Item 11. Executive Compensation

Compensation Discussion and Analysis

General

The executive compensation and stock option committee of our board of directors is comprised entirely of independent directors and oversee the compensation (base salary, annual bonus and long term incentives) of our company's executive officers and administers our company's stock option plans, other than the non-employee directors stock option plan, which is self executing.

The objectives of our compensation program are designed to strike a balance between offering sufficient compensation to either retain existing or attract new executives on the one hand, and maintaining compensation at reasonable levels on the other hand. Although our business has grown over the past several years as evidenced by our increased sales and growing portfolio of brand names, we do not have the resources comparable to the cosmetic giants in our industry, and accordingly cannot afford to pay excessive executive compensation. In furtherance of these objectives, our executive compensation packages generally include a base salary, as well as annual incentives tied to individual performance and long-term incentives tied to our operating performance.

Mr. Madar, the chairman and chief executive officer, takes the initiative after discussions with Mr. Russell Greenberg, an Executive Vice President, Chief Financial Officer and a Director, and recommends executive compensation levels for executives in the United States. Mr. Benacin, the president of Inter Parfums, S.A., takes the initiative after discussions with Philippe Santi, the Chief Financial Officer of Inter Parfums, S.A., and recommends executive compensation levels for executives in Europe. The recommendations are presented to the compensation committee for its consideration, and the compensation committee makes a final determination regarding salary adjustments and annual award amounts to executives, including our chief executive officer and president. Further, Messrs. Madar and Benacin, in addition to being executive officers and directors, are our largest shareholder's, therefore, their interests are aligned with our shareholder base in keeping executive compensation at a reasonable level.

The compensation committee believes that the individual executive compensation are at levels comparable with executives in other companies of similar size and stage of development that operate in fragrance industry and take into account our company's performance and our own strategic goals. Further, the compensation committee believes that its present policies to date, with its emphasis on rewarding performance, has served to focus the efforts of our executives to allow the our Company to achieve a high rate of growth and profitability, which management believes will result in a substantial increase in value to our shareholders.

Elements of Compensation

Generally, the compensation of our executive officers is comprised of base salaries, annual cash bonuses and long-term equity incentive awards. In determining specific components of compensation, the compensation committee considers individual performance, level of responsibility, skills and experience, and other compensation awards or arrangements. The compensation committee reviews and approves all elements of compensation for all of our executive officers taking into consideration recommendations from our Chief Executive Officer and the President of Inter Parfums, S.A., as well as information regarding compensation levels at competitors in our industry.

Base Salary

Base salaries for executive officers are initially determined by evaluating the responsibilities of the position held and the experience of the individual, and by reference to the competitive market place for executive talent. Base salaries for executive officers are reviewed on an annual basis, and adjustments are determined by evaluating our operating performance, the performance of each executive officer, as well as whether the nature of the responsibilities of the executive has changed. For executive officers of United States operations, the bulk of their annual compensation is in base salary. However, for executive officers of European operations base salary comprises a smaller percentage of overall compensation.

None of the executive officers for United States operations have employment agreements, as we believe that having flexibility in structuring annual base salary is a benefit, which permits us to act quickly to meet a changing economic environment. Unfortunately, with the global economic downturn commencing in the fourth quarter of 2008, the market price of our common stock as reported by The Nasdaq Stock Market has decreased substantially. Further, consolidated net sales of our company for the first quarter of 2009 had decreased. Further still, we have published guidance for 2009, assuming the dollar remains at current levels, for a further decrease in net sales and income. Based upon the recommendations of the chief executive officer, the compensation committee authorized a (i) rollback the \$20,000 increase in the annual base salaries previously authorized for the chief financial officer and president of Inter Parfums USA, LLC (Specialty Retail Division), so that their annual base salaries would return to the levels paid in 2008, and (ii) decrease the annual base salary by \$20,000 of the chief executive officer, all on a pro rata basis effective as of April 16, 2009.

Bonus Compensation/ Annual Incentives

Determination of the amount of annual bonus compensation to executives of United States operations, other than the chief executive officer, has been discretionary, and depends upon the performance the individual as well as the results of the company as a whole. We believe that having flexibility in structuring annual bonus compensation is a benefit. Such annual cash bonus compensation is generally a percentage of the annual base salary.

However, in order for the chief executive officer to receive a cash bonus, United States operations has to achieve after tax profit target. In 2008, based upon such targets, our chief executive officer did not earn any cash bonus. In 2007, based upon such targets, our chief executive officer earned a \$100,000 cash bonus. For 2009 the compensation committee has determined to use the same after tax profit target for our company's United States operations to calculate the chief executive officer's bonus.

Cash bonuses for executive officers of European operations generally consist of a larger portion of overall compensation as compared to executive officers of United States operations. The compensation committee believes that such larger bonus compensation is commensurate with the marketplace for comparable industry executives in Paris, where European operations maintain their headquarters.

In addition, as required by French law, Inter Parfums, SA maintains its own profit sharing plan for all French employees, including executive officers of our European operations other than Mr. Benacin, the Chief Executive Officer of Inter Parfums, SA.

Long Term Incentives

Stock Options. We link long-term incentives with corporate performance through the grant of stock options. All options are granted with an exercise price equal to the fair market value of the underlying shares of our common stock on the date of grant, and terminate on or shortly after severance of the executive's relationship with us. Unless the market price of our common stock increases, corporate executives will have no tangible benefit. Thus, they are provided with the additional incentive to increase individual performance with the ultimate goal of increasing our overall performance. We believe that enhanced executive incentives which result in increased corporate performance tend to build company loyalty. As a general rule, the number of options granted is determined by several factors, but most importantly, both individual and company operating results for the past year, as well as past option grants to such executives.

For executive officers of United States operations and Mr. Benacin, we typically grant nonqualified stock options with a term of 6 years that vest ratably of a 5-year period on a cumulative basis, so that the option will become fully exercisable at the beginning of the sixth year from the date of grant. In addition, we have temporarily discontinued all option grants to purchase shares of our majority-owned, French subsidiary, Inter Parfums, S.A. to avoid decrease the dilution of our ownership interest in Inter Parfums, S.A. In lieu of option grants to purchase shares of our majority-owned, French subsidiary, we have granted options to our French executive officers and employees under the French Addendum to our stock option plan, which have a term of 6 years and vest 4 years after the date of grant.

We believe that the vesting period of these options serve a dual purpose: 1. executives will not receive any benefit if they leave prior to such portion of the option vesting; and 2. having a vesting period, matches the service period with the potential benefits of the option. Pursuant to our stock option plan, non-qualified stock options granted to executives terminate immediately upon the executive's termination of association with our company. This termination provision coupled with a vesting period, reduces benefits afforded to an executive when an executive officer leaves our employ.

Over the past several years, as our company has grown and the market price of our common stock has increased, Messrs. Madar and Benacin have realized substantial compensation as the result of the exercise of their options. As the two executives most responsible for continued growth and success of our company, the Committee believes the granting of options is an appropriate tool to tie a substantial portion of their compensation to the success of our company and is completely warranted.

Generally we grant options to executive officers in December of each year. However, we had granted options in February 2008, after our stock option plan was amended, to French executive officers and French employees who had not received any option awards in 2007.

Unfortunately, with the global economic downturn commencing in the fourth quarter of 2008, the market price of our common stock as reported by The Nasdaq Stock Market has decreased substantially. As the result of such price decline, all outstanding options, other than the option grants made on December 31, 2008, have exercise prices which are in excess of the market price, thus rendering such options potentially worthless. It is the hope of the compensation committee that the most recent option grant with a lower exercise price based upon the market price at the time, as compared to prior years, will still act as a sufficient additional incentive for increased individual executive performance.

The actual compensation realized as the result of the exercise of options in the past, as well as the future potential of such rewards, are powerful incentives for increased individual performance and ultimately increased company performance. In view of the fact that the executive officers named above contribute significantly to our profitable operations, the compensation committee believes the option grants are valid incentives for these executive officers and are fair to our shareholders.

Stock Appreciation Rights. Our 2004 stock option plan authorizes us to grant stock appreciation rights, or SARs. An SAR represents a right to receive the appreciation in value, if any, of our common stock over the base value of the SAR. To date, we have not granted any SARs under the 2004 plan. While the compensation committee currently does not plan to grant any SARs under our 2004 plan, it may choose to do so in the future as part of a review of the executive compensation strategy.

Restricted Stock. We have not in the past, and we do not have any future plans to grant restricted stock to our executive officers. However, while the compensation committee currently does not plan to authorize any restricted stock plans, the compensation committee may choose to do so in the future as part of a review of the executive compensation strategy.

No Stock Ownership Guidelines

We do not require any minimum level of stock ownership by any of our executive officers. As stated above, Messrs. Madar and Benacin, are our largest shareholders, which aligns their interests with our shareholder base in keeping executive compensation at a reasonable level.

Retirement and Pension Plans

We maintain a 401K plan for United States operations. However, we do not match any contributions to such plan, as we have determined base compensation together with annual bonuses and stock option awards, are sufficient incentives to retain talented employees. Our European operations maintains a pension plan for it employees as required by French law.

Compensation Committee Report

We have reviewed and discussed with management the Compensation Discussion and Analysis provisions to be included in this amendment to the Annual Report on Form 10-K for fiscal year ended December 31, 2008, as well as the proxy statement for the upcoming annual meeting of shareholders. Based on this review and discussion, we recommended to the board of directors that the Compensation Discussion and Analysis referred to above be included in this amendment to the Annual Report on Form 10-K as well as the proxy statement for the upcoming annual meeting of shareholders.

Options

As discussed above, we typically grant nonqualified stock options with a term of 6 years that vest ratably of a 5-year period on a cumulative basis, so that the option will become fully exercisable at the beginning of the sixth year from the date of grant. Further, as reported above, options granted to French employees under the French Addendum to our stock option plan, have a term of 6 years, and vest 4 years after the date of grant. Options were granted in February 2008 after the technical amendments to our stock option plan to comply with certain provisions of French law.

We believe that the vesting period of these options serves a dual purpose: 1. executives will not receive any benefit if they leave prior to such portion of the option vesting; and 2. having a vesting period matches the service period with the potential benefits of the option.

Under our stock option plans, the fair market value is determined by the average of the high and low price on the date of grant, not the closing price as reported by The Nasdaq Stock Market.

We also note that the Summary Compensation Table does not include income realized by the named executive officers as the result of the exercise of stock options, but rather reflects the dollar amount recognized for financial statement reporting purposes for options granted in accordance with SFAS 123R. However, value realized as the result of stock option exercises is set forth in the table entitled "Option Exercises and Stock Vested".

During 2008 Mr. Santi realized \$58,275 as the result of the exercise of a stock option to purchase shares of our company and an additional \$154,308 as the result of the exercise of a stock option to purchase shares of our majority-owned subsidiary, Inter Parfums, S.A. In addition, Messrs. Benacin and Greenberg exercised stock options to acquire shares of our majority-owned subsidiary, Inter Parfums, S.A, and realized \$123,446 and \$46,000, respectively.

Inter Parfums, S.A. Profit Sharing Plan

As required by French law, Inter Parfums, SA maintains its own profit sharing plan for all French employees who have completed three months of service, including executive officers of our European operations other than Mr. Benacin, the Chief Executive Officer of Inter Parfums, SA. Benefits are calculated based upon a percentage of taxable income of Inter Parfums, S.A. and allocated to employees based upon salary. The maximum amount payable per year per employee is 25,000 euros, or approximately \$34,792.

Calculation of total annual benefits contribution is made according to the following formula:

50% of (Inter Parfums, S.A. net income, less 5% of shareholders equity without net income for the year) times a fraction, the numerator of which is wages, and the denominator of which is net income before tax + wages + taxes (other than income tax) + valuation allowances + amortization expenses + interest expenses.

Contribution to individual employees is then made pro rata based upon their individual salaries for the year.
