Date 27 January 2005

Number

02/05

BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED  
31 DECEMBER 2004

BHP Billiton today released its production report for the quarter ended 31 December 2004. Unless otherwise stated, production volumes refer to BHP Billiton share.

- **Record quarterly iron ore, metallurgical coal and manganese alloy production underpinned by continuing strong customer demand.**
- **Record quarterly natural gas production of 87.4 billion cubic feet following the commissioning of North West Shelf (Australia) fourth train in September 2004.**
- **Record quarterly silver production of 12.4 million ounces reflecting the benefits of a continuing debottlenecking program at Cannington (Australia).**
- **First oil production from the newly commissioned ROD (Algeria) field.**

- Total Petroleum Products

- Total production for the December 2004 quarter was 29.4 million barrels of oil equivalent, three per cent lower than the December 2003 quarter and five per cent higher than the September 2004 quarter.

- ◆ Oil and Condensate - Production for the December 2004 quarter was 12.2 million barrels, 18 per cent lower than the 14.9 million barrels produced in the December 2003 quarter. Production was lower due to natural field decline in Bass Strait, Laminaria, Griffin (all Australia), Liverpool Bay (UK) and Typhoon/Boris (USA). Higher downtime at Bass Strait, Laminaria and Wanaea/Cossack (Australia) and the divestment in February 2004 of our producing assets in Bolivia also impacted production for the quarter. This was partly offset by new production resulting from the commissioning of ROD (Algeria) in October 2004. Production for the quarter was one per cent lower than the 12.4 million barrels produced in the September 2004 quarter due to natural field decline at Bass Strait, Typhoon/Boris and higher downtime in Bass Strait, Laminaria and Wanaea/Cossack. This was partly offset by maintenance shutdowns in the previous quarter at Liverpool Bay and Bruce (UK) and new production from ROD.
- ◆ Natural Gas - Production for the December 2004 quarter was a record 87.4 billion cubic feet, 13 per cent higher than the 77.6 billion cubic feet produced in the December 2003 quarter. This was due to higher demand for Bass Strait gas and increased production from North West Shelf LNG following the commissioning of the 4<sup>th</sup> LNG Train in September 2004. Production for the December 2004 quarter was 13 per cent higher than the 77.2 billion cubic feet produced in the September 2004 quarter due to increased production from North West Shelf LNG with the commencement of the 4<sup>th</sup> LNG

Train and the maintenance shutdowns at Liverpool Bay and Bruce in the previous quarter. This was partially offset by lower demand for Bass Strait gas due to seasonal conditions.

- **Alumina -**

Production for the December 2004 quarter of 1.0 million tonnes was in line with the December 2003 quarter. Production was four per cent higher than the September 2004 quarter reflecting improving calciner performance at Worsley (Australia) and scheduled maintenance undertaken at Alumar (Brazil) in the previous quarter.

- **Aluminium**

- Production for the December 2004 quarter was 338,000 tonnes, 10 per cent higher than the December 2003 quarter. This primarily reflects the ramp up of production from Hillside 3 (South Africa) which reached full commissioning in December 2003. December 2003 quarter production was also impacted by an electrical outage at Alumar. Production was in line with the September 2004 quarter.

- **Copper -** Production for the December 2004 quarter was 265,800 tonnes, 17 per cent higher than the December 2003 quarter. This mainly reflects restoration of full capacity and higher head grades at Escondida (Chile) and Tintaya (Peru), along with record production at Antamina (Peru) following the return to their normal mine plan after the removal of lakebed sediments. These increases were partly offset by the sale of the Group's interest in Highland Valley Copper (Canada) in January 2004. Production was seven per cent higher than the September 2004 quarter due to higher head grades at Tintaya, Antamina and Cerro Colorado and higher mill throughput at Escondida.

- **Silver -** Production for the December 2004 quarter was a record 12.4 million ounces, 24 per cent higher than the December 2003 quarter and five per cent higher than the September 2004 quarter. This mainly reflects record quarterly mill throughput at Cannington (Australia) resulting from a continuing debottlenecking program.

- **Iron Ore -** Production for the December 2004 quarter was a record 24.9 million tonnes, 15 per cent higher than the December 2003 quarter and 11 per cent higher than the September 2004 quarter. The increase reflects additional capacity following the completion of several expansion projects at Western Australian Iron Ore (Australia) and record production at Samarco (Brazil), underpinned by continuing strong customer demand. Western Australian Iron Ore shipments were a record 22.1 million tonnes in the December 2004 quarter.

- **Metallurgical Coal -** Production for the December 2004 quarter was a record 9.6 million tonnes, 14 per cent higher than the December 2003 quarter. This reflects record quarterly production at Queensland Coal (Australia) underpinned by strong customer demand and improved operating performance at Illawarra Coal (Australia). Production was four per cent higher than the September 2004 quarter. This primarily reflects higher production at Illawarra Coal following longwall changeouts at Appin and Elouera and industrial activity at Elouera in the September 2004 quarter.

- **Manganese ore -** Ore production for the December 2004 quarter was 1.4 million tonnes, 14 per cent higher than the December 2003 quarter. Production increased to meet strong customer demand in all markets, particularly China, Japan and Europe. Production was in line with the September 2004 quarter.

- **Manganese alloys -** Production for the December 2004 quarter was a record 207,000 tonnes, 13 per cent higher than the December 2003 quarter. This primarily reflects improved operating performance at Metalloys (South Africa) and increased production at TEMCO (Australia) in response to strong customer demand. Production was six per cent higher than the September 2004 quarter, reflecting improved operating performance at Metalloys.

Edgar Filing: BHP BILLITON PLC - Form 6-K

- **Diamonds** - Production of 872,000 carats at Ekati (Canada) was 49 per cent lower than the December 2003 quarter. This decrease primarily reflects processing of lower grade ore in the December 2004 quarter after mining of a high grade zone in the Koala pipe was completed in the June 2004 quarter. Production was 12 per cent lower than the September 2004 quarter, primarily due to processing of lower grade ore in the current quarter.
- **Energy Coal** -  
Production for the December 2004 quarter was 21.4 million tonnes, seven per cent higher than the December 2003 quarter. This primarily reflects lower production in the December 2003 quarter at New Mexico Coal (USA), due to a planned major outage at a customer's power plant and a longwall move at San Juan underground. Production was eight per cent lower than the September 2004 quarter, primarily due to safety interventions at Ingwe's (South Africa) Douglas mine, adverse weather conditions at Cerrejon Coal (Colombia) and the impact of an excavator fire at Hunter Valley Coal (Australia) in the previous quarter.
- **Nickel**  
- Production for the December 2004 quarter was 19,700 tonnes, two per cent lower than the December 2003 quarter. This primarily reflects lower production at Yabulu (Australia) due to a planned plant wide shutdown in October 2004. Production was in line with the September 2004 quarter.
- **Ferrochrome** - Production for the December 2004 quarter was 271,000 tonnes, in line with both the December 2003 and September 2004 quarters.

<b>FERROCHROME</b>									
Saleable production ('000 tonnes)									
	South Africa (h)	60%	269	266	264	265	271	536	496
(a) Metal production is reported on the basis of payable metal.									
(b) Sulphide production at Tintaya was suspended in January 2002 due to weak market conditions,									
and recommenced during August 2003.									
(c) BHP Billiton sold its interest in Highland Valley Copper with effect from January 3, 2004.									
(d) Production at Selbaie ceased in February 2004, in accordance with mine plan. Shipments ceased in May 2004.									
(e) Iron ore production is reported on a wet tonnes basis.									
(f) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.									
(g) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.									
(h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.									
(i) Production was suspended at Boodarie Iron following an incident in May 2004 and the plant was placed									
on care and maintenance in November 2004.
