UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Universal Corporation, with its subsidiaries ("Universal" or the "Company"), is the world's leading leaf tobacco merchant and processor. Because of the seasonal nature of the Company's business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. Certain amounts in prior year statements have been reclassified to conform to the current year presentation. This Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2010.

NOTE 2. ACCOUNTING PRONOUNCEMENTS

Recent Pronouncements Adopted Through June 30, 2010

In June 2009, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles - a replacement of FASB Statement No. 162" ("SFAS 168"). This Statement established the newly-developed FASB Accounting Standards Codification ("Codification") as the single source of authoritative U.S. generally accepted accounting principles ("GAAP") for all nongovernmental entities. All guidance in the Codification carries the same level of authority, and all changes or additions to U.S. generally accepted accounting principles are now issued as Accounting Standards Updates ("ASU's"). In addition to the Codification, rules and interpretive releases of the U.S. Securities and Exchange Commission ("SEC") under federal securities laws remain sources of authoritative GAAP for SEC registrants. Universal was required to adopt SFAS 168 effective September 30, 2009. SFAS 168 did not make any changes to existing accounting guidance that impacted the Company's accounting and financial reporting.

During the fiscal year ended March 31, 2010 and through the quarter ended June 30, 2010, Universal adopted the following key accounting pronouncements:

- FASB Accounting Standards Update 2010-06, "Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"), which was issued by the FASB in January 2010 and is effective for interim and annual financial statements for fiscal years beginning after December 15, 2010. ASU 2010-06 expands and clarifies the disclosure requirements related to fair value measurements. It requires companies to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 of the fair value hierarchy and describe the reasons for the transfers. In addition, information about purchases, sales, issuances, and settlements on a gross basis is required in the reconciliation of Level 3 fair-value measurements. ASU 2010-06 also clarifies existing fair value measurement disclosure guidance related to level of disaggregation, fair value inputs, and valuation techniques. Universal was required to apply most provisions of the new guidance effective April 1, 2010, the beginning of the current fiscal year. The adoption of ASU 2010-06 did not have a material effect on the Company's financial statements.

- FASB Staff Position No. 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets" ("FSP 132(R)-1"), adopted effective March 31, 2010. This pronouncement, which is now a part of Topic 715 of the Codification, requires expanded disclosures about plan assets of defined benefit pension or other postretirement benefit plans. The new disclosures include information about investment allocation decisions, categories of plan assets, the inputs and valuation techniques used to measure the fair value of those assets, and significant

concentrations of credit risk. The disclosures required by FSP 132(R)-1 were included in the Company's annual financial statements at March 31, 2010 and did not have a material effect on those financial statements.

- FASB Statement of Financial Accounting Standards No. 165, "Subsequent Events" ("SFAS 165"), adopted effective June 30, 2009. SFAS 165, which is now set forth under Topic 855 of the Codification, establishes standards for accounting and disclosure for events occurring after the balance sheet date but before financial statements are issued. It defines the period after the balance sheet date during which events or transactions should be evaluated for potential recognition or disclosure, and it provides guidance on recognition and disclosure of actual transactions or events occurring after the balance sheet date. The adoption of SFAS 165 did not have a material effect on the Company's financial statements.

- FASB Statement of Financial Accounting Standards No. 160, "Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51" ("SFAS 160"), adopted effective April 1, 2009. SFAS 160, which is now set forth in Topic 810 of the Codification, requires that noncontrolling interests in subsidiaries that are included in a company's consolidated financial statements, previously referred to as "minority interests," be reported as a component of shareholders' equity in the balance sheet. It also requires that a company's consolidated net income and comprehensive income include the amounts attributable to both the company's interest and the noncontrolling interest in the subsidiary, identified separately in the financial statements. Finally, the new guidance requires certain disclosures about noncontrolling interests in the consolidated financial statements. Adoption of this guidance did not have a material impact on the Company's financial statements.

- FASB Statement of Financial Accounting Standards No. 141(R), "Business Combinations" ("SFAS 141(R)"), adopted effective April 1, 2009. SFAS 141(R) requires that companies record assets acquired, liabilities assumed, and noncontrolling interests in business combinations at fair value, separately from goodwill, as of the acquisition date. This approach differs from the cost allocation approach outlined under previous accounting guidance and can result in recognition of a gain at acquisition date if the cost to acquire a business is less than the net fair value of the assets acquired, liabilities assumed, and noncontrolling interests. SFAS 141(R), which is now set forth under Topic 805 of the Codification, also provides new guidance on recording assets and liabilities that arise from contingencies in a business combination, and it requires that transaction costs associated with business combinations be charged to expense instead of being recorded as part of the cost of the acquired business. Universal will apply the guidance to any future business combinations.

Pronouncements to be Adopted in Future Periods

In addition to the above accounting pronouncements adopted through June 30, 2010, the following pronouncement has been issued and will become effective in fiscal year 2012:

- FASB Accounting Standards Update 2009-13, "Multiple-Deliverable Revenue Arrangements" ("ASU 2009-13"), which was issued by the FASB in October 2009. ASU 2009-13 establishes a selling price hierarchy for determining the selling price of a deliverable in a multiple-deliverable arrangement. It also requires additional disclosures about the methods and assumptions used to evaluate multiple-deliverable arrangements and to identify the significant deliverables within those arrangements. ASU 2009-13 is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, which means that Universal will be required to adopt the guidance effective April 1, 2011, the beginning of its fiscal year 2012. The Company will be evaluating the potential impact of ASU 2009-13, but does not currently expect that it will have a material effect on its financial statements.

NOTE 3. GUARANTEES AND OTHER CONTINGENT LIABILITIES

Guarantees and Other Contingent Liabilities

Guarantees of bank loans to growers for crop financing and construction of curing barns or other tobacco producing assets are industry practice in Brazil and support the farmers' production of tobacco there. At June 30, 2010, the Company's total exposure under guarantees issued by its operating subsidiary in Brazil for banking facilities of farmers in that country was approximately $46 million ($62 million face amount including unpaid accrued interest, less $16 million recorded for the fair value of the guarantees). About 60% of these guarantees expire within one year, and all of the remainder expire within five years. The subsidiary withholds payments due to the farmers on delivery of tobacco and forwards those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiary to cover their obligations to the third-party banks could result in a liability for the subsidiary under the related guarantees; however, in that case, the subsidiary would have recourse against the farmers. The maximum potential amount of future payments that the Company's subsidiary could be required to make at June 30, 2010, was the face amount, $62 million including unpaid accrued interest ($82 million as of June 30, 2009, and $112 million at March 31, 2010). The fair value of the guarantees was a liability of approximately $16 million at June 30, 2010 ($36 million at June 30, 2009, and $26 million at March 31, 2010). In addition to these guarantees, the Company has other contingent liabilities totaling approximately $47 million, primarily related to a bank guarantee that bonds an appeal of a 2006 fine in the European Union, as discussed below.

European Commission Fines and Other Legal Matters

European Commission Fines in Spain

In October 2004, the European Commission (the "Commission") imposed fines on "five companies active in the raw Spanish tobacco processing market" totaling €20 million for "colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain." Two of the Company's subsidiaries, Tabacos Espanoles S.A. ("TAES"), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. ("Deltafina"), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of €108,000 on TAES and a fine of €11.88 million on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. The Company recorded a charge of about €12 million (approximately $14.9 million at the September 2004 exchange rate) in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against the Company's subsidiaries.

In January 2005, Deltafina filed an appeal in the General Court of the European Union. Although a hearing on the matter was held in June 2009, the outcome of the appeal is uncertain. The General Court is scheduled to issue its decision in September 2010; however, an ultimate resolution to the matter could take several years. The Company has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, the Company reported that it was aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. The Company reported that it did not believe that the Commission investigation in Italy would result in penalties being assessed against it or its subsidiaries that would be material to the Company's earnings. The reason the Company held this belief was that it had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, the Company received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, the Company received notification from the Commission that the Commission had imposed fines totaling €30 million (about $37 million at the June 30, 2010 exchange rate) on Deltafina and the Company jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

The Company does not believe that the decision can be reconciled with the Commission's Statement of Objections and the facts. In January 2006, the Company and Deltafina each filed appeals in the General Court of the European Union. For strategic reasons related to the defense of the Deltafina appeal, Universal recently withdrew its appeal. Based on consultation with outside legal counsel, the Company believes it is probable that Deltafina will prevail in the appeals process and has not accrued a charge for the fine. If the Company and Deltafina were ultimately found liable for the full amount of the fine, then accumulated interest on the fine would also be due and payable. Accumulated interest totaled approximately €4.7 million (about $5.7 million) at June 30, 2010. Deltafina has provided a bank guarantee to the Commission in the amount of the fine plus accumulated interest in order to stay execution during the appeals process.

U.S. Foreign Corrupt Practices Act

As a result of a posting to the Company's Ethics Complaint hotline alleging improper activities that involved or related to certain of its tobacco subsidiaries, the Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. The payments involved approximated $2 million over a seven-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but the Company believes those activities did not violate U.S. antitrust laws. The Company voluntarily reported these activities to the Department of Justice ("DOJ") and Securities and Exchange Commission ("SEC") in March 2006. On June 6, 2006, the SEC notified the Company that a formal order of investigation had been issued.

Since voluntarily reporting, the Company has cooperated with and assisted the DOJ and SEC in their investigations, and for the past year the Company has engaged in settlement discussions with both authorities to resolve the matter. Those negotiations have resulted in agreements in principle being reached with representatives of the DOJ and the staff of the SEC. The final resolution of this matter remains subject to the completion of definitive agreements and the approval and execution of those agreements by the DOJ and the SEC. In addition, each settlement is subject to the approval of a federal district court with jurisdiction over the matter. Based on the agreements in principle that have been reached to date, the resolution of this matter with the DOJ and the SEC is expected to include injunctive relief, disgorgement and prejudgment interest, fines, penalties, and the retention of an independent compliance monitor. Based in part on the progress of the matter and consultation with outside counsel, the Company has recorded accruals from time to time since the matter arose that are adequate to satisfy the estimated financial settlement the Company expects with the resolution of the matter. The financial settlement is not expected to have a material effect on the Company's financial condition or results of operations.

Other Legal Matters

In addition to the above-mentioned matters, various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending these matters and does not currently expect that any of them will have a material adverse effect on the Company's financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

NOTE 4. RESTRUCTURING COSTS

During the quarter ended June 30, 2010, the Company recorded restructuring costs totaling approximately $950,000, representing special termination benefits associated with actions taken to adjust operations and reduce costs in certain areas of its U.S. operations. Those operations are part of the Company's North America reportable segment. The

restructuring costs reflected termination benefits to be paid to management employees who accepted voluntary early retirement offers. The majority of the termination benefits will be paid immediately following the employees' retirement during the quarter ending September 30, 2010.

NOTE 5. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

(in thousands, except per share data)	Three Months Ended June 30, 2010	2009
Basic Earnings Per Share		
Numerator for basic earnings per share		
Net income attributable to Universal Corporation	$ 25,320	$ 43,745
Less: Dividends on convertible perpetual preferred stock	(3,712)	(3,712)
Earnings available to Universal Corporation common shareholders for calculation of basic earnings per share	21,608	40,033
Denominator for basic earnings per share		
Weighted average shares outstanding	24,213	24,985
Basic earnings per share	$ 0.89	$ 1.60
Diluted Earnings Per Share		
Numerator for diluted earnings per share		
Earnings available to Universal Corporation common shareholders	$ 21,608	$ 40,033
Add: Dividends on convertible perpetual preferred stock (if conversion assumed)	3,712	3,712
Earnings available to Universal Corporation common shareholders for calculation of diluted earnings per share	25,320	43,745
Denominator for diluted earnings per share:		
Weighted average shares outstanding	24,213	24,985
Effect of dilutive securities (if conversion or exercise assumed)		
Convertible perpetual preferred stock	4,742	4,728
Employee share-based awards	260	131
Denominator for diluted earnings per share	29,215	29,844
Diluted earnings per share	$ 0.87	$ 1.47

For the quarters ended June 30, 2010 and 2009, certain employee share-based awards were not included in the computation of diluted earnings per share because their effect would have been anti-dilutive. These awards included stock appreciation rights and stock options totaling 657,401 shares at a weighted-average exercise price of $52.65 for the quarter ended June 30, 2010, and 959,439 shares at a weighted-average exercise price of $46.79 for the quarter ended June 30, 2009.

NOTE 6. COMPREHENSIVE INCOME

Comprehensive income for each period presented in the consolidated statements of income and retained earnings was as follows:

(in thousands of dollars - all amounts net of income taxes)	Three Months Ended June 30, 2010	2009
Net income	$ 24,418	$ 43,804
Foreign currency translation adjustment	(11,406)	8,144
Foreign currency hedge adjustment	(2,198)	11,212
Total comprehensive income	10,814	63,160
Less: comprehensive income attributable to noncontrolling interests in subsidiaries (including foreign currency translation adjustment)	931	(75)
Comprehensive income attributable to Universal Corporation	$ 11,745	$ 63,085

NOTE 7. INCOME TAXES

The Company is subject to the tax laws of many jurisdictions. Changes in tax laws or the interpretation of tax laws can affect the Company's earnings, as can the resolution of pending and contested tax issues. The consolidated income tax rate is affected by a number of factors, including the mix of domestic and foreign earnings and investments, local tax rates of subsidiaries, repatriation of foreign earnings, and the Company's ability to utilize foreign tax credits.

The consolidated effective income tax rate was approximately 33.5% for each of the quarters ended June 30, 2010 and 2009. The rate for both periods was lower than the 35% U.S. federal statutory rate primarily due to continued earnings of subsidiaries in the Company’s African region, allowing for recognition of foreign tax credits.

NOTE 8. DERIVATIVES AND HEDGING ACTIVITIES

Universal is exposed to various risks in its worldwide operations and uses derivative financial instruments to manage two specific types of risks – interest rate risk and foreign currency exchange rate risk. Interest rate risk has been managed by entering into interest rate swap agreements, and foreign currency exchange rate risk has been managed by entering into forward foreign currency exchange contracts. However, the Company’s policy also permits other instruments. In addition, management works to manage foreign currency exchange rate risk by minimizing net monetary positions in non-functional currencies, which may include using local borrowings. The disclosures below provide additional information about the Company’s hedging strategies, the derivative instruments used, and the effects of these activities on the consolidated statements of income and the consolidated balance sheets. In the consolidated statements of cash flows, the cash flows associated with all of these activities are reported in net cash provided (used) by operating activities.

Fair Value Hedging Strategy for Interest Rate Risk

The Company has entered into interest rate swap agreements to manage its exposure to interest rate risk, with a strategy of maintaining a level of floating rate debt that approximates the interest rate exposure on its committed inventories. The strategy is implemented by borrowing at floating interest rates and converting a portion of the Company’s fixed-rate debt to floating rates. The interest rate swap agreements allow the Company to receive amounts

equal to the fixed interest payments it is obligated to make on the underlying debt instruments in exchange for making floating-rate interest payments that adjust semi-annually based on changes in the benchmark interest rate.

The Company's interest rate swap agreements are designated and qualify as hedges of the exposure to changes in the fair value of the underlying debt instruments created by fluctuations in prevailing market interest rates. In all cases, the critical terms of each interest rate swap agreement match the terms of the underlying debt instrument, and there is no hedge ineffectiveness. The total notional amount of the Company's receive-fixed/pay-floating interest rate swaps was $245 million at June 30, 2010 and March 31, 2010, and $170 million at June 30, 2009.

Cash Flow Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Forecast Purchases of Tobacco and Related Processing Costs

The majority of the tobacco production in most countries outside the United States where Universal operates is sold in export markets at prices denominated in U.S. dollars. However, purchases of tobacco from farmers and most processing costs (such as labor and energy) in those countries are usually denominated in the local currency. Changes in exchange rates between the U.S. dollar and the local currencies where tobacco is grown and processed affect the ultimate U.S. dollar cost of the processed tobacco and therefore can adversely impact the gross profit earned on the sale of that tobacco. Since the Company is able to reasonably forecast the volume, timing, and local currency cost of its tobacco purchases and processing costs, it has routinely entered into forward contracts to sell U.S. dollars and buy the local currency at future dates that coincide with the expected timing of a portion of those purchases and costs. This strategy contemplates the Company's pricing arrangements with key customers and substantially eliminates the variability of future U.S. dollar cash flows for tobacco purchases and processing costs for the foreign currency notional amount hedged. The hedging strategy has been used mainly for tobacco purchases and processing costs in Brazil, where the large crops, the terms of sale to customers, and the availability of derivative markets make it particularly desirable to manage the related foreign exchange rate risk.

For the crops bought, processed, and sold in fiscal years 2010 and 2011, all contracts related to tobacco purchases in Brazil were designated and qualify as hedges of the future cash flows associated with the forecast purchases of tobacco. As a result, except for insignificant amounts related to any ineffective portion of the hedging strategy, changes in fair values of the forward contracts have been recognized in comprehensive income as they occurred, but only recognized in earnings upon sale of the related tobacco to third-party customers. Forward contracts related to processing costs have not been designated as hedges, and gains and losses on those contracts have been recognized in earnings on a market-to-market basis.

From March through June 2010, the Company hedged approximately $109 million U.S. dollar notional amount related to 2009-2010 crop tobacco purchases in Brazil. Additional forward contracts totaling approximately $58 million U.S. dollar notional amount were entered to mitigate currency exposure on processing costs related to that crop. Purchases of the 2009-2010 crop were completed in July 2010, and all forward contracts to hedge those purchases matured and were settled by that time. For all hedge gains and losses recorded in accumulated other comprehensive loss at June 30, 2010, the Company expects to complete the sale of the tobacco and recognize the amounts in cost of goods sold by the end of fiscal year 2011. At June 30, 2010, all hedged forecast purchases of tobacco not yet completed remained probable of occurring within the originally designated time period and, as a result, no hedges have been discontinued. As noted above, changes in the fair values of forward contracts related to processing costs are recognized in earnings each quarter on a mark-to-market basis.

From September 2008 through July 2009, the Company hedged approximately $241 million U.S. dollar notional amount related to 2008-2009 crop tobacco purchases in Brazil, primarily related to customer contractual requirements. Purchases of that crop were completed in July 2009, and all forward contracts related to the crop matured and were settled by that time. Sales of the 2008-2009 crop began during the first quarter of fiscal year 2010 and were completed by the end of the fiscal year. As that tobacco was sold, all hedge gains and losses previously recorded in accumulated other comprehensive loss were reclassified to cost of goods sold.

Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Net Local Currency Monetary Assets and Liabilities of Foreign Subsidiaries

Most of the Company's foreign subsidiaries transact the majority of their sales in U.S. dollars and finance the majority of their operating requirements with U.S. dollar borrowings, and therefore use the U.S. dollar as their functional currency. These subsidiaries normally have certain monetary assets and liabilities on their balance sheets that are denominated in the local currency. Those assets and liabilities can include cash and cash equivalents, accounts receivable and accounts payable, advances to farmers and suppliers, deferred income tax assets and liabilities, recoverable value-added taxes, and other items. Net monetary assets and liabilities denominated in the local currency are remeasured into U.S. dollars each reporting period, generating gains and losses that the Company records in earnings as a component of selling, general and administrative expenses. The level of net monetary assets or liabilities denominated in the local currency normally fluctuates throughout the year based on the operating cycle, but it is most common for monetary assets to exceed monetary liabilities at most times of the year, sometimes by a significant amount. When this situation exists and the local currency weakens against the U.S. dollar, remeasurement losses are generated. Conversely, remeasurement gains are generated on a net monetary asset position when the local currency strengthens against the U.S. dollar. Due to the size of its operations and the fact that it provides significant financing to farmers for crop production, the Company's subsidiary in Brazil has significant exposure to currency remeasurement gains and losses due to fluctuations in exchange rates at certain times of the year. To manage a portion of its exposure to currency remeasurement gains and losses in Brazil during fiscal year 2011, the Company entered into forward contracts to sell the Brazilian currency and buy U.S. dollars at future dates coinciding with expected changes in the overall net local currency monetary asset position of the subsidiary. Gains and losses on the forward contracts were recorded in earnings as a component of selling, general, and administrative expenses as they occurred, and thus directly offset the related remeasurement losses or gains for the notional amount hedged in the consolidated statements of income. Accordingly, the Company did not designate these contracts as hedges for accounting purposes. The notional amount of these contracts totaled approximately $60 million in U.S. dollars. All of the contracts were entered and settled during the quarter ended June 30, 2010. No contracts were entered for this purpose in fiscal year 2010. To further mitigate currency remeasurement exposure, some of the Company's foreign subsidiaries have obtained short-term local currency financing during certain periods. This strategy, while not involving the use of derivative instruments, is intended to minimize the subsidiary's net monetary position by financing a portion of the local currency monetary assets with local currency monetary liabilities and thus hedging a portion of the overall position.

The Company has several foreign subsidiaries that transact the majority of their sales and finance the majority of their operating requirements in their local currency, and therefore use their respective local currencies as the functional currency for reporting purposes. From time to time, these subsidiaries sell tobacco to customers in transactions that are not denominated in the functional currency. In those situations, the subsidiaries routinely enter into forward exchange contracts to offset currency risk for the period of time that a fixed-price order and the related trade account receivable are outstanding with the customer. The contracts are not designated as hedges for accounting purposes.

Effect of Derivative Financial Instruments on the Consolidated Statements of Income

The table below outlines the effects of the Company's use of derivative financial instruments on the consolidated statements of income for the quarters ended June 30, 2010 and 2009.

	Three Months Ended June 30,			
(in thousands of dollars)		2010		2009
Fair Value Hedges - Interest Rate Swap Agreements				
Derivative				
Gain (loss) recognized in earnings	$	3,782	$	(2,212)
Location of gain (loss) recognized in earnings	Interest expense			
Hedged Item				
Description of hedged item	Fixed rate long-term debt			
Gain (loss) recognized in earnings	$	(3,782)	$	2,212
Location of gain (loss) recognized in earnings	Interest expense			
Cash Flow Hedges - Forward Foreign Currency Exchange Contracts				
Derivative				
Effective Portion of Hedge				
Gain (loss) recorded in accumulated other comprehensive loss	$	(371)	$	(6,385)
Loss reclassified from accumulated other comprehensive loss into earnings	$	(43)	$	(9,634)
Location of loss reclassified from accumulated other comprehensive loss into earnings	Cost of goods sold			
Ineffective Portion and Early De-designation of Hedges				
Gain (loss) recognized in earnings	$	99	$	1,872
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Hedged Item				
Description of hedged item	Forecast purchases of tobacco in Brazil			
Derivatives Not Designated as Hedges - Forward Foreign Currency Exchange Contracts				
Contracts related to forecast processing costs and forecast purchases of tobacco, primarily in Brazil				
Gain (loss) recognized in earnings	$	187	$	—
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Contracts related to net local currency monetary assets and liabilities of subsidiary in Brazil				
Gain (loss) recognized in earnings	$	661	$	—
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Contracts related to fixed-price orders and accounts receivable of non-U.S. dollar subsidiaries				
Gain (loss) recognized in earnings	$	(744)	$	353
Location of gain (loss) recognized in earnings	Selling, general and administrative expenses			
Total gain (loss) recognized in earnings for forward foreign currency exchange contracts not designated as hedges	$	104	$	353

For the interest rate swap agreements designated as fair value hedges, since the hedges have no ineffectiveness, the gain or loss recognized in earnings on the derivative is offset by a corresponding loss or gain on the underlying hedged debt.

For the forward foreign currency exchange contracts designated as cash flow hedges of tobacco purchases in Brazil, a net hedge loss of approximately $0.3 million remained in accumulated other comprehensive loss at June 30, 2010. That balance reflects net losses on open and settled contracts, less the amount reclassified to earnings related to tobacco sold through June 30, 2010. The balance in accumulated other comprehensive loss will be recognized in earnings as a component of cost of goods sold during fiscal year 2011 as the remaining 2009-2010 Brazilian crop tobacco is sold to customers. Based on the hedging strategy, as the loss or gain is recognized in earnings, it is offset by a change in the expected direct cost for the tobacco or by a change in sales prices if the strategy has been mandated by the customer. Generally, margins on the sale of the tobacco will not be significantly affected.

Effect of Derivative Financial Instruments on the Consolidated Balance Sheets

The table below outlines the effects of the Company's derivative financial instruments on the consolidated balance sheets at June 30, 2010 and 2009, and March 31, 2010:

	Derivatives in a Fair Value Asset Position				Derivatives in a Fair Value Liability Position			
	Balance	Fair Value as of			Balance	Fair Value as of		
(in thousands of dollars)	Sheet Location	June 30, 2010	June 30, 2009	March 31, 2010	Sheet Location	June 30, 2010	June 30, 2009	March 31, 2010
Derivatives Designated as Hedging Instruments								
Interest rate swap agreements	Other non-current assets	$ 13,547	$ 9,596	$ 10,358	Long-term obligations	$ —	$ —	$ 593
Forward foreign currency exchange contracts	Other current assets	157	176	84	Accounts payable and accrued expenses	5	163	73
Total		$ 13,704	$ 9,772	$ 10,442		$ 5	$ 163	$ 666
Derivatives Not Designated as Hedging Instruments								
Forward foreign currency exchange contracts	Other current assets	$ 918	$ 820	$ 740	Accounts payable and accrued expenses	$ 443	$ —	$ 512
Total		$ 918	$ 820	$ 740		$ 443	$ —	$ 512

NOTE 9. FAIR VALUE MEASUREMENTS

Universal measures certain financial and nonfinancial assets and liabilities at fair value based on applicable accounting guidance. The financial assets and liabilities measured at fair value include money market funds, trading securities associated with deferred compensation plans, interest rate swap agreements, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. The application of the fair value guidance to nonfinancial assets and liabilities primarily includes assessments of goodwill and long-lived assets for potential impairment.

Under the accounting guidance, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The framework for measuring fair value under the guidance is based on a fair value hierarchy that distinguishes between observable inputs (i.e., inputs that are based on market data obtained from independent sources) and unobservable inputs (i.e., inputs that require the Company to make its own assumptions about market participant assumptions because little or no market data exists). There are three levels within the fair value hierarchy:

Level	Description
1	quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date;
2	quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability; and
3	unobservable inputs for the asset or liability.

In measuring the fair value of liabilities, the Company considers the risk of non-performance in determining fair value.

At June 30, 2010, the Company had certain financial assets and financial liabilities that were required to be measured and reported at fair value on a recurring basis. These assets and liabilities are listed in the table below and classified based on how their values were determined under the fair value hierarchy:

	June 30, 2010			
(in thousands of dollars)	Level 1	Level 2	Level 3	Total
Assets:				
Money market funds	$ 5,001	$ —	$ —	$ 5,001
Trading securities associated with deferred compensation plans	17,975	—	—	17,975
Interest rate swaps	—	13,547	—	13,547
Forward foreign currency exchange contracts	—	1,075	—	1,075
Total assets	$ 22,976	$ 14,622	$ —	$ 37,598
Liabilities:				
Guarantees of bank loans to tobacco growers	$ —	$ —	$ 15,573	$ 15,573
Forward foreign currency exchange contracts	—	448	—	448
Total liabilities	$ —	$ 448	$ 15,573	$ 16,021

17

Money market funds

The fair values of money market funds, which are reported in cash and cash equivalents in the consolidated balance sheets, are based on quoted market prices (Level 1). The fair values of the Company's money market funds approximate cost due to the short-term maturities and the high credit quality of the issuers of the underlying securities.

Trading securities associated with deferred compensation plans

Trading securities represent mutual fund investments that are matched to employee deferred compensation obligations. These investments are bought and sold as employees defer compensation, receive distributions, or make changes in the funds underlying their accounts. Quoted market prices (Level 1) are used to determine the fair values of the mutual funds and their underlying securities.

Interest rate swaps

The fair values of interest rate swap contracts are determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, interest rate swaps are classified within Level 2 of the fair value hierarchy.

Forward foreign currency exchange contracts

The fair values of forward foreign currency exchange contracts are also determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, forward foreign currency exchange contracts are classified within Level 2 of the fair value hierarchy.

Guarantees of bank loans to tobacco growers

The fair values of the Company's guarantees of bank loans to tobacco growers are determined by using internally-tracked historical loss data for such loans to develop an estimate of future losses under the guarantees outstanding at the measurement date. The present value of the cash flows associated with those estimated losses is then calculated at a risk-adjusted interest rate. This approach is sometimes referred to as the "contingent claims valuation method." Although historical loss data is an observable input, significant judgment is required in applying this information to the portfolio of guaranteed loans outstanding at each measurement date and in selecting a risk-adjusted interest rate. The guarantees of bank loans to tobacco growers are therefore classified within Level 3 of the fair value hierarchy.

A reconciliation of the change in the balance of the financial liability for guarantees of bank loans to tobacco growers (Level 3) for the three months ended June 30, 2010, is as follows:

(in thousands of dollars)	Three Months Ended June 30, 2010
Balance at beginning of year	$ 25,997
Transfer to allowance for loss on direct loans to farmers (removal of prior crop year loans from portfolio and addition of current crop year loans)	(10,557)
Change in discount rate and estimated collection period	302

Currency remeasurement		(169)
Balance at end of period	$	15,573

The effects of currency remeasurement and the change in discount rate and estimated collection period are recorded in earnings and reported in selling, general, and administrative expense.

Universal has not elected to report at fair value any financial instruments or other items not otherwise required to be reported at fair value under current accounting guidance.

NOTE 10. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

The Company has several defined benefit pension plans covering U.S. salaried employees and certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. The Company also provides postretirement health and life insurance benefits for eligible U.S. employees attaining specific age and service levels.

The components of the Company's net periodic benefit cost were as follows:

	Pension Benefits Three Months Ended June 30,		Other Postretirement Benefits Three Months Ended June 30,	
(in thousands of dollars)	2010	2009	2010	2009
Service cost	$ 1,240	$ 1,015	$ 204	$ 163
Interest cost	3,547	3,668	624	705
Expected return on plan assets	(3,696)	(3,436)	(36)	(38)
Settlement cost	—	1,250	—	—
Net amortization and deferral	996	246	(78)	(255)
Net periodic benefit cost	$ 2,087	$ 2,743	$ 714	$ 575

During the quarter ended June 30, 2010, the Company made contributions of approximately $2.2 million to its qualified and non-qualified pension plans. Additional contributions of approximately $4.5 million are expected during the remaining nine months of fiscal year 2011.

NOTE 11. STOCK-BASED COMPENSATION

Universal's shareholders have approved Executive Stock Plans ("Plans") under which officers, directors, and employees of the Company may receive grants and awards of common stock, restricted stock, restricted stock units ("RSUs"), performance share awards ("PSAs"), stock appreciation rights ("SARs"), incentive stock options, and non-qualified stock options. The Company's practice is to award grants of stock-based compensation to officers on an annual basis at the first regularly scheduled meeting of the Executive Compensation, Nominating and Corporate Governance Committee of the Board of Directors (the "Compensation Committee") in the fiscal year, which is scheduled on a day between two and twelve business days following the public release of the Company's annual financial results. The Compensation Committee administers the Company's Plans consistently following previously defined guidelines. Awards of restricted stock, RSUs, PSAs, SARs, and non-qualified stock options are currently outstanding under the Plans. The non-qualified stock options and SARs have an exercise price equal to the closing price of a share of the Company's common stock on the grant date. All stock options currently outstanding are fully vested and exercisable, and they expire ten years after the grant date. The SARs are settled in shares of common stock, vest in equal one-third tranches one, two, and three years after the grant date, and expire ten years after the grant date, except that SARs granted after fiscal year 2007 expire on the earlier of three years after the grantee's retirement date or ten years after the grant date. The RSUs vest five years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The PSAs vest three years from the grant date, are paid out in shares of common stock at the vesting date, and do not carry rights to dividends or dividend equivalents prior to vesting. Shares ultimately paid out under PSA grants are dependent on the achievement of predetermined performance measures established by the Compensation Committee and can range from zero to 150% of the stated award. The Company's outside directors automatically receive restricted stock units or shares of restricted stock following each annual

meeting of shareholders. These shares vest upon the individual's retirement from service as a director.

During the three-month periods ended June 30, 2010 and 2009, Universal issued the following stock-based awards, representing the regular annual grants to officers and outside directors of the Company:

	Three Months Ended June 30,	
	2010	2009
SARs:		
Number granted	153,600	253,800
Exercise price	$ 39.71	$ 35.30
Grant date fair value	$ 8.35	$ 7.85
RSUs:		
Number granted	38,400	63,450
Grant date fair value	$ 39.71	$ 35.30
PSAs:		
Number granted	38,400	63,450
Grant date fair value	$ 33.95	$ 29.67

The grant date fair value of the SARs was estimated using the Black-Scholes pricing model and the following assumptions:

	2010	2009
Expected term	5.0 years	5.0 years
Expected volatility	35.3%	39.0%
Expected dividend yield	4.73%	5.21%
Risk-free interest rate	2.36%	2.51%

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of: (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at the date an award is granted, the total fair value of all non-forfeitable awards is recognized as expense at the date of grant. As a result, Universal typically incurs higher stock compensation expense in the first quarter of each fiscal year when grants are awarded than in the other three quarters. For PSAs, the Company generally recognizes fair value expense ratably over the performance and vesting period based on management’s judgment of the ultimate award that is likely to be paid out based on the achievement of the predetermined performance measures. For each of the three-month periods ended June 30, 2010 and 2009, the Company recorded total stock-based compensation expense of approximately $2 million. The Company expects to recognize stock-based compensation expense of approximately $4 million during the remaining nine months of fiscal year 2011.

NOTE 12. OPERATING SEGMENTS

The principal approach used by management to evaluate the Company's performance is by geographic region, although some components of the business are evaluated on the basis of their worldwide operations. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in pretax earnings of unconsolidated affiliates.

Operating results for the Company's reportable segments for each period presented in the consolidated statements of income and retained earnings were as follows:

	Three Months Ended June 30,	
(in thousands of dollars)	2010	2009
SALES AND OTHER OPERATING REVENUES		
Flue-cured and burley leaf tobacco operations:		
North America	$ 63,167	$ 36,132
Other regions (1)	401,819	521,172
Subtotal	464,986	557,304
Other tobacco operations (2)	73,930	58,808
Consolidated sales and other operating revenues	$ 538,916	$ 616,112
OPERATING INCOME		
Flue-cured and burley leaf tobacco operations:		
North America	$ 3,692	$ 306
Other regions (1)	32,327	63,909
Subtotal	36,019	64,215
Other tobacco operations (2)	6,413	9,198
Segment operating income	42,432	73,413
Less: Equity in pretax earnings of unconsolidated affiliates (3)	378	3,641
Restructuring costs (4)	949	—
Consolidated operating income	$ 41,105	$ 69,772

(1) Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.
(2) Includes Dark Air-Cured, Special Services, and Oriental, as well as inter-company eliminations. Sales and other operating revenues for this reportable segment include limited amounts for Oriental because its financial results consist principally of equity in the pretax earnings of an unconsolidated affiliate.
(3) Item is included in segment operating income, but not included in consolidated operating income.
(4) Item is not included in segment operating income, but is included in consolidated operating income.

NOTE 13. CHANGES IN SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS IN SUBSIDIARIES

A reconciliation of the changes in Universal Corporation shareholders' equity and noncontrolling interests in subsidiaries for the three months ended June 30, 2010 and 2009 is as follows:

	Three Months Ended June 30, 2010			Three Months Ended June 30, 2009		
(in thousands of dollars)	Universal Corporation	Noncontrolling Interests	Total	Universal Corporation	Noncontrolling Interests	Total
Balance at beginning of year	$ 1,122,570	$ 5,805	$ 1,128,375	$ 1,029,473	$ 3,771	$ 1,033,244
Changes in common stock						
Repurchase of common stock	(1,578)	—	(1,578)	(655)	—	(655)
Accrual of stock-based compensation	2,002	—	2,002	1,980	—	1,980
Withholding of shares for grantee income taxes (RSUs)	(562)	—	(562)	—	—	—
Dividend equivalents on RSUs	97	—	97	75	—	75
Changes in retained earnings						
Net income (loss)	25,320	(902)	24,418	43,745	59	43,804
Cash dividends declared						
Series B 6.75% convertible perpetual preferred stock	(3,712)	—	(3,712)	(3,712)	—	(3,712)
Common stock	(11,347)	—	(11,347)	(11,461)	—	(11,461)
Repurchase of common stock	(8,605)	—	(8,605)	(2,773)	—	(2,773)
Dividend equivalents on RSUs	(97)	—	(97)	(75)	—	(75)
Other comprehensive income (loss)						
Translation adjustments, net of income taxes	(11,377)	(29)	(11,406)	8,128	16	8,144
Foreign currency hedge adjustment, net of income taxes	(2,198)	—	(2,198)	11,212	—	11,212
Balance at end of period	$ 1,110,513	$ 4,874	$ 1,115,387	$ 1,075,937	$ 3,846	$ 1,079,783

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q and the following "Management's Discussion and Analysis of Financial Condition and Results of Operations" contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Among other things, these statements relate to the Company's financial condition, results of operation, and future business plans, operations, opportunities, and prospects. In addition, the Company and its representatives may from time to time make written or oral forward-looking statements, including statements contained in other filings with the Securities and Exchange Commission and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we "expect," "believe," "anticipate," "could," "should," "may," "plan," "will," "predict," "estimate," and simila or words of similar import. These forward-looking statements are based upon management's current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include: anticipated levels of demand for and supply of its products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; changes in exchange rates; and general economic, political, market, and weather conditions. For a further description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, "Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended March 31, 2010. We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. This Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2010.

Liquidity and Capital Resources

Overview

The first fiscal quarter is generally a period of significant working capital investment in both Brazil and Africa as crops are delivered by farmers. In fiscal year 2011, we funded those requirements using cash on hand, short-term borrowings, customer advances, and operating cash flows. In addition, we continued our share repurchase program, which is based on free cash flow generated in prior years and an assessment of our future capital needs.

Our liquidity and capital resource requirements are predominantly short term in nature and relate to working capital for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements, although crop size, prices paid to farmers, shipment and delivery timing, and currency fluctuations affect requirements each year. Peak working capital requirements are generally reached during the first and second fiscal quarters. Each geographic area follows a cycle of buying, processing, and shipping, although in many regions, we also provide agricultural materials to farmers during the growing season. The timing of the elements of each cycle is influenced by such things as local weather conditions and individual customer shipping requirements, which may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a relatively large portion of our total debt as long-term to reduce liquidity risk.

Operating Activities

We used $263 million in net cash flow to fund operating activities during the quarter ended June 30, 2010. Tobacco inventory, at nearly $1.2 billion, was up $340 million during the quarter on seasonal tobacco crop purchases and later shipment of customer orders in several areas, including Africa, South America, and Asia. Those purchases reflected

higher leaf costs and earlier deliveries by farmers in some countries. Tobacco inventory levels were $266 million higher than June 30, 2009, levels, which were lower than normal due to accelerated shipments from Brazil and Europe last year. Earlier crop purchases in Africa this year also increased the comparison year over year. Inventory is usually financed with a mix of cash, notes payable, and customer deposits, depending on our borrowing capabilities, interest rates, and exchange rates, as well as those of our customers.

Advances to suppliers were $123 million at June 30, 2010, a reduction of $45 million from March 31, 2010, as crops were delivered in payment of those balances primarily in Asia and Africa. Compared to the same time last year, advances to suppliers were $19 million lower, reflecting lower advances to Brazilian farmers. Accounts receivable decreased by $46 million compared to March 31, 2010, reflecting seasonal decreases.

We generally do not purchase material quantities of tobacco on a speculative basis. At June 30, 2010, our uncommitted inventories were $117 million, or about 10%, of total tobacco inventory, compared to $161 million, or about 20%, of our March 31, 2010, inventory, and $90 million, or about 10%, of our June 30, 2009 inventory. These percentages are within normal ranges for our business within their respective times of year.

Customer deposits were up $37 million in the quarter, reflecting a seasonal increase related to purchases in South America and Africa, and up $87 million over the same quarter last year due to accelerated shipments in that period.

Investing Activities

During the quarter ended June 30, 2010, we invested about $13 million in our fixed assets compared to $11 million in last year's first fiscal quarter. Depreciation expense was approximately $11 million and $10 million in the three months ended June 30, 2010 and 2009, respectively. Our intent is to limit maintenance capital spending to a level below depreciation expense in order to maintain strong cash flow. However, from time to time larger projects may be undertaken. Our capital expenditures in fiscal year 2010 included investments to expand and upgrade our processing facility in Lancaster, Pennsylvania, to accommodate the consolidation of our U.S. dark tobacco processing operations. We have several other projects that will require about $20 million of capital investment in aggregate. We spent approximately $9 million on these projects in fiscal year 2010, $7 million in the quarter ended June 30, 2010, and we expect to spend the remaining $4 million later in the current fiscal year.

Financing Activities

We consider the sum of notes payable and overdrafts, long-term debt (including current portion), and customer advances and deposits, less cash, cash equivalents, and short-term investments on our balance sheet to be our net debt. We also consider our net debt plus shareholders' equity to be our net capitalization. Net debt increased by about $336 million to $805 million during the quarter ended June 30, 2010, primarily due to seasonal working capital requirements. Net debt as a percentage of total capitalization was approximately 42% at June 30, 2010, and reflected normal seasonal expansion and remained within our target range. It is up from about 29% at March 31, 2010, and up from approximately 32% at June 30, 2009. Net debt was about $299 million higher than June 30, 2009 levels, reflecting earlier customer payments on accelerated shipments in the prior year.

As of June 30, 2010, we were in compliance with the covenants of our debt agreements. We had $300 million available under a committed revolving credit facility that will expire on August 31, 2012, and $62 million in cash and cash equivalents. Our short-term debt totaled $299 million, and we had $5 million of current maturities of long-term debt. In addition, we had about $553 million in unused, uncommitted credit lines. Our seasonal working capital requirements typically increase significantly between March and September and decline after mid-year. We plan to spend approximately $4 million to complete new investments requested by our customers. Available capital resources from our cash balances, committed credit facility, and uncommitted credit lines exceed these anticipated needs.

In November 2009, our Board of Directors approved a new share repurchase program, which superseded an expiring program. The new program expires November 5, 2012 and authorizes purchases of up to $150 million of our common stock Under the authorization, we will purchase shares from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. In determining our level of common share repurchase activity, our intent is to use only cash available after meeting our capital investment, dividend, and working capital requirements. As a result, our execution of the repurchase program may vary as we realize changes in cash flow generation and availability. During the three months ended June 30, 2010, we purchased 198,223 shares of common stock at an aggregate cost of $10.2 million (average price per share of $51.37), based on trading dates, which brought our total purchases under the program to 594,608 shares at an aggregate cost of $30.0 million (average price per share of $50.42). As of June 30, 2010, we had approximately 24.2 million common shares outstanding.

Derivatives

From time to time, we use interest rate swap agreements to manage our exposure to changes in interest rates. These agreements typically adjust interest rates on designated long-term obligations from fixed to variable. The swaps are

accounted for as fair value hedges. At June 30, 2010, the fair value of our outstanding interest rate swap agreements was $13.5 million, and the notional amount swapped was $245 million.

We also enter forward contracts from time to time to hedge certain foreign currency exposures, primarily related to forecast purchases of tobacco and related processing costs in Brazil, as well as our net monetary asset exposure in local currency there. We generally account for our hedges of forecast tobacco purchases as cash flow hedges. At June 30, 2010, the fair value of our open contracts was not material. We also had other forward contracts outstanding that were not designated as hedges, and the fair value of those contracts was also not material at June 30, 2010.

Recent Announcement

In June, we announced an agreement to assign farmer contracts for the production of tobacco representing approximately 20% of our current annual volume in Brazil to a subsidiary of Philip Morris International ("PMI"). As part of the transaction, the PMI subsidiary will acquire related assets and also offer employment to certain employees of our subsidiary in Brazil who work in agronomy and leaf procurement functions. The transaction is subject to various closing conditions and government approvals and is expected to close in October. The total consideration we receive in the transaction will depend on the number and characteristics of the actual farmer contracts assigned, but is expected to exceed the book value of the assets conveyed. We expect to continue to supply processed leaf and provide processing services in Brazil to PMI and its subsidiaries.

Results of Operations

Amounts included in the following discussion are attributable to Universal Corporation and exclude earnings related to non-controlling interests in subsidiaries.

Net income for the first quarter of fiscal year 2011, which ended on June 30, 2010, was $25.3 million, or $0.87 per diluted share. Those results reflected a 42% decline compared to the same period last year, when income was $43.7 million, or $1.47 per diluted share. Last year's first quarter results were exceptionally strong, primarily due to the effect of earlier shipments of Brazilian and European tobacco in that quarter. Revenues for the first quarter of fiscal year 2011 of about $539 million were lower by about 13%.

Flue-cured and Burley Operations

Operating income for our flue-cured and burley tobacco operations decreased by 44% to $36 million. Similarly, revenues for those operations declined by 17% to $465 million. That performance includes results from our North America and Other Regions segments. Comparisons for the Other Regions segment results were significantly impacted by early shipments in the first quarter last year in South America and Europe. South America volumes this year were also reduced somewhat by the smaller Brazilian crop caused by excess rain. The effect of these changes in South America was mitigated by lower selling, general, and administrative costs in the region on currency benefits and an accrual in the prior year related to our Foreign Corrupt Practices Act ("FCPA") matter. Results for Europe were also reduced on lower margins this year coupled with the translation effect of the weaker euro. Revenues for the Other Regions segment fell by 23%, primarily reflecting the shipment timing factors. Compared to last year's first quarter, both revenues and operating income for the North America segment improved in its seasonally low period, driven by increased sales of carryover stocks.

Other Tobacco Operations

The Other Tobacco Operations segment operating income declined by about $3 million due primarily to lower results from the oriental tobacco joint venture. Reduced volumes and lower margins combined with lower currency gains this year depressed results for this business. Dark tobacco results improved slightly as overhead cost savings offset reduced margins and lower volumes in some areas. Revenues for this segment increased by 26% to $74 million primarily related to the timing of customer deliveries by our just-in-time services group and the timing of oriental tobacco shipments into the United States, neither of which had a commensurate effect on segment operating income.

Other Information

Cost of sales decreased by 8% to $437 million in the quarter on lower volumes shipped, partly offset by higher overall leaf purchasing costs. Selling, general, and administrative costs decreased by 14% due to lower currency

remeasurement and exchange losses in the current year, and prior year accruals for costs associated with the FCPA matter. Interest expense was down in part because of interest costs accrued in last year's quarter related to the FCPA matter. In addition, we benefited from additional fixed to floating rate interest rate swaps entered after last year's first quarter. The effective income tax rate for the quarter of approximately 34% was comparable to the effective rate for the same quarter last year and lower than the 35% U.S. federal statutory rate.

General Overview

Our fiscal year 2011 first quarter results faced difficult comparisons to last year's very strong initial quarter, but were in line with historical trends for the first quarter. Although we expect shipment timing differences to correct during the remainder of the fiscal year, we face some challenges due to a smaller Brazilian crop, margin pressures in some areas as the cost of leaf increases, decreased customer demand due to softer cigarette sales, and changes in manufacturer sourcing methods.

In June, Philip Morris International announced that, with the help of its two largest leaf suppliers, it will source a portion of its leaf requirements directly from farmers in Brazil, beginning with the crop that will be marketed in our fiscal year 2012. We have not yet completed the transaction with them but expect it to be finalized in the fall. Last year, Japan Tobacco Inc. announced its intention to source a portion of its leaf directly in the United States, Brazil, and Malawi, and we expect to see some volume reductions this year related to this initiative. However, we are aggressively working to replace those volumes and have had some success in Brazil and Africa. We have effectively managed change in our business in the past and believe that we are well positioned to respond to it now. We support all of our customers in their strategic endeavors, and we continue to believe that the dealer industry performs a critical function and brings value to the manufacturers. We expect fiscal year 2011 to be challenging, and at this time we remain cautiously optimistic that we will achieve our objectives in reducing costs, replacing volumes, and remaining competitive as we meet the changing needs of our customers. We have made a first step in cost reduction this quarter with a restructuring charge related to a personnel reduction in our U.S. operations. We will continue a strong focus on operating improvements and cost reductions as the year progresses.

We estimate that worldwide dealer inventories of flue-cured and burley leaf are about 105 million kilos, compared to 70 million last year. Levels remain well below the long-term average, but we believe there is potential for oversupply in flue-cured tobacco. For this season, lower flue-cured crops in Brazil and the United States are being offset by projected increases in Tanzania and Zimbabwe. The level of manufacturers' inventory durations and future supply forecasts also affect market balance.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rates

After inventory is purchased, interest rate risk is limited in the tobacco business because major customers usually pre-finance purchases or pay market rates of interest for inventory purchased for their accounts. Our customers pay interest on tobacco purchased for their order. That interest is paid at rates based on current markets for variable-rate debt. When we fund our committed tobacco inventory with fixed-rate debt, we may not be able to recover interest at that fixed rate if current market interest rates were to fall. As of June 30, 2010, tobacco inventory of almost $1.2 billion included about $1.0 billion in inventory that was committed for sale to customers and about $117 million that was not committed. Committed inventory, after deducting $144 million in customer deposits, represents our net exposure of $891 million. We normally maintain a substantial portion of our debt at variable interest rates either directly or through interest rate exchange agreements in order to mitigate interest rate risk related to carrying fixed-rate debt. We also periodically have large cash balances that we use to fund seasonal tobacco purchases. These cash balances reduce our financing needs. Debt carried at variable interest rates was about $544 million at June 30, 2010. Although a hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately $5 million, that amount would be mitigated by changes in charges to customers. Our policy is to work toward a level of floating rate liabilities, including customer deposits, that reflects a substantial portion of our average committed inventory levels over time. In addition to the $544 million of debt with variable interest rates, about $179 million of long-term debt has an effective average fixed rate of 5.44%.

Currency

The international tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to production costs, overhead, and income taxes in the source country. We also provide farmer advances that are directly related to leaf purchases and are denominated in the local currency. Any currency gains or losses on those advances are usually offset by decreases or increases in the cost of tobacco, which is priced in the local currency. However, the effect of the offset may not occur until a subsequent quarter or fiscal year. Most of our operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our major countries of tobacco origin, we generally manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net local currency monetary position in individual countries. We are vulnerable to currency gains and losses to the extent that monetary assets and liabilities denominated in local currency do not offset each other. In addition to foreign exchange gains and losses, we are exposed to changes in the cost of tobacco due to changes in the value of the local currency in relation to the U.S. dollar. For example, when we purchased the Brazilian crop in the beginning of fiscal year 2009, the local currency had appreciated significantly against the U.S. dollar, increasing the cost of the crop over the prior year, in U.S. dollar terms. To reduce the volatility of costs, we enter into forward currency exchange contracts to hedge some of the effects of currency movements on purchases of tobacco and some processing costs, primarily related to the requirements of customer contracts. In addition, we enter some forward contracts to hedge balance sheet exposures.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these domestic markets are Hungary, Poland, and the Philippines. In other markets, such as Western Europe, where export sales have been primarily in local currencies, we also use the local currency as the functional currency. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

Derivatives Policies

Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations. When we use foreign currency derivatives to mitigate our exposure to exchange rate fluctuations, we may choose not to designate them as hedges for accounting purposes, which may result in the effects of fair value changes for the derivatives being recognized in our earnings in periods different from the items that created the exposure.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction-specific so that a specific debt instrument, forecast purchase, contract, or invoice determines the amount, maturity, and other specifics of the hedge.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer evaluated, with the participation of other members of management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, management concluded that our disclosure controls and procedures were effective. There were no changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

European Commission Fines in Spain

In October 2004, the European Commission (the "Commission") imposed fines on "five companies active in the raw Spanish tobacco processing market" totaling €20 million for "colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain." Two of our subsidiaries, Tabacos Espanoles S.A. ("TAES"), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. ("Deltafina"), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of €108,000 on TAES and a fine of €11.88 million on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. We recorded a charge of about €12 million (approximately $14.9 million at the September 2004 exchange rate) in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against our subsidiaries.

In January 2005, Deltafina filed an appeal in the General Court of the European Union. Although a hearing of the matter was held in June 2009, the outcome of the appeal is uncertain. The General Court is scheduled to issue its decision in September 2010; however, an ultimate resolution to the matter could take several years. Deltafina has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, we reported that we were aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. We reported that we did not believe that the Commission investigation in Italy would result in penalties being assessed against us or our subsidiaries that would be material to our earnings. The reason we held this belief was that we had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, we received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, we received notification that the Commission had imposed fines totaling €30 million (about $37 million at the June 30, 2010 exchange rate) on Deltafina and Universal Corporation jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

We do not believe that the decision can be reconciled with the Commission's Statement of Objections and the facts. In January 2006, both Deltafina and Universal Corporation filed appeals in the General Court of the European Union. For strategic reasons related to the defense of the Deltafina appeal, we recently withdrew our appeal. Based on consultation with outside legal counsel, we believe it is probable that we will prevail in the appeals process, and we have not accrued a charge for the fine. If both Deltafina and Universal Corporation were ultimately found liable for the full amount of the fine, then accumulated interest on the fine would also be due and payable. Accumulated interest totaled approximately €4.7 million (about $5.7 million) at June 30, 2010. Deltafina has provided a bank guarantee to the Commission in the amount of the fine plus accumulated interest in order to stay execution during the appeals process.

U.S. Foreign Corrupt Practices Act

As a result of a posting to our Ethics Complaint hotline alleging improper activities that involved or related to certain of our tobacco subsidiaries, the Audit Committee of our Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. The payments involved approximated $2 million over a seven-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but we believe those activities did not violate U.S. antitrust laws. We voluntarily reported these activities to the Department of Justice ("DOJ") and Securities and Exchange Commission ("SEC") in March 2006. On June 6, 2006, the SEC notified us that a formal order of investigation had been issued.

Since voluntarily reporting, we have cooperated with and assisted the DOJ and SEC in their investigations, and for the past year we have engaged in settlement discussions with both authorities to resolve the matter. Those negotiations have resulted in agreements in principle being reached with representatives of the DOJ and the staff of the SEC. The final resolution of this matter remains subject to the completion of definitive agreements and the approval and execution of those agreements by the DOJ and the SEC. In addition, each settlement is subject to the approval of a federal district court with jurisdiction over the matter. Based on the agreements in principle that have been reached to date, the resolution of this matter with the DOJ and the SEC is expected to include injunctive relief, disgorgement and prejudgment interest, fines, penalties, and the retention of an independent compliance monitor. Based in part on the progress of the matter and consultation with outside counsel, we have recorded accruals from time to time since the matter arose that are adequate to satisfy the estimated financial settlement we expect with the resolution of the matter. The financial settlement is not expected to have a material effect on our financial condition or results of operations.

Other Legal Matters

In addition to the above-mentioned matters, some of our subsidiaries are involved in other litigation or legal and tax matters incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending these matters and does not currently expect that any of them will have a material adverse effect on our financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

ITEM 1A. RISK FACTORS

As of the date of this report, there are no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended March 31, 2010. In evaluating our risks, readers should carefully consider the risk factors discussed in our Annual Report on Form 10-K, which could materially affect our business, financial condition or operating results, in addition to the other information set forth in this report and in our other filings with the Securities and Exchange Commission.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes our repurchases of equity securities for the three-month period ended June 30, 2010:

Period (1)	Total Number of Shares Repurchased	Average Price Paid Per Share(2)	Total Number of Shares Repurchased as Part of Publicly Announced Plan or Program(3)	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(3)
April 1, 2010 to April 30, 2010	84,052	$ 54.45	84,052	$ 125,629,957
May 1, 2010 to May 31, 2010	114,171	49.11	114,171	120,022,568
June 1, 2010 to June 30, 2010	—	—	—	120,022,568
Total	198,223	$ 51.37	198,223	$ 120,022,568

(1) Repurchases are based on the date the shares were traded. This presentation differs from the consolidated statement of cash flows, where the cost of share repurchases is based on the date the transactions were settled.
(2) Amounts listed for average price paid per share includes broker commissions paid in the transactions.
(3) A stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 5, 2009. This stock repurchase plan authorizes the purchase of up to $150 million in common stock in open market or privately negotiated transactions, subject to market conditions and other factors. This stock repurchase program will expire on the earlier of November 5, 2012, or when we have exhausted the funds authorized for the program.
