Report of Independent Registered Public Accounting Firm

The Board of Directors  
Benchmark Electronics, Inc.:

We have audited the accompanying statements of net assets available for benefits of the Benchmark Electronics, Inc. 401(k) Employee Savings Plan (the Plan) as of December 30, 2008 and 2007 and the related statement of changes in net assets available for benefits for the year ended December 30, 2008. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits as of December 30, 2008 and 2007, and the changes in net assets available for benefits for the year ended December 30, 2008, in conformity with accounting principles generally accepted in the United States of America.

Our audits were performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The Supplemental Schedule H, Line 4i - Schedule of Assets (Held at End of Year) as of December 30, 2008 is presented for the purpose of additional analysis and is not a required part of the basic financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This supplemental schedule is the responsibility of the Plan's management. This supplemental schedule has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

December 30, 2008 and 2007

(1) Description of Plan

The following description of the Benchmark Electronics, Inc. 401(k) Employee Savings Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for more complete information.

(a) General

The Plan is a defined contribution plan covering all employees of Benchmark Electronics, Inc. (the Company) and employees of the Company's affiliates, Benchmark Electronics Delaware Corp., Benchmark Electronics Company, Benchmark Electronics California Incorporated and Benchmark Electronics Huntsville, Inc. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan has adopted the Dreyfus Non Standardized Prototype Profit Sharing Plan and Trust (the Prototype Plan).

The Plan is administered by the Company and advised by the board of directors of the Company. Mellon Trust of New England, N.A. is trustee of the Plan and ACS HR Solutions is the record keeper.

(b) Contributions and Investment Options

Participants may elect to make pre-tax contributions of up to 100% (in 0.5% increments) of their compensation, as defined. Participant contributions will be matched by the Company on a 100% basis, not to exceed 4.0% of a participant's compensation (referred to as employer contributions) upon one year of service. The Company may also elect to make an employer discretionary contribution to all employees employed at the end of the Plan year who have completed 1,000 hours of service during such year. The Company did not make a discretionary contribution during the 2008 Plan year. Certain Internal Revenue Service (IRS) limits may apply to both the participants' contributions and the employers' contributions. Eligible participants may also elect to roll over distributions from a former employer's qualified retirement plan.

Participants may direct all contributions to any of the following investment options.

§ Mellon Stable Value, Series I - The fund is a collective investment fund that seeks high current income and stability of principal. The fund will invest principally in investment contracts, including guaranteed investment contracts (GICs), synthetic investment contracts consisting of high-quality fixed income securities held within contracts to minimize market volatilities, and short-term money market instruments.

(Continued)

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

§ Dreyfus BASIC S&P 500 Stock Index Fund - The fund seeks to match the total return of the Standard & Poor's 500 Composite Stock Price Index (S&P 500® Index). The fund normally invests at least 95% of its assets in common stocks included in the S&P 500® Index. The fund generally invests in all 500 stocks in the S&P 500® in proportion to their weighting in the index. The S&P 500® Index is an unmanaged index of 500 common stocks chosen to reflect the industries of the U.S. economy and is often considered a proxy for the stock market in general. Standard and Poor's chooses the member companies for the 500 based on market size, liquidity and industry representation.

§ Dreyfus Appreciation Fund, Inc. - The fund seeks long-term capital growth and preservation of capital. Its secondary goal is current income. The fund normally invests at least 80% of its assets in common stock. The fund focuses on "blue chip" companies, including multi-national companies, with total market capitalizations of more than \$5 billion at the time of purchase. The fund manager uses a "buy and hold" investment strategy and seeks to keep annual portfolio turnover below 15%.

§ GAMCO Westwood Balance Fund AAA – The fund seeks capital appreciation and current income. The fund invests in a combination of equity and debt securities. The fund typically invests 30% to 70% of its assets in equity securities and 70% to 30% in debt securities, and the balance of its assets in cash or cash equivalents.

§ Dreyfus Intermediate Term Income Fund, Class I - The fund seeks to maximize total return, consisting of capital appreciation and current income. The fund normally invests at least 80% of its assets in fixed-income securities of U.S. and foreign issuers rated investment grade or the unrated equivalent as determined by the fund manager. These securities include: U.S. government bonds and notes, corporate bonds, municipal bonds, convertible securities, preferred stocks, inflation-indexed securities, asset-backed securities, mortgage-related securities (including CMOs), and foreign bonds.

§ Dreyfus/The Boston Company International Core Equity Fund – The fund seeks long-term capital growth and normally invests at least 80% of its assets in foreign equities. It usually invests in at least five countries choosing from the countries included on the Morgan Stanley Capital International Europe, Australasia and Far East (EAFE) Index and Canada. The fund may invest up to 25% of its assets in securities of issuers located in emerging market countries.

§ TCW Select Equities Fund, Class N - The fund seeks long-term capital appreciation and invests primarily in common stocks of larger companies. The fund invests in companies that are believed to have strong and enduring business models and inherent advantages over competitors.

(Continued)

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

§ Goldman Sachs Mid Cap Value Fund – The funds seeks long-term capital appreciation. The fund typically invests at least 80% of its assets in equity securities with market capitalizations within the same range as the Russell Midcap® Value Index at the time of purchase. Although the fund invests primarily in U.S. securities, it may invest up to 25% of its assets in foreign securities, including securities of issues in emerging countries and securities quoted in foreign currencies.

§ JP Morgan Small Cap Equity Fund – The funds seeks long-term capital appreciation. The fund normally invests at least 80% of its assets in equity securities, primarily common stocks, of small cap companies. Small cap companies are companies with market capitalizations equal to those within the universe of the Russell 2000® Index stocks at the time of purchase.

§ Benchmark Electronics, Inc. Common Stock Fund - Funds are invested in common stock of the Company. This investment is designed to give participants ownership in Benchmark Electronics, Inc., as well as an opportunity to share in the Company's potential long-term growth.

(c) Participant Accounts

Each participant's account is credited with the participant's contribution and employer matching contributions and an allocation of discretionary employer contributions, if any, and plan earnings. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

(d) Vesting

Effective December 31, 2003, participants are immediately vested in their contributions and in employer matching contributions to the Plan plus actual earnings thereon.

(e) Participants' Notes Receivable

Upon application by a participant, the Plan administrator may make loans to participants not to exceed 50% of the participants' 401(k) vested balance, with a minimum of \$1,000 and a maximum of \$50,000 less the participant's highest outstanding loan balance during the preceding 12 months. Participants' notes are to be repaid by level monthly payroll deductions of principal plus interest or may be prepaid in full or in part without penalty at any time. The interest rate is set at the prime rate plus 1%. Loan proceeds are reduced by a \$50 loan processing fee.

(Continued)

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

(f) Administrative Expenses

Administrative expenses of the Plan are paid partly by the Company and partly by the Plan. Mutual fund redemption fees paid by participants are reported in administrative fees in the accompanying statement of changes in net assets available for benefits. Expenses related to the asset management of the investment funds and recordkeeping services are paid via the expense ratios charged on the investments which reduce the investment return reported and credited to participant accounts. Consequently, these management fees and operating expenses are reflected as a reduction of investment return for such investments. In addition, the Company incurs certain expenses administering the Plan, which are not included in the Plan's financial statements.

(g) Payment of Benefits

On termination of service, a participant may elect to receive either a lump-sum amount equal to the vested value of his/her account or an annuity with various terms and rates or rollover to another qualified plan.

While employed, a participant may make withdrawals from his or her account balance (as allowed under IRS regulations) subject to certain restrictions as described in the Plan. Certain restrictions associated with withdrawals may be waived in the event a participant demonstrates financial hardship.

(h) Termination of the Plan

Although the Company has not expressed any intent to terminate the Plan, it may do so as provided by the Plan agreement.

(i) Forfeitures

Nonvested employer contributions forfeited upon the participant's receipt of a distribution of his/her vested balance prior to December 31, 2003, totaled \$6,881 and \$43,681 at December 30, 2008 and 2007, respectively. These accounts will be used to reduce future employer contributions.

(2) Summary of Accounting Policies

(a) Basis of Financial Statements

The financial statements of the Plan are prepared under the accrual method of accounting.

(b) Investment Valuation

The Plan's investments are stated at fair value. The common stock of the Company and mutual funds are valued at their quoted market price. The investments in common/collective trust funds are valued based upon the quoted market values of the underlying assets. The estimated fair value of the investment in the Mellon Stable Value Fund is then adjusted to contract value in the adjustment from fair value to contract value for fully benefit-responsive investment contracts line item as described in paragraph (c) below. Participants' notes receivable are valued at their outstanding balances which approximates fair value.

(Continued)

7

---

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

Purchases and sales of securities are recorded on a trade-date basis. Interest and dividends are recorded as earned. Net investment gain (loss) from mutual funds and common/collective trust funds includes interest, dividends, realized gains (losses) on sale of investments and unrealized appreciation (depreciation) in fair value of investments. Net depreciation in fair value of common stock includes realized gains (losses) on sale of common stock and unrealized appreciation (depreciation) in fair value of common stock.

(c) Investment Contracts

The Mellon Stable Value Fund, Series I (the Stable Value Fund), which is provided as an investment option to participants in the Plan, holds fully benefit-responsive guaranteed investment contracts (GICs).

As provided in the provisions of the Financial Accounting Standards Board (FASB) Staff Position AAG INV-1 and SOP 94-4-1, "Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans" (the FSP), an investment contract is generally permitted to be valued at contract value, rather than fair value, to the extent it is fully benefit-responsive. As also provided for by the FSP, the fully benefit-responsive investment contracts are included at fair value in the investments of the Plan and are adjusted to contract value in the statements of net assets available for Plan benefits.

The Stable Value Fund is a common/collective trust fund and generally consists of three types of investment contracts that are described in detail below:

**Guaranteed Investment Contracts – Traditional GICs** are unsecured, general account obligations of insurance companies. The obligation is backed by the general account assets of the insurance company that writes the investment contract. The crediting rate on this product is typically fixed for the life of the investment. Separate account GICs are investments in a segregated account of assets maintained by an insurance company for the benefit of the investors. The total return of the segregated account assets supports the separate account GIC's return. The credited rate on this product will reset periodically and it will have an interest rate of not less than 0%. Fair values of GICs are calculated using the present value of the contract's future cash flow values discounted by comparable duration Wall Street Journal GIC Index rates.

**Fixed Maturity Synthetic Guaranteed Investment Contracts – General fixed maturity synthetic GICs** consist of an asset or collection of assets that are owned by the fund and a benefit responsive, book value wrap contract purchased for the portfolio. The wrap contract provides book value accounting for the asset and assures that book value, benefit responsive payments will be made for participant directed withdrawals. The crediting rate of the contract is set at the start of the contract and typically resets every quarter. Generally, fixed maturity synthetics are held to maturity. The initial crediting rate is established based on the market interest rates at the time the initial asset is purchased and it will have an interest crediting rate not less than 0%. Fair values of general fixed maturity GICs are calculated using the sum of all assets' market values provided by FT Interactive, a third party vendor Standish Mellon has engaged to provide fixed income prices on a monthly basis. Variable synthetic GICs consist of an asset or collection of assets that are managed by the bank or insurance company and are held in a bankruptcy remote vehicle for the benefit of the fund. The contract is benefit responsive and provides next day liquidity at book value. The crediting rate on this product resets every quarter based on the then current market index rates and an investment spread. The investment

spread is established at time of issuance and is guaranteed by the issuer for the life of the investment. Fair values for variable synthetic GICs are calculated using the present value of the contract's future cash flow values discounted by comparable swap rates.

(Continued)

8

---

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

Constant Duration Synthetic Guaranteed Investment Contracts – Constant duration synthetic GICs consist of a portfolio of securities owned by the fund and a benefit responsive, book value wrap contract purchased for the portfolio. The wrap contract amortizes gains and losses of the underlying securities over the portfolio duration, and assures that book value, benefit responsive payments will be made for participant directed withdrawals. The crediting rate on a constant duration synthetic GIC resets every quarter based on the book value of the contract, the market yield of the underlying assets, the market value of the underlying assets and the average duration of the underlying assets. The crediting rate aims at converging the book value of the contract and the market value of the underlying portfolio over the duration of the contract and therefore will be affected by movements in interest rates and/or changes in the market value of the underlying portfolio. The initial crediting rate is established based on the market interest rates at the time the underlying portfolio is first put together and it will have an interest crediting rate of not less than 0%. Fair values for constant duration synthetic GICs are calculated using the market values provided by the external investment managers Standish Mellon have engaged to provide investment services.

The existence of certain conditions can limit the ability of the Stable Value Fund to transact at book or contract value. Specifically, any event outside the normal operation of the Stable Value Fund which causes a withdrawal from an investment contract may result in a negative market value adjustment with respect to such withdrawal. Examples of such events include, but are not limited to, the following:

- employer-initiated events - events within the control of the Plan or the Company which would have a material and adverse impact on the Stable Value Fund;
  - employer communications designed to induce participants to transfer from the Stable Value Fund;
  - competing fund transfer or violation of equity wash or equivalent rules in place;
  - changes of qualification status of the Company or the Plan.

In general, issuers of investment contracts may terminate the contract and settle at other than contract value if the qualification status of the Company or the Plan changes, breach of material obligations under the contract and misrepresentation by the contract holder, or failure of the underlying portfolio to conform to the pre-established investment.

(Continued)

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

(d) Concentration of Investments

The Plan's investment in shares of the Company's common stock represents 6.6% and 8.7% of the Plan's net assets as of December 30, 2008 and 2007, respectively. The Company has been in operation since 1981 and is listed on the New York Stock Exchange.

(e) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

(f) Payment of Benefits

Benefits are recorded when paid.

(3) Benchmark Electronics, Inc. Common Stock

Each participant is entitled to exercise voting rights attributable to the shares allocated to his or her account and is notified by the trustee prior to the time that such rights are to be exercised.

(4) Federal Income Tax Exemption

The IRS has determined and informed the Company by a letter dated September 1, 1994, that the Prototype Plan and related trust are designed in accordance with Section 401(a) of the Internal Revenue Code of 1986 (IRC) and, accordingly, are entitled to an exemption from federal income taxes under the provisions of Section 501(a). The Plan administrator believes that the Plan is designed, and is currently being operated in compliance with the appropriate IRC sections.

Notes to Financial Statements

(5) Reconciliation of Financial Statements to Form 5500

Reconciliation of the Schedule H, Line 4(i) – Schedule of Assets (Held at End of Year) reported in the financial statements to the Form 5500 as of December 30, 2008 and 2007 is as follows:

	2008	2007
Schedule H, Line 4(i) – Schedule of Assets reported per the Form 5500	\$ 112,077,082	113,114,958
Adjustment from fair value to contract value for fully benefit-responsive contracts	(2,255,602)	(231,891)
Schedule H, Line 4(i) – Schedule of Assets reported in the accompanying statement	\$ 109,821,480	112,883,067

Reconciliation of the net assets available for benefits reported in the accompanying statements to the net assets available for benefits reported per the Form 5500 as of December 30, 2008 and 2007 is as follows:

	2008	2007
Net assets available for benefits reported per the Form 5500	\$ 112,373,596	113,268,336
Adjustment in employer contributions receivable	338,354	195,388
Adjustment in participants contributions receivable	174,482	408,253
Adjustment in due from trustee	126,087	32,265
Net assets available for benefits reported in the accompanying statement	\$ 113,012,519	113,904,242

Reconciliation of the changes in net assets available for benefits reported in the accompanying statement to the net changes in net assets available for benefits reported per the Form 5500 for the year ended December 30, 2008 is as follows:

Net changes in net assets available for benefits reported per the Form 5500	\$ (894,740)
Adjustment in contributions from employer	142,966
Adjustment in contributions from participants	(233,771)
Adjustment in amounts due from trustee	93,822
Net changes in net assets available for benefits reported in the accompanying statement	\$ (891,723)

(Continued)

BENCHMARK ELECTRONICS, INC.  
401(k) EMPLOYEE SAVINGS PLAN

Notes to Financial Statements

(6) Investments

The following table presents investments that represent 5 percent or more of the Plan's net assets as of December 30, 2008 and 2007:

	2008	2007
Mellon Stable Value Fund, Series I (contract value - \$47,546,172 and \$47,778,063, respectively)	\$ 50,775,719	47,546,172
Dreyfus BASIC S&P 500® Stock Index Fund	7,696,704	*
Benchmark Electronics, Inc. Common Stock Fund	7,467,094	9,880,624
Dreyfus Appreciation Fund, Inc.	7,464,888	11,654,920
Goldman Sachs Mid Cap Value Fund	7,331,453	9,238,554
Dreyfus Intermediate Term Income Fund, Class I	6,508,785	*
Dreyfus/The Boston Company International Core Equity Fund	*	8,115,695
Dreyfus Premier Balance Fund, Class I	*	6,493,390

\* Investment not greater than 5 percent.

(7) Party-in-Interest Transactions

The Plan engages in investment transactions with Funds managed by The Dreyfus Corporation, Mellon Trust of New England and Mellon Institutional Funds Investment Trust. These companies are all affiliated with The Bank of New York Mellon Corporation who is the parent company for The Dreyfus Corporation and Mellon Trust of New England, N.A., the trustee. These transactions are covered by an exemption from the prohibited transaction provisions of ERISA and IRC.

The Plan invests in shares of the Company's common stock. As the Company is the sponsor of the Plan, these transactions qualify as party-in-interest transactions which are also exempt under ERISA.

(8) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

The Stable Value Fund includes synthetic investment contracts that are benefit-responsive and are carried at fair value totaling \$50.8 million at December 30, 2008. There are no reserves against these synthetic GICs for credit risk of the contract issuer. Certain of the synthetic GICs contain limitations on contract value guarantees for liquidation other than to pay benefits. The average yield earned by the Stable Value Fund was 4.01% and 4.44% for the year ended December 30, 2008 and 2007, respectively. The average credited interest rate to the participants for the Stable Value Fund was 3.70% and 4.14% for the year ended December 30, 2008 and 2007, respectively. To calculate the yield, the amount credited to participants for the last day of the period is annualized and divided by the fair value of the Stable

Value Fund on that date.

Notes to Financial Statements

(8) Fair Value Measurements

As of December 31, 2007, the Plan adopted the provisions of SFAS No. 157, "Fair Value Measurements" (SFAS No. 157) for its investments. SFAS No. 157 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). An asset or liability's classification within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy under SFAS No. 157 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
  - Quoted prices for identical or similar assets or liabilities in inactive markets;
  - Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

As of December 30, 2008, the Plan's investments measured at fair value on a recurring basis were as follows:

	Level 1	Level 2	Level 3	Total
Mutual funds	\$ 46,831,840	—	—	46,831,840
Common stocks	7,467,094	—	—	7,467,094
Common/collective trust funds	—	50,775,809	—	50,775,809
Participants' notes receivable	—	—	4,746,737	4,746,737
Total investments at fair value	\$ 54,298,934	50,775,809	4,746,737	109,821,480
