AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

1. OVERVIEW, BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Overview. Agilent Technologies, Inc. ("we", "Agilent" or the "company"), incorporated in Delaware in May 1999, is a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow.

Our fiscal year-end is October 31, and our fiscal quarters end on January 31, April 30 and July 31. Unless otherwise stated, these dates refer to our fiscal year and fiscal quarters.

Basis of Presentation. We have prepared the accompanying financial data for the three and nine months ended July 31, 2016 and 2015 pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles ("GAAP") in the U.S. have been condensed or omitted pursuant to such rules and regulations. The accompanying financial data and information should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended October 31, 2015.

In the opinion of management, the accompanying condensed consolidated financial statements contain all normal and recurring adjustments necessary for a fair statement of our condensed consolidated balance sheet as of July 31, 2016 and October 31, 2015, condensed consolidated statement of comprehensive income (loss) for the three and nine months ended July 31, 2016 and 2015, condensed consolidated statement of operations for the three and nine months ended July 31, 2016 and 2015, and condensed consolidated statement of cash flows for the nine months ended July 31, 2016 and 2015.

Revision of Services and Other and Product Net Revenues and related Cost of Sales. In 2015, we revised amounts shown in our condensed consolidated statement of operations to more accurately reflect the character of items delivered to customers. Our diagnostic and genomics segment identified a stream of service revenues that had been presented as product revenue in the prior year. We have now revised prior year's presentation to show the revenue within services and other. The cost of sales associated with these newly identified service revenues has also been revised to align with the new presentation. For the three and nine months ended July 31, 2015 services and other revenue increased \$11 million and \$26 million and services and other cost of sales increased \$7 million and \$18 million with corresponding reductions in product revenue and cost of sales. These corrections to the classifications are not considered to be material to current or prior periods and had no impact to our results of operations previously reported in our condensed consolidated statement of operations.

Use of Estimates. The preparation of condensed consolidated financial statements in accordance with GAAP in the U.S. requires management to make estimates and assumptions that affect the amounts reported in our condensed consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, valuation of goodwill and purchased intangible assets, inventory valuation, share-based compensation, retirement and post-retirement plan assumptions and accounting for income taxes.

Variable Interest Entities. We make a determination upon entering into an arrangement whether an entity in which we have made an investment is considered a Variable Interest Entity (“VIE”). The company evaluates its investments in privately held companies on an ongoing basis. We have determined that as of July 31, 2016 there were no VIE’s required to be consolidated in the company’s consolidated financial statements because we do not have a controlling financial interest in any of the VIE’s that we have invested in nor are we the primary beneficiary. We account for these investments under either the equity or cost method, depending on the circumstances. We periodically reassess whether we are the primary beneficiary of a VIE. The reassessment process considers whether we have acquired the power to direct the most significant activities of the VIE through changes in governing documents or other circumstances. We also reconsider whether entities previously determined not to be VIEs have become VIEs, based on changes in facts and circumstances including changes in contractual arrangements and capital structure. As of July 31, 2016, the carrying value of our investments in VIE’s was \$101 million with a maximum exposure of \$108 million which includes our loans to our investments. The investments are included on the long term investments line of the condensed consolidated balance sheet.

During the nine months ended July 31, 2016, Agilent made a preferred stock investment in Lasergen for \$80 million. Agilent’s initial ownership stake was 48 percent and we have also joined the board of Lasergen and signed a collaboration agreement.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

We have the option to acquire all of the remaining shares of Lasergen until March 2, 2018, for additional consideration of \$105 million. Lasergen is a VIE, however, we do not consolidate the entity in our financial statements because we do not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance. Because of the nature of the preferred stock of Lasergen that we own, we account for this investment under the cost method. As of July 31, 2016, both the carrying value and maximum exposure of the Lasergen investment was \$80 million. The maximum exposure is equal to the carrying value because we do not have future funding commitments.

Fair Value of Financial Instruments. The carrying values of certain of our financial instruments including cash and cash equivalents, accounts receivable, accounts payable, accrued compensation and other accrued liabilities approximate fair value because of their short maturities. The fair value of long-term equity investments is determined using quoted market prices for those securities when available. For those long-term equity investments accounted for under the cost or equity method, their carrying value approximates their estimated fair value. Equity method investments are reported at the amount of the company's initial investment and adjusted each period for the company's share of the investee's income or loss and dividend paid. The fair value of our long-term debt, calculated from quoted prices which are primarily Level 1 inputs under the accounting guidance fair value hierarchy, exceeds the carrying value by approximately \$102 million and \$30 million as of July 31, 2016 and October 31, 2015, respectively. The change in the excess of fair value over carrying value in the nine months ended July 31, 2016 is due to fluctuations in market interest rates. The fair value of foreign currency contracts used for hedging purposes is estimated internally by using inputs tied to active markets. These inputs, for example, interest rate yield curves, foreign exchange rates, and forward and spot prices for currencies are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities. See also Note 9, "Fair Value Measurements" for additional information on the fair value of financial instruments.

Goodwill and Purchased Intangible Assets. Under the authoritative guidance we have the option to perform a qualitative assessment to determine whether further impairment testing is necessary. The accounting standard gives an entity the option to first assess qualitative factors to determine whether performing the two-step test is necessary. If an entity believes, as a result of its qualitative assessment, that it is more-likely-than-not (i.e. greater than 50% chance) that the fair value of a reporting unit is less than its carrying amount, the quantitative impairment test will be required. Otherwise, no further testing will be required.

The guidance includes examples of events and circumstances that might indicate that a reporting unit's fair value is less than its carrying amount. These include macro-economic conditions such as deterioration in the entity's operating environment or industry or market considerations; entity-specific events such as increasing costs, declining financial performance, or loss of key personnel; or other events such as an expectation that a reporting unit will be sold or a sustained decrease in the stock price on either an absolute basis or relative to peers.

If it is determined, as a result of the qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, the provisions of authoritative guidance require that we perform a two-step impairment test on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. The second step (if necessary) measures the amount of impairment by applying fair-value-based tests to the individual assets and liabilities within each reporting unit. As defined in the authoritative guidance, a reporting unit is an operating segment, or one level below an operating segment. We aggregate components of an operating segment that have similar economic characteristics into our reporting units.

In fiscal year 2015, we assessed goodwill impairment for our three reporting units which consisted of three segments: life sciences and applied markets, diagnostics and genomics and Agilent CrossLab. We performed a quantitative test for goodwill impairment of the three reporting units, as of September 30, 2015. Based on the results of our testing, the

fair value of these reporting units are greater than their respective carrying values. Each quarter we review the events and circumstances to determine if goodwill impairment is indicated. There was no impairment of goodwill during the three and nine months ended July 31, 2016 and 2015.

Purchased intangible assets consist primarily of acquired developed technologies, proprietary know-how, trademarks, and customer relationships and are amortized using the best estimate of the asset's useful life that reflect the pattern in which the economic benefits are consumed or used up or a straight-line method ranging from 6 months to 15 years. In-process research and development ("IPR&D") is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When the IPR&D project is complete, it is reclassified as an amortizable purchased intangible asset and is amortized over its estimated useful life. If an IPR&D project is abandoned, Agilent will record a charge for the value of the related intangible asset to Agilent's condensed consolidated statement of operations in the period it is abandoned.

Agilent's indefinite-lived intangible assets are IPR&D intangible assets. The accounting guidance allows a qualitative approach for testing indefinite-lived intangible assets for impairment, similar to the issued impairment testing guidance for goodwill and allows the option to first assess qualitative factors (events and circumstances) that could have affected the significant inputs

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

used in determining the fair value of the indefinite-lived intangible asset to determine whether it is more-likely-than-not (i.e. greater than 50% chance) that the indefinite-lived intangible asset is impaired. An organization may choose to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to calculating its fair value. We performed a qualitative test for impairment of indefinite-lived intangible assets as of September 30, 2015. Based on the results of our qualitative testing, we believe that it is more-likely-than-not that the fair value of these indefinite-lived intangible assets is greater than their respective carrying values. Each quarter we review the events and circumstances to determine if impairment of indefinite-lived intangible assets is indicated. During the three and nine months ended July 31, 2016, we recorded an impairment of \$4 million due to the announced cancellation of a certain IPR&D project. There were no impairments in the three and nine months ended July 31, 2015.

2. REVISION OF PRIOR PERIOD FINANCIAL STATEMENTS

During the years ended October 31, 2014 and 2015, the company identified and recorded various out of period income tax adjustments. We determined that the errors were not material to the previously issued financial statements and disclosures included in our Annual Report on Form 10-K for the year ended October 31, 2014 or for any quarterly periods included therein or through our Quarterly Report on Form 10-Q for the nine months ended July 31, 2015. However, as a result of the company presenting continuing operations and discontinued operations for the first time in our Annual Report on Form 10-K for the year ended October 31, 2015, we determined that the effect of the errors is significant to our financial results for the year ending October 31, 2014 and 2013. Accordingly, we revised our historical financial statements presented in our Form 10-K for the year ended October 31, 2015.

For the three and nine months ended July 31, 2016, we are presenting comparative fiscal 2015 quarterly information. The fiscal 2015 results for the three and nine months ended July 31, 2015 have been revised to reflect the quarterly impact of the out of period adjustments described above. For the three months ended July 31, 2015 the following out of period adjustments were included in the as-reported column in the revision adjustment table and have been removed in the adjustments column: \$8 million of tax expense related to the correction of the U.S. deferred tax liability for unremitted earnings of foreign subsidiaries. In addition to the aforementioned, for the nine months ended July 31, 2015, the following out of period adjustments were included in the as-reported column in the revision adjustment table and have been removed in the adjustments column: \$4 million of tax expense related to the increase of foreign deferred tax liabilities for a prior year, \$13 million of tax benefit from the reduction in deferred tax liabilities due to tax rate changes in Denmark occurring in a prior year and \$4 million of tax expense attributable to an error discovered on a prior year U.S. tax return.

	Three Months Ended July 31, 2015

The adjustments resulted in the following revisions to our condensed consolidated statement of cash flow.

	Nine Months Ended July 31, 2015		
	As Reported	Adjustments	As Revised (1)
	(in millions)		
Net income	\$258	\$ 3	\$ 261
Deferred taxes	\$(15)	\$(1)	\$(16)
Changes in assets and liabilities:			
Other assets and liabilities	\$(162)	\$(2)	\$(164)
Net cash provided by operating activities	\$254	\$ —	\$ 254

(1) The presentation above of certain amounts from the consolidated statement of cash flow for the nine months ended July 31, 2015 does not include the adjustments related to the early adoption of new guidance which have also been made in the third quarter of fiscal year 2016. See Note 3 "New Accounting Pronouncements" for additional information.

3. NEW ACCOUNTING PRONOUNCEMENTS

There were no changes to the new accounting pronouncements as described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2015 except for the following:

In March 2016, the Financial Accounting Standards Board (“FASB”) issued amendments that change the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when the awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The standard also allows us to repurchase more of an employee’s shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made on an employee’s behalf for withheld shares should be presented as a financing activity on our cash flows statement, and provides an accounting policy election to account for forfeitures as they occur. The amendments also remove the requirement to delay the recognition of an excess tax benefit until it reduces current taxes payable. Under the new guidance the benefit will be recorded when it arises with a cumulative effect adjustment to opening retained earnings for previously unrecognized benefits. The new guidance is effective for us beginning November 1, 2017, with early adoption permitted.

We elected to early adopt the new guidance in the third quarter of fiscal year 2016, on a retrospective basis, which requires us to reflect any adjustments as of November 1, 2015, the beginning of the annual period that includes the interim period of adoption. The impact of adoption on previously reported quarterly results was the recognition of tax shortfalls of \$2 million in

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

our provision for income taxes for the first quarter of fiscal year 2016. Additional amendments to the accounting for income taxes on previously reported quarterly results was the recognition of the windfall tax benefits as a cumulative effect adjustment to opening retained earnings of \$195 million together with an increase in deferred tax assets included in other assets of \$97 million, an increase in additional paid in capital of \$4 million, a reduction in other accrued liabilities of \$1 million and a decrease of \$99 million in other long term liabilities. There was no impact from minimum statutory withholding tax requirements to retained earnings as of November 1, 2015. We have elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period.

The adoption of the new guidance did not have a significant impact on the calculation of diluted weighted average shares. The impact of the adoption on our previously reported quarterly results for fiscal year 2016 follows:

	Three Months Ended January 31, 2016		Six Months Ended April 30, 2016	
	As Reported	As Adjusted	As Reported	As Adjusted
	(in millions, except per share amounts)			
Condensed Consolidated Statement of Operations:				
Provision for income taxes	\$19	\$ 21	\$45	\$ 47
Net income	\$123	\$ 121	\$214	\$ 212
Net income per share - Basic	\$0.37	\$ 0.37	\$0.65	\$ 0.65
Net income per share - Diluted	\$0.37	\$ 0.36	\$0.65	\$ 0.64
Weighted average shares used in computing net income per share - Diluted	332	332	330	330

We elected to apply the presentation requirements for cash flows related to excess tax benefits and employee taxes paid for withheld shares retrospectively to all periods presented which resulted in an increase to both net cash from operations and net cash used in financing of \$1 million and \$6 million for the three and nine months ended July 31, 2016, respectively. The presentation requirements for cash flows also impacted our previously reported quarterly condensed consolidated statement of cash flows for fiscal years 2016 and 2015 as follows:

	Three Months Ended January 31, 2016		Six Months Ended April 30, 2016	
	As Reported	As Adjusted	As Reported	As Adjusted
	(in millions)			
Condensed Consolidated Statement of Cash Flows:				
Net cash provided by operating activities	\$104	\$ 111	\$360	\$ 365
Net cash used in financing activities	\$(132)	\$(139)	\$(102)	\$(107)

	Three Months Ended January 31, 2015		Six Months Ended April 30, 2015		Nine Months Ended July 31, 2015	
	As Reported	As Adjusted	As Reported	As Adjusted	As Revised ⁽¹⁾	As Adjusted
	(in millions)					

Condensed Consolidated Statement of Cash Flows:

Net cash provided by (used in) operating activities	\$(20)	\$(9)	\$163	\$175	\$254	\$271
Net cash used in financing activities	\$(828)	\$(839)	\$(929)	\$(941)	\$(1,039)	\$(1,056)

(1) See Note 2, "Revision of Prior Period Financial Statements" for additional information.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

In August 2016, the FASB issued amendments to address eight specific cash flow issues with the objective of reducing the existing diversity in practice. The amendments are effective for us beginning November 1, 2018 and interim periods in the following year. Early adoption is permitted. If we decide to early adopt the amendments, we will be required to adopt all of the amendments in the same period. We are evaluating the potential impact of the amendments on our consolidated statement of cash flows and disclosures.

In March 2016, the FASB issued amendments to simplify the transition to the equity method of accounting. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The amendments are effective for us beginning November 1, 2017 and interim periods in the following year. We are evaluating the potential impact of this amendment on our consolidated financial statements.

In February 2016, the FASB issued guidance which amends the existing accounting standards for leases. Consistent with existing guidance, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification. Under the new guidance, a lessee will be required to recognize right-of-use assets and lease liabilities on the balance sheet. The new guidance is effective for us beginning November 1, 2020, and interim periods in the following year. Early adoption of this guidance is permitted and we will be required to adopt using a modified retrospective approach. We are evaluating the timing and the impact of adopting this guidance on our consolidated financial statements and disclosures.

In January 2016, the FASB issued amendments to address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The standard requires entities to measure equity investments that do not result in consolidation and are not accounted for under the equity method at fair value and recognize any changes in fair value in net income. The provisions under this amendment are effective for us beginning November 1, 2018, and for interim periods in the following year and early adoption is not permitted. We are evaluating the impact of adopting this guidance to our consolidated financial statements.

In November 2015, the FASB issued guidance to simplify accounting for deferred taxes. Beginning on November 1, 2017 and including the interim periods following that date, we will be required to present all deferred tax balances as non-current. Existing GAAP guidance requires us to record deferred tax balances as either current or non-current in accordance with the classification of the underlying attributes. Early adoption of this guidance is permitted and may be applied either prospectively or retrospectively to all periods presented. We adopted this guidance at the end of the period ended April 30, 2016 prospectively and therefore, the July 31, 2016 condensed consolidated balance sheet reflects the new disclosure requirements but prior periods have not been adjusted.

In May 2014, the FASB issued amendments to the accounting guidance related to revenue recognition. The objective of the amendments was to significantly enhance comparability and clarify principles of revenue recognition practices across entities, industries, jurisdictions and capital markets. In March 2016, the FASB clarified the implementation guidance on principal versus agent considerations. In April 2016, the FASB clarified certain aspects of identifying performance obligations and licensing implementation guidance. In May 2016, the FASB provided additional guidance related to disclosure of remaining performance obligations, as well as other amendments to guidance on collectibility, non-cash consideration and the presentation of sales and other similar taxes collected from customers. The amendments are effective for us beginning November 1, 2018. Early adoption is permitted for us beginning November 1, 2017. The company is currently assessing the potential impact of these amendments on our consolidated

financial statements.

Other amendments to GAAP in the U.S. that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

12

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

4. SHARE-BASED COMPENSATION

Agilent accounts for share-based awards in accordance with the provisions of the authoritative accounting guidance which requires the measurement and recognition of compensation expense for all share-based payment awards made to our employees and directors including employee stock option awards, restricted stock units, employee stock purchases made under our employee stock purchase plan (“ESPP”) and performance share awards granted to selected members of our senior management under the long-term performance plan (“LTPP”) based on estimated fair values.

Participants in the LTPP are entitled to receive unrestricted shares of the company's stock after the end of a three-year period, if specified performance targets are met. Certain LTPP awards are generally designed to meet the criteria of a performance award with the performance metrics and peer group comparison based on the Total Stockholders' Return (“TSR”) set at the beginning of the performance period. Effective November 1, 2015, the Compensation Committee of the Board of Directors approved another type of performance stock award, for the company's executive officers and other key employees. Participants in this program are also entitled to receive unrestricted shares of the company's stock after the end of a three-year period, if specified performance targets based on Operating Margin (“OM”) over the three- year period are met. All LTPP awards granted after November 1, 2015, are subject to a one year post-vest holding period.

Based on the performance metrics the final LTPP award may vary from zero to 200 percent of the target award. The maximum award value cannot exceed 300 percent of the grant date target value. We consider the dilutive impact of these programs in our diluted net income per share calculation only to the extent that the performance conditions are expected to be met.

The impact on our results for share-based compensation was as follows:

	Three Months Ended July 31, 2016		Nine Months Ended July 31, 2015	
	(in millions)			
Cost of products and services	\$2	\$2	\$11	\$9
Research and development	1	1	4	4
Selling, general and administrative	8	7	33	31
Total share-based compensation expense	\$11	\$10	\$48	\$44

At July 31, 2016 and October 31, 2015, there was no share-based compensation capitalized within inventory.

The following assumptions were used to estimate the fair value of the options and LTPP grants.

	Three Months Ended July 31, 2016		Nine Months Ended July 31, 2015	
Stock Option Plans:				
Weighted average risk-free interest rate	—	—	—	1.7 %
Dividend yield	—	—	—	1 %
Weighted average volatility	—	—	—	28 %

Expected life	—	—	—	5.5yrs	
LTPP:					
Volatility of Agilent shares	24%	25%	24	% 25	%
Volatility of selected peer-company shares	14%-50%	12%-57%	14%-50%	12%-57%	
Price-wise correlation with selected peers	35%	37%	35	% 37	%

The fair value of share-based awards for employee stock option awards was estimated using the Black-Scholes option pricing model. Shares granted under the LTPP (TSR) were valued using a Monte Carlo simulation model. Both the Black-Scholes and Monte Carlo simulation fair value models require the use of highly subjective and complex assumptions, including the option's expected life and the price volatility of the underlying stock.

Due to the separation of Keysight on November 1, 2014, expected volatility for grants of options in fiscal 2015 was based on a 5.5 year average historical stock price volatility of a group of our peer companies. For the volatility of our 2016 and 2015 LTPP (TSR) grants, we used the 3 year average historical stock price volatility of a group of our peer companies. We believe our

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

historical volatility prior to the separation of Keysight is no longer relevant to use. For the grants of options and LTTP (TSR) prior to November 1, 2014, the expected stock price volatility assumption was determined using the historical volatility of Agilent's stock over the most recent historical period equivalent to the expected life of the stock options and LTTP (TSR).

In developing our estimated life assumption of our employees' stock options of 5.5 years, we considered the separation of Keysight and the historical option exercise behavior for our executive employees who were granted the majority of the options in the annual grants made which we believe is representative of future behavior. No stock options were granted during the three and nine months ended July 31, 2016.

The ESPP allows eligible employees to purchase shares of our common stock at 85 percent of the price at purchase and uses the purchase date to establish the fair market value.

The estimated fair value of restricted stock unit and LTTP (OM) awards is determined based on the market price of Agilent's common stock on the date of grant adjusted for expected dividend yield. The compensation cost for LTTP (OM) reflects the cost of awards that are probable to vest at the end of the performance period.

All awards granted in 2016 to our senior management employees have a one year post-vest holding restriction. The estimated discount associated with post-vest holding restrictions is calculated using the Finnerty model. The model calculates the potential lost value if the employee were able to sell the shares during the lack of marketability period, instead of being required to hold the shares. The model used the 3 year average historical stock price volatility of a group of our peer companies and an expected dividend yield to compute the discount. The grants made during 2016 have a discount of 5.5 percent while computing the fair value.

In the third quarter of fiscal year 2016, the company elected to early adopt new guidance that changes the accounting for certain aspects of share-based payments to employees. For additional details related to the new guidance see Note 3, "New Accounting Pronouncements."

5. INCOME TAXES

The company's effective tax rate from continuing operations was 7.5 percent and 14.5 percent for the three and nine months ended July 31, 2016, respectively. The company's effective tax rate from continuing operations was 11.7 percent and 11.6 percent for the three and nine months ended July 31, 2015, respectively. The income tax expense from continuing operations was \$10 million and \$57 million for the three and nine months ended July 31, 2016, respectively. The income tax expense from continuing operations was \$15 million and \$39 million for the three and nine months ended July 31, 2015, respectively.

The income tax provision from continuing operations for the three and nine months ended July 31, 2016 included net discrete tax benefits of \$6 million and \$9 million, respectively. The net discrete tax benefit for the three months ended July 31, 2016, included an out-of-period correcting tax benefit of \$11 million associated with a true-up of deferred tax liability for unremitted foreign earnings that should have been recorded in the third quarter of fiscal year 2015 and \$5 million net expense related to other discrete items. In addition to the aforementioned, the net discrete tax benefit for the nine months ended July 31, 2016, included \$5 million of tax benefit for the extension of the U.S. research and development tax credit attributable to the company's prior fiscal year, \$6 million of tax expense related to the curtailment gain recognized with respect to the U.S. retirement plan and Supplemental Benefits Plan, \$8 million tax benefit related to the realization of tax credits that reduce the deferred tax liability for unremitted foreign earnings, and a net \$4 million of other discrete tax expense primarily related to return-to-provision true-ups, including an

out-of-period adjustment recorded in the second quarter of fiscal year 2016 of \$5 million of expense in Germany. The out-of-period corrections were determined to be immaterial to the previously issued and current period financial statements.

The income tax provision from continuing operations for the three and nine months ended July 31, 2015 included net discrete expense of \$1 million and benefit of \$15 million, respectively. The net discrete tax expense for the three months ended July 31, 2015 included \$1 million of tax expense related primarily to interest accruals for uncertain tax positions. In addition to the aforementioned, the net discrete tax benefit for the nine months ended July 31, 2015 included \$16 million of tax benefit related to the de-registration of certain foreign branches, \$6 million of tax benefit for the extension of the U.S. research and development tax credit attributable to the company's prior fiscal year and \$6 million of other discrete tax expense primarily related to the accrual of interest expense associated with uncertain tax positions and return to provision adjustments.

In the third quarter of fiscal 2016, the company elected to early adopt Accounting Standard Update (“ASU”) 2016-09 “Improvements to Employees Share-Based Payment Accounting”. For details related to the adoption of this new accounting standard update see Note 3, “New Accounting Pronouncements”. In the three and nine months ended July 31, 2016 we recorded \$3 million and \$1 million of tax benefit, respectively, in respect of share based awards.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

In the U.S., tax years remain open back to the year 2012 for federal income tax purposes and the year 2000 for significant states. On September 22, 2015, we reached an agreement with the Internal Revenue Service ("IRS") for the tax years 2008 through 2011. During the first quarter of 2016, we made a payment of approximately \$9 million of tax plus interest as part of closing the exam. In 2015, we reclassified a portion of other long-term liabilities to other accrued liabilities related to uncertain tax positions of continuing operations that we expected to pay within the next twelve months. This amount was partially offset by a prepaid tax account of approximately \$3 million that the IRS allowed as an offset to the \$12 million in incremental taxes. The settlement resulted in the recognition, within the continuing operations, of previously unrecognized tax benefits of \$119 million, offset by a tax liability on foreign distributions of approximately \$99 million principally related to the repatriation of foreign earnings.

In other major jurisdictions where the company conducts business, the tax years generally remain open back to the year 2003. With these jurisdictions and the U.S., it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitation or a tax audit settlement which will be partially offset by an anticipated tax liability related to unremitted foreign earnings, where applicable. Given the number of years and numerous matters that remain subject to examination in various tax jurisdictions, management is unable to estimate the range of possible changes to the balance of our unrecognized tax benefits.

On July 27, 2015, the U.S. Tax Court issued an opinion in *Altera Corp. v. Commissioner* related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision was entered by the U.S. Tax Court on December 1, 2015. At this time, the U.S. Department of the Treasury has not withdrawn the requirement from its regulations to include stock-based compensation in an intercompany cost-sharing arrangement. The IRS notified the U.S. Court of Appeals for the Ninth Circuit on February 19, 2016 of its intent to appeal the Tax Court's decision in the case. We concluded that no adjustment to our consolidated financial statements is appropriate at this time due to the uncertainties with respect to the ultimate resolution of this case.

6. NET INCOME PER SHARE

The following is a reconciliation of the numerator and denominator of the basic and diluted net income per share computations for the periods presented below:

	Three Months Ended July 31, 2015		Nine Months Ended July 31, 2015	
	2016 (As Revised)		2016 (As Revised)	
	(in millions)			
Numerator:				
Income from continuing operations	\$ 124	\$ 113	\$ 336	\$ 298
Loss from discontinued operations	—	(2)	—	(37)
Net income	\$ 124	\$ 111	\$ 336	\$ 261
Denominator:				
Basic weighted-average shares	325	332	326	334
Potential common shares— stock options and other employee stock plans	3	2	3	2
Diluted weighted-average shares	328	334	329	336

The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense and the dilutive effect of in-the-money options and non-vested restricted stock units. Under the treasury stock method, the amount the employee must pay for exercising stock options and unamortized share-based compensation expense collectively are assumed proceeds to be used to repurchase hypothetical shares. An increase in the fair market value of the company's common stock can result in a greater dilutive effect from potentially dilutive awards.

We exclude stock options with exercise prices greater than the average market price of our common stock from the calculation of diluted earnings per share because their effect would be anti-dilutive. For the three and nine months ended July 31, 2016, zero and 1.1 million options to purchase shares were excluded from the calculation of diluted earnings per share, respectively. For the three and nine months ended July 31, 2015, 1.2 million and 856,900 options to purchase shares were excluded from the calculation of diluted earnings per share, respectively. In addition, we exclude from the calculation of diluted earnings per share stock options, ESPP, LTPP and restricted stock awards whose combined exercise price and unamortized fair value were greater than the average

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

market price of our common stock because their effect would also be anti-dilutive. For the three and nine months ended July 31, 2016, zero and 306,100 additional shares were excluded from the calculation of diluted earnings per share, respectively. For the three and nine months ended July 31, 2015, 80,900 and 487,100 additional shares were excluded from the calculation of diluted earnings per share, respectively.

7. INVENTORY

	July 31, 2016	October 31, 2015
	(in millions)	
Finished goods	\$ 351	\$ 362
Purchased parts and fabricated assemblies	192	179
Inventory	\$ 543	\$ 541

8. GOODWILL AND OTHER INTANGIBLE ASSETS

The following table presents goodwill balances and the movements for each of our reportable segments during the nine months ended July 31, 2016:

	Life Sciences and Applied Markets	Diagnostics and Genomics	Agilent CrossLab	Total
	(in millions)			
Goodwill as of October 31, 2015	\$ 650	\$ 1,234	\$ 482	\$ 2,366
Foreign currency translation impact	5	14	3	22
Goodwill arising from acquisitions	137	—	—	137
Goodwill as of July 31, 2016:	\$ 792	\$ 1,248	\$ 485	\$ 2,525

The components of other intangibles as of July 31, 2016 and October 31, 2015 are shown in the table below:

	Purchased Other Intangible Assets		
	Gross Carrying Amount	Accumulated Amortization	Net Book Value
	(in millions)		
As of October 31, 2015:			
Purchased technology	\$ 746	\$ 476	\$ 270
Trademark/Tradename	141	50	91
Customer relationships	230	168	62
Total amortizable intangible assets	1,117	694	423
In-Process R&D	22	—	22
Total	\$ 1,139	\$ 694	\$ 445
As of July 31, 2016:			
Purchased technology	\$ 830	\$ 553	\$ 277
Backlog	1	1	—

Edgar Filing: AGILENT TECHNOLOGIES INC - Form 10-Q

Trademark/Tradename	151	59	92
Customer relationships	263	208	55
Total amortizable intangible assets	1,245	821	424
In-Process R&D	18	—	18
Total	\$ 1,263	\$ 821	\$ 442

On November 1, 2015, we acquired Seahorse Bioscience, a leader in providing instruments and assay kits for measuring cell metabolism and bioenergetics, for \$242 million. As a result, we recorded additions to goodwill of \$137 million and additions to other intangible assets of \$118 million during the nine months ended July 31, 2016. During the nine months ended July 31, 2016, other intangible assets increased \$3 million, due to the impact of foreign exchange translation.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

In the three and nine months ended July 31, 2016, we recorded \$4 million of impairments of other intangible assets related to the cancellation of an in-process research and development project. In the three and nine months ended July 31, 2015, there were no impairments of other intangible assets.

Amortization expense of intangible assets was \$37 million and \$120 million for the three and nine months ended July 31, 2016, respectively. Amortization expense of intangible assets was \$38 million and \$119 million for the three and nine months ended July 31, 2015, respectively.

Future amortization expense related to existing finite-lived purchased intangible assets for the remainder of fiscal year 2016 and for each of the five succeeding fiscal years and thereafter is estimated below:

Estimated future amortization expense:

(in millions)

Remainder of 2016	\$32
2017	\$112
2018	\$82
2019	\$58
2020	\$48
2021	\$35
Thereafter	\$57

9. FAIR VALUE MEASUREMENTS

The authoritative guidance defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, we consider the principal or most advantageous market and assumptions that market participants would use when pricing the asset or liability.

Fair Value Hierarchy

The guidance establishes a fair value hierarchy that prioritizes the use of inputs used in valuation techniques into three levels. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. There are three levels of inputs that may be used to measure fair value:

Level 1- applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2- applies to assets or liabilities for which there are inputs other than quoted prices included within level 1 that are observable, either directly or indirectly, for the asset or liability such as: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in less active markets; or other inputs that can be derived principally from, or corroborated by, observable market data.

Level 3- applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

Financial Assets and Liabilities Measured at Fair Value on a Recurring Basis

Financial assets and liabilities measured at fair value on a recurring basis as of July 31, 2016 were as follows:

	Fair Value Measurement at July 31, 2016 Using			
	Quoted Prices in Active Markets for Identical Assets (Level 1)		Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	July 31, 2016	July 31, 2016	July 31, 2016	July 31, 2016

Long-term					
Deferred compensation liability	35	—	35	—	
Total liabilities measured at fair value	\$40	\$—	\$ 40	\$	—

Our money market funds and trading securities investments are generally valued using quoted market prices and therefore are classified within level 1 of the fair value hierarchy. Our derivative financial instruments are classified within level 2, as there is not an active market for each hedge contract, but the inputs used to calculate the value of the instruments are tied to active markets. Our deferred compensation liability is classified as level 2 because, although the values are not directly based on quoted market prices, the inputs used in the calculations are observable.

Trading securities, which is comprised of mutual funds, bonds and other similar instruments, and deferred compensation liability are reported at fair value, with gains or losses resulting from changes in fair value recognized currently in net income. Certain derivative instruments are reported at fair value, with unrealized gains and losses, net of tax, included in accumulated

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

other comprehensive loss within stockholders' equity. Realized gains and losses from the sale of these instruments are recorded in net income.

Impairment of Investments. There were no impairments of investments for the three and nine months ended July 31, 2016 and 2015.

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

For the three and nine months ended July 31, 2016, long-lived assets held and used relating to IPR&D projects with a carrying amount of \$4 million were written down to their fair value of zero, resulting in an impairment charge of \$4 million, which was included in net income. For the three and nine months ended July 31, 2015, there were no impairments of long-lived assets held and used. For the three and nine months ended July 31, 2016 and 2015, there were no impairments of long-lived assets held for sale.

10. DERIVATIVES

We are exposed to foreign currency exchange rate fluctuations and interest rate changes in the normal course of our business. As part of our risk management strategy, we use derivative instruments, primarily forward contracts, purchased options to hedge economic and/or accounting exposures resulting from changes in foreign currency exchange rates.

Fair Value Hedges

We are exposed to interest rate risk due to the mismatch between the interest expense we pay on our loans at fixed rates and the variable rates of interest we receive from cash, cash equivalents and other short-term investments. We have issued long-term debt in U.S. dollars at fixed interest rates based on the market conditions at the time of financing. The fair value of our fixed rate debt changes when the underlying market rates of interest change, and, in the past, we have used interest rate swaps to change our fixed interest rate payments to U.S. dollar LIBOR-based variable interest expense to match the floating interest income from our cash, cash equivalents and other short term investments. As of July 31, 2016, all interest rate swap contracts had either been terminated or had expired.

On November 25, 2008, we terminated two interest rate swap contracts associated with our 2017 senior notes that represented the notional amount of \$400 million. On October 20, 2014 we prepaid \$500 million out of \$600 million principal of our 2017 senior notes and fully amortized the associated proportionate deferred gain to other income (expense). The remaining gain to be amortized related to the \$100 million of 2017 senior notes at July 31, 2016 was \$1 million. On August 9, 2011, we terminated five interest rate swap contracts related to our 2020 senior notes that represented the notional amount of \$500 million. The remaining gain to be amortized at July 31, 2016 was \$16 million. All deferred gains from terminated interest rate swaps are being amortized over the remaining life of the respective senior notes.

Cash Flow Hedges

We enter into foreign exchange contracts to hedge our forecasted operational cash flow exposures resulting from changes in foreign currency exchange rates. These foreign exchange contracts, carried at fair value, have maturities between one and twelve months. These derivative instruments are designated and qualify as cash flow hedges under the criteria prescribed in the authoritative guidance and are assessed for effectiveness against the underlying exposure every reporting period. Changes in the time value of the foreign exchange contract are excluded from the assessment

of hedge effectiveness and are recognized in other income (expense) each period. The changes in fair value of the effective portion of the derivative instrument are recognized in accumulated other comprehensive income (loss). Amounts associated with cash flow hedges are reclassified to cost of sales in the condensed consolidated statement of operations when the forecasted transaction occurs. If it becomes probable that the forecasted transaction will not occur, the hedge relationship will be de-designated and amounts accumulated in other comprehensive income (loss) will be reclassified to other income (expense) in the current period. Changes in the fair value of the ineffective portion of derivative instruments are recognized in other income (expense) in the condensed consolidated statement of operations in the current period. We record the premium paid (time value) of an option on the date of purchase as an asset. For options designated as cash flow hedges, changes in the time value are excluded from the assessment of hedge effectiveness and are recognized in other income (expense) over the life of the option contract. Ineffectiveness in the three and nine months ended July 31, 2016 and 2015 was not significant. For the three and nine months ended July 31, 2016 and 2015 gains and losses recognized in other income (expense) due to de-designation of cash flow hedge contracts were not significant.

In July 2012, Agilent executed treasury lock agreements for \$400 million in connection with future interest payments to be made on our 2022 senior notes issued on September 10, 2012. We designated the treasury lock as a cash flow hedge. The

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

treasury lock contracts were terminated on September 10, 2012 and we recognized a deferred gain in accumulated other comprehensive income which is being amortized to interest expense over the life of the 2022 senior notes. The remaining gain to be amortized related to the treasury lock agreements at July 31, 2016 was \$2 million.

In February 2016, Agilent executed three forward-starting pay fixed/receive variable interest rate swaps for the notional amount of \$300 million in connection with future interest payments associated with the planned issuance of debt in the form of senior notes later this fiscal year. The contract term allows us to hedge the interest rate risk and lock-in a benchmark rate on our anticipated debt issuance. These derivative instruments are designated and qualify as cash flow hedges under the criteria prescribed in the authoritative guidance. The changes in fair value of these derivative instruments will be recognized in accumulated other comprehensive income (loss). If the benchmark interest rates increase between the date of entry into the swap arrangement and termination, then the fair value of the swap increases. Conversely if benchmark interest rates decrease between the date of entry into the swap arrangement and termination, then the fair value of the swap decreases. For the three and nine months ended July 31, 2016, the change in fair value of the swap was classified as a loss in accumulated other comprehensive income (loss) of \$11 million and \$14 million, respectively. Amounts associated with these cash flow hedges will be reclassified to interest expense in the condensed consolidated statement of operations when the forecasted future interest payments on the senior notes occur. The coupon (interest rate payable) of the senior notes at issue will be comprised of the benchmark interest rate (which has been fixed by the swap) and the yield spread.

Other Hedges

Additionally, we enter into foreign exchange contracts to hedge monetary assets and liabilities that are denominated in currencies other than the functional currency of our subsidiaries. These foreign exchange contracts are carried at fair value and do not qualify for hedge accounting treatment and are not designated as hedging instruments. Changes in value of the derivative are recognized in other income (expense) in the condensed consolidated statement of operations, in the current period, along with the offsetting foreign currency gain or loss on the underlying assets or liabilities.

Our use of derivative instruments exposes us to credit risk to the extent that the counterparties may be unable to meet the terms of the agreement. We do, however, seek to mitigate such risks by limiting our counterparties to major financial institutions which are selected based on their credit ratings and other factors. We have established policies and procedures for mitigating credit risk that include establishing counterparty credit limits, monitoring credit exposures, and continually assessing the creditworthiness of counterparties.

A number of our derivative agreements contain threshold limits to the net liability position with counterparties and are dependent on our corporate credit rating determined by the major credit rating agencies. The counterparties to the derivative instruments may request collateralization, in accordance with derivative agreements, on derivative instruments in net liability positions.

The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a net liability position as of July 31, 2016, was \$19 million. The credit-risk-related contingent features underlying these agreements had not been triggered as of July 31, 2016.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

There were 73 foreign exchange forward contracts open as of July 31, 2016 and designated as cash flow hedges. There were 156 foreign exchange forward contracts open as of July 31, 2016 not designated as hedging instruments. The aggregated notional amounts by currency and designation as of July 31, 2016 were as follows:

Currency	Derivatives Designated as Cash Flow Hedges		Derivatives Not Designated as Hedging Instruments	
	Forward Contract	Forward Contract	Forward Contract	Forward Contract
	USD	USD	DKK	
	Buy/(Sell)	Buy/(Sell)	Buy/(Sell)	
	(in millions)

Curtailments and settlements	\$—					

	Pensions					
	U.S. Plans		Non-U.S. Plans		U.S. Post Retirement Benefit Plans	
	Nine Months Ended July 31, 2016	2015	2016	2015	2016	2015
	(in millions)					
Service cost—benefits earned during the period	\$ 12	\$ 18	\$ 14	\$ 12	\$ —	\$ 3
Interest cost on benefit obligation	11	10	12	18	3	3
Expected return on plan assets	(18)	(21)	(33)	(31)	(5)	(6)
Amortization:						
Actuarial losses	2	4	21	19	8	3
Prior service cost	(2)	(3)	—	—	(8)	(9)
Total net plan costs	\$5	\$ 8	\$ 14	\$ 18	\$ (2)	\$ (6)
Curtailment and settlements	\$(16)					

We made no contribution to our U.S. defined benefit plans during both the three and nine months ended July 31, 2016. We contributed \$6 million and \$19 million to our non-U.S. defined benefit plans during the three and nine months ended July 31, 2016, respectively.

We made no contribution to our U.S. defined benefit plans during the three months ended July 31, 2015. We contributed \$15 million to our U.S. defined benefit plans during the nine months ended July 31, 2015. We contributed \$9 million and \$20 million to our non-U.S. defined benefit plans during the three and nine months ended July 31, 2015, respectively.

We do not expect to contribute to our U.S. defined benefit plans during the remainder of 2016 and we expect to contribute \$6 million to our non-U.S. defined benefit plans during the remainder of 2016.

Plan Amendments. During the three months ended January 31, 2016, we made changes to our U.S. Retirement Plan and Supplemental Benefits Retirement Plan ("U.S. Plans"). Effective April 30, 2016, benefit accruals under the U.S. Plans were frozen. Any pension benefit earned in the U.S. Plans through April 30, 2016 remained fully vested, and there were no additional benefit accruals after April 30, 2016. In addition, active employees who have not met the eligibility requirement for the Retiree Medical Account (RMA) under the U.S. Post Retirement Benefit Plan - 55 years old with at least 15 years of Agilent service - as of April 30, 2016 - will only be eligible for 50 percent of the current RMA reimbursement amount upon retirement.

Due to these plan amendments, we recorded a curtailment gain of \$15 million in the U.S. Plans during the nine months ended July 31, 2016. In addition, we recognized a settlement gain of \$1 million related to the U.S. Supplemental Benefits Retirement Plan during the nine months ended July 31, 2016.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

12. WARRANTIES AND CONTINGENCIES

Warranties

We accrue for standard warranty costs based on historical trends in warranty charges as a percentage of net product shipments. The accrual is reviewed regularly and periodically adjusted to reflect changes in warranty cost estimates. Estimated warranty charges are recorded within cost of products at the time products are sold. The standard warranty accrual balances are held in other accrued and other long-term liabilities on our condensed consolidated balance sheet. Our standard warranty terms typically extend to one year from the date of delivery, depending on the product.

A summary of the standard warranty accrual activity is shown in the table below:

	Nine Months Ended July 31, 2016 2015 (in millions)	
Beginning balance as of November 1	\$ 31	\$ 30
Accruals for warranties including change in estimate	41	38
Settlements made during the period	(36)	(39)
Ending balance as of July 31,	\$ 36	\$ 29
Accruals for warranties due within one year	\$ 35	\$ 27
Accruals for warranties due after one year	1	2
Ending balance as of July 31,	\$ 36	\$ 29

Contingencies

We are involved in lawsuits, claims, investigations and proceedings, including, but not limited to, intellectual property, commercial and employment matters, which arise in the ordinary course of business. There are no matters pending that we currently believe are probable and reasonably possible of having a material impact to our business, consolidated financial condition, results of operations or cash flows.

13. SHORT-TERM DEBT

Credit Facilities

On September 15, 2014, Agilent entered into a credit agreement with a group of financial institutions which provides for a \$400 million five-year unsecured credit facility that will expire on September 15, 2019. On June 9, 2015, the commitments under the existing credit facility were increased by \$300 million so that the aggregate commitments under the facility now total \$700 million. As of July 31, 2016, the company had borrowings of \$235 million outstanding under the facility. We were in compliance with the covenants for the credit facility during the three and nine months ended July 31, 2016.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

14. LONG-TERM DEBT

Senior Notes

The following table summarizes the company's long-term senior notes and the related interest rate swaps:

	July 31, 2016			October 31, 2015		
	Amortized Principal	Swap	Total	Amortized Principal	Swap	Total
	(in millions)					
2017 Senior Notes	\$ 100	\$ 1	\$ 101	\$ 100	\$ 2	\$ 102
2020 Senior Notes	499	16	515	499	19	518
2022 Senior Notes	400	—	400	399	—	399
2023 Senior Notes	598	—	598	598	—	598
Total	\$ 1,597	\$ 17	\$ 1,614	\$ 1,596	\$ 21	\$ 1,617

All outstanding notes listed above are unsecured and rank equally in right of payment with all of Agilent's other senior unsecured indebtedness. There have been no changes to the principal, maturity, interest rates and interest payment terms of the Agilent senior notes, detailed in the table above, in the nine months ended July 31, 2016 as compared to the senior notes described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2015. All interest rate swap contracts have been terminated and amounts to be amortized over the remaining life of the senior notes as of July 31, 2016 and October 31, 2015 are detailed above.

Other Debt

As of July 31, 2016 and October 31, 2015, we have mortgage debt, secured on buildings in Denmark, in Danish Krone equivalent of \$38 million in both periods, aggregate principal, outstanding with a Danish financial institution.

15. STOCKHOLDERS' EQUITY

Stock Repurchase Program

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program effective in the first quarter of fiscal year 2014, upon the conclusion of the company's previous \$1 billion repurchase program. The program was designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. During the nine months ended July 31, 2016, we repurchased approximately 2.4 million shares for \$98 million, which completed the purchases under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. For the nine months ended July 31, 2015, we repurchased 6 million shares for \$267 million under this plan.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the three and nine months ended July 31, 2016, upon the completion of our previous repurchase program, we repurchased approximately 2.2 million shares for \$94 million and 7.3 million shares for \$290 million, respectively, under this authorization. All

such shares and related costs are held as treasury stock and accounted for using the cost method. As of July 31, 2016, we had remaining authorization to repurchase up to \$850 million of our common stock under this program.

Cash Dividends on Shares of Common Stock

During the three and nine months ended July 31, 2016, we paid cash dividends of \$0.115 per common share or \$37 million and \$0.345 per common share or \$112 million on the company's common stock. During the three and nine months ended July 31, 2015, we paid cash dividends of \$0.100 per common share or \$33 million and \$0.300 per common share or \$100 million on the company's common stock.

The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

AGILENT TECHNOLOGIES, INC.

Reclassifications out of accumulated other comprehensive income (loss) of prior service benefit and actuarial net loss in respect of retirement plans and post retirement pension plans are included in the computation of net periodic cost together with curtailments and settlements (see Note 11 "Retirement Plans and Post Retirement Pension Plans").

16. SEGMENT INFORMATION

Description of segments. We are a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow.

Agilent has three business segments comprised of the life sciences and applied markets business, diagnostics and genomics business and the Agilent CrossLab business each of which comprises a reportable segment. The three operating segments were determined based primarily on how the chief operating decision maker views and evaluates our operations. Operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Other factors, including market separation and customer specific applications, go-to-market channels, products and services and manufacturing are

considered in determining the formation of these operating segments.

A description of our three reportable segments is as follows:

Our life sciences and applied markets business provides application-focused solutions that include instruments and software that enable customers to identify, quantify and analyze the physical and biological properties of substances and products, as well as enable customers in the clinical and life sciences research areas to interrogate samples at the molecular level. Key product categories include: liquid chromatography ("LC") systems and components; liquid chromatography mass spectrometry ("LCMS") systems; gas chromatography ("GC") systems and components; gas chromatography mass spectrometry ("GCMS") systems; inductively coupled plasma mass spectrometry ("ICP-MS") instruments; atomic absorption ("AA") instruments; microwave

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

plasma-atomic emission spectrometry ("MP-AES") instruments; inductively coupled plasma optical emission spectrometry ("ICP-OES") instruments; cell analysis plate based assays; laboratory software and informatics systems; laboratory automation and robotic systems; dissolution testing; vacuum pumps and measurement technologies.

Our diagnostics and genomics business is comprised of five areas of activity providing solutions that include reagents, instruments, software and consumables, which enable customers in the clinical and life sciences research areas to interrogate samples at the cellular and molecular level. First, our genomics business includes arrays for DNA mutation detection, genotyping, gene copy number determination, identification of gene rearrangements, DNA methylation profiling, gene expression profiling, as well as next generation sequencing ("NGS") target enrichment and genetic data management and interpretation support software. Second, our nucleic acid solutions business provides equipment and expertise focused on production of synthesized oligonucleotides under pharmaceutical good manufacturing practices ("GMP") conditions for use as active pharmaceutical ingredients ("API") in an emerging class of drugs that utilize nucleic acid molecules for disease therapy. Next, our pathology solutions business is focused on product offerings to cancer diagnostics and anatomic pathology workflows. The broad portfolio of offerings includes immunohistochemistry ("IHC"), in situ hybridization ("ISH"), hematoxylin and eosin ("H&E") staining and special staining. We also collaborate with a number of major pharmaceutical companies to develop new potential pharmacodiagnosics, also known as companion diagnostics, which may be used to identify patients most likely to benefit from a specific targeted therapy. Finally, the reagent partnership business is a provider of reagents used for turbidimetry and flow cytometry.

The Agilent CrossLab business spans the entire lab with its extensive consumables and services portfolio, which is designed to improve customer outcomes. The majority of the portfolio is vendor neutral, meaning Agilent can serve and supply customers regardless of their instrument purchase choices. Solutions range from chemistries and supplies to services and software helping to connect the entire lab. Key product categories in consumables include GC and LC columns, sample preparation products, custom chemistries, and a large selection of laboratory instrument supplies. Services include startup, operational, training and compliance support, as well as asset management and consultative services that help increase customer productivity. Custom service and consumable bundles are tailored to meet the specific application needs of various industries and to keep instruments fully operational and compliant with the respective industry requirements.

A significant portion of the segments' expenses arise from shared services and infrastructure that we have historically provided to the segments in order to realize economies of scale and to efficiently use resources. These expenses, collectively called corporate charges, include legal, accounting, tax, real estate, insurance services, information technology services, treasury, other corporate infrastructure expenses and costs of centralized research and development. Charges are allocated to the segments, and the allocations have been determined on a basis that we consider to be a reasonable reflection of the utilization of services provided to or benefits received by the segments. In addition, we do not allocate amortization and impairment of acquisition-related intangible assets, pension curtailment gain, restructuring and transformational expenses, acquisition and integration costs and certain other charges to the operating margin for each segment because management does not include this information in its measurement of the performance of the operating segments.

The following tables reflect the results of our reportable segments under our management reporting system. The performance of each segment is measured based on several metrics, including segment income from operations. These results are used, in part, by the chief operating decision maker in evaluating the performance of, and in allocating resources to, each of the segments.

AGILENT TECHNOLOGIES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

The profitability of each of the segments is measured after excluding restructuring and asset impairment charges, investment gains and losses, interest income, interest expense, acquisition and integration costs, non-cash amortization and other items as noted in the reconciliations below.

17. SUBSEQUENT EVENT

On August 1, 2016 we completed the acquisition of substantially all of the assets of iLab Solutions LLC ("iLab"), a cloud-based solutions provider for core laboratory management. iLab Solutions' offerings enables customers to easily and accurately book time in shared facilities, to bill and invoice for projects, to manage studies, to generate reports and business intelligence, and to schedule instrument reservations across multiple projects. The purchase price was \$26 million in cash. We have not yet finished allocating the purchase price to the net assets acquired. The financial results of iLab will be included within our results from the beginning of the fourth quarter of fiscal year 2016.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (UNAUDITED)

The following discussion should be read in conjunction with the condensed consolidated financial statements and notes thereto included elsewhere in this Form 10-Q and our Annual Report on Form 10-K. This report contains forward-looking statements including, without limitation, statements regarding trends, seasonality and growth in, and drivers of, the markets we sell into, our strategic direction, our future effective tax rate and tax valuation allowance, earnings from our foreign subsidiaries, lease and site services income from Keysight, the impact of foreign currency movements on our performance, our hedging programs, remediation activities, indemnification, new product and service introductions, the ability of our products to meet market needs, adoption of our products, changes to our manufacturing processes, the use of contract manufacturers, out sourcing and third-party package delivery services, source and supply of materials used in our products, the impact of local government regulations on our ability to pay vendors or conduct operations, our liquidity position and cash availability, our ability to generate cash from operations, growth in our businesses, our investments, including in research and development, the potential impact of adopting new accounting pronouncements, our financial results, our operating margin, our sales, our purchase commitments, our capital expenditures, our contributions to our pension and other defined benefit plans, our strategic initiatives, our cost-control activities and other cost saving initiatives, uncertainties relating to Food and Drug Administration ("FDA") and other regulatory approvals, the integration of our acquisitions and other transactions, impairment of goodwill and other intangible assets, write down of investment values or loans and convertible notes, remediation of our material weakness, our stock repurchase program, our declared dividends, our transition to lower-cost regions, and the existence of economic instability, that involve risks and uncertainties. Our actual results could differ materially from the results contemplated by these forward-looking statements due to various factors, including those discussed in Part II Item 1A and elsewhere in this Form 10-Q.

Basis of Presentation

The financial information presented in this Form 10-Q is not audited and is not necessarily indicative of our future consolidated financial position, results of operations, comprehensive income (loss) or cash flows. Our fiscal year-end is October 31, and our fiscal quarters end on January 31, April 30 and July 31. Unless otherwise stated, these dates refer to our fiscal year and fiscal periods.

Executive Summary

Agilent Technologies Inc. ("we", "Agilent" or the "company"), incorporated in Delaware in May 1999, is a global leader in life sciences, diagnostics and applied chemical markets, providing application focused solutions that include instruments, software, services and consumables for the entire laboratory workflow.

In November 2015, we completed the acquisition of Seahorse Bioscience ("Seahorse"), a leader in providing instruments and assay kits for measuring cell metabolism and bioenergetics for \$242 million in cash. Seahorse's technology enables researchers to better understand cell health, function and signaling, and how the cell may be impacted by the introduction of a specific drug, by providing real-time kinetics to unlock essential cellular bioenergetics data. The financial results of Seahorse have been included within Agilent's consolidated financial statements for the three and nine months ended July 31, 2016.

On March 2, 2016, Agilent made a preferred stock investment in Lasergen for \$80 million. Agilent's initial ownership stake was 48 percent and we have also joined the board of Lasergen and signed a collaboration agreement. We have the option to acquire all of the remaining shares of Lasergen until March 2, 2018, for additional consideration of \$105 million. Lasergen is a Variable Interest Entity ("VIE"), however, we do not consolidate the entity in our financial statements because we do not have the power to direct the activities of the VIE that most significantly impact the

VIE's economic performance nor are we the primary beneficiary. Because of the nature of the preferred stock of Lasergen that we own, we account for this investment under the cost method.

On August 1, 2016 we completed the acquisition of substantially all of the assets of iLab Solutions LLC ("iLab"), a cloud-based solutions provider for core laboratory management. iLab Solutions' offerings enables customers to easily and accurately book time in shared facilities, to bill and invoice for projects, to manage studies, to generate reports and business intelligence, and to schedule instrument reservations across multiple projects. The purchase price was \$26 million in cash. We have not yet finished allocating the purchase price to the net assets acquired. The financial results of iLab will be included within our results from the beginning of the fourth quarter of fiscal year 2016.

Net revenue of \$1,044 million for the three months ended July 31, 2016 increased 3 percent when compared to the same period last year. Net revenue of \$3,091 million for the nine months ended July 31, 2016 increased 3 percent when compared to the same period last year. Foreign currency movements for the three and nine months ended July 31, 2016 had an unfavorable

Table of Contents

impact on revenue of approximately 1 percentage point and 2 percentage points, respectively, when compared to the same periods last year.

Revenue in the life sciences and applied markets business for the three and nine months ended July 31, 2016, decreased 1 percent and was flat respectively, when compared to the same periods last year. Foreign currency movements had no impact in the three months ended July 31, 2016 and had an unfavorable impact of approximately 2 percentage points in the nine months ended July 31, 2016. The impact of acquisitions, divestitures and the exit of the NMR business had an unfavorable impact of 2 percentage points and no impact in the three and nine months ended July 31, 2016 over the same periods last year, respectively. For the three and nine months ended July 31, 2016 and excluding the impact of currency movements, the NMR business and acquisitions, our performance within the life sciences market continued to show strength with strong revenue growth from the pharmaceutical and biotechnology market. Within the applied markets, and excluding the impact of foreign currency movements, the NMR business and acquisitions, there was strong revenue growth in both the environmental and food markets, but revenue from sales to other applied markets was weak with a decline in revenue from sales to the chemical and energy markets in the three and nine months ended July 31, 2016, when compared to the same periods last year.

Revenue in the diagnostics and genomics business for the three and nine months ended July 31, 2016, increased 8 percent and 7 percent, respectively, when compared to the same periods last year. Foreign currency movements had no impact on revenue in the three months ended July 31, 2016 and had an unfavorable impact of 2 percentage points in the nine months ended July 31, 2016. Excluding the impact of foreign currency movements, revenue increase was led by demand from the diagnostics and clinical research market which reported strong growth in the three and nine months ended July 31, 2016.

Revenue generated by Agilent CrossLab in the three and nine months ended July 31, 2016, increased 7 percent and 6 percent respectively, when compared to the same periods last year. Foreign currency movements had an unfavorable impact of 1 percentage point and 4 percentage points in the three and nine months ended July 31, 2016, respectively. Excluding the impact of foreign currency movements, revenue grew strongly in the pharmaceutical and biotechnology market as well as in the food and environmental markets in the three and nine months ended July 31, 2016 when compared to the same periods last year.

Net income from continuing operations for the three and nine months ended July 31, 2016 was \$124 million and \$336 million, respectively compared to \$113 million and \$298 million for the corresponding period last year. In the nine months ended July 31, 2016, cash generated from operations was \$559 million.

For the nine months ended July 31, 2016 and 2015, cash dividends of \$112 million and \$100 million, respectively, were paid on the company's outstanding common stock. The timing and amounts of any future dividends are subject to determination and approval by our board of directors.

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program effective in the first quarter of fiscal year 2014, upon the conclusion of the company's previous \$1 billion repurchase program. The program was designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. During the nine months ended July 31, 2016, we repurchased approximately 2.4 million shares for \$98 million, which completed the purchases under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. For the nine months ended July 31, 2015, we repurchased 6 million shares for \$267 million under this plan.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our common

stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the nine months ended July 31, 2016, upon the completion of our previous repurchase program, we repurchased approximately 7.3 million shares for \$290 million, under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. As of July 31, 2016, we had remaining authorization to repurchase \$850 million of our common stock under this program

Looking forward, we expect to focus on the growth of operating margin in our businesses by simplifying our operations, differentiating product solutions and improving our customers' experience. In addition, we anticipate returning a significant proportion of our cash flow to shareholders through our dividend and share repurchase programs. The unfavorable effects of changes in foreign currency exchange rates decreased revenue by approximately 2 percentage points in the nine months ended July 31, 2016. Costs and expenses, incurred in local currency, were subject to the favorable effects due to changes in foreign currency exchange rates in the nine months ended July 31, 2016, reducing our overall net exposure. The impact of foreign currency exchange rates movements can be positive or negative in any period and is calculated by applying the prior period foreign currency exchange rates to the current year period.

Table of Contents

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles ("GAAP") in the U.S. The preparation of condensed consolidated financial statements in conformity with GAAP in the U.S. requires management to make estimates, judgments and assumptions that affect the amounts reported in our condensed consolidated financial statements and accompanying notes. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, inventory valuation, restructuring, share-based compensation, retirement and post-retirement benefit plan assumptions, goodwill and purchased intangible assets and accounting for income taxes. There have been no significant changes to our critical accounting policies as described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2015. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates.

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used or changes in the accounting estimate that are reasonably likely to occur could materially change the financial statements.

Adoption of New Pronouncements

See Note 3, "New Accounting Pronouncements," to the condensed consolidated financial statements for a description of new accounting pronouncements.

Foreign Currency

Our revenues, costs and expenses, and monetary assets and liabilities are exposed to changes in foreign currency exchange rates as a result of our global operating and financing activities. The unfavorable effects of changes in foreign currency exchange rates has decreased revenue by approximately 2 percentage points in the nine months ended July 31, 2016. Costs and expenses, incurred in local currency, were subject to the favorable effects due to changes in foreign currency exchange rates in the nine months ended July 31, 2016, reducing our overall net exposure. The impact of foreign currency exchange rates movements can be positive or negative in any period and is calculated by applying the prior period foreign currency exchange rates to the current year period. We hedge revenues, expenses and balance sheet exposures that are not denominated in the functional currencies of our subsidiaries on a short term and anticipated basis. We do experience some fluctuations within individual lines of the condensed consolidated statement of operations and balance sheet because our hedging program is not designed to offset the currency movements in each category of revenues, expenses, monetary assets and liabilities. Our hedging program is designed to hedge currency movements on a relatively short-term basis (up to a rolling twelve month period). Therefore, we are exposed to currency fluctuations over the longer term. To the extent that we are required to pay for all, or portions, of an acquisition price in foreign currencies, Agilent may enter into foreign exchange contracts to reduce the risk that currency movements will impact the U.S. dollar cost of the transaction.

Results from Operations

Net Revenue

Edgar Filing: AGILENT TECHNOLOGIES INC - Form 10-Q

	Three Months Ended		Nine Months Ended		Year over Year Change	
	July 31,		July 31,		Three Months	Nine Months
	2016	2015	2016	2015	Months	Months
(in millions)						
Net revenue:						
Products	\$798	\$787	\$2,380	\$2,346	1%	1%
Services and other	246	227	711	657	8%	8%
Total net revenue	\$1,044	\$1,014	\$3,091	\$3,003	3%	3%

Net revenue of \$1,044 million for the three months ended July 31, 2016 increased 3 percent when compared to the same period last year. Net revenue of \$3,091 million for the nine months ended July 31, 2016 increased 3 percent when compared to

Table of Contents

the same period last year. Foreign currency movements for the three and nine months ended July 31, 2016 had an unfavorable impact on revenue of approximately 1 percentage point and 2 percentage points, respectively, when compared to the same periods last year.

Services and other revenue include revenue generated from servicing our installed base of products, warranty extensions and consulting including companion diagnostics. Services and other revenue increased 8 percent in both the three and nine months ended July 31, 2016 compared to the same periods last year. The service and other revenue growth was impacted by a portion of the revenue being driven by both the current and the previously installed product base.

Net Revenue By Segment

	Three Months Ended July 31, 2016		Nine Months Ended July 31, 2015		Year over Year Change Three Months Nine Months	
	2015	2016	2015	2016	Months	Months
	(in millions)

Total net revenue	\$1,044	\$1,014	\$3,091	\$3,003	3%	3%

Revenue in the life sciences and applied markets business for the three and nine months ended July 31, 2016, decreased 1 percent and was flat respectively, when compared to the same periods last year. Foreign currency movements had no impact in the three months ended July 31, 2016 and had an unfavorable impact of approximately 2 percentage points in the nine months ended July 31, 2016. The impact of acquisitions, divestitures and the exit of the NMR business had an unfavorable impact of 2 percentage points and no impact in the three and nine months ended July 31, 2016 over the same periods last year, respectively. For the three and nine months ended July 31, 2016 and excluding the impact of currency movements, the NMR business and acquisitions, our performance within the life sciences market continued to show strength with strong revenue growth from the pharmaceutical and biotechnology market. Within the applied markets, and excluding the impact of foreign currency movements, the NMR business and acquisitions, there was strong revenue growth in both the environmental and food markets, but revenue from sales to other applied markets was weak with a decline in revenue from sales to the chemical and energy markets in the three and nine months ended July 31, 2016, when compared to the same periods last year.

Revenue in the diagnostics and genomics business for the three and nine months ended July 31, 2016, increased 8 percent and 7 percent, respectively, when compared to the same periods last year. Foreign currency movements had no impact on revenue in the three months ended July 31, 2016 and had an unfavorable impact of 2 percentage points in the nine months ended July 31, 2016. Excluding the impact of foreign currency movements, revenue increase was led by demand from the diagnostics and clinical research market which reported strong growth in the three and nine months ended July 31, 2016.

Revenue generated by Agilent CrossLab in the three and nine months ended July 31, 2016, increased 7 percent and 6 percent respectively, when compared to the same periods last year. Foreign currency movements had an unfavorable impact of 1 percentage point and 4 percentage points in the three and nine months ended July 31, 2016, respectively. Excluding the impact of foreign currency movements, revenue grew strongly in the pharmaceutical and biotechnology market as well as in the food and environmental markets in the three and nine months ended July 31, 2016 when compared to the same periods last year.

Table of Contents

Operating Results

	Three Months Ended		Nine Months Ended		Year over Year Change	
	July 31, 2016		July 31, 2015		Three Months	Nine Months
Total gross margin	51.9 %	50.6 %	52.1 %	50.2 %	1 ppt	2 pts
Operating margin	14.0 %	14.2 %	14.0 %	12.2 %	—	2 pts

(in millions)

Research and development	\$86	\$79	\$245	\$248	9%	(1)%
Selling, general and administrative	\$310	\$290	\$932	\$892	7%	4%

Total gross margins for the three and nine months ended July 31, 2016 increased 1 percentage point and 2 percentage points, respectively, when compared to the same periods last year. In the three and nine months ended July 31, 2016 gross margins increased 2 percentage points in both periods in our life sciences and applied markets business, declined 1 percentage point and improved 1 percentage point in our diagnostics and genomics business and were flat in both periods in our Agilent CrossLab business, respectively, when compared to the same periods last year. Increases in total gross margins for the three months ended July 31, 2016 were as a result of the exit from the NMR business and improved efficiencies in logistics resulting in lowering costs offsetting the unfavorable currency hedging results. Increases in total gross margins for the nine months ended July 31, 2016 were as a result of the exit from the NMR business, the impact of an employee pension curtailment gain, lower costs incurred to address the now lifted FDA warning letter together with lower logistics costs offsetting the currency hedging results.

Total operating margin was flat and increased 2 percentage points in the three and nine months ended July 31, 2016, when compared to the same periods last year. In the three and nine months ended July 31, 2016, operating margin was flat and increased 2 percentage points in our life sciences and applied markets business, improved 2 percentage points and 4 percentage points in our diagnostics and genomics business and was flat and increased 1 percentage point in our Agilent CrossLab business, respectively, when compared to the same periods last year. In the three months ended July 31, 2016, total operating margin was flat primarily due to increased acquisition and integration costs, wage increases and increased costs in research and development, primarily related to an impairment of IPR&D of \$4 million offsetting improvements in gross margins. In the nine months ended July 31, 2016 total operating margins increased due to improvements in gross margins plus the impact of an employee pension curtailment gain and a slight reduction in research and development costs offsetting increased expenditures due to wage increases, higher variable pay and acquisition costs.

Research and development expenses in the three months ended July 31, 2016 increased 9 percent due to an impairment of IPR&D and higher program spending when compared to the lower spending in the same period last year. Research and development decreased 1 percent in the nine months ended July 31, 2016, when compared to the same period last year. Research and development expenditures decreased due to the impact of an employee pension curtailment gain, savings from the exit from the NMR business offset by wage increases, IPR&D impairment and acquisition costs related to the Cartagenia acquisition. We remain committed to invest significantly in research and development and have focused our development efforts on key strategic opportunities in order to align our business with available markets and position ourselves to capture market share.

Selling, general and administrative expenses increased 7 percent and 4 percent for the three and nine months ended July 31, 2016 when compared to the same periods last year. Selling, general and administrative expenditure increased due to wage increases, higher variable pay, impact of foreign currency movements, acquisition costs offset by the impact of an employee pension curtailment gain recognized in the first quarter and the decline in NMR expenses due

to the exiting of that business.

At July 31, 2016, our headcount was approximately 12,300 as compared to approximately 11,650 at July 31, 2015.

Other income (expense), net

In the three and nine months ended July 31, 2016 other income (expense), net includes \$3 million and \$9 million of income in respect of the provision of site service costs to, and lease income from, Keysight. The costs associated with these services are reported within income from operations. Agilent expects to receive lease and site service income from Keysight over the next 3-4 years of approximately \$12 million per year. In the three and nine months ended July 31, 2015 other income (expense), net includes \$3 million and \$21 million of income, respectively, in respect of the provision of certain IT services together with site service costs to, and lease income from, Keysight.

Table of Contents

Income Taxes

The company's effective tax rate from continuing operations was 7.5 percent and 14.5 percent for the three and nine months ended July 31, 2016, respectively. The company's effective tax rate from continuing operations was 11.7 percent and 11.6 percent for the three and nine months ended July 31, 2015, respectively. The income tax expense from continuing operations was \$10 million and \$57 million for the three and nine months ended July 31, 2016, respectively. The income tax expense from continuing operations was \$15 million and \$39 million for the three and nine months ended July 31, 2015, respectively.

The income tax provision from continuing operations for the three and nine months ended July 31, 2016 included net discrete tax benefits of \$6 million and \$9 million, respectively. The net discrete tax benefit for the three months ended July 31, 2016, included an out-of-period correcting tax benefit of \$11 million associated with a true-up of deferred tax liability for unremitted foreign earnings that should have been recorded in the third quarter of fiscal year 2015 and \$5 million net expense related to other discrete items. In addition to the aforementioned, the net discrete tax benefit for the nine months ended July 31, 2016, included \$5 million of tax benefit for the extension of the U.S. research and development tax credit attributable to the company's prior fiscal year, \$6 million of tax expense related to the curtailment gain recognized with respect to the U.S. retirement plan and Supplemental Benefits Plan, \$8 million tax benefit related to the realization of tax credits that reduce the deferred tax liability for unremitted foreign earnings, and a net \$4 million of other discrete tax expense primarily related to return-to-provision true-ups, including an out-of-period adjustment recorded in the second quarter of fiscal year 2016 of \$5 million of expense in Germany. The out-of-period corrections were determined to be immaterial to the previously issued and current period financial statements.

The income tax provision from continuing operations for the three and nine months ended July 31, 2015 included net discrete expense of \$1 million and benefit of \$15 million, respectively. The net discrete tax expense for the three months ended July 31, 2015 included \$1 million of tax expense related primarily to interest accruals for uncertain tax positions. In addition to the aforementioned, the net discrete tax benefit for the nine months ended July 31, 2015 included \$16 million of tax benefit related to the de-registration of certain foreign branches, \$6 million of tax benefit for the extension of the U.S. research and development tax credit attributable to the company's prior fiscal year and \$6 million of other discrete tax expense primarily related to the accrual of interest expense associated with uncertain tax positions and return to provision adjustments.

In the third quarter of fiscal 2016, the company elected to early adopt Accounting Standard Update ("ASU") 2016-09 "Improvements to Employees Share-Based Payment Accounting". For details related to the adoption of this new accounting standard update see Note 3, "New Accounting Pronouncements". In the three and nine months ended July 31, 2016 we recorded \$3 million and \$1 million of tax benefit, respectively, in respect of share based awards.

In the U.S., tax years remain open back to the year 2012 for federal income tax purposes and the year 2000 for significant states. On September 22, 2015, we reached an agreement with the Internal Revenue Service ("IRS") for the tax years 2008 through 2011. During the first quarter of 2016, we made a payment of approximately \$9 million of tax plus interest as part of closing the exam. In 2015, we reclassified a portion of other long-term liabilities to other accrued liabilities related to uncertain tax positions of continuing operations that we expected to pay within the next twelve months. This amount was partially offset by a prepaid tax account of approximately \$3 million that the IRS allowed as an offset to the \$12 million in incremental taxes. The settlement resulted in the recognition, within the continuing operations, of previously unrecognized tax benefits of \$119 million, offset by a tax liability on foreign distributions of approximately \$99 million principally related to the repatriation of foreign earnings.

In other major jurisdictions where the company conducts business, the tax years generally remain open back to the year 2003. With these jurisdictions and the U.S., it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitation or a tax audit settlement which will be partially offset by an anticipated tax liability related to unremitted foreign earnings, where applicable. Given the number of years and numerous matters that remain subject to examination in various tax jurisdictions, management is unable to estimate the range of possible changes to the balance of our unrecognized tax benefits.

On July 27, 2015, the U.S. Tax Court issued an opinion in *Altera Corp. v. Commissioner* related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision was entered by the U.S. Tax Court on December 1, 2015. At this time, the U.S. Department of the Treasury has not withdrawn the requirement from its regulations to include stock-based compensation in an intercompany cost-sharing arrangement. The IRS notified the U.S. Court of Appeals for the Ninth Circuit on February 19, 2016 of its intent to appeal the Tax Court's decision in the case. We concluded that no adjustment to our consolidated financial statements is appropriate at this time due to the uncertainties with respect to the ultimate resolution of this case.

Table of Contents

Life Sciences and Applied Markets

Our life sciences and applied markets business provides application-focused solutions that include instruments and software that enable customers to identify, quantify and analyze the physical and biological properties of substances and products, as well as enable customers in the clinical and life sciences research areas to interrogate samples at the molecular level. Key product categories include: liquid chromatography ("LC") systems and components; liquid chromatography mass spectrometry ("LCMS") systems; gas chromatography ("GC") systems and components; gas chromatography mass spectrometry ("GCMS") systems; inductively coupled plasma mass spectrometry ("ICP-MS") instruments; atomic absorption ("AA") instruments; microwave plasma-atomic emission spectrometry ("MP-AES") instruments; inductively coupled plasma optical emission spectrometry ("ICP-OES") instruments; cell analysis plate based assays; laboratory software and informatics systems; laboratory automation and robotic systems; dissolution testing; vacuum pumps and measurement technologies.

Net Revenue

	Three Months Ended		Nine Months Ended		Year over Year Change	
	July 31, 2016	July 31, 2015	July 31, 2016	July 31, 2015	Three Months	Nine Months
	(in millions)					
Net revenue	\$504	\$511	\$1,525	\$1,531	(1)%	—

Life sciences and applied markets business revenue for the three and nine months ended July 31, 2016 decreased 1 percent and was flat, respectively, when compared to the same periods last year. Foreign currency movements for the three and nine months ended July 31, 2016 had no impact and an unfavorable impact of 2 percentage points on revenue, respectively. The impact of acquisitions, divestitures and the NMR business had an unfavorable impact of 2 percentage points and no impact in the three and nine months ended July 31, 2016 over the same periods last year, respectively. Revenue performance, adjusted for the impact of foreign currency movements, reflected differing performance by geography and end market for the three and nine months ended July 31, 2016. Beginning in the third quarter of fiscal year 2016, we changed the methodology we use to derive our revenue by geography. Our revenue by geography for the three and nine months ended July 31, 2016 is determined based on the country where our products were delivered instead of the country where the order was placed. Prior periods in fiscal year 2015 were revised to reflect the same methodology. Geographically, revenue declined 14 percent in the Americas with a 1 percentage point unfavorable currency impact, increased 7 percent in Asia Pacific excluding Japan with a 2 percentage point unfavorable currency impact, declined 2 percent in Europe with no currency impact and increased 17 percent in Japan with a 14 percentage point favorable currency impact for the three months ended July 31, 2016 compared to the same period last year. Revenue increased 13 percent in Asia Pacific excluding Japan with a 1 percentage point unfavorable currency impact, declined 8 percent in the Americas with a 1 percentage point unfavorable currency impact, declined 9 percent in Europe with a 4 percentage point unfavorable currency impact and increased 2 percent in Japan with a 4 percentage point favorable currency impact for the nine months ended July 31, 2016 compared to the same period last year. The decline in the Americas for the three and nine months ended July 31, 2016 when compared to the same period last year was due to continued weakness in the chemical and energy markets, softness in diagnostic and clinical markets, and the impact of the exiting of the NMR business. Growth in Asia Pacific excluding Japan reflected broad growth in China, particularly in the environmental and food markets. European sales were down on weakness in sales to energy and applied markets.

Our life sciences markets continued to see strength in the pharmaceutical and biotechnology markets led by growth in technology refresh deals, new product acceptance, and ongoing demand across the spectrum of specialty, mid and large size pharmaceutical companies. Growth in life science research had another solid quarter with strong demand in China and an uptick in US business. Chemical and energy end-market revenue performance continued to decline in the three and nine months ended July 31, 2016. Macroeconomic factors continue to apply pressure to this segment with reduced investments in oil exploration and production. Food was again strong for the three and nine months ended July 31, 2016 within the applied markets with continued demand in China from government and privatized testing labs. Continued government spending in China for environmental initiatives helped drive market performance in the segment. Our revenue in the forensics market for the three months ended July 31, 2016 declined when compared to the same period last year mostly due to a relatively higher growth in the prior year.

Looking forward, we are optimistic about our growth opportunities in the life sciences and applied markets as our broad portfolio of products and solutions are well suited to address customer needs. We expect strong sales funnels given a number of significant new product introductions in the next few quarters as we continue to invest in expanding and improving our applications

Table of Contents

and solutions portfolio. We remain concerned about short term prospects in chemical and energy markets, but are confident in our product portfolio to address customer needs when the market does recover.

Operating Results

	Three Months Ended July 31, 2016		Three Months Ended July 31, 2015		Nine Months Ended July 31, 2016		Nine Months Ended July 31, 2015		Year over Year Change Three Months Nine Months	
Gross margin	57.8 %	55.6 %	58.3 %	55.9 %	2 ppts	2 ppts				
Operating margin	19.1 %	18.7 %	20.0 %	18.1 %	—	2 ppts				
(in millions)										
Research and development	\$49	\$47	\$145	\$145	6%	—				
Selling, general and administrative	\$146	\$142	\$440	\$434	3%	1%				

Gross margins for products and services for the three and nine months ended July 31, 2016, increased 2 percentage points in both periods when compared to the same periods last year. The increase in gross margins was aided by the exit of our NMR business and improved efficiencies in logistics resulting in lower costs.

Research and development expenses for the three and nine months ended July 31, 2016, increased 6 percent and was flat, respectively, when compared to the same periods last year. The growth for the three months ended July 31, 2016 was due to R&D program spending compared to lower spending in the period one year ago. The effects of acquisitions and divestitures largely offset each other. We are no longer incurring expenses with our NMR business that we exited but have added expenses with the acquisition of Seahorse in November of this year.

Selling, general and administrative expenses for the three and nine months ended July 31, 2016, increased 3 percent and 1 percent, respectively, when compared to the same periods last year. The modest growth rates are due to increases in wages and third party costs with the effects of acquisitions and divestitures which largely offset each other. Operating margin for products and services for the three and nine months ended July 31, 2016, was flat and increased 2 percentage points, respectively, when compared to the same periods last year.

Income from Operations

Income from operations for the three and nine months ended July 31, 2016, increased \$1 million and \$27 million, respectively, on a corresponding revenue decreases of \$7 million and \$6 million, respectively. The exit from the NMR business was a key driver in year over year improvement in income from operations for both the three and nine months ended July 31, 2016. The primary factor which led to the increase in operating margin over the prior year was gross margin improvement.

Diagnostics and Genomics

Our diagnostics and genomics business includes genomics, nucleic acid contract manufacturing and the pathology, companion diagnostics and reagent partnership businesses.

Our diagnostics and genomics business is comprised of five areas of activity providing solutions that include reagents, instruments, software and consumables, which enable customers in the clinical and life sciences research areas to interrogate samples at the cellular and molecular level. First, our genomics business includes arrays for DNA mutation detection, genotyping, gene copy number determination, identification of gene rearrangements, DNA methylation profiling, gene expression profiling, as well as next generation sequencing ("NGS") target enrichment and genetic data management and interpretation support software. Second, our nucleic acid solutions business provides equipment and

expertise focused on production of synthesized oligonucleotides under pharmaceutical good manufacturing practices ("GMP") conditions for use as active pharmaceutical ingredients ("API") in an emerging class of drugs that utilize nucleic acid molecules for disease therapy. Next, our pathology solutions business is focused on product offerings to cancer diagnostics and anatomic pathology workflows. The broad portfolio of offerings includes immunohistochemistry ("IHC"), in situ hybridization ("ISH"), hematoxylin and eosin ("H&E") staining and special staining. We also collaborate with a number of major pharmaceutical companies to develop new potential

Table of Contents

pharmacodiagnosics, also known as companion diagnostics, which may be used to identify patients most likely to benefit from a specific targeted therapy. Finally, the reagent partnership business is a provider of reagents used for turbidimetry and flow cytometry.

Net Revenue

	Three Months Ended July 31, 2016 (in millions)		Nine Months Ended July 31, 2016		Year over Year Change
	2015	2016	2015	Three Months	Nine Months
Net revenue	\$180	\$167	\$516	\$484	8% 7%

Diagnostics and genomics business revenue for the three and nine months ended July 31, 2016 increased 8 percent and 7 percent, respectively, when compared to the same periods last year. Foreign currency movements for the three and nine months ended July 31, 2016 had no impact and an unfavorable impact of 2 percentage points on revenue, respectively. Beginning in the third quarter of fiscal year 2016, we changed the methodology we use to derive our revenue by geography. Our revenue by geography for the three and nine months ended July 31, 2016 are determined based on the country where our products were delivered instead of the country where the order was placed. Prior periods in fiscal year 2015 were revised to reflect the same methodology. Geographically, revenue increased 19 percent in the Americas with no currency impact, declined 4 percent in Europe with a 1 percentage point unfavorable currency impact, increased 11 percent in Japan with a 13 percentage point favorable currency impact and increased 12 percent in Asia Pacific excluding Japan with a 2 percentage point unfavorable currency impact for the three months ended July 31, 2016 when compared to the same period last year. Revenue increased 12 percent in the Americas with a 1 percentage point unfavorable currency impact, declined 1 percent in Europe with a 4 percentage point unfavorable currency impact, increased 4 percent in Japan with a 4 percentage point favorable currency impact and increased 17 percent in Asia Pacific excluding Japan with a 2 percentage point unfavorable foreign currency impact for the nine months ended July 31, 2016 when compared to the same period last year. In the three months and nine months ended July 31, 2016, the performance in the Americas was assisted by positive growth in sales in genomics (particularly target enrichment and arrays), strength in our pathology business, continued market demand in the nucleic acid solutions and good momentum in the companion diagnostic business. Growth in Asia Pacific excluding Japan reflected strong growth in China. In the three months ended July 31, 2016, the weakness in Europe was driven by slowness in genomics and pathology businesses due to lower momentum in Turkey and the Middle East, delayed commercialization of PD-L1 based test and strong growth in the prior year in genomics. In the nine months ended July 31, 2016, In Europe our business showed strong growth in the NGS target enrichment solutions and microarrays/scanners.

The positive growth in the three months and nine months ended July 31, 2016 was led by demand for oligos in our nucleic acid solutions business, strength in genomics particularly in the target enrichment portfolio due to increasing adoption of NGS in clinical applications and aCGH arrays. Our pathology business continued its steady revenue growth driven by omnis instruments and a strong ramp up in our PD-L1 assays and good momentum in our companion diagnostic business. The end markets in diagnostics and clinical research continue their strong growth.

Looking forward, we are optimistic about our growth opportunities in the diagnostics markets and continue to invest in expanding and improving our applications and solutions portfolio. We remain positive about our growth in these markets, as adoption of our SureSelect and HaloPlex sequencing target enrichment solutions continue, and omnis instruments and reagents, PD-L1 assays and SureFISH gain traction with our customers in clinical oncology applications. Market demand in the nucleic acid solutions business related to therapeutic oligo programs continues to be strong. Our nucleic acid business is expanding into a new site to accommodate future production needs. We will continue to invest in research and development, and seek to expand our position in developing countries and emerging markets.

(in millions)

Research and development	\$20	\$20	\$62	\$60	—	3%
Selling, general and administrative	\$46	\$47	\$142	\$146	(2)%	(3)%

Gross margins for products and services for the three and nine months ended July 31, 2016, decreased 1 percentage point and increased 1 percentage point, respectively, when compared to the same periods last year. The reduction for the three months ended July 31, 2016 was driven by lower gains from hedging contracts and a product mix shift towards our diagnostics and genomics business with below average gross margin. The increase for the nine months ended July 31, 2016 was driven by higher revenue volumes and lower remediation work expenses related to the now lifted FDA warning letter partially offset by wage benefit increases.

Research and development expenses for the three and nine months ended July 31, 2016, was flat and increased 3 percent, respectively, when compared to the same periods last year. This increase is mainly due to the addition of our Cartagena acquisition in the third quarter of 2015, higher R&D program spending partially offset by favorable currency movements.

Selling, general and administrative expenses for the three and nine months ended July 31, 2016, decreased 2 percent and 3 percent, respectively, when compared to the same periods last year. The decrease for the three months ended July 31, 2016 was driven by one-time costs in 2015 not recurring this year. The decline for the nine months ended July 31, 2016 was mainly due to favorable currency movements and savings initiatives partially offset by acquisition expenses and wage increases.

Operating margins for products and services for the three and nine months ended July 31, 2016 increased 2 percentage points and 4 percentage points, respectively when compared to the same periods last year. For the three months ended July 31, 2016, the increase was driven by lower one-time costs, favorable currency movement and lower FDA warning letter expenses. The main reasons for the increase in the nine months ended July 31, 2016 were higher revenue volumes, lower costs on remediation work related to the now lifted FDA warning letter and business improvement initiatives aimed at reducing costs.

Income from Operations

Income from operations for the three and nine months ended July 31, 2016, increased \$6 million and \$22 million, respectively on a corresponding revenue increase of \$13 million and \$32 million, respectively.

Agilent CrossLab

The Agilent CrossLab business spans the entire lab with its extensive consumables and services portfolio, which is designed to improve customer outcomes. The majority of the portfolio is vendor neutral, meaning Agilent can serve and supply customers regardless of their instrument purchase choices. Solutions range from chemistries and supplies to services and software helping to connect the entire lab. Key product categories in consumables include GC and LC columns, sample preparation products, custom chemistries, and a large selection of laboratory instrument supplies.

Services include startup, operational, training and compliance support, as well as asset management and consultative services that help increase customer productivity. Custom service and consumable bundles are tailored to meet the specific application needs of various industries and to keep instruments fully operational and compliant with the respective industry requirements.

Table of Contents

Net Revenue

	Three Months Ended		Nine Months Ended		Year over Year Change	
	July 31, 2016	July 31, 2015	July 31, 2016	July 31, 2015	Three Months	Nine Months
	(in millions)					

Net revenue	\$360	\$336	\$1,050	\$988	7%	6%
-------------	-------	-------	---------	-------	----	----

Agilent CrossLab business revenue for the three and nine months ended July 31, 2016 increased 7 percent and 6 percent, respectively, when compared to the same periods last year. Foreign currency movements for the three and nine months ended July 31, 2016 had an unfavorable currency impact of 1 percentage points and 4 percentage points, respectively, when compared to the same periods last year. Revenue performance was led by increases in remarketed instruments, enterprise service contracts, bio-columns and LC small molecule columns for the three and nine months ended July 31, 2016. Beginning in the third quarter of fiscal year 2016, we changed the methodology we use to derive our revenue by geography. Our revenue by geography for the three and nine months ended July 31, 2016 is determined based on the country where our products were delivered instead of the country where the order was placed. Prior periods in fiscal year 2015 were revised to reflect the same methodology. Geographically, revenue increased 4 percent in the Americas with a 1 percentage point unfavorable currency impact, increased 14 percent in Asia Pacific excluding Japan with a 5 percentage point unfavorable currency impact, increased 4 percent in Japan with a 13 percentage point favorable currency impact and increased 5 percent in Europe with a 2 percentage point unfavorable currency impact for the three months ended July 31, 2016 when compared to the same period last year. Revenue increased 7 percent in the Americas with a 2 percentage point unfavorable currency impact, increased 14 percent in Asia Pacific excluding Japan with a 5 percentage point unfavorable currency impact, declined 10 percent in Japan with a 4 percentage point favorable currency impact and increased 3 percent in Europe with a 5 percentage point unfavorable currency impact for the nine months ended July 31, 2016 when compared to the same period last year.

The pharmaceutical and biotechnology market led all markets in revenue and revenue growth for the three and nine months ended July 31, 2016 when compared to the same periods last year. The food market saw very strong growth and the environmental market saw strong growth for the three months ended July 31, 2016. The same food market saw strong growth for the nine months ended July 31, 2016. Revenues from the remaining markets saw modest growth for the three and nine months ended July 31, 2016.

Looking forward, we expect continued strength in the pharmaceutical and biotechnology markets to drive growth in the near term. Demand for our products and services should continue to be robust due to the need of our customers to extend the life and to increase the efficiency of their instrumentation, even in market segments experiencing slower growth overall. The drivers of growth in the short-term and long-term will be our commitment to bring innovative solutions to market and our focus on improving customer experience. We also remain committed to fiscal discipline by optimizing gross margins across all our product lines.

Selling, general and administrative	\$83	\$76	\$254	\$240	9%	5%

Gross margins for products and services for the three and nine months ended July 31, 2016 was flat in both periods when compared to the same periods last year, with unfavorable currency hedging results, an unfavorable currency impact and higher labor costs being equally offset by higher sales volumes, lower standard costs and logistical cost reductions.

Table of Contents

Research and development expenses for the three and nine months ended July 31, 2016, was flat and decreased 3 percent when compared to the same periods last year, primarily due to a favorable currency impact.

Selling, general and administrative expenses for the three and nine months ended July 31, 2016, increased 9 percent and 5 percent, respectively, when compared to the same periods last year, primarily due to channel expansion and wage increases somewhat offset by a favorable currency impact.

Operating margins for products and services was flat for the three months ended July 31, 2016, and increased 1 percentage point for the nine months ended July 31, 2016 when compared to the same periods last year. For the nine-month comparison, the margin increase from the higher sales volume was mostly offset by the unfavorable currency hedging results, the unfavorable currency impact and the wage increases.

Income from Operations

Income from operations for the three and nine months ended July 31, 2016, increased \$6 million and \$19 million, respectively, on a corresponding revenue increase of \$24 million and \$62 million, respectively.

FINANCIAL CONDITION

Liquidity and Capital Resources

Our financial position as of July 31, 2016 consisted of cash and cash equivalents of \$2,199 million as compared to \$2,003 million as of October 31, 2015.

As of July 31, 2016, approximately \$2,075 million of our cash and cash equivalents is held outside of the U.S. in our foreign subsidiaries. Most of the amounts held outside of the U.S. could be repatriated to the U.S. within a reasonable period of time but, under current law, would be subject to U.S. federal and state income taxes, less applicable foreign tax credits. Agilent has accrued for U.S. federal and state tax liabilities on the earnings of its foreign subsidiaries except when the earnings are asserted as indefinitely reinvested outside of the U.S. Repatriation could result in additional material U.S. federal and state income tax payments in future years. We utilize a variety of funding strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed.

We believe our cash and cash equivalents, cash generated from operations, and ability to access capital markets and credit lines will satisfy, for at least the next twelve months, our liquidity requirements, both globally and domestically, including the following: working capital needs, capital expenditures, business acquisitions, stock repurchases, cash dividends, contractual obligations, commitments, principal and interest payments on debt, and other liquidity requirements associated with our operations.

Net Cash Provided by Operating Activities

Net cash inflow from operating activities was \$559 million for the nine months ended July 31, 2016 compared to cash inflow of \$271 million for the same period in 2015. In the nine months ended July 31, 2016, we paid approximately \$71 million under our variable and incentive pay programs, as compared to a total of \$62 million paid out during the same period of 2015. Net cash paid for income taxes was approximately \$54 million and \$121 million in the nine months ended July 31, 2016 and 2015, respectively. The cash paid for income taxes in the nine months ended July 31, 2015 was due to tax payments related to the Keysight separation. For the nine months ended July 31, 2016 and 2015, other assets and liabilities used cash of \$47 million and \$152 million, respectively. The usage of cash in the nine months ended July 31, 2016 in other assets and liabilities was largely related to the payment of income taxes. The usage of cash in the nine months ended July 31, 2015 in other assets and liabilities was largely the result of

contributions to defined benefit plans, changes in interest and restructuring accruals, income tax liabilities and transaction tax assets and liabilities and tax payments.

In the nine months ended July 31, 2016, accounts receivable provided cash of \$19 million compared to cash provided by \$1 million for the same period in 2015. Days' sales outstanding decreased to 51 days as of July 31, 2016 from 52 days compared to a year ago. Accounts payable used cash of \$27 million for the nine months ended July 31, 2016 compared to cash used of \$47 million in the same period in 2015. Cash used for inventory was \$11 million for the nine months ended July 31, 2016 compared to cash used of \$18 million for the same period in 2015. Inventory days on-hand decreased to 97 days as of July 31, 2016 compared to 98 days as of the end of the same period last year.

We contributed approximately \$19 million and \$35 million to our defined benefit plans in the nine months ended July 31, 2016 and 2015, respectively. Our annual contributions are highly dependent on the relative performance of our assets versus our

Table of Contents

projected liabilities, among other factors. We expect to contribute approximately \$6 million to our defined benefit plans during the remainder of 2016.

Net Cash Used in Investing Activities

Net cash used in investing activities was \$160 million for the nine months ended July 31, 2016 as compared to net cash used in investing activities of \$125 million. Investments in property, plant and equipment were \$87 million for the nine months ended July 31, 2016 compared to \$71 million in the same period of 2015. We expect that total capital expenditures for the current year will be approximately \$135 million. In the nine months ended July 31, 2016, we acquired Seahorse Bioscience for \$235 million, net of cash acquired, compared to no acquisitions in the same period last year. There was an \$80 million payment for the purchase of a cost method investment in Lasergen for the nine months ended July 31, 2016. Loans to equity method investment was \$3 million in the nine months ended July 31, 2016 compared to zero outlay in the same period last year.

Net Cash Used in Financing Activities

Net cash used in financing activities for the nine months ended July 31, 2016 was \$212 million compared to cash used of \$1,056 million for the same period of 2015. The decrease in cash used was largely due to the net cash transferred to Keysight in the nine months ended July 31, 2015 offset by our draw down of borrowings from the revolving credit facility.

Treasury stock repurchases

On November 22, 2013 we announced that our board of directors had authorized a share repurchase program effective in the first quarter of fiscal year 2014, upon the conclusion of the company's previous \$1 billion repurchase program. The program was designed to reduce or eliminate dilution resulting from issuance of stock under the company's employee equity incentive programs to target maintaining a weighted average share count of approximately 335 million diluted shares. During the nine months ended July 31, 2016, we repurchased approximately 2.4 million shares for \$98 million, which completed the purchases under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. For the nine months ended July 31, 2015, we repurchased 6 million shares for \$267 million under this plan.

On May 28, 2015 we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. During the nine months ended July 31, 2016, upon the completion of our previous repurchase program, we repurchased approximately 7.3 million shares for \$290 million, under this authorization. All such shares and related costs are held as treasury stock and accounted for using the cost method. As of July 31, 2016, we had remaining authorization to repurchase up to \$850 million of our common stock under this program.

Dividends

During the nine months ended July 31, 2016, we paid cash dividends of \$0.345 per common share or \$112 million on the company's common stock. During the nine months ended July 31, 2015, we paid cash dividends of \$0.300 per common share or \$100 million on the company's common stock.

Credit Facilities

On September 15, 2014, Agilent entered into a credit agreement with a group of financial institutions which provides for a \$400 million five-year unsecured credit facility that will expire on September 15, 2019. On June 9, 2015, the commitments under the existing credit facility were increased by \$300 million so that the aggregate commitments under the facility now total \$700 million. As of July 31, 2016, the company had borrowings of \$235 million outstanding under the facility. We were in compliance with the covenants for the credit facility during the nine months ended July 31, 2016.

Long-term debt

There have been no changes to the principal, maturity, interest rates and interest payment terms of the Agilent outstanding senior notes and mortgage debt in the three months ended July 31, 2016 as compared to the senior notes and mortgage debt as described in our Annual Report on Form 10-K for the fiscal year ended October 31, 2015.

Table of Contents

Other

As of July 31, 2016 our contractual obligations reported under “other purchase commitments” were approximately \$71 million, an increase of approximately \$18 million in the first nine months of fiscal year 2016, largely due to a renewed telecommunications contract together with a long-term support contract related to the purchase of a software license. There were no other substantial changes from our 2015 Annual Report on Form 10-K to our contractual commitments in the first nine months of fiscal 2016. We have contractual commitments for non-cancelable operating leases. We have no other material non-cancelable guarantees or commitments.

Other long-term liabilities include \$187 million and \$227 million related to uncertain tax positions of continuing operations as of July 31, 2016 and October 31, 2015, respectively. We are unable to accurately predict when these amounts will be realized or released. However, it is reasonably possible that there could be significant changes to our unrecognized tax benefits in the next twelve months due to either the expiration of a statute of limitations or a tax audit settlement.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to foreign currency exchange rate risks inherent in our sales commitments, anticipated sales, and assets and liabilities denominated in currencies other than the functional currency of our subsidiaries. We hedge future cash flows denominated in currencies other than the functional currency using sales forecasts up to twelve months in advance. Our exposure to exchange rate risks is managed on an enterprise-wide basis. This strategy utilizes derivative financial instruments, including option and forward contracts, to hedge certain foreign currency exposures with the intent of offsetting gains and losses that occur on the underlying exposures with gains and losses on the derivative contracts hedging them. We do not currently and do not intend to utilize derivative financial instruments for speculative trading purposes. To the extent that we are required to pay for all, or portions, of an acquisition price in foreign currencies, we may enter into foreign exchange contracts to reduce the risk that currency movements will impact the cost of the transaction.

Our operations generate non-functional currency cash flows such as revenues, third party vendor payments and inter-company payments. In anticipation of these foreign currency cash flows and in view of volatility of the currency market, we enter into such foreign exchange contracts as are described above to manage our currency risk.

Approximately 55 percent and 57 percent of our revenues were generated in U.S. dollars during the nine months ended July 31, 2016 and 2015, respectively. The unfavorable effects of changes in foreign currency exchange rates, principally as a result of the strength of the U.S. dollar, has decreased revenue by approximately 2 percentage points in the nine months ended July 31, 2016. The impact of foreign currency movements is calculated by applying the prior period foreign currency exchange rates to the current year period.

We performed a sensitivity analysis assuming a hypothetical 10 percent adverse movement in foreign exchange rates to the hedging contracts and the underlying exposures described above. As of July 31, 2016, the analysis indicated that these hypothetical market movements would not have a material effect on our condensed consolidated financial position, results of operations or cash flows.

We are exposed to interest rate risk due to the mismatch between the interest expense we pay on our loans at fixed rates and the variable rates of interest we receive from cash, cash equivalents and other short-term investments. We have issued long-term debt in U.S. dollars or foreign currencies at fixed interest rates based on the market conditions at the time of financing. We believe that the fair value of our fixed rate debt changes when the underlying market rates of interest change, and we may use interest rate swaps to modify such market risk.

We performed a sensitivity analysis assuming a hypothetical 10 percent adverse movement in interest rates relating to the underlying fair value of our fixed rate debt. As of July 31, 2016, the sensitivity analyses indicated that a hypothetical 10 percent adverse movement in interest rates would result in an immaterial impact to the fair value of our fixed interest rate debt.

We are also exposed to interest rate risk related to our forward starting interest rate swaps in connection with future interest payments associated with the planned issuance of debt later this fiscal year. If interest rates decrease below the interest rate swap rate on the receive variable/pay fixed contract then losses would accumulate in other comprehensive income (loss). Conversely if interest rates increase above the interest rate swap rate on the receive variable/pay fixed contract then gains would accumulate in other comprehensive income (loss). A 10 percent adverse movement in interest rates would decrease the fair value of the swap arrangement by approximately \$1 million. Amounts accumulated in other comprehensive income (loss) will be reclassified to interest expense when the forecasted future interest payments on debt occur.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures as required by Exchange Act Rule 13a-15(b) as of the end of the period covered by this report.

As previously disclosed under Item 9A. "Controls and Procedures" in our Annual Report on Form 10-K for our fiscal year ended October 31, 2015, we concluded that our disclosure controls and procedures were not effective based on the material weakness identified. During the year ended October 31, 2015, management identified certain errors in the tax accounts, primarily related to prior years, and as a result, concluded that the company did not design and maintain effective controls over the accounting for income taxes. Specifically, certain controls activities over the completeness and accuracy of our accounting for (i) U.S. taxes on foreign earnings, (ii) international provision for income taxes and (iii) reconciliation of income taxes payable were not performed on a timely basis or at the appropriate level of precision. These control deficiencies in the accounting for income taxes could result in a material misstatement that would not be prevented or detected.

Management's Remediation of Material Weakness in Internal Control over Financial Reporting

Management has reviewed the process for preparation and review of the Company's income tax provision. Significant progress has been made through July 31, 2016. The remediation actions include the design and implementation of critical management review controls through revision and formalization of the income tax review processes, including enhancing the formality and rigor of the review and reconciliation procedures. Controls have been designed and implemented to validate the inputs and outputs for the significant tax accounting process, as well as enhancing the tax accounting expertise within the tax function, focused on the areas identified in the material weakness. While some of the remediation actions are completed, remediation actions will take time to be fully integrated and confirmed to be effective and sustainable. Until we have concluded the controls are operating effectively, the material weakness will continue to exist.

Changes in Internal Control over Financial Reporting

Other than the changes disclosed above, there were no changes in our internal control over financial reporting during the quarter ended July 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved in lawsuits, claims, investigations and proceedings, including, but not limited to, intellectual property, commercial and employment matters, which arise in the ordinary course of business. There are no matters pending that we currently believe are probable or reasonably possible of having a material impact to our business, consolidated financial condition, results of operations or cash flows.

ITEM 1A. RISK FACTORS

Risks, Uncertainties and Other Factors That May Affect Future Results

Our operating results and financial condition could be harmed if the markets into which we sell our products decline or do not grow as anticipated.

Visibility into our markets is limited. Our quarterly sales and operating results are highly dependent on the volume and timing of orders received during the fiscal quarter, which are difficult to forecast and may be cancelled by our customers. A large amount of our orders are back-end loaded toward the end of our second and fourth fiscal quarters and their timing may be influenced by the sales incentive programs we have in place. In addition, our revenue and earnings forecasts for future fiscal quarters are often based on the expected seasonality of our markets. However, the markets we serve do not always experience the seasonality that we expect. Any decline in our customers' markets or in general economic conditions would likely result in a reduction in demand for our products and services. Also, if our customers' markets decline, we may not be able to collect on outstanding amounts due to us. Such declines could harm our consolidated financial position, results of operations, cash flows and stock price, and could limit our profitability. Also, in such an environment, pricing pressures could intensify. Since a significant portion of our operating expenses is relatively fixed in nature due to sales, research and development and manufacturing costs, if we were unable to respond quickly enough these pricing pressures could further reduce our operating margins.

If we do not introduce successful new products and services in a timely manner to address increased competition through frequent new product and service introductions, rapid technological changes and changing industry standards, our products and services will become obsolete, and our operating results will suffer.

We generally sell our products in industries that are characterized by increased competition through frequent new product and service introductions, rapid technological changes and changing industry standards. In addition, many of the markets in which we operate are seasonal. Without the timely introduction of new products, services and enhancements, our products and services will become technologically obsolete over time, in which case our revenue and operating results would suffer. The success of our new products and services will depend on several factors, including our ability to:

- properly identify customer needs and predict future needs;
- innovate and develop new technologies, services and applications;
- successfully commercialize new technologies in a timely manner;
- manufacture and deliver our products in sufficient volumes and on time;
- differentiate our offerings from our competitors' offerings;
- price our products competitively;
- anticipate our competitors' development of new products, services or technological innovations; and

- control product quality in our manufacturing process.

General economic conditions may adversely affect our operating results and financial condition.

Our business is sensitive to negative changes in general economic conditions, both inside and outside the United States. Slower global economic growth and uncertainty in the markets in which we operate may adversely impact our business resulting in:

- reduced demand for our products, delays in the shipment of orders, or increases in order cancellations;
- increased risk of excess and obsolete inventories;
- increased price pressure for our products and services; and

Table of Contents

greater risk of impairment to the value, and a detriment to the liquidity, of our investment portfolio.

Failure to adjust our purchases due to changing market conditions or failure to estimate our customers' demand could adversely affect our income.

Our income could be harmed if we are unable to adjust our purchases to reflect market fluctuations, including those caused by the seasonal nature of the markets in which we operate. The sale of our products and services are dependent, to a large degree, on customers whose industries are subject to seasonal trends in the demand for their products. During a market upturn, we may not be able to purchase sufficient supplies or components to meet increasing product demand, which could materially affect our results. In the past we have seen a shortage of parts for some of our products. In addition, some of the parts that require custom design are not readily available from alternate suppliers due to their unique design or the length of time necessary for design work. Should a supplier cease manufacturing such a component, we would be forced to reengineer our product. In addition to discontinuing parts, suppliers may also extend lead times, limit supplies or increase prices due to capacity constraints or other factors. In order to secure components for the production of products, we may continue to enter into non-cancelable purchase commitments with vendors, or at times make advance payments to suppliers, which could impact our ability to adjust our inventory to declining market demands. If demand for our products is less than we expect, we may experience additional excess and obsolete inventories and be forced to incur additional expenses.

Demand for some of our products and services depends on capital spending policies of our customers, research and development budgets and on government funding policies.

Our customers include pharmaceutical companies, laboratories, universities, healthcare providers, government agencies and public and private research institutions. Fluctuations in the research and development budgets at these organizations could have a significant effect on the demand for our products and services. Many factors, including public policy spending priorities, available resources, mergers and consolidation, spending priorities, institutional and governmental budgetary policies and product and economic cycles, have a significant effect on the capital spending policies of these entities. Research and development budgets fluctuate due to changes in available resources, consolidation, spending priorities, general economic conditions and institutional and governmental budgetary policies. The timing and amount of revenue from customers that rely on government funding or research may vary significantly due to factors that can be difficult to forecast. These policies in turn can have a significant effect on the demand for our products and services. If demand for our products and services is adversely affected, our revenue and operating results would suffer.

Economic, political, foreign currency and other risks associated with international sales and operations could adversely affect our results of operations.

Because we sell our products worldwide, our business is subject to risks associated with doing business internationally. We anticipate that revenue from international operations will continue to represent a majority of our total revenue. International revenue and costs are subject to the risk that fluctuations in foreign currency exchange rates could adversely affect our financial results when translated into U.S. dollars for financial reporting purposes. The unfavorable effects of changes in foreign currency exchange rates has decreased revenues by approximately 2 percentage points in the nine months ended July 31, 2016. In addition, many of our employees, contract manufacturers, suppliers, job functions and manufacturing facilities are located outside the United States. Accordingly, our future results could be harmed by a variety of factors, including:

- interruption to transportation flows for delivery of parts to us and finished goods to our customers;
- changes in foreign currency exchange rates;
- changes in a specific country's or region's political, economic or other conditions;

- trade protection measures and import or export licensing requirements;
- negative consequences from changes in tax laws including changes to U.S. tax legislation that could materially increase our effective tax rate;
- difficulty in staffing and managing widespread operations;
- differing labor regulations;
- differing protection of intellectual property;
- unexpected changes in regulatory requirements; and
- geopolitical turmoil, including terrorism and war.

We centralized most of our accounting and tax processes to two locations: India and Malaysia. These processes include general accounting, cost accounting, accounts payable, accounts receivables and tax functions. If conditions change in those countries, it may adversely affect operations, including impairing our ability to pay our suppliers and collect our receivables. Our

Table of Contents

results of operations, as well as our liquidity, may be adversely affected and possible delays may occur in reporting financial results.

Additionally, we must comply with complex foreign and U.S. laws and regulations, such as the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, and other local laws prohibiting corrupt payments to governmental officials, anti-competition regulations and sanctions imposed by the U.S. Office of Foreign Assets Control and other similar laws and regulations. Violations of these laws and regulations could result in fines and penalties, criminal sanctions, restrictions on our business conduct and on our ability to offer our products in one or more countries, and could also materially affect our brand, our ability to attract and retain employees, our international operations, our business and our operating results. Although we have implemented policies and procedures designed to ensure compliance with these laws and regulations, there can be no assurance that our employees, contractors, or agents will not violate our policies.

In addition, although the majority of our products are priced and paid for in U.S. dollars, a significant amount of certain types of expenses, such as payroll, utilities, tax, and marketing expenses, are paid in local currencies. Our hedging programs reduce, but do not always entirely eliminate, within any given twelve month period, the impact of currency exchange rate movements, and therefore fluctuations in exchange rates, including those caused by currency controls, could impact our business, operating results and financial condition by resulting in lower revenue or increased expenses. However, for expenses beyond that twelve month period, our hedging strategy does not mitigate our exposure. In addition, our currency hedging programs involve third party financial institutions as counterparties. The weakening or failure of financial institution counterparties may adversely affect our hedging programs and our financial condition through, among other things, a reduction in available counterparties, increasingly unfavorable terms, and the failure of the counterparties to perform under hedging contracts.

Our strategic initiatives could have long-term adverse effects on our business and we may not realize the operational or financial benefits from such actions.

We have implemented multiple strategic initiatives across our businesses to adjust our cost structure, and we may engage in similar activities in the future. These strategic initiatives and our regular ongoing cost reduction activities may distract management, could slow improvements in our products and services and limit our ability to increase production quickly if demand for our products increases. In addition, delays in implementing our strategic initiatives, unexpected costs or failure to meet targeted improvements may diminish the operational and financial benefits we realize from such actions. Any of the above circumstances could have an adverse effect on our business and financial statements.

Our business will suffer if we are not able to retain and hire key personnel.

Our future success depends partly on the continued service of our key research, engineering, sales, marketing, manufacturing, executive and administrative personnel. If we fail to retain and hire a sufficient number of these personnel, we will not be able to maintain or expand our business. The markets in which we operate are very dynamic, and our businesses continue to respond with reorganizations, workforce reductions and site closures. We believe our pay levels are very competitive within the regions that we operate. However, there is an intense competition for certain highly technical specialties in geographic areas where we continue to recruit, and it may become more difficult to retain our key employees.

Our acquisitions, strategic investments and alliances, joint ventures, exiting of businesses and divestitures may result in financial results that are different than expected.

In the normal course of business, we frequently engage in discussions with third parties relating to possible acquisitions, strategic investments and alliances, joint ventures and divestitures, and generally expect to complete several transactions per year. In addition, we may decide to exit a particular business within our product portfolio. As a result of such transactions, our financial results may differ from our own or the investment community's expectations in a given fiscal quarter, or over the long term. We may have difficulty developing, manufacturing and marketing the products of a newly acquired company in a way that enhances the performance of our combined businesses or product lines. Transactions such as acquisitions have resulted, and may in the future result, in unexpected significant costs and expenses. In the future, we may be required to record charges to earnings during the period if we determine there is an impairment of goodwill or intangible assets, up to the full amount of the value of the assets, or, in the case of strategic investments and alliances, consolidate results, including losses, of third parties or write down investment values or loans and convertible notes related to the strategic investment. In addition, acquisitions and strategic investments and alliances may require us to integrate and collaborate with a different company culture, management team and business infrastructure. Depending on the size and complexity of an acquisition, our successful integration of the entity depends on a variety of factors, including introducing new products and meeting revenue targets as expected, the retention of key employees and the retention of key customers.

Table of Contents

The integration of acquired businesses is likely to result in our systems and internal controls becoming increasingly complex and more difficult to manage. Any difficulties in the assimilation of acquired businesses into our control system could harm our operating results or cause us to fail to meet our financial reporting obligations.

A successful divestiture depends on various factors, including our ability to effectively transfer liabilities, contracts, facilities and employees to the purchaser, identify and separate the intellectual property to be divested from the intellectual property that we wish to keep and reduce fixed costs previously associated with the divested assets or business. In addition, if customers of the divested business do not receive the same level of service from the new owners, this may adversely affect our other businesses to the extent that these customers also purchase other Agilent products. In exiting a business, we may still retain liabilities associated with the support and warranty of those businesses. All of these efforts require varying levels of management resources, which may divert our attention from other business operations. If we do not realize the expected benefits or synergies of such transactions, our consolidated financial position, results of operations, cash flows and stock price could be negatively impacted.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results, which could lead to a loss of investor confidence in our financial statements and have an adverse effect on our stock price.

Effective internal controls are necessary for us to provide reliable and accurate financial statements and to effectively prevent fraud. We devote significant resources and time to comply with the internal control over financial reporting requirements of the Sarbanes Oxley Act of 2002. As further described in Part II, Item 9A, "Controls and Procedures" in our Annual Report on Form 10-K for our fiscal year ended October 31, 2015, management has concluded that, because of a material weakness in our internal control over financial reporting related to the accounting for income taxes, our disclosure controls and procedures were not effective as of October 31, 2015. We have and will continue to enhance our controls and expect to remediate the material weakness. However, we cannot be certain that these measures will be successful or that we will be able to prevent future significant deficiencies or material weaknesses. Inadequate internal controls could cause investors to lose confidence in our reported financial information, which could have a negative effect on investor confidence in our financial statements, the trading price of our stock and our access to capital.

Integrating Dako A/S may be more difficult, costly or time consuming than expected and our business and financial condition may be materially impaired.

We may not achieve the desired benefits from our acquisition and integration of Dako. In addition, the operation of Dako within Agilent may be a difficult, costly and time-consuming process that involves a number of risks, including, but not limited to:

- our response to significant competitive pressure;
- difficulties in meeting new product timelines;
- the ability to grow in emerging markets;
- increased exposure to certain governmental regulations and compliance requirements;
- increased costs to address certain governmental regulations and compliance issues, such as the U.S. Food and Drug Administration ("FDA") warning letter received in August 2013 which has now been lifted by the FDA;
- increased costs and use of resources; and
- difficulties in the assimilation of different corporate cultures, practices and sales and distribution methodologies, as well as in the assimilation and retention of geographically dispersed, decentralized operations and personnel.

Even if we are able to successfully operate Dako within Agilent, we may not be able to realize the revenue and other synergies and growth that we anticipated from the acquisition in the time frame that we expected, and the costs of

achieving these benefits may be higher than what we expected. As a result, the Dako acquisition and integration may not contribute to our earnings as expected, we may not achieve our operating margin targets when expected, or at all, and we may not achieve the other anticipated strategic and financial benefits of this transaction.

Our customers and we are subject to various governmental regulations, compliance with or changes in such regulations may cause us to incur significant expenses, and if we fail to maintain satisfactory compliance with certain regulations, we may be forced to recall products and cease their manufacture and distribution, and we could be subject to civil or criminal penalties.

Our customers and we are subject to various significant international, federal, state and local regulations, including but not limited to health and safety, packaging, product content, labor and import/export regulations. These regulations are complex, change frequently and have tended to become more stringent over time. We may be required to incur significant expenses to comply with these regulations or to remedy violations of these regulations. Any failure by us to comply with applicable government regulations could also result in cessation of our operations or portions of our operations, product recalls or impositions of fines

Table of Contents

and restrictions on our ability to carry on or expand our operations. In addition, because many of our products are regulated or sold into regulated industries, we must comply with additional regulations in marketing our products. We develop, configure and market our products to meet customer needs created by these regulations. Any significant change in these regulations could reduce demand for our products, force us to modify our products to comply with new regulations or increase our costs of producing these products. If demand for our products is adversely affected or our costs increase, our business would suffer.

Our products and operations are also often subject to the rules of industrial standards bodies, like the International Standards Organization, as well as regulation by other agencies such as the FDA. We also must comply with work safety rules. If we fail to adequately address any of these regulations, our businesses could be harmed.

We are subject to extensive regulation by the FDA and certain similar foreign regulatory agencies, and failure to comply with such regulations could harm our reputation, business, financial condition and results of operations.

A number of our products are subject to regulation by the FDA and certain similar foreign regulatory agencies. In addition, a number of our products may be in the future subject to regulation by the FDA and certain similar foreign regulatory agencies. These regulations govern a wide variety of product related activities, from quality management, design and development to labeling, manufacturing, promotion, sales and distribution. If we or any of our suppliers or distributors fail to comply with FDA and other applicable regulatory requirements or are perceived to potentially have failed to comply, we may face, among other things, warning letters, adverse publicity affecting both us and our customers; investigations or notices of non-compliance, fines, injunctions, and civil penalties; import or export restrictions; partial suspensions or total shutdown of production facilities or the imposition of operating restrictions; increased difficulty in obtaining required FDA clearances or approvals or foreign equivalents; seizures or recalls of our products or those of our customers; or the inability to sell our products. Any such FDA or other regulatory agency actions could disrupt our business and operations, lead to significant remedial costs and have a material adverse impact on our financial position and results of operations.

Some of our products are subject to particularly complex regulations such as regulations of toxic substances and failure to comply with such regulations could harm our business.

Some of our products and related consumables are used in conjunction with chemicals whose manufacture, processing, distribution and notification requirements are regulated by the U.S. Environmental Protection Agency ("EPA") under the Toxic Substances Control Act, and by regulatory bodies in other countries with similar laws. The Toxic Substances Control Act regulations govern, among other things, the testing, manufacture, processing and distribution of chemicals, the testing of regulated chemicals for their effects on human health and safety and import and export of chemicals. The Toxic Substances Control Act prohibits persons from manufacturing any chemical in the United States that has not been reviewed by EPA for its effect on health and safety, and placed on an EPA inventory of chemical substances. We must ensure conformance of the manufacturing, processing, distribution of and notification about these chemicals to these laws and adapt to regulatory requirements in all applicable countries as these requirements change. If we fail to comply with the notification, record-keeping and other requirements in the manufacture or distribution of our products, then we could be made to pay civil penalties, face criminal prosecution and, in some cases, be prohibited from distributing or marketing our products until the products or component substances are brought into compliance.

Our business may suffer if we fail to comply with government contracting laws and regulations.

We derive a portion of our revenue from direct and indirect sales to U.S., state, local, and foreign governments and their respective agencies. Such contracts are subject to various procurement laws and regulations, and contract provisions relating to their formation, administration and performance. Failure to comply with these laws, regulations

or provisions in our government contracts could result in the imposition of various civil and criminal penalties, termination of contracts, forfeiture of profits, suspension of payments, or suspension from future government contracting. If our government contracts are terminated, if we are suspended from government work, or if our ability to compete for new contracts is adversely affected, our business could suffer.

Our retirement and post retirement pension plans are subject to financial market risks that could adversely affect our future results of operations and cash flows.

We have significant retirement and post retirement pension plan assets and obligations. The performance of the financial markets and interest rates impact our plan expenses and funding obligations. Significant decreases in market interest rates, decreases in the fair value of plan assets and investment losses on plan assets will increase our funding obligations, and adversely impact our results of operations and cash flows.

The impact of consolidation and acquisitions of competitors is difficult to predict and may harm our business.

Table of Contents

The life sciences industry is intensely competitive and has been subject to increasing consolidation. Consolidation in our industries could result in existing competitors increasing their market share through business combinations and result in stronger competitors, which could have a material adverse effect on our business, financial condition and results of operations. We may not be able to compete successfully in increasingly consolidated industries and cannot predict with certainty how industry consolidation will affect our competitors or us.

If we are unable to successfully manage the consolidation and streamlining of our manufacturing operations, we may not achieve desired efficiencies and our ability to deliver products to our customers could be disrupted.

Although we utilize manufacturing facilities throughout the world, we have been consolidating, and may continue to consolidate, our manufacturing operations to certain of our plants to achieve efficiencies and gross margin improvements. Additionally, we typically consolidate the production of products from our acquisitions into our supply chain and manufacturing processes, which are technically complex and require expertise to operate. If we are unable to establish processes to efficiently and effectively produce high quality products in the consolidated locations, we may not achieve the anticipated synergies and production may be disrupted, which could adversely affect our business and operating results.

Our operating results may suffer if our manufacturing capacity does not match the demand for our products.

Because we cannot immediately adapt our production capacity and related cost structures to rapidly changing market conditions, when demand does not meet our expectations, our manufacturing capacity will likely exceed our production requirements. If, during a general market upturn or an upturn in one of our segments, we cannot increase our manufacturing capacity to meet product demand, we will not be able to fulfill orders in a timely manner which could lead to order cancellations, contract breaches or indemnification obligations. This inability could materially and adversely limit our ability to improve our results. By contrast, if during an economic downturn we had excess manufacturing capacity, then our fixed costs associated with excess manufacturing capacity would adversely affect our income, margins, and operating results.

Dependence on contract manufacturing and outsourcing other portions of our supply chain, including logistics and third-party package delivery services, may adversely affect our ability to bring products to market and damage our reputation. Dependence on outsourced information technology and other administrative functions may impair our ability to operate effectively.

As part of our efforts to streamline operations and to cut costs, we outsource aspects of our manufacturing processes and other functions and continue to evaluate additional outsourcing. If our contract manufacturers or other outsourcers fail to perform their obligations in a timely manner or at satisfactory quality levels, our ability to bring products to market and our reputation could suffer. For example, during a market upturn, our contract manufacturers may be unable to meet our demand requirements, which may preclude us from fulfilling our customers' orders on a timely basis. The ability of these manufacturers to perform is largely outside of our control. If one or more of the third-party package delivery providers experiences a significant disruption in services or institutes a significant price increase, we may have to seek alternative providers, our costs could increase and the delivery of our products could be prevented or delayed. Additionally, changing or replacing our contract manufacturers, logistics providers or other outsourcers could cause disruptions or delays. In addition, we outsource significant portions of our information technology ("IT") and other administrative functions. Since IT is critical to our operations, any failure to perform on the part of our IT providers could impair our ability to operate effectively. In addition to the risks outlined above, problems with manufacturing or IT outsourcing could result in lower revenue and unexecuted efficiencies, and impact our results of operations and our stock price. Much of our outsourcing takes place in developing countries and, as a result, may be subject to geopolitical uncertainty.

Environmental contamination from past operations could subject us to unreimbursed costs and could harm on-site operations and the future use and value of the properties involved, and environmental contamination caused by ongoing operations could subject us to substantial liabilities in the future.

Certain properties transferred to Keysight Technologies, Inc. ("Keysight") as part of the separation are undergoing remediation by HP Inc. and Hewlett-Packard Enterprise (formerly Hewlett-Packard Company) (together "HP") for subsurface contaminations that were known at the time of our separation from HP. HP has agreed to retain the liability for this subsurface contamination, perform the required remediation and indemnify Keysight with respect to claims arising out of that contamination. HP will have access to those Keysight properties to perform remediation. While HP has agreed to minimize interference with on-site operations at those properties, remediation activities and subsurface contamination may require Keysight to incur unreimbursed costs and could harm on-site operations and the future use and value of the properties. We cannot be sure that Keysight will not seek additional reimbursement from us for that interference or unreimbursed costs. We cannot be sure that HP will continue to fulfill its indemnification or remediation obligations, in which case Keysight may seek indemnification from us. In addition, the

Table of Contents

determination of the existence and cost of any additional contamination caused by us prior to the separation could involve costly and time-consuming negotiations and litigation.

Other than those properties currently undergoing remediation by HP, we have agreed to indemnify HP, with respect to any liability associated with contamination from past operations, and Keysight, with respect to any liability associated with contamination prior to the separation, at, respectively, properties transferred from HP to us and properties transferred by us to Keysight. While we are not aware of any material liabilities associated with any potential subsurface contamination at any of those properties, subsurface contamination may exist, and we may be exposed to material liability as a result of the existence of that contamination.

Our current and historical manufacturing processes involve, or have involved, the use of substances regulated under various international, federal, state and local laws governing the environment. As a result, we may become subject to liabilities for environmental contamination, and these liabilities may be substantial. While we have divested substantially all of our semiconductor related businesses to Avago Technologies Ltd. and Advantest Corporation and regardless of indemnification arrangements with those parties, we may still become subject to liabilities for historical environmental contamination related to those businesses. Although our policy is to apply strict standards for environmental protection at our sites inside and outside the United States, even if the sites outside the United States are not subject to regulations imposed by foreign governments, we may not be aware of all conditions that could subject us to liability.

As part of our acquisition of Varian, Inc. ("Varian") we assumed the liabilities of Varian, including Varian's costs and potential liabilities for environmental matters. One such cost is our obligation, along with the obligation of Varian Semiconductor Equipment Associates, Inc. ("VSEA") to each indemnify Varian Medical Systems, Inc. ("VMS") for certain costs relating to (a) environmental investigation, monitoring and/or remediation activities at certain facilities previously operated by Varian Associates, Inc. ("VAI") and third-party claims made in connection with environmental conditions at those facilities, and (b) EPA or third-party claims alleging that VAI or VMS is a potentially responsible party under the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended in connection with certain sites to which VAI allegedly shipped manufacturing waste for recycling, treatment or disposal. Although any ultimate liability arising from environmental-related matters could result in significant expenditures that, if aggregated and assumed to occur within a single fiscal year, could be material to our financial statements, the likelihood of such occurrence is considered remote. Based on information currently available and our best assessment of the ultimate amount and timing of environmental-related events, management believes that the costs of environmental-related matters are unlikely to have a material adverse effect on our financial condition or results of operations.

Regulations related to "conflict minerals" may cause us to incur additional expenses and could limit the supply and increase the cost of certain metals used in manufacturing our products.

We are subject to the rules of the Securities and Exchange Commission ("SEC") which require disclosures by public companies of specified minerals, known as conflict minerals, that are necessary to the functionality or production of products manufactured or contracted to be manufactured. The rule, which requires an annual disclosure report to be filed with the SEC by May 31st of each year, requires companies to perform due diligence, disclose and report whether or not such minerals originate from the Democratic Republic of Congo or an adjoining country. There are costs associated with complying with these disclosure requirements, including for diligence in regards to the sources of any conflict minerals used in our products, in addition to the cost of remediation and other changes to products, processes, or sources of supply as a consequence of such verification activities. In addition, our ongoing implementation of these rules could adversely affect the sourcing, supply, and pricing of materials used in our products. The rule could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals used in the manufacture of our products, including tin, tantalum, gold and tungsten. The number of suppliers

who provide conflict-free minerals may be limited. In addition, there may be material costs associated with complying with the disclosure requirements, such as costs related to the due diligence process of determining the source of certain minerals used in our products, as well as costs of possible changes to products, processes, or sources of supply as a consequence of such verification activities. As our supply chain is complex and we use contract manufacturers for some of our products, we may not be able to sufficiently verify the origins of the relevant minerals used in our products through the due diligence procedures that we implement, which may harm our reputation. We may also encounter challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free, which could place us at a competitive disadvantage if we are unable to do so.

Third parties may claim that we are infringing their intellectual property and we could suffer significant litigation or licensing expenses or be prevented from selling products or services.

From time to time, third parties may claim that one or more of our products or services infringe their intellectual property rights. We analyze and take action in response to such claims on a case by case basis. Any dispute or litigation regarding patents or other intellectual property could be costly and time-consuming due to the complexity of our technology and the uncertainty of

Table of Contents

intellectual property litigation and could divert our management and key personnel from our business operations. A claim of intellectual property infringement could force us to enter into a costly or restrictive license agreement, which might not be available under acceptable terms or at all, could require us to redesign our products, which would be costly and time-consuming, and/or could subject us to significant damages or to an injunction against development and sale of certain of our products or services. Our intellectual property portfolio may not be useful in asserting a counterclaim, or negotiating a license, in response to a claim of intellectual property infringement. In certain of our businesses we rely on third party intellectual property licenses and we cannot ensure that these licenses will be available to us in the future on favorable terms or at all.

Third parties may infringe our intellectual property and we may suffer competitive injury or expend significant resources enforcing our rights.

Our success depends in large part on our proprietary technology, including technology we obtained through acquisitions. We rely on various intellectual property rights, including patents, copyrights, trademarks and trade secrets, as well as confidentiality provisions and licensing arrangements, to establish our proprietary rights. If we do not enforce our intellectual property rights successfully our competitive position may suffer which could harm our operating results.

Our pending patent applications, and our pending copyright and trademark registration applications, may not be allowed or competitors may challenge the validity or scope of our patents, copyrights or trademarks. In addition, our patents, copyrights, trademarks and other intellectual property rights may not provide us a significant competitive advantage.

We may need to spend significant resources monitoring our intellectual property rights and we may or may not be able to detect infringement by third parties. Our competitive position may be harmed if we cannot detect infringement and enforce our intellectual property rights quickly or at all. In some circumstances, we may choose to not pursue enforcement because an infringer has a dominant intellectual property position or for other business reasons. In addition, competitors might avoid infringement by designing around our intellectual property rights or by developing non-infringing competing technologies. Intellectual property rights and our ability to enforce them may be unavailable or limited in some countries which could make it easier for competitors to capture market share and could result in lost revenues. Furthermore, some of our intellectual property is licensed to others which allow them to compete with us using that intellectual property.

Changes in tax laws, unfavorable resolution of tax examinations, or exposure to additional income tax liabilities could have a material adverse effect on our results of operations, financial condition and liquidity.

We are subject to income taxes in both the U.S. and various foreign jurisdictions. Governments in the jurisdictions in which we operate implement changes to tax laws and regulations from time to time. Any changes in corporate income tax laws relating to transfer pricing or repatriation of capital, any changes in the interpretation of existing tax laws and regulations, or any implementation of tax laws relating to proposals to curb base erosion and profit shifting or proposals for fundamental U.S. and foreign corporate tax reform, could lead to increases in overall tax liability, which could materially impact our effective tax rate and have a significant adverse impact on our results of operations. We are also subject to ongoing tax examinations of our tax returns by the U.S. Internal Revenue Service and other tax authorities in various jurisdictions. We regularly assess the likelihood of adverse outcomes resulting from ongoing tax examinations to determine the adequacy of our provision for income taxes. These assessments can require a high degree of judgment and estimation. Intercompany transactions associated with the sale of inventory, services, intellectual property and cost share arrangements are complex and affect our tax liabilities. The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax laws and regulations in multiple jurisdictions. There can be no assurance that the outcomes from ongoing tax examinations will not have an adverse

effect on our operating results and financial condition. A difference in the ultimate resolution of tax uncertainties from what is currently estimated could have an adverse effect on our operating results and financial condition.

If tax incentives change or cease to be in effect, our income taxes could increase significantly.

Agilent benefits from tax incentives extended to its foreign subsidiaries to encourage investment or employment. Several jurisdictions have granted Agilent tax incentives which require renewal at various times in the future. The incentives are conditioned on achieving various thresholds of investments and employment, or specific types of income. Agilent's taxes could increase if the incentives are not renewed upon expiration. If Agilent cannot or does not wish to satisfy all or parts of the tax incentive conditions, we may lose the related tax incentive and could be required to refund tax incentives previously realized. As a result, our effective tax rate could be higher than it would have been had we maintained the benefits of the tax incentives.

Table of Contents

We have substantial cash requirements in the United States while most of our cash is generated outside of the United States. The failure to maintain a level of cash sufficient to address our cash requirements in the United States could adversely affect our financial condition and results of operations.

Although the cash generated in the United States from our operations should cover our normal operating requirements and debt service requirements, a substantial amount of additional cash is required for special purposes such as the maturity of our debt obligations, our stock repurchase program, our declared dividends and acquisitions of third parties. Our business operating results, financial condition, and strategic initiatives could be adversely impacted if we were unable to address our U.S. cash requirements through the efficient and timely repatriations of overseas cash or other sources of cash obtained at an acceptable cost.

We have outstanding debt and may incur other debt in the future, which could adversely affect our financial condition, liquidity and results of operations.

We currently have outstanding an aggregate principal amount of \$1.6 billion in senior unsecured notes, and a \$38 million secured mortgage. We also are party to a five-year unsecured revolving credit facility which expires in September 2019. On June 9, 2015, we increased the commitments under the existing credit facility by \$300 million so that the aggregate commitments under the facility now total \$700 million and retained a provision that allows us to further increase commitments to the credit facility by \$300 million in the aggregate, subject to certain conditions. As of July 31, 2016, we had borrowings of \$235 million outstanding under the facility. We may borrow additional amounts in the future and use the proceeds from any future borrowing for general corporate purposes, other future acquisitions, expansion of our business or repurchases of our outstanding shares of common stock.

Our incurrence of this debt, and increases in our aggregate levels of debt, may adversely affect our operating results and financial condition by, among other things:

- increasing our vulnerability to downturns in our business, to competitive pressures and to adverse economic and industry conditions;
- requiring the dedication of an increased portion of our expected cash flows from operations to service our indebtedness, thereby reducing the amount of expected cash flows available for other purposes, including capital expenditures, acquisitions, stock repurchases and dividends; and
- limiting our flexibility in planning for, or reacting to, changes in our business and our industry.

Our current revolving credit facility imposes restrictions on us, including restrictions on our ability to create liens on our assets and the ability of our subsidiaries to incur indebtedness, and requires us to maintain compliance with specified financial ratios. Our ability to comply with these ratios may be affected by events beyond our control. In addition, the indenture governing our senior notes contains covenants that may adversely affect our ability to incur certain liens or engage in certain types of sale and leaseback transactions. If we breach any of the covenants and do not obtain a waiver from the lenders, then, subject to applicable cure periods, our outstanding indebtedness could be declared immediately due and payable.

If we suffer a loss to our factories, facilities or distribution system due to catastrophe, our operations could be seriously harmed.

Our factories, facilities and distribution system are subject to catastrophic loss due to fire, flood, terrorism or other natural or man-made disasters. In particular, several of our facilities could be subject to a catastrophic loss caused by earthquake due to their locations. Our production facilities, headquarters and Agilent Technologies Laboratories in California, and our production facilities in Japan, are all located in areas with above-average seismic activity. If any of these facilities were to experience a catastrophic loss, it could disrupt our operations, delay production, shipments and

revenue and result in large expenses to repair or replace the facility. If such a disruption were to occur, we could breach agreements, our reputation could be harmed, and our business and operating results could be adversely affected. In addition, since we have consolidated our manufacturing facilities, we are more likely to experience an interruption to our operations in the event of a catastrophe in any one location. Although we carry insurance for property damage and business interruption, we do not carry insurance or financial reserves for interruptions or potential losses arising from earthquakes or terrorism. Also, our third party insurance coverage will vary from time to time in both type and amount depending on availability, cost and our decisions with respect to risk retention. Economic conditions and uncertainties in global markets may adversely affect the cost and other terms upon which we are able to obtain third party insurance. If our third party insurance coverage is adversely affected, or to the extent we have elected to self-insure, we may be at a greater risk that our operations will be harmed by a catastrophic loss.

Table of Contents

If we experience a significant disruption in, or breach in security of, our information technology systems, or if we fail to implement new systems and software successfully, our business could be adversely affected.

We rely on several centralized information technology systems throughout our company to provide products and services, keep financial records, process orders, manage inventory, process shipments to customers and operate other critical functions. Our information technology systems may be susceptible to damage, disruptions or shutdowns due to power outages, hardware failures, computer viruses, attacks by computer hackers, telecommunication failures, user errors, catastrophes or other unforeseen events. Our information technology systems also may experience interruptions, delays or cessations of service or produce errors in connection with system integration, software upgrades or system migration work that takes place from time to time. If we were to experience a prolonged system disruption in the information technology systems that involve our interactions with customers or suppliers, it could result in the loss of sales and customers and significant incremental costs, which could adversely affect our business. In addition, security breaches of our information technology systems could result in the misappropriation or unauthorized disclosure of confidential information belonging to us or to our employees, partners, customers or suppliers, which could result in our suffering significant financial or reputational damage.

Adverse conditions in the global banking industry and credit markets may adversely impact the value of our cash investments or impair our liquidity.

As of July 31, 2016, we had cash and cash equivalents of approximately \$2.2 billion invested or held in a mix of money market funds, time deposit accounts and bank demand deposit accounts. Disruptions in the financial markets may, in some cases, result in an inability to access assets such as money market funds that traditionally have been viewed as highly liquid. Any failure of our counterparty financial institutions or funds in which we have invested may adversely impact our cash and cash equivalent positions and, in turn, our results and financial condition.

We could incur significant liability if the distribution of Keysight common stock to our shareholders is determined to be a taxable transaction.

We have received an opinion from outside tax counsel to the effect that the separation and distribution of Keysight qualifies as a transaction that is described in Sections 355(a) and 368(a)(1)(D) of the Internal Revenue Code. The opinion relies on certain facts, assumptions, representations and undertakings from Keysight and us regarding the past and future conduct of the companies' respective businesses and other matters. If any of these facts, assumptions, representations or undertakings are incorrect or not satisfied, our shareholders and we may not be able to rely on the opinion of tax counsel and could be subject to significant tax liabilities. Notwithstanding the opinion of tax counsel we have received, the IRS could determine on audit that the separation is taxable if it determines that any of these facts, assumptions, representations or undertakings are not correct or have been violated or if it disagrees with the conclusions in the opinion. If the separation is determined to be taxable for U.S. federal income tax purposes, our shareholders that are subject to U.S. federal income tax and we could incur significant U.S. federal income tax liabilities.

We may be exposed to claims and liabilities as a result of the separation with Keysight.

We entered into a separation and distribution agreement and various other agreements with Keysight to govern the separation and the relationship of the two companies going forward. These agreements provide for specific indemnity and liability obligations and could lead to disputes between us. The indemnity rights we have against Keysight under the agreements may not be sufficient to protect us. In addition, our indemnity obligations to Keysight may be significant and these risks could negatively affect our financial condition.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER PURCHASES OF EQUITY SECURITIES

The table below summarizes information about the Company's purchases, based on trade date, of its equity securities registered pursuant to Section 12 of the Exchange Act during the quarterly period ended July 31, 2016.

Period	Total Number of Shares of Common Stock Purchased (1)	Weighted Average Price Paid per Share of Common Stock (2)	Total Number of Shares of Common Stock Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Approximate Dollar Value of Shares of Common Stock that May Yet Be Purchased Under the Plans or Programs (in millions) (1)
	(a)	(b)	(c)	(d)
May 1, 2016 through May 31, 2016	1,600,000	\$ 42.81	1,600,000	\$ 875
June 1, 2016 through June 30, 2016	560,126	\$ 45.46	560,126	\$ 850
July 1, 2016 through July 31, 2016	—	\$ —	—	\$ 850
Total	2,160,126	\$ 43.50	2,160,126	

On May 28, 2015, we announced that our board of directors had approved a new share repurchase program (the "2015 repurchase program"). The 2015 repurchase program authorizes the purchase of up to \$1.14 billion of our (1) common stock through and including November 1, 2018. The 2015 repurchase program does not require the company to acquire a specific number of shares and may be suspended or discontinued at any time. All such shares and related costs are held as treasury stock and accounted for using the cost method.

(2) The weighted average price paid per share of common stock does not include the cost of commissions.
