

UTAH MEDICAL PRODUCTS INC
Form 10-Q
May 06, 2015

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Under Section 13 or 15(d) of
The Securities Exchange Act of 1934

For quarter ended: March 31, Commission File No.
2015 001-12575

UTAH MEDICAL PRODUCTS, INC.
(Exact name of Registrant as specified in its charter)

UTAH 87-0342734
(State or other jurisdiction of incorporation or (I.R.S. Employer Identification No.)
organization)

7043 South 300 West
Midvale, Utah 84047
Address of principal executive offices

Registrant's telephone number: (801) 566-1200

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and; (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of May 5, 2015:
3,753,200.

UTAH MEDICAL PRODUCTS, INC.
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(unaudited)

(1) The unaudited financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and note disclosures required by accounting principles generally accepted in the United States. These statements should be read in conjunction with the financial statements and notes included in the Utah Medical Products, Inc. ("UTMD" or "the Company") annual report on Form 10-K for the year ended December 31, 2014. In the opinion of management, the accompanying financial statements include all adjustments (consisting only of normal recurring adjustments) necessary to summarize fairly the Company's financial position and results of operations. Currency amounts are in thousands except per-share amounts and where noted.

Recent Accounting Standards

In May 2014, new accounting guidance was issued that outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The guidance is based on the principle that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Entities have the option of using either a full retrospective or a modified retrospective approach for the adoption of the new standard. This guidance becomes effective for annual reporting periods beginning after December 15, 2016 and early adoption is not permitted. UTMD is currently assessing the impact that this standard will have on its consolidated financial statements when it is adopted in 2017.

(2) Inventories at March 31, 2015 and December 31, 2014 consisted of the following:

	March 31, 2015	December 31, 2014
Finished goods	\$ 1,885	\$ 1,847
Work-in-process	1,079	1,103
Raw materials	1,886	1,922
Total	\$ 4,850	\$ 4,872

(3) **Stock-Based Compensation.** At March 31, 2015, the Company has stock-based employee compensation plans which authorize the grant of stock options to eligible employees and directors. The Company accounts for stock compensation under FASB Accounting Standards Codification ("ASC") 718, Stock Compensation. This statement requires the Company to recognize compensation cost based on the grant date fair value of options granted to employees and directors. In the quarters ended March 31, 2015 and 2014, the Company recognized \$22 and \$6, respectively, in stock based compensation cost.

(4) **Notes payable.** In March 2011, the Company obtained a \$14,000 loan from JPMorgan Chase Bank, N.A. (Chase), to help finance the purchase of Femcare. The terms and conditions of the loan require UTMD to a) repay the loan principal in equal monthly payments over 5 years, b) pay interest based on the 30-day LIBOR rate plus a margin starting at 2.80% and ranging from 2.00% to 3.75%, depending on the ratio of its funded debt to EBITDA (Leverage

Ratio), c) pledge 65% of all foreign subsidiaries' stock, d) provide first priority liens on all domestic business assets, e) maintain its Interest Coverage Ratio at 1.15 to 1.00 or better, f) maintain its Tangible Net Worth (TNW) above a minimum threshold 20% below TNW at closing on March 18, 2011, and g) maintain its Leverage Ratio at 2.75 to 1.00 or less. The note was fully paid off in February 2015.

In March 2011, the Company also obtained a \$12,934 loan from JP Morgan Chase, London Branch, to help finance UTMD's purchase of Femcare. Terms and conditions of the UK loan are the same as those listed above for the \$14,000 U.S. loan. The note was fully paid off in February 2015.

(5) Warranty Reserve. The Company's published warranty is: "UTMD warrants its products to conform in all material respects to all published product specifications in effect on the date of shipment, and to be free from defects in material and workmanship for a period of thirty (30) days for supplies, or twenty-four (24) months for equipment, from date of shipment. During the warranty period UTMD shall, at its option, replace any products shown to UTMD's reasonable satisfaction to be defective at no expense to the Purchaser or refund the purchase price."

UTMD maintains a warranty reserve to provide for estimated costs which are likely to occur. The amount of this reserve is adjusted, as required, to reflect its actual experience. Based on its analysis of historical warranty claims and its estimate that existing warranty obligations were immaterial, no warranty reserve was made at December 31, 2014 or March 31, 2015.

(6) Investments. Changes in the unrealized holding gain/loss on investment securities available-for-sale and reported as a separate component of accumulated other comprehensive income are as follows:

	1Q 2015	1Q 2014
Balance, beginning of period	\$ 9	\$ 8
Realized loss from securities included in beginning balance	-	-
Gross unrealized holding gains (losses), in equity securities	(2)	(5)
Deferred income taxes on unrealized holding (gain) loss	1	2
Balance, end of period	\$ 8	\$ 5

(7) Fair Value Measurements. The Company follows ASC 820, Fair Value Measurement to determine fair value of its financial assets. The following table provides financial assets carried at fair value measured as of March 31, 2015:

Description	Total Fair Value at 3/31/2015	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Equities	\$ 55	\$ 55	\$ 0	\$ 0

(8) Subsequent Events. UTMD has evaluated subsequent events through the date the financial statements were issued, and concluded there were no other events or transactions during this period that required recognition or disclosure in its financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

UTMD manufactures and markets a well-established range of specialty medical devices. The Company's Form 10-K Annual Report for the year ended December 31, 2014 provides a detailed description of products, technologies, markets, regulatory issues, business initiatives, resources and business risks, among other details, and should be read in conjunction with this report. Because of the relatively short span of time, results for any given three month period in comparison with a previous three month period may not be indicative of comparative results for the year as a whole. Currency amounts in the report are in thousands, except per-share amounts or where otherwise noted. Currencies in this report are denoted as \$ or USD = U.S. Dollars; AUD = Australia Dollars; GBP = UK Pound Sterling; and EUR = Euros.

Analysis of Results of Operations

a) Overview

In the first calendar quarter (1Q) of 2015, UTMD achieved results representing a solid start to meeting its previously announced goals for 2015, despite significant foreign currency exchange (FX) rate headwinds. The headwinds in U.S. Dollar terms reduced consolidated sales and had a leveraged negative effect on profits.

Income statement results in 1Q 2015 compared to the same period of 2014 were as follows:

	1Q 2015	1Q 2014	change	
Net Sales	\$10,233	\$9,827	4.1	%
Gross Profit	6,112	6,050	1.0	%
Operating Income	3,877	3,843	0.9	%
Income Before Tax	3,667	3,782	(3.0)	%
Net Income	2,667	2,722	(2.0)	%
Earnings per Share	.706	.719	(1.8)	%

UTMD's FX rates for income statement purposes are transaction-weighted averages. The average rates from the applicable foreign currency to USD during 1Q 2015 and 1Q 2014 follow:

	1Q 2015	1Q 2014	change	
GBP	1.514	1.655	(8.5)	%
EUR	1.119	1.372	(18.5)	%
AUD	0.784	0.899	(12.8)	%

UTMD's FX rates for balance sheet purposes are the applicable rates at the end of each reporting period. The FX rates from the applicable foreign currency to USD for assets and liabilities at the end of 1Q 2015 and the end of 1Q 2014 follow:

	1Q 2015	1Q 2014	change	
GBP	1.485	1.667	(11.0)	%

EUR	1.074	1.377	(22.0%)
AUD	0.763	0.927	(17.8%)

UTMD's profit margins remained strong despite the negative FX on about one-third of sales:

	1Q 2015	1Q 2014
Gross Profit Margin (gross profits/ sales):	59.7 %	61.6 %
Operating Profit Margin (operating income/ sales):	37.9 %	39.1 %
EBT Margin (income before income taxes/ sales):	35.8 %	38.5 %
Net Profit Margin (income after taxes/ sales):	26.1 %	27.7 %

Total consolidated sales in 1Q 2015 were \$406 higher (up 4%) than in 1Q 2014. Comparing 1Q 2015 to 1Q 2014, U.S. domestic sales were much stronger and UK domestic GBP sales were much weaker, further leveraged down in USD terms by a stronger USD. Approximately one-third of UTMD's sales are invoiced in foreign currencies. If 1Q 2015 foreign currency sales were converted to USD at the same FX rates as in 1Q 2014, 1Q 2015 total consolidated sales would have been an additional \$397 higher, or up 8% overall compared to 1Q 2014.

UTMD's 1Q 2015 Gross Profit Margin (GPM) was lower than in 1Q 2014 due to the impact of a stronger USD on the cost of goods purchased in USD terms by foreign subsidiaries, along with a less favorable product mix.

Operating expenses were 21.8% of sales in 1Q 2015 compared to 22.5% of sales in 1Q 2014. Higher revenues and lower UTMD foreign subsidiary expenses when translated into USD reduced the operating expense margin.

Income before taxes (EBT) was \$3,667 (35.8% of sales) in 1Q 2015 compared to \$3,782 (38.5% of sales) in 1Q 2014. The lower EBT is due mainly to a foreign currency exchange (FX) \$177 loss on the remeasured value of EUR cash balances in the UK, which declined by more than 11% in value relative to the USD during the quarter.

Net Income (NP) was \$2,667 (26.1% of sales) in 1Q 2015 compared to \$2,722 (27.7% of sales) in 1Q 2014. The lower NP margin was due to a lower GPM and the FX loss of EUR cash balances in the UK. The average consolidated income tax provision (as a % of EBT) in 1Q 2015 was 27.3% compared to 28.0% in 1Q 2014.

Earnings per share (EPS) were \$.706 in 1Q 2015 compared to \$.719 in 1Q 2014. Diluted shares used to calculate EPS decreased to 3,776,400 in 1Q 2015 from 3,786,700 in 1Q 2014 due to UTMD's repurchase of 22,200 shares after the end of 1Q 2014 and lower dilution from option shares outstanding. The number of shares added to outstanding shares as a dilution factor in 1Q 2015 was 26,100 compared to 37,000 in 1Q 2014.

The changes in UTMD's Balance Sheet at March 31, 2015 from December 31, 2014 resulted primarily from continued excellent cash generation from operations and paying off the remaining principal balances of loans obtained in 2011 to help finance the Femcare acquisition.

b) Revenues

The Company believes that revenue should be recognized at the time of shipment as title generally passes to the customer at the time of shipment, or completion of services performed under contract. Revenue recognized by UTMD is based upon documented arrangements and fixed contracts in which the selling price is fixed prior to acceptance and completion of an order. Revenue from product or service sales is generally recognized at the time the product is shipped or service completed and invoiced, and collectibility is reasonably assured. There are no post-shipment obligations which have been or are expected to be material to financial results.

There are circumstances under which revenue may be recognized when product is not shipped, which meet the criteria of SAB 104: the Company provides engineering services, for example, design and production of manufacturing tooling that may be used in subsequent UTMD manufacturing of custom components for other companies. This revenue is recognized when UTMD's service has been completed according to a fixed contractual agreement.

Terms of sale are established in advance of UTMD's acceptance of customer orders. In the U.S., Ireland, UK and Australia, UTMD generally accepts orders directly from and ships directly to end user clinical facilities, as well as third party med/surg distributors, under UTMD's Standard Terms and Conditions (T&C) of Sale. About 14% of UTMD's domestic end user sales go through third party med/surg distributors which contract separately with U.S. clinical facilities to provide purchasing, storage and scheduled delivery functions for the applicable facility. UTMD's T&C of Sale are substantially the same in the U.S., Ireland, UK and Australia.

UTMD may have separate discounted pricing agreements with a clinical facility or group of affiliated facilities based on volume of purchases. Pricing agreements with clinical facilities, or groups of affiliated facilities, if applicable, are established in advance of orders accepted or shipments made. For existing customers, past actual shipment volumes determine the fixed price by part number for the next agreement period of one or two years. For new customers, the customer's best estimate of volume is accepted by UTMD for determining the ensuing fixed prices for the agreement

period. New customers typically have one-year agreements. Prices are not adjusted after an order is accepted. For the sake of clarity, the separate pricing agreements with clinical facilities based on volume of purchases disclosure is not inconsistent with UTMD's disclosure above that the selling price is fixed prior to the acceptance of a specific customer order.

7

Total 1Q 2015 consolidated sales were \$406 (4%) higher than in 1Q 2014. If 1Q 2015 foreign currency sales were converted to USD at the same FX rates as in 1Q 2014, 1Q 2015 total consolidated sales would have been an additional \$397 higher, or up 8% overall compared to 1Q 2014.

International sales in 1Q 2015 were \$130 (3%) lower than in 1Q 2014 because of the weaker foreign currencies. Using 1Q 2014 FX rates, 1Q 2015 international sales would have been \$267 higher (+5%) rather than \$130 lower. As a result of the FX rate changes, international sales were only 47% of total consolidated sales compared to 51% in 1Q 2014. International sales exported from the U.S. in fixed USD terms were up 16%, while international sales by UTMD's foreign subsidiaries converted to USD terms were down 9%. International sales by UTMD foreign subsidiaries in USD terms using the same FX rates as in 2014 would have been up 2% rather than down 9%.

Trade sales are sales to third parties, excluding sales from one UTMD entity to another. Ireland subsidiary 1Q 2015 trade sales were up \$547 (+91%). The large increase resulted from \$342 sales of blood pressure monitoring (BPM) kits to UTMD's China distributor, and \$387 in shipments of Filshie Sterishot kits, now manufactured by UTMD Ireland, directly to international customers located outside the UK, neither of which occurred in 1Q 2014 Ireland trade sales. Although Ireland domestic sales were up 9% in EUR terms, they were down 11% in USD terms because of the weaker EUR.

Trade sales by UTMD's UK subsidiary, Femcare-Nikomed Ltd, were down overall by \$493 (14% lower). Sales of Sterishot kits to international customers outside the UK which were included in UK sales in 1Q 2014 were shipped directly from Ireland in 1Q 2015. UK domestic sales were down \$236 (22% lower) in part due to the 9% weaker GBP, and sales to Femcare's U.S. distributor of the Filshie Clip System (which are included in the U.S. domestic sales category) were up \$270 (22% higher).

Sales by UTMD's Australia subsidiary, Femcare Australia Pty Ltd, in 1Q 2015 were 5% lower in AUD terms than in 1Q 2014, but because of the weaker AUD, were down \$121 (17% lower) in USD.

U.S. domestic sales, which include direct sales to U.S. clinical user facilities, sales of the Filshie Clip System to CooperSurgical, Inc. (CSI) and sales to U.S. OEM customers were \$5,377 in 1Q 2015 (11% higher) compared to \$4,841 in 1Q 2014. Direct sales of devices to U.S. user facilities were up \$115 (4% higher). In addition to Filshie Clip System sales to CSI up \$270 (22% higher), UTMD's sales of components and finished devices to other U.S. companies for use in their products (OEM customers) were up \$150 (31% higher).

The following table provides USD sales amounts divided into general product categories for total sales and the subset of international sales:

Global revenues (USD) by product category:

	1Q 2015	%	1Q 2014	%
Obstetrics	\$1,134	11	\$1,169	12
Gynecology/ Electrosurgery/ Urology	5,954	58	6,121	62
Neonatal	1,533	15	1,273	13
Blood Pressure Monitoring and Accessories*	1,612	16	1,264	13
Total:	\$10,233	100	\$9,827	100

*includes molded components sold to OEM customers.

International revenues (USD) by product category:

	1Q 2015	%	1Q 2014	%
Obstetrics	\$185	3	\$168	3
Gynecology/ Electrosurgery/ Urology	3,411	78	3,896	78
Neonatal	455	6	302	6
Blood Pressure Monitoring and Accessories*	805	13	620	13
Total:	\$4,856	100	\$4,986	100

*includes molded components sold to OEM customers.

c) Gross Profit

Gross Profit (GP) results from subtracting the cost of manufacturing products (direct materials, direct labor and manufacturing overhead), or the purchase price of finished products which are resold, from revenues. At UTMD, manufacturing overhead costs fully absorb indirect costs including depreciation on manufacturing equipment and facilities, quality assurance, materials requirements planning and purchasing, manufacturing engineering, production supervision, shipping, royalties paid to other entities and health plan benefits for both direct and indirect manufacturing personnel. UTMD's GP margin (GPM) is GP as a percentage of revenues. GP in 1Q 2015 was \$6,112 (59.7% GPM) compared to \$6,050 (61.6% GPM) in 1Q 2014. The 1Q 2014 GPM was higher than for the full year of 2014 at 60.5%. With a stronger USD, the consolidated GPM is squeezed, assuming that unit prices to customers invoiced in foreign currencies are kept constant, because raw materials and finished devices sold to UTMD's foreign subsidiaries in fixed USD increase the cost of goods sold by the foreign subsidiary. In addition, 1Q 2015 product mix was less favorable than 1Q 2014. BPM kit sales to UTMD's China distributor, at a low GPM, were 3.3% of total consolidated sales in 1Q 2015 compared to none in 1Q 2014. Given the substantially lower FX rates and less favorable product mix, the 1Q 2015 GPM of 59.7% was better than expected.

d) Operating Income

Operating income (OP) is the profit remaining after subtracting operating expenses from GP. Operating expenses include sales and marketing (S&M) expenses, product development (R&D) expenses and general and administrative (G&A) expenses. UTMD's operating income margin (OPM) is its operating income divided by revenues. OP in 1Q 2015 was \$3,877 (37.9% OPM) compared to \$3,843 (39.1% OPM) in 1Q 2014. The lower ratio of operating expenses to sales was due to about the same consolidated USD expenses with higher consolidated sales.

Consolidated 1Q 2015 USD operating expenses were \$2,235, \$28 higher compared to 1Q 2014. In this case, the lower FX rates were helpful, as 1Q 2015 operating expenses of UTMD's foreign subsidiaries in the aggregate would have been another \$115 higher using 1Q 2014 FX rates.

Consolidated S&M expenses in 1Q 2015 were \$573 (5.6% of sales) compared to \$542 (5.5% of sales) in 1Q 2014. S&M expenses in 1Q 2015 included \$68 in U.S. Medical Device Excise Tax (MDET) compared to \$66 in 1Q 2014, due to higher U.S. domestic sales of medical devices. The MDET, imposed as a component of the Patient Protection and Affordable Care Act (Obamacare), is levied as a 2.3% excise tax on domestic sales of medical devices.

S&M expenses include all customer support costs including training. In general, training is not required for UTMD's products since they are well-established and have been clinically widely used. Written "Instructions For Use" are packaged with all finished devices. Although UTMD does not have any explicit contracts with customers to provide training, it does have agreements in the U.S. and UK under which it agrees to provide hospital members inservice and clinical training as required and reasonably requested.

UTMD promises prospective customers that it will provide, at no charge in reasonable quantities, copies of instruction materials developed for the use of its products. UTMD provides customer support from offices in the U.S., UK, Ireland and Australia by telephone, and employed representatives on a geographically dispersed basis, to answer user questions and help troubleshoot any user issues. Occasionally, on a case-by-case basis, UTMD may utilize the services of an independent practitioner to provide educational assistance to clinicians. All inservice and training expenses are routinely expensed as they occur. All of these services are allocated from S&M overhead costs included in Operating Expenses. Historically, marginal consulting costs have been immaterial to financial results.

R&D expenses were \$156 (1.5% of sales) in 1Q 2015 compared to \$123 (1.2% of sales) in 1Q 2014.

Consolidated G&A expenses in 1Q 2015 were \$1,506 (14.7% of sales) compared to \$1,542 (15.7% of sales) in 1Q 2014. G&A expenses in 1Q 2015 included \$611 (6.0% of sales) of non-cash expense from the amortization of identifiable intangible assets resulting from the 2011 Femcare acquisition, which were \$668 (6.8% of sales) in 1Q 2014. The lower USD amortization expense was the result of FX, as the expense was 404 GBP in both periods.

G&A expenses include the cost of outside financial auditors and corporate governance activities related to the implementation of SEC rules resulting from the Sarbanes-Oxley Act of 2002, as well as estimated stock-based compensation cost, a noncash expense. Option compensation expense included in G&A expenses was \$22 in 1Q 2015 compared to \$6 in 1Q 2014.

Summary comparison of (USD) consolidated operating expenses:

	1Q 2015	1Q 2014
S&M Expense	\$573	\$542
R&D Expense	153	123
G&A Expense	1,506	1,542
Total Operating Expenses:	\$2,235	\$2,207

e) Non-operating expense (NOE)/ Non-operating income (NOI)

Net NOE includes 1) loan interest, 2) bank fees and 3) FX loss from remeasuring the USD value of Euro cash bank balances in the UK and GBP cash balances in Ireland, minus non-operating income from 1) rent of underutilized property, 2) investment income and 3) royalties received from licensing the Company's technology. Net NOE in 1Q 2015 was \$210 compared to \$61 in 1Q 2014. The increase in Net NOE was due to a \$177 loss on the remeasured value of EUR cash balances in the UK. The total FX loss in 1Q 2015 was \$168 compared to none in 1Q 2014. The interest expense on loans obtained to help finance the acquisition of Femcare was \$65 in 1Q 2015 compared to \$87 in 1Q 2014. The loans were fully repaid in 1Q 2015.

f) Income Before Income Taxes

Income Before Income Taxes (EBT) results from subtracting NOE from OP. The EBT Margin (EBTM) is EBT divided by revenues. In 1Q 2015, consolidated EBT was \$3,667 (35.8% EBTM) compared to \$3,782 (38.5% EBTM) in 1Q 2014. The EBT of UTMD Ltd. (Ireland) was EUR 751 in 1Q 2015 compared to EUR 88 in 1Q 2014. The EBT of Femcare (Femcare-Nikomel Ltd., UK and Femcare Australia Pty Ltd) was GBP 945 in 1Q 2015 compared to GBP 1,159 in 1Q 2014.

Excluding the noncash effects of depreciation, amortization of intangible assets and stock option expense, 1Q 2015 consolidated EBT excluding the remeasured bank balance currency loss and interest expense was \$4,698 compared to \$4,713 in 1Q 2014.

g) Net Income

Net Income (NP) is EBT minus a provision for income taxes. NP divided by revenues is UTMD's net income margin (NPM). UTMD's consolidated NP was \$2,667 (26.1% NPM) in 1Q 2015 compared to \$2,722 (27.7% NPM) in 1Q 2014. The \$55 lower NP in 1Q 2015 compared to 1Q 2014 was essentially due to the FX loss on remeasured EUR cash balances held in the UK.

The average consolidated income tax provision (as a % of consolidated EBT) was 27.3% in 1Q 2015 compared to 28.0% in 1Q 2014. The combined income tax provision rate was lower in 1Q 2015 compared to 1Q 2014 because of a reduced corporate income tax rate in the UK, and because UTMD Ltd (Ireland), taxed at the lowest rate of all sovereignties, had a larger share of total EBT in 1Q 2015 compared to 1Q 2014.

UTMD's combined state and federal income tax rate in the U.S. after all allowable deductions was 34.2% in 1Q 2015 compared to 33.9% in 1Q 2014. The corporate income tax rate in the UK was 21% in 1Q 2015 compared to 23% in 1Q 2014. As of April 1, 2015, the UK corporate tax rate will be reduced again, from 21% to 20%, which will further benefit UTMD's NPM during the remainder of 2015. The income tax rate in Australia has been and remains 30%. UTMD Ltd (Ireland) tax provision rate was 10.8% in 1Q 2015 and 14.5% in 1Q 2014.

h) Earnings Per Share

Earnings per share (EPS) are consolidated NP divided by the number of shares of stock outstanding (diluted to take into consideration stock option awards which are “in the money,” i.e., have exercise prices below the applicable period’s weighted average market value). Diluted EPS were \$0.706 in 1Q 2015 compared to \$0.719 in 1Q 2014. EPS for the most recent twelve months were \$3.00.

Weighted average number of diluted common shares (the number used to calculate diluted EPS) in 1Q 2015 were 3,776,400 compared to 3,786,700 shares in 1Q 2014. Employees exercised options for 4,987 shares in 1Q 2015. Options outstanding at March 31, 2015 were 83,900 shares at an average exercise price of \$37.29 per share, including shares awarded but not vested. This compares to 74,900 unexercised option shares outstanding at March 31, 2014 at an average exercise price of \$27.94 per share.

Changes in UTMD's stock price impact EPS as a result of the dilution calculation for unexercised options with exercise prices below the average stock market value during each period. The dilution calculation added 26,100 shares to actual weighted average shares outstanding in 1Q 2015 compared to 37,000 in 1Q 2014. Actual outstanding common shares as of the end of 1Q 2015 were 3,752,600 compared to 3,756,300 at the end of 1Q 2014. The lower outstanding shares resulted from 22,200 shares repurchased during the last nine months of 2014. The Company did not repurchase any of its shares in the open market in 1Q 2015 or in 1Q 2014. UTMD retains its program for repurchasing shares when they seem undervalued.

i) Return on Equity

Return on equity (ROE) is the portion of NP retained by UTMD to internally finance its growth, divided by the average accumulated shareholders' equity for the applicable time period. Annualized ROE in 1Q 2015 was 17% compared to 18% in 1Q 2014. The lower ROE in 1Q 2015 was due to a 2% decrease in NP and a 4% increase in average shareholders' equity. Targeting a high ROE over 20% remains a key financial objective for UTMD management. ROE can be increased by increasing NP, or by reducing shareholders' equity by paying cash dividends to shareholders or by repurchasing shares.

Liquidity and Capital Resources

j) Cash flows

Net cash provided by operating activities, including adjustments for depreciation and amortization and other non-cash expenses along with changes in working capital, totaled \$2,243 in 1Q 2015 compared to \$1,922 in 1Q 2014. The most significant differences in the two periods were a \$401 benefit to cash from a smaller increase in 1Q 2015 inventories and a \$303 benefit from a smaller increase in 1Q 2015 accounts receivable compared to the increases in 1Q 2014. The largest difference in use was a \$257 larger increase in accrued expenses in 1Q 2015 compared to 1Q 2014.

The Company's reduction of its bank loan principal balances was the most significant use of cash in both periods. UTMD repaid the remaining \$4,778 principal on its notes during 1Q 2015, compared to \$1,012 paid during 1Q 2014. UTMD did not make cash dividend payments during either 1Q 2015 or 1Q 2014, as the dividends which would normally be paid in January were paid at the end of December of the prior applicable year.

Capital expenditures for property and equipment (PP&E) were \$68 in 1Q 2015 compared to \$658 in 1Q 2014. UTMD paid \$550 in 1Q 2014 as part of setting up a distribution facility in Castle Hill NSW Australia. Depreciation of PP&E was \$149 in 1Q 2015 and \$156 in 1Q 2014. Except for the possibility of a facility purchase in the UK or an acquisition, planned capital expenditures during 2015 are expected to be less than depreciation of PP&E. The Company will continue to keep facilities, equipment and tooling in good working order.

In 1Q 2015, UTMD received \$72 and issued 4,172 shares of its stock upon the exercise of employee stock options, net of 815 shares retired upon employees trading those shares in payment of the stock option exercise price. Option exercises in 1Q 2015 were at an average price of \$24.22 per share. In comparison, in 1Q 2014 the Company received

\$244 from issuing 13,260 shares of stock on the exercise of employee stock options, net of 2,657 shares retired upon employees trading those shares in payment of the stock option exercise price. UTMD did not repurchase any of its own shares of stock in the open market during either 1Q 2015 or 1Q 2014.

Management believes that income from operations and effective management of working capital will provide the liquidity needed to finance its internal growth plans. In addition, the Company may use cash for marketing or product manufacturing rights to broaden the Company's product offerings; for continued share repurchases when the price of the stock is undervalued; for cash dividends to stockholders; and if available for a reasonable price, an acquisition that might strategically fit UTMD's business and be accretive to financial performance.

k) Assets and Liabilities

March 31, 2015 total consolidated assets decreased \$5,701 from December 31, 2014. The decrease was due to a \$3,172 decrease in cash from paying off bank loans, a \$2,307 decrease in intangible assets from a lower FX value of Femcare intangibles combined with \$626 1Q 2015 period amortization, and \$472 lower net property, plant and equipment book value in UTMD Ltd (Ireland) and Femcare (UK and Australia) resulting from a lower FX. The repaying of the remaining principal balance of loans associated with the Femcare acquisition was a year early. UTMD's Ireland subsidiary EUR-denominated assets were translated into USD at an FX rate 11.3% lower (weaker EUR) than the rate at the end of 2014. UTMD's UK subsidiary GBP-denominated assets were translated into USD at an FX rate 4.7% lower (weaker GBP) than the rate at the end of 2014. UTMD's Australia subsidiary AUD-denominated assets were translated into USD at an FX rate 6.8% lower (weaker AUD) than the rate at the end of 2014. Consolidated net property, plant and equipment declined \$508 at March 31, 2015 from the end of 2014 due to lower FX rates, \$68 in new asset purchases and \$149 in depreciation. Accounts and other receivables balances increased \$310 but remained well within management's targets. Consolidated inventories declined \$22.

Working capital (current assets minus current liabilities) was \$21,430 at March 31, 2015, compared to \$20,704 at December 31, 2014. Current liabilities decreased \$3,612 due to elimination of the \$3,894 current portion of notes payable as of December 31, 2014. Accrued liabilities increased \$405 due to the 1Q 2015 quarterly dividend payment to shareholders accrued but not paid until after March 31, whereas the 4Q 2014 dividend was paid before the end of December 2014. In addition, a deposit for a prepaid shipment for an international distributor increased March 31, 2015 accrued liabilities \$370. UTMD believes that its working capital remains sufficient to meet normal operating needs and projected cash dividend payments to shareholders.

March 31, 2015 intangible assets (goodwill plus other intangible assets) declined \$2,307 from the end of 2014. The decrease was due to the lower FX rate for GBP Femcare intangibles as of March 31, 2015 compared to year-end 2014 plus \$611 1Q 2015 amortization of identifiable intangible Femcare assets. At March 31, 2015, net intangible assets including goodwill were 54% of total assets compared to 53% at year-end 2014.

UTMD eliminated all of its remaining bank debt during 1Q 2015. The principal balance of bank debt at December 31, 2014 was 1) \$1,750 to JP Morgan Chase in the U.S., of which \$350 was long term debt, and 2) \$3,117 (2,000 GBP) to JP Morgan Chase in the U.K., of which \$2,494 (1,600 GBP) was long term debt. The deferred tax liability balance for Femcare identifiable intangible assets (\$9,084 on the date of the acquisition), was \$5,190 at March 31, 2015 compared to \$5,581 at December 31, 2014. Reduction of the deferred tax liability occurs as the book/tax difference of amortization is eliminated over the remaining useful life of the Femcare identifiable intangible assets. UTMD's total debt ratio (total liabilities/ total assets) as of March 31, 2015 declined to 15% compared to 20% as of December 31, 2014.

l) Management's Outlook.

As outlined in its December 31, 2014 SEC 10-K report, UTMD's plan for 2015 is to

- 1) continue to exploit distribution and manufacturing synergies by further integrating capabilities and resources in its multinational operations;
- 2) introduce additional products helpful to clinicians through internal new product development;
- 3) continue achieving excellent overall financial operating performance;
- 4) utilize positive cash generation to eliminate debt remaining from the Femcare acquisition, continue cash dividends to shareholders and continue open market share repurchases if/when the UTMD share price seems undervalued; and
- 5) be vigilant for accretive acquisition opportunities which may be increasingly brought about by difficult burdens on small, innovative companies, including especially the MDET.

Management believes it is on track after 1Q 2015 to accomplish its previously stated objectives for the year 2015.

m) Accounting Policy Changes.

None.

12

Forward-Looking Information. This report contains certain forward-looking statements and information relating to the Company that are based on the beliefs of management as well as assumptions made by management based on information currently available. When used in this document, the words “anticipate,” “believe,” “project,” “estimate,” “expect,” “intend” and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. Such statements reflect the current view of the Company respecting future events and are subject to certain risks, uncertainties and assumptions, including the risks and uncertainties stated throughout the document. Although the Company has attempted to identify important factors that could cause the actual results to differ materially, there may be other factors that cause the forward statement not to come true as anticipated, believed, projected, expected, or intended. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may differ materially from those described herein as anticipated, believed, projected, estimated, expected or intended. Financial estimates are subject to change and are not intended to be relied upon as predictions of future operating results, and the Company assumes no obligation to update or disclose revisions to those estimates.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

UTMD has manufacturing and trading operations, including related assets, in the U.S. denominated in the U.S. Dollar (USD), in Ireland denominated in the Euro (EUR), in England denominated in the British Pound (GBP) and in Australia denominated in the Australia Dollar (AUD). The currencies are subject to exchange rate fluctuations that are beyond the control of UTMD. The exchange rates were .9309, .8258 and .7260 EUR per USD as of March 31, 2015, December 31, 2014 and March 31, 2014, respectively. Exchange rates were .6736, .6416 and .5998 GBP per USD as of March 31, 2015, December 31, 2014 and March 31, 2014, respectively. Exchange rates were 1.3115, 1.2223 and 1.0783 AUD per USD on March 31, 2015, December 31, 2014 and March 31, 2014, respectively. UTMD manages its foreign currency risk without separate hedging transactions by conducting as much business in local currencies as is practicable, and by optimizing global account structures through liquidity management accounts.

Item 4. Controls and Procedures

The Company’s management, under the supervision and with the participation of the Chief Executive Officer and the Principal Financial Officer, evaluated the effectiveness of the Company’s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of March 31, 2015. Based on this evaluation, the Chief Executive Officer and Principal Financial Officer concluded that, as of March 31, 2015, the Company’s disclosure controls and procedures were effective.

There were no changes in the Company’s internal controls over financial reporting that occurred during the quarter ended March 31, 2015, that have materially affected, or are reasonably likely to materially affect, the Company’s internal controls over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company may be a party from time to time in litigation incidental to its business. Presently, there is no litigation.

Item 1A. Risk Factors

In addition to the other information set forth in this report, investors should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in UTMD’s Annual Report on Form 10-K for the year ended December 31, 2014, which could materially affect its business, financial condition or future results. The risks described in the Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known to UTMD or currently deemed to be immaterial also may materially adversely affect the Company’s business, financial condition and/or operating results.

Legislative healthcare reform in the United States, as embodied in The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (the “Acts”) adds a substantial excise tax that began in 2013, increases administrative costs and has led to decreased revenues in the U.S.:

The voluminous Acts, administrative rules to enforce the Acts and promised efforts to reform the Acts, make the U.S. medical device marketplace unpredictable, particularly for the thousands of small medical device manufacturers including UTMD that do not have the overhead structure that the larger medical device companies can afford. To the extent that the Acts continue to place additional burdens on small medical device companies in the form of the excise tax on medical device sales, additional oversight of marketing and sales activities and new reporting requirements, the result is likely to continue to be negative for UTMD’s ability to effectively compete and support continued investments in new product development and marketing of specialty devices in the U.S.

Increasing regulatory burdens including premarketing approval delays may result in significant loss of revenue, unpredictable costs and loss of management focus on helping the Company thrive:

The Company’s experience in 2001-2005, when the FDA improperly sought to shut it down highlights the ongoing risk of being subject to a regulatory environment which can be arbitrary and capricious. The risks associated with such a circumstance relate not only to the substantial costs of litigation in millions of dollars, but also loss of business, the diversion of attention of key employees for an extended period of time, from new product development and routine quality control management activities, and a tremendous psychological and emotional toll on employees.

Since the FDA reserves to itself the interpretation of which vague industry standards comprise law at any point in time, it is impossible for any medical device manufacturer to ever be confident that it is operating within the Agency’s version of the law. The result is that companies, including UTMD, are considered guilty prior to proving their innocence.

New premarketing submission administrative burdens and substantial increases in “user fees” increase product development costs and result in delays to revenues from new or improved devices.

The growth of Group Purchasing Organizations (GPOs) adds non-productive costs, typically weakens the Company’s marketing and sales efforts and may result in lower revenues:

GPOs, theoretically acting as bargaining agents for member hospitals, but actually collecting their revenues from the companies that they are negotiating with, have made a concerted effort to turn medical devices that convey special patient safety advantages and better health outcomes, like UTMD’s, into undifferentiated commodities. GPOs have been granted an antitrust exemption by the U.S. Congress. In any other industry, their business model based on “kickbacks” would be a violation of law. These bureaucratic entities do not recognize or understand the overall cost of

care as it relates to safety and effectiveness of devices, and they create a substantial administrative burden that is primarily related to collection of their administrative fees.

The Company's business strategy may not be successful in the future:

As the level of complexity and uncertainty in the medical device industry increases, evidenced, for example, by the unpredictable regulatory environment, the Company's views of the future and product/ market strategy may not yield financial results consistent with the past.

As the healthcare industry becomes increasingly bureaucratic it puts smaller companies like UTMD at a competitive disadvantage:

An aging population and an extended economic recession are placing greater burdens on healthcare systems, particularly hospitals. The length of time and number of administrative steps required in adopting new products for use in hospitals has grown substantially in recent years. Smaller companies like UTMD typically do not have the administrative resources to deal with broad new administrative requirements, resulting in either loss of revenue or increased costs. As UTMD introduces new products it believes are safer and more effective, it may find itself excluded from certain clinical users because of the existence of long term supply agreements for preexisting products, particularly from competitors which offer hospitals a broader range of products and services. Restrictions used by hospital administrators to limit clinician involvement in device purchasing decisions makes communicating UTMD's clinical advantages much more difficult.

A product liability lawsuit could result in significant legal expenses and a large award against the Company:

UTMD's devices are frequently used in inherently risky situations to help physicians achieve a more positive outcome than what might otherwise be the case. In any lawsuit where an individual plaintiff suffers permanent physical injury, the possibility of a large award for damages exists whether or not a causal relationship exists.

The Company's reliance on third party distributors in some markets may result in less predictable revenues:

UTMD's distributors have varying expertise in marketing and selling specialty medical devices. They also sell other devices that may result in less focus on the Company's products. In some countries, notably China, Pakistan and India not subject to similarly rigorous standards, by copying, a distributor of UTMD's products may eventually become a competitor with a cheaper but lower quality version of UTMD's devices.

The loss of one or more key employees could negatively affect UTMD performance:

In a small company with limited resources, the distraction or loss of key personnel at any point in time may be disruptive to performance. The Company's benefits programs are key to recruiting and retaining talented employees. The rapid increase in UTMD's employee healthcare plan costs, for example, may cause the Company to have to reduce coverages which in turn represents a risk to retaining key employees.

Fluctuations in foreign currencies relative to the U.S. Dollar (USD) can result in significant differences in period to period financial results:

Since a significant portion of UTMD's sales are outside the U.S. and consolidated financial results are reported in USD terms, a stronger USD can have negative effects. For the portion of sales to foreign entities made in fixed USD terms, a stronger USD makes the devices more expensive and weakens demand. For the portion invoiced in a foreign currency, not only USD denominated sales and profits are reduced, but also gross profits and operating profits in foreign currency terms are reduced because finished distributed products and/or U.S. made raw materials and components are being purchased in fixed USD.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

UTMD did not purchase any of its own securities during 1Q 2015.

Item 6. Exhibits
