

YORK WATER CO
Form 10-Q
August 14, 2006

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934

For Quarter ended June 30, 2006

Commission file number 0-690

THE YORK WATER COMPANY
(Exact name of registrant as specified in its charter)

PENNSYLVANIA
(State or other jurisdiction of
incorporation or organization)

23-1242500
(I.R.S. Employer
Identification No.)

130 EAST MARKET STREET
YORK, PENNSYLVANIA
(Address of principal executive offices)

17401
(Zip Code)

(717) 845-3601
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES

NO

Indicate by checkmark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-accelerated Filer

Indicate by checkmark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES

NO

Edgar Filing: YORK WATER CO - Form 10-Q

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common stock, No par value	6,954,726 Shares outstanding as of August 9, 2006

Supplemental schedule of non cash investing and financing activities:

Accounts payable includes \$2,346 in 2006 and \$558 in 2005 for the construction of utility plant.

Accounts payable and other deferred credits includes \$271 in 2006 for the acquisition of water systems.

The change in notes receivable includes (\$5) in 2005 offset by like amounts of customer advances.

The accompanying notes are an integral part of these statements.

THE YORK WATER COMPANY

Notes to Interim Financial Statements
(In thousands of dollars, except per share amounts)

1. **Basis of Presentation**

The interim consolidated financial statements are unaudited but, in the opinion of management, reflect all adjustments, consisting of only normal recurring accruals, necessary for a fair presentation of results for such periods. Because the consolidated financial statements cover an interim period, they do not include all disclosures and notes normally provided in annual financial statements, and therefore, should be read in conjunction with the consolidated financial statements and notes thereto contained in the Company's Annual Report to Shareholders for the year ended December 31, 2005.

Operating results for the three and six month periods ended June 30, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006.

2. **Basic Earnings Per Share**

Basic earnings per share for the three months ended June 30, 2006 and 2005 were based on weighted average shares outstanding of 6,943,837 and 6,900,569, respectively.

Basic earnings per share for the six months ended June 30, 2006 and 2005 were based on weighted average shares outstanding of 6,939,491 and 6,894,989, respectively.

Since the Company has no common stock equivalents outstanding, there is no required calculation for diluted earnings per share.

3. **Reclassification**

Certain 2005 amounts have been reclassified to conform to the 2006 presentation. Such reclassifications had no effect on net income.

4. **Capital Commitments**

As of June 30, 2006 the Company had committed a total of \$4.2 million for a new meter reading system to be completed in early 2007. As of the end of the quarter, \$0.9 million remained to be incurred.

The Company announced the acquisition of the Abbottstown Borough Water System during the first quarter of 2006 at a purchase price of approximately \$0.9 million. Settlement on this acquisition is expected to take place between September and December 2006.

5. **Pensions****Components of Net Periodic Pension Cost**

	Three Months Ended June 30		Six Months Ended June 30	
	2006	2005	2006	2005
Service Cost	\$ 171	\$ 146	\$ 342	\$ 293
Interest Cost	264	255	529	509
Expected return on plan assets	(249)	(240)	(497)	(480)
Amortization of loss	57	37	113	74
Amortization of prior service cost	67	69	134	139
Rate-regulated adjustment	(198)	(155)	(396)	(310)
Net periodic pension expense	\$ 112	\$ 112	\$ 225	\$ 225

Employer Contributions

The Company previously disclosed in its financial statements for the year ended December 31, 2005 that it expected to contribute \$450 to its pension plans in 2006. As of June 30, 2006, no contributions had been made. The company expects to make the \$450 contribution in the fourth quarter of 2006.

6. **Interest Rate Swap Agreement**

The Company utilizes an interest rate swap agreement to convert its variable-rate debt to a fixed rate (cash flow hedge). The effective portion of the gain or loss on a derivative designated and qualifying as a cash flow hedging instrument is initially reported as a component of other comprehensive income and subsequently reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. The cumulative ineffective portion of the gain or loss on the derivative instrument, if any, is recognized currently in earnings. As of June 30, 2006, there was no cumulative ineffectiveness on the Company's interest rate swap.

9. Long-Term Debt

	As of June 30, 2006	As of Dec. 31, 2005

Financial Condition and Results of Operations
(In thousands of dollars, except per share amounts)**

Forward-looking Statements

Certain statements contained herein and elsewhere in this Form 10-Q which are not historical facts are forward-looking statements under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements address among other things: various federal and state regulations concerning water quality and environmental standards; the adequacy of approved rates to allow for a fair rate of return on the investment in utility plant; the timeliness of rate relief; quantity of rainfall and temperature; industrial demand; financing costs; energy rates; consummation of capital markets transactions to finance capital expenditure projects; and environmental and water quality regulations, as well as information contained elsewhere in this report preceded by, followed by, or including the words "believes," "expects," "anticipates," "plans," or similar expressions.

The statements are based on a number of assumptions concerning future events, many of which are outside the Company's control. The Company cautions that a number of important factors could cause the actual results to differ materially from those expressed in any forward-looking statements made on behalf of the Company. The Company undertakes no obligation to update or revise forward-looking statements, whether as a result of new information, future events or otherwise.

General Information

The business of the Company is to impound, purify and distribute water. The Company operates entirely within its franchised territory, which covers 34 municipalities within York County, Pennsylvania. The Company is regulated by the Pennsylvania Public Utility Commission, or PPUC, in the areas of billing, payment procedures, dispute processing, terminations, service territory, and rate setting. The Company must obtain PPUC approval before changing any of the aforementioned procedures. Water service is supplied through the Company's own distribution system. The Company obtains its water supply from the south branch and east branch of the Codorus Creek, which drains an area of approximately 117 square miles. The Company has two reservoirs, Lake Williams and Lake Redman, which together hold up to approximately 2.23 billion gallons of water. The Company has a 15-mile pipeline from the Susquehanna River to Lake Redman which provides access to an additional supply of 12 million gallons of water per day. As of June 30, 2006, the Company's average daily availability was approximately 35 million gallons, and consumption was approximately 18.2 million gallons daily.

The Company's service territory had an estimated population of 165,000 as of June 30, 2006. Industry within the Company's service territory is diversified, manufacturing such items as fixtures and furniture, electrical machinery, food products, paper, ordnance units, textile products, air conditioning systems, barbells and motorcycles.

The Company's business is somewhat dependent on weather conditions, particularly the amount of rainfall; however, minimum customer charges are in place, and the Company expects to cover its fixed costs of operations under all likely weather conditions.

The Company's business does not require large amounts of working capital and is not dependent on any single customer or a very few customers for a material portion of its business. Increases in revenues are generally dependent on our ability to obtain rate increases from regulatory authorities in a timely manner and in an adequate amount, and increasing volumes of water sold through increased consumption and increases in the number of customers served.

Results of Operations

Three Months Ended June 30, 2006 Compared
With Three Months Ended June 30, 2005

Net income for the second quarter of 2006 was \$1,466, a decrease of \$12, or 0.8%, from net income of \$1,478 for the same period of 2005. Increased operating expenses and higher short-term interest expenses were the primary contributing factors. The increase in expenses was partially offset by increased water operating revenues.

Water operating revenues for the three months ended June 30, 2006 increased \$322, or 4.8%, from \$6,694 for the three months ended June 30, 2005 to \$7,016 for the corresponding 2006 period. Increases in our revenues are generally dependent on our ability to obtain rate increases from regulatory authorities and increasing our volumes of water sold through increased consumption and increases in the number of customers served. The average number of customers served in the second quarter of 2006 increased as compared to the same period in 2005 by 2,438 customers, from 53,843 to 56,281 customers due to growth in our service territory and our acquisition of Spring Grove Water Company on July 6, 2005. Despite this increase in customers, the total per capita volume of water sold in the second quarter of 2006 decreased compared to the corresponding 2005 period due to reduced consumption in our service territory.

Operating expenses for the second quarter of 2006 increased \$315, or 9.0%, from \$3,502 for the second quarter of 2005 to \$3,817 for the corresponding 2006 period. Higher salaries due to higher wages and additional employees of approximately \$120, increased contractual services for system implementation, internal controls and painting expense aggregating approximately \$74, higher depreciation expense of approximately \$47 due to increased plant investment and increased power costs due to higher rates and additional facilities of approximately \$31 were the principal reasons for the increase. Higher transportation expenses due to additional vehicles and increased gas prices, higher 401k contributions and increased pension costs aggregating approximately \$48 also contributed to the increase. The increase was partially offset by reduced hydrant expense primarily due to capitalization of approximately \$58.

Interest expense on long-term debt for the second quarter of 2006 was \$24 lower than the same period in 2005 primarily due to the remarketing of the Company's 6.0% Industrial Development Authority Revenue Refunding Bonds, Series 1995, and the interest rate being redetermined to 3.75% on June 1, 2005.

Interest expense on short-term debt for the second quarter of 2006 was \$141 higher than the same period in 2005 due to an increase in short-term borrowings. The average short-term debt outstanding was \$10,063 for the second quarter of 2006 and \$650 for the second quarter of 2005.

Allowance for funds used during construction increased \$19, from \$22 in the second quarter of 2005 to \$41 in the 2006 period, due to an increase in construction expenditures which were eligible for interest.

Other expenses, net increased by \$10 in 2006 as compared to 2005 primarily due to increased non-operating property maintenance expenses.

Federal and state income taxes decreased by \$89, or 10.4%, due to the qualified domestic production deduction and lower taxable income. The Company's effective tax rate was 34.3% in the second quarter of 2006 and 36.6% in the second quarter of 2005.

Six Months Ended June 30, 2006 Compared
With Six Months Ended June 30, 2005

Net income for the first half of 2006 was \$2,725, an increase of \$17, or 0.6%, from net income of \$2,708 for the same period of 2005. Higher water operating revenues partially offset by increased operating expenses and higher short-term interest expenses were the primary contributing factors.

Water operating revenues for the six months ended June 30, 2006 increased \$702, or 5.4%, from \$12,928 for the six months ended June 30, 2005 to \$13,630 for the corresponding 2006 period. Increases in our revenues are generally dependent on our ability to obtain rate increases from regulatory authorities and increasing our volumes of water sold through increased consumption and increases in the number of customers served. The average number of customers served in the first half of 2006 increased as compared to the same period in 2005 by 2,477 customers, from 53,603 to 56,080 customers due to growth in our service territory and the Spring Grove acquisition. Despite this increase in customers, the total per capita volume of water sold in the first half of 2006 decreased compared to the corresponding 2005 period due to reduced consumption in our service territory.

Operating expenses for the first half of 2006 increased \$621, or 9.0%, from \$6,905 for the first half of 2005 to \$7,526 for the corresponding 2006 period. Higher salaries due to wage increases and additional employees of approximately \$214, higher depreciation expense of \$92 due to increased plant investment, increased distribution system maintenance of approximately \$84, increased contractual services for system implementation, internal controls and painting expense aggregating approximately \$78, higher transportation expenses due to additional vehicles and increased gas prices of approximately \$76 and increased power costs due to higher rates and additional facilities of approximately \$46 were the principal reasons for the increase. Higher chemical costs, customer billing expenses, 401k company contributions, capital stock, payroll and realty taxes aggregating approximately \$158 also contributed to the increase. The increase was partially offset by reduced hydrant expense primarily due to capitalization of approximately \$53, lower rate case expenses, reduced bank charges and higher indirect costs capitalized aggregating \$102.

Interest expense on long-term debt for the first half of 2006 was \$47 lower than the same period in 2005 primarily due to the remarketing of the Company's 6.0% Industrial Development Authority Revenue Refunding Bonds, Series 1995, and the interest rate being redetermined to 3.75% on June 1, 2005.

Interest expense on short-term debt for the first half of 2006 was \$260 higher than the same period in 2005 due to an increase in short-term borrowings. The average short-term debt outstanding was \$9,331 for the first half of 2006 and \$380 for the first half of 2005.

Allowance for funds used during construction increased \$29, from \$62 as of June 2005 to \$91 as of June 2006, due to an increase in construction expenditures which were eligible for interest.

Other expenses, net decreased by \$14 in 2006 as compared to 2005 primarily due to decreased contributions and lower supplemental retirement expenses aggregating \$64. The decrease was partially offset by higher non-operating property maintenance expenses and increased government relations fees.

Federal and state income taxes decreased by \$106, or 6.8%, due to the qualified domestic production deduction and lower taxable income. The Company's effective tax rate was 34.9% in the first half of 2006 and 36.6% in the first half of 2005.

Rate Developments

From time to time the Company files applications for rate increases with the PPUC and is granted rate relief as a result of such requests. The most recent rate request was filed by the Company on April 27, 2006, and sought an increase of \$4.5 million, which represents a 16.0% increase in rates. The request is currently under review. Any rate increase approved by the PPUC will be effective not later than January 26, 2007. There can be no assurance that the PPUC will grant the Company's rate increase in the amount requested, if at all.

Acquisitions

On February 2, 2006, the Company announced an agreement to acquire the water system of Abbottstown Borough which serves approximately 400 customers in Adams County, Pennsylvania. Following the acquisition, the Company will serve the customers of the Borough by using York Water's fully filtered and treated water supply. This treated supply will be provided through a main which is being constructed by the Company to interconnect with the Borough's existing distribution facilities. The interconnection is expected to be completed by October 1, 2006. The estimated acquisition cost of \$0.9 million will be funded through internally generated funds and short-term borrowings.

To date, the Company has obtained the required Pennsylvania Department of Transportation permit and stream crossing and construction permits from the Pennsylvania Department of Environmental Protection. The PPUC approved the acquisition on July 20, 2006, and construction has commenced on the water main, the booster station and the standpipe.

Liquidity and Capital Resources

As of June 30, 2006, current liabilities exceeded current assets by \$23,340. The excess was primarily due to the classification of the \$12.0 million aggregate principal amount of PEDFA Exempt Facilities Revenue Bonds, Series B of 2004 as current because the bondholders can tender their bonds at any time. The Company believes the bonds would be successfully remarketed if tendered. In addition, the Company had \$10,419 in short-term borrowings under its lines of credit as of June 30, 2006. The short-term borrowings were incurred to fund operations, acquisitions and construction expenditures. The Company maintains lines of credit aggregating \$20,500. Loans granted under these lines of credit bear interest at LIBOR plus 0.70 to 0.875%. The weighted average interest rate on short-term borrowings at June 30, 2006 was 5.89%. The lines of credit are unsecured and payable upon demand. The Company is not required to maintain compensating balances on its lines of credit.

During the first six months of 2006, net cash provided by operations and financing activities equaled net cash used in investing activities. The Company anticipates that this will continue to be the case during the remainder of 2006. Borrowings against the Company's lines of credit, proceeds from the issuance of common stock under its dividend reinvestment plan (stock issued in lieu of cash dividends), or DRIP, and employee stock purchase plan, or ESPP, customer advances and depending on market conditions, proceeds from potential long-term debt and common stock issues will be used to satisfy the need for additional cash.

During the first six months of 2006, the Company incurred \$8,726 of construction expenditures. Approximately \$2,690, or 31%, of the expenditures were for the automated meter reading system and the enterprise software system. An additional \$1,642 or 19% were for the main extension to Abbottstown and the construction and painting of various standpipes. The remaining expenditures were for routine distribution system expenditures. The Company financed such expenditures through internally generated funds, customers' advances, short-term borrowings, and proceeds from the issuance of common stock under its DRIP and ESPP. The Company anticipates construction expenditures for the remainder of 2006 of approximately \$9,300, primarily for projects relating to the Company's transmission and distribution systems, the aforementioned continuing projects and certain construction expenses related to the Abbottstown acquisition. The Company plans to finance these future expenditures using internally-generated funds, short-term borrowings, customer advances, proceeds from the issuance of common stock under the DRIP and ESPP, and depending on market conditions, proceeds from potential long-term debt and stock issuances.

The Company, like all other businesses, is affected by inflation, most notably by the continually increasing costs incurred to maintain and expand its service capacity. The cumulative effect of inflation results in significantly higher facility replacement costs which must be recovered from future cash flows. The ability of the Company to recover this increased investment in facilities is dependent upon future revenue increases, which are subject to approval by the

PPUC. The Company can provide no assurances that its rate increases will be approved by the PPUC; and, if approved, the Company cannot guarantee that these rate increases will be granted in a timely or sufficient manner to cover the investments and expenses for which the rate increase was sought.

Drought

On April 11, 2006 the Pennsylvania Department of Environmental Protection issued a drought watch for all 67 counties in Pennsylvania. The drought watch calls for a voluntary reduction in water use of 5 percent. Lower rainfall than normal has not affected the Company's source of supply, but conservation efforts on the part of customers may have reduced consumption. On June 29, 2006, the drought watch was lifted from York County, which includes our entire service territory.

Critical Accounting Estimates

The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements. Our accounting policies require us to make subjective judgments because of the need to make estimates of matters that are inherently uncertain. Our most critical accounting estimates include: regulatory assets and liabilities, the determination of the remaining life of our assets, revenue recognition and the discount rate used in our pension plan calculations. There has been no significant change in our accounting estimates or the method of estimation during the quarter ended June 30, 2006.

Off-Balance Sheet Transactions

The Company does not use off-balance sheet transactions, arrangements or obligations that may have a material current or future effect on financial condition, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenues or expenses. The Company does not use securitization of receivables or unconsolidated entities. The Company does not engage in trading or risk management activities, with the exception of the interest rate swap agreement previously mentioned, does not use derivative financial instruments for speculative trading purposes, has no lease obligations and does not have material transactions involving related parties.

Impact of Recent Accounting Pronouncements

In September 2005, the Emerging Issues Task Force (EITF) reached a consensus on Issue No. 04-13, "Accounting for Purchases and Sales of Inventory with the Same Counterparty." An entity may sell inventory to another entity from which it also purchases inventory to be sold in the same line of business. The inventory purchase and sales transactions may be pursuant to a single arrangement or separate arrangements, and the inventory purchased or sold may be in the form of raw materials, work-in-process (WIP), or finished goods. The consensus related to two issues regarding APB Opinion No. 29, "Accounting for Nonmonetary Transactions." This consensus is effective for new arrangements entered into, or modifications or renegotiations of existing arrangements, beginning in the first interim or annual reporting period beginning after March 15, 2006. This consensus had no impact on the Company's financial position or the results of operations.

In February 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 155, "Accounting for Certain Hybrid Financial Instruments - An Amendment of FASB Statements No. 133 and 140." SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative, clarifies which interest-only strips and principal-only strips are not subject to the requirements of Statement 133, establishes a requirement to evaluate interests in securitized financial assets for derivatives, clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives, and amends Statement 140 to eliminate the prohibition on a qualifying special-purpose entity from holding derivatives. This statement is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company is currently evaluating this standard for consideration in future financings.

In March 2006, The FASB issued SFAS No. 156, "Accounting for Servicing of Financial Assets," to simplify accounting for separately recognized servicing assets and servicing liabilities. SFAS No. 156 amends SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities." Additionally, SFAS No. 156 permits, but does not require, an entity to choose either the amortization method or the fair value measurement method for measuring each class of separately recognized servicing assets and servicing liabilities. SFAS No. 156 applies to all separately recognized servicing assets and liabilities acquired or issued after the beginning of an entity's fiscal year that begins after September 15, 2006. The Company is currently evaluating this standard for its effects on future financial position and results of operations.

In June 2006, the EITF reached consensus on Issue 05-1, "Accounting for the Conversion of an Instrument that Became Convertible upon the Issuer's Exercise of a Call Option." This consensus requires an assessment of the substance of a conversion right at issuance as to whether it is considered reasonably possible that the conversion right will become exercisable absent the issuer's call. If so, the conversion upon call is accounted for as a conversion with no gain or loss, if not, then the conversion is accounted for as an extinguishment with a gain or loss. This consensus is not expected to have an impact on the Company's financial position or results of operations.

In June 2006, the EITF reached consensus on Issue 06-02, "Accounting for Sabbatical Leave and Other Similar Benefits Pursuant to FASB Statement No. 43." The task force determined that an employee's right to a compensated absence under a sabbatical leave (or other similar benefit arrangement) that requires a service period and does not increase its benefit with additional years of service, accumulates pursuant to paragraph 6(b) of SFAS No. 43, "Accounting for Compensated Absences," for arrangements in which the individual continues to be a compensated employee and is not required to perform duties for the entity during the absence. As a result, the estimated cost of the sabbatical must be accrued over the service period. This consensus had no impact on the Company's financial position or results of operations.

Also in June 2006, the EITF reached consensus on Issue 06-03, "Disclosure Requirements for Taxes Assessed by a Governmental Authority on Revenue-Producing Transaction." The consensus determined that sales, use, value added or excise taxes could be presented gross as revenues and costs or net depending upon a company's policy. If presented gross, the amount included in revenues and costs must be disclosed. This consensus had no impact on the Company's financial position or results of operation.

In July, the FASB issued FASB Staff Position (FSP) No. FAS 13-2, "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction," to provide guidance to a lessor in a transaction classified as a leveraged lease in accordance with SFAS No. 13, "Accounting for Leases." FSP No. FAS 13-2 amends SFAS No. 13 to require a lessor to recalculate a leveraged lease to reflect a change or projected change in the timing of the realization of tax benefits generated by that lease. This FSP will apply to fiscal years beginning after December 15, 2006 and is not expected to have an impact on the Company's financial position or results of operations.

In July, the FASB issued FASB Interpretation (FIN) No. 48, "Accounting for Uncertainty in Income Taxes." FIN No. 48 prescribes (a) a consistent recognition threshold and (b) a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and provides guidance on derecognition, classification, interest and penalties, accounting, disclosure and transition. The company is currently reviewing its tax positions to determine if they meet the recognition and measurement test of FIN No. 48. This interpretation is effective for fiscal years beginning after December 15, 2006.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company does not use off-balance sheet transactions, arrangements or obligations that may have a material current or future effect on financial condition, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenues or expenses. The Company does not use securitization of receivables or unconsolidated entities. The Company does not engage in trading or risk management activities with the exception of an interest rate swap agreement, described below, does not use derivative financial instruments for speculative trading purposes, has no lease obligations, and does not have material transactions involving related parties.

The Company's operations are exposed to market risks primarily as a result of changes in interest rates. This exposure to market risks relates to the Company's debt obligations under its lines of credit. The Company has lines of credit for up to \$20.5 million with two banks, under which there were borrowings of \$10.4 million outstanding as of June 30, 2006. Loans granted under these lines bear interest based upon LIBOR plus 0.70 to 0.875 percent. The weighted average interest rate on short-term borrowings outstanding at June 30, 2006 was 5.89%. Based on the Company's current level of borrowings, a 25-basis point increase in LIBOR would cause additional short-term interest expense of approximately \$26 on an annual basis. Other than lines of credit, the Company has long-term fixed rate debt obligations and a variable-rate long-term debt obligation, the Pennsylvania Economic Development Financing Authority, or the PEDFA, Series B issue.

In December 2004, the PEDFA issued \$12.0 million aggregate principal amount of PEDFA Exempt Facilities Revenue Bonds, Series B. The PEDFA then loaned the proceeds to the Company pursuant to a variable interest rate loan agreement with a maturity date of October 1, 2029. The interest rate on the loan as of June 30, 2006 was 4.05%. In connection with the loan agreement, the Company entered into an interest rate swap transaction that results in the Company's floating rate obligation becoming substantially a fixed rate obligation. The purpose of the interest rate swap is to manage the Company's exposure to fluctuations in the interest rate. See the "Liquidity and Capital Resources" section of "Management's Discussion and Analysis of Financial Condition and Results of Operations" of our 2005 Annual Report to Shareholders.

The \$12.0 million PEDFA Series B bonds can be tendered at any time. When the bonds are tendered they are subject to an annual remarketing agreement. As additional security, the Company also has a Standby Bond Purchase Agreement (also known as a liquidity facility) whereby bonds which can not be remarketed are purchased by a financial institution. The Standby Bond Purchase Agreement is also renewed annually. As a result, the \$12.0 million obligation was classified as current maturities of long-term debt. The Company believes the bonds would be successfully remarketed if tendered.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's President and Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this quarterly report. Based upon this evaluation, the Company's President and Chief Executive Officer along with the Chief Financial Officer concluded that the Company's disclosure controls and procedures as of the end of the period covered by this report are functioning effectively to provide reasonable assurance that the information required to be disclosed by the Company in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the President and Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

(b) Change in Internal Control over Financial Reporting

No change in the Company's internal control over financial reporting occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II - Other Information**Item 4. Submission of Matters to a Vote of Security Holders**

The Annual Meeting of the Shareholders of The York Water Company was convened May 1, 2006 at the William T. Morris Employee Center, 396 Hess Farm Road, in the City of York, Pennsylvania, at 1:00 P.M. for the purpose of taking action upon the following proposals:

- (1) To elect three (3) Directors to three-year terms of office.

The actions taken by the Shareholders concerning the election of Directors are as follows:

	Votes for Each Nominee	Votes Withheld for Each Nominee
George Hay Kain, III	5,498,123.19 votes	80,946.34 votes
George W. Hodges	5,536,719.41 votes	41,350.13 votes
Michael W. Gang	5,508,614.41 votes	69,455.13 votes

The following Directors' terms of office continued after the Annual Meeting:

John L. Finlayson	Irvin S. Naylor
Chloé R. Eichelberger	William T. Morris
Thomas C. Norris	Jeffrey S. Osman

- (2) To appoint Beard Miller Company LLP as independent public accountants to audit the financial statements of the Company for the year 2006.

The actions taken by the Shareholders concerning the appointment of Beard Miller Company LLP independent accountants are as follows:

For Approval	5,489,212.21	Shares
Against Approval	52,082.16	Shares
Abstaining From Voting	36,772.16	Shares

Item 6. Exhibits

The following Part 1 exhibits are attached to this report:

- 31.1 Certification of Chief Executive Officer, pursuant to Rule 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934.
- 31.2 Certification of Chief Financial Officer, pursuant to Rule 13a-14(a)/15d-14(a) under the Securities Exchange Act of 1934.
- 32.1 Certification of Chief Executive Officer, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
