FORWARD-LOOKING STATEMENTS

The information included in this quarterly report on Form 10-Q contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may relate to the financial condition, results of operations, plans, objectives, future performance and business of OFG Bancorp (“we,” “our,” “us” or the “Company”), including, but not limited to, statements with respect to the adequacy of the allowance for loan losses, delinquency trends, market risk and the impact of interest rate changes, capital markets conditions, capital adequacy and liquidity, and the effect of legal proceedings and new accounting standards on the Company’s financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words “anticipate,” “believe,” “continues,” “expect,” “estimate,” “intend,” “project” and similar expressions and future or conditional verbs such as “will,” “would,” “should,” “could,” “might,” “can,” “may,” or similar expressions are generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates and assumptions by management that are difficult to predict. Various factors, some of which by their nature are beyond the Company’s control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to:

- additional credit defaults or a restructuring by the Commonwealth of Puerto Rico or any of its agencies, municipalities or instrumentalities;
- possible legislative, tax or regulatory changes;
- the rate of growth in the economy and employment levels, as well as general business and economic conditions;
- the relative strength or weakness of the consumer and commercial credit sectors and of the real estate market in Puerto Rico;
- competition in the financial services industry;
- the fiscal and monetary policies of the federal government and its agencies;
- changes in interest rates, as well as the magnitude of such changes;
- changes in federal bank regulatory and supervisory policies, including required levels of capital;
- the impact of the industry regulations on the Company’s businesses, business practices and cost of operations;
- the performance of the securities markets; and
- additional Federal Deposit Insurance Corporation (“FDIC”) assessments.

Other possible events or factors that could cause results or performance to differ materially from those expressed in these forward-looking statements include the following: negative economic conditions that adversely affect the general economy, housing prices, the job market, consumer confidence and spending habits which may affect, among other things, the level of non-performing assets, charge-offs and provision expense; changes in interest rates and market liquidity which may reduce interest margins, impact funding sources and affect the ability to originate and distribute financial products in the primary and secondary markets; adverse movements and volatility in debt and equity capital markets; changes in market rates and prices which may adversely impact the value of financial assets and liabilities; liabilities resulting from litigation and regulatory investigations; changes in accounting standards, rules and interpretations; increased competition; the Company's ability to grow its core businesses; decisions to downsize, sell or close units or otherwise change the Company's business mix; and management's ability to identify and manage these and other risks.

All forward-looking statements included in this quarterly report on Form 10-Q are based upon information available to the Company as of the date of this report, and other than as required by law, including the requirements of applicable securities laws, the Company assumes no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION, CONSOLIDATION AND BASIS OF PRESENTATION

Nature of Operations

OFG Bancorp (the “Company”) is a publicly-owned financial holding company incorporated under the laws of the Commonwealth of Puerto Rico. The Company operates through various subsidiaries including, a commercial bank, Oriental Bank (the “Bank”), a securities broker-dealer, Oriental Financial Services Corp. (“Oriental Financial Services”), an insurance agency, Oriental Insurance, LLC. (“Oriental Insurance”) and a retirement plan administrator, Oriental Pension Consultants, Inc. (“OPC”). Through these subsidiaries and their respective divisions, the Company provides a wide range of banking and financial services such as commercial, consumer and mortgage lending, auto loans, financial planning, insurance sales, money management and investment banking and brokerage services, as well as corporate and individual trust services.

On April 30, 2010, the Bank acquired certain assets and assumed certain deposits and other liabilities of Eurobank, a Puerto Rico commercial bank, in an FDIC-assisted acquisition. On February 6, 2017, the Bank and the FDIC agreed to terminate the shared-loss agreements related to the Eurobank Acquisition. On December 18, 2012, the Company acquired a group of Puerto Rico-based entities that included Banco Bilbao Vizcaya Argentaria Puerto Rico (“BBVAPR”), a Puerto Rico commercial bank, as well as a securities broker-dealer and an insurance agency, which is referred to herein as the “BBVAPR Acquisition.” The businesses acquired in these acquisitions have been integrated with the Company’s existing business.

Recent Accounting Developments

Scope of Modification Accounting. In May 2017, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2017-09 that clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. Entities will apply the modification accounting guidance if the value, vesting conditions or classification of the award changes. ASU No. 2017-08 is effective for fiscal years, and interim periods, beginning after December 15, 2018, with early adoption permitted. The Company's Omnibus Plan provides for equity-based compensation incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, and dividend equivalents, as well as equity-based performance awards. If any change occurs in the future to the Omnibus Plan, the Company will evaluate it under this guideline.

Premium Amortization on Purchased Callable Debt Securities Receivables. In March 2017, the FASB issued ASU No. 2017-08, which requires the amortization of the premium on callable debt securities to the earliest call date. The amortization period for callable debt securities purchased at a discount would not be impacted by the ASU. This ASU will be applied prospectively for annual and interim periods in fiscal years beginning after December 15, 2018. The ASU is not expected to have a material impact on the Company's consolidated financial position or results of operations. At June 30, 2017, the Company does not have callable debt securities.

Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting (a consensus of the Emerging Issues Task Force). In February 2017, the FASB issued ASU No. 2017-06, which intended to reduce diversity and improve the usefulness of information provided by employee benefit plans that hold interests in master trusts. This ASU will be applied prospectively for annual and interim periods in fiscal years beginning after December 15, 2018. The ASU is not expected to have a material impact on the Company's consolidated financial position or results of operations.

Simplifying the Test for Goodwill Impairment. In January 2017, the FASB issued ASU No. 2017-04, which simplifies the measurement of goodwill impairment. An entity will no longer perform a hypothetical purchase price allocation to measure goodwill impairment. Instead, impairment will be measured using the difference between the carrying amount and the fair value of the reporting unit. This ASU will be applied prospectively for annual and interim periods in fiscal years beginning after December 15, 2019. We are currently assessing the impact that the adoption of ASU 2017-04 will have on our consolidated financial statements and related disclosures.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Restricted Cash. In November 2016, the FASB issued ASU No. 2016-18, which amends Topic 230 (Statement of Cash Flows) and requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. ASU No. 2016-18 is intended to reduce diversity in practice in how restricted cash or restricted cash equivalents are presented and classified in the statement of cash flows. ASU No. 2016-18 is effective for fiscal years, and interim periods, beginning after December 15, 2017, with early adoption permitted. The standard requires application using a retrospective transition method. The adoption of ASU No. 2016-18 will change the presentation and classification of restricted cash and restricted cash equivalents in our consolidated statements of cash flows.

Measurement of Credit Losses on Financial Instruments. In June 2016, the FASB issued ASU No. 2016-13, which includes an impairment model (known as the current expected credit loss (CECL) model) that is based on expected losses rather than incurred losses. Under the new guidance, an entity recognizes as an allowance its estimate of expected credit losses. ASU No. 2016-13 is effective for fiscal years, and interim periods, beginning after December 15, 2019. While we continue to assess the impact of ASU No. 2016-13, we have developed a roadmap with time schedules in place from 2016 to implementation date. The Company is in the process of assessing the methodology and the software to be used.

Leases. In February 2016, the FASB issued ASU No. 2016-02, which requires lessees to recognize a right-of-use asset and related lease liability for leases classified as operating leases at the commencement date that have lease terms of more than 12 months. This ASU retains the classification distinction between finance leases and operating leases. ASU No. 2016-02 is effective for fiscal years, and interim periods, beginning after December 15, 2018. We are currently assessing the impact the adoption of ASU 2016-02 will have on our consolidated financial statements and related disclosures.

Revenue from Contracts with Customers. In May 2014, the FASB issued ASU No. 2014-09, which supersedes the revenue recognition requirements Topic 605 (Revenue Recognition), and most industry-specific guidance. ASU No. 2014-09 is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU No. 2014-09 also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. ASU No. 2014-09 permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective method). In August 2015, the FASB issued ASU No. 2015-14 to defer the effective date of ASU No. 2014-09 by one year to fiscal years beginning after December 15, 2017. ASU No. 2015-14 also permits early adoption of ASU No. 2014-09, but not before the original effective date, which was for fiscal years beginning after December 15, 2016. While the new guidance does not apply to revenue associated with loans or securities, the Company has been working to identify the customer contracts within the scope of the new guidance and assess the related revenues to determine if any accounting or internal control changes will be required for the new provisions. While the

assessment is not complete, the timing of the Company's revenue recognition is not expected to materially change. Overall, the Company does not expect the new guidance to have a material impact on its consolidated financial position or results of operations. The next phase of the Company's implementation work will be to evaluate required disclosures to be in compliance with the standard.

Other than the accounting pronouncements disclosed above, there are no other new accounting pronouncements issued during the first quarter of 2017 that could have a material impact on the Company's financial position, operating results or financial statements disclosures.

OFG BANCORP**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)****NOTE 2 – RESTRICTED CASH**

The following table includes the composition of the Company's restricted cash:

	June 30, 2017		December 31, 2016
	(In thousands)		
Cash pledged as collateral to other financial institutions to secure:			
Derivatives	\$ 1,980	\$	1,980
Obligations under agreement of loans sold with recourse	1,050		1,050
	\$ 3,030	\$	3,030

At June 30, 2017, the Bank's international banking entities, Oriental International Bank Inc. ("OIB") and Oriental Overseas, a division of the Bank, held an unencumbered certificate of deposit and other short-term highly liquid securities in the amount of \$300 thousand and \$325 thousand, respectively, as the legal reserve required for international banking entities under Puerto Rico law. At December 31, 2016, they held an unencumbered certificate of deposit and other short-term highly liquid securities in the amount of \$300 thousand as the required legal reserve. The certificate of deposit and other securities cannot be withdrawn or sold by OIB or Oriental Overseas without prior written approval of the Office of the Commissioner of Financial Institutions ("OCFI").

As part of its derivative activities, the Company has entered into collateral agreements with certain financial counterparties. At both June 30, 2017 and December 31, 2016, the Company had delivered approximately \$2.0 million of cash as collateral for such derivatives activities.

As part of the BBVA Acquisition, the Company assumed a contract with FNMA which required collateral to guarantee the repurchase, if necessary, of loans sold with recourse. At both June 30, 2017 and December 31, 2016, the Company delivered as collateral cash amounting to approximately \$1.1 million.

The Bank is required by Puerto Rico law to maintain average weekly reserve balances to cover demand deposits. The amount of those minimum average reserve balances for the week that covered June 30, 2017 was \$163.2 million (December 31, 2016 - \$161.0 million). At June 30, 2017 and December 31, 2016, the Bank complied with the requirement. Cash and due from bank as well as other short-term, highly liquid securities are used to cover the required average reserve balances.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 3 – INVESTMENT SECURITIES

Money Market Investments

The Company considers as cash equivalents all money market instruments that are not pledged and that have maturities of three months or less at the date of acquisition. At June 30, 2017 and December 31, 2016, money market instruments included as part of cash and cash equivalents amounted to \$6.5 million and \$5.6 million, respectively.

The amortized cost and fair value of the Company's investment securities at June 30, 2017, by contractual maturity, are shown in the next table. Securities not due on a single contractual maturity date, such as collateralized mortgage obligations, are classified in the period of final contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Company performs valuations of the investment securities on a monthly basis. Moreover, the Company conducts quarterly reviews to identify and evaluate each investment in an unrealized loss position for other-than-temporary impairment. Any portion of a decline in value associated with credit loss is recognized in the statements of operations with the remaining noncredit-related component recognized in other comprehensive income (loss). A credit loss is determined by assessing whether the amortized cost basis of the security will be recovered by comparing the present value of cash flows expected to be collected from the security, discounted at the rate equal to the yield used to accrete current and prospective beneficial interest for the security. The shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis is considered to be the “credit loss.”

Other-than-temporary impairment analysis is based on estimates that depend on market conditions and are subject to further change over time. In addition, while the Company believes that the methodology used to value these exposures is reasonable, the methodology is subject to continuing refinement, including those made as a result of market developments. Consequently, it is reasonably possible that changes in estimates or conditions could result in the need to recognize additional other-than-temporary impairment charges in the future.

Most of the investments (\$777.8 million, amortized cost, or 99.4%) with an unrealized loss position at June 30, 2017 consist of securities issued or guaranteed by the U.S. Treasury or U.S. government-sponsored agencies, all of which are highly liquid securities that have a large and efficient secondary market. Their aggregate losses and their variability from period to period are the result of changes in market conditions, and not due to the repayment capacity or creditworthiness of the issuers or guarantors of such securities.

The sole exposure to PR bond (\$4.7 million, amortized cost, or 0.6%) with an unrealized loss position at June 30, 2017 consists of an obligation issued by the Puerto Rico Highways and Transportation Authority ("PRHTA") secured by a pledge of toll revenues from the Teodoro Moscoso Bridge operated through a public-private partnership. The decline in the market value of this security is mainly attributed to the significant economic and fiscal challenges that Puerto Rico is facing, which is expected to result in a significant restructuring of the government under the supervision of a federally created Fiscal Oversight Board. All other Puerto Rico government securities were sold during the first quarter of 2016. The PRHTA bond had an aggregate fair value of \$4.3 million at June 30, 2017 (93% of the bond's amortized cost) and matures on July 1, 2018. The discounted cash flow analysis for the investment showed a cumulative default probability at maturity of 6.4%, thus reflecting that it is more likely than not that the bond will not default during its remaining term. Based on this analysis, the Company determined that it is more likely than not that it will recover all interest and principal invested in this Puerto Rico government bond and is, therefore, not required to recognize a credit loss as of June 30, 2017. Also, the Company's conclusion is based on the assessment of the specific source of repayment of the outstanding bond, which continues to perform. PRHTA started principal repayments on July 1, 2014. All scheduled principal and interest payments to date have been collected. On July 1, 2017, the Company received a scheduled principal payment of \$2.2 million. As a result of the aforementioned analysis, no other-than-temporary losses were recorded during the period ended June 30, 2017.

As of June 30, 2017, the Company performed a cash flow analysis of its Puerto Rico government bond to calculate the cash flows expected to be collected and determine if any portion of the decline in market value of this investment was

considered an other-than-temporary impairment. The analysis derives an estimate of value based on the present value of risk-adjusted future cash flows of the underlying investment, and included the following components:

- The contractual future cash flows of the bond are projected based on the key terms as set forth in the official statements for the investment. Such key terms include among others the interest rate, amortization schedule, if any, and maturity date.
- The risk-adjusted cash flows are calculated based on a monthly default probability and recovery rate assumptions based on the credit rating of the investment. Constant monthly default rates are assumed throughout the life of the bond which is based on the respective security's credit rating as of the date of the analysis.
- The adjusted future cash flows are then discounted at the original effective yield of the investment based on the purchase price and expected risk-adjusted future cash flows as of the purchase date of the investment.

The following table presents a rollforward of credit-related impairment losses recognized in earnings for the six-month periods ended June 30, 2017 and 2016 on available-for-sale securities:

		Six-Month Period Ended June 30,	
		2017	2016
		(In thousands)

NOTE 4 - LOANS

The Company's loan portfolio is composed of two segments, loans initially accounted for under the amortized cost method (referred to as "originated and other" loans) and loans acquired (referred to as "acquired" loans). Acquired loans are further segregated between acquired BBVAPR loans and acquired Eurobank loans. Acquired Eurobank loans were purchased subject to loss-sharing agreements with the FDIC, which were terminated on February 6, 2017.

The composition of the Company's loan portfolio at June 30, 2017 and December 31, 2016 was as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Originated and Other Loans and Leases Held for Investment

The Company's originated and other loans held for investment are encompassed within four portfolio segments: mortgage, commercial, consumer, and auto and leasing.

The following tables present the aging of the recorded investment in gross originated and other loans held for investment at June 30, 2017 and December 31, 2016, by class of loans. Mortgage loans past due include delinquent loans in the GNMA buy-back option program. Servicers of loans underlying GNMA mortgage-backed securities must report as their own assets the defaulted loans that they have the option (but not the obligation) to repurchase, even when they elect not to exercise that option.

At June 30, 2017 and December 31, 2016, the Company had carrying balance of \$132.2 million and \$136.6 million, respectively, in originated and other loans held for investment granted to the Puerto Rico government, including its instrumentalities, public corporations and municipalities as part of the institutional commercial loan segment. All originated and other loans granted to the Puerto Rico government are general obligations of municipalities secured by ad valorem taxation, without limitation as to rate or amount, on all taxable property within the issuing municipalities. The good faith, credit and unlimited taxing power of each issuing municipality are pledged for the payment of its general obligations. On June 30, 2017, the Company was opportunistic and entered into an agreement to sell a performing originated municipal loan, which was due in July 2018, for \$28.8 million. The sale reduced near-term risk associated with a likely refinancing. The loan was moved to other loans held-for-sale at June 30, 2017 with a balance of \$33.7 million, and included a principal payment of \$4.8 million received by the Company in July 1, 2017. The sale transaction settled in July 5, 2017. In addition, on July 1, 2017, the Company received \$3.7 million principal payments from the remaining municipal loans.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Acquired Loans

Acquired loans were initially measured at fair value and subsequently accounted for under either ASC 310-30 or ASC 310-20 (Non-refundable fees and Other Costs). We have acquired loans in two acquisitions, BBVAPR and Eurobank.

*Acquired BBVAPR Loans**Accounted for under ASC 310-20 (Loans with revolving feature and/or acquired at a premium)*

Credit cards, retail and commercial revolving lines of credits, floor plans and performing auto loans with FICO scores over 660 acquired at a premium are accounted for under the guidance of ASC 310-20, which requires that any contractually required loan payment receivable in excess of the Company's initial investment in the loans be accreted into interest income on a level-yield basis over the life of the loan. Loans accounted for under ASC 310-20 are placed on non-accrual status when past due in accordance with the Company's non-accrual policy, and any accretion of discount or amortization of premium is discontinued. Acquired BBVAPR loans that were accounted for under the provisions of ASC 310-20 are removed from the acquired loan category at the end of the reporting period upon refinancing, renewal or normal re-underwriting.

The following tables present the aging of the recorded investment in gross acquired BBVAPR loans accounted for under ASC 310-20 as of June 30, 2017 and December 31, 2016, by class of loans:

Acquired BBVAPR Loans Accounted for under ASC 310-30 (including those accounted for under ASC 310-30 by analogy)

Acquired BBVAPR loans, except for credit cards, retail and commercial revolving lines of credits, floor plans and performing auto loans with FICO scores over 660 acquired at a premium, are accounted for by the Company in accordance with ASC 310-30.

The carrying amount corresponding to acquired BBVAPR loans with deteriorated credit quality, including those accounted under ASC 310-30 by analogy, in the statements of financial condition at June 30, 2017 and December 31, 2016 is as follows:

		June 30, 2017	December 31, 2016

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

At June 30, 2017 and December 31, 2016, the Company had \$66.6 million and \$66.2 million, respectively, in loans granted to the Puerto Rico government, including its instrumentalities, public corporations and municipalities as part of its acquired BBVAPR loans accounted for under ASC 310-30. These loans are primarily secured municipal general obligations and a \$10.6 million participation in a loan to the Puerto Rico Housing Finance Authority ("PRHFA") legally required to be repaid from abandoned or unclaimed funds at financial institutions that revert to the government under a Puerto Rico escheat law. Such loan defaulted on an annual principal payment in the third quarter of 2016. On July 1, 2017, the Company received \$5.2 million principal payments from acquired BBVAPR loans to municipalities.

The following tables describe the accretable yield and non-accretable discount activity of acquired BBVAPR loans accounted for under ASC 310-30 for the quarters and six-month periods ended June 30, 2017, and 2016:

	325		552
Total non-accrual acquired BBVAPR loans accounted for under ASC 310-20	1,994		2,795
Total non-accrual loans	\$ 95,163	\$	104,090

Loans accounted for under ASC 310-30 are excluded from the above table as they are considered to be performing due to the application of the accretion method, in which these loans will accrete interest income over the remaining life of the loans using estimated cash flow analyses or are accounted under the cost recovery method.

Delinquent residential mortgage loans insured or guaranteed under applicable FHA and VA programs are classified as non-performing loans when they become 90 days or more past due, but are not placed in non-accrual status until they become 18 months or more past due, since they are insured loans. Therefore, these loans are included as non-performing loans but excluded from non-accrual loans. In addition, these loans are excluded from the impairment analysis.

At June 30, 2017 and December 31, 2016, loans whose terms have been extended and which are classified as troubled-debt restructurings that are not included in non-accrual loans amounted to \$98.7 million and \$98.1 million, respectively, as they are performing under their new terms.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Impaired Loans

The Company evaluates all loans, some individually and others as homogeneous groups, for purposes of determining impairment. The total investment in impaired commercial loans that were individually evaluated for impairment was \$58.1 million and \$54.3 million at June 30, 2017 and December 31, 2016, respectively. The impairments on these commercial loans were measured based on the fair value of collateral or the present value of cash flows, including those identified as troubled-debt restructurings. The allowance for loan and lease losses for these impaired commercial loans amounted to \$1.9 million and \$1.8 million at June 30, 2017 and December 31, 2016, respectively. The total investment in impaired mortgage loans that were individually evaluated for impairment was \$87.0 million and \$91.6 million at June 30, 2017 and December 31, 2016, respectively. Impairment on mortgage loans assessed as troubled-debt restructurings was measured using the present value of cash flows. The allowance for loan losses for these impaired mortgage loans amounted to \$8.6 million and \$7.8 million at June 30, 2017 and December 31, 2016, respectively.

Originated and Other Loans and Leases Held for Investment

The Company's recorded investment in commercial and mortgage loans categorized as originated and other loans and leases held for investment that were individually evaluated for impairment and the related allowance for loan and lease losses at June 30, 2017 and December 31, 2016 are as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Credit Quality Indicators

The Company categorizes originated and other loans and acquired loans accounted for under ASC 310-20 into risk categories based on relevant information about the ability of borrowers to service their debt, such as economic conditions, portfolio risk characteristics, prior loss experience, and the results of periodic credit reviews of individual loans.

The Company uses the following definitions for risk ratings:

Pass: Loans classified as “pass” have a well-defined primary source of repayment very likely to be sufficient, with no apparent risk, strong financial position, minimal operating risk, profitability, liquidity and capitalization better than industry standards.

Special Mention: Loans classified as “special mention” have a potential weakness that deserves management’s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution’s credit position at some future date.

Substandard: Loans classified as “substandard” are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful: Loans classified as “doubtful” have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, questionable and improbable.

Loss: Loans classified as “loss” are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off this worthless loan even though partial recovery may be effected in the future.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass rated loans.

As of June 30, 2017 and December 31, 2016, and based on the most recent analysis performed, the risk category of gross originated and other loans and BBVAPR acquired loans accounted for under ASC 310-20 subject to risk rating by class of loans is as follows:

NOTE 5 – ALLOWANCE FOR LOAN AND LEASE LOSSES

The composition of the Company's allowance for loan and lease losses at June 30, 2017 and December 31, 2016 was as follows:

	June 30, 2017		December 31, 2016
	(In thousands)		
Allowance for loans and lease losses:			
Originated and other loans and leases held for investment:			
Mortgage	\$ 18,664	\$	17,344
Commercial	17,279		8,995
Consumer	14,981		13,067
Auto and leasing	18,742		19,463
Unallocated	-		431
Total allowance for originated and other loans and lease losses	69,666		59,300
Acquired BBVAPR loans:			
Accounted for under ASC 310-20 (Loans with revolving feature and/or acquired at a premium)			
Commercial	41		169
Consumer	2,623		3,028
Auto	684		1,103
	3,348		4,300
Accounted for under ASC 310-30 (Loans acquired with deteriorated credit quality, including those by analogy)			
Mortgage	4,141		2,682
Commercial	25,614		23,452
Auto	7,739		4,922
	37,494		31,056
Total allowance for acquired BBVAPR loans and lease losses	40,842		35,356
Acquired Eurobank loans:			
Loans secured by 1-4 family residential properties	13,651		11,947
Commercial	8,131		9,328
Consumer	5		6
Total allowance for acquired Eurobank loan and lease losses	21,787		21,281
Total allowance for loan and lease losses	\$ 132,295	\$	115,937

The Company maintains an allowance for loan and lease losses at a level that management considers adequate to provide for probable losses based upon an evaluation of known and inherent risks. The Company's allowance for loan and lease losses policy provides for a detailed quarterly analysis of probable losses. The analysis includes a review of historical loan loss experience, value of underlying collateral, current economic conditions, financial condition of borrowers and other pertinent factors. While management uses available information in estimating probable loan losses, future additions to the allowance may be required based on factors beyond the Company's control. We also maintain an allowance for loan losses on acquired loans when: (i) for loans accounted for under ASC 310-30, there is deterioration in credit quality subsequent to acquisition, and (ii) for loans accounted for under ASC 310-20, the inherent losses in the loans exceed the remaining credit discount recorded at the time of acquisition.

Loans Accounted for under ASC 310-30 (including those accounted for under ASC 310-30 by analogy)

For loans accounted for under ASC 310-30, as part of the evaluation of actual versus expected cash flows, the Company assesses on a quarterly basis the credit quality of these loans based on delinquency, severity factors and risk ratings, among other assumptions. Migration and credit quality trends are assessed at the pool level, by comparing information from the latest evaluation period through the end of the reporting period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 6- FDIC INDEMNIFICATION ASSET, TRUE-UP PAYMENT OBLIGATION, AND FDIC SHARED-LOSS EXPENSE

On February 6, 2017, the Bank and the FDIC agreed to terminate the single family and commercial shared-loss agreements related to the FDIC assisted acquisition of Eurobank on April 30, 2010. As part of the loss share termination transaction, the Bank made a payment of \$10.1 million to the FDIC and recorded a net benefit of \$1.4 million. Such termination payment took into account the anticipated reimbursements over the life of the shared-loss agreements and the true-up payment liability of the Bank anticipated at the end of the ten year term of the single family shared-loss agreement. All rights and obligations of the parties under the shared-loss agreements terminated as of the closing date of the agreement.

Pursuant to the terms of the shared-loss agreements, the FDIC would reimburse the Bank for 80% of all qualifying losses with respect to assets covered by such agreements, and the Bank would reimburse the FDIC for 80% of qualifying recoveries with respect to losses for which the FDIC reimbursed the Bank. The single family shared-loss agreement provided for FDIC loss sharing and the Bank's reimbursement to the FDIC to last for ten years, and the commercial shared-loss agreement provided for FDIC loss sharing and the Bank's reimbursement to the FDIC to last for five years, with additional recovery sharing for three years thereafter.

The following table presents the activity in the FDIC indemnification asset and true-up payment obligation for the quarters and six-month periods ended June 30, 2017 and 2016:

	Quarter Ended June 30,		Six-Month Period Ended June 30,

NOTE 7 — DERIVATIVES

The following table presents the Company's derivative assets and liabilities at June 30, 2017 and December 31, 2016:

	June 30,	December 31,
	2017	2016
	(In thousands)	
Derivative assets:		
Interest rate swaps not designated as hedges	\$ 893	\$ 1,187
Interest rate caps	64	143
	\$ 957	\$ 1,330
Derivative liabilities:		
Interest rate swaps designated as cash flow hedges	923	1,004
Interest rate swaps not designated as hedges	893	1,187
Interest rate caps	65	139
Other	-	107
	\$ 1,881	\$ 2,437

Interest Rate Swaps

The Company enters into interest rate swap contracts to hedge the variability of future interest cash flows of forecasted wholesale borrowings attributable to changes in a predetermined variable index rate. The interest rate swaps effectively fix the Company's interest payments on an amount of forecasted interest expense attributable to the variable index rate corresponding to the swap notional stated rate. These swaps are designated as cash flow hedges for the forecasted wholesale borrowing transactions, are properly documented as such, and therefore, qualify for cash flow hedge accounting. Any gain or loss associated with the effective portion of the cash flow hedges is recognized in other comprehensive income (loss) and is subsequently reclassified into operations in the period during which the hedged forecasted transactions affect earnings. Changes in the fair value of these derivatives are recorded in accumulated other comprehensive income to the extent there is no significant ineffectiveness in the cash flow hedging relationships. Currently, the Company does not expect to reclassify any amount included in other comprehensive income (loss) related to these interest rate swaps to operations in the next twelve months.

The following table shows a summary of these swaps and their terms at June 30, 2017:

Type	Notional Amount (In thousands)	Fixed Rate	Variable Rate Index	Trade Date	Settlement Date	Maturity Date
Interest Rate Swaps	\$ 35,856	2.4210%	1-Month LIBOR	07/03/13	07/03/13	08/01/23
	\$ 35,856					

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

An accumulated unrealized loss of \$923 thousand and \$1.0 million was recognized in accumulated other comprehensive income (loss) related to the valuation of these swaps at June 30, 2017 and December 31, 2016, respectively, and the related liability is being reflected in the consolidated statements of financial condition.

At June 30, 2017 and December 31, 2016, interest rate swaps not designated as hedging instruments that were offered to clients represented an asset of \$893 thousand and \$1.2 million, respectively, and were included as part of derivative assets in the consolidated statements of financial position. The credit risk to these clients stemming from these derivatives, if any, is not material. At June 30, 2017 and December 31, 2016, interest rate swaps not designated as hedging instruments that are the mirror-images of the derivatives offered to clients represented a liability of \$893 thousand and \$1.2 million, respectively, and were included as part of derivative liabilities in the consolidated statements of financial condition.

The following table shows a summary of these interest rate swaps not designated as hedging instruments and their terms at June 30, 2017:

Type	Notional Amount (In thousands)	Fixed Rate	Variable Rate Index	Settlement Date	Maturity Date
Interest Rate Swaps - Derivatives Offered to Clients	\$		1-Month LIBOR	04/11/09	04/11/19
	\$	12,500	5.5050%		
	\$	12,500			
Interest Rate Swaps - Mirror Image Derivatives	\$		1-Month LIBOR	04/11/09	04/11/19
	\$	12,500	5.5050%		
	\$	12,500			

Interest Rate Caps

The Company has entered into interest rate cap transactions with various clients with floating-rate debt who wish to protect their financial results against increases in interest rates. In these cases, the Company simultaneously enters into mirror-image interest rate cap transactions with financial counterparties. None of these cap transactions qualify for hedge accounting, and therefore, they are marked to market through earnings. As of June 30, 2017 and December 31, 2016, the outstanding total notional amount of interest rate caps was \$135.6 million and \$136.1 million, respectively.

At June 30, 2017 and December 31, 2016, the interest rate caps sold to clients represented a liability of \$65 thousand and \$139 thousand, respectively, and were included as part of derivative liabilities in the consolidated statements of financial condition. At June 30, 2017 and December 31, 2016, the interest rate caps purchased as mirror-images represented an asset of \$64 thousand and \$143 thousand, respectively, and were included as part of derivative assets in the consolidated statements of financial condition.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 8 — ACCRUED INTEREST RECEIVABLE AND OTHER ASSETS

Accrued interest receivable at June 30, 2017 and December 31, 2016 consists of the following:

		June 30, 2017		December 31, 2016
		(In thousands)		
Loans, excluding acquired loans	\$	16,835	\$	16,706
Investments		2,963		3,521
	\$	19,798	\$	20,227

Other assets at June 30, 2017 and December 31, 2016 consist of the following:

		June 30, 2017		December 31, 2016
		(In thousands)		
Prepaid expenses	\$	17,117	\$	17,096
Other repossessed assets		3,225		3,224
Core deposit and customer relationship intangibles		5,424		6,160
Mortgage tax credits		6,277		6,277
Investment in Statutory Trust		1,083		1,083
Accounts receivable and other assets		33,162		46,525
	\$	66,288	\$	80,365

Prepaid expenses amounting to \$17.1 million at both June 30, 2017 and December 31, 2016, include prepaid municipal, property and income taxes aggregating to \$11.7 million and \$12.5 million, respectively.

In connection with the FDIC-assisted acquisition and the BBVAPR Acquisition, the Company recorded a core deposit intangible representing the value of checking and savings deposits acquired. At June 30, 2017 and December 31, 2016 this core deposit intangible amounted to \$3.8 million and \$4.3 million, respectively. In addition, the Company recorded a customer relationship intangible representing the value of customer relationships acquired with the acquisition of the securities broker-dealer and insurance agency in the BBVAPR Acquisition. At June 30, 2017 and December 31, 2016, this customer relationship intangible amounted to \$1.6 million and \$1.9 million, respectively.

Other repossessed assets totaled \$3.2 million at June 30, 2017 and December 31, 2016, respectively, include repossessed automobiles amounting to \$3.0 million, respectively, which are recorded at their net realizable value.

At June 30, 2017 and December 31, 2016, tax credits for the Company totaled \$6.3 million for both periods. These tax credits do not have an expiration date.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 9— DEPOSITS AND RELATED INTEREST

Total deposits, including related accrued interest payable, as of June 30, 2017 and December 31, 2016 consist of the following:

	June 30, 2017	December 31, 2016
	(In thousands)	
Non-interest bearing demand deposits	\$ 845,375	\$ 848,502
Interest-bearing savings and demand deposits	2,115,290	2,219,452

Brokered deposits	568,911	576,395
Total deposits	\$ 4,582,686	\$ 4,664,487

Brokered deposits include \$515.6 million in certificates of deposits and \$53.3 million in money market accounts at June 30, 2017, and \$508.4 million in certificates of deposits and \$68.0 million in money market accounts at December 31, 2016.

The weighted average interest rate of the Company's deposits was 0.65% and 0.62% at June 30, 2017 and December 31, 2016 respectively. Interest expense for the quarters and six-month periods ended June 30, 2017 and 2016 was as follows:

	Quarter Ended June 30,		Six-Month Period Ended June 30,	
	2017	2016	2017	2016
	(In thousands)			
Demand and savings deposits	\$ 2,939	\$ 3,184	\$ 5,848	\$ 6,026
Certificates of deposit	4,713	4,183	9,157	8,465
	\$ 7,652	\$ 7,367	\$ 15,005	\$ 14,491

At December 31, 2016, demand and interest-bearing deposits and certificates of deposit included uncollateralized deposits of Puerto Rico Cash & Money Market Fund, Inc. ("the Fund"), which amounted to \$15.3 million, with a

weighted average rate of 0.77%. On April 3, 2017, the Fund was liquidated in anticipation of its dissolution.

At June 30, 2017 and December 31, 2016, time deposits in denominations of \$250 thousand or higher, excluding accrued interest and unamortized discounts, amounted to \$360.9 million and \$344.0 million, respectively. Such amounts include public funds time deposits from various Puerto Rico government municipalities, agencies, and corporations of \$16.8 million and \$2.1 million at a weighted average rate of 0.63% and 0.50% at June 30, 2017 and December 31, 2016, respectively.

At June 30, 2017 and December 31, 2016, total public fund deposits from various Puerto Rico government municipalities, agencies, and corporations amounted to \$123.3 million and \$170.7 million, respectively. These public funds were collateralized with commercial loans amounting to \$215.8 million and \$209.2 million at June 30, 2017 and December 31, 2016, respectively.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Excluding accrued interest of approximately \$1.9 million, the scheduled maturities of certificates of deposit at June 30, 2017 and December 31, 2016 are as follows:

	June 30, 2017	December 31, 2016	
	(In thousands)		
Within one year:			
Three (3) months or less	\$ 262,406	\$	277,621
Over 3 months through 1 year	590,861		534,548
	853,267		812,169
Over 1 through 2 years	444,176		488,440
Over 2 through 3 years	195,287		154,545
Over 3 through 4 years	38,872		29,701
Over 4 through 5 years	35,145		41,949
	\$ 1,566,747	\$	1,526,804

The table of scheduled maturities of certificates of deposits above includes brokered-deposits and individual retirement accounts.

The aggregate amount of overdrafts in demand deposit accounts that were reclassified to loans amounted to \$761 thousand and \$575 thousand as of June 30, 2017 and December 31, 2016, respectively.

NOTE 10 — BORROWINGS AND RELATED INTEREST

Securities Sold under Agreements to Repurchase

At June 30, 2017, securities underlying agreements to repurchase were delivered to, and are being held by, the counterparties with whom the repurchase agreements were transacted. The counterparties have agreed to resell to the Company the same or similar securities at the maturity of these agreements. The purpose of these transactions is to provide financing for the Company's securities portfolio.

Edgar Filing: OFG BANCORP - Form 10-Q

At June 30, 2017 and December 31, 2016, securities sold under agreements to repurchase (classified by counterparty), excluding accrued interest in the amount of \$642 thousand and \$1.5 million, respectively, were as follows:

	June 30, 2017		December 31, 2016	
	Borrowing Balance	Fair Value of Underlying Collateral	Borrowing Balance	Fair Value of Underlying Collateral

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table shows a summary of the Company's repurchase agreements and their terms, excluding accrued interest in the amount of \$642 thousand, at June 30, 2017:

Year of Maturity		Borrowing Balance (In thousands)	Weighted- Average Coupon	Settlement Date	Maturity Date
2017	\$	37,001	1.65%	6/27/2017	7/3/2017
		57,281	1.55%	6/28/2017	7/5/2017
		66,068	1.50%	6/28/2017	7/7/2017
2018		182,500	1.42%	12/10/2012	4/29/2018
2019		50,000	1.72%	3/2/2017	9/3/2019
2020		60,000	1.85%	3/2/2017	3/2/2020
	\$	452,850	1.56%		

All the repurchase agreements referred above with maturity up to the date of this report were renewed by the Company.

A repurchase agreement in the original amount of \$500 million with an original term of ten years was modified in February 2016 to terminate, before maturity, \$268.0 million of this repurchase agreement at a cost of \$12.0 million, included as a loss on early extinguishment of debt in the consolidated statements of operations. The remaining balance of this repurchase agreement of \$232.0 million matured on March 2, 2017. At June 30, 2017, repurchase agreement in the original amount of \$25.0 million and \$75.0 million, respectively, with original term of June 2019 and December 2019, respectively, were terminated before maturity at a cost of \$80 thousand, included as a loss on early extinguishment of debt in consolidated statement of operations.

The following table presents the repurchase liability associated with the repurchase agreement transactions (excluding accrued interest) by maturity. Also, it includes the carrying value and approximate market value of collateral (excluding accrued interest) at June 30, 2017 and December 31, 2016. There was no cash collateral at June 30, 2017 and December 31, 2016.

Advances from the Federal Home Loan Bank of New York

Advances are received from the Federal Home Loan Bank of New York (the “FHLB-NY”) under an agreement whereby the Company is required to maintain a minimum amount of qualifying collateral with a fair value of at least 110% of the outstanding advances. At June 30, 2017 and December 31, 2016, these advances were secured by mortgage and commercial loans amounting to \$1.3 billion and \$1.4 billion, respectively. Also, at June 30, 2017 and December 31, 2016, the Company had an additional borrowing capacity with the FHLB-NY of \$935.5 million and \$1.2 billion, respectively. At June 30, 2017 and December 31, 2016, the weighted average remaining maturity of FHLB’s advances was 5.2 months and 10.6 months, respectively. The original terms of these advances range between one day and seven years, and the FHLB-NY does not have the right to exercise put options at par on any advances outstanding as of June 30, 2017.

The following table shows a summary of these advances and their terms, excluding accrued interest in the amount of \$308 thousand, at June 30, 2017:

Year of Maturity	Borrowing Balance (In thousands)	Weighted- Average Coupon	Settlement Date	Maturity Date

\$	137,232	1.70%		

All of the advances referred to above with maturity dates up to the date of this report were renewed as one-month short-term advances.

Subordinated Capital Notes

Subordinated capital notes amounted to \$36.1 million at June 30, 2017 and December 31, 2016, for both periods.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 11 – OFFSETTING OF FINANCIAL ASSETS AND LIABILITIES

The Company's derivatives are subject to agreements which allow a right of set-off with each respective counterparty. In addition, the Company's securities purchased under agreements to resell and securities sold under agreements to repurchase have a right of set-off with the respective counterparty under the supplemental terms of the master repurchase agreements. In an event of default, each party has a right of set-off against the other party for amounts owed in the related agreements and any other amount or obligation owed in respect of any other agreement or transaction between them. Security collateral posted to open and maintain a master netting agreement with a counterparty, in the form of cash and securities, may from time to time be segregated in an account at a third-party custodian pursuant to a an account control agreement.

The following table presents the potential effect of rights of set-off associated with the Company's recognized financial assets and liabilities at June 30, 2017 and December 31, 2016:

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 12 — INCOME TAXES

At June 30, 2017 and December 31, 2016, the Company's net deferred tax asset amounted to \$116.2 million and \$124.2 million, respectively. In assessing the realizability of the deferred tax asset, management considers whether it is more likely than not that some portion or the entire deferred tax asset will not be realized. The ultimate realization of the deferred tax asset is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax asset are deductible, management believes it is more likely than not that the Company will realize the deferred tax asset, net of the existing valuation allowances recorded at June 30, 2017 and December 31, 2016. The amount of the deferred tax asset that is considered realizable could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced.

At June 30, 2017 and December 31, 2016, Oriental International Bank Inc. ("OIB"), the Bank's international banking entity subsidiary, had \$6 thousand and \$109 thousand, respectively, in income tax effect of unrecognized gain on available-for-sale securities included in other comprehensive income. Following the change in OIB's applicable tax rate from 5% to 0% as a result of a Puerto Rico law adopted in 2011, this remaining tax balance will flow through income as these securities are repaid or sold in future periods. During the quarters ended June 30, 2017 and 2016, \$95 thousand and \$8 thousand, respectively, related to this residual tax effect from OIB was reclassified from accumulated other comprehensive income (loss) into income tax provision. During the six-month period ended June 30, 2017 and 2016, \$103 thousand and \$16 thousand, respectively, related to this residual tax effect from OIB was reclassified from accumulated other comprehensive income (loss) into income tax provision.

The Company classifies unrecognized tax benefits in other liabilities. These gross unrecognized tax benefits would affect the effective tax rate if realized. At June 30, 2017 the amount of unrecognized tax benefits was \$2.1 million (December 31, 2016 - \$2.0 million). The Company had accrued \$80 thousand at June 30, 2017 (December 31, 2016 - \$229 thousand) for the payment of interest and penalties relating to unrecognized tax benefits.

The Company is subject to the dispositions of the 2011 Puerto Rico Internal Revenue Code, as amended (the "Code"). The Code imposes a maximum corporate tax rate of 39%. The Company maintained a lower effective tax rate for the six-month periods ended June 30, 2017 and 2016 of 29.0% and 28.8%, respectively.

Income tax expense for the quarters ended June 30, 2017 and 2016 was \$4.0 million and \$5.9 million, respectively. Income tax expense for the six-month periods ended June 30, 2017 and 2016 was \$13.2 million and \$11.5 million,

respectively.

OFG BANCORP**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)****NOTE 13 — REGULATORY CAPITAL REQUIREMENTS*****Regulatory Capital Requirements***

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by federal and Puerto Rico banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Pursuant to the Dodd-Frank Act, federal banking regulators adopted capital rules that became effective January 1, 2015 for the Company and the Bank (subject to certain phase-in periods through January 1, 2019) and that replaced their general risk-based capital rules, advanced approaches rule, market risk rule, and leverage rules. Among other matters, the new capital rules: (i) introduce a new capital measure called "Common Equity Tier 1" ("CET1") and related regulatory capital ratio of CET1 to risk-weighted assets; (ii) specify that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting certain revised requirements; (iii) mandate that most deductions/adjustments to regulatory capital measures be made to CET1 and not to the other components of capital; and (iv) expand the scope of the deductions from and adjustments to capital as compared to prior regulations. The current capital rules prescribe a new standardized approach for risk weightings that expand the risk-weighting categories from the current four Basel I-derived categories (0%, 20%, 50% and 100%) to a larger and more risk-sensitive number of categories, depending on the nature of the assets, and resulting in higher risk weights for a variety of asset classes.

Pursuant to the current capital rules, the minimum capital ratios requirements are as follows:

4.5% CET1 to risk-weighted assets;

6.0% Tier 1 capital (that is, CET1 *plus* Additional Tier 1 capital) to risk-weighted assets;

8.0% Total capital (that is, Tier 1 capital *plus* Tier 2 capital) to risk-weighted assets; and

4.0% Tier 1 capital to average consolidated assets as reported on consolidated financial statements (known as the "leverage ratio").

As of June 30, 2017 and December 31, 2016, the Company and the Bank met all capital adequacy requirements to which they are subject. As of June 30, 2017 and December 31, 2016, the Bank is “well capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well capitalized,” an institution must maintain minimum CET1 risk-based, Tier 1 risk-based, total risk-based, and Tier 1 leverage ratios as set forth in the tables presented below.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 14 – STOCKHOLDERS' EQUITY

Additional Paid-in Capital

Additional paid-in capital represents contributed capital in excess of par value of common and preferred stock net of the costs of issuance. As of both periods, June 30, 2017 and December 31, 2016 accumulated issuance costs charged against additional paid in capital amounted to \$13.6 million and \$10.1 million for preferred and common stock, respectively.

Legal Surplus

The Puerto Rico Banking Act requires that a minimum of 10% of the Bank's net income or loss for the year be transferred to a reserve fund until such fund (legal surplus) equals the total paid in capital on common and preferred stock. At June 30, 2017 and December 31, 2016, the Bank's legal surplus amounted to \$79.5 million and \$76.3 million, respectively. The amount transferred to the legal surplus account is not available for the payment of dividends to shareholders.

Treasury Stock

Under the Company's current stock repurchase program it is authorized to purchase in the open market up to \$7.7 million of its outstanding shares of common stock. The shares of common stock repurchased are to be held by the Company as treasury shares. During the six-month periods ended June 30, 2017 and 2016, the Company did not purchase any shares under the program.

At June 30, 2017 the number of shares that may yet be purchased under the \$70 million program is estimated at 773,085 and was calculated by dividing the remaining balance of \$7.7 million by \$10.00 (closing price of the Company common stock at June 30, 2017).

The activity in connection with common shares held in treasury by the Company for the six-month periods ended June 30, 2017 and 2016 is set forth below:

	Six-Month Period Ended June 30,			
	2017			2016
	Shares	Dollar Amount	Shares	Dollar Amount

NOTE 16 – EARNINGS PER COMMON SHARE

The calculation of earnings per common share for the quarters and six-month periods ended June 30, 2017 and 2016 is as follows:

	Quarter Ended June 30, 2017	Quarter Ended June 30, 2016	Six-Month Period Ended June 30, 2017	Six-Month Period Ended June 30, 2016
	(In thousands, except per share data)			
Net income	\$ 17,104	\$ 14,339	\$ 32,254	\$ 28,510
Less: Dividends on preferred stock				
Non-convertible preferred stock (Series A, B, and D)	(1,629)	(1,629)	(3,256)	(3,256)
Convertible preferred stock (Series C)	(1,837)	(1,837)	(3,675)	(3,675)
Income available to common shareholders	\$ 13,638	\$ 10,873	\$ 25,323	\$ 21,579
Effect of assumed conversion of the convertible preferred stock	1,837	1,837	3,675	3,675
Income available to common shareholders assuming conversion	\$ 15,475	\$ 12,710	\$ 28,998	\$ 25,254
Weighted average common shares and share equivalents:				
Average common shares outstanding	43,947	43,914	43,931	43,906
Effect of dilutive securities:				
Average potential common shares-options	15	43	24	37
Average potential common shares-assuming conversion of convertible preferred stock	7,138	7,138	7,138	7,138
Total weighted average common shares outstanding and equivalents	\$ 51,100	\$ 51,095	\$ 51,093	\$ 51,081
	\$ 0.30	\$ 0.25	\$ 0.58	\$ 0.49

**Earnings per common share -
basic**

**Earnings per common share -
diluted**

\$	0.30	\$	0.25	\$	0.57	\$	0.49
----	-------------	----	-------------	----	-------------	----	-------------

In computing diluted earnings per common share, the 84,000 shares of convertible preferred stock, which remain outstanding at June 30, 2017, with a conversion rate, subject to certain conditions, of 86.4225 shares of common stock per share, were included as average potential common shares from the date they were issued and outstanding. Moreover, in computing diluted earnings per common share, the dividends declared during the quarters and six-month periods ended June 30, 2017 and 2016 on the convertible preferred stock were added back as income available to common shareholders.

For the quarters ended June 30, 2017 and 2016, weighted-average stock options with an anti-dilutive effect on earnings per share not included in the calculation amounted to 967,041 and 957,743, respectively. For the six-month period ended June 30, 2017 and 2016, weighted-average stock options with an anti-dilutive effect on earnings per share not included in the calculation amounted to 890,472 and 957,783, respectively.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 17 – GUARANTEES

At June 30, 2017 and December 31, 2016, the unamortized balance of the obligations undertaken in issuing the guarantees under standby letters of credit represented a liability of \$13.4 million and \$4.0 million, respectively.

As a result of the BBVAPR Acquisition, the Company assumed a liability for residential mortgage loans sold subject to credit recourse, pursuant to FNMA's residential mortgage loan sales and securitization programs. At June 30, 2017 and December 31, 2016, the unpaid principal balance of residential mortgage loans sold subject to credit recourse was \$6.6 million and \$20.1 million, respectively.

The following table shows the changes in the Company's liability for estimated losses from these credit recourse agreements, included in the consolidated statements of financial condition during the quarters and six-month periods ended June 30, 2017 and 2016.

	Quarter Ended June 30,		Six-Month Period Ended June 30,	
	2017	2016	2017	2016
	(In thousands)			
Balance at beginning of period	\$ 570	\$ 181	\$ 710	\$ 439
Net (charge-offs/terminations) recoveries	(111)	(19)	(251)	(277)
Balance at end of period	\$ 459	\$ 162	\$ 459	\$ 162

The estimated losses to be absorbed under the credit recourse arrangements were recorded as a liability when the credit recourse was assumed, and are updated on a quarterly basis. The expected loss, which represents the amount expected to be lost on a given loan, considers the probability of default and loss severity. The probability of default represents the probability that a loan in good standing would become 120 days delinquent, in which case the Company is obligated to repurchase the loan. The recourse obligation will be fully extinguished before the end of 2017.

If a borrower defaults, pursuant to the credit recourse provided, the Company is required to repurchase the loan or reimburse the third party investor for the incurred loss. The maximum potential amount of future payments that the Company would be required to make under the recourse arrangements is equivalent to the total outstanding balance of the residential mortgage loans serviced with recourse and interest, if applicable. During the quarters ended June 30, 2017 and 2016, the Company repurchased approximately \$66 thousand and \$83 thousand, respectively of unpaid principal balance in mortgage loans subject to the credit recourse provisions. During the six-month periods ended June 30, 2017 and 2016, the Company repurchased approximately \$107 thousand and \$288 thousand, respectively of unpaid principal balance in mortgage loans subject to the credit recourse provisions. If a borrower defaults, the

Company has rights to the underlying collateral securing the mortgage loan. The Company suffers losses on these mortgage loans when the proceeds from a foreclosure sale of the collateral property are less than the outstanding principal balance of the loan, any uncollected interest advanced, and the costs of holding and disposing the related property. At June 30, 2017, the Company's liability for estimated credit losses related to loans sold with credit recourse amounted to \$459 thousand (December 31, 2016– \$710 thousand).

When the Company sells or securitizes mortgage loans, it generally makes customary representations and warranties regarding the characteristics of the loans sold. The Company's mortgage operations division groups conforming mortgage loans into pools which are exchanged for FNMA and GNMA mortgage-backed securities, which are generally sold to private investors, or are sold directly to FNMA or other private investors for cash. As required under such mortgage backed securities programs, quality review procedures are performed by the Company to ensure that asset guideline qualifications are met. To the extent the loans do not meet specified characteristics, the Company may be required to repurchase such loans or indemnify for losses and bear any subsequent loss related to the loans. During the quarter ended June 30, 2017, the Company repurchased \$1.4 million (June 30, 2016 – \$817 thousand) of unpaid principal balance in mortgage loans, excluding mortgage loans subject to credit recourse provision referred above. During both the six-month periods ended June 30, 2017 and June 30, 2016, the Company repurchased \$2.3 million of unpaid principal balance in mortgage loans, excluding mortgage loans subject to credit recourse provision referred before.

During the quarters ended June 30, 2017 and 2016, the Company recognized \$254 thousand and \$92 thousand, respectively, in losses from the repurchase of residential mortgage loans sold subject to credit recourse, and \$283 thousand and \$329 thousand, respectively, from the repurchase of residential mortgage loans as a result of breaches of the customary representations and warranties. During the six-month periods ended June 30, 2017 and 2016, the Company recognized \$354 thousand and \$111 thousand, respectively, in losses

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

from the repurchase of residential mortgage loans sold subject to credit recourse, and \$590 thousand and \$830 thousand, respectively, from the repurchase of residential mortgage loans as a result of breaches of the customary representations and warranties.

Servicing agreements relating to the mortgage-backed securities programs of FNMA and GNMA, and to mortgage loans sold or serviced to certain other investors, including the FHLMC, require the Company to advance funds to make scheduled payments of principal, interest, taxes and insurance, if such payments have not been received from the borrowers. At June 30, 2017, the Company serviced \$845.7 million in mortgage loans for third-parties. The Company generally recovers funds advanced pursuant to these arrangements from the mortgage owner, from liquidation proceeds when the mortgage loan is foreclosed or, in the case of FHA/VA loans, under the applicable FHA and VA insurance and guarantees programs. However, in the meantime, the Company must absorb the cost of the funds it advances during the time the advance is outstanding. The Company must also bear the costs of attempting to collect on delinquent and defaulted mortgage loans. In addition, if a defaulted loan is not cured, the mortgage loan would be canceled as part of the foreclosure proceedings and the Company would not receive any future servicing income with respect to that loan. At June 30, 2017, the outstanding balance of funds advanced by the Company under such mortgage loan servicing agreements was approximately \$366 thousand (December 31, 2016 - \$334 thousand). To the extent the mortgage loans underlying the Company's servicing portfolio experience increased delinquencies, the Company would be required to dedicate additional cash resources to comply with its obligation to advance funds as well as incur additional administrative costs related to increases in collection efforts.

NOTE 18— COMMITMENTS AND CONTINGENCIES

Loan Commitments

In the normal course of business, the Company becomes a party to credit-related financial instruments with off-balance-sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby and commercial letters of credit, and financial guarantees. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the consolidated statements of financial condition. The contract or notional amount of those instruments reflects the extent of the Company's involvement in particular types of financial instruments.

The Company's exposure to credit losses in the event of nonperformance by the counterparty to the financial instrument for commitments to extend credit, including commitments under credit card arrangements, and commercial letters of credit is represented by the contractual notional amounts of those instruments, which do not necessarily represent the amounts potentially subject to risk. In addition, the measurement of the risks associated with these

instruments is meaningful only when all related and offsetting transactions are identified. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Credit-related financial instruments at June 30, 2017 and December 31, 2016 were as follows:

	June 30, 2017	December 31, 2016
	(In thousands)	
Commitments to extend credit	\$ 434,051	\$ 492,885
Commercial letters of credit	1,501	2,721

Commitments to extend credit represent agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Company upon the extension of credit, is based on management's credit evaluation of the counterparty.

At June 30, 2017 and December 31, 2016, commitments to extend credit consisted mainly of undisbursed available amounts on commercial lines of credit, construction loans, and revolving credit card arrangements. Since many of the unused commitments are expected to expire unused or be only partially used, the total amount of these unused commitments does not necessarily represent future cash requirements. These lines of credit had a reserve of \$667 thousand at June 30, 2017 and December 31, 2016.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Commercial letters of credit are issued or confirmed to guarantee payment of customers' payables or receivables in short-term international trade transactions. Generally, drafts will be drawn when the underlying transaction is consummated as intended. However, the short-term nature of this instrument serves to mitigate the risk associated with these contracts.

The summary of instruments that are considered financial guarantees in accordance with the authoritative guidance related to guarantor's accounting and disclosure requirements for guarantees, including indirect guarantees of indebtedness of others, at June 30, 2017 and December 31, 2016, is as follows:

		June 30, 2017		December 31, 2016
		(In thousands)		
Standby letters of credit and financial guarantees	\$	13,420	\$	4,041
Loans sold with recourse		6,640		20,126

Standby letters of credit and financial guarantees are written conditional commitments issued by the Company to guarantee the payment and/or performance of a customer to a third party ("beneficiary"). If the customer fails to comply with the agreement, the beneficiary may draw on the standby letter of credit or financial guarantee as a remedy. The amount of credit risk involved in issuing letters of credit in the event of nonperformance is the face amount of the letter of credit or financial guarantee. These guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the customer.

Lease Commitments

The Company has entered into various operating lease agreements for branch facilities and administrative offices. Rent expense for the quarters ended June 30, 2017 and 2016, amounted to \$2.5 million and \$2.3 million, respectively. For the six-month periods ended June 30, 2017 and 2016, rent expense amounted to \$4.5 million and \$4.4 million, respectively, and is included in the "occupancy and equipment" caption in the unaudited consolidated statements of operations. Future rental commitments under leases in effect at June 30, 2017, exclusive of taxes, insurance, and maintenance expenses payable by the Company, are summarized as follows:

<u>Year Ending December 31,</u>		Minimum Rent (In thousands)
2017	\$	3,665
2018		6,969
2019		6,928
2020		6,201
2021		5,371
Thereafter	\$	7,881
		37,015

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Contingencies

The Company and its subsidiaries are defendants in a number of legal proceedings incidental to their business. In the ordinary course of business, the Company and its subsidiaries are also subject to governmental and regulatory examinations. Certain subsidiaries of the Company, including the Bank (and its subsidiary OIB), Oriental Financial Services, and Oriental Insurance, are subject to regulation by various U.S., Puerto Rico and other regulators.

The Company seeks to resolve all litigation and regulatory matters in the manner management believes is in the best interests of the Company and its shareholders, and contests allegations of liability or wrongdoing and, where applicable, the amount of damages or scope of any penalties or other relief sought as appropriate in each pending matter.

Subject to the accounting and disclosure framework under the provisions of ASC 450, it is the opinion of the Company's management, based on current knowledge and after taking into account its current legal accruals, that the eventual outcome of all matters would not be likely to have a material adverse effect on the consolidated statements of financial condition of the Company. Nonetheless, given the substantial or indeterminate amounts sought in certain of these matters, and the inherent unpredictability of such matters, an adverse outcome in certain of these matters could, from time to time, have a material adverse effect on the Company's consolidated results of operations or cash flows in particular quarterly or annual periods. The Company has evaluated all litigation and regulatory matters where the likelihood of a potential loss is deemed reasonably possible. The Company has determined that the estimate of the reasonably possible loss is not significant.

NOTE 19 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company follows the fair value measurement framework under U.S. Generally Accepted Accounting Principles ("GAAP").

Fair Value Measurement

The fair value measurement framework defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This framework also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Money market investments

The fair value of money market investments is based on the carrying amounts reflected in the consolidated statements of financial condition as these are reasonable estimates of fair value given the short-term nature of the instruments.

Investment securities

The fair value of investment securities is based on quoted market prices, when available, or market prices provided by Interactive Data Corporation ("IDC"), and independent, well-recognized pricing company. Such securities are classified as Level 1 or Level 2 depending on the basis for determining fair value. If listed prices or quotes are not available, fair value is based upon externally developed models that use both observable and unobservable inputs depending on the market activity of the instrument, and such securities are classified as Level 3. At June 30, 2017 and December 31, 2016, the Company did not have investment securities classified as Level 3.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Derivative instruments

The fair value of the interest rate swaps is largely a function of the financial market's expectations regarding the future direction of interest rates. Accordingly, current market values are not necessarily indicative of the future impact of derivative instruments on earnings. This will depend, for the most part, on the shape of the yield curve, the level of interest rates, as well as the expectations for rates in the future. The fair value of most of these derivative instruments is based on observable market parameters, which include discounting the instruments' cash flows using the U.S. dollar LIBOR-based discount rates, and also applying yield curves that account for the industry sector and the credit rating of the counterparty and/or the Company.

Certain other derivative instruments with limited market activity are valued using externally developed models that consider unobservable market parameters. Based on their valuation methodology, derivative instruments are classified as Level 2 or Level 3. In the past, the Company offered its customers certificates of deposit with an option tied to the performance of the S&P Index and used equity indexed option agreements with major broker-dealers to manage its exposure to changes in this index. Their fair value was obtained through the use of an external based valuation that was thoroughly evaluated and adopted by management as its measurement tool for these options. The payoff of these options was linked to the average value of the S&P Index on a specific set of dates during the life of the option. The methodology used an average rate option or a cash-settled option whose payoff was based on the difference between the expected average value of the S&P Index during the remaining life of the option and the strike price at inception. The assumptions, which were uncertain and required a degree of judgment, included primarily S&P Index volatility, forward interest rate projections, estimated index dividend payout, and leverage. At June 30, 2017 and December 31, 2016, there were no options tied to the S&P Index outstanding.

Servicing assets

Servicing assets do not trade in an active market with readily observable prices. Servicing assets are priced using a discounted cash flow model. The valuation model considers servicing fees, portfolio characteristics, prepayment assumptions, delinquency rates, late charges, other ancillary revenues, cost to service and other economic factors. Due to the unobservable nature of certain valuation inputs, the servicing rights are classified as Level 3.

Impaired Loans

Impaired loans are carried at the present value of expected future cash flows using the loan's existing rate in a discounted cash flow calculation, or the fair value of the collateral if the loan is collateral-dependent. Expected cash flows are based on internal inputs reflecting expected default rates on contractual cash flows. This method of estimating fair value does not incorporate the exit-price concept of fair value described in ASC 820-10 and would generally result in a higher value than the exit-price approach. For loans measured using the estimated fair value of collateral less costs to sell, fair value is generally determined based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations, in accordance with the provisions of ASC 310-10-35 less disposition costs. Currently, the associated loans considered impaired are classified as Level 3.

Foreclosed real estate

Foreclosed real estate includes real estate properties securing residential mortgage and commercial loans. The fair value of foreclosed real estate may be determined using an external appraisal, broker price option or an internal valuation. These foreclosed assets are classified as Level 3 given certain internal adjustments that may be made to external appraisals.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Other repossessed assets

Other repossessed assets include repossessed automobiles. The fair value of the repossessed automobiles may be determined using internal valuation and an external appraisal. These repossessed assets are classified as Level 3 given certain internal adjustments that may be made to external appraisals.

Assets and liabilities measured at fair value on a recurring and non-recurring basis are summarized below:

During the quarters and six-month periods ended June 30, 2017 and 2016, there were purchases and sales of assets and liabilities measured at fair value on a recurring basis. There were no transfers into and out of Level 1 and Level 2 fair value measurements during such periods.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The table below presents quantitative information for all assets and liabilities measured at fair value on a recurring and non-recurring basis using significant unobservable inputs (Level 3) at June 30, 2017:

		June 30, 2017		
	Fair Value (In thousands)	Valuation Technique	Unobservable Input	Range
Servicing assets	\$ 9,866	Cash flow valuation	Constant prepayment rate	4.18% - 9.07%
			Discount rate	10.00% - 12.00%
Collateral dependant impaired loans	\$ 25,242	Fair value of property or collateral	Appraised value less disposition costs	22.20% - 36.20%
Other non-collateral dependant impaired loans	\$ 32,847	Cash flow valuation	Discount rate	4.15% - 10.50%
Foreclosed real estate	\$ 50,223	Fair value of property or collateral	Appraised value less disposition costs	22.20% - 36.20%
Other repossessed assets	\$ 3,225	Fair value of property or collateral	Estimated net realizable value less disposition costs	32.00% - 68.00%

Information about Sensitivity to Changes in Significant Unobservable Inputs

Servicing assets – The significant unobservable inputs used in the fair value measurement of the Company’s servicing assets are constant prepayment rates and discount rates. Changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or offset the sensitivities. Mortgage banking activities, a component of total banking and financial service revenue in the consolidated statements of operations, include the changes from period to period in the fair value of the mortgage loan servicing rights, which may result from changes in the valuation model inputs or assumptions (principally reflecting

changes in discount rates and prepayment speed assumptions) and other changes, including changes due to collection/realization of expected cash flows.

Fair Value of Financial Instruments

The information about the estimated fair value of financial instruments required by GAAP is presented hereunder. The aggregate fair value amounts presented do not necessarily represent management's estimate of the underlying value of the Company.

The estimated fair value is subjective in nature, involves uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could affect these fair value estimates. The fair value estimates do not take into consideration the value of future business and the value of assets and liabilities that are not financial instruments. Other significant tangible and intangible assets that are not considered financial instruments are the value of long-term customer relationships of retail deposits, and premises and equipment.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The estimated fair value and carrying value of the Company's financial instruments at June 30, 2017 and December 31, 2016 is as follows:

	June 30, 2017		December 31, 2016	
	Fair Value	Carrying Value	Fair Value	Carrying Value

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following methods and assumptions were used to estimate the fair values of significant financial instruments at June 30, 2017 and December 31, 2016:

- Cash and cash equivalents (including money market investments and time deposits with other banks), restricted cash, accrued interest receivable, accounts receivable and other assets and accrued expenses and other liabilities have been valued at the carrying amounts reflected in the consolidated statements of financial condition as these are reasonable estimates of fair value given the short-term nature of the instruments.
- Investments in FHLB-NY stock are valued at their redemption value.
- The fair value of investment securities, including trading securities and other investments, is based on quoted market prices, when available or prices provided from contracted pricing providers, or market prices provided by recognized broker-dealers. If listed prices or quotes are not available, fair value is based upon externally developed models that use both observable and unobservable inputs depending on the market activity of the instrument.
- The fair value of the FDIC indemnification asset represented the present value of the net estimated cash payments expected to be received from the FDIC for future losses on covered assets based on the credit assumptions on estimated cash flows for each covered asset and the loss sharing percentages. The FDIC shared-loss agreements were terminated on February 6, 2017. Such termination takes into account the anticipated reimbursements over the life of the shared-loss agreements and the true-up payment liability of the Bank anticipated at the end of the ten year term of the single family shared-loss agreement. Therefore, at June 30, 2017, the Company had no FDIC indemnification asset.
- The fair value of servicing asset is estimated by using a cash flow valuation model which calculates the present value of estimated future net servicing cash flows, taking into consideration actual and expected loan prepayment rates, discount rates, servicing costs, and other economic factors, which are determined based on current market conditions.
- The fair values of the derivative instruments are provided by valuation experts and counterparties. Certain derivatives with limited market activity are valued using externally developed models that consider unobservable market parameters. In the past, the Company offered its customers certificates of deposit with an option tied to the performance of the S&P Index and used equity indexed option agreements with major broker-dealers to manage its exposure to changes in this index. Their fair value was obtained through the use of an external based valuation that

was thoroughly evaluated and adopted by management as its measurement tool for these options. The payoff of these options was linked to the average value of the S&P Index on a specific set of dates during the life of the option. The methodology used an average rate option or a cash-settled option whose payoff was based on the difference between the expected average value of the S&P Index during the remaining life of the option and the strike price at inception. The assumptions, which were uncertain and required a degree of judgment, included primarily S&P Index volatility, forward interest rate projections, estimated index dividend payout, and leverage. At June 30, 2017, there were no options tied to S&P Index outstanding.

- Fair value of derivative liabilities, which include interest rate swaps and forward-settlement swaps, are based on the net discounted value of the contractual projected cash flows of both the pay-fixed receive-variable legs of the contracts. The projected cash flows are based on the forward yield curve, and discounted using current estimated market rates.
- The fair value of the loan portfolio (including loans held-for-sale) is estimated by segregating by type, such as mortgage, commercial, consumer, auto and leasing. Each loan segment is further segmented into fixed and adjustable interest rates and by performing and non-performing categories. The fair value of performing loans is calculated by discounting contractual cash flows, adjusted for prepayment estimates (voluntary and involuntary), if any, using estimated current market discount rates that reflect the credit and interest rate risk inherent in the loan. This fair value is not currently an indication of an exit price as that type of assumption could result in a different fair value estimate. Non-performing loans have been valued at the carrying amounts.
- The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is based on the discounted value of the contractual cash flows, using estimated current market discount rates for deposits of similar remaining maturities.
- The fair value of long-term borrowings, which include securities sold under agreements to repurchase, advances from FHLB, and subordinated capital notes is based on the discounted value of the contractual cash flows using current estimated market discount rates for borrowings with similar terms, remaining maturities and put dates.

OFG BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 20 – BUSINESS SEGMENTS

The Company segregates its businesses into the following major reportable segments of business: Banking, Wealth Management, and Treasury. Management established the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. Other factors such as the Company's organization, nature of its products, distribution channels and economic characteristics of the products were also considered in the determination of the reportable segments. The Company measures the performance of these reportable segments based on pre-established goals of different financial parameters such as net income, net interest income, loan production, and fees generated. The Company's methodology for allocating non-interest expenses among segments is based on several factors such as revenue, employee headcount, occupied space, dedicated services or time, among others. These factors are reviewed on a periodical basis and may change if the conditions warrant.

Banking includes the Bank's branches and traditional banking products such as deposits and commercial, consumer and mortgage loans. Mortgage banking activities are carried out by the Bank's mortgage banking division, whose principal activity is to originate mortgage loans for the Company's own portfolio. As part of its mortgage banking activities, the Company may sell loans directly into the secondary market or securitize conforming loans into mortgage-backed securities.

Wealth Management is comprised of the Bank's trust division, Oriental Financial Services, Oriental Insurance, and OPC. The core operations of this segment are financial planning, money management and investment banking, brokerage services, insurance sales activity, corporate and individual trust and retirement services, as well as retirement plan administration services.

The Treasury segment encompasses all of the Company's asset/liability management activities, such as purchases and sales of investment securities, interest rate risk management, derivatives, and borrowings. Intersegment sales and transfers, if any, are accounted for as if the sales or transfers were to third parties, that is, at current market prices.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

INTRODUCTION

The following discussion of the Company's financial condition and results of operations should be read in conjunction with the "Selected Financial Data" and the Company's consolidated financial statements and related notes. This discussion and analysis contains forward-looking statements. Please see "Forward-Looking Statements" and the risk factors set forth in our Form 10-K for the year ended December 31, 2016 (the "2016 Form 10-K"), for discussion of the uncertainties, risks and assumptions associated with these statements.

The Company is a publicly-owned financial holding company that provides a full range of banking and financial services through its subsidiaries, including commercial, consumer, auto and mortgage lending; checking and savings accounts; financial planning, insurance and securities brokerage services; and corporate and individual trust and retirement services. The Company operates through three major business segments: Banking, Wealth Management, and Treasury, and distinguishes itself based on quality service. The Company has 48 branches in Puerto Rico and a subsidiary in Boca Raton, Florida. The Company's long-term goal is to strengthen its banking and financial services franchise by expanding its lending businesses, increasing the level of integration in the marketing and delivery of banking and financial services, maintaining effective asset-liability management, growing non-interest revenue from banking and financial services, and improving operating efficiencies.

The Company's diversified mix of businesses and products generates both the interest income traditionally associated with a banking institution and non-interest income traditionally associated with a financial services institution (generated by such businesses as securities brokerage, fiduciary services, investment banking, insurance agency, and retirement plan administration). Although all of these businesses, to varying degrees, are affected by interest rate and financial market fluctuations and other external factors, the Company's commitment is to continue producing a balanced and growing revenue stream.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make a number of judgments, estimates and assumptions that affect the reported amount of assets, liabilities, income and expenses in the consolidated financial statements. Understanding our accounting policies and the extent to which we use management judgment and estimates in applying these policies is integral to understanding our financial statements. We provide a summary of our significant accounting policies in "Note 1—Summary of Significant Accounting Policies" of our 2016 Form 10-K.

In the "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates" section of our 2016 Form 10-K, we identified the following accounting policies as critical

because they require significant judgments and assumptions about highly complex and inherently uncertain matters and the use of reasonably different estimates and assumptions could have a material impact on our reported results of operations or financial condition:

- Loans and lease receivables
- Allowance for loan and lease losses
- Financial instruments

We evaluate our critical accounting estimates and judgments on an ongoing basis and update them as necessary based on changing conditions. Management has reviewed and approved these critical accounting policies and has discussed its judgments and assumptions with the Audit Committee of our Board of Directors. There have been no material changes in the methods used to formulate these critical accounting estimates from those discussed in our 2016 Form 10-K.

FINANCIAL HIGHLIGHTS OF THE SECOND QUARTER OF 2017

- **Net income available to shareholders increased.** The Company reported \$13.6 million, or \$0.30 per share fully diluted, compared to \$11.7 million, or \$0.26 per share fully diluted, in the first quarter of 2017 and \$10.9 million, or \$0.25 per share fully diluted, in the year ago quarter.
- **Puerto Rico municipality exposure reduced.** The Company opportunistically sold a \$38.0 million performing term loan with a municipality, resulting in a \$4.3 million pre-tax loss. The sale reduced its exposure to this sector by approximately 27% from March 31, 2017, to \$140.8 million after scheduled principal payments in July.
- **Balance sheet de-levered further.** The Company unwound a 1.48% \$100.0 million repurchase agreement, in line with its strategy to reduce borrowings. Related to this, the Company sold \$166.0 million of mortgage backed securities. These transactions resulted in a tax-advantaged gain of \$6.9 million.
- **Effective tax rate optimized.** The Company now forecasts its 2017 effective tax rate to be 29.15% as compared to its previously stated 38% estimate. The new rate is similar to its 2016 rate and resulted in a \$2.1 million beneficial adjustment to estimated income tax in the second quarter of 2017.
- **Net interest margin (NIM) improved.** Due to a significant reduction in the cost of borrowings and higher yields on variable rate commercial loans and on cash, NIM increased 8 basis points from the first quarter of 2017 to 5.18%.
- **Credit quality and major performance ratios remained solid.** The non-performing loan and total delinquency rates fell to the lowest levels in the last five quarters. Return on average assets was 1.09%, return on average tangible common stockholders' equity was 8.01%, and the efficiency ratio was 56.49%.
- **Capital buildup continued.** All major capital metrics advanced compared to the preceding and year ago quarters. Tangible book value per common share at \$15.51 was up 1.2% and 3.7%, respectively, while tangible common equity ratio at 11.09% was up 43 and 117 basis points, respectively

ANALYSIS OF RESULTS OF OPERATIONS

The following tables show major categories of interest-earning assets and interest-bearing liabilities, their respective interest income, expenses, yields and costs, and their impact on net interest income due to changes in volume and rates for the quarters and six-month periods ended June 30, 2017 and 2016:

TABLE 1 - ANALYSIS OF NET INTEREST INCOME AND CHANGES DUE TO VOLUME/RATE FOR THE QUARTERS ENDED JUNE 30, 2017 AND 2016

	Interest		Average rate		Average balance	
	June 2017	June 2016	June 2017	June 2016	June 2017	June 2016
(Dollars in thousands)

Net Interest Income

Net interest income is a function of the difference between rates earned on the Company's interest-earning assets and rates paid on its interest-bearing liabilities (interest rate spread) and the relative amounts of its interest earning assets and interest-bearing liabilities (interest rate margin). The Company constantly monitors the composition and re-pricing of its assets and liabilities to maintain its net interest income at adequate levels.

Comparison for the quarters ended June 30, 2017 and 2016

Table 1 above shows the major categories of interest-earning assets and interest-bearing liabilities, their respective interest income, expenses, yields and costs, and their impact on net interest income due to changes in volume and rates for the quarters ended June 30, 2017 and 2016.

Net interest income of \$75.6 million increased 3.1%, or \$2.3 million, from \$73.3 million, reflecting a decrease in interest expenses of 28.9%, or \$4.2 million, partially offset by a decrease in interest income of 2.2%, or \$2.0 million.

The decrease in interest expenses was primarily a result of the repayment at maturity of (i) a \$232.0 million 4.78% repurchase agreement in March 2017 that generated interest expense savings of \$2.5 million and (ii) \$227.0 million of short term FHLB advances during the second quarter of 2016 that generated interest expense savings of \$1.5 million. The decrease in interest expenses was partially offset by an increase in the deposit interest expense of \$285 thousand.

The decrease in interest income was caused primarily by a decrease of \$6.8 million in the interest income from the acquired BBVAPR and Eurobank loan portfolios as such loans continue to be repaid. This decrease was partially offset by an increase of \$4.3 million in the interest income from originated loans from higher yields in the commercial and retail loan portfolios and an increase of \$469 thousand in the interest income from investments as a result of increased yields on interest bearing cash and money market investments.

Interest rate spread increased 55 basis points from 4.55% to 5.10%. This increase is mainly due to the net effect of a 32 basis point increase in the average yield of interest-earning assets from 5.57% to 5.89% and to 23 basis point decrease in average costs of interest-bearing liabilities from 1.02% to 0.79%.

Interest income decreased to \$85.9 million from \$87.9 million. Such decrease reflected a decrease of \$7.8 million from a lower volume of interest-earning assets, partially offset by an increase of \$5.9 million from higher interest rates

on interest-earning assets. Interest income from loans decreased 3.1% to \$77.2 million, reflecting a decrease of \$7.4 million from a lower volume of loans, partially offset by an increase of \$4.9 million from higher interest rates. Interest income from investments increased 5.7% to \$8.7 million, reflecting an increase of \$945 thousand attributable to higher interest rates on cash balances and a decrease of \$476 thousand attributable to a lower volume.

The average balance of total interest-earning assets was \$5.849 billion, a decrease of 7.6% from the same period in 2016. The average balances of loans and investments decreased 8.3% and 5.8%, respectively, reflecting a decrease in the average acquired loan portfolio of \$296.2 million due to repayments and maturities and the sale of \$166.0 million mortgage-backed securities and \$39.2 million US Treasury securities during the quarter ended June 30, 2017.

Interest expense decreased to \$10.4 million from \$14.6 million, due to the decreases of \$3.1 million and \$1.2 million in the volume and interest rate of interest-bearing liabilities, respectively. The decreased volume and rate of repurchase agreements decreased interest expenses by \$1.1 million and \$1.5 million, respectively, and the decrease in the volume of other borrowings decreased interest expenses by \$2.0 million. The decrease in interest expenses was partially offset by an increase of \$285 thousand in deposit interest expenses from higher interest rates. The total cost of borrowings decreased 99 basis points to 1.78% from 2.77%. The cost of deposits slightly increased 6 basis point to 0.66%, when compared to 0.60% for the same period in 2016.

Comparison of six-month periods ended June 30, 2017 and 2016

Table 1A above shows the major categories of interest-earning assets and interest-bearing liabilities, their respective interest income, expenses, yields and costs, and their impact on net interest income due to changes in volume and rates for the six-month periods ended June 30, 2017 and 2016.

Net interest income of \$150.2 million increased 1.3%, or \$1.8 million, from \$148.3 million, reflecting a decrease in interest expense of 29.1%, or \$9.0 million, partially offset by a decrease in interest income of 4.0%, or \$7.1 million.

The decrease in interest expenses was primarily a result of the repayment (i) of \$268.0 million in part in February 2016 and \$232.0 million at maturity in March 2017 of a 4.78% repurchase agreement that generated interest expense savings of \$5.4 million and (ii) of \$227 million at maturity of short term FHLB advances classified as other borrowings during the quarter that generated interest expense savings of \$3.1 million. The decrease in interest expenses was partially offset by an increase in the deposit interest expense of \$514 thousand.

The decrease in interest income was caused primarily by a decrease of \$14.3 million in the interest income from the acquired BBVAPR and Eurobank loan portfolios as such loans continue to be repaid. This decrease was partially offset by an increase of \$8.4 million in the interest income from originated loans from higher yields in the commercial and retail loan portfolios. Interest income from investments decreased \$1.2 million in the as a result of a decrease in the investment securities portfolio volume.

Interest rate spread increased 47 basis points from 4.60% to 5.07%. This increase is mainly due to the net effect of a 24 basis point increase in the average yield of interest-earning assets from 5.66% to 5.90% and to 23 basis point decrease in average costs of interest-bearing liabilities from 1.06% to 0.83%.

Interest income decreased to \$172.1 million from \$179.2 million. Such decrease reflects a decrease of \$13.0 million from a lower volume of interest-earning assets, partially offset by an increase of \$5.9 million from higher interest rates on interest-earning assets. Interest income from loans decreased 3.7% to \$154.9 million, reflecting a decrease of \$11.7 million from a lower volume of loans, partially offset by an increase of \$5.8 million from higher interest rates. Interest income from investments decreased 6.3% to \$17.2 million, reflecting a decrease of \$1.3 million attributable to a lower volume and an increase of \$144 thousand attributable to higher interest rates on interest bearing cash and money market investments.

The average balance of total interest-earning assets was \$5.887 billion, a decrease of 7.3% from the same period in 2016. The average balances of loans and investments decreased 7.4% and 7.1%, respectively, reflecting a decrease in

the average acquired loan portfolio of \$250.0 million due to repayments and maturities, a decrease in the average originated loan portfolio of \$81.4 million as a result of the sale of the \$200 million participation in the PREPA line of credit in the fourth quarter of 2016. The decrease in average investments reflects the sale of \$166.0 million mortgage-backed securities and \$39.2 million US Treasury securities during the second quarter of 2017.

Interest expense decreased to \$21.9 million from \$30.9 million, due to the decreases of \$7.0 million and \$2.0 million from decreases in the volume and interest rate of interest-bearing liabilities, respectively. The decreased volume and rate of repurchase agreements decreased interest expenses by \$2.8 million and \$2.6 million, respectively, and the decrease in the volume of other borrowings decreased interest expenses by \$4.1 million. The decrease in interest expenses was partially offset by an increase of \$514 thousand in deposit interest expenses from higher interest rates. The total cost of borrowings decreased 78 basis points to 2.10% from 2.88%. The cost of deposits slightly increased 3 basis point to 0.65%, when compared to 0.62% for the same period in 2016.

Non-Interest Income

Non-interest income is affected by the level of trust assets under management, transactions generated by clients' financial assets serviced by the securities broker-dealer and insurance agency subsidiaries, the level of mortgage banking activities, and the fees generated from loans and deposit accounts.

Comparison of quarters ended June 30, 2017 and 2016

As shown in Table 2 above, the Company recorded non-interest income, net, in the amount of \$24.9 million, compared to \$15.2 million, an increase of 64.2%, or \$9.7 million.

Banking service revenue, which consists primarily of fees generated by deposit accounts, electronic banking services, and customer services increased 2.3% to \$10.5 million from \$10.2 million. The increase is mainly due to an increase in account analysis services fees of \$163 thousand and an increase in debit card interchange income fees of \$81 thousand.

Wealth management revenue, which consists of commissions and fees from fiduciary activities, and securities brokerage and insurance activities, decreased 7.5% to \$6.5 million, as compared to \$7.0 million in the same period in 2016. Such decrease reflects a reduction in securities brokerage activities and the liquidation of the Puerto Rico Cash & Money Market Fund on April 3, 2017. Client trading volume in the broker-dealer subsidiary continued its downward trend due to the general investor uncertainty in the Puerto Rico market.

Income generated from mortgage banking activities decreased 6.3% to \$959 thousand, compared to \$1.0 million, mainly from the decrease in price of the mortgage servicing asset.

During the second quarter of 2017, the Company took advantage of the market conditions and sold \$166.0 million of its mortgage-backed securities, generating a gain of \$6.9 million. As a result of this sale, the Company repaid before maturity \$100 million of repurchase agreements at a cost of \$80 thousand.

Comparison of six-month periods ended June 30, 2017 and 2016

The Company recorded non-interest income, net in the amount of \$44.0 million, compared to \$28.7 million for the same period in 2016, an increase of 53.4%, or \$15.3 million.

Banking service revenue, which consists primarily of fees generated by deposit accounts, electronic banking services, and customer services, increased 3.7% to \$21.1 million, from \$20.3 million for the same period in 2016. The increase is mainly due to increases in account analysis services fees of \$426 thousand, debit card interchange income of \$230 thousand, and card management service fees of \$106 thousand.

Wealth management revenue, which consists of commissions and fees from fiduciary activities, and securities brokerage and insurance activities, decreased 3.5% to \$12.7 million, as compared to \$13.2 million in the same period in 2016. Such decrease reflects a reduction in securities brokerage activities and the liquidation of the Puerto Rico Cash & Money Market Fund on April 3, 2017. Client trading volume in the broker-dealer subsidiary continued its downward trend due to the general investor uncertainty in the Puerto Rico market.

Income generated from mortgage banking activities decreased 17.7% to \$1.5 million, compared to \$1.9 million, mainly from the decrease in price of the mortgage servicing asset.

During the six-month period ended June 30, 2017, the Company entered into an agreement with the FDIC to terminate two shared-loss agreements covering certain assets, resulting in a benefit of \$1.4 million, recorded in the consolidated statement of operations. During the six-month period ended 2016, the Company recorded expenses of \$7.4 million related to the FDIC shared-loss agreement.

During the six-month period ended June 30, 2017, the Company took advantage of market conditions and sold \$166.0 million of its mortgage-backed securities, generating a gain of \$6.9 million. As a result of this sale, the Company unwound \$100 million of repurchase agreements at a cost of \$80 thousand, included as a loss on early extinguishment of debt in the consolidated statements of operations. During the same period in 2016, the Company sold \$277.2 million in mortgage-backed securities and \$11.1 million in Puerto Rico government bonds, resulting in a gain of \$12.2 million. This transaction resulted in the repayment before maturity of \$268.0 million of a repurchase agreement at a cost of \$12.0 million, included as a loss on early extinguishment of debt in the consolidated statements of operations.

TABLE 3 - NON-INTEREST EXPENSES SUMMARY

	Quarter Ended June 30,			Six-Month Period Ended June 30,		
	2017	2016	Variance %	2017	2016	Variance %
	(Dollars in thousands)					
Compensation and employee benefits	\$ 19,317	\$ 18,441	4.8%	\$ 39,664	\$ 38,696	2.5%

Printing, postage, stationery and supplies	665	600	10.8%	1,303	1,325	-1.7%
Director and investor relations	274	301	-9.0%	554	579	-4.3%
Credit related expenses	2,217	2,203	0.6%	4,843	4,458	8.6%
Other operating expenses	2,154	1,321	63.1%	3,850	2,618	47.1%
Total non-interest expenses	\$ 52,816	\$ 53,825	-1.9%	\$ 104,500	\$ 108,682	-3.8%
Relevant ratios and data:						
Efficiency ratio	56.49%	58.76%		56.32%	59.16%	
Compensation and benefits to non-interest expense	36.57%	34.43%		37.96%	35.71%	
Compensation to average total assets owned (annualized)	1.23%	1.09%		1.25%	1.13%	
Average number of employees	1,462	1,451		1,449	1,460	
Average compensation per employee	\$ 13.21	\$ 12.80		\$ 27.4	\$ 26.6	
Average loans per average employee	\$ 2,825	\$ 3,104		\$ 2,854	\$ 3,057	

Non-Interest Expenses

Comparison of quarters ended June 30, 2017 and 2016

Non-interest expense was \$52.8 million, representing a decrease of 1.9% compared to \$53.8 million.

Loss on sale of foreclosed real estate and other repossessed assets decreased 57.1% to \$1.8 million, as compared to \$4.2 million in the second quarter of 2016 due to lower markdowns, \$1.5 million in savings resulting from the loss-share termination, and to fewer losses on the sale of foreclosed real estate and other repossessed assets.

Insurance expense decreased \$2.0 million, to \$1.2 million, as a result of a change in the calculation method of the FDIC Savings Association Insurance Fund (SAIF) insurance that became effective during the third quarter of 2016.

Loan servicing and clearing expenses decreased \$696 thousand, mainly due to a reduction of \$611 thousand in mortgage servicing expense from the migration to in-house servicing during 2016.

The decreases in the foregoing non-interest expenses were partially offset by increases in compensation and employee benefits, in occupancy and equipment expenses, and in electronic banking charges.

Compensation and employee benefits increased \$876 thousand, mainly due to an increase in provision for bonus of \$936 thousand from an increase in average employees.

Occupancy and equipment expenses increased \$583 thousand, primarily due to costs associated with consolidating office space during the second quarter of 2017.

Electronic banking charges increased \$503 thousand, primarily as a result of an increase of \$538 thousand in credit cards processing services.

The efficiency ratio improved to 56.49% from 58.76%. The efficiency ratio measures how much of the Company's revenues is used to pay operating expenses. The Company computes its efficiency ratio by dividing non-interest expenses by the sum of its net interest income and non-interest income, but excluding gains on the sale of investment securities, derivatives gains or losses, FDIC shared-loss benefit/expense, losses on the early extinguishment of debt, other gains and losses, and other income that may be considered volatile in nature. Management believes that the exclusion of those items permits consistent comparability. Amounts presented as part of non-interest income (losses) that are excluded from efficiency ratio computation for the quarters ended June 30, 2017 and 2016 amounted to \$7.0

million income and a \$3.1 million loss, respectively.

Comparison of six-month periods ended June 30, 2017 and 2016

Non-interest expense for the six-month period ended June 30, 2017 was \$104.5 million, representing a decrease of 3.8% compared to \$108.7 million.

Insurance expense decreased \$3.5 million, to \$2.8 million, as a result of a change in the calculation method of the FDIC Savings Association Insurance Fund (SAIF) insurance. The change was effective beginning with the June 30, 2016 invoice, which was received during the third quarter of 2016.
