# Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

\_\_\_\_\_\_

We are a natural resources company engaged in the acquisition and exploration of our resource properties in the states of Idaho and Utah. We also provide contract mining services and specialized civil construction services for mine operators, exploration companies and the construction and natural resource industries through our trade name "Atlas Fausett Contracting."

Our primary source of revenue is generated by our Atlas Fausett Contracting operations. However, we also have exploration targets and timber. As a result, we are providing Management's discussion on our plan of operation.

### Contract Mining

Our contract mining generates most of our revenues. This may decrease as we are able to increase operations on our owned properties, and we will adjust our resources accordingly. At this time, we anticipate that our contracting will remain a significant portion of our business.

#### Property Exploration

We intend to continue our exploration activities for halloysite clay and other minerals, and intend to acquire commercially feasible properties that can be put into production with minimal environmental problems and with limited financial resources. We do not intend to seek out and acquire other properties until we have finished conducting our feasibility surveys and other exploration work on our current properties. Although we have not yet generated income from these properties, we are continuing our exploratory and development work on these properties. We have no assurances that our exploration will result in proving any commercially viable deposits. We realize that additional steps will need to be taken to move from an exploration stage to a development or productions stage.

In August 2001, we acquired the Dragon Mine in Juab, Utah and began our halloysite clay exploration. During the first six months of 2004, we had \$55,628 in exploration expenses. We also acquired additional equipment amounting to \$266,354 for mining at the Dragon Mine.

The halloysite clay is considered a non-toxic material and, as commercially viable amounts have been found on the property, we feel we can produce a sellable product with minimal environmental consequences using proper containment and processing techniques. The intended processing will be the crushing, drying, and packaging of the product for shipment. We have been able to formulate development and mining plans. We consider this property, the Dragon Mine, to be in the development stage, and it is our intent to bring it into a production stage in the near future.

We have also contacted potential customers, distributors and suppliers in the clay businesses. Each buyer may have a different use for the product and the price and quantity will vary as a result. The sale of product cannot be formalized until we have developed the mine and become production ready.

We are not aggressively looking for silver properties at this time, as we have been concentrating on our efforts to bring the clay property from

the exploration stage to the development stage. However once the clay property is further developed it is our intent to look for other properties that can be acquired, developed and mined with minimal costs, and environmental problems.

8

We have a mining plan approved by the proper state authorities, have filed and received Mine Safety and Health Administration (MSHA) registration, and County permitting where applicable. In the future, we may pursue additional acquisitions and exploration of other properties for metals and industrial minerals, development of which will require submission of new mining and reclamation plans to the proper state and federal authorities.

#### Timber

We will continue to harvest timber on our property. Timber harvesting will be dependent upon lumber prices and weather. We normally do not  $\log$  much in the winter months.

#### RESULTS OF OPERATIONS

Revenues for the six month period ending June 30, 2004, were \$387,725, and \$152,994 for the same period in 2003, or approximately a 153% increase. For the three month period ending June 30, 2004, revenues were \$229,096, compared to \$94,560 for the same period in 2003, or approximately a 142% increase. The company was able to maintain more work during the comparable periods of 2004, compared to 2003, predominately in its contracting entity. Thus reflecting an increase in revenues. For the six month period ended June 30, 2004, the company had timber revenues of \$10,758 compared to 0-for the same period in 2003. In 2003, timber prices did not merit logging, and fire dangers were extreme during the summer of 2003.

Gross profit (loss) for the six months ended June 30, 2004, was \$75,723, compared to \$11,983, for the same period in 2002. This was attributed to the greater revenue in 2004 compared to 2003. For the three month period ended June 30, 2004, our gross profit was \$42,168 compared to (\$4,875) for the same period in 2003. Again greater revenues in 2004 brought gross profits while smaller revenues in the same period in 2003 were not adequate enough to offset costs.

As of the six month period ended June 30, 2004, our total operating expenses were \$498,610 compared to \$519,715 for the same period in 2003. For the three month period ended June 30, 2004, the total operating expenses were \$174,856, compared to \$197,762 for the same period in 2003, a decrease of 4% and 11% respectively. The increase in this category resulted mainly from increases in professional fees during 2003, because of the company's efforts to become a fully registered company.

Exploration and Development Expenses for the six month period ending June 30, 2004 were \$55,628 compared to \$48,824 for the same period in 2003. For the three month period ending June 30, 2004 exploration and development expenses were \$53,540 compared to (\$1,444) for the same period in 2003. During 2003 the company conducted a drilling program while work done in 2004 was development of the mine site.

Our net profit (loss) for the six month period ended June 30, 2004, was (\$444,895) compared to (\$548,006) for the same period in 2003, a decrease if 19%. For the three month period ended June 30, 2004, the figure was (\$145,152) compared (\$210,554), a decrease of 31%. Increased

revenues and decreased General and Administrative costs in 2004 helped contribute to this difference.

9

#### LIQUIDITY AND CAPITAL RESOURCES

To date our activities have been financed primarily through the sale of equity securities, borrowings, and revenues from AFC and logging operations. We intend to continue pursuing contract mining work and logging of our timber properties to help pay for our operations. For the three month periods ended June 30, 2004 contract mining accounted for 99% of the revenue and 100% of the revenue for the same period in 2003. We have also borrowed from various sources to finance our activities. Our current debt structure is explained below.

Our total assets increased from \$834,764 as of June 30, 2004, compared to \$499,472 as of December 31, 2003. The company has increased its current assets by \$75,561 and has acquired additional equipment for mining and processing during the first six months of the current year. Total liabilities were \$1,092,110 as of June 30, 2004, compared to \$1,038,573 as of December 31, 2003. The company accounts receivable balance increased due to additional activities in contracting work and at the Dragon Mine.

We have a note payable to William Jacobson, an officer and director, which is payable on demand and bears no interest. The proceeds from this note were used for general working capital. The current amount due as of June 30, 2004 is \$70,829. We have an unsecured line of credit with Textron Financial at an interest rate of prime plus 6%. The balance of the line of credit at June 30, 2004 was \$21,757. The funds were used for general working capital and are on a revolving credit line. In 2000, we entered into an agreement with Universal Funding for a secured revolving credit line, immediately payable by accounts receivable. The funds are used for general working capital. As of June 30, 2004 the amount owing Universal funding is 0-. Accounts payable and accrued expenses due as of June 30, 2004 were \$235,053 and are the result of daily operations and taxes owed.

We have a note payable to Moss Adams, LLP, an accounting firm, for \$53,250 at 9% per annum, due in monthly payments of \$1,000 with a balloon payment due at maturity. The note was for accounting services provided to us in 1999 and 2000. As of June 30, 2004 our current balance, including interest is \$73,978. The note matured on August 16, 2001. We have renegotiated terms of repayment, and can pay this debt for approximately 50% of the amount otherwise due. We have notes payable to American National Mortgage due in monthly interest installments of \$35,788.39. The notes matured on May 31, 2003, at which time the principal became due, and is secured by property in northern Idaho. American Mortgage has filed bankruptcy, and we are negotiating a settlement on this debt with the trustee. We also have a note payable to CLS Mortgage Company, due in monthly installments of \$1,614, including interest at 16%. The note has a current balance of \$118,955 and is due in August 2005, secured by the proceeds of our logging activities and collateralized by land and a building on our property in northern Idaho.

If we are unable to reduce our debts or if we do not renegotiate any of this debt, we would be obligated to pay an average of \$54,214 per month or \$650,568 for the next fiscal year.

We may need to obtain additional funding to pursue our business strategy during the next fiscal year. At the present time, we anticipate seeking additional funding through additional private placements, joint

venture agreements, production financing, and/or pre-sale loans, although we do not have any specific plans or agreements for such funding, except as noted in the paragraph above. Our inability to raise additional capital to fund operations through the remainder of this year and through the next fiscal year could have a detrimental effect on our ability to pursue our business plan, and possibly our ability to continue as a going concern.

10

In anticipation of the above funding sources, we have attempted to satisfy our debts through a negotiated settlement, and/or ask for extended terms until we can become more profitable. We cannot assure you that any of these events will occur or, if they do occur, when they will occur.

Our principal sources of cash flow during the second quarter 2004 was from Contracting activities which provided an average of \$75,560 per month for the three month period ended June 30, 2004, and averaged \$31,520 per month for the same period in 2003. For the six month period ending June 30, 2004 our average monthly cash flow from contracting was \$64,620, compared to \$25,499 for the same period in 2003. In addition, we rely on our credit facilities and any public or private sales of equity for additional cash flow.

Cash flow from financing activities for the six month period ended June 30, 2004 was \$473,339 compared to \$226,534 for the same period in 2003, a difference of \$246,805. The major factor for the difference was receipt of proceeds from subscriptions receivable in 2004.

The Company spent \$214,563 from investing activities for the six month period ended June 30, 2004, compared to receiving \$14,119 in the same period in 2003. This was attributed from purchases of equipment and transactions with affiliates.

Cash flow used by operating activities for the six month period ended June 30, 2004, was (\$247,161) compared to (\$233,970) for the same period in 2003, a difference of \$13,191. In the six month period in 2004 a decrease in the accounts payable and accrued expenses accounted for the major change.

#### Item 3. CONTROLS AND PROCEDURES

(a) The term "disclosure controls and procedures" refers to the controls and procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported within required time periods. Within 90 days prior to the date of filing this report (the "Evaluation Date"), we carried out an evaluation under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of the effectiveness of our disclosure controls and procedures. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the Evaluation Date, such controls and procedures were effective in ensuring that required information will be disclosed on a timely basis in our periodic reports filed under the Exchange Act.

# (b) Changes in internal controls

There were no significant changes to our internal controls or in other factors that could significantly affect our internal controls subsequent to the Evaluation Date.
