IGEN NETWORKS CORP.

Notes to the Condensed Consolidated Interim Financial Statements

Six Months ended June 30, 2016

(Unaudited - Expressed in U.S. dollars)

1. Nature and continuance of operations

IGEN Networks Corp, (“IGEN”, or the “Company”) was incorporated in the State of Nevada on November 14, 2006. IGEN’s is in the business of providing vehicle tracking and recovery solutions to the automotive and power sport industries through its operating subsidiary, Nimbo, LLC.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which imply the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, on the ability of the company to grow its revenue base, on its ability to successfully grow the companies in which it is invested, and on the ability of the Company to obtain necessary equity financing to both support the latter objectives and to invest in and grow new companies. The Company has recurring losses since inception and had accumulated losses of \$8,077,029 as at June 30, 2016. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern. Although there are no assurances that management’s plans will be realized, management believes that the Company will be able to continue operations into the future. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

2. Summary of Significant Accounting Policies

a) Basic of presentation and consolidation

These condensed consolidated interim financial statements and related notes include the records of IGEN Networks Corp., its wholly owned subsidiary, IGEN Business Solutions Inc (incorporated in Canada) and Nimbo LLC (incorporated in USA).

All intercompany transactions and balances have been eliminated. These condensed consolidated interim financial statements are presented in accordance with accounting principles generally accepted in the United States, expressed in US dollars, and, in management’s opinion, have been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized as in the following:

b) Use of estimates

The preparation of these financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to donated expenses, and deferred income tax asset valuations. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company’s estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

c) Loss per share

Basic earnings (loss) per share are computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted earnings per share give effect to all dilutive potential common shares outstanding during the period including stock options, using the treasury stock method, and convertible preferred stock, using the if-converted method. In computing diluted earnings (loss) per share, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted earnings (loss) per share exclude all dilutive potential shares if their effect is anti-dilutive.

2. Summary of Significant Accounting Policies (Continued)

c) Loss per share (continued)

Because the effect of conversion of the Company's dilutive securities is anti-dilutive, diluted loss per share is the same as basic loss per share for the periods presented.

d) Financial instruments

The Company adopted FASB ASC 820-10-50, "Fair Value Measurements". This guidance defines fair value, establishes a three-level valuation hierarchy for disclosures of fair value measurement and enhances disclosure requirements for fair value measures. The three levels are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the assets or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 inputs to valuation methodology are unobservable and significant to the fair measurement.

The fair values of cash, accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to the immediate or short-term maturity of these financial instruments. Foreign currency transactions are primarily undertaken in Canadian dollars. The fair value of cash is determined based on "Level 1" inputs and the fair value of derivative liability with convertible debt is determined based on "Level 2" inputs. The financial risk is the risk to the Company's operations that arise from fluctuations in foreign exchange rates and the degree of volatility to these rates. Currently, the Company does not use derivative instruments to reduce its exposure to foreign currency risk. Financial instrument that potentially subject the Company to concentrations of credit risk consists of cash. The Company places its cash in what it believes to be credit-worthy financial institutions.

e) Equipment

Office equipment and computer are recorded at cost. Amortization is provided annually at rates and methods over their estimated useful lives as follows, except in the year of acquisition when one half of the rate is used. Management reviews the estimates of useful lives of the assets every year and adjust them on prospective basis, if needed.

Office equipment	20% declining balance
Computer	55% declining balance
Software	3 years straight line

Property, plant and equipment are reviewed for impairment whenever events or changes in the circumstances indicate that the carrying value may not be recoverable. If the total of the estimated undiscounted future cash flows is less than the carrying value of the asset, an impairment loss is recognized for the excess of the carrying value over the fair value of the asset during the year the impairment occurs. Subsequent expenditure relating to an item of office equipment is capitalized when it is probable that future economic benefits from the use of the assets will be increased.

2. Summary of Significant Accounting Policies (continued)

f) Revenue recognition

The Company recognizes revenue when earned, specifically when all the following conditions are met:

- Services are provided or products are delivered to customers.
- There is clear evidence that an arrangement exists.
- Amounts are fixed or can be determined.
- The ability to collect is reasonably assured.
- There is no significant obligation for future performance.
- The amount of future returns can be reasonably estimated.

g) Foreign currency transaction balances

The Company's reporting currency is the U.S. dollar. The consolidated financial statements of the Company are translated to U.S. dollars in accordance with ASC 830, Foreign Currency Translation Matters, using the exchange rate prevailing at the balance sheet date. Gains and losses arising on translation or settlement of foreign currency denominated transactions or balances are included in the determination of income.

Assets and liabilities of the Company's Canadian subsidiary are translated into U.S. dollars at the year-end exchange rates, and revenue and expenses are translated at the average exchange rates during the period. Exchange differences arising on translation are disclosed as a separate component of stockholders' equity

h) Income taxes

The Financial Accounting Standards Board (FASB) has issued FASB ASC 740-10. FASB ASC 740-10 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with prior literature FASB Statement No. 109, Accounting for Income Taxes. This standard requires a company to determine whether it is more likely than not that a tax position will be sustained upon examination based upon the technical merits of the position. If the more likely than not threshold is met, a company must measure the tax position to determine the amount to recognize in the financial statements. As a result of the implementation of this standard, the Company performed a review of its material tax positions in accordance with recognition and measurement standards established by FASB ASC 740-10.

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry-forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

i) Stock-based compensation

The Company records stock-based compensation in accordance with ASC 718, “Compensation – Stock Compensation”, using the fair value method. All transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable.

The Company uses the Black-Scholes option pricing model to calculate the fair value of stock-based awards. This model is affected by the Company’s stock price as well as assumptions regarding a number of subjective variables. These subjective variables include, but are not limited to the Company’s expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. The value of the portion of the award that is ultimately expected to vest is recognized as an expense in the consolidated statement of operations over the requisite service period.

2. Summary of Significant Accounting Policies (continued)

j) Inventories

Inventories are stated at the lower of cost or market with cost being determined on a first-in, first-Out (FIFO) basis. Inventories as at June 30, 2016 and December 31, 2015 were solely finished goods that can be resold. There was no provision for inventory recorded during the year ended December 31, 2015 and six months ended June 30, 2016.

k) Deferred revenue

As at June 30, 2016, and December 31, 2015, the Company had deferred revenues of \$55,500 and \$56,800 respectively. Annual service renewal fees are recorded as a component of deferred revenue in the balance sheets at the inception of the contract and are recognized as revenue evenly over the contract period, which is generally one year.

l) Changes in accounting policies and recent accounting pronouncements

The Company has not adopted new accounting policies since its most recent year ended December 31, 2015. The Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

3. Investment in an associate and Investment

Investment in an associate

As at June 30, 2016 and December 31, 2014 and 2015, the Company held approximately 30% of all the outstanding shares of Gogiro Internet Group ("Gogiro"), a private Canadian Company. The Company accounts for its investments in Gogiro with equity method. Consequently the Company has included Gogiro's income (losses) in the Company's condensed consolidated interim financial statements in accordance to the percentage ownership during three months ended March 31, 2015. In addition, gains and losses resulting from 'upstream' and 'downstream' transactions between IGEN and Gogiro are recognized in IGEN's consolidated financial statements only to the extent of unrelated investors' interests in Gogiro.

As at December 31, 2015 and June 30, 2016, the Company reviewed the recoverability of the investment in Gogiro and concluded that the investment was fully impaired. As a result, the Company recorded impairment charges of \$227,957 for the year ended December 31, 2015 and fully provided for its investment in Gogiro.

Changes in carrying value of the Company's investment in Gogiro are as follows:

	Number of Gogiro shares owned	Amount (\$)
Balance, December 31, 2013	2,478,080	241,338
Share of Gogiro's loss during fiscal 2014 December 31, 2014 (30.44%)	-	(14,263)

6. Stockholders' Equity – Continued

Number of options exercisable as June 30, 2016 was 3,325,000. The weighted average remaining life is 3.58 year.

The fair values of stock options granted are amortized over the vesting period where applicable. During six months ended June 30, 2016, the Company recorded \$20,090 (six months ended June 30, 2015 - \$33,358) stock-based compensation in connection with the vesting of options granted. The Company uses the Black-Scholes option pricing model to establish the fair value of options granted with the following assumptions:

	2016	2015		
Expected dividend yield	0	%	0	%
Volatility	200	%	200	%
Risk free interest rate	1.52	%	1.52	%

7. Derivative liabilities – options and warrants

Derivate liabilities consist of warrants that were originally issued in private placements and stock options granted that have exercise prices denominated in Canadian dollars, which differs from the Company's functional currency (United States dollars). Therefore these warrants and stock options cannot be considered to be indexed to the Company's own stock. Accordingly the fair values of the warrants and stock options must be accounted for as derivative liabilities with changes in fair value recorded in the consolidated statement of operations. The fair value of these warrants and options as at June 30, 2016 was \$29,269 (2015/12/31 - \$33,982). The fair values of warrants and stock options as at December 31, 2015 were determined using the Binomial option pricing model the following assumptions: risk free interest rate of 0.86%-1.54%, expected life of 1.37-5.00 years, volatility of 103.19%-176.96% and expected dividend of 0%. The fair values of warrants and stock options as at June 30, 2016 were determined using the Binomial option pricing model the following assumptions: risk free interest rate of 0.59% to 0.73%, expected life of 1.37-4.25 years, volatility of 88.19%-111.10% and expected dividend of 0%.

8. Note payable

During the fourth quarter of 2014, the Company issued a promissory note with principal of \$95,000 in exchange for a settlement of accounts payable of the same amount. This promissory is un-secured, will expire on December 31, 2016, and carries interest of 5% per annum.

The note payable was accounted for at amortized cost using the effective interest rate method with the effective interest rate of 14% per annum. The debt discount of \$16,163 was credited to Additional paid-in capital at issuance, and the \$16,163 debit to note payable is amortized over the term of the note.

The promissory note was accredited up to \$90,974 on June 30, 2016 (2015/12/31 -\$87,238). Including in the Company's accrued liabilities, there was an interest payable of \$8,349 as at (2015/12/31 - \$5,938) in connection with this outstanding promissory note.

As at June 30, 2016, the Company also had a promissory note payable of \$30,840 owing to a director of the Company (Note 5).

9. Financial instruments

Credit Risk

Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents. The Company deposits cash and cash equivalents with high credit quality financial institutions as determined by rating agencies. As a result, credit risk is considered insignificant.

Currency Risk

The Company's major expenses and payables are in United States dollars and are expected to continue to incur in United States dollars. Fluctuations in the exchange rate between the United States dollar and other currency may have a material effect on the Company's business, financial condition and results of operations. The Company is subject to foreign exchange risk for transactions in its Canadian subsidiary and its investment in Gogiro, which is a Canadian company. The Company does not actively hedge against foreign currency fluctuations.

Interest Rate Risk

The Company has cash balances and no interest bearing debt. The Company's current policy is to invest excess cash in high yield term deposits and bankers' acceptance. The Company regularly monitors its cash management policy. As a result, interest rate risk is considered not significant.

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with its financial liabilities. The Company manages liquidity risk by continuously monitoring actual and projected cash flows and matching the maturity profile of financial assets and liabilities. As at June 30, 2016, the Company had a working capital deficiency of \$727,284 (December 31, 2015 – working capital deficiency of \$536,863). The Company intends to have more equity financing, long term debt financing, share for debt settlement in order to eliminate the working capital deficiency and to the operations of the Company.

10. Convertible debenture and derivative liabilities

On June 1, 2016, the Company issued two convertible debentures (“CDs”) in the principal of CAD\$50,000 (\$38,634) and CAD\$20,000 (\$15,453) respectively. The CD with the principal of CAD\$50,000 (“CD#1”) and the CD with the principal of CAD\$20,000 (“CD#2”) were agreed to mature on four month anniversary of the closing date of June 8, 2016 (i.e. October 8, 2016). These CDs are non-secured, carry interest of 15% per annum payable monthly or at term. Subject to the approval of the holder of the CDs, IGEN may convert any of all of the principal and/or interest at any time following the 4 month anniversary of the issuance date of the CDs into common shares of IGEN at a price per share equal to a 20% discount to the fair market value of IGEN’s common share.

As the CDs are denominated in Canadian dollars (a currency different from the functional currency of the Company) and the exercise prices are not fixed (a 20% discount to the fair market value of IGEN’s common share), a derivative is recognized as a liability. The derivative liability is recorded at fair value and re-measured each period with the movement being recorded as a gain or loss in consolidated income (loss). The CDs are classified as a liability, less the portion relating to the derivative feature. During the period ended June 30, 2016, the Company recorded derivative liabilities of \$20,104 and convertible notes of \$38,663. The fair value of derivative liabilities was established by using the valuation technique, the Binomial option pricing model. Assumptions used in the option pricing model were as follows: average risk free interest rate – 0.22%; expected life – 0.35 year; expected volatility – 52%%; and expected dividends – nil.

The Company records accretion expense over the term of the convertible notes up to their principal when these CDs come due. During the period ended June 30, 2016, accretion expenses of \$4,680 (2015 - \$nil) was recorded. Interest expense on the CDs is composed of the interest calculated on the face value of the CDs at 15% per annum which amounted to \$672 during the period ended June 30, 2016 (2015 - \$nil).

Overview

During the second quarter of 2016 the Company continued to focus on initiatives to grow revenue, expand the customer base, and develop new revenue streams for its wholly owned subsidiary Nimbo LLC. The company also continued to pursue strategic merger and acquisition activities with targeted technologies and technology companies, and raising required capital.

Financial Condition and Results of Operations

Capital Resources and Liquidity

Current Assets and Liabilities, Working Capital

As of June 30, 2016 the Company's current assets were down marginally over the 6 month period (-\$15,044). Inventory levels doubled to \$59,077 but this was offset by decreases in accounts receivable and pre-paid expenses. Accounts receivable, consisting primarily of monies owed to Nimbo by its customers for products and services, continued to drop and now represent only 14% of the company's consolidated current assets.

Current liabilities increased by 25% over the quarter to \$887,784. An increase in accounts payable, primarily for hardware and the provision of wireless services, represented over half this increase. A further third was due to new convertible debt and its associated derivative liabilities.

The Company finished the third quarter with a working capital deficiency of (\$727,284), an increase of 35% over the six-month period. The Company intends to improve its working capital position through ongoing equity and debt financing and focusing on achieving a positive cash flow.

Total Assets and Liabilities, Net Assets

The six-month period saw a marginal net decrease in total assets of \$20,185. commensurate with the respective changes in current assets previously discussed; changes in noncurrent assets were not significant.

In similar fashion total liabilities saw increases over the six month period that were primarily the increases in current liabilities previously discussed, as changes in noncurrent liabilities were negligible.

The above resulted in net assets of (\$238,543), a decrease over six months of (\$190,849)

As of the date these financial statements were issued the Company believes it has access to adequate working capital and projected net revenues to maintain existing operations for approximately three months without requiring additional funding. The Company's business plan is predicated on raising further capital for the purpose of further investment and acquisition of targeted technologies and companies, to fund growth in these technologies and companies, and to expand sales and distribution channels for companies it currently owns or is invested. It is anticipated the Company will continue to raise additional capital through private placements and debt financing in the both the near and medium term.

Table of Contents

Results of Operations

Revenues and Net Income (Loss)

Revenues

The company had second quarter revenues of \$178,087, down from \$274,007 in the first quarter, and down from \$289,065 reported over the similar period in 2015. Revenue for the six month period was \$452,094, down marginally from \$467,614 reported for the similar period in 2015.

Gross profit for the second quarter was \$77,775, which was down from both the previous quarter and the similar quarter in 2015, though a gross margin of 44% remains healthy. For the six-month period however gross profits were up, being \$218,068 at margins of 48%, compared with \$163,975 at margins of 35% for the similar period in 2015. This represents a growth in gross profits of 33% over the previous year.

Revenue results for the second quarter and the six-month period were somewhat disappointing primarily due to challenges experienced introducing a third-party hardware device over the first and second quarters. Device hardware configuration and firmware issues caused delays in the Company's ability to ship, impacted profitability, and in some case incurred irrecoverable loss of business. The Company was able to resolve issues, and did achieve significant sales towards the end of the second quarter, but was not able to ship and recognize revenue for these sales until the beginning of Q3.

The Company continues to review hardware vendor, inventory, and order fulfillment strategies as well as product and service pricing and delivery models to try to both grow sales and maximize overall margins. It is anticipated that an increased percentage of hardware sales will have the effect of both increasing revenue while continuing to reduce blended margin percentages somewhat. In late Q2 and early Q3 the company implemented a pricing model based on initial lower margin sales of services and hardware that is pre-loaded in automotive dealership lots, with follow-on high margin revenue generated by subsequent sell-through to end customers. In June the Company announced its largest single revenue order through its Verizon channel as part of this new pricing model. Delivery of these and follow-on orders have begun in Q3.

Expenses

Expenses for Q2 2016 totaled \$302,448, down a marginal 5% from the first quarter. Over the six-month period an increase in expenses of 23% to \$620,522 was due primarily to increases in salary costs and management fees (netted against decreases in consulting and professional fees and stock base compensation), and interest expense.

Net Income (Loss)

The Company had a Q2 2016 net loss of (\$224,673), compared with (\$177,781) in the previous quarter and (\$158,491) in the similar quarter in 2015. Similarly, a net loss of (\$402,454) for the six-month period was greater than the (\$339,675) net loss reported for the similar period in 2015. Though the Company does anticipate that some quarterly net losses may continue to be necessary as the Company builds its business, delays in being able to ship new third party hardware devices were a significant factor in the increased losses incurred over the first half of the year.

The Company continues to invest in personnel and programs as necessary to drive revenue growth, increased gross profit, and to enable the Company to become cash flow positive.

Cash Flows

The company saw no significant increase or decrease in cash over the six-month period. Net cash of \$190,121 used in operating activities - significantly down from \$239,886 used over the similar period in 2015 – was offset by \$193,609 raised via private placements, option exercises and convertible debt. Cash at the end of the period was \$33,968.
