ITEM 1. BUSINESS

COMPANY OVERVIEW

Jones Lang LaSalle Incorporated (Jones Lang LaSalle, which we may refer to as we, us, our, the Company or the Firm) was incorporated in 1997. Jones Lang LaSalle is a financial and professional services firm specializing in real estate. We offer integrated services delivered by expert teams worldwide to clients seeking increased value by owning, occupying or investing in real estate. We have over 200 corporate offices worldwide and operations in more than 1,000 locations in 70 countries. We have approximately 45,500 employees, including 26,700 employees whose costs our clients reimburse. We offer comprehensive integrated real estate and investment management services on a local, regional and global basis to owner, occupier and investor clients. We are an industry leader in property and corporate facilities management services, with a portfolio of approximately 2.1 billion square feet worldwide. We deliver an array of Real Estate Services (RES) across our three geographic business segments: (1) the Americas, (2) Europe, Middle East and Africa (EMEA), and (3) Asia Pacific. LaSalle Investment Management, a wholly owned member of the Jones Lang LaSalle group that comprises our fourth business segment, is one of the world's largest and most diversified real estate investment management firms with over \$47.7 billion of assets under management.

In 2011, we generated record-setting revenue of \$3.6 billion across our four business segments, a 23% increase from 2010. We believe that we are well positioned to take advantage of the opportunities in a consolidating industry and to navigate successfully the dynamic markets in which we compete worldwide.

For discussion of our segment results please see "Results of Operations" and "Market Risks" within Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Note 3, Business Segments, of the Notes to Consolidated Financial Statements.

We won numerous awards during 2011, reflecting the quality of the services we provide to our clients, the integrity of our people and our desirability as a place to work. Among others we were named:

One of the World's Most Admired Companies by Fortune (as we also were in 2008 and 2009)

The highest ranking real estate services firm in the Leaders category of the Global Outsourcing 100 by the International Association of Outsourcing Professionals;

Euromoney's Global Best Investment Manager and Best Investment Manager in Asia;

ENERGY STAR's Partner of the Year by the U.S. Environmental Protection Agency;

The winner of P&G's Top Global Performing Partners Excellence Award;

For the fourth year in a row, one of the World's Most Ethical Companies by the Ethisphere Institute;

Best property consultancy in Australia, India, Thailand, Mexico, Italy, Turkey, Central and Eastern Europe, Russia and Dubai; and

One of the best places to work in, among others, Germany, Spain, Ireland, Atlanta, Denver, Phoenix, Los Angeles and Washington D.C.

The broad range of real estate services we offer includes:

- Agency leasing
- Tenant representation
- Property management
- Facilities management / outsourcing
- Project and development management / construction
- Valuations
- Consulting
- Capital markets
- Real estate investment banking / merchant banking
- Corporate finance
- Hotel advisory
- Energy and sustainability services
- Value recovery and receivership services
- Investment management

We offer these services locally, regionally and globally to real estate owners, investors and occupiers for a variety of property types, including:

- Offices
- Hotels
- Industrial properties
- Retail properties
- Healthcare and laboratory facilities
- Multi-family residential and military housing
- Critical environments and data centers
- Sports facilities
- Cultural facilities
- Transportation centers

Individual regions and markets may focus on different property types to a greater or lesser extent depending on local requirements, market conditions and the opportunities we perceive.

Table of Contents

We work for a broad range of clients who represent a wide variety of industries and are based in markets throughout the world. Our clients vary greatly in size. They include for-profit and not-for-profit entities of all kinds, public-private partnerships and governmental (public sector) entities. Increasingly, we are offering services to middle-market companies seeking to outsource real estate services. Through our LaSalle Investment Management subsidiary, we invest for clients on a global basis in both (1) publicly traded real estate securities and (2) private real estate assets.

The attributes that enhance our services and distinguish our firm include our:

Integrated global business model;

Industry-leading research capabilities;

Focus on client relationship management;

Consistent worldwide service delivery and integrity;

Ability to deliver innovative solutions to assist our clients in maximizing the value of their real estate portfolios;

Strong brand and reputation; and

Strong financial position.

We have grown our business by expanding our client base and the range of our services and products, both organically and through a series of strategic acquisitions and mergers. Our extensive global platform and in-depth knowledge of local real estate markets enable us to serve as a single-source provider of solutions for the full spectrum of real estate needs of our clients. We first began to establish this network of services across the globe through the 1999 merger of the Jones Lang Wootton companies (JLW, founded in England in 1783) with those of LaSalle Partners Incorporated (LaSalle Partners, founded in the United States in 1968).

Jones Lang LaSalle History and Acquisition Activities

Prior to our incorporation in Maryland in April 1997 and our initial public offering (the Offering) of 4,000,000 shares of common stock in July 1997, Jones Lang LaSalle conducted its real estate services and investment management businesses as LaSalle Partners Limited Partnership and LaSalle Partners Management Limited Partnership (collectively, the Predecessor Partnerships). Immediately prior to the Offering, the general and limited partners of the Predecessor Partnerships contributed all of their partnership interests in the Predecessor Partnerships in exchange for an aggregate of 12,200,000 shares of common stock.

In October 1998, we acquired all of the common stock of the COMPASS group of real estate service companies (collectively, COMPASS) from Lend Lease Corporation Limited. The acquisition of COMPASS made us the largest property management services company in the United States and expanded our international presence into Australia and South America.

In March 1999, LaSalle Partners merged its business with that of JLW and changed its name to Jones Lang LaSalle Incorporated. In connection with the merger, we issued 14,300,000 shares of common stock and paid cash consideration of \$6.2 million.

Since 2005, we have completed over 40 acquisitions as part of our global growth strategy. These strategic acquisitions have given us additional market share in key markets, expanded our capabilities in certain service areas and further broadened the global platform we make available to our clients. These acquisitions have increased our presence and product offering globally, and have included acquisitions in England, Scotland, Finland, France, Germany, the Netherlands, Spain, Turkey, Dubai, South Africa, Hong Kong, Singapore, Japan, Indonesia, India, the Philippines, Australia, Canada, Brazil and the United States.

Table of Contents

In January 2006, we acquired Spaulding & Slye, a privately held real estate services and investment company with offices in Boston and Washington, D.C. We integrated Spaulding & Slye's 500 employees into the Jones Lang LaSalle organization, significantly increasing the Firm's market presence in New England and Washington, D.C.

In a multi-step acquisition starting in 2007, we acquired the former Trammell Crow Meghraj (TCM), one of the largest privately held real estate services companies in India. We have combined TCM's operations with our Indian operations and we now operate under the Jones Lang LaSalle brand name throughout India.

In May 2008, we acquired Kemper's Holding GmbH (Kemper's), a Germany-based retail specialist, making us the largest property advisory business in Germany and providing us with new offices in Leipzig, Cologne and Hannover.

In July 2008, we acquired Staubach Holdings Inc. (Staubach), a U.S. real estate services firm specializing in tenant representation. Staubach, with 1,000 employees, significantly enhanced our presence in key markets across the United States and made us an industry leader in local, national and global tenant representation. The Staubach acquisition also established us as the market leader in public sector services and added scale to our industrial brokerage, investment sales, corporate finance and project and development services.

In May 2011, we completed the acquisition of King Sturge, a United Kingdom-based international property consultancy. The King Sturge acquisition, which further extends our historical roots back to its founding in 1760, significantly enhanced the strength and depth of our service capabilities in the United Kingdom and in continental Europe, adding approximately 1,400 employees.

In addition to King Sturge, we completed eight acquisitions in 2011 within the United States, South Africa, Australia, Singapore and Indonesia.

We are considering, and will continue to consider, acquisitions that we believe will strengthen our market positions, expand our service offerings, increase our profitability and supplement our organic growth. However, there is no assurance that we will engage in acquisition activity in the future at the same pace as we have in the past.

Value Drivers for Growth and Superior Client Service

Our mission is to deliver exceptional strategic, fully integrated services and solutions for real estate owners, occupiers and investors worldwide. We deliver a combination of services, skills and expertise on an integrated global platform that we own (and do not franchise), which we believe sets us apart from our competitors. While we face high-quality competition, we also believe that we have a unique set of attributes that makes us the best choice for clients seeking real estate and investment management services. We have the size and scale of resources necessary to provide the expertise of the Firm wherever clients need it. Our culture of teamwork and collaboration means that we can marshal those resources to deliver the greatest possible value and results. Our "client first" orientation means that our people focus on how we can best provide what our clients need and want.

Consultancy practices typically do not share our implementation expertise or local market awareness. Investment banking and investment management competitors generally possess neither our local market knowledge nor our real estate service capabilities. Traditional real estate firms lack our financial expertise and operating consistency. Other global competitors, which we believe often franchise at least some of their offices through separate owners, do not have the same level of business coordination or consistency of delivery that we can provide through our network of wholly owned offices, directly employed personnel and integrated information technology, human resources and financial systems. That network also permits us to promote a high level of integrity throughout the organization and to use our diverse and welcoming culture as a competitive advantage in developing clients, recruiting employees and acquiring businesses.

Table of Contents

Key value drivers distinguish our business activities:

Our integrated global services platform;

The quality and worldwide reach of our research function;

Our focus on client relationship management as a means to provide superior client service;

Our reputation for consistent and trustworthy worldwide service delivery, as measured by our creation of best practices and by the skills, experience, collaborative nature and integrity of our people;

Our ability to deliver innovative solutions to assist our clients in maximizing the value of their real estate portfolios;

The strength of our brand; and

The strength of our financial position.

We have designed our business model to create value for our clients, our shareholders and our employees. Based on our established presence in, and intimate knowledge of, local real estate and capital markets worldwide, and supported by our investments in thought leadership, technology and the use of the Internet to gather and communicate information relevant to our constituencies, we believe that we create value for clients by addressing their local, regional and global real estate needs as well as their broader business, strategic, operating and financial goals. Our financial position, which we believe is the strongest in our industry, and our reputation for integrity, which we also believe is the strongest in the industry, give our clients confidence in our long-term ability to meet our obligations to them. We also believe that the ability to create and deliver value to our clients drives our own ability to grow our business and improve profitability and shareholder value. In doing so, we enable our people to demonstrate their technical competence and advance their careers by taking on new and increased responsibilities within a dynamic environment as our business expands geographically, adds adjacent service offerings and develops in sophistication.

GLOBAL STRATEGIC PRIORITIES

To continue to create new value for our clients, shareholders and employees, we have identified five strategic priorities, which we call the G5.

G1: BUILD OUR LEADING LOCAL AND REGIONAL SERVICE OPERATIONS. Our strength in local and regional markets determines the strength of our global service capabilities. Our financial performance also depends, in great part, on the business we source and execute locally from our 200 wholly owned offices around the world. We continually seek to leverage our established business presence in the world's principal real estate markets in order to provide expanded and adjacent local and regional services without a proportionate increase in infrastructure costs. We believe that these capabilities will continue to set us apart and make us more attractive to current and prospective clients as well as to revenue generating employees such as brokers and client relationship managers.

G2: STRENGTHEN OUR LEADING POSITION IN CORPORATE SOLUTIONS. The accelerating trends of globalization, cost cutting, energy management and the outsourcing of real estate services by corporate occupiers support our decision to emphasize a truly global Corporate Solutions business to serve their needs comprehensively. This service delivery capability helps us create new client relationships, particularly as companies turn to the outsourcing of their real estate as a way to manage expenses and enhance sustainability. These services have proven to be counter-cyclical as we have seen demand for them strengthen when the economy has weakened. In addition, a number of corporate clients are demanding the multi-regional capabilities that we can deliver.

G3: CAPTURE THE LEADING SHARE OF GLOBAL CAPITAL FLOWS FOR INVESTMENT SALES. Our focus on further developing our ability to provide global Capital Markets services reflects the increasingly international nature of cross-border money flows into real estate and the global marketing of real estate assets. Our real estate investment banking capability helps provide capital and other financial solutions by which our clients can maximize the value of their real estate.

G4: STRENGTHEN LASALLE INVESTMENT MANAGEMENT’S LEADERSHIP POSITION. With its integrated global platform, LaSalle Investment Management is well positioned to serve institutional real estate investors looking for attractive opportunities around the world. We are focused on helping our LaSalle Investment Management business develop and offer new products quickly and extend its portfolio capabilities into promising new markets in order to enhance that position. We continue to maintain strong offerings in core products to meet the demand from clients who seek investments in the most stable and mature real estate markets.

G5: CONNECTIONS: DIFFERENTIATE BY CONNECTING ACROSS THE FIRM AND WITH CLIENTS. To create real value and new opportunities for our clients, shareholders and employees, we are working to strengthen and fully leverage the links between our people, service lines and geographies worldwide to better connect with our clients and put the Firm’s global expertise and experience to work for them. This includes constantly striving to leverage use of the Internet and emerging social media to gather and disseminate information that will be useful to our clients, employees, vendors and other constituencies.

We have committed resources to each of the G5 priorities in past years and expect we will continue to do so in the future. This strategy has helped us to weather economic downturns, continue to grow market share, expand our services by developing adjacent offerings and take advantage of new opportunities as they arise. By continuing to invest in the future based on how our strengths can support the needs of our clients, we intend to maintain and expand our position as an industry leader. Although our fundamental business strategies remain intact, each of our businesses continually reevaluates how it can best serve our clients as their needs change and as real estate markets, credit markets, economies and political environments exhibit changes, which in each case may be dramatic and unpredictable.

BUSINESS SEGMENTS

We report our operations as four business segments. We manage our Real Estate Services (RES) product offerings geographically as (1) the Americas, (2) Europe, Middle East and Africa (EMEA), and (3) Asia Pacific, and we manage our investment management business globally as (4) LaSalle Investment Management. See “Results of Operations” within Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, as well as Note 3 Business Segments of the Notes to Consolidated Financial Statements, for financial information discussed by segment.

REAL ESTATE SERVICES (RES): AMERICAS, EMEA AND ASIA PACIFIC

To address the needs of real estate owners and occupiers, we provide a full range of integrated property, project management and transaction services locally, regionally and globally through our Americas, EMEA and Asia Pacific operating segments. We organize our RES according to five major product categories:

- Leasing Services;
- Property and Facilities Management;
- Project and Development Services;
- Capital Markets and Hotels; and
- Advisory, Consulting and Other Services.

Across these five broad RES categories, we leverage our deep real estate expertise and experience within the Firm to provide innovative solutions for our clients. A description of these product categories and the services we provide within them follows:

1. Leasing Services

Agency Leasing Services executes marketing and leasing programs on behalf of investors, developers, property companies and public entities to secure tenants and negotiate leases with terms that reflect our clients' best interests. In 2011, we completed approximately 15,950 agency leasing transactions representing approximately 198 million square feet of space. We typically base our agency leasing fees on a percentage of the value of the lease revenue commitment for consummated leases.

Tenant Representation Services establishes strategic alliances with clients to deliver ongoing assistance to meet their real estate needs, and to help them evaluate and execute transactions to meet their occupancy requirements. Tenant Representation Services is also an important component of our local market services. We assist clients by defining space requirements, identifying suitable alternatives, recommending appropriate occupancy solutions, and negotiating lease and ownership terms with landlords. We help our clients lower their real estate costs, minimize real estate occupancy risks, improve occupancy control and flexibility, and create more productive office environments. We employ a multi-disciplinary approach to develop occupancy strategies linked to our clients' core business objectives.

Table of Contents

We determine Tenant Representation Services fees on a negotiated fee basis and in various markets landlords may be responsible for paying them. Fees often reflect performance measures related to targets that we and our clients establish prior to engagement or, in the case of strategic alliances, at future annual intervals. We use quantitative and qualitative measurements to assess performance relative to these goals, and incentive fees may be awarded for superior performance. In 2011, we completed approximately 12,960 tenant representation transactions representing approximately 349 million square feet of space.

2. Property and Facilities Management

Property Management Services provides on-site management services to real estate owners for office, industrial, retail and specialty properties. We seek to leverage our market share and buying power to deliver superior service and value to clients. Our goal is to enhance our clients' property values through aggressive day-to-day management. We may provide services through our own employees or through contracts with third-party providers (as to which we may act in a principal capacity or hire as an agent for our clients). We focus on maintaining high levels of occupancy and tenant satisfaction while lowering property operating costs. During 2011, we provided on-site property management services for properties totaling approximately 1.2 billion square feet.

We typically provide property management services through an on-site general manager and staff. We support them with regional supervisory teams and central resources in such areas as training, technical and environmental services, accounting, marketing and human resources. Our general managers are responsible for property management activities, client satisfaction and financial results. We do not compensate them with commissions, but rather with a combination of base salary and a performance bonus that is directly linked to results they produce for their clients. Increasingly, management agreements provide for incentive compensation relating to operating expense reductions, gross revenue or occupancy objectives or tenant satisfaction levels. Consistent with industry custom, management contract terms typically range from one to three years, but may be canceled at any time following a short notice period, usually 30 to 60 days.

Integrated Facilities Management Services provides comprehensive portfolio and property management services to corporations and institutions that outsource the management of the real estate they occupy. Properties under management range from corporate headquarters to industrial complexes. During 2011, Integrated Facilities Management Services managed approximately 855 million square feet of real estate for its clients. Our target clients typically have large portfolios (usually over 1 million square feet) that offer significant opportunities to reduce costs and improve service delivery. The competitive trends of globalization, outsourcing and offshoring have prompted many of these clients to demand consistent service delivery worldwide and a single point of contact from their real estate service providers. We generally develop performance measures to quantify the progress we make toward goals and objectives that we have mutually determined. Depending on client needs, our Integrated Facilities Management Services units, either alone or partnering with other business units, provide services that include portfolio planning, property management, agency leasing, tenant representation, acquisition, finance, disposition, project management, development management, energy and sustainability services and land advisory services. We may provide services through our own employees or through contracts with third-party providers (as to which we may act in a principal capacity or which we may hire as an agent for our clients).

Our Integrated Facilities Management Services units are compensated on the basis of negotiated fees that we typically structure to include a base fee and a performance bonus. We base performance bonus compensation on a quantitative evaluation of progress toward performance measures and regularly scheduled client satisfaction surveys. Integrated Facilities Management Services agreements are typically three to five years in duration, but they also are cancelable at any time upon a short notice period, usually 30 to 60 days, as is typical in the industry.

We also provide lease administration and auditing services, helping clients to centralize their lease management processes. Whether clients have a small number of leases or a global portfolio, we assist them by reducing costs associated with incorrect lease charges, right-sizing their portfolios through lease options, identifying underutilized assets and ensuring Sarbanes-Oxley compliance to mitigate risk.

Table of Contents

In the United States, we provide Mobile Engineering Services to banks and other clients with large portfolios of sites. Rather than using multiple vendors to perform facility services, these companies hire Jones Lang LaSalle to provide HVAC, electrical and plumbing services, and general interior repair and maintenance. Our multi-disciplined mobile engineers serve numerous clients in a specified geographic area, performing multiple tasks in a single visit and taking ownership of the operational success of the sites they service. This service delivery model reduces clients' operating costs by bundling on-site services and reducing travel time between sites.

3. Project and Development Services

Project and Development Services provides a variety of services to tenants of leased space, owners in self-occupied buildings and owners of real estate investments. These include conversion management, move management, construction management and strategic occupancy planning services. Project and Development Services frequently manages relocation and build-out initiatives for clients of our Property Management Services, Integrated Facilities Management Services and Tenant Representation Services units. Project and Development Services also manages all aspects of development and renovation of commercial projects for our clients, including in some cases as a general contractor. Additionally, we provide these services to public-sector clients, particularly to military and government entities and educational institutions, primarily in the United States and to a more limited but growing extent in other countries.

Our Project and Development Services business is generally compensated on the basis of negotiated fees. Client contracts are typically multi-year in duration and may govern a number of discrete projects, with individual projects being completed in less than one year.

In EMEA, we provide fit-out and refurbishment services under the Tetris brand, which we retained from an acquisition that our French business previously made.

4. Capital Markets and Hotels

Capital Markets Services includes institutional property sales and acquisitions, real estate financings, private equity placements, portfolio advisory activities, and corporate finance advice and execution. We are also a Freddie Mac Program Plus® Seller/Servicer and operate a multi-family lending and commercial loan servicing platform. Real Estate Investment Banking Services includes sourcing capital, both in the form of equity and debt, derivatives structuring and other traditional investment banking services designed to assist investor and corporate clients in maximizing the value of their real estate. To meet client demands to market real estate assets internationally and to invest outside of their home markets, our Capital Markets Services teams combine local market knowledge with our access to global capital sources to provide superior execution in raising capital for real estate assets. By researching, developing and introducing innovative new financial products and strategies, Capital Markets Services is also integral to the business development efforts of our other businesses.

Clients typically compensate Capital Markets Services units on the basis of the value of transactions completed or securities placed. In certain circumstances, we receive retainer fees for portfolio advisory services. Real Estate Investment Banking fees are generally transaction-specific and conditioned upon the successful completion of the transaction.

We also deliver Capital Markets Services for hotel and hospitality assets and portfolios on a global basis including investment sales, mergers and acquisitions, and financing. We provide services to assets that span the hospitality spectrum: luxury properties; resorts; select service and budget hotels; golf courses; theme parks; casinos; spas; and pubs.

We provide Value Recovery Services to owners, investors and occupiers to help them analyze the impact of a possible financial downturn on their assets and identify solutions that allow them to respond decisively. In this area, we address the operational and occupancy needs of banks and insurance companies that are merging with or acquiring other institutions. We assist banks and insurance companies with challenged assets and liabilities on their balance sheets by providing valuations, asset management, loan servicing and disposition services. We provide receivership services and special asset servicing capabilities to lenders, loan servicers and financial institutions that need help managing defaulted real estate assets. In addition, we provide valuation, asset management and disposition services to government entities to maximize the value of owned securities and assets acquired from failed financial institutions or from government relief programs. We also assist owners by identifying potentially distressed properties and the major occupiers who are facing challenges.

Table of Contents

5. Advisory, Consulting and Other Services

Valuation Services provides clients with professional valuation services and helps them determine market values for office, retail, industrial and mixed-use properties. Such services may involve valuing a single property or a global portfolio of multiple property types. We conduct valuations, which typically involve commercial property, for a variety of purposes, including acquisitions, dispositions, debt and equity financings, mergers and acquisitions, securities offerings (including initial public offerings) and privatization initiatives. Clients include occupiers, investors and financing sources from the public and private sectors. For the most part, our valuation specialists provide services outside of the United States. We usually negotiate compensation for valuation services based on the scale and complexity of each assignment, and our fees typically relate in part to the value of the underlying assets.

Consulting Services delivers innovative, results-driven real estate solutions that align strategically and tactically with clients' business objectives. We provide clients with specialized, value-added real estate consulting services in such areas as mergers and acquisitions, occupier portfolio strategy, workplace solutions, location advisory, financial optimization strategies, organizational strategy and Six Sigma process solutions. Our professionals focus on translating global best practices into local real estate solutions, creating optimal financial and operational results for our clients.

We also provide Advisory Services for hotels, including hotel valuations and appraisals, acquisition advice, asset management, strategic planning, management contract negotiation, consulting, industry research and project and development services for asset types spanning the hospitality spectrum.

We typically negotiate compensation for Consulting Services based on work plans developed for advisory services that vary based on scope and complexity of projects. For transaction services, we generally base compensation on the value of transactions that close.

We provide Energy and Sustainability Services to occupiers and investors to assist them in developing their corporate sustainability strategies, greening their real estate portfolios, reducing their energy consumption and their carbon footprint, upgrading building performance by managing Leadership in Energy and Environmental Design (LEED) construction or retrofits and providing sustainable building operations management. We have over 1,075 LEED-accredited professionals and have provided over 20,000 facilities with specialized energy evaluation services. In 2010, we documented \$128 million in energy savings for our clients and reduced their greenhouse gas emissions by 563,000 tons.

We generally negotiate compensation for Energy and Sustainability Services for each assignment based on the scale and complexity of the project or shared savings.

INVESTMENT MANAGEMENT

Our global real estate investment management business, a member of the Jones Lang LaSalle group that we operate under the brand name of LaSalle Investment Management, has three priorities:

Develop and execute customized investment strategies that meet the specific investment objectives of each of our clients;

Provide superior investment performance; and
Deliver uniformly high levels of service on a global basis.

We provide investment management services to institutional investors and high-net-worth individuals. We seek to establish and maintain relationships with sophisticated investors who value our global platform and extensive local

market knowledge. As of December 31, 2011, LaSalle Investment Management managed over \$47.7 billion of public real estate securities and private real estate assets, making us one of the world's largest managers of institutional capital invested in real estate assets and securities.

Table of Contents

LaSalle Investment Management provides clients with a broad range of real estate investment products and services in the public and private capital markets. We design these products and services to meet the differing strategic, risk/return and liquidity requirements of individual clients. The range of investment alternatives includes private investments in multiple real estate property types (including office, retail, industrial, health care and multi-family residential). We act either through investment funds that LaSalle Investment Management manages or through single client account relationships (“separate accounts”). We also offer indirect public investments, primarily in publicly traded real estate investment trusts (“REITs”) and other real estate equities.

We believe the success of our investment management business comes from our investment performance, industry-leading research capabilities, experienced investment professionals, innovative investment strategies, global presence and coordinated platform, local market knowledge and strong client focus. We maintain an extensive real estate research department whose dedicated professionals monitor real estate and capital market conditions around the world to enhance current investment decisions and identify future opportunities. In addition to drawing on public sources for information, our research department utilizes the extensive local presence of Jones Lang LaSalle professionals throughout the world to gather and share proprietary insight into local market conditions.

The investment and capital origination activities of our investment management business have grown increasingly global. We have invested in direct real estate assets in 17 countries across the globe, as well as in public real estate companies traded on all major stock exchanges. We expect that cross-border investment management activities, both fund raising and investing, will continue to grow.

Private Investments in Real Estate Properties. In serving our investment management clients, LaSalle Investment Management is responsible for the acquisition, management, leasing, financing and divestiture of real estate investments across a broad range of real estate property types. LaSalle Investment Management launched its first institutional investment fund in 1979 and currently has a series of commingled investment funds, including 15 funds that invest in assets in the Americas, 12 funds that invest in assets located in Europe and six funds that invest in assets in Asia Pacific. LaSalle Investment Management also maintains separate account relationships with investors for whom we manage private real estate investments. As of December 31, 2011, LaSalle Investment Management had approximately \$35.9 billion in assets under management in commingled funds and separate accounts.

Some investors prefer to partner with investment managers willing to co-invest their own funds to more closely align the interests of the investor and the investment manager. We believe that our ability to co-invest funds alongside the investments of clients’ funds will continue to be an important factor in maintaining and continually improving our competitive position. We believe our co-investment strategy strengthens our ability to continue to raise capital for new investment funds. At December 31, 2011, we had a total of \$224.9 million of investments in co-investments.

We may engage in “merchant banking” activities in appropriate circumstances. These involve making investments of the Firm’s capital to acquire properties in order to seed investment management funds before they have been offered to clients. Historically, we have done this substantially through the LaSalle Investment Company structures we describe in Note 5 Investment in Real Estate Ventures of the Notes to Consolidated Financial Statements. We may also provide investment capital directly.

LaSalle Investment Management conducts its operations with teams of professionals dedicated to achieving specific client objectives. We establish investment committees within each region whose members have specialized knowledge applicable to underlying investment strategies. These committees must approve all investment decisions to make private market investments. We utilize the investment committee approval process for LaSalle Investment Management’s investment funds and for all separate account relationships.

LaSalle Investment Management is generally compensated for money management services for private equity investments based on initial capital invested and managed, with additional fees tied to investment performance above benchmark levels. The terms of contracts vary by the form of investment vehicle involved and the type of service we provide. Our investment funds have various life spans, typically ranging between five and 10 years. Separate account advisory agreements generally have three-year terms with “at will” termination provisions, and they may include compensation arrangements that are linked to the market value of the assets under management.

Investments in Public Equity. LaSalle Investment Management also offers clients the ability to invest in separate accounts focused on public real estate equity. We invest the capital of these clients principally in publicly traded securities of REITs and property company equities. As of December 31, 2011, LaSalle Investment Management had approximately \$11.8 billion of assets under management in these types of investments. LaSalle Investment Management is typically compensated by securities investment clients on the basis of the market value of assets under management.

Table of Contents

COMPETITION

As the result of our significant growth over the previous decade, we are now one of the two largest real estate services and investment management providers on a global basis. We believe that the other similar global providers are significantly smaller in terms of revenues than us or CBRE Group, Inc., the other largest firm in the industry. We believe that our geographic reach, scope of services and scale of resources have become sufficient to provide substantially all of the services our clients need, wherever they need them. To most effectively serve and retain current clients, and win new clients, we strive to be the best firm in our industry.

Although there has been, and we expect will continue to be, consolidation within our industry, the totality of real estate services constituting the industry remains very large and as a whole the provision of these services remains highly diverse and fragmented. Accordingly, since we provide a broad range of commercial real estate and investment management services across many geographies, we face significant competition in many different ways on an international, regional and local level. Depending on the service, we also face competition from other real estate service providers, some of which may not traditionally be thought of as such, including institutional lenders, insurance companies, investment banking firms, investment managers, accounting firms, technology firms, firms providing outsourcing services of various types (including technology or building products) and companies that self-provide their real estate services with in-house capabilities. While these competitors may be global firms that claim to have service competencies similar to ours, many are local or regional firms which, although substantially smaller in overall size, may be larger in a specific local or regional market. During 2011, certain firms in our industry that had been more significant competitors have materially contracted.

COMPETITIVE DIFFERENTIATORS

We believe that the key value drivers we list below create several competitive differentiators. These form the basis of our market positioning as the leading firm of choice for clients seeking an integrated financial and professional services firm specializing in real estate on a global basis.

Integrated Global Services. By combining a wide range of high-quality, complementary services—and delivering them at consistently high service levels globally through wholly owned offices with directly employed personnel—we can develop and implement real estate strategies that meet the increasingly complex and far-reaching needs of our clients. We also believe that we have secured an established business presence in the world's principal real estate markets, with the result that we can grow revenue without a proportionate increase in infrastructure costs. With operations in more than 1,000 locations in 70 countries on six continents, we have in-depth knowledge of local and regional markets and can provide a full range of real estate services around the globe. This geographic coverage, combined with the ability and willingness of our people to communicate and connect with each other across a common infrastructure platform, positions us to serve the needs of our multinational clients and manage investment capital on a global basis. We anticipate that our cross-selling potential across geographies and product lines will continue to develop new revenue sources for multiple business units within Jones Lang LaSalle.

We also anticipate that over time we will continue to develop expanded service offerings that are complementary, or adjacent, to our current offerings. An example would be providing services to multi-family residential real estate that complements our current services to commercial clients seeking to develop multi-use properties that encompass office, retail and residential space.

Industry-Leading Research and Knowledge Building; Use of the Internet. We invest in and rely on comprehensive top-down and bottom-up research to support and guide the development of real estate and investment strategy for our clients. We have approximately 330 research professionals who gather data and cover market and economic conditions around the world. Research also plays a key role in keeping colleagues throughout the organization attuned to important events and changing conditions in world markets. We facilitate the dissemination of this information to colleagues through our company-wide intranet. We are also devising new approaches through technology, including

the use of the Internet and developing social media techniques, to make our research, services and property offerings more readily available to clients.

Table of Contents

Client Relationship Management. We support our ability to deliver superior service to our clients through our ongoing investments in client relationship management and account management. Our goal is to provide each client with a single point of contact at our firm, an individual who is answerable to, and accountable for, all the activities we undertake for the client. We believe that we enhance superior client service through best practices in client relationship management, the practice of seeking and acting on regular client feedback, and recognizing each client's own definition of excellence.

Our client-driven focus enables us to develop long-term relationships with real estate investors and occupiers. By developing these relationships, we are able to generate repeat business and create recurring revenue sources. In many cases, we establish strategic alliances with clients whose ongoing service needs mesh with our ability to deliver fully integrated real estate services across multiple business units and office locations. We support our relationship focus with an employee compensation and evaluation system designed to reward client relationship building, teamwork and quality performance, in addition to revenue development.

Consistent Service Delivery and Culture. We believe that our globally coordinated investments in research, technology, people and innovation, combined with the fact that our offices are wholly owned (rather than franchised) and our professionals are directly employed, enable us to develop, share and continually evaluate best practices across our global organization. We also believe these attributes allow us to promote a culture of internal communication and connectivity and of integrity that is unparalleled in our industry. As a result, we are able to deliver the same consistently high levels of client service and operational excellence substantially wherever our clients' real estate investment and services needs exist.

Based on our general industry knowledge and specific client feedback, we believe we are recognized as an industry leader in technology. We possess the capability to provide sophisticated information technology systems on a global basis to serve our clients and support our employees. For example, FutureView (sm), our global portfolio optimization tool, allows corporate real estate teams with geographically diverse portfolios to identify potential rent savings by comparing their lease obligations to our firm's sophisticated local market forecasts. OneView by Jones Lang LaSalle (sm), our client extranet technology, provides clients with detailed and comprehensive insight into their portfolios, the markets in which they operate and the services we provide to them.

For our Energy and Sustainability Services business we have developed four industry leading technology platforms designed to help our clients reduce their environmental footprint and energy costs: (1) our Upstream platform is a tool for benchmarking overall energy and environmental performance relative to similar buildings in a similar geography, (2) our Building Energy Allocation Tool (BEAT) enables a quick assessment of building energy consumption leading to opportunities for performance improvement, (3) our Portfolio Energy and Environmental Reporting (PEER) tool provides a web-based platform for ongoing energy and environmental measurement and reporting including carbon footprint assessment, and (4) our Environmental Sustainability Platform (ESP) is a real-time metering and monitoring program that enables on-line, real-time monitoring of building energy consumption. Connect (sm), our intranet technology, offers our employees easy access to the Firm's policies, news and collective thinking regarding our experience, skills and best practices. We have also recently implemented, or are in the process of implementing, global integrated systems for finance, human resources, client relationship management and securities management and trading systems for our investment management business.

We believe that our investments in research, technology, people and thought leadership position our firm as a leading innovator in our industry. Our various research initiatives investigate emerging trends and help us anticipate future conditions and shape new services to benefit our clients. Professionals in our Consulting Services practices identify and respond to shifting market and business trends to address changing client needs and opportunities. LaSalle Investment Management relies on our comprehensive investigation of global real estate and capital markets to develop new investment products and services tailored to the specific investment goals and risk/return objectives of our clients.

We believe that our commitment to innovation helps us secure and maintain profitable long-term relationships with the clients we target: the world's leading real estate owners, occupiers and investors.

We have a patented process for a "System and Method for Evaluating Real Estate Financing Structures" that assists clients with determining the optimal financing structure for controlling their real estate assets, including, for example, whether a client should own a particular asset, lease the asset, or control the asset by means of some other financing structure.

Table of Contents

We expect that we will continue to seek and implement additional ways in which we can develop and deploy technology platforms, use the Internet and employ social media techniques as business tools that will pro-actively make our own services and the real estate properties we list on the Internet increasingly efficient and useful to our constituencies and that will support our marketing and client development activities.

Maximizing Values of Real Estate Portfolios. To maximize the values of our real estate investments, LaSalle Investment Management capitalizes on its strategic research insights and local market knowledge to develop an integrated approach that leads to innovative solutions and value enhancement. Our global strategic perspective allows us to assess pricing trends for real estate and know which investors worldwide are investing actively. This gives us an advantageous perspective on implementing buying and selling strategies. During hold periods, our local market research allows us to assess the potential for cash flow enhancement in our clients assets based on an informed opinion of rental-rate trends. When combined, these two perspectives provide us with an optimal view that leads to timely execution and translates into superior investment performance.

Strong Brand. In 2008, we introduced a new global brand positioning and visual identity to further differentiate us from our competitors. Based on evidence provided by marketing surveys we have commissioned, the extensive coverage we receive in top-tier business publications, the major awards we receive in many categories of real estate, sustainability and ethics, as well as our significant, long-standing client relationships, we believe that large corporations and institutional investors and occupiers of real estate recognize Jones Lang LaSalle's ability to reliably create value in changing market conditions. Our reputation is based on our deep industry knowledge, excellence in service delivery, integrity and our global provision of high-quality, professional real estate and investment management services. We believe that the combined strength of the Jones Lang LaSalle and LaSalle Investment Management brands represents a significant advantage when we pursue new business opportunities and is also a major motivation for talented people to join us around the world.

We believe we hold the necessary trademarks worldwide with respect to the "Jones Lang LaSalle" and "LaSalle Investment Management" names and the related logo, which we expect to continue to renew as necessary.

Financial Strength. We focus on maintaining financial performance metrics, particularly our leverage and interest coverage ratios, that will allow us to maintain investment grade financial ratings. We believe that the confidence in the financial strength of long-term service providers has become increasingly important to our clients, particularly in light of the global recession and the volatility of the capital markets in its aftermath. We believe that clients are increasingly making financial strength one of the more important criteria when they are selecting real estate service providers. Accordingly, our ability to present a superior financial condition distinguishes us as we compete for business.

We also believe that our geographic dispersion and the diversity of our service offerings across the globe provide a diversification of the sources of our revenues that reduces the overall inherent volatility of operating a real estate services business and therefore an additional measure of financial stability relative to other firms that are only local or regional and therefore must rely on the strength of fewer different markets.

INDUSTRY TRENDS

Recovering But Still Uncertain Economic Conditions. During 2010 and 2011, commercial real estate markets broadly recovered around the world, although at different speeds and different levels of strength. Commercial values in most markets have been rising, though at varying rates of growth. Cross-border transaction volumes were nearly back to the levels of the previous cycle by the end of 2010, and continued to increase in 2011. During the second half of 2011, however, additional uncertainty was injected into the markets by the political and economic challenges that arose within the European Union, particularly as they influenced the credit quality of sovereign bonds issued by various European countries and the stability and liquidity of European banks. Additionally, unemployment, downward pressure on residential prices and political gridlock in the United States continued to tamp down economic recovery,

although there have been more recent signs of relative improvement. Due to the continuing uncertainties, a significant weight of equity capital has been targeting the most high quality prime real estate assets across all sectors, with prime yields continuing to compress due to the low supply of high quality assets to meet investor demand. Prime capital values have been rising over the last two years, most notably in many of the world's top office markets. Leasing conditions also have broadly improved worldwide although progress continues to trail the recovery in global capital markets.

Table of Contents

Increasing Demand for Global Services and Globalization of Capital Flows. Many corporations based in countries around the world have pursued growth opportunities in international markets. Many are striving to control costs by outsourcing or offshoring non-core business activities. Both trends have increased the demand for global real estate services, including facilities management, tenant representation and leasing, property and energy management services. We believe that these trends will favor real estate service providers with the capability to provide services—and consistently high service levels—in multiple markets around the world. The highly competitive marketplace for the services we provide, combined with financial pressures experienced by certain of our competitors have, however, negatively impacted fees within some of our service lines.

Additionally, real estate capital flows have become increasingly global, as more assets are marketed internationally and as more investors seek real estate investment opportunities beyond their own borders. This trend has created new opportunities for investment managers equipped to facilitate international real estate capital flows and execute cross-border real estate transactions.

Growth of Outsourcing. In recent years outsourcing of professional real estate services has increased substantially, as corporations have focused corporate resources on core competencies. Although some continue to unbundle and separate the sources of their real estate services, large users of commercial real estate services continue to demonstrate an overall preference for working with single-source service providers able to operate locally, regionally and globally. The ability to offer a full range of services on this scale requires significant corporate infrastructure investment, including information technology and personnel training. Smaller regional and local real estate service firms, with limited resources, are less able to make such investments. In addition, public and other non-corporate users of real estate, including government agencies and health and educational institutions, have begun to outsource real estate activities as a means of reducing costs. As a result, we believe there continues to be significant growth opportunities for firms like ours that can provide integrated real estate services across many geographic markets.

Alignment of Interests of Investors and Investment Managers. Institutional investors continue to allocate significant portions of their investment capital to real estate. Many investors have shown a desire to commit their capital to investment managers willing to co-invest their own capital in specific real estate investments or real estate funds. In addition, investors are increasingly requiring that fees paid to investment managers be more closely aligned with investment performance. As a result, we believe that investment managers with co-investment capital, such as LaSalle Investment Management, will have an advantage in attracting real estate investment capital. In addition, co-investment may bring the opportunity to provide additional services related to the acquisition, financing, property management, leasing and disposition of such investments.

We expect institutional capital to continue to flow into real estate as many institutional funds are currently under-allocated to real estate as an asset class. We also are seeing institutional investors begin to consolidate their real estate portfolios, moving away from the spread of smaller managers assembled over the last cycle and towards larger managers such as LaSalle Investment Management.

Industry Consolidation and Other Trends. We believe that consolidation in our industry will continue as the larger, more financially and operationally stable companies will gain market share and become increasingly more capable of servicing the needs of global clients. We also believe that developed countries will be favored for new investment as the risk appetite by investors remains conservative. Additionally, governance and ethics will become increasingly important factors as operators and investors will seek to avoid the significant potential costs and reputational issues associated with compliance missteps, such as violations of the U.S. Foreign Corrupt Practices Act or the U.K. Bribery Act.

Table of Contents**EMPLOYEES**

With the help of aggressive goal and performance measurement systems and training, we attempt to instill in all of our people the commitment to be the best in the industry. Our goal is to be the real estate advisor of choice for clients and the employer of choice in our industry. To achieve that, we intend to continue to promote human resources techniques that will attract, motivate and retain high quality employees. The following table details our respective headcounts at December 31, 2011 and 2010 (rounded to the nearest hundred):

| | 2011 | 2010 |
|---|--------|--------|
| Professional non reimbursable employees | 18,800 | 15,500 |
| Directly reimbursable employees | 26,700 | 24,800 |
| Total employees | 45,500 | 40,300 |

During 2011, we added approximately 1,400 employees as the result of the merger with King Sturge. Reimbursable employees include our property and integrated facilities management professionals and our building maintenance employees. The cost of these employees is generally reimbursable by our clients. Our employees are not members of any labor unions with the exception of approximately 1,200 directly reimbursable property maintenance employees in the United States. Approximately 31,700 and 27,600 of our employees at December 31, 2011 and 2010, respectively, were based in countries other than the United States.

COMPANY WEB SITE, CORPORATE GOVERNANCE AND OTHER AVAILABLE INFORMATION

Jones Lang LaSalle's Website address is www.joneslanglasalle.com. We make available, free of charge, our Form 10-K, 10-Q and 8-K reports, and our proxy statements, as soon as reasonably practicable after we file them electronically with the U.S. Securities and Exchange Commission ("SEC"). You also may read and copy any document we file with the SEC at its public reference room at 100 F Street, NE, Washington, D.C. 20549. Information about its public reference room can be obtained by calling the SEC at 1.800.SEC.0330. The SEC maintains an internet site that contains annual, quarterly and current reports, proxy statements and other information that we file electronically with the SEC. The SEC's Website address is www.sec.gov.

The Company's Code of Business Ethics, which applies to all employees of the Company, including our Chief Executive Officer, Chief Operating and Financial Officer, Global Controller and the members of our Board of Directors, can also be found in multiple languages on our Web site under Investor Relations/Board of Directors and Corporate Governance. In addition, the Company intends to post any amendment or waiver of the Code of Business Ethics with respect to a member of our Board of Directors or any of the executive officers named in our proxy statement.

Our Vendor Code of Conduct establishes the standard of conduct we require of vendors we hire for ourselves and on behalf of clients. We have published our Vendor Code of Conduct in multiple languages on our Website.

During 2011, we issued new versions of each of our Code of Business Ethics and our Vendor Code of Conduct.

Our Web site also includes information about our corporate governance. In addition to other information, we will make the following materials available in print to any shareholder who requests them:

Bylaws
 Corporate Governance Guidelines
 Charters for our Audit, Compensation, and Nominating and Governance Committees
 Statement of Qualifications for Members of the Board of Directors
 Complaint Procedures for Accounting and Auditing Matters
 Statements of Beneficial Ownership of our Equity Securities by our Directors and Officers

Our Corporate Social Responsibility Report is available at www.joneslanglasalle.com/csr.

Table of Contents

ITEM 1A. RISK FACTORS

Our business is complex, dynamic, entrepreneurial and international. Accordingly, it is subject to a number of significant risks in the ordinary course of its operations. If we cannot or do not successfully manage the risks associated with the services we provide, our operations, business, operating results, reputation and/or financial condition could be materially and adversely affected.

One of the challenges of a global business such as ours is to determine in a sophisticated manner the critical enterprise risks that exist or may newly develop over time as our business evolves. We must then determine how best to employ reasonably available resources to prevent, mitigate and/or minimize those risks that we are able to identify as having the greatest potential to cause significant damage from an operational, financial or reputational standpoint. An important dynamic we must also consider and appropriately manage is how much and what types of commercial insurance to obtain and how much potential liability may remain uninsured consistent with the infrastructure that is in place within the organization to identify and properly manage it.

We attempt to approach enterprise risk issues in an increasingly coordinated way across the globe. We govern our enterprise risk program primarily through our Global Operating Committee (the GOC). Our Global Chief Operating Officer chairs the GOC, which includes the Chief Operating Officers of our four reported business segments and the leaders of our principal corporate staff groups: Finance, Legal Services, Accounting, Insurance, Human Resources, Tax and Information Technology. The GOC coordinates its enterprise risk activities with our Internal Audit function, whose leadership attends GOC meetings and performs an annual risk assessment of our business in order to determine where to focus its auditing and advisory efforts. Representatives of the GOC and Internal Audit review risk matters, including emerging risks and the mitigation efforts that are in place, and report quarterly to the Audit Committee of our Board of Directors with respect to our procedural process and to the full Board of Directors with respect to substantive matters.

Various factors over which we have no control significantly affect commercial real estate markets. These include (1) macro movements of the stock, bond, currency and derivatives markets, (2) the political environment and (3) government policy and regulations. The severe financial disruption and global recession that occurred during 2008 and 2009 materially impacted global real estate markets as the volume and pace of commercial real estate transactions contracted and real estate pricing and leasing in many countries and markets fell substantially. Markets stabilized and improved during 2010 and into 2011, and business levels and confidence improved to more normal levels. Their continued recovery was impeded during the second half of 2011 for various reasons, including significant uncertainties arising out of the financial, political and liquidity challenges that continue for heavily indebted countries within the European Union, the continued stubbornness of unemployment within the United States and fiscal conservatism by the Chinese and Indian governments designed to curb inflationary pressures on housing and food prices. In general, macroeconomic and geopolitical uncertainties remain and the strength of the recovery has therefore varied from one economy to another. Also, governments are responding to problematic situations in different and sometimes unpredictable and politically motivated ways. Accordingly, it is inherently difficult to make accurate predictions about the future movements in the markets in which we operate.

This section reflects our current views concerning the most significant risks we believe our business faces, both in the short-term and the long-term. We do not, however, purport to include every possible risk from which we might sustain a loss. For purposes of the following analysis and discussion, we generally group the risks we face according to four principal categories:

External Market Risk Factors;
Internal Operational Risk Factors;
Financial Risk Factors; and

Human Resources Risk Factors.

We could appropriately place some of the risks we identify in more than one category, but we have chosen the one we view as primary. We do not necessarily present the risks below in their order of significance, the relative likelihood that we will experience a loss or the magnitude of any such loss. We also do not attempt to discuss the various significant efforts we employ to attempt to mitigate or avoid the risks we identify, although we believe we have a robust program to do so in a systematic way. Certain of these risks also may give rise to business opportunities for our firm, but our discussion of risk factors in Item 1A is limited to the adverse effects the risks may have on our business.

Table of Contents

External Market Risk Factors

GENERAL ECONOMIC CONDITIONS AND REAL ESTATE MARKET CONDITIONS CAN HAVE A NEGATIVE IMPACT ON OUR BUSINESS.

Real estate markets are inherently cyclical. They correlate strongly to local and national economic and political conditions or, at least, to the perceptions and confidence of investors and users as to the relevant economic outlook. For example, corporations may be hesitant to expand space or enter into long-term commitments if they are concerned about the general economic environment. Corporations that are under individual financial pressure for any reason, or are attempting to more aggressively manage their expenses, may (1) reduce the size of their workforces, (2) reduce spending on capital expenditures, including with respect to their offices, (3) permit more of their staff to work from home offices and/or (4) seek corresponding reductions in office space and related management services.

We have previously experienced, and expect in the future that we will be negatively impacted by, periods of economic slowdown or recession and corresponding declines in the demand for real estate and related services. The recent economic recession was extraordinary for its worldwide scope, severity and impact on major financial institutions, as well as the extent of governmental stimulus and regulatory responses. During 2011, the inability of the European Union to effect a sustainable resolution of the financial and political instability of certain of its member countries has prevented the return of a healthy level of confidence to its markets.

The speed with which markets change, both positively and negatively, has accelerated due to the increased global interconnectedness that has resulted from the immediacy and availability of information, among other reasons. This has added to the challenges of anticipating and quickly adapting to changes in business and revenue, particularly since real estate transactions are inherently complicated and longer-term in nature.

Negative economic conditions and declines in the demand for real estate and related services in several markets or in significant markets could have a material adverse effect, including as a result of the following factors:

Decline in Acquisition and Disposition Activity

A general decline in acquisition and disposition activity can lead to a reduction in the fees and commissions we receive for arranging such transactions, as well as in fees and commissions we earn for arranging financing for acquirers. For example, although overall conditions improved during 2010 and the first part of 2011, restrictions in the availability of credit in the global financial markets and the various other well-publicized business dislocations that resulted from the overall financial crisis, significantly reduced the volume and pace of commercial real estate transactions during 2008 and 2009 and negatively impacted real estate pricing as a general matter in many countries. Continued weakness in residential housing and unemployment in the United States and the challenges within the European Union, among other factors, have precluded a robust recovery in many markets.

Decline in the Real Estate Values and Performance, Leasing Activity and Rental Rates

A general decline in the value and performance of real estate and in rental rates can lead to a reduction in both (1) investment management fees, a significant portion of which is generally based upon the performance of investments and net asset values, and (2) the value of the co-investments we make with our investment management clients or merchant banking investments we have made for our own account. Additionally, such declines can lead to a reduction in fees and commissions that are based on the value of, or revenue produced by, the properties with respect to which we provide services. This may include fees and commissions (1) for property management and valuations, (2) generated by our Capital Markets, Hotels and other businesses for arranging acquisitions, dispositions and financings and (3) for arranging leasing transactions. Such declines can also lead to an unwillingness or inability of clients to make new (or honor existing) capital commitments to funds sponsored by our investment management business, which can result in a decline of both investment management fees and incentive fees and can also restrict our ability to employ capital for new investments in current funds or establish new funds. The general decline in the

value and performance of real estate negatively impacted the value of our own co-investments during 2009 and 2010 although we recognized an increase in their value during 2011.

Historically for companies in our industry, a significant decline in real estate values in a given market has also generally tended to result in increased litigation and claims regarding advisory and valuation work done prior to the decline, as well as pressure from investment management clients regarding performance.

Table of Contents

Decline in Value of Real Estate Securities

A general decline in the value of real estate securities (for example, real estate investment trusts, or “REITs”) will have a negative effect on the value of the portfolios that our LaSalle Investment Management Securities business manages, and any securities held in accounts that LaSalle Investment Management manages, and therefore the fees we earn on assets under management. In addition, a general decline in the value of real estate securities could negatively impact the amount of money that investors are willing to allocate to real estate securities and the pace of engaging new investor clients.

Cyclicality in the Real Estate Markets; Lag in Recovery Relative to Broader Markets

Cyclicality in the real estate markets may lead to cyclicality in our earnings and significant volatility in our stock price, which in recent years has been highly sensitive to market perception of the global economy generally and our industry specifically. Real estate markets are also thought to “lag” the broader economy. This means that even when underlying economic fundamentals improve in a given market, it may take additional time for these improvements to translate into strength in the real estate markets. This may be exacerbated when, as we believe has continued to occur in the aftermath of the financial crisis, banks delay their resolution of commercial real estate assets whose values are less than their associated loans.

Effect of Changes in Non-Real Estate Markets

Changes in non-real estate markets can also affect our business in different ways for different types of investors. For example, relative strength in the equity markets, which began to increase during the second half of 2009 and continued into 2011, can lead certain investors to lower the level of capital allocated to real estate, which in turn can mean that our ability to generate fees from the operation of our investment management business will be negatively impacted. Strength in the equity markets can also negatively impact the perception of relative performance of real estate as an asset class, which in turn means that the incentive fees relating to the performance of our investment funds will be negatively impacted. For those investors who seek to maintain real estate as a relatively fixed percentage of their portfolios and will periodically rebalance in order to do so, the so-called “denominator effect” can lead to either (1) selling real estate when the equity markets are weak since that can make real estate investments too great of a proportion of their portfolios or (2) buying real estate when equity markets are strong in order to maintain the desired percentage relative to other assets.

REAL ESTATE SERVICES AND INVESTMENT MANAGEMENT MARKETS ARE HIGHLY COMPETITIVE.

We provide a broad range of commercial real estate and investment management services. There is significant competition on an international, regional and local level with respect to many of these services and in commercial real estate services generally. Depending on the service, we face competition from other real estate service providers, institutional lenders, insurance companies, investment banking firms, investment managers, accounting firms, technology firms, consulting firms, firms providing outsourcing of various types (including technology, and building products), any of which may be a global, regional or local firm, and companies that self-provide their real estate services with in-house capabilities.

Many of our competitors are local or regional firms. Although they may be substantially smaller in overall size than we are, they may be larger than we are in a specific local or regional market. Some of our competitors have expanded the services they offer in an attempt to gain additional business. Some may be providing outsourced facilities management services in order to sell products to clients (such as HVAC systems) that we do not offer. In some sectors of our business, particularly Corporate Solutions, some of our competitors may have greater financial, technical and marketing resources, larger customer bases, and more established relationships with their customers and suppliers than we have. Larger or better-capitalized competitors in those sectors may be able to respond faster to the need for technological changes, price their services more aggressively, compete more effectively for skilled professionals, finance acquisitions more easily, develop innovative products more effectively and generally compete more

aggressively for market share. This can also lead to increasing commoditization of the services we provide and increasing downward pressure on the fees we can charge.

New competitors, or alliances among competitors that increase their ability to service clients, could emerge and gain market share, develop a lower cost structure, adopt more aggressive pricing policies or provide services that gain greater market acceptance than the services we offer. In order to respond to increased competition and pricing pressure, we may have to lower our prices or loosen contractual terms (such as liability limitations), which may have an adverse effect on our revenue and profit margins. We may also need to become increasingly productive and efficient in the way we deliver services or with respect to the cost structure supporting our businesses, which may in turn require more innovative uses of technology.

Table of Contents

As we are in a consolidating industry, there is an inherent risk that competitive firms may be more successful than we are at growing through merger and acquisition activity. While we have successfully grown organically and through a series of acquisitions, sourcing and completing acquisitions are complex and sensitive activities. In light of the continuing need to provide clients with more comprehensive services on a more productive and cost efficient basis, we expect increasing acquisition opportunities to emerge and may increase our acquisition activity compared to recent years. For example, in 2011 we completed the significant acquisition of the King Sturge business in Europe after having considerably slowed our acquisition activity during the 2008-2010 period. We are considering, and will continue to consider, acquisitions that we believe will strengthen our market position, increase our profitability and supplement our organic growth. However, there is no assurance that we will be able to continue our acquisition activity in the future at the same pace as we have in the past.

We believe we emerged from the global economic downturn in a stronger financial and market share position relative to certain of our traditional competitors. This may in some cases lead to a willingness on the part of a competitor to engage in aggressive pricing, advertising or hiring practices in order to maintain market shares or client relationships. To the extent this occurs, it increases the competitive risks and fee pressures we face, although ramifications will differ from one competitor to another given their different positions within the marketplace and their different financial situations.

We are substantially dependent on long-term client relationships and on revenue received for services under various service agreements. Many of these agreements may be canceled by the client for any reason with as little as 30 to 60 days' notice, as is typical in the industry. In this competitive market, if we are unable to maintain these relationships or are otherwise unable to retain existing clients and develop new clients, our business, results of operations and/or financial condition may be materially adversely affected. The global economic downturn led to additional pricing pressure from clients as they themselves came under financial pressure, participated in governmental bail-out programs or filed for bankruptcy or insolvency protection, as some significant clients did. These effects moderated during 2011 but they could increase again in the wake of the political and economic uncertainties within the European Union.

The value and premium status of our brand is one of our most important assets. An inherent risk in maintaining our brand is that we may fail to successfully differentiate the scope and quality of our service and product offerings from those of our competitors, or that we may fail to sufficiently innovate or develop improved products or services that will be attractive to our clients. Additionally, given the rigors of the competitive marketplace in which we operate, there is the risk that we may not be able to continue to find ways to operate more productively and more cost-effectively, including by achieving economies of scale, or that we will be limited in our ability to further reduce the costs required to operate on a globally coordinated platform.

The dynamic nature of the Internet and social media, which have substantially increased the availability and transparency of information, could devalue the information that we gather and disseminate as part of our business model and may harm certain aspects of our brokerage business in the event that principals of transactions prefer to transact directly with each other. In this regard, we face potential disintermediation challenges from companies whose primary business is to aggregate and disseminate for compensation the listing information they obtain from firms like ours that represent commercial landlords offering space to let.

THE SEASONALITY OF OUR REAL ESTATE SERVICES BUSINESS EXPOSES US TO RISKS. Within our Real Estate Services business, our revenue and profits have historically tended to be significantly higher in the third and fourth quarters of each year than in the first two quarters. This is a result of a general focus in the real estate industry on completing or documenting transactions by calendar-year-end and because certain expenses are constant through the year. Historically, we have reported an operating loss or a relatively small profit in the first quarter and then increasingly larger profits during each of the following three quarters, excluding the recognition of

investment-generated performance fees and co-investment equity gains (both of which can be particularly unpredictable).

The seasonality of our business makes it difficult to determine during the course of the year whether planned results will be achieved, and thus to adjust to changes in expectations. Additionally, negative economic or other conditions that arise at a time when they impact performance in the fourth quarter, such as the particular timing of when larger transactions close or changes in the value of the U.S. dollar against other currencies, may have a more significant impact than if they occurred earlier in the year. To the extent we are not able to identify and adjust for changes in expectations or we are confronted with negative conditions that impact inordinately on the fourth quarter of a year, this could have a material adverse effect.

Table of Contents

As a result of growth in our property management and integrated facilities management businesses and other services related to the growth of outsourcing of corporate real estate services, there has been somewhat less seasonality in our revenue and profits during the past few years than there was historically, but we believe that some level of seasonality will always be inherent in our industry and outside of our control. Although we continued to experience a level of seasonality in 2011 that was similar to previous years, we are unable to predict whether the aftermath of the global economic downturn, which led to unprecedented market disruptions and levels of government intervention, or whether the consequences of the current political and financial uncertainties within the European Union, will result in any overall permanent changes to the marketplace that will have an effect on the historical seasonality of our business in 2012 and beyond.

POLITICAL AND ECONOMIC INSTABILITY AND TRANSPARENCY: PROTECTIONISM; TERRORIST ACTIVITIES; HEALTH EPIDEMICS. We operate in approximately 70 countries with varying degrees of political and economic stability and transparency. For example, within the past few years certain Middle Eastern, Asian, European and South American countries have experienced serious political and economic instability that continued and in some cases increased during 2011, and such instability will likely continue to arise from time to time in countries in which we have operations. It is difficult for us to predict where or when a significant change in the political leadership or regime within a given country may occur, or what the implications of such a change will be on our operations given that legislative, tax and business environments can be altered quickly and dramatically. For example, the recent political changes in Egypt and other Middle Eastern countries have significantly disrupted business activity in these countries. Also, during 2009, 2010 and 2011 there has continued to be an unusual level of legislative and regulatory activity in the United States and certain countries in Europe, resulting in changes to financial, tax, healthcare, governance and other laws that may directly affect our business and continue to evolve. During the second half of 2011, there arose debate about the continued viability of the European Union and the Euro currency, and uncertainties remain about how this situation may ultimately be resolved, including with respect to the creditworthiness of European sovereign debt and financial institutions, and what the consequences to our business might be.

Accordingly, our ability to operate our business in the ordinary course and our willingness to commit new resources or investments may be affected or disrupted in one way or another, with corresponding reductions in revenue, increases in taxes and more aggressive taxation policies, increases in other expenses (such as with respect to employee healthcare), restrictions on repatriating funds, difficulties in collecting receivables from clients, difficulties in recruiting staff or other material adverse effects.

In the event that governments engage in protectionist policies which favor local firms over foreign firms or which restrict cross-border capital flows, our ability to utilize and benefit from our global platform and integrated business model could be adversely affected. The global downturn also significantly added to the deficit spending of certain governments in countries where we do business and has called into question the creditworthiness of some countries. More recently, particularly in Europe, governments have instituted austerity programs in an effort to contract spending and avoid defaults on sovereign debt, some of which have resulted in social unrest. There has been some speculation that one or more European countries may stop using the Euro as its currency. It is inherently difficult to predict what the consequences to our business may be from these situations as they develop.

In addition, terrorist activities have escalated in recent years and at times have affected cities in which we operate. The 2008 terrorist attack in Mumbai, India, where we have a presence, is an example and there have been serious situations in other cities where we have important operations, including London and Moscow. To the extent that similar terrorist activities continue to occur, they may adversely affect our business because they tend to target the same type of high-profile urban areas in which we do business.

Health epidemics that affect the general conduct of business in one or more urban areas (including as the result of travel restrictions and the inability to conduct face-to-face meetings), such as occurred in the past from SARS and influenza, or may occur in the future from other types of outbreak, can also adversely affect the volume of business transactions, real estate markets and the cost of operating real estate or providing real estate services.

Table of Contents

The increasing globalization by our multi-national clients creates pressure to expand our own geographical reach into less developed countries, including for example within Africa, which tends to exacerbate the above risks.

INFRASTRUCTURE DISRUPTIONS. Our ability to conduct a global business may be adversely impacted by disruptions to the infrastructure that supports our businesses and the communities in which they are located. This may include disruptions involving electrical, communications, transportation or other services used by Jones Lang LaSalle or third parties with which we conduct business. It may also include disruptions as the result of natural disasters such as hurricanes, earthquakes and floods, whether as the result of climate change or otherwise, political instability, general labor strikes or turmoil or terrorist attacks. These disruptions may occur, for example, as a result of events affecting only the buildings in which we operate (such as fires), or as a result of events with a broader impact on the cities where those buildings are located (including, potentially, the longer-term effects of global climate change). Nearly all of our employees in our primary locations, including Chicago, London, Singapore and Sydney, work in close proximity to each other in one or more buildings. If a disruption occurs in one location and our employees in that location are unable to communicate with or travel to other locations, our ability to service and interact with our clients may suffer, and we may not be able to successfully implement contingency plans that depend on communication or travel.

The infrastructure disruptions we describe above may also disrupt our ability to manage real estate for clients or may adversely affect the value of real estate investments we make on behalf of clients. The buildings we manage for clients, which include some of the world's largest office properties and retail centers, are used by numerous people daily. As a result, fires, earthquakes, floods, other natural disasters, defects and terrorist attacks can result in significant loss of life, and, to the extent we are held to have been negligent in connection with our management of the affected properties, we could incur significant financial liabilities and reputational harm.

The occurrence of natural disasters and terrorist attacks can also significantly increase the availability and/or cost of commercial insurance policies covering real estate, both for our own business and for those clients whose properties we manage and who may purchase their insurance through the insurance buying programs we make available to them.

There can be no assurance that the disaster recovery and crisis management procedures we employ will suffice in any particular situation to avoid a significant loss. Given that our staff is increasingly mobile and less reliant on physical presence in a Company office, our disaster recovery plans increasingly rely on the availability of the Internet (including "cloud" technology) and mobile phone technology, so the disruption of those systems would likely affect our ability to recover promptly from a crisis situation. Additionally, our ability to foresee or mitigate the potential consequences to managed properties, and real estate generally, from the effects of climate change, may be limited.

CIVIL AND REGULATORY CLAIMS; LITIGATING DISPUTES IN DIFFERENT JURISDICTIONS. Substantial civil legal liability or a significant regulatory action against our Firm could have a material adverse financial effect or cause us significant reputational harm, which in turn could seriously harm our business prospects. Many legal systems, including in the United States, have fairly significant barriers against recovering legal fees from plaintiffs that file cases we consider frivolous, so the costs to us of defending such cases can be substantial even if we prevail.

While we maintain commercial insurance in an amount we believe is appropriate, we also maintain a significant level of self-insurance for the liabilities we may incur. Although we place our commercial insurance with only highly-rated companies, the value of otherwise valid claims we hold under insurance policies may become uncollectible due to the insolvency of the applicable insurance company. The global economic downturn made insurance companies less stable financially and has therefore increased the risk of their creditworthiness to us to some degree as some of the most prominent insurers have experienced downgrades in their financial ratings. The current political and economic uncertainties in the European Union have negatively impacted the financial strength of those insurance companies that hold sovereign debt issued by certain European countries.

The quality of ratings provided by outside rating agencies has also generally been called into question in connection with the global financial crisis, which may increase the risk of relying on these ratings when we conduct due diligence on the credit-quality of insurance companies. The global nature of our business means that there are fewer insurance companies that can adequately service our account, so we do not have a significant number of alternative providers in case we are unable to continue to place coverage with one of our existing insurers. Additionally, the claims we have can be complex and insurance companies can prove difficult or bureaucratic in resolving claims, which may result in payments to us being delayed or reduced or that we must litigate in order to enforce an insurance policy claim.

Table of Contents

Any disputes we have with third parties, or any government regulatory matters, generally must be adjudicated within the jurisdiction in which the dispute arose. Therefore, our ability to resolve our disputes successfully depends on the local laws that apply and the operation of the local judicial system. The timeliness, quality, transparency, integrity and sophistication of judicial systems vary widely from one jurisdiction to the next. Our geographic diversity therefore may expose us to disputes in certain jurisdictions that could be challenging to resolve efficiently and/or effectively, particularly as there appears to be an increasing tendency toward litigation in emerging markets, where the rule of law is less reliable and legal systems are less mature and transparent. It also may be more difficult to collect receivables from clients who do not pay their bills in certain jurisdictions, since resorting to the judicial system in certain countries may not be an effective alternative given the delays and costs involved.

Internal Operational Risk Factors

CONCENTRATIONS OF BUSINESS WITH CORPORATE AND INVESTOR CLIENTS CAUSES INCREASED CREDIT RISK AND GREATER IMPACT FROM THE LOSS OF CERTAIN CLIENTS. While our client base remains highly diversified across industries and geographies, we do value the expansion of business relationships with individual corporate clients and institutional investors because of the increased efficiency and economics (both to our clients and our Firm) that can result from developing repeat business from the same client and from performing an increasingly broad range of services for the same client. Having increasingly large and concentrated clients also can lead to greater or more concentrated risks of loss if, among other possibilities, such a client (1) experiences its own financial problems, which can lead to larger individual credit risks, (2) becomes bankrupt or insolvent, which can lead to our failure to be paid for services we have previously provided or funds we have previously advanced, (3) decides to reduce its operations or its real estate facilities, (4) makes a change in its real estate strategy, such as no longer outsourcing its real estate operations, (5) decides to change its providers of real estate services or (6) merges with another corporation or otherwise undergoes a change of control, which may result in new management taking over with a different real estate philosophy or in different relationships with other real estate providers. In the case of LaSalle Investment Management, concentration of investor clients can lead to fewer sources of investment capital, which can negatively affect assets under management in case a higher-volume client withdraws its funds or does not re-invest them.

Additionally, competitive conditions, particularly in connection with increasingly large clients may require us to compromise on certain contract terms with respect to the payment of fees, the extent of risk transfer, liability limitations and other contractual terms, or in connection with disputes or potential litigation.

The global economic downturn increased these risks to our organization as it created significant financial distress (which in some cases led to bankruptcy or insolvency) for many organizations, including some that are clients of ours. Some of our largest clients include companies in the financial services industry, such as commercial banks, investment banks and insurance companies, and companies in the auto industry, which were significantly impacted by the global economic downturn and have not necessarily rebounded to pre-crisis levels of financial security. The current issues in the European Union may negatively impact the financial condition of companies conducting significant operations in European countries that experience recessions as the result of contractions in government spending, including as the result of reduced liquidity from banks that tighten lending policies and potential social unrest.

CONTRACTUAL LIABILITIES AS PRINCIPAL AND FOR WARRANTED PRICING. We may, on behalf of our clients, hire and supervise third-party contractors to provide construction, engineering and various other services for properties we are managing or developing on behalf of clients. Depending upon (1) the terms of our contracts with clients, which, for example, may place us in the position of a principal rather than an agent, or (2) the responsibilities we assume or are legally deemed to have assumed in the course of a client engagement (whether or not memorialized in a contract), we may be subjected to, or become liable for, claims for construction defects, negligent performance of

work or other similar actions by third parties we do not control.

Table of Contents

Adverse outcomes of property management disputes or litigation could negatively impact our business, operating results and/or financial condition, particularly if we have not limited in our contracts the extent of damages to which we may be liable for the consequences of our actions, or if our liabilities exceed the amounts of the commercial third-party insurance that we carry. Moreover, our clients may seek to hold us accountable for the actions of contractors because of our role as property manager even if we have technically disclaimed liability as a legal matter, in which case we may find it commercially prudent to participate in a financial settlement for purposes of preserving the client relationship.

Acting as a principal may also mean that we pay a contractor before we have been reimbursed by the client, which exposes us to additional risks of collection from the client in the event of an intervening bankruptcy or insolvency of the client. The reverse can occur as well, where a contractor we have paid files bankruptcy or commits fraud with the funds before completing a project for which we have paid it in part or in full.

As part of our project management business, we may enter into agreements with clients that provide for a warranted or guaranteed cost for a project that we manage. In these situations, we are responsible for managing the various other contractors required for a project, including general contractors, in order to ensure that the cost of a project does not exceed the contract price and that the project is completed on time. In the event that one of the other contractors on the project does not or cannot perform as a result of bankruptcy or for some other reason, we may be responsible for any cost overruns as well as the consequences for late delivery. In the event that for whatever reason we have not accurately estimated our own costs of providing services under warranted or guaranteed cost contracts, we may lose money on such contracts until such time as we can legally terminate them.

During the global economic downturn, we experienced credit-related problems at a higher level than in the past with vendors and contractors due to their increased financial instability. We expect this may also occur with respect to clients that are impacted by contracting liquidity and possible recession within the European Union.

PERFORMANCE AND FIDUCIARY OBLIGATIONS UNDER CLIENT CONTRACTS; REVENUE RECOGNITION; SCOPE CREEP; RISING COST OF INSURANCE RESULTING FROM NEGLIGENCE CLAIMS. In certain cases we are subject to fiduciary obligations to our clients, which may result in a higher level of legal obligation compared to basic contractual obligations. These relate to, among other matters, the decisions we make on behalf of a client with respect to managing assets on its behalf or purchasing products or services from third parties or other divisions within our Firm. Our services may involve handling substantial amounts of client funds in connection with managing their properties. They may also involve complicated and high-profile transactions which involve significant amounts of money. We face legal and reputational risks in the event we do not perform, or are perceived to have not performed, under those contracts or in accordance with those obligations, or in the event we are negligent in the handling of client funds or in the way in which we have delivered our professional services.

We have certain business lines, such as valuations and lease administration, where the size of the transactions we handle are much greater than the fees we generate from them. As a result, the consequences of errors that lead to damages can be disproportionately large in the event our contractual protections or our insurance coverage are inadequate to protect us fully.

The precautions we take to prevent these types of occurrences, which represent a significant commitment of corporate resources, may nevertheless be ineffective in certain cases. Unexpected costs or delays could make our client contracts or engagements less profitable than anticipated. Any increased or unexpected costs or unanticipated delays in connection with the performance of these engagements, including delays caused by factors outside our control, could have an adverse effect on profit margins.

In the event we perform services for clients without executing sufficient contractual documentation, we may be unable to realize our full compensation potential or recognize revenue for accounting purposes, and we may not be able to effectively limit our liability in the event of client disputes. If we perform services for clients that are beyond, or different from, what were originally contemplated in the governing contracts (known as “scope creep”), we may not be fully reimbursed for the services provided, or our potential liability in the case of a negligence claim may not have been as limited as it normally would have been or may be unclear.

If we make a large insurance claim on our professional indemnity policy due to a situation involving our negligence, we would expect subsequent premiums to increase materially, the size of deductibles we are required to retain may increase substantially and the availability of future coverage could be negatively impacted.

Table of Contents

CO-INVESTMENT, INVESTMENT, MERCHANT BANKING AND REAL ESTATE INVESTMENT BANKING ACTIVITIES SUBJECT US TO REAL ESTATE INVESTMENT RISKS AND POTENTIAL LIABILITIES. An important part of our investment strategy includes investing in real estate, both individually and along with our investment management clients. In order to remain competitive with well-capitalized financial services firms, we also may make merchant banking investments for which we may use Firm capital to acquire properties before the related investment management funds have been established or investment commitments have been received from third-party clients. A strategy that we have not pursued vigorously due to the disruptions in the markets, but that still has potential, is to further engage in certain real estate investment banking activities in which we, either solely or with one or more joint venture partners, would employ capital to assist our clients in maximizing the value of their real estate. For example, we might acquire a property from a client that wishes to dispose of it within a certain time frame, after which we would market it for sale as the principal and therefore assume any related market risk.

We also operate business lines that have as part of their strategy the acquisition, development, management and sale of real estate. Investing in any of these types of situations exposes us to a number of risks. Although our investment activities were substantially curtailed during 2008 through 2011 as the result of the on-going market uncertainties that have followed the worldwide credit crisis and economic downturn, we do anticipate that these strategies may ultimately re-emerge in the event that markets stabilize sufficiently.

Investing in real estate for the above reasons poses the following risks:

We may lose some or all of the capital that we invest if the investments under perform. Real estate investments can under-perform as the result of many factors outside of our control, including the general reduction in asset values within a particular geography or asset class. Starting in 2007 and continuing through 2009, for example, real estate prices in many markets throughout the world declined generally as the result of the significant tightening of the credit markets and the effects of recessionary economies and significant unemployment. We recognized impairment charges of \$6 million, \$14 million and \$51 million in 2011, 2010, and 2009, respectively, representing our equity share of impairment charges against individual assets in which we hold co-investments. Impairment charges decreased in 2011 and 2010 as markets improved from their lows.

We will have fluctuations in earnings and cash flow as we recognize gains or losses, and receive cash, upon the disposition of investments, the timing of which is geared toward the benefit of our clients.

We generally hold our investments in real estate through subsidiaries with limited liability; however, in certain circumstances, it is possible that this limited exposure may be expanded in the future based on, among other things, changes in applicable laws or the application of existing or new laws. To the extent this occurs, our liability could exceed the amount we have invested.

We make co-investments in real estate in many countries, and this presents risks as described above in “External Market Risk Factors.” This may include changes to tax treaties, tax policy, foreign investment policy or other local legislative changes that may adversely affect the performance of our co-investments. The global economic downturn increased the chances of significant changes in government policies generally, the effects of which are inherently difficult to predict. The financial pressures on government entities that have resulted from weak economies and deficit spending may lead taxing authorities to more aggressively pursue taxes and question tax strategies and positions.

We generally make co-investments in the local currency of the country in which the investment asset exists. We will therefore be subject to the risks described below under “Currency Restrictions and Exchange Rate Fluctuations.”

CORPORATE CONFLICTS OF INTEREST. All providers of professional services to clients, including our Firm, must manage potential conflicts of interest. This occurs principally where the primary duty of loyalty we owe to one

client may potentially be weakened or compromised by a relationship we also maintain with another client or third party. Corporate conflicts of interest arise in the context of the services we provide as a firm to our different clients. Personal conflicts of interest on the part of our employees are separately considered as issues within the context of our Code of Business Ethics. The failure or inability of the Firm to identify, disclose and resolve potential conflicts of interest in a significant situation could have a material adverse effect.

Table of Contents

An example of a potential conflict of interest situation is that in the ordinary course of its business, LaSalle Investment Management hires property managers for the investment properties it holds on behalf of clients. In that case, it may hire Jones Lang LaSalle to provide such services or it may hire a firm that is a competitor of Jones Lang LaSalle. In the event it retains Jones Lang LaSalle, it may appear to have a conflict of interest with respect to the selection. As a fiduciary with respect to its client funds, LaSalle Investment Management resolves such potential conflicts by acting independently of Jones Lang LaSalle and following certain internal procedures designed to select the service provider that can best represent the interests of the investment management client or fund.

Another example is that in certain countries, based upon applicable regulations and local market dynamics, we have established joint ventures or other arrangements with insurance brokers through which insurance coverage is offered to clients, tenants in buildings we manage and vendors to those buildings. In any case, although we fully disclose our arrangements and do not require anyone to use the insurance services, Jones Lang LaSalle has a financial interest in the placement of insurance with such third parties and therefore we may be deemed to have certain conflicts of interest.

After reductions in the market values of the underlying properties, firms engaged in the business of providing valuations are inherently subject to a higher risk of claims with respect to conflicts of interest based on the circumstances of valuations they previously issued. Regardless of the ultimate merits of these claims, the allegations themselves can cause reputational damage and can be expensive to defend in terms of counsel fees and otherwise.

CLIENT AND VENDOR DUE DILIGENCE. There are circumstances where the conduct or identity of our clients could cause us reputational damage or financial harm or could lead to our non-compliance with certain laws. An example would be the attempt by a client to “launder” funds through its relationship with us, namely to disguise the illegal source of funds that are put into otherwise legitimate real estate investments. Another example is our inadvertently doing business with a client that has been listed on one of the “prohibited persons” lists now issued by many governments around the world. We may also from time to time legally invest the sovereign wealth funds of a government entity client which is subsequently deemed to be inappropriate either from a reputational or legal standpoint.

Similar problems can arise with respect to the vendors we hire to provide services or products to us or for our clients. In the normal course of business, we spend significant amounts in order to purchase goods and services for the properties we manage on behalf of clients.

Our efforts to evaluate clients, vendors and government entities before doing business with them in order not to do business with a prohibited party and to avoid attempts to launder money or otherwise to exploit their relationship with us may not be successful in all situations since compliance for a business such as ours is very complex and also since we take a risk-based approach to the procedures we have employed. Additionally, it is not always possible to accurately determine the ultimate owners or control persons within our clients’ organizations or other entities with which we do business, particularly if they are actively attempting to hide such information from regulatory authorities. We may therefore unknowingly be doing business with entities that are otherwise involved in illegal activities that do not involve us or that are ultimately controlled by persons with whom engaging in business has been prohibited by applicable regulatory authorities.

BURDEN OF COMPLYING WITH MULTIPLE AND POTENTIALLY CONFLICTING LAWS AND REGULATIONS AND DEALING WITH CHANGES IN LEGAL AND REGULATORY REQUIREMENTS. We face a broad range of legal and regulatory environments in the countries in which we do business. Coordinating our activities to deal with these requirements presents significant challenges. For example, in the United Kingdom, the Financial Services Authority (FSA) regulates the conduct of investment businesses and the Royal Institute of Chartered Surveyors (RICS) regulates the profession of Chartered Surveyors, which is the professional qualification

required for certain of the services we provide in the United Kingdom, in each case through upholding standards of competence and conduct. As another example, activities associated with raising capital, offering investment funds and investment sales are regulated in the United States by the Securities and Exchange Commission (SEC) and in other countries by similar securities regulatory authorities.

Table of Contents

As a publicly traded company, we are subject to various corporate governance and other requirements established by statute, pursuant to SEC regulations and under the rules of the New York Stock Exchange. During the past decade, the Sarbanes-Oxley and Dodd-Frank legislative initiatives in the United States have added some significant requirements to various aspects of our governance. Additionally, changes in legal and regulatory requirements can impact our ability to engage in business in certain jurisdictions or increase the cost of doing so. The legal requirements of U.S. statutes may also conflict with local legal requirements in a particular country, as, for example, when anonymous hotlines required under U.S. law were construed to conflict in part with French privacy laws. The jurisdictional reach of laws may be unclear as well, as when laws in one country purport to regulate the behavior of affiliated corporations within our group that are operating in other countries. There is some uncertainty, for example, in the jurisdictional reach of the new U.K. Bribery Act, and the standards for illegal activity in that Act are in some ways higher than those established under the US Foreign Corrupt Practices Act.

Identifying the regulations with which we must comply, and then complying with them is complex. We may not be successful in complying with regulations in all situations, as a result of which we could be subject to regulatory actions and fines for non-compliance. The global economic crisis has resulted in an unusual level of related government and legislative activities, which we expect will continue into the future and which exacerbates these risks. We are also seeing increasing levels of labor regulation in emerging markets, such as China, which affect our property management business.

Changes in governments or majority political parties may result in significant changes in enforcement priorities with respect to employment, health and safety, tax, securities disclosure and other regulations, which in turn could negatively affect our business.

LICENSING AND REGULATORY REQUIREMENTS. The brokerage of real estate sales and leasing transactions, property management, construction, mobile engineering, conducting valuations, trading in securities for clients and the operation of the investment advisory business, among other business lines, require us to maintain licenses in various jurisdictions in which we operate and to comply with particular regulations. If we fail to maintain our licenses or conduct regulated activities without a license or in contravention of applicable regulations, we may be required to pay fines or return commissions. We may also have a given license suspended or revoked, meaning that we would need to suspend or cease the business activities for which the license was required. Our acquisition activity increases these risks because we must successfully transfer licenses of the acquired entities and their staff, as appropriate. Licensing requirements may also preclude us from engaging in certain types of transactions or change the way in which we conduct business or the cost of doing so. In addition, because the size and scope of real estate sales transactions and the number of countries in which we operate or invest have increased significantly during the past several years, both the difficulty of ensuring compliance with the numerous licensing regimes and the possible loss resulting from noncompliance have increased. To the extent we expand our service offerings further into more heavily regulated sectors, such as healthcare, environmental, pharmaceutical, scientific and medical laboratories, airports and industrial, the regulatory framework within which we operate may get more complicated and the consequences of noncompliance more serious.

Highly publicized accounting and investment management frauds that occurred in various businesses and countries during the financial crisis may result in significant changes in regulations that may affect our investment management business.

Furthermore, the laws and regulations applicable to our business, both in the United States and in foreign countries, also may change in ways that materially increase the costs of compliance. Particularly in emerging markets, there can be relatively less transparency around the standards and conditions under which licenses are granted, maintained or renewed. It also may be difficult to defend against the arbitrary revocation of a license in a jurisdiction where the rule of law is less well developed.

As a licensed real estate service provider and advisor in various jurisdictions, we and our licensed employees may be subject to various due diligence, disclosure, standard-of-care, anti-money laundering and other obligations in the jurisdictions in which we operate. Failure to fulfill these obligations could subject us to litigation from parties who purchased, sold or leased properties we brokered or managed or who invested in our funds. We could become subject to claims by participants in real estate sales or other services claiming that we did not fulfill our obligations as a service provider or broker. This may include claims with respect to conflicts of interest where we are acting, or are perceived to be acting, for two or more clients with potentially contrary interests.

Table of Contents

COMPUTER AND INFORMATION SYSTEMS. Our business is highly dependent on our ability to process transactions across numerous and diverse markets in many currencies. If any of our financial, accounting, human resources or other data processing, e-mail, client accounting, funds processing or electronic information management systems do not operate properly or are disabled, we could suffer a disruption of our businesses, liability to clients, loss of client data, loss of employee data, regulatory intervention or reputational damage. These systems may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, including disruptions of electrical or communications services, disruptions caused by natural disasters, political instability, terrorist attacks, sabotage, computer viruses or problems with the Internet, or our inability to occupy one or more of our office buildings. As we outsource significant portions of our information technology functions to third-party providers, we bear the risk of having somewhat less direct control over the manner and quality of performance than we would if done by our own employees. An example of this is the increasing use of “cloud” computing whereby we may outsource to third parties the maintenance of increasing amounts of our business records, including electronically maintained documents and emails, rather than keeping them on our own servers.

The development of new software systems used to operate one or more aspects of our business, particularly on a customized basis or in order to coordinate or consolidate financial, human resources or other types of infrastructure data reporting, client accounting or funds processing is complicated. Additionally, the effort may result in costs that we cannot recoup in the event of the failure to complete a planned software development. A new software system that has defects may cause reputational issues and client or employee dissatisfaction, with business lost as a result. The acquisition or development of software systems is often dependent to one degree or another on the quality, ability and/or financial stability of one or more third-party vendors, over which we may not have control beyond the rights we negotiate in our contracts. Different privacy policies from one country to the next (or across a region such as the European Union) may restrict our ability to share or collect data on a global basis, and this may limit the utility of otherwise available technology.

The Firm has been implementing significant new financial, human resources, client relationship management, payables processing, securities management and trading and intranet software systems on a worldwide basis, and is in the process of transitioning various significant processes to these new systems. This implementation is complex and involves continuously evolving processes. If the Firm does not implement these new systems effectively, or if any of the new systems does not operate as intended, the effectiveness of the Firm’s financial reporting or internal controls could be materially and adversely affected.

Our business is also dependent, in part, on our ability to deliver to our clients the efficiencies and convenience that technology affords. The effort to gain technological expertise and develop or acquire new technologies requires us to incur significant expenses. If we cannot offer new technologies as quickly as our competitors do, we could lose market share. We are increasingly dependent on the Internet and on intranet technology to gather and disseminate critical business information publicly and also to our employees internally. In the event of technology failure, including a failure of outsourced “cloud” computing, or our inability to maintain robust platforms, we risk competitive disadvantage.

RISKS INHERENT IN MAKING ACQUISITIONS. Since 2005, we have completed over 40 acquisitions as part of our global growth strategy. While we did not make any significant new acquisitions during 2009 or 2010 due to the significant market disruptions and uncertainties that all businesses experienced, in May 2011 we completed the acquisition of United Kingdom-based international property consultancy King Sturge. In addition to King Sturge, we completed eight acquisitions in 2011 within the United States, South Africa, Australia, Singapore and Indonesia. As long as a reasonable level of confidence remains within the markets, we believe that additional acquisition opportunities will emerge from time to time and that our industry will continue to consolidate.

Acquisitions subject us to a number of significant risks, any of which may prevent us from realizing the anticipated benefits or synergies of the acquisition. The integration of companies is a complex and time-consuming process that could significantly disrupt the businesses of Jones Lang LaSalle and the acquired company. The challenges involved in integration and realizing the benefits of an acquisition include:

- Diversion of management attention and financial resources from existing operations;
- Difficulties in integrating cultures, compensation structures, operations, existing contracts, accounting processes and methodologies, and realizing the anticipated synergies of the combined businesses;
- Inability to retain the management, key personnel and other employees of the acquired business;
- Inability to retain clients of the acquired business;

Table of Contents

Exposure to legal, environmental, employment, ethical and other types of claims for activities of the acquired business prior to acquisition, including those that may not have been adequately identified during the pre-acquisition due diligence investigation or those which the legal documentation associated with the transaction did not successfully terminate or transfer;

Addition of business lines in which we have not previously engaged (for example, general contractor services for “ground-up” construction development projects); and

Potential impairment of intangible assets, which could adversely affect our reported results.

Our failure to meet the challenges involved in successfully integrating our operations with those of another company or otherwise to realize any of the anticipated benefits of an acquisition could have a material adverse effect.

Additionally, the price we pay or other resources that we devote may exceed the value we realize, or the value we could have realized if we had allocated the consideration payable for the acquisition or other resources to another opportunity.

ENVIRONMENTAL LIABILITIES AND REGULATIONS; CLIMATE CHANGE RISKS. The Firm’s operations are affected by federal, state and/or local environmental laws in the countries in which we maintain office space for our own operations and where we manage properties for clients. We may face liability with respect to environmental issues occurring at properties that we manage or occupy, or in which we invest. Various laws and regulations restrict the levels of certain substances that may be discharged into the environment by properties or they may impose liability on current or previous real estate owners or operators for the cost of investigating, cleaning up or removing contamination caused by hazardous or toxic substances at the property. We may face costs or liabilities under these laws as a result of our role as an on-site property manager or a manager of construction projects. Our risks for such liabilities may increase as we expand our services to include more industrial and/or manufacturing facilities than has been the case in the past. In addition, we may face liability if such laws are applied to expand our limited liability with respect to our co-investments in real estate as discussed above. Within our own operation, we face additional costs from rising fuel prices which make it more expensive to power our corporate offices.

Given that the Firm’s own operations are generally conducted within leased office building space, we do not currently anticipate that regulations restricting the emissions of “greenhouse gases,” or taxes that may be imposed on their release, would result in material costs or capital expenditures. However, we cannot be certain about the extent to which such regulations will develop as there are higher levels of understanding and commitments by different governments around the world regarding the risks of climate change and how they should be mitigated. Regulations relating to climate change may affect the scope of services we provide to clients in their managed properties, but clients would typically bear any additional costs of doing so under their contracts with us. In any event, we anticipate that the burden and cost to the Firm of climate change disclosure and carbon reporting will increase over time.

We anticipate that the potential effects of climate change will increasingly impact the decisions and analysis that LaSalle Investment Management makes with respect to the properties it evaluates acquiring on behalf of clients since climate change considerations can impact the relative desirability of locations and the cost of operating and insuring acquired properties. Future legislation that requires specific performance levels for building operations could make non-compliant buildings obsolete, which could materially affect investments in properties we have made on behalf of clients, including those in which we may have co-invested.

ABILITY TO CONTINUE TO MAINTAIN SATISFACTORY INTERNAL FINANCIAL REPORTING CONTROLS AND PROCEDURES. If we are not able to continue to successfully implement the requirements of Section 404 of the United States Sarbanes-Oxley Act of 2002, or if there is a failure of one or more controls over financial reporting due to fraud, improper execution or the failure of such controls to adjust adequately as our business evolves, then our reputation, financial results and the market price of our stock could suffer. Our accounting can be complex and requires that management make judgments with respect to revenue recognition, acquisitions and other

aspects of our business. While we believe that we have adequate internal financial reporting control procedures in place, we may be exposed to potential risks from this legislation, which requires companies to evaluate their internal controls and have their controls attested to by their independent auditors on an annual basis. We have evaluated our internal control systems in order to allow our management to report on, and our independent auditors to attest to, our internal controls over financial reporting as required for purposes of this Annual Report on Form 10-K for the year ended December 31, 2011. However, there can be no assurance that we will continue to receive a positive attestation in future years, particularly since standards continue to evolve and are not necessarily being applied consistently from one auditing firm to another. If we identify one or more material weaknesses in our internal controls in the future that we cannot remediate in a timely fashion, we may be unable to receive a positive attestation at some time in the future from our independent auditors with respect to our internal controls over financial reporting.

Table of Contents

ABILITY TO PROTECT INTELLECTUAL PROPERTY; INFRINGEMENT OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS. Our business depends, in part, on our ability to identify and protect proprietary information and other intellectual property such as our service marks, domain names, client lists and information, and business methods. Existing laws of some countries in which we provide or intend to provide services, or the extent to which their laws are actually enforced, may offer only limited protections of our intellectual property rights. We rely on a combination of trade secrets, confidentiality policies, non-disclosure and other contractual arrangements, and on patent, copyright and trademark laws to protect our intellectual property rights. Our inability to detect unauthorized use (for example, by former employees) or take appropriate or timely steps to enforce our intellectual property rights may have an adverse effect on our business.

We cannot be sure that the intellectual property that we may use in the course of operating our business or the services we offer to clients do not infringe on the rights of third parties, and we may have infringement claims asserted against us or against our clients. These claims may harm our reputation, cost us money and prevent us from offering some services.

Confidential intellectual property is increasingly stored or carried on mobile devices, such as laptop computers, which makes inadvertent disclosure more of a risk in the event the mobile devices are lost or stolen and the information has not been adequately safeguarded or encrypted. This also makes it easier for someone with access to our systems, or someone who gains unauthorized access, to steal information and use it to the disadvantage of our firm or our people. Advances in technology, which permit increasingly large amounts of information to be stored on smaller devices or on third party “cloud” servers, tend to exacerbate these risks.

Financial Risk Factors

WE MAY HAVE INDEBTEDNESS WITH FIXED OR VARIABLE INTEREST RATES AND CERTAIN COVENANTS WITH WHICH WE MUST COMPLY. We currently have the ability to borrow, from a syndicate of lenders, up to \$1.1 billion on an unsecured revolving credit facility (the “Facility”), with capacity to borrow up to an additional \$47 million under local overdraft facilities. At December 31, 2011, we had \$463 million of unsecured indebtedness outstanding on the Facility. Our average outstanding borrowings under the Facility were \$467 million during 2011 at an effective interest rate of 1.8%.

Our outstanding borrowings fluctuate during the year primarily due to varying working capital requirements. For example, payment of annual incentive compensation represents a significant cash requirement commanding increased borrowings in the first half of the year, while historically the Firm’s seasonal earnings pattern provides more cash flow in the second half of the year. To the extent we continue our acquisition activities in the future, the level of our indebtedness could increase materially if we use our Facility to fund such purchases.

The terms of our Facility contain a number of covenants that could restrict our flexibility to finance future operations or capital needs, or to engage in other business activities that may be in our best interest. The debt covenants have the effect of limiting our ability, among other things, to:

- Encumber or dispose of assets;
- Incur significant additional indebtedness;
- Make significant investments;
- Engage in significant acquisitions.

In addition, our Facility requires that we comply with various financial covenants, including with respect to minimum net worth, leverage and cash interest coverage.

Table of Contents

If we are unable to make required payments under our Facility or if we breach any of the covenants, we will be in default under the terms of the Facility. A default under the Facility could cause acceleration of repayment of outstanding amounts as well as defaults under other existing and future debt obligations.

VOLATILITY IN LASALLE INVESTMENT MANAGEMENT INCENTIVE FEE REVENUE. LaSalle Investment Management's portfolio is of sufficient size to periodically generate large incentive fees and equity losses and gains that significantly influence our earnings and the changes in earnings from one year to the next. Volatility in this component of our earnings is inevitable due to the nature of this aspect of our business, and the amount of incentive fees or equity gains or losses we may recognize in future quarters is inherently unpredictable and relates to market dynamics in effect at the time. The speed with which the real estate markets worldwide turned from positive to negative starting in 2007 and continuing through 2009 is a further indication of the market volatility to which we are subject and over which we have no control. In the case of our commingled funds, underlying market conditions, particular decisions regarding the acquisition and disposition of fund assets, and the specifics of the client mandate will determine the timing and size of incentive fees from one fund to another. For separate accounts, where asset management is ongoing, we also may earn incentive fees at periodic agreed-upon measurement dates, and they may be related to performance relative to specified real-estate industry benchmarks and/or absolute return benchmarks.

While LaSalle Investment Management has focused over the past several years on developing more predictable annuity-type revenue, incentive fees should continue to be an important part of our revenue and earnings once real estate markets recover from the current significant downturn. As a result, the volatility described above should be expected to continue. For example, in 2006, we recognized one very significant incentive fee from the long-term performance of a separate account where we had ongoing portfolio management. This incentive fee was payable only once every four years and was calculated based on the account's performance relative to a market index. Given the extraordinary fall in asset prices that many markets experienced starting in 2007, our incentive fees fell significantly through 2010 and then rebounded modestly in 2011. A decline may be partially offset by our ability to take advantage of lower asset prices as we make new investments, although it is inherently difficult to predict with any confidence how all of these complicated factors will ultimately affect our future results.

Where incentive fees on a given transaction or portfolio are particularly large, certain clients have attempted to renegotiate fees even though contractually obligated to pay them, and we expect this to occur from time to time in the future. Our efforts to collect our fees in these situations may lead to significant legal fees and/or significant delays in collection due to extended negotiations, arbitration or litigation. They may also result in either negotiated reductions in fees that take into account the future value of the relationship or loss of the client.

VOLATILITY IN HOTELS AND CAPITAL MARKETS FEES. We have business lines other than LaSalle Investment Management that also generate fees based on the timing, size and pricing of closed transactions and these fees may significantly contribute to our earnings and to changes in earnings from one quarter or year to the next. For example, in 2007 our Hotels business generated one very substantial fee from the sale of a large portfolio of hotels on behalf of a particular client. Volatility in this component of our earnings is inevitable due to the nature of these businesses and the amount of the fees we will recognize in future quarters is inherently unpredictable.

LASALLE INVESTMENT MANAGEMENT BANKING AND CLIENT RELATIONSHIPS. Although not highly leveraged by general industry standards, the investment funds that LaSalle Investment Management operates in the ordinary course of business borrow money from a variety of institutional lenders. The loans typically are secured by liens on specific investment properties but are otherwise non-recourse. During the global financial crisis, the values of specific properties were in some cases less than the amount of the outstanding loan on the property, which gave the lender the right to foreclose on the property, in which case the equity invested by the fund would be without value. These situations were typically addressed on a case-by-case basis and, because we generally maintain good relationships with our lenders, were generally successfully renegotiated so that we remained in control of substantially

all fund properties, which has given additional time for values to recover. A similar phenomenon could recur in connection with economic recessions or liquidity contractions that arise out of the current situation in the European Union.

Table of Contents

Some clients of LaSalle Investment Management that had open commitments to provide additional investments and that came under stress due to the financial downturn became less able financially to honor their commitments and sought to renegotiate the terms of their commitments or the fees that they pay. These activities did not result in materially adverse consequences to LaSalle Investment Management or any of its funds. Clients adversely affected due to a recession in the European Union may react similarly.

Within a difficult economic environment, raising new funds takes longer and may be less successful as current and prospective clients may be less able or willing to commit new funds to real estate investments, which are inherently less liquid than many competing investments. Additionally, certain clients may decide to manage all or a portion of their real estate investments with internal resources rather than hiring outside investment managers.

CURRENCY RESTRICTIONS AND EXCHANGE RATE FLUCTUATIONS. We produce positive flows of cash in various countries and currencies that can be most effectively used to fund operations in other countries or to repay our indebtedness, which is currently primarily denominated in U.S. dollars. We face restrictions in certain countries that limit or prevent the transfer of funds to other countries or the exchange of the local currency to other currencies. We also face risks associated with fluctuations in currency exchange rates that may lead to a decline in the value of the funds produced in certain jurisdictions.

Additionally, although we operate globally, we report our results in U.S. dollars, and thus our reported results may be positively or negatively impacted by the strengthening or weakening of currencies against the U.S. dollar. As an example, the euro and the pound sterling, each a currency used in a significant portion of our operations, have fluctuated significantly in recent years. For the years ended December 31, 2011 and 2010, 44% and 45% of our revenue, respectively, was attributable to operations with U.S. dollars as their functional currency. In addition to the potential negative impact on reported earnings, fluctuations in currencies relative to the U.S. dollar may make it more difficult to perform period-to-period comparisons of the reported results of operations.

We are authorized to use currency-hedging instruments, including foreign currency forward contracts, purchased currency options and borrowings in foreign currency. There can be no assurance that such hedging will be economically effective. We do not use hedging instruments for speculative purposes.

As currency forward and option contracts are generally conducted off-exchange or over-the-counter (OTC), many of the safeguards accorded to participants on organized exchanges, such as the performance guarantee of an exchange clearing house, are generally unavailable in connection with OTC transactions. In addition, there can be no guarantee that the counterparty will fulfill its obligations under the contractual agreement, especially in the event of a bankruptcy or insolvency of the counterparty, which would effectively leave us unhedged.

The following table sets forth the revenue derived from our most significant currencies on a revenue basis (\$ in millions):

| | 2011 | 2010 |
|-------------------------|------------|---------|
| United States dollar | \$ 1,563.7 | 1,321.4 |
| Euro | 480.2 | 376.4 |
| British pound | 453.1 | 325.1 |
| Australian dollar | 249.9 | 208.2 |
| Japanese yen | 125.8 | 115.9 |
| Hong Kong dollar | 93.2 | 81.7 |

| | | |
|------------------|------------|---------|
| Singapore dollar | 92.1 | 106.0 |
| Other currencies | 526.5 | 390.9 |
| Total revenue | \$ 3,584.5 | 2,925.6 |

In 2009 and 2010, many of the most significant governments worldwide enacted economic stimulus measures of various type, although in 2011 some of them, particularly within the European Union, then instituted austerity measures designed to reduce sovereign indebtedness. Additionally, certain questions have arisen about the viability of the Euro and there has been speculation that some countries within the Eurozone may elect, or may be forced, to revert to the currency they issued prior to the establishment of the Euro. It is inherently difficult to predict how and when these complicated factors will affect the relative values of currencies and in any event we anticipate significant continuing volatility in currency exchange rates.

Table of Contents

GREATER DIFFICULTY IN COLLECTING ACCOUNTS RECEIVABLE IN CERTAIN COUNTRIES AND REGIONS. We face challenges in our ability to efficiently and/or effectively collect accounts receivable in certain countries and regions. For example, various countries have underdeveloped insolvency laws, and clients often are slow to pay. In some countries, clients typically tend to delay payments, reflecting a different business culture over which we do not necessarily have any control. Less-developed countries may have very lengthy or difficult judicial processes that can make collections through the court system more problematic than they would otherwise be.

Additionally, the increasing weakness in the global economy put additional financial stress on clients and landlords, who sometimes are the parties that pay our commissions where we have placed a tenant representation client into their buildings. This in turn has negatively impacted our ability to collect our receivables fully or in a timely manner. While the issue abated during 2010 and 2011 as financial situations stabilized, we expect it may emerge again in 2012 if countries within the European Union experience recession. We cannot be sure that the procedures we use to identify and rectify slowly paid receivables, and to protect ourselves against the insolvencies or bankruptcies of clients, landlords and other third parties with which we do business, which may involve placing liens on properties or litigating, will be effective in all cases.

INCREASING FINANCIAL RISK OF COUNTERPARTIES, INCLUDING REFINANCING RISK. The unprecedented disruptions and dynamic changes in the financial markets, and particularly insofar as they have led to major changes in the status and creditworthiness of some of the world's largest banks, investment banks and insurance companies, among others, have generally increased the counterparty risk to us from a financial standpoint, including with respect to:

- obtaining new credit commitments from lenders,
- refinancing credit commitments or loans that have terminated or matured according to their terms, including funds sponsored by our investment management subsidiary which use leverage in the ordinary course of their investment activities;
- placing insurance;
- engaging in hedging transactions; and
- maintaining cash deposits or other investments, both our own and those we hold for the benefit of clients, which are generally much larger than the maximum amount of government-sponsored deposit insurance in effect for a particular account.

While those risks likely remained higher during 2010 and 2011 than they were historically, we also believe they moderated as the financial system recovered. They recurred to some degree during the fourth quarter of 2011 and we expect they will continue at a higher level in 2012 since there are potential liquidity issues within certain European financial institutions.

We generally attempt to conduct business with only the highest quality and most well-known counterparties, but there can be no assurance (1) that our efforts to evaluate their creditworthiness will be effective in all cases (particularly as the quality of credit ratings provided by the nationally recognized rating agencies has been called into question), (2) that we will always be able to obtain the full benefit of the financial commitments made to us by lenders, insurance companies, hedging counterparties or other organizations with which we do business or (3) that we will always be able to refinance existing indebtedness (or commitments to provide indebtedness) which has matured by its terms, including funds sponsored by our investment management subsidiary.

Additionally, the ability of government regulatory authorities to adequately monitor and regulate banks, investment banks, securities firms and insurance companies has also been significantly called into question during the current downturn (for example, in identifying and preventing “pyramid schemes,” “bubbles” in different asset classes and other potential systemic failures in a timely fashion), as the result of which the overall risk of unforeseeable financial loss from engaging in business with ostensibly regulated counterparties has increased.

Table of Contents

POTENTIALLY ADVERSE TAX CONSEQUENCES; CHANGES IN TAX LEGISLATION AND TAX RATES.

Moving funds between countries can produce adverse tax consequences in the countries from which and to which funds are transferred, as well as in other countries, such as the United States, in which we have operations.

Additionally, as our operations are global, we face challenges in effectively gaining a tax benefit for costs incurred in one country that benefit our operations in other countries.

Changes in tax legislation or tax rates may occur in one or more jurisdictions in which we operate that may materially increase the cost of operating our business. This includes the potential for significant legislative policy change in the taxation objectives with respect to the income of multinational corporations, as has recently been the subject of policy debate and proposals in the United States and the United Kingdom. Although we are uncertain as to the ultimate results, or what the effects will be on our businesses in particular, it is possible that some governments will make significant changes to their tax policies as part of their responses to their weakened economies.

We face tax risks both in our own business but also in the investment funds that LaSalle Investment Management operates. Adverse or unanticipated tax consequences to the funds can negatively impact fund performance, incentive fees and the value of co-investments that we have made.

We believe that tax authorities are generally increasing the level of examination activities of major corporations, which have also generally experienced more scrutiny in the media and from activist groups such as the “Occupy Wall Street” movement that took place in a number of different locations during 2011.

THE CHARTER AND THE BYLAWS OF JONES LANG LASALLE, OR THE MARYLAND GENERAL CORPORATION LAW, COULD DELAY, DEFER OR PREVENT A CHANGE OF CONTROL. The charter and bylaws of Jones Lang LaSalle include provisions that may discourage, delay, defer or prevent a takeover attempt that may be in the best interest of Jones Lang LaSalle shareholders and may adversely affect the market price of our common stock.

The charter and bylaws provide for:

•The ability of the board of directors to establish one or more classes and series of capital stock including the ability to issue up to 10,000,000 shares of preferred stock, and to determine the price, rights, preferences and privileges of such capital stock without any further shareholder approval;

•A requirement that any shareholder action taken without a meeting be pursuant to unanimous written consent; and

•Certain advance notice procedures for Jones Lang LaSalle shareholders nominating candidates for election to the Jones Lang LaSalle board of directors.

Under the Maryland General Corporate Law (the “MGCL”), certain “Business Combinations” (including a merger, consolidation, share exchange or, in certain circumstances, an asset transfer or issuance or reclassification of equity securities) between a Maryland corporation and any person who beneficially owns 10% or more of the voting power of the corporation’s shares or an affiliate of the corporation who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of the voting power of the then-outstanding voting stock of the corporation (an “Interested Shareholder”) or an affiliate of the Interested Shareholder are prohibited for five years after the most recent date on which the Interested Shareholder became an Interested Shareholder. Thereafter, any such Business Combination must be recommended by the board of directors of such corporation and approved by the affirmative vote of at least (1) 80% of the votes entitled to be cast by holders of outstanding voting shares of the corporation and (2) 66 2/3% of the votes entitled to be cast by holders of outstanding voting shares of the corporation other than shares held by the Interested Shareholder with whom the Business Combination is to be effected, unless,

among other things, the corporation's shareholders receive a minimum price (as defined in the MGCL) for their shares and the consideration is received in cash or in the same form as previously paid by the Interested Shareholder for its shares. Pursuant to the MGCL, these provisions also do not apply to Business Combinations approved or exempted by the board of directors of the corporation prior to the time that the Interested Shareholder becomes an Interested Shareholder.

Table of Contents

Human Resources Risk Factors, Including From Non-Employees

DIFFICULTIES AND COSTS OF STAFFING AND MANAGING INTERNATIONAL OPERATIONS. The coordination and management of international operations pose additional costs and difficulties. We must manage operations that are in many time zones and that involve people with language and cultural differences. Our success depends on finding and retaining people capable of dealing with these challenges effectively, who will represent the Firm with the highest levels of integrity and who will communicate and cooperate well with colleagues and clients across multiple geographies. If we are unable to attract and retain qualified personnel, or to successfully plan for succession of employees holding key management positions, our growth may not be sustainable, and our business and operating results could suffer.

Among the challenges we face in retaining our people is maintaining a compensation system that rewards them consistent with local market practices and with our profitability. This can be especially difficult where competitors may be attempting to gain market share by aggressively attempting to hire our best people at rates of compensation that are well above the current market level. Another continuing challenge we have is to maintain compensation systems that align financial incentives with our strategic goals as an organization and the business and ethics behaviors we want to drive among our people, while at the same time not create incentives to engage in overly risky business pursuits or behaviors.

We have committed resources to effectively coordinate our business activities around the world to meet our clients' needs, whether they are local, regional or global. We also consistently attempt to enhance the establishment, organization and communication of corporate policies, particularly where we determine that the nature of our business poses the greatest risk of noncompliance. The failure of our people to carry out their responsibilities in accordance with our client contracts, our corporate and operating policies, or our standard operating procedures, or their negligence in doing so, could result in liability to clients or other third parties, which could have a material adverse effect. This is true not only with respect to individuals we employ directly, but also individuals who work for third party vendors whom we hire on behalf of clients, especially where we are acting in a principal capacity.

An employee we hire may be subject to restrictions under employment agreements with previous employers that can restrict their activities, and therefore their contribution, for a period of time after they join us. For example, they may be prohibited from soliciting business from certain clients, or from soliciting other individuals to join us as employees.

The worldwide credit crisis and economic recession caused us to restructure certain parts of our business in 2009, and to a lesser degree during 2010, in order to size them properly relative to levels of business activity we expect in the markets in which we compete. These activities, which may recur in the future, present additional risks to the business. When addressing staffing in connection with a restructuring of our organization or a downturn in economic conditions or activity, we must take into account the employment laws of the countries in which actions are contemplated. In some cases, this can result in significant costs, time delays in implementing headcount reductions and, potentially, litigation regarding allegedly improper employment practices.

NONCOMPLIANCE WITH POLICIES; COMMUNICATIONS AND ENFORCEMENT OF OUR POLICIES AND OUR CODE OF BUSINESS ETHICS. The geographic and cultural diversity in our organization makes it more challenging to communicate the importance of adherence to our Code of Business Ethics and our Vendor Code of Conduct, to monitor and enforce compliance with its provisions on a worldwide basis, and to ensure local compliance with United States and English laws that apply globally in certain circumstances. These include the Foreign Corrupt Practices Act, the Patriot Act and the Sarbanes-Oxley Act of 2002 in the United States and the Bribery Act in the United Kingdom.

Breaches of our Code of Business Ethics, particularly by our executive management, could have a material adverse effect. Breaches of our Vendor Code of Conduct by vendors whom we retain as a principal for client engagements can also lead to significant losses to clients from financial liabilities that might result.

Table of Contents

EMPLOYEE, VENDOR AND THIRD-PARTY MISCONDUCT. Like any business, we run the risk that employee fraud or other misconduct could occur. In a company such as ours with over 45,500 employees, it is not always possible to deter employee misconduct, and the precautions we take to prevent and detect this activity may not be effective in all cases. Employee misconduct, including fraud, can cause significant financial or reputational harm to any business, from which full recovery cannot be assured. We also may not have insurance that covers any losses in full or that covers losses from particular criminal acts.

Because we often hire third-party vendors to perform services for our own account or for clients, we are also subject to the consequences of fraud or misconduct by employees of our vendors, which also can result in significant financial or reputational harm (even if we have been adequately protected from a legal standpoint). We have instituted a Vendor Code of Conduct, which is published in multiple languages on our public Web site, and which is intended to communicate to our vendors the standards of conduct we expect them to uphold.

Anecdotally, the risk that the Company will be the victim of fraud, both from employees and third parties, is generally thought to increase during times of general economic stress such as we experienced particularly during 2008 and 2009. An example of a third-party fraud would be attempts to draw on bank accounts by way of forged checks or by corporate identity theft, both of which we have increasingly experienced in recent years as attempts but without financial loss.

SCRUTINY OF EXECUTIVE COMPENSATION PROGRAMS; INFLUENCE OF SHAREHOLDER ADVOCACY GROUPS. In recent years, there has been increasing scrutiny of the executive compensation practices of all public companies in the United States. Shareholders have been given increasing rights to vote on the acceptability of pay practices and the issuance of equity compensation. Independent shareholder advocacy groups have also had increasing influence on the decisions of institutional investors on how to vote on executive compensation matters. In the event that these emerging circumstances result in changes to our pay practices or our ability to issue equity compensation to executives or otherwise to deduct executive compensation, we may have difficulty in retaining its executives or could experience additional tax costs with respect to its compensation programs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal corporate holding company headquarters are located at 200 East Randolph Drive, Chicago, Illinois, where we currently occupy over 165,000 square feet of office space pursuant to a lease that expires in May 2017. Our regional headquarters for our Americas, EMEA and Asia Pacific businesses are located in Chicago, London and Singapore, respectively. We have over 200 corporate offices worldwide located in most major cities and metropolitan areas as follows: 73 offices in 8 countries in the Americas (including 59 in the United States), 76 offices in 31 countries in EMEA and 60 offices in 13 countries in Asia Pacific. Our offices are each leased pursuant to agreements with terms ranging from month-to-month to 10 years. In addition, we have on-site property and corporate offices located throughout the world. On-site property management offices are generally located within properties that we manage and are provided to us without cost.

ITEM 3. LEGAL PROCEEDINGS

The Company has contingent liabilities from various pending claims and litigation matters arising in the ordinary course of business, some of which involve claims for damages that are substantial in amount. Many of these matters are covered by insurance (including insurance provided through a captive insurance company), although they may nevertheless be subject to large deductibles or retentions, and the amounts being claimed may exceed the available insurance. Although the ultimate liability for these matters cannot be determined, based upon information currently available, we believe the ultimate resolution of such claims and litigation will not have a material adverse effect on

our financial position, results of operations or liquidity.

Dividends

On December 15, 2011 we paid a semi-annual dividend of \$0.15 per share of our common stock to holders of record at the close of business on November 15, 2011. The Company also paid a cash dividend of \$0.15 per share of its common stock on June 15, 2011 to holders of record at the close of business on May 16, 2011. At the Company's discretion, a dividend-equivalent in the same amount was also paid simultaneously on outstanding but unvested restricted stock units granted under the Company's Stock Award and Incentive Plan. There can be no assurance that future dividends will be declared since the actual declaration of future dividends and the establishment of record and payment dates remains subject to final determination by the Company's Board of Directors.

Comparison of Cumulative Total Return

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN AMONG JONES LANG LASALLE INCORPORATED, THE S&P 500 INDEX AND A PEER GROUP

The following graph compares the cumulative 5-year total return to shareholders on Jones Lang LaSalle Incorporated's common stock relative to the cumulative total returns of the S&P 500 index, and a customized peer group of two companies that includes: Grubb & Ellis Company and CB Richard Ellis Group Inc. The graph assumes that the value of the investment in the Company's common stock, in the peer group, and the index (including reinvestment of dividends) was \$100 on December 31, 2006 and tracks it through December 31, 2011.

Table of Contents

(1) EBITDA represents earnings before interest expense, net of interest income, income taxes, depreciation and amortization. Although EBITDA is a non-GAAP financial measure, it is used extensively by management and is useful to investors and lenders as one of the primary metrics for evaluating operating debt, to sustain potential future increases in debt and to satisfy capital requirements. EBITDA also is used in the calculations of certain covenants related to our revolving credit facility. However, EBITDA should not be considered as an alternative either to net income (loss) or net cash provided by operating activities, both of which are determined in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”). Because EBITDA is not calculated under U.S. GAAP, our EBITDA may not be comparable to similarly titled measures used by other companies.

Below is a reconciliation of our net income (loss) to EBITDA (\$ in thousands):

| | YEAR ENDED DECEMBER 31, | | | | |
|--|-------------------------|---------|----------|---------|---------|
| | 2011 | 2010 | 2009 | 2008 | 2007 |
| Net income (loss) available to common shareholders | \$163,997 | 153,524 | (4,109) | 83,515 | 256,490 |
| Interest expense, net of interest income | 35,591 | 45,802 | 55,018 | 30,568 | 13,064 |
| Provision for income taxes | 56,387 | 49,038 | 5,677 | 28,743 | 87,595 |
| Depreciation and amortization | 82,832 | 71,573 | 83,335 | 90,584 | 55,580 |
| EBITDA | \$338,807 | 319,937 | 139,921 | 233,410 | 412,729 |

Below is a reconciliation of our net cash provided by operating activities, the most comparable cash flow measure on the statements of cash flows, to EBITDA (\$ in thousands):

| | YEAR ENDED DECEMBER 31, | | | | |
|---|-------------------------|------------|------------|---------|-----------|
| | 2011 | 2010 | 2009 | 2008 | 2007 |
| Net cash provided by operating activities | \$211,338 | 384,270 | 250,554 | 33,365 | 409,418 |
| Interest expense, net of interest income | 35,591 | 45,802 | 55,018 | 30,568 | 13,064 |
| Provision for income taxes | 56,387 | 49,038 | 5,677 | 28,743 | 87,595 |
| Change in working capital and non-cash expenses | 35,491 | (159,173) | (171,328) | 140,734 | (97,348) |
| EBITDA | \$338,807 | 319,937 | 139,921 | 233,410 | 412,729 |

(2) For purposes of computing the ratio of earnings to fixed charges, “earnings” represents net earnings before income taxes, and certain adjustments for activity relative to equity earnings, plus fixed charges, less capitalized interest. Fixed charges consist of interest expense, including amortization of debt discount and financing costs, capitalized interest and one-third of rental expense, which we believe is representative of the interest component of rental expense.

(3) Assets under management represent the aggregate fair market value or cost basis (where an appraisal is not available) of assets managed by our Investment Management segment. Assets under management data for separate account and fund management amounts are reported based on a one quarter lag.

(4) Total debt includes long-term borrowing under our revolving Facility and short-term borrowing, primarily local overdraft facilities.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our Selected Financial Data and Consolidated Financial Statements, including the notes thereto, appearing elsewhere in this Form 10-K. The following discussion and analysis contains certain forward-looking statements generally identified by the words anticipates, believes, estimates, expects, plans, intends and other similar expressions. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Jones Lang LaSalle's actual results, performance, achievements, plans and objectives to be materially different from any future results, performance, achievements, plans and objectives expressed or implied by such forward-looking statements. See the Cautionary Note Regarding Forward-Looking Statements after Part IV, Item 15. Exhibits and Financial Statement Schedules.

We present our Management's Discussion and Analysis in six sections, as follows:

- (1) An executive summary of our business;
- (2) A summary of our critical accounting policies and estimates;
- (3) Certain items affecting the comparability of results and certain market and other risks that we face;
- (4) The results of our operations, first on a consolidated basis and then for each of our business segments;
- (5) Consolidated cash flows; and
- (6) Liquidity and capital resources.

EXECUTIVE SUMMARY

Jones Lang LaSalle provides comprehensive integrated real estate and investment management expertise on a local, regional and global level to owner, occupier and investor clients. We are an industry leader in property and corporate facility management services, with a portfolio of approximately 2.1 billion square feet worldwide. We deliver our array of real estate services ("RES") product offerings across of our three geographic business segments: (1) the Americas, (2) Europe, Middle East and Africa ("EMEA"), and (3) Asia Pacific. Our fourth business segment, LaSalle Investment Management, a member of the Jones Lang LaSalle group, is one of the world's largest and most diversified real estate investment management firms, with approximately \$47.7 billion of assets under management across the globe.

In 2011, we generated revenue of \$3.6 billion across our four business segments. In addition to U.S. dollars, we also generated revenue in euros, British pounds, Australian dollars, Japanese yen, Hong Kong dollars, Singapore dollars and a variety of other currencies.

The broad range of real estate services we offer includes:

- Agency leasing
- Tenant representation
- Property management
- Facilities management / outsourcing
- Project and development management / construction
- Valuations
- Consulting
- Capital markets
- Real estate investment banking / merchant banking
- Corporate finance
- Hotel advisory
- Energy and sustainability services
- Value recovery and receivership services
- Investment management

Table of Contents

We offer these services locally, regionally and globally to real estate owners, investors and occupiers for a variety of property types, including:

- Offices
- Hotels
- Industrial properties
- Retail properties
- Healthcare and laboratory facilities
- Multi-family residential and military housing
- Critical environments and data centers
- Sports facilities
- Cultural facilities
- Transportation centers

Individual regions and markets may focus on different property types to a greater or lesser extent depending on local requirements, market conditions and the opportunities we perceive.

We work for a broad range of clients that represent a wide variety of industries and are based in markets throughout the world. Our clients vary greatly in size. They include for-profit and not-for-profit entities of all kinds, public-private partnerships and governmental (public sector) entities. Increasingly, we are offering services to smaller middle-market companies that are looking to outsource real estate services. Through our LaSalle Investment Management subsidiary, we invest for clients on a global basis in both (1) publicly traded real estate securities and (2) private assets.

See Item 1. Business for additional information on the services we provide, as well as our “Value Drivers for Growth and Superior Client Service,” our “Global Strategic Priorities,” our “Competitive Differentiators,” and “Industry Trends.”

SUMMARY OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

An understanding of our accounting policies is necessary for a complete analysis of our results, financial position, liquidity and trends. The preparation of our financial statements requires management to make certain critical accounting estimates that impact the stated amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting periods. These accounting estimates are based on management’s judgment. We consider them to be critical because of their significance to the financial statements and the possibility that future events may differ from current judgments, or that the use of different assumptions could result in materially different estimates. We review these estimates on a periodic basis to ensure reasonableness. Although actual amounts likely differ from such estimated amounts, we believe such differences are not likely to be material.

Revenue Recognition

The SEC’s Staff Accounting Bulletin No. 101, “Revenue Recognition in Financial Statements” (“SAB 101”), as amended by SAB 104, provides guidance on the application of U.S. generally accepted accounting principles (“U.S. GAAP”) to selected revenue recognition issues. Additionally, the FASB’s Accounting Standards Codification (“ASC”) Subtopic 605-25, “Multiple-Element Arrangements,” provides guidance on the application of U.S. GAAP to revenue transactions with multiple deliverables, and ASC Subtopic 605-45, “Principal and Agent Considerations,” provides guidance when accounting for reimbursements received from clients.

We earn revenue from the following principal sources:

- Transaction commissions;
- Advisory and management fees;
- Incentive fees;
- Project and development management fees; and

- Construction management fees.

For a detailed discussion on our revenue recognition policies see the Revenue Recognition section of Note 2, Summary of Significant Accounting Policies, of the Notes to Consolidated Financial Statements.

Table of Contents

Allowance for Uncollectible Accounts Receivable

We estimate the allowance necessary to provide for uncollectible accounts receivable. This estimate includes specific accounts from which payment has become unlikely. We also base this estimate on historical experience, combined with a careful review of current developments and with a strong focus on credit quality. The process by which we calculate the allowance begins in the individual business units where specific uncertain accounts are identified and reserved as part of an overall reserve that is formulaic and driven by the age profile of the receivables and our historical experience. We then review these allowances on a quarterly basis to ensure they are appropriate. As part of this review, we develop a range of potential allowances on a consistent formulaic basis. Our allowance for uncollectible accounts receivable as determined under this methodology was \$20.6 million and \$20.4 million at December 31, 2011 and 2010, respectively.

Bad debt expense was \$10.3 million, \$7.1 million, and \$28.2 million for the years ended December 31, 2011, 2010 and 2009, respectively. In 2009 we saw a significant increase in our bad debt expense as result of the global economic downturn. This increase in bad debt expense reflected write-offs of specific accounts receivable determined to be uncollectible, as well as an overall deterioration in the aging and expectations of collections of accounts receivable more generally. During the economic downturn, clients tightened their cash management practices, causing our accounts receivable aging to deteriorate. As economic conditions improved in 2010 and 2011, the aging of our accounts receivable improved significantly, resulting in what we believe is a more normalized level of bad debt expense in 2010 and 2011.

We believe that we have an adequate reserve for our accounts receivables at December 31, 2011 given the current economic conditions and the credit quality of our clients. However, changes in these estimates could significantly impact our bad debt expense in the future.

For additional information on our allowance for uncollectible accounts see the Accounts Receivable section of Note 2, Summary of Significant Accounting Policies, of the Notes to Consolidated Financial Statements.

Asset Impairments

The property and equipment we use in our business substantially consists of computer equipment and software; leasehold improvements; furniture, fixtures and equipment; and automobiles. We have recorded goodwill and other identified intangibles from a series of acquisitions. We also invest in certain real estate ventures that own and operate commercial real estate. Typically, these are co-investments in funds that our Investment Management business establishes in the ordinary course of business for its clients. These investments include non-controlling ownership interests generally ranging from less than 1% to 10% of the respective ventures. These investments are primarily accounted for under the equity method of accounting or at fair value in the accompanying Consolidated Financial Statements due to the nature of our non-controlling ownership.

Property and Equipment—We review property and equipment for impairment whenever events or changes in circumstances indicate that the carrying value of an asset group may not be recoverable. If impairment exists due to the inability to recover the carrying value of an asset group, we record an impairment loss to the extent that the carrying value exceeds the estimated fair value. We did not recognize an impairment loss related to property and equipment in 2011, 2010 or 2009.

Goodwill—Historically, we have grown, in part, through a series of acquisitions. Consistent with the services nature of the businesses we have acquired, the largest asset on our balance sheet is goodwill. We do not amortize this goodwill; instead, we evaluate goodwill for impairment at least annually. In September 2011, the FASB issued ASU 2011-08, “Testing Goodwill for Impairment.” ASU 2011-08 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for

determining whether it is necessary to perform the two-step goodwill impairment test. We early adopted the provisions of ASU 2011-08 in the third quarter of 2011 with respect to the performance of our annual impairment test of goodwill. This analysis determined that no indicators of impairment existed primarily because (1) our market capitalization has consistently exceeded our book value by a significant margin, (2) our overall financial performance has been solid in the face of mixed economic environments, and (3) forecasts of operating income and cash flows generated by our reporting units appear sufficient to support the book values of the net assets of each reporting unit. In addition to our annual impairment evaluation, we consider whether events or circumstances have occurred in the period subsequent to our annual impairment testing which indicate that it is more likely than not an impairment loss has occurred.

Table of Contents

For additional information on goodwill and intangible asset impairment testing see the Business Combinations, Goodwill and Other Intangible Assets section of Note 2 Summary of Significant Accounting Policies of the Notes to Consolidated Financial Statements.

Investments in Real Estate Ventures—We review investments in real estate ventures accounted for under the equity method on a quarterly basis for indications of whether we may not be able to recover the carrying value of the real estate assets underlying our investments in real estate ventures and whether our investment in these co-investments is other than temporarily impaired. When events or changes in circumstances indicate that the carrying amount of a real estate asset underlying one of our investments in real estate ventures may be impaired, we review the recoverability of the carrying amount of the real estate asset in comparison to an estimate of the future undiscounted cash flows expected to be generated by the underlying asset. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. We then record the portion of the impairment loss related to our investment in the reporting period. Additionally, we consider a number of factors, including our share of co-investment cash flows and the fair value of our co-investments, in determining whether or not our investment is other than temporarily impaired.

For investments in real estate ventures for which the fair value option has been elected, we maintain an investment account which is increased or decreased each reporting period by the difference between the fair value of the investment and the carrying value at the balance sheet date. The adjustment to our investment balance is reflected as an unrealized gain or loss in our consolidated statement of operations within Equity in earnings (losses) from real estate ventures. The fair value of the investment at the balance sheet is determined using a discounted cash flow model with Level 3 inputs. For the year ended December 31, 2011, an unrealized gain of \$0.4 million is included in Equity earnings (losses).

Equity earnings (losses) from real estate ventures included impairment charges of \$6 million, \$14 million and \$51 million in the years ended December 31, 2011, 2010 and 2009, respectively, representing our equity share of the impairment charges against individual assets held by our real estate ventures. Declines in real estate markets adversely impacted our rental income assumptions and forecasted exit capitalization rates, resulting in our determination that certain real estate investments had become impaired. It is reasonably possible that if real estate values continue to decline, we may sustain additional impairment charges on our investments in real estate ventures in future periods.

Income Taxes

We account for income taxes under the asset and liability method. We recognize deferred tax assets and liabilities for the future tax consequences attributable to differences between (1) the financial statement carrying amounts of existing assets and liabilities and (2) their respective tax bases and operating loss and tax credit carryforwards. We measure deferred tax assets and liabilities using the enacted tax rates expected to apply to taxable income in the years in which we expect those temporary differences to be recovered or settled. We recognize into income the effect on deferred tax assets and liabilities of a change in tax rates in the period that includes the enactment date.

Because of the global and cross border nature of our business, our corporate tax position is complex. We generally provide for taxes in each tax jurisdiction in which we operate based on local tax regulations and rules. Such taxes are provided on net earnings and include the provision of taxes on substantively all differences between financial statement amounts and amounts used in tax returns, excluding certain non-deductible items and permanent differences.

Table of Contents

Our global effective tax rate is sensitive to the complexity of our operations as well as to changes in the mix of our geographic profitability. Local statutory tax rates range from 10% to 42% in the countries in which we have significant operations. We evaluate our estimated effective tax rate on a quarterly basis to reflect forecast changes in:

- (1) Our geographic mix of income;
- (2) Legislative actions on statutory tax rates;
- (3) The impact of tax planning to reduce losses in jurisdictions where we cannot recognize the tax benefit of those losses; and
- (4) Tax planning for jurisdictions affected by double taxation.

We reflect the benefit from tax planning when we believe it is probable that it will be successful, which usually requires that certain actions have been initiated. We provide for the effects of income taxes on interim financial statements based on our estimate of the effective tax rate for the full year.

The effective tax rates for 2011 and 2010 were 25.4% and 24.1%, respectively, which reflected our continued disciplined management of our global tax position. Our effective tax rate in 2009 was unusual due in part to income before income taxes and noncontrolling interest approaching zero, resulting in a particularly low denominator for the effective tax rate calculation. Accordingly, the 2009 effective tax rate is not representative of the effective tax rate we expect to achieve on a long-term basis.

Based on our historical experience and future business plans, we do not expect to repatriate our foreign source earnings to the United States. As a result, we have not provided deferred taxes on such earnings or the difference between tax rates in the United States and the various international jurisdictions where we earn such amounts. Further, there are various limitations on our ability to utilize foreign tax credits on such earnings when we repatriate them. As such, we may incur taxes in the United States upon repatriation without credits for foreign taxes paid on such earnings.

We have not provided a deferred U.S. tax liability on the unremitted earnings of international subsidiaries because it is our intent to permanently reinvest such earnings outside of the United States. If repatriation of all such earnings were to occur, and if we were unable to utilize foreign tax credits due to the limitations of U.S. tax law, we estimate that our maximum resulting U.S. tax liability would be \$131 million, net of the benefits of the utilization of U.S. federal and state carryovers. We believe that our policy of permanently reinvesting earnings of foreign subsidiaries does not significantly impact our liquidity.

We have established valuation allowances against deferred tax assets where expected future taxable income does not support their probable realization. We formally assess the likelihood of being able to utilize current tax losses in the future on a country-by-country basis, with the determination of each quarter's income tax provision. We establish or increase valuation allowances upon specific indications that the carrying value of a tax asset may not be recoverable. Alternatively, we reduce valuation allowances upon (1) specific indications that the carrying value of the tax asset is more likely than not recoverable or (2) the implementation of tax planning strategies allowing an asset we previously determined not realizable to be viewed as realizable.

The table below summarizes certain information regarding the gross deferred tax assets and valuation allowance for the past three years (\$ in millions):

DECEMBER 31,

| | 2011 | 2010 | 2009 |
|---------------------------|----------|-------|-------|
| Gross deferred tax assets | \$ 353.0 | 316.0 | 316.6 |
| Valuation allowance | 38.8 | 35.6 | 40.0 |

The increase in gross deferred tax assets in 2011 was the result of incurred tax loss carryovers.

We evaluate our segment operating performance before tax, and do not consider it meaningful to allocate tax by segment. Estimations and judgments relevant to the determination of tax expense, assets and liabilities require analysis of the tax environment and the future profitability, for tax purposes, of local statutory legal entities rather than business segments. Our statutory legal entity structure generally does not mirror the way that we organize, manage and report our business operations. For example, the same legal entity may include both Investment Management and RES businesses in a particular country.

Table of Contents

The Company adopted the provisions of ASC 740-10, "Accounting for Uncertainty in Income Taxes," on January 1, 2007. As a result of the implementation of ASC 740-10, we did not recognize any adjustment to our retained earnings or any change to our liability for unrecognized tax benefits. At December 31, 2011 the amount of unrecognized tax benefits was \$93.4 million.

We believe it is reasonably possible that \$62.1 million of gross unrecognized tax benefits will be settled within twelve months after December 31, 2011. This may occur due to the conclusion of an examination by tax authorities. We further expect that the amount of unrecognized tax benefits will continue to change as the result of ongoing operations, the outcomes of audits, and the passing of statutes of limitations. We do not expect this change to have a significant impact on the results of operations or the financial position of the Company. We do not believe that we have material tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility.

Incentive Compensation

An important part of our overall compensation package is incentive compensation, which we typically pay to our employees in the first or second quarter of the year after it is earned. Certain employees are eligible to receive a portion of their annual incentive compensation in the form of restricted stock units of our common stock under programs in which the restricted units vest over periods of up to 64 months from the date of grant. Under each program, we amortize related compensation cost to expense over the service period.

The most significant of these programs under which we grant restricted stock units has been our stock ownership program. We increase incentive compensation deferred under the stock ownership program by 20% when determining the value of restricted stock units we grant. These restricted units vest in two parts: 50% at 18 months and 50% at 30 months, in each case from the date of grant (namely, vesting periods start in January of the year following that for which the bonus was earned). The service period over which the related compensation cost is amortized to expense consists of the 12 months of the year to which payment of the restricted stock relates, plus the periods over which the stock vests. Given that we do not finalize individual incentive compensation awards until after year-end, we must estimate the portions of the overall incentive compensation pools that will qualify for these programs. Estimations factor in the performance of the Company and individual business units, together with the target bonuses for qualified individuals.

We determine and announce incentive compensation in the first quarter of the year following that to which the incentive compensation relates, at which point we true-up the estimated stock ownership program deferral and related amortization. The table below sets forth certain information regarding the stock ownership program (\$ in millions, except employee data):

| | YEAR ENDED DECEMBER 31, | | |
|--|-------------------------|---------|---------|
| | 2011 | 2010 | 2009 |
| Number of employees eligible for the restricted stock programs | 873 | 727 | 1,800 |
| Deferral of compensation under the current year stock ownership program | \$ (19.1) | (16.4) | (13.4) |
| 20% enhancement of deferred compensation | (3.8) | (3.3) | (2.7) |
| Change in estimated deferred compensation in the first quarter of the following year | N/A | 1.0 | 2.0 |
| Total deferred compensation | \$ (22.9) | (18.7) | (14.1) |
| | 6.7 | 6.6 | 5.4 |

Compensation expense recognized with regard to
the current year stock ownership program

| | | | |
|---|---------|------|------|
| Compensation expense recognized with regard to prior year stock ownership programs | 13.1 | 17.7 | 21.8 |
| Total stock ownership program compensation expense | \$ 19.8 | 24.3 | 27.2 |

In 2010, we made changes to our stock ownership program that reduced the number of employees eligible to participate. We made this change in order to reduce the overall number of restricted stock units we grant for incentive compensation and therefore to be able to increase the number of restricted stock units available to grant for retention and hiring purposes.

Self-Insurance Programs

In our Americas business, and in common with many other American companies, we have chosen to retain certain risks regarding health insurance and workers' compensation rather than purchase third-party insurance. Estimating our exposure to such risks involves subjective judgments about future developments. We supplement our traditional global insurance program by the use of a captive insurance company to provide professional indemnity and employment practices insurance on a "claims made" basis. As professional indemnity claims can be complex and take a number of years to resolve, we are required to estimate the ultimate cost of claims.

Table of Contents

- **Health Insurance**—We self-insure our health benefits for all U.S.-based employees, although we purchase stop loss coverage on an annual basis to limit our exposure. We self-insure because we believe that on the basis of our historic claims experience, the demographics of our workforce and trends in the health insurance industry, we incur reduced expense by self-insuring our health benefits as opposed to purchasing health insurance through a third party. We estimate our likely full-year health costs at the beginning of the year and expense this cost on a straight-line basis throughout the year. In the fourth quarter, we estimate the required reserve for unpaid health costs required at year-end.

Given the nature of medical claims, it may take up to 24 months for claims to be processed and recorded. The reserve balance for the 2011 program was \$11.5 million at December 31, 2011, and the reserve balance for the 2010 program was \$9.2 million at December 31, 2010.

The table below sets out certain information related to the cost of the health insurance program for the years ended December 31, 2011, 2010 and 2009 (\$ in millions):

| | 2011 | 2010 | 2009 |
|----------------------------------|---------|--------|--------|
| Expense to Company | \$ 23.8 | 21.9 | 24.4 |
| Employee contributions | 9.4 | 7.7 | 6.1 |
| Adjustment to prior year reserve | 0.4 | (0.9) | (0.2) |
| Total program cost | \$ 33.6 | 28.7 | 30.3 |

• **Workers' Compensation Insurance**—Given the historical experience that our workforce has had fewer injuries than is normal for our industry, we have been self-insured for workers' compensation insurance for a number of years. We purchase stop loss coverage to limit our exposure to large, individual claims. On a periodic basis we accrue using various state rates based on job classifications. On an annual basis in the third quarter, we engage in a comprehensive analysis to develop a range of potential exposure, and considering actual experience, we reserve within that range. We accrue the estimated adjustment to income for the differences between this estimate and our reserve. The credits taken to income for the years ended December 31, 2011, 2010 and 2009 were \$4.8 million, \$5.0 million, and \$6.1 million, respectively.

The table below sets out the range and our actual reserve for the past three years (\$ in millions):

| | MAXIMUM RESERVE | MINIMUM RESERVE | ACTUAL RESERVE |
|-------------------|-----------------|-----------------|----------------|
| December 31, 2011 | \$ 17.5 | 15.4 | 17.5 |
| December 31, 2010 | 15.9 | 13.3 | 15.9 |
| December 31, 2009 | 14.2 | 13.1 | 14.2 |

Given the uncertain nature of claim reporting and settlement patterns associated with workers' compensation insurance, we have accrued at the higher end of the range.

• **Captive Insurance Company**—In order to better manage our global insurance program and support our risk management efforts, we supplement our traditional insurance program by the use of a wholly-owned captive insurance company to provide professional indemnity and employment practice liability insurance coverage on a "claims made" basis. The level of risk retained by our captive is up to \$2.5 million per claim (dependent upon location) and up to \$12.5 million in the aggregate. The accruals for professional indemnity claims facilitated through our captive insurance company, which relate to multiple years, were \$0.7 million and \$2.1 million, net of receivables from third party insurers, as of December 31, 2011 and 2010, respectively.

Professional indemnity insurance claims can be complex and take a number of years to resolve. Within our captive insurance company, we estimate the ultimate cost of these claims by way of specific claim accruals developed through periodic reviews of the circumstances of individual claims. With respect to the consolidated financial statements, when a potential loss event occurs, management estimates the ultimate cost of the claims and accrues the related cost when probable and estimable.

Table of Contents

NEW ACCOUNTING STANDARDS

See New Accounting Standards section of Note 2 of the notes to consolidated financial statements.

ITEMS AFFECTING COMPARABILITY

Macroeconomic Conditions

Our results of operations and the variability of these results are significantly influenced by macroeconomic trends, the geo political environment, the global and regional real estate markets and the financial and credit markets. These macroeconomic conditions have had, and we expect to continue to have, a significant impact on the variability of our results of operations.

LaSalle Investment Management Revenue

Our investment management business is in part compensated through the receipt of incentive fees where performance of underlying funds' investments exceeds agreed-to benchmark levels. Depending upon performance and the contractual timing of measurement periods with clients, these fees can be significant and vary substantially from period to period.

“Equity in earnings (losses) from real estate ventures” also may vary substantially from period to period for a variety of reasons, including as a result of: (1) impairment charges, (2) realized gains on asset dispositions or (3) incentive fees recorded as equity earnings. The timing of recognition of these items may impact comparability between quarters, in any one year, or compared to a prior year.

The comparability of these items can be seen in Note 3 of the Notes to Consolidated Financial Statements and is discussed further in Segment Operating Results included herein.

Transactional-Based Revenue

Transactional-based fees for real estate investment banking, capital markets activities and other services within our Real Estate Services businesses increase the variability of the revenue we receive that relates to the size and timing of our clients' transactions. In 2008 and 2009, Capital Market transactions decreased sharply due to deteriorating economic conditions and the global credit crisis. In 2010 and 2011, Capital Market transactions grew as economic conditions generally improved. The timing and the magnitude of these fees can vary significantly from year to year and quarter to quarter.

Foreign Currency

We conduct business using a variety of currencies but we report our results in U.S. dollars. As a result, the volatility of currencies against the U.S. dollar may positively or negatively impact our results. This volatility can make it more difficult to perform period-to-period comparisons of the reported U.S. dollar results of operations, because such results may indicate a growth or decline rate that might not have been consistent with the real underlying growth or decline rate in the local operations. Consequently, we provide information about the impact of foreign currencies in the period-to-period comparisons of the reported results of operations in our discussion and analysis of financial condition in the Results of Operations section below.

MARKET RISKS

Market Risk

The principal market risks we face due to the risk of loss arising from adverse changes in market rates and prices are:

- Interest rates on our credit facilities; and

- Foreign exchange risks.

In the normal course of business, we manage these risks through a variety of strategies, including hedging transactions using various derivative financial instruments such as foreign currency forward contracts. We enter into derivative instruments with high credit-quality counterparties and diversify our positions across such counterparties in order to reduce our exposure to credit losses. We do not enter into derivative transactions for trading or speculative purposes.

Table of Contents

Interest Rates

We centrally manage our debt, considering investment opportunities and risks, tax consequences and overall financing strategies. We are primarily exposed to interest rate risk on our credit facility, consisting of \$1.1 billion of revolving credit that is available for working capital, investments, capital expenditures and acquisitions. Our average outstanding borrowings under the Facility were \$467 million during 2011 and the effective interest rate was 1.8%. As of December 31, 2011, we had \$463 million outstanding under the Facility. The Facility bears a variable rate of interest based on market rates.

Our overall interest rate risk management objective is to limit the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve this objective, in the past we have entered into derivative financial instruments such as interest rate swap agreements when appropriate and we may do so in the future. We entered into no such agreements in the prior three years and we had no such agreements outstanding at December 31, 2011.

Foreign Exchange

Foreign exchange risk is the risk that we will incur economic losses due to adverse changes in foreign currency exchange rates. Our revenue outside of the United States totaled 56% and 55% of our total revenue for 2011 and 2010, respectively. Operating in international markets means that we are exposed to movements in foreign exchange rates, most significantly by the euro (13% of revenue for 2011) and the British pound (13% of revenue for 2011).

We mitigate our foreign currency exchange risk principally by (1) establishing local operations in the markets we serve and (2) invoicing customers in the same currency as the source of the costs. The impact of translating expenses incurred in foreign currencies back into U.S. dollars offsets the impact of translating revenues earned in foreign currencies back into U.S. dollars. In addition, British pound and Singapore dollar expenses incurred as a result of our regional headquarters being located in London and Singapore, respectively, act as a partial operational hedge against our translation exposures to British pounds and Singapore dollars.

We enter into forward foreign currency exchange contracts to manage currency risks associated with intercompany loan balances. At December 31, 2011, we had forward exchange contracts in effect with a gross notional value of \$1.67 billion (\$758.2 million on a net basis) and a net fair value loss of \$1.4 million. This net carrying loss is offset by a carrying gain in associated intercompany loans such that the net impact to earnings is not significant.

Although we operate globally, we report our results in U.S. dollars. As a result, the strengthening or weakening of the U.S. dollar may positively or negatively impact our reported results. The following table sets forth the revenue derived from our most significant currencies on a revenue basis (\$ in millions):

| | 2011 | 2010 |
|---------------|------------|---------|
| United States | | |
| dollar | \$ 1,563.7 | 1,321.4 |
| Euro | 480.2 | 376.4 |
| British pound | 453.1 | 325.1 |
| Australian | | |
| dollar | 249.9 | 208.2 |
| Japanese yen | 125.8 | 115.9 |
| Hong Kong | | |
| dollar | 93.2 | 81.7 |
| Singapore | | |
| dollar | 92.1 | 106.0 |
| | 526.5 | 390.9 |

Other
currencies

| | | | |
|---------------|----|---------|---------|
| Total revenue | \$ | 3,584.5 | 2,925.6 |
|---------------|----|---------|---------|

We estimate that had euro-to-U.S. dollar exchange rates been 10% higher throughout the course of 2011, our reported operating income would have increased by \$5.0 million. Had the British pound-to-U.S. dollar exchange rates been 10% higher throughout the course of 2011, our reported operating income would have decreased by \$1.1 million. These hypothetical calculations estimate the impact of translating results into U.S. dollars and do not include an estimate of the impact a 10% increase in the U.S. dollar against other currencies would have on our foreign operations.

Table of Contents

Seasonality

Our quarterly revenue and profits tend to grow progressively by quarter throughout the year. This is a result of a general focus in the real estate industry on completing or documenting transactions by calendar-year-end and the fact that certain expenses are constant through the year. Historically, we have reported an operating loss or a relatively small profit in the first quarter and then increasingly larger profits during each of the following three quarters, excluding the recognition of investment-generated performance fees and co-investment equity gains (losses) (both of which can be particularly unpredictable). Such performance fees and co-investment equity gains (losses) are generally earned when assets are sold, the timing of which is geared toward the benefit of our clients. Non-variable operating expenses, which are treated as expenses when they are incurred during the year, are relatively constant on a quarterly basis.

RESULTS OF OPERATIONS

We operate in a variety of currencies but report our results in U.S. dollars, thus the volatility of these currencies against the U.S. dollar may positively or negatively impact our reported results. This volatility may result in the reported U.S. dollar revenue and expenses showing increases or decreases between years that may not be consistent with the real underlying increases or decreases in local currency operations. In order to provide more meaningful year-to-year comparisons of our reported results, we have included detail of the movements in certain reported lines of the Consolidated Statement of Operations (\$ in millions) in both U.S. dollars and in local currencies in the tables throughout this section.

Reclassifications

We report “Equity in earnings (losses) from real estate ventures” in the Consolidated Statement of Operations after “Operating income.” However, for segment reporting we reflect “Equity in earnings (losses) from real estate ventures” within “Total revenue.” See Note 3 of the Notes to Consolidated Financial Statements for “Equity earnings (losses)” reflected within segment revenue, as well as discussion of how the Chief Operating Decision Maker (as defined in Note 3) measures segment results with “Equity earnings (losses)” included in segment revenue.

Year Ended December 31, 2011 Compared to Year Ended December 31, 2010

| (\$ in millions) | Twelve | Twelve | Change in | % Change in | |
|---------------------------------------|-------------------|-------------------|--------------|--------------|----------------|

| Operating income | \$ 251.2 | 260.6 | (9.4) | (4 %) | (6 %) |
| (n.m. - not meaningful) | | | | | |

REVENUE

In 2011, revenue grew 23% for the year, 19% in local currency, driven both by (1) double-digit growth in all three geographic RES segments and (2) the acquisition of King Sturge completed in EMEA during the second quarter of 2011. Strong conversion of the firm's business pipelines drove growth in the transactional businesses of Leasing and Capital Markets, while Property & Facility Management revenue increased due to continued growth in corporate outsourcing. LaSalle Investment Management grew 6%, 2% in local currency.

Table of Contents

OPERATING EXPENSES

Operating expenses were \$3.3 billion in 2011, an increase of 25% in U.S. dollars and 22% in local currencies from the prior year. Operating expenses for 2011 include \$56 million of Restructuring and acquisition charges, primarily as a result of expenses related to the King Sturge acquisition and the integration of King Sturge's operations. Charges incurred related to the King Sturge acquisition included (1) employee retention bonuses of \$16 million, (2) lease termination charges of \$9 million and (3) other transaction costs of \$18 million. Additionally, \$13 million of employee termination costs unrelated to King Sturge were recognized in 2011.

Operating expenses, excluding Restructuring and acquisition charges, increased 23%, in US dollars and 20% in local currency. The overall increase in operating expenses was primarily driven by higher variable compensation resulting from improved transactional revenue and by variable costs to support client wins and to continue building the firm's pipeline for 2012.

INTEREST EXPENSE

Net interest expense was \$36 million in 2011, a decrease of 22% from the \$46 million in 2010. This was primarily due to a decrease in both our effective borrowing rate and accretive interest expense recognized for our deferred business acquisitions obligations.

EQUITY IN INCOME FROM REAL ESTATE VENTURES

In 2011, we recognized Equity income of \$6 million from our investments in real estate ventures, compared to a loss of \$11 million in 2010, due primarily to a reduction in impairment charges as real estate markets generally improved in 2011. Equity income and losses included impairment charges of \$6 million in 2011 and \$14 million in 2010.

PROVISION FOR INCOME TAXES

The provision for income taxes was \$56 million in 2011, resulting in an effective tax rate of 25.4%. See the Income Tax discussion in the Summary of Critical Accounting Policies and Estimates and see Note 8 of the Notes to Consolidated Financial Statements for a further discussion of our effective tax rate.

NET INCOME

Net income available to common shareholders for 2011 was \$164 million, or \$3.70 per diluted average share, compared to a net income of \$154 million, or \$3.48 per diluted average share, for 2010.

SEGMENT OPERATING RESULTS

We manage and report our operations as four business segments:

The three geographic regions of Real Estate Services ("RES"):

(1) Americas,

(2) Europe, Middle East and Africa ("EMEA"), and

(3) Asia Pacific;

and

(4) Investment Management, which offers investment management services on a global basis.

Each geographic region offers our full range of Real Estate Services, including tenant representation and agency leasing, capital markets and hotels, property management, facility management, project and development services, and

advisory, consulting and valuation services. We consider “property management” to be services provided to non-occupying property investors and “facility management” to be services provided to owner-occupiers.

The Investment Management segment provides investment management services to institutional investors and high-net-worth individuals.

Table of Contents

For segment reporting, we show equity in earnings (losses) from real estate ventures within our revenue line, since it is an integral part of our Investment Management segment. We have not allocated restructuring charges to the business segments for segment reporting purposes and therefore we do not include these costs in the discussion below.

AMERICAS—REAL ESTATE SERVICES

| (\$ in millions) | Twelve Months Ended December 31, 2011 | Twelve Months Ended December 31, 2010 | Change in U.S. dollars | | Change in Local Currency | |
|--------------------------------------|---|---|---------------------------|------|-----------------------------------|--|
| Leasing | \$ 760.2 | 639.1 | 121.1 | 19 % | 19 % | |
| Capital Markets and Hotels | 136.1 | 84.1 | 52.0 | 62 % | 62 % | |
| Property & Facility Management | 335.6 | 268.8 | 66.8 | 25 % | 24 % | |
| Project & Development Services | 178.5 | 158.9 | 19.6 | 12 % | 12 % | |
| Advisory, Consulting and Other | 112.2 | 110.3 | 1.9 | 2 % | 2 % | |
| Equity earnings | 2.7 | 0.3 | 2.4 | n.m. | n.m. | |
| Total segment revenue | \$ 1,525.3 | 1,261.5 | 263.8 | 21 % | 21 % | |
| Operating expenses | 1,362.6 | 1,113.2 | 249.4 | 22 % | 22 % | |
| Operating income | \$ 162.7 | 148.3 | 14.4 | 10 % | 10 % | |
| (n.m. - not meaningful) | | | | | | |

Full-year revenue in the Americas region was \$1.5 billion, an increase of \$264 million, or 21%, over the prior year. The growth was led by Capital Markets & Hotels and Leasing as business conditions improved and as we gained market share. Fourth-quarter revenue in the region was \$510 million, compared with \$429 million in the fourth quarter of 2010, an increase of 19%.

Operating expenses were \$1.4 billion for the year, a 22% increase over the prior year. The increase was impacted by higher commission expense related to the higher Leasing and Capital Markets & Hotels revenue, as well as increases in gross contract vendor costs related to corporate client activities in Property & Facility Management, \$16 million of which was added in the fourth quarter.

Americas operating income improved to \$163 million for the year, from \$148 million in 2010, while operating income margin was 10.7 % in 2011 compared with 11.8 % in 2010. Operating income margin improved to 16.6% in the fourth quarter of 2011, compared to 16.2 % in the fourth of 2010.

EMEA—REAL ESTATE SERVICES

Edgar Filing: JONES LANG LASALLE INC - Form 10-K

| (\$ in millions) | Twelve Months Ended December 31, 2011 | Twelve Months Ended December 31, 2010 | Change in U.S. dollars | | Change in Local Currency | |
|--------------------------------------|---|---|---------------------------|------|-----------------------------------|--|
| Leasing | \$ 236.1 | 202.6 | 33.5 | 17 % | 13 % | |
| Capital Markets and Hotels | 229.1 | 141.2 | 87.9 | 62 % | 57 % | |
| Property & Facility Management | 152.8 | 142.9 | 9.9 | 7 % | 3 % | |
| Project & Development Services | 182.5 | 115.0 | 67.5 | 59 % | 52 % | |
| Advisory, Consulting and Other | 173.5 | 127.2 | 46.3 | 36 % | 32 % | |
| Equity losses | (0.3) | (0.1) | (0.2) | n.m. | n.m. | |
| Total segment revenue | \$ 973.7 | 728.8 | 244.9 | 34 % | 29 % | |
| Operating expense | 945.8 | 709.2 | 236.6 | 33 % | 29 % | |
| Operating income | \$ 27.9 | 19.6 | 8.3 | 42 % | 38 % | |
| (n.m. - not meaningful) | | | | | | |

EMEA's revenue in 2011 was \$974 million, compared with \$729 million in 2010, an increase of 34%, 29% in local currency. This was primarily the result of strong growth in Capital Markets & Hotels and Advisory revenue and the successful integration of King Sturge. Fourth-quarter revenue in the region was \$340 million, compared with \$237 million in 2010, an increase of 43%, 45% in local currency.

Table of Contents

Operating expenses, which include seven months of King Sturge ongoing operating expenses and \$11 million of King Sturge intangibles amortization, were \$946 million for the year, an increase of 33% from the prior year, 29% in local currency. Gross contract vendor costs related to the PDS business line increased by more than \$40 million in the year compared with 2010. EMEA's adjusted operating income margin, which excludes \$11 million of King Sturge intangibles amortization, was 4.0% compared with 2.7% in 2010. For the fourth quarter of 2011, adjusted operating income margin, which excludes \$5 million of King Sturge intangibles amortization, was 11.4% compared with 8.5% in the fourth quarter of 2010.

ASIA PACIFIC—REAL ESTATE SERVICES

| (\$ in millions) | Twelve | Twelve | Change in | | |
|--------------------------------|----------|----------|--------------|----------|------|
| | Months | Months | | | |
| | Ended | Ended | Local | | |
| | December | December | Change in | Currency | |
| | 31, 2011 | 31, 2010 | U.S. dollars | | |
| Leasing | \$ 192.3 | 158.2 | 34.1 | 22% | 16% |
| Capital Markets and Hotels | 94.8 | 81.6 | 13.2 | 16% | 7% |
| Property & Facility Management | 364.6 | 303.7 | 60.9 | 20% | 13% |
| Project & Development Services | 80.8 | 63.5 | 17.3 | 27% | 23% |
| Advisory, Consulting and Other | 83.8 | 71.4 | 12.4 | 17% | 12% |
| Equity earnings (losses) | 0.2 | 0.1 | 0.1 | n.m. | n.m. |
| Total segment revenue | \$ 816.5 | 678.5 | 138.0 | 20% | 14% |
| Operating expense | 750.3 | 629.1 | 121.2 | 19% | 13% |
| Operating income | \$ 66.2 | 49.4 | 16.8 | 34% | 29% |

Revenue in Asia Pacific was \$816 million in 2011, compared with \$679 million in 2010, an increase of 20%, 14% in local currency. Continued expansion of the firm's market-leading positions in Greater China and India contributed to increased revenue, as did growth in Property & Facility Management. Fourth-quarter revenue in the region was \$236 million in 2011, an increase of 6% in both U.S. dollars and local currency compared with the same period in 2010. Capital Markets & Hotels revenue decrease in the fourth quarter due to lower market investment volumes overall and fewer Hotels transactions during the quarter following a very robust start to the year.

Operating expenses for the region were \$750 million for the year, an increase of 19%, 13% in local currency, on a year-over-year basis. The increase was primarily due to staff and gross contract vendor costs that related to a higher volume of PDS work, as well as expenses relating to other corporate client activities.

Asia Pacific's operating income margin for the year increased to 8.1%, up from 7.3% a year ago. Operating income margin was 10.7% in the fourth quarter compared with 11.5% for the same period a year ago, resulting from lower Capital Markets & Hotels revenue during the quarter.

LaSalle Investment Management's full-year Advisory fees were \$245 million, compared with \$238 million in 2010. Fourth-quarter Advisory fees were \$60 million, compared with \$61 million in the fourth quarter of 2010. The business recognized higher incentive fees during the year resulting from investment performance for clients.

LaSalle Investment Management raised nearly \$5.0 billion of net equity in 2011, and assets under management were \$47.7 billion at December 31, 2011.

REVENUE

In 2010, revenue increased 18% in U.S. dollars and 17% in local currency due to growth in real estate services in all three geographic segments and in most major product categories. As economic conditions in our markets generally improved in 2010, we saw significant growth in transactional revenues, with Leasing revenue of approximately \$1.0 billion, an increase of 27% in local currency, and Capital Markets and Hotels revenue of \$307 million, an increase of 51% in local currency. Property and Facility Management continued to grow in 2010, reaching \$715 million, an increase of 11% in local currency, due to growth in all of our geographic segments. LaSalle Investment Management was the only segment with lower revenue in 2010, decreasing 3% in local currency due to a reduction in advisory fees.

Table of Contents**OPERATING EXPENSES**

Operating expenses were \$2.7 billion in 2010, an increase of 13% in U.S. dollars and 12% in local currencies from the prior year. This increase was primarily driven by increased Compensation and benefits costs that resulted from increased incentive compensation due to improved results and higher transactional revenue. On a full-year basis, total compensation as a percentage of firm revenue improved to 64.9%, from 65.5% in 2009, driven by better productivity across the firm. Adjusted operating income margin, which excludes Restructuring charges, was 9.1% in 2010, up from 6.6% in 2009. Operating margins increased across all of our segments in 2010.

INTEREST EXPENSE

Net interest expense was \$46 million in 2010 and \$55 million in 2009, a decrease of \$9 million or 16%, due to a reduction in average borrowings during the year and a reduction in non-cash interest accrued on deferred business obligations. In 2010, we significantly reduced our deferred business acquisition obligations, paying \$106 million of deferred business acquisition obligations, including \$78 million for the 2008 Staubach acquisition and \$14 million for the 2006 Spaulding and Slye acquisition.

EQUITY IN LOSSES FROM REAL ESTATE VENTURES

In 2010, we recognized \$11 million of equity losses from our real estate ventures, compared to \$59 million of losses recognized in 2009. The 2010 and 2009 losses were primarily due to non-cash impairment charges. We recognized impairment charges throughout 2010 and 2009 as we determined that certain of our real estate investments had become impaired due to declines in real estate markets, adversely impacting rental income assumptions and forecasted exit capitalization rates.

PROVISION FOR INCOME TAXES

The provision for income taxes was \$49 million in 2010, resulting in an effective tax rate of 24.1%. See the Income Tax discussion in the Summary of Critical Accounting Policies and Estimates and see Note 8 of the Notes to Consolidated Financial Statements for a further discussion of our effective tax rate.

NET INCOME (LOSS)

Net income available to common shareholders for 2010 was \$154 million, or \$3.48 per diluted average share, compared to a net loss of \$4 million, or \$0.11 per diluted average share, for 2009.

| Operating income | \$ 148.3 | 86.2 | 62.1 | 72% | 79% |

n.m. - not meaningful

Revenue in the Americas region was nearly \$1.3 billion, an increase of 22% over the prior year, driven by increased transactional activities both in Leasing, which increased 28% to \$639 million, and Capital Markets and Hotels, which more than doubled to \$84 million. The Americas also saw significant growth in Property and Facility Management with revenue increasing 19%, as a result of new client wins and the expansion of activities with existing clients.

Table of Contents

Total operating expenses were \$1.1 billion, compared with \$945 million in 2009, an 18% increase. The Americas operating expense increase was primarily a result of increased revenue, especially higher transactional volumes and related incentive compensation. Americas operating income margin improved to 11.8%, from 8.4% in 2009.

EMEA—REAL ESTATE SERVICES

| (\$ in millions) | Twelve Months Ended December 31, 2010 | Twelve Months Ended December 31, 2009 | Change in U.S. dollars | | Change in Local Currency | |
|--------------------------------------|--|--|---------------------------|------|--------------------------------|--|
| Leasing | \$ 202.6 | 172.5 | 30.1 | 17 % | 22 % | |

| (n.m. - not meaningful) | | | | | | |

EMEA's full-year revenue was \$729 million, compared with \$644 million in 2009, an increase of 13% in U.S. dollars, 17% in local currency, with the most significant contribution from Capital Markets and Hotels. Transactional activity improved in our largest European markets as economic conditions improved significantly in these markets. Capital Markets and Hotels momentum picked up in the fourth quarter, driving revenue up 41% in local currency compared with the fourth quarter of 2009. Leasing revenue also grew significantly to \$203 million, an increase of 22% in local currency over 2009.

Operating expenses were \$709 million, an increase of 9% in U.S. dollars, 12% in local currency. This increase was primarily due to increased variable compensation expense related to improved year-over-year performance. For 2010, operating income margin was 2.7%, compared with an operating loss of 1.5% in 2009.

| (n.m. - not meaningful) | | | | | |

Revenue in the Asia Pacific region was \$679 million in 2010, an increase of 26% in U.S. dollars and 17% in local currency. The year-over-year increase was principally driven by transactional revenue improvement across most countries in the region. Leasing revenue was \$158 million, increasing 34% in local currency, and Capital Markets and Hotels revenue was \$82 million, increasing 25% in local currency. Fourth-quarter revenue in the region increased 25%, 18% in local currency, to \$223 million.

Table of Contents

Operating expenses for the region were \$629 million for 2010, compared with \$507 million in 2009, an increase of 16% in local currency, primarily due to an increase in costs associated with increased revenue and transaction volume. Full-year operating income margin was 7.3%, compared with 5.9% in 2009.

INVESTMENT MANAGEMENT

(n.m. - not meaningful)

LaSalle Investment Management's full-year Advisory fees were \$238 million in 2010, compared with \$242 million in 2009, a decrease of 3% in local currency. Fourth-quarter Advisory fees were \$61 million, down 1% compared with 2009 in both U.S. dollars and local currency. Transaction and incentive fees increased to \$5.9 million in the fourth quarter versus \$2.3 million in the prior year due to increased acquisition levels, bringing year-to-date transaction and incentive fees to \$20 million.

Full-year adjusted operating income margin, which excludes non-cash co-investment impairment charges, was 19.1% in 2010 compared with 17.6% in 2009.

LaSalle Investment Management raised net capital of \$5.0 billion during the year, making 2010 the second-best year of capital raised in LaSalle history. Investments totaled \$3.2 billion for the year. At the end of the fourth quarter, assets under management were \$41.3 billion.

CONSOLIDATED CASH FLOWS

Cash Flows From Operating Activities

During 2011, cash flow provided by operating activities was \$211 million, a decrease of \$173 million from the \$384 million of cash flows provided by operating activities in 2010. This year-over-year decrease in cash generated from operating activities resulted primarily from an increase in working capital requirements in support and in recognition of the 23% increase in revenue in 2011. The most significant change in working capital was the \$136 million year-over-year increase in receivables resulting primarily from significant growth in revenue late in the fourth quarter.

During 2010, cash flow provided by operating activities totaled \$384 million, an increase of \$134 million from the \$250 million of cash flows provided by operating activities in 2009. The year-over-year \$134 million increase in cash generated from operating activities resulted primarily from an increase in net income and cash flow provided by a change in working capital items. Net income increased \$158 million, but was partially off-set by decreases in non-cash charges, including: (1) a \$47 million decrease in Equity losses from real estate ventures, (2) a \$21 million decrease in the Provision for loss on receivables and other assets, and (3) a \$12 million decrease in Depreciation and

amortization. Cash flow from operations also was increased in 2010 by a \$62 million positive change in working capital.

Table of Contents

Cash Flows From Investing Activities

In 2011, we used \$389 million for investing activities, a \$298 million increase from 2010, due to (1) a \$228 million increase in cash used for acquisitions, (2) a \$44 million increase in capital expenditures, and (3) a net \$26 million increase in cash used for our investments in real estate ventures. In 2011 we paid \$252 million for acquisitions, consisting of (1) \$174 million for the King Sturge acquisition, (2) \$44 million for eight other new acquisitions, (3) \$22 million to acquire a portion of the minority interest in our India operations, and (4) \$12 million for contingent earn-out consideration paid for acquisitions completed in prior years.

In 2010, we used \$91 million of cash for investing activities, a \$5 million net increase from the \$86 million used in 2009. The \$5 million net increase was due to (1) a \$22 million increase in cash used for business combination activity, (2) a \$20 million decrease in net cash used for investment in real estate ventures, and (3) a \$3 million increase in capital expenditures. In 2010, we used \$24 million for business combinations, including (1) \$11 million for contingent earn-out payments for acquisitions completed in prior years, (2) \$9 million to purchase a portion of the minority interest in our Indian operations, and (3) \$4 million for various other acquisition-related activities.

Cash Flows From Financing Activities

In 2011, we generated \$111 million of cash from financing activities, a \$222 million increase from the \$111 million used for financing activities in 2010. This increase was primarily due to a \$274 million year-over-year increase in net borrowing, off-set by a \$58 million increase in cash used for deferred acquisition obligations. In 2011, we paid \$164 million for deferred business acquisition obligations, including \$150 million related to the 2008 Staubach acquisition and \$11 million related to the 2006 Spaulding and Slye acquisition.

In 2010, we used \$111 million for financing activities, a \$30 million decrease from the \$141 million used in 2009. The \$111 million used for financing activities in 2010 was comprised of a \$28 million net increase in cash from borrowings, offset by the following uses of cash: (1) \$106 million to satisfy deferred business acquisitions obligations primarily for payments of \$78 million related to the 2008 acquisition of Staubach and \$14 million related to the 2006 acquisition of Spaulding and Slye, (2) \$12 million of debt issuance costs in connection with the renegotiation of our Facility, (3) a net \$12 million used for stock compensation programs, primarily for the purchase of shares to cover payroll taxes associated with restricted stock units, and (4) \$9 million for dividend payments.

LIQUIDITY AND CAPITAL RESOURCES

Historically, we have financed our operations, co-investment activity, share repurchases and dividend payments, capital expenditures and business acquisitions with internally generated funds, issuances of our common stock and borrowings under our credit facilities.

Credit Facilities

In June 2011, we amended our credit facility (the "Facility") to, among other things: (1) reset pricing, (2) terminate the \$195 million term loan portion of the Facility, (3) increase the \$900 million revolving loan to \$1.1 billion, (4) extend the maturity to June 2016 and (5) permit the add-back of certain integration and retention costs associated with King Sturge and other acquisitions to the adjusted EBITDA and EBIT that are used in certain credit facility calculations. Currently, there are 18 banks participating in the Facility and the Facility remains unsecured. As of December 2011, we had \$463 million outstanding on the Facility. The average outstanding borrowings under the Facility were \$467 million during the twelve months ended December 31, 2011.

In addition to our Facility, we have the capacity to borrow up to an additional \$47 million under local overdraft facilities. At December 31, 2011 we had short-term borrowings (including capital lease obligations and local overdraft facilities) of \$65 million outstanding, of which \$39 million was attributable to local overdraft facilities.

Table of Contents

We will continue to use the Facility for working capital needs (including payment of accrued incentive compensation), co-investment activities, dividend payments, share repurchases, capital expenditures, acquisitions and general corporate purposes. We believe that the Facility, together with our local borrowing facilities and cash flow generated from operations, will provide adequate liquidity and financial flexibility to meet our current needs.

See Note 9, Debt, of the Notes to Consolidated Financial Statements for additional information on our Credit Facility.

Issuance of Common Stock

In June 2009, we sold 6,500,000 shares of our common stock, at a sale price of \$35.00 per share in an underwritten secondary public stock offering. We made the offering under a shelf registration statement we filed with the SEC. We used the net proceeds, after the underwriting discount, commissions and other expenses, of \$217 million to repay outstanding indebtedness on our unsecured revolving credit facility.

We sold no shares of our common stock in 2010 or 2011. All common stock shares issued in 2010 and 2011 were issued as part of our employee stock compensation programs.

Co-Investment Activity

As of December 31, 2011, we had total investments and loans of \$225 million in approximately 40 separate property or fund co-investments. Funding of co-investments exceeded return of capital by \$46 million, \$19 million, and \$39 million for the years ended December 31, 2011, 2010 and 2009, respectively. We expect to continue to pursue co-investment opportunities with our investment management clients in the Americas, EMEA and Asia Pacific. Co-investment remains important to the continued growth of our Investment Management business. We anticipate that our net co-investment funding for 2012 will be between \$40 and \$50 million (planned co-investment less return of capital from liquidated co-investments).

See Note 5, Investment in Real Estate Ventures, of the Notes to Consolidated Financial Statements for additional information on our co-investment activity.

Share Repurchase and Dividend Programs

Since October 2002, our Board of Directors has approved five share repurchase programs. At December 31, 2011, we have 1,563,100 shares that we remain authorized to repurchase under the current share repurchase program. We have made no share repurchases in the last three years. Our current share repurchase program allows the Company to purchase our common stock in the open market and in privately negotiated transactions. The repurchase of shares is primarily intended to offset dilution resulting from both stock and restricted stock unit grants made under our existing stock plans.

Our Board declared and paid total annual dividends and dividend-equivalents of \$0.30, \$0.20, and \$0.20 per common share in 2011, 2010 and 2009, respectively. In December 2011, we paid a semi-annual cash dividend of \$0.15 per share. There can be no assurance that we will declare dividends in the future since the actual declaration of future dividends and the establishment of record and payment dates, remains subject to final determination by the Company's Board of Directors.

Capital Expenditures

Capital expenditures for 2011 were \$92 million, compared to \$48 million in 2010 and \$44 million in 2009. Our capital expenditures are primarily for information systems, computer hardware and improvements to leased office space. In 2011, we received \$3 million of tenant improvement allowances, reimbursing us for capital expenditures we made related to leasehold improvements. These allowances will be amortized as a reduction of rent expense over the life of the related leases.

Business Acquisitions

In 2011 we paid \$252 million for acquisitions, consisting of (1) \$174 million for the King Sturge acquisition, (2) \$44 million for eight other new acquisitions, (3) \$22 million to acquire a portion of the minority interest in our India operations, and (4) \$12 million for contingent earn-out consideration paid for acquisitions complete in prior years. Also in 2011, we paid \$164 million for deferred business acquisition obligations, including \$150 million related to the 2008 Staubach acquisition and \$11 million related to the 2006 Spaulding and Slye acquisition.

Table of Contents

Terms for our acquisitions have typically included cash paid at closing with provisions for additional consideration and earn-outs subject to certain contract provisions and performance. Deferred business acquisition obligations totaled \$299 million on our consolidated balance sheet at December 31, 2011. These obligations represent the current discounted values of payments to sellers of businesses for which our acquisition has closed as of the balance sheet date and for which the only remaining condition on those payments is the passage of time. At December 31, 2011, we had the potential to make earn-out payments on 14 acquisitions that are subject to the achievement of certain performance conditions. The maximum amount of the potential earn-out payments for these acquisitions was \$157 million at December 31, 2011. We anticipate that the majority of these earn-outs will come due at various times over the next three years assuming the achievement of the applicable performance conditions.

Our 2007 acquisition of Indian real estate services company Trammell Crow Meghraj (TCM) has provisions for a payment to be made in 2014 for the repurchase of the remaining shares exchanged in the merger. This payment will be based on future performance of these operations and accordingly is not quantifiable at this time. An estimate of this obligation based on the original value of shares exchanged is reflected on our balance sheet within the \$18 million Minority shareholder redemption liability.

We are considering, and will continue to consider, acquisitions that we believe will strengthen our market position, increase our profitability and supplement our organic growth.

Contractual Obligations

We have obligations and commitments to make future payments under contracts in the normal course of business. The following table summarizes our minimum contractual obligations as of December 31, 2011 (\$ in millions):

| CONTRACTUAL OBLIGATIONS | TOTAL | LESS THAN | | MORE THAN | |
|--|------------|-----------|---------|-----------|---------|
| | | 1 YEAR | 3 YEARS | 5 YEARS | 5 YEARS |
| 1. Debt obligations | \$ 501.7 | 38.7 | — | 463.0 | — |
| 2. Interest on debt obligations | 37.7 | 9.0 | 16.5 | 12.2 | — |
| 3. Business acquisition obligations | 317.0 | 31.3 | 220.5 | 65.2 | — |
| 4. Minority shareholder redemption liability | 18.4 | — | 18.4 | — | — |
| 5. Lease obligations | 593.0 | 116.4 | 192.0 | 149.4 | 135.2 |
| 6. Deferred compensation | 8.6 | 0.8 | 5.1 | 2.6 | 0.1 |
| 7. Defined benefit plan obligations | 69.7 | 5.8 | 12.5 | 13.4 | 38.0 |
| 8. Vendor and other purchase obligations | 88.5 | 40.6 | 36.3 | 9.8 | 1.8 |
| 9. Unconsolidated joint ventures | — | — | — | — | — |
| Total | \$ 1,634.6 | 242.6 | 501.3 | 715.6 | 175.1 |

1. Debt Obligations. As of December 31, 2011, we had \$463.0 million of borrowings outstanding under our Facility and \$38.7 million under local overdraft facilities. We had the ability to borrow up to \$1.1 billion on the Facility, with capacity to borrow up to an additional \$47.0 million under local overdraft facilities. There are currently 18 banks participating in our Facility, which has a maturity of June 2016.

2. Interest on Debt Obligations. Our debt obligations incur interest charges at variable rates. For purposes of preparing an estimated projection of interest on debt obligations for this table, we have estimated our future interest payments based on our borrowing rates as of December 31, 2011 and assuming each of our debt obligations is held to maturity.

3. Business acquisition obligations. Our business acquisition obligations represent payments to sellers of businesses for acquisitions that were closed as of December 31, 2011, with the only condition on those payments being the passage of time. The \$317.0 million total represents \$299.1 million on a present value basis as reported in Deferred business acquisition obligations in our Consolidated Balance Sheet, and \$17.9 million of imputed interest reducing the obligations to their present value.

Table of Contents

The contractual obligation table above does not include possible contingent earn-out payments associated with our acquisitions. At December 31, 2011 we had the potential to make earn-out payments on 14 acquisitions that are subject to the achievement of certain performance conditions. The maximum amount of the potential earn-out payments was \$156.6 million at December 31, 2011. We anticipate that the majority of these earn-out payments will come due at various times over the next three years assuming the achievement of the applicable performance conditions.

4. Minority shareholder redemption liability. We estimate that the 2014 payment to purchase the remaining interest in our Indian operations held by the selling shareholders of the Trammell Crow Meghraj (“TCM”) business we acquired in 2007 will be \$18.4 million. The purchase price of the remaining interest in our India subsidiary will be based on formulas and independent valuations, as a result of which we cannot definitively determine the amount of this future payment at this time.

5. Lease obligations. Our lease obligations primarily consist of operating leases of office space in various buildings for our own use and operating leases for equipment. The total of minimum rentals to be received in the future under noncancelable operating subleases as of December 31, 2011 was \$29.7 million.

6. Deferred compensation. Deferred compensation obligations include payments under our long-term deferred compensation plans. The contractual obligation table above does not include a provision for certain long-term compensation plans for which we cannot reliably estimate the timing and amount of certain payment; we record these plans on our consolidated balance sheet as a long-term Deferred compensation liability based on their current fair value of \$7.2 million.

7. Defined benefit plan obligations. The defined benefit plan obligations represent estimates of the expected benefits to be paid out by our defined benefit plans. These obligations will be funded from the assets held by these plans. If the assets these plans hold are not sufficient to fund these payments these obligations will be funded by the Company. We have historically funded pension costs as actuarially determined and as applicable laws and regulations require.

8. Vendor and other purchase obligations. Our other purchase obligations primarily relate to various information technology servicing agreements, telephone communications and other administrative support functions.

9. Unconsolidated joint ventures. We have made capital commitments to certain unconsolidated joint ventures that are entitled to call up to a maximum of \$111.4 million as of December 31, 2011. We are not able to predict if, when, or in what amounts such capital calls will be made, and therefore we exclude such commitments from the above table. However, in relation to this activity, we made capital contributions and advances to investments in real estate ventures of \$71.0 million, \$33.9 million and \$39.8 million in 2011, 2010 and 2009, respectively, and we anticipate that our net co-investment funding for 2012 will be between \$40 and \$50 million (planned co-investment less return of capital from liquidated co-investments).

In the Notes to Consolidated Financial Statements, see Note 9, Debt, for additional information on long-term debt obligations, see Note 10, Leases, for additional information on lease obligations, and see Note 7, Retirement Plans, for additional information on defined benefit plan obligations.

Off-Balance Sheet Arrangements

We have unfunded capital commitments to LIC I and LIC II, which are unconsolidated joint ventures that serve as vehicles for substantially all of our co-investment activity, for future fundings of co-investments in underlying funds totaling a maximum of \$276 million as of December 31, 2011. See our discussion of unfunded commitments in Note 5, Investments in Real Estate Ventures, of the Notes to Consolidated Financial Statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information regarding market risk is included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations under the caption "Market Risks" and is incorporated by reference herein.

Disclosure of Limitations

As the information presented above includes only those exposures that exist as of December 31, 2011, it does not consider those exposures or positions that could arise after that date. The information represented herein has limited predictive value. As a result, the ultimate realized gain or loss with respect to interest rate and foreign currency fluctuations will depend on the exposures that arise during the period, the hedging strategies at the time and interest and foreign currency rates.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Jones Lang LaSalle Incorporated:

We have audited the accompanying consolidated balance sheets of Jones Lang LaSalle Incorporated and subsidiaries (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of operations, equity and cash flows for each of the years in the three-year period ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Jones Lang LaSalle Incorporated and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 27, 2012 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Jones Lang LaSalle Incorporated:

We have audited Jones Lang LaSalle Incorporated and subsidiaries (the Company) internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Jones Lang LaSalle Incorporated and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2011 and 2010, and the related consolidated statements of operations, equity and cash flows for each of the years in the three-year period ended December 31, 2011, and our report dated February 27, 2012 expressed an unqualified opinion on those consolidated financial statements.

Notes to Consolidated Financial Statements

(1) ORGANIZATION

Jones Lang LaSalle Incorporated (“Jones Lang LaSalle,” which we may refer to as we, us, our, the Company or the Firm) was incorporated in 1997. We have over 200 corporate offices worldwide and operations in more than 1,000 locations in 70 countries. We have approximately 45,500 employees, including 26,700 employees whose costs are reimbursed by our clients. We provide comprehensive integrated real estate and investment management expertise on a local, regional and global level to owner, occupier and investor clients. We are an industry leader in property and corporate facility management services, with a portfolio of approximately 2.1 billion square feet worldwide. LaSalle Investment Management, a member of the Jones Lang LaSalle group, is one of the world’s largest and most diversified real estate investment management firms, with approximately \$47.7 billion of assets under management.

Our range of real estate services includes:

- Agency leasing
- Tenant representation
- Property management
- Facilities management / outsourcing
- Project and development management / construction
- Valuations
- Consulting
- Capital markets
- Real estate investment banking / merchant banking
- Corporate finance
- Hotel advisory
- Energy and sustainability services
- Value recovery and receivership services
- Investment management

The following table shows the revenue for the major product categories that we group these services in for the years ended December 31, 2011, 2010 and 2009 (\$ in millions):

| | 2011 | 2010 | 2009 |
|----------------------------------|-----------|---------|---------|
| Real Estate Services: | | | |
| Leasing | \$1,188.6 | 999.9 | 783.0 |
| Capital Markets and Hotels | 460.0 | 306.9 | 203.8 |
| Property & Facilities Management | 853.0 | 715.4 | 627.4 |
| Project & Development Services | 441.8 | 337.4 | 311.0 |
| Advisory, Consulting and Other | 369.5 | 308.9 | 295.3 |
| LaSalle Investment Management | 271.6 | 257.1 | 260.2 |
| Total revenue | \$3,584.5 | 2,925.6 | 2,480.7 |

We offer these services locally, regionally and globally to real estate investors and occupiers for a variety of property types, including offices, hotels, industrial, retail, multi-family residential, healthcare facilities, critical environments and data centers, sports facilities, cultural institutions and transportation centers. Individual regions and markets focus on different property types, depending on local requirements and market conditions.

We work for a broad range of clients that represent a wide variety of industries and are based in markets throughout the world. Our clients vary greatly in size and include for-profit and not-for-profit entities of all kinds, public-private partnerships and governmental (public sector) entities. Increasingly, we are offering services to smaller middle-market companies that are looking to outsource real estate services. We provide real estate investment management services on a global basis for both public and private assets through our LaSalle Investment Management subsidiary. Our integrated global business model, industry-leading research capabilities, client relationship management focus,

consistent worldwide service delivery and strong brand are attributes that enhance our services.

Table of Contents

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

Our consolidated financial statements include the accounts of Jones Lang LaSalle and its majority-owned and controlled subsidiaries. We have eliminated all intercompany balances and transactions in our consolidated financial statements. Investments in real estate ventures over which we exercise significant influence, but not control, are accounted for either under the equity method or at fair value.

When applying principles of consolidation, we begin with Accounting Standards Update (ASU) 2009-17, “Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities,” in determining whether an investee entity is a variable interest entity (“VIE”) or a voting interest entity. ASU 2009-17 draws a distinction between voting interest entities, which are embodied by common and traditional corporate and partnership structures, and VIEs, broadly defined as entities for which control is achieved through means other than voting rights. For voting interest entities, the interest holder with control through majority ownership and majority vote consolidates. For VIEs, determination of the “primary beneficiary” drives the accounting. We identify the primary beneficiary of a VIE as the enterprise that has both of the following characteristics: (1) the power to direct the activities of the VIE that most significantly impact the entity’s economic performance; and (2) the obligation to absorb losses or receive benefits of the VIE that could potentially be significant to the entity. We perform this analysis on an ongoing basis. When we determine we are the primary beneficiary of a VIE, we consolidate our investment in the VIE; when we determine we are not the primary beneficiary of the VIE, we account for our investment in the VIE under the equity method or at fair value.

If an entity is not a VIE, but is a limited partnership or similar entity, we apply guidance from ASC Topic 810 related to investments in joint ventures, and consider rights held by limited partners which may preclude consolidation by a sole general partner. The assessment of limited partners’ rights and their impact on the presumption of control of the limited partnership by the sole general partner should be made when an investor becomes the general partner, and reassessed if (1) there is a change to the terms or in the exercisability of the rights of the limited partners, (2) the general partner increases or decreases its ownership of limited partnership interests, or (3) there is an increase or decrease in the number of outstanding limited partnership interests.

Our determination of the appropriate accounting method for all other investments is based on the level of influence we have in the underlying entity. When we have an asset advisory contract with the real estate limited partnership, the combination of our limited partner interest and the advisory agreement provides us with significant influence over such real estate limited partnership. Accordingly, we account for such investments either under the equity method or at fair value. We eliminate transactions with such subsidiaries to the extent of our ownership in the related subsidiary. We carry other investments at cost.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) requires us to make estimates and assumptions about future events that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of the revenue and expenses during the reporting periods. Such estimates include the value of purchase consideration, valuation of accounts receivable, goodwill, intangible assets, other long-lived assets, legal contingencies, assumptions used in the calculation of income taxes, incentive compensation, and retirement and other post-employment benefits, among others.

These estimates and assumptions are based on management’s best estimate and judgment. We evaluated these estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which we believe to be reasonable under the circumstances. We adjust such estimates and

assumptions when facts and circumstances dictate. Market factors, such as illiquid credit markets, volatile equity markets and foreign currency fluctuations can increase the uncertainty in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates resulting from continuing changes in economic environment will be reflected in the financial statements in future periods. Although actual amounts likely differ from such estimated amounts, we believe such differences are not likely to be material.

Table of Contents

Reclassifications

Certain prior year amounts have been reclassified to conform to the current presentation. These reclassifications have not been material and have not affected reported net income.

Revenue Recognition

We earn revenue from the following principal sources:

- Transaction commissions;
- Advisory and management fees;
- Incentive fees;
- Project and development management fees; and
- Construction management fees.

We recognize transaction commissions related to agency leasing services, capital markets services and tenant representation services as revenue when we provide the related service unless future contingencies exist. If future contingencies exist, we defer recognition of this revenue until the respective contingencies have been satisfied.

We recognize advisory and management fees related to property management services, valuation services, corporate property services, consulting services and investment management as income in the period in which we perform the related services.

We recognize incentive fees based on the performance of underlying funds' investments, contractual benchmarks and other contractual formulas.

We recognize project and development management and construction management fees by applying the percentage of completion method of accounting. We use the efforts expended method to determine the extent of progress towards completion for project and development management fees and costs incurred to total estimated costs for construction management fees.

Construction management fees, which are gross construction services revenue net of subcontract costs, were \$10.1 million, \$9.5 million and \$14.4 million for the years ended December 31, 2011, 2010 and 2009, respectively. Gross construction services revenue totaled \$143.3 million, \$165.9 million and \$160.8 million and subcontract costs totaled \$133.2 million, \$156.4 million and \$146.4 million for the years ended December 31, 2011, 2010 and 2009, respectively.

We include costs in excess of billings on uncompleted construction contracts of \$7.1 million and \$17.3 million in Trade receivables, and billings in excess of costs on uncompleted construction contracts of \$4.1 million and \$3.1 million in Deferred income, respectively, as of December 31, 2011 and 2010.

Certain contractual arrangements for services provide for the delivery of multiple services. We evaluate revenue recognition for each service to be rendered under these arrangements using criteria set forth in the FASB's Accounting Standards Codification ("ASC") Subtopic 605-25, "Multiple-Element Arrangements."

Gross and Net Accounting: We follow the guidance of ASC Subtopic 605-45, “Principal and Agent Considerations,” when accounting for reimbursements received from clients. In certain of our businesses, primarily those involving management services, our clients reimburse us for expenses incurred on their behalf. We base the treatment of reimbursable expenses for financial reporting purposes upon the fee structure of the underlying contract. Accordingly, we report a contract that provides for fixed fees, fully inclusive of all personnel and other recoverable expenses incurred but not separately scheduled, on a gross basis. When accounting on a gross basis, our reported revenues include the full billing to our client and our reported expenses includes all costs associated with the client.

Table of Contents

We account for a contract on a net basis when the fee structure is comprised of at least two distinct elements, namely (1) a fixed management fee and (2) a separate component that allows for scheduled reimbursable personnel costs or other expenses to be billed directly to the client. When accounting on a net basis, we include the fixed management fee in reported revenue and net the reimbursement against expenses. We base this accounting on the following factors, which define us as an agent rather than a principal:

• The property owner, with ultimate approval rights relating to the employment and compensation of on-site personnel, and bearing all of the economic costs of such personnel, is determined to be the primary obligor in the arrangement;

• Reimbursement to Jones Lang LaSalle is generally completed simultaneously with payment of payroll or soon thereafter;

• Because the property owner is contractually obligated to fund all operating costs of the property from existing cash flow or direct funding from its building operating account, Jones Lang LaSalle bears little or no credit risk; and

• Jones Lang LaSalle earns no margin in the reimbursement aspect of the arrangement, obtaining reimbursement only for actual costs incurred.

Certain of our management services which provide for fixed fees inclusive of personnel and other expenses incurred were accounted for on a net basis in 2010 and 2011. In 2011 and 2010, gross revenue and expenses for these management services would have added \$54.1 million and \$55.9 million, respectively. The majority of our service contracts are accounted for on a net basis. Such costs aggregated approximately \$1.4 billion, \$1.2 billion and \$1.1 billion in 2011, 2010 and 2009, respectively. The presentation of expenses pursuant to these arrangements under either a gross or net basis has no impact on operating income, net income or cash flows.

Cash and Cash Equivalents

We consider all highly-liquid investments purchased with maturities of less than three months to be cash equivalents. The carrying amount of cash equivalents approximates fair value due to the short-term maturity of these investments.

Accounts Receivable

Pursuant to contractual arrangements, accounts receivable includes unbilled amounts of \$216.3 million and \$183.0 million at December 31, 2011 and 2010, respectively.

We estimate the allowance necessary to provide for uncollectible accounts receivable. The estimate includes specific accounts for which payment has become unlikely. We also base this estimate on historical experience combined with a careful review of current developments and a strong focus on credit quality. The process by which we calculate the allowance begins in the individual business units where specific uncertain accounts are identified and reserved as part of an overall reserve that is formulaic and driven by the age profile of the receivables and our historical experience. We then review these allowances on a quarterly basis to ensure they are appropriate.

The following table details the changes in the allowance for uncollectible receivables for each of the three years ended December 31, 2011, 2010 and 2009 (\$ in thousands).

| | 2011 | 2010 | 2009 |
|--|----------|----------|----------|
| Allowance at beginning of the year | \$20,352 | 36,994 | 23,847 |
| Charged to income | 10,273 | 7,081 | 28,173 |
| Write-off of uncollectible receivables | (10,901) | (22,610) | (14,167) |
| Reserves acquired from King Sturge | 760 | - | - |

Edgar Filing: JONES LANG LASALLE INC - Form 10-K

| | | | |
|------------------------------|----------|----------|--------|
| Other | 111 | (1,113) | (859) |
| Allowance at end of the year | \$20,595 | 20,352 | 36,994 |

Amounts in Other include the impact of exchange rate fluctuations for all three years.

Table of Contents

Property and Equipment

Property and equipment are initially recorded at cost and depreciated over the relevant useful life. Certain direct costs relating to internal-use software development are capitalized when incurred during the application development phase.

We review property and equipment for impairment whenever events or circumstances indicate that the carrying value of an asset group may not be recoverable. We record an impairment loss to the extent that the carrying value exceeds the estimated fair value. We did not recognize an impairment loss related to property and equipment in 2011, 2010 and 2009.

We calculate depreciation and amortization on property and equipment for financial reporting purposes by using the straight-line method based on the estimated useful lives of our assets. Depreciation expense for the years ended December 31, 2011, 2010 and 2009 was \$62.6 million, \$60.6 million and \$60.9 million, respectively. The following table shows the gross value of major asset categories at December 31, 2011 and 2010 as well as the standard depreciable life for each of these asset categories (\$ in millions):

| CATEGORY | 2011 | 2010 | DEPRECIABLE LIFE |
|-----------------------------------|---------|---------|------------------|
| Furniture, fixtures and equipment | \$105.9 | 92.4 | 5 to 10 years |
| Computer equipment and software | 314.1 | 297.6 | 2 to 7 years |
| Leasehold improvements | 143.7 | 131.3 | 1 to 10 years |
| Automobiles and other | 14.1 | 10.8 | 4 to 5 years |
| Total | 577.8 | 532.1 | |
| Total Accumulated Depreciation | (336.4) | (333.4) | |
| Net Property and Equipment | \$241.4 | 198.7 | |

Business Combinations, Goodwill and Other Intangible Assets

We have historically grown, in part, through a series of acquisitions. Consistent with the services nature of the businesses we have acquired, two of the larger assets on our balance sheet are goodwill and intangibles resulting from these acquisitions. These intangible assets are primarily management contracts and customer backlog that we acquired as part of these acquisitions and amortize over their estimated useful lives.

We do not amortize goodwill; instead, we evaluate goodwill for impairment at least annually. In September 2011, the FASB issued ASU 2011-08, "Testing Goodwill for Impairment." ASU 2011-08 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. We define our four reporting units as the three geographic regions of Real Estate Services ("RES"), Americas RES, EMEA RES and Asia Pacific RES, and Investment Management. We early adopted the provisions of ASU 2011-08 in the third quarter of 2011, with respect to the performance of our annual impairment test of goodwill and determined that no indicators of impairment exist primarily because (1) our market capitalization has consistently exceeded our book value by a significant margin, (2) our overall financial performance has been solid in the face of mixed economic environments, and (3) forecasts of operating income and cash flows generated by our reporting units appear sufficient to support the book values of net assets of the reporting units.

In addition to our annual impairment evaluation, we evaluate whether events or circumstances have occurred in the period subsequent to our annual impairment testing which indicate that it is more likely than not an impairment loss has occurred. For example, we updated the annual evaluation in the fourth quarter of 2011, noting that our market capitalization exceeded our book value by a significant margin as of December 31, 2011 and that our forecasts of EBITDA and cash flows to be generated by each of our reporting units appeared sufficient to support the book values of the net assets of each of our reporting units. As a result, we did not change our conclusion that goodwill is not

impaired. However, it is possible our determination that goodwill for a reporting unit is not impaired could change in the future if current economic conditions deteriorate or remain difficult for an extended period of time. We will continue to monitor the relationship between the Company's market capitalization and book value, as well as the ability of our reporting units to deliver current and projected EBITDA and cash flows sufficient to support the book values of the net assets of their respective businesses.

Table of Contents

We evaluate our Identified intangibles for impairment annually or if other events or circumstances indicate that the carrying value may be impaired.

See Note 4 for additional information on goodwill and other intangible assets.

Investments in Real Estate Ventures

We invest in certain real estate ventures that own and operate commercial real estate. Typically, these are co-investments in funds that our Investment Management business establishes in the ordinary course of business for its clients. These investments take the form of ownership interests generally ranging from less than 1% to 10% of the respective ventures; we typically account for these investments under the equity method. Starting in 2011, we elected the fair value option for certain of our investments made in 2011.

Pursuant to ASC 825 this election is made on an investment by investment basis. We believe the fair value accounting method more accurately represents the value and performance of these investments. See “Principles of Consolidation” above in Note 2 for additional discussion of the accounting for our co-investments.

For real estate limited partnerships in which the Company is a general partner, the entities are generally well-capitalized and grant the limited partners substantive rights, such as the right to replace the general partner without cause, to dissolve or liquidate the partnership, to approve the sale or refinancing of the principal partnership assets, or to approve the acquisition of principal partnership assets. We generally account for such general partner interests under the equity method.

For real estate limited partnerships in which the Company is a limited partner, the Company is a co-investment partner, and has concluded that it does not have a controlling interest in these limited partnerships. When we have an asset advisory contract with the real estate limited partnership, the combination of our limited partner interest and the advisory agreement provides us with significant influence over the real estate limited partnership venture. Accordingly, we account for such investments under the equity method.

For investments in real estate ventures accounted for under the equity method, we maintain an investment account, which is (1) increased by contributions made and by our share of net income of the real estate ventures, and (2) decreased by distributions received and by our share of net losses of the real estate ventures. Our share of each real estate venture’s net income or loss, including gains and losses from capital transactions, is reflected in our consolidated statement of operations as Equity in earnings (losses) from real estate ventures.

We review investments in real estate ventures accounted for under the equity method on a quarterly basis for indications of whether we may not be able to recover the carrying value of the real estate assets underlying our investments in real estate ventures and whether our investment in these co-investments is other than temporarily impaired. When events or changes in circumstances indicate that the carrying amount of a real estate asset underlying one of our investments in real estate ventures may be impaired, we review the recoverability of the carrying amount of the real estate asset in comparison to an estimate of the future undiscounted cash flows expected to be generated by the underlying asset. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. We then record the portion of the impairment loss related to our investment in the reporting period. Additionally, we consider a number of factors, including our share of co-investment cash flows and the fair value of our co-investments, in determining whether or not our investment is other than temporarily impaired.

For investments in real estate ventures for which the fair value option has been elected, we maintain an investment account which is increased or decreased each reporting period by the difference between the fair value of the investment and the carrying value at the balance sheet date. The adjustment to our investment balance is reflected as

an unrealized gain or loss in our consolidated statement of operations within Equity in earnings (losses) from real estate ventures. The fair value of the investment at the balance sheet is determined using a discounted cash flow model with Level 3 inputs. For the year ended December 31, 2011, an unrealized gain of \$0.4 million is included in Equity in earnings (losses).

We report Equity in earnings (losses) from real estate ventures in the Consolidated Statements of Operations after Operating income. However, for segment reporting we reflect Equity earnings (losses) from real estate ventures within Revenue. See Note 3 for Equity earnings (losses) reflected within segment revenue, as well as discussion of how the Chief Operating Decision Maker (as defined in Note 3) measures segment results with Equity earnings (losses) included in segment revenue.

Table of Contents

See Note 5 for additional information on investments in real estate ventures.

Stock-Based Compensation

Stock-based compensation in the form of restricted stock units is a significant element of our compensation programs. The fair value of restricted stock units is determined based on the market price of the Company's common stock on the grant date and is amortized on a straight-line basis over the associated vesting period for each separately vesting portion of an award. We reduce stock-based compensation expense for estimated forfeitures each period and adjust expense accordingly upon vesting or actual forfeitures.

We also have a "noncompensatory" Stock Purchase Plan ("ESPP") for U.S. employees and a Jones Lang LaSalle Savings Related Share Option Plan ("Save As You Earn" or "SAYE") for U.K. and Irish employees. The fair value of options granted under the SAYE plan are determined on the grant date and amortized over the associated vesting period.

See Note 6 for additional information on stock-based compensation.

Income Taxes

We account for income taxes under the asset and liability method. We recognize deferred tax assets and liabilities for the expected future tax consequences of events that have been included in our financial statements or tax returns. Under this method, we determine deferred tax assets and liabilities based on the differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

An increase or decrease in the deferred tax liability that results from a change in circumstances, and which causes a change in our judgment about expected future tax consequences of events, would be included in the tax provision when the changes in circumstances and our judgment occurs. Deferred income taxes also reflect the impact of operating loss and tax credit carryforwards. A valuation allowance is established if we believe it is more likely than not that all or some portion of the deferred tax asset will not be realized. An increase or decrease in the valuation allowance that results from a change in circumstances, and which causes a change in our judgment about the ability to realize the related deferred tax asset, would be included in the tax provision when the changes in circumstances and our judgment occurs.

See Note 8 for additional information on income taxes.

Self-Insurance Programs

In our Americas business we have retained certain risks regarding health insurance and workers' compensation rather than purchase third-party insurance. Estimating our exposure to such risks involves subjective judgments about future events. We supplement our traditional global insurance program by the use of a captive insurance company to provide professional indemnity and employment practices insurance on a "claims made" basis. The estimate of the ultimate cost of claims can be difficult, as professional indemnity claims can be complex and take a number of years to resolve.

Health Insurance—We self-insure our health benefits for all U.S.-based employees, although we purchase stop loss coverage on an annual basis to limit our exposure. We self-insure because we believe that on the basis of our historic claims experience, the demographics of our workforce and trends in the health insurance industry, we incur reduced expense by self-insuring our health benefits as opposed to purchasing health insurance through a third party. We estimate our likely full-year cost at the beginning of the year and expense this cost on a straight-line basis throughout the year. In the fourth quarter, we estimate the required reserve for unpaid health costs we would need at year-end. Given the nature of medical claims, it may take up to 24 months for claims to be processed and recorded. The reserve balance for the 2011 program was \$11.5 million at December 31, 2011, and the reserve balance for the 2010 program was \$9.2 million at December 31, 2010.

Table of Contents

• **Workers' Compensation Insurance**—We have chosen to self-insure for worker's compensation insurance because our workforce has historically experienced fewer injuries than is normal for our industry. We purchase stop loss coverage to limit our exposure to large, individual claims. On a periodic basis we accrue using various state rates based on job classifications. On an annual basis in the third quarter, we engage in a comprehensive analysis using actual experience and current forecasts to adjust our workers' compensation reserves. We accrue the estimated adjustment to income for the differences between this estimate and our reserve. The credits taken to income for the years ended December 31, 2011, 2010 and 2009 were \$4.8 million, \$5.0 million and \$6.1 million, respectively. Our reserve for worker compensation insurance claims included in accrued compensation benefits was \$17.5 million and \$15.9 million at December 31, 2011 and 2010, respectively.

• **Captive Insurance Company**—In order to better manage our global insurance program and support our risk management efforts, we supplement our traditional insurance program by the use of a wholly-owned captive insurance company to provide professional indemnity and employment practices liability insurance coverage on a "claims made" basis. The level of risk retained by our captive is up to \$2.5 million per claim (dependent upon location) and up to \$12.5 million in the aggregate. The reserves for professional indemnity claims maintained by our captive insurance company, which relate to multiple years, were \$0.7 million and \$2.1 million, net of receivables from third party insurers, as of December 31, 2011 and 2010, respectively.

Professional indemnity insurance claims can be complex and take a number of years to resolve. Within our captive insurance company, we estimate the ultimate cost of these claims by way of specific claim reserves developed through periodic reviews of the circumstances of individual claims. With respect to the consolidated financial statements, when a potential loss event occurs, management estimates the ultimate cost of the claims and accrues the related cost when probable and estimable.

Fair Value of Financial Instruments

Fair value is a market-based measurement, not an entity-specific measurement, and should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, FASB guidance establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within levels one and two of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within level three of the hierarchy):

- Level 1. Observable inputs such as quoted prices in active markets;
- Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Our financial instruments include Cash and cash equivalents, Trade receivables, Accounts payable, Credit facilities and foreign currency exchange contracts. The estimated fair value of Cash and cash equivalents, Trade receivables, Notes and other receivable and Accounts payables approximates their carrying amounts due to the short maturity of these instruments. The estimated fair value of our revolving credit facility and short-term borrowings approximates their carrying value due to their variable interest rate terms.

We regularly use foreign currency forward contracts to manage our currency exchange rate risk related to intercompany lending and cash management practices. We determined the fair value of these contracts based on widely accepted valuation techniques. The inputs for these valuation techniques are Level 2 inputs in the fair value hierarchy. At December 31, 2011, we had forward exchange contracts in effect recorded as a current asset of \$4.2 million and a current liability of \$5.6 million. At December 31, 2010, we had forward exchange contracts in effect

recorded as a current asset of \$15.7 million and a current liability of \$2.4 million.

We maintain a deferred compensation plan for certain of our U.S. employees that allows them to defer portions of their compensation. The values of the assets and liabilities of this plan are determined based on the returns of certain mutual funds and other securities. The inputs for this valuation are primarily Level 2 inputs in the fair value hierarchy. This plan is recorded on our consolidated balance sheet at December 31, 2011 as Other long-term assets of \$39.1 million, Other long-term liabilities of \$46.7 million, and as a component of equity, Shares held in trust of (\$7.8 million).

Table of Contents

At December 31, 2011, we have no material recurring fair value measurements for financial assets and liabilities that are based on unobservable inputs (“Level 3 inputs”).

We review our investments in real estate ventures on a quarterly basis for indications of whether we may not be able to recover the carrying value of the real estate assets underlying our investments in real estate ventures and whether our investment in these co-investments is other than temporarily impaired. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. Our determination of fair value is based on a discounted cash flow approach using primarily Level 3 inputs.

Derivatives and Hedging Activities

As a firm, we do not enter into derivative financial instruments for trading or speculative purposes. However, in the normal course of business we do use derivative financial instruments in the form of forward foreign currency exchange contracts to manage selected foreign currency risks. At December 31, 2011, we had forward exchange contracts in effect with a gross notional value of \$1.7 billion (\$758.2 million on a net basis) with a net fair value loss of \$1.4 million. At December 31, 2010, we had forward exchange contracts in effect with a gross notional value of \$1.3 billion (\$542.5 million on a net basis) with a net fair value gain of \$13.3 million. We currently do not use hedge accounting for these contracts, which are marked-to-market each period with changes in unrealized gains or losses recognized in earnings and offset by foreign currency gains and losses on associated intercompany loans. We include the gains and losses on these forward foreign currency exchange contracts as a component of our overall net foreign currency gains and losses that are included in Operating, administrative and other expense.

We have considered the counterparty credit risk related to these forward foreign currency exchange contracts and do not deem any counterparty credit risk to be material at December 31, 2011.

Foreign Currency Translation

We prepare the financial statements of our subsidiaries located outside the United States using local currency as the functional currency. The assets and liabilities of these subsidiaries are translated to U.S. dollars at the rates of exchange at the balance sheet date with the resulting translation adjustments included in a separate component of equity (Other comprehensive income (loss)) and in the statement of operations (Other comprehensive income (loss)—foreign currency translation adjustments).

The \$33.8 million of Accumulated other comprehensive loss on our consolidated balance sheet at December 31, 2011, consists of net foreign currency translation gains of \$13.4 million and \$47.2 million of unrecognized losses on pensions plan recorded net of tax.

Income and expenses are translated at the average monthly rates of exchange. We include gains and losses from foreign currency transactions in net earnings as a component of Operating, administrative and other expense. Net foreign currency losses were \$1.6 million, \$4.1 million and \$3.5 million for the years ending December 31, 2011, 2010 and 2009, respectively.

The effects of foreign currency translation on cash and cash equivalents are reflected in cash flows from operating activities on the Consolidated Statements of Cash Flows.

Cash Held for Others

We manage significant amounts of cash and cash equivalents in our role as agent for our investment and property management clients. We do not include such amounts in our Consolidated Financial Statements.

Taxes Collected from Clients and Remitted to Governmental Authorities

We account for tax assessed by a governmental authority that is based on a revenue or transaction value (i.e., sales, use, and value added taxes) on a net basis, excluded from revenue, and recorded as current liability until paid.

Commitments and Contingencies

We are subject to various claims and contingencies related to lawsuits and taxes as well as commitments under contractual obligations. Many of these claims are covered under our current insurance programs, subject to deductibles. We recognize the liability associated with a loss contingency when a loss is probable and estimable. Our contractual obligations generally relate to the provision of services by us in the normal course of our business.

Table of Contents

See Note 12 for additional information on commitments and contingencies.

Earnings (Loss) Per Share; Net Income (Loss) Available to Common Shareholders

The difference between basic weighted average shares outstanding and diluted weighted average shares outstanding represents the dilutive impact of our common stock equivalents. Common stock equivalents consist primarily of shares to be issued under employee stock compensation programs and outstanding stock options whose exercise price was less than the average market price of our stock during these periods.

We calculate net income (loss) available to common shareholders by subtracting dividend-equivalents paid on outstanding but unvested shares of restricted stock units, net of tax, from net income (loss) attributable to the Company.

The following table details the calculations of basic and diluted earnings (loss) per common share (\$ in thousands, except share data) for each of the three years ended December 31, 2011, 2010 and 2009.

| | 2011 | 2010 | 2009 |
|--|------------|------------|------------|
| Net income (loss) attributable to the Company | \$ 164,384 | 153,902 | (3,595) |
| Dividends on unvested common stock, net of tax | 387 | 378 | 514 |
| Net income (loss) available to common shareholders | \$ 163,997 | 153,524 | (4,109) |
| Basic income (loss) per common share before dividends on unvested common stock | 3.81 | 3.64 | (0.09) |
| Dividends on unvested common stock, net of tax | (0.01) | (0.01) | (0.02) |
| Basic earnings (loss) per common share | \$3.80 | 3.63 | (0.11) |
| Basic weighted average shares outstanding | 43,170,383 | 42,295,526 | 38,543,087 |
| Dilutive impact of common stock equivalents: | | | |
| Outstanding stock options | 10,474 | 28,160 | — |
| Unvested stock compensation programs | 1,186,502 | 1,760,468 | — |
| Diluted weighted average shares outstanding | 44,367,359 | 44,084,154 | 38,543,087 |
| Diluted income (loss) per common share before dividends on unvested common stock | \$3.71 | 3.49 | (0.09) |
| Dividends on unvested common stock, net of tax | (0.01) | (0.01) | (0.02) |
| Diluted earnings (loss) per common share | \$3.70 | 3.48 | (0.11) |

The diluted weighted average shares outstanding for 2009 do not include the impact of outstanding stock options and unvested stock compensation programs because the effect of these items on diluted loss per common share would be anti-dilutive. The basic weighted average shares outstanding rose significantly in 2009 primarily due to the issuance of 6,500,000 shares of our common stock in June 2009.

NEW ACCOUNTING STANDARDS

Testing Goodwill for Impairment

In September 2011, the FASB issued ASU No. 2011-08, "Testing Goodwill for Impairment." ASU 2011-08 simplifies how entities test goodwill for impairment by permitting an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. We early adopted the provisions of ASU 2011-08 in the third quarter of 2011 in the performance of our annual impairment test of goodwill and determined that no indicators of impairment exist.

(3) BUSINESS SEGMENTS

We manage and report our operations as four business segments:

The three geographic regions of Real Estate Services (“RES”):

(1)Americas,

(2)Europe, Middle East and Africa (“EMEA”), and

(3)Asia Pacific;

and

(4) Investment Management, which offers investment management services on a global basis.

Each geographic region offers the full range of our Real Estate Services including agency leasing and tenant representation, capital markets and hotels, property management, facilities management, project and development management, energy management and sustainability, construction management, and advisory, consulting and valuation services.

The Investment Management segment provides investment management services to institutional investors and high-net-worth individuals.

Operating income (loss) represents total revenue less direct and indirect allocable expenses. We allocate all expenses, other than interest and income taxes, as nearly all expenses incurred benefit one or more of the segments. Allocated expenses primarily consist of corporate global overhead. We allocate these corporate global overhead expenses to the business segments based on the budgeted operating expenses of each segment.

For segment reporting we show equity earnings (losses) from real estate ventures within our revenue line, since it is a very integral part of our Investment Management segment. Our measure of segment operating results also excludes restructuring charges. The Chief Operating Decision Maker of Jones Lang LaSalle measures the segment results with equity in earnings (losses) from real estate ventures, and without restructuring charges. We define the Chief Operating Decision Maker collectively as our Global Executive Committee, which is comprised of our Global Chief Executive Officer, Global Chief Operating and Financial Officer and the Chief Executive Officers of each of our reporting segments.

Table of Contents

Summarized financial information by business segment for 2011, 2010 and 2009 are as follows (\$ in thousands):

We face restrictions in certain countries that limit or prevent the transfer of funds to other countries or the exchange of the local currency to other currencies.

Table of Contents

(4) BUSINESS COMBINATIONS, GOODWILL AND OTHER INTANGIBLE ASSETS

2011 Business Combinations Activity

In 2011, we paid \$251.8 million in total for (1) nine new acquisitions, (2) contingent earn-out consideration for acquisitions completed in prior years, and (3) an increase in ownership in our Indian operation from 80% to 90%. We also paid \$164.2 million to satisfy deferred business acquisition obligations, including \$150.0 million related to the 2008 Staubach acquisition and \$10.7 million related to the 2006 Spaulding and Slye acquisition.

In the first quarter of 2011, we completed two acquisitions in the Americas and one acquisition in EMEA. In the United States, we acquired Keystone Partners, a North Carolina-based integrated real estate services firm whose services include agency leasing, investment sales, project management, tenant representation, consulting and property management. We also acquired certain assets of Atlanta-based Primary Capital™ Advisors, which gives us the ability to operate as a Freddie Mac Program Plus® Seller/Service and allows us to originate, sell and service commercial mortgages. In Switzerland, we acquired a Zurich-based business that focuses on capital market transactions and valuations and serves many of our existing clients.

In the second quarter of 2011, we completed two acquisitions in EMEA and we increased the ownership of our Indian operation from 80% to 90%. In April, we completed the acquisition of Bradford McCormack & Associates, one of South Africa's leading corporate property service providers, increasing our capabilities across service lines in South Africa and neighboring countries. Effective May 31, 2011, we completed the acquisition of United Kingdom-based international property consultancy King Sturge. The King Sturge acquisition greatly enhances the strength and depth of our service capabilities and adds approximately 1,400 employees in the United Kingdom and across Europe.

In the third quarter of 2011, we completed two acquisitions. In August 2011, our Investment Management segment acquired Trinity Funds Management, an Australian property fund management business based in Brisbane, Australia, with approximately \$690 million of assets under management. Also in August, we acquired Procon, an Indonesian real estate services firm. The combination of Procon's operations with our Indonesian operations creates the largest real estate services company in Indonesia, with over 300 employees and offices in Jakarta, Bali and Surabaya.

In the fourth quarter of 2011, we completed the acquisitions of Pacific Real Estate Partners ("PREP") and DST International Property Services ("DST"). The PREP acquisition increases significantly our market presence in the U.S. Pacific Northwest, particularly in capital markets, agency leasing and tenant representation. In Singapore we acquired DST an agency specializing in the sale of properties in London, with extensive experience in selling international properties in the U.S., Australia and U.K.

Terms for the acquisitions completed in 2011 included (1) cash paid at closing of approximately \$239.7 million, (2) consideration subject only to the passage of time, which we recorded as deferred business acquisition obligations on our consolidated balance sheet at a current fair value of \$149.5 million, and (3) additional consideration subject to earn-out provisions that will be paid only if certain financial performance conditions are achieved, which we recorded in other short-term and long-term liabilities at their current estimated fair value of \$6.6 million.

Table of Contents

The following table shows total consideration for acquisitions completed in 2011 and the allocation of this consideration (\$ in thousands):

| | |
|--|-----------|
| Cash paid for 2011 acquisitions | \$239,657 |
| Cash paid for earn-outs on acquisitions completed in prior years | 12,130 |
| Deferred acquisition obligations | 149,521 |
| Earn-out liabilities | 6,598 |
| Total acquisition consideration | \$407,906 |
| Goodwill | 327,651 |
| Identifiable intangibles | 46,121 |
| Reduction in minority shareholder redemption liability | 17,058 |
| Net other assets acquired | 17,076 |
| | \$407,906 |

The initial purchase price allocation for the King Sturge acquisition is not yet complete. Terms of the acquisition agreement include a provision to make adjustments to the cash paid at closing for working capital and other assets based on a final agreed-upon set of accounts, which is still in process. We determined the fair value of deferred payments in the King Sturge acquisition based on a discount rate of 3.75%, an estimate of our borrowing rate over the five year deferred payment period.

The King Sturge acquisition resulted in \$265.0 million of goodwill and \$32.2 million of identifiable intangible assets, primarily the King Sturge trade name, customer relationships and acquired backlog that we anticipate that we will amortize over periods ranging from seven months to ten years, with a weighted average life of six years. We anticipate that we will finalize our valuation of assets acquired and liabilities assumed by the end of the first quarter of 2012.

2010 Business Combinations Activity

In 2010, we paid \$24.3 million for acquisition related activity including (1) \$9.0 million to purchase a portion of the minority interest in our Indian operations, (2) \$10.9 million for contingent earn-out payments for acquisitions completed in prior years recorded as an increase to goodwill, and (3) \$4.4 million for a new acquisition and various other acquisition-related activities. We also paid \$105.8 million to satisfy deferred business acquisition obligations, including \$77.9 million related to the 2008 Staubach acquisition and \$14.0 million related to the 2006 Spaulding and Slye acquisition.

In the third quarter of 2010, we acquired certain U.S. mall management operations from General Growth Properties, Inc. consisting of the management and leasing contracts for a portfolio of 18 regional shopping malls and community centers in 11 states, totaling more than 11 million square feet. This acquisition resulted in \$1.5 million of goodwill and \$3.3 million of identifiable intangibles that will be amortized over four years. We also recognized a liability of \$4.3 million for contingent consideration that will be paid if certain revenue targets are achieved; the maximum contingent consideration payable is \$4.5 million.

Earn-out Payments

At December 31, 2011, we had the potential to make earn-out payments on 14 acquisitions that are subject to the achievement of certain performance conditions. The maximum amount of the potential earn-out payments for these acquisitions was \$156.6 million at December 31, 2011. We anticipate that the majority of these amounts will come due at various times over the next three years assuming the achievement of the applicable performance conditions.

Approximately \$144.3 million of these potential earn-out payments are the result of acquisitions completed prior to the adoption of the fair value requirements for contingent consideration under ASC 805, "Business Combinations," and

thus will be recorded as additional purchase consideration if and when paid. Changes in the estimated fair value of the remaining \$12.3 million of potential earn-out payments will result in increases or decreases in Operating, administration and other expenses in our results of operations.

Table of Contents

Goodwill and Other Intangible Assets

We have \$1.8 billion of unamortized intangibles and goodwill as of December 31, 2011. A significant portion of these unamortized intangibles and goodwill are denominated in currencies other than U.S. dollars, which means that a portion of the movements in the reported book value of these balances are attributable to movements in foreign currency exchange rates. The tables below detail the foreign exchange impact on intangible and goodwill balances. Of the \$1.8 billion of unamortized intangibles and goodwill, we will amortize the \$44.0 million of identifiable intangibles over their remaining finite useful lives, and the remaining balance represents goodwill with indefinite useful lives, which we do not amortize.

The following table sets forth, by reporting segment, the current year movements in goodwill with indefinite useful lives (\$ in thousands):

| | REAL ESTATE SERVICES | | ASIA INVESTMENT MANAGEMENT | | CONSOLIDATED |
|-----------------------------------|----------------------|----------|----------------------------|--------|--------------|
| | AMERICAS | EMEA | PACIFIC | ASIA | |
| Balance as of January 1, 2010 | \$ 893,884 | 344,638 | 184,885 | 18,544 | 1,441,951 |
| Additions | 2,100 | 12,932 | 411 | — | 15,443 |
| Impact of exchange rate movements | 1,315 | (21,471) | 7,846 | (376) | (12,686) |
| Balance as of December 31, 2010 | \$ 897,299 | 336,099 | 193,142 | 18,168 | 1,444,708 |
| Additions | 25,368 | 276,750 | 24,872 | 661 | 327,651 |
| Impact of exchange rate movements | (366) | (20,215) | (580) | 9 | (21,152) |
| Balance as of December 31, 2011 | \$ 922,301 | 592,634 | 217,434 | 18,838 | 1,751,207 |

We anticipate being able to amortize and deduct for tax purposes \$306.6 million and \$2.1 million of the additions to goodwill in 2011 and 2010, respectively.

Table of Contents

The following table sets forth, by reporting segment, the movements in the gross carrying amount and accumulated amortization of our intangibles with finite useful lives (\$ in thousands):

| | REAL ESTATE SERVICES | | | | | CONSOLIDATED |
|-----------------------------------|----------------------|----------|------------|------------|------------|--------------|
| | AMERICAS | EMEA | MANAGEMENT | INVESTMENT | MANAGEMENT | |
| Gross Carrying Amount | | | | | | |
| Balance as of January 1, 2010 | \$ 80,269 | 16,309 | 11,510 | 125 | | 108,213 |
| Additions | 3,300 | - | - | - | | 3,300 |
| Impact of exchange rate movements | (91) | (969) | 229 | 17 | | (814) |
| Balance as of December 31, 2010 | \$ 83,478 | 15,340 | 11,739 | 142 | | 110,699 |
| Additions | 3,612 | 32,373 | 707 | 9,429 | | 46,121 |
| Impact of exchange rate movements | (13) | (3,606) | (27) | (783) | | (4,429) |
| Balance as of December 31, 2011 | \$ 87,077 | 44,107 | 12,419 | 8,788 | | 152,391 |
| Accumulated Amortization | | | | | | |
| Balance as of January 1, 2010 | \$ (50,501) | (14,488) | (6,308) | (125) | | (71,422) |
| Amortization expense | (6,687) | (1,370) | (2,895) | - | | (10,952) |
| Impact of exchange rate movements | (12) | 910 | (181) | (17) | | 700 |
| Balance as of December 31, 2010 | \$ (57,200) | (14,948) | (9,384) | (142) | | (81,674) |
| Amortization expense | (7,498) | (11,870) | (1,537) | - | | (20,905) |
| Impact of exchange rate movements | 36 | 2,714 | 34 | (6) | | 2,778 |
| Balance as of December 31, 2011 | \$ (64,662) | (24,104) | (10,887) | (148) | | (99,801) |
| Net book value December 31, 2011 | \$ 22,415 | 20,003 | 1,532 | 8,640 | | 52,590 |

We amortize our intangible assets with finite lives on a straight-line basis over their useful lives. The remaining weighted average amortization period of these intangible assets is 3.1 years and the remaining estimated future amortization expense for our intangibles with finite useful lives is as follows at December 31, 2011 (\$ in millions):

| | |
|------------|--------|
| 2012 | \$12.5 |
| 2013 | 7.5 |
| 2014 | 6.7 |
| 2015 | 5.7 |
| 2016 | 2.4 |
| Thereafter | 9.2 |
| Total | \$44.0 |

Table of Contents**(5) INVESTMENTS IN REAL ESTATE VENTURES**

As of December 31, 2011, we had total investments in real estate ventures of \$224.9 million that we account for primarily under the equity method of accounting. Starting in 2011, we have elected the fair value option for certain of our investments made in 2011. Our investments are primarily investments in approximately 40 separate property or fund co-investments for which we also have an advisory agreement. Our ownership percentages in these co-investments range from less than 1% to approximately 10%.

We utilize two investment vehicles to facilitate the majority of our co-investment activity. LaSalle Investment Company I (“LIC I”) is a series of four parallel limited partnerships which serve as our investment vehicle for substantially all co-investment commitments made through December 31, 2005. LIC I is fully committed to underlying real estate ventures. At December 31, 2011, our maximum potential unfunded commitment to LIC I is euro 7.5 million (\$9.6 million). LaSalle Investment Company II (“LIC II”), formed in January 2006, is comprised of two parallel limited partnerships which serve as our investment vehicle for most new co-investments. At December 31, 2011, LIC II has unfunded capital commitments to the underlying funds for future funding of co-investments of \$193.2 million, of which our 48.78% share is \$94.2 million. The \$94.2 million commitment is part of our maximum potential unfunded total commitment to LIC II at December 31, 2011 of \$266.7 million.

LIC I and LIC II invest in certain real estate ventures that own and operate commercial real estate. We have an effective 47.85% ownership interest in LIC I, and an effective 48.78% ownership interest in LIC II; primarily institutional investors hold the remaining 52.15% and 51.22% interests in LIC I and LIC II, respectively. We account for our investments in LIC I and LIC II under the equity method of accounting in the accompanying consolidated financial statements. Additionally, a non-executive Director of Jones Lang LaSalle is an investor in LIC I on equivalent terms to other investors.

LIC I’s and LIC II’s exposures to liabilities and losses of the ventures are limited to their existing capital contributions and remaining capital commitments. We expect that LIC I will draw down on our commitment over the next one to two years to satisfy its existing commitments to underlying funds, and we expect that LIC II will draw down on our commitment over the next four to eight years as it enters into new commitments. Our Board of Directors has endorsed the use of our co-investment capital in particular situations to control existing real estate assets or portfolios to seed future investments within LIC II. The purpose is to accelerate capital raising and growth in assets under management. Approvals for such activity are handled consistently with those of the firm’s co-investment capital.

As of December 31, 2011, LIC II maintains a \$60.0 million revolving credit facility (the “LIC II Facility”), principally for working capital needs. The LIC II Facility contains a credit rating trigger and a material adverse condition clause. If either of the credit rating trigger or the material adverse condition clauses becomes triggered, the facility would be in default and outstanding borrowings would need to be repaid. Such a condition would require us to fund our pro-rata share of the then outstanding balance on LIC II, which is the limit of our liability. The maximum exposure to Jones Lang LaSalle, assuming that the LIC II Facility was fully drawn, would be \$29.3 million. The exposure is included within and cannot exceed our maximum potential unfunded commitment to LIC II of \$266.7 million. As of December 31, 2011, LIC II had \$29.2 million of outstanding borrowings on the facility.

The following table summarizes the discussion above relative to LIC I and LIC II at December 31, 2011 (\$ in millions):

| | LIC I | LIC II |
|---|---------|----------|
| Our effective ownership interest in co-investment vehicle | 47.85 % | 48.78 % |
| | \$ 9.6 | \$ 266.7 |

| | | |
|---|-----|------|
| Our maximum potential unfunded commitments | | |
| Our share of unfunded capital commitments to underlying funds | 9.2 | 94.2 |
| Our maximum exposure assuming facilities are fully drawn | N/A | 29.3 |
| Our share of exposure on outstanding borrowings | N/A | 14.2 |

Table of Contents

Exclusive of our LIC I and LIC II commitment structures, we have potential obligations related to unfunded commitments to other real estate ventures, the maximum of which is \$7.6 million as of December 31, 2011.

As of December 31, 2011, \$22.3 million of our \$224.9 million of investments in real estate ventures were in entities classified as variable interest entities (“VIEs”) that we analyzed for potential consolidation under ASU 2009-17. We evaluated each of these VIEs to determine whether we might have the power to direct the activities that most significantly impact the entity’s economic performance. We determined that the key activities for each of these VIEs include purchasing, leasing, approving annual operating budgets, directing day-to-day operating activities, and selling of real estate properties. In each case, we determined that we either (a) did not have the power to direct the key activities or (b) shared power with investors, lenders, or other actively-involved third parties in directing such activities. Additionally, our exposure to loss in these VIEs is limited to the amount of our investment in the entities. Therefore, we concluded that we would not be deemed to (i) have a controlling financial interest in or (ii) be the primary beneficiary of these VIEs. Accordingly, we do not consolidate these VIEs in our consolidated financial statements.

The following table summarizes the combined financial information for the unconsolidated ventures (including those held via LIC I and LIC II) accounted for under the equity method of accounting (\$ in millions):

| | 2011 | 2010 | 2009 |
|---|-------------|----------|------------|
| Balance Sheet: | | | |
| Investments in real estate, net of depreciation | \$ 15,611.7 | 15,333.9 | 18,471.0 |
| Total assets | 18,672.6 | 17,800.2 | 20,969.0 |
| Mortgage indebtedness | 10,106.5 | 10,366.0 | 11,936.6 |
| Other borrowings | 242.7 | 525.5 | 504.1 |
| Total liabilities | 11,698.5 | 12,192.1 | 14,079.6 |
| Total equity | \$ 6,974.1 | 5,608.1 | 6,889.4 |
| Statements of Operations: | | | |
| Revenue | \$ 1,693.7 | 1,691.0 | 1,644.8 |
| Net income (loss) | 73.5 | (361.8) | (2,888.7) |

Impairment

We review our investments in real estate ventures on a quarterly basis for indications of (i) whether the carrying value of the real estate assets underlying our investments in real estate ventures may not be recoverable or (ii) whether our investment in these co-investments is other than temporarily impaired. When events or changes in circumstances indicate that the carrying amount of a real estate asset underlying one of our investments in real estate ventures may be impaired, we review the recoverability of the carrying amount of the real estate asset in comparison to an estimate of the future undiscounted cash flows expected to be generated by the underlying asset. When the carrying amount of the real estate asset is in excess of the future undiscounted cash flows, we use a discounted cash flow approach to determine the fair value of the asset in computing the amount of the impairment. Additionally, we consider a number of factors, including our share of co-investment cash flows and the fair value of our co-investments, in determining whether or not our investment is other than temporarily impaired.

For investments in real estate ventures for which the fair value option has been elected, we maintain an investment account which is increased or decreased each reporting period by the difference between the fair value of the investment and the carrying value at the balance sheet date. The adjustment to our investment balance is reflected as an unrealized gain or loss in our consolidated statement of operations within Equity in earnings (losses) from real estate ventures. For the year ended December 31, 2011, an unrealized gain of \$0.4 million is included in Equity in earnings (losses).

Equity earnings (losses) included impairment charges of \$5.6 million, \$13.6 million, and \$51.2 million for the years ended December 31, 2011, 2010 and 2009, respectively, representing our equity share of the impairment charges against individual assets held by our real estate ventures. Over time, declines in real estate markets have adversely impacted our rental income assumptions and forecasted exit capitalization rates, resulting in our determination that certain real estate investments had become impaired. It is reasonably possible that if real estate values decline we may incur impairment charges on our investments in real estate ventures in future periods.

Table of Contents**(6) STOCK COMPENSATION PLANS**

The Jones Lang LaSalle Amended and Restated Stock Award and Incentive Plan (“SAIP”) provides for the granting of various stock awards to eligible employees of Jones Lang LaSalle. Such awards include restricted stock units and options to purchase a specified number of shares of common stock, although we have not granted stock options since 2003. There were approximately 1.9 million shares available for grant under the SAIP at December 31, 2011.

Share-based compensation expense is included within Compensation and benefits expense in our Consolidated Statements of Operations. Share-based compensation expense for the years ended December 31, 2011, 2010 and 2009 consisted of the following (\$ in thousands):

| | 2011 | 2010 | 2009 |
|------------------|-----------|--------|--------|
| Restricted stock | | | |
| unit awards | \$ 33,915 | 41,166 | 45,870 |
| UK SAYE | 726 | 768 | 745 |
| | \$ 34,641 | 41,934 | 46,615 |

We amortize the fair value of share-based compensation on a straight-line basis over the associated vesting periods for each separately vesting portion of an award. Employees age 55 or older, with a sum of age plus years of service with the Company which meets or exceeds 65, are eligible to be considered for receipt of retirement benefits upon departure from the Company. These criteria trigger application of certain provisions of ASC Topic 718, “Compensation – Stock Compensation,” whereby compensation expense for restricted stock unit awards granted to employees meeting this criteria are accelerated such that all expense is recognized by the time that these employees meet the criteria to be considered for retirement eligibility.

Restricted Stock Unit Awards

Restricted stock activity in 2011 was as follows:

| | SHARES (THOUSANDS) | WEIGHTED AVERAGE GRANT DATE FAIR VALUE | WEIGHTED AVERAGE REMAINING VESTING PERIOD | AGGREGATE INTRINSIC VALUE (\$ IN MILLIONS) |
|-------------------------------------|-----------------------|---|---|---|
| Unvested at January 1, 2011 | 2,086.0 | \$ 50.48 | | |
| Granted | 425.0 | 88.25 | | |
| Vested | (1,102.3) | 45.10 | | |
| Forfeited | (42.8) | 58.38 | | |
| Unvested at December 31, 2011 | 1,365.9 | \$ 66.33 | 1.88 years | \$ 71.9 |
| Unvested shares expected to vest | 1,327.1 | \$ 66.21 | 1.88 years | \$ 69.9 |

We determine the fair value of restricted stock units based on the market price of the Company’s common stock on the grant date. As of December 31, 2011, there was \$30.8 million of remaining unamortized deferred compensation related to unvested restricted stock units. The remaining cost of unvested restricted stock units granted through December 31, 2011 will be recognized over varying periods through 2016.

Shares vested during the years ended December 31, 2011, 2010 and 2009 had grant date fair values of \$49.7 million, \$53.9 million and \$54.0 million, respectively.

Stock Option Awards

We have granted stock options at the market value of our common stock on the date of grant. Our options vested at such times and conditions as the Compensation Committee of our Board of Directors determined and set forth in the related award agreements; the most recent options, granted in 2003, vested over periods of up to five years. As a result of a change in compensation strategy, we do not currently use stock option grants as part of our employee compensation program.

Table of Contents

As of December 31, 2011, we have approximately 10,000 options outstanding with a weighted average price of \$18.73, all of which vested prior to 2009.

Options exercised during the years ended December 31, 2011, 2010 and 2009 totaled approximately 17,000, 23,700 and 36,100, having an intrinsic value of \$1.3 million, \$1.6 million and \$1.4 million, respectively. As a result of these exercises, we received cash of \$0.3 million, \$0.4 million and \$0.9 million, respectively.

Other Stock Compensation Programs

U.S. Employee Stock Purchase Plan—In 1998, we adopted an Employee Stock Purchase Plan (“ESPP”) for eligible U.S.-based employees. Through March 31, 2009, we enhanced employee contributions for stock purchases through an additional contribution of a 5% discount on the purchase price as of the end of each three month program period. Effective April 1, 2009, the 5% discount has been discontinued, program periods are now one month in length, and purchases are broker-assisted on the open market. We do not record any compensation expense with respect to this program.

U.K. SAYE—The Jones Lang LaSalle Savings Related Share Option (U.K.) Plan (“Save As You Earn” or “SAYE”) for eligible employees of our U.K. and Irish operations. Under the SAYE plan, employees make an election to contribute to the plan in order that their savings might be used to purchase stock at a 15% discount provided by the Company. The options to purchase stock with such savings vest over a period of three or five years. There were approximately 781,000 shares available for grant under the SAYE plan at December 31, 2011.

Options granted to our U.K.-based employees for the years ended December 31, 2011, 2010 and 2009 are as follows:

| | 2011 | 2010 | 2009 |
|-----------------|----------|--------|---------|
| Options granted | 17,000 | 31,000 | 326,000 |
| Exercise price | \$ 83.72 | 52.21 | 19.47 |

The fair values of options granted under the SAYE plan are amortized over their respective vesting periods. At December 31, 2011 there were 310,349 options outstanding under the SAYE plan.

(7) RETIREMENT PLANS**Defined Contribution Plans**

We have a qualified profit sharing plan that incorporates United States Internal Revenue Code Section 401(k) for our eligible U.S. employees. We make employer match contributions under this qualified profit sharing plan that are included in the accompanying consolidated statements of operations. For the years ended December 31, 2011, 2010 and 2009 our employer contributions were \$12.3 million, \$11.4 million and \$10.4 million, respectively. Related trust assets of the Plan are managed by trustees and are excluded from the accompanying consolidated financial statements.

We maintain several defined contribution retirement plans for our eligible non-U.S. employees. Our contributions to these plans were approximately \$15.0 million, \$14.0 million and \$15.5 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Defined Benefit Plans

We maintain five contributory defined benefit pension plans in the United Kingdom (U.K.), Ireland and the Netherlands to provide retirement benefits to eligible employees. With the second quarter 2011 acquisition of King Sturge we acquired another defined benefit plan in the United Kingdom. It is our policy to fund the minimum annual contributions required by applicable regulations. We use a December 31st measurement date for our plans.

Table of Contents

Net periodic pension cost for the years ended December 31, 2011, 2010 and 2009 consisted of the following (\$ in thousands):

| | 2011 | 2010 | 2009 |
|---|----------|----------|---------|
| Employer service cost—benefits earned during the year | \$ 3,853 | 2,653 | 2,747 |
| Interest cost on projected benefit obligation | 13,590 | 10,196 | 9,078 |
| Expected return on plan assets | (16,826) | (11,738) | (9,841) |
| Net amortization/deferrals | 1,450 | 1,409 | 211 |
| Recognized actuarial loss | 584 | 153 | 60 |
| Net periodic pension cost | \$ 2,651 | 2,673 | 2,255 |

The following tables provide reconciliations of projected benefit obligations and plan assets (the net of which is our funded status), as well as the funded status and accumulated benefit obligations, of our defined benefit pension plans as of December 31, 2011 and 2010 (\$ in thousands):

| | | |
|---|------------|---------|
| Change in benefit obligation: | 2011 | 2010 |
| Projected benefit obligation at beginning of year | \$ 199,604 | 188,327 |
| Service cost | 3,853 | 2,653 |
| Interest cost | 13,590 | 10,196 |
| Plan participants' contributions | 828 | 588 |
| Benefits paid | (5,294) | (4,412) |
| Actuarial loss | 5,214 | 11,287 |
| King Sturge Acquisition | 83,439 | - |
| Changes in currency translation rates | (5,946) | (7,697) |
| Other | (1,043) | (1,338) |
| Projected benefit obligation at end of year | \$ 294,245 | 199,604 |
| Change in plan assets: | 2011 | 2010 |
| Fair value of plan assets at beginning of year | \$ 195,583 | 181,449 |
| Actual return on plan assets | (653) | 19,819 |
| Plan contributions | 20,619 | 7,581 |
| Benefits paid | (5,294) | (4,412) |
| King Sturge Acquisition | 73,339 | - |
| Changes in currency translation rates | (5,242) | (7,516) |
| Other | (1,340) | (1,338) |
| Fair value of plan assets at end of year | 277,012 | 195,583 |
| Funded status and net amount recognized | (17,233) | (4,021) |
| Accumulated benefit obligation at end of year | \$ 290,344 | 197,584 |

The accumulated benefit obligation was calculated based on the actuarial present value of the vested benefits to which employees are entitled if they terminate their employment immediately.

Table of Contents

Defined benefit pension plan amounts recognized in the accompanying Consolidated Balance Sheets as of December 31, 2011 and 2010 include the following (\$ in thousands):

| | 2011 | 2010 |
|--------------------------------------|------------|---------|
| Pension liabilities | \$(17,233) | (5,031) |
| Other noncurrent assets | - | 1,010 |
| Accumulated other comprehensive loss | 58,710 | 38,818 |
| Net amount recognized | \$41,477 | 34,797 |

Amounts in accumulated other comprehensive income yet to be recognized as components of net periodic pension cost are comprised of \$57.5 million of actuarial losses and \$1.2 million of prior service cost as of December 31, 2011. We anticipate that \$2.2 million of this accumulated other comprehensive loss will be recognized as net periodic pension cost in 2012.

The ranges of assumptions we used in developing the projected benefit obligation as of December 31 and in determining net periodic benefit cost for the years ended December 31 were as follows:

| | 2011 | 2010 | 2009 |
|--|----------------|----------------|----------------|
| Discount rate used in determining present values | 4.70% to 5.70% | 5.35% to 6.00% | 5.70% to 6.20% |
| Annual increase in future compensation levels | 2.00% to 3.40% | 2.00% to 4.85% | 2.00% to 5.00% |
| Expected long-term rate of return on assets | 5.40% to 7.00% | 3.30% to 7.00% | 3.30% to 6.98% |

The discount rate assumptions used for these pension plans were based on the yield of investment grade bonds with durations consistent with the liabilities of these plans.

Plan assets consist of diversified portfolios principally comprised of equity and debt securities. The investments and investment policies of these defined benefit plans are controlled by trusts. The investment objective of these trusts is to invest plan assets in such a manner that members' benefit entitlements can be paid when they come due. Plan assets are invested with a long-term focus to achieve a return on investment that is based on levels of liquidity and investment risk that the trustees, in consultation with the Company's management, believe are prudent and reasonable. These trusts set investment target allocations, but generally are not prohibited by the Company from investing in certain types of assets. The pension plan assets held no derivative instruments at December 31, 2011.

The fair value of plan assets of the U.K. and Irish plans was determined using quoted market prices, Level 1 inputs, and significantly observable inputs, Level 2 inputs. The fair value of plan assets at December 31, 2011 determined using Level 1 inputs was \$222.1 million and Level 2 inputs was \$38.3 million. The expected long-term rate of return on these assets is based on historical trends for similar asset classes, as well as current economic conditions.

The Company's defined benefit plan in the Netherlands has its assets invested with a third party insurance company that guarantees the payments of benefits earned under this plan. The fair values of the plan assets for this plan were \$16.6 million and \$15.1 million at December 31, 2011 and 2010, respectively. The valuation of these assets was determined by the third party insurance company and is a Level 3 valuation.

Table of Contents

The allocation of pension plan assets at December 31, 2011 and 2010 is as follows:

| | 2011 | | 2010 | |
|----------------------|------|---|------|---|
| Equity securities | | | | |
| U.K. equities | 16 | % | 24 | % |
| Non-U.K. equities | 30 | % | 24 | % |
| Debt securities | | | | |
| Corporate bonds | 39 | % | 42 | % |
| Government and other | 5 | % | 1 | % |
| Cash & Other | 10 | % | 9 | % |
| | 100 | % | 100 | % |

The actual asset allocation at December 31, 2011 approximates the plan's target asset allocation percentages.

Future contributions and payments — We expect to contribute \$11.1 million to our defined benefit pension plans in 2012. Additionally, the following pension benefit payments, which reflect expected future service, as appropriate, are expected to be paid (\$ in millions):

| | PENSION BENEFIT PAYMENTS | |
|---------|-----------------------------|------|
| 2012 | \$ | 5.8 |
| 2013 | | 6.1 |
| 2014 | | 6.4 |
| 2015 | | 6.7 |
| 2016 | | 6.7 |
| 2017 to | | |
| 2022 | \$ | 38.0 |

(8) INCOME TAXES

For the years ended December 31, 2011, 2010 and 2009, our provision for income taxes consisted of the following (\$ in thousands):

| | 2011 | 2010 | 2009 |
|------------------|-----------|----------|----------|
| U.S. Federal: | | | |
| Current | \$ 2,702 | 3,255 | 2,431 |
| Deferred | 22,598 | (1,143) | (33,209) |
| | 25,300 | 2,112 | (30,778) |
| State and Local: | | | |
| Current | 643 | 775 | 579 |
| Deferred | 5,380 | (272) | (7,906) |
| | 6,023 | 503 | (7,327) |
| International: | | | |
| Current | 64,554 | 59,114 | 31,273 |
| Deferred | (39,490) | (12,691) | 12,509 |
| | 25,064 | 46,423 | 43,782 |
| Total | \$ 56,387 | 49,038 | 5,677 |

In 2011, 2010 and 2009 our current tax expense was reduced by \$22.7 million, \$35.8 million, and \$5.0 million, respectively, due to the utilization of prior years' net operating loss carryovers.

Table of Contents

Income tax expense for 2011, 2010, and 2009 differed from the amounts computed by applying the U.S. federal income tax rate of 35% to earnings before provision for income taxes as a result of the following (\$ in thousands):

| | 2011 | | 2010 | | 2009 | |
|---|----------|----------|----------|----------|----------|-----------|
| Computed "expected" tax expense | \$77,699 | 35.0 % | \$71,217 | 35.0 % | \$882 | 35.0 % |
| Increase (reduction) in income taxes resulting from: | | | | | | |
| State and local income taxes, net of federal income tax benefit | 4,089 | 1.8 % | 1,659 | 0.8 % | (949) | (37.7 %) |
| Amortization of goodwill and other intangibles | (1,131) | (0.5 %) | (1,183) | (0.6 %) | (1,247) | (49.5 %) |
| Nondeductible expenses | 680 | 0.3 % | 898 | 0.4 % | 720 | 28.6 % |
| International earnings taxed at varying rates | (29,174) | (13.1 %) | (32,779) | (16.1 %) | (22,056) | (872.8 %) |
| Valuation allowances | 3,152 | 1.4 % | 5,722 | 2.8 % | 19,341 | 767.8 % |
| Return to provision adjustment | (2,946) | (1.3 %) | (75) | 0.0 % | 5,352 | 212.5 % |
| Other, net | 4,018 | 1.8 % | 3,579 | 1.8 % | 3,634 | 141.5 % |
| | \$56,387 | 25.4 % | \$49,038 | 24.1 % | \$5,677 | 225.4 % |

For the years ended December 31, 2011, 2010, and 2009 our income (loss) before taxes from domestic (U.S.) and international sources is as follows (\$ in thousands):

| | 2011 | 2010 | 2009 |
|---------------|------------|---------|-----------|
| Domestic | \$ 97,469 | 36,836 | (103,789) |
| International | 124,530 | 166,641 | 106,308 |
| Total | \$ 221,999 | 203,477 | 2,519 |

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are presented below (\$ in thousands):

| | 2011 | 2010 | 2009 |
|---|-----------|-----------|-----------|
| Deferred tax assets attributable to: | | | |
| Accrued expenses | \$84,575 | 116,928 | 115,363 |
| U.S. federal and state loss carryforwards | 84,716 | 59,093 | 68,941 |
| Allowances for uncollectible accounts | 6,225 | 4,206 | 6,875 |
| International loss carryforwards | 125,121 | 61,144 | 55,737 |
| Property and equipment | — | 6,723 | 11,050 |
| Investments in real estate ventures | 32,588 | 43,384 | 46,605 |
| Pension liabilities | 19,399 | 16,946 | 10,400 |
| Other | 330 | 7,567 | 1,583 |
| | \$352,954 | 315,991 | 316,554 |
| Less valuation allowances | (38,797) | (35,641) | (40,048) |
| | \$314,157 | 280,350 | 276,506 |
| Deferred tax liabilities attributable to: | | | |
| Property and equipment | \$9,873 | — | — |
| Intangible assets | 74,836 | 65,974 | 52,398 |
| Income deferred for tax purposes | 2,980 | 2,008 | 2,073 |
| Other | — | — | 4,210 |
| | \$87,689 | 67,982 | 58,681 |

Table of Contents

We have not provided a deferred U.S. tax liability on the unremitted earnings of international subsidiaries because it is our intent to permanently reinvest such earnings outside of the United States. If repatriation of all such earnings were to occur, and if we were unable to utilize foreign tax credits due to the limitations of U.S. tax law, we estimate our maximum resulting U.S. tax liability would be \$131 million, net of the benefits of utilization of U.S. federal and state carryovers.

As of December 31, 2011, the Company had an available U.S. net operating loss carryback and carryforward of \$165.2 million which will begin to expire in 2029; U.S. state net operating loss carryforwards of \$19.2 million, which expire at various dates through 2026; and international net operating loss carryforwards of \$453.9 million, which begin to expire in 2012. The change in deferred tax balances for net operating loss carryovers from 2010 to 2011 includes increases from return-to-provision adjustments and decreases from 2011 estimated utilization.

As of December 31, 2011, we believe it is more likely than not that the net deferred tax asset of \$226.5 million will be realized based upon our estimates of future income and the consideration of net operating losses, earnings trends and tax planning strategies. Valuation allowances have been provided with regard to the tax benefit of certain international net operating loss carryforwards, for which we have concluded that recognition is not yet appropriate under ASC Topic 740, "Income Taxes." In 2011, we reduced valuation allowances by \$6.1 million on some jurisdictions' net operating losses due to the utilization or expiration of those losses, and we increased valuation allowances by \$9.3 million for other jurisdictions based upon circumstances that caused us to establish or continue to provide valuation allowances on current or prior year losses in addition to those provided in prior years.

As of December 31, 2011, our net current liability for income tax was \$82.6 million.

The Company or one of its subsidiaries files income tax returns in the United States including 45 states and 19 cities and the District of Columbia and Puerto Rico, the United Kingdom including England and Scotland, Australia, Germany, The Peoples' Republic of China including Hong Kong and Macau, France, Japan, Singapore, India, The Netherlands, and Spain as well as 59 other countries. Generally, the Company's open tax years include those from 2007 to the present, although reviews of taxing authorities for more recent years have been completed or are in process in a number of jurisdictions.

Tax examinations or other reviews were completed during 2011 in France; Germany; Russia; Hong Kong; Philippines; Hungary; Guangzhou; Ireland; and the United States. As of December 31, 2011, the Company is under examination in Ukraine; India; Indonesia; Singapore; Thailand; the United Kingdom; Korea; Hong Kong; the Philippines; Germany; the United States; and the State of Illinois.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for 2011 is as follows (\$ in millions):

| | |
|--|--------|
| Balance at January 1, 2011 | \$93.4 |
| Additions based on tax positions related to the current year | 9.6 |
| Decrease for tax positions of prior years | (1.5) |
| Reductions for use of reserves | (3.4) |
| Settlements | (4.0) |

| | |
|---------------------------------|--------|
| Lapse of statute of limitations | (0.7) |
| Balance at December 31, 2011 | \$93.4 |

The Company believes it is reasonably possible that \$62.1 million of gross unrecognized tax benefits will be settled within twelve months after December 31, 2011. This may occur due to the conclusion of an examination by tax authorities. The Company further expects that the amount of unrecognized tax benefits will continue to change as the result of ongoing operations, the outcomes of audits, and the passing of statutes of limitations. We do not expect this change to have a significant impact on the results of operations or the financial position of the Company. We do not believe that we have material tax positions for which the ultimate deductibility is highly certain, but there is uncertainty about the timing of such deductibility.

Table of Contents

The Company recognizes interest accrued and penalties, if any, related to income taxes as a component of income tax expense. During the years ended December 31, 2011, 2010, and 2009, the company recognized approximately \$1.9 million, \$2.0 million, and \$3.5 million, respectively, in interest and no penalties. The Company had approximately \$10.2 million and \$8.3 million for the payment of interest accrued at December 31, 2011 and 2010, respectively.

(9) DEBT

In June 2011, we amended our credit facility (the "Facility") to, among other things: (1) reset pricing, (2) terminate the \$195 million term loan portion of the Facility, (3) increase the \$900 million revolving loan to \$1.1 billion, (4) extend the maturity to June 2016 and (5) permit the add-back of certain integration and retention costs associated with King Sturge and other acquisitions to the adjusted EBITDA and EBIT that are used in certain credit facility calculations. Currently, there are 18 banks participating in the Facility and the Facility remains unsecured. As of December 31, 2011, we had \$463.0 million outstanding on the Facility. The average outstanding borrowings under the Facility were \$467.2 million during the twelve months ended December 31, 2011.

In addition to our Facility, we have the capacity to borrow up to an additional \$47.0 million under local overdraft facilities. At December 31, 2011 we had short-term borrowings (including capital lease obligations and local overdraft facilities) of \$65.1 million outstanding, of which \$38.7 million was attributable to local overdraft facilities.

Pricing on the Facility ranges from LIBOR plus 112.5 basis points to LIBOR plus 225.0 basis points. As of December 31, 2011, pricing on the Facility was LIBOR plus 162.5 basis points. The effective interest rate on our debt was 1.8% in 2011, compared with 3.7% in 2010.

Under the Facility, we must maintain a leverage ratio not exceeding 3.50 to 1 through September 2013 and 3.25 to 1 thereafter, and a minimum cash interest coverage ratio of 3.00 to 1.

Included in debt for the calculation of the leverage ratio is the present value of deferred business acquisition obligations and included in Adjusted EBITDA (as defined in the Facility) are, among other things, (1) an add-back for stock compensation expense, (2) the addition of the EBITDA of acquired companies earned prior to acquisition, as well as (3) add-backs for certain impairment and non-recurring charges. In addition, we are restricted from, among other things, incurring certain levels of indebtedness to lenders outside of the Facility and disposing of a significant portion of our assets. Lender approval or waiver is required for certain levels of cash acquisitions and co-investment. The deferred business acquisition obligation provisions of the Staubach Merger Agreement also contain certain conditions which are considerably less restrictive than those we have under our Facility. We remain in compliance with all covenants as of December 31, 2011.

We will continue to use the Facility for working capital needs (including payment of accrued incentive compensation), co-investment activities, dividend payments, share repurchases, capital expenditures and acquisitions.

Table of Contents

(10) LEASES

We lease office space in various buildings for our own use. The terms of these non-cancelable operating leases provide for us to pay base rent and a share of increases in operating expenses and real estate taxes in excess of defined amounts. We also lease equipment under both operating and capital lease arrangements.

Minimum future lease payments (e.g., base rent for leases of office space) due in each of the next five years ending December 31 and thereafter are as follows (\$ in thousands):

| | OPERATING LEASES | |
|------------------------|------------------|---------|
| 2012 | \$ | 116,377 |
| 2013 | | 102,762 |
| 2014 | | 89,191 |
| 2015 | | 80,106 |
| 2016 | | 69,310 |
| Thereafter | | 135,245 |
| Minimum lease payments | \$ | 592,991 |

As of December 31, 2011, we have accrued liabilities related to excess lease space of \$12.3 million, including \$7.9 million related to excess lease space as a result of combining King Sturge's offices with our offices. The total of minimum rentals to be received in the future under noncancelable operating subleases as of December 31, 2011 was \$29.7 million.

Total rent expense including office space and other rentals was \$124.4 million, \$110.5 million and \$109.8 million for the years ended December 31, 2011, 2010 and 2009, respectively.

(11) TRANSACTIONS WITH AFFILIATES

As part of our co-investment strategy we have equity interests in real estate ventures, some of which have certain of our officers as trustees or board of director members, and from which we earn advisory and management fees. Included in the accompanying Consolidated Financial Statements are revenue of \$132.3 million, \$163.2 million and \$166.8 million for 2011, 2010 and 2009, respectively, as well as receivables of \$11.2 million, \$14.2 million and \$15.9 million at December 31, 2011, 2010 and 2009, respectively, related to transactions with affiliates that are primarily a result of transactions with the real estate ventures in which we have equity interests.

The outstanding balance of loans to employees at December 31, 2011 and 2010 are shown in the following table (\$ in millions). (1)

| | 2011 | 2010 |
|---|---------|---------|
| Loans related to co-investments (2) | \$ 4.0 | \$ 3.1 |
| Travel, relocation and other miscellaneous advances | 55.6 | 44.7 |
| | \$ 59.6 | \$ 47.8 |

(1) The Company has not extended or maintained credit, arranged for the extension of credit or renewed the extension of credit, in the form of a personal loan to or for any director or executive officer of the Company since the enactment of the Sarbanes-Oxley Act of 2002.

(2) These loans have been made to allow employees the ability to participate in investment fund opportunities. All of these loans are nonrecourse loans.

(12) COMMITMENTS AND CONTINGENCIES

We are a defendant in various litigation matters arising in the ordinary course of business, some of which involve claims for damages that are substantial in amount. Many of these litigation matters are covered by insurance (including insurance provided through a captive insurance company), although they may nevertheless be subject to large deductibles or retentions and the amounts being claimed may exceed the available insurance. Although the ultimate liability for these matters cannot be determined, based upon information currently available, we believe the ultimate resolution of such claims and litigation will not have a material adverse effect on our financial position, results of operations or liquidity.

Table of Contents

In order to better manage our global insurance program and support our risk management efforts, we supplement our traditional insurance coverage by the use of a wholly-owned captive insurance company to provide professional indemnity and employment practices liability insurance coverage on a “claims made” basis. The level of risk retained by our captive is up to \$2.5 million per claim (depending upon the location of the claim) and up to \$12.5 million in the aggregate.

When a potential loss event occurs, management estimates the ultimate cost of the claim and accrues the related cost when probable and estimable. The accrual for professional indemnity insurance claims facilitated through our captive insurance company, which relate to multiple years, were \$0.7 million and \$2.1 million, net of receivables, as of December 31, 2011 and 2010, respectively.

(13) RESTRUCTURING

In 2011, we recognized \$56.1 million of restructuring and acquisition integration costs. These costs were mainly associated with the King Sturge acquisition and consisted of (1) employee retention bonuses of \$15.7 million, (2) lease termination charges of \$9.1 million and (3) other transaction costs of \$17.9 million. Additionally, \$13.4 million of employee termination costs unrelated to King Sturge were recognized in 2011.

In 2010, we recognized \$6.4 million of restructuring charges, net, consisting of (1) \$5.0 million of employee termination costs, (2) \$1.6 million of integration-related costs incurred as a result of the Staubach acquisition, and (3) a \$0.2 million reduction in a lease termination reserve we accrued in 2009.

In 2009, we recognized \$47.4 million of restructuring charges, consisting of (1) \$38.7 million of employee termination costs, (2) \$6.9 million of integration-related costs incurred as a result of the Staubach acquisition for office moving costs, employee retention payments, training, re-branding and other transition-related costs, and (3) \$1.8 million of lease exit costs.

The following table shows the restructuring charges and the related payment activity for the years ending December 31, 2011, 2010 and 2009 (\$ in thousands).

| | SEVERANCE | RETENTION BONUSES | LEASE TERMINATION | ACQUISITION AND OTHER COSTS |
|----------------------|-----------|----------------------|----------------------|--------------------------------|
| December 31, 2008 | \$ 9,430 | - | 470 | - |

| December 31, 2011 | \$ 11,712 | 7,555 | 7,912 | 4,778 |

Table of Contents

QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

The tables on the following pages set forth certain unaudited consolidated statements of operations data for each of our past eight quarters. In our opinion, this information has been presented on the same basis as the audited consolidated financial statements appearing elsewhere in this report, and includes all adjustments, consisting only of normal recurring adjustments and accruals, that we consider necessary for a fair presentation. The unaudited consolidated quarterly information should be read in conjunction with our Consolidated Financial Statements and the notes thereto as well as the “Summary of Critical Accounting Policies and Estimates” section within “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” The operating results for any quarter are not necessarily indicative of the results for any future period.

We note the following points regarding how we prepare and present our financial statements on a periodic basis.

Periodic Accounting for Incentive Compensation

An important part of our overall compensation package is incentive compensation, which we typically pay to employees in the year after it is earned. In our interim financial statements, we have accrued for incentive compensation based on the percentage of compensation costs and adjusted operating income relative to forecasted compensation costs and adjusted operating income for the full year, as substantially all incentive compensation pools are based upon full year results. The impact of this incentive compensation accrual methodology is that we accrue less compensation in the first six months of the year, with the majority of our incentive compensation accrued in the second half of the year, particularly in the fourth quarter. We adjust the incentive compensation accrual in those unusual cases where earned incentive compensation has been paid to employees.

In addition, we exclude from the standard accrual methodology incentive compensation pools that are not subject to the normal performance criteria. These pools are accrued for on a straight-line basis.

Certain employees receive a portion of their incentive compensation in the form of restricted stock units of our common stock. We recognize this compensation during the period including both the incentive compensation year and the vesting period of these restricted stock units, which has the effect of deferring a portion of current year incentive compensation to later years. We recognize the benefit of deferring certain compensation under the stock ownership program in a manner consistent with the accrual of the underlying incentive compensation expense.

The following table reflects the estimates of compensation to be deferred to future years under the stock ownership program for each year-to-date period in 2011 and 2010 (\$ in millions):

| | 2011 | 2010 |
|----------------------------------|--------|------|
| Three months ended March 31, | \$ 1.5 | 1.9 |
| Six months ended June 30, | 4.4 | 4.6 |
| Nine months ended September 30, | 6.4 | 6.5 |
| Twelve months ended December 31, | 12.4 | 9.8 |

Income Taxes

We provide for the effects of income taxes on interim financial statements based on our estimate of the effective tax rate for the full year. We assess our effective tax rate on a quarterly basis and reflect the benefit from tax planning actions when we believe it is probable they will be successful. We account for the cumulative catch-up impact of any change in estimated effective tax rate in the quarter that a change is made.

Seasonality

Our quarterly revenue and profits tend to grow progressively by quarter throughout the year. This is a result of a general focus in the real estate industry on completing or documenting transactions by calendar-year-end and the fact that certain expenses are constant through the year. Historically, we have reported an operating loss or a relatively small profit in the first quarter and then increasingly larger profits during each of the following three quarters, excluding the recognition of investment-generated performance fees and co-investment equity gains (both of which can be particularly unpredictable). Such performance fees and co-investment equity gains are generally earned when assets are sold, the timing of which is geared toward the benefit of our clients. Non-variable operating expenses, which are treated as expenses when they are incurred during the year, are relatively constant on a quarterly basis.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES
EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Jones Lang LaSalle (the Company) has established disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to the officers who certify the Company's financial reports and to the members of senior management and the Board of Directors.

Based on management's evaluation as of December 31, 2011, the principal executive officer and principal financial officer of the Company have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) are effective.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our principal executive officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our evaluation under the framework in Internal Control—Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2011.

KPMG LLP, the Independent Registered Public Accounting Firm that audited the consolidated financial statements included in this Annual Report on Form 10-K, issued an audit report on the Company's internal control over financial reporting. That Report of Independent Registered Public Accounting Firm is included in Item 8. Financial Statements and Supplementary Data, and is incorporated by reference herein.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING

There were no changes to the Company's internal controls over financial reporting during the quarter ended December 31, 2011 that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

Not applicable.

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

The information required by this item is incorporated by reference to the material in Jones Lang LaSalle's Proxy Statement for the 2012 Annual Meeting of Shareholders (the "Proxy Statement") under the captions "Directors and Executive Officers," and "Section 16(a) Beneficial Ownership Reporting Compliance" and in Item 1 of this Annual Report on Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated by reference to the material in the Proxy Statement under the caption "Executive Compensation."

Table of Contents

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

The information required by this item is incorporated by reference to the material in the Proxy Statement under the caption “Common Stock Security Ownership of Certain Beneficial Owners and Management.”

The following table provides information as of December 31, 2011 with respect to Jones Lang LaSalle’s common shares issuable under our equity compensation plans (in thousands, except exercise price):

Notes:

- (1) In 1997, we adopted the 1997 Stock Award and Incentive Plan (“SAIP”), which provides for the granting of options to purchase a specified number of shares of common stock and other stock awards to eligible participants of Jones Lang LaSalle.
- (2) In 1998, we adopted an Employee Stock Purchase Plan (“ESPP”) for eligible U.S. based employees. Under this plan, employee contributions for stock purchases are enhanced through an additional contribution of a 5% discount on the purchase price. Effective April 1, 2009, the 5% discount has been discontinued and purchases are broker-assisted on the open market.
- (3) In November 2001, we adopted the Jones Lang LaSalle Savings Related Share Option (U.K.) Plan (“Save As You Earn” or “SAYE”) for eligible employees of our U.K. based operations. In November 2006, the SAYE plan was extended to employees in our Ireland operations. Under this plan, employee contributions for stock purchases are

enhanced by us through an additional contribution of a 15% discount on the purchase price. Options granted under the SAYE plan vest over a period of three to five years. The original SAYE plan was not approved by shareholders since such approval was not required under applicable rules at the time of the adoption of this plan. In 2006, our shareholders approved an amendment to the SAYE plan that increased the number of shares reserved for issuance by 500,000.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information required by this item is incorporated by reference to the material appearing in the Proxy Statement under the caption “Certain Relationships and Related Transactions.”

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is incorporated by reference to the material appearing in the Proxy Statement under the caption “Information about the Independent Registered Public Accounting Firm.”

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

The following documents are filed as part of this report:

1. Financial Statements. See Index to Consolidated Financial Statements in Item 8 of this report.
2. Financial Statement Schedules. No financial statement schedules are included because they are not required or are not applicable, or the required information is set forth in the applicable statements or related notes.
3. Exhibits. A list of exhibits is set forth in the Exhibit Index, which immediately precedes the exhibits and is incorporated by reference herein.

Cautionary Note Regarding Forward-Looking Statements

Certain statements in this filing and elsewhere (such as in reports, other filings with the United States Securities and Exchange Commission, press releases, presentations and communications by Jones Lang LaSalle or its management and written and oral statements) regarding, among other things, future financial results and performance, achievements, plans and objectives, dividend payments and share repurchases may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Jones Lang LaSalle’s actual results, performance, achievements, plans and objectives to be materially different from any of the future results, performance, achievements, plans and objectives expressed or implied by such forward-looking statements.

We discuss those risks, uncertainties and other factors in this report in (1) Item 1A. Risk Factors; Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations; Item 7A. Quantitative and Qualitative Disclosures About Market Risk; Item 8. Financial Statements and Supplementary Data—Notes to Consolidated Financial Statements; and elsewhere, and (2) the other reports we file with the United States Securities and Exchange Commission. Important factors that could cause actual results to differ from those in our forward-looking statements include (without limitation):

- The effect of political, economic and market conditions and geopolitical events including the continuation of the worldwide financial crisis and credit contraction;
- The logistical and other challenges inherent in operating in numerous different countries;
- The actions and initiatives of current and potential competitors;
- The level and volatility of real estate prices, interest rates, currency values and other market indices;
- The outcome of pending litigation; and
- The impact of current, pending and future legislation and regulation.

Moreover, there can be no assurance that future dividends will be declared since the actual declaration of future dividends, and the establishment of record and payment dates, remains subject to final determination by the Company’s Board of Directors.

Accordingly, we caution our readers not to place undue reliance on forward-looking statements, which speak only as of the date on which they are made. Jones Lang LaSalle expressly disclaims any obligation or undertaking to update or revise any forward-looking statements to reflect any changes in events or circumstances or in its expectations or results.
