SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation
The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X for interim financial information. All normal recurring adjustments considered necessary for a fair presentation have been included. Certain disclosures normally included in annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) have been omitted. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes contained in our transition report on Form 10-K for the period ended March 31, 2014. Unless the context otherwise requires, references to "Sprint," "we," "us," "our" and the "Company" mean Sprint Corporation and its consolidated subsidiaries for all periods presented, inclusive of Successor and Predecessor periods (each as defined below), and references to "Sprint Communications" are to Sprint Communications, Inc. and its consolidated subsidiaries.
On July 10, 2013 (SoftBank Merger Date), SoftBank Corp. and certain of its wholly-owned subsidiaries (together, "SoftBank") completed the merger (SoftBank Merger) with Sprint Nextel Corporation (Sprint Nextel) contemplated by the Agreement and Plan of Merger, dated as of October 15, 2012 (as amended, the Merger Agreement), and the Bond Purchase Agreement, dated as of October 15, 2012 (as amended, the Bond Agreement). As a result of the SoftBank Merger, Starburst II, Inc. (Starburst II) became the parent company of Sprint Nextel. Immediately thereafter, Starburst II changed its name to Sprint Corporation and Sprint Nextel changed its name to Sprint Communications, Inc. In connection with the change of control, as a result of the SoftBank Merger, Sprint Communications' assets and liabilities were adjusted to fair value on the closing date of the SoftBank Merger. The consolidated financial statements distinguish between the predecessor period (Predecessor) relating to Sprint Communications for periods prior to the SoftBank Merger and the successor period (Successor) relating to Sprint Corporation, formerly known as Starburst II, for periods subsequent to the incorporation of Starburst II on October 5, 2012. The Successor financial information represents the activity and accounts of Sprint Corporation, which includes the activity and accounts of Starburst II prior to the close of the SoftBank Merger on July 10, 2013 and Sprint Communications, inclusive of the consolidation of Clearwire Corporation and its wholly-owned subsidiary Clearwire Communications LLC (together, "Clearwire"), prospectively following completion of the SoftBank Merger, beginning on July 11, 2013. The accounts and operating activity of Starburst II prior to the close of the SoftBank Merger primarily related to merger expenses that were incurred in connection with the SoftBank Merger (recognized in selling, general and administrative expense) and interest related to the $3.1 billion convertible bond (Bond) Sprint Communications, Inc. issued to Starburst II. The Predecessor financial information represents the historical basis of presentation for Sprint Communications for the 101-day period ended July 10, 2013 prior to the SoftBank Merger. As a result of the valuation of assets acquired and liabilities assumed at fair value at the time of the SoftBank Merger, the financial statements for the Successor period are presented on a measurement basis different than the Predecessor period (Sprint Communications historical cost) and are, therefore, not comparable. In addition, in order to align with SoftBank’s reporting schedule, our Board of Directors approved a change in fiscal year end to March 31, effective March 31, 2014. References herein to fiscal year 2014 refer to the twelve-month period ending March 31, 2015. See Note 3. Significant Transactions for additional information regarding the SoftBank Merger.
On July 9, 2013 (Clearwire Acquisition Date), Sprint Communications completed the acquisition of the remaining equity interests in Clearwire that it did not already own for approximately $3.5 billion, net of cash acquired, or $5.00 per share (Clearwire Acquisition). The consideration paid was allocated to assets acquired and liabilities assumed based on their estimated fair values at the time of the Clearwire Acquisition. The effects of the Clearwire Acquisition are included in the Predecessor period financial information and are therefore included in the allocation of the consideration transferred at the closing date of the SoftBank Merger.

The preparation of the unaudited interim consolidated financial statements requires management of the Company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements. These estimates are inherently subject to judgment and actual results could differ.

Certain prior period amounts have been reclassified to conform to the current period presentation.

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Change in Estimate
When estimating the value of returned inventory, we evaluate many factors and obtain information to support the estimated value of used devices and the useful lives. Recently, we have observed sustained value and extended useful lives for handsets leading to an increase in the estimated value for returned inventory. As a result, we revised our methodology and assumptions used in estimating the value for returned handsets during the quarter ended December 31, 2014.
The change in estimate was accounted for on a prospective basis effective October 1, 2014. The effect of the change in estimate, which was included in "Cost of services and products" in our consolidated statements of comprehensive loss, reduced our operating loss by approximately $100 million, or $0.03 per basic and diluted share, for both the three and nine-month periods ended December 31, 2014. In addition, this change resulted in an increase to "Device and accessory inventory" on the consolidated balance sheet of approximately $100 million at December 31, 2014.

Note 2. New Accounting Pronouncements
In April 2014, the Financial Accounting Standards Board (FASB) issued authoritative guidance regarding Reporting of Discontinued Operations and Disclosures of Disposals of Components of an Entity, which changes the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. The updated guidance defines discontinued operations as a disposal of a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has, or will have, a major effect on an entity’s operations and financial results. Additionally, the disclosure requirements for discontinued operations were expanded and new disclosures for individually significant dispositions that do not qualify as discontinued operations are required. The guidance is effective prospectively for fiscal years and interim reporting periods within those years beginning after December 15, 2014, with early adoption permitted for transactions that have not been reported in financial statements previously issued or available for issuance. The standard will be effective for the Company's fiscal year beginning April 1, 2015 and will be applied to relevant future transactions.
In May 2014, the FASB issued new authoritative literature, Revenue from Contracts with Customers. The issuance is part of a joint effort by the FASB and the International Accounting Standards Board (IASB) to enhance financial reporting by creating common revenue recognition guidance for U.S. GAAP and International Financial Reporting Standards and, thereby, improving the consistency of requirements, comparability of practices and usefulness of disclosures. The new standard will supersede much of the existing authoritative literature for revenue recognition. The standard and related amendments will be effective for the Company for its annual reporting period beginning April 1, 2017, including interim periods within that reporting period. Early application is not permitted. Entities are allowed to transition to the new standard by either retrospective application or recognizing the cumulative effect. The Company is currently evaluating the newly issued guidance, including which transition approach will be applied and the estimated impact it will have on our consolidated financial statements.
In June 2014, the FASB issued authoritative guidance regarding Compensation - Stock Compensation, which provides guidance on how to treat performance targets that can be achieved after the requisite service period. The updated guidance requires that a performance target that affects vesting and could be achieved after the requisite service period be treated as a performance condition and accounted for under current guidance as opposed to a nonvesting condition that would impact the grant-date fair value of the award. The guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015 with early adoption permitted. Entities may apply the amendments either (i) prospectively to all awards granted or modified after the effective date; or (ii) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter with the cumulative effect as

an adjustment to the opening retained earnings balance as of the beginning of the earliest annual period presented. The Company does not expect the adoption of this guidance to have a material effect on our consolidated financial statements.

In August 2014, the FASB issued authoritative guidance regarding Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern, which requires management to assess an entity’s ability to continue as a going concern and to provide related footnote disclosures in certain circumstances. The updated guidance requires management to perform interim and annual assessments on whether there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity’s ability to continue as a going concern within one year after the date that the financial

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

statements are issued and to provide related disclosures, if required. The standard will be effective for the Company’s fiscal year ending March 31, 2017, although early adoption is permitted. The Company does not expect the adoption of this guidance to have a material effect on our consolidated financial statements.
In January 2015, the FASB issued authoritative guidance on Extraordinary and Unusual Items, eliminating the concept of extraordinary items. The issuance is part of the FASB’s initiative to reduce complexity in accounting standards. Under the current guidance, an entity is required to separately classify, present and disclose events and transactions that meet the criteria for extraordinary classification. Under the new guidance, reporting entities will no longer be required to consider whether an underlying event or transaction is extraordinary, however, presentation and disclosure guidance for items that are unusual in nature or occur infrequently was retained and expanded to include items that are both unusual in nature and infrequently occurring. The amendments are effective for the Company’s fiscal year beginning April 1, 2016, although early adoption is permitted if applied from the beginning of a fiscal year. The Company does not expect the adoption of this guidance to have a material effect on our consolidated financial statements.

Note 3. Significant Transactions
Acquisition of Remaining Interest in Clearwire
On July 9, 2013, Sprint Communications completed the Clearwire Acquisition. The cash consideration paid totaled approximately $3.5 billion, net of cash acquired of $198 million. Approximately $125 million of the cash consideration was accrued as "Accrued expenses and other current liabilities" on the consolidated balance sheet for dissenting shares relating to stockholders who exercised their appraisal rights.
The fair value of consideration, which is measured at the estimated fair value of each element of consideration transferred as of the Clearwire Acquisition Date, was determined as the sum of (a) approximately $3.7 billion of cash transferred to Clearwire stockholders, which included $125 million of cash relating to dissenting shares, (b) approximately $3.3 billion representing the estimated fair value of Clearwire shares held by Sprint Communications immediately preceding the acquisition and (c) approximately $59 million of share-based payment awards (replacement awards) exchanged for awards held by Clearwire employees.
Purchase Price Allocation
The consideration transferred has been allocated to assets acquired and liabilities assumed based on their estimated fair values at the time of the Clearwire Acquisition. The allocation of consideration transferred was based on management's judgment after evaluating several factors, including a valuation assessment. Management finalized its purchase price allocation during the quarter ended June 30, 2014. Adjustments made since the initial purchase price allocation decreased recorded goodwill by approximately $269 million and were primarily attributable to a reduction of approximately $270 million made to deferred tax liabilities as a result of additional analysis. The remaining adjustments were insignificant.
The following table summarizes the purchase price allocation of consideration in the Clearwire Acquisition:

Purchase Price Allocation (in millions):		
Current assets	$778	
Property, plant and equipment	1,245	
Identifiable intangibles	12,870	
Goodwill	437	
Other assets	25	
Current liabilities	(1,070	)
Long-term debt	(4,288	)

Deferred tax liabilities	(2,130)
Other liabilities	(876)
Net assets acquired	$6,991

The excess of the consideration transferred over the estimated fair values of assets acquired and liabilities assumed was recorded as goodwill.

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

SoftBank Transaction
As discussed above, the SoftBank Merger was completed on July 10, 2013. Sprint Communications, Inc. stockholders received consideration in a combination of both cash and stock, subject to proration. Consideration paid in the SoftBank Merger was $14.1 billion, net of cash acquired of $2.5 billion, and the estimated fair value of the 22% interest in Sprint Corporation issued to the then existing stockholders of Sprint Communications, Inc.
In addition, pursuant to the Bond Agreement, on October 15, 2012, Sprint Communications, Inc. issued a Bond to Starburst II with a principal amount of $3.1 billion, interest rate of 1%, and maturity date of October 15, 2019, which was converted into 590,476,190 shares of Sprint Communications, Inc. common stock at $5.25 per share immediately prior to the close of the SoftBank Merger. As a result of the completion of the SoftBank Merger and subsequent open market stock purchases, SoftBank owned approximately 80% of the outstanding voting common stock of Sprint Corporation as of December 31, 2014. Other Sprint stockholders owned the remaining approximately 20% as of December 31, 2014.
Consideration Transferred and Investments by SoftBank
The fair value of consideration transferred, which is measured at the estimated fair value of each element of consideration transferred as of the SoftBank Merger Date, was determined as the sum of (a) approximately $16.6 billion of cash transferred to Sprint Communications, Inc. stockholders, (b) approximately $5.3 billion representing shares of Sprint issued to Sprint Communications, Inc. stockholders and (c) approximately $193 million of share-based payment awards (replacement awards) exchanged for awards held by Sprint employees.
Additionally, SoftBank invested approximately $5.0 billion of capital contributions in Sprint. The fair value of the investments by SoftBank was determined based on the cash transferred, including $3.1 billion to purchase the Bond and $1.9 billion at the close of the SoftBank Merger.
Purchase Price Allocation
The consideration transferred has been allocated to assets acquired and liabilities assumed based on their estimated fair values as of the SoftBank Merger Date, inclusive of the Clearwire Acquisition described above. The excess of the consideration transferred over the estimated fair values of assets acquired and liabilities assumed was recorded as goodwill. Goodwill resulting from the SoftBank Merger is allocated to the Wireless segment. The allocation of consideration transferred was based on management's judgment after evaluating several factors, including a valuation assessment. Management finalized its purchase price allocation during the quarter ended June 30, 2014. Adjustments made since the initial purchase price allocation decreased recorded goodwill by approximately $476 million. Indefinite-lived intangible assets increased by approximately $300 million due to additional analyses performed by management during the quarter ended December 31, 2013 and the quarter ended June 30, 2014 related to the value assigned to certain Federal Communications Commission (FCC) licenses. The remainder of the decrease was due to insignificant changes in various accounts.
The following table summarizes the purchase price allocation of consideration transferred:

Purchase Price Allocation (in millions):	
Current assets	$8,576
Investments	133
Property, plant and equipment	14,558
Identifiable intangibles	50,672
Goodwill	6,343
Other assets	244
Current liabilities	(10,623)
Long-term debt	(29,481)

Deferred tax liabilities	(14,256)
Other liabilities	(3,989)

Conversion of Bond	3,100
Net assets acquired, after conversion of the Bond	$25,277

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Accounts Receivable Facility

Transaction Overview

On May 16, 2014, certain wholly-owned subsidiaries of Sprint entered into a two-year committed facility (Receivables Facility) to sell certain accounts receivable (the Receivables) on a revolving basis, subject to a maximum funding limit of $1.3 billion. The actual amount available to draw upon varies based on eligible receivables as defined in the agreement, therefore, the amount available to withdraw will vary. In connection with the Receivables Facility, Sprint formed wholly-owned subsidiaries that are bankruptcy-remote special purpose entities (SPEs). Pursuant to the Receivables Facility, certain Sprint subsidiaries (Originators) will transfer selected Receivables to the SPEs. The SPEs will then sell the Receivables to a bank agent on behalf of unaffiliated multi-seller asset-backed commercial paper conduits (Conduits) or their sponsoring banks. Sales of eligible Receivables to the Conduits may occur daily and are settled on a monthly basis. Sprint pays a fee for the drawn and undrawn portions of the Receivables Facility, respectively. The Receivables primarily consist of wireless service charges currently due from subscribers and are short-term in nature. A subsidiary of Sprint will service the Receivables in exchange for a monthly servicing fee, and Sprint guarantees the performance of obligations of the servicer and the Originators under the Receivables Facility. As of December 31, 2014, Sprint had not sold any Receivables to the Conduits and the amount available under the Receivables Facility was $1.0 billion.

Receivables sold will be treated as a sale for accounting purposes. The expected accounting impacts include the derecognition of Receivables sold by the SPEs to the Conduits, recognition of cash received in exchange for the sale and recognition at fair value of a receivable due to Sprint from the Conduits for the difference between the Receivables sold and the cash received, less estimated fees and other items.

Each SPE’s sole business consists of the purchase or acceptance through capital contributions of the Receivables from the Originators and the subsequent retransfer of, or granting of a security interest in, such Receivables to the bank agent under the Receivables Facility. In addition, each SPE is a separate legal entity with its own separate creditors who will be entitled, upon its liquidation, to be satisfied out of the SPE’s assets prior to any assets or value in the SPE becoming available to the Originators or Sprint, and the assets of the SPE are not available to pay creditors of Sprint or any of its affiliates (other than any other SPE).

Variable Interest Entity

Sprint determined the Conduits are considered variable interest entities (VIEs) because they lack sufficient equity to finance their activities. Sprint's interests in the Receivables purchased by the Conduits, which are comprised of the net receivables due to Sprint, are not considered variable interests because they are in assets which represent less than 50% of the total activity of the Conduits.

Note 4. Installment Receivables

Certain subscribers have the option to purchase devices in installments over a 24-month period. The carrying value of installment receivables approximates fair value because the receivables are recorded at their present value, net of the deferred interest and allowance for credit losses. At the time of sale, we impute the interest on the installment receivable and record it as a reduction to equipment revenue and as a reduction to the face amount of the related receivable. Interest income is recognized over the term of the installment contract as operating revenue. Short-term installment receivables are recorded in "Accounts and notes receivable, net" and long-term installment receivables are recorded in "Other assets" in the consolidated balance sheets.

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes the installment receivables:

	Successor	
	December 31, 2014	March 31, 2014
	(in millions)	
Installment receivables, gross	$1,790	$740
Deferred interest	(153)	(77)
Installment receivables, net of deferred interest	1,637	663
Allowance for credit losses	(166)	(47)
Installment receivables, net	$1,471	$616
Classified on the consolidated balance sheets as:		
Accounts and notes receivable, net	$1,012	$299
Other assets	459	317
Installment receivables, net	$1,471	$616

We categorize our installment receivables as prime and subprime based upon subscriber credit profiles and as unbilled, billed-current and billed-past due based upon the age of the receivable. We use proprietary scoring systems that measure the credit quality of our receivables using several factors, such as credit bureau information, subscriber credit risk scores and service plan characteristics. Payment history is subsequently monitored to further evaluate credit profiles. Prime subscriber receivables are those with lower delinquency risk and subprime subscriber receivables are those with higher delinquency risk. Subscribers within the subprime category may be required to pay a down payment on their device and accessory purchases. Installment receivables for which invoices have not yet been generated for the customer are considered unbilled. Installment receivables for which invoices have been generated but which are not past the contractual due date are considered billed - current. Installment receivables for which invoices have been generated and the payment is approximately ten days past the contractual due date are considered billed - past due. Account balances are written-off if collection efforts were unsuccessful and future collection is unlikely based on the length of time from the day accounts become past due.
The balance and aging of installment receivables on a gross basis by credit category were as follows:

	Successor					
	December 31, 2014			March 31, 2014		
	Prime	Subprime	Total	Prime	Subprime	Total
	(in millions)					
Unbilled	$1,296	$369	$1,665	$466	$242	$708
Billed - current	60	22	82	16	9	25
Billed - past due	23	20	43	5	2	7
Installment receivables, gross	$1,379	$411	$1,790	$487	$253	$740

Activity in the deferred interest and allowance for credit losses for the installment receivables for the nine-month period ended December 31, 2014 was as follows:

	Successor	
	Nine Months Ended December	Three Months Ended March 31,

	31, 2014	2014
	(in millions)	
Deferred interest and allowance for credit losses, beginning of period	$124	$13
Bad debt expense	303	44
Write-offs, net of recoveries	(184)	—
Change in deferred interest on short-term and long-term installment receivables	76	67
Deferred interest and allowance for credit losses, end of period	$319	$124

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 5. Financial Instruments
Cash and cash equivalents, accounts and notes receivable, and accounts payable are carried at cost, which approximates fair value. Short-term investments (consisting primarily of commercial paper), totaling approximately $254 million and $1.2 billion as of the Successor periods ended December 31, 2014 and March 31, 2014, respectively, are recorded at amortized cost, and the respective carrying amounts approximate fair value. The fair value of marketable equity securities totaling $43 million and $50 million as of the Successor periods ended December 31, 2014 and March 31, 2014, respectively, are measured on a recurring basis using quoted prices in active markets. The estimated fair value of the majority of our current and long-term debt, excluding our credit facilities, is determined based on quoted prices in active markets or by using other observable inputs that are derived principally from, or corroborated by, observable market data.
The following table presents carrying amounts and estimated fair values of current and long-term debt:

	Successor				
	Carrying amount at December 31, 2014	Estimated Fair Value Using Input Type			
		Quoted prices in active markets	Observable	Unobservable	Total estimated fair value
	(in millions)				
Current and long-term debt	$32,038	$25,215	$4,870	$1,435	$31,520

	Successor				
	Carrying amount at March 31, 2014	Estimated Fair Value Using Input Type			
		Quoted prices in active markets	Observable	Unobservable	Total estimated fair value
	(in millions)				
Current and long-term debt	$32,277	$27,516	$5,421	$1,262	$34,199

Note 6. Property, Plant and Equipment
Property, plant and equipment consists primarily of network equipment, leased devices, and other long-lived assets used to provide service to our subscribers. The following table presents the components of property, plant and equipment and the related accumulated depreciation:

	Successor	
	December 31, 2014	March 31, 2014
	(in millions)	
Land	$266	$265
Network equipment, site costs and related software	17,317	14,902
Buildings and improvements	744	745
Non-network internal use software, office equipment, leased devices and other	2,025	866
Construction in progress	2,956	1,970
Less: accumulated depreciation	(4,455)	(2,449)
Property, plant and equipment, net	$18,853	$16,299

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

In September 2014, Sprint introduced a leasing program, whereby qualified subscribers can lease a device for a contractual period of time. At the end of the lease term, the subscriber has the option to turn in their device, continue leasing their device, or purchase the device. As of December 31, 2014, our device leases were all classified as operating leases. At lease inception, the devices leased through Sprint retail stores are reclassified from inventory to property, plant and equipment. For those devices leased through indirect channels, Sprint will purchase the device to be leased from the retailer at lease inception. The devices are then depreciated to their estimated residual value and equipment revenue is recognized ratably, both over the term of the lease. The following table presents leased devices and the related accumulated depreciation:

	Successor	
	December 31, 2014	March 31, 2014
	(in millions)	
Leased devices	$993	$—
Less: accumulated depreciation	(55)	—
Leased devices, net	$938	$—

Excluding leased devices, there were non-cash additions to property, plant and equipment of $695 million and $30 million during the nine-month periods ended December 31, 2014 and 2013, respectively, which represents property, plant and equipment owned but for which there were outstanding amounts included in “Accounts payable” or “Accrued expenses and other current liabilities” as of the respective balance sheet date. During the nine-month period ended December 31, 2014 there were non-cash additions to leased devices of approximately $850 million along with a corresponding decrease in "Device and accessory inventory" of approximately $700 million and a corresponding increase in "Accounts payable" of approximately $150 million for devices purchased from indirect dealers that were leased to our subscribers.

Assessment of Impairment

During the quarter ended December 31, 2014, we tested the recoverability of the Wireline long-lived assets due to continued declines in our Wireline segment earnings and our current forecast that projects continued losses in future periods. As a result of the test, we recorded an impairment loss of $233 million, which is included in “Impairments” in our consolidated statements of comprehensive loss, to reduce the carrying value of the Wireline asset group, which includes the Wireline long-lived assets, to its estimated fair value of $918 million as of December 31, 2014. The fair value of the Wireline long-lived assets was estimated using a market approach, which included significant unobservable inputs including liquidation curves, useful life assumptions, and scrap values. As the assumptions are largely unobservable, the estimate of fair value is considered to be unobservable within the fair value hierarchy.

Note 7. Intangible Assets

Indefinite-Lived Intangible Assets

Our indefinite-lived intangible assets consist of FCC licenses, which were acquired primarily through FCC auctions and business combinations, certain of our trademarks, and goodwill. At December 31, 2014, we held 1.9 GHz, 800 MHz and 2.5 GHz FCC licenses authorizing the use of radio frequency spectrum to deploy our wireless services. As long as the Company acts within the requirements and constraints of the regulatory authorities, the renewal and extension of these licenses is reasonably certain at minimal cost. Accordingly, we have concluded that FCC licenses are indefinite-lived intangible assets. Goodwill represents the excess of consideration paid over the estimated fair value of net tangible and identifiable intangible assets acquired in business combinations (see Note 3. Significant Transactions).

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

During the quarter ended June 30, 2014, the Company entered into definitive agreements with various counterparties to sell certain FCC licenses held by its Wireless segment. During the quarter ended September 30, 2014, an agreement totaling $100 million received regulatory approval and was settled. As of December 31, 2014, the carrying value of FCC licenses still pending regulatory approval that was reclassified from FCC licenses into held for sale was approximately $200 million and is included within "Prepaid expenses and other current assets" on the consolidated balance sheets. In January 2015, we received regulatory approval and the transactions pending as of December 31, 2014 were settled. These transactions did not have a material impact on the Company's consolidated results of operations.

	Successor March 31, 2014	Net Reductions		December 31, 2014
	(in millions)			
FCC licenses	$36,043	$(136	)	$35,907
Trademarks	5,935	(1,900	) (1)	4,035
Goodwill	6,383	(40	) (2)	6,343
	$48,361	$(2,076	)	$46,285

(1) Net reduction to trademarks for the Successor nine-month period ended December 31, 2014 of approximately $1.9 billion was related to the impairment of the Sprint trade name. See discussion below.

(2) Net reduction to goodwill for the Successor nine-month period ended December 31, 2014 of approximately $40 million was the result of purchase price allocation adjustments, which consisted of a $44 million decrease associated with the SoftBank Merger and a $4 million increase associated with the Clearwire Acquisition.

Assessment of Impairment

Our annual impairment testing date for goodwill and indefinite-lived intangible assets is January 1 of each year; however, we test for impairment between our annual tests if an event occurs or circumstances change that indicate that the asset may be impaired, or in the case of goodwill, that the fair value of the reporting unit is below its carrying amount. Since the SoftBank Merger Date, actual results and expectations of net postpaid handset subscriber additions have been lower than the forecasts used to allocate the purchase price to the assets acquired and liabilities assumed. During the quarter ended December 31, 2014, the stock price and our related market capitalization decreased significantly and our credit rating was downgraded by one of the ratings service providers. We also updated our long-term forecasted cash flows for the Company, including for the Wireless reporting unit, during the fourth quarter. This update considered current economic conditions and trends, estimated future operating results, our views of growth rates, anticipated future economic and regulatory conditions, future cost savings initiatives and the availability of the necessary network infrastructure, handsets and other devices. Based on these events and changes in circumstances, we determined that recoverability of the carrying amount of goodwill and the Sprint trade name should be evaluated for impairment.

The impairment test for an indefinite-lived intangible asset consists of a comparison of the fair value of the asset to its carrying amount. If the carrying amount exceeds its fair value, an impairment loss is recognized equal to that excess. We estimated the fair value of the Sprint trade name assigned to the Wireless segment using the relief-from-royalty method, which uses several significant assumptions, including management projections of future revenue, a royalty rate, a long-term growth rate, and a discount rate. As these assumptions are largely unobservable, the estimate of fair value is considered to be unobservable within the fair value hierarchy. The significant unobservable inputs included projected revenues with annual growth rates, a royalty rate, a growth rate of 1.5% in the terminal year and a discount

rate of 16%. The carrying value of the Sprint trade name exceeded its estimated fair value of $3.3 billion. Accordingly, during the quarter ended December 31, 2014 we recorded an impairment loss of $1.9 billion, which is included in “Impairments” in our consolidated statements of comprehensive loss.

The analysis of potential impairment of goodwill requires a two-step approach. The first step of the goodwill impairment test, used to identify potential impairment, compares the fair value of a reporting unit with its carrying amount, including goodwill. We estimated the fair value of the Wireless reporting unit using both discounted cash flow and market-based valuation models. The determination of the fair value of the reporting unit requires significant estimates and assumptions, including significant unobservable inputs. The key inputs include, but are not limited to, a discount rate of 8%, a terminal growth rate of 1.5%, management’s internal forecasts which include numerous assumptions such as share of

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

industry gross additions, churn, mix of plans, rate changes, expenses, EBITDA margins, and capital expenditures, among others. We compared the estimated fair value to the carrying amount of the Wireless reporting unit and concluded that the second step of a goodwill impairment test was not required because the estimated fair value exceeded the carrying amount.
The determination of fair value requires considerable judgment and is highly sensitive to changes in underlying assumptions. Consequently, there can be no assurance that the estimates and assumptions made for the purposes of the goodwill and Sprint trade name impairment tests will prove to be an accurate prediction of the future. Continued, sustained declines in the Company’s operating results, future forecasted cash flows, growth rates and other assumptions, as well as significant, sustained declines in the Company’s stock price and related market capitalization could impact the underlying key assumptions and our estimated fair values, potentially leading to a future material impairment of goodwill or other indefinite-lived intangible assets.
Intangible Assets Subject to Amortization
Customer relationships are amortized using the sum-of-the-months' digits method, while all other definite-lived intangible assets are amortized using the straight line method over the estimated useful lives of the respective assets. We reduce the gross carrying value and associated accumulated amortization when specified intangible assets become fully amortized. Amortization expense related to favorable spectrum and tower leases is recognized in cost of services.

		Successor					
		December 31, 2014			March 31, 2014		
	Useful Lives	Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
		(in millions)					
Customer relationships	4 to 8 years	$6,923	$ (2,438)	$4,485	$6,923	$ (1,289)	$5,634
Other intangible assets:							
Favorable spectrum leases	23 years	884	(61)	823	884	(30)	854
Favorable tower leases	3 to 7 years	589	(161)	428	589	(80)	509
Trademarks	34 years	520	(23)	497	520	(12)	508
Other	4 to 10 years	70	(15)	55	60	(7)	53
Total other intangible assets		2,063	(260)	1,803	2,053	(129)	1,924
Total definite-lived intangible assets		$8,986	$ (2,698)	$6,288	$8,976	$ (1,418)	$7,558

Note 8. Accounts Payable
Accounts payable at December 31, 2014 and March 31, 2014 include liabilities in the amounts of $85 million and $91 million, respectively, for checks issued in excess of associated bank balances but not yet presented for collection.

(1) Notes of Clearwire Communications LLC are also direct obligations of Clearwire Finance, Inc. and are guaranteed by certain Clearwire subsidiaries.

As of December 31, 2014, Sprint Corporation, the parent corporation, had $9.0 billion in principal amount of senior notes outstanding. In addition, as of December 31, 2014, the outstanding principal amount of senior notes issued by Sprint Communications, Inc. and Sprint Capital Corporation, guaranteed notes issued by Sprint Communications, Inc., exchangeable notes issued by Clearwire Communications LLC, the EDC agreement, and the EKN secured equipment credit facility, totaling $21.5 billion in principal amount of our long-term debt issued by 100% owned subsidiaries, was fully and unconditionally guaranteed by Sprint Corporation. The indentures and financing arrangements governing certain of our subsidiaries' debt contain provisions that limit cash dividend payments on subsidiary common stock. Except in the case of secured notes issued by Clearwire Communications LLC, the transfer of cash from subsidiaries to the parent corporation generally is not restricted.

Cash interest payments, net of amounts capitalized of $41 million and $30 million, totaled $1.8 billion and $1.0 billion during the Successor nine-month periods ended December 31, 2014 and 2013, respectively. Cash interest payments,

net of amounts capitalized of $14 million, totaled $509 million during the Predecessor 101-day period ended July 10, 2013, respectively.

Notes

As of December 31, 2014, our outstanding notes consisted of senior notes, guaranteed notes, and exchangeable notes, all of which are unsecured, as well as secured notes of Clearwire Communications LLC, which are secured solely by assets of Clearwire Communications LLC and certain of its subsidiaries. Cash interest on all of the notes is generally payable

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

semi-annually in arrears. As of December 31, 2014, approximately $28.6 billion aggregate principal amount of the notes was redeemable at the Company's discretion at the then-applicable redemption prices plus accrued interest.
As of December 31, 2014, approximately $20.1 billion aggregate principal amount of our senior notes and guaranteed notes provide holders with the right to require us to repurchase the notes if a change of control triggering event (as defined in the applicable indentures and supplemental indentures) occurs. As of December 31, 2014, approximately $300 million aggregate principal amount of Clearwire Communications LLC notes provide holders with the right to require us to repurchase the notes if a change of control occurs (as defined in the applicable indentures and supplemental indentures). If we are required to make such a change of control offer, we will offer a cash payment equal to 101% of the aggregate principal amount of notes repurchased plus accrued and unpaid interest.
Upon the close of the Clearwire Acquisition, the Clearwire Communications, LLC 8.25% Exchangeable Notes due 2040 became exchangeable at any time, at the holder’s option, for a fixed amount of cash equal to $706.21 for each $1,000 principal amount of notes surrendered. As a result, $444 million, which is the total cash consideration payable upon an exchange of all $629 million principal amount of notes outstanding, is now classified as a current debt obligation. The remaining carrying value of these notes is classified as a long-term debt obligation.
Debt retirements
On May 1, 2014, the Company retired the remaining $181 million in principal amount upon maturity of its outstanding iPCS, Inc. Second Lien Secured Floating Rate Notes due 2014 plus accrued and unpaid interest.
Credit Facilities
Bank credit facility
The Company has a $3.3 billion unsecured revolving bank credit facility that expires in February 2018. Borrowings under the revolving bank credit facility bear interest at a rate equal to the London Interbank Offered Rate (LIBOR) plus a spread that varies depending on the Company’s credit ratings. As of December 31, 2014, $500 million in letters of credit were outstanding under this credit facility, including the letter of credit required by the Report and Order (see Note 12. Commitments and Contingencies). As a result of the outstanding letters of credit, which directly reduce the availability of borrowings, the Company had $2.8 billion of borrowing capacity available under this facility as of December 31, 2014. In October 2014, we amended our revolving bank credit facility to, among other things, modify the required ratio (Leverage Ratio) of total indebtedness to trailing four quarters earnings before interest, taxes, depreciation and amortization and other non-recurring items, as defined by the credit facility (adjusted EBITDA), not to exceed 6.5 to 1.0 through the quarter ended December 31, 2015, 6.25 to 1.0 through the quarter ended December 31, 2016 and 6.0 to 1.0 each fiscal quarter ending thereafter through expiration of the facility. The amended facility allows us to reduce our total indebtedness for purposes of calculating the Leverage Ratio by subtracting from total indebtedness the amount of any cash contributed into a segregated reserve account, provided that, after such cash contribution, our cash remaining on hand for operations exceeds $2.0 billion. Upon transfer, the cash contribution will remain restricted until and to the extent it is no longer required for the Leverage Ratio to remain in compliance. The amendment also added Sprint Corporation as a guarantor of this credit facility.
The unsecured EDC agreement was amended in December 2014 to modify the Leverage Ratio to provide for terms similar to those of the revolving bank credit facility, as was amended in October 2014 mentioned above, as well as to add Sprint Corporation as guarantor. As part of the amendment to the EDC agreement, we increased our borrowing capacity by an additional $300 million due in 2019. As of December 31, 2014, the EDC agreement was fully drawn totaling $800 million. Under the terms of the EDC agreement, repayments of outstanding amounts cannot be re-drawn.
EKN secured equipment credit facility

The EKN secured equipment credit facility was amended in December 2014 to modify the terms and conditions as it relates to the Leverage Ratio to provide for terms similar to those of the revolving bank credit facility as was amended in October 2014 mentioned above, as well as to add Sprint Corporation as a guarantor. As of December 31, 2014, both tranches of the EKN secured equipment credit facility totaling $1.0 billion were fully drawn. We made a regularly scheduled principal repayment of $127 million in September 2014 and the balance outstanding at December 31, 2014 was $635 million. Under the terms of the EKN secured equipment credit facility, repayments of outstanding amounts cannot be re-drawn.

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Finnvera secured equipment credit facility
In December 2014, we and certain of our subsidiaries entered into a secured equipment credit facility insured by Finnvera plc (Finnvera), the Finnish export credit agency, with the ability to borrow up to $800 million, to finance network equipment-related purchases from Nokia Solutions and Networks US LLC, USA. The facility is divided into three consecutive tranches of varying size, with borrowings available through October 2017, contingent upon the amount of equipment-related purchases made by Sprint. Interest and fully-amortizing principal payments are due semi-annually, by tranche, beginning in March 2015 until June 2021. Although the facility was available for borrowing as of December 31, 2014, we had not yet drawn on the facility.
K-sure secured equipment credit facility
In December 2014, we and certain of our subsidiaries entered into a secured equipment credit facility insured by K-sure, the Korean export credit agency, with the ability to borrow up to $750 million, to finance network equipment-related purchases from Samsung Telecommunications America, LLC. The facility is divided into three consecutive tranches of varying size, and draws became available in January 2015 and will be available until May 2018 or until fully drawn, contingent upon the amount of equipment-related purchases by Sprint. Interest and fully-amortizing principal payments are due semi-annually by tranche beginning in June 2015 until December 2022.
Delcredere | Ducroire secured equipment credit facility
In December 2014, we and certain of our subsidiaries entered into a secured equipment credit facility insured by Delcredere | Ducroire (D/D), the Belgian export credit agency, with the ability to borrow up to $250 million, to finance network equipment-related purchases from Alcatel-Lucent USA Inc. The facility will be available to draw in early 2015 until December 2016. Interest and fully-amortizing principal payments are due semi-annually beginning in June 2015 until December 2021. The facility was not available to be drawn in December 2014.
Borrowings under the EKN, Finnvera, K-sure and D/D secured equipment credit facilities are each secured by liens on the respective equipment purchased pursuant to each of the facilities. Each of these facilities is fully and unconditionally guaranteed by both Sprint Communications, Inc. and Sprint Corporation. The covenants under each of the four secured equipment credit facilities are similar to one another and to the covenants of our revolving bank credit facility and EDC agreement.
Financing, Capital Lease and Other Obligations
We have approximately 3,000 cell sites that we sold and subsequently leased back. Terms extend through 2021, with renewal options for an additional 20 years. These cell sites continue to be reported as part of our property, plant and equipment due to our continued involvement with the property sold and the transaction is accounted for as a financing. Our capital lease and other obligations are primarily for the use of wireless network equipment.
Covenants
Certain indentures and financing arrangements governing our debt also require compliance with various covenants, including covenants that limit the ability of the Company and its subsidiaries to sell all or substantially all of its assets, limit the ability of the Company and its subsidiaries to incur indebtedness and liens, and require that we maintain certain financial ratios, each as defined by the terms of the indentures, supplemental indentures and financing arrangements.
As of December 31, 2014, the Company was in compliance with all restrictive and financial covenants associated with its borrowings. A default under any of our borrowings could trigger defaults under certain of our other debt obligations, which in turn could result in the maturities being accelerated.
Under our revolving bank credit facility and other finance agreements, we are currently restricted from paying cash dividends because our ratio of total indebtedness to adjusted EBITDA (each as defined in the applicable agreements) exceeds 2.5 to 1.0.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 10. Severance and Exit Costs

For the Successor three and nine-month periods ended December 31, 2014, we recognized lease exit costs primarily associated with facility closures as well as our network modernization plan and severance costs associated with reductions in our work force. In addition, we recognized access exit costs related to payments that will continue to be made under our backhaul access contracts for which we will no longer be receiving any economic benefit.

As a result of the United States Cellular (U.S. Cellular) asset acquisition, which closed in May 2013, we recorded a liability related to network shut-down costs for which we agreed to reimburse U.S. Cellular. During the quarter ended December 31, 2014, we identified favorable trends in actual costs and, as a result, we released some of the reserve resulting in a gain of approximately $41 million included in "Other, net" on the consolidated statements of comprehensive loss.

As a result of our network modernization and the completion of the significant transactions (see Note 3. Significant Transactions), we have begun to incur and, in the future expect to incur, additional exit costs related to the transition of our existing backhaul architecture to a replacement technology for our network and the efforts associated with the integration of our Significant Transactions, such as further evaluation of the future use of Clearwire cell sites, among other initiatives. These additional exit costs are expected to range between approximately $100 million to $200 million, of which the majority is expected to be incurred by March 31, 2016.

The following provides the activity in the severance and exit costs liability included in "Accounts payable," "Accrued expenses and other current liabilities" and "Other liabilities" within the consolidated balance sheets:

	Successor			
	March 31, 2014	Net (Benefit) Expense	Cash Payments and Other	December 31, 2014
	(in millions)			
Lease exit costs	$650	$(21) [1]	$(288)	$341
Severance costs	197	272 [2]	(242)	227
Access exit costs	124	41 [3]	(97)	68
	$971	$292	$(627)	$636

(1) In addition to the $41 million gain (Wireless only) related to U.S. Cellular recognized in both the Successor three and nine-month periods ended December 31, 2014, we recognized costs of $7 million ($6 million Wireless, $1 million Wireline) and $20 million ($19 million Wireless and $1 million Wireline), respectively.

(2) For the Successor three and nine-month periods ended December 31, 2014, we recognized costs of $3 million ($2 million Wireless, $1 million Wireline) and $272 million ($235 million Wireless, $37 million Wireline), respectively.

(3) For the Successor three and nine-month periods ended December 31, 2014, we recognized costs of $12 million (Wireless only) and $41 million ($36 million Wireless, $5 million Wireline), respectively.

Note 11. Income Taxes

The differences that caused our effective income tax rates to vary from the 35% U.S. federal statutory rate for income taxes were as follows:

	Successor	Predecessor
	Nine Months Ended	101 Days
	December 31,	Ended

	2014	2013	July 10, 2013
	(in millions)		
Income tax benefit (expense) at the federal statutory rate	$1,303	$632	$(367)
Effect of:			
State income taxes, net of federal income tax effect	96	47	(31)
Change in federal and state valuation allowance	(797)	(708)	(1,145)
Other, net	(1)	(15)	(20)
Income tax benefit (expense)	$601	$(44)	$(1,563)
Effective income tax rate	16.1 %	(2.4)%	149.1 %

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The realization of deferred tax assets, including net operating loss carryforwards, is dependent on the generation of future taxable income sufficient to realize the tax deductions, carryforwards and credits. However, our history of annual losses reduces our ability to rely on expectations of future income in evaluating the ability to realize our deferred tax assets. Valuation allowances on deferred tax assets are recognized if it is determined that it is more likely than not that the asset will not be realized. As a result, the Company recognized an increase in its valuation allowance of $797 million during the Successor nine-month period ended December 31, 2014 primarily attributable to the net increase in deferred tax assets related to the federal and state net operating loss carryforwards generated during the period offset by a $73 million decrease related to the planned disposition of certain FCC licenses. The planned disposition of the FCC licenses results in the ability to schedule the reversal of the temporary difference to generate future taxable income during the net operating loss carryforward period when evaluating the ability to realize our deferred tax assets. The Company recognized income tax expense to increase the valuation allowance by $708 million and $1.1 billion during the Successor nine-month period ended December 31, 2013 and Predecessor 101-day period ended July 10, 2013, respectively, on deferred tax assets primarily related to losses incurred during the period. We do not expect to record significant tax benefits on future net operating losses until our circumstances justify the recognition of such benefits.

Income tax benefit of $657 million and $601 million for the Successor three and nine-month periods ended December 31, 2014 is primarily attributable to recognition of a tax benefit on the $1.9 billion Sprint trade name impairment loss partially offset by tax expense on taxable temporary differences from the tax amortization of FCC licenses during the period. Income tax expense of $44 million for the Successor nine-month period ended December 31, 2013 is primarily attributable to taxable temporary differences from amortization of FCC licenses. Income tax expense of $1.6 billion for the Predecessor 101-day period ended July 10, 2013 is primarily attributable to taxable temporary differences from the $2.9 billion gain on the previously-held equity interests in Clearwire. The gain on the previously-held equity interests in Clearwire was principally attributable to the increase in the fair value of FCC licenses held by Clearwire. FCC licenses are amortized over 15 years for income tax purposes but, because these licenses have an indefinite life, they are not amortized for financial statement reporting purposes. These temporary differences result in net deferred income tax expense since they cannot be scheduled to reverse during the loss carryforward period.

As of December 31, 2014 and March 31, 2014, we maintained unrecognized tax benefits of $161 million and $160 million, respectively. Cash paid for income taxes, net was $36 million for the Successor nine-month period ended December 31, 2014 and insignificant for the Successor nine-month period ended December 31, 2013 as well as during the Predecessor 101-day period ended July 10, 2013.

Note 12. Commitments and Contingencies

Litigation, Claims and Assessments

In March 2009, a stockholder brought suit, Bennett v. Sprint Nextel Corp., in the U.S. District Court for the District of Kansas, alleging that Sprint Communications and three of its former officers violated Section 10(b) of the Exchange Act and Rule 10b-5 by failing adequately to disclose certain alleged operational difficulties subsequent to the Sprint-Nextel merger, and by purportedly issuing false and misleading statements regarding the write-down of goodwill. The plaintiff sought class action status for purchasers of Sprint Communications common stock from October 26, 2006 to February 27, 2008. On January 6, 2011, the Court denied the motion to dismiss. Subsequently, our motion to certify the January 6, 2011 order for an interlocutory appeal was denied. On March 27, 2014, the court certified a class including bondholders as well as stockholders. On April 11, 2014, we filed a petition to appeal that certification order to the Tenth Circuit Court of Appeals. The petition was denied on May 23, 2014. After mediation,

the parties have reached an agreement in principle to settle the matter, and the settlement amount is expected to be substantially paid by the Company's insurers. The proposed settlement is subject to court approval. We do not expect the resolution of this matter to have a material adverse effect on our financial position or results of operations.
In addition, five related stockholder derivative suits were filed against Sprint Communications and certain of its present and/or former officers and directors. The first, Murphy v. Forsee, was filed in state court in Kansas on April 8, 2009, was removed to federal court, and was stayed by the court pending resolution of the motion to dismiss the Bennett case; the second, Randolph v. Forsee, was filed on July 15, 2010 in state court in Kansas, was removed to federal court, and was remanded back to state court; the third, Ross-Williams v. Bennett, et al., was filed in state court in Kansas on February 1,

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2011; the fourth, Price v. Forsee, et al., was filed in state court in Kansas on April 15, 2011; and the fifth, Hartleib v. Forsee, et. al., was filed in federal court in Kansas on July 14, 2011. These cases are essentially stayed while the Bennett case is in the discovery phase. We do not expect the resolution of these matters to have a material adverse effect on our financial position or results of operations.

On April 19, 2012, the New York Attorney General filed a complaint alleging that Sprint Communications has fraudulently failed to collect and pay more than $100 million in New York sales taxes on receipts from its sale of wireless telephone services since July 2005. The complaint seeks recovery of triple damages as well as penalties and interest. Sprint Communications moved to dismiss the complaint on June 14, 2012. On July 1, 2013, the court entered an order denying the motion to dismiss in large part, although it did dismiss certain counts or parts of certain counts. Sprint Communications has appealed that order and the intermediate appellate court affirmed the order of the trial court. Our petition for leave to bring an interlocutory appeal to the highest court in New York was granted and briefing of that appeal was completed in January 2015. We believe the complaint is without merit and intend to continue to defend this matter vigorously. We do not expect the resolution of this matter to have a material adverse effect on our financial position or results of operations.

Eight related stockholder derivative suits have been filed against Sprint Communications and certain of its current and former officers and directors. Each suit alleges generally that the individual defendants breached their fiduciary duties to Sprint Communications and its stockholders by allegedly permitting, and failing to disclose, the actions alleged in the suit filed by the New York Attorney General. One suit, filed by the Louisiana Municipal Police Employees Retirement System, was dismissed by a federal court. Two suits were filed in state court in Johnson County, Kansas and one of those suits was dismissed as premature; and five suits are pending in federal court in Kansas. The remaining Kansas suits have been stayed. We do not expect the resolution of these matters to have a material adverse effect on our financial position or results of operations.

Sprint Communications, Inc. is also a defendant in a complaint filed by stockholders of Clearwire Corporation asserting claims for breach of fiduciary duty by Sprint Communications, and related claims and otherwise challenging the Clearwire Acquisition. ACP Master, LTD, et al. v. Sprint Nextel Corp., et al., was filed April 26, 2013, in Chancery Court in Delaware. Our motion to dismiss the suit was denied, and discovery has begun. Plaintiffs in the ACP Master, LTD suit have also filed suit requesting an appraisal of the fair value of their Clearwire stock, and discovery is proceeding in that case. Sprint Communications intends to defend the ACP Master, LTD cases vigorously, and, because they are still in the preliminary stage, we have not yet determined what effect the lawsuit will have, if any, on our financial position or results of operations.

Sprint is currently involved in numerous court actions alleging that Sprint is infringing various patents. Most of these cases effectively seek only monetary damages. A small number of these cases are brought by companies that sell products and seek injunctive relief as well. These cases have progressed to various degrees and a small number may go to trial if they are not otherwise resolved. Adverse resolution of these cases could require us to pay significant damages, cease certain activities, or cease selling the relevant products and services. In many circumstances, we would be indemnified for monetary losses that we incur with respect to the actions of our suppliers or service providers. We do not expect the resolution of these cases to have a material adverse effect on our financial position or results of operations.

In October 2013, the FCC Enforcement Bureau began to issue notices of apparent liability (NALs) to other Lifeline providers, imposing fines for intracarrier duplicate accounts identified by the government during its audit function. Those audits also identified a small percentage of potentially duplicative intracarrier accounts related to our Assurance Wireless business. No NAL has yet been issued with respect to Sprint and we do not know if one will be issued. Further, we are not able to reasonably estimate the amount of any claim for penalties that might be asserted.

However, based on the information currently available, if a claim is asserted by the FCC, Sprint does not believe that any amount ultimately paid would be material to the Company's results of operations or financial position.
Beginning in early 2012, a group of state attorneys general began an investigation into the practice of wireless carriers including on their bills charges for certain content from third party providers, particularly premium short message services, and the measures taken by carriers to ensure that such charges were appropriately authorized. Late in 2013, the Consumer Financial Protection Bureau (CFPB) also began a separate investigation into the issue, and the FCC began its own investigation in mid-2014. In July 2014, the Federal Trade Commission (FTC) brought suit against T-Mobile, alleging that it included unauthorized charges on its bills; in December 2014, T-Mobile entered into a settlement agreement with the FTC,

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FCC and state attorneys general. In October 2014, the FTC, FCC and states announced a settlement with AT&T regarding third-party billing issues. In December, 2014, the CFPB brought suit against Sprint regarding third-party billing issues. We believe that the suit is without merit, and do not expect any resolution of this suit or these investigations to be material to the Company's results of operations or financial position.

Various other suits, inquiries, proceedings and claims, either asserted or unasserted, including purported class actions typical for a large business enterprise and intellectual property matters, are possible or pending against us or our subsidiaries. If our interpretation of certain laws or regulations, including those related to various federal or state matters such as sales, use or property taxes, or other charges were found to be mistaken, it could result in payments by us. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial position or results of operations.

Spectrum Reconfiguration Obligations

In 2004, the FCC adopted a Report and Order that included new rules regarding interference in the 800 MHz band and a comprehensive plan to reconfigure the 800 MHz band. The Report and Order provides for the exchange of a portion of our 800 MHz FCC spectrum licenses, and requires us to fund the cost incurred by public safety systems and other incumbent licensees to reconfigure the 800 MHz spectrum band. Also, in exchange, we received licenses for 10 MHz of nationwide spectrum in the 1.9 GHz band.

The minimum cash obligation is $2.8 billion under the Report and Order. We are, however, obligated to pay the full amount of the costs relating to the reconfiguration plan, even if those costs exceed $2.8 billion. As required under the terms of the Report and Order, a letter of credit has been secured to provide assurance that funds will be available to pay the relocation costs of the incumbent users of the 800 MHz spectrum. Since the inception of the program, we have incurred payments of approximately $3.5 billion directly attributable to our performance under the Report and Order, including approximately $114 million during the Successor nine-month period ended December 31, 2014. When incurred, these costs are generally accounted for either as property, plant and equipment or as additions to FCC licenses. Although costs incurred through December 31, 2014 have exceeded $2.8 billion, not all of those costs have been reviewed and accepted as eligible by the transition administrator. During the Successor three-month period ended June 30, 2014, we received a cash payment of approximately $95 million, which represented a reimbursement of prior reconfiguration costs incurred by us that also benefited spectrum recently auctioned by the FCC. We do not expect any further reimbursements.

Completion of the 800 MHz band reconfiguration was initially required by June 26, 2008. The FCC continues to grant 800 MHz public safety licensees additional time to complete their band reconfigurations which, in turn, delays our access to some of our 800 MHz replacement channels. Accordingly, we will continue to transition to our 800 MHz replacement channels consistent with public safety licensees' reconfiguration progress. On May 24, 2012, the FCC revised its rules to authorize Sprint to deploy wireless broadband services, such as CDMA and LTE, on its 800 MHz spectrum, including channels that become available to Sprint upon completion of the 800 MHz band reconfiguration program. We anticipate that the continuing reconfiguration progress will be sufficient to support the 800 MHz portion of our network modernization. In January 2013, we submitted a Request for Declaratory Ruling to the FCC requesting two items: (i) that it declare that Sprint will not owe any anti-windfall payment to the US Treasury, because we have exceeded the $2.8 billion of required expenditures, and (ii) that the FCC remove the $850 million minimum for the letter of credit and allow further reductions based on quarterly estimates of remaining obligations. In September 2014, the FCC granted, in part, our request by authorizing our letter of credit to be reduced to $457 million, which was executed on October 6, 2014. An additional reduction was executed on December 22, 2014 reducing our letter of credit to $434 million and further quarterly reductions are allowed upon approval of any requests. In addition, it

directed the transition administrator to undertake an assessment of the anti-windfall calculation.

Guarantee Liabilities

Under certain of our wireless service plans, we offer an option to our subscribers to purchase, on a monthly basis, an annual trade-in right (the option). At the trade-in date, a subscriber who has elected to purchase a handset in an installment billing arrangement will receive a credit in the amount of the outstanding balance of the installment contract provided the subscriber trades-in an eligible used handset in good working condition and purchases a new handset from Sprint.

Table of Contents

Index for Notes to the Consolidated Financial Statements

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Additionally, the subscriber must have purchased the option for the 12 consecutive months preceding the trade-in. When a subscriber elects the option, the total estimated arrangement proceeds associated with the subscriber are reduced by the estimated fair value of current customer obligation of the fixed-price trade-in credit (guarantee liability) and the remaining proceeds are allocated amongst the other deliverables in the arrangement. The guarantee liability is estimated based on assumptions, including, but not limited to, the expected fair value of the used handset at trade-in, subscribers' estimated remaining balance of the remaining installment payments, and the probability and timing of the trade-in. When the subscriber elects to exercise the trade-in right, the difference between the outstanding balance of the installment receivable and the estimated fair value of the returned handset is recorded as a reduction of the guarantee liability. If the subscriber elects to stop purchasing the option prior to, or after, becoming eligible to exercise the trade-in right, we recognize the amount of the associated guarantee liability as operating revenue. At each reporting date, we reevaluate our estimate of the guarantee liability. If all subscribers who elected the option were to claim their benefit at the earliest contractual time of eligible trade-in, the maximum amount of the guarantee liability (i.e., the estimated unpaid balance of the subscribers' installment contracts) would be approximately $342 million at December 31, 2014. This amount is not an indication of the Company's expected loss exposure because it does not consider the expected fair value of the used handset, which is required to be returned to us in good working condition at trade-in, nor does it consider the probability and timing of trade-in. The total guarantee liabilities associated with the option, which are recorded in "Accrued expenses and other current liabilities" in the consolidated balance sheets, were immaterial for all periods presented.

Note 13. Per Share Data
Basic net loss per common share is calculated by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted net loss per common share adjusts basic net loss per common share, computed using the treasury stock method, for the effects of potentially dilutive common shares, if the effect is not antidilutive. Outstanding options and restricted stock units (exclusive of participating securities included in basic weighted average common shares outstanding) that had no effect on our computation of dilutive weighted average number of shares outstanding as their effect would have been antidilutive were approximately 78 million and 70 million as of the Successor periods ended December 31, 2014 and 2013, respectively, in addition to all 55 million shares issuable under the warrant held by SoftBank. The warrant was issued to SoftBank at the close of the SoftBank Merger and is exercisable at $5.25 per share at the option of SoftBank, in whole or in part, at any time on or prior to July 10, 2018. For the Predecessor 101-day period ended July 10, 2013, outstanding options and restricted stock units (exclusive of participating securities) that had no effect on our computation of dilutive weighted average number of shares outstanding as their effect would have been antidilutive were approximately 61 million, in addition to all 590 million shares issuable under the convertible bond issued by Sprint Communications to Starburst II in 2012.

Note 14. Segments
Sprint operates two reportable segments: Wireless and Wireline.

- Wireless primarily includes retail, wholesale, and affiliate revenue from a wide array of wireless voice and data transmission services and equipment revenue from the sale of wireless devices (handsets and tablets) and accessories in the U.S., Puerto Rico and the U.S. Virgin Islands.
- Wireline primarily includes revenue from domestic and international wireline voice and data communication services provided to other communications companies and targeted business and consumer subscribers, in addition to our Wireless segment.

We define segment earnings as wireless or wireline operating (loss) income before other segment expenses such as depreciation, amortization, severance, exit costs, goodwill impairments, asset impairments, and other items, if any, solely and directly attributable to the segment representing items of a non-recurring or unusual nature. Expense and income items excluded from segment earnings are managed at the corporate level. Transactions between segments are generally accounted for based on market rates, which we believe approximate fair value. The Company generally re-establishes these rates at the beginning of each fiscal year. Over the past several years, there has been an industry-wide trend of lower rates due to increased competition from other wireline and wireless communications companies as well as cable and Internet service providers.

---

(1) Inter-segment revenues consist primarily of wireline services provided to the Wireless segment for resale to, or use by, wireless subscribers.

(2) Impairments for the Successor three and nine-month periods ended December 31, 2014 consist of a $1.9 billion trade name impairment related to the Wireless segment and a $233 million impairment related to Wireline long-lived assets.

(3) Other, net for the Successor three and nine-month periods ended December 31, 2014 consists of $22 million and $333 million, respectively, of severance and exit costs. In addition, both the three and nine-month periods ended December 31, 2014 included $91 million for legal reserves related to various pending legal suits and proceedings and $59 million for a partial pension settlement, partially offset by a $41 million release of liability reserves associated with the May 2013 U.S. Cellular asset acquisition. Other, net for the Successor three-month period ended December 31, 2013 consists of $206 million of severance and exit costs, partially offset by $7 million of insurance reimbursement towards hurricane-related charges (included in our wireless segment and classified as a contra-expense in cost of services expense). Other, net for the Successor nine-month period ended December 31, 2013 consists of $309 million of severance and exit costs and $100 million of business combination fees paid to unrelated parties necessary for the transactions with SoftBank and Clearwire (included in our corporate segment and classified in our consolidated statements of comprehensive loss as selling, general and administrative

expenses), partially offset by $7 million of insurance reimbursement towards hurricane-related charges (included in our wireless segment and classified as a contra-expense in cost of services expense). Other, net for the 101-day period ended July 10, 2013 consists of severance and exit costs of $627 million and $53 million of business combination fees paid to unrelated parties in connection with the transactions with SoftBank and Clearwire (included in our corporate segment and classified in our consolidated statements of comprehensive loss as selling, general and administrative expenses).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Predecessor

Operating Revenues by Service and Products	Wireless	Wireline	Corporate, Other and Eliminations[1]	Consolidated
	(in millions)			
101 Days Ended July 10, 2013				
Wireless services	$7,996	$—	$ —	$ 7,996
Wireless equipment	894	—	—	894
Voice	—	419	(137)	282
Data	—	94	(47)	47
Internet	—	479	(53)	426
Other	146	16	2	164
Total net operating revenues	$9,036	$1,008	$ (235)	$ 9,809

(1) Revenues eliminated in consolidation consist primarily of wireline services provided to the Wireless segment for resale to or use by wireless subscribers.

Note 15. Related-Party Transactions
Clearwire Related-Party Transactions
Sprint's relationship with Clearwire, which is now a wholly-owned subsidiary of Sprint, includes agreements by which we resell wireless data services utilizing Clearwire's 4G network. In addition, Clearwire subscribers utilize the third generation (3G) Sprint network which provides dual-mode service to subscribers in those areas where access to Clearwire's 4G network is not available.
Immediately prior to the Clearwire Acquisition, Sprint Communications held approximately 50.1% of non-controlling voting interest and a 6.0% non-controlling economic interest in Clearwire Corporation as well as a 44.1% non-controlling economic interest in Clearwire Communications LLC for which the carrying value totaled $325 million. Prior to the close of the Clearwire Acquisition, we applied equity method accounting to the investment in Clearwire.
Equity in losses from Clearwire were $280 million for the Predecessor 100-day period ended July 9, 2013. The equity in losses from our investment in Clearwire consisted of our share of Clearwire's net loss and other adjustments, if any, such as non-cash impairment of our investment, gains or losses associated with the dilution of our ownership interest resulting from Clearwire's equity issuances, derivative losses associated with the change in fair value of the embedded derivative included in exchangeable notes between Clearwire and Sprint, and other items recognized by Clearwire Corporation that did not affect our economic interest. Sprint's equity in losses for the Predecessor 100-day period ended July 9, 2013, include a $65 million derivative loss associated with the change in fair value of the embedded derivative. Subsequent to the Clearwire Acquisition, Clearwire is consolidated as a wholly-owned subsidiary of Sprint. Cost of services and products included in our consolidated statements of comprehensive loss related to our agreement to purchase 4G services from Clearwire totaled $106 million for the Predecessor 100-day period ended July 9, 2013.
Summarized financial information for Clearwire for the 100-day period ended July 9, 2013, which preceded the Clearwire Acquisition, is as follows:

	100 Days Ended July 9, 2013 (in millions)
Revenues	$348
Operating expenses	(663)
Operating loss	$(315)
Net loss from continuing operations before non-controlling interests	$(447)

SoftBank Related-Party Transactions

In addition to agreements arising out of or relating to the SoftBank Merger, Sprint has entered into various other arrangements with SoftBank or its controlled affiliates (SoftBank Parties) or with third parties to which SoftBank Parties are

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

also parties, including for international wireless roaming, wireless and wireline call termination, real estate, device and accessory purchasing, and other services.

Specifically, we have arrangements with Brightstar US, Inc. (Brightstar), a wholly-owned subsidiary of SoftBank, whereby Brightstar provides supply chain and inventory management services to us in our indirect channels and whereby Sprint may sell new and used handsets and new accessories to Brightstar for its own purposes. The supply chain and inventory management agreement contemplates that Brightstar will purchase inventory from the original equipment manufacturers (OEMs) to sell directly to our indirect dealers. As compensation for these services, we remit per unit fees to Brightstar for each device sold to dealers or retailers in our indirect channels. Until Brightstar successfully negotiates contracts with, and procures credit from, our existing OEMs, Brightstar will purchase handset and accessory inventory from us in order to fulfill orders within our indirect channel. In October 2014, we provided a $1.0 billion credit line to Brightstar to facilitate certain of these arrangements. As a result, we are shifting our concentration of credit risk away from our indirect channel partners to Brightstar. Because Brightstar is a wholly-owned subsidiary of SoftBank, we expect SoftBank will provide the necessary support to ensure that Brightstar will fulfill its obligations to us under these agreements. However, we have no assurance that SoftBank will provide such support.

Amounts included in our consolidated financial statements associated with these arrangements with Brightstar were as follows:

Consolidated balance sheets:	Successor	
	December 31, 2014	March 31, 2014
	(in millions)	
Accounts receivable	$687	$—
Accounts payable	$49	$—

Consolidated statements of comprehensive loss:	Successor [(1)]	
	Three Months Ended December 31, 2014	Nine Months Ended December 31, 2014
	(in millions)	
Net operating revenues	$1,030	$1,149
Cost of services and products	$1,071	$1,165

(1) Amounts for all other reported periods were immaterial.

Additionally, we have arrangements with a wholly-owned subsidiary of Brightstar (Brightstar Subsidiary) to procure devices and accessories on our behalf with certain third-party vendors under existing purchase arrangements Sprint has with those vendors as well as new vendor purchase arrangements entered into by the Brightstar Subsidiary. The procurement services include placing orders, processing invoices, receiving payments from us, making payments to our suppliers on our behalf and reselling devices to us. As compensation, under the device arrangement we pay a portion of certain costs that Brightstar Subsidiary incurs plus a profit percentage. Under the accessory arrangement, we pay a percentage mark-up on the cost of accessory purchases. During the Successor three and nine-month periods ended December 31, 2014, we procured, through the Brightstar Subsidiary, approximately $1.9 billion and $4.6

billion, respectively, of device and accessory inventory, which was sold in direct and indirect channels for which we paid immaterial fees to the Brightstar Subsidiary. As of mid-December 2014, the Brightstar Subsidiary will no longer procure devices on our behalf.

Amounts included in our consolidated balance sheets associated with these arrangements with the Brightstar Subsidiary were as follows:

	Successor	
	December 31, 2014	March 31, 2014
	(in millions)	
Device and accessory inventory	$775	$266
Accounts payable	$795	$205

SPRINT CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 16. Benefit Plans
The Company provides a defined benefit pension plan and certain other postretirement benefits to certain employees. The Sprint Retirement Pension Plan (the Plan) provides for normal, early retirement, special early retirement, death and disability retirement, and deferred vested retirement upon meeting certain conditions. As of December 31, 2005, the accrual of additional benefits ceased for current Plan participants. The Company continues to make cash contributions to the Plan in an amount necessary to meet minimum funding requirements according to applicable benefit plan regulations.
In June 2014, the Company’s Board of Directors approved a plan amendment to the Plan to offer certain terminated participants, who had not begun to receive Plan benefits, the opportunity to voluntarily elect to receive their benefits as an immediate lump sum distribution. Upon expiration of the election period and completion of cash payments on November 28, 2014, the lump sum distribution, totaling approximately $560 million, created a settlement event that resulted in a $59 million charge, which is reflected in "Other, net" in the consolidated statement of comprehensive loss, as well as a reduction in the Company's projected benefit obligation of approximately $300 million compared to March 31, 2014.

Note 17. Guarantor Financial Information
On September 11, 2013, Sprint Corporation issued $2.25 billion aggregate principal amount of 7.250% notes due 2021 and $4.25 billion aggregate principal amount of 7.875% notes due 2023 in a private placement transaction with registration rights. On December 12, 2013, Sprint Corporation issued $2.5 billion aggregate principal amount of 7.125% notes due 2024 in a private placement transaction with registration rights. Each of these issuances is fully and unconditionally guaranteed by Sprint Communications, Inc. (Subsidiary Guarantor), which is a 100 percent owned subsidiary of Sprint Corporation (Parent/Issuer). In connection with the foregoing, the registration rights agreements with respect to the notes required the Company and Sprint Communications, Inc. to use their reasonable best efforts to cause an offer to exchange the notes for a new issue of substantially identical exchange notes registered under the Securities Act of 1933. Accordingly, in November 2014, we completed an exchange offer for these notes in compliance with our registration obligations. We did not receive any proceeds from this exchange offer.
Under the Subsidiary Guarantor's revolving bank credit facility and other finance agreements, the Subsidiary Guarantor is currently restricted from paying cash dividends to the Parent/Issuer or any Non-Guarantor Subsidiary because the ratio of total indebtedness to adjusted EBITDA (each as defined in the applicable agreement) exceeds 2.5 to 1.0.
In May 2014, certain wholly-owned subsidiaries of Sprint entered into a Receivables Facility arrangement to sell certain accounts receivable on a revolving basis, subject to a maximum funding limit of $1.3 billion. In connection with this arrangement, Sprint formed certain wholly-owned subsidiaries, which are bankruptcy remote SPEs and are included in the Non-Guarantor Subsidiaries condensed consolidated financial information (see Note 3. Significant Transactions).
The guarantor financial information distinguishes between the Predecessor period relating to Sprint Communications for periods prior to the SoftBank Merger and the Successor period relating to Sprint Corporation (formerly Starburst II), for periods subsequent to the incorporation of Starburst II on October 5, 2012. Additionally, because the Parent/Issuer column represents the activities of Sprint Corporation (formerly Starburst II), no Parent/Issuer financial information exists for the Predecessor periods, which are prior to the SoftBank Merger. We have accounted for investments in subsidiaries using the equity method. Presented below is the condensed consolidating financial information as of the Successor periods ended December 31, 2014 and March 31, 2014, and for the Successor three and nine-month periods ended December 31, 2014 and 2013 and the Predecessor 101-day period ended July 10, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Sprint Corporation, including its consolidated subsidiaries, is a communications company offering a comprehensive range of wireless and wireline communications products and services that are designed to meet the needs of individual consumers, businesses, government subscribers, and resellers. Unless the context otherwise requires, references to "Sprint," "we," "us," "our" and the "Company" mean Sprint Corporation and its consolidated subsidiaries for all periods presented, inclusive of Successor and Predecessor periods (each as defined within "Results of Operations"), and references to "Sprint Communications" are to Sprint Communications, Inc. and its consolidated subsidiaries.

Description of the Company

We are the third largest wireless communications company in the U.S. based on wireless revenue, as well as a provider of wireline long distance services and an Internet carrier. Our services are provided through our ownership of extensive wireless networks, an all-digital global long distance network and a Tier 1 Internet backbone.

We offer wireless and wireline voice and data transmission services to subscribers in all 50 states, Puerto Rico, and the U.S. Virgin Islands under the Sprint corporate brand, which includes our retail brands of Sprint®, Boost Mobile®, Virgin Mobile®, and Assurance Wireless® on networks that utilize third generation (3G) code division multiple access (CDMA) or Internet protocol (IP) technologies. We also offer fourth generation (4G) services utilizing Long Term Evolution (LTE) as well as Worldwide Interoperability for Microwave Access (WiMAX) technologies (which we expect to shut-down by the end of calendar year 2015). We utilize these networks to offer our wireless and wireline subscribers differentiated products and services whether through the use of a single network or a combination of these networks. We offer wireless services on a postpaid and prepaid payment basis to retail subscribers and also on a wholesale and affiliate basis, which includes the sale of wireless services that utilize the Sprint network but are sold under the wholesaler's brand.

Wireless

We continue to support the open development of applications, content, and devices on the Sprint platform through products and services such as Sprint ID,™ which provides an easy way for users to discover content from leading brands and special interests as well as manage those experiences on certain Android devices, and Sprint Zone, which allows subscribers to not only manage their account and self-service functions via their device but facilitates discovery of new content and personalization through recommendations for applications and entertainment content. We also support Sprint Guardian,™ a collection of mobile safety and device security bundles that provides families relevant tools to help stay safe and secure, and Pinsight Media+,™ which gives advertisers the power to reach consumers on their mobile device by providing more relevant advertising based on information consumers choose to share about their location and mobile Web browsing history. In addition, we enable a variety of business and consumer third-party relationships through our portfolio of machine-to-machine solutions, which we offer on a retail postpaid and wholesale basis. Our machine-to-machine solutions portfolio provides a secure, real-time and reliable wireless two-way data connection across a broad range of connected devices such as the Chrysler Group's UConnect® Access in-vehicle communications system powered through our Sprint Velocity™ end-to-end telematics solution, which enables hands free phone calls and the ability to access music, navigation, and other applications and services through cell connections built into the vehicle. Other connected devices include original equipment manufacturer (OEM) devices and after-market in-vehicle connectivity and electric vehicle charging stations, point-of-sale systems, kiosks and vending machines, asset tracking, digital signage, security, smartgrid utilities, medical equipment, and a variety of other consumer electronics and appliances.

Postpaid

In our postpaid portfolio, we recently launched a promotion, which gives new subscribers who bring their phone number from AT&T or Verizon Wireless unlimited talk and text to anywhere in the U.S. and matches the data allowance of their current monthly rate plan for half of the cost of their current base voice and data rate plan. This is in addition to the Contract Buyout promotion through which termination fees or remaining installment billing balances will be reimbursed up to $350 via a reward card or prepaid card. We also offer the Sprint Family Share Pack, Sprint $60 Unlimited Plan and an exclusive rate plan, the Sprint Simply Unlimited Plan, for the iPhone® 6 and 6 Plus.

The Sprint Family Share Pack is available to new and eligible existing subscribers and allows subscribers to share data across up to ten lines of service under one account. Subscribers choose a shared monthly data allowance starting at $20 per month for 1 gigabyte (GB) of data. For each handset, subscribers pay an access charge, which includes unlimited talk and text while on the Sprint network and ranges from $15 to $40 per month depending on how the subscriber chooses to purchase

Table of Contents

a handset and the size of data allowance selected. Subscribers may also add data access at $10 per month per tablet or $20 per month per mobile broadband device or hotspot.

The Sprint $60 Unlimited Plan is also available to new and eligible existing subscribers and includes unlimited talk, text and data while on the Sprint network for $60 per line per month with the purchase of a handset at full retail price, through an installment contract, or rent through the lease of a handset. Subscribers may purchase an eligible handset under an installment contract payable over 24 months through the use of the Sprint Easy Pay[SM] program and may pay an additional $10 per month per handset line to upgrade to a new handset as early as every 12 months if they turn in their handset. Qualified subscribers may also rent an eligible handset through a lease with no upfront cost for the handset. The terms of the Sprint Easy Pay or the lease program do not require the subscriber to execute a traditional two-year wireless service contract.

The Sprint Simply Unlimited Plan is available to new and eligible existing subscribers and includes unlimited talk, text and data while on the Sprint network for $50 per line per month for subscribers who purchase the iPhone 6 or 6 Plus at full retail price, through an installment contract, or through the lease of a handset. Qualified subscribers have the option to lease an iPhone 6 or 6 Plus through the iPhone for Life Plan at $20 per month for an iPhone 6 (16 GB) or $25 per month for an iPhone 6 Plus (16 GB) with no upfront cost for the handset. The terms of the iPhone for Life Plan do not require the subscriber to execute a traditional two-year wireless service contract.

We also offer price plans tailored to new and eligible existing business subscribers such as Sprint Business Share Plans, which provide for monthly unlimited talk and text while on the Sprint network and allow business decision makers to choose buckets of data for a certain number of lines of service to suit their needs. In addition, in July 2014, we launched Sprint Business Fusion Plans, which start at $15 per month with a qualifying handset purchase and include unlimited talk and text and Sprint Direct Connect while on the Sprint network and allow subscribers to choose unlimited data or share a pool of data among users for an additional fee. Subscribers also have the choice to add other devices to the shared pool of data, including tablets, mobile broadband cards, mobile hotspots, routers and machine-to-machine devices.

Prepaid

Our prepaid portfolio currently includes multiple brands, each designed to appeal to specific subscriber segments. Sprint Prepaid primarily serves subscribers who want plans that are affordable, simple and flexible without a long-term commitment. Boost Mobile serves subscribers with our Data Boost Plans, which offer subscribers unlimited text and talk with step pricing based on their preferred data usage for a lower monthly fee and double the data than our previously offered Monthly Unlimited Select plans. Virgin Mobile primarily serves subscribers with our Virgin Mobile Unlimited plans and our broadband plan, Broadband2Go[SM], which offer subscribers control, flexibility and connectivity through various plan options and communication vehicles. Virgin Mobile is also designated as a Lifeline-only Eligible Telecommunications Carrier in certain states and provides service for the Lifeline program under our Assurance Wireless brand. Assurance Wireless provides eligible subscribers, in certain states, who meet income requirements or are receiving government assistance, with a free wireless phone, 250 free local and long-distance voice minutes each month and unlimited free texts.

Wholesale

We have focused our wholesale business on enabling our diverse network of customers to successfully grow their business by providing them with an array of network, product, and device solutions. This allows our customers to customize this full suite of value-added solutions to meet the growing demands of their businesses. As part of these growing demands, some of our wholesale mobile virtual network operators (MVNO) are also selling prepaid services under the Lifeline program.

Wireline

We provide a broad suite of wireline voice and data communications services to other communications companies and targeted business and consumer subscribers. In addition, we provide voice, data and IP communication services to our Wireless segment.

Business Strategies and Key Priorities

The communications industry continues to compete on the basis of network performance and quality, types of services and devices offered, and price. Our business strategy is to be responsive to changing customer mobility demands by

being innovative and differentiated in the marketplace. Our future growth plans and strategy revolve around achieving the following three key priorities:

- Provide the best value;
- Enhance network coverage and capacity; and
- Operationalize a more effective cost structure.

Table of Contents

We strive to provide the best value through several new offerings of unlimited talk, text and data, and provide a broad selection of some of the most desired and iconic devices. We continue to enhance our network coverage, capacity and data speeds utilizing our unique spectrum portfolio to provide broad market coverage for voice and data, focusing on in-building penetration improvements. We are also re-evaluating our cost structure for opportunities to reduce costs to be more in-line with our competitors and the new price plans we are offering.

Significant Transactions

On July 9, 2013, Sprint Nextel Corporation (Sprint Nextel) completed the acquisition of the remaining equity interests in Clearwire Corporation and its consolidated subsidiary Clearwire Communications LLC (together "Clearwire") that it did not previously own (Clearwire Acquisition) in an all cash transaction for approximately $3.5 billion, net of cash acquired of $198 million, which provides us with control of 2.5 gigahertz (GHz) spectrum and tower resources for use in conjunction with our network modernization plan. The consideration paid was allocated to assets acquired and liabilities assumed based on their estimated fair values at the time of the Clearwire Acquisition. The allocation of consideration paid was based on management's judgment after evaluating several factors, including a valuation assessment.

On July 10, 2013, SoftBank Corp. and certain of its wholly-owned subsidiaries (together, "SoftBank") completed the merger (SoftBank Merger) with Sprint Nextel contemplated by the Agreement and Plan of Merger, dated as of October 15, 2012 (as amended, the Merger Agreement), and the Bond Purchase Agreement, dated as of October 15, 2012 (as amended, the Bond Agreement). As a result of the SoftBank Merger, Starburst II, Inc. (Starburst II) became the parent company of Sprint Nextel. Immediately thereafter, Starburst II changed its name to Sprint Corporation and Sprint Nextel changed its name to Sprint Communications, Inc. Pursuant to the Bond Agreement, Sprint Communications, Inc. issued a convertible bond (Bond) to Starburst II with a principal amount of $3.1 billion, interest rate of 1%, and maturity date of October 15, 2019, which was converted into 590,476,190 shares of Sprint Communications, Inc. common stock at $5.25 per share immediately prior to the close of the SoftBank Merger.

As a result of the completion of the SoftBank Merger in which SoftBank acquired an approximate 78% interest in Sprint Corporation, and subsequent open market stock purchases, SoftBank owns approximately 80% of the outstanding voting common stock of Sprint Corporation as of December 31, 2014. The SoftBank Merger consideration totaled approximately $22.2 billion, consisting primarily of cash consideration of $14.1 billion, net of cash acquired of $2.5 billion, and the estimated fair value of the 22% interest in Sprint Corporation issued to the then existing stockholders of Sprint Communications, Inc. The allocation of consideration paid was based on management's judgment after evaluating several factors, including a valuation assessment. The close of the transaction provided additional equity funding of $5.0 billion, consisting of $3.1 billion received by Sprint Communications, Inc. in October 2012 related to the Bond, which automatically converted to equity immediately prior to the closing of the SoftBank Merger, and $1.9 billion cash consideration at closing of the SoftBank Merger.

In connection with the close of the SoftBank Merger, Sprint Corporation became the successor registrant to Sprint Nextel under Rule 12g-3 of the Securities Exchange Act of 1934 (Exchange Act) and is the entity subject to the reporting requirements of the Exchange Act for filings with the Securities and Exchange Commission (SEC) subsequent to the close of the SoftBank Merger. In addition, in order to align with SoftBank’s reporting schedule, our Board of Directors approved a change in fiscal year end to March 31, effective March 31, 2014. References herein to fiscal year 2014 refer to the twelve-month period ending March 31, 2015.

Network Modernization

We are in the process of modernizing our network to allow the consolidation and optimization of our 1.9 GHz, 800 megahertz (MHz) and 2.5 GHz spectrum into our base stations. The Network Vision project, which commenced in late 2011, includes the deployment of enhanced 3G and 4G LTE technology using our 1.9 GHz spectrum and the deployment of voice technology on our 800 MHz spectrum on the majority of our 38,000 cell sites. We have substantially completed the deployment of enhanced 3G technology using 1.9 GHz spectrum. In addition, we have enabled High Definition Voice services nationwide with this technology. The deployment of enhanced 3G voice services utilizing our 800 MHz spectrum, which is subject to the timing and completion of work to reconfigure the spectrum (the "Report and Order"), and 4G LTE using our 1.9 GHz spectrum is substantially complete.

Some of our subscribers have experienced network service disruptions, particularly voice service, during the construction phase of Network Vision, which, among other factors, we believe has contributed to the elevated postpaid churn rates in recent quarters (refer to the churn results table within "Results of Operations"). Based on our experience in several markets that have reached near completion of Network Vision construction, we have observed that network-related churn

elevates during the construction phase and then gradually improves to pre-construction levels over a period of several months following the achievement of substantial completion in the market.

The Network Vision project and the related shut-down of the Nextel platform have resulted in incremental charges, beginning in 2012, including, but not limited to, an increase in depreciation associated with existing assets related to both the Nextel and Sprint platforms due to changes in our estimates of the remaining useful lives of long-lived assets, changes in the expected timing and amount of asset retirement obligations, and lease exit and other contract termination costs. The Nextel platform was successfully shut-down on June 30, 2013, and the remaining infrastructure is expected to be completely decommissioned by the end of calendar year 2016.

In October 2013, we announced Sprint Spark[SM], which is an enhanced LTE network capability that analyzes our three spectrum bands of LTE and connects a device to the most optimal band available in the area. We expect the deployment period for this technology to be determined over time based on many factors including the availability of equipment, devices and applications. As part of Sprint Spark, we plan to continue to expand 4G LTE technology on our 800 MHz and 2.5 GHz spectrum, which we expect will further enhance the quality of our network. We expect the majority of the efforts to roll out 4G LTE on our 800 MHz spectrum band to be completed by the end of calendar year 2015, subject to the timing and completion of the Report and Order. We expect the majority of the efforts to roll out 4G LTE on our 2.5 GHz spectrum band to be completed over the next three years.

We are also modifying our existing backhaul architecture to enable increased capacity to our network at a lower cost by utilizing Ethernet as opposed to our existing time division multiplexing (TDM) technology. We are incurring termination costs associated with our TDM contractual commitments with third-party vendors on an on-going basis, and expect future termination costs will range between approximately $25 million to $75 million, the majority of which we expect will be recorded by March 31, 2016.

As of the date of the Clearwire Acquisition, Clearwire had deployed WiMAX technology on approximately 17,000 cell towers and was in the process of deploying 4G LTE technology using the 2.5 GHz spectrum on certain sites. We have evaluated our consolidated cell tower portfolio, including the 17,000 cell towers obtained in the Clearwire Acquisition, and identified approximately 6,500 redundant sites that we expect to no longer utilize. We expect lease exit costs recorded in future periods associated with these redundant sites to range between approximately $75 million to $125 million on a net present value basis. The timing of lease exit charges will be dependent upon the date we cease utilizing these sites without future economic benefit. We have continued to deploy 4G LTE technology using the 2.5 GHz spectrum on approximately 10,000 of the remaining Clearwire sites, of which approximately 7,000 have been completed as of December 31, 2014. We plan to cease using WiMAX technology by the end of calendar year 2015.

Ultimately, we expect Network Vision, along with our ongoing network modernization efforts, to bring financial benefit to the Company through reduced network maintenance and operating costs, capital efficiencies, reduced energy costs, lower roaming expenses, backhaul savings, and reduction in total cell sites, as well as improvements to the quality of service to subscribers. Our expectation of financial savings is affected by multiple variables, including our expectation of the timeliness of modernization across our existing network footprint, which is managed by Sprint but is partly dependent upon our primary OEMs.

Financing Programs

During 2013, wireless carriers introduced new plans that allow subscribers to forgo traditional service contracts and handset subsidies in exchange for lower monthly service fees, early upgrade options, or both. In 2013, AT&T, Verizon Wireless and T-Mobile each launched early upgrade programs that included an option to purchase a handset using an installment billing program. Sprint offers our own handset installment billing program called Sprint Easy Pay.

Under the Sprint Easy Pay installment billing program, we recognize a majority of the revenue associated with future expected installment payments at the time of sale of the device. As compared to our traditional subsidized plans, this results in better alignment of the equipment revenue with the cost of the device, which reduces the amount of subsidy recognized in our operating results.

In September 2014, Sprint introduced a leasing program, whereby qualified subscribers can lease a device for a contractual period of time. At the end of the lease term, the subscriber has the option to turn in their device, continue leasing their device, or purchase the device. As of December 31, 2014, our device leases were all classified as

operating leases. As a result, at lease inception, the devices are reclassified from inventory to property, plant and equipment when leased through Sprint's retail stores. For leases in the indirect channel, Sprint purchases the device at lease inception from the dealer. The devices are then depreciated to their estimated residual value over the term of the lease. While a majority of the revenue

associated with installment sales is recognized at the time of sale along with the related cost of products, lease income and depreciation for leased devices are recorded over the term of the lease.

Additionally, Sprint is offering lower monthly service fees without a traditional contract as an incentive to attract subscribers to certain of our service plans. These lower rates for service are available whether the subscriber brings their own device, pays the full retail price of the device, purchases the device under our Sprint Easy Pay or leases their device through our leasing program. As the adoption rates of these plans increase throughout our base of subscribers, we expect Sprint platform postpaid average revenue per user (ARPU) to continue to decline as a result of lower pricing associated with our new service plans as compared to our traditional plans, which reflect higher service revenue and lower equipment revenue; however, we also expect reduced equipment net subsidy expense due to Sprint Easy Pay and leasing programs, to partially offset these declines. Since inception, the lower priced plans, Sprint Easy Pay and our leasing programs have been accretive to earnings. We expect that trend to continue with the magnitude of the impact being dependent upon the rate of subscriber adoption. We also expect that installment billing and leasing will require a greater use of operating cash flows in the earlier part of the contracts as the subscriber will generally pay less upfront than traditional plans because they are financing or leasing the device.

RESULTS OF OPERATIONS

As discussed above, both the Clearwire Acquisition and the SoftBank Merger were completed in July 2013. As a result of these transactions, the assets and liabilities of Sprint Communications and Clearwire were adjusted to estimated fair value on the respective closing dates. The Company's financial statement presentations distinguish between the predecessor period (Predecessor) relating to Sprint Communications for periods prior to the SoftBank Merger and the successor period (Successor) relating to Sprint Corporation, formerly known as Starburst II, for periods subsequent to the incorporation of Starburst II on October 5, 2012. The Successor financial information represents the activity and accounts of Sprint Corporation, which includes the activity and accounts of Starburst II prior to the close of the SoftBank Merger on July 10, 2013 and Sprint Communications, inclusive of the consolidation of Clearwire Corporation, prospectively following completion of the SoftBank Merger, beginning on July 11, 2013, for the 174-day period (Post-merger period). The accounts and operating activity of Starburst II prior to the close of the SoftBank Merger primarily related to merger expenses that were incurred in connection with the SoftBank Merger (recognized in selling, general and administrative expense) and interest related to the $3.1 billion convertible bond (Bond) Sprint Communications, Inc. issued to Starburst II. The Predecessor financial information represents the historical basis of presentation for Sprint Communications for the 101 days ended July 10, 2013 prior to the SoftBank Merger.

The following discussion covers results for the Successor three and nine-month periods ended December 31, 2014 as compared to 2013. Results for the Successor nine-month period ended December 31, 2014 compared to the combined nine-month period ended December 31, 2013 are also discussed, to the extent necessary, to provide an analysis of results on comparable periods although the basis of presentation may not be comparable due to the application of the acquisition method of accounting.

Predecessor 101 Days Ended July 10, 2013

Significant changes in the underlying trends affecting the Company's consolidated results of operations and net loss for the 101 days ended July 10, 2013 were as follows:

- We recorded a gain on previously-held Clearwire equity interests of approximately $2.9 billion for the difference between the estimated fair value of the equity interests owned prior to the acquisition ($5.00 per share offer price less an estimated control premium of approximately $0.60) and the carrying value of approximately $325 million for those previously-held equity interests; and
- Increased income tax expense was primarily attributable to taxable temporary differences as a result of the $2.9 billion gain on the previously-held equity interests in Clearwire, which was principally attributable to the increase in the fair value of Federal Communications Commission (FCC) licenses held by Clearwire and from amortization of FCC licenses. FCC licenses are amortized over 15 years for income tax purposes but, because these licenses have an indefinite life, they are not amortized for financial statement reporting purposes.

Depreciation Expense

Depreciation expense decreased $144 million, or 13%, and increased $680 million, or 34%, in the Successor three and nine-month periods ended December 31, 2014, respectively, compared to the same periods in 2013. The decrease in the Successor three-month period ended December 31, 2014 compared to the same period in 2013 is primarily due to equipment not being used for Network Vision becoming fully depreciated at December 31, 2013, partially offset by increased depreciation on new asset additions. The increase in the Successor nine-month period ended December 31, 2014 compared to the same period in 2013 is primarily due to comparing results for a full nine-month period in 2014 to the shortened Post-merger period in 2013.

Successor Nine-Month Period Ended December 31, 2014 and Combined Nine-Month Period Ended December 31, 2013

Our Network Vision deployment, which began in late 2011, as well as the shut down of the Nextel platform on June 30, 2013, resulted in incremental charges during earlier stages of implementation including, but not limited to, an increase in depreciation associated with existing assets related to both the Nextel and Sprint platforms, due to changes in our estimates of the remaining useful lives of long-lived assets, and the expected timing and amount of asset retirement obligations, which continued to have an impact on our results of operations in 2013. The incremental effect of accelerated depreciation due to the implementation of Network Vision was approximately $430 million during the Predecessor three-month period ended June 30, 2013, of which the majority related to the Nextel platform, which was shut down on June 30, 2013, compared to no such accelerated depreciation in 2014. In addition to the explanations above and the effect of accelerated depreciation in the Predecessor period, the depreciation expense also decreased by approximately $90 million for the Successor nine-month period ended December 31, 2014 due to asset revaluations as a result of the SoftBank Merger in 2013.

Table of Contents

Amortization Expense

Amortization expense decreased $67 million, or 15%, and increased $281 million, or 31%, in the Successor three and nine-month periods ended December 31, 2014 as compared to the same periods in 2013. The decrease in the three-month period ended December 31, 2014 as compared to the same period in 2013 is primarily due to customer relationship intangible assets that are amortized using the sum-of-the-months'-digits method, which results in higher amortization rates in early periods that will decline over time. The increase in the nine-month period ended December 31, 2014 as compared to the same period in 2013 is primarily due to amortization expense for a full nine-month period in 2014 as compared to the shortened Post-merger period in 2013.

Successor Nine-Month Period Ended December 31, 2014 and Combined Nine-Month Period Ended December 31, 2013

In addition to the explanations above, incremental amortization expense of approximately $350 million was incurred for the Successor nine-month period ended December 31, 2014, which was primarily attributable to the recognition of customer relationships of approximately $6.9 billion as a result of the SoftBank Merger.

Impairments

During the quarter ended December 31, 2014, we determined that recoverability of the carrying amount of the Sprint trade name should be evaluated for impairment due to changes in circumstances surrounding our Wireless reporting unit. As a result, we recorded an impairment loss of $1.9 billion, which is included in “Impairments” in our consolidated statements of comprehensive loss. During the quarter ended December 31, 2014, we also tested the recoverability of the Wireline asset group, which consists primarily of property, plant and equipment, due to continued declines in our Wireline segment earnings and our current forecast that projects continued losses in future periods. As a result, we recorded an impairment loss of $233 million to reduce the carrying value of Wireline’s property, plant and equipment to its estimated fair value, which is included in “Impairments” in our consolidated statements of comprehensive loss.

Other, net

The following table provides additional information regarding items included in "Other, net" for the Successor three and nine-month periods ended December 31, 2014 and 2013, the Predecessor 101-day period ended July 10, 2013, and the combined nine-month period ended December 31, 2013.

	Successor				Predecessor	Combined
	Three Months Ended December 31,		Nine Months Ended December 31,		101 Days Ended July 10,	Nine Months Ended December 31,
	2014	2013	2014	2013	2013	2013
	(in millions)					
Severance and exit costs	$(22)	$(206)	$(333)	$(309)	$ (627)	$ (936)
Litigation	(91)	—	(91)	—	—	—
Partial pension settlement	(59)	—	(59)	—	—	—
Release of assumed liability - United States Cellular Corporation (U.S. Cellular) asset acquisition	41	—	41	—	—	—
Other	—	7	—	(93)	(53)	(146)
Total	$(131)	$(199)	$(442)	$(402)	$ (680)	$ (1,082)

Other, net represented an expense of $131 million and $442 million in the Successor three and nine-month periods ended December 31, 2014, respectively, as compared to an expense of $199 million and $402 million in the Successor three and nine-month periods ended December 31, 2013, respectively. Severance and exit costs for the Successor three and nine-month periods ended December 31, 2014 included $3 million and $272 million, respectively, of severance primarily associated with reductions in force and $7 million and $20 million, respectively, of lease exit costs primarily associated with facility closures as well as the network modernization plan. In addition, we recognized $12 million and $41 million, respectively, of costs during the period related to payments that will continue to be made under our backhaul access contracts for which we will no longer be receiving any economic benefit. Litigation of $91 million in both the three and nine-month periods ended December 31, 2014, represents legal reserves for various pending legal

suits and proceedings. Partial pension settlement is the result of the Company's Board of Directors approving a plan amendment to the Sprint Retirement Pension Plan (Plan) to offer certain terminated participants, who had not begun to receive Plan benefits, the opportunity to voluntarily elect to receive their benefits as an immediate a lump sum distribution. The lump sum distribution created a settlement event that resulted in a $59 million charge in both the three and nine-month periods ended December 31, 2014, respectively. As a

---

result of the May 2013 U.S. Cellular asset acquisition, we recorded a liability related to network shut-down costs for which we agreed to reimburse U.S. Cellular. During the quarter ended December 31, 2014, we identified favorable trends in actual costs and, as a result, we released some of the reserve, resulting in a gain of approximately $41 million in both the three and nine-month periods ended December 31, 2014, respectively.

Severance and exit costs for the Successor three and nine-month periods ended December 31, 2013 included $178 million and $219 million, respectively, of severance primarily associated with reductions in force and $11 million and $56 million, respectively, of lease exit costs associated with taking the remaining Nextel platform sites off-air. In addition, for the Successor three and nine-month periods ended December 31, 2013 we recognized $29 million and $53 million, respectively, related to payments that will continue to be made under our backhaul access contracts, which will have no future economic benefit, of which $12 million and $19 million, respectively, was recognized as "Cost of services and products." Other for the Successor three-month period ended December 31, 2013 consists of $7 million of reimbursements related to 2012 hurricane-related charges recorded as a contra expense in cost of services in our consolidated statement of comprehensive loss. Other for the Successor nine-month period ended December 31, 2013 primarily consists of $100 million of business combination expenses classified within selling, general and administrative expense in our consolidated statement of comprehensive loss.

Successor Nine-Month Period Ended December 31, 2014 and Combined Nine-Month Period Ended December 31, 2013

In addition to the explanations above, exit costs in the Combined nine-month period ended December 31, 2013 also include lease exit costs of $470 million primarily associated with taking certain Nextel platform sites off-air as of June 30, 2013 and $144 million related to payments that will continue to be made under our backhaul access contracts for which we will no longer be receiving any economic benefit. Of the $144 million, $28 million was recognized as "Cost of services and products" and $116 million (solely attributable to Wireless) was recognized in "Severance and exit costs." We also recognized $41 million of severance related to reductions in force in the Predecessor 101-day period ended July 10, 2013. "Other" for the Predecessor 101-day period ended July 10, 2013 included $53 million of business combination expenses.

Interest Expense

Interest expense increased $4 million, or 1%, and $610 million, or 66%, in the Successor three and nine-month periods ended December 31, 2014, respectively, as compared to the same periods in 2013, primarily due to interest associated with debt issued in September and December 2013 as well as comparing results for a full nine-month period in 2014 to the shortened Post-merger period in 2013. The effective interest rate, which includes capitalized interest, on the weighted average long-term debt balance of $32.3 billion and $32.5 billion was 6.4% for both the Successor three and nine-month periods ended December 31, 2014, respectively. As a result of the Clearwire and SoftBank transactions, the Company's consolidated debt balance was approximately $33.0 billion as of December 31, 2013. The effective interest rate for the Successor three-month period ended December 31, 2013 was 6.3% based on a weighted average long-term debt balance of $32.9 billion. The effective interest rate for the Combined nine-month period ended December 31, 2013 was 7.8% based on a weighted average long-term debt balance of $28.4 billion. See “Liquidity and Capital Resources” for more information on the Company's financing activities.

Equity in Losses of Unconsolidated Investments, net

As a result of the Clearwire Acquisition on July 9, 2013 and the resulting consolidation of Clearwire results of operations into the accounts of the Company, the Successor period results of operations do not reflect any equity in losses of unconsolidated investments. The equity in losses of unconsolidated investments, net in the Predecessor periods primarily consists of our proportionate share of losses from our equity method investment in Clearwire. Equity in losses from Clearwire were $23 million and $280 million for the Predecessor 9-day and 100-day periods ended July 9, 2013, respectively.

Equity in losses from Clearwire for the 100-day period ended July 9, 2013 included a $65 million derivative loss associated with the change in fair value of the embedded derivative resulting from the exchangeable notes between Clearwire and Sprint.

Table of Contents

Other income, net

The following table provides additional information on items included in "Other income, net" for the Successor three and nine-month periods ended December 31, 2014 and 2013, the Predecessor 101-day period ended July 10, 2013, and the combined nine-month period ended December 31, 2013.

	Successor				Predecessor	Combined
	Three Months Ended December 31,		Nine Months Ended December 31,		101 Days Ended July 10,	Nine Months Ended December 31,
	2014	2013	2014	2013	2013	2013
	(in millions)					
Interest income	$3	$5	$10	$22	$ 18	$ 40
Gain on early retirement of debt	—	48	—	56	—	56
Other, net	7	2	9	(11)	1	(10)
Total	$10	$55	$19	$67	$ 19	$ 86

Other income, net represented income of $10 million and $19 million for the Successor three and nine-month periods ended December 31, 2014, respectively, as compared to income of $55 million and $67 million in the Successor three and nine-month periods ended December 31, 2013, respectively, and income of $19 million in the Predecessor 101-day period ended July 10, 2013. Other, net in the Successor nine-month period ended December 31, 2013 primarily consisted of $159 million of income related to the recognition of the remaining unaccreted convertible bond discount offset by a $167 million loss related to the embedded derivative associated with the convertible bond between Starburst II and Sprint Communications, Inc. Gain on early retirement of debt in the Successor three and nine-month periods ended December 31, 2013 was a result of early retirement of the Clearwire Communications LLC and Clearwire Finance, Inc. 12% secured notes due 2015 and 12% secured notes due 2017.

Income Taxes

The Successor period income tax benefit of $657 million and $601 million for the three and nine-month periods ended December 31, 2014, respectively, represented a consolidated effective tax rate of approximately 22% and 16%, respectively. The Successor period income tax expense of $15 million and $44 million for the three and nine-month periods ended December 31, 2013, respectively, represented a consolidated effective tax rate of approximately (1)% and (2)%, respectively. The income tax benefit for the three and nine-month periods ended December 31, 2014 is primarily attributable to recognition of a tax benefit on the $1.9 billion Sprint trade name impairment loss partially offset by tax expense on taxable temporary differences from the amortization of FCC licenses for income tax purposes. The tax expense of $15 million and $44 million for the Successor three and nine-month periods ended December 31, 2013, respectively, were primarily attributable to tax expense resulting from taxable temporary differences from amortization of FCC licenses. The income tax expense of $1.6 billion for the Predecessor 101-day period ended July 10, 2013 is primarily attributable to the recognition of tax expense on the $2.9 billion gain on previously-held equity interests in Clearwire.

Table of Contents

Segment Earnings - Wireless

Wireless segment earnings are a function of wireless service revenue, the sale of wireless devices (handsets and tablets), broadband devices, connected devices, and accessories, in addition to costs to acquire subscribers and network and interconnection costs to serve those subscribers, as well as other Wireless segment operating expenses. The costs to acquire our subscribers include the net cost at which we sell our devices, referred to as equipment net subsidies, as well as the marketing and sales costs incurred to attract those subscribers. Network costs primarily represent switch and cell site costs, backhaul costs, and interconnection costs, which generally consist of per-minute usage fees and roaming fees paid to other carriers. The remaining costs associated with operating the Wireless segment include the costs to operate our customer care organization and administrative support. Wireless service revenue, costs to acquire subscribers, and variable network and interconnection costs fluctuate with the changes in our subscriber base and their related usage, but some cost elements do not fluctuate in the short term with these changes. As shown by the table above under "Consolidated Results of Operations," Wireless segment earnings represented almost all of our total consolidated segment earnings (loss) for the Successor three and nine-month periods ended December 31, 2014. The wireless industry is subject to competition to retain and acquire subscribers of wireless services. Most markets in which we operate have high rates of penetration for wireless services. Wireless carriers accordingly must attract a greater proportion of new subscribers from competitors rather than from first-time subscribers. During 2013, wireless carriers also began to introduce new plans that allow subscribers to forgo traditional service contracts and handset subsidies in exchange for lower monthly service fees, early upgrade options, or both. As the adoption rates of these plans increase throughout our base of subscribers, we expect postpaid ARPU to continue to decline as a result of lower pricing associated with our new service plans as compared to our traditional plans which reflect higher service revenue and lower equipment revenue. Within the Wireless segment, postpaid wireless services represent the most significant contributors to earnings, and are driven by the number of postpaid subscribers to our services, as well as ARPU. We have experienced net losses of postpaid handset subscribers over the last several quarters. The net loss of these postpaid handset subscribers in the period beginning April 1, 2014 through the nine months ended December 31, 2014 is expected to cause wireless service revenue to be approximately $260 million lower for the remainder of this fiscal year and approximately $1.0 billion lower for fiscal year 2015 than it would have been had those subscribers not been lost. The expected negative impact to service revenue and wireless segment earnings as a result of these subscriber losses is expected to be partially mitigated by net adds of tablets and connected devices experienced during the same period and increases in equipment revenue due to subscribers migrating to our installment billing and leasing programs. In addition, we leased devices through our Sprint retail stores totaling approximately $630 million and $700 million during the Successor three and nine-month periods ended December 31, 2014, respectively, that would have impacted cost of goods sold if they had been purchased under the installment billing or subsidized model. If the trend of handset subscriber net losses continues, we expect to see increased pressure on segment earnings. We have taken initiatives to provide the best value in wireless service while continuing to enhance our network performance, coverage and capacity in order to attract and retain valuable handset subscribers, in addition to evaluating our cost model to operationalize a more effective cost structure that better matches our new service plans, which we believe may help to relieve some of the pressure we expect on earnings. Since the release of our new price plans, recent results show improvement in trends of handset losses.

Table of Contents

The following table provides an overview of the results of operations of our Wireless segment for the Successor three and nine-month periods ended December 31, 2014 and 2013, the Predecessor 101-day period ended July 10, 2013, and the combined nine-month period ended December 31, 2013.

(1) Represents service revenue primarily related to the acquisition of Clearwire on July 9, 2013.

Service Revenue

Our Wireless segment generates service revenue from the sale of wireless services and the sale of wholesale and other services. Service revenue consists of fixed monthly recurring charges, variable usage charges and miscellaneous fees such as activation fees, directory assistance, roaming, equipment protection, late payment and early termination charges, and certain regulatory related fees, net of service credits.

The ability of our Wireless segment to generate service revenue is primarily a function of:

- revenue generated from each subscriber, which in turn is a function of the types and amount of services utilized by each subscriber and the rates charged for those services; and
- the number of subscribers that we serve, which in turn is a function of our ability to retain existing subscribers and acquire new subscribers.

Retail comprises those subscribers to whom Sprint directly provides wireless services, whether those services are provided on a postpaid or a prepaid basis. We also categorize our retail subscribers as prime and subprime based upon subscriber credit profiles. We use proprietary scoring systems that measure the credit quality of our subscribers using several factors, such as credit bureau information, subscriber credit risk scores and service plan characteristics. Payment history is subsequently monitored to further evaluate subscriber credit profiles. Wholesale and affiliates are those subscribers who are served through MVNO and affiliate relationships as well as other arrangements through which wireless services are sold by Sprint to other companies that resell those services to subscribers.

Retail service revenue decreased $657 million, or 9%, and increased $6.5 billion, or 48%, for the Successor three and nine-month periods ended December 31, 2014, respectively, as compared to the same periods in 2013. Both the three and nine-month periods experienced decreases primarily due to growth in tablet sales and postpaid subscribers on our new plans that tend to carry a lower average revenue per subscriber as well as a decline in average postpaid and prepaid subscribers mostly due to churn. These decreases were partially offset by a decline in certain plan discounts and customer credits and

growth in our prepaid Boost brand that carries a higher average revenue per subscriber. The nine-month period resulted in an overall increase due to comparing results for the full nine-month period in 2014 to the shortened Post-merger periods in 2013.

Wholesale, affiliate and other revenues increased $67 million, or 47%, and $319 million, or 120%, for the Successor three and nine-month periods ended December 31, 2014, respectively, as compared to the same periods in 2013 primarily due to comparing results for a full nine-month period in 2014 to the shortened Post-merger period in 2013 as well as interest revenue associated with installment billing on handsets and an increase in revenues resulting from acquisitions in 2013. Approximately 49% of our wholesale and affiliate subscribers represent connected devices. These devices generate revenue from usage which varies depending on the solution being utilized. Average revenue per connected device is generally significantly lower than revenue from other wholesale and affiliate subscribers; however, the cost to service these subscribers is also lower resulting in a higher gross margin as a percent of revenue.

Average Monthly Service Revenue per Subscriber and Subscriber Trends

The table below summarizes average number of retail subscribers for the Successor three and nine-month periods ended December 31, 2014 and 2013, the Predecessor 101-day period ended July 10, 2013, and the combined nine-month period ended December 31, 2013. Additional information about the number of subscribers, net additions (losses) to subscribers, and average rates of monthly postpaid and prepaid subscriber churn for each quarter since the quarter ended June 30, 2013 may be found in the tables on the following pages.

	Successor				Predecessor	Combined
	Three Months Ended December 31,		Nine Months Ended December 31,		101 Days Ended July 10,	Nine Months Ended December 31,
	2014	2013	2014	2013	2013	2013
	(subscribers in thousands)					
Average postpaid subscribers	29,871	30,807	30,108	30,957	31,053	30,977
Average prepaid subscribers	15,324	16,063	15,272	16,040	15,890	15,972
Average retail subscribers	45,195	46,870	45,380	46,997	46,943	46,949

The table below summarizes ARPU for the Successor three and nine-month periods ended December 31, 2014 and 2013, the Predecessor 101-day period ended July 10, 2013, and the combined nine-month period ended December 31, 2013. Additional information about ARPU for each quarter since the quarter ended June 30, 2013 may be found in the tables on the following pages.

	Successor				Predecessor	Combined
	Three Months Ended December 31,		Nine Months Ended December 31,		101 Days Ended July 10,	Nine Months Ended December 31,
	2014	2013	2014	2013	2013	2013
ARPU[(1)]:						
Postpaid	$58.63	$63.44	$60.18	$63.46	$ 63.68	$ 63.57
Prepaid	$27.61	$27.34	$27.77	$26.64	$ 27.01	$ 26.80
Average retail	$48.11	$51.07	$49.27	$50.89	$ 51.27	$ 51.06

(1) ARPU is calculated by dividing service revenue by the sum of the monthly average number of subscribers in the applicable service category. Changes in average monthly service revenue reflect subscribers for either the postpaid or prepaid service category who change rate plans, the level of voice and data usage, the amount of service credits which are offered to subscribers, plus the net effect of average monthly revenue generated by new subscribers and deactivating subscribers.

Postpaid ARPU for the Successor three and nine-month periods ended December 31, 2014 decreased as compared to the same periods in 2013 primarily due to growth in sales of tablets, which carry a lower revenue per subscriber combined with the impact of subscriber migration to many of our new service plans, resulting in lower service fees. We expect Sprint platform postpaid ARPU to continue to decline during fiscal year 2014 as a result of lower service

fees associated with many of our new price plans, and a continued increase in tablet mix that carry a lower ARPU; however, as a result of our installment billing and leasing programs, we expect reduced equipment net subsidy expense to partially offset these declines. Prepaid ARPU for the Successor three and nine-month periods ended December 31, 2014 increased compared to the same periods in 2013 primarily due to the impact of a higher revenue per subscriber carried by subscribers acquired in the Clearwire Acquisition combined with an increase in ARPU among other prepaid brands as subscribers chose higher priced plans.

Table of Contents

The following table shows (a) net additions (losses) of wireless subscribers, (b) our total subscribers, and (c) end of period connected device subscribers as of the end of each quarterly period beginning with the quarter ended June 30, 2013.

	June 30, 2013	Sept 30, 2013	Dec 31, 2013	March 31, 2014	June 30, 2014	Sept 30, 2014	Dec 31, 2014
Net additions (losses) (in thousands)[1]							
Sprint platform:							
Postpaid	194	(360)	58	(231)	(181)	(272)	30
Prepaid	(486)	84	322	(364)	(542)	35	410
