FORWARD-LOOKING INFORMATION

This Annual Report on Form 10-K contains forward-looking statements based on beliefs of our management as of the filing date of this Form 10-K. These forward-looking statements include, among other things, statements related to:

• Our strategy for growth, future revenues, earnings, cash flow, uses of cash and other measures of financial performance, and market position;

• Our business strategy and investment priorities in relation to competitive offerings and evolving consumer demand trends affecting our products and markets, worldwide economic and capital market conditions, fluctuations in currency exchange rates, and current and future general regional economic conditions for fiscal year 2016 and beyond;

• The scope, nature or impact of acquisition, strategic alliance and divestiture activities;

• Our business and product plans and development and product innovation and their impact on future operating results and anticipated operating costs for fiscal year 2016 and beyond;

• Market opportunities and our ability to take advantage of them;

• Our plans for business restructuring (including, but not limited to, the exit from our OEM business and the reorganization of Lifesize), capital investments and research and development;

• Our expectations regarding our share buyback and dividend programs;

• The sufficiency of our cash and cash equivalents, cash generated from operations, and available borrowings under our bank lines of credit to fund capital expenditures and working capital needs; and

• The effects of changes in tax, environmental and other laws and regulations in the United States and other countries in which we operate.

Forward-looking statements also include, among others, those statements including the words "anticipate", "believe", "could", "estimate", "expect", "forecast", "intend", "may", "plan", "project", "predict", "should", "will" and similar language. These statements reflect our views and assumptions as of the date of this Annual Report on Form 10-K. All forward-looking statements involve risks and uncertainties that could cause our actual performance to differ materially from those anticipated in the forward-looking statements depending on a variety of factors. Important information as to these factors can be found in this Annual Report on Form 10-K under the headings of "Management's Discussion and Analysis of Financial Condition and Results of Operations", "Overview", "Critical Accounting Estimates" and "Liquidity and Capital Resources", among others. Factors that might cause or contribute to such differences include, but are not limited to, those discussed under Item 1A, Risk Factors, as well as elsewhere in this Annual Report on Form 10-K and in our other filings with the U.S. Securities and Exchange Commission, or "SEC." You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this Annual Report on Form 10-K. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document.

Table of Contents

PART I

ITEM 1. BUSINESS

Company Overview

Logitech is a world leader in products that connect people to the digital experiences they care about. Spanning multiple computing, communication and entertainment platforms, we develop and market innovative hardware and software products that enable or enhance digital navigation, music and video entertainment, gaming, social networking, and audio and video communication over the Internet and home-entertainment control.

Logitech was founded in Switzerland in 1981, and Logitech International S.A. has been the parent holding company of Logitech since 1988. Logitech International S.A. is a Swiss holding company with its registered office in Apples, Switzerland, which conducts its business through subsidiaries in Americas (including North and South America), EMEA (Europe, Middle East, Africa) and Asia Pacific (including, among other countries, China, Taiwan, Japan and Australia). Shares of Logitech International S.A. are listed on both the Nasdaq Global Select Market, under the trading symbol LOGI, and the SIX Swiss Exchange, under the trading symbol LOGN. References in this Form 10-K to the "Company," "Logitech," "we," "our," and "us" refer to Logitech International S.A. and its consolidated subsidiaries. In this Annual Report on Form 10-K for the fiscal year ended March 31, 2015, we have made the following changes to our preliminary results furnished to the United States Securities and Exchange Commission ("SEC") in the Current Report on Form 8-K on April 23, 2015: (a) Goodwill impairment charge of \$122.7 million related to its video conferencing reporting unit; (b) Accrual of \$3.25 million related to SEC investigation settlement discussions; (c) Balance sheet reclassification of \$0.5 million related to an increase in inventory and accrual; and (d) Changes in deferred tax assets of \$0.3 million related to the changes above. See Part II—"Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations" of this annual report for more details.

These changes were due to the completion of our evaluation of our video conferencing reporting unit's goodwill impairment and other subsequent events that we adjusted through the date of filing this annual report. The possibility of these adjustments were noted in the Current Report on Form 8-K and earning release on April 23, 2015. Also, subsequently on May 14, 2015, the registrant announced the goodwill impairment charge expected at that time to be between \$100 million and \$123 million.

Logitech has two operating segments, peripherals and video conferencing.

Peripherals

Our peripherals segment, which includes retail and Original Equipment Manufacturer (OEM) channels, encompasses the design, manufacturing and marketing of peripherals for personal computers (PCs), tablets and other digital platforms. We sell our peripherals products to a network of distributors, retailers and OEMs.

Retail Channel

Our retail peripherals product categories, which we classify as growth, profit maximization or non-strategic, are defined as follows:

Retail Strategic - Growth Categories:

• Mobile Speakers: Comprised of portable wireless Bluetooth speakers.

• Gaming: Includes Gaming mice, keyboards, headsets, gamepads and steering wheels.

• Video Collaboration: Includes primarily video products and certain headset products that can connect small and medium sized user groups.

• Tablet & Other Accessories: Includes keyboards and covers for tablets and smartphones as well as other accessories for mobile devices.

Retail Strategic - Profit Maximization Categories:

• Pointing Devices: Includes PC-related mice, touchpads and presenters.

• Keyboards & Combos: Includes keyboards and keyboards/mice combos for various platforms.

• Audio-PC & Wearables: Includes PC speakers, PC headsets and in-ear headphones.

• PC Webcams: Includes retail webcam products.

Table of Contents

Home Control: Includes our Harmony remote control and home automation products.

Non-Strategic:

This category, which represented less than 1% of our sales in fiscal year 2015, comprises a variety of products which we are in the process of transitioning out of, or have already transitioned out of, because they are no longer strategic to our business. Products currently included in this category are television (TV) camera, Digital Video Security (DVS), other gaming products not included in our Growth Category and music products, including over-ear headphones, TV and home speakers, Google TV products, and some other PC Keyboards & Desktops accessories.

We sell our peripherals products to a network of retailers, including direct sales to retailers and indirect sales through distributors. Our worldwide retail network includes consumer electronics distributors, retailers, mass merchandisers, specialty electronics stores, computer and telecommunications stores, value-added resellers and online merchants. Sales of peripherals to our retail channels were 89%, 88% and 87% of our net sales for the fiscal years 2015, 2014 and 2013, respectively. The large majority of our revenues have historically been derived from sales of our retail peripherals products for use by consumers.

OEM Channel

Our OEM customers include the majority of the world's largest PC manufacturers. For the fiscal years 2015, 2014 and 2013, Sales to OEM customers were 6% of our net sales of each year, and declined 17% year over year in fiscal year 2015. While the OEM business has been an important part of our history, we see limited opportunities for profitable growth. Given our heightened focus on growing our Retail Strategic business, we plan to exit OEM.

Video Conferencing

Our video conferencing segment encompasses the design, manufacturing and marketing of Lifesize-branded video conferencing products, infrastructure and services for small and medium size enterprises, public sector, and other business markets. Video conferencing products include SaaS video service, scalable HD (high-definition) video communication endpoints, video conferencing infrastructure software and appliances to support large-scale video deployments, and services to support these products. During the past few years, the competitive landscape of the video conferencing industry has changed drastically, characterized by increased competition combined with rapid shifting from infrastructure component business to Cloud-based services. During the second quarter of fiscal year 2015, Lifesize launched its Cloud offerings and we continue to see significant momentum for this Cloud-based video communication offering. On the other hand, we experienced significant sales declines in our infrastructure component business, especially during the fourth quarter of fiscal year 2015. While the sales of our Cloud offering are growing rapidly, they are not large enough to offset the declining video conferencing infrastructure business. As a result of these changes, we made a strategic decision to de-emphasize the legacy offerings more quickly than planned to enable maximum traction of the Cloud-based offerings. The video conferencing segment maintains a dedicated marketing and sales organization, which sells Lifesize services and products worldwide. Video conferencing product development and product management organizations are separate, but coordinated with our peripherals business. We sell our video conferencing products and services to distributors, value-added resellers, OEMs, and direct enterprise customers. Sales of video conferencing products were 5%, 6%, and 7% of our net sales in the fiscal year 2015, 2014 and 2013, respectively. Our video conferencing segment also has infrastructure functions, including finance, legal, information technology and facilities that are separate, but coordinated with our peripherals business.

Industry Overview

Historically, Logitech's business has been driven by the same trends that drove the adoption of desktop and laptop PCs for consumers, businesses and institutional applications, including the growth in affordable processing power, communications bandwidth, the increased accessibility of digital content, and the growing and pervasive use of the Internet for productivity, communication and entertainment. These trends have created opportunities for new applications, new users and dramatically richer interaction between people and digital content. In both mature and emerging markets, a large installed base of business and enterprise customers purchase peripherals for their PCs. In the last several years, the PC market has changed dramatically and there continues to be weakness in the global market for new PCs. This dynamic has negatively impacted net sales in our PC-related categories, except for Gaming and Video Collaboration products. The gaming platform continues to show strong growth as online gaming and

multi-platform experiences gain greater popularity. The decline in popularity of desktop PCs, combined with the increased interest in smaller, touch-interfaced computing devices (such as smartphones and tablets) has rapidly

6

Table of Contents

changed the market for PC peripherals, while creating opportunities for new peripheral categories. Although the installed base of PC users is large in our traditional mature markets (the United States, Canada, Western and Nordic Europe, Japan and Australia), consumer demand for PCs has declined in recent years and we believe this trend will continue in future years.

At the same time, there has been growth in the popularity of smaller, mobile computing devices, such as tablets and smartphones with touch interfaces, which have created new markets and usage models for mobile peripherals and accessories. Logitech offers peripherals and accessories to enhance the use of such digital platforms. For today's consumers, listening to music is a popular entertainment activity, fueled by the growth in smartphones, tablets, music services and Internet radio. Consumers are optimizing their audio experiences on their tablets and smartphones with wireless mobile speakers that pair easily with their mobile devices. Our Mobile Speakers products target a large and growing market that reflects the increasing popularity of mobile devices for accessing digital music. Consumers are also enhancing their tablet experience with a range of keyboards and cases that enable them to create, consume and do more with their tablets conveniently and comfortably.

The use of video across multiple platforms—PCs, laptops and mobile devices such as tablets and smartphones—is a continuing trend among consumers. The video communication industry continues to make progress towards a vision in which people can conduct a video call from any of these platforms to any other platform. The market opportunity to provide innovative, affordable, and easy to use video collaboration products to the millions of small to medium sized meeting rooms lacking video is substantial, and we are well-positioned to take advantage of it.

The trend among businesses and institutions to use video conferencing is even more prevalent than consumer use of video calling, and offers a long-term growth opportunity for Logitech. For businesses and institutions, video conferencing is increasingly substituted for travel, because of high travel costs as well as the productivity gain that can be achieved by a high-quality face-to-face meeting that does not require travel away from the office. Further, with the increased availability of higher Internet bandwidth, video conferencing is becoming a key component of Unified Communications, which is the integration of enterprise-class collaboration and communications solutions such as voicemail, e-mail, chat, presentation sharing and live video meetings.

Finally, we believe that trends established in the consumer technology market, such as brand identity, affordability, ease of installation and use, customer support, and design, have become important aspects of the purchase decision when buying a consumer electronics product. These are strengths that we believe Logitech offers in both consumer and enterprise markets.

Business Strategy

Logitech's current strategic objectives are to:

- focus our innovation and go-to-market teams on our retail business;
- continue to optimize profitability of our PC peripherals;
- build new categories that become sustainable growth engines;
- develop a world-class design company; and
- deliver operating leverage to improve profitability and to create the capacity to invest in growth.

Our product categories focus on the substantial worldwide installed base of PC and Mac computers by offering innovative peripherals to address needs for comfort, productivity and easy connectivity, as well as entertainment and communication. With a large installed base of users, we believe that the market for PC peripherals will continue to present opportunities for increased profitability.

As sales of PCs have declined over the past several years, sales of peripherals targeted for the PC platform have similarly diminished and affected our growth. As a result, we are focusing our investments in product categories with growth opportunities in which we can leverage our areas of expertise, competitive advantages and technology. We are currently focused on four growth categories: Mobile Speakers, Gaming, Video Collaboration and Tablet & Other Accessories. We also focus on developing and testing products for potential new growth opportunities.

Table of Contents

As we continue to shift the focus of our investment from PC peripherals to growth categories, our business approach is changing as well. Our product development process and responsiveness to consumers have become faster. We laid the foundation in fiscal year 2014 for building a design company that leverages technology, innovation and consumer insights. We are continuing to build on this foundation by making design a more integral part of our product development with the goals of creating fewer but more impactful products while increasing consumer satisfaction. Our video conferencing segment focuses on high-definition (HD) video conferencing for businesses and institutions. We believe that our strategy of delivering a high quality, Cloud-based experience combined with a compelling price/performance advantage will position us well in this rapidly evolving market.

We continually review our product offerings and our strategic direction in light of our profitability targets, competitive conditions, changing consumer trends, and the evolving nature of the interface between the consumer and the digital world. We continue to evaluate and phase out non-strategic products as part of our ongoing efforts to strengthen our overall portfolio.

Our turnaround strategy, which we originally outlined in May 2013, has been a success and we are continuing to transform Logitech into a simpler, faster, growing company. As we move forward we plan to focus on our growing Retail Strategic business, exit our OEM business and reorganize our video conferencing business, Lifesize, to sharpen its focus on its Cloud-based offering. We are also focused on streamlining our overall cost structure through product, overhead and infrastructure cost reductions, including a targeted resource realignment. As a result, over the coming year we expect restructuring charges of approximately \$15 million to \$20 million. The savings from all these actions will be used to offset currency headwinds and invest in future growth.

Product Strategy

To take advantage of the opportunities we anticipate in the growing digital marketplace, Logitech's product strategy focuses on enabling and enhancing the multiple interfaces for input, navigation, audio and video across the many digital devices used by today's consumers and enterprises.

Digital Music

Logitech has a solid foundation of audio solutions designed to satisfy consumers' needs for music consumption sourced from a variety of platforms. These platforms include music services, Internet radio and Bluetooth-enabled mobile devices such as tablets and smartphones. Our music solutions are focused primarily on Mobile Speakers. We recently introduced UE MEGABOOM, a larger and more powerful companion for UE BOOM offering 360-degree sound, more bass and water-proof design, which has already received several design awards.

Gaming

Our strategy is to leverage our deep research and development (R&D) expertise in the area of PC peripherals to build the most advanced gaming gear on the market. One recent example of this is the G402 Hyperion Fury Gaming Mouse which combines an optical sensor featuring Logitech Delta Zero™ technology with our exclusive Fusion Engine™ hybrid sensor to enable tracking speeds in excess of 500 inches per second (IPS).

Video Collaboration

The market opportunity to provide innovative, affordable, and easy to use video collaboration products to the millions of small to medium sized meeting rooms lacking video, or even to mobile meetings, is substantial, and we are well positioned to take advantage of it. Over the past year, we have built momentum with the CC3000e all-in-one video and audio conferencing solution for small and midsize conferencing rooms.

Tablet & Other Accessories

To seize the growth opportunities in the peripherals market for mobile devices, we are focusing on innovating new features and products to provide excellent consumer experience, and on reducing product cycle time to address the evolving market demand and frequent introductions of new devices. We have developed a range of products for the tablet market, for both Apple and Android platforms. We believe there will be additional demand for complementary peripherals to enhance consumers' experiences with tablets and other mobile devices.

Table of Contents

PC/Mac Accessories

Logitech continues to provide new, innovative, high-performance PC and Mac computer navigation devices and audio and video products for the large installed base of PC and Mac computers and for the enterprise market.

Home Controls

Logitech's Harmony brand is well recognized as the leader in performance remote controls for home entertainment. We believe this expertise provides a strong foundation for control of the digital home.

Video Conferencing

Our Lifesize division represents our focused investment in the growth of video communications for enterprises and business organizations. Lifesize is a leader in HD communication innovation at multiple price points, offering complete and scalable solutions including hardware, software, endpoints, services and infrastructure to small and medium enterprises. During the second quarter of fiscal year 2015, Lifesize launched its Cloud offerings. We continue to see significant momentum for this Cloud-based video communication offering. In the nine months since its launch, we have acquired more than 1,100 Lifesize Cloud customers and achieved strong growth in concurrent Cloud calls and usage. Looking at this growth, we recently decided to reorganize Lifesize with the goal of de-emphasizing Lifesize's legacy offerings to enable maximum traction with Lifesize Cloud.

Design and Technological Innovation

Logitech seeks to fulfill the increasing demand for interfaces between people and the expanding digital world across multiple platforms and user environments. The interface evolves as platforms, user models and our target markets evolve. As access to digital information has expanded, we have extended our focus beyond the PC to other entry and control points to the Internet and digital world, including mobile devices and the meeting room. All of these platforms require interfaces that are customized according to how the devices are used. We believe this expansion of access points provides additional attractive opportunities for Logitech because the relevance and importance of navigation, interaction, video and audio interfaces and applications remain substantially the same across platforms.

We recognize that continued investment in product research and development is critical to facilitate innovation of new and improved products and technologies. Four of Logitech's products were selected as 2015 Computer Electronics Show (CES) Innovation Award honorees, including:

- Logitech Bluetooth® Multi-Device Keyboard K480, a wireless desktop keyboard for your computers, tablets and smartphones.
- Logitech G502 Proteus Core Tunable Gaming Mouse that is customizable, combining the world's first 12,000 dots per inch (DPI) sensor with advanced surface and weight tuning.
- Logitech G402 Hyperion Fury Ultra-Fast FPS Gaming Mouse that can reliably track over 500 IPS.
- Logitech G910 Orion Spark RGB Mechanical Gaming Keyboard, a keyboard that combines high speed responsiveness and improved accuracy with superior red, green and blue (RGB) illumination in a performance-driven design.

During fiscal year 2015, three of Logitech's products won the 2015 iF product design award for excellence in the audio, mobile and PC peripherals categories. This year's winners are the UE MEGABOOM, Logitech AnyAngle and the Logitech Wireless Mouse M320. During fiscal year 2015, Logitech also won Red Dot awards for the Logitech ConferenceCam Connect, Logitech Keys-To-Go, the Logitech G910 Orion Spark RGB Mechanical Gaming Keyboard, the Logitech Bluetooth® Multi-Device Keyboard K480, the Logitech Wireless Mouse M320 and UE MEGABOOM and Good Design awards for Logitech case+, the Logitech Illuminated Living-Room Keyboard K830, the Logitech X300 Mobile Wireless Stereo Speaker, the Logitech G502 Proteus Core Tunable Gaming Mouse, the Logitech G402 Hyperion Fury Ultra-Fast™ FPS Gaming Mouse, the Logitech Ultrathin Keyboard Folio for iPad® Air and iPad® mini and the Logitech Ultrathin for iPad® Air.

Our research and development expenses for fiscal years 2015, 2014 and 2013 were \$131.0 million, \$139.4 million and \$155.0 million, respectively. We expect to continue to devote significant resources to research and development, including devices for digital platforms, video communications, wireless technologies, power management, user interfaces and device database management to sustain our competitive position.

Table of Contents

Logitech is committed to meeting consumer needs for peripheral devices and believes that design, innovation, value and product quality are important elements in gaining market acceptance and strengthening our market position.

Products

Our peripherals segment encompasses the design, manufacturing and marketing of peripherals for PCs, tablets and other digital platforms. We sell our peripherals products primarily to a network of distributors and retailers. The large majority of our revenues have historically been derived from sales of our peripherals products for use by consumers. Our video conferencing segment encompasses the design, manufacturing and marketing of Lifesize-branded video conferencing products, infrastructure and services for small and medium size enterprises, public sector, and other business markets. Video conferencing products include SaaS video service, scalable HD (high-definition) video communication endpoints, video conferencing infrastructure software and appliances to support large-scale video deployments, and services to support these products. During the second quarter of fiscal year 2015, Lifesize launched its Cloud-based offerings and we continue to see significant momentum for this Cloud-based video communication offering. On the other hand, we experienced significant sales declines in infrastructure component business, especially during the fourth quarter of fiscal 2015. While the sales of the Cloud offering are growing rapidly, they are not large enough to offset the declining of the video conferencing infrastructure business. As a result of these changes, we made a strategic decision to de-emphasize Lifesize's legacy offerings more quickly than planned to enable maximum traction of the Lifesize Cloud. We sell our Lifesize products and services to distributors, value-added resellers, OEMs and, occasionally, to direct enterprise customers.

Our brand, portfolio management, product definition and engineering teams in our peripherals segment are responsible for product strategy, technological innovation and development, and for bringing our products to market. Our marketing team is responsible for supporting the Logitech brand, public relations and social media, and digital marketing. Our design team provides creative leadership, consumer insights, design direction and management from concept exploration to product and experience execution. Our retail sales and marketing activities are organized into three geographic regions: Americas (North and South America), EMEA (Europe, Middle East, Africa) and Asia Pacific (China, Japan, Australia, Taiwan, India and other countries). Our infrastructure functions, including finance, legal, information technology, and facilities, are managed globally to support the business.

Peripherals

Retail Strategic - Growth Categories

Mobile Speakers

The Mobile Speakers category comprises portable wireless Bluetooth speakers. Our top revenue-generating product during fiscal year 2015 is UE BOOM, the 360° portable wireless speakers that provide bold, immersive sound in every direction. The UE BOOM is the primary driver for success in this product category. The category also includes the UE Mini BOOM, a portable Bluetooth speaker with two channel speaker system in a compact design.

Gaming

Logitech offers a full range of dedicated gaming gear for gamers, including mice, keyboards, headsets, gamepads and steering wheels. Some of our products in this category include:

• The Logitech G910 Orion Spark RGB Mechanical Gaming Keyboard, which features exclusive Romer-G switches, intelligent RGB illumination, and a wide range of options to customize colors and profiles.

• The Logitech G930 Wireless Gaming Headset, which offers high-performance 7.1 channel surround sound, a lag-free 2.4 GHz wireless connection, and three customizable G keys for one-touch command over music, chat, voice morphing and other features.

• The Logitech G402 Hyperion Fury Gaming Mouse, which combines an optical sensor featuring Logitech Delta Zero™ technology with our exclusive Fusion Engine™ hybrid sensor to enable tracking speeds in excess of 500 IPS.

• The Logitech G502 Proteus Core Gaming Mouse, which features an advanced optical sensor and eleven programmable buttons and allows gamers to customize the weight and balance.

Video Collaboration

Table of Contents

The Video Collaboration category includes Logitech's ConferenceCams, which combine enterprise-quality audio and HD 1080p video with affordability to bring video conferencing to small and medium conference rooms. Our key products in this category include:

• The Logitech ConferenceCam CC3000e offers best-in-class videoconferencing with HD 1080p video and professional audio that easily turns mid-size conference rooms into video-enabled collaboration rooms.

• The recently launched Logitech ConferenceCam Connect is a portable, all-in-one video conference solution with HD 1080p video, professional audio, and multi-device connectivity for small group collaboration.

Tablet & Other Accessories

The Tablet & Other Accessories category includes keyboards and covers for tablets and smartphones as well as other accessories for mobile devices. We expect to continue to enhance this category through the introduction of additional innovative and complementary products. Some of products in this category include:

• The Logitech Ultrathin Keyboard Cover for iPad Air provides an aluminum screen cover for added protection on the go, and doubles as a wireless keyboard.

• The Logitech Ultrathin Keyboard Folio for iPad Air and for iPad mini offers a thin-and-light typing experience, with front and back protection for the iPad.

• The Logitech Protective Folio for iPad Air and for iPad mini offer protection and versatility in a thin, light and stylish design.

Retail Strategic - Profit Maximization Categories

Pointing Devices

Logitech offers a variety of pointing devices, sold through retail channels. Some of our key products in this category include:

• The Logitech MX Master Wireless mouse is our flagship wireless mouse that is the new paradigm for precise, fast, comfortable computer navigation.

• The Logitech Wireless Mouse M325 offers micro-precise scrolling with a feel-good, contoured design.

• The Logitech Wireless Mouse M185 is a wireless mouse with nano receiver technology that is compatible with any computer.

Keyboards & Combos

Logitech offers a variety of corded and cordless keyboards, living room keyboards, and combos (keyboard-and-mouse combinations). Some of our products in this category include:

• The Logitech Wireless Touch Keyboard K400 is a sleek and compact keyboard with a 10-meter wireless range, provides functionality as a living room keyboard.

• The Logitech Combo MK270 offers a wireless compact mouse and keyboard with nano technology.

• The Logitech Combo MK520 is a sleek full size keyboard and mouse combination with unifying receiver.

Audio—PC & Wearables

The Audio-PC & Wearables category comprises PC speakers, PC headsets, and in-ear earphones designed to enhance the audio experience. Some of our products in this category include:

• The Logitech Speaker System Z623 delivers 200 watts (RMS) of power in a THX-Certified system with multiple inputs.

• The Logitech Surround Sound Speakers Z506 delivers 75 watts of power with 3D stereo and multiple inputs.

• The Logitech USB Headset H390 is an USB headset that offers noise cancelling microphone and in-line audio features.

PC Webcams

The PC Webcams category comprises PC-based webcams targeted primarily at consumers. Our top revenue-generating webcams during fiscal year 2015 included the Logitech HD Pro Webcam C920, which offers razor-sharp HD video and recordings with 1080p, enhanced by Carl Zeiss optics.

Table of Contents

Home Control

The Home Control category includes our Harmony advanced remote controls for home entertainment and control systems. Some of our products include:

The Logitech Harmony Ultimate and the Logitech Harmony Smart Control, both of which feature Logitech's Harmony Hub and Harmony Smartphone App to enable closed-cabinet control and one-touch entertainment access to hundreds of thousands of devices from a universal remote or smartphone. The Harmony Hub offers home control capability for connected home devices, such as Philips Hue lights.

• The Logitech Harmony 650 remote is a universal remote featuring a color screen and one-click activity buttons.

Video Conferencing

Our Lifesize division offers HD video communication solutions including a HD SaaS video conferencing service, HD video conferencing products, audio conference telephones, hardware and software infrastructure solutions, video management software, and services to support reliable video and audio communications and help users connect to networks securely and with ease. The Lifesize product line includes:

Lifesize Cloud, a SaaS infrastructure service that supports the ways people communicate and is a solution that offers a connected experience in small to medium size meeting rooms. Lifesize Cloud enables secure, immersive communication between meeting room-based video conferencing systems, software applications on PCs and Mac computers, and mobile applications on IOS and Android smartphones and tablets. It offers an intuitive, scalable, and cost-effective solution for companies looking to deploy business class video conferencing. Lifesize Cloud is now the primary strategic focus of the Lifesize business. We plan to deemphasize the legacy offerings listed below.

The Icon Series, which introduces a new, simplified user experience designed to make video communication simple and intuitive so that anyone can use it without training. It is tightly integrated with the Lifesize UVC Platform and its applications to make it easier for users to experience the full power of their platform.

The 220 Series, which provides full HD video quality at the lowest possible bandwidth, allowing data-sharing, supporting dual HD display, full HD camera, and phone or microphone options. These offer multiple models to support customer room configuration needs and multipoint bridging requirements.

Competitive Strengths

We believe the key competitive strengths that allow Logitech to be successful in the markets are:

• Our innovation capability, including understanding of product development, technology and industrial design excellence as an emerging strength, as demonstrated by a list of over 100 industry "firsts" to our name and a patent portfolio of approximately over 750 patents.

• Our expertise in key engineering disciplines that underlie our products, and our continued enhancement of our products through the use of advanced technologies.

• The Logitech, Ultimate Ears (UE), and Lifesize brand names and industrial designs, which are recognized worldwide as symbols of product quality, innovation, ease of use and price-performance value.

• Our hybrid model of in-house manufacturing and third-party contract manufacturers, which allows us to effectively respond to rapidly changing demand and leverage economies of scale.

• Our supply chain has extensive global reach, key distribution and strategic business relationships combined with extensive analytic modeling expertise, optimization tools and global processes.

• Our global presence, capable of drawing on the strengths of our global resources, global distribution system and geographic revenue mix.

• Our expertise in a broad array of PC, Mac and mobile device peripherals.

• Our extensive retail presence across consumer electronics, mass merchandises and office infrastructures.

We believe that we have competed successfully based on these factors. We believe that Logitech's future lies with our ability to continue to capitalize on these strengths.

Marketing and Design

Logitech's Design and Marketing team strives to understand consumers so that we can innovate, create and deliver amazing design to our users at each and every touch point of the consumer experience with the Logitech brand and products.

Table of Contents

We believe that by creating products that people desire and love, we maximize the number of consumers who actively buy and recommend Logitech products, fueling brand preference within and across our many product categories. We are making good progress building a strong internal Design and Marketing team, while partnering with world renowned design agencies to further our “design-led” approach to product development and launch. Our key design centers are in the United States, Switzerland, Ireland and Taiwan.

Sales and Distribution

Principal Markets

Net sales to unaffiliated customers by geographic region for fiscal years 2015, 2014 and 2013 (based on the customers' location) are as follows (in thousands):

	Year Ended March 31,		
	2015	2014	2013
Americas	\$915,478	\$859,893	\$808,618
EMEA	710,966	767,017	799,075
Asia Pacific	487,503	501,803	491,584
	\$2,113,947	\$2,128,713	\$2,099,277

Revenues from sales to customers in Switzerland, our home domicile, represented 2% of our total consolidated net sales in each of fiscal years 2015, 2014 and 2013. In fiscal years 2015, 2014 and 2013, the United States represented 36%, 35% and 33% of our total consolidated net sales, respectively. No other single country represented more than 10% of our total consolidated net sales for fiscal years 2015, 2014 or 2013.

Sales and Distribution

We primarily sell our peripherals products to a network of distributors and retailers. We support these channels with third-party distribution centers located in North America, Europe and Asia Pacific. Some of these distribution centers perform product localization with local language manuals, packaging and power plugs.

Logitech directly sells peripherals products to distributors and large retailers. Distributors in North America include Ingram Micro, Tech Data Corporation, D&H Distributing, and Synnex Corporation. In Europe, pan-European distributors include Ingram Micro, Tech Data, and Gem Distribution. We also sell to many regional distributors such as Actebis GmbH in Germany and Copaco Dc B.V. in the Netherlands. In Asia, major distributors include Beijing Digital China Limited in China, Daiwabo in Japan, and the pan-Asian distributor, Ingram Micro. Our distributor customers typically resell products to retailers, value-added resellers, systems integrators and other distributors with whom Logitech does not have a direct relationship.

In fiscal years 2015, 2014 and 2013, Ingram Micro Inc. and its affiliated entities together accounted for 14%, 14% and 11% of our net sales, respectively. No other customer individually accounted for more than 10% of our net sales during fiscal years 2015, 2014 and 2013. The material terms of our distribution agreements with Ingram Micro and its affiliated entities are summarized as follows:

• The agreements are non-exclusive in the particular territory and contain no minimum purchase requirements. Each agreement may be terminated for convenience at any time by either party. Most agreements provide for termination on 30 days written notice from either party, with two Ingram Micro agreements providing for termination on 90 days notice.

• We generally offer an allowance for marketing activities equal to a negotiated percentage of sales and volume rebates related to purchase volumes or sales of specific products to specified retailers. These terms vary by agreement.

• Most agreements allow price protection credits to be issued for on-hand or in-transit new inventory if we, in our sole discretion, lower the price of the product.

• We grant limited stock rotation return rights, which vary by agreement.

Logitech's peripherals products can be purchased in most major retail chains, where we typically have access to significant shelf space. These chains in the U.S. include Best Buy, Wal-Mart, Staples, Office Depot and Target. In Europe, chains include Metro Group (Media-Saturn Group), Carrefour Group, Kesa Electricals, Fnac, and Dixons

Table of Contents

Stores Group PLC. In Asia Pacific, retail chains include Australia's Dick Smith Electronics Limited. Logitech products can also be purchased online either directly from Logitech.com or through e-tailers, such as Amazon.com, TigerDirect.com, Buy.com, CDW, Insight Enterprises, Inc. and others.

Logitech's OEM products are sold to large OEM customers through a direct sales force, and we support smaller OEM customers through distributors. While OEM business has been an important part of our history, given our heightened focus on our growing retail business, we plan to exit OEM.

Our video conferencing Lifesize division maintains a marketing and sales organization, separate from the Peripherals segment that sells Lifesize products and services to distributors, value-added resellers, OEMs and direct enterprise customers. The large majority of Lifesize revenues are derived from sales of products for use by small-to-medium businesses, public healthcare providers, educational institutions and government organizations.

Through our operating subsidiaries, we maintain sales offices or sales representatives in approximately 43 countries.

Backlog

We typically have a relatively small amount of orders at the end of our fiscal periods that we have received but have not shipped, which is referred to as backlog. In our experience, the amount of backlog at any particular fiscal period-end is not a meaningful indication of our future business prospects.

Customer Service and Technical Support

Our customer service organization provides user technical support, support related to product inquiry, and order support. We support these customer service functions with an outsourced operation that has support centers located in the Philippines, Mexico, and Northern Ireland.

Logitech maintains customer service and technical support capabilities in the United States, Canada, Europe, and the Asia Pacific region. Customer service and technical personnel provide support services to retail purchasers of products through telephone, e-mail, forums, chat, facsimile and the Logitech Web site. The Logitech Web site is designed to expedite overall response time while minimizing the resources required for effective customer support. In general, OEMs provide customer service and technical support for their products, including components purchased from suppliers such as Logitech. Logitech provides warranties on our branded products that range from one to three years. In Korea, India and China, there are multiple locations where consumers may obtain service for their Logitech products. These locations are managed by a third party logistics provider. Consumers who have purchased Logitech products can visit these locations for product inspection, and return or exchange of products. Within China, there is also a mail-in center to provide these services for more remote locations in China.

Manufacturing

Logitech's manufacturing operations consist principally of final assembly and testing. Since 1994, we have had our own manufacturing operations in Suzhou, China, which currently handles approximately half of our total production of peripherals products. We continue to focus on ensuring the efficiency of the Suzhou facilities, through the implementation of quality management, automation, process improvements, and employee involvement programs. We outsource the remaining production to contract manufacturers and original design manufacturers located in Asia. Our Lifesize video conferencing products are manufactured in Malaysia under contract with a third-party manufacturer. Both our in-house and outsourced manufacturing operations are managed by our worldwide operations group. The worldwide operations group also supports the business units and marketing and sales organizations through management of distribution centers, the supply chain, and the provision of technical support, customer relations and other services.

New product launches, process engineering, commodities management, logistics, quality assurance, operations management and management of Logitech's contract manufacturers occur in Hsinchu, Taiwan, Suzhou, China, Shenzhen, China and Hong Kong, China. Certain components are manufactured to Logitech's specifications by vendors in Asia, the United States and Europe. We also use contract manufacturers to supplement internal capacity and to reduce volatility in production volumes. In addition, some products, including most keyboards, certain gaming devices, certain audio products, and video conferencing equipment are manufactured by third-party suppliers to Logitech's specifications. Retail product localization with local language manuals, packaging, and power plugs may be performed at distribution centers in North America, Europe and Asia Pacific.

Table of Contents

Our hybrid model of in-house manufacturing and third-party contract manufacturers allows us to effectively respond to rapidly changing demand and leverage economies of scale. Through our high-volume manufacturing operations for peripherals located in Suzhou, China, we believe we have been able to maintain strong quality process controls and have realized significant cost efficiencies. Our Suzhou operation provides for increased production capacity, manufacturing know-how, IP protection and greater flexibility in responding to product demand. Further, by outsourcing the manufacturing of certain products, we seek to reduce volatility in production volumes as well as improve time to market.

Competition

The peripherals and video conferencing industries are intensely competitive. The peripherals industry is characterized by short product life cycles, continual performance enhancements, and rapid adoption of technological and product advancements by competitors in our retail markets, and price sensitivity in the OEM market. We have experienced aggressive price competition and other promotional activities from our primary competitors and from less-established brands, including brands owned by some retail customers known as house brands. We may also encounter more competition if any of our competitors in one or more categories decide to enter other categories in which we currently operate.

We have been expanding the categories of products we sell and entering new markets, such as the markets for tablet accessories, music accessories and enterprise video collaboration. We remain alert to opportunities in new categories and markets. As we do so, we are confronting new competitors, many of which have more experience in the categories or markets and have greater marketing resources and brand name recognition than we have. In addition, because of the continuing convergence of the markets for computing devices and consumer electronics, we expect greater competition in the future from well-established consumer electronics companies in our developing categories, as well as future ones we might enter. Many of these companies have greater financial, technical, sales, marketing and other resources than we have. Our ability to grow our sales as a company is considerably dependent on the growth categories.

We expect continued competitive pressure in our retail and video conferencing businesses, including in the terms and conditions that our competitors offer customers, which may be more favorable than our terms and conditions, and may require us to take actions to increase our customer incentive programs, which could impact our revenues and operating margins.

Peripherals

Retail Strategic - Growth Categories

Mobile Speakers. Our competitors for Bluetooth wireless speakers include JBL, Hammon Kardon, Beats Electronics and Bose. Bose is our largest competitor. Apple's acquisition of Beats Electronics may now impact our access to shelf space in Apple retail stores and adversely impact our ability to succeed in this important growth category.

Gaming. Competitors for our Gaming peripherals include Razer USA Ltd., SteelSeries, Turtle Beach and Mad Catz Interactive.

Video Collaboration. Our competitors for Video Collaboration products include Cisco Systems, Inc., Polycom, Inc., and Avaya, Inc.

Tablet & Other Accessories. Competitors in the tablet case market include Apple, Otter, Speck and a large number of small brands. Competitors in the tablet keyboard market are Zagg, Kensington, Belkin, Targus and other less-established brands. Although we are one of the leaders in the tablet keyboard market and continue to expand our product portfolio to other tablet products, we expect the competition will increase.

Retail Strategic - Profit Maximization Categories

Pointing Devices and Keyboards & Combos. Microsoft Corporation is our main competitor in our PC mice, keyboard and combo product lines. We also experience competition and pricing pressure for corded and cordless mice and combos from less-established brands, including house brands, which we believe have impacted our market share in some sales geographies.

Audio-PC & Wearables. In the PC speakers business, our competitors include Bose, Cyber Acoustics, Phillips and Creative Labs, Inc. In the PC headset business, our main competitors include Plantronics and Altec Lansing. In-ear headphones competitors include Skull Candy, Sennheiser, Sony, and others.

Table of Contents

PC Webcams. Our primary competitor for PC webcams is Microsoft, with other various manufacturers taking smaller market share. The worldwide market for PC webcams has been declining, and as a result, fewer competitors have entered the market.

Home Control. Our primary competitors for remotes include Philips, Universal Remote Control, Inc., General Electric, RCA and Sony. We expect that the technological innovations in smartphones and tablet devices, as well as subscriber service-specific remotes such as Comcast and Direct TV, will likely result in increased competition. There are also many new entrants to the Home Control, including Nest (owned by Google), Revolve (owned by Samsung), Wink, and many other startups in the space that will also result in increased competition in the space of whole Home Control.

Video Conferencing

We primarily compete in the medium and small business, education, and state and local business sectors of the enterprise video conferencing market. This market is characterized by continual performance enhancements and large, well-financed competitors. There is increased participation in the video conferencing market by companies such as Cisco Systems, Inc., Polycom, Inc. and Avaya, Inc., and as a result, competition has increased in recent years and we expect competition in the industry to further intensify. In addition, there are an increasing number of PC-based multi-person video conferencing applications, such as Microsoft's Lync and Skype, Google Hangouts for Business and new entrants delivering Cloud-based video conferencing services, such as Blue Jeans Networks and Zoom.us, which compete with our Lifesize products and services. Our video conferencing segment encompasses the design, manufacturing and marketing of Lifesize-branded video conferencing products, infrastructure and services for small and medium size enterprises, public sector, and other business markets. Video conferencing products include SaaS video service, scalable HD (high-definition) video communication endpoints, video conferencing infrastructure software and appliances to support large-scale video deployments, and services to support these products.

Intellectual Property and Proprietary Rights

Intellectual property rights that apply to Logitech's products and services include patents, trademarks, copyrights and trade secrets.

We hold various United States patents and pending applications, together with corresponding patents and pending applications from other countries. While we believe that patent protection is important, we also believe that patents are of less competitive significance than factors such as technological expertise and innovation, ease of use, and quality design. No single patent is in itself essential to Logitech as a whole. From time to time we receive claims that we may be infringing on patents or other intellectual property rights of others. As appropriate, claims are referred to counsel, and current claims are in various stages of evaluation and negotiation. If necessary or desirable, we may seek licenses for certain intellectual property rights. Refer also to the discussion in Item 1A, Risk Factors—"We may be unable to protect our proprietary rights. Unauthorized use of our technology may result in the development of products that compete with our products." and "Claims by others that we infringe their proprietary technology could adversely affect our business."

To distinguish genuine Logitech products from competing products and counterfeit products, Logitech has used, registered, or applied to register certain trademarks and trade names in the U.S. and in other countries and jurisdictions. Logitech enforces its trademark and trade name rights in the U.S. and abroad. In addition, the software for Logitech's products and services is entitled to copyright protection, and we generally require our customers to obtain a software license before providing them with that software. We also protect details about our products and services as trade secrets through employee training, license and non-disclosure agreements, technical measures and other reasonable efforts to preserve confidentiality.

Environmental Regulation

We are subject to laws and regulations in many jurisdictions regulating the materials used in our products and, increasingly, product-related energy consumption, and the recycling of our products and packaging.

Europe. In Europe we are subject to the European Union's (EU's) RoHS (Restriction of Use of Certain Hazardous Substances in Electrical and Electronics Equipment) Directive 2011/65/EU, or RoHS 2. This directive restricts the placement into the EU market of electrical and electronic equipment containing certain hazardous materials including lead, mercury, cadmium, chromium, and halogenated flame-retardants. All Logitech products are covered by the

directive and have been modified, if necessary, to be RoHS 2 compliant. Logitech has an active program to ensure compliance with the RoHS 2 directive and to ensure RoHS 2 compliant components and

Table of Contents

manufacturing methods in order to comply with the requirements of the directive including issuing of a declaration of conformity and making the product with the 'CE' mark.

Logitech is also subject to the EU's ErP (Energy-related Products) Directive, which aims to encourage manufacturers and importers to produce products designed to minimize overall environmental impact. Under the Directive, manufacturers must ensure that their energy-related products comply with applicable requirements, issue a declaration of conformity and mark the product with the 'CE' mark. The Directive does not have binding requirements for specific products, but does define conditions and criteria for setting, through subsequent implementing measures, requirements regarding environmentally relevant product characteristics. To date the following implementing measures within the ErP Directive are active and applicable to Logitech products:

1275/2008: Eco-design requirements for standby and off mode electric power consumption of electrical and electronic household and office equipment.

278/2009: Eco-design requirements for no-load condition power consumption and average active efficiency of external power supplies.

Logitech has assessed the applicability of implementing these measures on relevant product lines and has taken steps to ensure that our products meet the requirements. Adoption of the ErP Directive will be aligned in all EU member states, and we expect conformity will be demonstrated by Logitech in conjunction with current CE conformity marking requirements. Similar requirements exist in the four member states of the European Free Trade Association (Iceland, Norway, Liechtenstein and Switzerland). Such requirements are substantially met by compliance with the ErP Directive.

We are also subject to a number of EOL (End of Life) Stewardship directives including the EU's WEEE (Waste Electrical and Electronic Equipment) Directive, the EU Packaging Directive and the EU Battery Directive, which require producers of electrical goods, packaging and batteries to be financially responsible for costs of specified collection, recycling, treatment and disposal of covered products. Where applicable, we have provided for the estimated costs, which are not material, of managing and recycling historical and future waste equipment, packaging and batteries. Logitech has also assessed the applicability of the European REACH Directive (Regulation (EC) No. 1907/2006 for Registration, Evaluation, Authorization, and Restrictions of Chemicals). Logitech is not subject to aspects of this Directive which relate to chemical substance import and control due to our current manufacturing structure. The aspect of this Directive that relates to product content does impact Logitech and we have taken steps to ensure that all substances of very high concern (on a list of candidate substances for authorization that is published on the EU Agency-Web site) present in products above a concentration limit are eliminated in subsequent product designs or notified per the Directive requirements. Additions to this list of candidate substances are reviewed on a regular basis to give consideration to any updates to the substances of very high concern (SVHC) list performed by the relevant EU agency.

China. In China we are subject to China's law on Management Methods on the Control of Pollution Caused by Electronic Information Products (China RoHS). This is substantially similar to the EU RoHS Directive, and as such, Logitech products are already compliant. China RoHS requires additional labelling of product that will be shipped in China and Logitech has taken steps to help ensure we comply with these requirements.

United States and Canada. In the U.S., we are subject to, among other laws, Appliance Efficiency Regulations adopted via the U.S. Energy Independence and Security Act of 2007. The regulations set out standards for the energy consumption performance of products within the scope of the regulations, which includes some of Logitech's products. The standards apply to appliances sold or offered for sale throughout the U.S., and Logitech has redesigned or changed products to comply with these regulations. We are also subject to California's Proposition 65, which requires that clear and reasonable warnings be given to consumers who are exposed to certain chemicals deemed by the state of California to be dangerous.

Logitech is also subject to the requirement as set out by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, specifically Section 1502, which addresses the use of "Conflict Minerals" in the supply chain. We have established systems which facilitate our compliance with the sourcing and traceability obligations and the reporting requirements of this Act aligned with guidelines published by the Securities and Exchange Commission. As an EICC (Electronic Industry Citizenship Coalition) member, Logitech is participating in the industry-wide Conflict Free

Sourcing Initiative and its Conflict Free Smelter Program by which these requirements will be met. In addition, the Transparency in Supply Chain Act of 2010 (S.B. 657) is effective from Logitech's fiscal year 2012. The law requires all retailers and manufacturers of tangible products who do business in California and have annual worldwide gross receipts exceeding \$100 million to disclose on their company websites their efforts to

Table of Contents

combat forced labor and human trafficking in their own supply chains. Logitech's disclosure is posted on our Web site, www.logitech.com.

In Canada and the United States, we are subject to laws in various Canadian provinces and U.S. states that impose fees to cover the cost of end of life responsible disposal and recycling of packaging, product and batteries. These laws require producers of electrical goods, packaging and batteries to be financially responsible for costs of specified collection, recycling, treatment and disposal of covered products. Where applicable, we have provided for the estimated costs, which are not material, of managing and recycling historical and future waste equipment, packaging and batteries.

Australia and New Zealand. In Australia and New Zealand, we are subject to the MEPS (Minimum Energy Performance Standards) regulations. These regulations set out standards for the energy consumption performance of products within the scope of the regulations, which includes some of Logitech's products. We have taken steps to modify products to ensure they are in compliance with MEPS.

We expect further laws governing product and packaging recycling to be introduced in other jurisdictions, many or most of which could impose fees to cover recycling costs, the cumulative impact of which could be significant. If such legislation is enacted in other countries, Logitech intends to develop compliance programs as necessary. However, until that time, we are not able to estimate any possible impact.

The effects on Logitech's business of complying with other government regulations are limited to the cost of agency fees and testing, as well as the time required to obtain agency approvals. There are also stewardship costs associated with the end of life collection, recycling and recovery of Logitech products, packaging and batteries where Logitech is recognized as the steward and participates in relevant programs. The costs and schedule requirements are industry requirements and therefore do not represent an undue burden relative to Logitech's competitive position. As regulations change, we will modify our products or processes to address those changes.

Seasonality

Our retail peripherals product sales are typically seasonal. Sales are generally highest during our third fiscal quarter (October to December) primarily due to the increased demand for our products during the year-end holiday buying season. Due to the timing of our new product introductions, we believe that year-over-year comparisons are more indicative of variability in our results of operations than current quarter to prior quarter comparisons.

Our video conferencing product sales experience minor seasonality. Sales are generally strongest during our third fiscal quarter primarily due to expiring budgets in the business community. Sales are generally lower during our fourth fiscal quarter ending March 31, as annual business budgets may not be finalized in the first calendar quarter of the year.

Materials

We purchase certain products and key components used in our products from a limited number of sources. If the supply of these products or key components, such as micro-controllers, optical sensors or Lifesize hardware products, were to be delayed or constrained, or if one or more of our single-source suppliers goes out of business, we might be unable to find a new supplier on acceptable terms, or at all, and our shipments to our customers could be delayed. In addition, lead times for materials, components and products ordered by us or by our contract manufacturers can vary significantly and depend on factors such as contract terms, demand for a component, our ability to forecast product demand, and supplier capacity. From time to time, we have experienced component shortages and extended lead times on semiconductors, such as micro-controllers and optical sensors, and base metals used in our products. Shortages or interruptions in the supply of components or subcontracted products, or our inability to procure these components or products from alternate sources at acceptable prices in a timely manner, could delay shipment of our products or increase our production costs.

Employees

As of March 31, 2015 we employed approximately 6,900 regular employees, of which approximately 4,000 employees are in our Suzhou manufacturing facility, and from the remaining 2,900 regular employees, approximately 700 are dedicated to research and development. None of Logitech's U.S. employees are represented by a labor union or are subject to a collective bargaining agreement. Certain other countries, such as China, provide by law for employee rights, which include requirements similar to collective bargaining agreements. We believe that our

employee relations are good.

18

Table of Contents

Executive Officers of the Registrant

The following sets forth certain information regarding our executive officers as of March 31, 2015:

Name	Age	Nationality	Position
Guerrino De Luca	63	Italian and U.S.	Executive Chairman of the Board
Bracken Darrell	52	U.S.	President and Chief Executive Officer
Vincent Pilette	43	Belgian	Chief Financial Officer
Marcel Stolk	48	Dutch	Sr. Vice President, Consumer Computing Platforms Business Group
L. Joseph Sullivan	61	U.S.	Sr. Vice President, Worldwide Operations

Guerrino De Luca has served as Chairman of the Logitech Board of Directors since January 2008 and as Chief Executive Officer from April 2012 to December 2012. Mr. De Luca served as Logitech's acting president and chief executive officer from July 2011 to April 2012. Previously, Mr. De Luca served as Logitech's President and Chief Executive Officer from February 1998, when he joined the Company, to January 2008. He has been an executive member of the Board of Directors since June 1998. Prior to joining Logitech, Mr. De Luca served as Executive Vice President of Worldwide Marketing for Apple, Inc., a consumer electronics and computer company, from February 1997 to September 1997, and as President of Claris Corporation, a U.S. personal computing software vendor, from May 1994 to February 1997. Prior to joining Claris, Mr. De Luca held various positions with Apple in the United States and in Europe. Mr. De Luca holds a Laurea degree in Electronic Engineering from the University of Rome, Italy.

Bracken Darrell joined Logitech as President in April 2012 and became Chief Executive Officer in January 2013. Prior to joining Logitech, Mr. Darrell served as President of Whirlpool EMEA and Executive Vice President of Whirlpool Corporation, a home appliance manufacturer and marketing company, from January 2009 to March 2012. Previously, Mr. Darrell had been Senior Vice President, Operations of Whirlpool EMEA from May 2008 to January 2009. From 2002 to May 2008, Mr. Darrell was with P&G (The Procter & Gamble Company), a consumer brand company, most recently as the President of its Braun GmbH subsidiary. Prior to rejoining P&G in 2002, Mr. Darrell served in various executive and managerial positions with General Electric Company from 1997 to 2002, with P&G from 1991 to 1997, and with PepsiCo Inc. from 1987 to 1989. Mr. Darrell holds a BA degree from Hendrix College and an MBA from Harvard University.

Vincent Pilette joined Logitech in September 2013 as Chief Financial Officer. Prior to joining Logitech, Mr. Pilette served as Chief Financial Officer of Electronics for Imaging, Inc., a digital printing innovation and solutions company, from January 2011 through August 2013. From January 2009 through December 2010, he served as Vice President of Finance for the Enterprise Server, Storage and Networking Group at Hewlett-Packard Company ("HP"). Prior to this role, Mr. Pilette served as Vice President of Finance for the HP Software Group from December 2005 through December 2008. Mr. Pilette held various other finance positions at HP, in the U.S and Europe, Middle East and Africa, since joining HP in 1997. Mr. Pilette holds an MS in Engineering and Business from Université Catholique de Louvain in Belgium and an MBA from Kellogg School of Management at Northwestern University.

Marcel Stolk joined Logitech in March 2011 as Vice President, Sales and Marketing EMEA and Executive Managing Director EMEA, and was appointed Senior Vice President, Consumer Computing Platforms Business Group in January 2013. Previously, Mr. Stolk was the Senior Vice President, Worldwide Sales and Marketing at Logitech, from March 2001 to October 2005, and held a number of positions within the sales and marketing functions at Logitech from 1991 to 2001. Prior to rejoining Logitech in 2011, he was the Chief Executive Officer of SourceTag BV, a software company for unique tagging of Cloud-based data, from September 2010 to March 2011. Mr. Stolk has also been the founder and Chief Executive Officer of Adoria Investments BV, a private equity company, from October 2005 to July 2010, and he remains the sole owner. Before joining Logitech in 1991, Mr. Stolk held various sales and marketing positions at Aashima Technology BV, a provider of PC components and accessories, in the Netherlands. Mr. Stolk studied at Utrecht University in the Netherlands and has participated in university-level executive courses, including an executive training course at Stanford University.

L. Joseph Sullivan joined Logitech in October 2005 as Vice President, Operations Strategy, and was appointed Senior Vice President, Worldwide Operations in April 2006. Prior to joining Logitech, Mr. Sullivan was Vice President of

Operational Excellence and Quality for Carrier Corporation, a subsidiary of United Technologies, from 2001 to 2005. Previously, he was with ACCO Brands, Inc. in engineering and manufacturing management roles from 1998

Table of Contents

to 2001. Mr. Sullivan holds a BS degree in Marketing Management and an MBA degree in Operations Management from Suffolk University in Massachusetts.

Available Information

Our Investor Relations Web site is located at <http://ir.logitech.com>. We post and maintain an archive of our earnings and other press releases, current reports, annual and quarterly reports, earnings release schedule, information regarding annual general meetings, further information on corporate governance, and other information regarding the Company on the Investor Relations Web site. The information we post includes filings we make with the U.S. Securities and Exchange Commission (SEC), including reports on Forms 10-K, 10-Q, 8-K, our proxy statement related to our annual shareholders' meeting and any amendments to those reports or statements filed or furnished pursuant to U.S. securities laws or Swiss laws. All such filings and information are available free of charge on the Web site, and we make them available on the Web site as soon as reasonably possible after we file or furnish them with the SEC. The contents of these Web sites are not intended to be incorporated by reference into this report or in any other report or document we file and our references to these Web sites are intended to be inactive textual references only.

In addition, Logitech publishes press releases upon occurrence of significant events within Logitech. Shareholders and members of the public may elect to receive e-mails when Logitech issues press releases upon occurrence of significant events within Logitech or other press releases by subscribing through <http://ir.logitech.com/alerts.cfm>.

As a Swiss company traded on the SIX Swiss Exchange, and as a company subject to the provisions of Section 16 of the Securities Exchange Act of 1934, as amended, we file reports on transactions in Logitech securities by members of Logitech's Board of Directors and executive officers. The reports that we file with the Securities and Exchange Commission on Forms 3, 4 and 5, along with our other SEC filings, may be accessed on our Web site or on the Securities and Exchange Commission's Web site at <http://www.sec.gov>, and the reports we file that are published by the SIX Swiss Exchange may be accessed at:

http://www.six-exchange-regulation.com/obligations/management_transactions_en.html.

ITEM 1A. RISK FACTORS

Our operating results are difficult to predict and fluctuations in results may cause volatility in the price of our shares.

Our revenues and profitability are difficult to predict due to the nature of the markets in which we compete, fluctuating user demand, the uncertainty of current and future global economic conditions, and for many other reasons, including the following:

- Our operating results are highly dependent on the volume and timing of orders received during the quarter, which are difficult to forecast. Customers generally order on an as-needed basis and we typically do not obtain firm, long-term purchase commitments from our customers. As a result, our revenues in any quarter depend primarily on orders booked and shipped in that quarter.
- A significant portion of our quarterly retail sales typically occurs in the last weeks of each quarter, further increasing the difficulty in predicting quarterly revenues and profitability.
- Our sales are impacted by consumer demand and current and future global economic conditions, and can therefore fluctuate abruptly and significantly during periods of uncertain economic conditions or geographic distress, as well as from shifts in distributor inventory practices and consumer buying patterns.
- We must incur a large portion of our costs in advance of sales orders, because we must plan research and production, order components, buy tooling equipment, and enter into development, sales and marketing, and other operating commitments prior to obtaining firm commitments from our customers. This makes it difficult for us to rapidly adjust our costs during the quarter in response to a revenue shortfall, which could adversely affect our operating results.
- Since the beginning of fiscal year 2013, we have attempted to simplify our organization, to reduce operating costs through expense reduction and global workforce reductions, to reduce the complexity of our product portfolio, and to

better align costs with our current business as we attempt to expand from PC accessories to growth

20

Table of Contents

opportunities in accessories for mobile devices and digital music. We may not achieve the cost savings or other anticipated benefits from these efforts, and such efforts may cause our operating results to fluctuate from quarter to quarter, making our results difficult to predict.

- Fluctuations in currency exchange rates can impact our revenues, expenses and profitability because we report our financial statements in U.S. Dollars, whereas a significant portion of our revenues and expenses are in other currencies. We attempt to adjust product prices over time to offset the impact of currency movements. However, over short periods of time, during periods of weakness in consumer spending or given high levels of competition in many product categories, our ability to change local currency prices to offset the impact of currency fluctuations is limited.

Because our operating results are difficult to predict, our results may be below the expectations of financial analysts and investors, which could cause the price of our shares to decline.

If we fail to innovate and develop new products in a timely and cost-effective manner for our new and existing product categories, our business and operating results could be adversely affected.

The peripherals industry is characterized by short product life cycles, frequent new product introductions, rapidly changing technology, dynamic consumer demand and evolving industry standards. As a result, we must continually innovate in our new and existing product categories, introduce new products and technologies, and enhance existing products in order to remain competitive.

The success of our product portfolio depends on several factors, including our ability to:

- Identify new features, functionality and opportunities;
- Anticipate technology, market trends and consumer preferences;
- Develop innovative, high-quality, and reliable new products and enhancements in a cost-effective and timely manner;
- Distinguish our products from those of our competitors; and
- Offer our products at prices and on terms that are attractive to our customers and consumers.

If we do not execute on these factors successfully, products that we introduce or technologies or standards that we adopt may not gain widespread commercial acceptance, and our business and operating results could suffer. In addition, if we do not continue to differentiate our products through distinctive, technologically advanced features, designs, and services that are appealing to our customers and consumers, as well as continue to build and strengthen our brand recognition and our access to distribution channels, our business could be adversely affected.

The development of new products and services is very difficult and requires high levels of innovation. The development process is also lengthy and costly. There are significant initial expenditures for research and development, tooling, manufacturing processes, inventory and marketing, and we may not be able to recover those investments. If we fail to accurately anticipate technological trends or our users' needs or preferences, are unable to complete the development of products and services in a cost-effective and timely fashion or are unable to appropriately increase production to fulfill customer demand, we will be unable to successfully introduce new products and services into the market or compete with other providers. Even if we complete the development of our new products and services in a cost-effective and timely manner, they may be not competitive with products developed by others, they may not achieve acceptance in the market at anticipated levels or at all, they may not be profitable or, even if they are profitable, they may not achieve margins as high as our expectations or as high as the

margins we have achieved historically.

As we introduce new or enhanced products, integrate new technology into new or existing products, or reduce the overall number of products offered, we face risks including, among other things, disruption in customers' ordering patterns, excessive levels of new and existing product inventories, revenue deterioration in our existing product lines, insufficient supplies of new products to meet customers' demand, possible product and technology defects, and a potentially different sales and support environment. Premature announcements or leaks of new products, features or technologies may exacerbate some of these risks by reducing the effectiveness of our product

21

Table of Contents

launches, reducing sales volumes of current products due to anticipated future products, making it more difficult to compete, shortening the period of differentiation based on our product innovation, straining relationships with our partners or increasing market expectations for the results of our new products before we have had an opportunity to demonstrate the market viability of the products. Our failure to manage the transition to new products or the integration of new technology into new or existing products could adversely affect our business, results of operations, operating cash flows and financial condition.

We believe sales of our PC peripherals will continue to decline, and that our future growth will depend on our product growth categories, and if we do not successfully execute on our growth opportunities, if our growth opportunities are more limited than we expect or if our sales of PC peripherals are less than we expect, our operating results could be adversely affected.

We have historically targeted peripherals for the PC platform. Consumer demand for PCs, especially in our traditional, mature markets such as North America, Western and Nordic Europe, Japan and Australia, has been declining and we expect it to continue to decline in the future. As a result, consumer demand for PC peripherals in many of our markets is slowing and in some cases declining. We expect this trend to continue. For example, we experienced weak consumer demand for many of our PC peripherals in each quarter of fiscal years 2015 and 2014, which adversely affected our financial performance.

From time to time, our channel partners have also reduced their inventory levels for PC peripherals as the PC market has continued to decline. In our OEM channel, the decline of desktop PCs has adversely impacted our sales of OEM mice, which have historically made up the bulk of our OEM sales. Our OEM sales accounted for 6% of total revenues in each of fiscal years 2015, 2014 and 2013. We recently announced that we plan to exit the OEM business.

In addition, our sales of PC peripherals might be less than we expect due to a decline in business or economic conditions in one or more of the countries or regions, a greater decline than we expect in demand for our products, our inability to successfully execute our sales and marketing plans, or for other reasons. Global economic concerns, such as the varying pace of global economic recovery, the impact of sovereign debt issues in Europe, the impact of low oil prices on Russia and conflicts with either local or global financial implications in places such as Russia and Ukraine, create unpredictability and add risk to our future outlook.

As a result, we are focusing more of our personnel, financial resources, and management attention on product innovations and growth opportunities, on products for gaming, on products for tablets and mobile devices, on products for the consumption of digital music, on products for video collaboration, and on other potential growth opportunities. Our investments may not result in the growth we expect, or when we expect it, for a variety of reasons including those described below.

Mobile Speakers. We are focused on products for the consumption of digital music as a future sales growth area. Competition in the mobile speaker category is intense, and we expect it to increase. If we are not able to introduce differentiated product and marketing strategies to separate ourselves from competitors, our mobile speaker efforts will not be successful, and our business and results of operations could be adversely affected.

Gaming. We are building a diverse business that features a variety of gaming peripherals. The rapidly evolving and changing market and increasing competition increase the risk that we do not allocate our resources in line with the market and our business and results of operations could be adversely affected.

Video Collaboration. While we view the small and medium sized user groups' opportunity to be large and relatively unaddressed, this is a new and evolving market segment that we are developing. If the market opportunity proves to exist, we expect increasing competition from the strong competitors in the video conferencing market as well as

potential new entrants. In addition, as this category develops, our video collaboration products may overlap with and reduce the sales of our existing video conferencing products.

Tablets & Other Mobile Devices. The increasing popularity of smaller, mobile computing devices such as tablets with touch interfaces is rapidly changing the consumer computing market. In our retail channels, tablets and other mobile devices are sold by retailers without peripherals. We believe this creates opportunities to sell products to consumers to help make their devices more productive and comfortable. However, consumer acceptance for tablet and mobile devices peripherals is still uncertain. Also, while this product category was a growth opportunity for us during fiscal years 2014 and 2013 and we still view it as a growth category, shipments of iPad devices declined

Table of Contents

significantly throughout fiscal year 2015. While we have introduced tablet peripherals for certain Android tablets, that segment of the market is currently much smaller than the market for iPad peripherals, more fragmented and may similarly not continue its growth trend. We also may not be as successful in competing in that segment to generate sales, margin or growth. Moreover, the increasing popularity of tablets and other mobile devices has decreased consumer demand for our PC peripherals, which has adversely affected our sales of these products. If we do not successfully innovate and market products designed for tablets and other mobile devices, if our distributor or retailer customers do not choose to carry or market such peripherals, or if general consumer demand for tablet and mobile devices peripherals for use with these devices does not increase, our business and results of operations could be adversely affected.

In addition to our current growth opportunities, our future growth may be reliant on our ability to identify and develop potential new growth opportunities. This process is inherently risky and will result in investments in time and resources for which we do not achieve any return or value.

Each of these growth categories is subject to rapidly changing and evolving technologies and may be replaced by new technology concepts or platforms. Some of these growth categories are also dependent on rapidly changing and evolving consumer preferences with respect to design and features that require calculated risk-taking and fast responsiveness. If we do not develop innovative and reliable peripherals and enhancements in a cost-effective and timely manner that are attractive to consumers in these markets, if we are otherwise unsuccessful entering and competing in these growth categories, if the growth categories in which we invest our limited resources do not emerge as the opportunities or do not produce the growth or profitability we expect, or when we expect it, or if we do not correctly anticipate changes and evolutions in technology and platforms, our business and results of operations could be adversely affected.

If we do not compete effectively, demand for our products could decline and our business and operating results could be adversely affected.

The peripherals and video conferencing industries are intensely competitive.

The peripherals industry is characterized by short product life cycles, continual performance enhancements, and rapid adoption of technological and product advancements by competitors in our retail markets, and price sensitivity in the OEM market. We experience aggressive price competition and other promotional activities from our primary competitors and from less-established brands, including brands owned by retail customers known as house brands, in both the retail and OEM markets. In addition, our competitors may offer customers terms and conditions that may be more favorable than our terms and conditions and may require us to take actions to increase our customer incentive programs, which could impact our revenues and operating margins.

The video conferencing industry is characterized by continual performance enhancements and large, well-financed competitors. The industry is also shifting from traditional, hardware-oriented video conferencing solutions to Cloud-based video conferencing solutions, a transition that we are in the process of making as we reorganize our Lifesize business. As a result, there is increased participation in the video conferencing market by new entrants delivering Cloud-based video conferencing services joining established companies such as Cisco Systems, Polycom and Avaya. This has caused competition to increase over the last few years and we expect competition in the industry to further intensify. In addition, there are an increasing number of PC-based multi-person video conferencing applications, such as Microsoft's Lync and Skype, which could compete at the lower end of the video conferencing market with our Lifesize products and services or could provide other competitors with lower barriers of entry into the video conferencing market.

In recent years, we have expanded the categories of products we sell, and entered new markets. We remain alert to opportunities in new categories and markets. As we do so, we are confronting new competitors, many of which have more experience in the categories or markets and have greater marketing resources and brand name recognition than we have. In addition, because of the continuing convergence of the markets for computing devices and consumer electronics, we expect greater competition in the future from well-established consumer electronics companies in our developing categories as well as in future categories we might enter. Many of these companies, such as Microsoft, Apple, Cisco, Sony Corporation, Polycom and others, have greater financial, technical, sales, marketing and other resources than we have.

Microsoft, Apple and Google are leading producers of operating systems, hardware and applications with which our mice, keyboards and other peripherals are designed to operate. In addition, Microsoft, Apple and Google each

Table of Contents

has significantly greater financial, technical, sales, marketing and other resources than Logitech, as well as greater name recognition and a larger customer base. As a result, Microsoft, Apple and Google each may be able to improve the functionality of their own peripherals, if any, or may choose to show preference to our competitors' peripherals, to correspond with ongoing enhancements to its operating systems, hardware and software applications before we are able to make such improvements. This ability could provide Microsoft, Apple, Google or other competitors with significant lead-time advantages. In addition, Microsoft, Apple, Google or other competitors may be able to offer pricing advantages on bundled hardware and software products that we may not be able to offer, and may be financially positioned to exert significant downward pressure on product prices and upward pressure on promotional incentives in order to gain market share.

Retail Strategic - Growth Categories

Mobile Speakers. Our competitors for Bluetooth wireless speakers include Bose, JBL, Hammon Kardon, and Beats Electronics. Bose is our largest competitor. Apple's acquisition of Beats Electronics may now impact our access to shelf space in Apple retail stores and adversely impact our ability to succeed in this important growth category.

Gaming. Competitors for our Gaming peripheral products include Razer USA Ltd., SteelSeries, Turtle Beach and Mad Catz Interactive.

Video Collaboration. Our competitors for Video Collaboration products include Cisco Systems, Inc., Polycom, Inc., and Avaya, Inc.

Tablet & Other Accessories. We primarily manufacture tablet keyboards and other accessories for Apple products, such as iPad and iPhone, and Android products. Competitors in the tablet keyboard market are Zagg, Kensington, Belkin, Targus and other less-established brands. Although we are one of the market leaders in the tablet keyboard market, and as we continue to expand our product portfolio to other tablet and mobile device products, we expect the competition will increase. Other large tablet and mobile device manufacturers, such as Apple and Samsung, could start to offer tablet keyboards and other accessories along with their tablet and other mobile device products. If such manufacturers of tablets and other mobile devices compete with us in the Tablet and Other Accessories category without substantially growing the peripherals market, it could adversely affect our ability to succeed in this growth category.

Retail Strategic - Profit Maximization Categories

Pointing Devices and PC Keyboards & Combos. Microsoft Corporation is our main competitor in our mice, keyboard and desktop product lines. We also experience competition and pricing pressure for corded and cordless mice and desktops from less-established brands, including house brands, which we believe have impacted our market share in some sales geographies and which could potentially impact our market share.

Audio—PC & Wearables. In the PC speaker business, our competitors include Bose, Cyber Acoustics, Phillips and Creative Labs, Inc. In the PC headset business, our main competitors include Plantronics and Altec Lansing. In earphones competitors include Skull Candy, Sennheiser, Sony, and others.

PC Webcams. Our primary competitor for PC webcams is Microsoft, with various other manufacturers taking smaller market share. The worldwide market for consumer PC webcams has been declining, and as a result, fewer competitors have entered the market.

Home Control. Our primary competitors for remotes include Philips, Universal Remote Control, Inc., General Electric, RCA and Sony. We expect that the technological innovation in smartphone and tablet devices, as well as

subscriber service specific remotes such as Comcast and Direct TV, will likely result in increased competition.

Video Conferencing

In video conferencing, we primarily compete with Cisco Systems, Polycom and Avaya as well as new Cloud-based entrants such as Blue Jeans Networks and Zoom.us. In addition, PC-based multi-person video conferencing applications, such as Microsoft's Lync, Google Hangouts for Business and Skype, which could compete at the lower-end of the video conferencing market with our Lifesize products and services, or could provide other competitors with lower barriers of entry into the video conferencing market.

Table of Contents

Our business depends in part on access to third-party platforms or technologies, and if the access is withdrawn, denied, or is not available on terms acceptable to us, or if the platforms or technologies change without notice to us, our business and operating results could be adversely affected.

Our peripherals business has historically been built largely around the PC platform, which over time became relatively open, and its inputs and operating system standardized. With the growth of mobile, tablet, gaming and other computer devices, the number of platforms has grown, and with it the complexity and increased need for us to have business and contractual relationships with the platform owners in order to produce products compatible with these platforms. Our product portfolio includes current and future products designed for use with third-party platforms or software, such as the Apple iPad, iPod and iPhone and Android phones and tablets. Our business in these categories relies on our access to the platforms of third parties, some of whom are our competitors. Platform owners that are competitors have a competitive advantage in designing products for their platforms and may produce peripherals or other products that work better, or are perceived to work better, than our products in connection with those platforms. As we expand the number of platforms and software applications with which our products are compatible, we may not be successful in launching products for those platforms or software applications, we may not be successful in establishing strong relationships with the new platform or software owners, or we may negatively impact our ability to develop and produce high-quality products on a timely basis for those platforms and software applications or we may otherwise adversely affect our relationships with existing platform or software owners.

Our access to third-party platforms may require paying a royalty, which lowers our product margins, or may otherwise be on terms that are not acceptable to us. In addition, the third-party platforms or technologies used to interact with our product portfolio can be delayed in production or can change without prior notice to us, which can result in our having excess inventory or lower margins.

If we are unable to access third-party platforms or technologies, or if our access is withdrawn, denied, or is not available on terms acceptable to us, or if the platforms or technologies are delayed or change without notice to us, our business and operating results could be adversely affected.

If we do not accurately forecast market demand for our products, our business and operating results could be adversely affected.

We use our forecasts of product demand to make decisions regarding investments of our resources and production levels of our products. Although we receive forecasts from our customers, many are not obligated to purchase the forecasted demand. Also, actual sales volumes for individual products in our retail distribution channel can be volatile due to changes in consumer preferences and other reasons. In addition, our retail products have short product life cycles, so a failure to accurately predict high demand for a product can result in lost sales that we may not recover in subsequent periods, or higher product costs if we meet demand by paying higher costs for materials, production and delivery. We could also frustrate our customers and lose shelf space. Our failure to predict low demand for a product can result in excess inventory, lower cash flows and lower margins if we are required to reduce product prices in order to reduce inventories.

Over the past few years, we have expanded the types of products we sell, and the geographic markets in which we sell them. The changes in our product portfolio and the expansion of our sales markets have increased the difficulty of accurately forecasting product demand.

We have experienced large differences between our forecasts and actual demand for our products. We expect other differences between forecasts and actual demand to arise in the future. If we do not accurately predict product demand, our business and operating results could be adversely affected.

Our success largely depends on our ability to hire, retain, integrate and motivate sufficient numbers of qualified personnel, including senior management. Our strategy and our ability to innovate, design and produce new products, sell products, maintain operating margins and control expenses depend on key personnel that may be difficult to replace.

Our success depends on our ability to attract and retain highly skilled personnel, including senior management and international personnel. From time to time, we experience turnover in some of our senior management positions.

25

Table of Contents

We compensate our employees through a combination of salary, bonuses, benefits and equity compensation. Recruiting and retaining skilled personnel, including software and hardware engineers, is highly competitive. If we fail to provide competitive compensation to our employees, it will be difficult to retain, hire and integrate qualified employees and contractors, and we may not be able to maintain and expand our business. If we do not retain our senior managers or other key employees for any reason, we risk losing institutional knowledge, experience, expertise and other benefits of continuity as well as the ability to attract and retain other key employees. In addition, we must carefully balance the size of our employee base with our current infrastructure, management resources and anticipated operating cash flows. If we are unable to manage the size of our employee base, particularly engineers, we may fail to develop and introduce new products successfully and in a cost-effective and timely manner. If our revenue growth or employee levels vary significantly, our operating cash flows and financial condition could be adversely affected. Volatility or lack of positive performance in our stock price, including declines in our stock prices in the past year, may also affect our ability to retain key employees, many of whom have been granted equity incentives. Logitech's practice has been to provide equity incentives to its employees, but the number of shares available for equity grants is limited. We may find it difficult to provide competitive equity incentives, and our ability to hire, retain and motivate key personnel may suffer.

Recently and in past years, we have initiated reductions in our workforce to align our employee base with our business strategy, our anticipated revenue base or with our areas of focus. We have also experienced turnover in our workforce. These reductions and turnover have resulted in reallocations of duties, which could result in employee uncertainty and discontent. Reductions in our workforce could make it difficult to attract, motivate and retain employees, which could adversely affect our business.

Our gross margins can vary significantly depending on multiple factors, which can result in unanticipated fluctuations in our operating results.

Our gross margins can vary due to consumer demand, competition, product life cycle, new product introductions, unit volumes, commodity and supply chain costs, geographic sales mix, currency exchange rates, and the complexity and functionality of new product innovations. In particular, if we are not able to introduce new products in a timely manner at the product cost we expect, or if consumer demand for our products is less than we anticipate, or if there are product pricing, marketing and other initiatives by our competitors to which we need to react or that are initiated by us to drive sales that lower our margins, then our overall gross margin will be less than we project.

In addition, our gross margins may vary significantly by product line, sales geography and customer type, as well as within product lines. When the mix of products sold shifts from higher margin product lines to lower margin product lines, to lower margin sales geographies, or to lower margin products within product lines, our overall gross margins and our profitability may be adversely affected.

As we expand into accessories for tablets and other mobile devices, and digital music, our products in those categories may have lower gross margins than in our traditional product categories. Consumer demand in these product categories, based on style, color and other factors, tends to be less predictable and tends to vary more across geographic markets. As a result, we may face higher up-front investments, inventory costs associated with attempting to anticipate consumer preferences, and increased inventory write-offs. If we are unable to offset these potentially lower margins by enhancing the margins in our more traditional product categories, our profitability may be adversely affected.

The impact of these factors on gross margins can create unanticipated fluctuations in our operating results, which may cause volatility in the price of our shares.

Table of Contents

As we continue our efforts to lower our costs and improve our operating leverage as part of our turnaround, we may or may not fully realize our goals.

Our turnaround strategy over the past couple years has been based in part on simplifying the organization, reducing operating costs through global workforce reductions and a reduction in the complexity of our product portfolio, with the goal of better aligning costs with our current business and with our decreasing revenues. We restructured our business in fiscal years 2015 and 2014, and we expect to restructure in fiscal year 2016 as we divest or discontinue non-strategic product categories, exit our OEM business and reorganize our Lifesize reporting unit. In addition, we are continuing the rationalization of our G&A, infrastructure and indirect procurement to reduce operating expenses.

Our ability to achieve the desired and anticipated cost savings and other benefits from these simplification, cost-cutting and restructuring activities, and within our desired and expected timeframes, are subject to many estimates and assumptions, and the actual savings and timing for those savings may vary materially based on factors such as local labor regulations, negotiations with third parties, and operational requirements. These estimates and assumptions are also subject to significant economic, competitive and other uncertainties, some of which are beyond our control. There can be no assurance that we will fully realize the desired and anticipated benefits from these activities. To the extent that we are unable to improve our financial performance, further restructuring measures may be required in the future. Furthermore, we are expecting to be able to use the anticipated cost savings from these activities to fund and support our current growth opportunities and incremental investments for future growth. If the cost-savings do not materialize as anticipated, or within our expected timeframes, our ability to invest in growth may be limited and our business and operating results may be adversely affected.

As part of the restructuring plans, we reduced the size of our product portfolio and the assortment of similar products at similar price points within each product category over the past several fiscal years. While we are constantly replacing products and are dependent on the success of our new products, this product portfolio simplification has made us even more dependent on the success of the new products that we are introducing.

As we focus on growth opportunities, we are divesting or discontinuing non-strategic product categories and pursuing strategic acquisitions and investments, which, if unsuccessful, could have an adverse impact on our business.

During the third quarter of fiscal year 2013, the declining trends in our PC peripherals accelerated, and we made a strategic decision to divest or discontinue certain non-strategic product categories and products. We continue to review our product portfolio and update our non-strategic product categories and products. We recently announced that we plan to exit the OEM business. If we are unable to effect sales on favorable terms or if realignment is more costly or distracting than we expect or has a negative effect on our organization, employees and retention, then our business and operating results may be adversely affected. Discontinuing products with service components may also cause us to continue to incur expenses to maintain services within the product life cycle or to adversely affect our customer and consumer relationships and brand. In addition, discontinuing product categories, even categories that we consider non-strategic, reduces the size and diversification of our business and causes us to be more dependent on a smaller number of product categories.

As we attempt to grow our business in strategic product categories and emerging market geographies, we will consider growth through acquisition or investment. We will evaluate acquisition opportunities that could provide us with additional product or service offerings or with additional industry expertise, assets and capabilities. Acquisitions could result in difficulties integrating acquired operations, products, technology, internal controls, personnel and management teams and result in the diversion of capital and management's attention away from other business issues and opportunities. If we fail to successfully integrate acquisitions, our business could be harmed. Moreover, our acquisitions may not be successful in achieving our desired strategic objectives, which would also cause our business to suffer. Acquisitions can also lead to large non-cash charges that can have an adverse effect on our results of

operations as a result of write-offs for items such as future impairments of intangible assets and goodwill or the recording of stock-based compensation. Several of our past acquisitions have not been successful and have led to impairment charges, including a \$122.7 million and \$214.5 million non-cash goodwill impairment charge in fiscal years 2015 and 2013, respectively, related to our video conferencing reporting unit. In addition, from time to time we make strategic venture investments in other companies that provide products and services that are complementary to ours. If these investments are unsuccessful, this could have an adverse impact on our results of operations, operating cash flows and financial condition.

Table of Contents

We rely on third parties to sell and distribute our products, and we rely on their information to manage our business. Disruption of our relationship with these channel partners, changes in their business practices, their failure to provide timely and accurate information, changes in distribution partners, practices or models or conflicts among our channels of distribution could adversely affect our business, results of operations, operating cash flows and financial condition.

Our sales channel partners, the distributors and retailers who distribute and sell our products, also sell products offered by our competitors and, in the case of retailer house brands, may also be our competitors. If product competitors offer our sales channel partners more favorable terms, have more products available to meet their needs, or utilize the leverage of broader product lines sold through the channel, or if our retailer channel partners show preference for their own house brands, our sales channel partners may de-emphasize or decline to carry our products. In addition, certain of our sales channel partners could decide to de-emphasize the product categories that we offer in exchange for other product categories that they believe provide them with higher returns. If we are unable to maintain successful relationships with these sales channel partners or to maintain our distribution channels, our business will suffer.

As we expand into new product categories and markets in pursuit of growth, we will have to build relationships with new channel partners and adapt to new distribution and marketing models. These new partners, practices and models may require significant management attention and operational resources and may affect our accounting, including revenue recognition, gross margins, and the ability to make comparisons from period to period. Entrenched and more experienced competitors will make these transitions difficult. If we are unable to build successful distribution channels or successfully market our products in these new product categories, we may not be able to take advantage of the growth opportunities, and our business and our ability to effect a turnaround in our business could be adversely affected.

The impact of economic conditions, evolving consumer preferences, and purchasing patterns on our distribution partners, or competition between our sales channels, could result in sales channel disruption. For example, if sales at large retail stores are displaced as a result of bankruptcy, competition from Internet sales channels or otherwise, our product sales could be adversely affected. Any loss of a major partner or distribution channel or other channel disruption could make us more dependent on alternate channels, increase pricing and promotional pressures from other partners and distribution channels, increase our marketing costs, or adversely impact buying and inventory patterns, payment terms or other contractual terms.

We use retail sell-through data, which represents sales of our products by our direct retailer customers to consumers, and by our distributor customers to their customers, along with other metrics, to assess consumer demand for our products. Sell-through data is subject to limitations due to collection methods and the third-party nature of the data and thus may not be an accurate indicator of actual consumer demand for our products. In addition, the customers supplying sell-through data vary by geographic region and from period to period, but typically represent a majority of our retail sales. If we do not receive this information on a timely and accurate basis, or if we do not properly interpret this information, our results of operations and financial condition may be adversely affected.

Our principal manufacturing operations and third-party contract manufacturers are located in China and Southeast Asia, which exposes us to risks associated with doing business in that geographic area.

We produce approximately half of our peripheral products at facilities we own in China. The majority of our other production is performed by third-party contract manufacturers, including other design manufacturers, in China.

Our manufacturing operations in China could be adversely affected by changes in the interpretation and enforcement of legal standards, by strains on China's available labor pool, changes in labor costs and other employment dynamics, high turnover among Chinese employees, communications, trade, and other infrastructures, by natural disasters, by conflicts or disagreements between China and Taiwan or China and the United States, by labor unrest, and by other

trade customs and practices that are dissimilar to those in the United States and Europe. Interpretation and enforcement of China's laws and regulations continue to evolve and we expect differences in interpretation and enforcement to continue in the foreseeable future.

Our manufacturing operations at third-party contractors could be adversely affected by contractual disagreements, by labor unrest, by natural disasters, by strains on local communications, trade, and other

Table of Contents

infrastructures, by competition for the available labor pool or manufacturing capacity, by increasing labor and other costs, and by other trade customs and practices that are dissimilar to those in the United States and Europe.

Further, we may be exposed to fluctuations in the value of the local currency in the countries in which manufacturing occurs. Future appreciation of these local currencies could increase our component and other raw material costs. In addition, our labor costs could continue to rise as wage rates increase and the available labor pool declines. These conditions could adversely affect our financial results.

We purchase key components and products from a limited number of sources, and our business and operating results could be adversely affected if supply were delayed or constrained or if there were shortages of required components.

We purchase certain products and key components from a limited number of sources. If the supply of these products or key components, such as micro-controllers, and optical sensors, were to be delayed or constrained, or if one or more of our single-source suppliers goes out of business as a result of adverse global economic conditions or natural disasters, we might be unable to find a new supplier on acceptable terms, or at all, and our product shipments to our customers could be delayed, which could adversely affect our business, financial condition and operating results.

Lead times for materials, components and products ordered by us or by our contract manufacturers can vary significantly and depend on factors such as contract terms, demand for a component, and supplier capacity. From time to time, we have experienced component shortages and extended lead times on semiconductors, such as micro-controllers and optical sensors, and base metals used in our products. Shortages or interruptions in the supply of components or subcontracted products, or our inability to procure these components or products from alternate sources at acceptable prices in a timely manner, could delay shipment of our products or increase our production costs, which could adversely affect our business and operating results.

New conflict minerals regulations are causing us to incur additional expenses and could limit the supply and increase the cost of certain metals used in manufacturing our products.

As part of the Dodd-Frank Wall Street Reform and Consumer Protection Act, the SEC adopted disclosure requirements regarding the use of certain minerals, known as conflict minerals, which are mined from the Democratic Republic of Congo and adjoining countries, as well as procedures regarding a manufacturer's efforts to identify and prevent the sourcing of such minerals and metals produced from those minerals. Additional reporting obligations are being considered by the European Union. The implementation of the existing U.S. requirements and any additional requirements in Europe could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals used in the manufacture of our products. The number of suppliers who provide conflict-free minerals may be limited, and the implementation of these requirements may decrease the number of suppliers capable of supplying our needs for certain metals. In addition, there may be material costs associated with complying with the disclosure requirements, such as costs related to the due diligence process of determining the source of certain minerals used in our products, as well as costs of possible changes to products, processes, or sources of supply as a consequence of such verification activities. As our supply chain is complex and we use contract manufacturers for some of our products, we may not be able to sufficiently verify the origins of the relevant minerals used in our products through the due diligence procedures that we implement, which may adversely affect our reputation. We may also encounter challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free, which could, if we are unable to satisfy their requirements or pass through any increased costs associated with meeting their requirements place us at a competitive disadvantage, adversely affect our business and operating results, or both. We filed our report for the calendar year 2014 with the SEC on May 29, 2015.

If we do not successfully coordinate the worldwide manufacturing and distribution of our products, we could lose sales.

Our business requires us to coordinate the manufacture and distribution of our products over much of the world. We rely on third parties to manufacture many of our products, manage centralized distribution centers, and transport our products. If we do not successfully coordinate the timely manufacturing and distribution of our products, we may have insufficient supply of products to meet customer demand, we could lose sales, we may experience a build-up in inventory, or we may incur additional costs.

Table of Contents

By locating our manufacturing in China and Southeast Asia, we are reliant on third parties to get our products to distributors around the world. Transportation costs, fuel costs, labor unrest, natural disasters and other adverse effects on our ability, timing and cost of delivering products can increase our inventory, decrease our margins, adversely affect our relationships with distributors and other customers and otherwise adversely affect our results of operations and financial condition.

A significant portion of our quarterly retail orders and product deliveries generally occur in the last weeks of the fiscal quarter. This places pressure on our supply chain and could adversely affect our revenues and profitability if we are unable to successfully fulfill customer orders in the quarter.

We conduct operations in a number of countries, and have invested significantly in growing our sales and marketing activities in China, and the effect of business, legal and political risks associated with international operations could adversely affect us.

We conduct operations in a number of countries, and have invested significantly in growing our personnel and sales and marketing activities in China and, to a lesser extent, other emerging markets. We may also increase our investments to grow sales in other emerging markets, such as Latin America and Eastern Europe. There are risks inherent in doing business in international markets, including:

•Difficulties in staffing and managing international operations;

•Compliance with laws and regulations, including environmental, tax and anti-corruption laws, which vary from country to country and over time, increasing the costs of compliance and potential risks of non-compliance;

•Varying laws, regulations and other legal protections, uncertain and varying enforcement of those laws and regulations, dependence on local authorities, and the importance of local networks and relationships;

•Exposure to political and financial instability, especially with the uncertainty associated with the ongoing sovereign debt crisis in certain Euro zone countries, which may lead to currency exchange losses and collection difficulties or other losses;

•Lack of infrastructure or services necessary or appropriate to support our products and services;

•Exposure to fluctuations in the value of local currencies;

•Difficulties and increased costs in establishing sales and distribution channels in unfamiliar markets, with their own market characteristics and competition, including entrenched local competition;

•Weak protection of our intellectual property rights;

•Higher credit risks;

•Changes in VAT (value-added tax) or VAT reimbursement;

•Imposition of currency exchange controls;

•Import or export restrictions that could affect some of our products, including those with encryption technology;

•Delays from customs brokers or government agencies; and

- A broad range of customs, consumer trends, and more.

Any of these risks could adversely affect our business, financial condition and operating results.

Sales growth in China is an important part of our expectations for our business. As a result, if Chinese economic, political or business conditions deteriorate, or if one or more of the risks described above materializes in China, our overall business and results of operations will be adversely affected.

Table of Contents

Our financial performance is subject to risks associated with fluctuations in currency exchange rates.

A significant portion of our business is conducted in currencies other than the U.S. Dollars. Therefore, we face exposure to movements in currency exchange rates.

Our primary exposure to movements in currency exchange rates relates to non-U.S. Dollar denominated sales and operating expenses worldwide. For fiscal year 2015, approximately 44% of our revenue was in non-U.S. denominated currencies. Weakening of currencies relative to the U.S. Dollar adversely affects the U.S. Dollar value of our non-U.S. Dollar-denominated sales and earnings. If we raise international pricing to compensate, it could potentially reduce demand for our products, adversely affecting our sales and potentially having an adverse impact on our market share. Margins on sales of our products in non-U.S. Dollar denominated countries and on sales of products that include components obtained from suppliers in non-U.S. Dollar denominated countries could be adversely affected by currency exchange rate fluctuations. In some circumstances, for competitive or other reasons, we may decide not to raise local prices to fully offset the U.S. Dollar's strengthening, which would adversely affect the U.S. Dollar value of our non-U.S. Dollar-denominated sales and earnings. Competitive conditions in the markets in which we operate may also limit our ability to increase prices in the event of fluctuations in currency exchange rates. Conversely, strengthening of currency rates may also increase our product component costs and other expenses denominated in those currencies, adversely affecting operating results. We further note that a larger portion of our sales than of our expenses are denominated in non-U.S. denominated currencies.

We use derivative instruments to hedge certain exposures to fluctuations in currency exchange rates. The use of such hedging activities may not offset any, or more than a portion, of the adverse financial effects of unfavorable movements in currency exchange rates over the limited time the hedges are in place and do not protect us from long term shifts in currency exchange rates.

As a result, fluctuations in currency exchange rates could adversely affect our business, operating results and financial condition. Moreover, these exposures may change over time.

As a Swiss, dual-listed company operating in many markets and jurisdictions and expanding into new growth categories, we are subject to risks associated with new, existing and potential future laws and regulations.

Based on our current business model and as we expand into new markets and product categories, we must comply with a wide variety of laws, standards and other requirements governing, among other things, health and safety, hazardous materials usage, product-related energy consumption, packaging, recycling and environmental matters. Our products may be required to obtain regulatory approvals and satisfy other regulatory concerns in the various jurisdictions where they are manufactured, sold or both. These requirements create procurement and design challenges, which, among other things, require us to incur additional costs identifying suppliers and contract manufacturers who can provide or obtain compliant materials, parts and end products. Failure to comply with such requirements can subject us to liability, additional costs, and reputational harm and, in severe cases, force us to recall products or prevent us from selling our products in certain jurisdictions.

As a Swiss company with shares listed on both the SIX Swiss Exchange and the Nasdaq Global Select Market, we are also subject to both Swiss and United States corporate governance and securities laws and regulations. In addition to the extra costs and regulatory burdens of our dual regulatory obligations, the two regulatory regimes may not always be compatible and may impose disclosure obligations or operating restrictions on our business to which our competitors and other companies are not subject. For example, on January 1, 2014, subject to certain transitional provisions, the Swiss Federal Council Ordinance Against Excessive Compensation at Public Companies (the "Ordinance") became effective in connection with the Minder initiative approved by Swiss voters during 2013. The Ordinance, among other things, (a) requires a binding shareholder "say on pay" vote with respect to the compensation of

members of our executive management and Board of Directors, (b) generally prohibits the making of severance, advance, transaction premiums and similar payments to members of our executive management and Board of Directors, (c) imposes other restrictive compensation practices, and (d) requires that our articles of incorporation specify various compensation-related matters. In addition, during 2013, Swiss voters considered an initiative to limit pay for a chief executive officer to a multiple of no more than twelve times the salary of the lowest-paid employee. Although voters rejected that initiative, it did receive substantial voter support. The Ordinance, potential future initiatives relating to corporate governance or executive compensation, and Swiss voter sentiment in

Table of Contents

favor of such regulations may increase our non-operating costs and adversely affect our ability to attract and retain executive management and members of our Board of Directors.

As a result of changes in tax laws, treaties, rulings, regulations or agreements, or their interpretation, of Switzerland or any other country in which we operate, the loss of a major tax dispute or a successful challenge to our operating structure, intercompany pricing policies or the taxable presence of our key subsidiaries in certain countries, or other factors, our effective income tax rates may increase in the future, which could adversely affect our net income and cash flows.

We operate in multiple jurisdictions and our profits are taxed pursuant to the tax laws of these jurisdictions. Our effective income tax rate may be affected by changes in or interpretations of tax laws, treaties, rulings, regulations or agreements in any given jurisdiction, utilization of net operating loss and tax credit carryforwards, changes in geographical allocation of income and expense, and changes in management's assessment of matters such as the realizability of deferred tax assets. In the past, we have experienced fluctuations in our effective income tax rate. Our effective income tax rate in a given fiscal year reflects a variety of factors that may not be present in the succeeding fiscal year or years. There is no assurance that our effective income tax rate will not change in future periods.

We are incorporated in the Canton of Vaud in Switzerland and our effective income tax rate benefits from a longstanding ruling from the Canton of Vaud. The tax rules in Switzerland are expected to change in response to certain guidance and demands from both the European Union and the Organization for Economic Co-operation and Development and that could have an adverse effect on our tax ruling and effective income tax rate. Switzerland's implementation of any material change in tax laws or policies or its adoption of new interpretations of existing tax laws and rulings, or changes in our tax ruling from the Canton of Vaud, could result in a higher effective income tax rate on our worldwide earnings and such change could adversely affect our net income.

We file Swiss and foreign tax returns. We are frequently subject to tax audits, examinations and assessments in various jurisdictions. If any tax authority successfully challenges our operational structure, intercompany pricing policies or the taxable presence of our key subsidiaries in certain countries, if the terms of certain income tax treaties are interpreted in a manner that is adverse to our structure, or if we lose a material tax dispute in any country, our effective income tax rate could increase. A material assessment by a governing tax authority could adversely affect our profitability. If our effective income tax rate increases in future periods, our net income and cash flows could be adversely affected.

Claims by others that we infringe their proprietary technology could adversely affect our business.

We have been expanding the categories of products we sell, and entering new markets, such as entering the market for enterprise video conferencing and introducing products for tablets, other mobile devices and digital music. We expect to continue to enter new categories and markets. As we do so, we face an increased risk that claims alleging we infringe the patent or other intellectual property rights of others, regardless of the merit of the claims, may increase in number and significance. Infringement claims against us may also increase as the functionality of video, voice, data and conferencing products begin to overlap. This risk is heightened by the increase in lawsuits brought by holders of patents that do not have an operating business or are attempting to license broad patent portfolios and by the increasing attempts by companies in the technology industries to enjoin their competitors from selling products that they claim infringe their intellectual property rights. Intellectual property lawsuits are subject to inherent uncertainties due to the complexity of the technical issues involved, and we cannot be certain that we will be successful in defending ourselves against intellectual property claims. A successful claimant could secure a judgment that requires us to pay substantial damages or prevents us from distributing certain products or performing certain services. We might also be required to seek a license for the use of such intellectual property, which may not be available on commercially acceptable terms or at all. Alternatively, we may be required to develop non-infringing technology,

which could require significant effort and expense and may ultimately not be successful. Any claims or proceedings against us, whether meritorious or not, could be time consuming, result in costly litigation or the diversion of significant operational resources, or require us to enter into royalty or licensing agreements, any of which could materially and adversely affect our business and results of operations.

We may be unable to protect our proprietary rights. Unauthorized use of our technology may result in the development of products that compete with our products.

Table of Contents

Our future success depends in part on our proprietary technology, technical know-how and other intellectual property. We rely on a combination of patent, trade secret, copyright, trademark and other intellectual property laws, and confidentiality procedures and contractual provisions such as nondisclosure terms and licenses, to protect our intellectual property.

We hold various United States patents and pending applications, together with corresponding patents and pending applications from other countries. It is possible that any patent owned by us will be invalidated, deemed unenforceable, circumvented or challenged, that the patent rights granted will not provide competitive advantages to us, or that any of our pending or future patent applications will not be granted. In addition, other intellectual property laws or our confidentiality procedures and contractual provisions may not adequately protect our intellectual property. Also, others may independently develop similar technology, duplicate our products, or design around our patents or other intellectual property rights. Unauthorized parties have copied and may in the future attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. Any of these events could adversely affect our business, financial condition and operating results.

Product quality issues could adversely affect our reputation and could impact our operating results.

The market for our products is characterized by rapidly changing technology and evolving industry standards. To remain competitive, we must continually introduce new products and technologies. The products that we sell could contain defects in design or manufacture. Defects could also occur in the products or components that are supplied to us. There can be no assurance we will be able to detect and remedy all defects in the hardware and software we sell. Failure to do so could result in product recalls, product redesign efforts, lost revenue, loss of reputation, and significant warranty and other expenses to remedy.

The collection, storage, transmission, use and distribution of user data could give rise to liabilities and additional costs of operation as a result of laws, governmental regulation and risks of security breaches.

In connection with certain of our products, we collect data related to our consumers. This information is increasingly subject to legislation and regulations in numerous jurisdictions around the world, and especially in Europe. Government actions are typically intended to protect the privacy and security of personal information and its collection, storage, transmission, use and distribution in or from the governing jurisdiction. In addition, because various jurisdictions have different laws and regulations concerning the use, storage and transmission of such information, we may face requirements that pose compliance challenges in existing markets as well as new international markets that we seek to enter. The collection of user data heightens the risk of security breaches related to our IT systems and the systems of third-party data storage and other service and IT providers. Such laws and regulations, and the variation between jurisdictions, as well as additional security measures and risk, could subject us to costs, liabilities or negative publicity that could adversely affect our business.

We are upgrading our worldwide business application suite, and difficulties, distraction or disruptions may interrupt our normal operations and adversely affect our business and operating results.

During fiscal years 2014 and 2015, we devoted significant resources to the upgrade of our worldwide business application suite to Oracle's version R12. We recently implemented that upgrade and will be testing the success of that implementation through fiscal year 2016 and into fiscal year 2017. As we transition to the new business application suite, we may experience difficulties with our systems, management distraction, lack of visibility into our business operations and results, and significant business disruptions. Difficulties with our systems may interrupt our normal operations, including our enterprise resource planning, forecasting, demand planning, supply planning, intercompany processes, promotion management, internal financial controls, pricing, and our ability to provide quotes, process orders, ship products, provide services and support to our customers and consumers, bill and track our customers,

fulfill contractual obligations, and otherwise run and track our business. In addition, we may need to expend significant attention, time and resources to correct problems or find alternative sources for performing these functions. Any such difficulty or disruption may adversely affect our business and operating results.

In previous periods, we identified material weaknesses in our internal control over financial reporting and, if we are unable to satisfy regulatory requirements relating to internal controls or if our internal control over financial reporting is not effective, our business and stock price could be adversely affected.

In connection with Section 404 of the Sarbanes-Oxley Act, we have identified in the past and may, from time-to-time in the future, identify issues with our internal controls and deficiencies in our internal control over financial

Table of Contents

reporting. Certain of these material weaknesses were identified during the independent investigation by our Audit Committee in fiscal year 2015 and a review of related accounting matters that resulted in late filings of our Annual Report on Form 10-K for fiscal year 2014 and our Quarterly Reports on Form 10-Q for the first and second quarters of fiscal year 2015 and a restatement of our financial results for fiscal years 2011 and 2012 and the first quarter of fiscal year 2012. This also follows the identification of material weaknesses in our internal control over financial reporting in our Annual Report on Form 10-K for the fiscal year ended March 31, 2013, as amended on Form 10-K/A, and the identification in previous periods of significant deficiencies in our internal controls over financial reporting. A material weakness is defined as a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. As a result of these material weaknesses, our management concluded that our internal control over financial reporting was not effective as of March 31, 2013 and March 31 2014, based on criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) in Internal Control-An Integrated Framework (1992). While we believe that we have remediated these material weaknesses, if we find that our remediation efforts were not effective or if additional material weaknesses or significant deficiencies in our internal controls are discovered or occur in the future, our consolidated financial statements may contain material misstatements and we could be required to restate our financial results again, we could be subject to litigation which, whether meritorious or not, could be time consuming, costly or divert significant operational resources, we could lose investor confidence in the accuracy and completeness of our financial reports, and our reputation, business, results of operations and stock price could be adversely affected.

In addition, in May 2013, COSO issued a new version of its internal control framework, which has been deemed by COSO to supersede the 1992 version of the framework as of December 15, 2014. We are developing our plan for transition to application of the 2013 edition of the framework to our assessment of our internal control over financial reporting. During the course of the transition to the new framework and its application to our assessment of our internal control over financial reporting, we may determine that other deficiencies exist in our internal controls that may rise to the level of material weaknesses. Such an occurrence, or a failure to effectively remedy such a deficiency, could adversely affect investor confidence in the accuracy and timeliness of our financial reports.

Goodwill impairment charges could have an adverse effect on the results of our operations.

Goodwill associated with a number of previous acquisitions could result in impairment charges. The slowdown in the overall video conferencing industry together with the competitive environment in fiscal year 2013 resulted in a \$214.5 million non-cash goodwill impairment charge in fiscal year 2013, which substantially impacted our operating results. We recorded an additional impairment charge of goodwill of \$122.7 million related to our video conferencing reporting unit in fiscal year 2015, reducing the goodwill of our video conferencing reporting unit to zero, which substantially impacted our operating results again. As we attempt to effect a turnaround of our business, and divesting or discontinuing product categories or products that we previously acquired, we will need to continue to evaluate the carrying value of our goodwill. Additional impairment charges could adversely affect our results of operations.

Table of Contents

(1) Contracted through a third-party warehouse management company.

Logitech also contracts with various distribution services throughout the world for additional warehouses in which we store inventory. We also have leased sales offices in approximately 65 locations and 39 countries, with various expiration dates from 2015 to 2020.

We believe that Logitech's manufacturing and distribution facilities are adequate for our ongoing needs and we continue to evaluate the need for facilities to meet current and anticipated future requirements.

ITEM 3. LEGAL PROCEEDINGS

From time-to-time we are involved in claims and legal proceedings that arise in the ordinary course of our business. We are currently subject to several such claims and a small number of legal proceedings. We believe that these matters lack merit and we intend to vigorously defend against them. Based on currently available information, we do not believe that resolution of pending matters will have a material adverse effect on our financial condition, cash flows or results of operations. However, litigation is subject to inherent uncertainties, and there can be no assurances that our defenses will be successful or that any such lawsuit or claim would not have a material adverse impact on our business, financial condition, cash flows and results of operations in a particular period. Any claims or proceedings against us, whether meritorious or not, can have an adverse impact because of defense costs, diversion of management and operational resources, negative publicity and other factors. Any failure to obtain necessary license or other rights, or litigation arising out of intellectual property claims, could adversely affect our business.

ITEM 4. MINE SAFETY DISCLOSURES

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Logitech's shares are listed and traded on both the SIX Swiss Exchange, where the share price is denominated in Swiss francs, and on the Nasdaq Global Select Market, where the share price is denominated in U.S. Dollars. The trading symbol for Logitech shares is LOGN on the SIX Swiss Exchange and LOGI on Nasdaq. As of May 12, 2015, there were 173,106,620 shares issued (including 8,547,748 shares held as treasury stock) held by 14,252 holders of record, and the closing price of our shares was CHF 14.05 (\$15.11 based on exchange rates on such date) per share on the SIX Swiss Exchange and \$15.11 per share as reported by the Nasdaq Stock Market.

SIX Swiss Exchange

The following table sets forth certain historical share price information for the Company's shares traded on the SIX Swiss Exchange, as reported by the SIX Swiss Exchange.

	SIX Swiss Exchange	
	High CHF	Low CHF
Fiscal Year Ended March 31, 2015		
First quarter	13.80	11.00
Second quarter	13.95	11.15
Third quarter	14.60	10.75
Fourth quarter	14.25	11.60
Fiscal Year Ended March 31, 2014		
First quarter	6.80	5.92
Second quarter	8.05	6.14
Third quarter	12.25	7.93
Fourth quarter	14.70	12.00

Nasdaq Global Select Market

The following table sets forth certain historical share price information for the Company's shares traded on the Nasdaq Global Select Market.

	Nasdaq Global Select Market	
	High	Low
Fiscal Year Ended March 31, 2015		
First quarter	\$15.46	\$12.34
Second quarter	15.35	12.56
Third quarter	15.00	11.51
Fourth quarter	15.21	12.50
Fiscal Year Ended March 31, 2014		
First quarter	\$7.27	\$6.25
Second quarter	8.97	6.47
Third quarter	13.60	8.75
Fourth quarter	16.86	13.22

Dividends

Under Swiss law, a corporation may only pay dividends upon a vote of its shareholders. This vote typically follows the recommendation of the corporation's Board of Directors. In March 2015, we announced a plan to pay \$250.0 million in cumulative dividends for fiscal year 2015 through fiscal year 2017. The Board of Directors plans to request shareholder approval of the Swiss Franc equivalent of an \$85 million dividend for fiscal year 2015 at our next annual general meeting. Based on exchange rates of 1.0283 and the number of shares outstanding as of March 31, 2015, this represents approximately CHF 0.51 per share, compared to dividend of CHF 0.26 per share for fiscal year 2015. On December 8, 2014, Logitech's shareholders approved a cash dividend payment of CHF 43.1 million out of retained earnings to Logitech shareholders who owned shares on December 29, 2014. Eligible shareholders were paid CHF 0.26 per share (\$0.27 per share in U.S. Dollars), totaling \$43.8 million in U.S. Dollars on December 30, 2014. On September 4, 2013, Logitech's shareholders approved a cash dividend payment of CHF 33.7 million out of retained earnings to Logitech shareholders who owned shares on September 16, 2013. Eligible shareholders were paid CHF 0.21 per share (\$0.22 per share in U.S. Dollars), totaling \$36.1 million in U.S. Dollars on September 17, 2013. On September 5, 2012, Logitech's shareholders approved a cash dividend payment of CHF 125.7 million out of retained earnings to Logitech shareholders who owned shares on September 17, 2012. Eligible shareholders were paid CHF 0.79 per share (\$0.85 per share in U.S. Dollars), totaling \$133.5 million in U.S. Dollars on September 18, 2012. The dividend in September 2012 qualified as a distribution of qualifying additional paid-in-capital and, as such, was not subject to Swiss Federal withholding tax.

Dividends paid and similar cash or in-kind distributions made by Logitech to a holder of Logitech shares (including dividends or liquidation proceeds and stock dividends), other than distributions of qualifying additional paid-in-capital if it is available under the current Swiss tax regime, are subject to a Swiss federal anticipatory tax at a rate of 35%. The anticipatory tax must be withheld by Logitech from the gross distribution, and paid to the Swiss Federal Tax Administration.

A Swiss resident holder and beneficial owner of Logitech shares may qualify for a full refund of the Swiss anticipatory tax withheld from such dividends. A holder and beneficial owner of Logitech shares who is a non-resident of Switzerland, but a resident of a country that maintains a double tax treaty with Switzerland, may qualify for a full or partial refund of the Swiss anticipatory tax withheld from such dividends by virtue of the provisions of the applicable treaty between Switzerland and the country of residence of the holder and beneficial owner of the Logitech shares.

In accordance with the tax convention between the United States and the Swiss Confederation ("Treaty"), a mechanism is provided whereby a U.S. resident (as determined under the Treaty), and U.S. corporations, other than U.S. corporations having a "permanent establishment" or a fixed base, as defined in the Treaty, in Switzerland, generally can obtain a refund of the Swiss anticipatory tax withheld from dividends in respect of Logitech shares, to the extent that 15% of the gross dividend is withheld as final withholding tax (i.e. 20% of the gross dividend may

generally be refunded). In specific cases, U.S. companies not having a "permanent establishment" or a fixed base

Table of Contents

in Switzerland owning at least 10% of Logitech registered shares may receive a refund of the Swiss anticipatory tax withheld from dividends to the extent it exceeds 5% of the gross dividend (i.e., 30% of the gross dividend may be refunded). To get the benefit of a refund, holders must beneficially own Logitech shares at the time such dividend becomes due.

Share Repurchases

The following table presents certain information related to purchases made by Logitech of its equity securities under its publicly announced share buyback program (in thousands, except per share amounts):

During Fiscal Year Ended	Shares Repurchased	Weighted Average Price Per Share		Amount Available for Repurchase
		CHF	USD	
March 31, 2013	8,600	9.66	10.21	\$6,472
March 31, 2014	—	—	—	250,000
March 31, 2015	115	—	14.43	248,337
	8,715			

In fiscal year 2015, the following approved share buyback programs were in place:

Share Buyback Program	Shares	Approved Amounts
March 2014	17,311	\$250,000

In September 2012, the Company's shareholders approved the cancellation of the 18.5 million shares repurchased under the September 2008 amended share buyback program. These shares were legally cancelled during the quarter ended December 31, 2013.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve risks and uncertainties. The Company's actual results could differ materially from those anticipated in these statements as a result of certain factors, including those set forth above in Item 1A, Risk Factors, and below in Item 7A, Quantitative and Qualitative Disclosures about Market Risk.

Overview of Our Company

Logitech is a world leader in products that connect people to the digital experiences they care about. Spanning multiple computing, communication and entertainment platforms, we develop and market innovative hardware and software products that enable or enhance digital navigation, music and video entertainment, gaming, social networking, audio and video communication over the Internet and home-entertainment control. We have two reporting segments: peripherals and video conferencing.

Our peripherals segment encompasses the design, manufacturing and marketing of peripherals for PCs, tablets and other digital platforms. Within our peripherals segment, we classify our retail product categories as growth, profit maximization, and non-strategic. Our growth product categories are: Mobile Speakers, Gaming, Video Collaboration and Tablet & Other Accessories. Our profit maximization categories are: Pointing Devices, Keyboards & Combos, Audio-PC & Wearables, PC Webcams, and Home Control.

Our brand, portfolio management, product development and engineering teams in our peripherals segment are responsible for product strategy, technological innovation, product design and development and to bring our products to market.

Our global marketing organization is responsible for developing and building the Logitech brand, consumer insights, public relations, social media and digital marketing. Our regional retail sales and marketing activities are organized into three geographic areas: Americas (North and South America), EMEA (Europe, Middle East and Africa) and Asia Pacific (including, among other countries, China, Taiwan, Japan and Australia).

We sell our peripherals products to a network of retailers, including direct sales to retailers and indirect sales through distributors. Our worldwide retail network includes wholesale distributors, consumer electronics retailers, mass merchandisers, specialty electronics, computers and telecommunications stores, value-added resellers and online merchants. Sales of our retail peripherals were 89%, 88% and 87% of our net sales for fiscal years 2015, 2014 and 2013, respectively. The large majority of our revenues have historically been derived from sales of our peripherals products for use by consumers. Our OEM customers include several of the world's largest PC manufacturers. Sales to OEM customers were 6% of our net sales for each of fiscal years 2015, 2014 and 2013.

Our video conferencing segment encompasses the a Cloud-based video conferencing solution, design, manufacturing and marketing of Lifesize branded video conferencing products, infrastructure and services for the enterprise, public sector and other small to medium business markets. Video conferencing products include scalable high-definition, or HD, video communication endpoints, HD video conferencing systems with integrated monitors, video bridges, and other infrastructure software and hardware to support large-scale video deployments and services to support these products. The video conferencing segment maintains a separate marketing and sales organization, which sells Lifesize products and services worldwide. Video conferencing product development and product management organizations are separate, but coordinated with our peripherals business, particularly our Consumer Computing Platform group. In April 2015, we announced our intent to reorganize Lifesize with the goal of de-emphasizing Lifesize's legacy offerings more quickly to enable maximum traction with Lifesize Cloud. We plan to shrink our Lifesize business to grow the cloud opportunity faster. We sell our video conferencing products and services to distributors, value-added resellers, OEMs and, occasionally, direct enterprise customers. Net sales of video conferencing products and services were 5%, 6% and 7% of our net sales in the fiscal year 2015, 2014 and 2013, respectively. During fiscal years 2015 and 2013, we recorded goodwill impairment charges of \$122.7 million and \$214.5 million related to our video conferencing reporting segment, respectively.

We seek to fulfill the increasing demand for interfaces between people and the expanding digital world across multiple platforms and user environments. The interface evolves as platforms, user models and our target markets

evolve. As access to digital information has expanded, we have extended our focus to mobile devices, the digital home, and the enterprise as access points to the Internet and the digital world. All of these platforms require interfaces that are customized according to how the devices are used. We believe that continued investment in product research and development is critical to creating the innovation required to strengthen our competitive

Table of Contents

advantage and to drive future sales growth. We are committed to identifying and meeting current and future consumer trends with new and improved product technologies, partnering with others where our strengths are complementary, as well as leveraging the value of the Logitech and Lifesize brands from a competitive, channel partner and consumer experience perspective.

We believe that innovation, design and product quality are important to gaining market acceptance and maintaining market leadership.

We have been expanding the categories of products we sell and entering new markets, such as the markets for mobile speakers. As we do so, we are confronting new competitors, many of which have more experience in the categories or markets and have greater marketing resources and brand name recognition than we have. In addition, because of the continuing convergence of the markets for computing devices and consumer electronics, we expect greater competition in the future from well-established consumer electronics companies in our new categories as well as future ones we might enter. Many of these companies have greater financial, technical, sales, marketing and other resources than we have.

From time to time, we may seek to partner with, or acquire when appropriate, companies that have products, personnel, and technologies that complement our strategic direction. We continually review our product offerings and our strategic direction in light of our profitability targets, competitive conditions, changing consumer trends and the evolving nature of the interface between the consumer and the digital world. In April 2015, we announced our intent to exit the OEM business and to reorganize the Lifesize business to sharpen its focus on its Cloud-based offering.

Summary of Financial Results

Our total net sales for fiscal year 2015 decreased 1% in comparison to fiscal year 2014 due to decreases in video conferencing sales and OEM sales, partially offset by an increase in retail sales.

Retail sales and units sold during fiscal year 2015 increased 1% and 2%, respectively, compared to fiscal year 2014. Retail sales increased 8% and 2% in AMR and Asia Pacific, respectively, partially offset by a decrease of 7% in EMEA.

OEM sales and units sold during fiscal year 2015 decreased 17% and 25%, respectively, compared to fiscal year 2014. Sales of Lifesize video conferencing products, which were 5% of total net sales during fiscal year 2015, decreased 10% during fiscal year 2015, compared to fiscal year 2014. Lifesize is in the early stages of transitioning its product portfolio to the recently announced Lifesize Cloud, a software-as-a-service (SaaS) offering. While sales of the Cloud offering are growing rapidly, they are not yet large enough to offset the combination of the short-term portfolio transition and soft market conditions for video conferencing infrastructure.

Our gross margin for fiscal year 2015 increased to 36.6%, compared to 34.2% for fiscal year 2014. The increase in gross margin primarily reflects the combination of a significant improvement in both our Profit Maximization categories and Mobile Speakers category, driven largely by product cost reductions and economies of scale, as well as the benefit from exiting the products included in the Non-Strategic category.

Operating expenses for fiscal year 2015 were 35.9% of net sales, compared to 30.6% for fiscal year 2014. The increase in total operating expenses as a percentage of net sales was primarily due to a goodwill impairment charge of \$122.7 million relating to our video conferencing reporting unit, \$23.7 million in expenses related to the Audit Committee's Independent investigation (as described in our Annual Report on Form 10-K for fiscal year 2014) and related expenses, partially offset by a restructuring credit of \$4.9 million during fiscal year 2015 resulting from partial lease termination of our Silicon Valley campus, which was previously vacated and under a restructuring plan during fiscal year 2014, as opposed to a restructuring charge of \$13.8 million during fiscal year 2014, as well as savings from prior year's restructuring actions and the ongoing rationalization of infrastructure.

Net income for fiscal year 2015 was \$9.3 million, compared to net income of \$74.3 million for fiscal year 2014. The decline was primarily due to a goodwill impairment charge of \$122.7 million during fiscal year 2015 partially offset by improvements in gross margin as discussed above.

Given our global sales presence and the reporting of our financial results in U.S. Dollars, our financial results for fiscal year 2015 were affected by significant shifts in currency exchange rates during fiscal year 2015. See "Results of Operations" beginning on page 50 for information on the effect of currency exchange results on our net

Table of Contents

sales. If the U.S. Dollar remains at its current strong levels in comparison to other currencies, this will affect our results of operations in future periods as well.

Trends in Our Business

Our sales of PC peripherals for use by consumers in Americas and Europe have historically made up the large majority of our revenues. In the last several years, the PC market has changed dramatically and there continues to be significant weakness in the global market for new PCs. This weakness had a negative impact on our net sales in all of our PC-related categories. We believe that this weakness reflects the growing popularity of tablets and smartphones as mobile computing devices.

We believe our future growth will be determined by our ability to rapidly create innovative products across multiple digital platforms - especially accessories for mobility-related products, including tablets and smartphones, gaming and digital music devices, to offset the decline in our PC peripherals. The following discussion represents key trends specific to each of our two operating segments: peripherals and video conferencing.

Trends Specific to our Peripherals Segment

Mobile Speakers: The mobile speaker market grew throughout fiscal year 2015 based on consumer smartphones, consumption of music through tablets, and the growth of music services and Internet radio. This market growth, together with our investments in the UE brand, our introduction of new products and our ability to gain market share during fiscal year 2015, has driven our growth in Mobile Speakers.

PC Peripherals (Pointing Devices, Keyboards & Combos, PC Webcams, Gaming and Audio PC & Wearables): Although the installed base of PC users is large, consumer demand for new PCs has declined in recent years, and we believe it will continue to decline in future years. As a consequence, consumer demand for PC peripherals is slowing, or in some cases declining. As the quality of PC-embedded webcams improves along with the increasing popularity of tablets and smartphones with embedded webcams, we expect future sales of our PC-connected webcams will continue to be weak (or continue to decline on a year-over-year basis). The PC Gaming platform continues to show strong growth as online gaming and multi-platform experiences gain greater popularity and gaming content becomes increasingly more demanding. We believe Logitech is well positioned to benefit from the PC Gaming market growth.

Enterprise Market: We are continuing our efforts to create and sell products and services to enterprises, including Video Collaboration products. For example, we have introduced the Logitech ConferenceCam CC3000e video collaboration product. Growing our enterprise peripherals business will continue to require investment in selected business-specific products, targeted product marketing, and sales channel development.

Tablets and Other Accessories: Smaller mobile computing devices, such as tablets with touch interfaces, have created new markets and usage models for peripherals and accessories. We offer a number of products to enhance the use of mobile devices, including keyboard folios for the iPad and iPad mini, and keyboard covers and folios for the iPad Air. We have also introduced keyboard folios for the Samsung Galaxy tablet. While we achieved growth in sales of our tablet covers for the iPad, we have seen the market decline through fiscal year 2015 for the iPad platform, which has impacted the sales of our tablet peripherals.

OEM Business: Sales of our OEM mice and keyboards have historically made up the bulk of our OEM sales. In recent years, there has been a dramatic shift away from desktop PCs and there continues to be weakness in the global market for PCs, which has adversely affected our sales of OEM mice and keyboards, all of which are sold with name-brand desktop PCs. We expect this trend to continue in the future, and we plan to exit the OEM business as we see limited opportunities for profitable growth.

Trends in Non-Strategic Peripherals Product Categories: We continue to evaluate our product offerings and exit those which no longer support our strategic direction.

Table of Contents

Trends Specific to our Video Conferencing Segment

The trend among businesses and institutions to use video conferencing offers a long-term growth opportunity for us. However, the overall video conferencing industry has experienced a slowdown in recent quarters. In addition, there has been an increase in the competitive environment. Lifesize is in the early stages of transitioning its product portfolio to Lifesize Cloud. While sales of this software-as-a-service offering are growing rapidly, they are not yet large enough to offset the combination of the short-term portfolio transition and soft market conditions for video conferencing infrastructure. Looking at this growth opportunity, recently in April 2015, we decided to reorganize Lifesize with the goal of de-emphasizing Lifesize's legacy offerings more quickly to enable maximum traction with Lifesize Cloud. We plan to shrink our Lifesize business to grow the Cloud opportunity faster. This resulted in an estimated \$122.7 million non-cash goodwill impairment charge in the quarter ended March 31, 2015. We believe the growth in our video conferencing segment depends in part on our ability to increase sales of our new Cloud offering and smooth transition from our legacy infrastructure business.

Critical Accounting Estimates

The preparation of financial statements and related disclosures in conformity with U.S. GAAP (Generally Accepted Accounting Principles in the United States of America) requires us to make judgments, estimates and assumptions that affect reported amounts of assets, liabilities, net sales and expenses, and the disclosure of contingent assets and liabilities.

We consider an accounting estimate critical if it: (i) requires management to make judgments and estimates about matters that are inherently uncertain; and (ii) is important to an understanding of our financial condition and operating results.

We base our estimates on historical experience and on various other assumptions we believe to be reasonable under the circumstances. Although these estimates are based on management's best knowledge of current events and actions that may impact us in the future, actual results could differ from those estimates. Management has discussed the development, selection and disclosure of these critical accounting estimates with the Audit Committee of the Board of Directors.

We believe the following accounting estimates are most critical to our business operations and to an understanding of our financial condition and results of operations, and reflect the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Accruals for Customer Programs

We record accruals for product returns, cooperative marketing arrangements, customer incentive programs and pricing programs. An allowance against accounts receivable is recorded for accruals and program activity related to our direct customers and indirect customers who receive payments for program activity through our direct customers. A liability is recorded for accruals and program activity related to our indirect customers who receive payments directly and do not have a right of offset against a receivable balance. The estimated cost of these programs is usually recorded as a reduction of revenue. If we receive a separately identifiable benefit from the customer and can reasonably estimate the fair value of that benefit, such cost is reflected in cost of sales or in operating expenses. Significant management judgment and estimates must be used to determine the cost of these programs in any accounting period.

Returns. We grant limited rights to return products. Return rights vary by customer, and range from just the right to return defective product to stock rotation rights limited to a percentage of sales approved by management. Estimates of expected future product returns are recognized at the time of sale based on analyses of historical return trends by customer and by product, inventories owned by and located at distributors and retailers, current customer demand, current operating conditions, and other relevant customer and product information. Upon recognition, we reduce sales and cost of sales for the estimated return. Return trends are influenced by product life cycle status, new product introductions, market acceptance of products, sales levels, product sell-through, the type of customer, seasonality, product quality issues, competitive pressures, operational policies and procedures, and other factors. Return rates can fluctuate over time, but are sufficiently predictable to allow us to estimate expected future product returns.

Cooperative Marketing Arrangements. We enter into customer marketing programs with many of our distribution and retail customers, and with certain indirect partners, allowing customers to receive a credit equal to a set percentage of their purchases of our products, or a fixed dollar credit for various marketing programs. The objective of these

arrangements is to encourage advertising and promotional events to increase sales of our

45

Table of Contents

products. Accruals for these marketing arrangements are recorded at the later of time of sale or time of commitment, based on negotiated terms, historical experience and inventory levels in the channel.

Customer Incentive Programs. Customer incentive programs include performance-based incentives and consumer rebates. We offer performance-based incentives to our distribution customers, retail customers and indirect partners based on pre-determined performance criteria. Accruals for performance-based incentives are recognized as a reduction of the sale price at the time of sale. Estimates of required accruals are determined based on negotiated terms, consideration of historical experience, anticipated volume of future purchases, and inventory levels in the channel. Consumer rebates are offered from time to time at our discretion for the primary benefit of end-users. Accruals for the estimated costs of consumer rebates and similar incentives are recorded at the later of time of sale or when the incentive is offered, based on the specific terms and conditions. Certain incentive programs, including consumer rebates, require management to estimate the number of customers who will actually redeem the incentive based on historical experience and the specific terms and conditions of particular programs.

Pricing Programs. We have agreements with certain customers that contain terms allowing price protection credits to be issued in the event of a subsequent price reduction. At our discretion, we also offer special pricing discounts to certain customers. Special pricing discounts are usually offered only for limited time periods or for sales of selected products to specific indirect partners. Our decision to make price reductions is influenced by product life cycle stage, market acceptance of products, the competitive environment, new product introductions and other factors. Accruals for estimated expected future pricing actions are recognized at the time of sale based on analysis of historical pricing actions by customer and by products, inventories owned by and located at distributors and retailers, current customer demand, current operating conditions, and other relevant customer and product information, such as stage of product life-cycle.

We regularly evaluate the adequacy of our accruals for product returns, cooperative marketing arrangements, customer incentive programs and pricing programs. Future market conditions and product transitions may require us to take action to increase such programs. In addition, when the variables used to estimate these costs change, or if actual costs differ significantly from the estimates, we would be required to record incremental increases or reductions to revenue or operating expenses. If, at any future time, we become unable to reasonably estimate these costs, recognition of revenue might be deferred until products are sold to users, which would adversely impact revenue in the period of transition.

Inventory Valuation

We must order components for our products and build inventory in advance of customer orders. Further, our industry is characterized by rapid technological change, short-term customer commitments and rapid changes in demand.

We record inventories at the lower of cost or market value and record write-downs of inventories that are obsolete or in excess of anticipated demand or market value. A review of inventory is performed each fiscal quarter that considers factors including the marketability and product life cycle stage, product development plans, component cost trends, demand forecasts and current sales levels. Inventory on hand which is not expected to be sold or utilized is considered excess, and we recognize the write-off in cost of sales at the time of such determination. The write-off is determined by comparison of the current replacement cost with the estimated selling price less any costs of completion and disposal (net realizable value) and the net realizable value less an allowance for normal profit. At the time of loss recognition, a new cost basis per unit, lower-cost basis for that inventory is established and subsequent changes in facts and circumstances would not result in an increase in the cost basis. If there were an abrupt and substantial decline in demand for Logitech's products or an unanticipated change in technological or customer requirements, we may be required to record additional write-downs that could adversely affect gross margins in the period when the write-downs are recorded.

Share-Based Compensation Expense

Share-based compensation expense includes compensation expense, reduced for estimated forfeitures. The grant date fair value for stock options and stock purchase rights is estimated using the Black-Scholes-Merton option-pricing valuation model. The grant date fair value of RSUs (restricted stock units) that vest upon meeting certain market conditions is estimated using the Monte-Carlo simulation method. The grant date fair value of time-based RSUs is calculated based on the closing market price on the date of grant, adjusted by estimated dividends yield prior to

vesting.

46

Table of Contents

Our estimates of share-based compensation expense require a number of complex and subjective assumptions including our stock price volatility, employee exercise patterns, future forfeitures, dividend yield, related tax effects and the selection of an appropriate fair value model. We estimate expected share price volatility based on historical volatility using daily prices over the term of past options, RSUs or purchase offerings, as we consider historical share price volatility as most representative of future volatility. We estimate expected life based on historical settlement rates, which we believe are most representative of future exercise and post-vesting termination behaviors. We use historical data to estimate pre-vesting forfeitures, and we record share-based compensation expense only for those awards that are expected to vest. The dividend yield assumption is based on our history and future expectations of dividend payouts.

The assumptions used in calculating the fair value of share-based compensation expense and related tax effects represent our best estimates, but these estimates involve inherent uncertainties and the application of management judgment. As a result, if factors change and we use different assumptions, or if we decide to use a different valuation model, our share-based compensation expense could be materially different in the future from what we have recorded in the current period, which could materially affect our results of operations.

Accounting for Income Taxes

We operate in multiple jurisdictions and our profits are taxed pursuant to the tax laws of these jurisdictions. Our effective income tax rate may be affected by the changes in or interpretations of tax laws and tax agreements in any given jurisdiction, utilization of net operating loss and tax credit carryforwards, changes in geographical mix of income and expense, and changes in our assessment of matters such as the ability to realize deferred tax assets. As a result of these considerations, we must estimate income taxes in each of the jurisdictions in which we operate. This process involves estimating current tax exposure together with assessing temporary differences resulting from different treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheet.

We assess the likelihood that our deferred tax assets will be recovered from future taxable income, considering all available evidence such as historical levels of income, expectations and risks associated with estimates of future taxable income and ongoing prudent and feasible tax strategies. When we determine that we are not able to realize all or part of our deferred tax assets, an adjustment is charged to earnings in the period when such determination is made. Likewise, if we later determine that it is more likely than not that the deferred tax assets would be realized, the previously provided valuation allowance would be reversed.

We make certain estimates and judgments about the application of tax laws, the expected resolution of uncertain tax positions and other matters surrounding the recognition and measurement of uncertain tax benefits. In the event that uncertain tax positions are resolved for amounts different than our estimates, or the related statutes of limitations expire without the assessment of additional income taxes, we will be required to adjust the amounts of the related assets and liabilities in the period in which such events occur. Such adjustments may have a material impact on our income tax provision and our results of operations.

Goodwill

We conduct a goodwill impairment analysis annually at December 31 or more frequently if indicators of impairment exist or if a decision is made to sell or exit a business. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include deterioration in general economic conditions, negative developments in equity and credit markets, adverse changes in the markets in which an entity operates, increases in input costs that have a negative effect on earnings and cash flows, or a trend of negative or declining cash flows or a decline in actual or planned revenue or earnings compared with actual and projected results of relevant prior periods, or other relevant entity-specific events such as changes in management, key personnel, strategy, or customers, contemplation of bankruptcy, or litigation. The fair value that could be realized in an actual transaction may differ from that used to evaluate the impairment of goodwill.

In reviewing goodwill for impairment, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (greater than 50%) that the estimated fair value of a reporting unit is less than its carrying amount. If an entity elects to perform a qualitative

assessment and determines that an impairment is more likely than not, the entity is then required to perform the two-step quantitative impairment test; otherwise, no further analysis is required. An entity also may elect not to perform the qualitative assessment and, instead, proceed directly to the two-step quantitative impairment test. The ultimate outcome of the goodwill impairment review for a reporting unit should be the same whether an entity chooses to perform the qualitative assessment or proceeds directly to the two-step quantitative

Table of Contents

impairment test. Goodwill is allocated among and evaluated for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment. We have two reporting units, peripherals and video conferencing.

Peripherals

We performed our annual impairment analysis of the goodwill for our peripherals reporting unit at December 31, 2014 by performing a qualitative assessment and concluded that it was more likely than not that the fair value of our peripherals reporting unit exceeded its carrying amount. In assessing the qualitative factors, we considered the impact of these key factors: change in industry and competitive environment, growth in market capitalization of \$2.3 billion as of December 31, 2014 from \$2.2 billion a year ago, and budgeted-to-actual revenue performance from the prior year. The peripherals reporting unit has seen an improvement in operating income from \$64.8 million and \$117.8 million for the three and nine months ended December 31, 2013 to \$76.1 million and \$160.3 million for the three and nine months ended December 31, 2014, respectively.

Video Conferencing

We proceeded directly to the two-step quantitative impairment test for the video conferencing reporting unit and performed a Step 1 assessment at December 31, 2014. The Step 1 test involves measuring the recoverability of goodwill at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the estimated fair value of the reporting unit. The fair value is estimated using an income approach employing a discounted cash flow ("DCF") and a market-based model. The DCF model is based on projected cash flows from our approved most recent forecast ("assessment forecast") developed in connection with the video conferencing reporting unit to perform the goodwill impairment assessment. The assessment forecast is based on a number of key assumptions, including, but not limited to, discount rate, compound annual growth rate ("CAGR") during the forecast period, and terminal value. The terminal value is based on an exit price at the end of the assessment forecast using an earning multiple applied to the final year of the assessment forecast. The discount rate is applied to the projected cash flows to reflect the risks inherent in the timing and amount of the projected cash flows, including the terminal value, and is derived from the weighted average cost of capital of market participants in similar businesses. The market approach is based on applying certain revenue and earnings multiples of comparable companies relevant to each of its reporting units to the respective revenue and earnings metrics of our reporting units. The income approach and the market approach require the exercise of significant judgment, including assumptions about appropriate discount rates, long-term growth rates for purposes of determining a terminal value at the end of the discrete forecast period, economic expectations, timing of expected future cash flows, and expectations of returns on equity that will be achieved. Such assumptions are subject to change as a result of changing economic and competitive conditions. If the carrying amount of the reporting unit exceeds its fair value as determined by these assessments, goodwill is considered impaired and the Step 2 test is performed to measure the amount of impairment loss. The Step 2 test measures the impairment loss by allocating the reporting unit's fair value to its assets, including unrecognized intangibles which are not carried on the books, and liabilities other than goodwill, and comparing the resulting implied fair value of goodwill with its carrying amount. The implied fair value of goodwill is the excess of the fair value of the reporting unit over the fair value amounts assigned to all of the assets and liabilities of that unit as if the reporting unit was acquired in a business combination and the fair value of the reporting unit represented the purchase price. If the carrying value of goodwill exceeds its implied fair value, an impairment loss equal to such excess would be recognized.

We use a third party valuation expert in the development of our market and income approach models. The annual Step 1 assessment performed as of December 31, 2014 resulted in us determining that the video conferencing reporting unit passed the Step 1 test because the estimated fair value of video conferencing reporting unit from the Step 1 assessment exceeded its carrying value by approximately 38.0%, thus not requiring a Step 2 assessment of this reporting unit. Therefore, we concluded it was more likely than not that the goodwill of the video conferencing reporting unit was not impaired as of December 31, 2014.

During the fourth quarter of the fiscal year ended March 31, 2015, the net sales of the video conferencing reporting unit decreased to \$24.9 million from \$31.0 million in the fourth quarter of the fiscal year ended March 31, 2014 and from \$29.9 million in the third quarter of fiscal year ended March 31, 2015. The sales decline was concentrated in the

video conferencing infrastructure legacy business primarily due to faster shift of customer preference towards Cloud infrastructure conferencing versus on-premise infrastructure solutions and resource realignment, which was not anticipated during annual impairment assessment as of December 31, 2014. This quick shift towards Cloud-based offering resulted in the change in business strategy to de-emphasize Lifesize's legacy offerings more quickly than planned to enable maximum traction of the Lifesize Cloud, which would result in shrinking the legacy Lifesize business but could grow the Cloud opportunity faster. In the last nine months, the sales

48

Table of Contents

of Cloud-based offerings have grown rapidly; however, they are not yet large enough to offset the combination of the short-term portfolio transition. As a result of the lower-than-expected performance in the legacy infrastructure sales, we made a strategic decision to sharpen our focus on our new Cloud-based offering. We plan to realign our costs and operations to this new strategy as part of a restructuring plan announced during April 2015 and are exploring various other options for our Lifesize business. The significant change in business strategy has adversely affected the near-term projections and we expect that it will shrink the Lifesize revenue for the next several years, including lowering the overall growth, pushing out the break-even point and increasing the operating loss as well as increasing uncertainty in the near term. In light of the aforementioned, we concluded it was appropriate to perform the Step 1 goodwill impairment assessment.

As of March 31, 2015, taking into consideration the video conferencing reporting unit's updated business outlook for fiscal year 2016 based on the factors discussed above and the risk of execution of its refocused strategy, we updated the future cash flow assumptions for the video conferencing reporting unit and calculated updated estimates of fair value using the income approach. In particular, we lowered our December 31, 2014 goodwill impairment test projections of future revenue and operating income (loss) growth and adjusted other factors (such as working capital and capital expenditure). After updating the assumptions and projections, we then calculated a present value of the cash flow to arrive at an estimate of fair value under the income approach as of March 31, 2015. Key assumptions included in the income approach were significant reduction in the revenue assumption for fiscal year 2016 through fiscal year 2021 compared with the revenue assumption used in our annual goodwill impairment assessment as of December 31, 2014, CAGR at 7.2%, discount rate at 14.0%, and terminal growth rate at 4.0%. Consistent with the annual impairment test on December 31, 2014, we also updated the estimates of fair value determined under the market approach. Based on the income approach and market approach, the estimated fair value of the video conferencing reporting unit under the Step 1 assessment was lower than the carrying amount of the net asset including goodwill.

The video conferencing reporting unit failed the Step 1 test as prescribed under ASC 350, thus requiring a Step 2 assessment of this reporting unit to determine the goodwill impairment. In determining the impairment amount, the fair value of the video conferencing reporting unit was allocated to its assets and liabilities, including any unrecognized intangible assets not on the balance sheet, based on their respective fair values. Assumptions used in measuring the value of these assets and liabilities included the discount rates, working capital, and technology obsolescence rates used in valuing the intangible assets, and pricing of comparable transactions in the market in valuing the tangible assets. Based on this allocation, the implied value of intangible assets and tangible net assets fully absorbed the fair value of the business, leaving no implied fair value left to be allocated to the goodwill. The video conferencing reporting unit's carrying value of goodwill exceeded the implied fair value of goodwill, resulting in a goodwill impairment charge of \$122.7 million, which is recorded in the Consolidated Statement of Operations. The current assessment represents the fair value of the video conferencing business as of March 31, 2015. If we dispose all or any equity interest of the video conferencing reporting unit in the future, it may result in a gain. The gain will be recognized as a difference between the carrying amount of the video conferencing reporting unit and the proceeds, if any, received from such a disposal.

During fiscal year 2013, our video conferencing reporting unit failed the Step 1 test because the estimated fair value was less than its carrying value, thus requiring Step 2 assessment of this reporting unit. This impairment primarily resulted from a decrease in the expected CAGR during the assessment forecast period based on greater evidence of the overall enterprise video conferencing industry experiencing a slowdown, combined with lower demand related to new product launches, increased competition during fiscal year 2013, and other market data. These factors had an adverse effect on our video conferencing operating results and future outlook. During fiscal year 2013, we recorded goodwill impairment and other charges of \$214.5 million related to our video conferencing reporting unit.

Determining the fair value of a reporting unit is judgmental in nature and requires the use of significant estimates and assumptions, including revenue growth rates, operating margins, discount rates and future market conditions, among others. If we are required to take further substantial impairment charges in future periods, our operating results would be materially and adversely affected in such period.

Table of Contents

Product Warranty Accrual

We estimate the cost of product warranties at the time the related revenue is recognized based on historical and projected warranty claim rates, historical and projected costs, and knowledge of specific product failures that are outside of our typical experience. Each quarter, we reevaluate estimates to assess the adequacy of recorded warranty liabilities considering the size of the installed base of products subject to warranty protection and adjust the amounts as necessary. If actual product failure rates or repair costs differ from estimates, revisions to the estimated warranty liabilities would be required and could materially affect our results of operations.

Results of Operations

Non-GAAP Measures

We refer to our net sales excluding the impact of currency exchange rate fluctuations as "constant dollar" sales. Constant dollar sales is a non-GAAP financial measure, which is information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S. GAAP. Our management uses these non-GAAP measures in its financial and operational decision-making, and believes these non-GAAP measures, when considered in conjunction with the corresponding GAAP measures, facilitate a better understanding of changes in net sales. Percentage of constant dollar sales growth is calculated by translating prior period sales in each local currency at the current period's average exchange rate for that currency and comparing that to current period sales.

Net Sales

Net sales by channel for fiscal years 2015, 2014 and 2013 were as follows (in thousands):

	Years Ended March 31,			Change		
	2015	2014	2013	2015 vs. 2014	2014 vs. 2013	
Retail	\$1,887,446	\$1,866,279	\$1,821,051	1	% 2	%
OEM	117,462	141,749	141,186	(17)	—
Video conferencing	109,039	120,685	137,040	(10)	(12
Total net sales	\$2,113,947	\$2,128,713	\$2,099,277	(1)	1

Retail:

During fiscal year 2015, retail sales increased 1% and units sold increased 2%, respectively, compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar retail sales would have increased 4%. The increase in retail sales is primarily due to triple-digit growth in Mobile Speakers and Video Collaboration, and double-digit growth in Gaming, partially offset by declines in Audio-PC & Wearables, Tablet & Other Accessories, PC webcams and our Non-Strategic categories, compared to fiscal year 2014. Our retail average selling price decreased by 1% during fiscal year 2015 compared to fiscal year 2014.

During fiscal year 2014, retail sales increased 2% and units sold decreased 3%, compared to fiscal year 2013. Retail sales increased in Americas and Asia Pacific and decreased in EMEA during fiscal year 2014, compared to fiscal year 2013. The increase in retail sales is primarily due to triple-digit growth in Mobile Speakers, double-digit growth in Tablets & Other Accessories and Gaming, offset in part by a decline in Audio-PC & Wearables, Video, and our Non-Strategic categories, compared to fiscal year 2013.

OEM:

During fiscal year 2015, OEM sales and units sold decreased 17% and 25%, respectively, compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar OEM net sales would have decreased 17%. The decline was primarily due to the continued weakness in global PCs market and loss of volume shares from certain PC manufactures. Given our heightened focus on our growing Retail Strategic business, we plan to exit the OEM business.

During fiscal year 2014, OEM sales and units sold remained flat, compared to fiscal year 2013.

Table of Contents

Video conferencing:

During fiscal year 2015, video conferencing net sales decreased 10%, compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar video conferencing net sales would have decreased 10%. Lifesize is in the process of transitioning its product portfolio to the recently announced Lifesize Cloud, a software-as-a-service (SaaS) offering that provides an affordable, simple and scalable video conferencing solution with little to no need for IT involvement. While sales of the Cloud offering are growing rapidly, they are not yet large enough to offset the combination of the short-term portfolio transition and soft market conditions for video conferencing infrastructure. To align our refocus on Lifesize Cloud offering and transition from Lifesize legacy business, we announced a restructuring plan subsequently in April 2015.

During fiscal year 2014, video conferencing net sales decreased 12%, compared to fiscal year 2013. The decrease primarily resulted from the combination of a changing industry landscape caused by a shift to less expensive, Cloud-based video conferencing solutions, an evolving Lifesize product line and challenges in execution.

Sales Denominated in Other Currencies

Although our financial results are reported in U.S. Dollars, a portion of our sales were generated in currencies other than the U.S. Dollar, such as the Euro, Chinese Renminbi, Japanese Yen, Canadian Dollar, Taiwan Dollar, British Pound and Australian Dollar. During fiscal years 2015, 2014 and 2013, 44%, 45% and 45% of our net sales were denominated in currencies other than the U.S. Dollar, respectively.

Retail Sales by Region

The following table presents the change in retail sales by region for the fiscal year 2015 compared with fiscal year 2014 and fiscal year 2014 compared with fiscal year 2013:

	2015 vs. 2014		2014 vs. 2013	
Americas	8	%	9	%
EMEA	(7)	(4)
Asia Pacific	2		2	

Americas

During fiscal year 2015, retail sales in Americas increased 8%, compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar retail sales would have increased 9% in the Americas. We achieved sales increases in all strategic categories except Audio-PC & Wearables, PC webcams, and Tablets & Other Accessories. This increase was led by triple digit growth in Mobile Speakers mainly from UE BOOM and our recently launched UE MEGABOOM, and triple digit growth in Video Collaboration mainly from our ConferenceCam CC3000e and Webcam C930e.

During fiscal year 2014, retail sales in Americas increased 9%, compared to fiscal year 2013. Retail sales increased in Mobile Speakers, Gaming, Tablet & Other Accessories, Keyboards & Combos and Pointing Devices, partially offset by decreases in Non-Strategic, Audio-PC & Wearables, Home Control, and PC Webcams. The increase in Tablet & Other Accessories was led by sales of our Ultrathin Keyboard Cover for the iPad and from our recently introduced Keyboard Folio suite of products designed for the iPad, iPad mini and iPad Air. The increase in Mobile Speakers was primarily from the UE BOOM. The increase in Gaming was due to the recent launch of our new gaming products. The increase in Keyboards & Combos was driven by low-end, mid-range and high-end products. Retail sales improved in the United States and Canada during fiscal year 2014, compared to fiscal year 2013.

EMEA

During fiscal year 2015, retail sales in EMEA decreased 7%, compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar retail sales would have decreased 3% in the EMEA region. Retail sales decreased across all strategic categories except Gaming, Mobile Speakers, Video Collaboration, Home Control and Keyboards and Combos product categories. The decline in sales was heavily impacted by market weakness in Russia and Ukraine. We achieved a triple digit growth in Video Collaboration, and a double digit growth in both Mobile Speakers and Gaming during fiscal year 2015 compared to fiscal year 2014.

Table of Contents

During fiscal year 2014, retail sales in EMEA decreased 4%, compared to fiscal year 2013. Retail sales decreased in Pointing Devices, PC Webcams, Audio-PC & Wearables, and Non-Strategic, partially offset by increases in Mobile Speakers, Gaming, Tablet & Other Accessories and Home Control. We experienced a significant decrease in Germany due to sales challenges which we overcame in the second half of fiscal year 2014. The decrease in Germany was partially offset by an increase in the United Kingdom.

Asia Pacific

During fiscal year 2015, retail sales in Asia Pacific increased 2%, compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar retail sales would have increased 4% in the Asia Pacific region. We achieved triple digit growths in both Mobile Speakers and Video Collaboration, partially offset by the decline in Tablets & Other Accessories, Audio - PC Wearables, and Non-Strategic.

During fiscal year 2014, retail sales in Asia Pacific increased 2%, compared to fiscal year 2013. Retail sales increased in Mobile Speakers, Gaming, Tablet & Other Accessories and Remotes, partially offset by decreases in Non-Strategic, Audio- PC & Wearables, Video, and Pointing Devices and PC keyboards & Desktops. In addition, retail sell-through in Asia Pacific increased 2% during fiscal year 2014, compared to fiscal year 2013.

Net Sales by Product Categories and Sales Channels

Net sales by product categories and sales channels for fiscal years 2015, 2014 and 2013 were as follows (in thousands):

	Years Ended March 31,			Change		2014 vs. 2013	
	2015	2014	2013	2015 vs. 2014			
Peripherals:							
Mobile Speakers	\$ 178,038	\$ 87,414	\$ 33,408	104	%	162	%
Gaming	211,911	186,926	144,512	13		29

Non-Strategic	2,725	37,000	86,102	(93)	(57)
OEM	117,462	141,749	141,186	(17)	—	
	2,004,908	2,008,028	1,962,237	—		2	
Video Conferencing	109,039	120,685	137,040	(10)	(12)
	\$ 2,113,947	\$ 2,128,713	\$ 2,099,277	(1)	1	

(1) Certain products within the retail product families presented in prior years have been reclassified to conform to the current year presentation. There's no impact over total net retail sales.

Retail Strategic Sales

During fiscal year 2015, retail strategic sales increased 3% compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar retail strategic sales would have increased 6%.

During fiscal year 2014, retail strategic sales increased 5% compared to fiscal year 2013.

Table of Contents

Retail Strategic - Growth Categories:

Mobile Speakers

Our retail Mobile Speakers category products are portable Bluetooth wireless speakers.

During fiscal year 2015, retail sales of Mobile Speakers increased 104% and units sold increased 99%, compared to fiscal year 2014. The sales increased significantly across our all three regions, with a triple digit growth in both Americas and Asia Pacific regions, are primarily due to strong demand for the UE BOOM, which is our top revenue generating wireless speaker and experienced a triple digit growth in fiscal year 2015, compared to fiscal year 2014. The successful launch of UE MEGABOOM during the fourth quarter of fiscal year 2015 contributed 6% of total Mobile Speakers sales for fiscal year 2015.

During fiscal year 2014, retail sales of Mobile Speakers increased 162% and units sold increased 88%, compared to fiscal year 2013. The 162% increase in our wireless speakers for smartphones and tablets was driven by a strong demand primarily for the UE BOOM. Our top revenue-generating wireless speaker products during fiscal year 2014 included the UE BOOM and the UE Mini BOOM.

Gaming

Our retail Gaming category comprises gaming mice, keyboards, headsets, gamepads and steering wheels.

During fiscal year 2015, retail sales of Gaming increased 13% and units sold increased 21%, compared to fiscal year 2014. This growth was primarily from gaming headsets and gaming mice due to the launch of our new gaming products, including mice, keyboards and headsets. New products made up 12% of total Gaming revenue for fiscal year 2015. Our top revenue-generating Gaming products included the Logitech G502 Proteus Core, the Logitech G27 Racing Wheel, the Logitech G930 Wireless Gaming Headset, and the G430 Cordless Mice.

During fiscal year 2014, retail sales of Gaming increased 29% and units sold increased 24%, compared to fiscal year 2013. This growth was primarily due to the recent launch of our new gaming products, including mice, keyboards and headsets. New products made up 23% of total Gaming revenue for fiscal year 2014. Our top revenue-generating Gaming products included the Logitech G27 Racing Wheel, the Logitech G930 Wireless Gaming Headset, the G500s Laser Gaming Mouse, the G700s Rechargeable Gaming Mouse, and the G710+ Mechanical Gaming Keyboard.

Video Collaboration

Our retail Video Collaboration category primarily includes video products and certain headset products that can connect small and medium sized user groups.

During fiscal year 2015, retail sales of Video Collaboration increased 114% and units sold increased 49%, compared to fiscal year 2014. The sales increased significantly across all products in this category was primarily driven by the success of the Logitech ConferenceCam CC3000e and Logitech ConferenceCam C930e.

During fiscal year 2014, retail sales of Video Collaboration increased 55% and units sold increased 33%, compared to fiscal year 2013. The significant increase in sales across all products in this category was primarily driven by the success of the Logitech Webcam C930e.

Tablet & Other Accessories

Our retail Tablet & Other Accessories category comprises keyboards and covers for tablets and smartphones as well as other accessories for mobile devices.

During fiscal year 2015, retail sales of Tablet & Other Accessories decreased 18% and units sold decreased 5%, compared to fiscal year 2014. The reduction in sales, primarily from tablet keyboards, reflects the combination of a declining demand for iPad tablet platform and increased competition, partially offset by sales growth with our tablet covers for the iPad.

During fiscal year 2014, retail sales of Tablet & Other Accessories increased 44% and units sold increased 87%, compared to fiscal year 2013. The increase was driven by demand for the Logitech Ultrathin Keyboard Cover for the iPad, as well as strong sales from recently introduced products such as the Logitech Ultrathin Keyboard Cover for the iPad Mini and from the Logitech Keyboard Folio suite of products designed for the iPad, iPad mini, and iPad Air. The faster growth in unit shipments reflected the broadening of our portfolio to address a larger portion of the tablet accessory market, including tablet cases.

Table of Contents

Retail Strategic - Profit Maximization Categories:

Pointing Devices

Our retail Pointing Devices category comprises PC and Mac-related mice, touchpads and presenters.

During fiscal year 2015, retail sales of Pointing Devices decreased 4% and units sold increased 2%, compared to fiscal year 2014. The decrease in retail sales was primarily due to the continued weakness in the global PC market. The decrease was primarily from our high-end product offerings, which decreased 12%, followed by our low-end product offerings which decreased 5%, partially offset by our mid-range product offerings which increased 1%. Retail sales of corded mice decreased 4% and units sold remained flat. Retail sales of cordless mice decreased 5% and units sold increased 2%.

During fiscal year 2014, retail sales of Pointing Devices decreased 3% and units sold decreased 1%, compared to fiscal year 2013. The decrease in retail sales was primarily due to the continued weakness in the global PC market. The decrease was primarily from our high-end product offerings, which decreased 14%, followed by our mid-range product offerings, which decreased 6%, and our low-end product offerings increased by 1%. Retail sales of corded mice decreased 9% and units sold decreased 10%. Retail sales of cordless mice decreased 1% and units sold increased 4%.

Keyboards & Combos

Our retail Keyboards & Combos category comprises PC keyboards and keyboard/mice combo products.

During fiscal year 2015, retail sales of Keyboards & Combos increased 3% and units sold increased 7%, compared to fiscal year 2014. The sales increase was primarily due to sales increase in our corded and cordless combos. Retail sales of corded and cordless combos increased 19% and 6%, respectively, and units sold increased 25% and 10%, respectively. Our best selling products in this category were the Logitech Wireless Combo MK270 and Wireless Combo MK520, which feature powerful and reliable wireless connections and plug-and-play simplicity. Retail sales of corded and cordless keyboards decreased 9% and 7%, respectively, and units sold decreased 4% and 3%, respectively.

During fiscal year 2014, retail sales of Keyboards & Combos increased 4% and units sold decreased 1%, compared to fiscal year 2013. The sales increase was primarily due to sales increase in our corded and cordless combo. Our best selling product in this category was the Wireless Touch Keyboard K400, which features an integrated touchpad and has been popular for use in the living room. Retail sales of corded and cordless keyboards decreased 17% and 5%, respectively, and units sold decreased 21% and 6%, respectively. Retail sales of corded and cordless combos increased 3% and 7%, respectively, and units sold decreased 1% and increased 10%, respectively.

Audio-PC & Wearables

Our retail Audio-PC & Wearables category comprises PC speakers, PC headsets and in-ear headphones.

During fiscal year 2015, retail sales of Audio-PC decreased 15% and units sold decreased 10%, compared to fiscal year 2014. The decrease was primarily due to decreases in PC speaker retail sales, reflecting a category that appears to be in structural decline as music consumption continues to migrate to mobile platforms, which benefits our mobile speaker product category. Retail sales of our headset products decreased 4% and units decreased 6%. Retail sales of our Wearables products declined 35%.

During fiscal year 2014, retail sales of Audio-PC decreased 14% and units sold decreased 17%, compared to fiscal year 2013. The decrease was primarily due to decreases in PC speaker retail sales of 10% and units sold of 11%. These decreases reflect both a weakness in the overall market for new PCs and a market shift toward mobile audio devices. Retail sales of our Wearables products declined 39%, as we phased out the headphone category.

PC Webcams

Our PC Webcams category comprises PC-based webcams targeted primarily at consumers.

During fiscal year 2015, retail sales of PC Webcams decreased 15% and units sold decreased 18%, compared to fiscal year 2014. The weak sales reflect the ongoing structural decline of the consumer webcam market, which continues to contract.

Table of Contents

During fiscal year 2014, retail sales of PC Webcams decreased 17% and units sold decreased 28%, compared to fiscal year 2013. The decrease was due to weakness in our consumer webcam product line, which continued to be negatively impacted by the combination of market trends, including the popularity of embedded webcams in mobile devices, and the overall weakness of the PC market.

Home Control

Our retail Home Control category comprises our Harmony remotes and recently-launched, new Harmony Home Control.

During fiscal year 2015, retail sales of Remotes increased 1% and units sold increased 22%, compared to fiscal year 2014. The increase in Home Control was primarily concentrated in our mid-range and low-end products, partially offset by decreases in our high-end products. New products contributed to 17% of total retail sales of Home Control for fiscal year 2015.

During fiscal year 2014, retail sales of Home Control decreased 6% and units sold decreased 23%, compared to fiscal year 2013. The decrease in Home Control was primarily concentrated in our high-end and low-end products, partially offset by increases in our mid-range product lines.

Non-Strategic

This category comprises a variety of products that we currently intend to transition out of, or have already transitioned out of, because they are no longer strategic to our business. Products currently included in this category include TV camera, Digital Video Security, TV and home speakers, Google TV products, Keyboard/Desktop accessories, and music docks.

During fiscal year 2015, retail sales of this category decreased 93%, compared to fiscal year 2014. During fiscal year 2014, retail sales of this category decreased 57%, compared to fiscal year 2013.

OEM

During fiscal year 2015, OEM sales and units sold decreased 17% and 25%, respectively, compared to fiscal year 2014. This decrease was primarily due to weak mice sales which was expected as we elected not to participate in lower margin opportunities with several customers. We plan to exit the OEM business as we see limited opportunities for profitable growth.

During fiscal year 2014, OEM sales and units sold remained flat compared to fiscal year 2013.

Video Conferencing

During fiscal year 2015, video conferencing sales decreased 10% compared to fiscal year 2014. If currency exchange rates had been constant in 2015 and 2014, our constant dollar video conferencing net sales would have decreased 10%. Lifesize is in the process of transitioning its product portfolio to the recently announced Lifesize Cloud, a software-as-a-service (SaaS) offering that provides an affordable, simple and scalable video conferencing solution with little to no need for IT involvement. While sales of the Cloud offering are growing rapidly, they are not yet large enough to offset the combination of the short-term portfolio transition and soft market conditions for video conferencing infrastructure. We recently decided to reorganize Lifesize with the goal of de-emphasizing Lifesize's legacy offerings more quickly to enable maximum traction with Lifesize Cloud. We plan to shrink our Lifesize business to grow the Cloud opportunity faster.

During fiscal year 2014, video conferencing sales decreased 12% compared to fiscal year 2013. The decrease was primarily due to a combination of a changing industry landscape caused by a shift to less expensive, Cloud-based video conferencing solutions, an evolving Lifesize product line and challenges in execution experienced in all geographic regions.

Table of Contents

Gross Profit

Gross profit for fiscal years 2015, 2014 and 2013 was as follows (in thousands):

	Years Ended March 31,			Change		2014 vs. 2013	
	2015	2014	2013	2015 vs. 2014			
Net sales	\$2,113,947	\$2,128,713	\$2,099,277	(1)%	1	%
Cost of goods sold	1,339,750	1,400,844	1,389,643	(4)	1	
Gross profit	\$774,197	\$727,869	\$709,634	6		3	
Gross margin	36.6	% 34.2	% 33.8	%			

Gross profit consists of net sales, less cost of goods sold, which includes materials, direct labor and related overhead costs, costs of manufacturing facilities, costs of purchasing components from outside suppliers, distribution costs, shipping and handling cost, outside processing costs, write-down of inventories and amortization of intangible assets. The increase in gross margin during fiscal year 2015, compared to fiscal year 2014, primarily resulted from a 0.5% improvement attributable to cost reduction initiatives across the Pointing Devices, Keyboards & Combos and Mobile Speakers product categories, a 0.5% improvement attributable to exiting non-strategic product categories, a 0.7% improvement attributable to the combination of a \$5.8 million reduction in amortization of other intangible assets and a \$5.2 million prior year discontinued products write off, and a 0.5% improvement attributable to lower inventory reserves in fiscal year 2015 that was partially offset by a higher percentage of air shipments in fiscal 2015. The increase in gross margin during fiscal year 2014, compared to fiscal year 2013, was primarily due to cost improvements across all PC-related categories, actions we took since fiscal year 2013 to streamline our product portfolio, inventory reserves of several discontinued Music category products and the discontinuation of projects in 2013 due to restructuring.

Operating Expenses

Operating expenses for fiscal years 2015, 2014 and 2013 were as follows (in thousands):

	Years Ended March 31,			Change		2014 vs. 2013	
	2015	2014	2013	2015 vs. 2014			
Marketing and selling	\$378,593	\$379,747	\$431,886	—		(12)%
% of net sales	17.9	% 17.8	% 20.6	%			
Research and development	131,012	139,385	155,012	(6)	(10)
% of net sales	6.2	% 6.5	% 7.4	%			
General and administrative	131,446	118,940	114,381	11		4	
% of net sales	6.2	% 5.6	% 5.4	%			
Impairment of goodwill and other assets	122,734	—	216,688	NM		(100)
% of net sales	5.8	% —	% 10.3	%			
Restructuring charges (Credits), net	(4,888) 13,811	43,704	(135)	(68)
% of net sales	(0.2)% 0.6	% 2.1	%			
Total operating expenses	\$758,897	\$651,883	\$961,671	16		(32)
% of net sales	35.9	% 30.6	% 45.8	%			

NM—Not Meaningful.

The increase in total operating expenses during fiscal year 2015, compared to fiscal year 2014, was primarily due to a goodwill impairment charge of \$122.7 million relating to our video conferencing reporting unit and \$23.7 million in expense related to the Audit Committee's Independent investigation during fiscal 2015, partially offset by a restructuring credit of \$4.9 million during fiscal year 2015 resulting from partial lease termination of our Silicon Valley campus, which was previously vacated and under a restructuring plan during fiscal year 2014, as opposed to a restructuring charge of \$13.8 million during fiscal year 2014.

Table of Contents

The decrease in total operating expenses during fiscal year 2014, compared to fiscal year 2013, was primarily due to the \$216.7 million impairment of goodwill and other assets recorded in fiscal year 2013, combined with the restructuring plans initiated in fiscal year 2013, which reduced personnel-related expenses in fiscal year 2014 as well as resulted in a \$30.0 million decrease in restructuring expenses in fiscal 2013.

Marketing and Selling

Marketing and selling expense consists of personnel and related overhead costs, corporate and product marketing, promotions, advertising, trade shows, customer and technical support and facilities costs.

During fiscal year 2015, marketing and selling expense remained flat compared to fiscal year 2014.

During fiscal year 2014, marketing and selling expense decreased 12%, compared to fiscal year 2013. The decrease was primarily due to \$15 million lower personnel-related expenses from the workforce reduction in video conferencing reporting unit as a result of the restructuring plan initiated during fiscal 2014 and \$24 million lower advertising and marketing costs related to the launch of new Music category in fiscal year 2013.

Research and Development

Research and development expense consists of personnel and related overhead costs, contractors and outside consultants, supplies and materials, equipment depreciation and facilities costs, all associated with the design and development of new products and enhancements of existing products.

During fiscal year 2015, research and development expense decreased 6%, compared to fiscal year 2014. The decrease was primarily due to \$2.8 million lower personnel-related expenses from the workforce reduction in the video conferencing reporting unit as a result of the restructuring plan initiated during fiscal year 2014, \$1.3 million decrease in stock-based compensation expense due to fewer grants during fiscal year 2015, and \$1.6 million savings from depreciation and amortization expense.

During fiscal year 2014, research and development expense decreased 10%, compared to fiscal year 2013. The decrease was primarily due to \$6 million lower personnel-related expenses from the workforce reduction in video conferencing reporting unit as a result of the plan initiated during fiscal 2014 and \$9 million lower design and development cost related to the launch of the new Music category in fiscal 2013.

General and Administrative

General and administrative expense consists primarily of personnel and related overhead and facilities costs for the finance, information systems, executives, human resources and legal functions.

During fiscal year 2015, general and administrative expense increased 11% compared to fiscal year 2014. The increase was primarily due to \$23.7 million in expense related to the Audit Committee Independent investigation and related expenses, partially offset by infrastructure cost savings such as \$6.5 million decrease in information technology costs, including third party vendor cost, and \$6.1 million decrease in facility expense as a result of the consolidation of properties.

During fiscal year 2014, general and administrative expense increased 4%, compared to fiscal year 2013. The increase was primarily due to an \$8 million increase in personnel-related expenses due to higher variable compensation costs related to our improved performance and share-based compensation expense, partially offset by a \$4 million decrease in facility related expenses due to our restructuring plans initiated in fiscal year 2013.

Impairment of Goodwill and Other Assets

We recorded an impairment charge of goodwill of \$122.7 million related to our video conferencing reporting unit in fiscal year 2015, and therefore the goodwill of video conferencing reporting unit is reduced to zero as of March 31, 2015. There was no impairment of goodwill and other assets for fiscal year 2014. We recorded an impairment charge of goodwill and other assets of \$216.7 million primarily related to the video conferencing reporting unit in fiscal year 2013.

Table of Contents

Restructuring Charges

The following table summarizes restructuring-related activities during the years ended March 31, 2015, 2014 and 2013 (in thousands):

	Restructuring Termination Benefits	Lease Exit Costs	Total	
Accrual balance at March 31, 2013	\$ 13,383	\$ 75	\$ 13,458	
Charges	6,463	7,348	13,811	
Adjustment for deferred rent	—	1,450	1,450	
Cash payments	(19,534) (1,454) (20,988)
Currency exchange impact	(170) —	(170)
Accrual balance at March 31, 2014	142	7,419	7,561	
Credits	(86) (4,802) (4,888)
Cash payments	(56) (1,578) (1,634)
Accrual balance at March 31, 2015	\$—	\$ 1,039	\$ 1,039	

During the second quarter of fiscal year 2014, we implemented a restructuring plan solely affecting our video conferencing operating segment to align our organization to our strategic priorities of increasing focus on a tighter range of products, and improving profitability. Restructuring charges under this plan primarily consist of severance and other one-time termination benefits. During fiscal year 2014, restructuring charges under this plan included \$5.0 million in termination benefits and \$0.6 million in lease exit costs. We substantially completed this restructuring plan by March 31, 2014.

During the fourth quarter of fiscal year 2013, we implemented a restructuring plan to align our organization to our strategic priorities of increasing focus on mobility products, improving profitability in PC-related products and enhancing global operational efficiencies. As part of this restructuring plan, we reduced our worldwide non-direct labor workforce. Restructuring charges under this plan primarily consisted of severance and other one-time termination benefits. During fiscal year 2015, we recorded \$4.9 million restructuring credits as a result of partial termination of our lease agreement for the Silicon Valley campus, which was partially vacated during fiscal year 2014. During fiscal year 2014, restructuring charges under this plan included \$1.5 million in termination benefits and \$6.7 million in lease exit costs, \$5.4 million of which pertains to the consolidation of our Silicon Valley campus from two buildings down to one during the quarter ended March 31, 2014. We substantially completed this restructuring plan by the fourth quarter of fiscal year 2014.

Interest Income (Expense), Net

Interest income and expense for fiscal years 2015, 2014 and 2013 were as follows (in thousands):

	Years Ended March 31,			
	2015	2014	2013	
Interest income	\$ 1,225	\$ 1,831	\$ 2,215	
Interest expense	—	(2,228) (1,308)
	\$ 1,225	\$ (397) \$ 907	

Interest expense decreased during fiscal year 2015, compared to fiscal year 2014. The decrease was primarily due to the termination of our \$250 million Senior Revolving Credit Facility during fiscal year 2014. There were no new borrowings since then.

Interest expense increased during fiscal year 2014, compared to fiscal year 2013. The increase was primarily due to the write-off of \$1.0 million capitalized deferred loan fees related to our \$250.0 million Senior Revolving Credit Facility which we chose to terminate during fiscal year 2014.

Table of Contents

Other Income (Expense), Net

Other income and expense for fiscal years 2015, 2014 and 2013 were as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Investment income related to deferred compensation plan	\$1,055	\$1,487	\$933
Gain on sale of securities	—	—	831
Impairment of investments	(2,298)	(624)	(3,600)
Currency exchange gain (loss), net	(1,280)	62	104
Other	(229)	1,068	(466)
	\$ (2,752)	\$ 1,993	\$ (2,198)

Investment income for fiscal years 2015, 2014 and 2013 represents earnings, gains, and losses on trading investments related to a deferred compensation plan offered by one of our subsidiaries.

The \$2.3 million, \$0.6 million and \$3.6 million investment impairment charges in fiscal years 2015, 2014 and 2013, respectively, primarily resulted from the write-down of investments in privately-held companies.

During fiscal year 2013, we sold two available-for-sale securities with a total carrying value of \$0.4 million and a total par value of \$15.2 million for \$0.9 million. This sale resulted in a \$0.8 million gain recognized in other income (expense), net, \$0.3 million of which resulted from the recognition of a temporary increase in fair value previously recorded in accumulated other comprehensive loss. Following the sales in fiscal year 2013, we have not held any available for sale securities.

Currency exchange gains or losses relate to balances denominated in currencies other than the functional currency in our subsidiaries, as well as to the sale of currencies, and to gains or losses recognized on foreign exchange forward contracts. We do not speculate in currency positions, but we are alert to opportunities to maximize foreign exchange gains and minimize foreign exchange losses.

Provision for (Benefit from) Income Taxes

The provision for (benefit from) income taxes and the effective income tax rate for fiscal years 2015, 2014 and 2013 were as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Provision for (benefit from) income taxes	\$4,490	\$3,278	\$(25,810)
Effective income tax rate	32.6 %	4.2 %	10.2 %

The change in the effective income tax rate between fiscal year 2015 and 2014 was primarily due to the non-tax deductible goodwill impairment charge of \$122.7 million during fiscal year 2015, the mix of income and losses in the various tax jurisdictions in which we operate and a tax benefit of \$16.4 million during fiscal year 2015, related to the reversal of uncertain tax positions resulting from the expiration of the statutes of limitations and the closure of tax examination in the state of California of the United States. The effective income tax rate excluding the goodwill impairment charge in fiscal year 2015 is 3.3%. In fiscal year 2014, there was a tax benefit of \$14.3 million related to the reversal of uncertain tax positions resulting from the expiration of the statutes of limitations.

The change in the effective income tax rate between fiscal year 2014 and 2013 was primarily due to the mix of income and losses in the various tax jurisdictions and a tax benefit of \$14.3 million during fiscal year 2014, related to the reversal of uncertain tax positions resulting from the expiration of the statutes of limitations. In fiscal year 2013, there was a tax benefit of \$35.6 million related to the reversal of uncertain tax positions resulting from the closure of federal income tax examinations in the United States.

On December 19, 2014, the enactment of the Tax Increase Prevention Act of 2014 in the United States extended the federal research and development tax credit through December 31, 2014 which had previously expired on December 31, 2013. The provision for income taxes for fiscal year ended March 31, 2015 reflected a \$0.9 million tax benefit as a result of the extension of the tax credit.

Table of Contents

As of March 31, 2015 and March 31, 2014, the total amount of unrecognized tax benefits due to uncertain tax positions was \$79.0 million and \$91.0 million, respectively, of which \$79.0 million and \$86.1 million would affect the effective income tax rate if recognized, respectively.

As of March 31, 2015, we had \$72.1 million in non-current income taxes payable and \$0.1 million in current income taxes payable, including interest and penalties, related to our income tax liability for uncertain tax positions. As of March 31, 2014, we had \$93.1 million in non-current income taxes payable and \$0.3 million in current income taxes payable. Pursuant to ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, which became effective in the first quarter of fiscal year 2015, we reclassified \$10.3 million of unrecognized tax benefits previously presented as non-current income taxes payable to a reduction in non-current deferred tax assets primarily for tax credit carryforwards.

We continue to recognize interest and penalties related to unrecognized tax positions in income tax expense. We recognized \$0.8 million, \$1.1 million and \$1.0 million in interest and penalties in income tax expense during fiscal years 2015, 2014 and 2013, respectively. As of March 31, 2015, 2014 and 2013, we had approximately \$4.9 million, \$5.6 million and \$6.6 million of accrued interest and penalties related to uncertain tax positions.

We file Swiss and foreign tax returns. We received final tax assessments in Switzerland through fiscal year 2012. For other foreign jurisdictions such as the United States, we are generally not subject to tax examinations for years prior to fiscal year 2011. We are under examination and have received assessment notices in foreign tax jurisdictions. If the examinations are resolved unfavorably, there is a possibility they may have a material negative impact on our results of operations.

Liquidity and Capital Resources

Cash Balances, Available Borrowings, and Capital Resources

At March 31, 2015, we had cash and cash equivalents of \$537.0 million, compared with \$469.4 million at March 31, 2014. Our cash and cash equivalents consist of bank demand deposits and short-term time deposits of which 81% is held by our Swiss-based entities and 11% is held by our subsidiaries in Hong Kong and China. We do not expect to incur any material adverse tax impact or be significantly inhibited by any country in which we do business from the repatriation of funds to Switzerland, our home domicile.

At March 31, 2015, our working capital was \$557.1 million compared with working capital of \$478.2 million at March 31, 2014. The increase in working capital over the prior year was primarily due to higher cash and inventory balances, partially offset by higher accounts payable balances at March 31, 2015.

During fiscal year 2015, we generated \$178.6 million cash from operating activities. Our main sources of operating cash flows were from net income after adding back non-cash expenses of depreciation, amortization, impairment of goodwill and share-based compensation expense, and from an increase in accounts payable, partially offset by increases in inventories and accounts receivable and a decrease in accrued and other liabilities. Net cash used in investing activities was \$48.3 million, primarily for purchase of property, plant, and equipment of \$45.3 million and investments in privately held companies of \$2.6 million. Net cash used in financing activities was \$48.9 million, primarily for the \$43.8 million cash dividend payment, \$9.2 million tax withholdings related to net share settlements of restricted stock units, partially offset by \$4.1 million in proceeds received from the sale of shares upon exercise of options and purchase rights.

We had several uncommitted, unsecured bank lines of credit aggregating to \$38.1 million as of March 31, 2015. There are no financial covenants under these lines of credit which we must comply with. As of March 31, 2015, we had outstanding bank guarantees of \$5.1 million under these lines of credit. There are no financial covenants under these credit lines.

Table of Contents

The following table summarizes our Consolidated Statements of Cash Flows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Net cash provided by operating activities	\$178,632	\$205,421	\$122,389
Net cash used in investing activities	(48,289)	(46,803)	(57,723)
Net cash used in financing activities	(48,854)	(22,681)	(207,641)
Effect of exchange rate changes on cash and cash equivalents	(13,863)	(349)	(1,571)
Net increase (decrease) in cash and cash equivalents	\$67,626	\$135,588	\$(144,546)
Cash Flow from Operating Activities			

The following table presents selected financial information and statistics for fiscal years 2015, 2014 and 2013 (dollars in thousands):

	March 31,		
	2015	2014	2013
Accounts receivable, net	\$179,823	\$182,029	\$178,959
Inventories	270,730	222,402	262,644
Working capital	557,113	478,213	385,073
Days sales in accounts receivable ("DSO")(Days)(1)	35	34	34
Inventory turnover ("ITO")(x)(2)	4.6	5.9	4.7

(1) DSO is determined using ending accounts receivable as of the most recent quarter-end and net sales for the most recent quarter.

(2) ITO is determined using ending inventories and annualized cost of goods sold (based on the most recent quarterly cost of goods sold).

ITO as of March 31, 2015 decreased compared to March 31, 2014. The decrease was primarily due to higher inventory levels due to the port strike in the west coast of the United States and change in shipping strategy from air to ocean during the fourth quarter of fiscal year 2015.

ITO as of March 31, 2014 increased, compared to March 31, 2013. The increase was primarily due to lower inventory levels in relation to net sales during the fourth quarter of fiscal year 2014.

Cash Flow from Investing Activities

	Years Ended March 31,		
	2015	2014	2013
Purchases of property, plant and equipment	\$(45,253)	\$(46,658)	\$(54,487)
Investment in privately held companies	(2,550)	(300)	(4,420)
Acquisitions, net of cash acquired	(926)	(650)	—
Proceeds from sales of available-for-sale securities	—	—	917
Proceeds from return of investment from strategic investments	—	261	—
Purchase of trading investments	(5,034)	(8,450)	(4,196)
Proceeds from sales of trading investments	5,474	8,994	4,463
	\$(48,289)	\$(46,803)	\$(57,723)

Our expenditures for property, plant and equipment during fiscal year 2015, 2014 and 2013 were primarily expenditures for leasehold improvements, computer hardware and software, tooling and equipment.

Table of Contents

During fiscal year 2015, purchases of property, plant and equipment remained relatively stable compared to fiscal year 2014. We made a \$2.5 million strategic investment in one privately held company and acquired one privately held company for \$0.9 million, during fiscal year 2015.

During fiscal year 2014, purchases of property, plant and equipment decreased, compared to fiscal year 2013, primarily due to leasehold improvements related to our new Silicon Valley campus during fiscal year 2013. During fiscal year 2014, we made a \$0.7 million investment.

During fiscal year 2013, we purchased a strategic investment for \$4.0 million in exchange for convertible preferred stock. We accounted for this investment under the cost method of accounting since we have less than 20% ownership interest and we lack the ability to exercise significant influence over the operating and financial policies of the investee. We also purchased another strategic investment for \$0.4 million. In addition, we sold our two remaining available-for-sale securities for \$0.9 million.

The purchases and sales of trading investments during fiscal years 2015, 2014 and 2013 represent mutual fund activity directed by participants in a deferred compensation plan offered by one of our subsidiaries. The mutual funds are held by a Rabbi Trust.

Cash Flow from Financing Activities

	Years Ended March 31,		
	2015	2014	2013
Payment of cash dividends	\$(43,767)	\$(36,123)	\$(133,462)
Purchases of treasury shares	(1,663)	—	(87,812)
Contingent consideration related to prior acquisition	(100)	—	—
Repurchase of ESPP awards	(1,078)	—	—
Proceeds from sales of shares upon exercise of options and purchase rights	4,138	16,914	15,982
Tax withholdings related to net share settlements of restricted stock units	(9,215)	(5,718)	(2,375)
Excess tax benefits from share-based compensation	2,831	2,246	26
	\$(48,854)	\$(22,681)	\$(207,641)

During fiscal year 2015 and 2014, we paid annual cash dividends of \$43.8 million and \$36.1 million, respectively, compared to a special one-time distribution of \$133.5 million during fiscal year 2013.

During fiscal year 2015, we repurchased 0.1 million shares for \$1.7 million. There were no stock repurchases during fiscal year 2014. During fiscal year 2013, we repurchased 8.6 million shares for \$87.8 million.

Proceeds from the sale of shares upon exercise of options and purchase rights pursuant to our stock plans during fiscal years 2015, 2014 and 2013 were \$4.1 million, \$16.9 million and \$16.0 million, respectively. The payments of tax withholdings related to net share settlements of RSUs (restricted stock units) during fiscal years 2015, 2014 and 2013 were \$9.2 million, \$5.7 million and \$2.4 million, respectively.

Translation effect of exchange rate changes on cash and cash equivalents

During fiscal year 2015, there was a \$13.9 million currency translation exchange rate effect on cash and cash equivalents. This is primarily due to the 22% weakening of Euro versus U.S Dollar during fiscal year 2015 which had an adverse impact on our cash and cash equivalents balances in subsidiaries with functional currency as Euro.

Cash Outlook

Our principal sources of liquidity are our cash and cash equivalents, cash flow generated from operations and, to a much lesser extent, capital markets and borrowings. Our future working capital requirements and capital expenditures may increase to support investment in product innovations and growth opportunities, or to acquire or invest in complementary businesses, products, services, and technologies.

In March 2015, we announced a plan to pay \$250 million in cumulative dividends for fiscal year 2015 through fiscal year 2017. The Board of Directors plans to request shareholder approval of the Swiss Franc equivalent of an \$85 million dividend for fiscal year 2015 at our next annual general meeting. Based on exchange rates of 1.0283 and the number of shares outstanding as of March 31, 2015, this represents approximately CHF 0.51 per share,

Table of Contents

compared to dividend of CHF 0.26 per share for fiscal year 2015. During fiscal year 2015, we paid a cash dividend of CHF 43.1 million (U.S. Dollar amount of \$43.8 million) out of retained earnings.

In March 2014, our Board of Directors approved a new share buyback program, which authorizes us to invest up to \$250.0 million to purchase our own shares. Our share buyback program provides us with the opportunity to make repurchases during periods of favorable market conditions and is expected to remain in effect for a period of three years. Shares may be repurchased from time to time on the open market, through block trades or otherwise. Purchases may be started or stopped at any time without prior notice depending on market conditions and other factors. During fiscal year 2015, 0.1 million shares were repurchased for \$1.7 million under this program.

During the first quarter of fiscal year 2016, we announced that we are committing to pursue a restructuring, including exiting the OEM business, reorganizing Lifesize to sharpen its focus on its Cloud-based offering, and streamlining the Company's overall cost structure through product, overhead and infrastructure cost reductions with a targeted resource realignment. We expect that we will recognize restructuring charges of approximately \$15 million to \$20 million, consisting primarily of severance, other one-time termination benefits, and other restructuring charges. We expect this restructuring will save personnel-related costs and other overhead costs and we expect to use the savings from the restructuring to offset currency headwinds and to invest in future growth.

Our other contractual obligations and commitments that require cash are described in the following sections.

For over ten years, we have generated positive cash flows from our operating activities, including cash from operations of \$178.6 million, \$205.4 million and \$122.4 million during fiscal years 2015, 2014 and 2013, respectively. If we do not generate sufficient operating cash flows to support our operations and future planned cash requirements, our operations could be harmed and our access to credit facilities could be restricted or eliminated. However, we believe that the trend of our historical cash flow generation, our projections of future operations and reduced expenses and our available cash balances will provide sufficient liquidity to fund our operations for at least the next 12 months.

Contractual Obligations and Commitments

As of March 31, 2015, our outstanding contractual obligations and commitments included: (i) inventory purchase commitments and obligations, (ii) capital expenditure purchase commitments, and (iii) facilities leased under operating lease commitments. The following table summarizes our contractual obligations and commitments as of March 31, 2015 (in thousands):

	March 31, 2015	Payments Due by Period			
		<1 year	1-3 years	4-5 years	>5 years
Inventory commitments	\$165,912	\$165,912	\$—	\$—	\$—
Capital commitments	14,390	14,390	—	—	—
Operating leases	54,232	13,829	18,727	11,768	9,908
	\$234,534	\$194,131	\$18,727	\$11,768	\$9,908

Operating Leases

We lease facilities under operating leases, certain of which require us to pay property taxes, insurance and maintenance costs. Operating leases for facilities are generally renewable at our option and usually include escalation clauses linked to inflation. The remaining terms on our non-cancelable operating leases expire in various years through 2030.

Purchase Commitments

As of March 31, 2015, we have fixed purchase commitments of \$165.9 million for inventory purchases made in the normal course of business to original design manufacturers, contract manufacturers and other suppliers, the majority of which are expected to be fulfilled during the first quarter of fiscal year 2016. We record a liability for firm, non-cancelable, and unhedged inventory purchase commitments in excess of anticipated demand or market value consistent with our valuation of excess and obsolete inventory. As of March 31, 2015, the liability for these purchase commitments was \$9.8 million and is recorded in accrued and other current liabilities and is not included in the preceding table. We have fixed purchase commitments of \$14.4 million for capital expenditures, primarily related to commitments for tooling, computer hardware and leasehold improvements. We expect to continue making capital

Table of Contents

expenditures in the future to support product development activities and ongoing and expanded operations. Although open purchase commitments are considered enforceable and legally binding, the terms generally allow us the option to reschedule and adjust our requirements based on business needs prior to delivery of goods or performance of services.

Income Taxes Payable

As of March 31, 2015, we had \$72.1 million in non-current income taxes payable, including interest and penalties, related to our income tax liability for uncertain tax positions. At this time, we are unable to make a reasonably reliable estimate of the timing of payments in individual years in connection with these tax liabilities; therefore, such amounts are not included in the above contractual obligation table.

Off-Balance Sheet Arrangements

We have not entered into any transactions with unconsolidated entities whereby we have financial guarantees, subordinated retained interests, derivative instruments or other contingent arrangements that expose us to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to us.

Investment Commitments

During 2015, we entered into a limited partnership agreement with a private investment fund specialized in early-stage start-up consumer hardware electronics companies and committed a capital contribution of \$4.0 million over the life of the fund. As of March 31, 2015, no capital contribution has been called by the fund.

Other Contingencies

We are subject to an ongoing formal investigation by the SEC's Enforcement Division, relating to certain issues including the accounting for Revue inventory valuation reserves that resulted in the restatement described in the Fiscal Year 2014 Annual Report on Form 10-K, revision to our consolidated financial statements concerning warranty accruals and amortization of intangible assets presented in our Amended Annual Report on Form 10-K/A, filed on August 7, 2013, and our transactions with a distributor for Fiscal Year 2007 through Fiscal Year 2009. We have entered into an agreement with the SEC to extend the statute of limitations. We are cooperating with the investigation and recently engaged in discussions to settle the matter with the SEC, including making offers of monetary amounts for a civil penalty. In accordance with U.S. GAAP, we have made an accrual in our financial statements. We cannot predict the timing, range of possible loss or final outcome of this matter.

Guarantees

Logitech Europe S.A. guaranteed payments of third-party contract manufacturers' purchase obligations. As of March 31, 2015, the maximum amount of this guarantee was \$3.8 million, of which \$1.7 million of guaranteed purchase obligations were outstanding.

Indemnifications

We indemnify certain of our suppliers and customers for losses arising from matters such as intellectual property disputes and product safety defects, subject to certain restrictions. The scope of these indemnities varies, but in some instances, includes indemnification for damages and expenses, including reasonable attorneys' fees. As of March 31, 2015, no amounts have been accrued for indemnification provisions. We do not believe, based on historical experience and information currently available, that it is probable that any material amounts will be required to be paid under our indemnification arrangements.

We also indemnify our current and former directors and certain of our current and former officers. Certain costs incurred for providing such indemnification may be recoverable under various insurance policies. We are unable to reasonably estimate the maximum amount that could be payable under these arrangements because these exposures are not capped, the obligations are conditional in nature, and the facts and circumstances involved in any situation that might arise are variable.

Research and Development

For a discussion of our research and development activities, patents and licenses, please refer to Item 1, Business.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

Market risk represents the potential for loss due to adverse changes in the fair value of financial instruments. As a global concern, we face exposure to adverse movements in currency exchange rates and interest rates. These exposures may change over time as business practices evolve and could have a material adverse impact on our financial results.

Currency Exchange Rates

We report our results in U.S. Dollars. Changes in currency exchange rates compared to the U.S. Dollar can have a material impact on our results when the financial statements of our non-U.S. subsidiaries are translated into U.S. Dollars. The functional currency of our operations is primarily the U.S. Dollar. Certain operations use the Swiss Franc, or the local currency of the country as their functional currencies. Accordingly, unrealized currency gains or losses resulting from the translation of net assets or liabilities denominated in other currencies to the U.S. Dollar are accumulated in the cumulative translation adjustment component of other comprehensive income (loss) in shareholders' equity.

We are exposed to currency exchange rate risk as we transact business in multiple currencies, including exposure related to anticipated sales, anticipated purchases and assets and liabilities denominated in currencies other than the U.S. Dollar. We transact business in over 30 currencies worldwide, of which the most significant to operations are the Euro, Chinese Renminbi, Australian Dollar, Taiwanese Dollar, British Pound, Canadian Dollar, Japanese Yen and Mexican Peso. For example, for the year ended March 31, 2015, approximately 44% of our sales were in non-U.S. denominated currencies, with 23% of our sales denominated in Euro. The mix of our cost of goods sold and operating expenses by currency are significantly different from the mix of our sales, with a larger portion denominated in U.S. Dollar and less denominated in Euro and other currencies. As a result, a strengthening U.S. Dollar has an adverse impact on our operating results. The average exchange rate for the U.S. Dollar for the year ended March 31, 2015 strengthened significantly against most of the currencies for the same period in the prior fiscal year, which adversely impacted our actual results for the year ended March 31, 2015 including our net sales, net income, cash flows from operations and our growth rates year over year. If the U.S. Dollar remains at its current strong levels in comparison to other currencies, this will affect our results of operations in future periods as well. The table below provides information about our underlying transactions that are sensitive to currency exchange rate changes, primarily assets and liabilities denominated in currencies other than the base currency, where the net exposure is greater than \$0.5 million as of March 31, 2015. The table also presents the U.S. Dollar impact on earnings of a 10% appreciation and a 10% depreciation of the base currency as compared with the transaction currency (in thousands):

Table of Contents

Currency	Transaction Currency	March 31, 2015		
		Net Exposed Long (Short) Currency	Currency Exchange Gain (Loss) from 10% Change in Base Currency	
Base Currency	Transaction Currency	Position	Appreciation	Depreciation
U.S. Dollar	Mexican Peso	\$11,684	\$(1,062)	\$1,298
U.S. Dollar	Japanese Yen	7,244	(659)	805
U.S. Dollar	Australian Dollar	8,852	(805)	984
U.S. Dollar	Canadian Dollar	7,376	(671)	820
U.S. Dollar	Indian Rupee	1,896	(172)	211
U.S. Dollar	Singapore Dollar	(6,483)	589	(720)
U.S. Dollar	Chinese Renminbi	(7,086)	644	(787)
U.S. Dollar	Taiwanese Dollar	(16,846)	1,531	(1,872)
Euro	British Pound	4,609	(419)	512
Euro	Turkish Lira	859	(78)	95
Euro	Norwegian Krone	(510)	46	(57)
Euro	Swedish Krona	(928)	84	(103)
		\$10,667	\$(972)	\$1,186

Long currency positions represent net assets being held in the transaction currency while short currency positions represent net liabilities being held in the transaction currency.

Our principal manufacturing operations are located in China, with much of our component and raw material costs transacted in CNY. As of March 31, 2015, net liabilities held in Chinese Renminbi (CNY) totaled \$7.1 million.

Derivatives

We enter into foreign exchange forward contracts to hedge against exposure to changes in currency exchange rates related to its subsidiaries' forecasted inventory purchases. We have one entity with a Euro functional currency that purchases inventory in U.S. Dollars. The primary risk managed by using derivative instruments is the currency exchange rate risk. We have designated these derivatives as cash flow hedges. These hedging contracts mature within four months, and are denominated in the same currency as the underlying transactions. Gains and losses in the fair value of the effective portion of the hedges are deferred as a component of accumulated other comprehensive loss until the hedged inventory purchases are sold, at which time the gains or losses are reclassified to cost of goods sold. We assess the effectiveness of the hedges by comparing changes in the spot rate of the currency underlying the forward contract with changes in the spot rate of the currency in which the forecasted transaction will be consummated. If the underlying transaction being hedged fails to occur or if a portion of the hedge does not generate offsetting changes in the currency exposure of forecasted inventory purchases, we immediately recognize the gain or loss on the associated financial instrument in other income (expense), net. Such gains and losses were not material during fiscal years 2015, 2014 and 2013. Cash flows from such hedges are classified as operating activities in the Consolidated Statements of Cash Flows. As of March 31, 2015 and 2014, the notional amounts of foreign exchange forward contracts outstanding related to forecasted inventory purchases were \$43.5 million and \$51.8 million, respectively. Deferred realized gains of \$1.9 million are recorded in accumulated other comprehensive loss as of March 31, 2015, and are expected to be reclassified to cost of goods sold when the related inventory is sold. Deferred unrealized gains of \$2.1 million related to open cash flow hedges are also recorded in accumulated other comprehensive loss as of March 31, 2015 and these forward contracts will be revalued in future periods until the related inventory is sold, at which time the resulting gains or losses will be reclassified to cost of goods sold. We also enter into foreign exchange forward and swap contracts to reduce the short-term effects of currency fluctuations on certain currency receivables or payables. These forward contracts generally mature within one month. The primary risk managed by using forward and swap contracts is the currency exchange rate risk. The gains or losses on these foreign exchange contracts are recognized in earnings based on the changes in fair value. Cash flows from these contracts are classified as operating activities in the consolidated statements of cash flows.

The notional amounts of foreign exchange forward and swap contracts outstanding as of March 31, 2015 and 2014 relating to foreign currency receivables or payables were \$61.7 million and \$53.7 million, respectively. Open forward and swap contracts as of March 31, 2015 and 2014 consisted of contracts in Taiwanese Dollars, Australian

Table of Contents

Dollars, Mexican Pesos, Japanese Yen and British Pounds to be settled at future dates at pre-determined exchange rates.

Interest Rates

Changes in interest rates could impact our future interest income on our cash equivalents and investment securities. We prepared a sensitivity analysis of our interest rate exposures to assess the impact of hypothetical changes in interest rates. Based on the results of this analysis, a 100 basis point decrease or increase in interest rates from the March 31, 2015 and March 31, 2014 period end rates would not have a material effect on our results of operations or cash flows.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Logitech's financial statements and supplementary data required by this item are set forth as a separate section of this Form 10-K. See Item 15 (a) for a listing of financial statements and supplementary data provided in the section titled "Financial Statements and Supplementary Data."

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Annual Report on Form 10-K, Logitech carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended, ("the Exchange Act"). Disclosure controls and procedures are controls and other procedures designed to reasonably assure that information required to be disclosed in our reports filed or submitted under the Exchange Act, such as this Annual Report on Form 10-K, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures are also designed to reasonably assure that this information is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure.

Based on that evaluation, Logitech's Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2015, our disclosure controls and procedures were operating effectively, as described in Management's Report on Internal Control over Financial Reporting below.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) of the Exchange Act. Our management assessed, with the oversight of the Board of Directors, the effectiveness of our internal control over financial reporting as of March 31, 2015. In making this assessment, management used the criteria established in Internal Control-Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this assessment, management has concluded that the Company's internal control over financial reporting was effective as of March 31, 2015.

Changes in Internal Controls over Financial Reporting:

We implemented and enhanced the following internal control procedures which addressed previously identified material weaknesses. These internal control changes included the following:

Changes to establish effective oversight of information, documentation and communication:

• Finance and Accounting leadership team, including a new Chief Financial Officer (who was appointed Principal Financial and Accounting Officer), a new Vice President (VP) of Internal Audit, and a new VP,

Table of Contents

Corporate Controller, to strengthen oversight of the team and improve the design, implementation, execution and supervision of internal controls within the organization.

Enhanced lines of communications and other new policies and procedures that allow frequent open communication with key internal stakeholders, including Senior VPs and Directors, Legal Counsel, our advisors, and our independent registered public accounting firm, on key business and operational matters impacting financial reporting.

Enhanced the Company's internal representation policies and procedures by requiring over 50 senior level employees to complete detailed questionnaires each quarter and ensured the feedback received is reviewed by the Controllershship Group and appropriate actions are initiated and resolved.

Enhanced the SOX Steering Committee, Disclosure Committee review process and the Audit Committee Communication process to include greater analyses of key financial statement information and metrics with a focus on areas involving greater management estimate and judgment to ensure greater transparency and effective monitoring and oversight.

Implemented policy requiring formal documentation of the conclusions and basis for conclusions for all significant accounting positions and financial reporting issues, by finance and accounting personnel with sufficient technical competence, including review and approval by the appropriate level of management.

Changes to ensure that there is sufficient complement of personnel with appropriate accounting knowledge, experience and competence:

Hired experienced resources in the area of controllership functions, including SEC Reporting, Financial Planning and Analysis, Operations Finance, Regional Controllershship Group, Revenue Recognition Accounting, and Corporate Consolidation and Reporting Group.

Enhanced training for key individuals that provide critical information used in financial accounting and reporting to reinforce pre-established and new policies and procedures to improve our ability to prevent and detect potential material misstatements in our internally prepared reports, analyses and financial records.

Identified skills gaps within the global finance and accounting organization and recruited resources with appropriate experience and technical expertise.

Changes to ensure that we have an appropriate methodology to accrue the costs of product warranties given to end customers (including an on-going review of the assumptions within the methodology to determine the completeness and accuracy of the warranty accrual):

Implemented new policies and procedures for identifying and accruing costs relating to product warranty, including documenting and evaluating the key assumptions used and ensuring the appropriate supervision and review each quarter.

Changes to ensure we consider all relevant information and document the underlying assumptions in our assessment of the valuation of finished goods, work in process and components inventory, including non-cancelable orders for such inventory:

Implemented new policies and procedures for analyzing our inventory reserves, including increased standardization and documentation over our evaluation of key inputs and assumptions such as aging, historical sales data, product life cycles and market acceptance.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-K

Changes to ensure we review supporting information to determine the completeness and accuracy of the consolidated statement of cash flows, the consolidated statement of comprehensive income (loss) and disclosures in the notes to the consolidated financial statements:

- Implemented a process to enhance the nature and extent of review of reports on Forms 10-Q and 10-K by a team led by the new Corporate Controller, a more robust process for disclosure committee

68

Table of Contents

meetings, and a final review of these filings with the Principal Financial and Accounting Officer. The Principal Financial and Accounting Officer and the Corporate Controller in turn report the results of this process to the Disclosure and Audit Committees in formal quarterly meetings.

Implemented processes and procedures to ensure the completeness and accuracy of the cash flow statement, the consolidated statement of comprehensive income (loss) and disclosures to the notes to the consolidated financial statements, including appropriate review and supervision over the individual components that support the sufficiency and appropriateness of these items each quarter.

After completing our testing of the design and operating effectiveness of these new enhanced procedures, we concluded that we have remediated the previously identified material weakness as of March 31, 2015.

Except for the items noted above, we have made no changes to our internal control over financial reporting during the fiscal year ended March 31, 2015 that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

The effectiveness of the Company's internal control over financial reporting as of March 31, 2015 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in its report, which appears in Item 15.

Limitations on the Effectiveness of Controls

The Company's management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the Company's disclosure controls and procedures or internal control over financial reporting will prevent all errors and all fraud. Internal control over financial reporting, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives will be met. Because of the inherent limitations in internal control over financial reporting, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of simple error or mistake.

Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information regarding our executive officers is incorporated herein by reference to Part I, Item 1, above.

Other information required by this Item may be found in the definitive Proxy Statement for the 2015 Annual Meeting of Shareholders and is incorporated herein by reference. The definitive Proxy Statement will be filed with the Commission within 120 days after our fiscal year end of March 31, 2015 (the "Proxy Statement").

The Company's code of ethics policy entitled, "Business Ethics and Conflict of Interest Policy of Logitech International S.A.," covers members of the Company's board of directors and the principal executive officer, principal financial and accounting officer as well as all other employees.

The code of ethics addresses, among other things, the following items:

Honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

Full, fair, accurate, timely, and understandable disclosure in reports and documents that we file with, or submit to, the Commission and in other public communications made by us;

Compliance with applicable governmental laws, rules and regulations;

The prompt internal reporting to an appropriate person or persons identified in the code of violations of any of the provisions described above; and

Accountability for adherence to the code.

Any amendments or waivers of the code of ethics for members of the Company's board of directors or executive officers will be disclosed in the investor relations section of the Company's Web site within four business days following the date of the amendment or waiver and will also be disclosed either on a Form 8-K or the Company's next Form 10-K filing. During fiscal year 2015, no waivers or amendments were made to the code of ethics for any Director or Executive Officer.

Logitech's code of ethics is available on the Company's Web site at www.logitech.com, and for no charge, a copy of the Company's code of ethics can be requested via the following address or phone number:

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Logitech International S.A.:

We have audited the accompanying consolidated balance sheet of Logitech International S.A. and subsidiaries (the Company) as of March 31, 2015, and the related consolidated statement of operations, comprehensive loss, stockholders' equity, and cash flows for the year ended March 31, 2015. In connection with our audit of the consolidated financial statements, we also have audited the related financial statement schedule for the year ended March 31, 2015 listed in the accompanying index. We also have audited the Company's internal control over financial reporting as of March 31, 2015, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting appearing in Item 9A. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Logitech International S.A. and subsidiaries as of March 31, 2015, and the result of their operations and their cash flows for year ended March 31, 2015, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein. Also in our opinion, Logitech International S.A. maintained,

Table of Contents

in all material respects, effective internal control over financial reporting as of March 31, 2015, based on criteria established in Internal Control (1992) - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders of Logitech International S.A.:

In our opinion, the consolidated balance sheet as of March 31, 2014 and the related consolidated statements of operations, comprehensive income (loss), shareholders' equity and cash flows for each of two years in the period ended March 31, 2014 present fairly, in all material respects, the financial position of Logitech International S.A. and its subsidiaries at March 31, 2014, and the results of their operations and their cash flows for each of the two years in the period ended March 31, 2014 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) for each of the two years in the period ended March 31, 2014 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

LOGITECH INTERNATIONAL S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1—The Company

Logitech International S.A, together with its consolidated subsidiaries, ("Logitech" or the "Company") develops and markets innovative hardware and software products that enable or enhance digital navigation, music and video entertainment, gaming, social networking, audio and video communication over the Internet, video security and home-entertainment control.

The Company has two operating segments, peripherals and video conferencing. Logitech's peripherals segment encompasses the design, manufacturing and marketing of peripherals for personal computers ("PCs"), tablets and other digital platforms. The Company's video conferencing segment offers scalable high-definition, or HD, video communication endpoints, HD video conferencing systems with integrated monitors, video bridges, a Cloud-based video conferencing solution and other infrastructure software and hardware to support large-scale video deployments and services to support these products.

The Company sells its peripherals products to a network of distributors, retailers and original equipment manufacturers ("OEMs"). The Company sells its video conferencing products and services to distributors, value-added resellers, OEMs and, occasionally, direct enterprise customers. The large majority of the Company's net sales have historically been derived from peripherals products for use by consumers.

Logitech was founded in Switzerland in 1981 and Logitech International S.A. has been the parent holding company of Logitech since 1988. Logitech International S.A. is a Swiss holding company with its registered office in Apples, Switzerland, which conducts its business through subsidiaries in Americas, Europe, Middle East, Africa ("EMEA") and Asia Pacific. Shares of Logitech International S.A. are listed on both the SIX Swiss Exchange under the trading symbol LOGN and the Nasdaq Global Select Market under the trading symbol LOGI.

Note 2—Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of Logitech and its subsidiaries. All intercompany balances and transactions have been eliminated. The consolidated financial statements are presented in accordance with U.S. GAAP (accounting principles generally accepted in the United States of America).

Fiscal Year

The Company's fiscal year ends on March 31. Interim quarters are thirteen-week periods, each ending on a Friday. For purposes of presentation, the Company has indicated its quarterly periods as ending on the month end.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make judgments, estimates and assumptions that affect reported amounts of assets, liabilities, net sales and expenses, and the disclosure of contingent assets and liabilities. Examples of significant estimates and assumptions made by management involve the fair value of goodwill, warranty liabilities, accruals for discretionary customer programs, sales return reserves, allowance for doubtful accounts, inventory valuation, uncertain tax positions, and valuation allowances for deferred tax assets. Although these estimates are based on management's best knowledge of current events and actions that may impact the Company in the future, actual results could differ from those estimates.

Foreign Currencies

The functional currency of the Company's operations is primarily the U.S. Dollar. Certain operations use the Euro, Chinese Renminbi, Swiss Franc, or other local currencies as their functional currencies. The financial statements of the Company's subsidiaries whose functional currency is other than the U.S. Dollar are translated to U.S. Dollars using period-end rates of exchange for assets and liabilities and monthly average rates for net sales, income and expenses. Cumulative translation gains and losses are included as a component of shareholders' equity in accumulated other comprehensive income/(loss). Gains and losses arising from transactions denominated

Table of Contents

in currencies other than a subsidiary's functional currency are reported in other income (expense), net in the consolidated statements of operations.

Revenue Recognition

Revenues are recognized when all of the following criteria are met:

- Evidence of an arrangement between the Company and the customer exists;
- Delivery has occurred and title and risk of loss has transferred to the customer;
- The price of the product is fixed or determinable; and
- Collectability of the receivable is reasonably assured.

For sales of most hardware peripherals products and hardware bundled with software essential to its functionality, these criteria are met at the time delivery has occurred and title and risk of loss have transferred to the customer.

The Company's video conferencing segment has multiple deliverable revenue arrangements that include both undelivered software elements and, hardware with software essential to its functionality. The Company uses the following hierarchy to determine the relative selling price for allocating revenue to the deliverables: (i) VSOE (vendor specific objective evidence) of fair value, if available; (ii) TPE (third party evidence), if VSOE is not available; or (iii) ESP (best estimate of selling price), if neither VSOE nor TPE are available. Management judgment must be used to determine the appropriate deliverables and associated relative selling prices. The Company has identified the Lifesize video conferencing products as products sold with software components that qualify as multiple-deliverable revenue arrangements.

Lifesize products include the following deliverables:

Non-software deliverables

- Hardware with software essential to the functionality of the hardware device delivered at time of sale
- Maintenance for hardware with essential software, including future when-and-if-available unspecified upgrades
- Other services, including training and installation

Software deliverables

• Non-essential software

- Maintenance for non-essential software, including future when-and-if available unspecified upgrades

The relative selling price for hardware with essential software and non-essential software is based on ESP, as VSOE and TPE cannot be established due to variable price discounting. Key factors considered in developing ESP are historical selling prices of the product, pricing of substantially similar products, and other market conditions. Lifesize sells maintenance for non-essential software, maintenance for hardware with essential software, and other services on a standalone basis, and therefore has established VSOE for those deliverables.

The consideration received for multiple element arrangements consisting of both non-software and software deliverables is allocated based on relative selling prices to the non-software deliverables and the software deliverables as a group. Amounts allocated to non-software-related elements, such as delivered hardware with essential software, are recognized at the time of sale provided that the other criteria for revenue recognition have been met. Amounts allocated to maintenance services for hardware and essential software are deferred and recognized ratably over the maintenance period. Amounts allocated to other services are deferred and recognized upon completion of services. Amounts allocated to software deliverables such as non-essential software and related services are further allocated to the individual deliverables within the software group. The fair value, based on VSOE, of non-essential software-related maintenance is deferred and recognized ratably over the maintenance period. The residual value of the amounts allocated to software-related elements is recognized at the time of sale.

Revenue from Cloud-based services arrangements that allow for the use of a hosted software product or service over a contractually determined period of time without taking possession of software are accounted for as subscriptions with billings recorded as deferred revenue and recognized as revenue ratably over the contractual period beginning on the date the service is made available to customers.

Revenues from sales to distributors and authorized resellers are recognized upon shipment net of estimated product returns and expected payments for cooperative marketing arrangements, customer incentive programs and pricing programs. The estimated cost of these programs is recorded as a reduction of sales or as an operating

Table of Contents

expense, if the Company receives a separately identifiable benefit from the customer and can reasonably estimate the fair value of that benefit. Significant management judgment and estimates are used to determine the cost of these programs in any accounting period.

The Company grants limited rights to return products. Return rights vary by customer, and range from just the right to return defective product to stock rotation rights limited to a percentage of sales approved by management. Estimates of expected future product returns are recognized at the time of sale based on analyses of historical return trends by customer and by product, inventories owned by and located at distributors and retailers, current customer demand, current operating conditions, and other relevant customer and product information. Upon recognition, the Company reduces sales and cost of sales for the estimated return. Return trends are influenced by product life cycle status, new product introductions, market acceptance of products, sales levels, product sell-through, the type of customer, seasonality, product quality issues, competitive pressures, operational policies and procedures, and other factors. Return rates can fluctuate over time, but are sufficiently predictable to allow the Company to estimate expected future product returns.

The Company enters into cooperative marketing arrangements with many of its distribution and retail customers, and with certain indirect partners, allowing customers to receive a credit equal to a set percentage of their purchases of the Company's products, or a fixed dollar credit for various marketing programs. The objective of these arrangements is to encourage advertising and promotional events to increase sales of the Company's products. Accruals for these marketing arrangements are recorded at the later of time of sale or time of commitment, based on negotiated terms, historical experience and inventory levels in the channel.

Customer incentive programs include performance-based incentives and consumer rebates. The Company offers performance-based incentives to its distribution customers, retail customers and indirect partners based on pre-determined performance criteria. Accruals for performance-based incentives are recognized as a reduction of the sale price at the time of sale. Estimates of required accruals are determined based on negotiated terms, consideration of historical experience, anticipated volume of future purchases, and inventory levels in the channel. Consumer rebates are offered from time to time at the Company's discretion for the primary benefit of end-users. Accruals for the estimated costs of consumer rebates and similar incentives are recorded at the later of time of sale or when the incentive is offered, based on the specific terms and conditions. Certain incentive programs, including consumer rebates, require management to estimate the number of customers who will actually redeem the incentive based on historical experience and the specific terms and conditions of particular programs.

The Company has agreements with certain of its customers that contain terms allowing price protection credits to be issued in the event of a subsequent price reduction. At management's discretion, the Company also offers special pricing discounts to certain customers. Special pricing discounts are usually offered only for limited time periods or for sales of selected products to specific indirect partners. Management's decision to make price reductions is influenced by product life cycle stage, market acceptance of products, the competitive environment, new product introductions and other factors. Accruals for estimated expected future pricing actions are recognized at the time of sale based on analyses of historical pricing actions by customer and by products, inventories owned by and located at distributors and retailers, current customer demand, current operating conditions, and other relevant customer and product information, such as stage of product life-cycle.

The Company regularly evaluates the adequacy of its estimates for product returns, cooperative marketing arrangements, customer incentive programs and pricing programs. Future market conditions and product transitions may require the Company to take action to change such programs. In addition, when the variables used to estimate these costs change, or if actual costs differ significantly from the estimates, the Company would be required to record incremental increases or reductions to sales, cost of goods sold or operating expenses. If, at any future time, the Company becomes unable to reasonably estimate these costs, recognition of revenue might be deferred until products are sold to users, which would adversely impact sales in the period of transition.

Shipping and Handling Costs

The Company's shipping and handling costs are included in cost of sales in the consolidated statements of operations for all periods presented.

Research and Development Costs

Costs related to research, design and development of products, which consist primarily of personnel, product design and infrastructure expenses, are charged to research and development expense as they are incurred.

Table of Contents

Advertising Costs

Advertising costs are expensed as incurred. Advertising costs are recorded as either a marketing and selling expense or a deduction from revenue. Advertising costs reimbursed by the Company to direct or indirect customers must have an identifiable benefit and an estimable fair value in order to be classified as an operating expense. If these criteria are not met, the cost is classified as a reduction of revenue. Advertising costs during fiscal years 2015, 2014 and 2013 were \$174.2 million, \$161.2 million and \$165.8 million, respectively.

Cash Equivalents

The Company considers all highly liquid instruments purchased with an original maturity of three months or less to be cash equivalents. Cash equivalents are carried at cost, which approximates fair value.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents and accounts receivable. The Company maintains cash and cash equivalents with various financial institutions to limit exposure with any one financial institution, but is exposed to credit risk in the event of default by financial institutions to the extent that cash balances with individual financial institutions are in excess of amounts that are insured.

The Company sells to large OEMs, distributors and retailers and, as a result, maintains individually significant receivable balances with such customers. In fiscal years 2015, 2014 and 2013, one customer in the peripherals operating segment represented 14%, 14% and 11% of the Company's total net sales, respectively. No other customer represented more than 10% of the Company's total net sales during fiscal years 2015, 2014 or 2013. As of March 31, 2015 and 2014, one customer represented 12% and 14% of total accounts receivable, respectively. No other customer represented more than 10% of the Company's total accounts receivable at either March 31, 2015 or 2014. Typical payment terms require customers to pay for product sales generally within 30 to 60 days; however terms may vary by customer type, by country and by selling season. Extended payment terms are sometimes offered to a limited number of customers during the second and third fiscal quarters. The Company does not modify payment terms on existing receivables.

The Company's OEM customers tend to be well-capitalized multi-national companies, while distributors and key retailers may be less well-capitalized. The Company manages its accounts receivable credit risk through ongoing credit evaluation of its customers' financial condition. The Company generally does not require collateral from its customers.

Allowances for Doubtful Accounts

Allowances for doubtful accounts are maintained for estimated losses resulting from the inability of the Company's customers to make required payments. The allowances are based on the Company's regular assessment of the credit worthiness and financial condition of specific customers, as well as its historical experience with bad debts and customer deductions, receivables aging, current economic trends, geographic or country-specific risks and the financial condition of its distribution channels.

Inventories

Inventories are stated at the lower of cost or market. Costs are computed under the standard cost method, which approximates actual costs determined on the first-in, first-out basis. The Company records write-downs of inventories which are obsolete or in excess of anticipated demand or market value based on a consideration of marketability and product life cycle stage, product development plans, component cost trends, demand forecasts, historical net sales, and assumptions about future demand and market conditions.

As of March 31, 2015 and 2014, the Company also recorded a liability of \$9.8 million and \$9.2 million, respectively, arising from firm, non-cancelable, and unhedged inventory purchase commitments in excess of anticipated demand or market value consistent with its valuation of excess and obsolete inventory. Such liability is included in accrued and other current liabilities.

Investments

The Company's investment securities portfolio consists of bank time deposits with an original maturity of three months or less and marketable securities (money market and mutual funds) related to a deferred compensation plan.

Table of Contents

The bank time deposits are classified as cash equivalents and are recorded at cost, which approximates fair value. The marketable securities related to the deferred compensation plan are classified as non-current trading investments, as they are intended to fund the deferred compensation plan long-term liability. Since participants in the deferred compensation plan may select the mutual funds in which their compensation deferrals are invested within the confines of the Rabbi Trust which holds the marketable securities, the Company has designated these marketable securities as trading investments, although there is no intent to actively buy and sell securities within the objective of generating profits on short-term differences in market prices. These securities are recorded at fair value based on quoted market prices. Earnings, gains and losses on trading investments are included in other income (expense), net.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Additions and improvements are capitalized, and maintenance and repairs are expensed as incurred. The Company capitalizes the cost of software developed for internal use in connection with major projects. Costs incurred during the feasibility stage are expensed, whereas direct costs incurred during the application development stage are capitalized.

Depreciation is provided using the straight-line method. Plant and buildings are depreciated over estimated useful lives from ten to twenty-five years, equipment over useful lives from three to five years, internal-use software development over useful lives of three to seven years and leasehold improvements over the lesser of the useful life of the improvement or the term of the lease.

When property and equipment is retired or otherwise disposed of, the cost and accumulated depreciation are relieved from the accounts and the net gain or loss is included in operating expenses.

Valuation of Long-Lived Assets

The Company reviews long-lived assets, such as property and equipment, and finite-lived intangible assets, for impairment whenever events indicate that the carrying amounts might not be recoverable. Recoverability of property and equipment, and other finite-lived intangible asset is measured by comparing the projected undiscounted net cash flows associated with those assets to their carrying values. If an asset is considered impaired, it is written down to fair value, which is determined based on the asset's projected discounted cash flows or appraised value, depending on the nature of the asset. For purposes of recognition of an impairment for assets held for use, the Company groups assets and liabilities at the lowest level for which cash flows are separately identifiable.

Goodwill and Other Intangible Assets

The Company's intangible assets principally include goodwill, acquired technology, trademarks, and customer contracts. Other intangible assets with finite lives, which include acquired technology, trademarks and customer contracts, and other are recorded at cost and amortized using the straight-line method over their useful lives ranging from one year to ten years. Intangible assets with indefinite lives, which include only goodwill, are recorded at cost and evaluated at least annually for impairment.

In accordance with ASC Topic 350-10 ("ASC 350-10") as it relates to Goodwill and Other Intangible Assets, the Company conducts its annual goodwill impairment analysis as of December 31 each year and as necessary if changes in facts and circumstances indicate that it is more likely than not that the fair value of its reporting units may be less than its carrying amount. Events or changes in facts and circumstances that might indicate potential impairment of goodwill include deterioration in general economic conditions, negative developments in equity and credit markets, adverse changes in the markets in which an entity operates, increases in input costs that have a negative effect on earnings and cash flows, or a trend of negative or declining cash flows or a decline in actual or planned revenue or earnings compared with actual and projected results of relevant prior periods, other relevant entity-specific events such as changes in management, key personnel, strategy, or customers; contemplation of bankruptcy; or litigation. Determining the number of reporting units and the fair value of a reporting unit requires the Company to make judgments and involves the use of significant estimates and assumptions. The Company has two reporting units: peripherals and video conferencing. The allocation of assets and liabilities to each of the reporting units also involves judgment and assumptions.

FASB ASC 350-20 permits the Company to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test.

Table of Contents

If an entity concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it would not be required to perform the two-step impairment test for that reporting unit. The Company may elect to proceed directly to Step 1 without performing a qualitative assessment.

The Step 1 of the two-step impairment test involves measuring the recoverability of goodwill at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the estimated fair value of the reporting unit. The fair value is estimated using an income approach employing a discounted cash flow ("DCF") and a market-based model. The DCF model is based on projected cash flows from the Company's most recent forecast ("assessment forecast") developed in connection with each of its reporting units to perform the goodwill impairment assessment. The assessment forecast is based on a number of key assumptions, including, but not limited to, discount rate, compound annual growth rate ("CAGR") during the forecast period, and terminal value. The terminal value is based on an exit price at the end of the assessment forecast using an earnings multiple applied to the final year of the assessment forecast. The discount rate is applied to the projected cash flows to reflect the risks inherent in the timing and amount of the projected cash flows, including the terminal value, and is derived from the weighted average cost of capital of market participants in similar businesses. The market approach model is based on applying certain revenue and earnings multiples of comparable companies relevant to each of the Company's reporting units to the respective revenue and earnings metrics of its reporting units. To test the reasonableness of the fair values indicated by the income approach and the market-based approach, the Company may assess the implied premium of the aggregate fair value over the market capitalization considered attributable to an acquisition control premium, which is the price in excess of a stock market's price that investors would typically pay to gain control of an entity. The DCF model and the market approach require the exercise of significant judgment, including assumptions about appropriate discount rates, long-term growth rates for purposes of determining a terminal value at the end of the discrete forecast period, economic expectations, timing of expected future cash flows, and expectations of returns on equity that will be achieved. Such assumptions are subject to change as a result of changing economic and competitive conditions. If the carrying amount of the reporting unit exceeds its fair value as determined by these assessments, goodwill is considered impaired, and Step 2 of the analysis is performed to measure the amount of impairment loss. Step 2 measures the impairment loss by allocating the reporting unit's fair value to its assets and liabilities other than goodwill, comparing the resulting implied fair value of goodwill with its carrying amount, and recording an impairment charge for the difference.

Income Taxes

The Company provides for income taxes using the asset and liability method, which requires that deferred tax assets and liabilities be recognized for the expected future tax consequences of temporary differences resulting from differing treatment of items for tax and accounting purposes. In estimating future tax consequences, expected future events are taken into consideration, with the exception of potential tax law or tax rate changes.

The Company's assessment of uncertain tax positions requires that management makes estimates and judgments about the application of tax law, the expected resolution of uncertain tax positions and other matters. In the event that uncertain tax positions are resolved for amounts different than the Company's estimates, or the related statutes of limitations expire without the assessment of additional income taxes, the Company will be required to adjust the amounts of the related assets and liabilities in the period in which such events occur. Such adjustments may have a material impact on the Company's income tax provision and its results of operations.

Fair Value of Financial Instruments

The carrying value of certain of the Company's financial instruments, including cash equivalents, accounts receivable and accounts payable approximates fair value due to their short maturities. The Company's trading investments related to the deferred compensation plan are reported at fair value based on quoted market prices.

Net Income (Loss) per Share

Basic net income (loss) per share is computed by dividing net income (loss) by the weighted average outstanding shares. Diluted net income (loss) per share is computed using the weighted average outstanding shares and dilutive share equivalents. Dilutive share equivalents consist of share-based awards, including stock options, purchase rights under employee share purchase plan, and restricted stock units ("RSUs").

The dilutive effect of in-the-money share-based compensation awards is calculated based on the average share price for each fiscal period using the treasury stock method, which assumes that the amount used to repurchase shares includes the amount the employee must pay for exercising share-based awards, the amount of

Table of Contents

compensation cost not yet recognized for future service, and the amount of tax impact that would be recorded in additional paid-in capital when the award becomes deductible.

Share-Based Compensation Expense

Share-based compensation expense includes compensation expense, reduced for estimated forfeitures, for share-based awards granted based on the grant date fair value. The grant date fair value for stock options and stock purchase rights is estimated using the Black-Scholes-Merton option-pricing valuation model. The grant date fair value of RSUs which vest upon meeting certain market conditions is estimated using the Monte-Carlo simulation method. The grant date fair value of time-based and performance-based RSUs is calculated based on the market price on the date of grant, adjusted by estimated dividends yield prior to vesting.

Excess tax benefits resulting from share-based awards are classified as cash flows from financing activities in the consolidated statements of cash flows. Excess tax benefits are realized tax benefits from tax deductions for exercised options and vested RSUs in excess of the deferred tax asset attributable to share-based compensation costs for such share-based awards.

The Company will recognize a benefit from share-based compensation in additional paid-in capital only if an incremental tax benefit is realized after all other available tax attributes have been utilized.

Product Warranty Accrual

The Company estimates cost of product warranties at the time the related revenue is recognized based on historical and projected warranty claim rates, historical and projected costs, and knowledge of specific product failures that are outside of the Company's typical experience. Each quarter, the Company reevaluates estimates to assess the adequacy of recorded warranty liabilities considering the size of the installed base of products subject to warranty protection and adjusts the amounts as necessary. If actual product failure rates or repair costs differ from estimates, revisions to the estimated warranty liabilities would be required and could materially affect the Company's results of operations.

Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the total change in shareholders' equity during the period other than from transactions with shareholders. Comprehensive income (loss) consists of net income (loss) and other comprehensive income (loss). Other comprehensive income (loss) is comprised of currency translation adjustments from those entities not using the U.S. Dollar as their functional currency, unrealized gains and losses on marketable equity securities, net deferred gains and losses and prior service costs and credits for defined benefit pension plans, and net deferred gains and losses on hedging activity.

Treasury Shares

The Company periodically repurchases shares in the market at fair value. Treasury shares repurchased are recorded at cost as a reduction of total shareholders' equity. Treasury shares held may be reissued to satisfy the exercise of employee stock options and purchase rights, the vesting of restricted stock units, and acquisitions, or may be cancelled with shareholder approval. Treasury shares that are reissued are accounted for using the first-in, first-out basis.

Derivative Financial Instruments

The Company enters into foreign exchange forward contracts to reduce the short-term effects of currency fluctuations on certain foreign currency receivables or payables and to hedge against exposure to changes in currency exchange rates related to its subsidiaries' forecasted inventory purchases. These forward contracts generally mature within four months.

Gains and losses for changes in the fair value of the effective portion of the Company's forward contracts related to forecasted inventory purchases are deferred as a component of accumulated other comprehensive income (loss) until the hedged inventory purchases are sold, at which time the gains or losses are reclassified to cost of goods sold. Gains or losses for changes in the fair value on forward contracts that offset translation losses or gains on foreign currency receivables or payables are recognized are included in other income (expense), net.

Table of Contents

Restructuring Charges

The Company's restructuring charges consist of employee severance, one-time termination benefits and ongoing benefits related to the reduction of its workforce, lease exit costs, and other costs. Liabilities for costs associated with a restructuring activity are measured at fair value and are recognized when the liability is incurred, as opposed to when management commits to a restructuring plan. One-time termination benefits are expensed at the date the entity notifies the employee, unless the employee must provide future service, in which case the benefits are expensed ratably over the future service period. Ongoing benefits are expensed when restructuring activities are probable and the benefit amounts are estimable. Costs to terminate a lease before the end of its term are recognized when the property is vacated. Other costs primarily consist of legal, consulting, and other costs related to employee terminations are expensed when incurred. Termination benefits are calculated based on regional benefit practices and local statutory requirements.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update No. 2014-9, "Revenue from Contracts with Customers (Topic 606)," ("ASU 2014-9"). ASU 2014-9 outlines a new, single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. Under the new model, recognition of revenue occurs when a customer obtains control of promised goods or services in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires that reporting companies disclose the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. As currently issued, the new standard is effective beginning in the first quarter of 2017; early adoption is prohibited. The new standard is required to be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying it recognized at the date of initial application. The Company has not yet selected a transition method nor has it determined the impact of the new standard on its consolidated financial statements.

Note 3—Net Income (Loss) per Share

The computations of basic and diluted net income (loss) per share for the Company were as follows (in thousands except per share amounts):

	Years Ended March 31,		
	2015	2014	2013
Net income (loss)	\$9,283	\$74,304	\$(227,518)
Shares used in net income (loss) per share computation:			
Weighted average shares outstanding—basic	163,536	160,619	158,468
Effect of potentially dilutive equivalent shares	2,638	1,907	—
Weighted average shares outstanding—diluted	166,174	162,526	158,468
Net income (loss) per share:			
Basic	\$0.06	\$0.46	\$(1.44)
Diluted	\$0.06	\$0.46	\$(1.44)

During fiscal years 2015, 2014 and 2013, 9.0 million, 15.1 million and 22.9 million share equivalents attributable to outstanding stock options, RSUs and ESPP were excluded from the calculation of diluted net income (loss) per share because the combined exercise price, average unamortized fair value and assumed tax benefits upon exercise of these options and ESPP or vesting of RSUs were greater than the average market price of the Company's shares, and therefore their inclusion would have been anti-dilutive.

Note 4—Employee Benefit Plans

Employee Share Purchase Plans and Stock Incentive Plans

As of March 31, 2015, the Company offers the 2006 ESPP (2006 Employee Share Purchase Plan (Non-U.S.)), the 1996 ESPP (1996 Employee Share Purchase Plan (U.S.)), the 2006 Plan (2006 Stock Incentive Plan) and the

Table of Contents

2012 Plan (2012 Stock Inducement Equity Plan). Shares issued to employees as a result of purchases or exercises under these plans are generally issued from shares held in treasury stock.

The following table summarizes share-based compensation expense and related tax benefit recognized for fiscal years 2015, 2014 and 2013 (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Cost of goods sold	\$2,473	\$2,518	\$2,499
Marketing and selling	9,094	8,298	7,825
Research and development	3,224	4,546	7,532
General and administrative	11,034	10,184	7,342
Total share-based compensation expense	25,825	25,546	25,198
Income tax benefit	(5,558)	(4,902)	(5,356)
Total share-based compensation expense, net of income tax	\$20,267	\$20,644	\$19,842

During the years ended March 31, 2015, 2014 and 2013, the Company capitalized \$0.5 million, \$0.4 million and \$0.4 million, respectively, of stock-based compensation expenses as inventory.

The following table summarizes total unamortized share-based compensation expense and the remaining months over which such expense is expected to be recognized, on a weighted-average basis by type of grant (in thousands, except number of months):

	March 31, 2015	
	Unamortized Expense	Remaining Months
Stock options and ESPP	\$1,509	7
Premium-priced stock options	224	12
Time-based RSUs	23,545	21
Market-based and performance-based RSUs	6,383	23
	\$31,661	

Under the 1996 ESPP and 2006 ESPP plans, eligible employees may purchase shares at the lower of 85% of the fair market value at the beginning or the end of each offering period, which is generally six months. Subject to continued participation in these plans, purchase agreements are automatically executed at the end of each offering period. An aggregate of 29 million shares was reserved for issuance under the 1996 and 2006 ESPP plans. As of March 31, 2015, a total of 8.3 million shares were available for issuance under these plans. The Company was not current with its periodic reports required to be filed with the SEC and was therefore unable to issue any shares under its Registration Statements on Form S-8 from July 31, 2014 to November 26, 2014. Given the proximity of the unavailability of those registration statements and the end of the then-current ESPP offering period, on July 31, 2014, the Compensation Committee authorized the termination of the then-current ESPP offering period and a one-time payment to each participant in an amount equal to the fifteen percent (15%) discount at which shares would otherwise have been repurchased pursuant to the then-current period of the ESPPs. This one-time payment aggregating to \$1.1 million was accounted for as a repurchase of equity awards that reduced additional paid-in capital, resulting in no additional compensation cost. A new ESPP offering period of seven months was initiated on January 1, 2015, which ends on July 31, 2015.

The 2006 Plan provides for the grant to eligible employees and non-employee directors of stock options, stock appreciation rights, restricted stock and RSUs. Awards under the 2006 Plan may be conditioned on continued employment, the passage of time or the satisfaction of performance and market vesting criteria. The 2006 Plan had an expiration date of June 16, 2016 until September 5, 2012 when shareholder approved the amendment of the 2006 Plan to eliminate the expiration date. All stock options under this plan have terms not exceeding ten years and are issued at exercise prices not less than the fair market value on the date of grant.

Time-based RSUs granted to employees under the 2006 Plan generally vest in four equal annual installments on the grant date anniversary. Time-based RSUs granted to non-executive board members under the 2006 Plan

Table of Contents

vest in one annual installment on the grant date anniversary. Performance-based RSUs granted under the 2006 plan vest contingent upon the achievement of pre-determined financial metrics. The performance period for performance-based RSUs granted in fiscal year 2015 is three years. Market-based options granted under the 2006 Plan vest upon meeting certain share price performance criteria. Market-based RSUs granted under the 2006 Plan vest at the end of the performance period upon meeting certain share price performance criteria measured against market conditions. The performance period is four years for market-based options granted in fiscal year 2013. The performance period is three years for market-based RSU granted in fiscal years 2015, 2014 and 2013. An aggregate of 24.8 million shares was reserved for issuance under the 2006 Plan. As of March 31, 2015, a total of 9.1 million shares were available for issuance under this plan.

Under the 2012 Plan, stock options and RSUs may be granted to eligible employees to serve as inducement material to enter into employment with the Company. Awards under the 2012 Plan may be conditioned on continued employment, the passage of time or the satisfaction of market stock performance criteria, based on individual written employment offer letter. The 2012 Plan has an expiration date of March 28, 2022. Premium-priced stock options granted under the 2012 Plan vest in full if and only when Logitech's average closing share price, over a consecutive ninety-day trading period, meets or exceeds the exercise price of each of the three tranches of the grant. An aggregate of 1.8 million shares was reserved for issuance under the 2012 Plan. As of March 31, 2015, no shares were available for issuance under this plan.

The grant date fair value of the awards using the Black-Scholes-Metron option-pricing valuation model and Monte-Carlo simulation method are determined applying the following assumptions and values:

	Employee Purchase Plans			Stock Option Plans			Premium Priced Options			Market-based Stock Option Plan		
	Fiscal Years Ended March 31,			Fiscal Years Ended March 31,			Fiscal Years Ended March 31,			Fiscal Years Ended March 31,		
	2015	2014	2013	2015	2014	2013	2015	2014	2013	2015	2014	2013
Dividend yield	1.97 %	0.43 %	— %	n/a	n/a	— %	n/a	n/a	— %	n/a	n/a	— %
Risk-free interest rate	0.14 %	0.07 %	0.09 %	n/a	n/a	1.20 %	n/a	n/a	2.00 %	n/a	n/a	1.93 %
Expected volatility	30 %	36 %	47 %	n/a	n/a	46 %	n/a	n/a	46 %	n/a	n/a	44 %
Expected life (years)	0.6	0.5	0.5	n/a	n/a	6.0	n/a	n/a	7.0	n/a	n/a	6.0
Weighted average fair value	\$3.18	\$2.46	\$2.14	n/a	n/a	\$3.64	n/a	n/a	\$2.52	n/a	n/a	\$2.58
Market-based RSUs							Years Ended March 31,					
							2015	2014		2013		
Dividend yield							1.86	% 0.75	%	—	%	%
Risk-free interest rate							0.83	% 1.09	%	0.31	%	%
Expected volatility							46	% 46	%	47	%	%
Expected life (years)							3.0	2.9		3.0		

The dividend yield assumption is based on the Company's future expectations of dividend payouts. The unvested RSUs or unexercised options are not eligible for these dividends. The expected life is based on historical settlement rates, which the Company believes are most representative of future exercise and post-vesting termination behaviors, or the purchase offerings periods expected to remain outstanding, or the derived period based on the expected stock performance for market-based awards. Expected volatility is based on historical volatility using the Company's daily closing prices, or including the volatility of components of the NASDAQ 100 index for market-based RSUs, over the expected life. The Company considers the historical price volatility of its shares as most representative of future volatility. The risk-free interest rate assumptions are based upon the implied yield of U.S. Treasury zero-coupon issues appropriate for the expected life of the Company's share-based awards.

The Company estimates awards forfeitures at the time of grant and revises those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company uses historical data to estimate pre-vesting option and RSU forfeitures and records share-based compensation expense only for those awards that are expected to vest.

Table of Contents

A summary of the Company's stock option activities under all stock plans for fiscal years 2015, 2014 and 2013 is as follows:

	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (In thousands)
Outstanding, March 31, 2012	(In thousands) 13,034			
Granted	3,718			
Exercised	(389)			\$1,121
Cancelled or expired	(2,679)			
Outstanding, March 31, 2013	13,684			
Granted	—			
Exercised	(551)			\$2,045
Cancelled or expired	(3,317)			
Outstanding, March 31, 2014	9,816	\$ 16		
Granted	—	\$ —		
Exercised	(390)	\$ 11		\$1,505
Cancelled or expired	(1,550)	\$ 16		
Outstanding, March 31, 2015	7,876	\$ 18	4.2	\$10,177
Vested and expected to vest, March 31, 2015	6,546	\$ 18	3.6	\$7,308
Vested and exercisable, March 31, 2015	6,296	\$ 19	3.5	\$6,028

The options outstanding as of March 31, 2015 above includes 1.3 million shares of unvested market-based awards.

The number of shares expected to vest for market-based awards is calculated assuming March 31, 2015 was the end of the performance contingency period.

As of March 31, 2015, the exercise price of outstanding options ranged from \$1 to \$39 per option.

The tax benefit realized for the tax deduction from options exercised during the fiscal years 2015, 2014 and 2013 was \$0.5 million, \$0.5 million and \$0.3 million, respectively.

Table of Contents

A summary of the Company's time-based, market-based, and performance-based RSU activities for fiscal years 2015, 2014 and 2013 is as follows (in thousands, except per share values; grant-date fair values are weighted averages):

	Number of Shares (In thousands)	Weighted-Average Grant Date Fair Value	Weighted-Average Remaining Vesting Period (Years)	Aggregate Intrinsic Value (In thousands)
Outstanding, March 31, 2012	4,125			
Granted—time-based	2,219	\$ 7		
Granted—market-based	101	\$ 6		
Vested	(1,097)			\$8,329
Cancelled or expired	(706)			
Outstanding, March 31, 2013	4,642			
Granted—time-based	3,104	\$ 11		
Granted—market-based	1,060	\$ 8		
Vested	(1,560)			\$17,810
Cancelled or expired	(1,158)			
Outstanding, March 31, 2014	6,088	\$ 10		
Granted—time-based	1,332	\$ 13		
Granted—market-based	523	\$ 13		
Granted - performance-based	55	\$ 12		
Vested	(1,949)	\$ 10		\$27,844
Cancelled or expired	(1,110)	\$ 11		
Outstanding, March 31, 2015	4,939	\$ 11	1.5	\$64,944
Expected to vest, March 31, 2015	3,466	\$ 10	1.3	\$45,580

The RSU outstanding as of March 31, 2015 above includes 1.2 million shares of market-based and performance-based shares. The number of shares expected to vest for these awards is calculated assuming March 31, 2015 is the end of the performance contingency period. The number of shares of common stock for market-based awards to be received at vesting will range from zero percent to 150 percent of the target number of stock units based on our total stockholder return (“TSR”) relative to the performance of companies in the NASDAQ-100 Index for each measurement period, generally over a three year period. We present shares granted at 100 percent of target of the number of stock units that may potentially vest.

The tax benefit realized for the tax deduction from RSUs that vested during the fiscal years 2015, 2014 and 2013 was \$6.9 million, \$4.7 million and \$1.9 million, respectively.

Defined Contribution Plans

Certain of the Company's subsidiaries have defined contribution employee benefit plans covering all or a portion of their employees. Contributions to these plans are discretionary for certain plans and are based on specified or statutory requirements for others. The charges to expense for these plans for fiscal years 2015, 2014 and 2013, were \$5.8 million, \$6.6 million and \$6.9 million, respectively.

Defined Benefit Plans

Certain of the Company's subsidiaries sponsor defined benefit pension plans or non-retirement post-employment benefits covering substantially all of their employees. Benefits are provided based on employees' years of service and earnings, or in accordance with applicable employee benefit regulations. The Company's practice is to fund amounts sufficient to meet the requirements set forth in the applicable employee benefit and tax regulations.

The Company recognizes the overfunded or underfunded status of defined benefit pension plans and non-retirement post-employment benefit obligations as an asset or liability in its consolidated balance sheets, and recognizes changes in the funded status of defined benefit pension plans in the year in which the changes occur

Table of Contents

through accumulated other comprehensive income (loss), which is a component of shareholders' equity. Each plan's assets and benefit obligations are remeasured as of March 31 each year.

The net periodic benefit cost of the defined benefit pension plans and the non-retirement post-employment benefit obligations for fiscal years 2015, 2014 and 2013 was as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Service costs	\$7,646	\$8,591	\$7,842
Interest costs	1,970	1,794	1,852
Expected return on plan assets	(2,084)	(1,727)	(1,710)
Amortization:			
Net transition obligation	4	4	5
Net prior service costs (credit) recognized	(45)	210	712
Net actuarial loss recognized	301	592	846
Settlement and curtailment	(13)	769	2,658
	\$7,779	\$10,233	\$12,205

The changes in projected benefit obligations for fiscal years 2015 and 2014 were as follows (in thousands):

	Years Ended March 31,	
	2015	2014
Projected benefit obligations, beginning of the year	\$102,383	\$90,234
Service costs	7,646	8,591
Interest costs	1,970	1,794
Plan participant contributions	2,914	2,726
Actuarial (gains) losses	16,768	(2,942)
Benefits paid	(5,307)	(1,841)
Plan amendment related to statutory change	(3,936)	—
Settlement and curtailment	(157)	(1,261)
Administrative expense paid	(160)	(174)
Currency exchange rate changes	(8,798)	5,256
Projected benefit obligations, end of the year	\$113,323	\$102,383

The accumulated benefit obligation for all defined benefit pension plans as of March 31, 2015 and 2014 was \$92.0 million and \$83.2 million, respectively.

The following table presents the changes in the fair value of defined benefit pension plan assets for fiscal years 2015 and 2014 (in thousands):

	Years Ended March 31,	
	2015	2014
Fair value of plan assets, beginning of the year	\$63,384	\$48,689
Actual return on plan assets	136	5,334
Employer contributions	5,731	5,390
Plan participant contributions	2,914	2,726
Benefits paid	(5,307)	(1,841)
Settlement and curtailment	(157)	(500)
Administrative expenses paid	(160)	(174)
Currency exchange rate changes	(5,631)	3,760
Fair value of plan assets, end of the year	\$60,910	\$63,384

Table of Contents

The Company's investment objectives are to ensure that the assets of its defined benefit plans are invested to provide an optimal rate of investment return on the total investment portfolio, consistent with the assumption of a reasonable risk level, and to ensure that pension funds are available to meet the plans' benefit obligations as they become due. The Company believes that a well-diversified investment portfolio will result in the highest attainable investment return with an acceptable level of overall risk. Investment strategies and allocation decisions are also governed by applicable governmental regulatory agencies. The Company's investment strategy with respect to its largest defined benefit plan, which is available only to Swiss employees, is to invest in the following allocation ranges starting from January 2014: 20-55% for equities, 25-60% for bonds, and 0-10% for cash and cash equivalents. The Company also can invest in real estate funds, commodity funds, and hedge funds depend upon economic conditions. Prior to January 2014, the Company followed the following allocation ranges: 28-43% for equities, 33-63% for Swiss bonds, 5-15% for foreign bonds, 5-15% for hedge and investment funds, and 0-20% for cash and cash equivalents. The Company's other defined benefit plans, which comprise 7.2% of total defined benefit plan assets as of March 31, 2015, have similar investment and allocation strategies.

The following tables present the fair value of the defined benefit pension plan assets by major categories and by levels within the fair value hierarchy as of March 31, 2015 and 2014 (in thousands):

	March 31, 2015				2014			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Cash	\$7,958	\$46	\$—	\$8,004	\$10,339	\$—	\$—	\$10,339
Equity securities	20,476	—	—	20,476	17,324	—	—	17,324
Debt securities	20,357	—	—	20,357	20,300	—	—	20,300
Swiss real estate funds	8,586	—	—	8,586	8,970	—	—	8,970
Hedge funds	—	3,251	—	3,251	—	3,611	—	3,611
Insurance contracts	—	114	—	114	—	—	2,598	2,598
Other	28	94	—	122	43	199	—	242
	\$57,405	\$3,505	\$—	\$60,910	\$56,976	\$3,810	\$2,598	\$63,384

The funded status of the plans was as follows (in thousands):

	Years Ended March 31,	
	2015	2014
Fair value of plan assets	\$60,910	\$63,384
Less: Projected benefit obligations	113,323	102,383
Under funded status	\$(52,413)	\$(38,999)

Amounts recognized on the balance sheet for the plans were as follows (in thousands):

	March 31,	
	2015	2014
Current liabilities	\$(1,232)	\$(1,100)
Non-current liabilities	(51,181)	(37,899)
Net liabilities	\$(52,413)	\$(38,999)

Table of Contents

Amounts recognized in accumulated other comprehensive loss related to defined benefit pension plans were as follows (in thousands):

	March 31,		
	2015	2014	2013
Net prior service costs (credits)	\$1,672	\$(2,149)	\$(2,307)
Net actuarial loss	(28,751)	(12,319)	(19,850)
Net transition obligation	(8)	(12)	(14)
Accumulated other comprehensive loss	(27,087)	(14,480)	(22,171)
Deferred tax benefit	123	192	315
Accumulated other comprehensive loss, net of tax	\$(26,964)	\$(14,288)	\$(21,856)

The following table presents the amounts included in accumulated other comprehensive loss as of March 31, 2015, which are expected to be recognized as a component of net periodic benefit cost in fiscal year 2016 (in thousands):

	Year Ending March 31, 2016
Amortization of net transition obligation	\$4
Amortization of net prior service credits	(121)
Amortization of net actuarial loss	1,750
	\$1,633

The Company reassesses its benefit plan assumptions on a regular basis. The actuarial assumptions for the defined benefit plans for fiscal years 2015 and 2014 were as follows:

	Years Ended March 31,	
	2015	2014
Benefit Obligations:		
Discount rate	0.75%-7.75%	1.50%-9.25%
Estimated rate of compensation increase	2.50%-8.00%	3.00%-8.00%
Periodic Costs:		
Discount rate	1.50%-9.25%	1.50%-8.00%
Estimated rate of compensation increase	2.50%-8.00%	3.00%-4.00%
Expected average rate of return on plan assets	0.75%-3.50%	0.75%-3.50%

The discount rate is estimated based on corporate bond yields or securities of similar quality in the respective country, with a duration approximating the period over which the benefit obligations are expected to be paid. The Company bases the compensation increase assumptions on historical experience and future expectations. The expected average rate of return for the Company's defined benefit pension plans represents the average rate of return expected to be earned on plan assets over the period that the benefit obligations are expected to be paid, based on government bond notes in the respective country, adjusted for corporate risk premiums as appropriate.

Table of Contents

The following table reflects the benefit payments that the Company expects the plans to pay in the periods noted (in thousands):

Years Ending March 31,	
2016	\$4,583
2017	4,790
2018	4,987
2019	5,329
2020	6,014
2021-2025	29,245
	\$54,948

The Company expects to contribute \$4.7 million to its defined benefit pension plans during fiscal year 2016.

Deferred Compensation Plan

One of the Company's subsidiaries offers a deferred compensation plan that permits eligible employees to make 100% vested salary and incentive compensation deferrals within established limits. The Company does not make contributions to the plan.

The fair value of the deferred compensation plan's assets is included in other assets on the consolidated balance sheets. The marketable securities are classified as trading investments and were recorded at a fair value of \$17.2 million and \$16.6 million as of March 31, 2015 and 2014, respectively, based on quoted market prices. The Company also had \$17.2 million and \$16.6 million deferred compensation liability as of March 31, 2015 and 2014, respectively.

Earnings, gains and losses on trading investments are included in other income (expense), net and corresponding changes in deferred compensation liability are included in operating expenses and cost of goods sold.

Note 5—Interest and Other Income (Expense), net

Interest income (expense), net comprises of the following (in thousands):

	Years Ended March 31,		
	2015	2014	2013

Other income (expense), net	\$(2,752)	\$1,993	\$(2,198)

Table of Contents

Note 6—Income Taxes

The Company is incorporated in Switzerland but operates in various countries with differing tax laws and rates. Further, a portion of the Company's income (loss) before taxes and the provision for (benefit from) income taxes is generated outside of Switzerland.

Income (loss) before income taxes for the fiscal years 2015, 2014 and 2013 is summarized as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Swiss	\$112,308	\$49,503	\$(53,004)
Non-Swiss	(98,535)	28,079	(200,324)
Income (loss) before taxes	\$13,773	\$77,582	\$(253,328)

The provision for (benefit from) income taxes is summarized as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Current:			
Swiss	\$1,228	\$127	\$672
Non-Swiss	1,188	8,580	(23,146)
Deferred:			
Non-Swiss	2,074	(5,429)	(3,336)
Provision for (benefit from) income taxes	\$4,490	\$3,278	\$(25,810)

The difference between the provision for (benefit from) income taxes and the expected tax provision (benefit) at the statutory income tax rate of 8.5% is reconciled below (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Expected tax provision (benefit) at statutory income tax rates	\$1,171	\$6,594	\$(21,533)
Income taxes at different rates	(2,035)	497	5,714
Research and development tax credits	(1,287)	(1,393)	(3,302)
Foreign tax credits	—	—	(1,535)
Executive compensation	1,557	—	—
Stock-based compensation	2,261	1,608	1,643
Valuation allowance	764	182	3,809
Impairment of goodwill and other assets	10,432	—	18,419
Restructuring charges / (credits)	(415)	1,174	4,336
Tax reserves (releases), net	(7,111)	(4,660)	1,935
Audit settlement	(837)	(400)	(35,608)
Other, net	(10)	(324)	312
Provision for (benefit from) income taxes	\$4,490	\$3,278	\$(25,810)

On December 19, 2014, the enactment of the Tax Increase Prevention Act of 2014 in the United States extended the federal research and development tax credit through December 31, 2014 which had previously expired on December 31, 2013. The provision for income taxes for fiscal year ended March 31, 2015 reflected a \$0.9 million tax benefit as a result of the extension of the tax credit.

Table of Contents

Deferred income tax assets and liabilities consist of the following (in thousands):

	March 31, 2015	2014
Deferred tax assets:		
Net operating loss carryforwards	\$8,372	\$9,421
Tax credit carryforwards	2,739	13,241
Accruals	44,363	48,153
Depreciation and amortization	4,396	4,781
Share-based compensation	14,183	15,304
Gross deferred tax assets	74,053	90,900
Valuation allowance	(5,590)	(4,872)
Gross deferred tax assets after valuation allowance	68,463	86,028
Deferred tax liabilities:		
Acquired intangible assets and other	(3,299)	(8,436)
Gross deferred tax liabilities	(3,299)	(8,436)
Deferred tax assets, net	\$65,164	\$77,592

Management regularly assesses the ability to realize deferred tax assets recorded in the Company's entities based upon the weight of available evidence, including such factors as recent earnings history and expected future taxable income. In the event that the Company changes its determination as to the amount of deferred tax assets that can be realized, the Company will adjust its valuation allowance with a corresponding impact to the provision for income taxes in the period in which such determination is made.

The Company had a valuation allowance of \$5.6 million at March 31, 2015, increased from \$4.9 million at March 31, 2014 primarily due to \$1.0 million increase in valuation allowance for deferred tax assets in the state of California of the United States. The Company had a valuation allowance of \$3.6 million as of March 31, 2015 against such deferred tax assets. The remaining valuation allowance primarily represents \$1.5 million for capital loss carryforwards in the United States and \$0.5 million for various tax credit carryforwards. The Company determined that it is more likely than not that the Company would not generate sufficient taxable income in the future to utilize such deferred tax assets.

Deferred tax assets relating to tax benefits of employee stock grants have been reduced to reflect settlement activity in fiscal years 2015 and 2014. Settlement activity of grants in fiscal years 2015 and 2014 resulted in a "shortfall" in which tax deductions were less than previously recorded share-based compensation expense. The Company recorded a shortfall to equity of \$1.8 million and \$2.8 million, respectively, in fiscal years 2015 and 2014.

As of March 31, 2015, the Company had foreign net operating loss and tax credit carryforwards for income tax purposes of \$197.8 million and \$40.1 million, respectively, of which \$143.3 million of the net operating loss carryforwards and \$26.4 million of the tax credit carryforwards, if realized, will be credited to equity since they have not met the applicable realization criteria. Unused net operating loss carryforwards will expire at various dates in fiscal years 2016 to 2035. Certain net operating loss carryforwards in the United States relate to acquisitions and, as a result, are limited in the amount that can be utilized in any one year. The tax credit carryforwards will begin to expire in fiscal year 2019.

As of March 31, 2015, the Company had capital loss carryforwards of \$4.0 million. The loss will begin to expire in fiscal year 2016.

Swiss income taxes and non-Swiss withholding taxes associated with the repatriation of earnings or for other temporary differences related to investments in non-Swiss subsidiaries have not been provided for, as the Company intends to reinvest the earnings of such subsidiaries indefinitely or the Company has concluded that no additional tax liability would arise on the distribution of such earnings. If these earnings were distributed to Switzerland in the form of dividends or otherwise, or if the shares of the relevant non-Swiss subsidiaries were sold or otherwise transferred, the Company may be subject to additional Swiss income taxes and non-Swiss withholding taxes. As of March 31, 2015, the cumulative amount of unremitted earnings of non-Swiss subsidiaries for which no income taxes

Table of Contents

have been provided is approximately \$149.6 million. The amount of unrecognized deferred income tax liability related to these earnings is estimated to be approximately \$5.0 million.

The Company follows a two-step approach in recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

As of March 31, 2015 and March 31, 2014, the total amount of unrecognized tax benefits due to uncertain tax positions was \$79.0 million and \$91.0 million, respectively, of which \$79.0 million and \$86.1 million would affect the effective income tax rate if recognized, respectively.

As of March 31, 2015, the Company had \$72.1 million in non-current income taxes payable and \$0.1 million in current income taxes payable, including interest and penalties, related to our income tax liability for uncertain tax positions. As of March 31, 2014, the Company had \$93.1 million in non-current income taxes payable and \$0.3 million in current income taxes payable. Pursuant to ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, which became effective in the first quarter of fiscal year 2015, the Company reclassified \$10.3 million of unrecognized tax benefits previously presented as non-current income taxes payable to a reduction in non-current deferred tax assets primarily for tax credit carryforwards.

The aggregate changes in gross unrecognized tax benefits in fiscal years 2015, 2014 and 2013 were as follows (in thousands):

March 31, 2012	\$136,888	
Lapse of statute of limitations	(6,490))
Settlements with tax authorities	(42,770))
Decreases in balances related to tax positions taken during prior years	(1,500))
Increases in balances related to tax positions taken during the year	9,570	
March 31, 2013	\$95,698	
Lapse of statute of limitations	(12,514))
Settlements with tax authorities	(100))
Decreases in balances related to tax positions taken during prior years	(778))
Increases in balances related to tax positions taken during the year	8,740	
March 31, 2014	\$91,046	
Lapse of statute of limitations	(14,071))
Settlements with tax authorities	(2,160))
Decreases in balances related to tax positions taken during prior years	(3,544))
Increases in balances related to tax positions taken during the year	7,752	
March 31, 2015	\$79,023	

The Company recognizes interest and penalties related to unrecognized tax positions in income tax expense. The Company recognized \$0.8 million, \$1.1 million and \$1.0 million in interest and penalties in income tax expense during fiscal years 2015, 2014 and 2013, respectively. As of March 31, 2015, 2014 and 2013, the Company had \$4.9 million, \$5.6 million and \$6.6 million of accrued interest and penalties related to uncertain tax positions, respectively. The Company files Swiss and foreign tax returns. The Company received final tax assessments in Switzerland through fiscal year 2012. For other foreign jurisdictions such as the United States, the Company is generally not subject to tax examinations for years prior to fiscal year 2011. The Company is under examination and has received assessment notices in foreign tax jurisdictions. If the examinations are resolved unfavorably, there is a possibility they may have a material negative impact on its results of operations.

Table of Contents

Although the Company has adequately provided for uncertain tax positions, the provisions on these positions may change as revised estimates are made or the underlying matters are settled or otherwise resolved. During fiscal year 2016, the Company will continue to review its tax positions and provide for or reverse unrecognized tax benefits as issues arise. During the next 12 months, it is reasonably possible that the amount of unrecognized tax benefits could increase or decrease significantly due to changes in tax law in various jurisdictions, new tax audits and changes in the U.S. Dollar as compared to other currencies. Excluding these factors, uncertain tax positions may decrease by as much as \$17.0 million primarily from the lapse of the statutes of limitations in various jurisdictions during the next 12 months.

Note 8—Fair Value Measurements

The Company considers fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. The Company utilizes the following three-level fair value hierarchy to establish the priorities of the inputs used to measure fair value:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Observable inputs other than quoted market prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The following table presents the Company's financial assets and liabilities, that were accounted for at fair value on a recurring basis, excluding assets related to the Company's defined benefit pension plans, classified by the level within the fair value hierarchy (in thousands):

	March 31, 2015		March 31, 2014	
	Level 1	Level 2	Level 1	Level 2
Cash equivalents:				
Cash equivalents	\$264,647	\$—	\$200,641	\$—
	\$264,647	\$—	\$200,641	\$—
Trading investments for deferred compensation plan:				
Money market funds	\$2,936	\$—	\$3,139	\$—
Mutual funds	14,301	—	13,472	—
	\$17,237	\$—	\$16,611	\$—
Foreign exchange derivative assets	\$—	\$2,080	\$—	\$155
Foreign exchange derivative liabilities	\$—	\$75	\$—	\$701

There were no material level 3 financial assets held by the Company during fiscal years 2015 or 2014.

Investment Securities

The marketable securities for the Company's deferred compensation plan are recorded at a fair value of \$17.2 million and \$16.6 million as of March 31, 2015 and 2014, respectively, based on quoted market prices. Quoted market prices are observable inputs that are classified as Level 1 within the fair value hierarchy. Unrealized trading gains related to trading securities for the fiscal years 2015, 2014 and 2013 were not significant and are included in other income (expense), net.

Derivative Financial Instruments

Under certain agreements with the respective counterparties to the Company's derivative contracts, subject to applicable requirements, the Company is allowed to net settle transactions of the same type with a single net amount payable by one party to the other. However, the Company presents its derivative assets and derivative liabilities on a gross basis on the Consolidated Balance Sheets as of March 31, 2015 and 2014.

Table of Contents

The following table presents the fair values of the Company's derivative instruments as of March 31, 2015 and 2014 (in thousands):

	Derivatives		Liability	
	Asset March 31, 2015	2014	March 31, 2015	2014
Designated as hedging instruments:				
Cash flow hedges	\$2,080	\$4	\$—	\$243
Not designated as hedging instruments:				
Foreign exchange contracts	—	151	75	458
	\$2,080	\$155	\$75	\$701

The following table presents the amounts of gains and losses on the Company's derivative instruments for fiscal years 2015, 2014 and 2013 and their locations on its consolidated statements of operations and consolidated statements of comprehensive income (in thousands):

	Amount of Gain (Loss) Deferred as a Component of Accumulated Other Comprehensive Loss After Reclassification to Costs of Goods Sold			Amount of Loss (Gain) Reclassified from Accumulated Other Comprehensive Loss to Costs of Goods Sold			Amount of Gain (Loss) Immediately Recognized in Other Income (Expense), Net		
	2015	2014	2013	2015	2014	2013	2015	2014	2013
Designated as hedging instruments:									
Cash flow hedges	\$4,466	\$(1,025)	\$566	\$(4,505)	\$2,472	\$1,756	\$20	\$(126)	\$275
Not designated as hedging instruments:									
Foreign exchange contracts	—	—	—	—	—	—	2,479	824	328
	\$4,466	\$(1,025)	\$566	\$(4,505)	\$2,472	\$1,756	\$2,499	\$698	\$603

Cash Flow Hedges: The Company enters into foreign exchange forward contracts to hedge against exposure to changes in currency exchange rates related to its subsidiaries' forecasted inventory purchases. The Company has one entity with a Euro functional currency that purchases inventory in U.S. Dollars. The primary risk managed by using derivative instruments is the currency exchange rate risk. The Company has designated these derivatives as cash flow hedges. These hedging contracts mature within four months, and are denominated in the same currency as the underlying transactions. Gains and losses in the fair value of the effective portion of the hedges are deferred as a component of accumulated other comprehensive loss until the hedged inventory purchases are sold, at which time the gains or losses are reclassified to cost of goods sold. The Company assesses the effectiveness of the hedges by comparing changes in the spot rate of the currency underlying the forward contract with changes in the spot rate of the currency in which the forecasted transaction will be consummated. If the underlying transaction being hedged fails to occur or if a portion of the hedge does not generate offsetting changes in the currency exposure of forecasted inventory purchases, the Company immediately recognizes the gain or loss on the associated financial instrument in other income (expense), net. Such gains and losses were not material during fiscal years 2015, 2014 and 2013. Cash flows from such hedges are classified as operating activities in the Consolidated Statements of Cash Flows. As of March 31, 2015, and 2014, the notional amounts of foreign exchange forward contracts outstanding related to forecasted inventory purchases were \$43.5 million and \$51.8 million, respectively. The Company estimates that \$4.0 million of net gains related to its cash flow hedges included in accumulated other comprehensive loss as of March 31, 2015 will be reclassified into earnings within the next 12 months.

Table of Contents

Other Derivatives: The Company also enters into foreign exchange forward and swap contracts to reduce the short-term effects of currency fluctuations on certain foreign currency receivables or payables. These forward and swap contracts generally mature within one month. The primary risk managed by using forward and swap contracts is the currency exchange rate risk. The gains or losses on foreign exchange forward contracts are recognized in other income (expense), net based on the changes in fair value.

The notional amounts of foreign exchange forward and swap contracts outstanding as of March 31, 2015 and 2014 relating to foreign currency receivables or payables were \$61.7 million and \$53.7 million, respectively. Open forward and swap contracts as of March 31, 2015 and 2014 consisted of contracts in Taiwanese Dollars, Australian Dollars, Mexican Pesos, Japanese Yen and British Pounds to be settled at future dates at pre-determined exchange rates. The fair value of all foreign exchange forward and swap contracts is determined based on observable market transactions of spot currency rates and forward rates. Cash flows from these contracts are classified as operating activities in the Consolidated Statements of Cash Flows.

Non-Financial Assets Measured at Fair Value on a Nonrecurring Basis

The majority of the Company's non-financial assets and liabilities, which include goodwill, intangible assets, inventories, and property, plant and equipment, are not required to be measured at fair value on a recurring basis. However, if certain triggering events occur (or tested at least annually for goodwill) such that a non-financial instrument is required to be evaluated for impairment and an impairment is recorded to reduce the non-financial instrument's carrying value to the fair value as a result of such triggering events, the non-financial assets and liabilities are measured at fair value for the period such triggering events occur. See Note 2 herein, for additional information about how we test various asset classes for impairment. During fiscal year 2015, the Company recognized \$122.7 million of impairment related to goodwill of its Video Conferencing reporting unit and the carrying value of which was written down to zero based on Level 3 inputs.

Note 9—Goodwill and Other Intangible Assets

Annual Goodwill Impairment Testing

The Company conducts a goodwill impairment analysis annually at December 31 or more frequently if indicators of impairment exist or if a decision is made to sell or exit a business. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include deterioration in general economic conditions, negative developments in equity and credit markets, adverse changes in the markets in which an entity operates, increases in input costs that have a negative effect on earnings and cash flows, a trend of negative or declining cash flows, a decline in actual or planned revenue or earnings compared with actual and projected results of relevant prior periods, or other relevant entity-specific events such as changes in management, key personnel, strategy, or customers, contemplation of bankruptcy, or litigation. The fair value that could be realized in an actual transaction may differ from that used to evaluate the impairment of goodwill.

In reviewing goodwill for impairment, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (greater than 50%) that the estimated fair value of a reporting unit is less than its carrying amount. If an entity elects to perform a qualitative assessment and determines that an impairment is more likely than not, the entity is then required to perform the two-step quantitative impairment test; otherwise, no further analysis is required. An entity also may elect not to perform the qualitative assessment and, instead, proceed directly to the two-step quantitative impairment test. The ultimate outcome of the goodwill impairment review for a reporting unit should be the same whether an entity chooses to perform the qualitative assessment or proceeds directly to the two-step quantitative impairment test. Goodwill is allocated among and evaluated for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment. The Company has two reporting units, peripherals and video conferencing.

Peripherals

The Company performed its annual impairment analysis of the goodwill for its peripherals reporting unit at December 31, 2014 by performing a qualitative assessment and concluded that it was more likely than not that the fair value of its peripherals reporting unit exceeded its carrying amount. In assessing the qualitative factors, the Company considered the impact of these key factors: change in industry and competitive environment, growth in market capitalization of \$2.3 billion as of December 31, 2014 from \$2.2 billion a year ago, and budgeted-to-actual

Table of Contents

revenue performance from the prior year. The peripherals reporting unit has seen an improvement in operating income from \$64.8 million and \$117.8 million for the three and nine months ended December 31, 2013 to \$76.1 million and \$160.3 million for the three and nine months ended December 31, 2014, respectively. No recent events or changes in circumstances indicate that impairment existed as of March 31, 2015.

Video Conferencing

The Company proceeded directly to the two-step quantitative impairment test for the video conferencing reporting unit and performed a Step 1 assessment at December 31, 2014. The Company uses a third party valuation expert in the development of its market and income approach models. The annual Step 1 assessment performed as of December 31, 2014 resulted in the Company determining that the video conferencing reporting unit passed the Step 1 test because the estimated fair value of the video conferencing reporting unit from the Step 1 assessment exceeded its carrying value by approximately 38.0%, thus not requiring a Step 2 assessment of this reporting unit. Therefore, the Company concluded it was more likely than not that the goodwill of the video conferencing reporting unit was not impaired as of December 31, 2014.

During the fourth quarter of the fiscal year ended March 31, 2015, the net sales of the video conferencing reporting unit decreased to \$24.9 million from \$31.0 million in the fourth quarter of the fiscal year ended March 31, 2014 and from \$29.9 million in the third quarter of fiscal year ended March 31, 2015. The sales decline was concentrated in the video conferencing infrastructure legacy business primarily due to faster shift of customer preference towards Cloud infrastructure conferencing versus on-premise infrastructure solutions and resource realignment, which was not anticipated during annual impairment assessment as of December 31, 2014. This quick shift towards Cloud-based offering resulted in the change in business strategy to de-emphasize Lifesize's legacy offerings more quickly than planned to enable maximum traction of the Lifesize Cloud, which would result in shrinking the legacy Lifesize business but could grow the Cloud opportunity faster. In the last nine months, the sales of Cloud-based offerings have grown rapidly; however, they are not yet large enough to offset the combination of the short-term portfolio transition. As a result of the lower-than-expected performance in the legacy infrastructure sales, the Company made a strategic decision to sharpen its focus on its new Cloud-based offering. The Company plans to realign its costs and operations to this new strategy as part of a restructuring plan announced during April 2015 and will explore various other options for its Lifesize business. The significant change in business strategy has adversely affected the near-term projections and the Company expects that it will shrink the Lifesize revenue for the next several years, including lowering the overall growth, pushing out the break-even point and increasing the operating loss as well as increasing uncertainty in the near term. In light of the aforementioned, the Company concluded it was appropriate to perform the Step 1 goodwill impairment assessment.

As of March 31, 2015, taking into consideration the video conferencing reporting unit's updated business outlook for fiscal year 2016 and onwards based on the factors discussed above, and the risk of execution of its refocused strategy, the Company updated the future cash flow assumptions for the video conferencing reporting unit and calculated updated estimates of fair value using the income approach. In particular, the Company lowered its December 31, 2014 goodwill impairment test projections of future revenue and operating income (loss) growth and adjusted other factors (such as working capital and capital expenditure). After updating the assumptions and projections, the Company then calculated a present value of the cash flow to arrive at an estimate of fair value under the income approach as of March 31, 2015. Key assumptions included in the income approach were significant reduction in the revenue assumption for fiscal year 2016 through fiscal year 2021 compared with the revenue assumption used in the Company's annual goodwill impairment assessment as of December 31, 2014, CAGR at 7.2%, discount rate at 14%, and terminal growth rate at 4.0%. Consistent with the annual impairment test on December 31, 2014, the Company also updated the estimates of fair value determined under the market approach. Based on the income approach and market approach, the estimated fair value of the video conferencing reporting unit under the Step 1 assessment was lower than the carrying amount of the net asset including goodwill.

The video conferencing reporting unit failed the Step 1 test as prescribed under ASC 350, thus requiring a Step 2 assessment of this reporting unit to determine the goodwill impairment. In determining the impairment amount, the fair value of the video conferencing reporting unit was allocated to its assets and liabilities, including any unrecognized intangible assets not on the balance sheet, based on their respective fair values. Assumptions used in

measuring the value of these assets and liabilities included the discount rates, working capital, and technology obsolescence rates used in valuing the intangible assets, and pricing of comparable transactions in the market in valuing the tangible assets. Based on this allocation, the implied value of intangible assets and tangible net assets fully absorbed the fair value of the business, leaving no implied fair value left to be allocated to the goodwill. The video conferencing reporting unit's carrying value of goodwill exceeded the implied fair value of

Table of Contents

goodwill, resulting in a goodwill impairment charge of \$122.7 million, which is recorded in the Consolidated Statement of Operations.

The current assessment represents the fair value of the video conferencing business as of March 31, 2015. If the Company disposes all or any equity interest of the video conferencing reporting unit in the future, it may result in a gain. The gain will be recognized as a difference between the carrying amount of the video conferencing reporting unit and the proceeds, if any, received from such a disposal.

During fiscal year 2013, the Company's video conferencing reporting unit failed the Step 1 test because the estimated fair value was less than its carrying value, thus requiring Step 2 assessment of this reporting unit. This impairment primarily resulted from a decrease in the expected CAGR during the assessment forecast period based on greater evidence of the overall enterprise video conferencing industry experiencing a slowdown, combined with lower demand related to new product launches, increased competition during fiscal year 2013, and other market data. These factors had an adverse effect on the Company's video conferencing operating results and future outlook. During fiscal year 2013, the Company recorded goodwill impairment and other charges of \$214.5 million related to its video conferencing reporting unit.

Determining the fair value of a reporting unit is judgmental in nature and requires the use of significant estimates and assumptions, including revenue growth rates, operating margins, discount rates and future market conditions, among others. A goodwill impairment charge would have the effect of decreasing the Company's earnings or increasing its losses in such period. If the Company is required to take further substantial impairment charges in future periods, its operating results would be materially and adversely affected in such period.

The following table summarizes the activity in the Company's goodwill balance during fiscal years 2015 and 2014 (in thousands):

	Years Ended March 31,			2014		
	2015			2014		
	Peripherals	Video Conferencing	Total	Peripherals	Video Conferencing	Total
Beginning of the period	\$219,415	\$125,595	\$345,010	\$216,744	\$124,613	\$341,357
Acquisitions	988	—	988	202	—	202
Impairment	—	(122,734)	(122,734)	—	—	—
Currency exchange rate impact and other	(2,190)	(2,861)	(5,051)	—	982	982
Reclassified from assets held for sale (1)	—	—	—	2,469	—	2,469
End of the period	\$218,213	\$—	\$218,213	\$219,415	\$125,595	\$345,010

(1) Represents allocated goodwill related to the Company's Retail— Home Control product category which was classified as assets held for sale as of March 31, 2013. The allocated goodwill related to the Home Control product category was reclassified from assets held for sale as of March 31, 2014, as the Company updated its strategic plan and decided to retain its Home Control product category.

The Company's acquired other intangible assets subject to amortization were as follows (in thousands):

	March 31,			2014		
	2015			2014		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Trademark and tradenames	\$13,049	\$(13,038)	\$11	\$13,091	\$(11,949)	\$1,142
Technology	81,441	(79,716)	1,725	83,080	(78,257)	4,823
Customer contracts/relationships	38,538	(38,408)	130	38,851	(34,287)	4,564
	\$133,028	\$(131,162)	\$1,866	\$135,022	\$(124,493)	\$10,529

For fiscal years 2015, 2014 and 2013, amortization expense for other intangible assets was \$8.4 million, \$17.8 million and \$23.6 million, respectively. The Company expects that annual amortization expense for the fiscal years 2016 and 2017 to be \$1.7 million and \$0.2 million, respectively.

Table of Contents

Note 10—Financing Arrangements

The Company had several uncommitted, unsecured bank lines of credit aggregating \$38.1 million as of March 31, 2015. There are no financial covenants under these lines of credit with which the Company must comply. As of March 31, 2015, the Company had outstanding bank guarantees of \$5.1 million under these lines of credit. There was no borrowing outstanding under the line of credit as of March 31, 2015 or March 31, 2014.

Note 11—Commitments and Contingencies

Operating Leases

The Company leases facilities under operating leases, certain of which require it to pay property taxes, insurance and maintenance costs. Operating leases for facilities are generally renewable at the Company's option and usually include escalation clauses linked to inflation. Future minimum annual rentals under non-cancelable operating leases at March 31, 2015 are as follows (in thousands):

Years Ending March 31,	
2016	\$13,829
2017	10,397
2018	8,330
2019	6,575
2020	5,193
Thereafter	9,908
	\$54,232

Rent expense for fiscal years 2015, 2014 and 2013 was \$12.6 million, \$14.7 million and \$25.3 million, respectively. In connection with its leased facilities, the Company recognized a liability for asset retirement obligations for 2015 and 2014 representing the present value of estimated remediation costs to be incurred at lease expiration. The liabilities for asset retirement obligations were not material as of March 31, 2015 and 2014.

Product Warranties

All of the Company's Peripherals products are covered by warranty to be free from defects in material and workmanship for periods ranging from one year to five years. At the time of sale, the Company accrues a warranty liability for estimated costs to provide products, parts or services to repair or replace products in satisfaction of the warranty obligation. The Company's estimate of costs to fulfill its warranty obligations is based on historical experience and expectations of future conditions. When the Company experiences changes in warranty claim activity or costs associated with fulfilling those claims, the warranty liability is adjusted accordingly.

Table of Contents

Changes in the Company's warranty liability for fiscal years 2015 and 2014 were as follows (in thousands):

	Years Ended March 31,	
	2015	2014
Beginning of the period	\$24,380	\$21,442
Provision	10,958	15,473
Settlements	(12,027) (15,206
Currency translation (1)	(1,601) 344
Adjustment (2)	—	2,327
End of the period	\$21,710	\$24,380

(1) The currency translation during fiscal year 2014 is presented separately to conform to the current year presentation.

(2) During fiscal year 2014, the warranty liability allocated to the Company's Home Control product category was reclassified from liabilities held for sale.

Deferred Services Revenue

The Company's video conferencing reporting unit offers maintenance contracts with the sale of a majority of its products which allow customers to receive service and support extended beyond the expiration of the product warranty contractual term. The Company recognizes these contracts over the life of the service period.

Changes in the Company's deferred services revenue during fiscal years 2015 and 2014 were as follows (in thousands):

	Years Ended March 31,	
	2015	2014
Beginning of the period	\$30,160	\$29,327
Extended warranties issued	30,256	33,007
Amortization	(31,766) (32,174
End of the period	\$28,650	\$30,160

Investment Commitments

During 2015, the Company entered into a limited partnership agreement for a private investment fund specialized in early-stage start-up consumer hardware electronics companies and committed to a capital contribution of \$4.0 million over the life of the fund. As of March 31, 2015, no capital has been called upon by the fund.

Other Contingencies

The Company is subject to an ongoing formal investigation by the SEC's Enforcement Division, relating to certain issues including the accounting for Revue inventory valuation reserves that resulted in the restatement described in the Fiscal Year 2014 Annual Report on Form 10-K, revision to the Company's consolidated financial statements concerning warranty accruals and amortization of intangible assets presented in the Company's Amended Annual Report on Form 10-K/A, filed on August 7, 2013, and the Company's transactions with a distributor for Fiscal Year 2007 through Fiscal Year 2009. The Company has entered into an agreement with the SEC to extend the statute of limitations. The Company is cooperating with the investigation and recently engaged in discussions to settle the matter with the SEC, including making offers of monetary amounts for a civil penalty. In accordance with U.S. GAAP, the Company has made an accrual in its financial statements. The Company cannot predict the timing, range of possible loss or final outcome of this matter.

Guarantees

Logitech Europe S.A. guaranteed payments of two third-party contract manufacturers' purchase obligations. As of March 31, 2015, the maximum amount of this guarantee was \$3.8 million, of which \$1.7 million of guaranteed purchase obligations was outstanding.

Table of Contents

Indemnifications

The Company indemnifies certain of its suppliers and customers for losses arising from matters such as intellectual property disputes and product safety defects, subject to certain restrictions. The scope of these indemnities varies, but in some instances, includes indemnification for damages and expenses, including reasonable attorneys' fees. As of March 31, 2015, no amounts have been accrued for these indemnification provisions. The Company does not believe, based on historical experience and information currently available, that it is probable that any material amounts will be required to be paid under its indemnification arrangements.

The Company also indemnifies its current and former directors and certain of its current and former officers. Certain costs incurred for providing such indemnification may be recoverable under various insurance policies. The Company is unable to reasonably estimate the maximum amount that could be payable under these arrangements because these exposures are not limited, the obligations are conditional in nature and the facts and circumstances involved in any situation that might arise are variable.

Legal Proceedings

From time to time the Company is involved in claims and legal proceedings which arise in the ordinary course of its business. The Company is currently subject to several such claims and a small number of legal proceedings. The Company believes that these matters lack merit and intends to vigorously defend against them. Based on currently available information, the Company does not believe that resolution of pending matters will have a material adverse effect on its financial condition, cash flows or results of operations. However, litigation is subject to inherent uncertainties, and there can be no assurances that the Company's defenses will be successful or that any such lawsuit or claim would not have a material adverse impact on the Company's business, financial conditions, cash flows or results of operations in a particular period. Any claims or proceedings against the Company, whether meritorious or not, can have an adverse impact because of defense costs, diversion of management and operational resources, negative publicity and other factors. Any failure to obtain necessary license or other rights, or litigation arising out of intellectual property claims, could adversely affect the Company's business.

Note 12—Shareholders' Equity

Share Capital

The Company's nominal share capital is CHF 43,276,655, consisting of 173,106,620 shares with a par value of CHF 0.25 each, all of which were issued and 8,624,821 of which were held in treasury shares as of March 31, 2015. In September 2008, the Company's shareholders approved an amendment to reserve conditional capital of 25,000,000 shares for potential issuance on the exercise of rights granted under the Company's employee equity incentive plans. The shareholders also approved the creation of conditional capital representing the issuance of up to 25,000,000 shares to cover any conversion rights under a future convertible bond issuance. This conditional capital was created in order to provide financing flexibility for future expansion, investments or acquisitions.

Shares Outstanding

In September 2012, the Company's shareholders approved the cancellation of the 18.5 million shares repurchased under the September 2008 amended share buyback program. These shares were legally cancelled during fiscal year 2013, which decreased the treasury shares outstanding by this amount and also decreased its shares issued and outstanding from 191.6 million to 173.1 million.

Dividends

Pursuant to Swiss corporate law, Logitech International S.A. may only pay dividends in Swiss Francs. The payment of dividends is limited to certain amounts of unappropriated retained earnings (CHF 444.9 million or \$457.5 million based on the exchange rate at March 31, 2015) and is subject to shareholder approval. In March 2015, the Company announced a plan to pay \$250.0 million in cumulative dividends for fiscal year 2015 through fiscal year 2017. The Board of Directors plans to request shareholder approval of the Swiss Franc equivalent of an \$85 million dividend for fiscal year 2015 at the Company's next annual general meeting. Based on the exchange rate and the number of shares outstanding as of March 31, 2015, this represents approximately CHF 0.51 per share. In December 2014, Logitech's shareholders approved a cash dividend payment of CHF 43.1 million out of retained earnings to Logitech shareholders. Eligible shareholders were paid CHF 0.26 per share (\$0.27 per share in U.S. Dollars), totaling \$43.8 million in U.S. Dollars in December 2014. In September 2013, Logitech's shareholders

Table of Contents

approved a cash dividend payment of CHF 33.7 million out of retained earnings to Logitech's shareholders. Eligible shareholders were paid CHF 0.21 per share (\$0.22 per share in U.S. Dollars), totaling \$36.1 million in U.S. Dollars in September 2013. In September 2012, the Company's shareholders approved a cash dividend of CHF 125.7 million out of retained earnings to Logitech shareholders. Eligible shareholders were paid CHF 0.79 per share (\$0.85 per share in U.S. Dollars), totaling \$133.5 million in U.S. Dollars in September 2012. This dividend qualified as a distribution of qualifying additional paid-in capital and, as such, was not subject to Swiss Federal withholding tax.

Legal Reserves

Under Swiss corporate law, a minimum of 5% of the Company's annual net income must be retained in a legal reserve until this legal reserve equals 20% of the Company's issued and outstanding aggregate par value per share capital.

These legal reserves represent an appropriation of retained earnings that are not available for distribution and totaled \$9.9 million at March 31, 2015 (based on the exchange rate at March 31, 2015).

Additionally, under Swiss corporate law, the Company is required to establish a reserve equal to the cost of repurchased treasury shares owned as of year end. The reserve for treasury shares, which is not available for distribution, totaled \$77.4 million at March 31, 2015 (based on the exchange rate at March 31, 2015).

Share Repurchases

In March 2014, the Company's Board of Directors approved the 2014 share buyback program, which authorizes the Company to use up to \$250.0 million to purchase its own shares. The Company's share buyback program is expected to remain in effect for a period of three years. Shares may be repurchased from time to time on the open market, through block trades or otherwise. Purchases may be started or stopped at any time without prior notice depending on market conditions and other factors.

In September 2008, the Company's Board of Directors approved the September 2008 share buyback program for \$250.0 million. In November 2011, an amendment to the September 2008 share buyback program ("September 2008—amended") was approved by the Company's Board of Directors to enable future purchases of shares for cancellation. In August 2013, the September 2008 share buyback and September 2008—amended share buyback programs expired.

A summary of the approved share buyback programs are shown in the following table (in thousands, excluding transaction costs):

Share Buyback Program	Approved		Repurchased	
	Shares	Amounts	Shares	Amounts
March 2014	17,311	\$250,000	115	\$1,663
September 2008—amended(1)	28,465	177,030	18,500	170,714
September 2008(1)	8,344	250,000	7,609	73,134
	54,120	\$677,030	26,224	\$245,511

(1) Expired in August 2013

During fiscal years 2015 and 2013, 0.1 million and 8.6 million shares were repurchased for \$1.7 million and \$87.8 million, respectively. There were no share repurchases during fiscal year 2014. During fiscal year 2013, 18.5 million of the repurchased shares were cancelled.

Accumulated Other Comprehensive Income (Loss)

The components of accumulated other comprehensive income (loss) were as follows (in thousands):

	Accumulated Other Comprehensive Income (Loss)			
	Cumulative	Defined	Deferred	Total
	Translation	Benefit	Hedging	
	Adjustment (1)	Plans(1)	Gains (Losses)	
March 31, 2014	\$ (70,999) \$ (14,288) \$ (515) \$ (85,802
Other comprehensive income (loss)	(19,225) (12,676) 4,466	(27,435
March 31, 2015	\$ (90,224) \$ (26,964) \$ 3,951) \$(113,237

(1) Tax effect was not significant as of March 31, 2015 or 2014.

Note 13—Segment Information

The Company has two reporting segments, peripherals and video conferencing, based on product markets and internal organizational structure. The peripherals segment encompasses the design, manufacturing and marketing of peripherals for PCs, tablets and other digital platforms. The video conferencing segment offers scalable high-definition, or HD, video communication endpoints, HD video conferencing systems with integrated monitors, video bridges, a Cloud-based video conferencing solution and other infrastructure software and hardware to support large-scale video deployments and services to support these products. The Company's reporting segments do not record revenue on sales between segments.

Operating performance measures for the peripherals segment and the video conferencing segment are reported separately to Logitech's Chief Executive Officer ("CEO"), who is considered to be the Company's Chief Operating Decision Maker ("CODM"). The CEO periodically reviews information such as net sales and operating income (loss) for each operating segment to make business decisions. These operating performance measures do not include share-based compensation expense and amortization of intangible assets. Share-based compensation expense and amortization of intangible assets are presented in the following financial information by operating segment as "other income (expense)." Assets by operating segment are not presented since the Company does not present such data to the CODM.

Table of Contents

Net sales and operating income (loss) for the Company's operating segments were as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Net sales:			
Peripherals	\$2,004,908	\$2,008,028	\$1,962,237

	\$2,113,947	\$2,128,713	\$2,099,277

(1) Certain products within the retail product families presented in prior years have been reclassified to conform to the current year presentation. There is no impact over total net retail sales.

Net sales to unaffiliated customers by geographic region for fiscal years 2015, 2014 and 2013 (based on the customers' location) were as follows (in thousands):

	Years Ended March 31,		
	2015	2014	2013
Americas	\$915,478	\$859,893	\$808,618
EMEA	710,966	767,017	799,075
Asia Pacific	487,503	501,803	491,584
	\$2,113,947	\$2,128,713	\$2,099,277

The United States represented 36%, 35% and 33% of net sales for the fiscal years 2015, 2014 and 2013, respectively. No other single country represented more than 10% of net sales during these periods. Revenues from net sales to customers in Switzerland, the Company's home domicile, represented 2% of net sales for each of fiscal years 2015, 2014 and 2013, respectively.

Geographic long-lived assets information, primarily fixed assets, are reported below based on the location of the asset (in thousands):

Table of Contents

	March 31, 2015	2014
Americas	\$48,527	\$45,166
EMEA	3,584	5,154
Asia Pacific	39,482	38,071
	\$91,593	\$88,391

Long-lived assets in the United States and China were \$48.3 million and \$34.0 million at March 31, 2015, respectively, and \$44.9 million and \$31.9 million at March 31, 2014, respectively. No other countries represented more than 10% of the Company's total consolidated long-lived assets at March 31, 2015 or 2014. Long-lived assets in Switzerland, the Company's home domicile, were \$1.5 million and \$1.6 million at March 31, 2015 and 2014, respectively.

Note 14—Restructuring

The following table summarizes restructuring related activities during fiscal year 2015 and 2014 (in thousands):

	Restructuring Termination Benefits	Lease Exit Costs	Total
Accrual balance at March 31, 2013	\$13,383	\$75	\$13,458
Charges	6,463	7,348	13,811
Adjustment for deferred rent	—	1,450	1,450
Cash payments	(19,534)	(1,454)	(20,988)
Currency exchange impact	(170)	—	(170)
Accrual balance at March 31, 2014	142	7,419	7,561
Credits	(86)	(4,802)	(4,888)
Cash payments	(56)	(1,578)	(1,634)
Accrual balance at March 31, 2015	\$—	\$1,039	\$1,039

During the second quarter of fiscal year 2014, the Company implemented a restructuring plan solely affecting its video conferencing operating segment to align its organization to its strategic priorities of increasing focus on a tighter range of products and improving profitability. Restructuring charges under this plan primarily consist of severance and other one-time termination benefits. During fiscal year 2014, restructuring charges under this plan included \$5.0 million in termination benefits and \$0.6 million in lease exit costs. The Company substantially completed this restructuring plan by March 31, 2014.

During the fourth quarter of fiscal year 2013, the Company implemented a restructuring plan to align its organization to its strategic priorities of increasing focus on mobility products, improving profitability in PC-related products and enhancing global operational efficiencies. As part of this restructuring plan, the Company reduced its worldwide non-direct labor workforce. Restructuring charges under this plan primarily consisted of severance and other one-time termination benefits. During fiscal year 2015, the Company recorded a \$4.9 million restructuring credit primarily as a result of partial termination of its lease agreement for the Silicon Valley campus, which was previously vacated and under the restructuring plan during fiscal year 2014. During fiscal year 2014, restructuring charges under this plan included \$1.5 million in termination benefits and \$6.7 million in lease exit costs, \$5.4 million of which pertains to the consolidation of the Company's Silicon Valley campus from two buildings down to one during the quarter ended March 31, 2014. The Company substantially completed this restructuring plan by the fourth quarter of fiscal year 2014.

Termination benefits were calculated based on regional benefit practices and local statutory requirements. Lease exit costs primarily relate to costs associated with the closure of existing facilities. Other charges primarily consist of legal, consulting and other costs related to employee terminations.

Table of Contents

Note 15—Subsequent Events

On April 22, 2015, the Company announced its intent to exit the OEM business and reorganize Lifesize to sharpen its focus on its Cloud-based offerings, and streamline its overall cost structure through product, overhead and infrastructure cost reductions, including a targeted resource realignment. The Company expects to recognize restructuring charges of approximately \$15 million to \$20 million.

During the quarter ended September 30, 2013, the Company implemented a restructuring plan solely affecting the (1) video conferencing operating segment to align its organization to its strategic priorities of increasing focus on a tighter range of products, expanding Cloud-based video conferencing services and improving profitability.

The Company incurred \$5.4 million of restructuring charges related to lease exit costs which pertains to the
(2) consolidation our Silicon Valley campus from two buildings down to one during the quarter ended March 31, 2014.

The impairment of goodwill and other assets during the fourth quarter of fiscal year 2015 was attributable to
(3) goodwill impairment charge related to our video conferencing reporting unit. The Company recognized \$4.7 million restructuring credits as result of partial termination of its lease agreement for Silicon Valley campus, which was previously vacated and under a restructuring plan during fiscal 2014.

Schedule II

LOGITECH INTERNATIONAL S.A.

VALUATION AND QUALIFYING ACCOUNTS

For the Fiscal Years Ended March 31, 2015, 2014 and 2013 (in thousands)

The Company's Schedule II includes valuation and qualifying accounts related to allowances for doubtful accounts, sales returns, cooperative marketing arrangements, customer incentive programs, and pricing programs, for direct customers and tax valuation allowances. The Company also has sales incentive programs for indirect customers with whom it does not have a direct sales and receivable relationship. These programs are recorded as accrued liabilities and are not considered valuation or qualifying accounts.

	Balance at Beginning of Year	Charged (Credited) to Statement of Operations	Claims and Adjustments Applied Against Allowances	Balance at End of Year
Allowance for doubtful accounts:				
2015	\$1,712	\$(372)	\$(247)	\$1,093
2014	\$2,153	\$656	\$(1,097)	\$1,712
