Our first quarter financial results demonstrated the strength in our subscription business driven by customer loyalty, the success of our SmartDefense program and the resulting strong operating cash flow and increase in deferred revenues, said Gil Shwed, chairman and chief executive officer of Check Point Software. In general, our financial results were impacted by a change in our decision to acquire Sourcefire, lower product revenues and a slower pace of growth in our industry.

Connectra delivered enhanced and most comprehensive SSL VPN with new security, application and performance features.

Eventia Analyzer 2.0 launched simplified security event management (SEM) that automatically prioritizes security events for decisive, intelligent action, and has extended support to the endpoint and correlates data for anti-virus applications, personal firewalls and operating systems.

VPN-1 Edge NGX unveiled extended security protection for remote offices with advanced intrusion prevention and anti-virus to complement its firewall and VPN technologies and ensure that branch offices have protection from worms and viruses.

Mr. Shwed continued, We are entering the second quarter with a high level of activity and many initiatives in our pipeline.
