CALCASIEU REAL ESTATE & OIL CO., INC.

PART I

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company earned \$251,777 net income for the first quarter of 2003 compared to \$89,991 for the first quarter of 2002, an increase of 180.8%. This increase was due entirely to the increase of income from oil and gas properties. Oil and gas income increased partly due to higher prices but primarily because of production from one well in the North Gordon field, which began production after the first quarter of 2002.

During the second quarter the Company hopes to receive income from the

Edgar Filing: CALCASIEU REAL ESTATE & OIL CO INC - Form 10-Q

settlement of the Strohe suit. This is a one time event and we are projecting receipt of approximately \$70,000. The Company is also pursuing receipt of approximately \$120,000 being held in escrow pending proof of mineral ownership. There is currently no new mineral activity on the Company's lands.

The enclosed financial statements are unaudited with the exception of the Balance Sheet for December 31, 2002. The unaudited interim financial statements reflect all adjustments which are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented. All such adjustments are of a normal recurring nature.

Management believes that the Company's revenues will be sufficient to meet its existing needs and the needs for its anticipated future operations. Long-term trends will depend upon the ability of management to continue to find new production to replace the depletion of the Company's present minerals as well as increasing the Company's income from timber and agriculture. Management does not presently anticipate that the Company will incur material additional liabilities in its future operations. The Company participates in no off-balance sheet entities.
