

SPO Medical Inc
Form 10KSB
March 20, 2007

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-KSB

MARK ONE:

ANNUAL REPORT UNDER SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934
for the Fiscal Year ended December 31, 2006

TRANSITION REPORT UNDER SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

COMMISSION FILE NUMBER: 0-11772

SPO MEDICAL INC.

(Exact name of Small Business Issuer as specified in its chapter)

Delaware
(State or Other Jurisdiction of Incorporation)

11-3223672
(IRS Employer Identification No.)

21860 Burbank Blvd., North Building, Suite 380, Woodland Hills, CA 91367
(Address of Principal Executive Offices)

818-888-4380
(Small Business Issuer's Telephone Number, including Area Code)

Securities Registered Pursuant to Section 12(b) of the Exchange Act: None

Securities Registered Pursuant to Section 12(g) of the Exchange Act: \$0.01 Par Value Common Stock

Check whether the issuer is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the issuer was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Check if there is no disclosure contained herein of delinquent filers in response to Item 405 of Regulation S-B, and will not be contained, to the best of issuer's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendment to this Form 10-KSB.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The issuer's revenues for the year ended December 31, 2006: \$3,714,000

As of March 16, 2007, there were 19,335,525 shares of the issuer's common stock outstanding. The aggregate market value of the shares of the issuer's common stock held by non-affiliates was approximately \$28 million based on the last reported sale price of \$1.89 per share on March 15, 2007 as quoted on the Pink Sheets. Shares of the registrant's common stock held by each officer and director and each person known to the registrant to own 10% or more of the outstanding voting power of the registrant have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not a determination for other purposes.

Transitional Small Business Disclosure Format (Check one): Yes No

FORWARD LOOKING STATEMENTS

CERTAIN STATEMENTS MADE IN THIS ANNUAL REPORT ON FORM 10-KSB ARE "FORWARD-LOOKING STATEMENTS" WITHIN THE MEANING OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995. FORWARD-LOOKING STATEMENTS CAN BE IDENTIFIED BY TERMINOLOGY SUCH AS "MAY", "WILL", "SHOULD", "EXPECTS", "INTENDS", "ANTICIPATES", "BELIEVES", "ESTIMATES", "PREDICTS", OR "CONTINUE" OR THE NEGATIVE OF THESE TERMS OR OTHER COMPARABLE TERMINOLOGY. BECAUSE FORWARD-LOOKING STATEMENTS INVOLVE RISKS AND UNCERTAINTIES, THERE ARE IMPORTANT FACTORS THAT COULD CAUSE ACTUAL RESULTS TO DIFFER MATERIALLY FROM THOSE EXPRESSED OR IMPLIED BY THESE FORWARD-LOOKING STATEMENTS. ALTHOUGH THE COMPANY BELIEVES THAT EXPECTATIONS REFLECTED IN THE FORWARD-LOOKING STATEMENTS ARE REASONABLE, IT CANNOT GUARANTEE FUTURE RESULTS, PERFORMANCE OR ACHIEVEMENTS. MOREOVER, NEITHER THE COMPANY NOR ANY OTHER PERSON ASSUMES RESPONSIBILITY FOR THE ACCURACY AND COMPLETENESS OF THESE FORWARD-LOOKING STATEMENTS. THE COMPANY IS UNDER NO DUTY TO UPDATE ANY FORWARD-LOOKING STATEMENTS AFTER THE DATE OF THIS REPORT TO CONFORM SUCH STATEMENTS TO ACTUAL RESULTS.

PART I

ITEM 1. DESCRIPTION OF BUSINESS

History

SPO Medical Inc. was originally organized under the laws of the State of Delaware in September 1981 under the name "Applied DNA Systems, Inc." On November 16, 1994, the company changed its name to "Nu-Tech Bio-Med, Inc." and on December 23, 1998, its name was changed to "United Diagnostic, Inc." Effective April 21, 2005, we acquired (the "Acquisition Transaction") 100% of the outstanding capital stock of SPO Medical Equipment Ltd., a company incorporated under the laws of the State of Israel ("SPO Ltd."), pursuant to a Capital Stock Exchange Agreement dated as of February 28, 2005 among SPO Medical Inc., SPO Ltd. and the shareholders of SPO Ltd., as amended and restated on April 21, 2005. In exchange for the outstanding capital stock of SPO Ltd., we issued to the former shareholders of SPO Ltd. a total of 5,769,106 shares of its common stock, par value \$0.01 per share ("Common Stock"), representing approximately 90% of the Common Stock then issued and outstanding after giving effect to the Acquisition Transaction. As a result of the Acquisition Transaction, SPO Ltd. became our wholly owned subsidiary and we changed our name from United Diagnostic Inc. to "SPO Medical Inc." Upon consummation of the Acquisition Transaction, we effected a forward subdivision of our Common Stock issued and outstanding on a 2.65285:1 basis.

Following the Acquisition Transaction, we began to engage in the business that SPO Ltd. was engaged in.

Business Overview

Since its incorporation in August 1995, SPO Ltd. has been engaged in the design, development and marketing of non-invasive pulse oximetry technologies to monitor blood oxygen saturation and heart rate for a variety of markets, including medical, homecare, sports and search & rescue. Pulse oximetry is a non-invasive process used to measure blood oxygen saturation levels and is an established procedure in medical practice.

We utilize proprietary and patented technologies to deliver oximetry functionality through innovative commercial products that address such applications as emergency care, home monitoring, sleep apnea, cardiovascular performance, cardiac rehabilitation and the physiological monitoring of military personnel and safety care workers.

We have developed and patented proprietary technology that enables the use of pulse oximetry in a reflectance mode of operation (i.e. a sensor that can be affixed to a single side of a body part). This technique is known as Reflectance Pulse Oximetry (RPO). Using RPO, a sensor can be positioned on various body parts, hence minimizing problems of motion and poor perfusion. The unique design features contribute to substantially lower electric power requirements and enable a wireless, stand-alone configuration with expanded commercial possibilities.

Background

Pulse oximetry is an important non-invasive process used to both measure blood oxygen saturation levels (SpO₂) by monitoring the percentage of hemoglobin (Hb) that is saturated with oxygen and measure heart rate. This procedure has been used regularly in hospitals during the past twenty years and is established as an essential measurement in medical practice to ensure maintenance of adequate oxygen and prevention of respiratory difficulty. In many disease states, oxygen saturation is one of the most important vital signs to monitor.

-1-

There are two methods to measure pulse oximetry by transmission through a body part or by reflection. In general, the transmission method can only be used on certain areas of the body, such as fingers, earlobes, etc. Furthermore, in some instances when the transmission method is used, physiological conditions such as stress and temperature can adversely affect the accuracy of pulse oximetry readings.

Since pulse oximetry measurements taken on-site in an emergency, at local medical practices, and/or in home care can save lives and curtail intervention costs, mobile units have been developed. However, mobile oximetry units have not been widely adopted because their power requirements (and hence limited battery life) often make them impractical. In addition, existing mobile units require patients to remain absolutely stationary to produce reliable results, further reducing their practicality.

Our solution

Responding to the need for life-saving information in the field where people cannot be absolutely stationary, we have developed patented sensors that work accurately during mild physical activity. This technique uses a reflectance method (known as RPO) whereby a very small sensor placed on the body at various locations has the ability to measure oxygen saturation and heart pulse rate. We have incorporated our patented reflectance technology into portable devices for medical and consumer applications. Moreover, these devices operate at a power requirement approximately 1/50th of that compared to other commercially available portable systems. This puts pulse oximetry into the hands medical practitioners and emergency personnel on-site for the safety and benefit of all and offers the opportunity to create new commercial and consumer applications.

We intend to leverage our core technologies to develop new, innovative product applications. For instance, we are currently investigating monitoring of other vital sign information that can be obtained using other optical, non-invasive techniques including :

Blood pressure using reflectance oximetry

Billirubin levels

Monitoring glucose levels in blood

Hemoglobin count in blood

Products

The following details our products utilizing our unique pulse oximetry technology.

PulseOx 5500TM -- a stand-alone commercial RPO spot check monitor for SpO2 and heart rate. The PulseOx 5500TM uses SPO patented technology to provide a medical device which is easier to use for many patients and less expensive to operate than any other device that is commercially available. Its main advantages include: (i) long lasting battery with more than 1,000 hours, using only a fraction of the power used by competitive devices and (ii) resistance to many forms of motion, reducing its susceptibility to the motion artifacts which are typical of other pulse oximetry devices. The PulseOx 5500 was first introduced commercially during the fourth quarter of 2004. The device was approved and registered by the Food and Drug Administration ("FDA") in June 2004. The device also carries the CE (European Directives 93/42/EEC and 90/385/EEC for regulatory and safety standards of medical equipment) and Canadian Standards Association (CSA) mark for safety and audited manufacturing processes, all of which were obtained in February 2005.

Check Mate™--- addresses the sports and aviation market's demand for a lightweight, inexpensive monitor for measuring SpO2 and heart rate during physically active and high-altitude activities. It offers the user a greater ability to monitor these vital signs under motion and is less expensive than most other available devices. The Check Mate was first introduced commercially during third quarter of 2005. The Check Mate does not require FDA approval or registration. It carries the CE and CSA mark for safety and audited manufacturing processes.

PulseOx 7500™ --a monitor for extended monitoring of SpO2 and heart rate by means of RPO. The monitor is being initially marketed for pre screening of sleep apnea sufferers. Our monitor's main advantages include: (i) long lasting battery equivalent to a month's use of monitoring using only a fraction of the power used by competitive devices and hence a lower cost of ownership and (ii) resistance to many forms of motion, reducing its susceptibility to the motion artifacts which are typical of other similar pulse oximetry devices.

-2-

Research & Development / Products Under Design and Development

We currently have in various stages of development other devices utilizing its oximetry technology. These include the following:

Handheld -- a stand-alone commercial RPO spot check monitor for SpO₂ and heart rate. The Handheld will use our patented technology to provide a medical device which is easier to use and have lower operating costs than other devices currently widely used in hospitals and related environments. The device's main advantages are expected to include: (i) long lasting battery with more than 1,000 hours, using only a fraction of the power used by competitive devices and (ii) resistance to many forms of motion, reducing its susceptibility to the motion artifacts which are typical of other pulse oximetry devices

PedOMetrixTM -- a monitor being designed specifically for the use with infants. This unique monitor is being designed for continual non-invasive monitoring of an infant.

Our research and development activities as well as product design activities are primarily conducted in our research and development subsidiary SPO Ltd. located in Israel. During our 2006 and 2005 fiscal years, we expended approximately \$972,000 and \$629,000, respectively, on the research and development.

Business Strategy

Our mission is to build a profitable business that develops and commercializes medical biosensor products that improve people's lives and increases stockholder value. To achieve this mission, we are pursuing the following business strategies:

- *Establish our brand in both the medical and consumer marketplaces. The initial product launch PulseOx 5500TM was a demonstration of our strategy to establish our company within the most demanding part of the market - medical devices requiring FDA approval and requiring a doctor's prescription. Thereafter, subject to regulatory approval consumer applications using the technology will be marketed for direct purchase at appropriate outlets (e.g., retail drug chains, sports and fitness establishments, distributors of safety and security products).
- *Partner with highly qualified, focused companies, internationally. We intend to collaborate with leading medical device resellers capable of distributing the products to the target market. For instance, we currently sell the PulseOx 5500TM through reputable, established medical device distributors serving North American markets and the European, Asian and Latin American markets. Other medical products may be distributed by these and other distributors. We anticipate that our other consumer products, such as the Check MateTM, will be distributed by companies with access to its target market which includes sports enthusiasts. Finally, with medical and consumer products developed jointly with other companies, the most appropriate distribution channels will be used for each product and application.
- *Research and Development. Our research and development strategy is to continually improve and expand our product offerings by leveraging existing and newly developed proprietary technologies, as well as those of our collaborators, into new product offerings. We intend to pursue a multi-disciplinary approach to product design that includes substantial electrical, mechanical, software and biomedical engineering efforts. We are currently focusing research and development programs on expanding our current product offering and investigations in to other non-invasive optical techniques for blood analysis of other vital signs in blood. In addition, we have established relationships with leading teaching hospitals and academic institutions for the purpose of clinically evaluating its new products. We have consulting arrangements with physicians and scientists in the areas of research, product development and clinical evaluation.

Suppliers

Our products are made of components which we manufacture or which are usually available from existing and alternate sources of supply. Some of our products are manufactured through agreements with unaffiliated companies. We purchase certain components from single or preferred sources of supply. The use of single or preferred sources of supply increases our exposure to price increases and production delays.

We outsource our primary manufacturing operations. We utilize contract manufacturers that are ISO 13485:2003 certified. However, the outsourcing of these operations may mean that some degree of risks related to delivery schedules, yields, and other factors are not directly under our control.

Marketing and Sales Organization

Our products are sold primarily through resellers in the United States and a combination of resellers and independent distributors in international markets. Our primary markets include home care, physicians, hospitals, other medical institutions and general home-care providers.

-3-

We provide service and maintenance to purchasers of our products under warranty. We employ service representatives in the United States and Europe and maintain service facilities in the United States and through our resellers in Europe and elsewhere.

Patents and Proprietary Information

We currently rely on a combination of patent, trade secret, copyright and trademark law, as well as non-disclosure agreements and invention assignment agreements, to protect proprietary information. However, such methods may not afford complete protection and there can be no assurance that other competitors will not independently develop such processes, concepts, ideas and documentation. We hold three patents issued by the United States Patent and Trademark Office ("USPTO") covering various aspects of our unique sensors for radiance based diagnostics using pulse oximetry. Although we believe that our existing issued patents provide a competitive advantage, there can be no assurance that the scope of our patent protection is or will be adequate to protect our technologies or that the validity of any patent issued will be upheld in the future.

Because of the uncertainty of patent protection and the unavailability of patent protection for certain processes and techniques, our policy is to require our employees, consultants, other advisors, as well as utility and design collaborators, to execute confidentiality and assignment of invention agreements upon the commencement of employment, consulting or advisory relationships. These agreements generally provide that all confidential information developed or made known to a party by us during the course of the party's association with the Company is to be kept confidential and not to be disclosed to third parties except in specific circumstances. In the case of employees and consultants, the agreements also provide that all inventions conceived by the individual in the course of their employment or consulting relationship will be our exclusive property.

Employees

As of March 16, 2007, we employed 22 full-time employees, of which four work out of our corporate offices in California and 18 out of facilities in Israel. None of these employees is subject to collective bargaining agreements.

Competition

We believe that hospitals and other medical institutions choose among competing products on the basis of product performance, features, price and service. In general, we believe that price has become an important factor in hospital purchasing decisions because of pressure to cut costs. These pressures on hospitals result from federal and state regulations that limit reimbursement for services provided to Medicare and Medicaid patients. There are also cost containment pressures on healthcare systems outside the U.S.A., particularly in certain European countries.

There are number companies, some of which are substantially larger than we are and with significantly more resources, are engaged in manufacturing competing products. Our competition is primarily in the traditional medical market. Our competitors include Nellcor, a unit of the Tyco Healthcare division of Tyco International Ltd; Nonin Medical Inc. of Plymouth, Minnesota, a privately owned company; and Smiths Medical PM Inc. of Waukesha, WI, which is the designer, manufacturer, and distributor of the BCI(R) brand of patient monitoring equipment which competes with the SPO PulseOx 5500TM units.

Governmental Regulations

The manufacture and sale of our products are subject to extensive regulation by numerous governmental authorities, principally by the FDA and corresponding foreign agencies. The FDA administers the Federal Food, Drug and Cosmetic Act and the regulations promulgated thereunder. Our PulseOx 5500TM and PulseOx 7500TM are sold in

the United States and are subject to the FDA's standards and procedures for the manufacture of medical devices and our facilities are subject to inspection by the FDA for compliance with such standards and procedures.

The FDA classifies each medical device into one of three classes depending on the degree of risk associated with the device and the extent of control needed to ensure safety and effectiveness. The Company's PulseOx 5500TM and the PulseOx 7500TM have been classified by the FDA as Class II device and has secured a 510(k) pre-market notification clearance before being introduced into the United States market. For additional products, the process of obtaining 510(k) clearance typically takes several months and may involve the submission of limited clinical data supporting assertions that the product is substantially equivalent to an already approved device or to a device that was on the market before the enactment of the Medical Device Amendments of 1976.

Every company that manufactures or assembles medical devices to be sold in the United States is required to register with the FDA and adhere to certain "good manufacturing practices" in accordance with the FDA's Quality System Regulation which regulates the manufacture of medical devices, prescribes record keeping procedures and provides for the routine inspection of

-4-

facilities for compliance with such regulations. The FDA also has broad regulatory powers in the areas of clinical testing, marketing and advertising of medical devices.

Medical device manufacturers are routinely subject to periodic inspections by the FDA. If the FDA believes that a company may not be operating in compliance with applicable laws and regulations, it can:

- place the company under observation and re-inspect the facilities; o issue a warning letter apprising of violating conduct;
- detain or seize products;
- mandate a recall;
- enjoin future violations; and
- assess civil and criminal penalties against the company, its officers or its employees.

We are also subject to regulation in each of the foreign countries in which we sell our products. Many of the regulations applicable to our products in such countries are similar to those of the FDA. The national health or social security organizations of certain countries require our products to be qualified before they can be marketed in those countries.

AVAILABLE INFORMATION

Our Internet website is located at <http://www.spomedical.com>. This reference to our Internet website does not constitute incorporation by reference in this report of the information contained on or hyperlinked from our Internet website and such information should not be considered part of this report.

The public may read and copy any materials we file with the Securities and Exchange Commission ("SEC") at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Rooms by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC. The SEC's Internet website is located at <http://www.sec.gov>.

Risk Factors

The following risk factors should be considered carefully in addition to the other information presented in this report. This report contains forward-looking statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, the following:

WE HAVE A HISTORY OF LOSSES AND EXPECT TO INCUR LOSSES AND NEGATIVE OPERATING CASH FLOWS IN THE FUTURE.

Our accumulated deficit was approximately \$11,049,000 as at December 31, 2006. We expect our operating losses to continue as we continue to expend resources to further develop and enhance our existing product lines, to complete development of new generation products, obtain regulatory clearances or approvals, expand our marketing, sales, manufacturing and finance capabilities and conduct further research and development.

We also expect to experience negative cash flow in the future as we fund our operating losses and capital expenditures. We currently have three products that are commercially available. In order to achieve and maintain profitability we must expand our existing product lines.

WE MAY NEED TO RAISE ADDITIONAL FUNDS TO IMPLEMENT OUR BUSINESS PLAN AND THERE IS NO ASSURANCE THAT SUCH FUNDS CAN BE RAISED ON TERMS THAT WE WOULD FIND ACCEPTABLE, OR AT ALL.

Although management believes funds on hand as well as revenues that we expect to generate in the ordinary course of our business may enable us to meet our operating liquidity needs as they arise, circumstances may arise that would require us to raise additional capital in order to meet our liquidity needs and satisfy our current business plan. We do not know whether additional financing will be available when needed, or on terms favorable to our stockholders or us. We may raise any necessary funds through public or private equity offerings, debt financings or additional corporate collaboration and licensing arrangements. Any

-5-

failure to achieve adequate funding in a timely fashion would delay our development programs and could lead to abandonment of one or more of our development initiatives. To the extent we cannot obtain additional funding, our ability to continue to develop and introduce products to market will be limited. Any additional equity financing may be dilutive to stockholders, and debt and certain types of equity financing, if available, may involve restrictive covenants or other provisions that would limit how we conduct our business or finance our operations.

WE ARE CURRENTLY DEPENDENT ON LIMITED NUMBER OF PRODUCTS AND IN ORDER TO SUCCEED WE WILL NEED TO DEVELOP AND COMMERCIALIZE OTHER PRODUCTS CURRENTLY UNDER DEVELOPMENT.

Unlike many of our competitors which have commercialized a number of products, we are currently dependent on our three pulse oximetry products for the generation of revenues. The PulseOx 5500 was first commercially available in the fourth quarter of 2004. While our core technology has a number of potentially beneficial uses, if that core technology is not widely accepted in the marketplace, we currently do not have other commercialized products to fall back on.

We began commercial distribution of the PulseOx 7500™ first quarter 2007. Commercial distribution of the PedOMetrix™, a monitor being designed specifically for the use with infants and also currently under development, is expected to commence during late fourth quarter of 2007. However, potential products that appear to be promising at any development stage may not reach the market for a number of reasons. These reasons include the possibility that the potential products may:

- * be found ineffective or cause harmful side effects;
- * fail to receive necessary regulatory approvals;
- * be precluded from commercialization by proprietary rights of third parties;
- * be difficult to manufacture on a large scale; or
- * be uneconomical or fail to achieve market acceptance.

If any of these potential problems occur, we may not successfully market these products.

WE DO NOT HAVE A LONG OPERATING HISTORY, WHICH MAKES IT DIFFICULT FOR YOU TO EVALUATE OUR BUSINESS.

SPO Ltd. commenced operations in 1998. We introduced our first product into the marketplace in the fourth quarter of 2004. Accordingly, there is limited historical information regarding our revenue trends and operations upon which investors can evaluate our business. Our prospects must be considered in light of the substantial risks, expenses, uncertainties and difficulties encountered by entrants into the medical device industry, which is characterized by increasing intense competition and the relative failure rates.

THE SALE OF OUR PRODUCTS IN THE UNITED STATES IS SUBJECT TO GOVERNMENT REGULATIONS AND WE MAY NOT BE ABLE TO OBTAIN CERTAIN NECESSARY CLEARANCES OR APPROVALS.

The design, manufacturing, labeling, distribution and marketing of medical device products in the United States is subject to extensive and rigorous regulation by the Food and Drug Administration (FDA). In order for us to market our products in the United States, we must obtain clearance or approval from the FDA. which can be expensive and

uncertain and can cause lengthy delays before we can begin selling our products. We cannot be sure:

- that we, or any collaborative partner, will make timely filings with the FDA;
- that the FDA will act favorably or quickly on these submissions;
- that we will not be required to submit additional information or perform additional clinical studies;
- that we would not be required to submit an application for pre-market approval, rather than a 510(k) pre-market notification submission as described below; or
- that other significant difficulties and costs will not be encountered to obtain FDA clearance or approval.

-6-

The FDA may impose strict labeling or other requirements as a condition of its clearance or approval, any of which could limit our ability to market our products. Further, if we wish to modify a product after FDA clearance of a pre-market notification or approval of a pre-market approval application, including changes in indications or other modifications that could affect safety and efficacy, additional clearances or approvals will be required from the FDA. Any request by the FDA for additional data, or any requirement by the FDA that we conduct additional clinical studies or submit to the more rigorous and lengthier pre-market approval process, could result in a significant delay in bringing our products to market and substantial additional research and other expenditures. Similarly, any labeling or other conditions or restrictions imposed by the FDA on the marketing of our products could hinder our ability to effectively market our products. Any of the above actions by the FDA could delay or prevent altogether our ability to market and distribute our products. Further, there may be new FDA policies or changes in FDA policies that could be adverse to us.

OUTSIDE THE UNITED STATES, WE ARE SUBJECT TO GOVERNMENT REGULATION, WHICH COULD DELAY OR PREVENT OUR ABILITY TO SELL OUR PRODUCTS IN CERTAIN JURISDICTIONS.

In order for us to market our products in Europe and some other international jurisdictions, we and our distributors and agents must obtain required regulatory registrations or approvals. We must also comply with extensive regulations regarding safety, efficacy and quality in those jurisdictions. We may not be able to obtain the required regulatory registrations or approvals, or we may be required to incur significant costs in obtaining or maintaining any regulatory registrations or approvals we receive. Delays in obtaining any registrations or approvals required to market our products, failure to receive these registrations or approvals, or future loss of previously obtained registrations or approvals would limit our ability to sell our products internationally. For example, international regulatory bodies have adopted various regulations governing product standards, packaging requirements, labeling requirements, import restrictions, tariff regulations, duties and tax requirements. These regulations vary from country to country.

EVEN IF WE OBTAIN CLEARANCE OR APPROVAL TO SELL OUR PRODUCTS, WE ARE SUBJECT TO ONGOING REQUIREMENTS AND INSPECTIONS THAT COULD LEAD TO THE RESTRICTION, SUSPENSION OR REVOCATION OF OUR CLEARANCE.

We are required to adhere to applicable FDA regulations and ISO standards regarding good manufacturing practice, which include testing, control, and documentation requirements. We are subject to similar regulations in foreign countries. Ongoing compliance with good manufacturing practice and other applicable regulatory requirements will be strictly enforced in the United States through periodic inspections by state and federal agencies, including the FDA, and in international jurisdictions by comparable Notified Body for CE Marking and ISO Standards. Failure to comply with these regulatory requirements could result in, among other things, warning letters, fines, injunctions, civil penalties, recall or seizure of products, total or partial suspension of production, failure to obtain premarket clearance or premarket approval for devices, withdrawal of approvals previously obtained, and criminal prosecution. The restriction, suspension or revocation of regulatory approvals or any other failure to comply with regulatory requirements would limit our ability to operate and could increase our costs.

OUR SUCCESS LARGELY DEPENDS ON OUR ABILITY TO OBTAIN AND PROTECT THE PROPRIETARY INFORMATION ON WHICH WE BASE OUR PRODUCTS.

Our success depends in large part upon our ability to establish and maintain the proprietary nature of our technology through the patent process, as well as our ability to license from others patents and patent applications necessary to develop our products. If any of our patents are successfully challenged, invalidated or circumvented, or our right or ability to manufacture our products was to be limited, our ability to continue to manufacture and market our products could be adversely affected.

The defense of patent infringement suits is costly and time-consuming and their outcome is uncertain. An adverse determination in litigation could subject us to significant liabilities, require us to obtain licenses from third parties, or restrict or prevent us from selling our products in certain markets. Although patent and intellectual property disputes are often settled through licensing or similar arrangements, costs associated with such arrangements may be substantial and could include ongoing royalties. Furthermore, the necessary licenses may not be available to us on satisfactory terms, if at all. Thus, as discussed above, if third party patents cover any aspect of our products or processes, then we may lack freedom to operate in accordance with our business plan.

We have been issued three United States patents. One or more of the patents for our existing or future products, may be successfully challenged, invalidated or circumvented, or we may otherwise be unable to rely on these patents. These risks are also present for the process we use or will use for manufacturing our products. In addition, our competitors, many of whom have substantial resources and have made substantial investments in competing technologies, may apply for and obtain patents that

-7-

prevent, limit or interfere with our ability to make, use and sell our products, either in the United States or in international markets.

The medical device industry has been characterized by extensive litigation regarding patents and other intellectual property rights. In addition, the United States Patent and Trademark Office may institute interference proceedings. The defense and prosecution of intellectual property suits, Patent and Trademark Office proceedings and related legal and administrative proceedings are both costly and time consuming. Moreover, we may need to litigate to enforce our patents, to protect our trade secrets or know-how, or to determine the enforceability, scope and validity of the proprietary rights of others. Any litigation or interference proceedings involving us may require us to incur substantial legal and other fees and expenses and may require some of our employees to devote all or a substantial portion of their time to the proceedings. An adverse determination in the proceedings could subject us to significant liabilities to third parties, require us to seek licenses from third parties or prevent us from selling our products in some or all markets. We may not be able to reach a satisfactory settlement of any dispute by licensing necessary patents or other intellectual property. Even if we reached a settlement, the settlement process may be expensive and time consuming, and the terms of the settlement may require us to pay substantial royalties. An adverse determination in a judicial or administrative proceeding or the failure to obtain a necessary license could prevent us from manufacturing and selling our products.

In addition to patents, we rely on trade secrets and proprietary know-how, which we seek to protect, in part, through confidentiality and proprietary information agreements. The other parties to these agreements may breach these provisions, and we may not have adequate remedies for any breach. Additionally, our trade secrets could otherwise become known to or be independently developed by competitors.

Finally, our PulseOx 7500TM utilizes third party owned proprietary licensed software. If for, whatever reason, we are unable to maintain the license or renew it on commercially acceptable terms (or at all) or if such party's right to such proprietary rights are challenged and we are unable to maintain these licenses or obtain or develop replacement technologies, our business may be adversely affected.

WE ARE DEVELOPING OUR CURRENT PRODUCT LINES INDEPENDENTLY FROM ANY COLLABORATIVE PARTNERS, WHICH WILL REQUIRE US TO ACCESS ADDITIONAL CAPITAL AND TO DEVELOP ADDITIONAL SKILLS TO PRODUCE, MARKET AND DISTRIBUTE THESE PRODUCTS.

We are independently finishing development, building up production capacity, launching, marketing and distributing our oximetry line of products. These activities require additional resources and skills that we will need to secure. There is no assurance that we will be able to raise sufficient capital or attract and retain skilled personnel to enable us to finish development, launch and market these products. Thus, there can be no assurance that we will be able to commercialize all, or any, of these products.

OUR PRODUCTS USE NOVEL TECHNOLOGIES OR APPLY TECHNOLOGIES IN MORE INNOVATIVE WAYS THAN OTHER COMPETING MEDICAL DEVICES AND ARE OR WILL BE NEW TO THE MARKET; ACCORDINGLY, WE MAY NOT BE SUCCESSFUL IN ACHIEVING WIDE ACCEPTANCE OF OUR PRODUCTS AND OUR OPERATIONS AND GROWTH WOULD BE ADVERSELY AFFECTED.

Our products are based on new methods of reflective pulse oximetry. If our products do not achieve significant market acceptance, our sales will be limited and our financial condition may suffer. Physicians and individuals may not recommend or use our products unless they determine that these products are an attractive alternative to current tests that have a long history of safe and effective use. To date, few independent studies regarding our products have been published. The lack of independent studies limits the ability of doctors or consumers to compare our products to

conventional products.

IF WE ARE UNABLE TO COMPETE EFFECTIVELY IN THE HIGHLY COMPETITIVE MEDICAL DEVICE INDUSTRY, OUR FUTURE GROWTH AND OPERATING RESULTS WILL SUFFER.

The medical device industry in general, and the markets in which we expect to offer products in particular, are intensely competitive. Many of our competitors have substantially greater financial, research, technical, manufacturing, marketing and distribution resources than we possess and have greater name recognition and lengthier operating histories in the health care industry. We may not be able to effectively compete against these and other competitors. A number of competitors offer oximetry products. These products and monitors are widely accepted in the health care industry and have a long history of accurate and effective use. Further, if our products are not available at competitive prices, health care administrators who are subject to increasing pressures to reduce costs may not elect to purchase them.

-8-

Furthermore, our competitors may succeed in developing, either before or after the development and commercialization of our further products, devices and technologies that permit more efficient, less expensive non-invasive and less invasive pulse oximetry monitoring.

WE HAVE LIMITED MANUFACTURING EXPERIENCE, WHICH COULD LIMIT OUR GROWTH.

We do not have sufficient internal manufacturing experience that would enable us to make products in the volumes that would be necessary for us to achieve significant commercial sales, and we rely upon our suppliers. In addition, we may not be able to establish and maintain reliable, efficient, full scale manufacturing at commercially reasonable costs, in a timely fashion. Difficulties we encounter in manufacturing scale-up, or our failure to implement and maintain our manufacturing facilities in accordance with good manufacturing practice regulations, international quality standards or other regulatory requirements, could result in a delay or termination of production. We may decide to manufacture these products ourselves in the future or may decide to manufacture products that are currently under development in this market segment. Companies often encounter difficulties in scaling up production, including problems involving production yield, quality control and assurance, and shortages of qualified personnel.

Since we are relying on third party manufacturing for our initial product offerings in the pulse oximetry product line, we are dependent upon those parties for product supply. Any delay in initiating production or scaling production to higher volumes could result in delays of product introduction, or create lower availability of product than our expectations. These delays could lead to lower revenue achievement and additional cash requirements for us.

CONCENTRATIONS OF AVAILABLE SOURCES OF SUPPLY OF PRODUCTS

Certain components used in the Company's products are currently available to the Company from only one source and other components are currently available from only a limited number of sources. The Company does not have long-term supply contracts with its suppliers. In addition, the Company employs several unaffiliated subcontractors outside of Israel for the manufacture of its chipsets. While the Company has been able to obtain adequate supplies of components and has experienced no material problems with subcontractors to date, in the event that any of these suppliers or subcontractors is unable to meet the Company's requirements in a timely manner, the Company may experience an interruption in production. Any such disruption, or any other interruption of such suppliers' or subcontractors' ability to provide components to the Company and manufacture its chipsets, could result in delays in making product shipments, which could have a material adverse impact on the Company's business, financial condition and results of operations.

OUR LIMITED MARKETING AND SALES EXPERIENCE MAKES OUR REVENUE UNCERTAIN.

We are responsible for marketing our oximetry product line. We have relatively limited experience in marketing or selling medical device products and only have a two person internal marketing and sales team. In order to successfully continue to market and sell our products, we must either develop a marketing and sales force or expand our arrangements with third parties to market and sell our products. We may not be able to successfully develop an effective marketing and sales force, and we may not be able to enter into and maintain marketing and sales agreements with third parties on acceptable terms, if at all. If we develop our own marketing and sales capabilities, we will compete with other companies that have experienced and well-funded marketing and sales operations. If we enter into a marketing arrangement with a third party, any revenues we would receive will be dependent on this third party, and we will likely be required to pay a sales commission or similar compensation to this party. The efforts of these third parties for the marketing and sale of our products may not be successful.

BECAUSE WE OPERATE IN AN INDUSTRY WITH SIGNIFICANT PRODUCT LIABILITY RISK, AND WE HAVE NOT SPECIFICALLY INSURED AGAINST THIS RISK, WE MAY BE SUBJECT TO SUBSTANTIAL CLAIMS AGAINST OUR PRODUCTS.

The development, manufacture and sale of medical products entail significant risks of product liability claims. We currently have limited product liability insurance coverage beyond that provided by our general liability insurance. Accordingly, we may not be adequately protected from any liabilities, including any adverse judgments or settlements, we might incur in connection with the development, clinical testing, manufacture and sale of our products. A successful product liability claim or series of claims brought against us that result in an adverse judgment against or settlement by us in excess of any insurance coverage could seriously harm our financial condition or reputation. In addition, product liability insurance is expensive and may not be available to us on acceptable terms, if at all.

-9-

THE AVAILABILITY OF THIRD-PARTY REIMBURSEMENT FOR OUR PRODUCTS IS UNCERTAIN, WHICH MAY LIMIT CONSUMER USE AND THE MARKET FOR OUR PRODUCTS.

In the United States and elsewhere, sales of medical products are dependent, in part, on the ability of consumers of these products to obtain reimbursement for all or a portion of their cost from third-party payors, such as government and private insurance plans. Any inability of patients, hospitals, physicians and other users of our products to obtain sufficient reimbursement from third-party payors for our products, or adverse changes in relevant governmental policies or the policies of private third-party payors regarding reimbursement for these products, could limit our ability to sell our products on a competitive basis. We are unable to predict what changes will be made in the reimbursement methods used by third-party health care payors. Moreover, third-party payors are increasingly challenging the prices charged for medical products and services, and some health care providers are gradually adopting a managed care system in which the providers contract to provide comprehensive health care services for a fixed cost per person. Patients, hospitals and physicians may not be able to justify the use of our products by the attendant cost savings and clinical benefits that we believe will be derived from the use of our products, and therefore may not be able to obtain third-party reimbursement.

Reimbursement and health care payment systems in international markets vary significantly by country and include both government sponsored health care and private insurance. We may not be able to obtain approvals for reimbursement from these international third-party payors in a timely manner, if at all. Any failure to receive international reimbursement approvals could have an adverse effect on market acceptance of our products in the international markets in which approvals are sought.

OUR SUCCESS DEPENDS ON OUR ABILITY TO ATTRACT AND RETAIN SCIENTIFIC, TECHNICAL, MANAGERIAL AND FINANCE PERSONNEL.

Our ability to operate successfully and manage our future growth depends in significant part upon the continued service of key scientific, technical, managerial and finance personnel, as well as our ability to attract and retain additional highly qualified personnel in these fields. We may not be able to attract and retain key employees when necessary, which would limit our operations and growth. In addition, if we are able to successfully develop and commercialize our products, we will need to hire additional scientific, technical, marketing, managerial and finance personnel. We face intense competition for qualified personnel in these areas, many of whom are often subject to competing employment offers.

WE ARE SIGNIFICANTLY INFLUENCED BY OUR DIRECTORS, EXECUTIVE OFFICERS AND THEIR AFFILIATED ENTITIES.

Our directors, executive officers and entities affiliated with them beneficially owned an aggregate of approximately 29% of our outstanding Common Stock as of December 31, 2006. These stockholders, acting together, would be able to exert significant influence on substantially all matters requiring approval by our stockholders, including the election of directors and the approval of mergers and other business combination transactions.

THERE IS NO ACTIVE MARKET FOR OUR COMMON STOCK AND NONE MAY DEVELOP OR BE SUSTAINED

Our Common Stock is quoted on the Pink Sheets under the symbol "SPOM". The Pink Sheets is a centralized quotation service that collects and publishes market maker quotes in real time, primarily through its web site, <http://www.pinksheets.com>. Because our stock trades on the Pink Sheets, rather than on a national securities exchange or even the NASDAQ over-the counter Bulletin Board (OTC) market, you may find it difficult to either dispose of, or to obtain quotations as to the price of, our Common Stock.

There has only been very limited trading activity in our Common Stock. There can be no assurance that a more active trading market will commence in our securities either before or following any new business transaction. Further, in the event that an active trading market commences, there can be no assurance as to the level of any market price of our shares of common stock, whether any trading market will provide liquidity to investors, or whether any trading market will be sustained.

We can provide no assurance when, if ever, our board of directors, will take action to have our Common Stock quoted on the NASDAQ over-the-counter Bulletin Board (OTC) or, even, if the Board were to take such action, no assurance can be given that our Common Stock will in fact be quoted on the OTC Bulletin Board market. Failure to develop or maintain an active trading market could negatively affect the price of our securities.

ADDITIONAL BURDENS IMPOSED UPON BROKER-DEALERS BY THE APPLICATION OF THE "PENNY STOCK" RULES TO OUR COMMON STOCK MAY LIMIT THE MARKET FOR OUR COMMON STOCK.

Broker-dealer practices in connection with transactions in "penny stocks" are regulated by certain penny stock rules adopted by the Securities and Exchange Commission. Penny stocks generally are equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the Nasdaq system, provided that current

-10-

prices and volume information with respect to transactions in such securities are provided by the exchange or system). If our Common Stock continues to be offered at a market price less than \$5.00 per share, and does not qualify for any exemption from the penny stock regulations, our Common Stock will continue to be subject to these additional regulations relating to low-priced stocks.

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document that provides information about penny stocks and the risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction, and monthly account statements showing the market value of each penny stock held in the customer's account. In addition, the penny stock rules generally require that prior to a transaction in a penny stock the broker-dealer make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These requirements have historically resulted in reducing the level of trading activity in securities that become subject to the penny stock rules.

The additional burdens imposed upon broker-dealers by these penny stock requirements may discourage broker-dealers from effecting transactions in the Common Stock, which could severely limit the market liquidity of our Common Stock and our shareholders' ability to sell our Common Stock in the secondary market.

OUR BOARD OF DIRECTORS' RIGHT TO AUTHORIZE THE ISSUANCE OF ADDITIONAL SHARES OF PREFERRED STOCK COULD ADVERSELY IMPACT THE RIGHTS OF HOLDERS OF OUR COMMON STOCK.

Our board of directors currently has the right to designate and authorize the issuance of our preferred stock, in one or more series, with such voting, dividend and other rights as our directors may determine. The board of directors can designate new series of preferred stock without the approval of the holders of our Common Stock. The rights of holders of our Common Stock may be adversely affected by the rights of any holders of shares of preferred stock that may be issued in the future, including without limitation dilution of the equity ownership percentage of our holders of Common Stock and their voting power if we issue preferred stock with voting rights. Additionally, the issuance of preferred stock could make it more difficult for a third party to acquire a majority of our outstanding voting stock.

RISKS RELATED TO OPERATIONS IN ISRAEL

WE DEPEND ON A SINGLE FACILITY IN ISRAEL AND ARE SUSCEPTIBLE TO ANY EVENT THAT WOULD ADVERSELY AFFECT ITS CONDITION.

Most of our laboratory capacity and principal research and development and manufacturing facilities are located in the State of Israel. Fire, natural disaster or any other cause of material disruption in our operation in this location could have a material adverse effect on our business, financial condition and operating results. As discussed above, to remain competitive in the network communications industry, we must respond quickly to technological developments. Damage to our facility in Israel could cause serious delays in the development of new products and services and, therefore, could adversely affect our business. In addition, the particular risks relating to our location in Israel are described below.

THE TRANSFER AND USE OF SOME OF OUR TECHNOLOGY AND ITS PRODUCTION IS LIMITED BECAUSE OF THE RESEARCH AND DEVELOPMENT GRANTS WE RECEIVED FROM THE ISRAELI GOVERNMENT TO DEVELOP SUCH TECHNOLOGY. SUCH LIMITATIONS MAY RESTRICT OUR BUSINESS GROWTH AND PROFITABILITY.

Our research and development efforts associated with the development of oximetry products have been partially financed through grants from the Office of the Chief Scientist of the State of Israel (the "Chief Scientist"). We are subject to certain restrictions under the terms of the Chief Scientist grants. Specifically, the products developed with the funding provided by these grants may not be manufactured, nor may the technology which is embodied in our products be transferred outside of Israel without appropriate governmental approvals and/or fines. These restrictions do not apply to the sale or export from Israel of our products developed with this technology. These restrictions could limit or prevent our growth and profitability.

POLITICAL AND ECONOMIC CONDITIONS IN ISRAEL MAY LIMIT OUR ABILITY TO PRODUCE AND SELL OUR PRODUCTS. THIS COULD RESULT IN A MATERIAL ADVERSE EFFECT ON OUR OPERATIONS AND BUSINESS.

Our research and development and manufacturing facilities are located Israel,. Political, economic and security conditions in Israel directly influence us. Since the establishment of the State of Israel in 1948, Israel and its Arab neighbors have engaged in a number of armed conflicts. A state of hostility, varying in degree and intensity, has led to security and economic problems for

-11-

Israel. Major hostilities between Israel and its neighbors may hinder Israel's international trade and lead to economic downturn. This, in turn, could have a material adverse effect on our operations and business.

Since October 2000, there has been substantial deterioration in the relationship between Israel and the Palestinian Authority that has resulted in increased violence. The future effect of this deterioration and violence on the Israeli economy and our operations is unclear. Ongoing violence between Israel and the Palestinians as well as tension between Israel and the neighboring Syria and Lebanon may have a material adverse effect on our business, financial conditions or results of operations.

Generally, male adult citizens and permanent residents of Israel under the age of 51 are obligated to perform up to 36 days of military reserve duty annually. Additionally, these residents may be called to active duty at any time under emergency circumstances. The full impact on our workforce or business if some of our officers and employees are called upon to perform military reserve service is difficult to predict.

ITEM 2. DESCRIPTION OF PROPERTY

We do not own any real property. Our corporate headquarters are located at 21860 Burbank Blvd, North Building Suite 380, Woodland Hills California and are currently comprised of approximately 430 square feet. We use these premises primarily for our corporate offices. The current monthly rental under the lease is approximately \$2,500. The lease term is scheduled to expire in June 2007 and has an extension option of a further six months, the rental cost will rise to \$2,600 from April 1, 2007. We anticipate that we will be able to renew and continue to rent on a month-by-month basis on substantially the same lease terms.

We also lease approximately 1290 square feet in Kfar Saba, Israel which is used for administrative offices for our subsidiary SPO Ltd. under a lease that expires in January 2008. with a further option to extend it through January 2009. In addition, we also lease approximately 3230 square feet in Kiryat Malachi, Israel which is used by SPO Ltd. for research the research and development activities under a lease that expires in August 2011 The aggregate monthly rental payment for both of the leases in Israel are approximately \$3,000.

We believe that our facilities are generally in good condition and suitable to carry on our business. We also believe that, if required, suitable alternative or additional space will be available to us on commercially reasonable terms.

ITEM 3. LEGAL PROCEEDINGS

There are no material pending legal proceedings to which we are a party or to which any of our properties are subject. There are no material proceedings known to us to be contemplated by any governmental authority.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None

PART II

ITEM 5. MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our Common Stock is quoted on the Pink Sheets LLC's Electronic Inter-dealer Quotation and Trading System (the "Pink Sheets") under ticker symbol "SPOM". Trading of our Common Stock on the Pink Sheets has been sporadic and limited. There can be no assurance that an established trading market will develop, that the current market will be maintained or that a liquid market for our Common Stock will be available in the future. Prior to May 2005, although

our Common Stock was quoted on the Pink Sheets under the symbol "UNDI", there was no active trading market for the Common Stock. Investors should not rely on historical stock price performance as an indication of future price performance.

The following table shows the quarterly high and low bid prices for our Common Stock over the last two completed fiscal years. The prices represent quotations by dealers without adjustments for retail mark-ups, mark-downs or commission and may not represent actual transactions.

-12-

	LOW	HIGH
Year Ended		
December 31, 2006		
First Quarter	\$ 1.25	\$ 2.25
Second Quarter	\$ 1.5	\$ 2.5
Third Quarter	\$ 1.9	\$ 3
Fourth Quarter	\$ 1.5	\$ 2.5
Year Ended		
December 31, 2005		
First Quarter	\$ —	—
Second Quarter	\$ 0.20	1.00
Third Quarter	\$ 0.65	1.00
Fourth Quarter	\$ 0.65	1.25

As of February 26, 2007, there were approximately 118 holders of record of our Common Stock. We believe that a number of shares of our Common Stock are held in either nominee name or street name brokerage accounts and, consequently, we are unable to determine the exact number of beneficial owners of our stock.

DIVIDEND POLICY

We have paid no dividends on our Common Stock and do not expect to pay cash dividends in the foreseeable future with respect to the Common Stock. It is the present policy of our board of directors to retain all earnings to provide funds for our growth. The declaration and payment of dividends in the future will be determined by our board based upon our earnings, financial condition, capital requirements and such other factors as our board may deem relevant. We are not under any contractual restriction as to our present or future ability to pay dividends.

RECENT SALES OF UNREGISTERED SECURITIES

We did not sell any securities during the three months ended December 31, 2006.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS

THE FOLLOWING DISCUSSION SHOULD BE READ IN CONJUNCTION WITH OUR FINANCIAL STATEMENTS AND THE NOTES RELATED TO THOSE STATEMENTS. SOME OF OUR DISCUSSION IS FORWARD-LOOKING AND INVOLVES RISKS AND UNCERTAINTIES. FOR INFORMATION REGARDING RISK FACTORS THAT COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, REFER TO THE RISK FACTORS SECTION OF THIS ANNUAL REPORT.

OVERVIEW

We are engaged in the design, development and marketing of non-invasive pulse oximetry technologies to monitor blood oxygen saturation and heart rate for a variety of markets, including medical, homecare, sports and search & rescue. Pulse oximetry is a non-invasive process used to measure blood oxygen saturation levels and is an established procedure in medical practice.

We were originally organized under the laws of the State of Delaware in September 1981 under the name "Applied DNA Systems, Inc." On November 16, 1994, we changed our name to "Nu-Tech Bio-Med, Inc." On December 23, 1998, we changed our name to "United Diagnostic, Inc." Effective April 21, 2005, we acquired 100% of the outstanding capital stock of SPO Ltd. pursuant to a Capital Stock Exchange Agreement dated as of February 28, 2005

among the Company, SPO Ltd. and the shareholders of SPO Ltd., as amended and restated on April 21, 2005 pursuant to which we issued to the former shareholders of SPO Ltd. a total of 5,769,106 shares of the Company's Common Stock representing approximately 90% of the Common Stock then issued and outstanding.

We have generated significant operating losses since inception and we have a limited operating history upon which an evaluation of our prospects can be made. Our prospects must therefore be evaluated in light of the problems, expenses, delays and complications associated with a development stage company.

CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial condition and results of operations are based upon our audited consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going

-13-

basis, we evaluate our estimates, including those related to revenue recognition, bad debts, investments, intangible assets and income taxes. Our estimates are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

We have identified the accounting policies below as critical to our business operations and the understanding of our results of operations.

REVENUE RECOGNITION

We generate revenues principally from sales of our products. Revenues from the sale of products are recognized when delivery has occurred, persuasive evidence of an arrangement exists, the vendor's fee is fixed or determinable, no further obligation exists and collection of is probable and there are no remaining significant obligations. Delivery is deemed to have occurred upon shipment of products from any of the distribution centers of the Company.

We also generate revenues from the provision of research and development services. Revenues generated from research and development services are recognized when such services are performed.

INVENTORY VALUATION

Inventories are stated at the lower of cost or market. Cost is determined as follows: raw materials, components and finished products - on the first in first out (FIFO) basis. Work-in-process - on the basis of direct manufacturing costs.

USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

RESULTS OF OPERATIONS

COMPARISON OF THE YEAR ENDED DECEMBER 31, 2006 (the "2006 Period") AND THE YEAR ENDED DECEMBER 31, 2005 (the "2005 Period")

REVENUES. Revenues for the 2006 Period were \$3,714,000, an increase of 103% over revenues of \$1,825,000 for the 2005 Period. Revenues were derived primarily from sales of our PulseOX 5500 TM designed for the medical and homecare markets.

COSTS OF REVENUES. Costs of revenues for the 2006 Period were \$1,809,000 compared to \$843,000 for 2005 Period. Costs of revenues include all costs related to manufacturing products and services and consist primarily of direct material costs, shipping and salaries and related expenses for personnel. Included in cost of revenues were non cash compensation benefits of \$13,000 and \$4,000 in respect of 2006 and 2005 respectively.

RESEARCH AND DEVELOPMENT EXPENSES. Research and development expenses consist primarily of expenses incurred in the design, development and testing of our products. These expenses consist primarily of salaries and related expenses for personnel, contract design and testing services, supplies used and consulting and license fees paid to third parties and are net of any government grants and development fees charged to third parties. Research and development expenses for the 2006 Period were \$972,000 compared to \$584,000 for the 2005 Period. The increase in research and development expenses for the 2006 Period as compared to 2005 Period is primarily attributable to the increase in employee and related compensation costs. Included in research and development expenses were non cash compensation benefits of \$176,000 and \$66,000 in respect of 2006 and 2005.

SELLING AND MARKETING EXPENSES. Selling and marketing expenses consist primarily of costs relating to compensation attributable to employees engaged in sales and marketing activities, promotion, sales support, travel and related expenses. Selling and marketing expenses for the 2006 Period and 2005 Period were \$671,000 and \$786,000, respectively. The decrease in sales and marketing during the 2006 Period is primarily attributable to the decrease of non cash compensation benefits to consultants and employees which amounted to \$99,000 and \$349,000 for the 2006 Period and 2005 Period, respectively, offset by the increase of employees engaged in sales and marketing activities and related compensation .

GENERAL AND ADMINISTRATIVE EXPENSES. General and administrative expenses primarily consist of salaries and other related costs for personnel in executive and other administrative functions. Other significant costs include professional fees for legal, accounting services. General and administrative expenses for the 2006 Period and 2005 Period were \$923,000 and

-14-

\$782,000, respectively. The increase in general and administrative expenses during 2006 Period is primarily attributable to higher compensation costs and higher accounting and legal and professional expenses. Included in general and administrative expenses were non cash compensation benefits of \$122,000 and \$117,000 in respect of 2006 and 2005 respectively.

FINANCIAL EXPENSES, NET. Financial expense net, for the 2006 Period and 2005 Period were \$4,302,000 and \$617,000, respectively. Included in financial expenses were non cash compensation benefits to lenders and consultants and amortization of loan discounts of \$4,097,000 and \$370,000 in respect of 2006 and 2005 respectively.

NET LOSS. For the 2006 Period and 2005 Period we had a net loss of \$4,963,000 and \$2,038,000, respectively.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2006, we had cash and cash equivalents of \$836,000 compared to \$493,000 at December 31, 2005. The increase in available cash resources is primarily attributable to the funds raised from the private placement of our securities discussed below.

We generated negative cash flow from operating activities of approximately \$443,000 during the 2006 Period compared to \$1,209,000 for the 2005 Period.

In December 2005 we completed the private placement to certain accredited investors that we commenced in April 2005 for the issuance of up to \$1,544,000 of units of our securities, with each unit comprised of (i) our 18 month 6% promissory note (collectively, the "April 2005 Notes") and (ii) three year warrants to purchase up to such number of shares of our Common Stock as are determined by the principal amount of the Note purchased by such investor divided by \$ 0.85 (collectively the "April 2005 Warrants"). In September 2006, we offered to the holders of the April 2005 Notes to revise certain of the terms of the original offering in order to facilitate an extension to the scheduled maturity date of the Note, (hereinafter the "Amendment"). The Amendment provides that (a) the maturity date of the April 2005 Notes is to be extended by one year from the original maturity date on the original note, (b) the exercise period of the April 2005 Warrants is to be extended from three to five years and the per share exercise price was adjusted to \$0.60 and (c) the interest rate on the amounts outstanding under the April 2005 Notes was increased to 8% per annum, effective July 12, 2006. The Amendment also provides that if we subsequently issue shares of our Common Stock at an effective per share exercise price less than that of the adjusted per share exercise price of the April 2005 Warrants during the adjusted exercise period, then the exercise price thereof is to be reduced to such lower exercise price; provided, that, this protection will not apply to certain of our equity or debt issuances (i) from approved stock option plans to employees, directors and other service providers, (ii) upon exercise of options and warrants outstanding as of September 27, 2006 and (iii) to our consultants that an unaffiliated third party would deem to be commercially reasonable and fair. In addition, the Amendment also provides that, subject to certain qualifications, our obligation to file a registration statement under the Securities Act of 1933, as amended, relating to the resale of our Common Stock underlying the April 2005 Warrants is extended to April 15, 2007. The Amendment became effective as of September 30, 2006. The Amendment resulted in a one time non-cash finance expense in the amount of approximately \$2,500,000 being recognized in 2006. As of March 19, 2007, holders of Notes in the principal amount \$1,414,000 have signed the Amendment and the holder of a note in the principal amount of \$50,000 which matured on November 30, 2006 has requested repayment of principle and accrued interest. The Company is currently in contact with the remaining note holders of \$80,000 of the April 2005 Notes with respect to obtaining their formal execution of the Amendment.

Our recent financings in 2006 are discussed below.

On February 1, 2006 we borrowed the principal amount of \$150,000. This loan bears interest at an annual rate of prime plus 4% and is repayable in four equal installments every three calendar months through January 31, 2007. We

issued to the holder of this indebtedness a three year warrant to purchase up to 60,000 shares of Common Stock at a per share exercise price of \$0.85. As of December 31, 2006, we repaid \$119,000 representing principal and accrued interest then due. On January 31, 2007 the final installment of \$48,000 including accrued interest was repaid.

In January 2006 we and an institutional investor entered into an agreement pursuant to which we agreed to sell to such investor shares of our Common Stock at \$0.70 per share for aggregate gross proceeds of \$600,000. The private placement was completed in June 2006.

In July 2006, we commenced a private placement of units of our securities comprised of our (i) 8% promissory note that becomes due 12 months following issuance and (ii) warrants as described below. The principal and accrued interest on the promissory is scheduled to be paid in one balloon payment at the end of the twelve month period. Each purchaser of the note would receive warrants, exercisable over a period of two years from the date of issuance, to purchase 16,250 shares of our

-15-

Common Stock for each \$25,000 of principal loaned, at per share exercise price equal to the lower of \$1.50 or 35% less than any the offering price at an initial public offering of our Common Stock during the warrant exercise period. We raised \$550,000 in gross proceeds from this offering, which represents the maximum amount that could be raised under this offering.

Additionally, we obtained an extension of nine months to the scheduled maturity of our convertible promissory notes (collectively the "Notes") that had been raised in January 2005 from the private placement of our debt instruments and warrants, in the aggregate principal amount of \$300,000. The Notes became payable on September 30, 2006; interest accrued at a per annum rate of 8%. At the election of the holder, the Notes are convertible into our Common Stock at a per share price equal to the lesser of (i) 60% of the per share purchase price of any security subsequently sold by us and (ii) \$0.705. In September 2006, the outstanding principal and accrued interest were converted into 948,949 shares of our Common Stock.

We will need to raise additional funds to be able to satisfy our cash requirements over the next twelve months. Product development, corporate operations and marketing expenses will continue to require additional capital. Our current revenue from operations is insufficient to cover our current operating expenses and projected expansion plans. We therefore are aggressively seeking additional financing through the sale of our equity and/or debt securities to satisfy future capital requirements until such time as we are able to generate sufficient cash flow from revenues to finance on-going operations. No assurance can be provided that additional capital will be available to us on commercially acceptable or at all. Our auditors included a "going concern" qualification in their auditors' report for the year ended December 31, 2006. While we have raised approximately \$1,300,000 in gross proceeds from the issuance of our debt and equity securities during 2006, such "going concern" qualification may make it more difficult for us to raise funds when needed. Additional equity financings may be dilutive to holders of our Common Stock.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

(1) SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments—an Amendment of FASB Statements No. 133 and 140" - In February 2006, the Financial Accounting Standards Board (the "FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 155, "Accounting for Certain Hybrid Financial Instruments—an Amendment of FASB Statements No. 133 and 140" ("SFAS 155") to simplify and make more consistent the accounting for certain financial instruments. Namely, SFAS 155 amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" to permit fair value remeasurement for any hybrid financial instrument with an embedded derivative that otherwise would require bifurcation, provided that the whole instrument is accounted for on a fair value basis. SFAS 155 amends SFAS No. 140, "Accounting for the Impairment or Disposal of Long-Lived Assets" to allow for a qualifying special-purpose entity to hold a derivative financial instrument that relates to a beneficial interest other than another derivative financial instrument.

SFAS 155 applies to all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006, with earlier application permitted. Accordingly, the Company will adopt SFAS 155 as of January 1, 2007. The adoption of SFAS 155 is not expected to have any effect on the Company's financial position or results of operations.

(2) FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109" - In June 2006, the FASB issued FASB Interpretation No. 48 ("FIN-48"), "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109." The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, "Accounting for Income Taxes." Specifically, FIN-48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken. The provisions of FIN-48 are effective for financial statements for fiscal years beginning after December 15, 2006. Accordingly, the Company will adopt FIN-48 as of January 1, 2007. The adoption of FIN-48 is not expected to

have a material effect on the Company's financial position or results of operations.

- (3) SFAS No. 157, "Fair Value Measurements" - In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" ("SFAS 157"), which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 applies whenever other accounting standards require or permit assets or liabilities to be measured at fair value. Accordingly, it does not expand the use of fair value in any new circumstances. Fair value under SFAS 157 is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This Standard clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data, for example, a reporting entity's own data. Under SFAS 157, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS 157 is effective for fiscal years beginning after November 15, 2007. Accordingly, the Company is to adopt SFAS 157 on January 1, 2008. The adoption of SFAS 157 is not expected to have a material effect on the Company's financial position or results of operations.

(4) Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements" - In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements" ("SAB 108"), which provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment two approaches are commonly used to evaluate the materiality of misstatements or errors in financial statements: the roll-over, also known as the current-period or income-statement approach, and the iron curtain, also known as the cumulative or balance-sheet approach. The roll-over approach quantifies a misstatement based on the amount of the error originating in the current-period income statement. This approach could allow balance sheet items to grow each year by immaterial amounts, until the cumulative error becomes material. The iron curtain approach quantifies a misstatement based on the effects of correcting the misstatement existing in the balance sheet at the end of the current period. This approach does not consider the income statement effects of correcting prior year misstatements in the current year to be errors.

The reliance on only one of these approaches, to the exclusion of the other, does not appropriately quantify all misstatements that could be material to financial-statement users. Accordingly, SAB 108 will require quantification of financial statement errors based on the effects of the error on each of an entity's financial statements and the related financial statement disclosures. This model is commonly referred to as a dual approach because it essentially requires quantification of errors under both the iron-curtain and the roll-over approaches.

SAB 108 is effective for annual financial statements covering the first fiscal year ending after November 15, 2006. From a transition perspective, SAB 108 permits companies to record the cumulative effect of initially applying the dual approach in the first year ending after November 15, 2006 by recording any necessary correcting adjustments to the carrying values of assets and liabilities as of the beginning of that year with the offsetting adjustment recorded to the opening balance of retained earnings. The initial adoption of SAB 108 had no affect on the Company's financial position, results of operations or cash flows.

ITEM 7. FINANCIAL STATEMENTS

The information called for by this Item 7 is included following the "Index to Consolidated Financial Statements" contained in this Annual Report on Form 10-KSB.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

Our auditor prior to the Acquisition Transaction was Marcum & Kliegman LLP ("MKLLP"). The auditor of SPO Ltd., the acquired company, prior to the Acquisition Transaction and thereafter, is Brightman Almagor & Co., certified public accountants (Israel) and a member of Deloitte Touche Tohmatsu ("Brightman"). Following the Acquisition Transaction, effective November 18, 2005, the audit committee and our board of directors dismissed MKLLP as our independent accountant and engaged the services of Brightman as new independent accountants.

The reports of MKLLP did not contain an adverse opinion or disclaimer of opinion but were qualified as to going concern limitations. During our two most recent fiscal years and subsequent interim periods there were no disagreements with MKLLP on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of MKLLP, would have caused MKLLP to make reference to the subject matter of the disagreements in their report on the financial statements for such years.

ITEM 8A. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of "disclosure controls and procedures" in Rule 13a-14(c).

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Principal

-17-

Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report to provide reasonable assurance that material information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

Management is aware that there is a lack of segregation of duties due to the small number of employees dealing with general administrative and financial matters. However, at this time, management has decided that considering the employees involved, the control procedures in place, and the outsourcing of certain financial functions, the risks associated with such lack of segregation are low and the potential benefits of adding additional employees to clearly segregate duties do not justify the expenses associated with such increases. Management will periodically reevaluate this situation. If the volume of the business increases and sufficient capital is secured, it is our intention to increase staffing to mitigate the current lack of segregation of duties within the general administrative and financial functions.

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. Such limitations include the fact that human judgment in decision-making can be faulty and that breakdowns in internal control can occur because of human failures, such as simple errors or mistakes or intentional circumvention of the established process.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING. Except as described above, during our the three months ended December 31, 2006, there have not been any changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, these controls.

ITEM 8B. OTHER INFORMATION

None.

PART III

ITEM 9. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Management

The individuals who serve as our executive officers and directors are:

NAME	AGE	POSITION
Michael Braunold	47	President, Chief Executive Officer and Director
Richard H. Ryan	55	Chief Operating Officer
Jeff Feuer	42	Chief Financial Officer
Israel Sarussi	56	Chief Technology Officer
Pauline Dorfman	42	Director (1)
Sidney Braun	47	Director (1)

(1) Audit Committee and Compensation Committee Member.

The business experience, principal occupations and employment, as well as the periods of service, of each of our directors and executive officers during at least the last five years are set forth below.

MICHAEL BRAUNOLD has been Chief Executive Officer of SPO Ltd. since March 1998 and the President and Chief Executive Officer of the Company since May 18, 2005. Prior to March 1998, Mr. Braunold was Senior Director of Business Development at Scitex Corporation Ltd., a multinational corporation specializing in visual information communication. In such capacity, Mr. Braunold played a strategic role in managing a team of professionals assigned to M&A activities. During his 12-year tenure at Scitex, he held various positions within the worldwide organization, including a period in the United States as Vice President of an American subsidiary of Scitex specializing in medical imaging. From March 2000 through September 2000, Mr. Braunold was also the Chief Executive Officer and Chairman of Ambient Corporation, a Delaware company, that specializes in the implementation of a proposed comprehensive high-speed communication infrastructure that is designed to utilize existing electrical power distribution lines as a high-speed communication medium. Mr. Braunold served as a director of Amedia

-18-

Networks, Inc. (formerly TTR Technologies, Inc.) from February 2000 through August 2002. Mr. Braunold obtained a Bachelor of Science degree with honors in Engineering and Management Sciences from Imperial College Business School, London.

RICHARD H. RYAN has been Chief Operating Officer of the Company since May 2005. Prior to joining Philips Medical Systems in 2001, Mr. Ryan was contracted by Agilent Technologies, where he assisted in the successful divestiture of its Healthcare Solutions Group to Philips Medical Systems; he also oversaw the transfer of three production lines from Xing Dao, in Mainland China, to a local subsidiary in California. Following the acquisition by Philips, he was asked to join the corporate management team to help set up their new Global Materials Organization (the GMO) and was a founding member of its Executive Board. During his tenure at Philips Medical Systems, Mr. Ryan was instrumental in driving a cultural change in supplier management, creating new supply chain opportunities in Asia while reducing costs at most of the company's manufacturing sites worldwide.

JEFF FEUER has been Chief Financial Officer of the Company since July 14, 2005. Prior to joining the Company, Mr. Feuer served in similar capacities at Transpharma Medical Ltd., a biomedical device start-up company (January 2004 through May 2005), and Finjan Software Inc., a security software company (September 1999 through September 2003). From July 1996 to September 1999, he served as corporate controller of Aladdin Knowledge Systems, Ltd., an Israeli based NASDAQ company. Prior to this he was a senior auditor in public accounting both in Israel and the UK.

ISRAEL SARUSSI has been the Chief Technology Officer of SPO Ltd. since its inception in 1996 and Chief Technology Officer of the Company since April 21, 2005. Prior to joining SPO Ltd., Mr. Sarussi established a private company specializing in computer systems for agricultural applications. Israel has held various technical positions at several hi-tech Israeli companies including Elta Electronics, a company specializing in military communications, where he was assigned to advanced development projects for the Israeli Air Force. He holds a degree in Electronic Engineering from Ben Gurion University, Be'ersheba.

PAULINE DORFMAN has served as a director since April 21, 2005. Since January 2001 Ms. Dorfman, a qualified chartered accountant and chartered business valuator, has been a consultant that assists government, commercial business, law and accounting firms in the area of valuations, forensic investigations, litigation support and dispute resolution. Ms. Dorfman specializes in conducting analysis and financial investigations in connection with valuations for various purposes such as international development disputes, income tax, estate planning, matrimonial disputes, and economic damage quantification for breach of contract and insurance related matters such as expropriations, business interruptions and personal injuries. Prior to this assignment, Ms. Dorfman worked for 10 years with the Toronto Dominion Bank in the finance and commercial lending areas analyzing the financial risk of various bank investments and strategies, assisting in the development of new bank products, developing accounting policies and controls and meeting the external and internal financial reporting requirements of the bank..

SIDNEY BRAUN has served as a director since April 21, 2005. From June 2004 to September 2006, Mr. Braun has served as the President and Chief Operating Officer for Med-Emerg International Inc. (MEII), a company incorporated in the Province of Ontario and continues to serve on the board of directors of MEII. Since September 2006, Mr. Braun is also a director of Romlight International Inc., a developer and manufacturer of electronic ballasts and Romlight International (Canada) Inc.. Mr. Braun has extensive experience in commerce both in North America and Europe, including manufacturing, distribution and trading. Prior to his position at MEII and Romlight, Mr. Braun worked for 7 years as an independent consultant to several large state-owned corporations from the former Eastern European block on developing business strategies and adapting to new working conditions in western markets. In addition, Mr. Braun developed expertise in emerging financial markets in Europe and introduced several companies to the UK and German capital markets.

Committees of the Board of Directors

Our Board of Directors operates with the assistance of the Audit Committee and the Compensation Committee. Due to the small size of our Board, we do not presently maintain a formal nominating committee. The entire Board participates in the process of nominating candidates for the Board of Directors.

The function of the Audit Committee is to (i) make recommendations to the full Board of Directors with respect to appointment of our independent public accountants, and (ii) meet periodically with our independent public accountants to review the general scope of audit coverage, including consideration of internal accounting controls and financial reporting.

The Board of Directors has determined that Pauline Dorfman is an "Audit Committee Financial Expert" for purposes of the SEC's rules. The Board believes that Ms. Dorfman meets the independence criteria set out in Rule 4200(a)(14) of the Marketplace Rules of the National Association of Securities Dealers and the rules and other requirements of the SEC.

-19-

The Compensation Committee sets compensation policy and administers our cash and equity incentive programs for the purpose of attracting and retaining skilled executives who will promote the Company's business goals and build shareholder value. The committee is also responsible for reviewing and making recommendations to the Board regarding all forms of compensation to be provided to the Company's named executive officers, including stock compensation and bonuses.

Board of Directors; Appointment of Officers

All directors are elected by a plurality vote at the annual meeting of the shareholders, and shall hold office until his successor is duly elected and qualified. Any vacancy occurring in the Board of Directors may be filled by the shareholders, the Board of Directors, or if the Directors remaining in office constitute less than a quorum of the Board of Directors, they may fill the vacancy by the affirmative vote of a majority of the Directors remaining in office. A director elected to fill a vacancy is elected for the unexpired term of his predecessor in office. Any directorship filled by reason of an increase in the number of directors shall expire at the next shareholders' meeting in which directors are elected, unless the vacancy is filled by the shareholders, in which case the term shall expire on the later of (i) the next meeting of the shareholders or (ii) the term designated for the director at the time of creation of the position being filled.

Our executive officers are appointed by our board of directors. Each officer shall hold office until the earlier of: his death; resignation or removal from office; or the appointment and qualification of his successor.

CODE OF ETHICS

We have adopted a code of ethics that applies to our chief executive officer, president, chief financial officer, controller and others performing similar executive and financial functions at the Company. A copy of our policy was attached as an exhibit to our annual report on Form 10-KSB for the year ended December 31, 2005. We intend to satisfy the disclosure requirement under Item 10 of Form 8-K regarding an amendment to, or waiver from, a provision of this code of ethics by posting such information on our Website, at the address and location specified above.

SECTION 16(A) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Section 16(a) of the Securities Exchange Act of 1934, as amended, requires each of our officers and directors and each person who owns more than 10% of a registered class of our equity securities to file with the SEC an initial report of ownership and subsequent reports of changes in such ownership. Such persons are further required by SEC regulation to furnish us with copies of all Section 16(a) forms (including Forms 3, 4 and 5) that they file. Based solely on our review of the copies of such forms received by us with respect to fiscal year 2006, or written representations from certain reporting persons, we believe all of our directors and executive officers met all applicable filing requirements.

ITEM 10. EXECUTIVE COMPENSATION

The following table sets forth all compensation for the last fiscal year awarded to, earned by, or paid to our Chief Executive Officer and the two most highly paid executive officers serving as such at the end of 2006 whose salary and bonus exceeded \$100,000 for the year ended December 31, 2006 (the "Named Executive Officers").

SUMMARY COMPENSATION TABLE

Name & Principal Position	Year	Salary (\$)	Bonus (\$)	Option Awards (\$ (1))	All Other Compensation (\$)	Total (\$)

MICHAEL BRAUNOLD President and Chief Executive Officer	2006	\$165,041	—	—	\$52,976 (2)	\$218,017
ISRAEL SARUSSI Chief Technology Officer	2006	\$173,608	—	—	\$48,201 (3)	\$221,809
RICHARD H. RYAN Chief Operating Officer	2006	152,885	—	\$55,668	\$12,444 (4)	\$220,997

(1) Amounts in this column reflect the expense recognized by us for accounting purposes calculated in accordance with FASB Statement of Financial Accounting Standards No. 123R ("FAS 123R") with respect to employee stock options issued under the Company's 2005 Incentive Plan in 2005. The assumptions used to calculate the fair value of stock option grants under FAS 123R, were: expected holding period of 10 years, risk free interest rate of 2.63%, no dividend yield and volatility of 100%.

- (2) Reflects payments made by us in connection with a leased automobile and related benefits (\$12,567) and contributions to insurance premiums paid under Israeli law for pension, severance and further education funds (\$40,409).
- (3) Reflects payments made by us in connection with a leased automobile and related benefits (\$14,486) and contributions to insurance premiums paid under Israeli law for pension, severance and further education funds (\$33,716).
- (4) Reflects payments made by us for health insurance contributions.

None of the Named Executive Officers received any option grants during the fiscal year ended December 31, 2006.

Outstanding Equity Awards at Fiscal Year End

The following table sets forth information concerning unexercised options and stock that has not vested for each of our executive officers named in the Summary Compensation Table that are outstanding as of December 31, 2006.

-21-

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR-END — DECEMBER 31, 2006

Name	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Equity Incentive Plan Awards: Number of Securities Underlying Unexercised Unearned Options (#)	Option Exercise Price (\$)	Option Expiration Date
M i c h a e l Braunold	250,000 (1)	—	—	\$0.60	12/22/15
Israel Sarusi	— (2)	—	—	—	—
Richard H. Ryan	150,000 (3)	50,000	—	\$0.05	5/1/15

(1) Options were issued under our 2005 Equity Incentive Plan on December 22, 2005 and were fully vested upon issuance.

(2) Does not include Warrants for 446,383, issued to Mr. Sarusi on April 21, 2005 in exchange for warrants in SPO Ltd held prior to Acquisition Transaction..

(3) Options were issued under our 2005 Equity Incentive Plan on May 1, 2005. Options for 150,000 shares had vested as of December 31, 2006. Options for the remaining 50,000 shares are scheduled to vest on May 1, 2007.

EMPLOYMENT AGREEMENTS WITH EXECUTIVE OFFICERS

MICHAEL BRAUNOLD. On May 18, 2005, we entered into an employment agreement with Michael Braunold, pursuant to which he serve as our Chief Executive Officer and President. On such date, Mr. Braunold and SPO Ltd., entered into an employment agreement pursuant to which Mr. Braunold serves as SPO Ltd.'s Chief Executive Officer. Each of the agreements with us and SPO Ltd. has an initial term of three years commencing on the date of the agreement and is automatically renewable for successive two year terms unless we or Mr. Braunold indicate in writing, upon 90 days prior to the scheduled termination of the initial term or any renewal term, that such party does not intend to renew the agreement. Mr. Braunold is paid a monthly salary of \$13,250 under the agreement with SPO Ltd. Mr. Braunold is not entitled to a salary under the agreement with us but has been granted options under our 2005 Equity Incentive Plan to purchase 250,000 shares of our Common Stock at a per share exercise price of \$0.60. The agreements may be terminated by Mr. Braunold for any reason on 60 days written notice or for Good Reason (as defined in the employment agreement) or by us for Just Cause (as defined in the employment agreement) or for any other reason. In the event of a termination by Mr. Braunold for Good Reason or by us for any reason other than Just Cause, we are to pay Mr. Braunold an amount equal to (i) if such termination occurs during the initial term of the agreement, the base salary then payable, if any, for the longer of (a) the period from the date of such termination to the end of the initial term as if the agreement had not been so terminated and (b) twelve months and (ii) if such termination occurs after the initial term, the base salary then payable, if any, for a period of twelve months as if the agreement had not been so terminated.

ISRAEL SARUSSI. In January 1998 SPO Ltd. entered into an employment agreement with Israel Sarussi and which was subsequently amended in 2002 and 2005. Pursuant to the agreement Mr. Sarussi serves as the SPO Ltd.'s Chief

Technical Officer. The agreement with SPO Ltd. terminates on the earlier of: (i) Mr. Sarussi's death or disability, (ii) termination by SPO Ltd. without cause upon 12 months written notice; or (iii) termination of Mr. Sarussi with cause. Mr. Sarussi is paid a monthly salary of \$13,250 under the agreement with SPO Ltd.

Each of these agreements includes certain customary intellectual property development rights, confidentiality and non-compete provisions that prohibit the executive from competing with us for one year, or soliciting our employees for one year, following the termination of his employment.

RICHARD RYAN. On May 18, 2005, we entered into an employment agreement with Richard H. Ryan pursuant to which Mr. Ryan serves as our Chief Operating Officer. The agreement has an initial term of two years. Under the agreement as originally entered into, Mr. Ryan was entitled to a monthly salary of \$8,334 and entitled to a bonus based on the amount of our net sales during the first year of the agreement. In January 2006 the agreement with Mr. Ryan was amended pursuant to which his monthly salary was increased to \$12,500 and the bonus provisions were deleted. In addition, in connection with his employment, in May 2005 Mr. Ryan was granted an option under our 2005 Incentive Plan to purchase up to 200,000 shares of our Common Stock, which option is scheduled to vest over two years vest from the date of grant and is at a per share exercise price of \$0.05. The agreement may be terminated by Mr. Ryan on 60 days' notice or at our election on 90 days' notice without cause.

-22-

COMPENSATION OF DIRECTORS

We paid each outside director \$15,000 per annum for service on our Board of Directors in 2006. In addition, we have granted stock options to directors to compensate them for their services. In June 2006 we issued to each of Pauline Dorfman and Sidney Braun options under our 2005 Non-Employee Directors Stock Option to purchase up to 25,000 shares of our Common Stock each at a per share exercise price of \$0.85. In January 2007, we increased the Director fees in respect of each of our directors to \$25,000 per annum

The following table summarizes data concerning the compensation of our non-employee directors for the fiscal year ended December 31, 2006.

	Fees Earned or paid	Option Awards(\$)	Total
Sidney Braun	\$ 15,000	35,535(1)	\$ 50,535
Pauline Dorfman	\$ 15,000	35,535 (1)	\$ 50,535

(1) Amounts in this column reflect the expense recognized by the Company for accounting purposes calculated in accordance with FASB Statement of Financial Accounting Standards No. 123R ("FAS 123R") with respect to employee stock options issued under the Company's 2005 Incentive Plan in 2005. For information on the assumptions used to calculate the value of stock option grants under FAS 123R, see Note 13 of the Company's financial statements for the year ended December 31, 2006 included elsewhere in this report. Options are discussed in further detail in the Outstanding Equity Awards at Fiscal Year End Table. The assumptions used to calculate the fair value of stock option grants under FAS 123R, were: expected holding period of 3.5 years, risk free interest rate of 4.28%, no dividend yield and volatility of 100%.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth information as of the close of business on March 19, 2007, concerning shares of our common stock beneficially owned by each director and named executive officer, each other person beneficially owning more than 5% of our Common Stock and by all directors and executive officers as a group.

In accordance with the rules of the SEC, the table gives effect to the shares of common stock that could be issued upon the exercise of outstanding options and warrants within 60 days of March 19, 2007. Unless otherwise noted in the footnotes to the table and subject to community property laws where applicable, the following individuals have sole voting and investment control with respect to the shares beneficially owned by them. We have calculated the percentages of shares beneficially owned based on 19,335,525 shares of common stock outstanding at March 19, 2007.

Name of Beneficial Owner (1)	Common Stock Percentage of Beneficially Owned (2)	Common Stock
Michael Braunold	993,922 ⁽³⁾	5.14%
Richard H. Ryan	200,000 ⁽⁴⁾	1.03%
Jeff Feuer	120,000 ⁽⁵⁾	*
Israel Sarussi	4,165,776 ⁽⁶⁾	21.54%
Pauline Dorfman	75,000 ⁽⁷⁾	*
Sidney Braun	75,000 ⁽⁷⁾	*

All officers and directors as a group (6 persons)	5,629,698	29.12%
---	-----------	--------

* Less than 1%

(1) Except as otherwise indicated, the address of each beneficial owner is c/o SPO Medical Inc., 21860 Burbank Blvd., North Building, Suite 380, Woodland Hills, CA 91367.

(2) Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to the shares shown. Except where indicated by footnote and subject to community property laws where applicable, the persons named in the table have sole voting and investment power with respect to all shares of voting securities shown as beneficially owned by them.

-23-

- (3) Includes 250,000 shares of our Common Stock that are issuable upon exercise of vested options issued under our 2005 Equity Incentive Plan (the "2005 Plan").
- (4) Represents shares issuable upon exercise of vested options under the Company's 2005 Plan.
- (5) Represents shares issuable upon exercise of options under the Company's 2005 Plan.
- (6) Comprised of 3,719,393 shares of the Company's Common Stock and 446,383 shares of Common Stock issuable upon exercise of currently exercisable warrants.
- (7) Represents shares issuable upon exercise of currently exercisable options under the Company's 2005 Non-Employee Directors Stock Option Plan (the "2005 Directors Plan").

EQUITY COMPENSATION PLAN INFORMATION

We have two compensation plans (excluding individual stock option grants outside of such plans) under which our equity securities are authorized for issuance to employees, directors and consultants in exchange for services - the 2005 Equity Incentive Plan (the "2005 Plan") and the 2005 Non-Employee Directors Stock Option Plan (the "2005 Directors Plan"; together with the 2005 Plan, the "Plans"). Our shareholders have approved these plans.

The following table presents information as of December 31, 2006 with respect to compensation plans under which equity securities were authorized for issuance, including the 2005 Plan and the Non-Employee Directors Plan and agreements granting options or warrants outside of these plans.

	NUMBER OF SECURITIES TO BE ISSUED UPON EXERCISE OF OUTSTANDING OPTIONS, WARRANTS OR RIGHTS		WEIGHTED- AVERAGE EXERCISE PRICE OF OUTSTANDING OPTIONS, WARRANTS OR RIGHTS		NUMBER OF SECURITIES REMAINING AVAILABLE FOR FUTURE ISSUANCE UNDER EQUITY COMPENSATION PLANS
Equity compensation plans approved by security holders	1,260,000	\$	0.44		890,000
Equity compensation plans not approved by security holders	5,047,422	\$	0.65		
Total	6,307,422	\$	0.64		890,000

NON-SHAREHOLDER APPROVED PLANS

The following is a description of options and warrants granted to employees, directors, advisory directors and consultants that were outstanding as of December 31, 2006.

As of December 31, 2006, we had outstanding options and warrants to purchase an aggregate of 854,308 shares of our Common Stock were granted outside of the Plans. These are comprised of the following: (i) vested options to purchase up to 446,383 shares of our Common Stock issued in April 2005 were granted to Israel Sarussi, an executive officer, at a per share exercise price of \$0.01, (ii) vested warrants to purchase up to 406,925 shares of our Common Stock issued between April and December 2005 to consultants at per share exercise price of \$0.01 and (iii) an unspecified number of warrants issued to placement agents and which will be equal to \$30,000 divided by 60% less than the lowest price of shares of Common Stock sold by the Company in a subsequent transaction.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**Audit and Non-Audit Fees**

The following table presents fees for professional audit services rendered by Brightman Almagor & Co., Certified Public Accountants, A member firm of Deloitte Touche Tohmatsu, for the audit of our annual financial statements for the year ended December 31, 2006 and 2005.

	Fiscal Year Ended December 31, 2006	Fiscal Year Ended December 31, 2005
Audit Fees	\$ 39,000	\$ 36,500
Audit Related Fees	\$ —	\$ —
Tax Fees	\$ 6,500	\$ 18,500
All Other Fees	\$ —	\$ —
Total	\$ 45,500	\$ 55,000

AUDIT FEES were for professional services rendered for the audits of our consolidated financial statements, quarterly review of the financial statements included in our Quarterly Reports on Form 10-QSB, consents, and other assistance required to complete the year-end audit of the consolidated financial statements.

AUDIT-RELATED FEES were for assurance and related services reasonably related to the performance of the audit or review of financial statements and not reported under the caption Audit Fees.

TAX FEES were for professional services related to tax compliance, tax authority audit support and tax planning.

All OTHER FEES include any other fees charged by the Company's auditors that are not otherwise specified.

Our audit committee (the "Audit Committee") reviews non-audit services rendered for each year and determines whether such services are compatible with maintaining the accountants' independence. The Audit Committee's policy is to pre-approve all audit services and all non-audit services that our independent public accountants are permitted to perform for us under applicable federal securities regulations. As permitted by the applicable regulations, the Audit Committee's policy utilizes a combination of specific pre-approval on a case-by-case basis of individual engagements of the independent public accountants and general pre-approval of certain categories of engagements up to predetermined dollar thresholds that are reviewed annually by the Audit Committee. Specific pre-approval is mandatory for, among other things, the annual financial statement audit engagement.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Stockholders of
SPO MEDICAL INC.**

We have audited the accompanying consolidated balance sheet of SPO MEDICAL INC. ("the Company") and its subsidiary as of December 31, 2006, and the related statements of operations, changes in stockholders' equity and cash flows for each of the two years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above, present fairly, in all material respects, the consolidated financial position of the Company and its subsidiary as of December 31, 2006, and the consolidated results of their operations and their cash flows for each of the two years in the period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company has suffered recurring losses from operations and has a shareholders' deficiency that raises doubt about its ability to continue as a going concern. Management's plans concerning these matters are also described in Note 2. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty.

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 1 - GENERAL

SPO Medical Inc. (hereinafter referred to as "SPO" or the "Company") was originally incorporated under the laws of the State of Delaware in September 1981 under the name "Applied DNA Systems, Inc." On November 16, 1994, the Company changed its name to "Nu-Tech Bio-Med, Inc." On December 23, 1998, the Company changed its name to "United Diagnostic, Inc." Effective April 21, 2005, the Company acquired (the "Acquisition Transaction") 100% of the outstanding capital stock of SPO Medical Equipment Ltd., a company incorporated under the laws of the State of Israel ("SPO Ltd."), pursuant to a Capital Stock Exchange Agreement dated as of February 28, 2005 between the Company, SPO Ltd. and the shareholders of SPO Ltd., as amended and restated on April 21, 2005 (the "Exchange Agreement"). In exchange for the outstanding capital stock of SPO Ltd., the Company issued to the former shareholders of SPO Ltd. a total of 5,769,106 shares of the Company's common stock, par value \$0.01 per share ("Common Stock"), representing approximately 90% of the Common Stock then issued and outstanding after giving effect to the Acquisition Transaction. As a result of the Acquisition Transaction, SPO Ltd. became a wholly owned subsidiary of the Company as of April 21, 2005 and, subsequent to the Acquisition Transaction, the Company changed its name to "SPO Medical Inc." Upon consummation of the Acquisition Transaction, the Company effectuated a forward subdivision of the Company's Common Stock issued and outstanding on a 2.65285:1 basis.

The merger between UNDI and the SPO Ltd was accounted for as a reverse merger. As the shareholders of SPO Ltd received the largest ownership interest in the Company, SPO Ltd was determined to be the "accounting acquirer" in the reverse acquisition. As a result, the historical financial statements of the Company were replaced with the historical financial statements of the SPO Ltd.

The Company and its subsidiary, SPO Ltd., are collectively referred to as the "Company".

NOTE 2 - Going Concern

As reflected in the accompanying financial statements, the Company's operations for the year ended December 31, 2006, resulted in a net loss of \$4,963 and the Company's balance sheet reflects a net stockholders' deficit of \$902. The Company's ability to continue operating as a "going concern" is dependent on its ability to raise sufficient additional working capital. Management's plans in this regard include raising additional cash from current and potential stockholders and increasing the marketing of its current and new products.

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 3 - Significant Accounting Policies

The financial statements have been prepared in accordance with generally accepted accounting principles (“GAAP”) in the United States of America.

a. Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, SPO Ltd. All material inter-company accounts and transactions have been eliminated in consolidation.

b. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

c. Financial statements in U.S. dollars

The reporting currency of the Company is the U.S. dollar ("dollar"). The dollar is the functional currency of the Company. Transactions and balances originally denominated in dollars are presented at their original amounts. Non-dollar transactions and balances are remeasured into dollars in accordance with the principles set forth in Statement of Financial Accounting Standards ("SFAS") No. 52 “Foreign Currency Translation” (“SFAS No. 52”). All exchange gains and losses from remeasurement of monetary balance sheet items resulting from transactions in non-dollar currencies are recorded in the statement of operations as they arise.

d. Cash and Cash Equivalents

The Company considers all highly liquid investments originally purchased with maturities of three months or less to be cash equivalents.

e. Property and Equipment

Property and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, as follows:

Computer and peripheral equipment	3 - 7 years
Office furniture and equipment	7 - 15 years
Leasehold improvement	Over the term of the lease

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 3 - Significant Accounting Policies (Cont.)

In accordance with SFAS No. 144, "Accounting for Impairment or Disposal of Long-Lived Assets", management reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable based on estimated future undiscounted cash flows. If so indicated, an impairment loss would be recognized for the difference between the carrying amount of the asset and its fair value. As of December 31, 2006, no impairment losses have been recorded.

f. Revenue recognition

The Company generates its revenues mainly from sales of its products. Revenues are recognized when delivery has occurred, persuasive evidence of an arrangement exists, the vendor's fee is fixed or determinable, no further obligation exists and collection is probable and there are no remaining significant obligations. Delivery is considered to have occurred upon shipment from the Company's distribution centers of products to the reseller. All of the Company's products that are sold through reseller agreements are non-exchangeable, non refundable and non returnable. Accordingly the resellers are considered end users.

g. Inventory

Inventories are stated at the lower of cost or market. Cost is determined as follows:
Raw materials, components and finished products - on the FIFO basis.
Work-in-process - on the basis of direct manufacturing costs.

h. Research and development costs

Research and development costs, net of government grants and participation by others, are charged to expenses as incurred.

i. Income taxes

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" ("SFAS No. 109"). This statement prescribes the use of the liability method whereby deferred tax assets and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value.

F-10

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 3 - Significant Accounting Policies (Cont.)**j. Fair value of financial instruments**

The financial instruments of the Company consist mainly of cash and cash equivalents, short-term investments, trade receivables, accounts payable and short-term loans. In view of their nature, the fair value of the Company's financial instruments is usually identical or close to their carrying value.

Additionally the financial instruments of the Company include long term loans which according to the Company's management recorded close to their fair value.

k. Concentrations of credit risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents. The majority of the Company's cash and cash equivalents are invested in US dollar deposits. Management believes that the financial institutions that hold the Company's investments are financially sound, and accordingly, minimal credit risk exists with respect to these investments.

l. Stock-based compensation

Effective January 1, 2006, the Company adopted SFAS No. 123 (revised 2004), "Share-Based Payment" (SFAS No. 123R) requiring that compensation cost relating to share-based payment awards made to employees and directors be recognized in the financial statements. The awards issued under Company's stock-based compensation plans are described in Note 13, "Stockholder's Equity". The cost for such awards is measured at the grant date based on the calculated fair value of the award. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods (generally the vesting period of the equity award) in the Company's Consolidated Statement of Operations. The following table summarizes the effects of stock-based compensation resulting from the application of SFAS No. 123 (revised 2004) included in Statement of Operations:

	Year ended December 31, 2006	
Cost of revenues	\$	13
Research and development, net		176
Selling and marketing		99
General and administrative		122
	\$	410

Prior to January 1, 2006, the Company accounted for share-based compensation cost using the intrinsic value method in accordance with Accounting Principles Board No. 25, "Accounting for Stock Issued to Employees" (APB No. 25), and related interpretations. The Company also followed disclosure requirements of SFAS No. 123, "Accounting for Stock-Based Compensation", as amended by SFAS No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure".

The company adopted SFAS No. 123R using the modified prospective method and, accordingly, the Consolidated Statement of Operations for prior years has not been restated to reflect the fair value method of recognizing compensation cost relating to stock options. Share-based compensation cost relating to stock options recognized in 2006 is based on the value of the portion of the award that is ultimately expected to vest. SFAS No. 123R requires forfeitures to be estimated at the time of grant in order to estimate the portion of the award that will ultimately vest. Such portion is currently estimated at 0%, based on the Company's historical rates of forfeiture.

Compensation cost related to stock options is recognized in operating results (included in cost of revenues, research and development, selling and marketing, general and administrative expenses) under SFAS No. 123R in 2006 was \$410 thousand. Compensation cost related to stock options recognized in our Consolidated Statement of Operations in 2006 includes (1) compensation cost for stock option awards granted prior to, but not yet vested as of December 31, 2005, based on the grant-date fair value estimated in accordance with the pro forma provisions of SFAS No. 123 and (2) compensation cost for stock option awards granted subsequent to December 31, 2005, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123R.

The following table illustrates the effect on net income and earnings per share as if we had applied the fair value recognition provisions of SFAS No. 123 in the year prior to the adoption of FAS No. 123R:

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 3 - Significant Accounting Policies (Cont.)

	Year ended December 31, 2005
Net Loss, as reported	\$ 2,038
Deduct: stock-based compensation determined under APB 25	193
Add: Stock-based compensation determined under SFAS123	599
Pro-forma net loss	\$ 2,444
Basic and fully diluted Loss per share as reported	\$ 0.11
Basic and fully diluted Loss per share proforma	\$ 0.14

Under SFAS 123, the fair market value of option grants was estimated on the date of grant using the "Black-Scholes option pricing" method with the following weighted-average assumptions: (1) expected life of 3.5 or 10 years (as per option's terms); (2) dividend yield of 0% (3) expected volatility of 100% and (4) risk-free interest rate of approximately 4.3%.

m. Effects of recently issued accounting standards

(1) SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments—an Amendment of FASB Statements No. 133 and 140" - In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments—an Amendment of FASB Statements No. 133 and 140" ("SFAS 155") to simplify and make more consistent the accounting for certain financial instruments. Namely, SFAS 155 amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" to permit fair value remeasurement for any hybrid financial instrument with an embedded derivative that otherwise would require bifurcation, provided that the whole instrument is accounted for on a fair value basis. SFAS 155 amends SFAS No. 140, "Accounting for the Impairment or Disposal of Long-Lived Assets" to allow for a qualifying special-purpose entity to hold a derivative financial instrument that relates to a beneficial interest other than another derivative financial instrument.

F-12

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 3 - Significant Accounting Policies

m. Effects of recently issued accounting standards (Cont.)

SFAS 155 applies to all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006, with earlier application permitted. Accordingly, the Company is to adopt SFAS 155 on January 1, 2007. The adoption of SFAS 155 is not expected to have any effect on the Company's financial position or results of operations.

(2) FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109" - In June 2006, the FASB issued FASB Interpretation No. 48 ("FIN-48"), "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109." The interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, "Accounting for Income Taxes." Specifically, FIN-48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken.

The provisions of FIN-48 are effective for financial statements for fiscal years beginning after December 15, 2006. Accordingly, the Company is to adopt FIN-48 on January 1, 2007. The adoption of FIN-48 is not expected to have a material effect on the Company's financial position or results of operations.

(3) SFAS No. 157, "Fair Value Measurements" - In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" ("SFAS 157"), which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 applies whenever other accounting standards require or permit assets or liabilities to be measured at fair value. Accordingly, it does not expand the use of fair value in any new circumstances. Fair value under SFAS 157 is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This Standard clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data, for example, a reporting entity's own data. Under SFAS 157, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS 157 is effective for fiscal years beginning after November 15, 2007. Accordingly, the Company is to adopt SFAS 157 on January 1, 2008. The adoption of SFAS 157 is not expected to have a material effect on the Company's financial position or results of operations.

NOTE 3 - Significant Accounting Policies

m. Effects of recently issued accounting standards (Cont.)

(4) Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements" - In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108, "Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements" ("SAB 108"), which provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment two approaches are commonly used to evaluate the materiality of misstatements or errors in financial statements: the roll-over, also known as the current-period or income-statement approach, and the iron curtain, also known as the cumulative or balance-sheet approach. The roll-over approach quantifies a misstatement based on the amount of the error originating in the current-period income statement. This approach could allow balance sheet items to grow each year by immaterial amounts, until the cumulative error becomes material. The iron curtain approach quantifies a misstatement based on the effects of correcting the misstatement existing in the balance sheet at the end of the current period. This approach does not consider the income statement effects of correcting prior year misstatements in the current year to be errors.

The reliance on only one of these approaches, to the exclusion of the other, does not appropriately quantify all misstatements that could be material to financial-statement users. Accordingly, SAB 108 will require quantification of financial statement errors based on the effects of the error on each of an entity's financial statements and the related financial statement disclosures. This model is commonly referred to as a dual approach because it essentially requires quantification of errors under both the iron-curtain and the roll-over approaches.

SAB 108 is effective for annual financial statements covering the first fiscal year ending after November 15, 2006. From a transition perspective, SAB 108 permits companies to record the cumulative effect of initially applying the dual approach in the first year ending after November 15, 2006 by recording any necessary correcting adjustments to the carrying values of assets and liabilities as of the beginning of that year with the offsetting adjustment recorded to the opening balance of retained earnings. The initial adoption of SAB 108 had no effect on the Company's financial position, results of operations or cash flows.

(5) In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" (SFAS No. 159). SFAS No. 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS No. 159 is effective for the company beginning in the first quarter of fiscal year 2008, although earlier adoption is permitted. The company is currently evaluating the impact that SFAS No. 159 will have on its financial statements.

n. Basic and diluted net loss per share:

Basic and diluted net loss per share is presented in accordance with Statement of Accounting Financial Standards No. 128, "Earnings Per Share" ("SFAS No. 128") for all periods presented. Basic and diluted net loss per share of Common stock was determined by dividing net loss attributable to Common stock holders by weighted average number of shares of Common stock outstanding during the period. Diluted net loss per share of Common stock is the same as basic net loss per share of Common stock for all periods presented as the effect of the Company's potential additional shares of Common stock were anti-dilutive.

NOTE 6 - Long-term and Short-term Loans

a. In December 2005 the Company completed a private placement to certain accredited investors that it commenced in April 2005 for the issuance of up to \$1,544 of units of its securities, with each unit comprised of (i) the Company's 18 month 6% promissory note (collectively, the "April 2005 Notes") and (ii) three year warrants to purchase up to such number of shares of the Company's Common Stock as are determined by the principal amount of the Note purchased by such investor divided by \$ 0.85 (collectively the "April 2005 Warrants").

For financial reporting purposes, the Company recorded a discount of \$949 to reflect the value of the warrants and is amortizing this amount to the date of maturity.

In September 2006, the Company offered to the holders of the April 2005 Notes to revise certain of the terms of the original offering in order to facilitate an extension to the scheduled maturity date of the Note, (hereinafter the "Amendment"). The Amendment provides that (a) the maturity date of the April 2005 Notes is to be extended by one year from the original maturity date on the original note, (b) the exercise period of the April 2005 Warrants is to be extended from three to five years and the per share exercise price was adjusted to \$0.60 and (c) the interest rate on the amounts outstanding under the April 2005 Notes was increased to 8% per annum, effective July 12, 2006. The Amendment also provides that if the Company subsequently issues shares of its Common Stock at an effective per share exercise price less than that of the adjusted per share exercise price of the April 2005 Warrants during the adjusted exercise period, then the exercise price thereof is to be reduced to such lower exercise price; provided, that, this protection will not apply to certain Company equity or debt issuances (i) from approved stock option plans to employees, directors and other service providers, (ii) upon exercise of options and warrants outstanding as of September 27, 2006 and (iii) to Company consultants that an unaffiliated third party would deem to be commercially reasonable and fair.

In addition, the Amendment also provides that, subject to certain qualifications, the Company's obligation to file a registration statement under the Securities Act of 1933, as amended, relating to the resale of the Company's Common Stock underlying the April 2005 Warrants was extended to April 15, 2007.

As of the date of signing the financial statements holders of Notes in the principal amount \$1,414 have signed the Amendment and the holder of a note in the principal amount of \$50 received repayment of principle and accrued interest. The Company is currently in contact with the remaining note holders of \$80 of the April 2005 Notes with respect to obtaining their formal execution of the Amendment.

The Amendment was effective as of September 30, 2006 and the accounting costs related to the Amendment has been fully recognized in the current accounting year. For financial reporting purposes, the Company recorded a one time non-cash finance expense in the amount of \$2,534 in respect of the full amount of the April 2005 Note \$1,494.

b. On February 1, 2006 the Company borrowed the principal amount of \$150. Interest accrued at an annual rate of prime plus 4% and was repayable in four equal installments every three calendar months (commencing June 30, 2006) through January 31, 2007. The Company issued to the holder of this indebtedness a three-year warrant to purchase up to 60,000 shares of Common Stock at a per share exercise price of \$0.85. As of December 31, 2006, the Company repaid \$119 representing principal and accrued interest then due. On January 31, 2007 the final installment of \$48 including accrued interest was repaid.

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS

NOTE 6 - Long-term and Short-term Loans (Cont.)

b. In July 2006, the Company commenced a private placement of units of securities, with each unit comprised of (i) the Company's 8% month promissory note due 12 months from the date of issuance and (ii) warrants as described below. The principal and accrued interest are due in one balloon payment at the end of the twelve month period. Each purchaser of the note would receive warrants, exercisable over a period of two years from the date of issuance, to purchase 16,250 shares of Common Stock for each \$25 of principal loaned, at a per share exercise price equal to the lower of \$1.50 or 35% less than any the offering price at an initial public offering of the Company's Common Stock during the warrant exercise period. The Company raised a gross amount of \$550, which is the maximum amount that can be raised under the offering.

The Company recorded in the financial statements a discount of \$463 to reflect the value of the warrants and is amortizing this amount through the date of the loans maturity.

NOTE 7 - Repayment of Outstanding Debt

a. On September 6, 2005 the Company negotiated with a lender a loan in the principal amount of \$100 plus a one time arrangement fee of \$10. This loan was repaid in January 2006. The Company also issued to the holder of the debt a three-year warrant to purchase up to 25,000 shares of the Company's Common Stock at a per share price of \$0.75.

The Company recorded in the financial statements a discount of \$14 to reflect the value of the warrants and amortized this amount through the date of the maturity of the loan.

b. In August 2004 the Company negotiated with a lender the extension of the scheduled maturity date of indebtedness in the principal amount of \$140 that was originally scheduled to mature on October 12, 2005. The maturity date of \$100 of the original principal amount of this indebtedness was extended to March 31, 2006. In consideration of the extension of the principal amount of \$100, the Company paid to the lender a one-time arrangement fee of \$20 and issued to the holder of the debt a three-year warrant to purchase up to 15,000 shares of the Company's Common Stock at a per share price of \$0.75. On March 31, 2006 the principal amount of \$100 was repaid in full.

NOTE 8 - Convertible Loans

In January 2005, the Company issued to 10 investors its convertible promissory notes (collectively the "Notes") in the aggregate principal amount of \$300. The Notes became payable on September 30, 2006 and bore interest at an annual rate of 8%. Under the terms of the Notes at the election of the holder the Notes were convertible into the Company's Common Stock at a per share price equal to the lesser of (i) 60% of the per share purchase price of any Company security subsequently sold by the Company and (ii) \$0.705. All the holders of these convertible promissory notes elected to convert the principal and the accrued interest. The conversion resulted in the issuance to these investors of a total of 948,949 shares of the Company's Common Stock.

In addition, the Company issued to three of the holders of these Notes, as compensation for their participation in raising the funds relating to the Notes, warrants, exercisable through April 21, 2008, to purchase such number of shares of Common Stock as is determined by dividing \$30 by the Exercise Price.

NOTE 9 -Deferred Revenues

In February 2006 the Company entered into a Distribution Agreement with a Distributor to market and distribute certain of the Company's products. In accordance with this agreement, as at the balance sheet date, the distributor advanced the Company \$395. This advance will be offsettable against future amounts due from the Distributor in respect of future sales of certain products subject to other commitments per the Distribution Agreement. Accordingly, this amount has been recorded as deferred revenues.

NOTE 10 - Accrued Expenses and other liabilities

	December 31, 2006
Accrued expenses pre merger	\$ 263
Royalties	171
Other accrued expenses	138
	\$ 572

NOTE 11 - Accrued Severance Pay

The Company's liability for severance pay is calculated in accordance with Israeli law based on the most recent salary paid to employees and the length of employment in the Company. The Company's liability for severance pay has been fully provided for. Part of the liability is funded through individual insurance policies. The policies are assets of the Company and, under labor agreements, subject to certain limitations, they may be transferred to the ownership of the beneficiary employees.

Severance pay expenses for the years ended December 31, 2006 and 2005 were \$78 and \$136 respectively.

NOTE 12 - Private Placement

In January 2006, the Company entered into an agreement with an institutional investor for the private placement of 857,143 shares of its Common Stock for gross proceeds of \$600 (prior to the payment of placement related expenses aggregating approximately to \$20).

NOTE 13 - Stockholder's Equity

a. Equity Incentive Plans

In April 2005, the Company adopted the 2005 Equity Incentive Plan (the "2005 Plan"). A total of 1.75 million shares of Common Stock were originally reserved for issuance under the 2005 Plan. The 2005 Plan provides for the grant of incentive stock options, nonqualified stock options, stock appreciation rights, restricted stock, bonus stock, awards in lieu of cash obligations, other stock-based awards and performance units. The 2005 Plan also permits cash payments under certain conditions. The compensation committee of the Board of Directors is responsible for determining the

type of award, when and to who awards are granted, the number of shares and the terms of the awards and exercise prices. The options are exercisable for a period not to exceed ten years from the date of grant. Vesting periods range from immediately to four years.

F-18

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS
U.S. dollars in thousands (except share data)

NOTE 13 - Stockholder's Equity (Cont.)

In April 2005, the Company adopted the 2005 Non-Employee Directors Stock Option Plan (the "2005 Directors Plan") providing for the issuance of up to 400,000 shares of Common Stock to non-employee directors. Under the 2005 Directors Plan, only non-qualified options may be issued and they will be exercisable for a period of six years from the date of grant.

The options granted vest over periods of up to five years from the date of the grant. Most of the options granted prior to 2005 expire after 10 years from the date of the grant while most of the options granted in 2005 expire after 6 years.

With respect to options granted through December 31, 2005 at exercise prices below the fair market value of the underlying shares at the date of grant, deferred compensation amortization totaling \$187 was recorded and charged to earnings during 2005 in accordance with APB 25 and FIN 44.

With respect to compensation expenses recorded in 2006, relating to options granted through December 31 2006, the Company applied the provisions of SFAS No. 123(R) and SAB No. 107, using the prospective recognition method, which require employee share-based equity awards to be accounted for under the fair value method, and eliminates the ability to account for these instruments under the intrinsic value method prescribed by APB Opinion No. 25 and allowed under the original provisions of SFAS No. 123. SFAS No. 123(R) requires the use of an option pricing model for estimating fair value, which is then amortized to expense over the service periods.

During 2006 the Company recorded Stock-based compensation expenses in the amount of \$1,152.

The following is a summary of the Company's outstanding options and warrants:

b. Stock Options:

As of December 31, 2006 an aggregate of 890,000 options remain available for future grants under the Company's 2005 Plan and 2005 Directors Plan.

(1) Issued to investors in the private placement in connection with the April 2005 Notes. According to the Company offer all of these warrants except for 58, 823 shall be replaced to new warrants see (6) and Note 6a.

(2) Warrants issued to other lenders

(3) Warrants issued to service providers

(4) Warrants issued to service provider for consulting services relating to the development of financial and strategic business relationships. Warrants were exercisable through February 2010 and were exercised in full on February 22, 2006.

(5) Warrants issued to consultant for financial services.

(6) Warrants issued according to the Amendment and replace the warrants issued in connection with the April 2005 Notes see Note 6a.

(7) Issued in connection with a private placement of units of securities see Note 6b.

(8) This table does not include the 948,949 warrants related to the convertible loan converted on September 30, 2006 see Note 8.

d. Dividends

The Company does not intend to pay cash dividends in the foreseeable future.

NOTE 14 - Deferred Taxes

a. Measurement of taxable income under the Income Tax Law (Inflationary Adjustments), 1985:

The results for tax purposes of the Israeli subsidiary are measured in terms of earnings in NIS, after certain adjustments for increases in the Israeli Consumer Price Index ("CPI"). As explained in Note 3c, the functional currency is the U.S. dollar. The difference between the annual change in the Israeli CPI and in the NIS/dollar exchange rate causes a further difference between taxable income and the income before taxes presented in the financial statements. In accordance with paragraph 9(f) of SFAS No. 109, the Company has not provided deferred income taxes on the difference between the functional currency and the tax bases of assets and liabilities at the Israeli subsidiary.

b. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS

NOTE 14 - Deferred Taxes (Cont.)

In accordance with SFAS No. 109, the components of deferred income taxes are as follows:

	December 31, 2006
Tax on net operating losses carryforward	\$ 1,037
Less - valuation allowance	(1,037)
	\$ —

c. The Company has provided valuation allowances in respect of deferred tax assets resulting from tax loss carryforward and other temporary differences. Management currently believes that since the Company has a history of losses it is more likely than not that the deferred tax regarding the loss carryforward and other temporary differences will not be realized in the foreseeable future

Net operating loss carryforwards as of December 31, 2006 are as follows:

	December 31, 2006
Israel	\$ 3,090
USA	827
Total	\$ 3,917

Net operating losses in Israel may be carried forward indefinitely. Net operating losses in the U.S. are available through 2031.

NOTE 15 - Commitments and Contingencies**Lease Commitments**

The Company maintains its principal offices in the Warner Gateway campus in Warner Center, Woodland Hills, CA, USA. The offices are leased at a monthly cost of approximately \$2.6 and cover a square area of 60 square meters. The lease period for this office terminates in June 2007. The Company has an option to extend the lease a further six months through the end of December 2007. The Company intends to maintain the lease of the premises on a month-to-month basis. The offices provide accommodation for sales, internal administrative and external customer support operations.

SPO MEDICAL INC
NOTES TO THE FINANCIAL STATEMENTS

NOTE 15 - Commitments and Contingencies (Cont.)

Research and development is carried out at the Company's premises in Kiryat Malachi, Israel, which are comprised of laboratory and development facilities covering an area of 300 sq. m. In addition, the Company sub-leases a smaller facility of 112 square meters in Kfar Saba, Israel for local administrative staff. The facilities in Kiryat Malachi, Israel, are leased pursuant to a lease agreement that is to expire in July 2011 at an approximate per month rate of \$1.5. The administrative facilities in Israel are leased pursuant to a lease agreement that terminates in December 2007 with an option to extend the lease for two additional 12 month periods at an approximate monthly rate of \$0.7.

Government of Israel

The Company's subsidiary, SPO Ltd., is committed to pay royalties of 3% to the Government of Israel on proceeds from the sale of products, the research and development of which the Government has participated in by way of grants, up to the amount of 100%-150% of the grants received plus interest at dollar LIBOR. The royalties are payable at a rate of 3% for the first three years of product sales and 3.5% thereafter. The total amount of grants received or accrued, net of royalties paid or accrued, as of December 31, 2006 was \$1,371. The refund of the grants is contingent upon the successful outcome of the research and development and the attainment of sales. The Company has no obligation to refund these grants, if sales are not generated. The financial risk is assumed completely by the Government of Israel. The grants were received from the Government on a project-by-project basis. If the project fails the Company has no obligation to repay any grant received for the specific unsuccessful or aborted project. As of December 31, 2006 the Company has provided for \$171 in royalties payable from such grants.

F-23
