

Magyar Bancorp, Inc.  
Form 10-Q  
August 13, 2015

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report Under Section 13 or 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2015

Commission File Number **000-51726**

**Magyar Bancorp, Inc.**

(Exact Name of Registrant as Specified in Its Charter)

**Delaware**

(State or Other Jurisdiction of Incorporation or Organization)

**20-4154978**

(I.R.S. Employer Identification Number)

**400 Somerset Street, New Brunswick, New Jersey**

(Address of Principal Executive Office)

**08901**

(Zip Code)

**(732) 342-7600**

(Issuer's Telephone Number including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the past 12 months (or for such shorter period that the registrant was required

Edgar Filing: Magyar Bancorp, Inc. - Form 10-Q

to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer   
Non-accelerated filer  Smaller reporting company   
(Do not check if a  
smaller reporting  
company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

State the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at August 1, 2015
Common Stock, \$0.01 Par Value	5,819,494

Table of Contents

**MAGYAR BANCORP, INC. AND SUBSIDIARY**

Notes to Consolidated Financial Statements

(Unaudited)

**NOTE A – BASIS OF PRESENTATION**

The consolidated financial statements include the accounts of Magyar Bancorp, Inc. (the “Company”), its wholly owned subsidiary, Magyar Bank (the “Bank”), and the Bank’s wholly owned subsidiaries Magyar Service Corporation, Hungaria Urban Renewal, LLC, and MagBank Investment Company. All material intercompany transactions and balances have been eliminated. The Company prepares its financial statements on the accrual basis and in conformity with accounting principles generally accepted in the United States of America ("US GAAP"). The unaudited information furnished herein reflects all adjustments (consisting of normal recurring accruals) that are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented.

Operating results for the three and nine months ended June 30, 2015 are not necessarily indicative of the results that may be expected for the year ending September 30, 2015. The September 30, 2014 information has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by US GAAP for complete financial statements.

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the valuation of other real estate owned, and the assessment of realizability of deferred income tax assets.

The Company has evaluated events and transactions occurring subsequent to the balance sheet date of June 30, 2015 for items that should potentially be recognized or disclosed in these financial statements. The evaluation was conducted through the date these financial statements were issued.

**NOTE B- RECENT ACCOUNTING PRONOUNCEMENTS**

In January 2014, the Financial Accounting Standards Board (FASB) issued an accounting standard update (ASU 2014-04) related to; *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40) Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*. The update applies to all creditors who obtain physical possession of residential real estate property collateralizing a consumer mortgage loan in satisfaction of a receivable. The amendments in this update clarify when an in-substance repossession or foreclosure occurs and requires disclosure of both (1) the amount of foreclosed residential real estate property held by a creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in the update are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The Company foreclosed \$2.4 million of residential real estate loans for the nine months ended June 30, 2015, and \$3.0 million of consumer mortgage loans collateralized by residential real estate property are in the process of foreclosure at June 30, 2015.

In May 2014, FASB issued ASU 2014-09 *Revenue from Contracts with Customers (Topic 606)*. ASU 2014-09 affects any entity using U.S. GAAP that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (e.g., insurance contracts or lease contracts). This ASU will supersede the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance. This ASU also supersedes some cost guidance included in Subtopic 605-35, Revenue Recognition—Construction-Type and Production-Type Contracts. In addition, the existing requirements for the recognition of a gain or loss on the transfer of nonfinancial assets that are not in a contract with a customer (e.g., assets within the scope of Topic 360, Property, Plant, and Equipment, and intangible assets within the scope of Topic 350, Intangibles—Goodwill and Other) are amended to be consistent with the guidance on recognition and measurement (including the constraint on revenue) in this ASU.

## Table of Contents

The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps:

Step 1: Identify the contract(s) with a customer.

Step 2: Identify the performance obligations in the contract.

Step 3: Determine the transaction price.

Step 4: Allocate the transaction price to the performance obligations in the contract.

Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

For a public business entity, the amendments in this ASU are effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early application is not permitted. The FASB has proposed a one year delay in the effective date of this amendment. The Company is currently analyzing the impact of the guidance on its financial statements.

An entity should apply the amendments in this ASU using one of the following two methods:

Retrospectively to each prior reporting period presented and the entity may elect any of the following practical expedients:

For completed contracts, an entity need not restate contracts that begin and end within the same annual reporting period.

For completed contracts that have variable consideration, an entity may use the transaction price at the date the contract was completed rather than estimating variable consideration amounts in the comparative reporting periods.

For all reporting periods presented before the date of initial application, an entity need not disclose the amount of the transaction price allocated to remaining performance obligations and an explanation of when the entity expects to recognize that amount as revenue.

Retrospectively with the cumulative effect of initially applying this ASU recognized at the date of initial application. If an entity elects this transition method it also should provide the additional disclosures in reporting periods that include the date of initial application of:

The amount by which each financial statement line item is affected in the current reporting period by the application of this ASU as compared to the guidance that was in effect before the change.

An explanation of the reasons for significant changes.

## NOTE C - CONTINGENCIES

The Company, from time to time, is a party to routine litigation that arises in the normal course of business. In the opinion of management, the resolution of this litigation, if any, would not have a material adverse effect on the Company's consolidated financial position or results of operations.

NOTE D - EARNINGS PER SHARE

Basic and diluted earnings per share for the three and nine months ended June 30, 2015 and 2014 were calculated by dividing net income by the weighted-average number of shares outstanding for the period considering the effect of diluted equity options and stock awards for the diluted earnings per share calculations.

7

Table of Contents

	For the Three Months Ended June 30,		For the Nine Months Ended June 30,	
	2015	2014	2015	2014
	(In thousands except for per share data)			
Income applicable to common shares	\$ 245	\$ 188	\$ 574	\$ 382
Weighted average number of common shares outstanding - basic	5,819	5,815	5,818	5,814
Stock options and restricted stock	—	1	—	1
Weighted average number of common shares and common share equivalents - diluted	5,819	5,816	5,818	5,815
Basic earnings per share	\$ 0.04	\$ 0.03	\$ 0.10	\$ 0.07
Diluted earnings per share	\$ 0.04	\$ 0.03	\$ 0.10	\$ 0.07

Options to purchase 188,276 shares of common stock at a weighted average price of \$14.61 were outstanding and not included in the computation of diluted earnings per share for the three and nine months ended June 30, 2015 because the grant (or option strike) price was greater than the average market price of the common shares during the period and are thus anti-dilutive. Options to purchase 188,276 shares of common stock at a weighted average price of \$14.61 were outstanding and not included in the computation of diluted earnings per share for the three and nine months ended June 30, 2014 because the grant (or option strike) price was greater than the average market price of the common shares during the period and are thus anti-dilutive.

**NOTE E – STOCK-BASED COMPENSATION AND STOCK REPURCHASE PROGRAM**

The Company follows FASB Accounting Standards Codification (“ASC”) Section 718, Compensation-Stock Compensation, which covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. ASC 718 requires that compensation cost relating to share-based payment transactions be recognized in financial statements. The cost is measured based on the fair value of the equity or liability instruments issued.

Stock options generally vest over a five-year service period and expire ten years from issuance. Management recognizes compensation expense for all option grants over the awards’ respective vesting periods. The fair values of all option grants were estimated using the Black-Scholes option-pricing model. Since there was limited historical information on the volatility of the Company’s stock, management also considered the average volatilities of similar

entities for an appropriate period in determining the assumed volatility rate used in the estimation of fair value. Management estimated the expected life of the options using the simplified method allowed under SAB No. 107. The 7-year Treasury yield in effect at the time of the grant provided the risk-free rate for periods within the contractual life of the option. Management recognizes compensation expense for the fair values of these awards, which have graded vesting, on a straight-line basis over the vesting period of the awards. Once vested, these awards are irrevocable. Shares will be obtained from either the open market or treasury stock upon share option exercise.

Restricted shares generally vest over a five-year service period on the anniversary of the grant date. Once vested, these awards are irrevocable. The product of the number of shares granted and the grant date market price of the Company's common stock determine the fair value of restricted shares under the Company's restricted stock plans. Management recognizes compensation expense for the fair value of restricted shares on a straight-line basis over the vesting period of the awards.

The following is a summary of the status of the Company's stock option activity and related information for its option plan for the nine months ended June 30, 2015 and 2014, respectively:

Table of Contents

	Number of Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value

Stock option and stock award expenses included with compensation expense were \$0 and \$10,000, respectively, for the nine months ended June 30, 2015.

Table of Contents

The Company announced in November 2007 its second stock repurchase program of up to 5% of its publicly-held outstanding shares of common stock, or 129,924 shares. Through June 30, 2015, the Company had repurchased a total of 81,000 shares of its common stock at an average cost of \$8.33 per share under this program. No shares were repurchased during the nine months ended June 30, 2015 and 2014, respectively. Under the stock repurchase program, 48,924 shares of the 129,924 shares authorized remained available for repurchase as of June 30, 2015. The Company's intended use of the repurchased shares is for general corporate purposes, including the funding of awards granted under the 2006 Equity Incentive Plan.

The Company has an Employee Stock Ownership Plan ("ESOP") for the benefit of employees of the Company and the Bank who meets the eligibility requirements as defined in the plan. The ESOP trust purchased 217,863 shares of common stock in the open market using proceeds of a loan from the Company. The total cost of shares purchased by the ESOP trust was \$2.3 million, reflecting an average cost per share of \$10.58. The Bank will make cash contributions to the ESOP on an annual basis sufficient to enable the ESOP to make the required loan payments to the Company. The loan bears a variable interest rate that adjusts annually every January 1<sup>st</sup> to the then published Prime Rate (3.25% at January 1, 2015) with principal and interest payable annually in equal installments over thirty years. The loan is secured by shares of the Company's stock.

As the debt is repaid, shares are released as collateral and allocated to qualified employees. Accordingly, the shares pledged as collateral are reported as unearned ESOP shares in the Consolidated Balance Sheet. As shares are released from collateral, the Company reports compensation expense equal to the then current market price of the shares, and the shares become outstanding for earnings per share computations.

At June 30, 2015, shares allocated to participants totaled 140,883. Unallocated ESOP shares held in suspense totaled 76,980 at June 30, 2015 and had a fair market value of \$742,857. The Company's contribution expense for the ESOP was \$80,000 and \$73,000 for the nine months ended June 30, 2015 and 2014, respectively.

NOTE F – OTHER COMPREHENSIVE INCOME (LOSS)

The components of other comprehensive income (loss) and the related income tax effects are as follows:

Three Months Ended June 30, 2015		2014			
Before Tax	Tax Benefit	Net of Tax	Before Tax	Tax Benefit	Net of Tax

Edgar Filing: Magyar Bancorp, Inc. - Form 10-Q

	Amount (Dollars in thousands)	(Expense)	Amount	Amount (Expense)	Amount
Unrealized holding gain (loss) arising during period on:					
Available-for-sale investments <sup>(b)</sup>	\$(54)	\$ 19	\$ (35 )	\$108	\$ (41 ) \$ 67
Other comprehensive income (loss), net	\$(54)	\$ 19	\$ (35 )	\$108	\$ (41 ) \$ 67

## NOTE G – FAIR VALUE DISCLOSURES

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Our securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other assets or liabilities on a non-recurring basis, such as held-to-maturity securities, mortgage servicing rights, loans receivable and other real estate owned, or OREO. These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting or write-downs of individual assets.

In accordance with ASC 820, we group our assets and liabilities at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

**Level 1 -** Valuation is based upon quoted prices for identical instruments traded in active markets.

**Level 2 -** Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.

**Level 3 -** Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

We base our fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The following is a description of valuation methodologies used for assets measured at fair value on a recurring basis.

#### Securities available-for-sale

Our available-for-sale portfolio is carried at estimated fair value on a recurring basis, with any unrealized gains and losses, net of taxes, reported as accumulated other comprehensive income/loss in stockholders' equity. Our securities available-for-sale portfolio consists of U.S government-sponsored mortgage-backed securities and private label mortgage-backed securities. The fair values of these securities are obtained from an independent nationally recognized pricing service. Our independent pricing service provides us with prices which are categorized as Level 2, as quoted prices in active markets for identical assets are generally not available for the securities in our portfolio. Various modeling techniques are used to determine pricing for our mortgage-backed securities, including option pricing and discounted cash flow models. The inputs to these models include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data.

Table of Contents

The following table provides the level of valuation assumptions used to determine the carrying value of our assets measured at fair value on a recurring basis.

	Fair Value at June 30, 2015			
	Total	Level 1	Level 2	Level 3
	(Dollars in thousands)			
Securities available for sale:

Obligations of U.S. government-sponsored enterprises:				
Mortgage-backed securities-residential	10,369	—	10,369	—
Private label mortgage-backed securities-residential	406	—	406	—
Total securities available for sale	\$ 12,070	\$ —	\$ 12,070	\$ —

The following is a description of valuation methodologies used for assets measured at fair value on a non-recurring basis.

Mortgage Servicing Rights, net

Mortgage Servicing Rights (MSRs) are carried at the lower of cost or estimated fair value. The estimated fair value of MSR is determined through a calculation of future cash flows, incorporating estimates of assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, including the market's perception of future interest rate movements and, as such, are classified as Level 3. The Company had MSRs totaling \$147,000 and \$175,000 at June 30, 2015 and September 30, 2014, respectively.

Impaired Loans

Loans which meet certain criteria are evaluated individually for impairment. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. All amounts due according to the contractual terms means that both the contractual interest and principal payments of a loan will be collected as scheduled in the loan agreement. Three impairment measurement methods are used, depending upon the collateral securing the asset: 1) the present value of expected future cash flows discounted at the loan's effective interest rate (the rate of return implicit in the loan); 2) the asset's observable market price; or 3) the fair value of the collateral, less anticipated selling and disposition costs, if the asset is collateral dependent. The regulatory agencies require the lost method for loans from which repayment is expected to be provided solely by the underlying collateral. Our impaired loans are generally collateral dependent and, as such, are carried at the estimated fair value of the collateral less estimated selling costs. Fair value is estimated through current appraisals, and adjusted as necessary, by management, to reflect current market conditions and, as such, are generally classified as Level 3.

Table of Contents

Appraisals of collateral securing impaired loans are conducted by approved, qualified, and independent third-party appraisers. Such appraisals are ordered via the Company's credit administration department, independent from the lender who originated the loan, once the loan is deemed impaired, as described in the previous paragraph. Impaired loans are generally re-evaluated with an updated appraisal within one year of the last appraisal. However, the Company also obtains updated appraisals on performing construction loans that are approaching their maturity date to determine whether or not the fair value of the collateral securing the loan remains sufficient to cover the loan amount prior to considering an extension. The Company discounts the appraised "as is" value of the collateral for estimated selling and disposition costs and compares the resulting fair value of collateral to the outstanding loan amount. If the outstanding loan amount is greater than the discounted fair value, the Company requires a reduction in the outstanding loan balance or additional collateral before considering an extension to the loan. If the borrower is unwilling or unable to reduce the loan balance or increase the collateral securing the loan, it is deemed impaired and the difference between the loan amount and the fair value of collateral, net of estimated selling and disposition costs, is charged off through a reduction of the allowance for loan loss.

Other Real Estate Owned

The fair value of other real estate owned is determined through current appraisals, and adjusted as necessary, by management, to reflect current market conditions and anticipated selling and disposition costs. As such, other real estate owned is generally classified as Level 3.

The following table provides the level of valuation assumptions used to determine the carrying value of our assets measured at fair value on a non-recurring basis at June 30, 2015 and September 30, 2014

	Fair Value at June 30, 2015			
	Total	Level 1	Level 2	Level 3
	(Dollars in thousands)			
Impaired loans	\$ 1,453	\$ —	\$ —	\$ 1,453
Other real estate owned	15,747	—	—	15,747
	\$ 17,200	\$ —	\$ —	\$ 17,200
	Fair Value at September 30, 2014			
	Total	Level 1	Level 2	Level 3
	(Dollars in thousands)			
Impaired loans	\$ 1,801	\$ —	\$ —	\$ 1,801
Other real estate owned	17,342	—	—	17,342
	\$ 19,143	\$ —	\$ —	\$ 19,143

Edgar Filing: Magyar Bancorp, Inc. - Form 10-Q

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which Company has utilized Level 3 inputs to determine fair value:

Quantitative Information about Level 3 Fair Value Measurements

(Dollars in thousands)

June 30, 2015	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Impaired loans	\$ 1,453	Appraisal of collateral <sup>(1)</sup>	Appraisal adjustments (2)	0.0% to -18.0% (-6.0%)
Other real estate owned	\$ 15,747	Appraisal of collateral <sup>(1)</sup>	Liquidation expenses (2)	0.0% to -41.2% (-16.7%)

Table of Contents

## Quantitative Information about Level 3 Fair Value Measurements

(Dollars in thousands)

September 30, 2014	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Impaired loans	\$ 1,801	Appraisal of collateral <sup>(1)</sup>	Appraisal adjustments (2)	0% to -21.0% (-10.7%)
Other real estate owned	\$ 17,342	Appraisal of collateral <sup>(1)</sup>	Liquidation expenses (2)	-3.2% to -39.1% (-15.6%)

(1) Fair value is generally determined through independent appraisals for the underlying collateral, which generally include various level 3 inputs which are not identifiable.

(2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments not already disclosed above for which it is practicable to estimate fair value:

Cash and interest earning deposits with banks: The carrying amounts are a reasonable estimate of fair value.

Held to maturity securities: The fair values of our held to maturity securities are obtained from an independent nationally recognized pricing service. Our independent pricing service provides us with prices which are categorized as Level 2, as quoted prices in active markets for identical assets are generally not available for the securities in our portfolio.

Loans: Fair value for the loan portfolio, excluding impaired loans with specific loss allowances, is estimated based on discounted cash flow analysis using interest rates currently offered for loans with similar terms to borrowers of similar credit quality.

Federal Home Loan Bank of New York ("FHLB") stock: The carrying amount of FHLB stock approximates fair value and considers the limited marketability of the investment.

Bank-owned life insurance: The carrying amounts are based on the cash surrender values of the individual policies, which is a reasonable estimate of fair value.

## Edgar Filing: Magyar Bancorp, Inc. - Form 10-Q

Deposits: The fair value of deposits with no stated maturity, such as money market deposit accounts, interest-bearing checking accounts and savings accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is equivalent to current market rates for deposits of similar size, type and maturity.

Accrued interest receivable and payable: For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Federal Home Loan Bank of New York advances and securities sold under reverse repurchase agreements: The fair value of borrowings is based on the discounted value of contractual cash flows. The discount rate is equivalent to the rate currently offered by the Federal Home Loan Bank of New York for borrowings of similar maturity and terms.

The fair value of commitments to extend credit is estimated based on the amount of unamortized deferred loan commitment fees. The fair value of letters of credit is based on the amount of unearned fees plus the estimated cost to terminate the letters of credit. Fair values of unrecognized financial instruments including commitments to extend credit and the fair value of letters of credit are considered immaterial.

The following presents the carrying amount, fair value, and placement in the fair value hierarchy of the Company's financial instruments carried at cost or amortized cost as of June 30, 2015 and September 30, 2014. This table excludes financial instruments for which the carrying amount approximates level 1 fair value. For short-term financial assets such as cash and cash equivalents, the carrying amount is a reasonable estimate of fair value due to the relatively short time between the origination of the instrument and its expected realization. For financial liabilities such as interest-bearing demand, NOW, and money market savings deposits, the carrying amount is a reasonable estimate of fair value due to these products being payable on demand and having no stated maturity.

## NOTE I – IMPAIRMENT OF INVESTMENT SECURITIES

The Company recognizes credit-related other-than-temporary impairment on debt securities in earnings while noncredit-related other-than-temporary impairment on debt securities not expected to be sold are recognized in other comprehensive income (“OCI”).

We review our investment portfolio on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which the fair value has been lower than the cost, the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer and the intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in the market. We evaluate our intent and ability to hold debt securities based upon our investment strategy for the particular type of security and our cash flow needs, liquidity position, capital adequacy and interest rate risk position. In addition, the risk of future other-than-temporary impairment may be influenced by prolonged recession in the U.S. economy, changes in real estate values and interest deferrals.

Investment securities with fair values less than their amortized cost contain unrealized losses. The following tables present the gross unrealized losses and fair value at June 30, 2015 and September 30, 2014 for both available for sale and held to maturity securities by investment category and time frame for which the loss has been outstanding:

	June 30, 2015		
	Less Than 12 Months	12 Months Or Greater	Total

Total	29	\$12,134	\$(81)	\$27,167	\$(877)	\$39,301	\$(958)

The investment securities listed above currently have fair values less than amortized cost and therefore contain unrealized losses. The Company evaluated these securities and determined that the decline in value was primarily related to fluctuations in the interest rate environment and were not related to any company or industry specific event. At June 30, 2015 and September 30, 2014, there were twenty five and twenty nine, respectively, investment securities with unrealized losses.

The Company anticipates full recovery of amortized costs with respect to these securities. The Company does not intend to sell these securities and has determined that it is not more likely than not that the Company would be required to sell these securities prior to maturity or market price recovery. Management has considered factors regarding other than temporarily impaired securities and determined that there are no securities with impairment that is other than temporary as of June 30, 2015 and September 30, 2014.

## NOTE J – LOANS RECEIVABLE, NET AND RELATED ALLOWANCE FOR LOAN LOSSES

Loans receivable, net were comprised of the following:

	June 30, 2015	September 30, 2014
(Dollars in thousands)		
One-to four-family residential	\$ 160,027	\$ 160,335
Commercial real estate	174,755	169,449

Edgar Filing: Magyar Bancorp, Inc. - Form 10-Q

Construction	14,011	12,232
Home equity lines of credit	22,309	19,366
Commercial business	38,742	35,035
Other	10,350	10,396
Total loans receivable	420,194	406,813
Net deferred loan costs	185	217
Allowance for loan losses	(2,966 )	(2,835 )
Total loans receivable, net	\$417,413	\$ 404,195

The segments of the Bank's loan portfolio are disaggregated to a level that allows management to monitor risk and performance. The residential mortgage loan segment is further disaggregated into two classes: amortizing term loans, which are primarily first liens, and home equity lines of credit, which are generally second liens. The commercial real estate loan segment is further disaggregated into three classes: commercial real estate loans include loans secured by multifamily structures, owner-occupied commercial structures, and non-owner occupied nonresidential properties. The construction loan segment consists primarily of loans to developers or investors for the purpose of acquiring, developing and constructing residential or commercial structures and to a lesser extent one-to-four family residential construction loans made to individuals for the acquisition of and/or construction on a lot or lots on which a residential dwelling is to be built. Construction loans to developers and investors have a higher risk profile because the ultimate buyer, once development is completed, is generally not known at the time of the loan. The commercial business loan segment consists of loans made for the purpose of financing the activities of commercial customers and consists primarily of revolving lines of credit. The consumer loan segment consists primarily of stock-secured installment loans, but also includes unsecured personal loans and overdraft lines of credit connected with customer deposit accounts.

Table of Contents

Management evaluates individual loans in all segments for possible impairment if the loan either is in nonaccrual status, or is risk rated Substandard and is greater than 90 days past due. Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Once the determination has been made that a loan is impaired, the recorded investment in the loan is compared to the fair value of the loan using one of three methods: (a) the present value of expected future cash flows discounted at the loan's effective interest rate; (b) the loan's observable market price; or (c) the fair value of the collateral securing the loan, less anticipated selling and disposition costs. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. If there is a shortfall between the fair value of the loan and the recorded investment in the loan, the Company charges the difference to the allowance for loan loss as a charge-off and carries the impaired loan on its books at fair value. It is the Company's policy to evaluate impaired loans on an annual basis to ensure the recorded investment in a loan does not exceed its fair value.

The following table presents impaired loans by class, segregated by those for which a specific allowance was required and charged-off and those for which a specific allowance was not necessary at the dates presented:

	Impaired Loans with Specific Allowance		Impaired Loans with No Specific Allowance		Total Impaired Loans Unpaid Principal Balance

Commercial business	738	413
Average investment in impaired loans	\$ 23,310	\$ 23,718

Management uses a ten point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized, and are aggregated as “Pass” rated. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. Loans classified Doubtful have all the weaknesses inherent in loans classified Substandard with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable. All loans greater than three months past due are considered Substandard. Any portion of a loan that has been charged off is placed in the Loss category.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Bank has a structured loan rating process with several layers of internal and external oversight. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as severe delinquency, bankruptcy, repossession, or death occurs to raise awareness of a possible credit event. The Bank's Commercial Loan Officers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis. The Asset Review Committee performs monthly reviews of all commercial relationships internally rated 6 ("Watch") or worse. Confirmation of the appropriate risk grade is performed by an external Loan Review Company that semi-annually reviews and assesses loans within the portfolio. Generally, the external consultant reviews commercial relationships greater than \$500,000 and/or criticized relationships greater than \$250,000. Detailed reviews, including plans for resolution, are performed on loans classified as Substandard on a monthly basis.

The following table presents the classes of the loan portfolio summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the Bank's internal risk rating system at the dates presented:

An allowance for loan losses (“ALL”) is maintained to absorb losses from the loan portfolio. The ALL is based on management’s continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of NPLs.

The Bank’s methodology for determining the ALL is based on the requirements of ASC Section 310-10-35 for loans individually evaluated for impairment (discussed above) and ASC Subtopic 450-20 for loans collectively evaluated for impairment, as well as the Interagency Policy Statements on the Allowance for Loan and Lease Losses and other bank regulatory guidance.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by other qualitative and economic factors.

The loans are segmented into classes based on their inherent varying degrees of risk, as described above. Management tracks the historical net charge-off activity by segment and utilizes this figure, as a percentage of the segment, as the general reserve percentage for pooled, homogenous loans that have not been deemed impaired. Typically, an average of losses incurred over a defined number of consecutive historical years is used.

Non-impaired credits are segregated for the application of qualitative factors. Management has identified a number of additional qualitative factors which it uses to supplement the historical charge-off factor because these factors are likely to cause estimated credit losses associated with the existing loan pools to differ from historical loss experience. The additional factors that are evaluated quarterly and updated using information obtained from internal, regulatory, and governmental sources include: national and local economic trends and conditions; levels of and trends in delinquency rates and non-accrual loans; trends in volumes and terms of loans; effects of changes in lending

policies; experience, ability, and depth of lending staff; value of underlying collateral; and concentrations of credit from a loan type, industry and/or geographic standpoint.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL. Since loans individually evaluated for impairment are promptly written down to their fair value, typically there is no portion of the ALL for loans individually evaluated for impairment.

The following table summarizes the ALL by loan category and the related activity for the nine months ended June 30, 2015:

The allowance for loan losses is based on estimates, and actual losses will vary from current estimates. Management believes that the segmentation of the loan portfolio into homogeneous pools and the related historical loss ratios and other qualitative factors, as well as the consistency in the application of assumptions, result in an ALL that is representative of the risk found in the components of the portfolio at any given date.

The Bank has adopted FASB ASU No. 2011-02 on the determination of whether a loan restructuring is considered to be a Troubled Debt Restructuring (“TDR”). A TDR is a loan that has been modified whereby the Bank has agreed to make certain concessions to a borrower to meet the needs of both the borrower and the Bank to maximize the ultimate recovery of a loan. TDR occurs when a borrower is experiencing, or is expected to experience, financial difficulties and the loan is modified using a modification that would otherwise not be granted to the borrower. The types of concessions granted generally include, but are not limited to, interest rate reductions, limitations on the accrued interest charged, term extensions, and deferment of principal.

There was one TDR during the three and nine months ended June 30, 2015. The following table summarizes the TDRs during the three and nine month period ended June 30, 2015 and 2014 that were classified as TDRs due to financial difficulty of the borrowers and/or lower than market interest rates.

Table of Contents

## Three Months Ended June 30, 2015

	Number of Loans (Dollars in thousands)	Investment Before TDR Modification (Dollars in thousands)	Investment After TDR Modification (Dollars in thousands)
One-to four-family residential	1	\$ 524	\$ 563
Total	1	\$ 524	\$ 563

## Nine Months Ended June 30, 2015

	Number of Loans (Dollars in thousands)	Investment Before TDR Modification (Dollars in thousands)	Investment After TDR Modification (Dollars in thousands)
One-to four-family residential	1	\$ 524	\$ 563
Total	1	\$ 524	\$ 563

## Three Months Ended June 30, 2014

	Number of Loans (Dollars in thousands)	Investment Before TDR Modification (Dollars in thousands)	Investment After TDR Modification (Dollars in thousands)
One-to four-family residential	1	\$ 194	\$ 194
Total	1	\$ 194	\$ 194

## Nine Months Ended June 30, 2014

	Number of Loans (Dollars in thousands)	Investment Before TDR Modification (Dollars in thousands)	Investment After TDR Modification (Dollars in thousands)
One-to four-family residential	1	\$ 194	\$ 194
Total	1	\$ 194	\$ 194

A default on a troubled debt restructured loan for purposes of this disclosure occurs when a borrower is 90 days past due or a foreclosure or repossession of the applicable collateral has occurred. During the three and nine months ended June 30, 2015, no defaults occurred on troubled debt restructured loans that were modified as a TDR within the previous 12 months.

## NOTE K - DEPOSITS

A summary of deposits by type of account are summarized as follows:

	2015	2014
	June 30	September 30
	(Dollars in thousands)

Certificates of deposit	111,853	126,661
Retirement certificates	20,733	23,214
	\$ 445,108	\$ 448,451

Table of Contents

## NOTE L – INCOME TAXES

The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled.

Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The valuation allowance is assessed by management on a quarterly basis and adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant. In assessing whether it is more likely than not that some portion or all of the deferred tax assets will not be realized, management considers projections of future taxable income, the projected periods in which current temporary differences will be deductible, the availability of carry forwards, feasible and permissible tax planning strategies and existing tax laws and regulations. Due to the uncertainty of the Company's ability to realize the benefit of certain deferred tax assets within statutory time limits, the net deferred tax assets are partially offset by a valuation allowance at June 30, 2015, the amount of which has not materially changed from that in place at September 30, 2014.

A reconciliation of income tax between the amounts calculated based upon pre-tax income at the Company's federal statutory rate and the amounts reflected in the consolidated statements of operations are as follows:

	For the Three Months Ended June 30,		For the Nine Months Ended June 30,	
	2015	2014	2015	2014
	(in thousands)			
Income tax expense at 34% statutory federal tax rate	\$124	\$90	\$ 278	\$ 166
State tax expense	20	12	42	24
Other	(25 )	(25 )	(77 )	(84 )
Income tax expense	\$119	\$77	\$ 243	\$ 106

NOTE M - FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

The Company uses derivative financial instruments, such as interest rate floors and collars, as part of its interest rate risk management. Interest rate caps and floors are agreements whereby one party agrees to pay or receive a floating rate of interest on a notional principal amount for a predetermined period of time if certain market interest rate thresholds are met. The Company considers the credit risk inherent in these contracts to be negligible.

As of June 30, 2015 and September 30, 2014, the Company did not hold any interest rate floors or collars.

The Bank is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are commitments to extend credit are summarized in the below table. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the balance sheets.

Table of Contents

	June 30, 2015	September 30, 2014
	(Dollars in thousands)	
Financial instruments whose contract amounts represent credit risk		
Letters of credit	\$ 1,120	\$ 884
Unused lines of credit	35,615	43,644
Fixed rate loan commitments	8,127	1,900
Variable rate loan commitments	13,879	8,500
	\$ 58,741	\$ 54,928

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

## Forward-Looking Statements

When used in this filing and in future filings by the Company with the Securities and Exchange Commission, in the Company's press releases or other public or shareholder communications, or in oral statements made with the approval of an authorized executive officer, the words or phrases, "anticipate," "would be," "will allow," "intends to," "will likely result," "are expected to," "will continue," "is anticipated," "estimated," "projected," "believes", or similar expressions are intended to identify "forward looking statements." Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those risks previously disclosed by the Company in Item 1A of its Annual Report on Form 10-K as supplemented by quarterly reports on Form 10-Q filings with the SEC, general economic conditions, changes in interest rates, regulatory considerations, competition, technological developments, retention and recruitment of qualified personnel, and market acceptance of the Company's pricing, products and services, and with respect to the loans extended by the Bank and real estate owned, the following: risks related to the economic environment in the market areas in which the Bank operates, particularly with respect to the real estate market in New Jersey; the risk that the value of the real estate securing these loans may decline in value; and the risk that significant expense may be incurred by the Company in connection with the resolution of these loans.

The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made, and advises readers that various factors, including regional and national economic conditions, substantial changes in levels of market interest rates, credit and other risks of lending and investing activities, and competitive and regulatory factors, could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from those anticipated or projected.

The Company does not undertake, and specifically disclaims any obligation, to update any forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

**Critical Accounting Policies**

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. Critical accounting policies may involve complex subjective decisions or assessments. We consider the following to be our critical accounting policies.

***Allowance for Loan Losses.*** The allowance for loan losses is the amount estimated by management as necessary to cover credit losses in the loan portfolio both probable and reasonably estimable at the balance sheet date. The allowance is established through the provision for loan losses which is charged against income. In determining the allowance for loan losses, management makes significant estimates and has identified this policy as one of our most critical. Due to the high degree of judgment involved, the subjectivity of the assumptions utilized and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses, the methodology for determining the allowance for loan losses is considered a critical accounting policy by management.

As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans and discounted cash flow valuations of properties are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisals and discounted cash flow valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly affect the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals and discounted cash flow valuations are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

## Table of Contents

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. We consider a variety of factors in establishing this estimate including, but not limited to, current economic conditions, delinquency statistics, geographic and industry concentrations, the adequacy of the underlying collateral, the financial strength of the borrower, results of internal loan reviews and other relevant factors. This evaluation is inherently subjective as it requires material estimates by management that may be susceptible to significant change based on changes in economic and real estate market conditions.

The evaluation has a specific and general component. The specific component relates to loans that are delinquent or otherwise identified as impaired through the application of our loan review process and our loan grading system. All such loans are evaluated individually, with principal consideration given to the value of the collateral securing the loan and discounted cash flows. Specific impairment allowances are established as required by this analysis. The general component is determined by segregating the remaining loans by type of loan, risk weighting (if applicable) and payment history. We also analyze historical loss experience, delinquency trends, general economic conditions and geographic and industry concentrations. This analysis establishes factors that are applied to the loan groups to determine the amount of the general component of the allowance for loan losses.

Actual loan losses may be significantly greater than the allowances we have established, which could have a material negative effect on our financial results.

***Other Real Estate Owned.*** Real estate acquired through foreclosure, or a deed-in-lieu of foreclosure, is recorded at fair value less estimated selling costs at the date of acquisition or transfer, and subsequently at the lower of its new cost or fair value less estimated selling costs. Adjustments to the carrying value at the date of acquisition or transfer are charged to the allowance for loan losses. The carrying value of the individual properties is subsequently adjusted to the extent it exceeds estimated fair value less estimated selling costs, at which time a provision for losses on such real estate is charged to operations.

Appraisals are critical in determining the fair value of the other real estate owned amount. Assumptions for appraisals are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly affect the valuation of a property. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable.

***Investment Securities.*** If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are “temporary” or “other-than-temporary” in accordance with applicable accounting guidance. The Company accounts for temporary impairments based upon security classification as either available-for-sale, held-to-maturity, or trading. Temporary impairments on “available-for-sale” securities are recognized, on a tax-effected basis, through accumulated other comprehensive income (“AOCI”) with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Conversely, the Company does not adjust the carrying value of “held-to-maturity” securities for temporary impairments, although information concerning the amount and duration of impairments on held to maturity securities is generally disclosed in periodic financial statements. The carrying value of securities held in a trading portfolio is adjusted to their fair value through earnings on a daily basis. However, the Company maintained no securities in trading portfolios at or during the periods presented in these financial statements.

The Company accounts for other-than-temporary impairments based upon several considerations. First, other-than-temporary impairments on securities that the Company has decided to sell as of the close of a fiscal period, or will, more likely than not, be required to sell prior to the full recovery of their fair value to a level equal to or exceeding their amortized cost, are recognized in operations. If neither of these criteria apply, then the other-than-temporary impairment is separated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows that are expected to be collected on an other-than-temporarily impaired security fall below its amortized cost while the noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. The Company recognizes credit-related, other-than-temporary impairments in earnings, while noncredit-related, other-than-temporary impairments on debt securities are recognized, net of deferred taxes, in AOCI. Management did not account for any other-than-temporary impairments at or during the periods presented in these financial statements.

Table of Contents

**Fair Value.** We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Our securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other assets or liabilities on a non-recurring basis, such as held-to-maturity securities, mortgage servicing rights, loans receivable and other real estate owned. These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting or write-downs of individual assets.

In accordance with ASC 820, Fair Value Measurements and Disclosures, we group our assets and liabilities at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. We base our fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

**Deferred Income Taxes.** The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled.

Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant.

**Comparison of Financial Condition at June 30, 2015 and September 30, 2014**

Total assets increased \$10.3 million, or 1.9%, to \$540.8 million during the nine months ended June 30, 2015 from \$530.4 million at September 30, 2014. The change was attributable to a \$13.2 million increase in net loans receivable, partially offset by a \$1.6 million decrease in OREO.

Cash and interest bearing deposits with banks decreased \$782,000, or 7.6%, to \$9.5 million at June 30, 2015 from \$10.3 million at September 30, 2014. The decrease was attributable to growth in net loans receivable.

Investment securities decreased \$952,000, or 1.6%, to \$60.1 million at June 30, 2015 from \$61.0 million at September 30, 2014. The Company purchased \$9.7 million of investment securities held-to-maturity, received repayments

totaling \$5.2 million and sold securities totaling \$5.4 million during the nine months ended June 30, 2015.

Investment securities at June 30, 2015 consisted of \$51.3 million in mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises, \$5.0 million in U.S. government-sponsored enterprise debt securities, \$3.0 million in corporate securities and \$770,000 in “private-label” mortgage-backed securities. There were no other-than-temporary-impairment charges for the Company’s investment securities for the nine months ended June 30, 2015.

Total loans receivable increased \$13.4 million during the nine months ended June 30, 2015 to \$420.2 million and were comprised of \$174.8 million (41.5%) commercial real estate loans, \$160.0 million (38.1%) one-to-four family residential mortgage loans, \$38.7 million (9.2%) commercial business loans, \$22.3 million (5.3%) home equity lines of credit, \$14.0 million (3.3%) construction loans and \$10.4 million (2.6%) other loans. Expansion of the portfolio during the nine months ended June 30, 2015 occurred primarily in commercial real estate loans, which increased \$5.3 million, followed by commercial business loans, which increased \$3.7 million, and home equity lines of credit, which increased \$2.9 million.

Total non-performing loans (“NPLs”), defined as loans 90 days or more delinquent, decreased by \$1.4 million to \$8.4 million at June 30, 2015 from \$9.8 million at September 30, 2014. The ratio of non-performing loans to total loans decreased to 2.0% at June 30, 2015 from 2.4% at September 30, 2014.

Included in the non-performing loan totals were fifteen residential mortgage loans totaling \$2.3 million, five commercial real estate loans totaling \$2.0 million, one commercial business loan totaling \$1.7 million, one construction loan totaling \$1.7 million, and five home equity lines of credit totaling \$680,000.

Non-performing loans secured by one-to four-family residential properties including home equity lines of credit and other consumer loans, decreased \$2.1 million to \$3.0 million at June 30, 2015 from \$5.1 million at September 30, 2014. The loans remained in varying stages of foreclosure at June 30, 2015. The Company has not and does not intend to originate or purchase sub-prime loans or option-ARM loans. Year-to-date, Magyar Bank charged off \$297,000 in non-performing residential and home equity line of credit and other consumer loans through a reduction in its allowance for loan loss and received one recovery totaling \$400,000 from a previously charged-off non-performing residential loan.

Table of Contents

At June 30, 2015, non-performing construction loans decreased \$586,000 to \$1.7 million at June 30, 2015 from \$2.3 million at September 30, 2014. There was one non-performing construction loan totaling \$1.7 million for land acquisition and construction in Pennsylvania. Magyar Bank is pursuing foreclosure of the collateral securing the loan. Year-to-date, Magyar Bank charged off \$342,000 in non-performing construction loans through a reduction in its allowance for loan loss and received one recovery totaling \$37,000 from a previously charged-off non-performing construction loan.

Non-performing commercial real estate loans decreased \$134,000 to \$2.0 million at June 30, 2015 from \$2.2 million at September 30, 2014. The five non-accrual loans were in various stages of foreclosure and collection at June 30, 2015. Year-to-date, Magyar Bank charged off \$329,000 in non-performing commercial real estate loans through a reduction in its allowance for loan loss and there were no recovery loans.

Non-performing commercial business loans increased \$1.4 million to \$1.7 million at June 30, 2015 from \$274,000 at September 30, 2014. Year-to-date, Magyar Bank charged off \$274,000 in non-performing commercial business loans through a reduction in its allowance for loan loss.

During the nine months ended June 30, 2015, the allowance for loan losses increased \$131,000 to \$3.0 million. The allowance for loan losses as a percentage of non-performing loans increased to 35.2% at June 30, 2015 compared with 29.0% at September 30, 2014. At June 30, 2015, the Company's allowance for loan losses as a percentage of total loans was 0.71% compared with 0.70% at September 30, 2014.

Future increases in the allowance for loan losses may be necessary based on the growth of the loan portfolio, the change in composition of the loan portfolio, possible future increases in non-performing loans and charge-offs, and the possible deterioration of the current economic environment. The Company determines the carrying value of loans secured by real estate by obtaining an updated third-party appraisal of the real estate collateral.

To the extent that an updated valuation of the collateral is insufficient to cover a collateral-dependent loan, the Company reduces the balance of the loan via a charge to the allowance for loan loss. Specific reserves for loan loss may be established for estimated selling and disposition costs as well as portions of the loan expected to be recovered within a reasonable time period. At June 30, 2015, the Bank held specific reserves totaling \$147,000.

Other real estate owned decreased \$1.6 million to \$15.7 million at June 30, 2015 from \$17.3 million at September 30, 2014. The decrease was due to the sale of sixteen properties totaling \$4.8 million. The properties were sold for a net loss of \$2,000. Offsetting the decline was the addition of ten properties totaling \$2.8 million resulting from foreclosure of collateral securing non-performing loans and the improvement or completion of properties totaling \$390,000. The Bank is determining the proper course of action for its other real estate owned, which may include holding the properties until the real estate market further improves, marketing the individual properties for sale, or

selling multiple properties to a real estate investor.

Total deposits decreased \$3.3 million, or 0.7%, to \$445.1 million during the nine months ended June 30, 2015. The decrease in deposits occurred in certificates of deposit (including individual retirement accounts) of \$17.3 million, or 11.5%, to \$132.6 million and interest-bearing checking accounts, which decreased \$4.8 million, or 10.2%, to \$42.2 million. Offsetting these decreases were increases in savings accounts, which increased \$18.2 million, or 28.0%, to \$83.3 million, and non-interest bearing checking accounts, which increased \$706,000, or 0.8%, to \$85.0 million.

Included with the total deposits at June 30, 2015 were \$6.5 million in brokered certificates of deposit. At September 30, 2014 brokered certificates of deposit were \$9.0 million.

Federal Home Loan Bank of New York advances and securities sold under agreements to repurchase increased \$12.6 million to \$43.1 million at June 30, 2015 from \$30.5 million at September 30, 2014. Borrowings were used to fund loan originations and replace temporary deposits outflows at June 30, 2015.

Stockholders' equity increased \$716,000, or 1.6%, to \$46.6 million at June 30, 2015 from \$45.9 million at September 30, 2014. The increase in stockholders' equity was attributable to the Company's results from operations.

The Company did not repurchase any shares during the nine months ended June 30, 2015. Through June 30, 2015, the Company had repurchased 81,000 shares at an average price of \$8.33 pursuant to the second stock repurchase plan, which has reduced outstanding shares to 5,819,494. The Company's book value per share increased to \$8.02 at June 30, 2015 from \$7.90 at September 30, 2014. The increase was due to the Company's results of operations for the nine months ended June 30, 2015.

Table of Contents**Average Balance Sheets for the Three and Nine Months Ended June 30, 2015 and 2014**

The tables on the following pages present certain information regarding the Company's financial condition and net interest income for the three and nine months ended June 30, 2015 and 2014. The tables present the annualized average yield on interest-earning assets and the annualized average cost of interest-bearing liabilities. We derived the yields and costs by dividing annualized income or expense by the average balance of interest-earning assets and interest-bearing liabilities, respectively, for the periods shown. We derived average balances from daily balances over the periods indicated. Interest income includes fees that we consider adjustments to yields.

Table of Contents

**Comparison of Operating Results for the Three Months Ended June 30, 2015 and 2014**

**Net Income.** Net income increased \$57,000, or 30.3%, to \$245,000 during the three-month period ended June 30, 2015 compared with net income \$188,000 at the three-month period ended June 30, 2014 due to higher net interest and dividend income, which increased \$57,000, and higher non-interest income, which increased \$164,000. Partially offsetting these items were higher non-interest expenses, which increased \$118,000 and higher income tax expense, which increased \$42,000.

**Net Interest and Dividend Income.** Net interest and dividend income increased \$57,000 to \$4.1 million for the three months ended June 30, 2015 from \$4.0 million for the three months ended June 30, 2014. The Company's net interest margin increased by 4 basis points to 3.38% for the quarter ended June 30, 2015 compared to 3.34% for the quarter ended June 30, 2014. The yield on interest-earning assets fell 2 basis points to 4.03% for the three months ended June 30, 2015 from 4.05% for the three months ended June 30, 2014 primarily due to the lower interest rate environment. The cost of interest-bearing liabilities fell 9 basis points to 0.79% for the three months ended June 30, 2015 from 0.88% for the three months ended June 30, 2014. The decrease in the cost of interest-bearing liabilities was attributable to the lower rate environment and a more favorable funding composition comprised of a larger percentage of lower-cost deposit account balances and lower borrowing costs.

**Interest and Dividend Income.** Interest and dividend income decreased \$17,000, or 0.3%, to \$4.8 million for the three months ended June 30, 2015 from \$4.9 million for the three months ended June 30, 2014. The decrease was attributable to a 2 basis point decrease in the yield on such assets to 4.03%, offset by a \$687,000, or 0.1%, increase in the average balance of interest-earning assets for the quarter ended June 30, 2015 compared with the prior year period. Interest expense decreased \$74,000, or 8.7%, to \$779,000 for the three months ended June 30, 2015 from \$853,000 for the three months ended June 30, 2014. The average balance of interest-bearing liabilities increased \$4.9 million, or 1.3%, between the two periods, while the cost on such liabilities fell 9 basis points to 0.79% for the quarter ended June 30, 2015 compared with the prior year period.

Interest earned on loans decreased \$21,000, or 0.5%, to \$4.5 million for the three months ended June 30, 2015 compared with the prior year same period due to a 7 basis point decrease in the average yield on such loans to 4.34% from 4.41%. The decrease in yield between the two periods was due primarily to the lower market interest rate environment.

Interest earned on our investment securities, including interest earning deposits and excluding Federal Home Loan Bank of New York stock, decreased \$97,000, or 8.3%, due to a \$3.2 million, or 4.5%, decrease in the average balance of such securities to \$69.7 million from \$69.9 million in the lower market interest rate environment for the three months ended June 30, 2015. The average yield on investment securities, including interest earning deposits, increased 12 basis points to 2.08% for the three months ended June 30, 2015 from 1.96% for the three months ended June 30, 2014.

**Interest Expense.** Interest expense decreased \$74,000, or 8.7%, to \$779,000 for the three months ended June 30, 2015 from \$853,000 for the three months ended June 30, 2014. The average balance of interest-bearing liabilities increased \$4.9 million, or 1.3%, between the two periods, while the cost on such liabilities fell 9 basis points to 0.79% for the quarter ended June 30, 2015 from 0.88% compared with the prior year period was due primarily to the lower market interest rate environment.

The average balance of interest bearing deposits increased \$9.6 million to \$363.5 million from \$353.8 million while the average cost of such deposits decreased 1 basis point to 0.67% from 0.68% in the lower market interest rate environment. As a result, average interest paid on interest-bearing deposits increased \$7,000 to \$605,000 for the three months ended June 30, 2015 from \$598,000 for the three months ended June 30, 2014.

Interest paid on advances and securities sold under agreements to repurchase decreased \$81,000, or 31.8%, to \$174,000 for the three months ended June 30, 2015 from \$255,000 for the same period prior year due to a decrease in the average balance of such borrowings to \$31.7 million from \$36.5 million. The average cost of advances and securities sold under agreements to repurchase decreased 60 basis points to 2.20% for the three months ended June 30, 2015 from 2.80% for the same period of June 30, 2014, reflecting the lower market interest rate environment.

**Provision for Loan Losses.** We establish provisions for loan losses, which are charged to earnings, at a level necessary to absorb known and inherent losses that are both probable and reasonably estimable at the date of the financial statements. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, peer group information and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur. After an evaluation of these factors, management recorded a provision of \$346,000 for the three months ended June 30, 2015 compared to a provision of \$342,000 for the prior year period.

Table of Contents

The provision for loan losses increased slightly due to larger growth in loans receivable between periods. Specific reserves declined to \$147,000 at June 30, 2015 from \$360,000 at June 30, 2014. Net charge-offs were \$194,000 for the three months ended June 30, 2015 compared to net charge-offs of \$1.0 million for the three months ended June 30, 2014.

The loan charge-offs during the three months ended June 30, 2015 resulted from write-downs of four impaired loans. The non-performing loans were written down based on updated appraisals of the real estate collateralizing the loans, net of estimated selling and disposal costs. There were no recoveries during the period ended June 30, 2015.

Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Management reviews the level of the allowance on a quarterly basis, and establishes the provision for loan losses based on the factors set forth in the preceding paragraph. As management evaluates the allowance for loan losses, the increased risk associated with larger non-homogenous construction, commercial real estate and commercial business loans may result in larger additions to the allowance for loan losses in future periods.

**Other Income.** Non-interest income increased \$164,000, or 49.0%, to \$499,000 during the three months ended June 30, 2015 compared to \$335,000 for the three months ended June 30, 2014. The increase was primarily attributable to higher service charge income, which increased \$108,000 from the prior year period, due to higher loan modification fees and prepayment penalties. The Company also recorded gains totaling \$90,000 from the sale of guaranteed portions of SBA loans during the three months ended June 30, 2015, which increased \$65,000 from the prior year period.

**Other Expenses.** Non-interest expenses increased \$118,000 to \$3.8 million from \$3.7 million for the three months ended June 30, 2014. Compensation and benefit expenses increased \$119,000, or 6.2%, from the prior year period due to annual merit increases for employees, a 1% increase in the Company's 401(k) match to 2% of eligible compensation, and higher incentive program expenses.

**Income Tax Expense.** The Company recorded tax expense of \$119,000, or 32.7% of pre-tax income, for the three months ended June 30, 2015, compared to tax of \$77,000, or 29.1% of pre-tax income for the three months ended June 30, 2014.

**Comparison of Operating Results for the Nine Months Ended June 30, 2015 and 2014**

**Net Income.** Net income increased \$192,000, or 50.3%, during the nine-month period ended June 30, 2015 compared with the nine-month period ended June 30, 2014 due to higher non-interest income, which increased \$443,000, lower provisions for loan loss, which decreased \$146,000, and higher net dividend and interest income, which increased \$72,000. Partially offsetting these items were higher non-interest expenses, which increased \$332,000.

The net interest margin increased by 1 basis point to 3.35% for the nine months ended June 30, 2015 compared to 3.34% for the nine months ended June 30, 2014. The yield on interest-earning assets fell 7 basis points to 4.01% for the nine months ended June 30, 2015 from 4.08% for the nine months ended June 30, 2014 primarily due to the lower rate environment. The cost of interest-bearing liabilities fell 10 basis points to 0.80% for the nine months ended June 30, 2015 from 0.90% for the nine months ended June 30, 2014. The decrease in the cost of interest-bearing liabilities was attributable to the lower rate environment and a more favorable funding composition comprised of a larger percentage of lower-cost deposit account balances and lower borrowing costs.

**Net Interest and Dividend Income.** Net interest and dividend income increased \$72,000, or 0.6%, to \$12.0 million during the nine month period ended June 30, 2015.

**Interest and Dividend Income.** Interest and dividend income decreased \$212,000, or 1.4%, to \$14.4 million for the nine months ended June 30, 2015 from \$14.6 million for the nine months ended June 30, 2014. The average balance of interest-earning assets increased \$1.4 million, or 0.3%, while the yield on assets decreased 7 basis points to 4.01% for the nine months ended June 30, 2015 compared with the prior year period.

Interest earned on our investment securities, including interest earning deposits and excluding Federal Home Loan Bank of New York stock, decreased \$89,000, or 8.1%, due to a \$2.2 million, or 3.1%, decrease in the average balance of such securities to \$70.3 million for the nine months ended June 30, 2015 from \$72.5 million for the nine months ended June 30, 2014. The average yield on investment securities decreased 11 basis points to 1.91% for the nine months ended June 30, 2015 from 2.02% for the nine months ended June 30, 2014. The decrease in yield was due to the lower overall interest rate market.

Table of Contents

**Interest Expense.** Interest expense decreased \$284,000, or 10.8%, to \$2.4 million for the nine months ended June 30, 2015 from \$2.6 million for the nine months ended June 30, 2014. The average balance of interest-bearing liabilities increased \$837,000, or 0.2%, between the two periods while the cost on such liabilities fell 10 basis points to 0.80% for the nine months ended June 30, 2015 compared with the prior year period.

Interest paid on advances and securities sold under agreements to repurchase decreased \$229,000, or 29.2%, to \$555,000 for the nine months ended June 30, 2015 from \$784,000 for the prior year period due to a decrease in the average balance of such borrowings to \$29.3 million from \$38.2 million. The average cost of advances and securities sold under agreements to repurchase decreased 21 basis points to 2.53% for the nine months ended June 30, 2015 from 2.74% for the same period of June 30, 2014, reflecting the lower market interest rate environment.

**Provision for Loan Losses.** We establish provisions for loan losses, which are charged to earnings, at a level necessary to absorb known and inherent losses that are both probable and reasonably estimable at the date of the financial statements. In evaluating the level of the allowance for loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, peer group information and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events occur. After an evaluation of these factors, management recorded a provision of \$936,000 for the nine months ended June 30, 2015 compared to \$1.1 million for the nine months ended June 30, 2014. The decrease in the provision for loan loss was due primarily to lower levels of loan charge-offs. Net charge-offs were \$805,000 for the nine months ended June 30, 2015 compared to \$1.3 million for the nine months ended June 30, 2014.

The loan charge-offs during the nine months ended June 30, 2015 resulted primarily from additional write-downs of loans previously deemed impaired. Fourteen non-performing loans totaling \$3.5 million were written down by \$1.2 million for the nine months based on updated valuations of the real estate securing the loans. Of these loans, five totaling \$1.1 million at September 30, 2014 were transferred to other real estate owned ("OREO"). There were recoveries totaling \$437,000 received during the nine month period.

Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Management reviews the level of the allowance on a quarterly basis, and establishes the provision for loan losses based on the factors set forth in the preceding paragraph. As management evaluates the allowance for loan losses, the increased risk associated with larger non-homogenous construction, commercial real estate and commercial business loans may result in larger additions to the allowance for loan losses in future periods.

**Other Income.** Non-interest income increased \$443,000, or 41.3%, to \$1.5 million for the nine months ended June 30, 2015 from \$1.1 million for the nine months ended June 30, 2014. The increase was attributable to higher net gains on the sales of assets and higher service charge income. Gains on the sale of investment securities and loans increased \$295,000 to \$458,000 for the nine months ended June 30, 2015 from \$163,000 for the nine months ended June 30,

2014. In addition, service charge income increased \$162,000, or 28.1%, to \$738,000 due to higher loan modification fees and prepayment penalties.

**Other Expenses.** Non-interest expenses increased \$332,000, or 2.9%, to \$11.8 million during the nine months ended June 30, 2015 from \$11.5 million for the nine months ended June 30, 2014 primarily due to higher compensation and benefit expenses and other expenses. Compensation and benefit expenses increased \$305,000, or 5.3%, from the prior year period due to annual merit increases for employees, a 1% increase in the Company's 401(k) match to 2% of eligible compensation, and higher incentive program expenses. Other expenses increased \$240,000 during the nine months ended June 30, 2015 compared with the prior year period primarily due to the settlement of a lawsuit with the Company's former President & CEO that resulted in a net charge of \$135,000. Offsetting these increases were lower loan servicing expenses and OREO expenses, which decreased \$171,000 and \$88,000, respectively, due to lower levels of non-performing loans and OREO.

**Income Tax Benefit.** The Company recorded tax expense of \$243,000, or 29.7% of pre-tax income, for the nine months ended June 30, 2015, compared to tax of \$106,000, or 21.7% of pre-tax income for the nine months ended June 30, 2014.

Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The valuation allowance is assessed by management on a quarterly basis and adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant. In assessing whether it is more likely than not that some portion or all of the deferred tax assets will not be realized, management considers projections of future taxable income, the projected periods in which current temporary differences will be deductible, the availability of carry forwards, and existing tax laws and regulations. The valuation allowance in place on deferred tax assets at June 30, 2015, did not materially change from that in place on September 30, 2014.

Table of Contents

**LIQUIDITY AND CAPITAL RESOURCES**

**Liquidity**

The Company's liquidity is a measure of its ability to fund loans, pay withdrawals of deposits, and other cash outflows in an efficient, cost-effective manner. The Company's short-term sources of liquidity include maturity, repayment and sales of assets, excess cash and cash equivalents, new deposits, other borrowings, and new advances from the Federal Home Loan Bank. There has been no material adverse change during the nine months ended June 30, 2015 in the ability of the Company and its subsidiaries to fund their operations.

At June 30, 2015, the Company had commitments outstanding under letters of credit of \$1.1 million, commitments to originate loans of \$22.0 million, and commitments to fund undisbursed balances of closed loans and unused lines of credit of \$35.6 million. There has been no material change during the nine months ended June 30, 2015 in any of the Company's other contractual obligations or commitments to make future payments.

**Capital Requirements**

The Bank has committed to the Federal Deposit Insurance Corporation and the New Jersey Department of Banking and Insurance to maintain capital at or above well capitalized levels. At June 30, 2015, the Bank's Tier 1 capital as a percentage of the Bank's total assets was 8.48%, and total qualifying capital as a percentage of risk-weighted assets was 12.40%.

**Item 3 – Quantitative and Qualitative Disclosures about Market Risk**

Not applicable to smaller reporting companies.

**Item 4 – Controls and Procedures**

Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were

effective.

There has been no change in the Company's internal control over financial reporting during the nine months ended June 30, 2015 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
