Item 1. Business

THE COMPANY

General

Enterprise Bancorp, Inc. (the company) is a Massachusetts corporation, which operates as the parent holding company of Enterprise Bank and Trust Company (the bank). Substantially all of the company's operations are conducted through the bank. The bank, a Massachusetts trust company, has three wholly owned subsidiaries, Enterprise Insurance Services, LLC, Enterprise Investment Services, LLC, and Enterprise Security Corporation, organized for the purposes of engaging in insurance sales activities, offering non-deposit investment products and services and investing in equity securities on its own behalf and not as a broker, respectively.

Through the bank and its subsidiaries, the company offers a range of commercial and consumer loan and deposit products, investment advisory services, trust and insurance services. The services offered through the bank and subsidiaries are managed as one strategic unit and represent the company's only reportable operating segment.

The company's headquarters are located at 222 Merrimack Street in Lowell, Massachusetts. The company's primary market area is the Merrimack Valley and North Central regions of Massachusetts and South Central New Hampshire. The company has fourteen full service branch banking offices located in the Massachusetts cities and towns of Andover, Billerica, Chelmsford, Dracut, Fitchburg, Leominster, Lowell, Tewksbury, and Westford; and in Salem, New Hampshire which serve those cities and towns as well as the surrounding communities. The company recently received regulatory approval to establish a new branch in the city of Methuen, Massachusetts, and expects to open the facility for business in late 2007.

The company endeavors to expand market share in existing markets and to pursue strategic growth through expansion into neighboring markets. Management believes the company's business model, strong service culture, skilled management team and brand name create opportunities for the company to be the leading provider of commercial banking and investment management services in its growing market area. Management continually strives to differentiate the company from competitors by providing highly competitive commercial banking, investment, and insurance products delivered through prompt, responsive and personal service based on management's familiarity and understanding of the banking and other financial service needs of its customers. Management seeks to hire, develop and retain highly motivated top professionals who understand the communities in which the bank operates as well as the local banking environment.

Lending

General

The company specializes in lending to business entities, non-profit organizations, professionals and individuals. The company's primary lending focus is on the development of high quality commercial lending relationships achieved through active business development efforts, strong community involvement and focused marketing strategies. Loans made by the company to businesses include commercial mortgage loans, construction loans, secured and unsecured commercial loans and lines, and standby letters of credit. The company also originates equipment lease financing for businesses. Loans made to individuals include residential mortgage loans, home equity loans, residential construction loans, secured and unsecured personal loans and lines of credit and mortgage loans on investment and vacation properties.

The company employs a seasoned commercial lending staff, with commercial lenders supporting each branch location. The company has an internal loan review function that assesses the compliance of loan originations with the company's internal policies and underwriting guidelines and monitors the ongoing quality of the loan portfolio. The company also contracts with an external loan review company to review loans in the loan portfolio on a pre-determined schedule, based on the type, size, rating, and overall risk of the loan.

In addition, a management loan review committee, consisting of senior lending officers and loan review personnel, is responsible for setting loan policy and procedures, as well as reviewing loans on the company's internal watch asset list and classified loan report. A loan committee, consisting of seven outside members of the board of directors, and two executive officers who are also members of the board of directors, reviews current portfolio statistics, new credits, construction loan reviews, loan delinquencies, allowance for loan losses and watched assets, as well as current market conditions and issues relating to the construction and real estate development industry.

The company has also established an internal credit review committee, consisting of senior lending officers and loan review personnel. The committee meets on an as needed basis to review loan requests related to borrowing relationships of certain levels, as well as other borrower relationships recommended for discussion by committee members. The company's executive committee of the board of directors also approves loan relationships exceeding certain prescribed limits.

At December 31, 2006, the bank's statutory lending limit, based on 20% of capital, to any individual borrower was approximately \$17.4 million, subject to certain exceptions provided under applicable law.

Commercial Real Estate, Commercial and Construction Loans

Commercial real estate loans include loans secured by commercial and industrial properties, apartment buildings, office and mixed-use facilities, strip shopping malls, or other commercial property. Commercial real estate loans generally have repayment periods of approximately fifteen to twenty years. Variable interest rate loans have a variety of adjustment terms and indices, and are generally fixed for the first one to five years before periodic rate adjustment begins.

Commercial and industrial loans include seasonal revolving lines of credit, working capital loans, equipment financing (including equipment leases), loans partially guaranteed by the Small Business Administration (SBA), and loans under various programs issued in conjunction with the Massachusetts Development and Finance Agency and other agencies, as well as unsecured loans and lines to financially strong borrowers. These commercial loans may be secured in whole or in part by real estate unrelated to the principal purpose of the loan or secured by inventories, equipment, or receivables, and are generally guaranteed by the principals of the borrower. Variable rate loans in this portfolio have interest rates that are periodically adjusted, generally with fixed initial periods of one to three years. Commercial and industrial loans have average repayment periods of one to seven years.

Commercial construction loans include the development of residential housing and condominium projects, the development of commercial and industrial use property and loans for the purchase and improvement of raw land. The company's construction lenders work to cultivate long-term relationships with established developers. The company limits the amount of financing provided to any single developer for the construction of properties built on a speculation basis. Funds for construction projects are disbursed as pre-specified stages of construction are completed. Regular site inspections are performed, either by experienced construction lenders on staff or by independent outside inspection companies, at each construction phase, prior to advancing additional funds. Commercial construction loans generally have terms of one to three years.

From time to time the company participates in the financing of certain large commercial projects with other banks. In some cases the company may act as the lead lender, originating and servicing the loans, but participating out a portion of the funding to other banks. In other cases the company may participate in loans originated by other institutions. In each case the participating bank funds a percentage of the loan commitment and takes on the related risk. The company performs an independent credit analysis of each commitment prior to participation in the loan.

Standby letters of credit are conditional commitments issued by the company to guarantee the performance by a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. If the letter of credit is drawn upon the company creates a loan for the customer, generally a commercial loan, with the same criteria associated with similar commercial loans.

Residential Loans

The company originates conventional mortgage loans on one-to-four family residential properties. These properties may serve as the borrower's primary residence, second homes or investment properties. Loan to value limits vary up to 97%, with mortgage insurance coverage required for loan-to-value ratios greater than 80% based on program parameters. In addition the company provides financing for the construction of owner occupied residences.

Residential mortgage loans made by the company have terms of up to 30 years at either fixed or adjustable rates of interest. Fixed and adjustable rate residential mortgage loans are generally originated using underwriting standards and standard documentation allowing their sale in the secondary market. Depending on the current interest rate environment, management projections of future interest rates and the overall asset-liability management program of the company, management may elect to sell or hold residential loan production for the company's portfolio. The company generally does not pool mortgage loans for sale, but instead sells the loans on an individual basis. The company may retain or sell the servicing when selling the loans. All loans sold are currently sold without recourse.

Home Equity Loans and Lines of Credit

Home equity loans are originated for the company's portfolio for one-to-four family residential properties with maximum original loan to value ratios generally up to 80% of the assessed or appraised value of the property securing the loan. Home equity loan payments consist of monthly principal and interest based on amortizations ranging from three to fifteen years and are generally offered at fixed rates of interest.

Home equity lines are originated for the company's portfolio for one-to-four family residential properties with maximum original loan to value ratios generally up to 80% of the assessed or appraised value of the property securing the loan. Home equity lines generally have interest rates that adjust monthly based on changes in the Prime rate as published in the Wall Street Journal. Some home equity lines may be fixed for a period of time and then adjusted monthly thereafter. The payment schedule for home equity lines for the first ten years of the loans are interest only payments. At the end of ten years the line is frozen to future advances and principal plus interest payments are collected over a fifteen-year amortization schedule.

Consumer Loans

Consumer loans primarily consist of secured or unsecured personal loans and overdraft protection lines on checking accounts extended to individual customers.

Risk Elements and Allowance for Loan Losses

Information regarding the company's risk elements and allowance for loan losses is contained in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the headings Risk Elements/Asset Quality and Allowance for Loan Losses, contained in the section Financial Condition, and under the heading Allowance for Loan Losses, which is contained in the Critical Accounting Estimates section of Item 7.

Investment Activities

The company's investment activity is an integral part of the overall asset-liability management program of the company. The investment function provides readily available funds to support loan growth as well as to meet withdrawals and maturities of deposits and attempts to provide maximum return consistent with liquidity constraints and general prudence, including diversification and safety of investments. The securities in which the company may invest are limited by regulation. In addition, the company has an internal investment policy which restricts investments to the following categories: U.S. treasury securities, federal agency obligations (obligations issued by government sponsored enterprises that are not backed by the full faith and credit of the United States government), mortgage-backed securities (MBS's), including collateralized mortgage obligations (CMO's), and state, county and municipal securities (Municipals), all of which must be considered investment grade by a recognized rating service. The company also invests in certificates of deposit and, within prescribed regulatory limits, in publicly traded equity securities and registered mutual funds. The bank is also required to purchase Federal Home Loan Bank of Boston (FHLB) stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost.

The short-term investments classified as cash equivalents may be comprised of short-term U.S. Agency Discount Notes, money market mutual funds and overnight or short-term federal funds sold. Other short-term investments not classified as cash equivalents may consist of auction rate preferred securities, which typically have redemption (auction) dates of up to forty-nine days, but cannot readily be converted to cash at par value until the next successful auction. The investment policy also limits the categories within the investment portfolio to particular percentages of the total portfolio and to certain percentages of total assets and/or capital. The effect of changes in interest rates, principal payments and market values are considered when purchasing securities.

Investment transactions, portfolio allocations and projected cash flows are prepared monthly and presented to the company's Asset-Liability Committee of the Board of Directors (ALCO) on a periodic basis. ALCO is comprised of five outside directors and three executive officers of the company who are also directors, with various management liaisons. In addition, several directors who are not on the committee rotate in on a regular basis. ALCO performs an in-depth review of the company's asset-liability strategy. The credit rating of each debt security or obligation in the portfolio is closely monitored by management and presented, at least annually, to the ALCO, along with a detailed evaluation of the company's municipal securities portfolio.

Source of Funds

Deposits

Deposits have traditionally been the principal source of the company's funds. The company offers a broad selection of deposit products to the general public, including personal interest checking accounts (PIC), savings accounts, money market accounts, individual retirement accounts (IRA) and certificates of deposit. The company also offers commercial checking, business and municipal savings accounts, money market and business sweep accounts, and escrow management accounts, as well as checking and Simplified Employee Pension (SEP) accounts to employees of our business customers.

Terms on certificates of deposit range from overnight to thirty months. The company has offered premium rates on specially designated products from time to time in order to promote new branches and to attract customers. In addition, the company may use brokered certificates of deposit as an alternative to borrowing funds from the FHLB.

Management determines the interest rates offered on deposit accounts based on current and expected economic conditions, competition, liquidity needs, the volatility of the existing deposits, the asset-liability position of the company and the overall objectives of the company regarding the growth and retention of relationships.

The company utilizes third party money market mutual funds for sweep accounts. Management believes that commercial customers benefit from enhanced interest rate options on sweep accounts, while retaining a conservative investment option of the highest quality and safety. The balances transferred into mutual funds do not represent obligations of the company.

Borrowed Funds

The bank is a member of the FHLB. This membership enables the bank to borrow funds from the FHLB based on the pledge of qualifying collateral balances, including certain residential loans, commercial loans and U.S. Government and Agency securities. The company utilizes borrowings from the FHLB to fund short-term liquidity needs. This facility is an integral component of the company's asset-liability management program.

The company also borrows funds from customers (generally commercial and municipal customers) by entering into agreements to sell and repurchase investment securities from the company's portfolio, with terms typically ranging from overnight to six months. These repurchase agreements represent a cost competitive funding source for the company. Interest rates paid by the company on these repurchase agreements are based on market conditions and the company's need for additional funds at the time of the transaction.

Junior Subordinated Debentures

In March 2000 the company organized Enterprise (MA) Capital Trust I (the Trust), a statutory business trust created under the laws of Delaware, in order to issue \$10.5 million of 10.875% trust preferred securities that mature in 2030 and are callable beginning in 2010. The proceeds from the sale of the trust preferred securities were used by the Trust, along with the company's \$325 thousand capital contribution, to acquire \$10.8 million in aggregate principal amount of the company's 10.875% Junior Subordinated Debentures that mature in 2030 and are callable beginning in 2010.

Pursuant to Financial Interpretation No. 46R, issued by the Financial Accounting Standards Board in December 2003, the company carries the \$10.8 million of Junior Subordinated Debentures on the company's financial statements as borrowed funds, with related interest expense, and the \$10.5 million of trust preferred securities issued by the Trust, and the related non-interest expense, are excluded from the company's financial statements.

Investment Advisory Group

The company provides a range of investment advisory and management services to individuals, family groups, businesses, trusts, foundations, nonprofit organizations, endowments and retirement plans. These services include a combination of securities brokerage services through a third party service arrangement with Commonwealth Financial Network, a licensed securities brokerage firm, and fee only investment advisory and trust services for management of equity and fixed income portfolios. Portfolios are managed based on the individual investment objectives of each client.

The company's Investment Advisory Group utilizes an open-architecture, manager of managers approach to client investment management. The philosophy is to identify and hire highly competitive outside mutual fund companies and investment management firms on behalf of our clients. The company performs a detailed search and due diligence review based on an objective analysis of each fund's historic returns, management, longevity, investment style, risk profile, and other criteria. The company identifies and hires the best service providers and maintains ongoing oversight and monitoring of their performance. This rigorous due diligence enables the company to customize sound investment portfolios that meet each customer's financial objectives and deliver superior long-term performance.

Enterprise Insurance Services

Enterprise Insurance Services LLC engages in insurance sales activities through a third party arrangement with HUB International New England, LLC (HUB), a full service insurance agency, with offices in Massachusetts and New Hampshire. Enterprise Insurance Services provides, through HUB, a full array of insurance products including property and casualty, employee benefits and risk-management solutions tailored to serve the specific insurance needs of businesses in a range of industries operating in the company's market area.

Internet Banking

The company uses an in-house turn-key solution from its core banking system vendor for internet banking services for retail and commercial customers. Major internet banking capabilities include the following: balance inquiry; internal transfers; loan payments; ACH origination; federal tax payments; placement of stop payments; access to images of checks paid; as well as access to prior period account statements. In addition, commercial customers may take advantage of remote deposit capture service and have the ability to initiate requests for wire transfers online.

Company Website

The company currently uses an outside vendor to design, support and host its internet website. The underlying structure of the site provides for dynamic maintenance of the information by company personnel. The site provides information on the company and its services, as well as providing the access point to various specified banking services and to various financial management tools. In addition, the site includes the following major capabilities: career opportunities; loan and deposit rates; calculators; an ATM/Branch Locator/Map; and investor and corporate information, which includes a corporate governance page. The corporate governance page includes the company's corporate governance guidelines, code of business conduct and ethics, and whistleblower protection policy, as well as the charters of the Board of Directors' audit, compensation and personnel, and corporate governance/nominating committees.

The company makes available free of charge, through a link on its web site to its SEC filings, copies of the company's annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, as well as all registration statements that the company has been required to file in connection with the issuance of its shares. The company similarly makes available all insider stock ownership and transaction reports filed with the SEC by the company's executive officers, directors and any 10% stockholders under Section 16 of the Securities Exchange Act of 1934 (Forms 3, 4 and 5). Access to all of these reports is essentially simultaneous with the SEC's posting of these reports on its EDGAR system through the SEC website (www.SEC.gov). The company's internet web address is: EnterpriseBanking.com.

Competition

The company faces strong competition to attract deposits and to generate loans. National and larger regional banks have a local presence in the Merrimack Valley and North Central regions of Massachusetts and in South Central New Hampshire. Numerous local savings banks, commercial banks, cooperative banks, credit unions and savings and loan associations have one or more offices in the company's market area. Larger banks have certain competitive advantages over the company, including the ability to make larger loans to a single borrower than is possible for the company. The greater financial resources of larger banks also allow them to offer a broad range of automated banking services, to maintain numerous branch offices and to mount extensive advertising and promotional campaigns. Competition for loans and deposits also comes from other businesses that provide financial services, including consumer finance companies, mortgage brokers, insurance companies, securities brokerage firms, institutional mutual funds, private lenders and internet-only based banks. Advances in, and the increased use of, technology, such as Internet banking and electronic item processing, are expected to have a significant impact on the future competitive landscape confronting financial institutions.

Notwithstanding the substantial competition with which the company is faced, management believes that the company has established a solid reputation within its market area. The company's officers and directors have substantial business and personal ties in the cities and towns in which the company operates. The company believes that it has differentiated itself from competitors by providing customers with personal and responsive service based on management's familiarity and understanding of such customers' banking and investment management needs. The company continually examines new products and technologies in order to maintain a highly competitive mix of offerings and to target product lines to customer needs.

Management actively seeks to strengthen its position, by capitalizing on the market opportunities, and the continuing pursuit of growth within existing and neighboring markets. The company recently received regulatory approval to establish its fifteenth branch in the city of Methuen, Massachusetts. This will be the company's sixth new branch location since 2002.

To the extent that changes in the regulation of financial services may further increase competition, these changes could result in the company paying increased interest rates to obtain deposits while receiving lower interest rates on its loans. Under such circumstances, the company's net interest margin would decline.

See also "Supervision and Regulation" below, for further discussion on how new laws and regulations may effect the company's competitive position.

Supervision and Regulation

General

Bank holding companies and banks are subject to extensive government regulation through federal and state statutes and related regulations, which are subject to changes that can significantly affect the way in which financial service organizations conduct business.

As a general matter, regulation of the banking and financial services industries continues to undergo significant changes, some of which are intended to ease legal and regulatory restrictions while others have increased regulatory requirements. For example, the Gramm-Leach-Bliley Act of 1999 (the "GLB Act") eased regulatory restrictions on consolidated companies offering diversified financial services by removing the legal barriers that formerly served to separate the banking, insurance and securities industries. The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994, which reduced geographic restrictions on banking organizations by enhancing their ability to operate on a nationwide basis, is another example of federal legislation that has reduced the legal and regulatory burdens on the business activity of banks and their holding companies.

Many of the more recent changes in law and regulation that have increased banks' and financial organizations' regulatory requirements have applied to operations relevant to the "war on terrorism" or areas affecting the interests of investors and consumers. For example the United and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (a/k/a the Patriot Act) added new provisions to the Bank Secrecy Act that increased anti-money laundering and customer identification requirements, which are intended to facilitate the prevention, detection and prosecution of international money laundering and the financing of terrorism.

The passage of the Sarbanes-Oxley Act of 2002 added new financial reporting and certification, accounting, corporate governance and internal controls requirements to the company's ongoing federal securities law compliance obligations, which are intended to enhance corporate accountability and improve the quality of investor information.

The Fair and Accurate Credit Transaction Act ("FACT Act"), which amended the Fair Credit Reporting Act in 2003, requires banks and other financial firms to take measures intended to help deter identity theft by developing appropriate fraud response programs and giving consumers greater control over their credit data.

The Check Clearing for the 21st Century Act (Check 21), which became effective in 2004, is designed to facilitate the automation of the nation's check-processing system away from physical transportation of paper checks. The law allows banks to process check information electronically, and to deliver digital images of the check to banks that choose to continue to receive paper checks. Check 21 requires all banks to accept legally equivalent substitute checks in place of originals and comply with federal regulations governing the treatment of remotely created checks and electronic check conversion transactions.

Currently pending legislative proposals at both the federal level and in various states, including Massachusetts, would further address data breaches affecting consumer financial information and could impose additional operational and reporting obligations on banks and their affiliates.

Any future increase in the extent of regulation imposed upon the banking or financial services industries generally could result in the company incurring additional operating and compliance costs, which in turn could impede profitability.

To the extent that the information in this report under the heading *Supervision and Regulation* describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statutory or regulatory provision so described. Any changes in applicable laws or regulations may have a material effect on the business and prospects of the company.

Regulation of the Holding Company

The company is a registered bank holding company under the federal Bank Holding Company Act of 1956, as amended (the *Bank Holding Company Act*). The business and operations of the company are subject to the supervision and examination of the Board of Governors of the Federal Reserve System (the *Federal Reserve Board*) and the company files reports with the Federal Reserve Board as required under the *Bank Holding Company Act*. Under applicable Massachusetts law, the company is also subject to the supervisory jurisdiction of the Massachusetts Commissioner of Banks (the *Commissioner*).

The *Bank Holding Company Act* requires prior approval by the Federal Reserve Board of the acquisition by the company of substantially all the assets or more than five percent of the voting stock of any bank. The *Bank Holding Company Act* also authorizes the Federal Reserve Board to determine (by order or by regulation) what activities are so closely related to banking as to be a proper incident of banking, and thus, whether the company, either directly or indirectly through non-bank subsidiaries, can engage in such activities. The *Bank Holding Company Act* prohibits the company and the bank from engaging in certain tie-in arrangements in connection with any extension of credit, sale of property or furnishing of services. There are also restrictions on extensions of credit and other transactions between the bank, on the one hand, and the company, or other affiliates of the bank, on the other hand.

The GLB Act enhanced the authority of banks and their holding companies to engage in non-banking activities. By electing to become a *financial holding company* , a qualified parent company of a banking institution may engage, directly or through its non-bank subsidiaries, in any activity that is financial in nature or incidental to such financial activity or in any other activity that is complimentary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally.

A bank holding company will be able to successfully elect to be regulated as a *financial holding company* if all of its depository institution subsidiaries meet certain prescribed standards pertaining to management, capital adequacy and compliance with the federal *Community Reinvestment Act*. *Financial holding companies* remain subject to regulation and oversight by the Federal Reserve Board. The company believes that the bank, which is the company's sole depository institution subsidiary, presently satisfies all of the requirements that must be met to enable the company to successfully elect to become a *financial holding company*. However, the company has no current intention of seeking to become a *financial holding company*. Such a course of action may become necessary or appropriate at some time in the future depending upon the company's strategic plan.

Regulation of the Bank

As a trust company organized under Chapter 172 of the Massachusetts General Laws, the deposits of the bank are insured by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation (the FDIC), up to the maximum amount provided by law. The bank is subject to regulation, supervision and examination by the Commissioner and the FDIC. The bank is also subject to certain regulatory requirements of the Federal Reserve Board.

The regulations of these agencies govern many aspects of the bank's business, including permitted investments, the opening and closing of branches, the amount of loans which can be made to a single borrower, mergers, appointment and conduct of officers and directors, capital levels and terms of deposits. The Federal Reserve Board also requires the bank to maintain minimum reserves on its deposits. Federal and state regulators can impose sanctions on the bank and its management if the bank engages in unsafe or unsound practices or otherwise fails to comply with regulatory standards. Various other federal and state laws and regulations, such as truth-in-lending and truth-in-savings statutes, the Equal Credit Opportunity Act, the Bank Secrecy Act, the Real Estate Settlement Procedures Act, the Community Reinvestment Act, Check 21 and the FACT Act, also govern the bank's activities and operations.

Pursuant to the GLB Act, the bank may also form, subject to the approvals of the Commissioner and the FDIC, financial subsidiaries to engage in any activity that is financial in nature or incidental to a financial activity. In order to qualify for the authority to form a financial subsidiary, the bank would be required to satisfy certain conditions, some of which are substantially similar to those that the company would be required to satisfy in order to elect to become a financial holding company. The company believes that the bank would be able to satisfy all of the conditions that would be required to form a financial subsidiary, although the company has no current intention of doing so. Such a course of action may become necessary or appropriate at some time in the future depending upon the company's strategic plan.

Deposit Insurance Assessment

As of January 1, 2007, the bank is subject to a revised deposit insurance assessment system as implemented by the FDIC in accordance with the requirements of the Federal Deposit Insurance Reform Act of 2005 (the Deposit Insurance Reform Act). Under the former system for assessing deposit insurance premiums on federally insured banks and thrifts, the bank had no current obligation to pay any deposit insurance premium based on its designation as well capitalized.

Effective January 1, 2007, the new deposit insurance assessment rates will be determined based upon a combination of an institution's financial ratios and supervisory factors. Under the new deposit insurance assessment system, even the highest risk-rated (i.e., least risk) banks and thrifts are subject to some level of assessment payable to the FDIC's Deposit Insurance Fund. There are four established risk categories under the new assessment rules. The bank anticipates that it will qualify as a Risk Category I (least risk) institution with an assessment rate in a range of 5 to 7 basis points of the bank's deposit assessment base, as defined by the FDIC. Based upon an analytic tool provided by the FDIC, the bank anticipates that its projected calculated assessment rate for 2007 will be at the lower end of this range.

Under the Deposit Insurance Reform Act, eligible insured depository institutions, such as the bank, will share in a one-time assessment credit pool of approximately \$4.7 billion, effectively reducing the amount these institutions will be required to submit as an overall assessment. As indicated in the final rule regarding this credit published in October 2006, the FDIC provided the bank with a preliminary Statement of One-Time Credit. The bank's portion of the one-time assessment credit as indicated on that statement is approximately \$333 thousand.

The FDIC will apply the bank's one-time assessment credit against the bank's payment of future deposit insurance assessments. The company anticipates that the credit will offset more than half of the bank's deposit insurance assessments for fiscal year 2007.

Dividends

Under Massachusetts law, the company's board of directors is generally empowered to pay dividends on the company's capital stock out of its net profits to the extent that the board of directors considers such payment advisable. Massachusetts banking law also imposes substantially similar standards upon the payment of dividends by the bank to the company. The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) also prohibits a bank from paying any dividends on its capital stock in the event that the bank is in default on the payment of any assessment to the FDIC or if the payment of any such dividend would otherwise cause the bank to become undercapitalized.

Capital Resources

Capital planning by the company and the bank considers current needs and anticipated future growth. The primary sources of capital have been the sale of common stock in 1988 and 1989, the issuance of \$10.5 million of trust preferred securities in 2000 by the Trust, retention of earnings less dividends paid since the bank commenced operations, and proceeds from the exercise of stock options.

The Company

The Federal Reserve Board has adopted capital adequacy guidelines that generally require bank holding companies to maintain total capital equal to 8% of total risk-weighted assets, with at least one-half of that amount (or 4% of total risk-weighted asset) consisting of core or Tier 1 capital. Total capital for the company consists of Tier 1 capital and supplementary or Tier 2 capital. Tier 1 capital for the company begins with common stockholders' equity and is reduced by certain intangible assets. In addition, trust preferred securities may compose up to 25% of the company's Tier 1 capital (subject to certain limitations and with any excess allocable to Tier 2 capital). Supplementary capital for the company is comprised solely of a portion of the allowance for loan losses. Assets are adjusted under the risk-based capital guidelines to take into account different levels of credit risk, for example, cash and government securities are placed in a 0% risk category (requiring no additional capital), most home mortgage loans are placed in a 50% risk category, and the bulk of assets that, by their nature in the ordinary course of business, pose a direct credit risk to a bank holding company, including commercial real estate loans, commercial business loans and consumer loans, are placed in a 100% risk category.

In addition to the risk-based capital requirements, the Federal Reserve Board requires bank holding companies to maintain a minimum leverage ratio of Tier 1 capital to quarterly average total assets of 4% (3% percent if given the highest regulatory rating and not experiencing significant growth).

The Bank

The bank is subject to separate capital adequacy requirements of the FDIC, which are substantially similar to the requirements of the Federal Reserve Board applicable to the company. However, trust preferred proceeds contributed to the bank from the company are included in Tier 1 capital of the bank without limitation. The company contributed \$10.3 million of proceeds from the sale of these securities to the bank in 2000. Under the FDIC requirements, the minimum total capital requirement is 8% of total assets and certain off-balance sheet items, weighted by risk. At least 4% of the total 8% ratio must consist of Tier 1 capital (primarily common equity including retained earnings) and the remainder may consist of subordinated debt, cumulative preferred stock and a limited amount of loan loss reserves. At the bank level, as at the company level on a consolidated basis, certain intangible assets are deducted from Tier 1 capital in calculating regulatory capital ratios.

Under the applicable FDIC capital requirements, the bank is also required to maintain a minimum leverage ratio. The ratio is determined by dividing Tier 1 capital by quarterly average total assets, less intangible assets and other adjustments. FDIC rules require a minimum of 3% for the highest rated banks. Banks experiencing high growth rates are expected to maintain capital positions well above minimum levels.

Depository institutions, such as the bank, are also subject to the prompt corrective action framework for capital adequacy established by FDICIA. Under FDICIA, the federal banking regulators are required to take prompt supervisory and regulatory actions against undercapitalized depository institutions. FDICIA establishes five capital categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. A well capitalized institution has a total capital to total risk-weighted assets ratio of at least 10%, a Tier 1 capital to total risk-weighted assets ratio of at least 6%, a leverage ratio of at least 5% and is not subject to any written order, agreement or directive; an adequately capitalized institution has a total capital to total risk-weighted assets ratio of at least 8%, a Tier 1 capital to total risk-weighted assets ratio of at least 4%, and a leverage ratio of at least 4% (3% percent if given the highest regulatory rating and not experiencing significant growth), but does not qualify as well capitalized. An undercapitalized institution fails to meet one of the three minimum capital requirements. A significantly undercapitalized institution has a total capital to total risk-weighted assets ratio of less than 6%, a Tier 1 capital to total risk-weighted assets ratio of less than 3%, and a leverage ratio of less than 3%. A critically undercapitalized institution has a ratio of tangible equity to assets of 2%, or less. Under certain circumstances, a well capitalized, adequately capitalized or undercapitalized institution may be required to comply with supervisory actions as if the institution were in the next lowest category.

Failure to meet applicable minimum capital requirements, including a depository institution being classified as less than adequately capitalized within FDICIA's prompt corrective action framework, may subject a bank holding company or its subsidiary depository institution(s) to various enforcement actions, including substantial restrictions on operations and activities, dividend limitations, issuance of a directive to increase capital and, for a depository institution, termination of deposit insurance and the appointment of a conservator or receiver.

Patents, Trademarks, etc.

The company holds a number of registered service marks related to product names and corporate branding. The company holds no patents, registered trademarks, licenses (other than licenses required to be obtained from appropriate banking regulatory agencies), franchises or concessions which are material to its business.

Employees

At December 31, 2006, the company employed 282 full-time equivalent employees, including 100 officers. None of the company's employees are presently represented by a union or covered by a collective bargaining agreement. Management believes its employee relations to be excellent.

Item 1A. Risk Factors

An investment in the company's common stock is subject to a variety of risks and uncertainties. The material risks and uncertainties that management believes affect the company are described below. These risks and uncertainties are not listed in any particular order of priority and are not necessarily the only ones facing the company. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair the company's business and results of operations.

This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, the company's financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of the company's common stock could decline significantly, and shareholders could lose some or all of their investment.

The Company is Subject to Interest Rate Risk

The company's earnings and cash flows are largely dependent upon its net interest income, meaning the difference between interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities. Interest rates are highly sensitive to many factors that are beyond the company's control. If the interest rates paid on interest-bearing liabilities increase at a faster rate than the interest rates received on loans and other investments, the company's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on interest-bearing liabilities.

See Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", for further discussions related to the company's management of interest rate risk.

The Company is Subject to Lending Risk

There are inherent risks associated with the company's lending activities. These risks include, among other things, the impact of changes in interest rates and changes in the economic conditions in the market areas in which the company operates. Increases in interest rates and/or weakening economic conditions could adversely impact the ability of borrowers to repay outstanding loans or the value of the collateral securing these loans.

The company's loan portfolio consists primarily of commercial real estate, commercial and industrial and construction loans. These types of loans are generally viewed as having more risk of default than residential real estate loans or consumer loans. These types of loans are also typically larger than residential real estate loans and consumer loans. The underlying commercial real estate values and customer payment expectations on such loans can be more easily influenced by adverse conditions in the real estate market or in the economy in general. Commercial construction financing involves a higher degree of risk than long term financing on existing occupied real estate. An underestimation of the actual costs necessary to complete a construction project would require the company to advance funds beyond the original commitment in order to finish the development. Any significant deterioration in the company's commercial loan portfolio or underlying collateral values could have a material adverse effect on the company's financial condition and results of operations.

See the discussion under the heading "Loans" included in the section entitled "Financial Condition", which is contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", for further information regarding the company's commercial loan portfolio.

The Company's Profitability Depends Significantly on Economic Conditions in the Company's Primary Market Areas

The company's success depends principally on the general economic conditions of the primary market areas in which the company operates. The local economic conditions in these areas have a significant impact on the demand for the company's products and services as well as the ability of the company's customers to repay loans, the value of the collateral securing loans and the stability of the company's deposit funding sources. A significant decline in general economic conditions, caused by inflation, recession, acts of terrorism, outbreak of hostilities or other international or domestic occurrences, unemployment, changes in securities markets or other factors could impact these local economic conditions and, in turn, have a material adverse effect on the company's financial condition and results of operations.

The Company's Allowance for Loan Losses May Be Insufficient

The company maintains an allowance for loan losses, which is a reserve established through a provision for loan losses charged to earnings that represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The determination of the appropriate level of the allowance for loan losses inherently involves a high degree of subjectivity and requires the company to make significant estimates of current credit risks and future trends, all of which may undergo material changes. In addition, bank regulatory agencies periodically review the company's allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further loan charge-offs, based on judgments different than those of the company's management. Any increases in the allowance for loan losses will result in a decrease in net income and, depending upon the magnitude of the changes, could have a material adverse effect on the company's financial condition and results of operations.

See the discussions contained in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the headings Risk Elements/Asset Quality and Allowance for Loan Losses, contained in the section Financial Condition, and under the heading Allowance for Loan Losses, which is contained in the Critical Accounting Estimates section of Item 7 for further information regarding the process by which the company determines the appropriate level of its allowance for loan losses.

The Company Operates in a Highly Competitive Industry and Market Area

The company faces substantial competition in all areas of its operations from a variety of different competitors, many of which are larger and have more financial resources than the company. These competitors include not only national, regional, and other community banks, but also various types of other non-bank financial institutions, such as credit unions, finance companies, brokerage firms, mutual fund companies, insurance companies, factoring companies and other financial intermediaries.

See the section entitled Competition contained in Item 1, Business, for additional information regarding the competitive issues facing the company.

The Company is Subject to Extensive Government Regulation and Supervision

The company is subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not the interests of shareholders. These regulations affect the company's lending practices, capital structure, investment practices, dividend policy and growth, among other things. Changes to federal or state statutes, regulations or regulatory policies, including changes in interpretation or implementation of existing statutes, regulations or policies, could affect the company in substantial and unpredictable ways, including subjecting the company to additional costs, limiting the types of financial services and products the company may offer and/or increasing competition from other non-bank providers of financial services.

See the section entitled Supervision and Regulation contained in Item 1, Business, for additional information regarding the supervisory and regulatory issues facing the company.

The Company's Controls and Procedures May Fail or Be Circumvented

Management regularly reviews and updates the company's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of the company's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on the company's business, results of operations and financial condition.

The Company Relies on Dividends From the Bank for Substantially All of its Revenue

The company is a separate and distinct legal entity from the bank. It receives substantially all of its revenue from dividends paid by the bank. These dividends are the principal source of funds used to pay dividends on the company's common stock and interest and principal on the company's subordinated debt. Various federal and state laws and regulations limit the amount of dividends that the bank may pay to the company. If the bank is unable to pay dividends to the company, then the company will be unable to service debt, pay obligations or pay dividends on the company's common stock. The inability to receive dividends from the bank could have a material adverse effect on the company's business, financial condition and results of operations.

Slower than Expected Growth in New Branches and New Products and Services Could Adversely Affect the Company's Profitability

The company has placed a strategic emphasis on expanding its branch network and product and service offerings. Executing this strategy carries risks of slower than anticipated growth both in new branches and new products and services. New branches and new products and services require a significant investment of both financial and personnel resources. Lower than expected loan and deposit growth in new branches and/or lower than expected fee or other income from new products and services could decrease anticipated revenues and net income generated by such investments. Opening new branches and introducing new products and services could also divert resources from current core operations and thereby further adversely affect the company's growth and profitability.

Growth Strategies Involving Acquisitions Could Adversely Affect the Company's Profitability

The company may in the future explore growth opportunities through acquisition of other banks, financial services companies or lines of their business. Any future acquisition could adversely affect the company's profitability based on management's ability to successfully complete the acquisition and integrate the acquired business.

Increased Reliance on Borrowings as a Source of Funds Could Adversely Affect the Company's Profitability

The company has traditionally obtained funds principally through deposits and borrowings. As a general matter, deposits are a lower cost source of funds than borrowings, because interest rates paid for deposits are typically less than interest rates charged for borrowings. If, as result of competitive pressures, market interest rates, general economic conditions or other events, the balance of the company's deposits decreases relative to the company's overall banking operations, the company may have to rely more heavily on borrowings as a source of funds in the future. Any such increased reliance on borrowings could have a negative impact on the company's net interest income and, consequently, on its results of operations and financial condition.

The Company May Not be Able to Attract and Retain Key Personnel

The company's success depends, in large part, on its ability to attract and retain key personnel. Competition for the best people in most activities engaged in by the company can be intense and the company may not be able to hire or retain the key personnel that it depends upon for success. The unexpected loss of services of one or more of the company's key personnel could have a material adverse impact on the company's business because of their skills, knowledge of the company's market, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

The Company's Information Systems May Experience an Interruption or Breach in Security

The company relies heavily on communications and information systems to conduct its business and to provide internet banking services to its customers. The occurrence of any failures, interruptions or security breaches of the company's information systems could damage the company's reputation, result in a loss of customer business, expose customer's personal information to unauthorized parties, subject the company to additional regulatory scrutiny, and expose the company to civil litigation and possible financial liability, any of which could have a material adverse effect on the company's financial condition and results of operations.

See the discussion under the heading "Opportunities and Risks" included in the section entitled "Overview", which is contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", for further information regarding the company's information security and technology practices.

The Company's Relies on Independent Service Providers

The company relies on independent firms to provide key services necessary to conducting its business. These services include, but are not limited to: electronic funds delivery networks; electronic banking services; investment advisory, management and custodial services; correspondent banking services; information security assessments; and loan underwriting and review services. The occurrence of any failures, interruptions or security breaches of the independent firms' systems or in their delivery of services, could result in a loss of customer business, expose customer's personal information to unauthorized parties, damage the company's reputation and expose the company to civil litigation and possible financial liability, any of which could have a material adverse effect on the company's financial condition and results of operations.

The Company Continually Encounters Technological Change

The banking industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Many of the company's competitors have substantially greater resources to invest in technological improvements. Failure to successfully keep pace with technological change affecting the banking industry could have a material adverse effect on the company's business and, in turn, the company's financial condition and results of operations.

The Trading Volume in the Company's Common Stock is Less Than That of Larger Companies

Although the company's common stock is listed for trading on the NASDAQ Stock Market, the trading volume in the company's common stock is substantially less than that of larger companies. Given the lower trading volume of the company's common stock, significant purchases or sales of the company's common stock, or the expectation of such purchases or sales, could cause significant swings up or down in the company's stock price.

Shareholder Dilution May Occur if Additional Stock is Issued in the Future

If the company's Board of Directors should determine in the future that there is a need to obtain additional capital through the issuance of additional shares of the company's common stock or securities convertible into shares of common stock, such issuances could result in dilution to existing shareholders' ownership interest. Similarly, if the Board of Directors decides to grant additional stock options for the purchase of shares of common stock, the issuance of additional shares upon exercise of the options may expose shareholders to dilution.

Directors and Executive Officers own a significant portion of common stock

The company's directors and executive officers as a group beneficially own approximately 30% of the company's outstanding common stock as of December 31, 2006. As a result of this combined ownership interest, the directors and executive officers have the ability, if they vote their shares in a like manner, to significantly influence the outcome of all matters submitted to shareholders for approval, including the election of directors.

The Company's Articles Of Organization, By-Laws and Shareholders Rights Plan as Well as Certain Banking Laws May Have an Anti-Takeover Effect

Provisions of the company's articles of organization and by-laws, its shareholders rights plan and certain federal and state banking laws, including regulatory approval requirements, could make it more difficult for a third party to acquire the company, even if doing so would be perceived to be beneficial to the company's shareholders. The combination of these provisions effectively inhibits a non-negotiated merger or other business combination, which, in turn, could adversely affect the market price of the company's common stock.

Additional Factors Described Elsewhere in This Report

In addition to the factors listed above in this section, additional important factors that could adversely affect the results of the company's future operations are described under the heading "Special Note Regarding Forward-Looking Statements" contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 1B. Unresolved Staff Comments

None.

18

Item 2. Properties

The company conducts its business from its main office and operational support and lending offices in Lowell, Massachusetts. The company currently has fourteen full service branch banking offices serving the Merrimack Valley and North Central regions of Massachusetts and South Central New Hampshire. The company is obligated under various non-cancelable operating leases, most of which provide for periodic adjustments. The company believes that all its facilities are well maintained and suitable for the purpose for which they are used.

The following table sets forth general information related to facilities owned or used by the company as of December 31, 2006.

BRANCH LOCATION	OWNED OR LEASED
Andover 6-8 High Street	Leased
Billerica 674 Boston Post Road	Owned
Chelmsford 20 Drum Hill	Owned
185 Littleton Road Dracut	Owned
1168 Lakeview Avenue Fitchburg	Leased
420 John Fitch Highway Leominster	Leased
4 Central Street (1) Lowell	Leased
430-434 Gorham Street 222 Merrimack Street (Main Office)	Leased Leased
North Billerica 223 Boston Road	Owned
Salem, NH 130 Main Street	Leased
Tewksbury 910 Andover Street	Leased
1120 Main Street Westford	Leased
237 Littleton Road	Owned
 <u>OPERATION/LENDING OFFICES</u>	
Lowell 170 Merrimack Street	Leased
21-27 Palmer Street Andover	Leased
63 Park Street(2)	Leased
 <u>PLANNED BRANCH LOCATION</u>	
Methuen 255 Broadway	Owned

(1) The company has the option to purchase this facility on the last day of the basic term or at any time during any extended term at the price of \$550 thousand as adjusted for increases in the producer's price index.

(2) The Park Street lease expires in August 2007 and will not be renewed. This temporary location housed the Andover branch prior to the opening of the permanent 6-8 High St. location in December, 2006.

See note 4, Premises and Equipment, to the consolidated financial statements in Item 8 for further information regarding the company's lease obligations.

19

Item 3. Legal Proceedings

The company is involved in various legal proceedings incidental to its business. Management does not believe resolution of any present litigation will have a material adverse effect on the financial condition of the company.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the quarter ended December 31, 2006.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***Market for Common Stock*

In February 2005 the company's common stock began trading on the NASDAQ® Stock Market, under the symbol EBTC. Prior to this date there had been no established public trading market for the company's common stock. Although periodically there had been private trades of the company's common stock, prior to its trading on the NASDAQ Stock Market, the company cannot state with certainty the sales price at which such transactions occurred. The following table sets forth sales volume and price information, to the best of management's knowledge, for the common stock of the company for the periods indicated.

On June 30, 2006, the company issued 3,842,015 shares in a two-for-one stock split paid in the form of a stock dividend. All share and per share amounts have been retroactively adjusted to reflect the stock dividend for all periods presented.

Fiscal Year	Trading Volume	Share Price High	Share Price Low
2006:			
4th Quarter	114,460	\$ 16.99	\$ 15.25
3rd Quarter	68,485	21.00	15.10
2nd Quarter	97,886	17.82	15.10
1st Quarter	119,230	17.31	15.26
2005:			
4th Quarter	122,914	\$ 16.00	\$ 13.58
3rd Quarter	107,150	15.05	14.00
2nd Quarter	137,206	15.75	13.48
1st Quarter	195,850	25.20	13.50

As of March 5, 2007, there were 731 registered shareholders of the company's common stock and 7,767,580 shares of the company's common stock outstanding.

Dividends

In 2006, the company began paying quarterly dividends. Quarterly dividends of \$0.07 per share were paid in March, June, September and December. Total 2006 quarterly dividends represent an increase of 17% compared to the annual dividend of \$0.24 paid in 2005.

The company maintains a dividend reinvestment plan (the "DRP"). The DRP enables stockholders, at their discretion, to elect to reinvest dividends paid on their shares of the company's common stock by purchasing additional shares of common stock from the company at a purchase price equal to fair market value. Shareholders utilized the DRP to reinvest \$944 thousand, of the \$2.1 million total quarterly dividends paid by the company in 2006, into 58,623 shares of the company's common stock.

On January 16, 2007, the company announced a quarterly dividend of \$0.08, paid on March 1, 2007 to shareholders of record as of February 8, 2007. On an annualized basis, this quarterly dividend represents a 14% increase over the 2006 dividend rate.

As the principal asset of the company, the bank currently provides the only source of cash for the payment of dividends by the company. Under Massachusetts law, trust companies such as the bank may pay dividends only out of net profits and only to the extent that such payments will not impair the bank's capital stock. Any dividend payment that would exceed the total of the bank's net profits for the current year plus its retained net profits of the preceding two years would require the Commissioner's approval. FDICIA also prohibits a bank from paying any dividends on its capital stock if the bank is in default on the payment of any assessment to the FDIC or if the payment of dividends would otherwise cause the bank to become undercapitalized. These restrictions on the ability of the bank to pay dividends to the company may restrict the ability of the company to pay dividends to the holders of its common stock.

The statutory term net profits essentially equates with the accounting term net income and is defined under the Massachusetts banking statutes to mean the remainder of all earnings from current operations plus actual recoveries on loans and investments and other assets after deducting from such total all current operating expenses, actual losses, accrued dividends on any preferred stock and all federal and state taxes.

Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of December 31, 2006 with respect to the company's 1988 Stock Option Plan, Amended and Restated 1998 Stock Incentive Plan and 2003 Stock Incentive Plan, as amended, which together constitute all of the company's existing equity compensation plans that have been previously approved by the company's stockholders. The company does not have any existing equity compensation plans, including any existing individual equity compensation arrangements, which have not been previously approved by the company's stockholders.

Plan Category	Number of Securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of Securities remaining available for future issuance under equity compensation plans (excluding securities reflected in second column from left)
Equity compensation plans approved by security holders	675,450	\$ 12.80	448,618
Equity compensation plans not approved by security holders	-0-	-0-	-0-
TOTAL	675,450	\$ 12.80	448,618

Performance Graph

The following graph compares the cumulative total return (which assumes the reinvestment of all dividends) on the company's common stock with the cumulative total return reflected by a broad based equity market index and an appropriate published industry index. This graph shows the changes over the five-year period ended on December 31, 2006 in the value of \$100 invested in (i) the company's common stock, (ii) the Standard & Poors 500 Index and (iii) the NASDAQ Bank Index. As of February 14, 2005, the company's shares began trading on the NASDAQ National Market (now the Nasdaq Global Market) under the trading symbol "EBTC". Prior to February 14, 2005, there was no active trading market for the company's common stock, although shares were traded periodically on a privately negotiated basis. For each year prior to 2005 shown on the graph, the increase in the value of the company's common stock is based on the actual prices known to the company at which shares of the common stock were traded as of the most recent date prior to December 31 of each of these earlier periods. For purposes of the graph, the reinvestment of dividends paid prior to 2005 is based upon the annual valuation analysis of the company's common stock that was formerly undertaken in the years prior to the company's listing on the NASDAQ National Market pursuant to the company's administration of its dividend reinvestment plan.

	2001	2002	2003	2004	2005	2006
Enterprise Bancorp	\$ 100.00	\$ 117.89	\$ 141.46	\$ 173.74	\$ 174.36	\$ 183.67
S&P 500	\$ 100.00	\$ 77.90	\$ 100.24	\$ 111.15	\$ 116.61	\$ 135.02
NASDAQ Bank	\$ 100.00	\$ 106.95	\$ 142.29	\$ 161.73	\$ 158.61	\$ 180.53

Sales of Unregistered Securities and Repurchases of Shares

The company has not sold any equity securities that were not registered under the Securities Exchange Act of 1934 during the year ended December 31, 2006. Neither the company nor any affiliated purchaser (as defined in the SEC's Rule 10b-18(a) (3)) has repurchased any of the company's outstanding shares, nor caused any such shares to be repurchased on its behalf, during the fiscal quarter ended December 31, 2006.

Item 6. Selected Financial Data

(Dollars in thousands, except per share data)	Year Ended December 31,					
	2006	2005	2004	2003	2002	
EARNINGS DATA						
Net interest income	\$ 41,560	\$ 38,102	\$ 32,120	\$ 28,352	\$ 28,055	
Provision for loan losses	1,259	1,135	1,650	1,075	1,325	
Net interest income after provision for loan losses	40,301	36,967	30,470	27,277	26,730	
Non-interest income	7,020	6,244	6,071	6,580	5,577	
Net gains (losses) on sales of investment securities	(204)	191	906	2,150	1,341	
Non-interest expense	32,540	30,235	25,687	23,342	24,947

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis should be read in conjunction with the company's consolidated financial statements and notes thereto, contained in Item 8, the information contained in the description of the company's business in Item 1 and other financial and statistical information contained in this annual report.

Special Note Regarding Forward-Looking Statements

This report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements concerning plans, objectives, future events or performance and assumptions and other statements that are other than statements of historical fact. Forward-looking statements may be identified by reference to a future period or periods or by use of forward-looking terminology such as anticipates, believes, expects, intends, may, plans, pursue, views and similar terms or expressions. Various statements contained in Item 1 Business, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 7A

Quantitative and Qualitative Disclosures About Market Risk, including, but not limited to, statements related to management's views on the banking environment and the economy, competition and market expansion opportunities, the interest rate environment, credit risk and the level of future non-performing assets and charge-offs, potential asset and deposit growth, future non-interest expenditures and non-interest income growth, and borrowing capacity are forward-looking statements. The company wishes to caution readers that such forward-looking statements reflect numerous assumptions and involve a number of risks and uncertainties that may adversely affect the company's future results. The following important factors, among others, could cause the company's results for subsequent periods to differ materially from those expressed in any forward-looking statement made herein: (i) changes in interest rates could negatively impact net interest income; (ii) changes in the business cycle and downturns in the local, regional or national economies, including deterioration in the local real estate market, could negatively impact credit and/or asset quality and result in credit losses and increases in the company's reserve for loan losses; (iii) changes in consumer spending could negatively impact the company's credit quality and financial results; (iv) increasing competition from larger regional and out-of-state banking organizations as well as non-bank providers of various financial services could adversely affect the company's competitive position within its market area and reduce demand for the company's products and services; (v) deterioration of securities markets could adversely affect the value or credit quality of the company's assets and the availability of funding sources necessary to meet the company's liquidity needs; (vi) changes in technology could adversely impact the company's operations and increase technology-related expenditures; (vii) increases in employee compensation and benefit expenses could adversely affect the company's financial results; (viii) changes in laws and regulations that apply to the company's business and operations could increase the company's regulatory compliance costs and adversely affect the company's business environment, operations and financial results; and (ix) changes in accounting standards, policies and practices, as may be adopted or established by the regulatory agencies, the Financial Accounting Standards Board or the Public Company Accounting Oversight Board could negatively impact the company's financial results. Therefore, the company cautions readers not to place undue reliance on any such forward-looking information and statements.

Critical Accounting Estimates

The company's significant accounting policies are described in note 1, Summary of Significant Accounting Policies, to the consolidated financial statements contained in Item 8. In applying these accounting policies, management is required to exercise judgment in determining many of the methodologies, assumptions and estimates to be utilized. Certain of the critical accounting estimates are more dependent on such judgment and in some cases may contribute to volatility in the company's reported financial performance should the assumptions and estimates used change over time due to changes in circumstances. The two most significant areas in which management applies critical assumptions and estimates include the areas described further below.

Allowance for Loan Losses

The allowance for loan losses is an estimate of credit losses inherent in the loan portfolio. The company's allowance is accounted for in accordance with SFAS No. 114, as amended by SFAS No. 118, Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosures, and SFAS No. 5, Accounting for Contingencies. The allowance for loan losses is established through a provision for loan losses, a direct charge to earnings. Loan losses are charged against the allowance when management believes that the collectability of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance. The company maintains the allowance at a level that it deems adequate to absorb all reasonably anticipated losses from specifically known and other credit risks associated with the portfolio.

The company uses a systematic process to measure the amount of estimated loan loss exposure inherent in the portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology relies on a combination of qualitative and quantitative factors, including loan reviews of large and higher risk credits, industry concentrations, results of regulatory examinations, historical charge-off and recovery experience, the growth, composition and size of the loan portfolio, trends in delinquencies and non-performing loans, the strength of the local and national economy, interest rates and other changes in the portfolio.

The foundation of the process is an ongoing internal credit rating and review system conducted by the company's credit department, which takes into consideration the borrower's financial condition, the borrower's performance with respect to loan terms and the adequacy of collateral. In addition, the company contracts annually with an external loan review firm to review commercial loans on a semi-annual basis. Loans which are evaluated to be of weaker credit quality are considered classified and are reviewed on a more regular basis by management.

The company accounts for impaired loans in accordance with the terms of SFAS 114. Individual commercial loans deemed to be impaired are analyzed for loss exposure using one of the acceptable methods prescribed in the accounting standard, while portfolios of more homogenous populations of loans, such as residential mortgages and consumer loans, are analyzed at a group level.

On a quarterly basis the company prepares an estimate of the necessary reserves. Except for loans specifically identified as impaired, the estimate is a two-tiered approach that allocates loan loss reserves to classified loans by credit rating and to non-classified loans by credit type. The general loss allocations take into account the quantitative and qualitative factors identified above.

The adequacy of the allowance for loan losses is reviewed and evaluated on a regular basis by an internal management committee, a sub-committee of the board of directors and the full board itself.

Management believes that the allowance for loan losses is adequate to absorb reasonably anticipated losses from specifically known and other credit risks associated with the loan portfolio as of the balance sheet dates. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the company's allowance for loan losses. Such agencies may require the company to recognize additions to the allowance based on judgments different from those of management.

Managements assessment of the adequacy of the allowance for loan losses is contained under the headings Risk Elements/Asset Quality and Allowance for Loan Losses, which are contained in the Financial Condition section of this Item 7.

Impairment Review of Goodwill and Other Intangible Assets

In accordance with generally accepted accounting principles, the company does not amortize goodwill and instead, at least annually, evaluates whether the carrying value of goodwill has become impaired. Impairment of the goodwill occurs when the estimated fair value of the company is less than its recorded value. A determination that goodwill has become impaired results in immediate write-down of goodwill to its determined value with a resulting charge to operations.

The annual impairment test is a two-step process used to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized, if any. The first step of the goodwill impairment test, used to identify potential impairment, compares the fair value of the reporting unit (in this case, the company) with its carrying amount, or the book value of the reporting unit, including goodwill. If the fair value of the reporting unit equals or exceeds its book value, goodwill is considered not impaired, and the second step of the impairment test is unnecessary. The second step, if necessary, measures the amount of goodwill impairment loss to be recognized. The reporting unit must determine fair values for all assets and liabilities, excluding goodwill. The net of the assigned fair value of assets and liabilities is then compared to the book value of the reporting unit, and any excess book value becomes the implied fair value of goodwill. If the carrying amount of the goodwill exceeds the newly calculated implied fair value of that goodwill, an impairment loss is recognized in the amount required to write down the goodwill to the implied fair value.

The company's consolidated financial statements also include intangible assets (core deposit intangibles), which are amortized to expense over their estimated useful life of ten years and reviewed for impairment on an ongoing basis or whenever events or changes in business circumstances warrant a review of the carrying value. If impairment is determined to exist, the related write-down of the intangible asset's carrying value is charged to operations.

Based on these impairment reviews the company determined that goodwill and core deposit intangible assets were not impaired at December 31, 2006.

Overview

The current interest rate environment and the highly competitive marketplace continue to present a growth and earnings challenge for the banking industry. This environment has contributed to slower loan and deposit growth for the company and continued pressure on the company's net interest margin from rising funding costs. Despite these economic and industry issues, the company reported net income growth of 10% and 9% for the December 31, 2006 year-to-date and quarter-to-date results, respectively.

Composition of Earnings

The company had net income of \$9.234 million for the year ended December 31, 2006 compared to \$8.414 million during the year ended December 31, 2005, an increase of 10%. Diluted earnings per share were \$1.18 for the current year compared to \$1.09 for 2005, an increase of 8%. All prior period per-share amounts have been adjusted to reflect the two-for-one stock split paid on June 30, 2006 in the form of a stock dividend.

Net income for the fourth quarter ended December 31, 2006 amounted to \$2.545 million compared to \$2.329 million for the same period in 2005, an increase of 9%. Diluted earnings per share were \$0.32 for the quarter ended December 31, 2006 compared to \$0.30 for the same period in 2005, an increase of 7%.

The company's earnings are largely dependent on its net interest income, which is the difference between interest income on loans and investments and interest expense on deposits and borrowings. The re-pricing frequency of these assets and liabilities are not identical, and therefore subject the company to the risk of adverse changes in interest rates. This is often referred to as interest rate risk and is reviewed in more detail in Item 7A, Quantitative and Qualitative Disclosures About Market Risk.

The company's net income growth continues to result primarily from increases in net interest income, partially offset by increases in non-interest expense. Net interest income for the year ended December 31, 2006 amounted to \$41.6 million compared to \$38.1 million for the same period in 2005, an increase of 9%. The primary driver of net interest income growth over the period was loan growth, which increased 9% since December 31, 2005. Net interest margin, the spread earned between interest-earning assets and the company's funding sources, primarily deposits, was 4.78% for the year ended December 31, 2006 compared to 4.82% for the same period in 2005. From a quarterly perspective, the margin was 4.74% for the three months ended December 31, 2006 compared to 4.76% and 4.90% for the three month periods ended September 30, 2006 and December 31, 2005, respectively. The decrease in margin reflects both the flat yield curve and the highly-competitive marketplace currently in existence.

Non-interest expense amounted to \$32.5 million for the year ended December 31, 2006 compared to \$30.2 million for the same period in 2005, an increase of 8%, and reflected the strategic and operational costs necessary to support the company's continued growth.

Increases were predominantly in salary and benefits, occupancy costs and advertising and public relations, partially offset by a reduction in performance-based incentive compensation.

The year-end results also include non-interest income of \$6.8 million, an increase of \$381 thousand or 6% over the prior year. The growth resulted primarily from an increase of 18% in investment advisory fees and a full year of bank-owned life insurance income. The increase in non-interest income was partially offset by a reduction in net gains (losses) on sales of investment securities, which amounted to net losses of \$204 thousand for the year ended 2006 compared to net gains of \$191 thousand for the same period in 2005.

The provision for loan losses, which is impacted by asset quality and loan growth, amounted to \$1.259 million for the year ended December 31, 2006 compared to \$1.135 million in the prior year end. Asset quality remained favorable during the year with net charge-offs of 0.05% of average total loans or \$369 thousand. The allowance for loan losses to total loans ratio was 1.70% at December 31, 2006 compared to 1.72% at December 31, 2005.

Sources and Uses of Funds

The company's primary sources of funds are deposits, brokered certificates of deposit, FHLB borrowings, repurchase agreements, current earnings and proceeds from the sales, maturities and paydowns on loans and investment securities. The company uses funds to originate loans, purchase investment securities, conduct operations, expand the branch network, and pay dividends to shareholders.

Total assets amounted to \$979.3 million at December 31, 2006, an increase of 7% since December 31, 2005. The company's core asset strategy is to grow loans, primarily commercial loans. Total loans increased 9% since December 31, 2005 compared to 23% for the same period in 2005 and amounted to \$761.1 million, or 78% of total assets. Commercial loans amounted to \$647.6 million, or 85% of total loans.

The investment portfolio is the other key component of the company's earning assets and is primarily used to invest excess funds, provide liquidity and to manage the company's asset-liability position. Total investments amounted to \$131.5 million at December 31, 2006, or 13% of total assets. The portfolio has declined 16% since December 31, 2005 as investment portfolio cash flow (proceeds from sales, maturities, calls and principal paydowns) has been utilized to fund loan growth.

From a funding perspective, management's strategy is to grow low cost deposits (primarily checking accounts). Prior to the fourth quarter of 2005, the company's funding needs were met primarily through internally generated low cost and higher costing commercial and retail deposits (certificates of deposit, money market and savings products) and investment portfolio cash flow. In the fourth quarter of 2005, a combination of strong commercial loan growth and slower deposit growth, resulted in the company increasing its use of external funding sources, primarily brokered deposits and FHLB borrowings.

At December 31, 2006, total deposits, which included brokered CDs, amounted to \$867.5 million, representing 12% growth over December 31, 2005. Total deposits, excluding brokered CDs, amounted to \$802.6 million at December 31, 2006, representing growth of \$37.2 million, or 5% over December 31, 2005, compared to a reduction of \$3.2 million, or 0.4%, for 2005 over 2004. The company utilized non-brokered deposits along with brokered deposits, repurchase agreements, FHLB borrowings, and investment portfolio cash flow to fund loan growth of \$61.4 million in 2006.

At December 31, 2006, the company had \$64.9 million in brokered term deposits (brokered CDs) and \$10.3 million in FHLB borrowings compared to \$10.0 million in brokered CDs and \$57.9 million in FHLB borrowings at December 31, 2005.

Opportunities and Risks

Management recognizes that substantial competition exists in the marketplace and views this as a key business risk. Market competition includes the expanded commercial lending capabilities of credit unions, the shift to commercial lending by traditional savings banks, the presence of large regional and national commercial banks, as well as the products offered by non-bank financial service competitors.

Despite these challenges, the company has been successful in growing its commercial loan portfolio. Management believes this growth is the result of ongoing business development efforts and continued market expansion within existing and into new markets. The company has fourteen branch locations and continues to look for market and branch opportunities that will increase long-term franchise value and shareholder returns. Such expansion typically increases the company's operating expenses, primarily in salary and benefits, marketing, and occupancy, before the growth benefits are fully realized in those markets.

In addition to growth and competition, the company's significant challenges continue to be the effective management of credit, interest rate and operational risk.

Credit risk management is reviewed below in the Financial Condition section of this Item 7 under the headings Risk Elements/Asset Quality and Allowance for Loan Losses.

Interest rate risk management is reviewed under Item 7A, Quantitative and Qualitative Disclosures About Market Risk.

Operational risk management is also a key component of the company's risk management process, particularly as it relates to technology administration, information security, and business continuity.

Management utilizes a combination of third party security assessments, key technologies and ongoing internal evaluations in order to continually monitor and safeguard information on its operating systems and that of third party service providers. The company contracts with outside parties to perform a broad scope of both internal and external security assessments on a regular basis. These third parties test the company's security controls and network configuration, and assess internal practices and other key items. In addition, the company contracts with an outside service provider to monitor usage patterns and identify unusual activity on bank issued debit/ATM cards. The company also utilizes firewall technology and an intrusion detection system to protect against unauthorized access and commercial software that continuously scans for computer viruses on the company's information systems.

The company maintains an Information Security and Technology Practices policy applicable to all employees. The policy outlines the employee's responsibilities and key components of the company's Information Security and Technology Practices Program, which include the following: identification and assessment of risk; institution of policies and procedures to manage and control the risk; risk assessment of outsourced service providers; development of strategic security contingency plans; training of all officers and employees; and reporting to the Board of Directors. Significant technology issues, related changes in risk and results of third party security assessments are reported to the Board's Banking Technology and Audit Committees. The Board, through these committees, reviews the status of the Information Security and Technology Practices Program and makes adjustments to the policy as deemed necessary.

The company has a Business Continuity Plan that consists of the information and procedures required to enable rapid recovery from an occurrence that would disable the company for an extended period. The plan establishes responsibility for assessing a disruption of business, contains alternative strategies for the continuance of critical business functions, assigns responsibility for restoring services, and sets priorities by which critical services will be restored.

See Item 1A, Risk Factors for additional factors that could adversely affect the company's future results of operations.

Financial Condition

Total assets increased \$60.8 million, or 7%, over the prior year, to \$979.3 million at December 31, 2006. The increase was primarily attributable to an increase in total loans of \$61.4 million, or 9% and consisted primarily of commercial real estate growth. Total investments (investment securities and total short-term investments) decreased by \$15.1 million, or 9%. Premises and equipment, BOLI, prepaid expenses and other assets increased by \$12.4 million.

The company's outstanding funding obligations increased \$48.6 million at December 31, 2006 compared to December 31, 2005 and consisted of \$867.5 million in deposits including \$64.9 million in brokered certificates of deposits, \$15.1 million in borrowed funds and \$10.8 million in junior subordinated debentures. The increase in funding was used to fund loan growth.

Loans

Total loans were \$761.1 million, or 78% of total assets, at December 31, 2006, compared with \$699.7 million, or 76% of total assets, at December 31, 2005. The company attributes the \$61.4 million or 9%, increase in loans outstanding to its seasoned lending team, the company's sales and service culture and geographic expansion.

The following table sets forth the loan balances by certain loan categories at the dates indicated and the percentage of each category to gross loans.

(Dollars in thousands)	December 31, 2006		2005		2004		2003		2002

The following table sets forth the scheduled maturities of commercial real estate, commercial & industrial and commercial construction loans in the company's portfolio at December 31, 2006. The table also sets forth the dollar amount of loans which are scheduled to mature after one year which have fixed or adjustable rates.

(Dollars in thousands)	Commercial real estate	Commercial & industrial	Commercial construction
Amounts due:			
One year or less	\$ 25,331	\$ 86,669	\$ 77,556
After one year through five years	16,527	44,468	21,745
Beyond five years	326,763	33,728	14,777
	\$ 368,621	\$ 164,865	\$ 114,078
Interest rate terms on amounts due after one year:			
Fixed	\$ 26,470	\$ 31,897	\$ 11,073
Adjustable	316,820	46,299	25,449

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

Scheduled contractual maturities may not reflect the actual maturities of loans. The average maturity of loans may be shorter than their contractual terms principally due to prepayments.

The company's primary lending focus is on the development of high quality commercial real estate, commercial construction and commercial and industrial lending relationships with business entities, non-profit organizations, professionals and individuals.

29

During 2006, commercial real estate loans increased \$41.7 million, or 13%. Commercial real estate loans are typically secured by apartment buildings, office or mixed-use facilities, strip shopping malls or other commercial property. Commercial and industrial loans decreased by \$1.1 million, or 1%. These loans include seasonal revolving lines of credit, working capital loans, equipment financing (including equipment leases), term loans, and revolving lines of credit. Also included in commercial and industrial loans are loans under various U.S. Small Business Administration programs. Commercial construction loans increased \$6.0 million, or 6%. Commercial construction loans include the development of residential housing and condominium projects, the development of commercial and industrial use property and loans for the purchase and improvement of raw land.

Residential real estate loans, residential construction and home equity mortgages combined, increased by \$14.4 million, or 15%, and consumer loans increased \$321 thousand or 8% since December 31, 2005.

At December 31, 2006 the company had commercial loan balances participated out to various banks amounting to \$8.2 million, compared to \$9.0 million at December 31, 2005. These balances participated out to other institutions are not carried as assets on the company's financial statements. Loans originated by other banks in which the company is the participating institution are carried at the company's prorata share of ownership and amounted to \$18.3 million and \$18.8 million at December 31, 2006 and 2005, respectively.

Risk Elements/Asset Quality

Inherent in the lending process is the risk of loss. Commercial lending may entail significant additional risks compared to residential mortgage lending. Loan size is typically larger and payment expectations on such loans can be more easily influenced by adverse conditions in the real estate market or in the economy in general. Commercial construction financing involves a higher degree of risk than long term financing on existing occupied real estate. An underestimation of the actual costs necessary to complete the project would require the company to advance funds beyond the original commitment in order to finish the development. If projected cash flows to be derived from the loan collateral or the values of the collateral prove to be inaccurate, for example because of unprojected additional costs or slow unit sales, the collateral may have a value that is insufficient to ensure full repayment. While the company endeavors to minimize this risk, management recognizes that loan losses will occur and that the amount of these losses will fluctuate depending on the risk characteristics of the loan portfolio.

The company's credit risk management function focuses on a wide variety of factors, including, among others, current and expected economic conditions, the real estate market, the financial condition of borrowers, the ability of borrowers to adapt to changing conditions or circumstances affecting their business and the continuity of borrowers' management teams.

Management regularly monitors these factors, as well as levels of non-accrual loans, levels of charge-offs and recoveries, peer results, levels and composition of outstanding loans and known and inherent risks in the loan portfolio, through ongoing credit reviews by the credit department, an external loan review service, reviews by members of senior management and the Loan Committee of the Board of Directors and the full Board of Directors.

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans is discontinued when a loan becomes contractually past due, with respect to interest or principal, by ninety days for real estate loans and generally sixty days for all other loans, or when reasonable doubt exists as to the full and timely collection of interest or principal. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest accruals are resumed on such loans only when payments are brought current and when, in the judgment of management, the collectability of both principal and interest is reasonably assured. Interest payments received on loans in a non-accrual status are generally applied to principal.

Impaired loans are individually significant loans for which management considers it probable that not all amounts due in accordance with original contractual terms will be collected. Impaired loans are accounted for, except those loans that are accounted for at the lower of cost or fair value, at the present value of the expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, in the case of collateral dependent loans, the lower of the fair value of the collateral or the recorded amount of the loans.

Impaired loans exclude large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment, loans that are measured at fair value and leases as defined in SFAS No. 114.

Management considers the payment status, net worth and earnings potential of the borrower, and the value and cash flow of the collateral as factors to determine if a loan will be paid in accordance with its contractual terms. Management does not set any minimum delay of payments as a factor in reviewing for impaired classification. Impaired loans are charged off when management believes that the collectability of the loan's principal is remote.

Restructured loans are those where interest rates and/or principal payments have been restructured to defer or reduce payments as a result of financial difficulties of the borrower. Restructured loans are generally included in the impaired loan category.

The company uses an asset classification system, which classifies loans depending on risk of loss characteristics. The classifications range from substantially risk free for the highest quality loans and loans that are secured by cash collateral, to the most severe classifications of substandard, doubtful and loss based on criteria established under banking regulations. Loans classified as substandard include those characterized by the distinct possibility that the bank will sustain some loss if the deficiencies are not corrected. Loans classified as doubtful have all the weaknesses inherent in a substandard rated loan with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Loans classified as loss are generally considered uncollectible at present, although long term recovery of part or all of loan proceeds may be possible. These loss loans would require a specific loss reserve or charge-off.

Despite prudent loan underwriting, adverse changes within the bank's market area, or deterioration in local, regional or national economic conditions, could negatively impact the company's level of non-performing assets in the future.

Overall, asset quality at December 31, 2006 remained relatively consistent with the prior year and non-performing assets are considered to be at low levels.

The following table sets forth information regarding non-performing assets, restructured loans and delinquent loans 30-89 days past due as to interest or principal, held by the company at the dates indicated:

(Dollars in thousands)	December 31,					
	2006	2005	2004	2003	2002	
Non-accrual loans	\$ 1,785	\$ 1,475	\$ 2,140	\$ 2,983	\$ 1,915	
Accruing loans > 90 days past due	7	1			2	
Total non-performing loans	1,792	1,476	2,140	2,983	1,917	
Other real estate owned						
Total non-performing assets	\$ 1,792	\$ 1,476	\$ 2,140	\$ 2,983	\$ 1,917	
Accruing restructured loans not included above	\$ 128	\$ 82	\$ 26	\$ 2,370	\$ 2,086	
Delinquent loans 30-89 days past due	5,715	963	4,325	2,510	1,287	
Non-performing loans to total loans	0.24	% 0.21	% 0.38	% 0.61	% 0.46	%
Non-performing assets to total assets	0.18	% 0.16	% 0.25	% 0.40	% 0.26	%
Loans 30-89 days past due to total loans	0.75	% 0.14	% 0.76	% 0.51	% 0.31	%

Non-performing assets were \$1.8 million at December 31, 2006, compared to \$1.5 million at December 31, 2005, an increase of \$316 thousand, or 21%. The ratio of non-performing loans as a percentage of total loans outstanding increased to 0.24% from 0.21% as of those same dates.

The majority of impaired loans are included within the non-accrual balances; however, not every loan in non-accrual status has been designated as impaired. Total impaired loans were \$1.8 million and \$1.5 million at December 31, 2006 and 2005, respectively. Impaired loans included in non-accrual loans were \$1.7 million and \$1.4 million as of December 31, 2006 and 2005, respectively.

There were no other real estate owned balances during the years ended December 31, 2006 or 2005.

Total restructured loans outstanding as of December 31, 2006 and 2005 were \$653 thousand and \$211 thousand, respectively. Restructured loans included in non-performing assets amounted to \$525 thousand and \$129 thousand at December 31, 2006 and 2005, respectively. Accruing restructured loans as of December 31, 2006 and 2005 were \$128 thousand and \$82 thousand, respectively.

The ratio of delinquent loans 30-89 days past due as a percentage of total loans increased to 0.75% at December 31, 2006, from 0.14% at December 31, 2005. The ratio of delinquent loans to total loans will fluctuate due to the timing of customer payments, generally the largest concentration of these loans fall into the 30 - 40 day past due category, as was the case at December 31, 2006. Short-term fluctuations are not uncommon within this category and the increase is not considered significant.

At December 31, 2006, the company classified \$6.7 million and \$0 as substandard and doubtful loans, respectively. Included in the substandard category is \$1.4 million in non-performing loans. The remaining balance of substandard loans is performing but possesses potential weaknesses and, as a result, could become non-performing loans in the future.

The classification of a loan or other asset as non-performing does not necessarily indicate that loan principal and interest will be ultimately uncollectible. However, management recognizes the greater risk characteristics of these assets and therefore considers the potential risk of loss on assets included in this category in evaluating the adequacy of the allowance for loan losses.

Allowance for Loan Losses

The allowance for loan losses is an estimate of credit risk inherent in the loan portfolio. The allowance for loan losses is established through a provision for loan losses, a direct charge to earnings. Loan losses are charged against the allowance when management believes that the collectability of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance. The company maintains the allowance at a level that it deems adequate to absorb all reasonably anticipated losses from specifically known and other credit risks associated with the portfolio. The credit risk of the portfolio depends on a wide variety of factors.

In making its assessment on the adequacy of the allowance, management considers several quantitative and qualitative factors that could have an effect on the credit quality of the portfolio, including the level of non-performing loans, net charge-offs, loan growth, expansion in geographic market area, economic trends and comparison to industry peers, among other factors.

The allowance for loan loss to total loans ratio of 2.26% at December 31, 2002 reflected an increase in the provisions for loan losses made after 9/11, which increased the ratio from 1.99% at December 31, 2001. The increase resulted from expected economic weakness and anticipated credit quality deterioration. However, in the ensuing periods credit quality remained stable and beginning in 2003 it began to improve measurably. Consequently, the loan loss reserve ratio declined beginning in 2003.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The following table summarizes the activity in the allowance for loan losses for the periods indicated:

(Dollars in thousands)	Years Ended December 31,					
	2006	2005	2004	2003	2002

Resid: mortg.cnstr and HELOC s	925	14.5 %	817	13.7 %	699	15.1 %	529	16.0 %	838	19.8 %
Consumer	112	0.6 %	102	0.6 %	69	0.7 %	52	0.9 %	85	1.2 %
Unallocated	49		325							
Total	\$ 12,940	100.0 %	\$ 12,050	100.0 %	\$ 10,923	100.0 %	\$ 9,986	100.0 %	\$ 9,371	100.0 %

The allocation of the allowance for loan losses above reflects management's judgment of the relative risks of the various categories of the company's loan portfolio. This allocation should not be considered an indication of the future amounts or types of possible loan charge-offs.

The allowance for loan loss to total loans ratio was 1.70% at December 31, 2006 and was consistent with the December 31, 2005 result of 1.72%. There were no significant changes in credit quality, the company's underwriting, or the allowance assessment methodology.

Based on the foregoing, as well as management's judgment as to the risks inherent in the loan portfolio, the company's allowance for loan losses is deemed adequate to absorb reasonably anticipated losses from specifically known and other credit risks associated with the portfolio as of December 31, 2006.

Short-Term Investments

As of December 31, 2006, total short-term investments amounted to \$15.3 million, or 1.6% of total assets, compared to \$5.4 million, or 0.6% of total assets, at December 31, 2005. Short-term investments carried as cash equivalents at December 31, 2006 and 2005 consisted of overnight and term federal funds sold and money market mutual funds. From time to time, the company may invest in auction rate preferred securities with redemption options (auction dates) every forty-nine days, but which cannot readily be converted to cash at par value until the next successful auction. These investments are not cash equivalents and would be classified as other short-term investments. The company had no other short-term investments at December 31, 2006 or 2005.

Investment Securities

At December 31, 2006 and 2005, all investment securities (other than FHLB stock) were classified as available for sale and were carried at fair market value. At December 31, 2006, the investment portfolio represented 13% of total assets.

The following table summarizes the fair market value of investments at the dates indicated:

(Dollars in thousands)	December 31,		
	2006	2005	2004
Federal agency obligations(1)	\$ 10,405	\$ 15,202	\$ 29,206
Collateralized mortgage obligations and other Mortgage backed securities (CMO/MBS)	61,431	77,143	98,890
Municipal securities	48,762	54,915	55,578
Fixed income securities	120,598	147,260	183,674
Certificates of deposit	1,033	1,000	1,000
Federal Home Loan Bank stock(2)	1,428	3,205	1,340
Equity securities	8,481	5,056	1,587
Total investments	\$ 131,540	\$ 156,521	\$ 187,601

(1) Federal agency obligations include securities issued by government-sponsored enterprises such as Fannie Mae, Freddie Mac, and the FHLB. These securities do not represent obligations of the U.S. government and are not backed by the full faith and credit of the United States Treasury.

(2) The bank is required to purchase FHLB stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost.

The net unrealized gain or loss in the company's fixed income portfolio fluctuates as interest rates rise and fall. Due to the fixed rate nature of this portfolio, as rates rise the value of the portfolio declines, and as rates fall the value of the portfolio rises. The unrealized gains on fixed income investments will also decline as the securities approach maturity. The net unrealized gain or loss on equity securities will change based on changes in the market value of the individual securities and mutual funds in the portfolio. The unrealized gain or loss will only be realized if the securities are sold.

As of December 31, 2006, the net unrealized losses in the investment portfolio were \$163 thousand compared to the net unrealized losses of \$1.1 million at December 31, 2005. The change consists of a reduction in the net unrealized losses on fixed income securities of \$432 thousand and an increase in the net unrealized gains on equity securities of \$491 thousand. The change in the net unrealized losses on fixed income securities resulted from tighter market spreads in the CMO portfolio and from losses realized on the sales of securities in 2006. The increase in equity securities unrealized gains resulted from strong equity markets.

During 2006 the company recognized \$204 thousand in net losses on sales of \$19.9 million of securities. Included in the sales proceeds were approximately \$11 million in securities sold in December 2006 that resulted in losses of approximately \$300 thousand.

The securities sold in December were originally purchased during the low interest rate periods of 2003 and 2004. These securities had unrealized losses at September 30, 2006 and at that time management had the ability and intent to hold the securities until the unrealized losses reversed. However, during December 2006, management re-evaluated its intent to hold these particular securities and decided to sell based on the expectation of improving net interest income in subsequent reporting periods through reinvestment at higher yields or through paydowns of borrowed funds and brokered deposits.

At December 31, 2006, management had the intent and ability to hold the remaining \$1.7 million of unrealized losses in the fixed income portfolio until they reverse. The unrealized losses typically reverse as the securities approach maturity or as interest rates decline.

Principal paydowns, calls and maturities totaled \$20.1 million during the current period, and were primarily comprised of prepayments in the mortgage backed securities portfolio. The proceeds from the sales and paydowns were partially utilized to purchase \$14.3 million of investments, primarily U.S agency, municipals, mortgage backed securities and equities, with the remainder utilized to fund loan growth.

The contractual maturity distribution at amortized cost, as of December 31, 2006, of the fixed income securities above with the weighted average yield for each category is set forth below:

(Dollars in thousands)	Under 1 Year		>1 3 Years		>3 5 Years		>5 10 Years		Over 10 Years	
	Balance	Yield	Balance	Yield	Balance	Yield	Balance	Yield	Balance	Yield
Agency obligations	\$ 21	5.23	%\$ 6,419	4.43	%\$ 4,041	4.89	%\$		\$	
CMO/MBS	3	6.11	% 289	4.88	%		23,964	4.22	% 38,357	4.39 %
Municipals(1)	4,088	3.22	% 12,341	4.50	% 12,105	5.55	% 17,275	7.06	% 2,573	7.98 %
	\$ 4,112	3.23	%\$ 19,049	4.48	%\$ 16,146	5.38	%\$ 41,239	5.41	%\$ 40,930	4.62 %

(1) Municipal security yields and total yields are shown on a tax equivalent basis.

Scheduled contractual maturities may not reflect the actual maturities of the investments. CMO/MBS are shown at their final maturity. However, due to prepayments and amortization the actual CMO/MBS cash flows may be faster than presented above. Similarly, included in the agency and municipal categories are \$35.4 million in securities which can be called before maturity. Actual maturity of these callable securities could be shorter if market interest rates decline further. Management considers these factors when evaluating the net interest margin in the company's asset-liability management program.

Bank Owned Life Insurance (BOLI)

Beginning in 2005, the company purchased BOLI as an investment, utilizing the earnings on BOLI to offset the cost of the company's benefit plans. During 2006 and 2005, the company made net BOLI purchases of \$8.0, and \$1.9 million, respectively. Additionally, in 2005 approximately \$1.9 million in life insurance policies were assigned to the bank as part of a restructuring of executive supplemental retirement programs. The cash surrender value of BOLI was \$12.2 million and \$3.9 million at December 31, 2006 and 2005, respectively. The company recorded income from the BOLI policies, net of related expenses, of \$339 thousand in 2006 and \$87 thousand for 2005.

Further information regarding the company's retirement benefit plans, is contained in note 10 Employee Benefit Plans to the Consolidate Financial Statements, under the heading Supplemental Retirement Plan.

Deposits

The following table sets forth deposit balances by certain categories at the dates indicated and the percentage of each deposit category to total deposits.

(Dollars in thousands)	December 31, 2006		December 31, 2005		December 31, 2004	
	Amount	%	Amount	%	Amount	%
Demand deposits	\$ 169,910	19.6 %	\$ 173,804	22.4 %	\$ 172,949	22.5 %
Interest bearing checking	179,533	20.7 %	171,611	22.1 %	170,224	22.1 %
Total checking	349,443	40.3 %	345,415	44.5 %	343,173	44.6 %
Retail savings/money markets	141,202	16.3 %	151,969	19.6 %	172,748	22.5 %
Commercial savings/money markets	125,584	14.5 %	115,126	14.9 %	120,461	15.7 %
Total savings/money markets	266,786	30.8 %	267,095	34.5 %	293,209	38.2 %
Certificates of deposit	186,349	21.4 %	152,889	19.7 %	132,262	17.2 %
Total non brokered deposits	802,578	92.5 %	765,399	98.7 %	768,644	100.0 %
Brokered certificates of deposit	64,944	7.5 %	9,988	1.3 %		
Total deposits	\$ 867,522	100.0 %	\$ 775,387	100.0 %	\$ 768,644	100.0 %

Total deposits increased \$92.1 million, or 12%, to \$867.5 million at December 31, 2006, from \$775.4 million at December 31, 2005. Total deposits at December 31, 2004 were partially inflated by a \$32 million demand deposit received in late December 2004 and withdrawn in early January 2005. Excluding that deposit, growth was 5.3% at December 31, 2005 compared to December 31, 2004.

Total deposits as a percentage of total assets were 89% at December 31, 2006 compared to 84% at December 31, 2005.

Checking deposits increased \$4.0 million, or 1.0%, at December 31, 2006 compared to December 31, 2005 and accounted for 40% of total deposits at December 31, 2006. This was a decline compared to 45% of total deposits at December 31, 2005. The decline in concentration and slight increase in balances reflects current market conditions in which depositors are interest rate sensitive and are minimizing funds in lower cost checking products.

Savings and money market accounts decreased by \$309 thousand at December 31, 2006 compared to December 31, 2005. The decline was less than one percent and, like the change in checking deposits, reflects the current interest sensitivity of depositors seeking higher yields.

Higher cost certificates of deposit increased by \$88.4 million, or 54%, and reflects the trend of depositors shifting excess funds to higher yielding term products.

Included in the December 31, 2006 total deposit balance were \$64.9 million in brokered certificates of deposit compared to \$10.0 million at December 31, 2005. The company uses brokered certificates of deposit as an alternative to borrowing funds from the FHLB.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The table below sets forth a comparison of the company's average deposits and average rates paid for the periods indicated, as well as the percentage of each deposit category to total average deposits. The annualized average rate on total deposits reflects both interest bearing and non-interest bearing deposits.

(Dollars in thousands)	Year ended December 31, 2006			2005			2004		
	Average Balance	Average Rate	% of Deposits	Average Balance	Average Rate	% of Deposits	Average Balance	Average Rate	% of Deposits
Demand	\$ 165,957		19.9 %	\$ 163,429		21.4 %	\$ 143,441		20.2 %
Interest Chkg	159,009	0.80	% 19.0	167,178	0.53	% 21.9	153,085	0.30	% 21.6
Savings	167,353	2.05	% 20.0	176,143	1.37	% 23.1	156,483	1.13	% 22.0
Money market	109,783	2.25	% 13.1	115,422	1.41	% 15.2	121,513	1.24	% 17.1
	436,145	1.65	% 52.1	458,743	1.08	% 60.2	431,081	0.87	% 60.7
Certificates of Deposit	173,433	3.78	% 20.7	139,775	2.34	% 18.4	135,611	1.92	% 19.1
Brokered CDs	61,082	5.12	% 7.3	82	5.90	%			
Total	\$ 836,617	2.02	% 100.0	\$ 762,029	1.08	% 100.0	\$ 710,133	0.89	% 100.0

The increase in the average rate paid on total deposit accounts to 2.02% for 2006, from 1.08%, for 2005, resulted primarily from increasing yields on all categories of deposits attributable to increases in market interest rates during the period and from the increase use of brokered certificates of deposits as an alternative to FHLB borrowings.

Demand and interest checking accounts decreased 2% on an average balance basis and accounted for 39% of average total deposits. Management views the continued growth of low cost checking accounts as a key component of the company's business strategy.

Borrowed Funds

Total borrowed funds, consisting of securities sold to customers under agreements to repurchase (repurchase agreements) and FHLB borrowings, amounted to \$25.9 million at December 31, 2006, a decrease of \$43.5 million from December 31, 2005. The decrease resulted from the increased use of brokered certificates of deposits in lieu of FHLB borrowings during the year.

At December 31, 2006, outstanding FHLB advances amounted to \$10.3 million with a weighted average rate of 5.20%, compared to \$57.9 million with a weighted average rate of 4.17% at December 31, 2005.

The outstanding balance of FHLB borrowings at December 31, 2006 was composed of \$7.0 million in overnight advances, at a rate of 5.06%, \$2.8 million of short-term advances, maturing in less than 6 months at a rate of 5.43%, and \$470 thousand of longer-term advances maturing in 6.5 years, at a rate of 5.94%.

Maximum amounts outstanding at any month end during 2006, 2005, and 2004 were \$31.9 million, \$59.0 million and \$20.7 million respectively.

At December 31, 2006, the bank had the ability to borrow an additional \$63.1 million from the FHLB.

Repurchase agreements outstanding at December 31, 2006 were \$4.8 million, with a weighted average interest rate of 4.82% and original terms from one to six months. The outstanding balance under repurchase agreements at December 31, 2005 was \$706 thousand, with a weighted average rate of 1.90%.

Maximum amounts outstanding under repurchase agreements at any month end during 2006, 2005, and 2004 were \$6.7 million, \$6.4 million, and \$14.5 million, respectively.

The table below shows the comparison of the company's average repurchase agreements and FHLB advances and average rates paid for the periods indicated.

(Dollars in thousands)	Year ended December 31, 2006			2005			2004		
	Average Balance	Average Rate		Average Balance	Average Rate		Average Balance	Average Rate	
Repurchase agreements	\$ 2,325	4.41 %		\$ 2,823	2.59 %		\$ 2,867	1.62 %	
FHLB advances	17,100	4.71 %		19,250	3.85 %		5,018	1.71 %

Liquidity

Liquidity is the ability to meet cash needs arising from, among other things, fluctuations in loans, investments, deposits and borrowings. Liquidity management is the coordination of activities so that cash needs are anticipated and met readily and efficiently. Liquidity policies are set and monitored by the company's asset-liability committee. The company's liquidity is maintained by projecting cash needs, monitoring various liquidity ratios, monitoring deposit flows, maintaining liquidity within the investment portfolio and maintaining borrowing capacity.

The company's asset-liability management objectives are to maintain liquidity, provide and enhance access to a diverse and stable source of funds, provide competitively priced and attractive products to customers, conduct funding at a low cost relative to current market conditions and engage in sound balance sheet management strategies. Funds gathered are used to support current asset levels and to take advantage of selected leverage opportunities. The company's primary sources of funds are deposits, borrowed funds and stockholders' equity. In January 2007, the company pledged additional loans as collateral to the FHLB and increased its available borrowing capacity to \$125.1 million. See the discussion above under the heading "Borrowed Funds" regarding outstanding FHLB advances.

Management believes that the company has adequate liquidity to meet its commitments.

Capital Adequacy

The company is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possible additional discretionary, supervisory actions by regulators, which, if undertaken, could have a material adverse effect on the company's consolidated financial condition. At December 31, 2006 the capital levels of both the company and the bank complied with all applicable minimum capital requirements of the Federal Reserve Board and the FDIC, respectively, and both qualified as "well-capitalized" under applicable Federal Reserve Board and FDIC regulations.

For additional information regarding the capital requirements applicable to the company and the bank and their respective capital levels at December 31, 2006, see the section entitled "Capital Resources" contained in Item 1 "Business" and note 8, "Stockholders' Equity", to the consolidated financial statements contained in Item 8.

Contractual Obligations and Commitments

The company is required to make future cash payments under various contractual obligations. These obligations include the repayment of short and long-term borrowings and long-term subordinated debentures, payment of fixed-cash supplemental retirement benefits, payments under non-cancelable operating leases for various premises, and payments due under agreements to purchase goods and future services from a variety of vendors.

The company is also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans, commitments to sell loans, standby letters of credit and unadvanced loans and lines of credit. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheets. The contract amounts of these instruments reflect the extent of involvement the company has in the particular classes of financial instruments.

The following table summarizes the contractual cash obligations and commitments at December 31, 2006.

(Dollars in thousands)	Payments Due By Period				
	Total	With in 1 Year	>1 3 Years	>3 5 Years	After 5 Years
Contractual Cash Obligations:					
Repurchase agreements	4,835	4,835			
FHLB borrowings	\$ 10,270	\$ 9,800	\$	\$	\$ 470
Junior subordinated debentures	10,825				10,825
Supplemental retirement plans	5,516		279	520	4,717
Operating lease obligations	3,258	1,036	1,150	522	550
Vendor contracts	6,369	4,012	1,897	448	12
Total contractual obligations	\$ 41,073	\$ 19,683	\$ 3,326	\$ 1,490	\$ 16,574

(Dollars in thousands)	Commitment Expiration By Period				
	Total	With in 1 Year	>1 3 Years	>3 5 Years	After 5 Years
Other Commitments:					
Unadvanced loans and lines	\$ 247,210	\$ 165,687	\$ 26,521	\$ 8,165	\$ 46,837
Standby letters of credit	17,618	11,765	5,600	253

Investment Assets Under Management

The company provides a wide range of investment management services. These services include management of equity, fixed income, balanced and strategic cash management portfolios through the company's investment advisory group. The market value of each of these components is affected by fluctuation in the financial markets.

Also included in the investment assets under management total are commercial sweep accounts that are invested in third party money market mutual funds.

The following table sets forth the fair market value of investment assets under management by certain categories at the dates indicated.

(Dollars in thousands)	December 31,		
	2006	2005	2004
Investment advisory assets	\$ 401,269	\$ 346,322	\$ 315,320
Commercial sweep accounts	100,790	78,631	47,930
Investment assets under management	\$ 502,059	\$ 424,953	\$ 363,250

Investment assets under management increased by \$77.1 million, or 18%, from \$425.0 million at December 31, 2005 to \$502.1 million at December 31, 2006. The increase was due to an increase in investment management and trust assets of \$54.9 million and in commercial sweep accounts of \$22.2 million. The increase in investment management and trust assets was primarily due to growth from new business and general increases in investment market value due to higher market interest rates.

The commercial sweep account balance generally fluctuates in accordance with the cash needs of the bank's customers. At December 31, 2006 the balance amounted to \$100.8 million compared to \$78.6 million at December 31, 2005. The \$22.2 million increase over the prior year end resulted from sales growth and a migration from deposit balances due to customer sensitivity for higher earning products.

Results of Operations

Rate/Volume Analysis

The following table sets forth the extent to which changes in interest rates and changes in the average balances of interest-earning assets and interest-bearing liabilities have affected interest income and expense during the years ended December 31, 2006 and 2005. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (1) volume (change in average portfolio balance multiplied by prior year average rate); (2) interest rate (change in average interest rate multiplied by prior year average balance); and (3) rate and volume (the remaining difference).

(Dollars in thousands)	December 31, 2006 vs. 2005				2005 vs. 2004

(1) Average loans include non-accrual loans and are net of average deferred loan fees.

(2) Average balances are presented at average amortized cost and average yields are presented on a tax equivalent basis. The tax equivalent effect, which is not included in the interest amounts above, was \$962, \$1,038, and \$1,107 for the years ended December 31, 2006, 2005 and 2004, respectively.

(3) Investments include investment securities and total short-term investments.

(4) Certificates of deposit include brokered and non-brokered CDs.

COMPARISON OF YEARS ENDED DECEMBER 31, 2006 AND 2005

Unless otherwise indicated, the reported results are for the year ended December 31, 2006 with the comparable year or prior year being the year ended December 31, 2005.

Net Income

The company had net income in 2006 of \$9.2 million compared to \$8.4 million for 2005, an increase of 10%. Earnings per share for 2006 were \$1.21 and \$1.18 on a basic and diluted basis, compared to \$1.13 and \$1.09 in the prior year, increases of 7% and 8%, respectively.

Net Interest Income

The company's net interest income was \$41.6 million for the year ended December 31, 2006, an increase of \$3.5 million, or 9%, over the prior year. The primary driver of the increase was a \$107.4 million, or 17%, increase in average loan balances, partially offset by funding costs rising more rapidly than asset yields during the year (i.e., net interest margin decreased).

Net Interest Margin

Tax equivalent net interest margin (margin) decreased by 4 basis points, to 4.78% for the year ended December 31, 2006, compared to 4.82% for the prior year. The decrease in margin was due to an 83 basis point increase in the yield on interest earning assets, exceeded by a 91 basis point increase in the total cost of deposits and borrowed funds (cost of funds). The primary reason for the yield increases were higher market interest rates during the period. The increase in cost of funds exceeded asset yields mainly due to the flat yield curve and the timing of rate adjustments. Asset yields re-priced more quickly than funding costs over the current rising rate cycle that began in mid 2004. On an incremental basis, funding cost increases caught up to the previously realized asset yield increases in the latter half of 2006.

Total Interest Income

Total interest income for the year ended December 31, 2006 was \$60.5 million, an increase of \$12.2 million, or 25%, over the prior year. The increase resulted from an increase in the average balance of interest earning assets of \$78.1 million, or 10%, to \$890.0 million for the year ended December 31, 2006, and an increase in the average tax equivalent yield on interest earning assets of 83 basis points, to 6.91%.

Interest income on loans increased by \$13.0 million, or 32%, for the year ended December 31, 2006 to \$54.1 million. For the year ended December 31, 2006, the average loan balance increased by \$107.4 million, or 17%, while the average rate earned on loans increased by 81 basis points to 7.38%. The increase in loan yield was driven by the higher market rates, as variable rate loans indexed to Prime re-priced to the higher market rates over the period.

Income on investment securities and total short-term investments (together, investments) declined by \$818 thousand, to \$6.4 million for the year ended December 31, 2006. The average balance of investments decreased by \$29.3 million, or 16%, for the year ended December 31, 2006, compared to the prior year, as investment cash flow was primarily redeployed to fund loan growth. The average tax equivalent yield on investments increased by 26 basis points, to 4.69%, for the year ended December 31, 2006 compared to the average tax equivalent yield of 4.43% for the prior year.

Total Interest Expense

Total interest expense for the year ended December 31, 2006 was \$19.0 million compared to \$10.2 million for the year ended December 31, 2005, an increase of \$8.7 million or 86%. The increase resulted primarily from a 108 basis point increase in the average interest rate paid on interest bearing liabilities, to 2.70%, for the year ended December 31, 2006, and to a lesser extent, from the \$69.4 million, or 11%, increase in the average balance of interest-bearing deposits, borrowed funds and debentures, to \$700.9 million for the year ended December 31, 2006.

Interest expense on deposits increased by \$8.7 million, or 105%, to \$16.9 million for the year ended December 31, 2006. The average balance of savings, checking and money market deposit accounts decreased by \$22.6 million, or 5%, to \$436.1 million for the year ended December 31, 2006, while the average interest rate paid on such deposit accounts increased 57 basis points over the prior year.

The average balance on certificates of deposit increased by \$94.7 million, or 68% over the prior year, to \$234.5 million for the year ended December 31, 2006. The increase resulted from customers seeking higher rate deposit products as interest rates rose in 2005 and 2006. Also, in late 2005 the company began to utilize brokered certificates of deposit as an alternative funding source. The average balance in brokered certificates of deposit increased \$61.0 million in 2006 compared to 2005. The average interest rate on certificates of deposit increased 179 basis points for the year ended December 31, 2006 compared to the year ended December 31, 2005. The increase in deposit rates during the period was primarily due to higher market rates and the increased use of brokered deposits, which are generally more rate sensitive than internally generated deposits.

Interest expense on borrowed funds, consisting of FHLB borrowings and term repurchase agreements, increased by \$93 thousand over the prior year. The average balance of borrowed funds for the year ended December 31, 2006 decreased by \$2.6 million, to \$19.4 million. The average cost of borrowed funds increased 98 basis points, to 4.67%, for the year ended December 31, 2006, due to the increase in market interest rates.

The interest expense and average rate on junior subordinated debentures was \$1.2 million and 10.88%, respectively, for both years ended December 31, 2006 and 2005.

The average balance of non-interest bearing deposits increased by \$2.5 million, or 2%, for the year ended December 31, 2006. The total cost of funds (cost of interest bearing liabilities and non-interest bearing deposits) was 2.19% for the year ended December 31, 2006, compared to 1.28% for the same period ended December 31, 2005.

Provision for Loan Losses

The provision for loan losses was \$1.3 million and \$1.1 million for the years ended December 31, 2006 and 2005, respectively. Net charge-offs for 2006 were \$369 thousand compared to net charge-offs of \$8 thousand for 2005. The provision reflects management's ongoing assessment of the adequacy of the allowance for loan losses to support the estimated credit risk in the loan portfolio, including the real estate values and economic conditions in New England and, in particular, the Merrimack Valley and the North Central regions of Massachusetts and South Central New Hampshire, the level of non-accrual loans, levels of charge-offs and recoveries during the period, growth of outstanding loans and inherent risks in the nature of the loan portfolio. Despite the growth in the company's loan portfolio, there have been no material changes to the company's underwriting practices or the methodology used to estimate loan loss exposure. The provision for loan losses is a significant factor in the company's operating results.

See Risk Elements/Asset Quality and Allowance for Loan Losses under the heading, Financial Condition, in this Item 7 above, for further information regarding the provision for loan losses.

Non-Interest Income

Non-interest income was \$6.8 million for the year ended December 31, 2006, an increase of \$381 thousand compared to 2005. The primary components of the increase were increases in investment advisory fees and other income, partially offset by losses on sales of investment securities. The changes are discussed in detail below.

The following table sets forth the components of non-interest income and the related changes for the periods indicated.

(Dollars in thousands)	Year Ended December 31,		Change
	2006	2005	
Investment advisory fees	\$ 2,662	\$ 2,262	\$ 400
Deposit service fees	1,757	1,671	86
Bank-owned life insurance income	391	88	303
Net gains (losses) on sales of Investment securities	(204)	191	(395)
Gains on sales of loans	147	246	(99)
Other income	2,063	1,977	86
Total non-interest income	\$ 6,816	\$ 6,435	\$ 381

Investment advisory fees increased by \$400 thousand, or 17.7%, in 2006 compared to 2005. The increase resulted from new business generated in 2006 and 2005 and an increase in fees earned per average asset due to the company's restructured fee schedule implemented in mid-2005. The year to date balances of average investment advisory assets increased by \$40.7 million, or 13%, from \$326.0 million for 2005 to \$366.8 million for 2006.

Income from BOLI amounted to \$391 thousand and increased \$303 thousand in 2006 compared to 2005. The increase resulted from a full year of activity and from additional purchases in 2006. The average balance was \$8.4 million for the year ended December 31, 2006 compared to \$2.6 million for the same period in 2005, reflecting purchases made in 2005 and 2006.

Net gains (losses) on the sales of investment securities amounted to a loss of \$204 thousand and a gain of \$191 thousand for the years ended December 31, 2006 and 2005, respectively. The net loss in 2006 and net gain in 2005 resulted from sales of \$19.9 million and \$1.5 million, respectively, in those periods. The net losses realized in 2006 primarily resulted from management's decision to sell a portion of the fixed income portfolio in December based on the expectation of improving net interest income in subsequent reporting periods through reinvestment at higher yields or through paydowns of borrowed funds and brokered deposits.

Non-Interest Expense

Non-interest expense was \$32.5 million for the year ended December 31, 2006 an increase of \$2.3 million, or 8%, compared to 2005. The primary components of the increase were salaries and benefits, occupancy costs, advertising and public relations and other operating expenses. The changes are discussed in detail below.

The following table sets forth the components of non-interest expense and the related changes for the periods indicated.

(Dollars in thousands)	Year Ended December 31,		Change
	2006	2005	
Salaries and employee benefits	\$ 19,169	\$ 18,326	\$ 843
Occupancy expenses	6,095	5,537	558
Audit, legal and other professional fees	1,826	1,680	146
Advertising and public relations	1,372	875	497
Supplies and postage	874	862	12
Investment advisory and custodial expenses	500	505	(5)
Other operating expenses	2,704	2,450	254
Total non-interest expense	\$ 32,540	\$ 30,235	\$ 2,305

Salaries and benefits expense totaled \$19.2 million for the year ended December 31, 2006, compared with \$18.3 million for 2005, an increase of \$843 thousand, or 5%. The increase was due to additional staffing necessary to support the company's strategic growth initiatives, annual compensation adjustments and corresponding increases in health insurance premiums and the additional expense related to employee stock compensation. Performance based incentive compensation, a component of salary and benefit expense,

decreased by \$1.4 million in 2006. Excluding this reduction, salary and benefit expense increased \$2.2 million, or 13%, over the prior year.

Occupancy expenses totaled \$6.1 million, an increase of \$558 thousand, or 10%, compared to the prior year, primarily due to ongoing occupancy cost increases and facility expansion necessary to support the company's growth and strategic initiatives.

Advertising and public relations expense increased \$497 thousand and amounted to \$1.4 million in 2006. The increase resulted primarily from the company's branding initiatives, business development efforts and community relations.

Other operating expenses increased \$254 thousand, or 10%, to \$2.7 million in 2006. The increases in this category were due primarily to the company's growth and related increases in business development costs, courier services, staff development initiatives, and expense related to BOLI, partially offset by reductions in ATM network/ telecommunication charges and security related expenses.

Income Tax Expense

Income tax expense and the effective tax rate for the year ended December 31, 2006 and December 31, 2005 were \$5.3 million and 36.7%, and \$4.8 million and 36.1%, respectively. The effective rates for 2006 and 2005 reflect normal activity with the decrease from the statutory rate of 40.93% due primarily to the effect of interest income earned on tax-exempt municipal securities.

COMPARISON OF YEARS ENDED DECEMBER 31, 2005 AND 2004

Unless otherwise indicated, the reported results are for the year ended December 31, 2005 with the comparable year or prior year being the year ended December 31, 2004.

Net Income

The company had net income in 2005 of \$8.4 million compared to \$7.5 million for 2004, an increase of 12%. Earnings per share for 2005 were \$1.13 and \$1.09 on a basic and diluted basis, compared to \$1.03 and \$0.99 in the prior year, increases of 9.7% and 10.1%, respectively.

Net Interest Income

The company's net interest income was \$38.1 million for the year ended December 31, 2005, an increase of \$6.0 million, or 19%, over the prior year. The primary driver of the increase was a \$97.5 million, or 19%, increase in average loan balances and, to a slightly lesser degree, the increase in net interest margin during the period. Loan growth and higher market rates primarily led to the \$8.5 million increase in total interest income over the prior year. Loan growth was funded primarily through lower cost and non-interest bearing deposit growth, proceeds from maturities and paydowns of investments, and an increase in borrowed funds during the fourth quarter of 2005. Total interest expense increase by \$2.6 million over the prior year, due primarily to the increase in market rates and a \$46.1 million, or 8%, increase in the average balance of total interest bearing deposits, borrowed funds and debentures.

Net Interest Margin

Tax equivalent net interest margin (margin) increased by 32 basis points, to 4.82% for the year ended December 31, 2005, compared to 4.50% for 2004. The increase in margin was due to the 54 basis point increase in the yield on interest earning assets, partially offset by a 23 basis point increase in the total cost of funds. The primary reason for these yield increases was the higher market interest rates during the period, especially the prime lending rate (Prime), which increased 325 basis points since June 2004.

Total Interest Income

Total interest income for the year ended December 31, 2005 was \$48.3 million, an increase of \$8.5 million, or 22%, over the prior year. The increase resulted from an increase in the average balance of interest earning assets of \$74.1 million, or 10%, to \$811.9 million for the year ended December 31, 2005, and an increase in the average tax equivalent yield on interest earning assets of 54 basis points, to 6.08%.

Interest income on loans increased by \$8.8 million, or 27%, for the year ended December 31, 2005 to \$41.1 million. For the year ended December 31, 2005, the average loan balance increased by \$97.5 million, or 19%, while the average rate earned on loans increased by 46 basis points to 6.57%. The increase in loan yield was driven by the higher market rates, as variable rate loans indexed to Prime repriced to the higher market rates over the period.

Income on investment securities and total short-term investments (together, investments) declined by \$265 thousand, to \$7.2 million for the year ended December 31, 2005. The average balance of investments decreased by \$23.4 million, or 11%, for the year ended December 31, 2005, compared to the prior year, as proceeds from maturities and paydowns were redeployed to fund loan growth. The average tax equivalent yield on investments increased by 34 basis points, to 4.43%, for the year ended December 31, 2005 compared to the average tax equivalent yield of 4.09% for the year ended December 31, 2004.

Total Interest Expense

Total interest expense for the year ended December 31, 2005 was \$10.2 million compared to \$7.6 million for the year ended December 31, 2004, an increase of \$2.6 million or 33%. The increase resulted primarily from a 31 basis point increase in the average interest rate paid on interest bearing liabilities, to 1.62%, for the year ended December 31, 2005, and to a lesser extent, from the \$46.1 million, or 8%, increase in the average balance of interest-bearing deposits, borrowed funds and debentures, to \$631.5 million for the year ended December 31, 2005.

Interest expense on deposits increased by \$1.9 million, or 30%, to \$8.2 million for the year ended December 31, 2005. The average balance of savings, checking and money market deposit accounts increased by \$27.7 million, or 6%, to \$458.7 million for the year ended December 31, 2005, while the average interest rate paid on such deposit accounts increased 21 basis points over the prior year. The average balance on certificates of deposit increased by \$4.2 million, or 3% over the prior year, to \$139.9 million for the year ended December 31, 2005. The average interest rate on certificates of deposit increased 42 basis points for the year ended December 31, 2005 compared to the year ended December 31, 2004. The increase in deposit rates was due to the higher market rates during the period.

Interest expense on borrowed funds, consisting of FHLB borrowings and repurchase agreements, increased by \$683 thousand over the prior year to \$815 thousand. The average balance of borrowed funds for the year ended December 31, 2005 increased by \$14.2 million, to \$22.1 million compared to \$7.9 million for the prior year. The increase in average borrowed funds consisted of increases in FHLB borrowing, primarily in the fourth quarter of 2005, as slower deposit growth necessitated the alternate funding. The average cost of borrowed funds increased 202 basis points, to 3.69%, for the year ended December 31, 2005, due to the increase in market interest rates. The interest expense and average rate on junior subordinated debentures was \$1.2 million and 10.88%, respectively, for both years ended December 31, 2005 and 2004.

The average balance of non-interest bearing deposits, a key component of the company's net interest margin increased by \$20.0 million, or 14%, for the year ended December 31, 2005. The total cost of funds (cost of interest bearing liabilities and non-interest bearing deposits) was 1.28% for the year ended December 31, 2005, compared to 1.05% for the same period ended December 31, 2004.

Provision for Loan Losses

The provision for loan losses was \$1.1 million and \$1.7 million for the years ended December 31, 2005 and 2004, respectively. The larger provision in 2004 primarily resulted from charge-offs that occurred during the first quarter of that year. Net charge-offs for 2005 were \$8 thousand, compared to net charge-offs for 2004 of \$713 thousand. The provision reflects management's ongoing assessment of the adequacy of the allowance for loan losses to support the estimated credit risk in the loan portfolio, including the real estate values and economic conditions in New England and, in particular, the Merrimack Valley and the North Central regions of Massachusetts and South Central New Hampshire, the level of non-accrual loans, levels of charge-offs and recoveries during the period, growth of outstanding loans and inherent risks in the nature of the loan portfolio. Despite the growth in the company's loan portfolio, there have been no material changes to the company's underwriting practices or the methodology used to estimate loan loss exposure. The provision for loan losses is a significant factor in the company's operating results.

See Risk Elements/Asset Quality and Allowance for Loan Losses under the heading, Financial Condition, in this Item 7 above, for further information regarding the provision for loan losses.

Non-Interest Income

Non-interest income was \$6.4 million for the year ended December 31, 2005, a decrease of \$542 thousand compared to 2004. The primary components of the decrease compared to the prior year were decreases in the gains realized from the sales of investment securities and loans, which collectively declined \$852 thousand, and the decrease of \$387 thousand in deposit servicing fee income, partially offset by the \$539 thousand increase in other income. The changes are discussed in detail below.

The following table sets forth the components of non-interest income and the related changes for the periods indicated.

(Dollars in thousands)	Year Ended December 31,		Change
	2005	2004	
Investment advisory fees	\$ 2,262	\$ 2,104	\$ 158
Deposit service fees	1,671	2,058	(387)
Net gains on sales of investment securities	191	906	(715)
Gains on sales of loans	246	383	(137)
Other income	2,065	1,526	539
Total non-interest income	\$ 6,435	\$ 6,977	\$ (542)

Investment advisory fees increased by \$158 thousand, or 7.5%, in 2005 compared to 2004. The change resulted from new business generated in 2005 and an increase in fees earned per average asset due to the company's restructured fee schedule. The year to date balances of average investment management and trust assets decreased by \$7.6 million, or 2%, from \$333.6 million in 2004 to \$326.0 million for 2005.

Deposit service fees decreased by \$387 thousand, or 19%, to \$1.7 million in 2005. The decrease was primarily attributed to higher earnings credit rates paid on commercial checking accounts due to the increase in market interest rates during the period. The earnings credit rate allows customers to earn credit on deposit balances, which are used to offset service charges.

Net gains on the sales of investment securities amounted to \$191 thousand and \$906 thousand for the years ended December 31, 2005 and 2004, respectively. These gains were realized on sales of securities of \$1.5 million and \$18.1 million in 2005 and 2004, respectively. The decline primarily resulted from market interest rate levels, which made investment security sales less attractive than previous years. These sales resulted from management's decision to take advantage of certain investment opportunities and asset/liability repositioning during these periods.

Gains on sales of loans were \$246 thousand for the year ended December 31, 2005, a decrease of \$137 thousand or 36%. The decrease was due to the decrease in the volume of fixed rate residential mortgage loans originated and subsequently sold. The increase in

market interest rates led to a significant reduction in fixed rate mortgage loan origination volume compared to the prior year. The company sold approximately \$22.9 million and \$25.9 million of residential mortgage loans in 2005 and 2004, respectively.

The other income category includes merchant credit card deposit fees and electronic banking fees, commercial letter of credit fees, check printing fees, and income related to bank-owned life insurance, and miscellaneous income. Such other income was \$2.1 million, an increase of \$539 thousand, or 35%, over the prior year. The increase was due primarily to the increases in merchant and electronic banking fee income, partially due to the sale of a merchant credit card services portfolio, income related to bank-owned life insurance, income from the purchase of state tax credits and general increases in fee income due to the company's growth and increase in transaction volume.

Non-Interest Expense

Non-interest expense was \$30.2 million for the year ended December 31, 2005 an increase of \$4.5 million, or 18%, compared to 2004. The primary component of the increase was salaries and benefits as discussed below.

The following table sets forth the components of non-interest expense and the related changes for the periods indicated.

(Dollars in thousands)	Year Ended December 31,		Change
	2005	2004	
Salaries and employee benefits	\$ 18,326	\$ 14,788	\$ 3,538
Occupancy expenses	5,537	5,189	348
Audit, legal and other professional fees	1,680	1,368	312
Advertising and public relations	875	766	109
Supplies and postage	862	872	(10)
Investment advisory and custodial expenses	505	527	(22)
Other operating expenses	2,450	2,177	273
Total non-interest expense	\$ 30,235	\$ 25,687	\$ 4,548

Salaries and benefits expense totaled \$18.3 million for the year ended December 31, 2005, compared with \$14.8 million for 2004, an increase of \$3.5 million, or 24%. The increase was due to an increase in salary expense related to additional staffing necessary to support the company's strategic growth initiatives and annual compensation adjustments, corresponding increases in health insurance premiums and payroll taxes, and an increase in performance based incentive compensation.

Occupancy expenses totaled \$5.5 million, an increase of \$348 thousand, or 7% compared to the prior year, primarily due to the company's growth and the opening of three branches since March 2004.

Audit, legal and other professional expenses increased by \$312 thousand, or 23% over the prior year, and totaled \$1.7 million for the year ended December 31, 2005. The increase was primarily attributable to increased audit and legal costs associated with the financial reporting requirement of the Sarbanes-Oxley Act, for the cost of marketing support related to a 2005 brand initiative and the costs of outsourced technology services.

Other operating expenses increased \$273 thousand, or 13%, to \$2.5 million in 2005. The increases in this category were due primarily to the company's growth and related to increases in director fees and telecommunication, training, security, and miscellaneous operating/processing charges.

Income Tax Expense

Income tax expense and the effective tax rate for the year ended December 31, 2005 and December 31, 2004 were \$4.8 million and 36.1%, and \$4.3 million and 36.2%, respectively. The effective rates for 2005 and 2004 reflect normal activity with the decrease from the statutory rate of 40.93% due primarily to the effect of interest income earned on tax-exempt municipal securities.

Accounting Rule Changes

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—An Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 also prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. In addition, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006. The provisions of FIN 48 are to be applied to all tax positions upon initial adoption of this standard. Only tax positions that meet the more-likely-than-not recognition threshold at the effective date may be recognized or continue to be recognized upon adoption of FIN 48. The adoption of FIN 48 did not have a material impact on the company's financial position or results of operation.

In September 2006 the FASB issued Statement of Financial Accounting Standards No. 158 *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—An Amendment of FASB Statements No. 87, 88, 106 and 132(R)* (FAS 158). This new statement requires employers to recognize the funded status for pension and other post-retirement benefit plans in its financial statements, to recognize certain actuarial gains and losses, prior service cost, and any transition amounts when recognizing a plan's funded status, with the offset to other comprehensive income. For fiscal years ending after December 15, 2008, FAS 158 will also require measurement of plan assets and obligations as of the fiscal year end, eliminating the use of earlier measurement dates currently permissible. Calendar year public companies were required to adopt the provisions of this new statement effective December 31, 2006. The adoption of FAS 158 did not have a material impact on the company's financial position or results of operation.

In September 2006 the FASB's Emerging Issues Task Force reached a consensus regarding Issue No. 06-4 (EITF 06-4) *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split Dollar Life Insurance Arrangements*. The Task Force affirmed that an employer should recognize a liability for future benefits associated with an endorsement split-dollar life insurance arrangement that provides a benefit to an employee that extends to postretirement periods. The liability and related compensation cost are to be determined in accordance with the appropriate previously issued financial standards. The Task Force concluded that this Issue should be effective through either (a) a change in accounting principle through a cumulative-effect adjustment to retained earnings or to other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption, or (b) a change in accounting principle through retrospective application to all prior periods. The Task Force reached a consensus that this Issue should be effective for fiscal years beginning after December 15, 2007. Management is in the process of determining the impact that adoption of EITF No. 06-4 will have on the company's financial position and results of operation.

In September 2006, the Securities and Exchange Commission staff issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides interpretive guidance regarding the approach companies must use to quantify the materiality of financial misstatements after considering all relevant quantitative and qualitative factors. The approach requires assessing the impact of correcting misstatements, including the carryover and reversing effects of cumulative prior year misstatements, on the current financial statements. SAB 108 permits companies to apply its provisions by either restating prior financial statements or recording the cumulative effect of initially applying the approach as adjustments to the carrying values of assets and liabilities, with an offsetting adjustment to retained earnings, as of the beginning of the fiscal year of adoption. SAB 108 was required to be applied in the company's annual financial statements covering the fiscal year ended December 31, 2006. The adoption of SAB 108 did not have an impact on the company's financial position or results of operation.

Impact of Inflation and Changing Prices

The company's asset and liability structure is substantially different from that of an industrial company in that virtually all assets and liabilities of the company are monetary in nature. Management believes the impact of inflation on financial results depends upon the company's ability to react to changes in interest rates and by such reaction, reduce the inflationary impact on performance. Interest rates do not necessarily move in the same direction, or at the same magnitude, as the prices of other goods and services. As discussed previously, management seeks to manage the relationship between interest-sensitive assets and liabilities in order to protect against wide net interest income fluctuations, including those resulting from inflation.

Various information shown elsewhere in this annual report will assist in the understanding of how well the company is positioned to react to changing interest rates and inflationary trends. In particular, the Interest Margin Sensitivity Analysis contained in Item 7A and other maturity and repricing information of the company's assets and liabilities in this report contain additional information.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Interest Margin Sensitivity Analysis

The company's primary market risk is interest rate risk and *interest rate risk management* is centered on the company's Asset-Liability Committee (the committee). The committee is comprised of five outside directors of the company and three executive officers of the company, who are also members of the Board of Directors. In addition, several directors who are not on the committee rotate in on a regular basis.

Annually, the committee approves the company's asset-liability policy, which provides management with guidelines for controlling interest rate risk, as measured through net interest income sensitivity, within certain tolerance levels. The committee also establishes and monitors guidelines for the company's liquidity and capital ratios.

The asset-liability strategies are reviewed on a periodic basis by management and presented and discussed with the committee on at least a quarterly basis. The asset-liability strategies and guidelines are revised based on changes in interest rate levels, general economic conditions, competition in the marketplace, the current interest rate risk position of the company, anticipated growth and other factors.

One of the principal factors in maintaining planned levels of net interest income is the ability to design effective strategies to manage the impact of interest rate changes on future net interest income. At least four times per year, management completes a net interest income sensitivity analysis, which is presented to the committee. This analysis includes a simulation of the company's net interest income under various interest rate scenarios. Management utilizes a static balance sheet, instantaneous rate shock, and parallel shift methodology in conducting the simulations. Variations in the interest rate environment affect numerous factors, including prepayment speeds, reinvestment rates, maturities of investments (due to call provisions), and interest rates on various asset and liability accounts.

In addition, on an annual basis management runs several alternative simulations used to further evaluate the interest rate sensitivity inherent in the existing balance sheet. These simulations include an Economic Value of Equity (EVE) analysis in which the balance sheet is marked to market and then shocked up and down by 200 basis points. EVE is performed to evaluate the sensitivity of the company's net equity to changing interest rate environments. The company also runs simulations that include balance sheet growth and certain alternative curve scenarios such as steep, flat or inverted yield curves, again to further evaluate or enhance the quarterly simulations.

At December 31, 2006 management considers the company's primary interest rate risk exposure to be margin compression that may result from changes in interest rates and/or changes in the mix of the company's balance sheet components. Specifically, these

components include fixed versus variable rate loans and investments on the asset side, and higher cost deposits and borrowings versus lower cost deposits on the liability side.

Under the company's current balance sheet position, margin generally performs better in a rising rate environment, while it generally decreases when the yield curve is flat, inverted or declining.

Under a flat yield curve scenario, margin compression occurs as the spread between the cost of funding and the yield on interest earning assets narrows. Under this scenario the degree of margin compression is highly dependent on the company's ability to fund asset growth through lower cost deposits. However, if the curve is flattening, while short-term rates are rising, the adverse impact on margin may be somewhat delayed, as increases in the prime rate will initially result in the company's asset yields re-pricing more quickly than funding costs.

Under an inverted yield curve situation, shorter-term rates exceed longer-term rates, and the impact on margin is similar but more adverse than the flat curve scenario. Again, however, the extent of the impact on margin is highly dependent on the company's balance sheet mix.

Under a declining yield curve scenario, margin compression will eventually occur as the yield on interest earning assets decreases more rapidly than decreases in funding costs. The primary causes would be the impact of interest rate decreases (including decreases in the prime rate) on adjustable rate loans and the fact that decreases in deposit rates may be limited.

It should be noted that the interest rate scenarios used do not necessarily reflect management's view of the most likely change in interest rates over the next 24 months. Furthermore, since a static balance sheet is assumed, the results do not reflect the anticipated future net interest income of the company.

51

The following table summarizes the projected cumulative net interest income for a 24-month period as of December 31, 2006, simulated under three rate scenarios: (i) an instantaneous 200 basis point upward shift in all interest rates, (ii) no change in interest rates, and (iii) an instantaneous 200 basis point downward shift in all interest rates. Rates on the company's interest sensitive assets and liabilities (i.e., rates on investments, loans, deposits and borrowed funds) have been changed accordingly.

(Dollars in thousands)	December 31, 2006		
	Rates Fall 200 BP	Rates Unchanged	Rates Rise 200 BP
Interest Earning Assets:			
Loans	\$ 101,340	\$ 116,545	\$ 130,175
Collateralized mortgage obligations and other mortgage backed securities	5,352	5,892	6,260
Other investments	5,111	6,529	7,355
Total interest income	111,803	128,966	143,790
Interest Earning Liabilities:			
Certificates of deposit	17,438	23,520	29,602
Interest bearing checking, money market, savings	13,988	17,596	23,836
Borrowed funds	1,024	1,597	2,172
Junior subordinated debentures	2,356	2,356	2,356
Total interest expense	34,806	45,069	57,966
Net interest income	\$ 76,997	\$ 83,897	\$ 85,824

Management estimates that over a 24-month period net interest income will increase in a rising rate environment and decrease in a declining rate environment due to the company being more asset than liability sensitive.

The results and conclusions reached from the December 31, 2006 simulation are not significantly different from the December 31, 2005 simulation set forth below.

(Dollars in thousands)	December 31, 2005		
	Rates Fall 200 BP	Rates Unchanged	Rates Rise 200 BP
Interest Earning Assets	\$ 95,493	\$ 113,038	\$ 128,269
Interest Bearing Liabilities	23,194	30,380	43,267
Net interest income	\$ 72,299	\$ 82,658	\$ 85,002

Maturity and composition information of the company's loan portfolio, investment portfolio, certificates of deposit, and borrowed funds are contained in Part I, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the captions Loans, Short-Term Investments, Investment Securities, Deposits and Borrowed Funds. Management uses this information in the simulation model along with other information about the company's assets and liabilities. Management makes certain prepayment assumptions based on an analysis of market consensus and management projections, regarding how the factors discussed above will affect the assets and liabilities of the company as rates change. One of the more significant changes in the anticipated maturity of assets occurs in the investment portfolio, specifically the reaction of mortgage backed securities (including collateralized mortgage obligations) and callable securities as rates change.

ENTERPRISE BANCORP, INC.

Notes to Consolidated Financial Statements

(1) Summary of Significant Accounting Policies

(a) Basis of Presentation

The consolidated financial statements of Enterprise Bancorp, Inc. (the company) include the accounts of the company and its wholly owned subsidiary Enterprise Bank and Trust Company (the bank). Enterprise Bank and Trust Company is a Massachusetts trust company organized in 1989. Substantially all of the company's operations are conducted through the bank.

The bank has three wholly owned subsidiaries, Enterprise Insurance Services, LLC, Enterprise Investment Services, LLC, and Enterprise Security Corporation, organized for the purposes of engaging in insurance sales activities, offering non-deposit investment products and services and investing in equity securities on its own behalf and not as a broker, respectively. The services offered through the bank and subsidiaries are managed as one strategic unit and represent the company's only reportable operating segment.

The company's deposit accounts are insured by the Deposit Insurance Fund of the Federal Deposit Insurance Corporation (the FDIC) up to the maximum amount provided by law. The FDIC and the Massachusetts Commissioner of Banks (the Commissioner) have regulatory authority over the bank.

The business and operations of the company are subject to the regulatory oversight of the Board of Governors of the Federal Reserve System (the Federal Reserve Board). The Commissioner also retains supervisory jurisdiction over the company.

In preparing the financial statements, management is required to make estimates and assumptions that affect the reported values of assets and liabilities at the balance sheet date and income and expenses for the years then ended. Actual results, particularly regarding the estimate of the allowance for loan losses, may differ from these estimates.

All significant intercompany balances and transactions have been eliminated in the accompanying consolidated financial statements.

(b) Reclassification

Certain amounts in previous years' financial statements have been reclassified to conform to the current year's presentation.

On June 30, 2006, the company issued 3,842,015 shares in a two-for-one stock split paid in the form of a stock dividend. All share and per share amounts have been retroactively adjusted to reflect the stock dividend for all periods presented.

(c) Short-term Investment Securities

The company utilizes short-term investments to earn returns on short-term excess liquidity. The company's short-term investments may consist of investments carried as both cash equivalents and non-cash equivalents. Cash equivalents are defined as short-term highly liquid investments that are both readily convertible to known amounts of cash and are so near their maturity date that they present insignificant risk of changes in value due to changes in interest rates. The company's cash equivalent short-term investments may be comprised of overnight and term federal funds sold, money market mutual funds and discount U.S. agency notes with original maturities of less than ninety days. Short-term investments carried as cash equivalents at December 31, 2006 and 2005 consisted of overnight and term federal funds sold and money market mutual funds. From time to time, the company may

invest in auction rate preferred securities with redemption options (auction dates) every forty-nine days, but which cannot readily be converted to cash at par value until the next successful auction. These investments are not cash equivalents and would be classified as other short-term investments. The company had no other short-term investments at December 31, 2006 or 2005.

(d) Investment Securities

Investment securities that are intended to be held for indefinite periods of time but which may not be held to maturity or on a long-term basis are considered to be available for sale and are carried at fair value. Net unrealized appreciation and depreciation on investments available for sale, net of applicable income taxes, are reflected as a component of accumulated other comprehensive income. Included as available for sale are securities that are purchased in connection with the company's asset-liability risk management strategy and that may be sold in response to changes in interest rates, resultant prepayment risk and other related factors. In instances where the company has the positive intent to hold to maturity, investment securities will be classified as held to maturity and carried at amortized cost. The bank is required to purchase Federal Home Loan Bank of Boston (FHLB) stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost.

As of the balance sheet dates all of the company's investment securities (with the exception of restricted FHLB stock) were classified as available for sale and carried at fair value. The company regularly reviews the portfolio for securities with unrealized losses that are other than temporarily impaired. Management's assessment includes evaluating the credit quality of the issuer, if any equity securities exhibit fundamental deterioration and whether it is unlikely that the security will completely recover its unrealized loss. If a decline in market value of a security is considered other than temporary, the cost basis of the individual security is written down to market value and the loss is charged to net gains on sales of investment securities.

Investment securities discounts are accreted and premiums are amortized over the period of estimated principal repayment using methods that approximate the interest method.

Gains or losses on the sale of investment securities are recognized on the trade date on a specific identification basis.

(e) Loans

The company grants commercial real estate loans, secured and unsecured commercial loans, single family and multi-family residential loans, and a variety of consumer loans. In addition, the company grants loans for the construction of residential homes, multi-family properties, and commercial real estate properties and for land development. Most loans granted by the company are collateralized by real estate or equipment and/or are guaranteed by the borrower. The ability and willingness of the single family residential and consumer borrowers to honor their repayment commitments is generally dependent on the level of overall economic activity and real estate values within the borrowers' geographic areas. The ability and willingness of commercial real estate, commercial and construction loan borrowers to honor their repayment commitments is generally dependent on the health of the real estate sector in the borrowers' geographic areas and the general economy, among other factors.

Loans are reported at the principal amount outstanding, net of deferred origination fees and costs. Loan origination fees received, offset by direct loan origination costs, are deferred and amortized using the straight line method over three to five years for lines of credit and demand notes or over the life of the related loans

using the level-yield method for all other types of loans. When loans are paid off, the unamortized fees and costs are recognized as an adjustment to interest income.

Loans held for sale are carried at the lower of aggregate amortized cost or market value. All loans sold are currently sold without recourse. When loans are sold a gain or loss is recognized to the extent that the sales proceeds plus unamortized fees and costs exceed or are less than the carrying value of the loans. Gains and losses are determined using the specific identification method.

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans is discontinued when a loan becomes contractually past due, with respect to interest or principal, by ninety days for real estate loans and generally sixty days for all other loans, or when reasonable doubt exists as to the full and timely collection of interest or principal. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest accruals are resumed on such loans only when payments are brought current and when, in the judgment of management, the collectability of both principal and interest is reasonably assured. Interest payments received on loans in a non-accrual status are generally applied to principal.

Impaired loans are individually significant loans for which management considers it probable that not all amounts due in accordance with original contractual terms will be collected. Impaired loans are accounted for, except those loans that are accounted for at the lower of cost or fair value, at the present value of the expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, in the case of collateral dependent loans, the lower of the fair value of the collateral or the recorded amount of the loans. Impaired loans exclude large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment, loans that are measured at fair value and leases as defined in SFAS No. 114. Management considers the payment status, net worth and earnings potential of the borrower, and the value and cash flow of the collateral as factors to determine if a loan will be paid in accordance with its contractual terms. Management does not set any minimum delay of payments as a factor in reviewing for impaired classification. Impaired loans are charged off when management believes that the collectability of the loan's principal is remote.

Restructured loans are those where interest rates and/or principal payments have been restructured to defer or reduce payments as a result of financial difficulties of the borrower. Restructured loans are generally included in the impaired loan category.

(f) Allowance for Loan Losses

The allowance for loan losses is an estimate of credit losses inherent in the loan portfolio. The company's allowance is accounted for in accordance with SFAS No. 114, as amended by SFAS No. 118, *Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosures*, and SFAS No. 5, *Accounting for Contingencies*. The allowance for loan losses is established through a provision for loan losses, a direct charge to earnings. Loan losses are charged against the allowance when management believes that the collectability of the loan principal is unlikely. Recoveries on loans previously charged off are credited to the allowance. The company maintains the allowance at a level that it deems adequate to absorb all reasonably anticipated losses from specifically known and other credit risks associated with the portfolio.

The company uses a systematic process to measure the amount of estimated loan loss exposure inherent in the portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology relies on a combination of qualitative and quantitative factors, including loan reviews of large and higher risk credits,

industry concentrations, results of regulatory examinations, historical charge-off and recovery experience, the growth, composition and size of the loan portfolio, trends in delinquencies and non-performing loans, the strength of the local and national economy, interest rates and other changes in the portfolio.

The foundation of the process is an ongoing internal credit rating and review system conducted by the company's credit department, which takes into consideration the borrower's financial condition, the borrower's performance with respect to loan terms and the adequacy of collateral. In addition, the company contracts annually with an external loan review firm to review commercial loans on a semi-annual basis. Loans which are evaluated to be of weaker credit quality are considered classified and are reviewed on a more regular basis by management.

The company accounts for impaired loans in accordance with the terms of SFAS 114. Individual commercial loans deemed to be impaired are analyzed for loss exposure using one of the acceptable methods prescribed in the accounting standard, while portfolios of more homogenous populations of loans, such as residential mortgages and consumer loans, are analyzed at a group level.

On a quarterly basis the company prepares an estimate of the necessary reserves. Except for loans specifically identified as impaired, the estimate is a two-tiered approach that allocates loan loss reserves to classified loans by credit rating and to non-classified loans by credit type. The general loss allocations take into account the quantitative and qualitative factors identified above.

The adequacy of the allowance for loan losses is reviewed and evaluated on a regular basis by an internal management committee, a sub-committee of the board of directors and the full the board itself.

Management believes that the allowance for loan losses is adequate to absorb reasonably anticipated losses from specifically known and other credit risks associated with the loan portfolio as of the balance sheets dates. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the company's allowance for loan losses. Such agencies may require the company to recognize additions to the allowance based on judgments different from those of management.

See Allowance for Loan Losses under the headings, Financial Condition and Critical Accounting Estimates, contained in Item 7 above for further information regarding the allowance for loan losses.

(g) Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation or amortization is computed on a straight-line basis over the lesser of the estimated useful lives of the asset or the respective lease term (with reasonably assured renewal options) for leasehold improvements as follows:

Buildings and leasehold improvements	10 to 25 years
Computer software and equipment	3 to 5 years
Furniture, fixtures and equipment	3 to 7 years

(h) Impairment of Long-Lived Assets Other than Goodwill

The company reviews long-lived assets, including premises and equipment, for impairment on an ongoing basis or whenever events or changes in business circumstances indicate that the remaining useful life may warrant revision or that

the carrying amount of the long-lived asset may not be fully recoverable. If impairment is determined to exist, any related impairment loss is recognized through a charge to earnings. Impairment losses on assets disposed of, if any, are based on the estimated proceeds to be received, less cost of disposal.

(i) Goodwill and Core Deposit Intangible Assets

Goodwill and core deposit intangibles carried on the company's consolidated financial statements were \$5.7 million and \$475 thousand, respectively, at December 31, 2006 and \$5.7 million and \$608 thousand, respectively, at December 31, 2005. Both of these assets are related to the company's acquisition of two branch offices in July 2000.

In accordance with generally accepted accounting principles, the company does not amortize goodwill and instead, at least annually, evaluates whether the carrying value of goodwill has become impaired. Impairment of the goodwill occurs when the estimated fair value of the company is less than its recorded value. A determination that goodwill has become impaired results in immediate write-down of goodwill to its determined value with a resulting charge to operations.

The annual impairment test is a two-step process used to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized, if any. The first step of the goodwill impairment test, used to identify potential impairment, compares the fair value of the reporting unit (in this case, the company) with its carrying amount, or the book value of the reporting unit, including goodwill. If the fair value of the reporting unit equals or exceeds its book value, goodwill is considered not impaired, and the second step of the impairment test is unnecessary. The second step, if necessary, measures the amount of goodwill impairment loss to be recognized. The reporting unit must determine fair values for all assets and liabilities, excluding goodwill. The net of the assigned fair value of assets and liabilities is then compared to the book value of the reporting unit, and any excess book value becomes the implied fair value of goodwill. If the carrying amount of the goodwill exceeds the newly calculated implied fair value of that goodwill, an impairment loss is recognized in the amount required to write down the goodwill to the implied fair value.

The company's consolidated financial statements also include intangible assets (core deposit intangibles), which are amortized to expense over their estimated useful life of ten years and reviewed for impairment on an ongoing basis or whenever events or changes in business circumstances warrant a review of the carrying value. If impairment is determined to exist, the related write-down of the intangible asset's carrying value is charge to operations. Accumulated amortization expense related to core deposit intangible asset was \$859 thousand at December 31, 2006. Amortization expense is expected to amount to \$133 thousand for each of the years ended December 31, 2007, 2008 and 2009, and \$77 thousand in 2010.

Based on these impairment reviews the company determined that goodwill and core deposit intangible assets were not impaired at December 31, 2006.

(j) Income Taxes

The company uses the asset and liability method of accounting for income taxes. Under this method deferred tax assets and liabilities are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities will be adjusted accordingly through the provision for income taxes.

(k) Investment Assets Under Management

Securities and other property held in a fiduciary or agency capacity are not included in the consolidated balance sheets because they are not assets of the company. Investment assets under management, consisting of assets managed by the investment advisory group and the commercial sweep product, totaled \$502.1 million and \$425.0 million at December 31, 2006 and 2005, respectively. Fee income is reported on an accrual basis.

(l) Earnings Per Share

Basic earnings per share are calculated by dividing net income by the weighted average number of common shares outstanding during the year. Diluted earnings per share reflects the effect on weighted average shares outstanding of the number of additional shares outstanding if dilutive stock options were converted into common stock using the treasury stock method.

The table below presents the increase in average shares outstanding, using the treasury stock method, for the diluted earnings per share calculation for the years ended December 31st and the effect of those shares on earnings:

	2006	2005	2004
Basic weighted average common shares outstanding	7,661,178	7,468,498	7,294,760
Dilutive shares	160,119	222,028	318,436
Diluted weighted average common shares outstanding	7,821,297	7,690,526	7,613,196
Basic Earnings per share	\$ 1.21	\$ 1.13	\$ 1.03
Effect of dilutive shares	(0.03)	(0.04)	(0.04)
Diluted Earnings per share	\$ 1.18	\$ 1.09	\$ 0.99

At December 31, 2006 and 2005 there were 16,000 and 417,602 outstanding stock options, respectively, which were excluded from the calculations of diluted earnings per share above, due to the exercise price exceeding the average market price. These options, which were not dilutive as of the calculation date, may potentially dilute earnings per share in the future.

(m) Stock Based Compensation

Prior to January 1, 2006, the company accounted for stock-based compensation plans using the intrinsic value method under which no compensation cost was recorded if, at the grant date, the exercise price of the options was equal to or greater than the fair market value of the company's common stock. Accordingly, prior to 2006, the company did not record compensation cost related to stock option awards. However, the company supplementally disclosed pro forma net income and earnings per share amounts as if the fair value based method of accounting had been applied to its stock-based compensation.

On January 1, 2006, the company adopted Financial Accounting Standards No. 123(R) Share-Based Payment (SFAS 123(R)), using the modified version of the prospective application method. Pursuant to this transition method, beginning in 2006 the company's financial statements include stock-based compensation expense for the portion of stock option awards, net of estimated forfeitures, outstanding on January 1, 2006 and options issued subsequent to January 1, 2006, for which the requisite service has been rendered during the period. The compensation expense has been estimated based on the grant-date fair value estimate of the awards as calculated under the original provisions of SFAS 123 for previous pro forma disclosures and

under the provisions of 123(R) for options issued subsequent to January 1, 2006. The company will recognize the remaining estimated compensation expense for the portion of outstanding awards and compensation expense for any future awards, net of estimated forfeitures, as the requisite service is rendered (i.e., on a straight-line basis over the remaining vesting period of each grant).

(n) Reporting Comprehensive Income

Comprehensive income is defined as all changes to equity except investments by and distributions to stockholders. Net income is one component of comprehensive income, with other components referred to in the aggregate as other comprehensive income. The company's only other comprehensive income component is the net unrealized holding gains or losses on investments available for sale, net of deferred income taxes.

(o) Derivatives

The company recognizes all derivatives as either assets or liabilities in its balance sheet and measures those instruments at fair market value. The company generally originates fixed rate residential mortgage loans with the anticipation of selling such loans. The company generally does not pool mortgage loans for sale but instead sells the loans on an individual basis. The company may retain or sell the servicing when selling these loans. Interest rate lock commitments related to the origination of mortgage loans that will be sold are considered derivative instruments. The company estimates the fair value of these derivatives using the difference between the guaranteed interest rate in the commitment and the current market interest rate. To reduce the net interest rate exposure arising from its loan sale activity, the company enters into the commitment to sell these loans at essentially the same time that the interest rate lock commitment is quoted on the origination of the loan. The commitments to sell loans are also considered derivative instruments, with estimated fair values based on changes in current market rates. At December 31, 2006 the estimated fair value of the company's derivative instruments were considered to be immaterial.

(p) Other Accounting Rule Changes

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*—An Interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 also prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. In addition, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006. The provisions of FIN 48 are to be applied to all tax positions upon initial adoption of this standard. Only tax positions that meet the more-likely-than-not recognition threshold at the effective date may be recognized or continue to be recognized upon adoption of FIN 48. The adoption of FIN 48 did not have a material impact on the company's financial position or results of operation.

In September 2006 the FASB issued Statement of Financial Accounting Standards No. 158 *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*—an amendment of FASB Statements No. 87, 88, 106 and 132(R) (FAS 158). This new statement requires employers to recognize the funded status for pension and other post-retirement benefit plans in its financial statements, and to recognize certain actuarial gains and losses, prior service cost, and any transition amounts when recognizing a plan's funded status, with the offset to other comprehensive income. For fiscal years ending after December 15, 2008, FAS 158 will also require

measurement of plan assets and obligations as of the fiscal year end, eliminating the use of earlier measurement dates currently permissible. Calendar year public companies were required to adopt the provisions of this new statement effective December 31, 2006. The adoption of FAS 158 did not have an impact on the company's financial position or results of operation.

See Supplemental Retirement Plan contained in note 10, Employee Benefit Plans for further information regarding the company's postretirement benefit obligation.

In September 2006 the FASB's Emerging Issues Task Force reached a consensus regarding Issue No. 06-4 (EITF 06-4) Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split Dollar Life Insurance Arrangements. The Task Force affirmed that an employer should recognize a liability for future benefits associated with an endorsement split-dollar life insurance arrangement that provides a benefit to an employee that extends to postretirement periods. The liability and related compensation cost are to be determined in accordance with the appropriate previously issued financial standards. The Task Force concluded that this Issue should be effective through either (a) a change in accounting principle through a cumulative-effect adjustment to retained earnings or to other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption, or (b) a change in accounting principle through retrospective application to all prior periods. The Task Force reached a consensus that this Issue should be effective for fiscal years beginning after December 15, 2007. Management is in the process of determining the impact that adoption EITF No. 06-4 will have on the company's financial position and results of operation.

In September 2006, the Securities and Exchange Commission staff issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB 108). SAB 108 provides interpretive guidance regarding the approach companies must use to quantify the materiality of financial misstatements after considering all relevant quantitative and qualitative factors. The approach requires assessing the impact of correcting misstatements, including the carryover and reversing effects of cumulative prior year misstatements, on the current financial statements. SAB 108 permits companies to apply its provisions by either restating prior financial statements or recording the cumulative effect of initially applying the approach as adjustments to the carrying values of assets and liabilities, with an offsetting adjustment to retained earnings, as of the beginning of the fiscal year of adoption. SAB 108 was required to be applied in the company's annual financial statements covering the fiscal year ended December 31, 2006. The application of SAB 108 did not have an impact on the company's financial position or results of operation.

(2) Investment Securities

The amortized cost and estimated fair values of investment securities at December 31 are summarized as follows:

(Dollars in thousands)	2006 Amortized cost	Unrealized gains	Unrealized losses	Fair Value
Federal agency obligations (1)	\$ 10,481	\$	\$ 76	\$ 10,405
Collateralized mortgage obligations and other mortgage backed securities (CMO/MBS)	62,613		1,182	61,431
Municipal securities	48,382	815	435	48,762
Total fixed income securities	121,476	815	1,693	120,598
Certificates of Deposit	1,033			1,033
FHLB stock, at cost (2)	1,428			1,428
Equity investments	7,766	791	76	8,481
Total investment securities	\$ 131,703	\$ 1,606	\$ 1,769	\$ 131,540

(Dollars in thousands)	2005 Amortized cost	Unrealized gains	Unrealized losses	Fair value
Federal agency obligations (1)	\$ 15,421	\$	\$ 219	\$ 15,202
CMO/MBS	78,690	7	1,554	77,143

FHLB stock, at cost (2)	3,205			3,205
Equity investments	4,832	426	202	5,056
Total investment securities	\$ 157,607	\$ 1,490	\$ 2,576	\$ 156,521

(1) Federal agency obligations include securities issued by government sponsored enterprises such as Fannie Mae, Freddie Mac, and the FHLB. These securities do not represent obligations of the US government and are not backed by the full faith and credit of the United States Treasury.

(2) The bank is required to purchase Federal Home Loan Bank (FHLB) stock in association with outstanding advances from the FHLB; this stock is classified as a restricted investment and carried at cost.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The following table summarizes investments having temporary impairment, due to the fair market values having declined below the amortized costs of the individual securities, and the period that the investments have been impaired.

(Dollars in thousands)	2006		12 months or longer		Total	
	Less than 12 months Fair Value	Unrealized Losses	Fair value	Unrealized Losses	Fair Value	Unrealized Losses
Federal agency obligations	\$	\$	\$ 10,384	\$ (76)	\$ 10,384	\$ (76)
CMO/MBS	3,647	(26)	57,782	(1,156)	61,429	(1,182)
Municipal securities	2,526	(12)	21,732	(423)	24,258	(435)
Equity investments	618	(54)	115	(22)	733	(76)
Total temporarily impaired securities	\$ 6,791	\$ (92)	\$ 90,013	\$ (1,677)	\$ 96,804	\$ (1,769)

(Dollars in thousands)	2005		12 months or longer		Total	
	Less than 12 months Fair Value	Unrealized Losses	Fair value	Unrealized Losses	Fair Value	Unrealized Losses
Federal agency obligations	\$ 15,202	\$ (219)	\$	\$	\$ 15,202	\$ (219)

Municipal securities	12,914	(182)	16,966	(419)	29,880	(601)
Equity investments	1,814	(202)			1,814	(202)
Total temporarily impaired securities	\$ 90,875	\$ (1,760)	\$ 30,974	\$ (816)	\$ 121,849	\$ (2,576)

At December 31, 2006 and 2005, the company had fixed income securities with unrealized losses totaling \$1.7 million and \$2.4 million, respectively. The decline in market value at each of the year end dates was due to interest rate volatility and not credit quality as all of these securities were AAA credit rated. In addition the company has the ability and intent to hold these investments until a market price recovery or maturity. Therefore, the unrealized losses were not considered other-than-temporary in nature.

At December 31, 2006, the company's equity security portfolio had 26 securities with unrealized losses totaling \$76 thousand. Five securities totaling \$22 thousand of the unrealized losses were in existence for greater than twelve months. These unrealized losses were due to normal market volatility and the securities were not considered other than temporarily impaired. Management regularly reviews the portfolio for securities with unrealized losses that are other than temporarily impaired. Management's assessment includes evaluating if any equity securities exhibit fundamental deterioration and whether it is unlikely that the security will completely recover its unrealized loss. Upon such review, there were no securities at December 31, 2006 that were considered other than temporarily impaired.

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-K

The contractual maturity distribution of total fixed income securities at December 31, 2006 is as follows:

(Dollars in thousands)	Amortized cost	Percent	Fair Value	Percent	
Within one year	\$ 4,112	3.4	% \$ 4,073	3.4	%
After one but within three years	19,049	15.7	% 18,795	15.6	%
After three but within five years	16,146	13.3	% 16,062	13.3	%
After five but within ten years	41,239	33.9	% 41,314	34.2	%
After ten years	40,930	33.7	% 40,354	33.5	%
Total fixed income securities	\$ 121,476	100.0	% \$ 120,598	100.0	%

Scheduled contractual maturities may not reflect the actual maturities of the investments. CMO/MBS are shown at their final maturity but are expected to have shorter average lives due to principal prepayments. Included in municipal securities and federal agency obligations are investments that can be called prior to final maturity with amortized cost and fair values of \$35.4 million and \$35.9 million, respectively, at December 31, 2006.

At December 31, 2006, securities with a fair value of \$25.1 million were pledged as collateral for various municipal deposit accounts and repurchase agreements (note 7) and securities with a fair value of \$2.0 million were pledged as collateral for treasury, tax and loan deposits. At December 31, 2005, securities with a fair value of \$12.5 million and \$1.9 million were pledged as collateral for municipal deposit accounts and repurchase agreements, and treasury tax and loan deposits, respectively. At December 31, 2004, securities with a fair value of \$15.1 million and \$2.0 million were pledged as collateral for municipal deposit accounts and repurchase agreements, and treasury tax and loan deposits, respectively.

Securities designated as qualified collateral for FHLB borrowing capacity amounted to \$46.2 million, \$81.2 million and \$122.3 million at December 31, 2006, 2005 and 2004, respectively.

Sales of investment securities for the years ended December 31, 2006, 2005, and 2004 are summarized as follows:

(Dollars in thousands)	2006	2005	2004
Amortized cost of securities sold	\$ 19,917	\$ 1,486	\$ 18,141
Gross realized gains on sales	149	246	907
Gross realized losses on sales	(353)	(55)	(1)
Total proceeds from sales of investment securities	\$ 19,713	\$ 1,677	\$ 19,047

Tax exempt interest earned on the municipal securities portfolio was \$2.0 million for each of the years ended December 31, 2006, 2005 and 2004, respectively.

(3) Loans and Loans Held for Sale

Major classifications of loans and loans held for sale at December 31, are as follows:

(Dollars in thousands)	2006	2005
Real estate:		
Commercial real estate	\$ 368,621	\$ 326,963
Commercial construction	114,078	108,048
Residential mortgages	61,854	47,207
Residential construction	3,981	4,154
Loans held for sale	549	267
Total real estate	549,083	486,639
Commercial and industrial	164,865	165,982
Home equity	44,038	44,444
Consumer	4,307	3,986
Gross loans	762,293	701,051
Deferred loan origination fees, net	(1,180)	(1,325)
Total loans	761,113	699,726
Allowance for loan losses	(12,940)	(12,050)
Net loans and loans held for sale	\$ 748,173	\$ 687,676

Directors, officers, principal stockholders and their associates are credit customers of the company in the normal course of business. All loans and commitments included in such transactions are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unaffiliated persons and do not involve more than a normal risk of collectability or present other unfavorable features.

As of December 31, 2006 and 2005, the outstanding loan balances to directors, officers, principal stockholders and their associates were \$10.0 million and \$10.6 million, respectively. Unadvanced portions of lines of credit available to directors and officers were \$3.2 million and \$3.3 million, as of December 31, 2006 and 2005, respectively. During 2006, new loans and net increases in loan balances or lines of credit under existing commitments of \$702 thousand were made and principal paydowns of \$1.3 million were received. All loans to these related parties are current.

At December 31, 2006 and 2005, the company was servicing residential mortgage loans owned by investors amounting to \$13.5 million and \$14.0 million, respectively. Additionally, the company was servicing commercial loans participated out to various other institutions amounting to \$8.2 million and \$9.0 million at December 31, 2006 and 2005, respectively.

First lien 1-4 family residential mortgage loans designated as qualified collateral for FHLB borrowing capacity amounted to \$42.5 million and \$35.8 million at December 31, 2006 and 2005, respectively. In January 2007, the company increased its FHLB borrowing capacity by pledging additional commercial real estate, home equity and multi-family loans as collateral to the FHLB. The additional loan balances pledged amounted to \$124.7 million at January 31, 2007, and provided an additional \$62.4 in borrowing capacity.

Non-performing assets at December 31 are summarized as follows:

(Dollars in thousands)	2006	2005
Real estate	\$ 788	\$ 356
Commercial and industrial	980	1,117
Consumer, including home equity	17	2
Total non-accrual loans	\$ 1,785	\$ 1,475
Accruing loans > 90 days past due	7	1
Other real estate owned		
Total non-performing assets	\$ 1,792	\$ 1,476

There were no commitments to lend additional funds to those borrowers whose loans were classified as non-accrual at December 31, 2006, 2005, and 2004. The reduction or increase in interest income for the years ended December 31, associated with non-accruing loans is summarized as follows:

(Dollars in thousands)	2006	2005	2004
Income in accordance with original loan terms	\$ 259	\$ 210	\$ 246
Less income recognized	64	32	443
Reduction/(increase) in interest income	\$ 195	\$ 178	\$ (197)

At December 31, 2006 and 2005, total impaired loans were \$1.8 million and \$1.5 million, respectively. In the opinion of management, there were no impaired loans requiring an allocated reserve at December 31, 2006 and 2005, respectively. All of the impaired loans have been measured based on the present value of expected future cash flows. During the years ended December 31, 2006, 2005 and 2004, the average recorded value of impaired loans was \$1.8 million, \$1.8 million and \$3.8 million, respectively. Included in the reduction in interest income in the table above is \$178 thousand, \$174 thousand and \$207 thousand of interest income that was not recognized on loans that were deemed impaired as of December 31, 2006, 2005 and 2004, respectively. All payments received on impaired loans in non-accrual status are applied to principal. The company is not committed to lend additional funds on any loans that are considered impaired.

Changes in the allowance for loan losses for the years ended December 31, are summarized as follows:

(Dollars in thousands)	2006	2005	2004
Balance at beginning of year	\$ 12,050	\$ 10,923	\$ 9,986
Provision charged to operations	1,259	1,135	1,650
Loan recoveries	210	119	272
Loans charged off	(579)	(127)	(985)
Balance at end of year	\$ 12,940	\$ 12,050	\$ 10,923

(4) Premises and Equipment

Premises and equipment at December 31 are summarized as follows:

(Dollars in thousands)	2006	2005
Land	\$ 1,374	\$ 1,374
Buildings and leasehold improvements	16,215	12,066
Computer software and equipment	8,809	7,526
Furniture, fixtures and equipment	6,531	5,088
	32,929	26,054
Less accumulated depreciation	(16,914)	(14,524)
Total premises and equipment, net of accumulated depreciation	\$ 16,015	\$ 11,530

The company is obligated under various non-cancelable operating leases, some of which provide for periodic adjustments. At December 31, 2006 minimum lease payments for these operating leases were as follows:

(Dollars in thousands)	
Payable in:	
2007	\$ 1,036
2008	718
2009	432
2010	362
2011	160
Thereafter	550
Total minimum lease payments	\$ 3,258

Total rent expense for the years ended December 31, 2006, 2005 and 2004 amounted to \$1.0 million, \$862 thousand, and \$787 thousand, respectively.

(5) Accrued Interest Receivable

Accrued interest receivable consists of the following at December 31:

(Dollars in thousands)	2006	2005
Investments	\$ 840	\$ 1,004
Loans and loans held for sale	4,624	3,884
Total accrued interest receivable	\$ 5,464	\$ 4,888

(6) Deposits

Deposits at December 31st are summarized as follows:

(Dollars in thousands)	2006	2005
Demand deposits	\$ 169,910	\$ 173,804
Interest bearing checking	179,533	171,611
Savings	141,734	154,539
Money market	125,052	112,556
Certificates of deposit less than \$100,000	95,651	86,590
Certificates of deposit of \$100,000 or more	90,698	66,299
Brokered certificates of deposit	64,944	9,988
Total deposits	\$ 867,522	\$ 775,387

In the fourth quarter of 2005, a combination of strong commercial loan growth and slower deposit growth, resulted in the company increasing its use of external funding such as brokered certificates of deposits.

The following table shows the scheduled maturities of certificates of deposit with balances less than \$100,000 and greater than \$100,000 at December 31, 2006:

(Dollars in thousands)	Less than \$100,000	\$100,000 and Greater	Total
Due in less than three months(1)	\$ 71,037	\$ 54,182	\$ 125,219
Due in over three through twelve months(1)	75,169	31,847	107,015
Due in over one year through two years	12,526	4,214	16,741
Due in over two years through three years	1,863	352	2,215
Due in over three years through four years	-	103	103
Total certificates of deposit	\$ 160,595	\$ 90,698	\$ 251,293

(1) The line items Due in less than three months and Due in over three through twelve months include brokered certificates of deposit of \$39.9 million and \$25.0 million, respectively, in the less than \$100,000 category.

Interest expense on certificates of deposit with balances of \$100,000 or more amounted to \$3.2 million, \$1.3 million, and \$863 thousand, in 2006, 2005 and 2004, respectively.

The aggregate amount of overdrawn deposits that have been reclassified as loan balances were \$506 thousand and \$572 thousand at December 31, 2006 and 2005, respectively.

(7) Borrowed Funds and Debentures

Borrowed funds and debentures at December 31 are summarized as follows:

(Dollars in thousands)	2006		2005		2004		
	Amount	Average Rate	Amount	Average Rate	Amount	Average Rate	
Securities sold under agreements to repurchase	\$ 4,835	4.82	% \$ 706	1.90	% \$ 1,718	1.84	%
Federal Home Loan Bank of Boston borrowings	10,270	5.20	% 57,933	4.17	% 1,933	2.94	%
Total borrowed funds	15,105	5.08	% 58,639	4.14	% 3,651	2.42	%
Junior subordinated debentures	10,825	10.88	% 10,825	10.88	% 10,825	10.88	%
Total borrowed funds and debentures	\$ 25,930	7.50	% \$ 69,464	5.19	% \$ 14,476	8.74	%

Repurchase agreements for securities sold at December 31, 2006 had maturities ranging generally from one to six months, with a weighted average term of 71 days. Maximum amounts outstanding at any month end during 2006, 2005, and 2004 were \$6.7 million, \$6.4 million, and \$14.5 million, respectively

FHLB borrowings at December 31, 2006 consisted of \$7.0 million in overnight borrowings at 5.06%, \$2.8 million in short-term borrowings, maturing in less than 6 months, at 5.43% and \$470 thousand in a term advance maturing in 6.5 years at 5.94%. Maximum amounts outstanding at any month end during 2006, 2005, and 2004 were \$31.9 million, \$59.0 million, and \$20.7 million, respectively.

The following table summarizes the average balance and average rate paid for securities sold under agreements to repurchase and FHLB borrowings for the year ended December 31,

(Dollars in thousands)	2006		2005		2004		
	Average Balance	Average Rate	Average Balance	Average Rate	Average Balance	Average Rate	
Repurchase agreements	\$ 2,325	4.41	% \$ 2,823	2.59	% \$ 2,867	1.62	%
FHLB advances	17,100	4.71	% 19,250	3.85	% 5,018	1.71	%
Total	\$ 19,425	4.67	% \$ 22,073	3.69	% \$ 7,885	1.67	%

As a member of the FHLB, the bank has the capacity to borrow an amount up to the value of its qualified collateral, as defined by the FHLB which includes access to a pre-approved overnight line of credit for up to 5% of its total assets. Borrowings from the FHLB are secured by certain securities from the company's investment portfolio not otherwise pledged and certain residential and commercial real estate loans. At December 31, 2006, based on qualifying collateral less outstanding advances, the bank had the capacity to borrow additional funds from the FHLB of up to approximately \$63.1 million, which includes a pre-approved overnight line of credit in the amount of \$11.0 million. In January 2007, the company pledged additional loans as collateral to the FHLB and increased its total available borrowing capacity to \$125.5 million.

See note 2 and note 3 above to these consolidated financial statements for further information regarding securities and loans pledged for borrowed funds.

On March 10, 2000 the company organized Enterprise (MA) Capital Trust I (the Trust), a statutory business trust created under the laws of Delaware. The Trust issued \$10.5 million of 10.875% trust preferred securities. The proceeds from the sale of the trust preferred securities were used by the Trust, along with the company's \$325 thousand capital contribution, to acquire \$10.8 million in aggregate principal amount of the company's 10.875% Junior Subordinated Debt Securities that mature in 2030 and are callable beginning in 2010.

(8) Stockholders Equity

The company's authorized capital is divided into common stock and preferred stock. The company is authorized to issue 10,000,000 shares of common stock and 1,000,000 shares of preferred stock.

Holders of common stock are entitled to one vote per share, and are entitled to receive dividends if and when declared by the board of directors. Dividend and liquidation rights of the common stock may be subject to the rights of any outstanding preferred stock.

The company maintains a dividend reinvestment plan (the DRP). The DRP enables stockholders, at their discretion, to elect to reinvest dividends paid on their shares of the company's common stock by purchasing additional shares of common stock from the company at a purchase price equal to fair market value. Shareholders utilized the DRP to reinvest \$944 thousand, of the \$2.1 million total quarterly dividends paid by the company in 2006, into 58,623 shares of the company's common stock.

The company maintains a shareholders rights plan pursuant to which each share of common stock includes a right to purchase under certain circumstances one-four hundredth of a share of the company's Series A Junior Participating Preferred Stock, par value \$0.01 per share, at a purchase price of \$18.75 per one-two hundredth of a preferred share, subject to adjustment, or, in certain circumstances, to receive cash, property, shares of common stock or other securities of the company. The rights are not presently exercisable and remain attached to the shares of common stock until the occurrence of certain triggering events that would ordinarily be associated with an unsolicited acquisition or attempted acquisition of 10% or more of the company's outstanding shares of common stock. The rights will expire, unless earlier redeemed or exchanged by the company, on January 13, 2008. The rights have no voting or dividend privileges, and unless and until they become exercisable have no dilutive effect on the earnings of the company.

Applicable regulatory requirements require the company and the bank to maintain total capital equal to 8.00% of risk-weighted assets (total capital ratio), Tier 1 capital equal to 4.00% of risk-weighted assets (Tier 1 capital ratio) and Tier 1 capital equal to 4.00% of average assets (leverage capital ratio). Tier 1 capital, in the case of the company, is composed of common equity and trust preferred securities, reduced by certain intangible assets. Total capital includes Tier 1 capital plus Tier 2 capital (which in the case of the company is composed of the allowance for loan losses up to 1.25% of risk-weighted assets).

The company is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate or result in certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a material adverse effect on the company's financial statements. Under applicable capital adequacy requirements and the regulatory framework for prompt corrective action applicable to the bank, the company must meet specific capital guidelines that involve quantitative measures of the company's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The company's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Neither the company nor the bank may declare or pay dividends on its stock if the effect thereof would cause stockholders' equity to be reduced below applicable regulatory capital requirements or if such declaration and payment would otherwise violate regulatory requirements.

Quantitative measures established by regulation to ensure capital adequacy require the company to maintain the minimum capital amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined). Management believes, as of December 31, 2006, that the company meets all capital adequacy requirements to which it is subject.

As of December 31, 2006 and 2005, both the company and the bank qualified as well capitalized under applicable Federal Reserve Board and FDIC regulations. To be categorized as well capitalized, the company and the bank must maintain minimum total, Tier 1 and, in the case of the bank, leverage capital ratios as set forth in the following table. The company's and the bank's actual capital amounts and ratios are presented in the following tables.

(Dollars in thousands)	Actual Amount	Ratio		Minimum Capital for Capital Adequacy Purposes Amount	Ratio		Minimum Capital To Be Well Capitalized* Amount	Ratio		
As of December 31, 2006										
The Company										
Total Capital (to risk weighted assets)	\$ 91,237	11.37	%	\$ 64,196	8.00	%	\$ 80,245	10.00	%	
Tier 1 Capital (to risk weighted assets)	80,849	10.08	%	32,098	4.00	%	48,147	6.00	%	
Tier 1 Capital (to average assets)	80,849	8.47	%	38,177	4.00	%	N/A	N/A		
The Bank										
Total Capital (to risk weighted assets)	\$ 90,724	11.31	%	\$ 64,196	8.00	%	\$ 80,245	10.00	%	
Tier 1 Capital (to risk weighted assets)	80,336	10.01	%	32,098	4.00	%	48,147	6.00	%	
Tier 1 Capital (to average assets)	80,336	8.42	%	38,150	4.00	%	47,687	5.00	%	

(Dollars in thousands)	Actual Amount	Ratio		Minimum Capital for Capital Adequacy Purposes Amount	Ratio		Minimum Capital To Be Well Capitalized*	Amount	Ratio
<i>As of December 31, 2005</i>									
The Company									
Total Capital (to risk weighted assets)	\$ 81,603	11.12	%	\$ 58,715	8.00	%	\$ 73,394	10.00	%
Tier 1 Capital (to risk weighted assets)	72,293	9.85	%	29,357	4.00	%	44,036	6.00	%
Tier 1 Capital (to average assets)	72,293	8.04	%	35,945	4.00	%	N/A	N/A	
The Bank									
Total Capital (to risk weighted assets)	\$ 80,802	11.01	%	\$ 58,721	8.00	%	\$ 73,402	10.00	%
Tier 1 Capital (to risk weighted assets)	71,491	9.74	%	29,361	4.00	%	44,041	6.00	%
Tier 1 Capital (to average assets)	71,491	7.96	%	35,918	4.00	%	44,897	5.00	%

* For the bank to qualify as well capitalized, it must maintain a leverage capital ratio (Tier 1 capital to average assets) of at least 5%. This requirement does not apply to the company.

(9) Stock Based Compensation Plans

The company currently has three individual stock incentive plans (the 1988 plan, the 1998 plan as amended in 2001, and the 2003 plan). No additional options or other rights of any kind may be granted under the 1988 plan. The remaining plans permit the Board of Directors under various terms to grant both incentive and non-qualified stock options, stock appreciation rights and other rights for the purchase of newly issued shares of common stock to officers and other employees, directors and consultants. These plans also allow for newly issued shares of common stock to be issued with or without restrictions, to officers and other employees, directors and consultants. As of December 31, 2006, 448,618 shares remain available for future grants under these plans.

To date the company has utilized the plans to issue stock option awards and restricted stock awards to officers and other employees, and stock in lieu of cash fees to directors. No options or other awards of any kind have been granted to consultants.

Total stock-based compensation expense related to these plans was \$459 thousand, \$215 thousand and \$182 thousand for the years ended 2006, 2005 and 2004 respectively. The total tax benefit recognized related to the stock based compensation expense was \$139 thousand, \$89 thousand and \$75 thousand, for the years ended 2006, 2005 and 2004 respectively.

On February 14, 2005 the company's common stock began trading on the NASDAQ® Stock Market, under the symbol EBTC, and all stock options and any other equity based compensation granted after this date utilize the company's NASDAQ® trading price for purposes of determining the fair market value of the common stock on the date of the grant. Prior to February 14, 2005, in the absence of an active trading market for the company's common stock, the per share exercise price on all stock options granted had been determined on the basis of a fair market valuation provided to the company by an outside financial advisor, which does not necessarily reflect the actual prices at

which shares of the common stock had been purchased and sold in privately negotiated transactions.

Stock Option Awards

SFAS 123(R) requires that the stock-based compensation expense recognized in earnings be based on the amount of awards ultimately expected to vest; therefore, a forfeiture assumption must be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The company has estimated forfeitures based on historical experience for the portion of the grant which had vested and/or grants already vested based on similarities in the type of options and employee group. Prior to the adoption of SFAS 123(R), the company was not estimating forfeitures, but was rather adjusting pro forma compensation cost as actual forfeitures occurred, as permitted by SFAS 123. SFAS 123(R) did not require a cumulative adjustment at the time of adoption.

As a result of adopting SFAS 123(R), the company recognized stock-based compensation expense related to stock option awards of \$243 thousand for the year ended December 31, 2006. Accordingly, income before taxes and net income were \$243 thousand and \$192 thousand lower, respectively, than if the company had continued to account for stock-based compensation using the intrinsic value method. The impact on both basic and diluted earnings per share for the year ended December 31, 2006 was a reduction of \$0.025. In addition, in accordance with SFAS 123(R), the company presented a \$22 thousand tax benefit realized on the exercise of stock options as cash flow from financing activities. Prior to adoption, these tax benefits were presented as cash flow from operating activities.

In accordance with the modified prospective transition method, the company's Consolidated Financial Statements for prior periods have not been restated to reflect the impact of SFAS 123(R) or SFAS 123. The pro forma table below reflects net income, basic and diluted earnings per share for years ended December 31, 2005 and 2004 had the company determined stock-based compensation expense based on the fair value at the grant date for its options under SFAS 123:

(Dollars in thousands, except per share data)	2005	2004
Net income as reported	\$ 8,414	\$ 7,507
SFAS 123 compensation cost, net of tax	(251)	(217)
Pro forma net income	\$ 8,163	\$ 7,290
Basic earnings per share as reported	\$ 1.13	\$ 1.03
Pro forma basic earnings per share	1.09	1.00
Diluted earnings per share as reported	1.09	0.98
Pro forma diluted earnings per share	1.06	0.96

Stock option transactions during the year ended December 31, 2006 are summarized as follows:

	Shares	Wtd. Avg. Exercise Price	Wtd. Avg. Remaining Life	Aggregate Intrinsic Value
Outstanding at December 31, 2005	759,478	\$ 11.35	4.62	
Granted	9,000	16.91		
Exercised	(72,382)	4.79		
Forfeited	(20,646)	12.82		
Outstanding December 31, 2006	675,450	12.08	4.02	\$ 2,725,899
Vested and Exercisable at December 31, 2006	445,500	10.66	3.13	\$ 2,424,557

The aggregate intrinsic value in the table above represents the difference between the closing price of the company's common stock on December 31, 2006 and the exercise price, multiplied by the number of options. If the closing price was less than the exercise price of the option, no intrinsic value was assigned to the grant. The intrinsic value of options vested and exercisable represents the total pretax intrinsic value that would have been received by the option holders had all in-the-money vested option holders exercised their options on December 31, 2006. The intrinsic value will change based on the fair market value of the company's stock.

All options that have been granted under the plans generally become exercisable at the rate of 25% a year. In addition, options granted since June 2002 provide for full vesting upon attainment of age 62 while remaining employed with the bank. All options granted prior to 1998 expire 10 years from the grant date. Options granted from 1998 through 2004 expire 7 years from the grant date, and options granted in 2005 and 2006 expire 8 years from the grant date.

Under the terms of the plans, incentive stock options may not be granted at less than 100% of the fair market value of the shares on the date of grant and may not have a term of more than ten years. Any shares of common stock reserved for issuance pursuant to options granted under the 1998 and 2003 plans that are returned to the company unexercised shall remain available for issuance under such plans. For participants owning 10% or more of the company's outstanding common stock (of which there are currently none), incentive stock options may not be granted at less than 110% of the fair market value of the shares on the date of grant.

There were 9,000 options granted in 2006. The per share weighted average fair value of stock options granted in 2006 was determined to be \$3.79. The weighted average fair value of the options was determined to be 22% of the market value of the stock at the date of grant. The average assumptions used in the model for the 2006 grants for the risk-free interest rate, expected volatility, dividend yield and expected life in years were 4.91%, 16%, 1.66% and 6, respectively.

There were 237,300 options granted in 2005. The per share weighted average fair value of stock options granted in 2005 was determined to be \$2.79. The weighted average fair value of the options was determined to be 20% of the market value of the stock at the date of grant. The average assumptions used in the model for the 2005 grants for the risk-free interest rate, expected volatility, dividend yield and expected life in years were 4.13%, 15%, 1.67% and 6, respectively.

There were 215,880 options granted in 2004. The per share weighted average fair value of stock options granted in 2004 was determined to be \$1.54. The weighted average fair value of the options was determined to be 11% of the market value of the stock at the date of grant. The average assumptions used in the model for the 2004 grants for the risk-free interest rate, expected volatility, dividend yield and expected life in years were 3.59%, 15%, 1.53% and 6, respectively.

The expected volatility is the anticipated variability in the company's share price over the expected life of the option. The company's shares began trading on a public exchange in February 2005 and limited trading has occurred. Management determined the company's expected volatility by reviewing the historical volatility of peer financial institutions and a banking index, in addition to reviewing the company's own limited history.

The expected life represents the period of time that the option is expected to be outstanding. The company utilized the simplified method and under this method, the expected term equals the vesting term plus the contractual term divided by 2.

The dividend yield is the company's annualized dividend rate divided by its share price.

The risk-free rate is based on the U.S. Treasury rate in effect at the time of grant for a period equivalent to the expected life of the option.

During 2005, management replaced the Binomial option valuation model (a lattice style model) with the Black-Scholes option valuation model. The company has determined that option values calculated prior to 2005 under the Binomial model are not materially different from those that would have been calculated using the Black-Scholes model.

Total intrinsic value of options exercised in 2006 was \$844 thousand. Cash received from option exercises was \$296 thousand, \$504 thousand and \$422 thousand in 2006, 2005 and 2004, respectively.

The actual tax benefit arising during the period for the tax deduction from the disqualifying disposition of shares acquired upon exercise was \$22 thousand, \$104 thousand and \$21 thousand in 2006, 2005, and 2004, respectively. In accordance with SFAS 123(R), beginning in 2006 this excess tax benefit has been classified under the heading "Cash flows from financing activities" in the Consolidated Statement of Cash Flows. Prior to the adoption of SFAS 123(R), the company presented the tax benefit of stock option exercises as operating cash flows.

As of December 31, 2006, there was \$432 thousand of unrecognized stock-based compensation expense, net of estimated forfeitures, related to non-vested stock options. That cost is expected to be recognized over the remaining weighted average vesting period of 2.4 years.

Restricted Stock Awards

The company has granted one restricted stock award, comprised of 17,500 newly issued shares, in September 2005. The grant date fair value of the restricted stock awarded was \$14.25 per share, which reflects the market value of the common stock on the grant date, based on the average of the high and low trade prices on that date. There were no restricted stock awards granted or forfeited during 2006. The shares granted vest twenty percent per year starting on the first anniversary date of the award. The restricted stock award allows for the receipt of dividends, and the voting of all shares, whether or not vested, throughout the vesting period.

Compensation expense recognized in association with the restricted stock award amounted to \$50 thousand and \$17 thousand, for the years ended 2006 and 2005, respectively. The total tax benefit recognized related to the restricted stock compensation expense was \$20 thousand and \$7 thousand, for the years ended 2006 and 2005 respectively.

As of December 31, 2006, 3,500 shares have vested and 14,000 remain non-vested. As of December 31, 2006, there remained \$183 thousand of unrecognized compensation expense related to the restricted stock award. That cost is expected to be recognized over the remaining vesting period of 3.7 years.

Director Stock Compensation

The members of the company's Board of Directors are offered the choice to receive newly issued shares of the company's common stock in lieu of cash compensation for attendance at Board and Board Committee meetings. Directors must make an irrevocable election to receive shares of common stock in lieu of cash compensation prior to December 31st of the preceding year. Directors are granted shares of common stock in lieu of cash fees at a per share price which reflects the value of the common stock on the first business day of the year, based on the average of the high and low trade prices of the common stock on that date.

Total Director Compensation expense amounted to \$265 thousand, \$283 thousand and \$207 thousand for the years ended December 31, 2006, 2005 and 2004, respectively. Included in the 2006 expense were fees of \$167 thousand, which represented 10,575 shares issued to Directors in January 2007, at a fair market value price of \$15.79 per share, which reflected the value of the common stock on January 3, 2006. Included in the 2005 expense were fees of \$199 thousand, which represented 12,158 shares issued to Directors in December 2005, at a fair market value price of \$16.43 per share, which reflected the fair value of the common stock on January 3, 2005. Included in the 2004 expense were fees of \$182 thousand, which represented 11,866 shares issued to Directors in December 2004, at a fair market value price of \$15.34 per share, which reflected the fair value of the common stock on January 2, 2004. The total tax benefit recognized related to the director stock compensation expense was \$68 thousand, \$82 thousand and \$75 thousand, for the years ended 2006, 2005 and 2004 respectively.

(10) Employee Benefit Plans

401(k) Defined Contribution Plan

The company has a 401(k) defined contribution employee benefit plan. The 401(k) plan allows eligible employees to contribute a base percentage, plus a supplemental percentage, of their pre-tax earnings to the plan. A portion of the base percentage, as determined by the board of directors, is matched by the company. No company contributions are made for supplemental contributions made by participants. The percentage matched was 50%, 75% and 50% in 2006, 2005 and 2004, respectively up to the first 6% contributed by the employee. The company's total expense for the 401(k) plan match, including bonus match and the discretionary match discussed below, was \$374 thousand, \$474 thousand and \$303 thousand, respectively, for the years ended December 31, 2006, 2005, and 2004.

All employees, at least 21 years of age, are immediately eligible to participate. Vesting for the company's 401(k) plan contribution is based on years of service with participants becoming 20% vested after 2 years of service, increasing pro-rata to 100% vesting after 6 years of service. Amounts not distributable to an employee following termination of employment are used to offset plan administration fees.

Employee Bonus Programs

The company bonus program includes all employees. Bonuses are paid to the employees based on the accomplishment of certain goals and objectives that are determined at the beginning of the fiscal year and approved by the compensation committee of the board of directors.

The company also has maintained a supplemental bonus plan for certain senior officers. The goals, objectives and payout schedule of this plan are set by the compensation committee. The plan provides for payment of cash bonuses based on the achievement of certain earnings per share goals.

From time to time the company may also make an annual discretionary employer contribution to the 401(k) plan of an additional percentage of employee contributions.

In 2006, 2005 and 2004 amounts charged to salaries and benefits under these programs were \$496 thousand, \$1.7 million and \$225 thousand, respectively.

Supplemental Retirement Plan

Since 1996 the company has maintained a supplemental retirement plan for its chairman and since 1999 for its president and an executive vice president, (together, the executives). Until 2005, these supplemental retirement plans were provided through split dollar insurance agreements with the executives (Executive Split Dollar Agreements).

In response to potential compliance and tax issues with respect to the Executive Split Dollar Agreements resulting from the enactment of the Sarbanes-Oxley Act of 2002 and the issuance of Internal Revenue Service Notice 2002-8, the company engaged a consultant to advise the Compensation Committee and make recommendations on the best alternative for funding executive officer non-qualified retirement programs.

The objective of the Compensation Committee was to eliminate the compliance and tax concerns associated with the Executive Split Dollar Agreements while maintaining a level of retirement and insurance benefit for each of the executives that would be substantially equivalent to the benefits that had been anticipated under the Executive Split Dollar Agreements. Based upon the consultant's recommendations, in 2005 the Compensation Committee approved a restructuring of the executives' supplemental retirement programs under which the executives assigned ownership of the life insurance policies subject to the Executive Split Dollar Agreements to the company, the Executive Split Dollar Agreements were terminated and the company entered into salary continuation and supplemental life insurance agreements with the executives.

The salary continuation agreements provide for a predetermined fixed-cash supplemental retirement benefit, the amount subject to vesting requirements, to be provided for a period of 20 years after the individual reaches a defined retirement age. In addition, upon an executive's death a death benefit will be paid to his designated beneficiaries.

These non-qualified plans represent direct liabilities of the company, and as such have no specific assets set aside to settle the benefit obligation. The funded status is the aggregate amount accrued, or the Accumulated Postretirement Benefit Obligation, which is equal to the present value of the retirement benefits to be provided to the employee or any beneficiary in exchange for the employee's service rendered to that date. Because the company's retirement benefit obligations provide for predetermined fixed-cash payments the company does not have any unrecognized costs to be included as a component of accumulated other comprehensive income.

The amounts charged to expense for supplemental retirement programs was \$626 thousand, \$664 thousand and \$509 thousand, for the years ended December 31, 2006, 2005 and 2004, respectively.

The following table provides a reconciliation of the changes in the supplemental retirement benefit obligation and the net periodic benefit cost for the years ended December 31:

(Dollars in thousands)	2006	2005
<i>Reconciliation of benefit obligation:</i>		
Previously accrued supplemental retirement benefits	\$	\$ 509
Benefit obligation at beginning of year	1,173	
Service cost	539	615
Interest cost	87	49
Benefit obligation at end of year	\$ 1,799	\$ 1,173
<i>Funded status:</i>		
Accrued liability as of December 31	\$ (1,799)	\$ (1,173)
Discount rate used for benefit obligation	6.00	% 6.00 %
<i>Net periodic benefit cost:</i>		
Service cost	\$ 539	\$ 615
Interest cost	87	49
	\$ 626	\$ 664

Management utilizes the Moody's 20 year A and AA corporate bond rates to evaluate the reasonableness of the discount rate used. The company recognizes that the duration of the benchmark should reflect the timing of the cash flows of each benefit obligation. However, since the duration of most fixed income investments do not exceed 20 years and the cash flows on the benefit obligations may extend to 30-40 years, it was resolved that the company shall assume a long term duration for all participants.

Benefits expected to be paid in each of the next five years and in the aggregate five years thereafter:

(Dollars in thousands)

2007	\$
2008	98
2009	181
2010	244
2011	276
2012-2016	1,379

The company has purchased bank owned life insurance on certain senior officers. The cash surrender value carried on the balance sheet at December 31, 2006 and December 31, 2005 amounted to \$12.2 million and \$3.9 million, respectively. There are no associated surrender charges under the outstanding policies.

See note 9 Stock Based Compensation Plans above, for additional information regarding employee benefits offered in the form of stock option awards.

(11) Income Taxes

The components of income tax expense for the years ended December 31 were calculated using the asset and liability method as follows:

(Dollars in thousands)	2006	2005	2004
Current tax expense:			
Federal	\$ 4,578	\$ 3,734	\$ 3,064
State	1,774	1,622	1,381
Total current tax expense	6,352	5,356	4,445
Deferred tax benefit:			
Federal	(813)	(416)	(41)
State	(196)	(187)	(151)
Total deferred tax benefit	(1,009)	(603)	(192)
Total income tax expense	\$ 5,343	\$ 4,753	\$ 4,253

The provision for income taxes differs from the amount computed by applying the statutory federal income tax rate as follows:

(Dollars in thousands)	2006 Amount	%	2005 Amount	%	2004 Amount	%
Computed income tax expense at statutory rate	\$ 4,956	34.0 %	\$ 4,477	34.0 %	\$ 3,998	34.0 %
State income taxes, net of federal tax benefit	1,041	7.1 %	947	7.2 %	812	6.9 %
Tax exempt interest, net of disallowance	(770)	(5.3 %)	(669)	(5.1 %)	(648)	(5.5 %)
Other	116	0.9 %	(2)	0.0 %	91	0.8 %
Total income tax expense	\$ 5,343	36.7 %	\$ 4,753	36.1 %	\$ 4,253	36.2 %

At December 31 the tax effects of each type of income and expense item that give rise to deferred taxes are:

(Dollars in thousands)	2006	2005
Deferred tax asset:		
Allowance for loan losses	\$ 5,332	\$ 4,908
Depreciation	1,457	1,064
Net unrealized losses on investments securities	110	458
Supplemental employee retirement plans	740	493
Non-accrual interest	227	149
Non-qualified stock option expense	52	
Other		14
Total	7,918	7,086
Deferred tax liability:		
Goodwill	645	483
Deferred origination costs	337	308
Restricted Stock	75	95
Total	1,057	886
Net deferred tax asset	\$ 6,861	\$ 6,200

The company paid federal income taxes for the 2006, 2005, and 2004 of \$3.9 million, \$3.1 million and \$2.8 million, respectively. Management believes that it is more likely than not that current recoverable income taxes and the expectation of future taxable income, based on the company's history of reporting taxable income, will generate sufficient taxable income to realize the deferred tax asset existing at December 31, 2006.

(12) Related Party Transactions

Certain of the company's offices in Lowell, Massachusetts, are leased from realty trusts, the beneficiaries of which included during the years ended December 31, 2006, 2005 and 2004 various directors of the company. The maximum remaining term of the leases including options is 20 years.

Total amounts paid to the realty trusts for annual rent, which approximated market rates, for the years ended December 31, 2006, 2005, and 2004, were \$621 thousand, \$517 thousand, and \$527 thousand, respectively.

See note 3 Loans and Loans Held for Sale above, for information regarding loans to related parties.

(13) Commitments, Contingencies and Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk

The company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans, standby letters of credit and unadvanced lines of credit.

The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheets. The contract amounts of these instruments reflect the extent of involvement the company has in the particular classes of financial instruments.

The company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for loan commitments and standby letters of credit is represented by the contractual amounts of those instruments. The company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Financial instruments with off-balance sheet credit risk at December 31, 2006 and 2005 are as follows:

(Dollars in thousands)	2006	2005
Commitments to originate loans	\$ 49,961	\$ 34,584
Commitments to originate loans to be sold	1,607	1,300
Commitments to sell loans	2,156	1,567
Standby letters of credit	17,618	16,116
Unadvanced portions of consumer loans (including credit card loans and overdraft protection lines)	4,143	3,899
Unadvanced portions of construction loans (cmml & resid)	71,223	75,047
Unadvanced portions of home equity lines	51,585	48,046
Unadvanced portions of commercial loans and lines	120,259	103,922

Commitments to originate loans are agreements to lend to a customer provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the company upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include security interests in mortgages, accounts receivable, inventory, property, plant and equipment and income-producing properties.

The company originates residential mortgage loans under agreements to sell such loans, generally with servicing released. At December 31, 2006 and 2005, the company had commitments to sell loans totaling \$2.2 million and \$1.6 million respectively.

Standby letters of credit are conditional commitments issued by the company to guarantee the performance by a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. If the letter of credit is drawn upon the company creates a loan for the customer with the same criteria associated with similar loans. The fair value of these commitments were estimated to be the fees charged to enter into similar agreements. The estimated fair value of these commitments carried on the balance sheet was \$31 thousand and \$36 thousand at December 31, 2006 and 2005, respectively. These amounts are amortized to income over the life of the letters of credit, typically one year.

The company manages its loan portfolio to avoid concentration by industry or loan size to minimize its credit risk exposure. Commercial loans may be collateralized by the assets underlying the borrower's business such as accounts receivable, equipment, inventory and real property. Residential mortgage and home equity loans are secured by the real property financed. Consumer loans such as installment loans are generally secured by the personal property financed. Credit card loans are generally unsecured. Commercial real estate loans are generally secured by the underlying real property and rental agreements.

The bank is required by the Federal Reserve Bank of Boston (FRB) to maintain in reserves certain amounts of vault cash and/or deposits with the FRB. The average daily reserve requirement included in Cash and Due from Banks was approximately \$533 thousand and \$474 thousand, based on the two week computation periods encompassing December 31, 2006, and 2005, respectively.

The company is involved in various legal proceedings incidental to its business. After review with legal counsel, management does not believe resolution of any present litigation will have a material adverse effect on the financial condition or results of operations of the company.

(14) Fair Values of Financial Instruments

The following methods and assumptions were used by the company in estimating fair values of its financial instruments:

The respective carrying values of certain financial instruments approximated their fair value, as they were short-term in nature or payable on demand. These include cash and due from banks, total short-term investments, accrued interest receivable, repurchase agreements, accrued interest payable and non-certificate deposit accounts.

Investments: Fair values for investments were based on quoted market prices, where available. If quoted market prices were not available, fair values were based on quoted market prices of comparable instruments. The carrying amount of FHLB stock reported approximates fair value. If the FHLB stock is redeemed, the company will receive an amount equal to the par value of the stock.

Loans: The fair values of loans, was determined using discounted cash flow analysis, using interest rates currently being offered by the company. The incremental credit risk for non-accrual loans was considered in the determination of the fair value of the loans.

Commitments: The fair values of the unused portion of lines of credit and letters of credit were estimated to be the fees currently charged to enter into similar agreements. Commitments to originate non-mortgage loans were short-term and were at current market rates and estimated to have no significant change in fair value.

Financial liabilities: The fair values of certificates of deposit and FHLB borrowings were estimated using discounted cash flow analysis using rates offered by the bank, or advance rates offered by the FHLB on December 31, 2006 for similar instruments. The fair value of junior subordinated debentures was estimated using discounted cash flow analysis using a market rate of interest at December 31, 2006.

Limitations: The estimates of fair value of financial instruments were based on information available at December 31, 2006 and 2005 and are not indicative of the fair market value of those instruments as of the date of this report. These estimates do not reflect any premium or discount that could result from offering for sale at one time the company's entire holdings of a particular financial instrument. Because no active market exists for a portion of the company's financial instruments, fair value estimates were based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates were based on existing on- and off-balance sheet financial instruments without an attempt to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments, including premises and equipment and foreclosed real estate.

86

In addition, the tax ramifications related to the realization of the unrealized appreciation and depreciation can have a significant effect on fair value estimates and have not been considered in any of the estimates. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the company.

(Dollars in thousands)	2006 Carrying Amount	Fair Value	2005 Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	\$ 50,887	\$ 50,887	\$ 38,381	\$ 38,381
Investment securities	131,540	131,540	156,521	156,521

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Enterprise Bancorp, Inc.:

We have audited the accompanying consolidated balance sheets of Enterprise Bancorp, Inc. and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2006. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Enterprise Bancorp, Inc. and subsidiaries as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Enterprise Bancorp, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 15, 2007 expressed an unqualified opinion on management's assessment of, and the effective operation of, internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Enterprise Bancorp, Inc.:

We have audited management's assessment, included in the accompanying Management Report on Effectiveness of Internal Control Over Financial Reporting and Compliance with Designated Laws and Regulations, that Enterprise Bancorp, Inc. and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Enterprise Bancorp, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

91

In our opinion, management's assessment that Enterprise Bancorp, Inc. and subsidiaries maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Also, in our opinion, Enterprise Bancorp, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Enterprise Bancorp, Inc. and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2006, and our report dated March 15, 2007 expressed an unqualified opinion on those consolidated financial statements.

Item 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The company maintains a set of disclosure controls and procedures designed to ensure that the information required to be disclosed in reports that it files or submits to the SEC under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

The company carried out an evaluation as of the end of the period covered by this report, under the supervision and with the participation of the company's management, including its chief executive officer and chief financial officer, of the effectiveness of the design and operation of the company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b). Based upon that evaluation, the company's chief executive officer and chief financial officer concluded that the company's disclosure controls and procedures are effective.

Management's Report on Internal Control Over Financial Reporting

The company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The company's internal control system was designed to provide reasonable assurance to the company's management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, however, no matter how well designed, have inherent limitations and may not prevent or detect misstatement. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

The company's management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2006. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework. Based on management's assessment, the company believes that, as of December 31, 2006, the company's internal control over financial reporting is effective based on these criteria.

The company's independent registered public accounting firm has issued an audit report on management's assessment of the company's internal control over financial reporting, which appears on page 91 of this report.

Changes in Internal Controls Over Financial Reporting

There has been no change in the company's internal controls over financial reporting that has occurred during the company's most recent fiscal quarter (i.e., the three months ended December 31, 2006) that has materially affected, or is reasonably likely to materially affect, such internal controls.
