CHINA XD PLASTICS COMPANY LIMITED AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of presentation, accounting pronouncement adopted in 2018 and significant concentrations and risks

(a) Basis of presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted as permitted by rules and regulations of the United States Securities and Exchange Commission ("SEC"). The condensed consolidated balance sheet as of December 31, 2017 was derived from the audited consolidated financial statements of China XD Plastics Company Limited ("China XD") and subsidiaries (collectively, the "Company"). The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the consolidated balance sheet of the Company as of December 31, 2017, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, included in the Company's Annual Report on Form 10-K filed with the SEC on March 15, 2018.

In the opinion of the management, all adjustments (which include normal recurring adjustments) necessary to present a fair statement of the financial position as of March 31, 2018, the results of operations and cash flows for the three-month periods ended March 31, 2018 and 2017, have been made.

The preparation of condensed consolidated financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant items subject to such estimates and assumptions include the recoverability of the carrying amounts of property, plant and equipment, the realizability of inventories, the useful lives of property, plant and equipment, the collectability of accounts receivable, the fair values of stock-based compensation awards, and the accruals for tax uncertainties and other contingencies. The current economic environment has increased the degree of uncertainty inherent in those estimates and assumptions.

(b) Accounting Pronouncement Adopted in 2018

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers, which supersedes virtually all existing revenue recognition guidance. The new standard requires an entity to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration the entity expects to receive in exchange for those goods or services. This update also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. We adopted ASU 2014-09 in the first quarter 2018, using the modified retrospective transition approach, which did not have any impact on how we recognize revenue or to our financial statements or disclosures. See below for additional information related to our recognition of revenue generated from customer contracts.

Revenue recognition

Effective January 1, 2018, we adopted the new guidance of ASC Topic 606, Revenue from Contracts with Customers (Topic 606), which supersedes the revenue recognition requirements in ASC Topic 605, Revenue Recognition. Topic

606 requires us to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new guidance requires us to apply the following steps: (1) identify the contract with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when, or as, we satisfy a performance obligation. The adoption of this new guidance did not result in any changes to our revenue recognition.

ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash requires that the Statement of Cash Flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. The Company retrospectively adopted this guidance as of January 1, 2018, to each period presented.

(c) Significant concentrations and risks

Sales concentration

The Company sells its products primarily through approved distributors in the People's Republic of China (the "PRC"). The Company's sales are highly concentrated. Sales to distributors individually exceeded 10% of the Company's revenues for the three-month periods ended March 31, 2018 and 2017, are as follows:

	For the Three-Month Period Ended March			
	31, 2018		2017	
	US\$	%	US\$	%
Distributor A, located in PRC	47,731,909	15.4%	42,217,833	17.8%
Distributor B, located in PRC	35,567,286	11.5%	28,510,327	12.0%
Distributor C, located in PRC	32,353,013	10.4%	22,231,697	9.3%
Total	115,652,208	37.3%	92,959,857	39.1%

The Company expects revenues from these distributors to continue to represent a substantial portion of its revenue in the future. Any factor adversely affecting the automobile industry in the PRC or the business operations of these customers will have a material effect on the Company's business, financial position and results of operations.

Purchase concentration of raw materials and equipment

The principal raw materials used for the Company's production of modified plastics products are plastic resins, such as polypropylene, ABS and nylon. The Company purchases substantially all of its raw materials through a limited number of distributors. Raw material purchases from these distributors, which individually exceeded 10% of the Company's total raw material purchases, accounted for approximately 30.3% (three distributors) and 40.4% (three distributors), of the Company's total raw material purchases for the three-month periods ended March 31, 2018 and 2017, respectively. Management believes that other suppliers could provide similar raw materials on comparable terms. A change in suppliers, however, could cause a delay in manufacturing and a possible loss of sales, which would adversely affect the Company's business, financial position and results of operations.

Cash concentration

Cash and cash equivalents, short-term restricted cash and time deposits mentioned below maintained at banks consist of the following:

	March 31, 2018 US\$	December 31, 2017 US\$

Total bank deposits amounted to \$1,575,495 and \$1,505,747 are insured as of March 31, 2018 and December 31, 2017, respectively. The Company has not experienced any losses in uninsured bank deposits and does not believe that it is exposed to any significant risks on cash held in bank accounts. To limit exposure to credit risk, the Company primarily places bank deposits with large financial institutions in the PRC, Hong Kong SAR, Macau SAR and Dubai, UAE with acceptable credit rating.

Time deposits represent certificates of deposit with initial terms of six or twelve months when purchased. As of March 31, 2018 and December 31, 2017, the Company's time deposits bear a weighted average interest rate of 1.7% and 1.3% per annum, respectively.

Upon maturity and repayment of the bills payable, which is generally within 6 months, the cash becomes available for use by the Company. The cash flows from such bank deposits are reported within operating activities in the consolidated statements of cash flows.

Overview

China XD is one of the leading specialty chemical companies engaged in the research, development, manufacture and sale of modified plastics primarily for automotive applications in China, and to a lesser extent, in Dubai, UAE.

Through our wholly-owned operating subsidiaries in China and UAE, we develop modified plastics using our proprietary technology, manufacture and sell our products primarily for use in the fabrication of automobile parts and components. We have 454 certifications from manufacturers in the automobile industry as of March 31, 2018. We are the only company certified as a National Enterprise Technology Center in modified plastics industry in Heilongjiang province. Our Research and Development (the "R&D") team consists of 522 professionals and 11 consultants, including one consultant who is a member of Chinese Academy of Engineering. As a result of the integration of our academic and technological expertise, we have a portfolio of 443 patents, 32 of which we have obtained the patent rights and the remaining 411 of which we have applications pending in China as of March 31, 2018.

Our products include twelve categories: Modified Polypropylene (PP), Modified Acrylonitrile Butadiene Styrene (ABS), Modified Polyamide 66 (PA66), Modified Polyamide 6 (PA6), Modified Polyoxymethylenes (POM), Modified Polyphenylene Oxide (PPO), Plastic Alloy, Modified Polyphenylene Sulfide (PPS), Modified Polyimide (PI), Modified Polylactic acid (PLA), Poly Ether Ether Ketone (PEEK), and Polyethylene (PE).

The Company's products are primarily used in the production of exterior and interior trim and functional components of 30 automobile brands and 92 automobile models manufactured in China, including Audi, Mercedes Benz, BMW, Toyota, Buick, Chevrolet, Mazda, Volvo, Ford, Citroen, Jinbei, VW Passat, Golf, Jetta, etc. Our research center is dedicated to the research and development of modified plastics, and benefits from its cooperation with well-known scientists from prestigious universities in China. We operate three manufacturing plants in Harbin, Heilongjiang in the PRC. As of March 31, 2018, in Harbin, Heilongjiang Province, we had approximately 390,000 metric tons of

production capacity across 84 automatic production lines utilizing German twin-screw extruding systems, automatic weighing systems and Taiwanese conveyer systems. In December 2013, we broke ground on the construction of our fourth production plant in Nanchong City, Sichuan Province, with additional 300,000 metric tons of annual production capacity, expecting to bring total domestic installed production capacity to 690,000 metric tons with additional 70 new production lines at the completion of the construction of our fourth production plant. Sichuan Xinda has supplied to its customers since 2013, mainly backed by production capacity in our Harbin production plant. We installed 50 production lines in the second half of 2016 in our Sichuan plant with production capacity of 216,000 metric tons during the year of 2017. As of March 31, 2018, there is still construction ongoing on the site of our Sichuan plant which is to be expected to be completed by the end of the second quarter of 2018. In order to meet the increasing demand from our customer in the ROK and to develop potential overseas markets, Dubai Xinda obtained one leased property and two purchased properties, approximately 52,530 square meters in total, including one leased 10,000 square meters, and two purchased 20,206 and 22,324 square meters on January 25, 2015, June 28, 2016 and September 21, 2016, respectively, from Jebel Ali Free Zone Authority ("JAFZA") in Dubai, UAE, with constructed building comprising warehouses, offices and service blocks. In addition to the earlier 10 trial production lines in Dubai Xinda, the Company is planning to complete installing 45 production lines with 12,000 metric tons of annual production capacity by the end of May 2018, and an additional 50 production lines with 13,000 metric tons of annual production capacity by end of 2018, bringing total installed production capacity in Dubai Xinda to 25,000 metric tons, targeting high-end products for the overseas market.

According to the China Association of Automobile Manufacturers, automobile sales in China increased by 2.8% for the first quarter of 2018 as compared to the same period of 2017.

An improvement in macroeconomic conditions since 2017 has improved business conditions and ease pricing pressures.

Driven by accelerating growth of 7.6% in Northeast China, 184% in Central China, 124% in South China, 89% in Southwest China, 26% in North China, and 22% in East China, our domestic sales during the three month ended March 31, 2018 increased by 30.5% as compared to the same period of the prior year.

As for the RMB selling price, the Company also implemented a marketing strategy of offering lower-end products with lower RMB pricing to further penetrate the new regional markets in Central China and Southwest China.

The Company continued to shift production mix from traditional lower-end products to higher-end products such as PA66, PA6, Plastic Alloy, and PLA, primarily due to (i) greater growth potential of advanced modified plastics in luxury automobile models in China, (ii) the stronger demand as a result of promotion by the Chinese government for clean energy vehicles and (iii) better quality from and consumer recognition of higher-end cars made by automotive manufacturers from Chinese and Germany joint ventures, and U.S. and Japanese joint ventures, which manufacturers tend to use more and higher-end modified plastics in quantity per vehicle in China.

R&D expenses were US\$5.0 million during the quarter ended March 31, 2018 compared with US\$5.9 million during the same period in 2017, a decrease of US\$0.9 million, or 15.3%. The decrease was primarily due to the decrease of raw materials used by HLJ Xinda Group.

As of March 31, 2018, the number of ongoing research and development projects was 326. We expect to complete and commence to realize economic benefits from approximately 25% of the projects in the near term. The remaining projects are expected to be carried out for a longer period. The majority of the projects are in the field of modified plastics in automotive applications and the rest are in advanced fields such as ships, airplanes, high-speed rail, medical devices, etc.

Operating Income

Total operating income was US\$38.9 million in the first quarter ended March 31, 2018 compared to \$21.3 million in the same period of 2017, representing an increase of 82.6% or US\$17.6 million. This increase is primarily due to increased gross profit, lower research and development expenses, partially offset by a higher G&A expenses and selling expenses.

The effective income tax rates for the three-month periods ended March 31, 2018 and 2017 were 24.5% and 26.4%, respectively. The effective income tax rate reduced from 26.4% for the three-month period ended March 31, 2017 to 24.5% for the three-month period ended March 31, 2018, primarily due to the decrease of continuous operating loss occurred in oversea subsidiaries such as Xinda Holding (HK) and Dubai Xinda, and partially offset by the decrease of Sichuan Xinda's PBT ratio. The effective income tax rate for the three-month period ended March 31, 2018 differs from the PRC statutory income tax rate of 25% primarily due to Sichuan Xinda's preferential income tax rate and R&D 50% additional deduction of the major PRC operating entities.

Our PRC and Dubai subsidiaries have US\$562.7 million of cash and cash equivalents, restricted cash and time deposits as of March 31, 2018, which are planned to be indefinitely reinvested in the PRC and Dubai. Due to our policy of indefinitely reinvesting our earnings in our PRC business, we have not provided for deferred income tax liabilities related to PRC withholding income tax on undistributed earnings of our PRC subsidiaries. In addition, due to our policy of indefinitely reinvesting our earnings in Dubai, UAE, we have not provided for deferred income tax liabilities related to Dubai Xinda in Dubai, UAE, on undistributed earnings.

Net Income

As a result of the above factors, we had a net income of US\$19.1 million in the first quarter of 2018 compared to a net income of US\$9.9 million in the same quarter of 2017.

Redeemable Series D convertible preferred stock	97.6	97.6	-	-
Stockholders' equity	761.6	712.8	48.8	6.8 %

Our financial condition continued to improve as measured by an increase of 6.8% in stockholders' equity as of March 31, 2018 as compared to that of December 31, 2017. Cash and cash equivalents, restricted cash and time deposits decreased by 7.1% or US\$43.3 million due to the operating cash outflows. Accounts receivable decreased by 36.3% or US\$108.6 million due to the management efforts to collect outstanding balances due from the domestic customers. Inventories increased by 32.1% as a result of more purchases of the raw materials and the Company's strategy to stock up the finished goods for the upcoming order. Prepaid expenses and other current assets decreased by 22.5% or US\$32.5 million as Sichuan Xinda received the refund of prepayment from Hailezi in January 2018. Prepayments to equipment and construction suppliers increased by 17.9% or US\$34.2 million because HLJ Xinda Group prepaid to Hailezi to purchase equipment for the industrial project of upgrading existing equipment for 100,000 metric tons of engineering plastics. The aggregate short-term and long-term bank loans decreased by 7.9% due to the repayments of the loans. We define the manageable debt level as the sum of aggregate short-term and long-term loans, and notes payable over total assets.

LIQUIDITY AND CAPITAL RESOURCES

Historically, our primary uses of cash have been to finance working capital needs and capital expenditures for new production lines. We have financed these requirements primarily from cash generated from operations, bank borrowings and the issuance of our convertible preferred stocks and debt financings. As of March 31, 2018 and December 31, 2017, we had US\$50.8 million and US\$190.4 million, respectively, in cash and cash equivalents, which were primarily deposited with banks in China (including Hong Kong and Macau SAR), UAE and U.S. As of March 31, 2018, we had US\$674.0 million outstanding short-term bank loans (including the current portion of long-term bank loans), including US\$325.1 million unsecured loan and US\$71.5 million loans secured by accounts receivable, US\$24.5 million loans secured by restricted cash, and US\$252.9 long-term bank loans that due in one year. We also had US\$145.6 million unsecured long-term loans (excluding the current portion). Short-term and long-term bank loans in total bear a weighted average interest rate of 4.3% per annum and do not contain any renewal terms. We have historically been able to make repayments when due.

We have historically been able to make repayments when due. As of March 31, 2018, we have contractual obligations to pay (i) lease commitments in the amount of US\$11.5 million, including US\$1.4 million due in one year; (ii) equipment acquisition and facility construction in the amount of US\$68.8 million; and (iii) long-term bank loan in the amount of US\$424.4 million (including principals and interests).

We expect that we will be able to meet our needs to fund operations, capital expenditures and other commitments in the next 12 months primarily with our cash and cash equivalents, operating cash flows and bank borrowings.

We may, however, require additional cash resources due to changes in business conditions or other future developments. If these sources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain a credit facility. The sale of additional equity or equity-linked securities could result in additional dilution to stockholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financial covenants that would restrict operations. Financing may not be available in amounts or on terms acceptable to us, or at all.

The following table sets forth a summary of our cash flows for the periods indicated.

(in millions US\$)	Three-Month Period Ended March 31,	
	2018	2017
Net cash provided by (used in) operating activities	28.4	(47.6)
Net cash used in investing activities	(41.1)	(148.2)
Net cash (used in) provided by financing activities	(96.2)	128.6
Effect of foreign currency exchange rate changes on cash, cash equivalents and restricted cash	10.1	1.6
Net decrease in cash, cash equivalents, and restricted cash	(98.8)	(65.6)
Cash, cash equivalents, and restricted cash at the beginning of period	320.1	271.6
Cash, cash equivalents, and restricted cash at the end of period	221.3	206.0

Operating Activities

Net cash provided by operating activities was US\$28.4 million for the three-month period ended March 31, 2018, as compared to US\$47.6 million used in operating activities for the three-month period ended March 31, 2017, primarily due to (i) the decrease of approximately US\$106.2 million in cash operating payments, including raw material purchases, rental and personnel costs, (ii) the increase of US\$1.3 million in interest income received, (iii) the increase of US\$0.3 million received from government grant, partially offset by (iv) the decrease of approximately US\$25.7 million in cash collected from our customers for the three-month period ended March 31, 2018, (v) the increase of US\$1.9 million in income tax payments for the three-month period ended March 31, 2018, (vi) the increase of US\$1.6 million option contracts loss and (vii) the increase of US\$2.6 million interest payments.

Investing Activities

Net cash used in the investing activities was US\$41.1 million for the three-month period ended March 31, 2018 as compared to US\$148.2 million for the same period of last year, mainly due to (i) the decrease of US\$264.0 million purchase of property, plant and equipment, (ii) the decrease of US\$3.0 million acquisition of land use right, and (iii) the increase of US\$7.0 million government grant related to the industrial project for 300,000 metric tons biological composite materials, partially offset by (iv) the increase of US\$103.6 million purchase of time deposits, (v) the decrease of US\$48.3 million proceeds from maturity of time deposits and (vi) the decrease of US\$15.0 million refund of deposit from an equipment supplier for the three-month period ended March 31, 2018.

Financing Activities

Net cash used in the financing activities was US\$96.2 million for the three-month period ended March 31, 2018, as compared to US\$128.6 million provided by financing activities for the same period of last year, primarily as a result of (i) the increase of US\$159.3 million repayments of bank borrowings for the three-month period ended March 31, 2018 and (ii) the decrease of the proceeds of US\$65.5 million from bank borrowings.

As of March 31, 2018, our cash, cash equivalents and restricted cash balance was US\$221.3 million, as compared to US\$206.0 million at December 31, 2017.

Days Sales Outstanding ("DSO") has decreased from 99 days for the year ended December 31, 2017 to 71 days for the quarter ended March 31, 2018 as a result of faster accounts receivable collection from the domestic customers.

It takes shorter to collect from our customers. We believe that our DSO is well below industry average Industry Standard Customer and Supplier Payment Terms (days) as below:

Edgar Filing: China XD Plastics Co Ltd - Form 10-Q

	Three-month period ended March 31, 2018	Year ended December 31, 2017
Customer Payment Term	Payment in advance/up to 90 days	Payment in advance/up to 90 days
Supplier Payment Term	Payment in advance/up to 90 days	Payment in advance/up to 90 days

Inventory turnover days have increased from 120 days for the year ended December 31, 2017 to 172 days for the quarter ended March 31, 2018. Turnover days of payables have decreased from 94 days for the year ended December 31, 2017 to 48 days for the quarter ended March 31, 2018.

Based on past performance and current expectations, we believe our cash and cash equivalents provided by operating activities and financing activities will satisfy our working capital needs, capital expenditures and other liquidity requirements associated with our operations for at least the next 12 months.

The majority of the Company's revenues and expenses were denominated primarily in Renminbi ("RMB"), the currency of the People's Republic of China. There is no assurance that exchange rates between the RMB and the U.S. Dollar will remain stable. Inflation has not had a material impact on the Company's business.

(2) Sichuan plant construction and equipment purchase

On March 8, 2013, Xinda Holding (HK) entered into an investment agreement with Shunqing Government, pursuant to which Xinda Holding (HK) will invest RMB1.8 billion in property, plant and equipment and approximately RMB0.6 billion in working capital, for the construction of Sichuan plant. As of March 31, 2018, the Company has a remaining commitment of RMB54.8 million (equivalent to US\$8.6 million) mainly for facility construction.

In September 2016, Sichuan Xinda entered into equipment purchase contracts with Hailezi for a consideration of RMB17.0 million (equivalent to US\$2.7 million) to purchase storage facility and testing equipment. Afterward, Sichuan Xinda cancelled two contracts with Hailezi for a consideration of RMB1.6 million (equivalent to US\$0.3 million). As of March 31, 2018, Sichuan Xinda prepaid RMB6.0 million (equivalent to US\$1.0 million) and has a remaining commitment of RMB9.4 million (equivalent to US\$1.4 million).

On October 20, 2016, Sichuan Xinda entered into an equipment purchase agreement purchase contract with Peaceful for a total consideration of RMB89.8 million (equivalent to US\$14.3 million) to purchase certain production and testing equipment. By the end of June 2017, Sichuan Xinda expected to launch an integrated ERP system, which resulted in the equipment to be purchased under the original contracts with Hailezi not meeting the production requirements. Thus the original contracts have been terminated with the amount of RMB2,222.9 million (equivalent to US\$353.5 million), and Hailezi agreed to refund the prepayment in the amount of RMB1,704.9 million (equivalent to US\$271.1 million) by the end of March 2018, out of the total prepayment made by Sichuan Xinda of RMB1,722.9 million (equivalent to US\$273.9 million). As of March 31, 2018, Hailezi has refunded the prepayment in the amount of RMB1,704.9 million (equivalent to US\$271.1 million). Off-Balance Sheet Arrangements

We have not engaged in any off-balance sheet transactions.

Item 3. Quantitative and Qualitative Disclosures about Market Risks

Interest Rate Risk

We are exposed to interest rate risk primarily with respect to our short-term loans, long-term bank loans, notes payable, cash and cash equivalents, restricted cash and time deposits. Although the interest rates, which are based on the banks' prime rates are fixed for the terms of the loans and deposits, increase in interest rates will increase our interest expense.

A hypothetical 1.0% increase in the annual interest rate for all of our credit facilities under which we had outstanding borrowings as of March 31, 2018 would decrease income before income taxes by approximately US\$2.0 million for the quarter ended March 31, 2018. Management monitors the banks' prime rates in conjunction with our cash requirements to determine the appropriate level of debt balances relative to other sources of funds. We have not entered into any hedging transactions in an effort to reduce our exposure to interest rate risk.

Foreign Currency Exchange Rates

The majority of our revenues are collected in and our expenses are paid in RMB. We face foreign currency rate translation risks when our results are translated to U.S. dollars.

The RMB was relatively stable against the U.S. dollar at approximately 8.28 RMB to the US\$1.00 until July 21, 2005 when the Chinese currency regime was altered resulting in a 2.1% revaluation versus the U.S. dollar. From July 21, 2005 to June 30, 2010, the RMB exchange rate was no longer linked to the U.S. dollar but rather to a basket of currencies with a 0.3% margin of fluctuation resulting in further appreciation of the RMB against the U.S. dollar. Since June 30, 2009, the exchange rate had remained stable at 6.8307 RMB to 1.00 U.S. dollar until June 30, 2010 when the People's Bank of China allowed a further appreciation of the RMB by 0.43% to 6.798 RMB to 1.00 U.S. dollar. The People's Bank of China allowed the RMB and U.S. dollar exchange rate to fluctuate within 1% on April 16, 2012 and 2% on March 17, 2014, respectively. On March 31, 2018, the RMB traded at 6.2881 RMB to 1.00 U.S. dollar.

There remains international pressure on the Chinese government to adopt an even more flexible currency policy and the exchange rate of RMB is subject to changes in China's government policies which are, to a large extent, dependent on the economic and political development both internationally and locally and the demand and supply of RMB in the domestic market. There can be no assurance that such exchange rate will continue to remain stable in the future amongst the volatility of currencies, globalization and the unstable economies in recent years. Since (i) our revenues and net income of our PRC operating entities are denominated in RMB, and (ii) the payment of dividends, if any, will be in U.S. dollars, any decrease in the value of RMB against U.S. dollars would adversely affect the value of the shares and dividends payable to shareholders, in U.S. dollars.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company's management has evaluated, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operations of the Company's

disclosure controls and procedures (as defined in Securities Exchange Act Rule 13a-15(e)), as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were not effective because of material weakness in our internal control over financial reporting as disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

Notwithstanding management's assessment that our internal control over financial reporting was ineffective as of March 31, 2018. We believe that our unaudited condensed consolidated financial statements included in this Quarterly Report present fairly our financial position, results of operations and cash flows for the three months ended March 31, 2018 in all material respects.

(b) Changes in internal controls.

During the three months ended March 31, 2018, our efforts to improve our internal controls over financial reporting 1) adopting procedures to evaluate and assess performance of directors, officers and employees of the Company, (2) internal meetings, discussions, trainings and seminars periodically to review and improve our internal control procedures; (3) recruiting qualified accounting staff in Xinda CI (Beijing) with requisite expertise and knowledge to help improve our internal control procedures. We plan to improve on the above-referenced weakness by the end of the fiscal year ending December 31, 2018.

Other than the foregoing, there has been no other changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our first fiscal quarter ended March 31, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
