DJ MARKET TALK: CBOT Corn Headed Toward \$6 -ETF Manager
10/08/10 11:10:34 EDT

1055 EDT [Dow Jones] - CBOT corn is locked limit up and expected to stay that way all day on the USDA's stunning yield reduction. Sal Gilbertie, manager of the Teucrium Corn Fund ETF, says the market is likley [sic] to head to \$6. "This is too tight a blance [sic] sheet for this early in the marketing year," he says. He adds, however, that at \$6, any further gains could be limited by farmer selling. While the CBOT futures pit is quiet with the market locked limit up, options trade is frenzied, with prices trading another 20 cents higher synthetically. CBOT Dec corn is up 30 cents to \$5.28 1/4 per bushel and March corn is up 30 cents to \$5.37 1/2. (IPB)
