Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

**MTS FURTHER SIGNIFICANTLY EXPANDS
ITS LICENSE FOOTPRINT IN RUSSIA**

Moscow, Russian Federation February 17, 2004 Mobile TeleSystems OJSC (MTS - NYSE: MBT), the largest mobile phone operator in Russia, Eastern and Central Europe(1), today announces a significant expansion in its license area, which now covers almost all of Russia's territory.

MTS has received GSM licenses to operate in eleven new regions in Russia with a total population of 14.3 million;

MTS has received 900 MHz extensions to existing licenses in several regions, which should improve coverage and optimize capex spending;

The validity of the 900/1800 MHz license for the Moscow Region has been extended until December 2008.

The issuance of these new licenses has resulted from intensive research and development efforts to explore additional frequency resource. This work has been carried out by MTS in cooperation with the Ministry of Communications, General Radio Frequency Center, State Committee for Radio Frequencies and the Ministry of Defense during the past two years.

The issuance of new licenses allows MTS to provide mobile communications services in almost all of Russia's regions. In addition to this, MTS will now have the opportunity to develop its network in 900 MHz in many of the regions where network build-out was limited to GSM 1800 MHz, which will ensure higher quality of service and should optimize capex spending.

MTS gained access to the following regions: Mordovia Republic, Chuvashia Republic, Dagestan Republic, Ingooshetia Republic, Karachai-Cherkes Republic, Stavropol Region, Evenki Autonomous District and Kemerovo Region (licenses to operate in 900/1800 MHz), as well as Ulyanovsk Region, Kabarda-Balkar Republic and North Ossetia-Alania Republic (licenses to operate in 1800 MHz);

Edgar Filing: MOBILE TELESYSTEMS OJSC - Form 6-K

MTS received several licenses in the regions where it operates through its daughter companies: Astrakhan(2) and Irkutsk(3) regions (licenses to operate in 900 MHz), and licenses for Altai, Tyva and Kalmykia republics (licenses to operate in 1800 MHz);

MTS received extensions to existing licenses in the following regions: Mariy-El Republic, Udmurtiya Republic, Khakas Republic, Komi-Permyak Autonomous District, Yamalo-Nenets Autonomous District, Khanty-Mansi Autonomous District, Orenburg, Tambov, Ivanovo, Yaroslavl, Belgorod, Lipetsk, Orel, Tyumen and Kurgan regions (extensions to operate in 900 MHz) and in the Altai Region (extensions to existing license to operate in 1800 MHz).

In addition, the MTS license to operate in the Moscow license area in 900/1800 MHz was extended until December 2008.

Therefore, the license area of MTS and its daughter companies has extended to the whole territory of Russia, excluding the Penza Region and the Chechen Republic (87 out of 89 Russian regions).

(1) in terms of subscribers

(2) MTS is represented in the Astrakhan Region through a 50% holding in Astrakhan Mobile

(3) MTS is represented in the Irkutsk Region through a 50% holding in Primtelefon (operates under the MTS brand)

The population of the eleven new regions where MTS received licenses is 14.3 million people (around 10% of Russia's population). The MTS license area in Russia now covers 142.7 million people (98.2% of the country's population). Together with Ukraine and Belarus, the MTS license area is home to 200.6 million people.

Vassily Sidorov, President and CEO of MTS, commented: Since the launch of MTS's first network, the company's shareholder and management efforts have been focused on building a national cellular operator that provides high quality, affordable services throughout the territory of Russia. The issuance of MTS's new licenses completes a very important stage of our plans. We are now faced with the challenge of carrying out extensive build-out in these new regions and completing the formation of a national GSM network.
