Cautionary Note Regarding Forward-Looking Statements

Our disclosure and analysis in this report, including Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Statements that are not purely historical may be forward-looking. You can identify these forward-looking statements by the use of words such as anticipate, believe, estimate, expect, hope, intend, may, project, plan, goal, target, should, and similar expressions, including when used in the negative.

Forward-looking statements are subject to various risks and uncertainties. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in these statements. The following are some of the factors that could affect our financial performance or could cause actual results to differ materially from estimates contained in or underlying the forward-looking statements:

- *our business model has changed significantly since our inception in response to a constantly changing and evolving market, which may make it difficult to evaluate our business and prospects, and may expose us to increased risks and uncertainties;*
- *we have incurred significant operating losses since our inception and may not achieve or sustain profitability in the future;*
- *failure to comply with covenants contained in our loan agreements could trigger prepayment obligations, which could adversely affect our results of operations and financial condition;*
- *we may not be able to raise additional capital to fund future operating losses;*
- *the Securities and Exchange Commission is investigating us and the results of that investigation could have a material adverse effect on our business, results of operations and financial condition;*
- *it is difficult for us to estimate our future operating results;*
- *we operate in a highly competitive industry and if we are unable to compete successfully, our revenue and profitability will be adversely affected;*

- *we recently acquired EnerPath International Holding Company, and we may not realize the expected benefits of the acquisition should we encounter integration difficulties or other challenges;*
- *we depend upon a limited number of utility contracts to generate substantially all of our revenues; and*
- *failure of our subcontractors to properly and effectively perform their services in a timely manner could cause delays in the delivery of our energy efficiency solutions.*

The factors listed above should not be construed as exhaustive and should be read in conjunction with the risk factors set forth in our Annual Report on Form 10-K for the year ended December 31, 2015;

Table of Contents

particularly under Item 1A, Risk Factors. Any forward-looking statements speak only as of the date the statement is made and, except as otherwise required by federal securities laws, we do not undertake any obligation to publicly update, review or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason. It is not possible to identify all of the risks, uncertainties and other factors that may affect future results. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this report may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. Accordingly, users of this report are cautioned not to place undue reliance on the forward-looking statements.

Table of Contents

Note 1 Basis of Presentation

The accompanying unaudited condensed consolidated financial statements (the *Financial Statements*) of Lime Energy Co. (*Lime Energy* and, together with its subsidiaries, the *Company*, *we*, *us* or *our*) have been prepared in accordance with Rule 10-01 of Regulation S-X promulgated by the Securities and Exchange Commission (the *SEC*) and, therefore, do not include all information and footnotes necessary for a fair presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America (*GAAP*). In management's opinion, however, the Financial Statements contain all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the Company's financial position, results of operations and cash flows as of and for the interim periods.

The results of operations for the three months ended March 31, 2016 are not necessarily indicative of the results to be expected for the full year.

The December 31, 2015 balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. For further information, refer to the audited financial statements and the related footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Starting on March 24, 2015, the date of the acquisition of EnerPath, the results of EnerPath's operations have been consolidated with the Company's results. For a more complete discussion of the EnerPath acquisition, refer to Note 5 Acquisition of EnerPath below.

Note 2 - Share-Based Compensation

The Compensation Committee of the Board of Directors of the Company (the *Board*) grants stock options and restricted stock under the Company's 2008 Long Term Incentive Plan (as amended, the *2008 Plan*). Prior to an amendment to the 2008 Plan that became effective on October 15, 2015, the 2008 Plan provided that up to 407,143 shares of common stock could be delivered under the plan to certain of the Company's employees, consultants, and non-employee directors. As amended, the 2008 Plan provides for the issuance of up to 1,585,718 shares of common stock. In addition, the 2008 Plan provides for an automatic annual increase in the number of shares of common stock reserved under the plan in an amount equal to 35,715 shares.

As of March 31, 2016, there were 1,389,599 shares of common stock reserved for issuance under the 2008 Plan. During the first three months of 2016, no options were granted under the 2008 Plan, and options to purchase 1,277,751 shares were outstanding under the 2008 Plan as of March 31, 2016.

All options granted under the 2008 Plan were granted at a price equal to or greater than the market price of the Company's stock on the date of grant. Substantially all outstanding stock options under the 2008 Plan vest ratably over three years and expire 10 years from the date of grant. In addition to grants made under the 2008 Plan, the Company gave employees the right to purchase shares at a discount to the market price under the Company's employee stock purchase plans. The employee stock purchase plans allow Company employees to purchase the Company's common stock at a discount using payroll deductions and entitles employees in the United States to receive favorable tax treatment provided by the Internal Revenue Code of 1986, as amended.

Table of Contents

During the first quarter of 2015, the Board adopted, and subsequently the shareholders approved, the Lime Energy Co. 2014 Employee Stock Purchase Plan (the "2014 ESPP"). The 2014 ESPP provided for two successive six-month offering periods commencing on July 1, 2014 and January 1, 2015, respectively. During the second quarter of 2015, the Board adopted, and subsequently the Company's shareholders approved, the Lime Energy Co. 2015 Employee Stock Purchase Plan (the "2015 ESPP"), which became effective on June 18, 2015. The 2015 ESPP provides for the issuance of up to 100,000 shares of common stock in two successive six-month offering periods commencing on July 1, 2015 and January 1, 2016, respectively. As of March 31, 2016 approximately 256 persons were eligible to participate in the 2015 ESPP.

The Board grants restricted stock to non-employee directors under the Company's 2010 Non-Employee Directors Stock Plan (the "Directors' Plan"). Restricted stock granted to date under the Directors' Plan for Board service vest 50% upon grant and 50% on the first to occur of the first anniversary of the grant date, if the director is then still serving on the Board, or the director's death, disability, or retirement. Restricted stock granted under the Directors' Plan for committee service vest 50% upon grant and 50% on the first to occur of the first anniversary of the grant date, if the director is then still serving on the committee, or the director's death, disability, or retirement. During the first three months of 2016, the Company granted 41,664 shares of restricted stock under the Directors' Plan. As of March 31, 2016, there were 242,700 shares of common stock available for issuance under the Directors' Plan.

The Company accounts for employee share-based awards in accordance with Accounting Standards Codification (ASC) 718 Compensation Stock Compensation, which requires companies to measure the cost of employee service received in exchange for a share-based award based on the fair value of the award at the date of grant, with expense recognized over the requisite service period (generally equal to the vesting period of the grant).

The following table summarizes the Company's total share-based compensation expense (in thousands):

Three months ended March 31,	2016	2015
Stock options	\$ 178	\$ 51
Restricted stock	88	158
Employee Stock Purchase Plan	15	16
	\$ 281	\$ 225

Edgar Filing: LIME ENERGY CO. - Form 10-Q

Table of Contents

The compensation expense to be recognized in future periods related to the Company's employee options and restricted stock is as follows:

As of March 31, 2016	Unrecognized Compensation Expense (in thousands)	Weighted Average Remaining Life (in Months)
Stock options	\$ 797	10.0
Restricted stock	\$ 68	4.7

Note 3 Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-02, Leases (Topic 842). ASU 2016-02 will require organizations that lease assets referred to as lessees to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. Under the new guidance, a lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months. Consistent with current GAAP, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. However, unlike current GAAP which requires only capital leases to be recognized on the balance sheet the new ASU will require both types of leases to be recognized on the balance sheet. ASU 2016-02 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company is currently evaluating the impact of adopting ASU 2016-02 on its consolidated financial statements and related disclosures.

In January 2016, FASB issued ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities. ASU 2016-01 provides guidance concerning certain matters involving the recognition, measurement, and disclosure of financial assets and financial liabilities. The guidance does not alter the basic framework for classifying debt instruments held as financial assets. ASU 2016-01 is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is not permitted, with some exceptions. The adoption of ASU 2016-01 will not have a material impact on the Company's consolidated financial statements and related disclosures.

In November 2015, FASB issued ASU 2015-17, Balance Sheet Classification of Deferred Taxes. ASU 2015-17 simplifies the presentation of deferred income taxes and requires deferred tax liabilities and assets be classified as non-current in a classified statement of financial position. ASU 2015-17 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Earlier application is permitted for all entities as of the beginning of an interim or annual reporting period. ASU 2015-17 may be applied either prospectively or retrospectively to all periods presented. The Company is currently evaluating the impact of adopting ASU 2015-17 on its consolidated financial statements and related disclosures.

In May 2014, FASB issued ASU 2014-09, Revenue from Contracts With Customers. ASU 2014-09 supersedes nearly all existing guidance on revenue recognition under GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which the Company expects to be entitled for those goods or

Table of Contents

services using a defined five-step process. More judgment and estimates may be required to achieve this principle than under existing GAAP. ASU 2014-09 is effective for annual periods beginning after December 15, 2017, including interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients or (ii) a retrospective approach with the cumulative effect upon initial adoption recognized at the date of adoption which includes additional footnote disclosures. The Company is currently evaluating the impact of adopting ASU 2014-09 on its consolidated financial statements and has not yet determined the method of adoption.

In April 2015, FASB issued ASU 2015-03, Simplifying the Presentation of Debt Issuance Costs. ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. FASB issued the ASU to simplify the presentation of debt issuance costs, and to align with other existing FASB guidance. ASU 2015-03 is effective for annual periods beginning after December 15, 2015, and interim periods within those annual periods. The adoption of this standard did not have a significant impact on the Company's consolidated financial statements.

Note 4 Earnings Per Share

The Company computes income or loss per share under ASC 260 Earnings Per Share, which requires presentation of two amounts: basic and diluted loss per common share. Basic loss per common share is computed by dividing income or loss available to common stockholders by the number of weighted average common shares outstanding, and includes all common stock issued. Diluted earnings include all common stock equivalents. The Company has not included the outstanding options or warrants as common stock equivalents in the computation of diluted loss per share for the three months ended March 31, 2016 and 2015, because the effect would be anti-dilutive.

The following table sets forth the weighted average shares issuable upon exercise of outstanding options:

Three months ended March 31,	2016	2015
Weighted average shares issuable upon exercise of outstanding options	1,277,751	395,327
Weighted average shares issuable upon exercise of outstanding warrants	14,019	
Weighted average shares issuable upon conversion of convertible preferred stock	4,166,666	
Weighted average shares issuable upon conversion of convertible debt	3,718,354	
Total	9,176,790	395,327

Table of Contents**Note 5 Acquisition of EnerPath**

On March 24, 2015, the Company acquired EnerPath International Holding Company, a Delaware corporation (EnerPath). EnerPath is a California-based provider of software solutions and program administration for utility energy efficiency programs. The consideration paid in connection with the EnerPath acquisition was approximately \$11 million in cash with \$0.3 million held in escrow, subject to adjustment as set forth in the Agreement and Plan of Merger by and among EIHC Merger Sub, Inc., a wholly-owned subsidiary of the Company, EnerPath, and the EnerPath stockholders.

The fair values of the assets acquired and liabilities assumed related to the acquisition are based on estimates and assumptions.

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of the closing of the acquisition (in thousands):

Current assets	\$	8,932
Property and equipment		153
Other assets		41
Intangible assets - finite life		5,595
Goodwill		2,164
Total assets acquired		16,885
Current Liabilities assumed		(4,639)
Deferred income tax liability		(1,246)
Net assets acquired	\$	11,000

The intangible assets acquired from EnerPath, fair value, average amortization periods, and estimated annual amortization expense are as follows:

	Fair Value	Average Amortization Method/Period	Estimated Annual Amortization Expense
Customer relationships	\$ 1,505	Cash flow/7 years	\$ 215
Enerworks System Software	3,265	SL/4 years	816
Trade name	825	SL/3 years	275
	\$ 5,595		\$ 1,306

Acquisition costs on the Unaudited Condensed Consolidated Statements of Operations are related to acquisition activities, which include legal, accounting, banking, and other expenses.

Table of Contents

Note 6 Subordinated Convertible Term Notes

2015 Convertible Debt Financing to Fund Acquisition:

The Company financed the purchase price of the acquisition of EnerPath (as described in *Note 5* above) through the issuance of debt. The Company entered into a Note Purchase Agreement (the "Note Purchase Agreement") with Bison Capital Partners IV, L.P. ("Bison") on March 24, 2015, pursuant to which the Company issued a subordinated convertible note due March 24, 2020 (the "Bison Note") in the principal amount of \$11,750,000 (the "Note Issuance"). The proceeds from the sale of the Bison Note were used to finance the EnerPath Acquisition and to pay \$0.9 million of fees and expenses incurred in connection therewith, including fees and expenses incurred in connection with the Note Purchase Agreement, which were capitalized and included as a discount to long-term debt. As of the date the Bison Note was issued, Bison owned 10,000 shares of the Company's Series C Convertible Preferred Stock (the "Series C Preferred Stock") which was, as of the date thereof, convertible into approximately 30% of the Company's common stock and was the Company's single largest stockholder. Two members of the Board, Andreas Hildebrand and Peter Macdonald, are partners of an affiliate of Bison. As such, they recused themselves from the Board's consideration of the Note Issuance.

Based upon the initial conversion price of the Bison Note (\$3.16), all or any portion of the principal amount of the Bison Note, plus, subject to the terms of the Bison Note, any accrued but unpaid interest, but not more than the principal amount of the Bison Note, may, at the election of the note holder, be converted into 3,718,354 shares of common stock after March 24, 2018 or the occurrence of a change of control of the Company, whichever occurs first. The conversion price is subject to anti-dilution adjustments in connection with stock splits and similar occurrences and certain other events set forth in the Bison Note, including future issuances of common stock or common stock equivalents at effective prices lower than the then-current conversion price. Due to the terms of the anti-dilution provision, the Company separated this conversion feature from the debt instrument and accounts for it as a derivative liability that must be carried at its estimated fair value with changes in fair value reflected in the Company's Consolidated Statements of Operations. Upon issuance, the initial estimate of fair value was established as both a derivative liability and as a discount on the Bison Note. That discount, absent the amendments to the Bison Note described below, would have been amortized to interest expense over the term of the Bison Note. The Company determined the estimated fair value of the derivative liability to be \$7.4 million and \$6.6 million as of March 31, 2016 and December 31, 2015, respectively.

The fair value of the derivative liability was determined using a binomial option pricing model with the following assumptions: a risk-free rate of 1.20%; expected volatility of 84%; a maturity date of March 24, 2020; probability factors regarding the Company's ability to meet the EBITDA covenants in the Bison Note; and a 0% probability that a future financing transaction would reduce the conversion price.

On March 31, 2015, the Company executed an amendment to the Bison Note ("Amendment No. 1"). The Amendment provided that, should the Company fail to meet certain trailing EBITDA targets as of June 30, September 30 or December 31, 2015, then for each such quarter in which such EBITDA target was not met, an additional \$1 million in interest would have accrued and been added to the note principal. The Company was in compliance with all of the financial covenants in Amendment No. 1 and no penalty interest was accrued.

On March 30, 2016, the Company entered into a second amendment to the Bison Note ("Amendment No. 2"). Amendment No. 2 revised the covenants related to minimum consolidated EBITDA for the four consecutive fiscal quarters ending March 31, June 30, September 30 and December 31, 2016. Pursuant to Amendment No. 2, if the Company fails to meet the specified trailing EBITDA targets for any of these quarters, then for each such quarter in which such EBITDA target is not met up to an additional \$500 thousand in interest will accrue and be added to the note principal. As a result of Amendment No. 2, the Company's failure to meet the specified trailing EBITDA targets for any of the four consecutive fiscal

Table of Contents

quarters ending March 31, June 30, September 30 and December 31, 2016 would not be an event of default under the Bison Note. Amendment No. 2 did not, however, revise the required minimum consolidated EBITDA targets for periods subsequent to December 31, 2016. Going forward, if the Company is unable to further amend the Bison Note or significantly improve its EBITDA, the Company's consolidated EBITDA may not exceed the minimum consolidated EBITDA tests required by the Bison Note and, as a result, an event of default would exist under the Bison Note for which Bison could accelerate the Company's repayment of the indebtedness.

Pursuant to prevailing accounting guidance, Amendment No. 2, for accounting purposes, was treated as an extinguishment of the original amended note and the issuance of a new note, with the conversion derivative left intact and unchanged. Upon extinguishment, the net carrying amount of the extinguished note (including its principal amount and related discounts) of \$7.4 million was written off and the fair value of the amended note was established, resulting in a net charge to earnings in the statement of operations of \$2.1 million. The fair value of the amended note was determined by reference to its probability weighted average expected cash flows discounted at an estimated market interest rate for a hypothetical similar non-convertible note issued by the Company. The March 30, 2016 carrying value of \$9.5 million will incur interest charges at an effective interest rate required to result in the ultimate amount of cash flows needed to service the Bison Note. As of March 30, 2016, that effective interest rate is estimated at 26.4% but may change depending on actual cash requirements to service the Bison Note pursuant to the various interest payment alternatives described above.

As of March 31, 2016, the Company was not in compliance with the revised covenants related to minimum consolidated EBITDA and, as a result, \$500 thousand of interest was accrued and added to the note principal. As of March 31, 2016, \$13,014,719 in principal amount, including accrued interest, was outstanding under the Bison Note.

Note 7 Sale of Series C Preferred Stock

On December 23, 2014, the Company entered into a Preferred Stock Purchase Agreement with Bison, pursuant to which Bison purchased 10,000 shares of the Company's Series C Preferred Stock at a price of \$1,000 per share of Series C Preferred Stock.

The shares of Series C Preferred Stock are entitled to an accruing dividend of 12.5% per annum of their base amount (subject to adjustments for stock splits, combinations and similar recapitalizations), payable every six months. The base amount is adjusted on each dividend payment date for the unpaid dividends accrued. The Company accrued dividends of \$352 thousand and \$308 thousand during the three months ended March 31, 2016 and 2015, respectively.

The shares of Series C Preferred Stock may be converted, at any time, at the option of the holder, into shares of the Company's common stock at a conversion price which was initially equal to \$2.40 per share (the Series C Conversion Price). The Series C Conversion Price shall be proportionately adjusted for stock splits, combinations and similar recapitalizations, and shall be adjusted for future issuances of common stock. Upon conversion, all accrued, undeclared and unpaid dividends on the shares of Series C Preferred Stock so converted shall be cancelled.

At any time after the fourth anniversary of the closing date, the Company shall have the right to redeem all, but not less than all, of the shares of Series C Preferred Stock for an amount equal to the original issue price of the shares plus all accrued but unpaid dividends, with such redemption to occur 30 days after the Company's giving notice thereof to the holder(s) of the shares of Series C Preferred Stock. During such 30-

Edgar Filing: LIME ENERGY CO. - Form 10-Q

Table of Contents

day period, the holders of the Series C Preferred Stock may convert the Series C Preferred Stock to common stock in lieu of receiving the redemption payment. At any time after the fourth anniversary of the closing date, a holder of Series C Preferred Stock shall have the right to require the Company to redeem all or a portion of its Series C Preferred Stock for an amount equal to the original issue price of the shares plus all accrued but unpaid dividends. In the event the Company fails to make the required redemption payment by the date fixed for such payment, the dividend rate will increase to 15% per annum and increase by an additional 1% per annum each quarter until paid.

In connection with the issuance of the Series C Preferred Stock, the Company, Bison, Richard Kiphart and The John Thomas Hurvis Revocable Trust entered into a Shareholder and Investor Rights Agreement dated as of December 23, 2014 (the "Shareholder Agreement"). Pursuant to the terms of the Shareholder Agreement, in the event the Company proposes to issue new securities (subject to certain exceptions), the Company must allow Bison to purchase a proportion of the new securities equal to the number of shares of common stock beneficially owned by Bison divided by the total number of shares of common stock then outstanding, on a fully-diluted basis.

The Shareholder Agreement also provides Bison with operational consent rights and director appointment rights that apply so long as Bison holds at least five percent of the total voting power of the Company. The stockholders of the Company party to the Shareholder Agreement have agreed to vote in favor of Bison's director appointees. The Shareholder Agreement entitles Bison to appoint one director to the Company's Compensation Committee and any new board committee that is established, other than the Audit Committee or the Governance and Nominating Committee. It also entitles Bison to receive certain financial information. Bison may not, subject to certain exceptions in the Shareholder Agreement, acquire additional shares of common stock or seek to influence the management of the Company without the Company's consent. Such restrictions will no longer apply upon certain changes of control of the Company.

If, on the fifth anniversary of the closing date or any succeeding anniversary of such date, ten percent of the average daily trading volume of common stock is less than the number of shares of common stock beneficially owned by Bison divided by 240, then Bison may require the Company to initiate a sale process. Subject to the terms of the Shareholder Agreement, the stockholders of the Company party to the Shareholder Agreement have agreed to vote in favor of and otherwise support such a sale. If such a sale is not consummated within nine months, Bison shall have the right to require the Company to purchase, subject to the terms of the Shareholder Agreement, all or any portion of its Series C Preferred Stock or common stock into which such Series C Preferred Stock has converted, for a per share price generally equal to the average closing price of the Company's common stock for the 60 trading days immediately preceding giving notice of exercise of such right.

The Company incurred costs of approximately \$617 thousand to issue the Series C Preferred Stock. These costs were recorded net of the proceeds of the Series C Preferred Stock. The Series C Preferred Stock is classified outside of permanent equity as the rights of redemption and the ability to initiate a sale are not solely within the control of the Company.

The Company has used the cash proceeds from the sale of the Series C Preferred Stock for general corporate purposes and intends to use the remaining amounts for similar purposes.

On March 24, 2015, the Company amended and restated the Shareholder Agreement (as amended and restated, the "Amended and Restated Shareholder Agreement") and that certain Registration Rights Agreement dated December 23, 2014 by and among the Company, Bison and certain other stockholders of the Company (as amended and restated, the "Amended and Restated Registration Rights Agreement").

Table of Contents

Pursuant to the terms of the Amended and Restated Shareholder Agreement, in the event the Company proposes to issue new securities (subject to certain exceptions), the Company must allow Bison to purchase a proportion of the new securities equal to the number of shares of common stock beneficially owned by Bison (including the shares of common stock into which the Bison Note could convert) divided by the total number of shares of common stock outstanding on a fully-diluted basis. The operational consent rights and director appointment rights held by Bison under the Shareholder Agreement remain in the Amended and Restated Shareholder Agreement; provided, however, that, in the event Bison is no longer entitled to designate at least one director under the terms of the Series C Preferred Stock, Bison will be entitled under the Amended and Restated Shareholder Agreement to designate that number of directors that is consistent with its ownership of common stock (including shares of common stock that are convertible from the Series C Preferred Stock and the Bison Note, assuming the Bison Note was immediately convertible) if it holds at least five percent of the common stock (computed in the same fashion).

Pursuant to the Amended and Restated Registration Rights Agreement, Bison is entitled to certain registration rights in connection with the common stock into which its shares of Series C Preferred Stock and the Bison Note may convert, including the right to demand the registration of such shares at any time after December 23, 2015 and rights to include such shares in other registration statements filed by the Company. Additionally, Mr. Kiphart and the John Thomas Hurvis Revocable Trust are entitled to include certain of their shares of common stock in a registration statement filed by the Company. The Company has agreed to indemnify the other parties to the Amended and Restated Registration Rights Agreement in connection with any claims related to their sale of securities under a registration statement, subject to certain exceptions.

Note 8 Letter of Credit Agreement

On August 1, 2014, the Company entered into a Letter of Credit Agreement with Mr. Kiphart (the "LOC Agreement"), which replaced a previous letter of credit agreement the Company had entered into with Mr. Kiphart on December 7, 2012. Pursuant to the LOC Agreement, Mr. Kiphart agreed to cause, at the Company's request, the issuance of one or more letters of credit (collectively, the "Kiphart Letter of Credit") for the benefit of a surety, up to an aggregate amount of \$1.3 million. The Kiphart Letter of Credit was used to guarantee certain obligations of the Company in connection with its performance under a contract between the Company and a utility customer.

The Company agreed to pay Mr. Kiphart simple interest on the aggregate amount of the Kiphart Letter of Credit at a rate of six percent per annum. The Company accrued interest of \$19 thousand during the three months ended March 31, 2015.

As consideration for Mr. Kiphart's obligations under the LOC Agreement, the Company issued to Mr. Kiphart warrants to purchase 50,000 shares of the Company's common stock. The value of the warrants, which had been determined to be \$100 thousand, was capitalized as deferred financing costs. In connection with the issuance of Series C Preferred Stock discussed in Note 7 "Sale of Series C Preferred Stock", the warrants were forfeited and deferred financing costs of \$100 thousand were recorded to interest expense.

In May 2015, the Company replaced the Kiphart Letter of Credit with restricted funds of the Company. The restriction on these funds was released in January 2016 as the Company entered into two letter of credit agreements with Heritage Bank of Commerce in December 2015 for letters of credits of \$1.3 million and \$0.1 million (the "Letters of Credit") as discussed under Note 9 "Line of Credit - Heritage Bank of Commerce". The Letters of Credit are used to guarantee certain obligations of the Company in connection with its performance under contracts between the Company and two utility customers. The Letters of Credit

Table of Contents

reduce the Company's borrowing base as calculated in the Company's Line of Credit with Heritage Bank of Commerce as described in Note 9.

Note 9 Line of Credit Heritage Bank of Commerce

On July 24, 2015, the Company entered into a Loan and Security Agreement (the "Loan Agreement") with Heritage Bank of Commerce (the "Bank"), whereby the Bank agreed to make available to the Company a secured credit facility (the "Credit Facility") consisting of a \$6.0 million revolving line of credit which the Company may draw upon from time to time, subject to the calculation and limitation of a borrowing base, for working capital and other general corporate purposes. As additional incentive to the Bank to enter into the Credit Facility and make available to the Company funds thereunder, the Company issued to the Bank a warrant to purchase shares of the Company's common stock up to \$60 thousand in the aggregate.

The line of credit, which matures on July 24, 2017, bears variable interest at the prime rate plus 1.00% and is collateralized by certain assets of the Company and its subsidiaries including their respective accounts receivable, certain deposit accounts, and intellectual property.

In December 2015, the Company entered into two Letter of Credit agreements with Heritage Bank of Commerce for letters of credit of \$1.3 million and \$0.1 million. The Letters of Credit are used to guarantee certain obligations of the Company in connection with its performance under contracts between the Company and two utility customers. The Letters of Credit reduce the Company's borrowing base as calculated under the Loan Agreement.

The Loan Agreement requires the Company to comply with a number of conditions precedent that must be satisfied prior to any borrowing. In addition, the Company is required to remain compliant with certain customary representations and warranties and a number of affirmative and negative covenants. The occurrence of an event of default under the Loan Agreement may cause amounts outstanding during the event of default to accrue interest at a rate of 3.00% above the interest rate that would otherwise be applicable. As of March 31, 2016, the Company was not in compliance with its EBITDA covenant with Heritage Bank. The Company is in the process of negotiating a modification to the financial covenants with Heritage Bank, which has in the meantime indicated that it intends to waive the covenant for the first quarter.

As of March 31, 2016, the available portion of the Heritage Credit Facility was approximately \$4.6 million.

Note 10 Preferred Stock Dividends

During the first quarter of 2016 and 2015, the Company accrued dividends of \$352 thousand and \$308 thousand, respectively, on our Series C Preferred Stock.

Table of Contents

Note 11 Legal Matters

SEC Investigation. In 2012, the SEC commenced an investigation with respect to certain of the Company's revenue recognition practices and financial reporting. The Company has cooperated with the SEC staff throughout the course of the investigation, which is likely to lead to regulatory or legal proceedings and could have a material adverse effect on the Company's business, results of operations, and financial condition. The Company is in discussions with the SEC regarding the possibility of resolving this matter. There can be no assurances that these discussions will lead to a resolution, or of the amount or timing of any such resolution.

Dressler v. Lime Energy, United States District Court for the District of New Jersey, Case 3:14-cv-07060-FLW-DEA. This purported whistleblower case was filed on November 10, 2014, alleging illegal retaliation by the Company for the plaintiff's alleged disclosure of activity she believed violated the Securities Exchange Act of 1934, as amended. The plaintiff alleges that she made repeated disclosures to various individuals employed by the Company that certain accounting practices were improper and could lead to a restatement of financial statements. The plaintiff filed her complaint pursuant to the Sarbanes-Oxley Act of 2002 (18 U.S.C. §1514A), and the Dodd-Frank Wall Street Reform and Consumer Protection Act (15 U.S.C. §78u-6, et seq.). This case has been accepted for coverage under the Lime Executive Protection Portfolio Policy. Although the Company believes the lawsuit has no merit, the court has denied the Company's motion to dismiss the case. The lawsuit remains in early stages and the Company intends to continue to defend itself vigorously.

Note 12 Discontinued Operations

The Company sold the majority of its public sector business on February 28, 2013 to PowerSecure. During the third quarter of 2013, the Company's board of directors authorized management to sell or dispose of GES-Port Charlotte, its contract with the Army Corps of Engineers under the Federal Renewal and Renovation program (the FRR contract), and the regional service business located in Bethlehem, Pennsylvania. These businesses, along with the public sector business, which the Company exited in 2013, and Asset Development business, which the Company shut down at the end of 2012, have all been reported as discontinued operations in the accompanying financial statements.

The revenue and loss related to discontinued operations were as follows (in thousands):

Three months ended March 31,	2016	2015
Revenue	\$ 10	\$ 10
Operating loss	\$ (12)	\$ (63)

Table of Contents

The assets and liabilities related to discontinued operations were as follows (in thousands):

Total Liabilities	\$ 133	\$ 138

Note 13 Business Segment Information

All of the Company's operations, including EnerPath, which was acquired on March 24, 2015, are included in one reportable segment, the Energy Efficiency segment.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion regarding the Company along with our financial statements and related notes included in this quarterly report. This quarterly report, including the following discussion, contains forward-looking statements that are subject to risks, uncertainties and assumptions. Our actual results, performance and achievements in 2016 and beyond may differ materially from those expressed in, or implied by, these forward-looking statements. See Cautionary Note Regarding Forward-Looking Statements.

Overview

Lime Energy provides utilities with the comprehensive customer relationship services they need in order to satisfy their shareholders, regulators and customers. Working on behalf of utilities and with their business customers, Lime Energy delivers energy services aimed at customer satisfaction, grid reliability and cost-effective environmental compliance. Our innovative contracting methods and software platform enables the integrated delivery of energy efficiency, demand response, renewable energy, customer engagement and behavioral change. We believe that the next century of energy infrastructure investment will focus on the customer side of the meter, and Lime Energy is helping utilities to build the new business model that this energy future demands.

Edgar Filing: LIME ENERGY CO. - Form 10-Q

We are a leader in designing and implementing energy efficiency programs that enable our utility clients to reach their underserved markets and achieve their energy reduction goals. We offer utilities energy efficiency program delivery services targeted to their small and medium-sized business customers. Our programs help these businesses use less energy through the upgrade of existing equipment with new, more

Table of Contents

energy efficient equipment. This service allows the utility to delay investments in transmission and distribution upgrades and new power plants while cost-effectively complying with environmental regulations. The same programs provide benefits to their customers in the form of lower energy bills, improved equipment reliability, reduced maintenance costs and a better overall operating environment.

We currently deliver energy efficiency programs for 12 of the 25 largest electric utilities in the country, including the largest investor-owned utility and the largest public utility. We focus on deploying direct install energy efficiency solutions for small and mid-size commercial businesses that improve energy efficiency, reduce energy-related expenditures and lessen the impact of energy use on the environment. These programs include energy efficient lighting upgrades, mechanical (HVAC) upgrades, water conservation measures, building controls, refrigeration, pool pumps, building shell improvements and appliance recycling. Our small business energy solutions (SBES) programs provide a cost-effective avenue for our utility clients to offer products and services to a hard-to-reach customer base, while satisfying aggressive state-mandated energy reduction goals.

Our SBES model is a turnkey solution under which we contract with our utility clients to design and market their small and mid-size energy efficiency programs within a defined territory, perform the technical audits, sell the solution to the end-use customer and oversee the implementation of the energy efficiency measures. This model makes it easy and affordable for small businesses to upgrade to new, more energy efficient equipment. We deliver these programs for our utility clients on a performance basis, where we are only paid for delivered energy efficiency resources.

Results of Operations

Revenue

We generate the majority of our revenue from the sale of our services and the products that we purchase and resell to our clients. We charge our utility clients based upon an agreed-to rate schedule based on the item installed or the savings generated. A typical project for a small business utility client can take anywhere from a few hours to a few weeks to complete.

Gross Profit

Gross profit equals our revenue less costs of sales. The cost of sales for our business consists primarily of materials, our internal labor, including engineering, and the cost of subcontracted labor.

Gross profit is a key metric that we use to evaluate our performance. Gross profit depends in large part on the volume and mix of products and services that we sell during any given period.

Selling, General and Administrative Expenses

Selling, general and administrative expenses (SG&A) include the following components:

- direct labor and commission costs related to our employee sales force;
- costs of our non-production management, supervisory and staff salaries and employee benefits, including the costs of share-based compensation;
- costs related to insurance, travel and entertainment, office supplies and utilities;
- costs related to marketing and advertising our products;

Table of Contents

- legal and accounting expenses; and
- costs related to administrative functions that serve to support our existing businesses, as well as to provide the infrastructure for future growth.

Acquisition Costs

Acquisition costs are related to acquisition activities, which include legal, accounting, banking, and other expenses.

Amortization of Intangibles

When we acquire companies we allocate the purchase price to tangible assets (such as property, equipment, accounts receivable, etc.), and identifiable intangible assets (such as contract backlogs, customer relationships, technology, trade name, software, etc.), with the balance recorded as goodwill. We amortize the value of certain intangible assets over their estimated useful lives as a non-cash expense.

Other Income (Expense)

Other income (expense) includes net interest expense consisting of interest expense net of interest income and the extinguishment of debt charge from fair valuing our subordinated convertible note upon amendment. Net interest expense represents the interest costs associated with our subordinated convertible term note (including amortization of the related debt discount and issuance costs). Interest income includes earnings on our invested cash balances and amortization of the discount on our long-term receivables.

Loss from continuing operations before income taxes	-31.6%	-17.9%
Income tax benefit (expense)	0.0%	6.8%
Loss from continuing operations	-31.7%	-11.1%
Loss from operation of discontinued business	-0.1%	-0.3%
Net loss	-31.7%	-11.5%

Revenue. Our consolidated revenue increased \$4.8 million, or 26.5%, to \$23.1 million during the first quarter of 2016, from \$18.3 million during the first quarter of 2015. The increase in revenue was driven primarily by the acquisition of EnerPath. We expect our growth from existing programs to continue to moderate.

Gross Profit. The increase in revenue led to a \$1.4 million, or 26.2%, increase in our gross profit during the first quarter of 2016 when compared to the first quarter of 2015. Our gross profit margin was basically flat, declining slightly from 30.1% during the first quarter of 2015 to 30.0% during the first quarter of 2016. In general, our gross profit margin is a function of the margin profiles of individual programs. We have negotiated more favorable pricing from our suppliers and we believe our gross profit margin will improve as a result.

Selling, General and Administrative Expenses. Our selling, general and administrative expenses increased \$4.2 million, or 72.2%, to \$10.0 million during the three-month period ended March 31, 2016, from \$5.8 million for the same period in 2015. The increase is primarily due to the acquisition of EnerPath. Costs related to the restatement we completed in July 2013, the stockholder lawsuits and the SEC investigation, totaled \$36 thousand during the first quarter of 2016, which was \$91 thousand lower than the \$127 thousand incurred during the first quarter of 2015.

Acquisition Cost. We incurred acquisition costs of \$218 thousand during the first quarter of 2016 as compared to \$694 during the first quarter of 2015. Acquisition costs are related to acquisition activities, which include legal, accounting, banking, and other expenses.

Amortization of Intangibles. Amortization expense for the first quarter of 2016 was \$335 thousand as compared to \$31 thousand for the first quarter of 2015.

Table of Contents

Other Income (Expense), Net. Other income (expense), net was \$3.7 million of expense during the first quarter of 2016, an increase of \$1.5 million, compared to expense of \$2.3 million for the same period in 2015.

Net interest expense was \$900 thousand during the first quarter of 2016, compared to net interest expense of \$25 thousand during the first quarter of 2015, an increase of \$875 thousand. The components of interest expense for the three-month period ended March 31, 2016 and 2015 were as follows (in thousands):

Three months ended March 31,	2016	2015
Subordinated convertible notes - Related Party	\$ 869	\$ 33
Letter of credit		19
Other	4	
Total contractual interest	873	52
Amortization of deferred issuance costs	27	8
Amortization of debt discount - Related Party	76	
Total interest expense	\$ 976	\$ 60

On March 31, 2015, we amended our convertible note resulting in a loss on extinguishment of \$1.4 million.

On March 30, 2016, we entered into a second amendment to our convertible note. Pursuant to prevailing accounting guidance, this amendment was treated as an extinguishment of the original note and the issuance of a new note. Upon extinguishment, the net carrying amount of the extinguished note (including its principal amount and related discounts and deferred financing costs) was written off and the fair value of the new note was established, resulting in a loss on extinguishment of debt of \$2.1 million.

A conversion feature included in the Company's outstanding convertible note is required to be separated from the note and recorded as a derivative liability. The derivative liability is recorded at fair value which was \$7.4 million at March 31, 2016 and \$6.7 million at December 31, 2015. The increase in the liability of \$0.7 million was recorded as a loss from the change in derivative liability. In 2015, the derivative liability was recorded at fair value which was \$5.6 million and \$6.4 million as of its issuance date and March 31, 2015, respectively. The increase in the liability of \$0.8 million was recorded as a loss from change in derivative liability.

Interest expense for the first quarter of 2015 was related to outstanding subordinated notes and the Letter of Credit with Mr. Kiphart.

Also contributing to 2015 interest expense was amortization of deferred issuance costs.

Table of Contents

Our interest income increased \$41 thousand to \$76 thousand during the first quarter of 2016, from \$35 thousand earned during the first quarter of 2015. Substantially all of the interest income during both periods represented amortization of the discount on our long-term receivables. The increase in amortization was due to an increase in our long-term receivable balances. We expect continued increases in our long-term receivable balances in the future due to increased use of extended payment terms by customers under some of our utility programs.

Preferred Stock Dividends

During the first quarter of 2016 and 2015, we accrued dividends of \$352 thousand and \$308 thousand, respectively, on our Series C Convertible Preferred Stock (the "Series C Preferred Stock").

Liquidity and Capital Resources

As of March 31, 2016, we had cash and cash equivalents of \$2.4 million, compared to \$6.7 million (including \$1.3 million of restricted cash) as of December 31, 2015.

Our principal cash requirements are for operating expenses, including employee costs, the cost of outside services including accounting, legal and contracting services; the funding of accounts receivable; and capital expenditures. Since our inception, we have financed our operations primarily through the sale of equity, as well as various forms of secured debt.

Three Months Ended March 31, 2016 Compared to Three Months Ended March 31, 2015

The following table summarizes, for the periods indicated, selected items in our consolidated statements of cash flows (in thousands):

Three months ended March 31,	2016	2015
Net cash used in operating activities	\$ (2,510)	\$ (19)
Net cash used in investing activities	(546)	(11,236)
Net cash provided by financing activities	40	11,413
Net Increase (Decrease) in Cash and Cash Equivalents	(3,016)	158
Cash and Cash Equivalents, at beginning of period	5,389	5,473
Cash and Cash Equivalents, at end of period	\$ 2,373	\$ 5,631

Edgar Filing: LIME ENERGY CO. - Form 10-Q

Net unrestricted cash decreased \$3.0 million during the three-month period ended March 31, 2016 as compared to increasing \$158 thousand during the same period in 2015.

Table of Contents*Operating Activities*

Operating activities consumed cash of \$2.5 million during the three-month period ended March 31, 2016 as compared to consuming cash of \$19 thousand during the same period of 2015.

Whether cash is consumed or generated by operating activities is a function of the profitability of our operations and changes in working capital. To get a better understanding of cash sources and uses, our management characterizes the cash used or provided by operating activities into two categories: the cash consumed or generated by operating activities before changes in assets and liabilities; and the cash consumed or generated from changes in assets and liabilities. Our management believes that analyzing the cash used or provided by operating activities in this way makes it easier to understand how much of our operating cash flow is the result of the Company's current period cash earnings or loss and how much of our operating cash flow is due to changes in working capital. These two measures are calculated as follows (in thousands):

Three Months Ended March 31,	2016	2015
Net Loss	\$ (7,340)	\$ (2,099)
Provision for bad debt	156	97
Share-based compensation	281	225
Depreciation and amortization	617	208
Amortization of deferred financing costs	27	8
Change in derivative liability	756	805
Loss on extinguishment of debt	2,052	1,420
Deferred income tax benefit		(1,246)
Interest on subordinated notes added to principal	869	32
Amortization of original issue discount - related party	76	
Preferred dividends		(308)
Release of restricted funds	1,300	
Cash consumed by operating activities before changes in assets and liabilities	\$ (1,206)	\$ (858)
Changes in assets and liabilities, net of business acquired:		
Accounts receivable	\$ 3,904	\$ (390)
Inventories	399	(186)
Unbilled accounts receivable	1,048	(1,333)
Prepaid expenses and other	92	(36)
Assets of discontinued operations	58	4
Accounts payable	(5,866)	1,156
Accrued expenses	(292)	1,027
Unearned revenue	(453)	273
Customer deposits and other current liabilities	(189)	188
Liabilities of discontinued operations	(5)	136
Cash provided (consumed) by changes in assets and liabilities	\$ (1,304)	\$ 839

Edgar Filing: LIME ENERGY CO. - Form 10-Q

Table of Contents

The reconciliation to net cash used in operating activities as reported on our Consolidated Statement of Cash Flows is as follows (in thousands):

Three Months Ended March 31,	2016	2015
Cash consumed by operating activities before changes in assets and liabilities	\$ (1,206)	\$ (858)
Cash provided (consumed) by changes in assets and liabilities	(1,304)	839
Net cash generated by (used in) operating activities	\$ (2,510)	\$ (19)

The cash consumed by operating activities before changes in assets and liabilities increased \$0.3 million, or 40.6%, to \$1.2 million, during the first quarter of 2016 as compared to consuming \$0.8 million during the first quarter of 2015. We believe that continued improvements in our gross profit will lead to improvements in this measure of cash flow in future periods.

Changes in assets and liabilities consumed cash of approximately \$1.3 million during the first quarter of 2016, compared to generating \$0.8 million during the first quarter of 2015. This was the result of having to use cash during the first quarter of 2016 for working capital related assets and liabilities, which was not necessary during the first quarter of 2015. We expect to consume more modest amounts of cash from changes in working capital related assets and liabilities in future periods if our sales grow as we expect.

Investing Activities

We consumed \$546 thousand of cash in investing activities during the first quarter of 2016, compared to \$11.2 million during the first quarter of 2015. All of the cash consumed during the first quarter of 2016 was for capital expenditures, \$291 thousand of which was used to continue to develop the software platform used by our utility programs. The cash consumed during the first quarter of 2015 included the \$11.0 million used to acquire EnerPath and \$236 thousand for capital expenditures, \$199 thousand of which was used to continue to develop the software platform used by our utility programs. We expect to make additional investment in our software platform in future periods as we continue to add to its capabilities in order to increase our operating efficiencies and the value of our programs to our customers.

Financing Activities

During the first quarter of 2016 financing activities generated \$40 thousand of cash, as compared to \$11.4 million during the first quarter of 2015. During the first quarter of 2016, we financed the purchase of two vehicles used to support our utility programs. During the three-month period ended March 31, 2015, we raised \$11.75 million from the issuance of a convertible note to fund our acquisition of EnerPath. This was partially offset by \$337 thousand in deferred financing costs.

Contractual Obligations

Edgar Filing: LIME ENERGY CO. - Form 10-Q

On March 24, 2015, the Company issued a subordinated convertible note to Bison due March 24, 2020 in the principal amount of \$11.75 million. See *Note 6 Subordinated Convertible Term Notes* for a description of the Note, and its subsequent amendments.

Table of Contents

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Sources of Liquidity

Our primary sources of liquidity are our available, unrestricted cash reserves and our line of credit from Heritage Bank of Commerce (Heritage Bank).

On July 24, 2015, we entered into a Loan and Security Agreement (the Loan Agreement) with Heritage Bank, whereby Heritage Bank agreed to make available to us a secured credit facility (the Heritage Credit Facility) consisting of a \$6.0 million revolving line of credit which we may draw upon from time to time, subject to the calculation and limitation of a borrowing base, for working capital and other general corporate purposes.

The line of credit, which matures on July 24, 2017, bears variable interest at the prime rate plus 1.00% and is collateralized by certain of our assets and those of our subsidiaries including our respective accounts receivable, certain deposit and investment accounts, and intellectual property. As additional incentive to Heritage Bank to enter into the Heritage Credit Facility and make available to us funds thereunder, we issued to Heritage Bank a warrant to purchase shares of the Company s common stock up to \$60 thousand in the aggregate.

The Loan Agreement requires us to comply with a number of conditions precedent that must be satisfied prior to any borrowing. In addition, we are required to remain compliant with certain customary representations and warranties and a number of affirmative and negative covenants. During the existence of any event of default (as specified in the Loan Agreement), Heritage Bank may cancel its commitment, declare all or a portion of outstanding amounts immediately due and payable or declare all or a portion of outstanding amounts payable upon demand. During the existence of any payment default, the interest rate would be increased by 3.0%.

In December 2015, we entered into two letter of credit agreements with Heritage Bank for letters of credit of \$1.3 million and \$0.1 million (Letters of Credit), which are used to guarantee certain of our obligations in connection with our performance under our contracts with two utility customers. The Letters of Credit reduce our borrowing base under the Heritage Credit Facility. As of March 31, 2016, the unused portion of the Heritage Credit Facility was approximately \$4.6 million. As of March 31, 2016, we were not in compliance with our financial covenant with Heritage Bank with respect to the first quarter. For additional information regarding the Heritage Credit Facility, see the discussion under Note 9 - Line of Credit - Heritage Bank of Commerce.

Our ability to continue to expand the sales of our products and services will require the continued commitment of significant funds. The actual timing and amount of our future funding requirements will depend on many factors, including the amount, timing and profitability of future revenues, working capital requirements, the level and amount of product marketing and sales efforts, among other things.

We have raised a significant amount of capital since our formation through the issuance of shares of our common and preferred stock and notes, which has allowed us to continue to execute our business plan. Most of these funds have been consumed by operating activities, either to fund our losses or for working capital requirements. If we do determine it necessary to raise additional capital because profitability does not improve as we expect it to, there is no assurance we will be able to do so, or it may only be available

Table of Contents

on terms that are not favorable to the Company or our existing shareholders. In the event that we are required to raise additional capital in the future but are unable to do so, we may be required to scale back operations or cease operations altogether.

Our management is focused on improving our cash flows with a goal of growing revenue and reducing our overhead costs.

ITEM 3. **Quantitative and Qualitative Disclosures about Market Risk**

Not applicable.

ITEM 4. **Controls and Procedures**

Evaluation of Disclosure Controls and Procedures

Our management, including our chief executive officer and our chief financial officer, maintains our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) and has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Report. Based on such evaluation, our chief executive officer and chief financial officer have concluded that, as of March 31, 2016, such disclosure controls and procedures were effective for the purpose of ensuring that material information required to be in the reports that we submit, file, furnish or otherwise provide to the SEC is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls.

There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the quarter ended March 31, 2016 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Limitations of the Effectiveness of Internal Control

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the internal control system are met. Because of the inherent limitations of any internal control system, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

In addition to ordinary routine litigation incidental to the Company's business, the Company is a party to the legal proceedings noted in Note 11 to our condensed consolidated financial statements in Part I, Item 1

Table of Contents

of this Report. During the quarter for which this Report is filed, there were no material developments in previously reported legal proceedings, and no other cases or legal proceedings, other than ordinary routine litigation incidental to the Company's business and other nonmaterial proceedings, were brought against the Company.

ITEM 6. **Exhibits**

The information required by this item is set forth on the exhibit index that follows the signature page of this Report.
