HIGHWAY HOLDINGS REPORTS FISCAL 2010 SECOND QUARTER RESULTS

--Net profit increases; Sees Signs of Recovery from Worldwide Economic Downturn--

HONG KONG — November 10, 2009 — Highway Holdings Limited (Nasdaq:) today reported results for its second fiscal quarter ended September 30, 2009, reflecting a modest gain in net income and gross margin improvement despite the impact of global economic conditions on net sales.

Net income for the 2010 fiscal second quarter increased to \$139,000, or \$0.04 per diluted share, from \$100,000, or \$0.03 per diluted share, a year earlier. Net sales for same period were \$5.2 million compared with \$9.5 million a year earlier.

Net income for the first half of fiscal 2010 was \$3,000, compared with a net income of \$387,000, a year earlier. Net sales for the six-month period were \$9.8 million compared with \$18.9 million a year ago --reflecting the full impact of global economic conditions on the company's major customers during the first two quarters of the new fiscal year.

“As expected, net sales were substantially lower during the first six months of this fiscal year than last year as a result of fewer orders received and a change in pricing policy that reduces our sales price when material costs decrease. The decrease in orders was due to the effects of the worldwide recession on our clients. Orders, however, started to improve beginning in August,” said Roland Kohl, president and chief executive officer.

Kohl further noted that despite reduced sales levels, the company was able to post a profit for both the second fiscal quarter and the six-month period— a result of management's precautionary measures that were implemented at the beginning of the current recession, including a 50 percent reduction in the workforce; successful new pricing policies with customers to address raw material cost price fluctuations; greater utilization of automation, and improved overall efficiency. “As a result of these measures and several other initiatives, I believe that we are well positioned to realize significant improvement in our operating results as economic conditions improve and net sales increase,” Kohl said

2-2-2

Gross profit as a percentage of sales for the quarter increased to 25.2 percent from 19.1 percent in the same period a year ago as a result of the company's new pricing policies and the increase in automation.

Selling, general and administrative expenses decreased to \$1.22 million during the second quarter of the current fiscal year from \$1.45 million in same quarter a year ago. The decrease in selling, general and administrative expenses was the result of ongoing streamlining of its administrative operations and the decrease in sales. The company is in the process of consolidating three of its manufacturing operations into one. Kohl noted that the company's factory located in He Yuan has already been relocated to the company's facilities in Long Hua, and that its Golden Bright facility in Ping Hsu is in the process of also being integrated into the main operation in Long Hua. Once completed, the consolidation of these three facilities is expected to contribute major further cost reductions.

The company realized a \$67,000 currency exchange gain during the fiscal 2010 second quarter compared with a \$197,000 currency exchange loss during the same period last year, due to the strong value of the Euro compared with the U.S. dollar. For the six-months, the company realized a currency exchange gain of \$348,000 compared with a currency exchange loss of \$205,000 a year earlier. Since the company does not engage in currency exchange rate hedging, the company will in the future continue to realize currency exchange gains and losses as a result of the fluctuation of currency exchange rates.

Kohl highlighted the company's strong balance sheet, with cash and cash equivalents and restricted cash increasing by \$68,000 to \$6.9 million, or \$1.8 cash per share, from March 31, 2009 to September 30, 2009. He also noted that inventory, accounts receivable and other current assets at September 30, 2009 were reduced by \$1.03 million from levels at March 31, 2009 – representing cash, cash equivalents and restricted cash being approximately half of current assets. Current liabilities at September 30, 2009 totaled \$4.86 million and current assets were 13.9 million. Total shareholders' equity at September 30, 2009 was \$ 11.2 million, or \$2.96 per diluted share, compared with \$11.4 million, or \$3.07 per diluted share, at March 31, 2009.
