NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2007

NOTE 1 — ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

On November 16, 2005, a wholly-owned subsidiary of MDwerks, Inc. (f/k/a Western Exploration, Inc., and hereinafter referred to as the “Company”) was merged with and into MDwerks Global Holdings, Inc., a Florida corporation (“MDwerks”), with MDwerks surviving. The Company acquired all of the outstanding capital stock of MDwerks in exchange for issuing 9,246,339 shares of the Company’s common stock, par value \$0.001 per share to MDwerks’ stockholders, which at closing of the Merger Agreement represented approximately 87.4% of the issued and outstanding shares of the Company’s common stock. In connection with the Merger, the Company changed its corporate name to MDwerks, Inc.

The Company has four operating subsidiaries. Xeni Medical Systems, Inc. ("Xeni Medical") was incorporated under the laws of the state of Delaware on July 21, 2004. Xeni Medical provides a Web-based package of electronic claims solutions to the healthcare provider industry through Internet access to its “MDwerks” suite of proprietary products and services so that healthcare providers can significantly improve daily insurance claims transaction processing, administration and management. Xeni Financial Services, Corp. ("Xeni Financial") was incorporated under the laws of the state of Florida on February 3, 2005. Xeni Financial offers financing and advances to health care providers secured by claims processed through the MDwerks system. Xeni Medical Billing, Corp. ("Xeni Billing") was incorporated under the laws of the state of Florida on March 2, 2005. Xeni Billing offers health care providers billing services facilitated through the MDwerks system. Patient Payment Solutions, Inc. (“PPS”) was incorporated under the laws of the state of Florida on May 30, 2007. PPS will offer healthcare providers a payment improvement process for “out of network” claims.

Going concern

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company has suffered losses that raise substantial doubt about its ability to continue as a going concern. While the Company is attempting to attain revenue growth and profitability, the growth has not been significant enough to support the Company’s daily operations. Management intends to attempt to raise additional funds by way of a public or private offering and make strategic acquisitions. While the Company believes in the viability of its strategy to improve sales volume and in its ability to raise additional funds, there can be no assurances to that effect. The ability of the Company to continue as a going concern is dependent on the Company’s ability to further implement its business plan and generate revenue. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern. Management believes that the actions presently being taken to further implement its business plan and generate revenue, including the institutional financing described in Note 4 provide the opportunity for the Company to continue as a going concern.

As reflected in the accompanying consolidated financial statements, the Company has stockholders’ deficiency of \$685,451 and a working capital deficiency of \$909,403 at June 30, 2007.

Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and Item 310(b) of Regulation S-B. Accordingly, the financial statements do not include all of the information and footnotes

required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and such adjustments are of a normal recurring nature. These consolidated financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2006 and notes thereto and other pertinent information contained in the Form 10-KSB of the Company as filed with the Securities and Exchange Commission (the "Commission"). The results of operations for the six months ended June 30, 2007 are not necessarily indicative of the what results will be for the full fiscal year ending December 31, 2007.

NOTE 1 — ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Certain amounts previously reported for in 2006 have been reclassified to conform with the classifications used in 2007. Such reclassifications have no effect on the reported net loss.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Fair value of financial instruments

Statement of Financial Accounting Standards No. 107, "Disclosures about Fair Value of Financial Instruments," requires disclosures of information about the fair value of certain financial instruments for which it is practicable to estimate the value. For purpose of this disclosure, the fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation.

The carrying amounts reported in the consolidated balance sheet for cash, notes receivable, accounts payable and accrued expenses, notes payable and loans payable approximate their fair market value based on the short-term maturity of these instruments.

Cash and cash equivalents

For purposes of the consolidated statements of cash flows, the Company considers all highly liquid instruments purchased with a maturity of three months or less and money market accounts to be cash equivalents.

At various times, the Company has deposits in excess of the Federal Deposit Insurance Corporation limit. The Company has not experienced any losses on these accounts.

Advertising

The Company expenses advertising costs as incurred. Advertising costs charged to operations were approximately \$72,158 and \$80,033 for the six months ended June 30, 2007 and 2006, respectively.

Property and equipment

Property and equipment are stated at cost. Depreciation and amortization are provided using the straight-line method over the estimated useful life.

Revenue recognition

The Company follows the guidance of the Securities and Exchange Commission's ("SEC") Staff Accounting Bulletin 104 for revenue recognition. In general, the Company records revenue when persuasive evidence of an arrangement exists, services have been rendered or product delivery has occurred, the sales price to the customer is fixed or determinable, and collectability is reasonably assured. The following policies reflect specific criteria for the various

revenue streams of the Company.

Revenue derived from fees related to claims and contract management services are generally recognized when services are provided to the customer.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2007

NOTE 1 — ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue recognition (continued)

The Company, through its subsidiaries, provides advance funding services to unaffiliated healthcare providers that are customers of the Company. The customer advances are typically collateralized by Security Agreements granting first position liens on the medical claims submitted by its customers to third party payors (the ‘‘Payors’’). The advances are repaid through the remittance of payments of customer medical claims, by Payors, directly to the Company. The Company can withhold from these advances interest, an administrative fee and other charges as well as any amount for prior advances that remain unpaid after a specified number of days. These interest charges, administrative fees and other charges are recognized as revenue when earned. There is no right of cancellation or refund provisions in these arrangements and the Company has no further obligations once the services are rendered.

Revenue derived from fees related to billing and collection services are generally recognized when the customer’s accounts receivable are collected.

Revenue from implementation fees are generally recognized over the term of the customer’s agreement. Revenue derived from maintenance, administrative and support fees are generally recognized at the time the services are provided to the customer.

Income taxes

Income taxes are accounted for under the asset and liability method of Statement of Financial Accounting Standards No. 109, ‘‘Accounting for Income Taxes’’ (‘‘SFAS 109’’). Under SFAS 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under SFAS 109, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Loss per common share

Basic loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. Diluted loss per share is computed by dividing net income by the weighted average number of shares of common stock, potential common stock and potentially dilutive securities outstanding during each period. As of June 30, 2007, the Company had outstanding options to purchase an aggregate of 2,856,250 shares of common stock and warrants to purchase an aggregate of 2,566,345 shares of Common Stock, which could potentially dilute future earnings per share. Diluted loss per common share has not been presented for the six months ended June 30, 2007 since the impact of the stock options and warrants would be antidilutive. As of June 30, 2006, the Company had outstanding options to purchase an aggregate of 1,060,000 shares of common stock and warrants to purchase an aggregate of 804,400 shares of Common Stock, which could potentially dilute future earnings per share.

NOTE 1 — ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Stock-based compensation

The Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), *Share Based Payment* (“SFAS No. 123R”) utilizing the modified prospective method. SFAS No. 123R establishes the financial accounting and reporting standards for stock-based compensation plans. As required by SFAS No. 123R, the Company recognizes the cost resulting from all stock-based payment transactions including shares issued under its stock option plans in the consolidated financial statements.

Recent accounting pronouncements

In February 2006, the Financial Accounting Standards Board issued Statement No. 155 (“SFAS No 155”), “Accounting for Certain Hybrid Instruments: An Amendment of FASB Statements No. 133 and 140”. Management does not believe that this statement will have a significant impact as the Company does not use such instruments.

In May 2006, the SEC announced that the compliance date for non-accelerated filers pursuant to Section 404 of the Sarbanes-Oxley Act had been extended. Under the latest extension, a company that is not required to file its annual and quarterly reports on an accelerated basis must begin to comply with the internal control over financial reporting audit requirements for its first fiscal year ending on or after December 15, 2008, which, for us, is effective for fiscal 2008 beginning January 1, 2008. This is a one-year extension from the previously established July 15, 2007 compliance date established in September 2005. The SEC similarly extended the compliance date for these companies relating to requirements regarding evaluation of internal control over financial reporting and management certification requirements. We are currently evaluating the impact of Section 404 of the Sarbanes-Oxley Act on our results of operations, cash flows or financial condition.

In July 2006, the Financial Accounting Standards Board (“FASB”) issued FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109” (“FIN 48”), which provides criteria for the recognition, measurement, presentation and disclosure of uncertain tax positions. A tax benefit from an uncertain position may be recognized only if it is “more likely than not” that the position is sustainable based on its technical merits. The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006. The Company does not expect FIN 48 will have a material effect on its consolidated financial condition or results of operations.

In September 2006, the SEC issued Staff Accounting Bulletin (“SAB”) 108 which provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. SAB 108 is effective for the first interim period following the first fiscal year ending after November 15, 2006, which, for us, is effective for fiscal 2007 beginning January 1, 2007. We believe that the adoption of SAB 108 will not have a material impact on the Company’s results of operations, cash flows or financial condition.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 (“SFAS 157”), Fair Value Measurements. SFAS 157 provides guidance for measuring the fair value of assets and liabilities. It requires additional disclosures related to the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on earnings. SFAS 157 is effective for fiscal years beginning after November 15, 2007. The Company is in the process of determining what effect, if any, the adoption of SFAS 157 will have on its consolidated results of operations and financial condition.

NOTE 1 — ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In February 2007, the FASB issued SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities - including an Amendment of SFAS No. 115*, (“SFAS 159”), which permits an entity to measure many financial assets and financial liabilities at fair value that are not currently required to be measured at fair value. Entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option may be elected on an instrument-by-instrument basis, with few exceptions. SFAS 159 amends previous guidance to extend the use of the fair value option to available-for-sale and held-to-maturity securities. The Statement also establishes presentation and disclosure requirements to help financial statement users understand the effect of the election. SFAS No. 159 is effective as of the beginning of the first fiscal year beginning after November 15, 2007. The Company is currently evaluating the impact of adopting SFAS 159.

The Company does not believe that any other recently issued, but not yet effective accounting standards will have a material effect on the Company’s consolidated financial position, results of operations or cash flows.

NOTE 2 — ACCOUNTS AND NOTES RECEIVABLE

Accounts receivable are recorded when revenue has been recognized but not yet collected. The Company has \$26,141 of accounts receivable from implementation, processing, collection, and other fees, and disbursements not yet collected as of June 30, 2007.

At June 30, 2007, the Company advanced healthcare providers under lines of credit and note agreements, respectively, aggregating \$782,371. Advances under the lines of credit are due to be repaid out of collections. The Company charged the healthcare providers interest and other charges as defined in the agreements. At June 30, 2007, no amounts were past due.

Accounts and notes receivable are reported at their outstanding unpaid principal balances reduced by an allowance for doubtful accounts. The Company estimates doubtful accounts based on historical bad debts, factors related to specific customers’ ability to pay and current economic trends. The Company writes off receivables against the allowance when a balance is determined to be uncollectible. At June 30, 2007, the Company has no allowance for doubtful accounts.

NOTE 3 — PROPERTY AND EQUIPMENT

At June 30, 2007, property and equipment consisted of the following:

	Estimated Life	
Office furniture and equipment	5-7 Years	\$ 26,443
Computer equipment and software	3-5 Years	181,898
Total		208,341
Less: accumulated depreciation		(70,248)

NOTE 4 — NOTES PAYABLE

On August 24, 2006, we received gross proceeds of \$250,000 (net proceeds of \$236,566, after expenses) in connection with a financing provided by an unrelated party. In connection with the financing, we issued a secured promissory note in the original principal amount of \$250,000 (the “Note”) and a three year warrant to purchase 111,111 shares of the Company’s common stock at a price of \$2.25 per share. The Note bears interest at the rate of 7% per year, payable monthly in arrears and will become due and payable on August 24, 2007. This Note is subject to certain mandatory prepayment provisions as defined in the secured promissory note. At June 30, 2007, principal payments made under the mandatory prepayment provisions had reduced the Note balance to \$213,850. In connection with this note, the Company’s subsidiary, Xen Financial Services, Corp. entered into a security and guaranty agreement whereby Xen Financial Services, Corp has agreed to guaranty repayment of the note and grant a security interest in a client Revolving Line of Credit Loan Agreement including two promissory notes in the original principal amounts of \$250,000 and \$121,068 issued by that client to Xen Financial Services Corp, which were consolidated into a single promissory note in the amount of \$180,165 on December 5, 2006.

In connection with the 7% secured promissory note, the Company granted warrants to purchase 111,111 shares of its common stock at an exercise price of \$2.25 per share which warrants expire on August 24, 2009. These warrants were treated as a discount on the secured promissory note and were valued at \$250,000 to be amortized over the 12-month note terms. The fair market value of each stock warrant was estimated on the date of grant using the Black-Scholes option-pricing model in accordance with SFAS No. 123R using the following weighted-average assumptions: expected dividend yield 0%; risk-free interest rate of 4.80%; volatility of 142% and an expected term of 3 years.

On August 24, 2006, the Company received gross proceeds of \$110,000 (net proceeds of \$100,000, after expenses) in connection with a financing provided equally by two unrelated parties. These notes bear interest at 10% per year, and both interest and principal were due on January 21, 2007. In connection with the financing, the Company issued 10,000 shares of its common stock at a fair market value on the date of grant of \$39,800 or \$3.98 per share which was recorded as a discount on notes payable to be amortized over the term of the Notes. For the six months ended June 30, 2007, amortization of this debt discount amounted to \$7,960 and is included in interest expense. In addition, the Company paid a total cash fee of \$23,434 in connection with the above promissory notes for placement agent fees and related expenses. Accordingly, these fees were treated as deferred issuance cost to be amortized over their respective note terms. For the six months ended June 30, 2007, amortization of deferred issuance cost amounted to \$8,720. On January 21, 2007 the Company paid the August 24, 2006 notes payable of \$110,000, together with all accrued interest, to the two unrelated parties.

On each of October 20, 2006 and November 9, 2006 the Company received gross proceeds of \$2,500,000 (\$2,375,000 net proceeds) or \$5,000,000 (\$4,750,000 net proceeds) in the aggregate in connection with a financing provided by Gottbetter Capital Master, Ltd., an unaffiliated accredited institutional investor (the “Investor”).

For the six months June 30, 2007, amortization of the debt discount amounted to \$814,858.

The Company also entered into a Registration Rights Agreement with the Investor. The Company made this determination based on the representations of the Investor, which included, in pertinent part, that the Investor is an "accredited investor" within the meaning of Rule 501 of Regulation D promulgated under the Securities Act, and that the Investor was acquiring the Senior Notes, the Series D Warrants and the Series E Warrants for investment purposes for its own account and not as nominee or agent, and not with a view to the resale or distribution, and that Investor understood such securities may not be sold or otherwise disposed of without registration under the Securities Act or an applicable exemption therefrom.

Registration rights

The Company filed a “resale” registration statement with the SEC covering all shares of common stock and shares of common stock underlying the warrants (including shares of common stock and underlying warrants issued to the Placement Agent) issued in connection with the June 13, 2005 Private Placement. The Company agreed that it will maintain the effectiveness of the “resale” registration statement from the effective date through and until the earlier of two years and the time at which exempt sales pursuant to Rule 144(k) may be permitted. The Company agreed to use its best efforts to respond to any SEC comments to the “resale” registration statement on or prior to the date which is 20 business days from the date such comments were received, but in any event not later than 30 business days from the date such comments were received. The “resale” registration statement became effective on December 7, 2006.

In the event the “resale” registration statement had not been filed with the SEC on or prior to the date which is 180 days after the last closing date of the Private Placement, each investor in the Private Placement would have received as liquidating damages an additional number of shares of common stock equal to 2% of the total number of shares of common stock purchased by the investor in the Private Placement for each month (or portion thereof) that the Registration Statement was not filed, provided that the aggregate increase in such shares of common stock as a result of the delinquent filing would in no event exceed 20% of the original number of shares of common stock purchased in the Private Placement.

In the event that the Company had failed to respond to SEC comments to the Registration Statement within 30 business days, each investor in the Private Placement would have received an additional number of shares of common stock equal to 2% of the total number of shares of common stock purchased by the investor in the Private Placement for each month (or portion thereof) that a response to the comments to the Registration Statement has not been submitted to the SEC, provided that the aggregate increase in such shares shall in no event exceed 20% of the original number of shares of common stock purchased in the Private Placement.

Registration rights (continued)

Pursuant to the February 1, 2006 Series A Convertible Preferred Private Placement Subscription documents, we agreed to file a registration statement with the Securities and Exchange Commission to register the shares and warrants held by the selling security holders for resale. That registration statement was declared effective on December 7, 2006. We have agreed to maintain the effectiveness of the registration statement from the effective date through and until the earlier of two years following December 31, 2005 (which was the termination date of the first private placement described above) or the earlier of two years following June 28, 2006 (which was the effective date of the termination of the second private placement described above) and such time as exempt sales pursuant to Rule 144(k) under the Securities Act of 1933 ('Rule 144(k)') may be permitted for purchasers of Units.

We also entered into a Registration Rights Agreement and amendment thereto with the Investor. The amended Registration Rights Agreement required us to file a registration statement covering the resale of 2,777,778 shares of common stock underlying the Senior Notes. The registration statement covering the resale of the shares of common stock underlying the Senior Notes became effective on December 7, 2006. In addition to it being an event of default under the Senior Notes, if we fail to maintain the effectiveness of the registration statement as required by the Registration Rights Agreement, the exercise price of the Series D and the Series E Warrants will immediately be reduced by \$0.25 per share and then reduced by an additional \$0.10 per share for each thirty day period thereafter that the registration statement is not filed or effective, as the case may be, up to a maximum reduction of \$0.65.

NOTE 7 — RESTATEMENT

The Company has effected a restatement of its financial results for the period ended June 30, 2006 (the 'Restatement'). After reviewing certain accounting principles the Company had applied in previously issued financial statements, management has determined that the Company's 'Accounting for Derivative Financial Instruments Indexed To, and Potentially Settled in, a Company's Own Stock', should have resulted in a liability on the balance sheet at June 30, 2006 and certain charges to expense and a deemed preferred stock dividend on the accompanying consolidated statements of operations for the three and six month periods then ended, in accordance with SFAS No. 133 and EITF 00-19. Consequently, management restated its quarterly financial statements as of June 30, 2006. The change in presentation of the Company's embedded derivative feature associated with its Series A Convertible Preferred shares and related warrants had the effect of increasing warrant liability by \$1,403,317, increasing paid-in capital by \$121,026 and increasing the accumulated deficit by \$1,524,343 as of June 30, 2006, increasing the Company's net loss by \$460,465 for the three months ended June 30, 2006 and by \$634,566 for the six months ended June 30, 2006, increasing the calculated deemed preferred stock dividend by \$760,513 for the three months ended June 30, 2006 and by \$889,777 for the six months ended June 30, 2006, and increasing the Company's net loss available to common shareholders by \$1,221,078 for the three months ended June 30, 2006 and by \$1,524,343 for the six months ended June 30, 2006. This change in presentation of the Company's embedded derivative feature affected did not impact the cash balance at the end of the period.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS AND PLAN OF OPERATIONS

Overview

We offer a comprehensive technology-based selection of electronic medical claims processing, funding and collection solutions to the healthcare provider industry through an Internet Web browser. Our services help doctors, hospital based practices, and other healthcare providers and their vendors to significantly improve daily insurance claims transaction administration and management.

Our Xeni Medical Systems, Inc. ("Xeni Medical") CLAIMwerks™ solutions can provide actual contract based, insurance company comparable screening and analysis of medical claims directly from a client's practice management system, so that deficiencies and errors can be corrected before they are submitted to insurance companies for electronic payment. Further, the matching, settlement and posting of private insurance company claims payments is electronically performed for clients, minimizing the bookkeeping and investigation necessary to determine payment status and collection actions.

Since the system has the capability of analyzing value and risk of claims payment, clients may also qualify for pre-approved revolving line of credit advances on claims processed by our Xeni Financial Services, Corp. ("Xeni Financial") FUNDwerks™ solution. FUNDwerks™ can electronically manage loans, loan repayments and the movement of funds through linked bank accounts administered by us for banks or finance companies; clients can receive electronic advance funding on claims they select within five business days on favorable terms.

Additionally, clients may choose to complete the claims management cycle by subscribing to the Xeni Medical Billing, Inc. ("Xeni Billing") BILLwerks™ services, which can include patient billing and collections and/or managing third party appeals on the provider's behalf.

There is no major hardware or software investment required to use the Company's Web-based systems. All transactions are designed to comply with the Health Insurance Portability and Accountability Act of 1996 ("HIPAA").

On May 30, 2007, we incorporated a new subsidiary Patient Payment Solutions, Inc. ("PPS") to improve collections for health care providers that perform services "out-of-network". As of June 30, 2007, PPS has not begun to generate revenue and has incurred minimal expenses.

We offer our services to physician and clinical service group practices, hospitals, rehabilitation centers, nursing homes and certain related practice vendors, by using internal and external resources. Internal resources consist mainly of specialized sales executives with industry knowledge and/or a portfolio of contacts. External resources consist primarily of independent sales representatives as well as channel associates such as vendors of practice management systems and medical industry specific sales groups such as office management consultants. These sales resources can leverage an existing customer base and contacts. Our marketing is based on prioritizing potential subscribers by size, location and density, need for our products and services and distribution opportunities. Accordingly, we are focusing our initial marketing efforts in geographic areas such as California, Florida, Texas, New York and New Jersey, which contain high concentrations of prospective clients.

Because we have had a limited operating history, it is difficult to accurately forecast our revenues and expenses. Additionally, our operations will continue to be subject to risks inherent in the establishment of a new business, including, among other things, efficiently deploying our capital, developing our product and services offerings, developing and implementing our marketing campaigns and strategies and developing awareness and acceptance of our products. Our ability to generate future revenues will be dependent on a number of factors, many of which are beyond our control, including the pricing of other services, overall demand for our products, market competition and government regulation.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We apply the Securities and Exchange Commission's Staff Accounting Bulletin 104 for revenue recognition. In general, we record revenue when persuasive evidence of an arrangement exists, services have been rendered or product delivery has occurred, the sales price to the customer is fixed or determinable, and collectability is reasonably assured. We have identified the policy below as critical to our business operations and understanding of our financial results:

Revenues derived from fees related to claims and contract management services are generally recognized when services are provided to the customer. We provide advance funding for medical claims and term loan services to unaffiliated healthcare providers. These arrangements typically require us to advance funds to these unaffiliated healthcare providers (our customers) in exchange for liens on the receivables related to invoices remitted to their clients for services performed. The advances are generally repaid through the remittance of payments of receivables by their payors directly to us. We may withhold from these advances interest, a fee charged in consideration of administration of advance funding and loans and other charges as well as the amount of receivables relating to prior advances that remain unpaid after a specified number of days. These interest charges, administrative fees and other charges are recognized as revenue when earned and are calculated on a daily basis.

Revenues derived from fees related to billing and collection services are generally recognized when the customer's accounts receivable are collected. Revenues from implementation fees are generally recognized over the term of the customer agreement. Revenues derived from maintenance, administrative and support fees are generally recognized at the time the services are provided to the customer.

From March 22, 2006 through June 28, 2006, we sold 28.3 units in a private placement to accredited investors pursuant to the terms of a Confidential Private Placement Memorandum, dated February 1, 2006, and private placement subscription agreements executed and delivered by each investor on or before the closing of the private placement. In connection with the sale of the 28.3 units, we received net proceeds of \$1,426,391.

On August 24, 2006, we received gross proceeds of \$250,000 (net proceeds of \$236,566, after expenses) in connection with a financing provided by an unrelated party. In connection with the financing, we issued a secured promissory note in the original principal amount of \$250,000 (the "Note") and a three year warrant to purchase 111,111 shares of our common stock at a price of \$2.25 per share. The Note bears interest at the rate of 7% per year, payable monthly in arrears and will become due and payable on August 24, 2007. This Note is subject to certain mandatory prepayment provisions as defined in the secured promissory note. At June 30, 2007, principal payments made under the mandatory prepayment provisions had reduced the Note balance to \$213,850. In connection with this note, our subsidiary, Xeni Financial, entered into a security and guaranty agreement whereby Xeni Financial has agreed to guaranty repayment of the note and grant a security interest in a client Revolving Line of Credit Loan Agreement including two promissory notes in the original principal amounts of \$250,000 and \$121,068 issued by that client to Xeni Financial, which were consolidated into a single promissory note in the amount of \$180,165 on December 5, 2006.

While we have sufficient funds to conduct our business and operations as they are currently undertaken into the next quarter, our ability to continue to implement our revenue and profit growth strategy beyond the next quarter will be adversely affected if we are unable to consummate additional private placement transactions or debt financing, which we are currently pursuing.

We currently have no material commitments for capital expenditures.

Our actual results could differ materially and adversely from those anticipated in such forward-looking statements as a result of certain factors, including those set forth below and elsewhere in this report. Important factors that may cause actual results to differ from projections include, but are not limited to, for example:

- adverse economic conditions;
- inability to raise sufficient additional capital to implement our business plan;
- intense competition, including entry of newly-developed alternative drug technologies;
- unexpected costs and operating deficits, and lower than expected sales and revenue;
- adverse results of any legal proceedings;
- inability to satisfy government and commercial customers using our technology;
- the volatility of our operating results and financial condition;
- inability to attract or retain qualified senior management personnel, including sales and marketing, and technology personnel; and
- other specific risks that may be alluded to in this report.

All statements, other than statements of historical facts, included in this report regarding our strategy, future operations, financial position, estimated revenue or losses, projected costs, prospects and plans and objectives of management are forward-looking statements. When used in this report, the words “will,” “may,” “believe,” “anticipate,” “intend,” “estimate,” “expect,” “project,” “plan” and similar expressions are intended to identify forward-looking statements although not all forward-looking statements contain such identifying words. All forward-looking statements speak only as of the date of this report. We do not undertake any obligation to update any forward-looking statements or other information contained herein. Potential investors should not place undue reliance on these forward-looking statements. Although we believe that our plans, intentions and expectations reflected in or suggested by the forward-looking statements in this report are reasonable, no one can assure investors that these plans, intentions or expectations will be achieved.

ITEM 3. CONTROLS AND PROCEDURES

We maintain “disclosure controls and procedures,” as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the “Exchange Act”), that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. We conducted an evaluation (the “Evaluation”), under the supervision and with the participation of our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), of the effectiveness of the design and operation of our disclosure controls and procedures (“Disclosure Controls”) as of the end of the period covered by this report pursuant to Rule 13a-15 of the Exchange Act. Based on this Evaluation, our CEO and CFO concluded that our Disclosure Controls were effective as of the end of the period covered by this report.

We have also evaluated our internal controls for financial reporting, and there have been no significant changes in our internal controls or in other factors that could significantly affect those controls subsequent to the date of their last evaluation.

Our management, including our CEO and CFO, does not expect that our Disclosure Controls and internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management or board override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. CEO and CFO Certifications appearing immediately following the signatures section of this report there are Certifications of the CEO and the CFO. The Certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 (the Section 302 Certifications). This Item of this report, which you are currently reading is the information concerning the Evaluation referred to in the Section 302 Certifications and this information should be read in conjunction with the Section 302 Certifications for a more complete understanding

Evaluation of disclosure controls and procedures and remediation

In connection with the Restatement, under the direction of the Company's management, we have reevaluated certain disclosure controls and procedures and internal control over financial reporting. In connection with the Restatement, we identified a material weakness in our internal controls and procedures relating to the accounting treatment of our series A preferred stock and related warrants.

To our knowledge, as of the date of this filing, we have remediated such material weakness in our internal controls and procedures.

In connection with this Form 10-QSB, under the direction of our Chief Executive Officer, we have evaluated our disclosure controls and procedures as of June 30, 2007, including the remedial actions discussed above, and we have concluded that, as of June 30, 2007, our disclosure controls and procedures are effective.

It should be noted that while our management believe our disclosure controls and procedures provide a reasonable level of assurance, they do not expect that our disclosure controls and procedures or internal controls will prevent all error and all fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments, in decision making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of internal control is based in part upon certain assumptions above the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.
