ITEM 1. BUSINESS

Special Cautionary Notice Regarding Forward-Looking Statements

We believe that it is important to communicate our future expectation to our shareholders and to the public. This report contains forward-looking statements, including, in particular, statements about our goals, plans, objectives, beliefs, expectations and prospects under the headings Item 1. Business and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in this report. You can identify these statements by forward-looking words such as anticipate, intend, plan, continue, could, grow, may, potential, predict, strive, will, seek, estimate, believe, expect, and similar expressions that convey uncertainty of future events or outcomes. Any forward-looking statements herein are made pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning future:

results of operations;

liquidity, cash flow and capital expenditures;

demand for and pricing of our products and services;

acquisition activities and the effect of completed acquisitions;

viability and effectiveness of strategic alliances;

industry conditions and market conditions; and

general economic conditions.

Although we believe that the goals, plans, expectations, and prospects reflected by our forward-looking statements are reasonable in view of the information currently available to us, those statements are not guarantees of performance. There are many factors that could cause our actual results to differ materially from those anticipated by forward-looking statements made herein. These factors include continuing economic uncertainty, the timing and degree of business recovery, unpredictability and the irregular pattern of future revenues, competitive pressures, delays and other risks associated with new product development, undetected software errors, and risks associated with market acceptance of our products and services as well as a number of other risk factors that could affect our future performance. Factors that could cause or contribute to such differences include, but are not limited to, those discussed under the section captioned Factors Affecting Future Performance in Item 7 of this Form 10-K/A as well as the cautionary statements and other factors that we discuss in other sections of this Form 10-K/A.

Company Overview

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

American Software, Inc. (American Software or the Company) was incorporated as a Georgia corporation in 1970. We develop, market and support a portfolio of software and services that deliver enterprise management and collaborative supply chain solutions to the global marketplace. Our software and services are designed to bring business value to enterprises by supporting their operations over intranets, extranets, client/servers or the Internet. We position ourselves as a single source business software solution provider. References to the Company, our products, our software, our services and similar references include the appropriate business unit actually providing the product or service.

We provide our software solutions through three major business segments, which are further broken down into a total of four major product and service groups. The three business segments are (1) Collaborative Supply Chain Management, (2) Enterprise Resource Planning (ERP), and (3) IT Consulting. The Collaborative Supply Chain Management segment consists of Logility, Inc., an 86% owned subsidiary which provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners. The ERP segment consists of (i) American Software ERP, which provides purchasing and materials management, customer order processing, financial, e-commerce, Flow Manufacturing and traditional manufacturing solutions, and (ii) New Generation Computing (NGC), which provides industry specific business software to both retailers and manufacturers in the Apparel and Sewn Products industry. The IT Consulting segment consists of The Proven Method, an IT staffing and consulting services firm. We also provide support for our software products, such as software enhancements, documentation, updates, customer education, consulting, systems integration services, and maintenance.

Table of Contents

Segment 1 Collaborative Supply Chain Management

Logility, Inc.

Collaborative Supply Chain Management solutions are provided through Logility, Inc. We currently own approximately 86% of the common stock of Logility, the remaining 14% being publicly held (NASDAQ: LGTY).

Logility, Inc. was incorporated as a Georgia corporation in 1996. Logility provides collaborative supply chain solutions to streamline and optimize the management, production and distribution of products between manufacturers, suppliers, distributors, retailers, carriers and other organizations and their respective trading partners. The supply chain refers to the complex network of business relationships with trading partners (customers, suppliers and carriers) to forecast, source, manufacture, and deliver products and services to multiple locations and customers by various modes of transportation. Supply chain operations include demand chain, supply chain, manufacturing, logistics, warehouse management, transportation and other business-to-business process management for collaborative relationships between customers, suppliers and carriers. Logility's solutions enable enterprises to increase their market visibility to build competitive advantages and increase profitability by significantly reducing costs, increasing revenues, improving operational efficiencies and collaborating with suppliers and customers to more effectively respond to dynamic market conditions.

Logility Voyager Solutions™ consists of an Internet and client/server based, integrated software suite that provides advanced supply chain management including collaborative planning, strategic network design, optimized supply sourcing, warehouse management, and collaborative logistics capabilities that are designed to increase revenues, reduce inventory costs, improve forecast accuracy, decrease order cycle times, manage global sourcing initiatives, optimize production scheduling, streamline logistics operations, reduce transportation costs and improve customer service.

In response to global competitive pressures, companies are continually seeking new ways to enhance the productivity of their operations. Companies that effectively communicate, collaborate and integrate with their trading partners within the extended enterprise or supply chain can realize significant competitive advantages in the form of lower costs, greater customer responsiveness, and increased revenue. Supply chain management refers to the process of managing the complex network of relationships that organizations maintain with external trading partners (customers, suppliers, manufacturers, distributors and retailers) to source, manufacture and deliver goods and services to the end consumer. Supply chain management involves both the activities related to supplying products or services (source, make, move, buy, store, and deliver) as well as the sales and marketing activities that impact the demand for goods and services, such as new product introductions, promotions, pricing and forecasting.

Today several market trends are driving organizations to expand collaboration with trading partners along the supply chain. A general shift in market power has forced manufacturers and distributors to become more responsive to retailers and consumers, which has increased the demand for improved planning capabilities. At the same time, global economic conditions and competitive pressures are forcing manufacturers to reduce costs, decrease order cycle times and improve operating efficiencies. As a result, manufacturers, distributors and retailers are increasingly under pressure to better manage the supply chain as they seek to improve manufacturing efficiency and logistics operations while maintaining flexibility and responsiveness to changing market conditions and specific customer demands. These pressures are compounded by the increasing complexity and globalization of the interactions among suppliers, manufacturers, distributors, retailers and consumers.

The growth and rapid adoption of the Internet has enhanced the ability of organizations to integrate their business processes through collaborative planning to synchronize internal assets and production with external demand and supplier capabilities. Global Internet technology

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

adoption and supply chain strategies are converging to create a competitive advantage by reducing the cost of goods sold, improving customer service, building global brands and increasing global supply chain visibility as companies move product to market quicker. Logility's customers goal is to cost-effectively provide the right product in the right place at the right time at a competitive price.

Logility derives revenues from three primary sources:

Licenses. License revenues are derived from license agreements for software usage, based upon the number of modules licensed and the number of servers, users and/or sites for which the solution is designed.

Maintenance. Maintenance revenues derived from contracts primarily include telephone consulting, product updates, and releases of new versions of products previously purchased by the customer, as well as error reporting and correction services.

Services. Services revenues primarily include consulting, implementation, and training.

Table of Contents

Leveraging its supply chain management expertise, Logility has been an innovator in developing and deploying collaborative supply chain management solutions, with its first Internet-based collaborative planning solution implemented in 1996. Logility continues to invest and expand its innovative solutions which support the Voluntary Interindustry Commerce Standards Association (VICS), collaborative planning, forecasting and replenishment (CPFR[®]) standards, as well as other emerging collaborative supply chain management standards for transportation and distribution center management such as RFID, or radio frequency identification, a technology that uses radio waves to uniquely identify items. In the future, RFID will reduce labor costs in distribution centers, increase order accuracy, enhance transportation solutions and provide greater operational efficiency throughout the supply chain.

Logility believes companies in distribution-intensive industries face considerable competitive pressure, which is intensified by the high cost of inventory and distribution investments, dynamically changing consumer needs, and variability in overall supply chain performance. These companies need solutions that are capable of delivering significant financial benefits by quickly solving problems that arise in sourcing, manufacturing and distribution operations. Logility's solutions are capable of helping these companies collaborate with their trading partners to improve customer service and optimize their sourcing, manufacturing, inventory and distribution networks.

The *Logility Voyager Solutions* software suite is modular and scaleable to meet the management requirements of complex organizations involving tens of thousands of products across multiple sites. In addition, Logility's solutions readily interface with a broad range of existing enterprise applications deployed on a variety of Internet and client/server operating environments and platforms. Logility has licensed one or more modules of *Logility Voyager Solutions* to more than 400 companies worldwide, including ConAgra, Continental Tires North America, Eastman Chemical Company, Elizabeth Arden, Epson America, Florida Power & Light, Huhtamaki (UK) Limited, Komatsu, L'Oréal USA, Magneti Marelli, McCain Foods Limited, McCormick & Company, Mercury Marine, Pernod-Ricard, Pfizer, Porsche, Sigma Aldrich, Sony Electronics, VF Corporation, and xpedx. Logility sells its products and services through direct and indirect channels. Logility derived approximately 12% of its revenues in the fiscal year ended April 30, 2003 from international sales.

The key benefits of Logility's software solutions and services include the following:

End-to-End Supply Chain Management. *Logility Voyager Solutions* provide functionality that addresses both the flow of information and the flow of products throughout the supply chain. By synchronizing its comprehensive planning software products with its transportation and warehouse management software solutions, Logility's product suite can more efficiently and accurately coordinate the sourcing of goods and delivery of products to the customer. This end-to-end approach allows maximum synchronization of activities along the supply chain, including collaboration with external trading partners.

Advanced Collaborative Planning and Supply Chain Execution Functionality. Logility's products allow for collaboration among the various levels within an organization and among external constituents (trading partners) throughout the supply chain. The architecture of *Logility Voyager Solutions* enables key constituents to participate in the planning process, including marketing, sales, manufacturing, procurement, logistics, warehousing and transportation personnel, creating a consensus plan that addresses the requirements of all groups. *Logility Voyager Collaborate* supports the business processes and practices defined in the VICS CPFR guidelines, streamlining buyer and seller trading partner communications. Complementing *Voyager Collaborate* for supply chain planning is *Logility Voyager Fulfill* on the supply chain execution side. *Voyager Fulfill* extends collaboration to transportation and distribution center management trading partners to streamline the order fulfillment process through collaboration among warehouse, transportation and carrier trading partners. *Voyager Fulfill* supports emerging industry standards for collaborative transportation management.

Comprehensive Planning Solution. Logility's planning solution includes demand, inventory, event, life cycle, replenishment, supply, manufacturing, and transportation planning modules that balance demand opportunities with supply constraints through the synchronization of information gathered from supply chain participants. A key benefit of Logility's planning solution components is its emphasis on addressing the

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

full range of complex demand planning requirements of customers, including comprehensive forecasting capabilities that take into account each user's unique perspective of the supply chain. Additionally, Logility's planning solution implements and manages key business goals such as profit maximization or cost minimization, traditional distribution resource planning (DRP), and advanced planning systems (APS). It does so by applying financial and optimization capabilities to sourcing decisions, enabling companies with complex supply chains to balance profits, costs, and service while simultaneously considering all supply chain constraints.

Robust Supply Chain Execution Solution. The Supply Chain Execution components of *Logility Voyager Solutions* support the needs of single or multi-site operations. This is accomplished by systematically balancing logistics strategies, customer service policies, carrier effectiveness and inventory levels to optimize warehouse and transportation operations and leverage collaboration with carriers to optimize the distribution network, gain greater visibility of inventory in-transit and improve customer service.

Table of Contents

Rapid Deployment. Logility’s products use a modular design centered around proven business processes that streamline implementation and accelerate deployment. The functionality of each module generally permits customers to implement the solutions with nominal modifications. In addition, Logility’s software combines sophisticated techniques and tools with intuitive, Windows- and browser-based user interfaces to reduce training requirements and accelerate implementation tasks.

Open, Scaleable, Internet and Client/Server Architecture. Logility has designed its software to use the Internet to reach remote corporate users and incorporate external trading partners. Logility’s application suite integrates with existing in-house and third-party software applications and a variety of operating environments and platforms. The software is scaleable to manage complex processes involving tens of thousands of products across multiple sites.

Product Features

The *Logility Voyager Solutions* suite was designed to synchronize demand opportunities with supply constraints, sourcing alternatives and logistics operations. The suite is comprised of a series of Internet and client/ server based, integrated modules that provide a robust solution for supply chain management resulting in both internal and external collaboration to streamline the supply chain. These modules can be implemented individually, as well as in combinations or as a full solution suite. *Logility Voyager Solutions* supports multiple communications protocols and is designed to operate with industry-standard open technologies, including leading web-based and client/server environments, such as Windows NT/Windows 2000, UNIX, and iSeries (AS/400) on Oracle, Microsoft SQL Server and DB2 databases. The following summarizes key features of Logility’s product line:

Module

Features

Value Chain Collaboration
Logility Voyager Collaborate

VICS collaborative planning, forecasting and replenishment (CPFR) compliant
Collaborative planning with trading partners (customers and suppliers)
Internal Sales and Operations Planning (S&OP)
Open integration architecture supports rapid integration with various forecasting scenarios
Value Chain Workflow defines and tailors business processes
Exception-based management of supply chain business conditions

Logility Voyager Fulfill

Deployable in both private and public trading exchanges
Collaborative warehouse and transportation planning with suppliers, customers and carriers
Open integration architecture
Value Chain Workflow defines and tailors business processes
Exception-based management of order fulfillment business conditions
Deployable in both private and public trading exchanges

Supply Chain Event Management
Logility Voyager Navigate

Provides supply chain event management for increased visibility of operations
Exception-based management of the supply chain
Efficiently monitors, notifies, controls and measures supply chain performance

Speeds resolution of supply chain exceptions

Optimizes critical human capital via a role-based prioritized list of activities that identify where responsible parties have the biggest impact on operations

Incorporates any Open Data Base Connectivity (ODBC)-compliant data source for an accurate view of key business conditions

Logility Voyager Solutions for Collaborative Supply Chain Management

These applications allow companies to plan, manage and optimize their supply chain operations and strategic trading partner relationships for direct material procurement, production, logistics and customer order fulfillment.

Value Chain Collaboration

Logility Voyager Collaborate enables companies to communicate easily and share real-time information across the organization and with external trading partners by uniting suppliers, manufacturers, distributors and retailers under the power of common goals and collaborative business processes such as Sales and Operations Planning and VICS collaborative planning, forecasting and replenishment (CPFR) standards that eliminate traditional barriers among trading partners.

Logility Voyager Fulfill provides a private transportation exchange that extends collaboration to carriers, customers and suppliers. Customers and suppliers can view the status of their orders and shipments in-transit, while carriers can accept or reject loads offered, bid on loads tendered, provide shipment scheduling and status and the payment status of previous shipments.

Supply Chain Event Management

Logility Voyager Navigate provides the benefits of Supply Chain Event Management (SCEM) by allowing trading partners to efficiently monitor, notify, control and measure supply chain operations on an exception basis, both within companies and throughout the supply chain to improve the efficiency of the overall operation.

Table of Contents

Demand Chain Planning

These solutions provide the visibility to increase forecast accuracy as they create an overview of demand, new product introductions and promotions, allowing customers to build plans that are synchronized with market demand.

Life Cycle Planning provides collaborative life cycle planning, that enables the supply chain to effectively control each phase in a product's sunrise-to-sunset cycle including introduction, maturity, replacement, substitution and retirement to ensure that the right products are available upon customer demand.

Demand Planning helps reconcile discrepancies between high-level business forecasting and low-level product forecasting. It evaluates and predicts future demand based on demand history, customer orders, point-of-sale data, market forecasts, syndicated data and other information to generate a graphical representation of demand by item, location, customer and/or group. *Demand Planning* has a self-correcting, self-selecting modeling process that utilizes a number of advanced forecasting models to generate sales, marketing, logistics and other forecasts. This system allows for user-override of certain modeling parameters, such as quantities or percentages, to account for promotions, supply constraints and other what-if scenarios.

Inventory Planning dynamically sets time-phased inventory targets based on safety stock and order quantity rules to effectively measure the trade-off of inventory investment and desired customer service levels. Built around industry best practices, *Inventory Planning* enhances planning and scheduling of inventory while taking into consideration replenishment frequency and order size, seasonal build and manufacturing plans. Companies can apply service level targets and policies individually to each product within an enterprise or uniformly throughout the various product lines.

Event Planning is a causal-based forecasting solution designed to facilitate product life-cycle management and promotion planning, and provide forecasting capabilities to help determine the impact of promotions, price changes or other events, enabling manufacturers to adjust production to match changing demand. *Event Planning* utilizes advanced algorithms based on neural network techniques that allow the system to refine forecasting by incorporating the results of ongoing promotions and other activities.

Demand Chain Voyager. Through the use of the Internet, the *Demand Chain Voyager* module extends the reach of *Demand Planning* by allowing remote users to view corporate forecasts and to input demand data in real-time. *Demand Chain Voyager* provides an online, updated schedule of events including promotions, product launches and holidays. In addition, it allows for the revision of inventory goals and objectives such as service levels and turns.

Global Sourcing Management

Global Sourcing Management gives customers the freedom to cost-effectively source and manufacture anywhere in the world to gain a competitive advantage without compromising quality or product availability.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

The *Value Chain Designer* module provides a strategic view of the supply chain network. Companies can optimize location decisions, resource allocation, customer assignment, sourcing alternatives and transportation strategies to minimize costs or maximize profitability.

Global Sourcing automates the sourcing process from proposal management and product specification package delivery to supplier bid analysis, selection and performance management via the Internet.

Production Visibility utilizes collaborative time and action calendars to monitor supplier production and quality, track milestones, gain packaging and labeling compliance and provide exception-based management of global sourcing initiatives.

Supplier Logistics provides Advanced Ship Notice and tracks supplier shipments from global manufacturing locations to provide greater visibility of inbound logistics and product availability.

Supply Chain Planning

Logility optimizes material, inventory, production and distribution assets and synchronizes supply and demand. Multiple and simultaneous supply chain planning models generate plans based on constraints and alternative sourcing, production and distribution options.

Manufacturing Planning models the production operations by capturing capacity constraints, such as equipment capabilities, intermediate storage limitations, shop floor calendars and raw material availability and production constraints, such as synchronization of multi-step operations, product sequencing, production changeovers and inventory policies. *Manufacturing Planning* enables

Table of Contents

collaborative decision-making by comparing the feasibility and cost effectiveness of various scheduling strategies through the use of simulation.

The *Supply Planning* module supports sourcing options based on business goals such as profit maximization or cost minimization. It also balances manufacturing constraints and applies advanced financial and optimization capabilities to sourcing decisions. *Supply Planning* enables companies with complex supply chains to balance profits, costs, and service while simultaneously considering all supply chain constraints to satisfy business requirements.

Replenishment Planning provides future visibility of customer demands, product and material requirements, and the actions needed by suppliers and production teams to satisfy those demands. *Replenishment Planning* takes into account manufacturing constraints, inventory investment, desired service levels, and current orders and commitments. *Replenishment Planning* provides support for continuous replenishment strategies, such as Vendor Managed Inventory, Quick Response and Efficient Consumer Response.

Supply Chain Execution

Logility provides industry-leading capabilities for optimizing both warehouse and transportation operations to systematically balance logistics strategies, customer service policies, carrier effectiveness and inventory management to improve profitability.

Transportation Planning consolidates shipments and determines the optimal transportation mode and carrier while providing a list of alternatives. The solution includes a Load Control Center that reviews all inbound, outbound and inter-facility shipments and provides an integrated view of all orders requiring shipping decisions. Logility has designed this product to reduce freight costs, improve customer service levels and increase cost-effective responsiveness to specific customer requirements.

Transportation Management facilitates the timely execution of the optimized shipping plan developed by the *Transportation Planning* module. It includes load tendering and shipment tracking via Electronic Data Interchange (EDI), e-mail or automatic fax. The freight audit and payment capabilities enable flexible reporting of landed cost by shipment, customer or product group. Logility designed this module to reduce freight costs, improve carrier utilization and provide comprehensive freight management reporting.

WarehousePRO raises shipping and inventory accuracy by optimizing the flow of materials and information through distribution centers. WarehousePRO cuts operating costs and improves productivity, increase order fill rates, optimize space utilization and improve customer service. The solution is highly flexible and quickly adapts to changing business requirements. *WarehousePRO* features an extensive workflow library incorporating industry-specific best-practice templates for effective warehousing techniques. With built-in standard interfaces to major radio frequency data collection systems, this software delivers more accurate inventory accountability and improved warehouse efficiency for a paperless warehouse environment.

Segment 2 Enterprise Resource Planning

American Software ERP

Our enterprise solutions are comprehensive global solutions that link critical functions throughout an enterprise. All of our enterprise solutions support e-business functions.

The *e-Intelliprise* solution is a web-based ERP system that a customer can run over the Internet, intranet or extranet utilizing the IBM iSeries servers. This allows any function within the ERP system to be easily deployed over the Internet using a dynamic role-based web page capability. Users no longer require separate implementations to achieve differing e-business views over the Internet. This solution supports e-businesses and traditional businesses with full front-to-back office integration, which is critical to successful fulfillment and seamless processing and reporting throughout the enterprise. The e-intelliprise solution is a global system, capable of operating in multiple languages and logistical organizations. We build this system around a flexible enterprise architecture that enables centralized management of enterprise wide processes while allowing delegation of other business process decisions to other levels of the organization.

Flow Manufacturing is a software solution that supports pull-based manufacturing. Flow Manufacturing, also referred to as Lean or Agile Manufacturing, is expected to become a key competitive advantage to companies as e-Business increases consumer expectations for faster deliveries, reduced pricing and more highly customized products.

Our *e-applications* are e-business solutions that can web-enable specific business functions through integration with existing ERP or legacy systems. Currently, *e-applications* are available for the following applications: *e-procurement*, *e-store*, *e-expenses*, *e-forms*, *e-payables*, *e-receivables*, *Purchase Order Tracking and Vendor Collaboration*, and *e-connect*, a seamless, XML-enabled data exchange. We believe that these products represent a cost-effective solution for customers with an e-business requirement.

Table of Contents

We also market a tool to enable our customers to enter inventory and production transactions using bar code data collection devices. This product is known as RF Direct Connect, and ensures accurate entry of such information as shipping, transfer, inventory movement, receiving, and production data.

We have web-enabled our legacy S/390 applications using Host Access Transformation Server (an IBM WebSphere application). This product enables our existing S/390 customers to access their back office systems from any Windows-based computer with Internet access using only a web browser. The graphical user interface reduces the learning curve for new users and rejuvenates the look and feel of the systems. We market this product under the name *Host Access*.

Our product line consists of software and services that operate on three strategic computer platforms: (1) IBM System/390 Mainframe or compatible, (2) IBM iSeries (AS/400), and (3) Intel-based servers and clients that operate, Windows 95, 98 and NT, and Windows 2000. The products are written in various standard programming languages utilized for business application software, including ANS COBOL, Micro Focus COBOL, C, C++, Visual Basic, JAVA and other programming languages. Many have both on-line and batch capabilities.

The following is a summary of our main ERP software solutions outside of our New Generation Computing, Inc. subsidiary:

Manufacturing Modules

Companies may use e-intelligence with Traditional MRP II Manufacturing and/or Flow Manufacturing modules. The modules listed below are the solution components within Traditional Manufacturing:

Master Scheduling

Material Requirements Planning

Bill of Materials

Capacity Planning

Production Order Status

Route and Work Center Maintenance

Shop Floor Control

Logistics Modules

Our logistics solution consists of an integrated system of modules that provide information about the status of purchasing activities, customer orders, inventory position and internal inventory requisition requirements. These modules perform primarily the following functions:

Inventory Asset Management

Inventory Asset Control

Lot Control

Receipt and Shipment Management

Serialized Inventory Processing

Replenishment Processing

Requisition Management

Inspection

Table of Contents

Procurement

e-Procurement

Traditional Purchasing

Requisition Processing

Blanket Purchasing

Purchase Order and Purchase Requisition Approval Routing

Customer Order Management

e-Store

Order Management

Pricing and Promotions Management

Shipping Management

Billing Management

Credit Control Processing

Customer Management

Financial Modules

Our comprehensive financial solutions provide functions such as financial reporting, budgeting, asset management, cash management, credit management and receivables management. These systems assist in resolving customers' specific financial control issues faster and more effectively. We designed the e-intelligence financial module for global companies and in order to allow the use and reporting of multiple currencies, including the European Monetary Unit (EMU). The specific applications available are:

Key benefits of Enterprise Solutions include the following:

American Software is a single-source solution provider for the Internet age. Our comprehensive e-business solution suite supports the e-business requirements of most enterprises throughout their adoption of Internet technology. e-intelliprise is a comprehensive solution to support the operations of enterprises and provide advanced decision support tools.

Front-to-Back Office Integration is critical to the success of an enterprise. e-intelliprise provides complete integration of e-business transactions to the entire ERP system. This assures complete and consistent flow of information throughout the enterprise and supply chain. Fulfillment issues that have been experienced by some e-tailers can be resolved through front-to-back office integration. e-intelliprise is a single solution for support of traditional and e-business activities.

Rules-based architecture allows different views based upon user role. e-intelliprise is very flexible due to its rules-based architecture. This allows the ERP data to be presented based upon the profile of the user.

Deployable over the Internet, Intranet and, Extranet. Companies can deploy e-intelliprise over multiple channels without a separate implementation. e-intelliprise allows users to create multiple secure role-based views of the system. We believe this system flexibility provides greater business value by extending the information within the ERP securely across to employees, customers and trading partners, as needed.

Full Global Capabilities. e-intelliprise provides full global support of the entire enterprise with multiple languages, currencies and books. This allows users to view information in their native language and currency.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Modular Solution. Companies may purchase one or more modules, which they can integrate with other enterprise software. They may also purchase an integrated product suite to handle increased requirements for enterprise management, processing and transaction volume.

Extensive Functionality. Our enterprise solutions combine traditional and e-business functionality into a comprehensive yet flexible system. e-intelligence offers full operational and decision support functionality for global enterprises.

Rapid Deployment. Our products utilize a modular design and a flexible rules-based architecture, thereby streamlining implementation and reducing project time and expenses. We have announced a 120-day implementation program that is appropriate for many customers.

Flow Manufacturing Modules

American Software's Flow Manufacturing solution is designed to operate on a stand-alone basis, or with the e-intelligence ERP suite or with an ERP suite provided by another vendor. Customers can use Flow Manufacturing in conjunction with traditional manufacturing or they can use it as the sole manufacturing solution throughout an enterprise. Flow Manufacturing represents the industry's most comprehensive solution designed expressly for companies considering the adoption of this approach to manufacturing. The solution is comprised of the following modules:

Line Design

Kanban Management

Demand Smoothing

Table of Contents

Product Costing

Engineering Change Control

Method Sheet Management (Work Instructions)

Flow Manufacturing Benefits:

e-business support. To meet e-business demands, many manufacturers are replacing traditional mass production methods with Flow Manufacturing techniques. The benefits of Flow Manufacturing, such as reduced cost and reduced lead-time, offer a more appropriate structure for responding to e-business demands. With Flow Manufacturing manufacturers build the product in response to customer demand.

Scaleable Implementation. We can scale Flow Manufacturing to handle a single production line up to the requirements of a complex multi-plant, multi-source manufacturing environment. The solution can also co-exist with traditional manufacturing so that manufacturers can use Flow Manufacturing for some portions of production and assembly while maintaining traditional manufacturing for others.

Integration. We can license Flow Manufacturing in conjunction with our e-intelligence ERP suite, or we can license it to companies that are using the enterprise solutions of other vendors. Industry-standard data formats, interfaces and protocols facilitate this integration.

Rapid Deployment. Flow Manufacturing has a modular design, which we believe streamlines implementation and allows deployment in a relatively short time frame. The comprehensive functionality of each module generally permits customers to implement the solutions with nominal modifications. In addition, Flow Manufacturing's Windows-based interface and other tools and techniques reduces training requirements and implementation tasks.

e-APPLICATIONS

e-applications streamline business processes and create competitive advantage that helps businesses leverage the full value of their existing ERP and legacy systems. Our e-applications provide added value by extending the reach of the ERP to trading partners, establishing the groundwork for collaborative trading.

e-Procurement. This self-service online procurement solution reduces the time, cost and effort associated with buy side activities. This e-application can also help an enterprise become more efficient and productive by streamlining the procurement process and eliminating purchasing bottlenecks. This solution not only eliminates purchasing delays but it positions enterprises to respond faster to change and to capitalize on e-business opportunities.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

e-Store. This e-business storefront solution offers a cost-effective way to expand an enterprise's market by providing around-the-clock access to web-based ordering. e-Store acquires and retains customers', employees' and distributors' access to catalog information, pricing, product availability and order status. The solution can give users authority to create or change customer orders, or may be restricted to inquiries.

e-Expenses. This paperless workflow solution enables employees to submit expense reports via the Internet, document receipts via fax and merge receipts and electronic documents. By giving employees access into expense status at all stages of the processing cycle (routing, approval and payment) and by supplying company management with a systemwide look into expense behavior, the e-Expenses solution offers a new level of control over and accountability for the cost of the function.

e-Forms. E-Forms provides the ability to route specific forms, such as purchase requisitions, purchase orders, invoices, and acknowledgments via e-mail or fax. We believe that e-forms offers an effective, easy-to-use communication channel to external trading partners. e-Forms provides a secure, self-service link between non-host users and purchasing, requisitioning, accounts payable, accounts receivable, customer order processing and manufacturing systems. Using e-mail, fax and XML/FTP gateways, this solution's workflow engine routes documents from host applications. The review, approval and update loop uses HTML formatting and receives instructions interactively.

e-Payables. This module streamlines administrative processes regarding purchases online not using purchase orders, enabling users to cost-effectively transact business from any location at any time. Using the Internet or internal intranets, e-Payables provides a secure interface into an accounts payable system.

Table of Contents

e-Receivables. This solution is designed to supply account information online to an enterprise's customers. e-Receivables can help improve cash flow, reduce the cost of financing sales and, by automating routine tasks such as customer queries, enable strategic focus on profit creation and reduce time demands on customer service representatives.

Purchase Order Tracking and Vendor Collaboration. Companies that source globally may experience problems communicating with distant suppliers. This module combines some of the features of e-Procurement and e-Forms with the ability to negotiate delivery schedules. The system allows buyers to electronically send purchase orders to suppliers, receive acknowledgments into a secure web site, then communicate and negotiate delivery schedules via a secure web site. It uses E-mail alerts extensively to notify buyers and suppliers of changes to requirements and schedules.

e-Connect. We designed this solution to enable the exchange of XML-enabled data. e-Connect provides the link to extend the ERP back-office software to the Web and to enable users to interact with the ERP software via the web. e-Connect also enables the interactive communication between Web applications, marketplaces, trading exchanges, suppliers, B2B transactions and the back office ERP systems.

New Generation Computing, Inc.

New Generation Computing (NGC) is our wholly-owned subsidiary that provides product solutions for both retailers and manufacturers in the Apparel and Sewn Products Industry by providing functionality that allows customers to improve efficiencies, lower operating costs, reduce supply chain time, meet complex customer requirements, improve supply chain visibility, improve inventory management, and reduce production costs. NGC's solutions include an Apparel Specific Enterprise Resource Planning System (AMAS), Shop Floor Control and Incentive Payroll System (TPM), Import Management System (IMS), Electronic Data Interchange (EDI), Full Package Management System (FMS), EZ-Ship Packing and Shipping System for Remote Factories (EZ-Ship), and our Internet Sourcing and Supply Chain Visibility system (eSPS). All products are completely integrated or can be implemented individually.

AMAS This integrated, high performance software package is specifically designed for companies producing sewn products (apparel, handbags, shoes, hats, bedspreads, accessories, and other sewn products). Whether companies make to order, produce in advance, import finished goods or a combination of the three, AMAS provides a high performance, cost-effective solution. AMAS is a comprehensive management system that includes sales, distribution, finance, production planning, administration, accounting, EDI and much more, such as:

Powerful order entry and allocation

Invoicing and accounts receivable, including factoring

Finished goods inventory with comprehensive Cut and Sold analysis

Fabric and trims inventory (includes optional roll and dye lot control)

Numerous sales analysis profiles

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Powerful and Flexible Bill of Materials

Material requirements planning, including time-phased analysis

Purchasing and Receiving control system

Accounts Payable, with check reconciliation

General Ledger, including up to 20 companies with consolidation

Electronic Data Interchange (EDI)

807/9802 Remote Plant Tracking and Control System

Import Management System with Letters of Credit and Landed Costing

Production Planning including plant level capacity planning options

Table of Contents

Available on a wide range of personal computers and high performance networks

Available on DOS, Novell, Windows95, and Windows NT

TPM is a shop floor control software system, designed for any business that is producing sewn products. Bar-coded coupons permit rapid entry of daily production and payroll data. After scanning the coupons into TPM, TPM generates reports and inquiries to track employee performance, calculate payroll for incentive and non-incentive employees, display the status of work-in-process (WIP) and assist with plant loading. Other methods of data collection are available, including modular monitoring and real time WIP data collection. Bar-coded coupons and bundle/container control. Other features of TPM include:

Supports modular, progressive bundling, piece rate, salary, and hybrid pay methods

Unlimited user-defined Off-Standard paycodes and methodologies

Extensive WIP and Operator Analysis, including Skills Inventories

Training curves and jump base tables for flexible pay plans

Bi-lingual English and Spanish system

Lot Tracking System

Computerized Time Clock Interface

Hand Held Data Collection Interface

Interface to GSD Labor Costing

Plant Loading

Real Time Systems

Available on Personal Computers

Available on DOS, Novell, Windows 95, and Windows NT

IMS The Import Management System controls factory orders from the issue of purchase orders, through Letter of Credit requests, issues, tracking and release. Additionally, the system tracks factory orders and shipments to the distribution center while recording estimated and actual costs for each factory order. We designed the Import Management System for any business engaged in the importing of finished products and businesses

using letters of credit. Other features of IMS include:

Tracks import factory orders

Tracks and manages letters of credit

Tracks factory shipments

Records import costing

EDI EDI Orders and Invoices interfaces to NGC's Customer Order Processing Module and Invoicing and Accounts Receivable Modules. This software product accepts electronic customer orders and updates them automatically into the NGC Customer Order Processing Module. The EDI customer order data is translated under program control into the NGC database to create customer orders. It provides a comprehensive audit/validation process to check EDI order information prior to posting into the Customer Order file.

EDI Orders and Invoices are a key ingredient of an overall quick response strategy. Significant savings are possible by eliminating manual data entry and printed invoices which require time and postage to deliver. These EDI facilities can provide a rapid return on investment through improved customer service and internal efficiency gains.

Table of Contents

FMS Full Package production has become an important part of the overall sourcing strategy for many apparel manufacturers. A Full Package environment includes many business activities beyond the sewing process. FMS has been created to address these multiple and complex business processes. Some of the Business Processes encompassed in the bilingual (Spanish and English) FMS system are:

Purchasing and receiving

Fabric inventory

Trim inventory

Bills of material

Requirements planning

Accounts payable

Order processing

Cut processing

Finished goods inventory

Invoicing

Accounts receivable

Quality control

Electronic data interchange (EDI)

Bar-coded carton labels and electronic Advance Ship Notices (ASN s)

Production Planning

Factory tracking for control of local and remote production facilities

Import utility for cut/order data from manufacturer s ERP system

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Production control and bar-coded payroll system

Interface to Web-based e-SPS

All current versions of Windows and Novell

EZ-Ship facilitates a global sourcing strategy for companies producing sewn products around the world. This multi-lingual system allows for shipping to multiple distribution centers or customers from factories, contractors and suppliers. EZ-Ship supports unlimited ASN and label formats, thereby giving remote shipping sites greater flexibility. EZ-Ship uses a standard import/export data set to easily integrate with most ERP or Distribution Center system. EZ-Ship also integrates with NGC's Shop Floor Control System (TPM) and NGC's Internet Sourcing and Production System (e-SPS). EZ-Ship utilizes a web-enabled FTP data exchange utility to easily facilitate data transfer between host and remote systems. Other features of EZ-Ship include:

Scans UPC labels

Creates/scans UCC-128 labels

Advanced ship notices (ASNs)

Manifests

Table of Contents

Commercial invoices

Bills of lading

Validates carton and shipment accuracy

Carton-level quality

e-SPS NGC has designed *e-SPS* to provide a wide range of supply chain management solutions over the Internet. *e-SPS* is a powerful software application for companies producing and sourcing products around the world. Users include retailers, apparel manufacturers, brand managers, contractors, agents, brokers, and logistics providers. *e-SPS* users around the world only need a web browser to use and update the system. *e-SPS* employs secure hierarchical views to select data that is appropriate for each user. It creates Triggers and Alerts automatically based on events defined in the Time and Action calendars, Business Processes and other specific collaboration issues. Barcode labels and ASNs facilitate distribution channel receipts. *e-SPS* provides end-to-end visibility into the Supply Chain from product inception to distribution channel reception, all in real time. Several industry leading companies have successfully implemented this product including Kellwood Corporation, Wilson's Leather, Ralph Lauren Childrenswear, William Carter Company and Russell Corporation. *e-SPS* features include:

Specification Creation and Delivery

Product Development Tracking

Request For Quotation and Bid Exchange

Pre-Production Calendaring

Create POs and/or interface to ERP Systems

Supplier/Factory order acknowledgements/confirmations

Tracks the progress of orders (Routes, Stages, and Milestones)

Supplier/Factory Scorecards based on performance standards

Capture quality data and facilitate the early detection of quality problems

Scan, pack, barcode, and ship the product with ASNs

Track the logistics of the shipments

Identify and collaboratively resolve issues

Analyze, evaluate and monitor efficiencies, on-time deliveries, and quality

Exceptional Reporting and Executive Information System

No software is needed at the remote site, only an internet browser

Segment 3 IT Consulting

The Proven Method, Inc.

The Proven Method, Inc. (TPM), our wholly owned subsidiary, is an IT Consulting services firm that specializes in assisting a diverse customer base to solve business issues with custom-developed technology solutions. The Proven Method maintains a fulltime staff of technical specialists and business management consultants with a wide range of technical skills, business applications, and industry experience.

We believe that a key differentiator of The Proven Method is its ability to offer flexibility among potential solutions that are determined by the individual needs of each customer. The solutions it provides can include custom development, third party packages, and the temporary use of project managers and highly skilled technical resources to augment a customer's in-house development team.

Table of Contents

The cross industry and cross platform experience that TPM has acquired over the years enables it to provide services to virtually any type or size company.

The Proven Method's customers typically benefit from our services in one of three ways:

1. Smaller and emerging firms rely on The Proven Method to serve in lieu of an in-house application development group. We provide these firms with the management and technical resources necessary to deliver custom-developed solutions.
2. Midsize companies will typically outsource complete application development projects to The Proven Method, particularly when their internal technical personnel face a combination of critical timing and heavy backlog.
3. Any size company can rely on The Proven Method to provide supplemental technical personnel when the need arises for a skill or technical discipline that they may not currently possess or, if they simply need more of a particular set of skills required to complete large development projects.

The Proven Method has worked with customers such as IBM, Georgia Tech Research Institute, Kubota Manufacturing of North America, Home Depot, BellSouth and numerous small to midsize companies.

Company Strategy

The objective of American Software is to become a leading provider of enterprise-wide solutions to mid-market distributors and manufacturers. Our strategy includes the following key elements:

Leverage and Expand Installed Base of Customers. We currently target businesses in the consumer goods, chemicals and pharmaceuticals, food and beverage, apparel and sewn products, and oil and gas industries. We intend to continue to leverage our installed base of more than 500 customers to introduce additional functionality, product upgrades, and complementary modules. In addition, we intend to expand sales to new customers in our existing vertical markets and to target additional vertical markets over time.

Continue to Expand Sales and Marketing. Our Logility subsidiary intends to continue to pursue an increased share of the market for supply chain management software solutions by expanding our sales and marketing activities. We believe our competitive advantage includes providing a rapid implementation, easy-to-maintain configuration, and quick time-to-benefit across the full spectrum of supply chain operations. We intend to continue building a direct sales force that is focused on selected vertical markets, such as consumer goods, retail and manufacturing supply chains.

Expand Indirect Channels to Increase Market Penetration. We believe that key relationships with value added resellers will increase sales and expand market penetration of our products and services. For example, during fiscal 2002, Logility established a relationship with SSA Global Technologies to market, sell, implement and support components of the *Logility Voyager Solutions* suite as the *BPCS Collaborative Commerce Suite powered by Logility*.

Invest Aggressively to Build Market Share. We will continue to invest to expand our sales force, research and development efforts, and consulting infrastructure, balanced with our goal of increasing profitability, as needed. We believe these investments are necessary to increase our market share and to capitalize on the growth opportunities in the market.

Acquire or Invest in Complementary Businesses, Products and Technologies. We believe that select acquisitions or investments may provide opportunities to broaden our product offering to provide more advanced solutions for our target markets. We will evaluate acquisitions or investments that will provide us with complementary products and technologies, expand our geographic presence and distribution channels, extend our presence into other vertical markets with similar challenges and requirements of those we currently meet or further solidify our leadership position within the supply chain management market.

Maintain Technology Leadership. We believe that we are a technology leader in the field of supply chain management software solutions and intend to continue to provide innovative, advanced solutions and services to this market. We believe that we were one of the earliest providers of supply chain planning software solutions on a client-server platform, and the first to introduce a supply chain planning software solution that operates over the Internet. We intend to continue to develop and introduce new or enhanced products and keep pace with technological developments and emerging industry standards.

Table of Contents

Implement E-Business Strategy. We have launched an e-Business initiative that will enable us to build on current applications while moving toward total Internet-based value chain management. Our e-Business strategy includes products and services designed to enable the optimization of the customer's supply chain and improve collaboration. In launching this initiative, we intend to do the following:

Continue to develop and sell *e-Intelligence* capabilities that capitalize on the speed and flexibility of the Internet with the collaborative planning and logistics capabilities of the software.

Continue to develop and sell the *e-application* products that leverage the Internet to improve processes and communications.

Focus on Integrated Planning and Logistics Execution Solutions. We believe we are one of the few providers of integrated supply chain management software solutions addressing demand and supply planning as well as transportation and warehousing logistics requirements. We are focusing on providing the most comprehensive planning and execution solution aimed at optimizing operations along the supply chain. We intend to continue focusing our development initiatives on enhancing our end-to-end solution and introducing additional capabilities that complement an integrated solution.

Focus on Mid-Market. We have defined as Mid-Market those corporations or divisions of corporations that have annual revenues ranging from \$200 million to \$4 billion. Organizations of this size fit our historical customer profile, and are prime candidates for the purchase and use of our unique full suite of integrated products.

Increase Penetration of International Markets. In the fiscal year ended April 30, 2003, we generated 11% of our total revenues from direct international sales and established marketing relationships with a number of international distributors. We intend to expand our international presence by using our direct sales personnel to address international markets and creating additional relationships with distributors in Europe, Latin America and the Asia/Pacific region.

Expand Strategic Relationships. Logility intends to expand the depth and number of strategic relationships with leading enterprise software, systems integrators and service providers to integrate the *Logility Voyager Solutions* suite into their services and products and to create joint marketing opportunities. Logility has a number of marketing alliances, including those with IBM and SSA Global Technologies. In addition, Logility has developed a network of international agents who assist in the sale and support of its products. Logility intends to utilize these and future relationships with software and service organizations to enhance its sales and marketing position.

Continue to Focus on Providing High Quality Customer Service. Providing high quality customer service is a critical element of our strategy. We intend to continue to invest in technology and personnel to accommodate the needs of our customer base.

There can be no assurance, however, that we will be successful in implementing the strategy outlined above.

Table of Contents**Customers**

We primarily target businesses in the apparel, consumer-packaged goods, chemicals, pharmaceuticals, industrial products and other manufacturing industries. During fiscal 2003, one customer accounted for 11% of our total revenues. A sample of companies that have purchased one or more of our products or services is as follows:

Consumer	Chemicals, Oil & Gas,	Manufacturing
Packaged Goods	Pharmaceuticals	and Others
Ashley Furniture	ALZA Corporation	Appleton Paper
Aurora Foods	Beyschlag Centralab Component	Cintas
Bausch & Lomb	BOC Distribution Services	Corning Cable Systems
Bell Sports	CITGO Petroleum Corporation	Crown Crafts, Inc.
Boots The Chemists	Eastman Chemical Company	Dal-Tile Corporation
Canandaigua Wine Company	Gulf Petrochemical	IBM/Synertech
Coca-Cola Company	IMC Global	Koch Industries
Columbia Sportswear Company	Kaiser Foundation	Magneti Marelli
ConAgra, Inc.	Nordic Synthesis AB	Mercury Marine
Elizabeth Arden Inc.	Noxpro St. Gobain	Mohawk Industries
Haggar Clothing Company	PDVSA	Mohawk Paper
Haverty Furniture Company	Pfizer, Inc.	Peugeot International
Heineken USA	Sigma-Aldrich Corporation	Newell Company
Hugo Boss		Rand McNally & Company
Huhtamaki UK	Telecommunications	Raytheon Marine Company
L Oreal USA	Verizon	RJ Reynolds
Maybelline, Inc.	Sprint PCS	Robert Horne Paper Company
McCormick & Company		Russell Corporation
Mills Pride	Utilities	Shaw Industries
Nestle France	Alabama Gas Corporation	Siecor
Pharmavite Corporation	Allegheny Power Corporation	Snap On, Incorporated
Perry Ellis International	Florida Power & Light	Subaru of America, Inc.
Pernod-Ricard	Saudi Consolidated Electric	Tyco Plastics and Adhesives
Polo Ralph Lauren	Texas Utilities	Union Camp
Ralph Lauren Childrenswear		Wells/Bloomfield
Sara Lee Knit Products	After Market Distribution	Weyerhaeuser
Saks Incorporated	Donaldson	xpedx
S.C. Johnson & Sons Inc.	Epson America, Inc.	
The Coca-Cola Company	Komatsu	
The Franklin Mint	Porsche Cars of North America, Inc.	
Tiffany & Company	Rheem Manufacturing	
VF Corporation	Sony Electronics	
Williamson-Dickie Manufacturing		

We typically experience a slight degree of seasonality with regards to a slowing of services revenues during the annual winter holiday season, which occurs in the third quarter of our fiscal year. The extent of our backlog is accounted for in deferred revenues (refer to note 1(b) in Notes to Consolidated Financial Statements). We are not reliant on government customers.

Integrated System Design

While customers can use our software applications individually, we have designed them to be combined as integrated systems to meet unique customer requirements. The user may select virtually any combination of modules to form an integrated solution for a particular business problem. The license for such a solution could range from one single module to a multi-module, multiple-user solution incorporating the full range of our products.

Customers frequently require services beyond those provided by our standard support/maintenance agreement. To meet those customers' needs, we established a separate professional services division that provides specialized business and software implementation consulting, custom programming, on-site installation, system-to-system interfacing and extensive training. We provide these services, frequently referred to as systems integration services, for an additional fee normally under a separate contract, based upon time and materials utilized.

Table of Contents

Marketing And Sales

We market our products through direct and indirect sales channels. We conduct our principal sales and marketing activities from corporate headquarters in Atlanta, Georgia, and have sales and/or support offices in Boston, Chicago, Dallas, and Pittsburgh. We manage sales channels outside of North America from our international offices in the United Kingdom, France, and Spain.

In addition to the Marketing License Agreement between American Software and Logility, discussed in Item 13 of this Report, Logility has a number of marketing alliances, including those with IBM, Insight, Microsoft Great Plains, New Breed, and SSA Global Technologies. Generally, these marketing alliance agreements provide the vendors with non-exclusive rights to market our products and access to our marketing materials and product training. Some highlights of these agreements are as follows:

IBM Logility entered into an agreement with IBM in 2000 pursuant to which it modified its Supply Chain products, with IBM's technical and financial assistance, to operate with IBM's eServer iSeries (AS/400) platform. Also, Logility agreed to market and support the IBM-compatible Supply Chain products that resulted from our efforts. IBM may also market our Supply Chain products and refer potential customers to Logility.

SSA Global Technologies In November 2001, Logility granted SSA Global Technologies (SSA) a worldwide, non-exclusive license to name, package, market, distribute and supply the *Logility Voyager Solutions* suite as *BPCS Collaborative Commerce powered by Logility*. The agreement terminates November 16, 2004, but may be automatically renewed for successive one-year terms. In exchange, SSA agreed to use all reasonable efforts to promote and sell the software. In fiscal 2003, Logility and SSA amended this agreement to provide for a minimum net license fee commitment of \$1 million to be paid to Logility during Fiscal Year 2004.

In addition to these marketing alliances, we have developed a network of international agents who assist in selling our products in 12 countries. We intend to utilize these and future relationships with software and service organizations to enhance our sales and marketing position. These independent distributors and resellers located in Central America, Europe and the Asia/Pacific region distribute our product lines in foreign countries. These vendors typically sell their own consulting and systems integration services in conjunction with licensing our products.

To support our direct sales force, we conduct marketing programs that include public relations, direct marketing, advertising, trade shows, product seminars, industry speakers, user group conferences and ongoing customer communication programs.

The price for our products typically is determined based upon the number of modules licensed and the number of servers, users and sites for which the solution is designed. During the fiscal year ended April 30, 2003, license fees generally ranged from approximately \$50,000 to \$1 million.

Licenses

Like many business application software firms, we typically enter into license agreements that grant non-exclusive rights to use our products. Our standard license agreements contain provisions designed to prevent disclosure and unauthorized use of our software. These agreements warrant that our products will function in accordance with the specifications set forth in our product documentation. These licenses generally limit the use of the software to a specific number of individual users and servers for a one-time fee. A significant portion of the license fee is

generally payable upon the delivery of product documentation, with the balance due upon installation.

Services and Support

We offer a full range of services that allow our customers to maximize the benefits of our software products including: project management, implementation, product education, technical consulting, programming, system integration, network management and maintenance and support. The customer receives documentation manuals or imbedded help software, which describe the system's features and its method of operation. We continually enhance and improve our software products to accommodate technological changes and other factors that may affect the customer's information requirements. We price our services separately, and generally do not include fees for our services in the price of our software products. To receive maintenance and enhancements from us customers must pay fees that are based on a percentage of the then-current price of the product.

As a part of our support service, we provide experienced application and data processing personnel to answer telephone inquiries on a 24-hours-a-day, seven days-a-week basis, and furnish consulting support in implementing and maintaining our systems. In addition, we make training courses and documentation materials available to train personnel and update them on new system features.

Table of Contents

Research and Development

We are committed to the development and acquisition of new products and to the continued enhancement of our existing products. We expensed approximately \$5,116,000 for research and development in fiscal 2003, \$7,209,000 in fiscal 2002, and \$11,340,000 in fiscal 2001. In addition, we capitalized \$2,978,000 in software developments during fiscal year 2003, \$3,288,000 in fiscal 2002, and \$3,949,000 in 2001 in accordance with the Statement of Financial Accounting Standards No. 86, *Accounting for the Cost of Computer Software to Be Sold, Leased or Otherwise Marketed*. Our internal product development and enhancements of existing products include two categories: research and development expenditures and additions to capitalized computer software development costs. These combined categories totaled \$8,094,000 in fiscal 2003, \$10,497,000 in fiscal 2002, and \$15,289,000 in fiscal 2001, and represented 14% of total revenues in fiscal 2003, 16% of total revenues in fiscal 2002, and 21% of total revenues in fiscal 2001.

We believe that our future success depends in part upon our ability to continue to enhance existing products, respond to changing customer requirements, develop and introduce new or enhanced products and keep pace with technological developments and emerging industry standards. We focus our development efforts on several areas, including, but not limited to, enhancing operability of our products across distributed and changing heterogeneous hardware platforms, operating systems and relational databases and adding functionality to existing products. These development efforts will continue to focus on deploying applications within a multi-tiered supply chain environment, including the Internet.

We believe that our client/server and Internet-based solutions, which utilize the latest technologies, will be important for our long-term growth. As of April 30, 2003, we employed 84 persons in product research, development and enhancement activities.

Competition

The market for enterprise applications is intensely competitive, rapidly changing and significantly affected by new product offerings and other market activities. In the application software market, we compete with a variety of software vendors including:

internet application vendors in the enterprise application software market segment;

vendors in the manufacturing software application market segment;

vendors in the emerging enterprise resource optimization software solutions market segment;

providers of human resource management system software products;

providers of financial management systems software products;

internal development efforts by Corporate Information Technology departments; and

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

numerous other firms that offer products and services with new or advanced features.

In particular, approximately six firms that market mainframe application software products and over thirty firms that market midrange and client/server application software products are significant competitors for one or more of our products.

As a result, the market for business application software and related services has been and continues to be intensely competitive. Some competitors have become more aggressive with their prices and payment terms and issuance of contractual implementation terms or guarantees. We may be unable to continue to compete successfully with new and existing competitors without lowering prices or offering favorable terms. In addition, we believe we must differentiate ourselves through architectural and technological factors.

Some of our competitors may have an advantage over us due to their:

significant worldwide presence;

longer operating and product development history;

substantially greater financial, technical and marketing resources than ours; and

larger installed base.

Table of Contents

Furthermore, potential customers may consider outsourcing options, including application service providers, data center outsourcing and service bureau as viable alternatives to licensing our software products.

We believe that purchasers of software products when comparing our products and services to those of our competitors, are principally concerned with the range of product modules available, ease of integration, variety of features, performance, simplicity of use, documentation, technical support and training. We further believe that our software products and services are competitive in these areas. Price considerations are a key factor and we believe our pricing is competitive. We believe the continuing market trend to open systems, allowing software to operate across hardware platforms, will increase the number of competitors and intensity of competition. We believe that it is necessary for us to expend significant development funds annually to remain competitive in the marketplace.

Proprietary Rights and Licenses

We seek to protect our proprietary interest in software products and trade secrets. We maintain non-disclosure and confidentiality agreements and other contractual arrangements with customers, consultants, employees and others. While we cannot assure the strict enforceability of such agreements, we believe that they provide a deterrent to the use of information that may be proprietary to us. In the event of any breach of such agreements, we intend to take appropriate legal action. We copyright our programs and software documentation related to these programs. The source code for our proprietary software is protected as a trade secret and as a copyrighted work. Generally, copyrights on our products expire 95 years after the year of first publication of each product. We enter into confidentiality or license agreements with our employees, consultants and customers and control access to and distribution of our software, documentation and other proprietary information. In addition, we have registered certain trademarks and other trademarks have registration applications pending.

We provide our software products to customers under non-exclusive license agreements. As is customary in the software industry, in order to protect our intellectual property rights, we do not sell or transfer title to our products to our customers. Although the license agreements place restrictions on the customer's use of our products, unauthorized use of our products nevertheless may occur.

Existing copyright laws afford only limited protection of our intellectual property. Moreover, the laws of some countries in which our software products are or may be licensed do not protect our software products and intellectual property rights to the same extent as the laws of the United States. We believe that the rapid technological change in the computer software industry has made trade secret and copyright protection less significant than factors such as the knowledge, ability and experience of our employees, frequent software product enhancements and the timeliness and quality of our support services.

Despite measures we have taken to protect our proprietary rights, unauthorized parties may attempt to reverse engineer or copy aspects of our products or to obtain and use information that we regard as proprietary. Policing unauthorized use of our products is difficult and expensive. In addition, litigation may be necessary to enforce our intellectual property rights to the extent that unauthorized parties may attempt to reverse engineer or copy aspects of our products or obtain and use information that we regard as proprietary. Such litigation could result in substantial costs and diversion of resources and could have a material adverse effect on our business, operating results and financial condition.

In the future, we may increasingly be subject to claims of intellectual property infringement as the number of products and competitors in our industry segment grows and the functionality of products in different industry segment overlaps. There can be no assurance that third parties will not claim infringement by us with respect to current or future products. Any such claims against us, with or without merit, can be time consuming and expensive to defend, prosecute or resolve. Moreover, an adverse outcome in litigation or similar adversarial proceedings could subject us to significant liabilities to third parties, require the expenditure of significant resources to develop non-infringing technology, require

a substantial amount of attention from management, require disputed rights to be licensed from others, require us to enter into royalty arrangements or require us to cease the marketing or use of certain products, any of which could have a material adverse effect on our business, operating results and financial condition. To the extent that we are required to obtain licenses to patents or proprietary rights of others there can be no assurance that any such licenses will remain acceptable to us, if at all.

Employees

As of April 30, 2003, we had 308 full-time employees, including 84 in product research, development and enhancement, 37 in customer support, 108 in professional services, 46 in marketing, sales and sales support, and 33 in accounting, facilities and administration. We believe that our continued success will depend in part on our ability to continue to attract and retain highly skilled technical, marketing and management personnel, who may be in great demand.

Table of Contents

We have never had a work stoppage and no employees are represented under collective bargaining arrangements. We consider our employee relations to be excellent.

ITEM 2. PROPERTIES

Our corporate headquarters are located in an approximately 100,000 square foot office building that we own, at 470 East Paces Ferry Road, N.E., Atlanta, Georgia. We own a four-story 42,000 square foot building at 3110 Maple Drive, a one-story 1,400 square foot building at 3116 Maple Drive and a one-story 14,000 square foot building at 3120 Maple Drive, each in Atlanta, Georgia.

We lease a two-story, 17,500 square foot building at 443 East Paces Ferry Road, N.E., Atlanta, Georgia, which is used primarily for one subsidiary, The Proven Method and financial administration. This building is owned by a limited partnership of which Thomas L. Newberry and James C. Edenfield, principal shareholders of American Software, are the sole partners. The term of the lease expired December 31, 1996, and has been continued on a month-to-month basis with a current base rental rate of \$17.00 per square foot.

We lease approximately 30,175 square feet of office space in the United Kingdom. We have also entered into leases for sales offices located in various cities in the United States and overseas. Normally, these leases are for terms of less than five years and average 3,000 square feet of leasable space.

ITEM 3. LEGAL PROCEEDINGS

Many of our installations involve products that are critical to the operations of our clients' businesses. Any failure in our products could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to limit contractually our liability for damages arising from product failures or negligent acts or omissions, there can be no assurance that the limitations of liability contained in our contracts will be enforceable in all instances. We are not currently a party to any material legal proceeding that would require disclosure under this Item.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of shareholders during the fourth quarter of our recently completed fiscal year.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS****Trading Market**

Our Class A Common Shares are listed on the Nasdaq Stock Market National Market under the symbol AMSWA. As of July 11, 2003, there were approximately 8,025 holders of record of Class A Common Shares, some of whom are holders in nominee name for the benefit of different shareholders, and two holders of Class B Common Shares.

Market Price Information

The table below presents the quarterly high and low sales prices for American Software, Inc. Class A common stock as reported by NASDAQ, for the Company's last two fiscal years (2003 and 2002).

	<u>High</u>	<u>Low</u>
Fiscal Year 2003		
First Quarter	\$ 3.80	\$ 2.50
Second Quarter	3.14	2.10
Third Quarter	3.07	2.38
Fourth Quarter	4.10	2.70
Fiscal Year 2002		
First Quarter	\$ 2.00	\$ 1.39
Second Quarter	2.28	1.05
Third Quarter	3.01	1.35
Fourth Quarter	3.80	2.53

Equity Compensation Plans

The following table discloses information regarding the Company's equity compensation plans as of April 30, 2003:

<u>Plan Category</u>	<u>Number of Securities to be issued upon exercise of outstanding options, warrants and rights</u>	<u>Weighted-Average exercise price of outstanding options, warrants and rights</u>	<u>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in the first column)</u>

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Equity Compensation Plans approved by security holders	4,918,276	\$	3.18	783,991
Equity Compensation Plan not approved by security holders ⁽¹⁾	24,000	\$	2.77	-0-

⁽¹⁾ This represents a single warrant grant to a consultant pursuant to an agreement in February 2003. As of April 30, 2003, only 4,000 shares were earned and exercisable.

Dividends

We have not paid dividends on our Class A and Class B Common Shares during the past three fiscal years. On July 9, 2003, the Board of Directors approved a dividend payment policy, declaring an initial quarterly cash dividend of \$.06 per share, payable on our Class A and Class B Common Shares on or about September 19, 2003. We currently expect to declare and pay cash dividends at this level on a quarterly basis in the future. The continuation of this policy, and payment of future cash dividends, will be at the sole discretion of the Board of Directors. In exercising this discretion, the Board of Directors will consider our profitability, financial condition, cash requirements, future prospects and other factors that the Board of Directors deems relevant.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The following discussion and analysis should be read in conjunction with Item 6. Selected Consolidated Financial Data and Item 8. Financial Statements and Supplementary Data. This discussion contains forward-looking statements relating to our future financial performance, business strategy, financing plans and other future events that involve uncertainties and risks. You can identify these statements by forward-looking words such as anticipate, intend, plan, continue, could, grow, may, potential, predict, strive, estimate, believe, expect, and similar expressions that convey uncertainty of future events or outcomes. Any forward-looking statements herein are made pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995. Our actual results could differ materially from the results anticipated by these forward-looking statements as a result of many known and unknown factors that are beyond our ability to control or predict, including but not limited to those discussed below in Factors Affecting Future Performance and elsewhere in this report. See also Special Cautionary Notice Regarding Forward-Looking Statements at the beginning of Item 1. Business.

The terms fiscal 2003, fiscal 2002, and fiscal 2001 refer to our fiscal years ended April 30, 2003, 2002, and 2001.

Critical Accounting Policies and Estimates

We have based the following discussion and analysis of financial condition and results of operations on our consolidated financial statements, which we have prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Note 1 in the Notes to the Consolidated Financial Statements for the fiscal year ended April 30, 2003, describes the significant accounting policies that we have used in preparing our consolidated financial statements. On an ongoing basis, we evaluate our estimates, including, but not limited to, those related to bad debts, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results could differ from these estimates under different assumptions or conditions.

We believe the critical accounting policies listed below affect significant judgments and estimates used in the preparation of the consolidated financial statements.

Revenue Recognition. We recognize revenue in accordance with Statement of Position (SOP) 97-2, *Software Revenue Recognition*, and SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition with Respect to Certain Transactions*. We recognize license revenues in connection with license agreements for standard proprietary and tailored software upon delivery of the software, provided collection is considered probable, the fee is fixed or determinable, there is evidence of an arrangement, and vendor specific objective evidence exists with respect to any undelivered elements of the arrangement. Maintenance fees are generally billed annually in advance and the resulting revenues are recognized ratably over the term of the maintenance agreement. Revenues derived from services primarily include consulting, implementation, and training. Fees are billed under both time and materials and fixed fee arrangements and we recognize them as we perform the services. Deferred revenues represent advance payments or billings for software licenses, services, and maintenance billed in advance of the time revenues are recognized. Revenues from sales of third party products are recorded net of royalties, in accordance with Emerging Issues Task Force Issue 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*.

Generally, our software products do not require significant modification or customization. Installation of the products is normally routine and is not essential to the functionality of the product. Our sales frequently include maintenance contracts and professional services with the sale of our software licenses. We have established vendor-specific objective evidence of fair value (VSOE) for our maintenance contracts and professional services. We determine fair value based on the prices we charge to customers when we sell these elements separately. Maintenance revenues, including those sold with the initial license fee, are deferred based on VSOE, and recognized ratably over the maintenance contract period. We recognize consulting and training service revenues, including those sold with license fees, as we perform the services based on their established VSOE. We determine the amount of revenue we allocate to the licenses sold with services or maintenance using the residual method of accounting. Under the residual method, we allocate the total value of the arrangement first to the undelivered elements based on their VSOE, and allocate the remainder to license fees.

Allowance for Doubtful Accounts. We maintain allowances for doubtful accounts for estimated losses resulting from the inability of customers to make required payments. If the financial condition of these customers were to deteriorate, resulting in an

Table of Contents

impairment of their ability to make payments, we may need to establish additional allowances or defer additional revenue until collection becomes probable. We specifically analyze accounts receivables and analyze historical bad debts, customer creditworthiness, current economic trends and changes in customer payment terms when we evaluate the allowance for doubtful accounts.

Valuation of Long-Lived and Intangible Assets. In accordance with Financial Accounting Standards Board Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS No. 144) and Statement No. 86, *Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed* (SFAS No. 86), we review the carrying value of intangible assets and other long-lived assets (asset group), including, but not limited to, capitalized computer software development costs, on a regular basis for the existence of facts or circumstances that may suggest impairment. Factors we consider important that could trigger an impairment review include:

significant underperformance relative to historical or projected future operating results;

significant negative industry or economic trends;

significant decline in our stock price for a sustained period;

significant decline in our technological value as compared to the market; and

our market capitalization relative to net book value.

If such circumstances exist, we evaluate the carrying value of long-lived assets (asset group) to determine if impairment exists based upon estimated undiscounted future cash flows over the remaining useful life of the assets and comparing that value to the carrying value of the assets. If the carrying value of the asset is greater than the estimated future cash flows, we write down the asset to the net realizable value for software or the estimated fair value for other long-lived and intangible assets. We determine the estimated fair value of the assets on a projected discounted cash flow method using a discount rate that we determine to be commensurate with the risks inherent in our current business model. In determining expected future cash flows, we group assets at the lowest level for which cash flows are identifiable and independent of cash flows from other asset groups. We estimate cash flows using appropriate and customary assumptions and projections.

Income taxes. We recognize deferred tax assets and liabilities based on the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their tax bases. We measure deferred tax assets and liabilities using statutory tax rates in effect in the year in which we expect the differences to reverse. We establish a deferred tax asset for the expected future benefit of net operating loss and credit carry-forwards. Under Statement of Financial Accounting Standards No. 109 (SFAS No. 109),

Accounting for Income Taxes , we cannot recognize a deferred tax asset for the future benefit of our net operating losses, tax credits and temporary differences unless we can establish that it is more likely than not that the deferred tax asset would be realized. Due to our history of net losses, we have not recognized a tax asset and have recorded a full valuation allowance against our otherwise recognizable deferred tax asset, in accordance with SFAS No. 109. Future events could cause us to conclude that it is more likely than not that we will realize a portion of the deferred tax asset. Upon reaching such a conclusion, we will reduce the valuation allowance and recognize the deferred tax asset. We have generated taxable income in 2003 and 2002, and if our operating results for 2004 indicate the generation of additional taxable income, we may reduce the valuation allowance in the third or fourth quarter of 2004.

Table of Contents**RESULTS OF OPERATIONS**

The following table sets forth certain revenue and expense items as a percentage of total revenues for the three years ended April 30, 2003, 2002, and 2001 and the percentage increases and decreases in those items for the years ended April 30, 2003 and 2002:

	Percentage of			Pct. Change In

GENERAL MARKET CONDITIONS:

The weakness in the overall economy continued in fiscal 2003 and has resulted in reduced expenditures in the business software market. As a result of these economic conditions and increased competition in the business application area, we restructured our business in the first half of fiscal 2001 in order to become profitable, which we achieved in the fourth quarter of fiscal 2001 and continued in fiscal 2002 and 2003.

Market Conditions by Operating Segment

The revenue trend in our Enterprise Resource Planning (ERP) segment continues to be negative due to multiple factors. Overall Information Technology spending continues to be weak, as many companies were left with limited resources after spending significant amounts preparing systems for Year 2000 conversions. Since 2000, the generally weak economic conditions have prevented companies from replenishing resources needed for capital investment, including investment in information technology, resulting in continued reduced levels of software purchases. Moreover, we face heavy competition in the ERP segment from major software vendors. Lower license fee revenues have resulted in lower services implementation revenues, as well as lower recurring maintenance revenues. Additionally, we have experienced a lower level of maintenance renewal rates from legacy customers in our ERP segment.

In fiscal year 2001 we wrote off \$9.5 million in ERP capitalized software development costs. This charge was taken primarily as the result of lower than anticipated sales of particular ERP products in recent periods and our belief that future cash flows from sales of these particular ERP products would be minimal.

Table of Contents

Our Collaborative Supply Chain Management (SCM) segment is also experiencing a downward trend in revenues due to many of the factors noted as to the ERP segment. Although the SCM market does not include as many strong competitors as the ERP market, constraints on companies' IT budgets have negatively impacted our SCM license fee revenues. Services implementation revenues have trended downward as a result, although we have experienced higher levels of maintenance renewals in the SCM segment than in the ERP segment.

Our IT Consulting segment has experienced an upward trend in revenues in recent years. As companies have moved to cut costs and limit IT budgets, they have utilized more outsourcing services, which tend to be more cost-effective for them. This trend has resulted in increased business for this segment.

We do not segment our business on a geographic basis due to the fact that international revenues have historically averaged only 10-12% of total revenues.

Fiscal Years Ended April 30, 2003 and 2002:

Revenues:

Our total revenues decreased 8% to \$59.3 million in the fiscal year ended April 30, 2003 from \$64.6 million in the fiscal year ended April 30, 2002. This decrease was primarily due to a decrease in implementation and services revenues, and to a lesser extent a decline in maintenance revenues. These declines were partially offset by an increase in license fee revenues. International revenues represented approximately 11% of total revenues in the year ended April 30, 2003, unchanged from 11% of total revenues in the year ended April 30, 2002.

Software Licenses. Our license fee revenues increased 4% in the fiscal year ended April 30, 2003, to \$12.5 million compared to \$12.1 million in the prior year. This increase was primarily due to a 24% increase in license fees for our ERP software products, due primarily to unusually low sales in fiscal 2002, partially offset by a 5% decrease in Logility's license fee revenues, to \$8.0 million compared to \$8.4 million in the prior fiscal year, resulting primarily from slow general economic conditions. Logility's software sales constituted approximately 64% of total license fees in fiscal 2003 and 70% of total license fee revenues in fiscal 2002. Software revenues have fluctuated and we expect them to continue to fluctuate based on competition, demand for our products and general market conditions.

Services. Services revenues, which consist primarily of consulting, implementation, training and network management services, decreased 12% to \$26.9 million in fiscal year 2003 from \$30.7 million in fiscal year 2002. This decrease was primarily a result of a 38% decrease in Logility's fiscal 2003 services revenues, to \$5.9 million, as well as a reduction in consulting and implementation projects, in each case due to lower prior year ERP license fee sales. Services revenues for Logility constituted 22% of total services revenues for fiscal year 2003 and 32% of total services revenues for fiscal year 2002. Services revenues as a percentage of total revenues have fluctuated, and are expected to continue to fluctuate on a period-to-period basis primarily based upon the demand for implementation and consulting services from new license fee sales.

Maintenance. Maintenance revenues arise from product support activities and ongoing product enhancements that we provide to customers who license our products and purchase maintenance agreements. These revenues decreased 9% to \$19.9 million in fiscal year 2003 compared to \$21.9 million in fiscal year 2002. This decrease was due primarily to lower prior period license fee revenues, both in our ERP business and in Logility's business. Maintenance revenues for Logility constituted 55% of total maintenance revenues for fiscal year 2003 and 52% of total maintenance revenues for fiscal year 2002. Maintenance revenues have a direct relationship to current and historic license fee revenues, since

licenses are the source of potential new maintenance customers, as well as renewals for maintenance services; accordingly, maintenance revenues generally will vary in direct proportion to new license sales and renewal rates.

Gross Margin:

Total gross margin was \$31.0 million, or 52% of total revenues, in fiscal 2003, compared to \$38.0 million, or 59% of total revenues, in fiscal 2002. This decrease was due to decreases in both services and maintenance revenues and gross margins, partially offset by an increase in license fee gross margin. Services gross margin decreased to \$8.2 million, or 31% in fiscal 2003, compared to \$12.6 million, or 41% in fiscal 2002, due primarily to the decrease in services revenues, combined with lower margin contracts entered into during the year. Maintenance gross margin decreased to \$14.4 million, or 72% in fiscal 2003, compared to \$18.0 million, or 82% in fiscal 2002, due primarily to movement of personnel from our R&D function to our maintenance function, as well as the lower level of maintenance revenues. License fee gross margin increased to \$8.4 million, or 67% in fiscal 2003, from \$7.5 million, or

Table of Contents

62% in fiscal 2002, due to the increase in license fee revenues and lower software amortization expense. The cost of license revenue consists primarily of amortization of computer software costs, royalties that we pay to solution partners for products we license and third party agent fees for selling our software.

Operating Expenses:

Research and Development. Gross product development costs include all non-capitalized and capitalized software development costs. A breakdown of the research and development costs for the two most recent fiscal years is as follows:

	Years Ended (000 s omitted)		
	April 30, 2003	Percent Change	April 30, 2002
Gross product development costs	\$ 8,094	(23%)	\$ 10,497
Percentage of total revenues	14%		16%
Less: capitalized development	(2,978)	(9%)	(3,288)
Percentage of gross product development costs	37%		31%
Product development expenses	\$ 5,116	(29%)	\$ 7,209
Percentage of total revenues	9%		11%
Total amortization of development costs*	\$ 3,498		\$ 3,946

* Included in cost of license fees.

Gross product development costs decreased 23% in fiscal year 2003 compared to fiscal year 2002 as a result of cost reduction efforts and the reallocation of some research and development resources to services and support. Capitalized development decreased by 9% from a year ago, while the rate of capitalized development increased to 37% from 31% due to the lower level of gross product development costs. Product development expenses as a percentage of total revenues decreased to 9% in fiscal year 2003 compared to 11% in fiscal year 2002 primarily as a result of the reduction in gross development costs.

Sales and Marketing. Sales and marketing expenses consist primarily of compensation of our sales and marketing personnel and direct costs associated with selling programs and marketing campaigns. Sales and marketing expenses decreased 12% to \$11.6 million in fiscal year 2003 as a result of cost containment efforts. Sales and marketing expenses as a percentage of total revenues decreased to 20% for fiscal year 2003 when compared to 21% for fiscal year 2002.

General and Administrative. General and administrative expenses consist primarily of compensation for executive, financial, facilities and administrative personnel, insurance, outside professional and service fees, facility costs, and other items. General and administrative expenses decreased 22% to \$9.3 million in fiscal year 2003 compared to \$11.9 million in the prior year. The decrease was due to the reduction of headcount and related cost control efforts, as well as the discontinuation of amortization of goodwill expense in accordance with SFAS 141 and SFAS 142. Total headcount at April 30, 2003 was 308 compared to 331 at April 30, 2002.

Provision for Doubtful Accounts. For fiscal year 2003 we incurred a charge for doubtful accounts of \$414,000 compared to \$503,000 in fiscal year 2002. In both periods, these charges resulted primarily from difficult customer collections and the overall weakness in the economy.

Other Income/Minority Interest. Other income is comprised predominantly of interest income, gains and losses from sales of investments and changes in the market value of investments. Other income decreased to \$980,000 in fiscal 2003 from \$2.0 million in fiscal year 2002. This decrease is primarily related to the sale of real property in fiscal year 2002, which resulted in a net gain of \$682,000, as well as lower overall yields realized on investment securities in fiscal 2003. Minority interest income (loss) represents that portion of our Logility subsidiary's earnings (loss) not owned by us. Minority interest resulted in a charge of \$306,000 for the twelve months ended April 30, 2003 compared to a charge of \$339,000 for the same period a year ago.

Income Tax Expense (Benefit). There is no effective income tax rate in fiscal years 2003 and 2002 since we had prior period net operating losses to offset the current year income. In *Critical Accounting Policies and Estimates* above, we discuss deferred tax valuation allowance.

Discontinued Operations. Effective February 5, 2002, we sold all of the shares in AmQUEST, Inc., a wholly-owned subsidiary that provides information technology services, business continuity services, and systems and network management services to various industries, to Infocrossing, Inc.. AmQUEST generated losses from operations of approximately \$1,866,000 in fiscal 2002 and \$8,183,000 in fiscal 2001. AmQUEST used cash in its operating, investing, and financing activities totaling approximately \$1,225,000 in fiscal 2002 and \$8,004,000 in fiscal 2001. The gain from discontinued operations, of approximately \$2.1 million in fiscal 2003, was the result of the reduction of contingent liabilities related to capital and operating leases. These liabilities were

Table of Contents

extinguished in the fourth quarter of fiscal year 2003 in accordance with the Company's plan. The gain from discontinued operations in fiscal 2002 was approximately \$11.5 million which included a gain on sale of \$13.4 million offset by a \$1.9 million operating loss during the year. Since AmQUEST generated losses from operations in recent years and was a net user of cash, we believe the sale will have a positive effect on our results of operations, cash flows and liquidity in future periods.

Fourth Quarter of Fiscal Year 2003:

In the fourth quarter of fiscal year 2003, we recorded operating income of \$1.6 million and net income of \$2.4 million. Total revenues decreased 8% over the prior year period, caused primarily by a 12% decrease in license fee revenues, to \$3.4 million, as well as a 10% decrease in services revenues, to \$6.8 million, and to a lesser extent a 4% decrease in maintenance revenues, to \$4.9 million. The decline in license fee revenues was due primarily to decreased ERP license fees. This decline in turn resulted in lower ERP services implementation revenues, as well as lower ERP maintenance revenues.

Fiscal Years Ended April 30, 2002 And 2001:

Revenues:

Our total revenues decreased 9% to \$64.6 million in the fiscal year ended April 30, 2002 from \$71.2 million in the fiscal year ended April 30, 2001. This decrease was primarily due to a decrease in implementation and training services as well as a decline in maintenance revenues. International revenues represented approximately 11% of total revenues in the year ended April 30, 2002 and 12% of total revenues in the year ended April 30, 2001.

Software Licenses. Our license fee revenues decreased 6% in the fiscal year ended April 30, 2002 to \$12.1 million compared to \$12.8 million in the prior year. This decrease was primarily due to a 14% decrease in license fees for our ERP software products due to increased competition and slower technology spending in the marketplace. In addition, Logility's license fee revenues decreased to \$8.4 million in the fiscal year ended April 30, 2002 compared to \$8.6 million in the prior fiscal year. Logility's software sales constituted approximately 70% of total license fees in fiscal 2002 and 67% of total license fee revenues in fiscal 2001.

Services. Services revenues, which consist primarily of consulting, implementation, training and network management services, decreased 11% to \$30.7 million in fiscal year 2002 from \$34.5 million in fiscal year 2001. This decrease was primarily a result of a reduction in new consulting and implementation projects due to lower prior period ERP license fee sales. This decrease was partially offset by a 6% increase in Logility's services revenue in fiscal 2002 when compared to fiscal 2001. Services revenues for Logility constituted 32% of total services revenues for fiscal year 2002 and constituted 26% of total services revenues for fiscal year 2001. Services revenues constituted 47% of total revenues in fiscal year 2002 and 48% of total revenues in fiscal year 2001.

Maintenance. Maintenance revenues arise from product support activities and ongoing product enhancements that we provide to customers who license our products and purchase maintenance agreements. These revenues decreased 8% to \$21.9 million in fiscal year 2002 compared to \$23.9 million in fiscal year 2001. This decrease was due primarily to a 21% decrease in ERP maintenance revenue in fiscal year 2002 when compared to fiscal year 2001 which was due to lower ERP license fee revenue as well as a lower rate of renewals from legacy ERP customers. This was partially offset by an 8% increase in Logility's maintenance revenues for fiscal year 2002 when compared to fiscal year 2001.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Maintenance revenues constituted 34% of total revenues both in fiscal year 2002 and fiscal year 2001.

Gross Margin:

Total gross margin in fiscal 2002 was \$38.0 million, or 59% compared to \$28.1 million, or 40% in fiscal year 2001. This increase was primarily due to the increase of license fee margin to \$7.5 million, or 62% in fiscal 2002 compared to negative margin of \$2.3 million or negative 18% in fiscal 2001. The increase in license fee margin was primarily due to a \$9.4 million write-off of capitalized computer software development costs included in the cost of license fees in fiscal 2001, and to a lesser extent lower agent commissions and royalty expense due to the mix of products and distribution channels through which we sold our products in fiscal 2002. This was slightly offset by higher amortization expense on capitalized software in fiscal year 2002. Services gross margin increased to \$12.6 million, or 41% in fiscal 2002, from \$11.8 million, or 34% in fiscal 2001, due mainly to the cost control efforts that we began in fiscal 2001. Maintenance gross margin was \$18.0 million, or 82% in fiscal 2002, compared to \$18.6 million, or 78% in fiscal year 2001. This increase in maintenance gross margin percentage was primarily due to the cost control efforts that we began in fiscal year 2001, partially offset by the decrease in maintenance revenues.

Table of Contents**Operating Expenses:**

Research and Development. Gross product development costs include all non-capitalized and capitalized software development costs. A breakdown of the research and development costs for fiscal years 2002 and 2001 is as follows:

	Years Ended (000 \$ omitted)		
	April 30, 2002	Percent Change	April 30, 2001
Gross product development costs	\$ 10,497	(31%)	\$ 15,289
Percentage of total revenues	16%		21%
Less: capitalized development	(3,288)	(17%)	(3,949)
Percentage of gross product development costs	31%		26%
Product development expenses	\$ 7,209	(36%)	\$ 11,340
Percentage of total revenues	11%		16%
Total amortization of development costs*	\$ 3,946		\$ 3,790
Write-off of capitalized software development costs*	—		\$ 9,446

* Included in cost of license fees.

Gross product development costs decreased 31% in fiscal year 2002 compared to fiscal year 2001 as a result of cost reduction efforts in response to lower license fees and the reallocation of some research and development resources to services and support. Capitalized development decreased by 17% from a year ago, while the rate of capitalized development increased to 31% from 26% in fiscal year 2001 due to cost reduction efforts, as well as completion of several capitalized projects. Product development expenses as a percentage of total revenues decreased to 11% in fiscal year 2002 compared to 16% in fiscal year 2001 primarily as a result of the reduction in development costs combined with a decrease in revenues in fiscal year 2002. In fiscal year 2001 we wrote off \$9.5 million in capitalized software development costs. We took this charge primarily due to lower than anticipated sales of particular ERP products in recent periods and our belief that future cash flow from sales of these particular ERP products would be minimal.

Sales and Marketing. Sales and marketing expenses decreased 34% to \$13.3 million in fiscal year 2002 as a result of cost containment efforts. Sales and marketing expenses as a percentage of total revenues decreased to 21% for fiscal year 2002 when compared to 28% for fiscal year 2001.

General and Administrative. General and administrative expenses decreased to \$11.9 million in fiscal year 2002 compared to \$12.8 million in fiscal 2001. The decrease was due primarily to the reduction of headcount and the related expenses and to our cost control efforts during fiscal 2002. Total headcount at April 30, 2002 was 331 compared to 444 at April 30, 2001.

Provision for Doubtful Accounts. For fiscal year 2002 we incurred a charge for doubtful accounts of \$503,000 compared to \$1.3 million in fiscal year 2001. In both periods, these charges resulted primarily from difficult customer collections of Internet-related businesses which eased somewhat in fiscal 2002, and the overall weakness in the economy.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Charge for Restructuring. For fiscal year 2002, we did not incur a charge against earnings, compared to a restructuring charge of \$1.0 million in fiscal 2001. These charges were primarily a result of lower than anticipated sales of our ERP products. The restructuring charge was the result of severance expenses for approximately 110 employees in Sales, Marketing, Services and Research and Development. Included in the \$1.0 million was a non-cash charge of approximately \$270,000 related to the accelerated vesting of stock options for the severed employees.

Other Income/Minority Interest. Other income increased to \$2.0 million in fiscal year 2002 compared to \$1.6 million for the same period a year ago. This increase is primarily related to the sale of real property in fiscal year 2002, which resulted in a net gain of \$682,000. Minority interest resulted in a charge of \$339,000 for the twelve months ended April 30, 2002, compared to income of \$914,000 for fiscal 2001. This charge is primarily related to the purchase of the remaining shares of New Generation Computing in August 2001 and to Logility's earnings in fiscal 2002, compared to Logility's losses in fiscal 2001.

Income Tax Expense (Benefit). There was no effective income tax rate in fiscal year 2002 since we had prior period net operating losses to offset the current year income. In fiscal year 2001 we recorded an income tax benefit in the amount of \$2.4 million as a result of an income tax refund in the amount of \$705,000 and a reduction in income tax liability in the amount of \$1.7 million based on current estimates of future tax liabilities resulting from the conclusion of an IRS audit.

Discontinued Operations. Effective February 5, 2002, we sold all of the shares in AmQUEST, Inc., a wholly-owned subsidiary that provides information technology services, business continuity services, and systems and network management services to various industries, to Infocrossing, Inc.. AmQUEST generated losses from operations of approximately \$1,866,000 in fiscal 2002 and \$8,183,000 in fiscal 2001. AmQUEST used cash in its operating, investing, and financing activities totaling approximately \$1,225,000 in fiscal 2002 and \$8,004,000 in fiscal 2001. Since AmQUEST generated losses from operations in recent years and was a net user of cash, we believe the sale will have a positive effect on our results of operations, cash flows and liquidity in future periods.

Table of Contents**Operating Pattern**

We experience an irregular pattern of quarterly operating results, caused primarily by fluctuations in both the number and size of software license contracts received and delivered from quarter to quarter and our ability to recognize revenues in that quarter in accordance with our revenue recognition policies. We expect this pattern to continue.

Liquidity and Capital Resources

The following table shows information about our cash flows during the fiscal years ended April 30, 2003 and April 30, 2002. You should read this table and the discussion that follows in conjunction with our consolidated statements of cash flows.

	Twelve Months Ended April 30,	
	2003	2002
	(in thousands)	
Net cash provided by operating activities	\$ 9,000	\$ 6,282
Net cash (used in) provided by investing activities	(7,241)	17,060
Net cash used in financing activities	(1,764)	(1,510)
Net (decrease) increase in cash and equivalents	(5)	21,832

We fund our operations and capital expenditures primarily with cash generated from operating activities. The changes in net cash provided by operating activities generally reflect the changes in net earnings and non-cash operating items plus the effect of changes in operating assets and liabilities, particularly trading securities, trade accounts receivable, trade accounts payable, accrued expenses and deferred revenue.

Our operating activities provided cash of approximately \$9.0 million in fiscal year 2003, compared to approximately \$6.3 million in fiscal 2002. In fiscal 2003, sources of cash were primarily net earnings from continuing operations of \$5.5 million, depreciation and amortization expense of \$5.3 million, net loss on investments of \$440,000, and minority interest in earnings of subsidiary of \$306,000. This was partially offset by net changes in operating assets and liabilities of \$3.1 million. In fiscal 2002, sources of cash were primarily net earnings from continuing operations of \$7.2 million, depreciation and amortization expense of \$7.1 million, and minority interest in earnings of subsidiary of \$339,000. This was partially offset by net changes in operating assets and liabilities of \$7.8 million, and a gain on disposal of property of \$682,000.

Cash used in investing activities was approximately \$7.2 million in fiscal 2003 and cash provided by investing activities was approximately \$17.1 million in fiscal 2002. Cash flows from investing activities decreased for the period primarily because we recorded proceeds from the sale of AmQUEST of \$19.7 million in fiscal 2002. In fiscal 2003, cash was used primarily in net purchases of investments of \$3.0 million, capitalized software development costs of \$3.0 million, cash paid to resolve the final adjustment of the purchase price for the sale of our AmQUEST segment of \$650,000, purchases of property and equipment of \$311,000, and repurchases of Logility stock of \$254,000. In fiscal 2002, cash was provided by the sale of AmQUEST of \$19.7 million, and the sale of property of \$1.7 million. This was partially offset by capitalized software development costs of \$3.3 million, purchase of majority interest in our NGC subsidiary of \$557,000, purchases of property

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

and equipment of \$305,000, and repurchases of Logility stock of \$130,000.

Cash used in financing activities was approximately \$1.8 million for fiscal year 2003 and \$1.5 million for fiscal 2002. We used \$1.9 million for the repurchase of our common stock in fiscal 2003. In fiscal 2002, we used \$1.2 million in payments of capital lease obligations by our AmQUEST segment, and \$351,000 in the repurchase of our common stock.

Days Sales Outstanding in accounts receivable were 68 days at April 30, 2003, compared to 70 days at April 30, 2002. Our current ratio was 4.2 to 1 at April 30, 2003, compared to 2.8 to 1 at April 30, 2002. This increase was due primarily to a shift in investments from long term to short term, and to a lesser extent reductions in other current liabilities. Cash and investments totaled 64% of total assets at April 30, 2003, compared to 61% at April 30, 2002.

Our principal sources of liquidity are our cash and investments, which totaled approximately \$60.6 million at April 30, 2003. We believe that our sources of liquidity and capital resources will be sufficient to satisfy our presently anticipated requirements during at least the next twelve months for working capital, capital expenditures and other corporate needs. However, we may need to seek additional sources of capital to meet our requirements, either through equity or debt financing. We do not currently have a bank line of credit. No assurance can be given that bank lines of credit or other financing will be available on terms acceptable to us. If available, such financing may result in interest expense and dilution to our shareholders.

Table of Contents

On December 18, 1997, our Board of Directors approved a resolution authorizing the repurchase up to 1.5 million shares of our Class A common stock. On March 11, 1999, our Board of Directors approved a resolution authorizing us to repurchase an additional 700,000 shares for a total of up to 2.2 million shares of our Class A common stock. On August 22, 2002, our Board of Directors approved a resolution authorizing us to repurchase an additional 2.0 million shares for a total of up to 4.2 million shares of our Class A common stock. These repurchases have been and will be made through open market purchases at prevailing market prices. The timing of any repurchases will depend upon market conditions, the market price of our common stock and management's assessment of our liquidity and cash flow needs. For these repurchase plans, as of July 11, 2003, we have repurchased approximately 2.2 million shares of common stock at a cost of approximately \$7.1 million.

On December 15, 1997, Logility's Board of Directors approved a resolution authorizing it to repurchase up to 350,000 shares of its common stock through open market purchases at prevailing market prices. Logility completed this repurchase plan in November 1998, at which time Logility adopted an additional repurchase plan for up to 800,000 shares. In February 2003, Logility's Board of Directors approved a resolution authorizing it to repurchase an additional 400,000 shares for a total authorized repurchase amount of 1,550,000 shares. The timing of any repurchases depends on market conditions, the market price of Logility's common stock and management's assessment of its liquidity and cash flow needs. For all repurchase plans, as of July 11, 2003, Logility had repurchased a cumulative total of approximately 775,000 shares at a total cost of \$4.9 million. In fiscal 2003, Logility purchased a total of 82,900 shares at a total cost of approximately \$253,000, for an average price of \$3.05 per share.

Recent Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board (FASB) issued Statement No. 141, *Business Combinations* (SFAS 141) and Statement No. 142, *Goodwill and Other Intangible Assets* (SFAS 142). SFAS 141 requires that the purchase method of accounting be used for all business combinations initiated or completed after June 30, 2001 and specifies criteria intangible assets acquired in a purchase method business combination must meet to be recognized and reported apart from goodwill. SFAS 142 requires that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead must be tested for impairment at least annually in accordance with the provisions of SFAS 142. SFAS 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144).

We adopted the provisions of SFAS 141 in 2001 and SFAS 142 effective May 1, 2002. SFAS 141 required, upon adoption of SFAS 142, that we evaluate our existing goodwill and intangible assets that were acquired in prior purchase business combinations and make any necessary reclassifications in order to conform with the new criteria in SFAS 141 for recognition apart from goodwill. Because we will not amortize goodwill and certain intangible assets over a specific period but rather will review those assets for impairment annually if they exist, there could be more volatility in our reported earnings (loss) than under previous accounting standards due to impairment losses occurring irregularly and in varying amounts. Upon adoption of SFAS 142, we also were required to reassess the useful lives and residual values of all intangible assets acquired, and to make any necessary amortization period adjustments.

As of May 1, 2002, the date of adoption of SFAS 142, we had unamortized goodwill of \$4.1 million and no unamortized identifiable intangible assets, which were subject to the transition provisions of SFAS 141 and SFAS 142. During the second quarter of fiscal 2003, we evaluated the fair values of the reporting units identified under the provisions of SFAS 141 and SFAS 142 and concluded that no impairment of recorded goodwill exists. As a result, we recorded no amortization of goodwill for the year ended April 30, 2003. Amortization expense related to goodwill was \$1.15 million for the year ended April 30, 2002.

Table of Contents

The reconciliation of reported net earnings adjusted for the adoption of SFAS 142 is as follows (in thousands except per share amounts):

	Year ended April 30,		
	2003	2002	2001
Net earnings			
As reported	\$ 7,586	\$ 18,701	\$ (22,580)
Add back: Goodwill amortization		1,152	989
Adjusted net earnings available to common shareholders	<u>\$ 7,586</u>	<u>\$ 19,853</u>	<u>\$ (21,591)</u>
Net earnings per common share			
Basic:			
As reported	\$ 0.34	\$ 0.82	\$ (0.99)
Add back: Goodwill amortization		0.05	0.04
Adjusted net earnings per common share	<u>\$ 0.34</u>	<u>\$ 0.87</u>	<u>\$ (0.95)</u>
Diluted:			
As reported	\$ 0.33	\$ 0.82	\$ (0.99)
Add back: Goodwill amortization		0.05	0.04
Adjusted net earnings per common share	<u>\$ 0.33</u>	<u>\$ 0.87</u>	<u>\$ (0.95)</u>

In June 2001, the FASB issued Statement No. 143, *Accounting for Asset Retirement Obligations* (SFAS 143). SFAS 143 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS 143 applies to all entities. SFAS 143 applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development or the normal operation of a long-lived asset, except for certain lease obligations. SFAS 143 is effective for financial statements issued for fiscal years beginning after June 15, 2002, which means that we must adopt SFAS 143 for our fiscal year ending April 30, 2004. We do not anticipate the adoption of SFAS 143 to have a material effect on our consolidated financial condition or results of operations.

In August 2001, the FASB issued Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144), which supersedes both FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (SFAS 121) and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (Opinion 30), for the disposal of a segment of a business (as previously defined in that Opinion). SFAS 144 retains the fundamental provisions in SFAS 121 for recognizing and measuring impairment losses on long-lived assets held for use and long-lived assets to be disposed of by sale, while also resolving significant implementation issues associated with SFAS 121. For example, SFAS 144 provides guidance on how a long-lived asset that is used as part of a group should be evaluated for impairment, establishes criteria for when a long-lived asset is held for sale, and prescribes the accounting for a long-lived asset that will be disposed of other than by sale. SFAS 144 retains the basic provisions of Opinion 30 on how to present discontinued operations in the income statement but broadens that presentation to include a component of an entity (rather than a segment of a business). Unlike SFAS 121, an impairment assessment under SFAS 144 will never result in a write-down of goodwill. Rather, we evaluate goodwill for impairment under SFAS 142.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

We adopted SFAS 144 effective May 1, 2002. The adoption of SFAS 144 did not have a material impact on our consolidated financial condition or results of operations because the impairment assessment under SFAS 144 is largely unchanged from SFAS 121. The provisions of SFAS 144 for assets held for sale or other disposal generally are required to be applied prospectively after the adoption date to newly initiated disposal activities.

In June 2002, the FASB issued Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146). Under the new rules, an issuer may only recognize a liability for a cost associated with an exit or disposal activity when the liability is incurred. Under the previous guidance of EITF No. 94-3, issuers recognized a liability for exit costs at the date of an entity's commitment to an exit plan. SFAS 146 is effective for exit or disposal activities that are initiated after December 31, 2002. The adoption of SFAS 146 had no material impact on our consolidated financial condition, results of operations or cash flows.

In December 2002, the FASB issued Statement No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure, an amendment of FASB Statement No. 123* (SFAS 148). SFAS 148 amends FASB Statement No. 123, *Accounting for Stock-Based Compensation*, (SFAS 123) to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of SFAS 123 to require prominent disclosures in both annual and interim financial statements. We adopted SFAS 148 for our fiscal year ended April 30, 2003 and the required disclosures are presented in our consolidated financial statements.

Table of Contents

In May 2003, the FASB issued Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity* (SFAS 150), which is effective at the beginning of the first interim period beginning after June 15, 2003. SFAS 150 establishes standards for the classification of liabilities in the financial statements that have characteristics of both liabilities and equity. The adoption of SFAS 150 is not expected to have a material effect on our consolidated financial condition or results of operations.

FACTORS AFFECTING FUTURE PERFORMANCE

A Variety of Factors May Affect Our Future Results and the Market Price of Our Stock.

We have included certain forward-looking statements in Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this Form 10-K/A. We may also make oral and written forward-looking statements from time to time, in reports filed with the Securities and Exchange Commission, and otherwise. Actual results may differ materially from those projected in any such forward-looking statements due to a number of factors, including those set forth below and elsewhere in this Form 10-K/A.

We operate in a dynamic and rapidly changing environment that involves numerous risks and uncertainties. The following section lists some, but not all, of the risks and uncertainties that may have a material adverse effect on our business, financial condition or results of operations. This section should be read in conjunction with the audited Consolidated Financial Statements and Notes thereto, and Management's Discussion and Analysis of Financial Condition and Results of Operations for the fiscal years ended April 30, 2003, 2002 and 2001 contained elsewhere in this Form 10-K/A.

Continued regional or global changes in economic, political and market conditions could cause decreases in demand for our software and related services, which could negatively affect our revenue and operating results and the market price of our stock.

Our revenue and profitability depend on the overall demand for our software and related services. Unfavorable general economic and market conditions could continue to adversely affect our business. As a result of unfavorable general economic and market conditions in the United States and internationally, the software industry continues to experience a significant slowdown, resulting in delayed customer purchases, decreased product demand, price erosion, and layoffs. Although we have a diverse customer base, we have targeted a number of vertical markets, such as the manufacturing, distribution, and consumer goods industries, that have also been significantly impacted by the continuing economic downturn, and which would have a material adverse effect on our business, operating results, cash flows, and financial condition. Regional or global change in the economy and financial markets could result in the delay or canceling of customer purchases. Some of our competitors have recently announced that the current economic conditions have negatively impacted their financial results. If demand for our software and related services decreases, our revenues may decrease and our operating results would be adversely affected. Our inability to license software products to new customers may cause our stock price to fall.

We Could Experience Fluctuations in Quarterly Operating Results That Could Adversely Impact Our Stock Price.

Our revenue and operating results are difficult to predict and have varied widely from quarter to quarter in the past. We expect they will continue to vary significantly from quarter to quarter due to a number of factors, many of which are outside our control. We base our expense levels, operating costs and hiring plans on projections of future revenues and are relatively fixed. A failure to meet expectations of revenues could adversely affect the price of our stock. License revenues in any quarter depend substantially on the combined contracting activity of the

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

American Software group of companies and our ability to recognize revenues in that quarter in accordance with our revenue recognition policies. Our contracting activity is difficult to forecast for a variety of reasons, including the following:

we complete a significant portion of our license agreements within the last few weeks of each quarter;

our sales cycle is relatively long and variable because of the complex and mission-critical nature of our products;

the size of our license transactions can vary significantly;

the possibility of adverse global political conditions and economic downturns, both domestic and international, characterized by decreased product demand, price erosion, technological shifts, work slowdowns and layoffs, may substantially reduce customer demand and contracting activity;

customers may unexpectedly postpone or cancel anticipated system replacement or new system evaluations and implementation due to changes in their strategic priorities, project objectives, budgetary constraints, internal purchasing processes or company management;

Table of Contents

customer evaluations and purchasing processes vary from company to company, and a customer's internal approval and expenditure authorization process can be difficult and time consuming, even after selection of a vendor; and

the number, timing and significance of software product enhancements and new software product announcements by us and by our competitors may affect purchase decisions.

Several factors may require us to defer recognition of license or service related revenue for a significant period of time after entering into a customer agreement, including:

whether the license agreement relates to then unavailable software products;

whether transactions include both currently deliverable software products and software products that are under development or other undeliverable elements;

whether the customer demands services that include significant modifications, customizations or complex interfaces that could delay products delivery or acceptance;

whether the transaction involves acceptance criteria that may preclude revenue recognition or if there are identified product-related issues, such as known defects; and

whether the transaction involves payment terms or fees that depend upon contingencies.

Because of the factors listed above and other specific requirements under Generally Accepted Accounting Principles (GAAP) for software revenue recognition, we must have precise terms in our customer agreements in order to recognize revenue when we initially deliver software or perform services. Although we have standard forms of license and service agreements that meet the criteria under GAAP for current revenue recognition on delivered elements, we negotiate and revise these terms and conditions in some transactions. Negotiation of mutually acceptable terms and conditions can extend the sales cycle, and sometimes we do not obtain terms and conditions that permit revenue recognition at the time of delivery or even as work on the project is completed.

Variances or slowdowns in our licensing activity in prior quarters may affect current and future consulting, training and maintenance revenues since these revenues typically follow license fee revenues. Our ability to maintain or increase services revenue primarily depends on our ability to increase the number and size of our licensing agreements. In addition, we base our expense levels, operating costs and hiring plans on projections of future revenues and are relatively fixed. If our actual revenues fall below our expectations in any particular quarter, our business, operating results, and financial condition could be materially adversely affected.

There Is Intense Competition in Our Industry, Which Requires Us to Constantly Create New Products, Improve Our Existing Products and Sell Our Products at Competitive Prices.

We compete with a variety of software vendors, including:

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Internet application vendors in the enterprise application software market segment;

vendors in the manufacturing software application market segment;

vendors in the emerging enterprise resource optimization software solutions market segment;

providers of human resource management system software products;

providers of financial management systems software products;

internal development efforts by corporate information technology departments; and

numerous other firms that offer products and services with new or advanced features.

As a result, the market for business application software and related services has been and continues to be intensely competitive. Some competitors have become more aggressive with their prices and payment terms and issuance of contractual implementation terms or guarantees. We may be unable to continue to compete successfully with new and existing competitors without lowering prices or offering other favorable terms.

Table of Contents

In addition, we believe we must differentiate ourselves through architectural and technological factors. Some of our competitors may have an advantage over us due to their:

significant worldwide presence and greater name recognition;

longer operating and product development history;

substantially greater financial, technical and marketing resources; and

larger installed base.

Some competitors have become more aggressive with their payment terms, discounting practices, and service arrangements, which makes product differentiation even more important. If competitors offer more favorable payment terms, discounting practices, contractual implementation terms, or product or service warranties, or if they offer product functionality that we do not currently provide, we may need to lower prices or offer other favorable terms in order to compete successfully. Any such changes would reduce our margins and may adversely affect operating results.

Furthermore, potential customers may consider outsourcing options, including application service providers, data center outsourcing and service bureaus as alternatives to licensing our software products.

We May Derive a Significant Portion of Our Revenue in any Quarter from a Limited Number of Large, Non-Recurring License Sales.

We expect to continue to experience from time to time large, individual license sales, which may cause significant variations in quarterly license fees. We also believe that purchasing our products is relatively discretionary and generally involves a significant commitment of a customer's capital resources. Therefore, a downturn in any customer's business could result in order cancellations that could have a significant adverse impact on our revenue and quarterly results. Moreover, declines in general economic conditions could precipitate significant reductions in corporate spending for information technology, which could result in delays or cancellations of orders for our products.

We Are Dependent Upon Key Personnel, and Need to Hire Additional Personnel in All Areas.

Our future operating results depend significantly upon the continued service of a relatively small number of key senior management and technical personnel, including our Chief Executive Officer, James C. Edenfield. None of our key personnel are bound by long-term employment agreements. The loss of Mr. Edenfield or one or more other key individuals could have an adverse effect on us.

Our future success also depends on our continuing ability to attract and retain other highly qualified managerial and technical personnel. Competition for these personnel is intense, and we have at times experienced difficulty in recruiting and retaining qualified personnel. We may be unable to retain our key managerial and technical employees and we may not be successful in attracting, assimilating and retaining other highly qualified managerial and technical personnel in the future. If our competitors increase their use of non-compete agreements, the pool of

available sales and technical personnel may further narrow in certain areas, even if the non-compete agreements ultimately prove to be unenforceable. We may grant large numbers of stock options to attract and retain personnel, which could be highly dilutive to our stockholders. The volatility or lack of positive performance of our stock price may adversely affect our ability to retain or attract employees. The loss of key management and technical personnel or the inability to attract and retain additional qualified personnel could have an adverse effect on us.

Our Principal Stockholders May Control Our Management Decisions.

James C. Edenfield, Chief Executive Officer of the Company, and Thomas L. Newberry, Chairman of the Board of Directors, own 100% of our outstanding Class B common stock between them, giving them the right to elect a majority of the Board of Directors. Current directors and executive officers as a group beneficially own approximately 8.0% of our Class A common stock. Mr. Edenfield, Dr. Newberry and members of their immediate families currently constitute four of the eight members of the Board and, thus, have significant influence in directing the actions of the Board of Directors and all other matters requiring approval by stockholders, including the approval of mergers and other business combinations.

Table of Contents

The Impact of Changes in Global Economic Conditions on Our Customers May Cause Us to Fail to Meet Expectations, Which Could Negatively Affect the Price of Our Stock.

Our operating results can vary significantly based upon the effect of changes in global economic conditions on our customers. In particular, the current macro-economic environment is more uncertain than in recent periods and has the potential to materially and adversely affect us. The revenue growth and profitability of our business depends on the overall demand for computer software and services, particularly in the areas in which we compete. Because we sell primarily to major corporate customers whose businesses fluctuate with general economic and business conditions, a softening of demand for computer software caused by a weakening economy may result in decreased revenues and lower growth rates. Historically, we have relied upon relatively large license transactions, which causes us to be especially prone to this risk. Customers may defer or reconsider purchasing products if they experience a downturn in their business or if there is a continued downturn in the general economy, which has been worsened by the September 11, 2001 terrorist attacks in the United States. Various segments of the software industry have experienced significant economic downturns characterized by decreased product demand, price erosion, work slowdown and layoffs. Moreover, there is increasing uncertainty in the business application software market attributed to many factors, including global economic conditions and strong competitive forces.

We Have Recently Expanded Our Technology into Several New Business Areas and Cannot Be Certain that Our Expansion Will Be Successful.

Our future success depends to a large degree on the Internet being accepted and widely used for commerce. If use of the Internet for commerce does not increase as we anticipate, our business will suffer. We have in recent years expanded our technology into a number of new business areas to foster long-term growth, including electronic commerce, on-line business services and other products and services that can be offered over the Internet. These areas are relatively new to our product development, sales and marketing personnel and we cannot be sure that the markets for these products will develop or that we will be able to compete effectively or will generate significant revenues in these new areas. As a result, our success in this area is difficult to predict. In addition, rapid growth in the use of the Internet remains a comparatively recent trend. As a result, acceptance and use may not continue to develop at historical rates, and a sufficiently broad base of business customers may not adopt or continue to use the Internet to conduct their operations. Demand and market acceptance for recently introduced services and products over the Internet are subject to a high level of uncertainty, and there exist few proven services and products. Our business could be seriously harmed if:

the necessary communication and computer network technology underlying the Internet and other online services does not effectively support any expansion;

industry does not develop or adopt new standards and protocols in a timely manner;

there are increased concerns about security, reliability, cost, ease of use, accessibility, quality of service; or

if other facts result in the Internet not becoming established as a viable commercial marketplace, inhibiting the development of electronic commerce and reducing the need for and desirability of our products and services.

Our continued success depends on our ability to achieve growth. Our ability to successfully offer products and services and to implement our business plan in a rapidly evolving market requires an effective planning and management process. To continue competing effectively and achieve future growth, we must continue to evaluate and improve the adequacy of our management structure and existing procedures, including our financial and internal controls. If we are not successful, our business, operating results, and financial condition would be materially adversely affected.

Future Regulation of the Internet May Slow its Growth, Resulting in Decreased Demand for Our Products and Services and Increased Costs of Doing Business.

Due to increasing popularity of the Internet, it is possible that state, Federal and international regulators could adopt laws and regulations that impose additional burdens on companies conducting business online. For example, the growth and development of the market for Internet-based services may prompt calls for more stringent consumer protection laws. Moreover, the applicability to the Internet of existing laws in various jurisdictions governing issues such as property ownership, sales tax, libel and personal privacy is uncertain and may take years to resolve. Any new legislation or regulation, the application of laws and regulations from jurisdictions whose laws do not currently apply to our business, or the application of existing laws and regulations to the Internet and other online services could inhibit the expansion of the Internet, causing our costs to increase and our growth to be harmed.

Table of Contents

The Viability of Electronic Marketplaces Is Uncertain.

Electronic marketplaces that allow collaboration over the Internet among trading partners are relatively new and unproven. There can be no assurance that trading partners will adopt electronic marketplaces as a method of doing business. Trading partners may fail to participate in electronic marketplaces for a variety of reasons, including:

concerns about the confidentiality of information provided to electronic marketplaces;

the inability of technological advances to keep pace with the volume of information processed by electronic marketplaces; and

regulatory issues, including antitrust issues that may arise when trading partners collaborate through electronic marketplaces.

Any of these factors could limit the growth of electronic marketplaces as an accepted means of commerce. Slower growth or the abandonment of the electronic marketplace concept in one or more industries could have a material adverse effect on our business, results of operations and financial condition.

We Depend on Third-Party Technology that Could Result in Increased Costs or Delays in the Production and Improvement of Our Products.

We license critical third-party software products that we incorporate into our own software products. If any of the third-party software vendors were to change their product offerings or terminate our licenses, we might incur additional development or acquisition costs to ensure continued performance of our products. In addition, if the cost of licensing any of these third-party software products significantly increases, our gross margin levels could significantly decrease.

We rely on existing relationships with certain other software vendors who are also competitors. If these vendors change their business practices in the future, we may be compelled to find alternative vendors with complementary software, which may not be available on attractive terms, or may not be as widely accepted or as effective as the software provided by our existing vendors. If the cost of licensing or maintaining these third-party software products or other technology significantly increases, our gross margin levels could significantly decrease. In addition, interruption in functionality of our products could adversely affect future license and service revenues.

Services Revenues Carry Lower Gross Margins than License Revenues and an Overall Increase in Services Revenue as a Percentage of Total Revenues Could Have an Adverse Impact on Our Business.

Because service revenues have lower gross margins than license revenues, an increase in the percentage of total revenue represented by service revenues could have a detrimental impact on our overall gross margins and could adversely affect operating results. As a result, an increase in services revenues as a percentage of total revenue and a change in the mix between services that are provided by our employees versus services provided by third-party consultants may negatively affect our gross margins.

We May Change Our Pricing Practices, Which Could Adversely Impact Operating Margins or Customer Ordering Patterns.

In the future, we may choose to make changes to our pricing practices. For example, we may (i) offer additional discounts to customers, (ii) increase (or decrease) the use of pricing that involves periodic fees based on the number of users of a product, or (iii) change maintenance pricing. Such changes could reduce margins or inhibit our ability to sell our products.

Accounting Pronouncements Could Adversely Impact Our Profitability by Delaying Some Revenue Recognition into Future Periods.

In recent years, the American Institute of Certified Public Accountants issued Statement of Position (SOP) 97-2, *Software Revenue Recognition*, and SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions*. In addition, in December 1999, the Securities and Exchange Commission staff issued Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, which explains how the SEC staff believes existing revenue recognition rules should be applied to or interpreted for transactions not addressed by existing rules. These standards address software revenue recognition matters primarily from a conceptual level and do not include specific implementation guidance. We believe that we currently comply with SOPs 97-2, SOP 98-9 and SAB 101.

The American Institute of Certified Public Accountants has issued implementation guidelines for these standards and the accounting profession is still discussing a wide range of potential interpretations. These implementation guidelines, once finalized, could lead to unanticipated changes in our current revenue accounting practices that could cause us to recognize lower profits. As a

Table of Contents

result, we may change our business practices significantly in order to continue to recognize a substantial portion of our license revenues when we deliver our software products and services. These changes may adversely affect our business and results of operations.

Our Future Growth Depends Upon Our Ability to Build and Maintain Strategic Relationships with Third Parties.

A key aspect of our sales and marketing strategy is to build and maintain strong working relationships with businesses that we believe play an important role in the successful marketing of our software products and the marketing of our managed services and other services. Our current and potential customers often rely on third-party system integrators to implement, deploy and manage client/server and other platform-based applications. We believe that our marketing and sales efforts are enhanced by the worldwide presence of these companies.

However, these companies, most of which have significantly greater financial and marketing resources than we have, may commence, or in some cases increase, the marketing of business application software in competition with us, or may otherwise discontinue their relationships with or support of us. In addition, many of these companies also have relationships with one or more of our competitors and may, in some instances, select or recommend the software offerings of our competitors rather than our software. In addition, certain of these third parties compete with us directly in developing and marketing business application software and related services. If we are unable to maintain or increase our relationships with the third parties that recommend, implement, or support our software, our revenue may be materially affected. In addition, if these strategic partners are unable to recruit and adequately train a sufficient number of consulting personnel to support the implementation of our software products, we may lose customers.

As we have done in the past, in the future we may enter into various development or joint business arrangements to develop new software products or extensions to our existing software products. Under these joint business arrangements, we may distribute ourselves or jointly sell with our business partners an integrated software product and pay a royalty to the business partner based on end-user license fees. While we intend to develop business applications that are integrated with our software products, these software products may in fact not be integrated or brought to market or the market may not accept the integrated enterprise solution. As a result, we may not achieve the revenues that we anticipated at the time we entered into the joint business arrangement.

If We Do Not Maintain Software Performance across Accepted Platforms and Operating Environments, Our License and Services Revenue Could be Adversely Affected.

Market acceptance of new platforms and operating environments may require us to undergo the expense of developing and maintaining compatible product lines. We can license our software products for use with a variety of popular industry standard relational database management system platforms. There may be future or existing relational database platforms that achieve popularity in the marketplace and that may or may not be architecturally compatible with our software product design. In addition, the effort and expense of developing, testing, and maintaining software product lines will increase as more hardware platforms and operating systems achieve market acceptance within our target markets. Moreover, future or existing user interfaces that achieve popularity within the business application marketplace may or may not be architecturally compatible with our current software product design. If we do not achieve market acceptance of new user interfaces that we support, or adapt to popular new user interfaces that we do not support, our sales and revenue may be adversely affected. Developing and maintaining consistent software product performance characteristics across all of these combinations could place a significant strain on our resources and software product release schedules, which could adversely affect revenue and results of operations.

Our Software Products and Product Development Are Complex, Which Make It Increasingly Difficult to Innovate, Extend Our Product Offerings, and Avoid Costs Related to Correction of Program Errors.

The market for our software products is characterized by rapid technological change, evolving industry standards, changes in customer requirements and frequent new product introductions and enhancements. For instance, existing products can become obsolete and unmarketable when vendors introduce products utilizing new technologies or new industry standards emerge. As a result, it is difficult for us to estimate the life cycles of our software products. There can be no assurance that we will successfully identify new product opportunities, develop and bring new products to the market in a timely and cost-effective manner, or that products, capabilities, or technologies developed by our competitors will not render our products obsolete. Our future success will depend in part upon our ability to:

continue to enhance and expand our core applications;

continue to sell our products;

continue to successfully integrate third-party products;

Table of Contents

enter new markets and achieve market acceptance; and

develop and introduce new products that keep pace with technological developments, including developments related to the Internet, satisfy increasingly sophisticated customer requirements and achieve market acceptance.

We can license our software products for use with a variety of popular industry standard database management systems. There may be future or existing database management system platforms that achieve popularity within the business application marketplace and on which we may desire to offer our applications. These future or existing database management system products may or may not be architecturally compatible with our software product design. We may not be able to develop software products on additional platforms with the specifications and within the time frame necessary for market success.

Despite testing by us, our software programs, like all software programs generally, may contain a number of undetected errors or bugs when we first introduce them or as new versions are released. We do not discover some errors until we have installed the product and our customers have used it. Errors may result in the delay or loss of revenue, diversion of software engineering resources, material non-monetary concessions, negative media attention, or increased service or warranty costs as a result of performance or warranty claims. Errors could lead to customer dissatisfaction, resulting in litigation, damage to our reputation, and impaired demand for our products. Correcting bugs may result in increased costs and reduced acceptance of our software products in the marketplace. The effort and expense of developing, testing and maintaining software product lines will increase with the increasing number of possible combinations of:

vendor hardware platforms;

operating systems and updated versions;

application software products and updated versions; and

database management system platforms and updated versions.

Developing consistent software product performance characteristics across all of these combinations could place a significant strain on our development resources and software product release schedules.

Implementation of Our Products Can Be Complex, Time-Consuming and Expensive and Customers May Be Unable to Implement Our Products Successfully.

Our products must integrate with the many existing computer systems and software programs of our customers. This can be complex, time-consuming and expensive, and may cause delays in the deployment of our products. Our customers may be unable to implement our products successfully or otherwise achieve the benefits attributable to our products.

We Sometimes Experience Delays in Product Releases, Which Can Adversely Affect Our Business.

Historically, we have issued significant new releases of our software products periodically, with minor interim releases issued more frequently. As a result of the complexities inherent in our software, major new product enhancements and new products often require long development and testing periods before they are released. On occasion, we have experienced delays in the scheduled release date of new or enhanced products, and we cannot provide any assurance that we will achieve future scheduled release dates. The delay of product releases or enhancements, or the failure of such products or enhancements to achieve market acceptance, could materially affect our business and reputation.

Our Recent and Future Acquisitions May Not Be Successful.

We have in the past acquired and invested, and may continue to acquire or invest, in complementary companies, products and technologies, and enter into joint ventures and strategic alliances with other companies. Acquisitions, joint ventures, strategic alliances, and investments present many risks, and we may not realize the financial and strategic goals that were contemplated at the time of any transaction. Risks commonly encountered in such transactions include:

the risk that the acquired company or assets may not further our business strategy or that we paid more than the company or assets were worth;

the difficulty of assimilating the operations and retaining and motivating personnel of the combined companies;

Table of Contents

the risk that we may not be able to integrate the acquired technologies or products with our current products and technologies;

the potential disruption of our ongoing business and the diversion of our management's attention from other business concerns;

the inability of management to maximize our financial and strategic position through the successful integration of acquired businesses;

adverse impact on our annual effective tax rate;

dilution of existing equity holders caused by capital stock issuances to the stockholders of acquired companies or stock option grants to retain employees of the acquired companies;

difficulty in maintaining controls, procedures and policies;

potential adverse impact on our relationships with partner companies or third-party providers of technology or products;

the impairment of relationships with employees and customers; and

issues with product quality, product architecture, legal contingencies, product development issues, or other significant issues that may not be detected through our due diligence process.

Recent changes in the law require the use of the purchase method of accounting in all new business acquisitions. The purchase method of accounting for business combinations may require large write-offs of any in-process research and development costs related to companies being acquired, as well as ongoing amortization costs for other intangible assets valued in combinations of companies. In addition, goodwill will need to be periodically measured for impairment which may result in large future write-offs. Such write-offs and ongoing amortization charges may have a significant negative impact on operating margins and net income in the quarter of the combination and for several subsequent years. We may not be successful in overcoming these risks or any other problems encountered in connection with such transactions.

Terrorist Activities and Resulting Military Actions Could Adversely Affect Our Business.

The terrorist attacks on September 11, 2001, disrupted commerce throughout the world. In response to such attacks and other threats, the U.S. is actively using military force to pursue those behind these attacks and initiating broader actions against global terrorism. The continued threat of terrorism throughout the world, the escalation of military action, and heightened security measures in response to such threats may continue to cause significant disruption to commerce throughout the world. To the extent that such disruptions result in instability of capital markets, the imposition of further import and export restrictions, reductions in capital expenditures or spending on information technology, longer sales cycles, deferral or delay of customer orders, or an inability to effectively market our products, our business and results of operations could be materially and adversely affected. Additionally, terrorist attacks present a potential threat to communication systems, information technology and security, damage to buildings and their contents, and injury to or death of key employees. We continue to take steps to increase security and add protections against terrorist threats. This may require adjustment or change of business practices, which could involve significant capital expenditure and result in loss of focus and distraction of management. Moreover, an actual or perceived increase in risk of travel due to further terrorist activity may impair our ability to demonstrate products and meet with prospective customers, which may, in turn, adversely affect our ability to close sales and meet projected forecasts.

Our International Operations and Sales Subject Us to Risks Associated with Unexpected Activities Outside of the United States.

The global reach of our business could cause us to be subject to unexpected, uncontrollable and rapidly changing events and circumstances in addition to those experienced in locations within the United States. The following factors, among others, could have an adverse impact on our business and earnings:

conducting business in currencies other than United States dollars subjects us to factors such as currency controls and fluctuations in currency exchange rates;

we may be unable to hedge some transactions because of uncertainty or the inability to reasonably estimate our foreign exchange exposure;

Table of Contents

we may hedge some anticipated transactions and transaction exposures, but could experience losses if exchange rates move in the opposite direction;

we may have difficulty in offering foreign technical standards;

increased cost and development time required to localize our products;

lack of experience in a particular geographic market;

regulatory, social, political, labor or economic conditions in a specific country or region;

reduced protection for intellectual property rights in some countries;

cultural and language difficulties;

political instability;

difficulties in staffing and managing international operations;

laws, policies and other regulatory requirements affecting trade and investment including loss or modification of exemptions for taxes and tariffs, and import and export license requirements;

exposure to different legal standards;

difficulties in collecting accounts receivable and longer collection periods; and

higher operating costs.

It May Become Increasingly Expensive to Obtain and Maintain Liability Insurance.

We contract for insurance to cover a variety of potential risks and liabilities. In the current market, insurance coverage is becoming more restrictive, and when insurance coverage is offered, the deductible for which we are responsible is larger. In light of these circumstances, it may become more difficult to maintain insurance coverage at historical levels, or if such coverage is available, the cost to obtain or maintain it may increase substantially. This may result in our being forced to bear the burden of an increased portion of risks for which we have traditionally been covered by insurance, which could negatively impact our results of operations.

We Have Limited Protection of Intellectual Property and Proprietary Rights and May Potentially Infringe Third-Party Intellectual Property Rights.

We consider certain aspects of our internal operations, software and documentation to be proprietary, and rely on a combination of copyright, trademark and trade secret laws; confidentiality agreements with employees and third parties; and protective contractual provisions such as those contained in our license agreements with consultants, vendors, partners and customers and other measures to protect this information. Existing copyright laws afford only limited protection. We believe that the rapid pace of technological change in the computer software industry has made trade secret and copyright protection less significant than factors such as:

knowledge, ability and experience of our employees;

frequent software product enhancements;

customer education; and

timeliness and quality of support services;

Our competitors may independently develop technologies that are substantially equivalent or superior to our technology. The laws of some countries in which our software products are or may be licensed do not protect our software products and intellectual property rights to the same extent as the laws of the United States.

We generally enter into confidentiality or license agreements with our employees, customers, consultants, and vendors. These agreements control access to and distribution of our software, documentation, and other proprietary information. Despite our efforts to protect our proprietary rights, unauthorized parties may copy aspects of our products, obtain and use information that we regard as

Table of Contents

proprietary, or develop similar technology through reverse engineering or other means. Preventing or detecting unauthorized use of our products is difficult. There can be no assurances that the steps we take will prevent misappropriation of our technology or that our license agreements will be enforceable. In addition, we may resort to litigation to enforce our intellectual property rights, to protect our trade secrets, to determine the validity and scope of others' proprietary rights, or to defend against claims of infringement or invalidity in the future. Such litigation could result in significant costs or the diversion of resources. This could materially adversely affect our business, operating results and financial condition.

Third parties may assert infringement claims against us. Although we do not believe that our products infringe on the proprietary rights of third parties, we cannot guarantee that third parties will not assert or prosecute infringement or invalidity claims against us. These assertions could distract management, require us to enter into royalty arrangements, and could result in costly and time consuming litigation, including damage awards. Such assertions or defense of such claims may materially adversely affect our business, operating results, or financial condition. In addition, such assertions could result in injunctions against us. Injunctions that prevent us from distributing our products would have a material adverse effect on our business, operating results, and financial condition. If third parties assert such claims against us, we may seek to obtain a license to use such intellectual property rights. There can be no assurance that such a license would be available on commercially reasonable terms.

We May Experience Liability Claims Arising Out of the Licensing of Our Software and Provision of Services.

Our agreements normally contain provisions designed to limit our exposure to potential liability claims. However, these provisions could be invalidated by unfavorable judicial decisions or by federal, state, local or foreign laws or ordinances. For example, we may not be able to avoid or limit liability for disputes relating to product performance or the provision of services. If a claim against us were to be successful, we may be required to incur significant expense and pay substantial damages. Even if we prevailed, the accompanying publicity could adversely impact the demand for our products and services.

We also rely on certain technology that we license from third parties, including software that is integrated with our internally developed software. Although these third parties generally indemnify us against claims that their technology infringes on the proprietary rights of others, such indemnification is not always available for all types of intellectual property. Often such third-party indemnifiers are not well capitalized and may not be able to indemnify us in the event that their technology infringes on the proprietary rights of others. As a result, we may face substantial exposure in the event that technology we license from a third-party infringes on another party's proprietary rights. Defending such infringement claims, regardless of their validity, could result in significant cost and diversion of resources.

Concerns That Our Products Do Not Adequately Protect the Privacy of Consumers Could Inhibit Sales of Our Products.

One of the features of our customer management software applications is the ability to develop and maintain profiles of customers for use by businesses. Typically, these products capture profile information when customers and employees visit an Internet web site and volunteer information in response to survey questions concerning their backgrounds, interests and preferences. Our products augment these profiles over time by collecting usage data. Although we have designed our customer management products to operate with applications that protect user privacy, privacy concerns may nevertheless cause visitors to resist providing the personal data necessary to support this profiling capability. If we cannot adequately address customers' privacy concerns, these concerns could seriously harm our business, financial condition and operating results.

We Face Risks Associated with the Security of our Products.

We have included security features in certain of our Internet browser-enabled products that are intended to protect the privacy and integrity of customer data. Despite these security features, our products may be vulnerable to break-ins and similar problems caused by Internet users. Such break-ins and other disruptions could jeopardize the security of information stored in and transmitted through the computer systems of our customers. Break-ins include such things as hackers bypassing firewalls and accessing confidential information. Addressing problems caused by such break-ins may have a material adverse effect on our business.

Although our license agreements with our customers contain provisions designed to limit our exposure as a result of the defects listed above, such provisions may not be effective. Existing or future Federal, state, or local laws or ordinances or unfavorable judicial decisions could affect their enforceability. To date, we have not experienced any such product liability claims, but there can be no assurance that this will not occur in the future. Because our products are used in essential business applications, a successful product liability claim could have a material adverse effect on our business, operating results, and financial condition. Additionally, defending such a suit, regardless of its merits, could entail substantial expense and require the time and attention of key management.

Table of Contents

Growth in Our Operations Could Increase Demands on Our Managerial and Operational Resources.

If the scope of our operating and financial systems and the geographic distribution of our operations and customers increase dramatically, it may increase demands on our management and operations. Our officers and other key employees will need to implement and improve our operational, customer support and financial control systems and effectively expand, train and manage our employee base.

Further, we may be required to manage an increasing number of relationships with various customers and other third parties. We may not be able to manage future expansion successfully, and our inability to do so could harm our business, operating results and financial condition.

Our Stock Price Is Volatile and There Is a Risk of Litigation.

The trading price of our common stock has in the past and may in the future be subject to wide fluctuations in response to factors such as the following:

revenue or results of operations in any quarter failing to meet the expectations, published or otherwise, of the investment community;

reduced investor confidence in equity markets, due in part to corporate collapses in recent years;

speculation in the press or analyst community;

wide fluctuations in stock prices, particularly with respect to the stock prices for other technology companies;

announcements of technological innovations by us or our competitors;

new products or the acquisition of significant customers by us or our competitors;

developments with respect to our copyrights or other proprietary rights or those of our competitors;

changes in interest rates;

changes in investors' beliefs as to the appropriate price-earnings ratios for us and our competitors;

changes in recommendations or financial estimates by securities analysts;

changes in management;

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

rumors or dissemination of false or misleading information, particularly through Internet chat rooms, instant messaging, and other rapid-dissemination methods;

conditions and trends in the software industry generally;

the announcement of acquisitions or other significant transactions by us or our competitors;

adoption of new accounting standards affecting the software industry;

general market conditions; and

domestic or international terrorism and other factors.

Fluctuations in the price of our common stock may expose us to the risk of securities class action lawsuits. Although no such lawsuits are currently pending against us and we are not aware that any such lawsuit is threatened to be filed in the future, there is no assurance that we will not be sued based on fluctuations in the price of our common stock. Defending against such suits could result in substantial cost and divert management's attention and resources. In addition, any settlement or adverse determination of such lawsuits could subject us to significant liability.

Table of Contents

We Cannot Predict Every Event and Circumstance That May Impact Our Business and, Therefore, the Risks and Uncertainties Discussed Above May Not Be the Only Ones You Should Consider.

The risks and uncertainties discussed above are in addition to those that apply to most businesses generally. In addition, as we continue to operate our business, we may encounter risks of which we are not aware at this time. These additional risks may cause serious damage to our business in the future, the impact of which we cannot estimate at this time.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS.

Foreign Currency. In the fiscal year ended April 30, 2003, we generated 11% of our revenues outside the United States. We typically make international sales through our foreign subsidiaries or our Logility subsidiary and denominated those sales typically in U.S. Dollars or British Pounds Sterling. However, expenses incurred in connection with these sales are typically denominated in the local currencies. The effect of foreign exchange rate fluctuations on us in fiscal 2003 was not material.

Interest rates and other market risks. We manage our interest rate risk by maintaining an investment portfolio of trading and held-to-maturity investments with high credit quality and relatively short average maturities. These instruments include, but are not limited to, money-market instruments, bank time deposits, and taxable and tax-advantaged variable rate and fixed rate obligations of corporations, municipalities, and national, state, and local government agencies, in accordance with an investment policy approved by our Board of Directors. These instruments are denominated in U.S. dollars. The fair market value of securities as of April 30, 2003 was approximately \$58.0 million.

We also hold cash balances in accounts with commercial banks in the United States and foreign countries. These cash balances represent operating balances only and are invested in short-term time deposits of the local bank. Such operating cash balances held at banks outside the United States are denominated in the local currency and are minor.

Many of our investments carry a degree of interest rate risk. When interest rates fall, our income from investments in variable-rate securities declines. When interest rates rise, the fair market value of our investments in fixed-rate securities declines. In addition, our investments in equity securities are subject to stock market volatility. Due in part to these factors, our future investment income may fall short of expectations or we may suffer losses in principal if forced to sell securities, which have seen a decline in market value due to changes in interest rates. We attempt to mitigate risk by holding fixed-rate securities to maturity, but, if our liquidity needs force us to sell fixed-rate securities prior to maturity, we may experience a loss of principal. We believe that a 10% fluctuation in interest rates would not have a material effect on our accompanying statements of operations.

Inflation. Although we cannot accurately determine the amounts attributable thereto, we have been affected by inflation through increased costs of employee compensation and other operational expenses. To the extent permitted by the marketplace for our products and services, we attempt to recover increases in costs by periodically increasing prices.

Table of Contents

AMERICAN SOFTWARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

April 30, 2003, 2002, and 2001

(1) Summary of Significant Accounting Policies

(a) Basis of Presentation

Founded in 1970 and headquartered in Atlanta, Georgia, American Software, Inc. and its subsidiaries (collectively, the Company) are engaged in the development, marketing, and support activities of a broad range of computer business application software products. The Company's operations are principally in the computer software industry, and its products and services are used by customers within the United States and certain international markets. The consolidated financial statements include the accounts of American Software, Inc., and its wholly and majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

(b) Revenue Recognition and Deferred Revenue

The Company recognizes revenue in accordance with Statement of Position (SOP) 97-2, *Software Revenue Recognition*, and SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, with Respect to Certain Transactions*.

License. License revenue in connection with license agreements for standard proprietary and tailored software are recognized upon delivery of the software, provided collection is considered probable, the fee is fixed or determinable, there is evidence of an arrangement, and vendor specific objective evidence (VSOE) exists with respect to any undelivered elements of the arrangement. For multiple-element arrangements, the Company recognizes revenue under the residual method as permitted by SOP 98-9, whereby (1) the total fair value of the undelivered elements, as indicated by VSOE, is deferred and subsequently recognized in accordance with SOP 97-2 and (2) the difference between the total arrangement fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements.

Maintenance. Revenue derived from maintenance contracts primarily includes telephone consulting, product updates, and releases of new versions of products previously purchased by the customer, as well as error reporting and correction services. Maintenance contracts are typically sold for a separate fee with initial contractual periods ranging from one to three years with renewal for additional periods thereafter. Maintenance fees are generally billed annually in advance. Maintenance revenue is recognized ratably over the term of the maintenance agreement. In situations where all or a portion of the maintenance fee is bundled with the license fee, VSOE for maintenance is determined based on prices when sold separately, which generally approximate 18% of the net license fee.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Services. Revenue derived from services primarily includes consulting, implementation, and training. Fees are billed under both time and materials and fixed fee arrangements and are recognized as services are performed. Reimbursements received for travel and other out-of-pocket expenses incurred in connection with consulting, implementation, and training services are classified as revenue in the statement of operations.

Indirect Channel Revenue. Sales are recognized through indirect channels only when a sale has been made by the distributor to an end-user. Revenue from indirect channels are recognized upon delivery of the software to the end-user assuming all other conditions of SOP 97-2 and SOP 98-9 are met.

Deferred Revenue. Deferred revenue represents advance payments or billings for software licenses, services, and maintenance billed in advance of the time revenue is recognized.

(c) Cost of Revenue

Cost of revenue for licenses includes amortization of capitalized computer software development costs, salaries and benefits, and royalties paid to third-party software vendors. Costs for maintenance and services include the cost of personnel to conduct implementations and customer support, consulting, and other personnel-related expenses.

(d) Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Table of Contents

AMERICAN SOFTWARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

April 30, 2003, 2002, and 2001

(e) Investments

Investments consist of money market funds, debt securities, and marketable equity securities. The Company accounts for its investments under the provisions of Statement of Financial Accounting Standards (SFAS) No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. Pursuant to the provisions of SFAS 115, the Company has classified its investment portfolio as trading and held-to-maturity. Trading securities are bought and held principally for the purpose of selling them in the near term and are recorded at fair value. Unrealized gains and losses on trading securities are included in the determination of net earnings. Held-to-maturity investments are recorded at amortized cost, adjusted for the amortization or accretion of premiums or discounts.

(f) Property and Equipment

Property and equipment are recorded at cost. Depreciation of buildings, computer equipment, and office furniture and equipment is calculated using the straight-line method based upon the estimated useful lives of the assets of 30 years, three to five years, and five years, respectively. Leasehold improvements are amortized using the straight-line method over the estimated useful lives of the assets or the related lease term, whichever is shorter.

(g) Capitalized Software Development Costs

The Company capitalizes certain computer software development costs in accordance with SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*. Costs incurred internally to create a computer software product or to develop an enhancement to an existing product are charged to expense when incurred as research and development expense until technological feasibility for the respective product is established. Thereafter, all software development costs are capitalized and reported at the lower of unamortized cost or net realizable value. Capitalization ceases when the product or enhancement is available for general release to customers. The Company makes ongoing evaluations of the recoverability of its capitalized software projects by comparing the amount capitalized for each product to the estimated net realizable value of the product. If such evaluations indicate that the unamortized software development costs exceed the net realizable value, the Company writes off the amount by which the unamortized software development costs exceed net realizable value. Capitalized software development costs are being amortized ratably based on the projected revenue associated with the related software or on a straight-line basis over three years, whichever method results in a higher level of amortization.

Capitalized software development costs consisted of the following at April 30, 2003 and 2002 (in thousands):

	<u>2003</u>	<u>2002</u>
Capitalized software development costs	\$ 17,465	\$ 27,387
Less accumulated amortization	10,194	19,596
	<u>\$ 7,271</u>	<u>\$ 7,791</u>

During the year ended April 30, 2003, the Company removed \$12.9 million of fully amortized capitalized computer software projects. There was no effect on the Company's Statement of Operations or the net amount of capitalized computer software development costs.

Total Expenditures, Amortization, and Write-offs. Total expenditures for capitalized computer software development costs, total research and development expense, total amortization of capitalized computer software development costs, and write-off of capitalized computer software costs are as follows:

	<u>Years ended April 30</u>		
	<u>2003</u>	<u>2002</u>	<u>2001</u>
	(In thousands)		
Total capitalized software development costs	\$ 2,978	\$ 3,288	\$ 3,949
Total research and development expense	5,116	7,209	11,340
	<u>\$ 8,094</u>	<u>\$ 10,497</u>	<u>\$ 15,289</u>
Total amortization of capitalized computer software development costs	\$ 3,498	\$ 3,946	\$ 3,790
Write-off of capitalized software development costs as a result of net realizable value analyses			9,446

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001***(h) Goodwill*

Goodwill represents the excess of costs over fair value of assets of businesses acquired. The Company adopted the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets*, as of May 1, 2002. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with the provisions of SFAS No. 142. SFAS No. 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*. At April 30, 2003, the Company had no intangible assets, as defined by SFAS No. 142 with indefinite useful lives or that were subject to amortization. Goodwill additions of approximately \$557,000 and \$517,000 relate to the purchase of the remaining interest in New Generation Computing during 2002 and 2001, respectively. Goodwill additions of \$253,000, \$130,000, and \$105,000 relate to the purchase of additional interests in Logility, Inc. (Logility) during 2003, 2002, and 2001, respectively.

In connection with SFAS No. 142's transitional goodwill impairment evaluation, the Company was required to perform an assessment of whether there was an indication that goodwill is impaired as of the date of adoption. To accomplish this, the Company was required to identify its reporting units and determine the carrying value of each reporting unit by assigning the assets and liabilities, including the existing goodwill and intangible assets, to those reporting units as of May 1, 2002. The Company was required to determine the fair value of each reporting unit and compare it to the carrying amount of the reporting unit within six months of May 1, 2002. The carrying amount of the Company's reporting units did not exceed the fair value of the reporting units. As such, there was no indication of impairment of the goodwill reported in the balance sheet and the Company was not required to recognize an impairment loss.

Prior to the adoption of SFAS No. 142, goodwill was amortized on a straight-line basis over the expected periods to be benefited, generally three to seven years, and assessed for recoverability by determining whether the amortization of the goodwill balance over its remaining life could be recovered through undiscounted future net operating cash flows expected to be derived from such assets. If such an evaluation indicated a potential impairment, the Company used the fair value to determine the amount of the goodwill that should be written off.

The changes in carrying values of goodwill for the year ended April 30, 2003 were as follows (in thousands):

	Enterprise resource planning	Collaborative Supply Chain Management	Total
Carrying value at April 30, 2002	\$ 1,812	\$ 2,280	\$ 4,092
Additional goodwill from purchases of additional interests in Logility		254	254

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Carrying value at April 30, 2003	\$ 1,812	\$ 2,534	\$ 4,346
----------------------------------	----------	----------	----------

Goodwill amortization expense totaled approximately \$1,152,000 and \$989,000 in 2002 and 2001, respectively. The impact of goodwill amortization on basic and diluted earnings (loss) per share is as follows (in thousands, except per share amounts):

	2003	2002	2001
Reported net earnings (loss)	\$ 7,586	\$ 18,701	\$ (22,580)
Add goodwill amortization		1,152	989
Adjusted net earnings (loss)	\$ 7,586	\$ 19,853	\$ (21,591)
Earnings (loss) per common share:			
Basic:			
As reported	\$ 0.34	\$ 0.82	\$ (0.99)
Add back goodwill amortization		0.05	0.04
Adjusted earnings (loss) per share	\$ 0.34	\$ 0.87	\$ (0.95)
Diluted:			
As reported	\$ 0.33	\$ 0.82	\$ (0.99)
Add back goodwill amortization		0.05	0.04
Adjusted earnings (loss) per share	\$ 0.33	\$ 0.87	\$ (0.95)

(i) *Income Taxes*

The Company accounts for income taxes using the asset and liability method of SFAS No. 109, *Accounting for Income Taxes*. Under the asset and liability method of SFAS No. 109, deferred tax assets and liabilities are recognized for the future tax

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001**

consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under SFAS No. 109, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

(j) Earnings (Loss) Per Common Share

Basic earnings (loss) per common share available to common shareholders are based on the weighted average number of Class A and B common shares outstanding, since the Company considers the two classes of common stock as one class for the purposes of the per share computation. Diluted earnings (loss) per common share available to common shareholders are based on the weighted average number of common shares outstanding and dilutive potential common shares, such as dilutive stock options.

The numerator in calculating both basic and diluted earnings (loss) per common share for each year is the same as net earnings (loss). The denominator is based on the following number of common shares:

	Years ended April 30		
	2003	2002	2001
	(In thousands)		
Common shares:			
Weighted average common shares outstanding:			
Class A shares	18,390	18,691	18,648
Class B shares	4,021	4,082	4,082
Basic weighted average common shares outstanding	22,411	22,773	22,730
Dilutive effect of outstanding Class A common stock options outstanding	721	138	
Total	23,132	22,911	22,730

For the years ended April 30, 2003, 2002, and 2001, approximately 1,982,000, 4,008,000, and 3,768,000 stock options, respectively, were excluded from the computation of diluted loss per share because they were antidilutive.

(k) Use of Estimates

The preparation of the consolidated financial statements requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the period. Significant items subject to such estimates and assumptions include the carrying amount of property and equipment; valuation allowance for receivables and deferred income tax assets; and obligations related to employee benefits. Actual results could differ from those estimates.

(l) Impairment of Long-Lived Assets

The Company adopted SFAS No. 144 on May 1, 2002. In accordance with SFAS No. 144, long-lived assets, such as property and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of would be separately presented in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of a disposed group classified as held for sale would be presented separately in the appropriate asset and liability sections of the balance sheet. Prior to the adoption of SFAS No. 144, the Company accounted for long-lived assets in accordance with SFAS No. 121, *Accounting for Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of*. The adoption of SFAS No. 144 did not affect the Company's consolidated financial condition or results of operations.

(m) Stock Compensation Plans

The Company applies the intrinsic-value-based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations including Financial Accounting Standards

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001**

Board (FASB) Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation*, an interpretation of APB Opinion No. 25, to account for its fixed-plan stock options. Under this method, compensation expense is recorded on the date of grant only if the current market price of the underlying stock exceeds the exercise price. SFAS No. 123, *Accounting for Stock-Based Compensation*, established accounting and disclosure requirements using a fair-value-based method of accounting for stock-based employee compensation plans. As allowed by SFAS No. 123, the Company has elected to continue to apply the intrinsic-value-based method of accounting described above, and has adopted only the disclosure requirements of SFAS No. 123. Accordingly, no compensation cost has been recognized for the Company's stock option plans. Following are the assumptions used in calculating the pro forma option expense amounts under SFAS No. 123 using the Black-Scholes option pricing model:

	<u>2003</u>	<u>2002</u>	<u>2001</u>
Dividend yield	0%	0%	0%
Expected volatility	48.5%	80.0%	121.2%
Risk-free interest rate	3.3%	4.9%	5.9%
Expected life	8 years	8 years	8 years

The following table illustrates the effect on net earnings (loss) if the fair-value-based method had been applied in each period.

	<u>Years ended April 30</u>		
	<u>2003</u>	<u>2002</u>	<u>2001</u>
	(In thousands, except per share data)		
Net earnings (loss) as reported	\$ 7,586	\$ 18,701	\$ (22,580)
Less total stock-based compensation expense determined under fair value based method for all awards	(2,889)	(3,100)	(4,441)
Pro forma net earnings (loss)	\$ 4,697	\$ 15,601	\$ (27,021)
Basic earnings (loss) per share:			
As reported	0.34	0.82	(0.99)
Pro forma	0.21	0.69	(1.19)
Diluted earnings (loss) per share:			
As reported	0.33	0.82	(0.99)
Pro forma	0.20	0.68	(1.19)

(n) Reclassifications

Certain reclassifications have been made to the 2002 and 2001 consolidated financial statements to conform to the presentation adopted in 2003.

(o) Comprehensive Income (Loss)

The Company has adopted SFAS No. 130, *Reporting Comprehensive Income*. SFAS No. 130 establishes standards for reporting and presentation of comprehensive income and its components in a full set of financial statements. Comprehensive income (loss) consists of net earnings (loss) and foreign currency translation adjustments and is presented in the consolidated statements of shareholders' equity and comprehensive income (loss). SFAS No. 130 requires only additional disclosures in the consolidated financial statements; it does not affect the Company's consolidated financial position or results of operations.

(p) Recent Accounting Pronouncements

In June 2001, the FASB issued Statement No. 143, *Accounting for Asset Retirement Obligations* (SFAS 143). SFAS 143 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS 143 applies to all entities. SFAS 143 applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development or the normal operation of a long-lived asset, except for certain lease obligations. SFAS 143 is effective for financial statements issued for fiscal years beginning after June 15, 2002, which means that the Company must adopt SFAS 143 for its fiscal year ending April 30, 2004. The Company does not anticipate the adoption of SFAS 143 to have a material effect on its consolidated financial condition or results of operations.

In June 2002, the FASB issued Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146). Under the new rules, an issuer may only recognize a liability for a cost associated with an exit or disposal activity when the

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001**

liability is incurred. Under the previous guidance of EITF No. 94-3, issuers recognized a liability for exit costs at the date of an entity's commitment to an exit plan. SFAS 146 is effective for exit or disposal activities that are initiated after December 31, 2002. The adoption of SFAS 146 had no material impact on the Company's consolidated financial condition, results of operations or cash flows.

In December 2002, the FASB issued Statement No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure, an amendment of FASB Statement No. 123* (SFAS 148). SFAS 148 amends FASB Statement No. 123, *Accounting for Stock-Based Compensation*, (SFAS 123) to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of SFAS 123 to require prominent disclosures in both annual and interim financial statements. The Company adopted SFAS 148 for its fiscal year ended April 30, 2003 and the required disclosures are presented in its consolidated financial statements.

In May 2003, the FASB issued Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity* (SFAS 150), which is effective at the beginning of the first interim period beginning after June 15, 2003. SFAS 150 establishes standards for the classification of liabilities in the financial statements that have characteristics of both liabilities and equity. The adoption of SFAS 150 is not expected to have a material effect on the Company's consolidated financial condition or results of operations.

(2) Investments

Investments consist of the following:

	April 30	
	2003	2002
	(In thousands)	
Trading:		
Debt securities:		
U.S. Treasury securities	\$ 7,309	\$ 6,089
Tax-exempt state and municipal bonds	836	928
Total debt securities	8,145	7,017
Marketable equity securities	3,268	3,418

	\$ 11,413	\$ 10,435
--	-----------	-----------

April 30, 2003

	Carrying value	Fair value	Unrealized gain (loss)
(In thousands)			
Held-to-maturity:			
Government securities	\$ 9,113	\$ 9,114	\$ 1
Commercial paper	6,993	6,998	5
Corporate bonds	2,334	2,333	(1)
	\$ 18,440	\$ 18,445	\$ 5

April 30, 2002

	Carrying value	Fair value	Unrealized gain (loss)
(In thousands)			
Held-to-maturity:			
Government securities	\$ 2,441	\$ 2,435	\$ (6)
Commercial paper	5,991	5,996	5
Corporate bonds	6,959	6,971	12
	\$ 15,391	\$ 15,402	\$ 11

The total carrying value of all investments on a consolidated basis was approximately \$29,853,000 and \$25,826,000 at April 30, 2003 and 2002, respectively. All held-to-maturity investments at April 30, 2003 are included in investments-current in the accompanying consolidated balance sheet, as all held-to-maturity investments mature in the following year.

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001**

In 2003, 2002, and 2001, the Company's investment portfolio of trading securities experienced net unrealized holding gains (losses) of approximately \$78,000, \$396,000, and \$(1,073,000), respectively, which have been included in other income, net in the accompanying consolidated statements of operations.

(3) Fair Value of Financial Instruments

The Company's financial instruments, excluding investments, consisted of cash and cash equivalents; trade accounts receivable and unbilled accounts receivable; accounts payable; accrued compensation and related costs; and other current liabilities. The carrying amounts of these financial instruments approximate fair value because of their short-term maturities. For the Company's investments classified as trading, the carrying value represents fair value. See note 2 for the fair value of the Company's investments classified as held-to-maturity.

(4) Property and Equipment

Property and equipment consist of the following at April 30, 2003 and 2002 (in thousands):

	<u>2003</u>	<u>2002</u>
Buildings and leasehold improvements	\$ 16,447	\$ 16,475
Computer equipment and purchased software	10,002	16,030
Office furniture and equipment	3,896	3,982
	<u>30,345</u>	<u>36,487</u>
Less accumulated depreciation	21,427	26,063
	<u>\$ 8,918</u>	<u>\$ 10,424</u>

(5) Income Taxes

Income tax benefit consists of the following:

	Year ended April 30		
	2003	2002	2001
	(In thousands)		
Current:			
Federal	\$	\$	\$ (2,418)
State			
	—	—	—
			(2,418)
	—	—	—
Deferred:			
Federal			
State			
	—	—	—
	—	—	—
	\$	\$	\$ (2,418)

The Company's effective income tax rate differs from the expected income tax expense (benefit) calculated by applying the Federal statutory rate of 34% to income (loss) from continuing operations before income taxes as follows:

	Years ended April 30		
	2003	2002	2001
	(In thousands)		
Computed expected income tax expense (benefit)	\$ 1,871	\$ 2,445	\$ (5,717)
Increase (decrease) in income taxes resulting from:			
State income taxes, net of Federal income tax effect	134	664	(1,092)
IRS settlement			(2,957)
Tax-exempt interest income	(16)	(16)	(54)
Change in valuation allowance for deferred tax assets	(2,692)	(5,015)	7,671
AmQUEST net operating loss		1,986	
Other	703	(64)	(269)
	\$	\$	\$ (2,418)

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001**

The significant components of deferred income tax expense attributable to income (loss) from continuing operations before income taxes for the years ended April 30, 2003, 2002, and 2001 are as follows:

	Years ended April 30		
	2003	2002	2001
	(In thousands)		
Deferred tax expense (benefit)	\$ 2,692	\$ 5,015	\$ (7,671)
(Decrease) increase in beginning-of-the year balance of the valuation allowance for deferred tax assets	(2,692)	(5,015)	7,671
	\$	\$	\$

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at April 30, 2003 and 2002 are presented as follows:

	2003	2002
	(In thousands)	
Deferred tax assets:		
Expenses, due to accrual for financial reporting purposes	\$ 477	\$ 565
Accounts receivable, due to allowance for doubtful accounts	285	329
Compensation expense related to grants of nonqualified stock options	244	290
Net operating loss carryforwards	6,762	8,914
Intangible assets	922	922
Gain on investments not recognized for tax purposes	425	261
General business credits and other	755	908
Total gross deferred tax assets	9,870	12,189
Less valuation allowance	(6,491)	(9,183)
Net deferred tax assets	3,379	3,006
Deferred tax liabilities:		
Capitalized computer software development costs	(1,115)	(1,312)

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Other	(2,264)	(1,694)
	<u> </u>	<u> </u>
Total gross deferred tax liabilities	(3,379)	(3,006)
	<u> </u>	<u> </u>
Net deferred tax liability	\$	\$
	<u> </u>	<u> </u>

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon reversal of deferred tax liabilities, management believes it is more likely than not the Company will realize the benefits of these deductible differences, net of the existing valuation allowances, at April 30, 2003 and 2002.

At April 30, 2003, the Company has net operating loss carry forwards for federal income tax purposes of approximately \$13 million which are available to offset future federal taxable income, if any, through 2022.

(6) Acquisitions and Dispositions

In July 1998, the Company purchased an 80% majority interest in New Generation Computing, Inc. (NGC), a company which specializes in accounting and manufacturing control software for the sewn goods industry (apparel, handbags, shoes, hats, etc.). The related goodwill of \$1.4 million was being amortized over a seven-year period until May 1, 2002 at which time amortization ceased in accordance with SFAS No. 142. During 2002, 2001, and 2000, the Company purchased the remaining 20% interest in NGC for approximately \$557,000, \$517,000, and \$658,000, respectively, which was recorded as goodwill. The acquisition has been accounted for as a purchase and, accordingly, the results of operations have been included since the date of acquisition.

In January 1996, the Company acquired a 60% interest in Intellimedia Commerce, Inc. (Intellimedia), a company which builds and maintains systems for commerce on the Internet, for \$850,000. In April 1998, the Company acquired an additional 3% interest in Intellimedia for \$115,000. To maintain its majority ownership interest, the Company invested an additional \$367,500 in 2000. The

Table of Contents

AMERICAN SOFTWARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

April 30, 2003, 2002, and 2001

acquisition has been accounted for as a purchase and, accordingly, the results of operations have been included since the date of acquisition. In January 2001, the Intellimedia Board of Directors voted to wind down the company due to a substantial slowdown in their industry. The Company wrote off the investment in Intellimedia in January 2001. The total amount written off was \$965,000.

Effective February 5, 2002, the Company signed an agreement with Infocrossing, Inc. to sell AmQUEST, Inc. (AmQUEST), a wholly owned subsidiary that provides information technology services, business continuity services, and systems and network management services in various industries. Upon completion of the sale, Infocrossing paid approximately \$20,284,000 in cash in exchange for all of the outstanding shares of AmQUEST. In fiscal year 2003 approximately \$650,000 was paid by the Company to Infocrossing to resolve the final adjustment of the purchase price for the sale of AmQUEST.

AmQUEST generated losses from operations of approximately \$1,866,000 and \$8,183,000 for the years ended April 30, 2002, and 2001, respectively. The Company recorded a gain of \$2,084,000 and \$13,376,000 on the sale of AmQUEST in 2003 and 2002, respectively. The total gain on the sale of approximately \$15,460,000 is net of certain closing costs, lease commitments, and costs related to commitments to subscribe to AmQUEST services.

At April 30, 2003 and 2002, there were no assets related to the discontinued AmQUEST segment. Liabilities at April 30, 2003 consisted of approximately \$50,000 of lease commitments and \$840,000 of costs related to commitments for AmQUEST services. Liabilities at April 30, 2002 consisted of approximately \$2,450,000 of lease commitments, \$900,000 of costs related to commitments for AmQUEST services, \$547,000 of accrued compensation for compensatory options to purchase shares of the Company that were granted in 2002 but not issued until 2003, and \$450,000 in accrued closing costs.

AmQUEST's revenues prior to the sale for the years ended April 30, 2002 and 2001 were \$12,395,000 and \$15,958,000, respectively. The consolidated financial statements and related notes for all periods have been reclassified, where applicable, to reflect the AmQUEST business as a discontinued operation.

(7) Asset Impairment and Restructuring

During October 2000, the Company recognized a charge against earnings of \$9.5 million related to the complete write-off of certain capitalized software development costs which was included as a component of cost of revenues license fees in the accompanying 2001 statement of operations. This write-off was the result of lower than anticipated sales of certain of the Company's products in the enterprise resource planning (ERP) segment in recent periods and the anticipation that future cash flows from sales of these particular ERP products would be minimal. The Company also recognized a restructuring charge of approximately \$1,012,000 in fiscal year 2001, which was a result of severance expenses for involuntary termination of employees in sales, marketing, services, and research and development. Included in the charge was a noncash charge

of approximately \$270,000 related to the accelerating of vesting of stock options for the severed employees. The restructuring plan was completed by April 30, 2001.

(8) Shareholders Equity

Certain Class A and Class B Common Stock Rights

Except for the election or removal of Directors and class votes as required by law or the Articles of Incorporation, holders of both classes of common stock vote as a single class on all matters with each share of Class A common stock entitled to cast one-tenth vote per share and each share of Class B common stock entitled to cast one vote per share. Neither has cumulative voting rights. Holders of Class A common stock, as a class, are entitled to elect 25% of the board of directors (rounded up to the nearest whole number of Directors) if the number of outstanding shares of Class A common stock is at least 10% of the number of outstanding shares of both classes of common stock. No cash or property dividend may be paid to holders of shares of Class B common stock during any fiscal year of the Company unless a dividend of \$0.05 per share has been paid in such year on each outstanding share of Class A common stock. This \$0.05 per share annual dividend preference is noncumulative. Dividends per share of Class B common stock during any fiscal year may not exceed dividends paid per share of Class A common stock during each year. Each share of Class B common stock is convertible at any time into one share of Class A common stock at the option of the shareholder. Class A and B shares are considered as one class for purpose of the earnings (loss) per share computation.

Employee Stock Purchase Plan

In December 1998 the Company began an Employee Stock Purchase Plan that offers its employees the right to purchase shares of the Company's common stock at 85% of the market price, as defined, pursuant to the Employee Stock Purchase Plan (the Purchase Plan). Under the Purchase Plan, full-time employees, except persons owning 5% or more of the Company's common stock, are eligible to participate after one month of employment. Employees may contribute up to 15% of their annual salary toward the

Table of Contents

AMERICAN SOFTWARE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

April 30, 2003, 2002, and 2001

Purchase Plan up to a maximum of \$15,000 per year. During the fiscal year ended April 30, 2003, shares purchased on the open market and issued under the Purchase Plan were 5,996.

In November 1998, Logility, Inc., a subsidiary of the Company, began an Employee Stock Purchase Plan that offers its employees the right to purchase shares of Logility's common stock at 85% of the market price, as defined, pursuant to the Employee Stock Purchase Plan (the Subsidiary Purchase Plan). Under the Subsidiary Purchase Plan, full-time employees, except persons owning 5% or more of Logility's common stock, are eligible to participate after one month of employment. Employees may contribute up to 15% of their annual salary toward the Subsidiary Purchase Plan up to a maximum of \$15,000 per year. A maximum of 200,000 shares of common stock may be purchased under the Subsidiary Purchase Plan. Common stock is purchased in the open market on behalf of the participants. The Company contributes to the purchase price in order to provide for the 15% discount to market price. Shares issued under the Subsidiary Purchase Plan were 22,462 during the fiscal year ended April 30, 2003.

Stock Option Plans

The Company has outstanding stock options granted pursuant to three stock option plans. The 1991 Employee Stock Option Plan (the Employee Option Plan) and the Directors and Officers Stock Option Plan (the Directors and Officers Option Plan) were adopted in 1991. These Plans were terminated and replaced by the 2001 Stock Option Plan (the 2001 Option Plan) effective September 1, 2000. Options outstanding under the Employee Option Plan and the Directors and Officers Option Plan remain in effect, but no new options may be granted under those plans.

Under the 2001 Stock Option Plan, options to purchase Class A common shares are granted in the form of both incentive stock options and non-qualified stock options. The number of options granted under this plan is determined with each grant, except with respect to non-employee directors, who receive grants of non-qualified options to purchase 5,000 shares upon election and 3,000 shares at the end of each fiscal quarter. The price of such grants is equal to the closing market price of the shares on the date of grant. Options are exercisable based on the terms of such options, but no more than 10 years after the date of grant (or 5 years for incentive stock options granted to any person who owns 10% or more of the combined voting power of all classes of capital stock of the Company at the time of grant). A total of 2,975,000 shares are authorized for issuance pursuant to options granted under this Plan.

In February 2000, the Company modified its stock option plans to allow the exercise of options beyond the initial three-month allowance from the termination date of an option holder's employment, but not to exceed 10 years, for retired employees, as defined, or any employee designated by the board of directors at its sole discretion. This right was granted to certain employees during 2002 and 2001 and resulted in a compensation charge of approximately \$65,000 and \$265,000, respectively, for the difference between the original exercise price of the option and the fair market value of the Company's common stock at the date the right was granted.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Incentive and nonqualified options exercisable at April 30, 2003 are 2,125,692 and 913,180, respectively. Options available for grant at April 30, 2003, for the 2001 Plan are 783,991 shares.

Effective August 7, 1997, Logility Inc., a subsidiary of the Company, adopted the Logility, Inc. 1997 Stock Plan (Subsidiary Stock Plan). The Subsidiary Stock Plan provides for grants of incentive stock options and nonqualified stock options to certain key employees and directors of Logility, Inc. The Subsidiary Stock Plan also allows for stock appreciation rights in lieu of or in addition to stock options. Options to purchase a maximum of 1.2 million shares of common stock and a maximum of 300,000 units of Stock Appreciation Rights (SARs), as defined, may be granted under the Subsidiary Stock Plan. The options generally vest over a four-year period. The terms of the options generally are for ten years. There have been no SARs granted to date.

A summary of the status of the Company's stock option plans as of April 30, 2003, 2002, and 2001 and changes during the years ended on those dates is presented below:

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001****(9) International Revenue and Significant Customer**

International revenue approximated \$6.5 million or 11%, \$7.4 million or 11%, and \$8.5 million or 12% of consolidated revenue for the years ended April 30, 2003, 2002, and 2001, respectively, and was derived primarily from customers in Canada and Europe.

One customer accounted for approximately 11% of consolidated revenue for the years ended April 30, 2003 and 2002. Accounts receivable from this customer were \$508,000 and \$1,869,000 at April 30, 2003 and 2002, respectively. No individual customer accounted for more than 10% of consolidated revenue for the year ended April 30, 2001.

(10) Commitments*Leases*

The Company leases an office facility from a partnership controlled by the two Class B shareholders, under an operating lease that by its term expired December 31, 1996. An extension of that lease, on a month-to-month basis, has been approved by the board of directors. Amounts expensed under this lease for each of the years ended April 30, 2003, 2002, and 2001 approximated \$300,000.

The Company leases other office facilities and equipment under various operating leases expiring through 2005. Rental expense for these leases approximated \$861,000, \$788,000, and \$911,000 for the years ended April 30, 2003, 2002, and 2001, respectively.

Future minimum lease payments under noncancelable operating leases (with initial or remaining lease terms in excess of one year) as of April 30, 2003 are as follows:

Year ending April 30:

2004	\$ 210
2005	96
2006	8
Thereafter	

Total minimum lease payments	\$ 314
------------------------------	--------

401(k) Profit Sharing Plan

Employees are offered the opportunity to participate in the Company's 401(k) Profit Sharing Plan (the 401(k) Plan), which is intended to be a tax-qualified defined contribution plan under Section 401(k) of the Internal Revenue Code. Under the 401(k) Plan, employees are eligible to participate on the first day of the month following the date of hire. Eligible employees may contribute up to 15% of pretax income to the 401(k) Plan. Subject to certain limitations, the Company may make a discretionary profit sharing contribution at an amount determined by the board of directors of the Company. The Company did not make profit sharing contributions for 2003, 2002, or 2001.

Through December 31, 2001, the Company contributed an employer match in an amount equal to 25% of the eligible participant's compensation contributed to the Plan subject to a maximum of 6% of compensation. The Company's matching contributions totaled \$281,492 and \$404,230 for 2002 and 2001, respectively.

Effective January 1, 2002, the Company amended the 401(k) Plan to discontinue the matching contributions. The 401(k) Plan was further amended to allow the Company to make a discretionary matching contribution at a rate to be determined by the Company. No discretionary matching contributions have been made subsequent to January 1, 2002.

(11) Contingencies

The Company is involved in various claims arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse affect on the financial position or results of operations of the Company.

(12) Segment information

The Company operates and manages its business in three segments based on software and services provided in three key product markets: (i) Collaborative Supply Chain Management, which provides collaborative supply chain solutions to streamline and optimize the production, distribution and management of products between trading partners; (ii) Enterprise Resource Planning (ERP), which

Table of Contents**AMERICAN SOFTWARE, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****April 30, 2003, 2002, and 2001**

automates customers' internal financing, human resources, and manufacturing functions; and (iii) IT Consulting, which consists of IT staffing and consulting services.

Independent Auditors Report

The Board of Directors and Shareholders

American Software, Inc.:

We have audited the accompanying consolidated balance sheets of American Software, Inc. and subsidiaries as of April 30, 2003 and 2002, and the related consolidated statements of operations, shareholders' equity and comprehensive income (loss), and cash flows for each of the years in the three-year period ended April 30, 2003. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of American Software, Inc. and subsidiaries as of April 30, 2003 and 2002, and the results of their operations and their cash flows for each of the years in the three-year period ended April 30, 2003 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the consolidated financial statements, effective May 1, 2002, the Company adopted Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets.

None.

PART III**ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT**

The directors and executive officers of the Company are:

<u>Name</u>	<u>Age</u>	<u>Position</u>
James C. Edenfield	68	President, Chief Executive Officer, Treasurer and Director; Chairman of the Board of Directors of Logility, Inc.
Thomas L. Newberry	70	Chairman of the Board of Directors
J. Michael Edenfield	45	Director, Executive Vice President; President and Director of Logility, Inc.
David H. Gambrell	73	Director
Dennis Hogue	50	Director
John J. Jarvis	61	Director
James B. Miller Jr	63	Director
Thomas L. Newberry, V	36	Director
Jeffrey W. Coombs	51	Executive Vice President of American Software USA, Inc.
Vincent C. Klings	40	Chief Financial Officer
James R. McGuone	56	Secretary

All directors hold office until the next annual meeting of the shareholders of the Company. Executive officers of the Company are elected annually and serve at the pleasure of the Board of Directors.

Mr. James C. Edenfield is one of our co-founders and has served as our Chief Executive Officer since November 1989, and as Co-Chief Executive Officer for more than five years prior to that time. He has been a Director since 1971. Prior to founding American Software, Mr. Edenfield held several executive positions and was a director of Management Science America, Inc., an applications software development and sales company. He holds a Bachelor of Industrial Engineering degree from the Georgia Institute of Technology. Mr. Edenfield also serves as Chairman of the Board of Directors of Logility, Inc., our majority owned subsidiary.

Dr. Newberry is one of our co-founders and has served as our Chairman of the Board since November 1989, and was Co-Chief Executive Officer prior to that for more than five years. He has been a Director since 1971. Prior to founding American Software, he held executive positions with several companies engaged in computer systems analysis and software development and sales including Management Science

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

America, Inc., where he was also a director. Dr. Newberry holds Bachelor, Master of Science, and Ph.D. degrees in Industrial Engineering from the Georgia Institute of Technology.

Mr. J. Michael Edenfield was elected as a Director of American Software on June 1, 2001. He has served as our Executive Vice President since June 1994. In January 1997, Mr. Edenfield was elected to President of Logility, Inc., a majority owned subsidiary of ours. Mr. Edenfield also serves as director of Logility, Inc. From June 1994 to October 1997, he served as Chief Operating Officer of the Company. Prior to holding that position, he served as Senior Vice President of North American Sales and Marketing of American Software USA, Inc. from July 1993 to June 1994, as Senior Vice President of North American Sales from August 1992 to July 1993, as Group Vice President from May 1991 to August 1992 and as Regional Vice President from May 1987 to May 1991. Mr. Edenfield holds a Bachelor of Industrial Management degree from the Georgia Institute of Technology. Mr. Edenfield is the son of James C. Edenfield, our Chief Executive Officer.

Mr. Gambrell has served as a Director of American Software since January 1983. He has been a practicing attorney since 1952, and is a partner with the law firm of Gambrell & Stolz, L.L.P., counsel to us. He served as a member of the United States Senate from the State of Georgia in 1971 and 1972. Mr. Gambrell holds a Bachelor of Science degree from Davidson College and a J.D. degree from the Harvard Law School.

Mr. Hogue became Chief Executive Officer of Datatrac Corporation in July 2003. Datatrac is a software developer and wireless communications provider for the expedited delivery industry. Previously, he served as Chief Executive Officer and President of

Table of Contents

Mercari Technologies from April 2002 to June 2003. Prior to joining Mercari Technologies, he served as Chief Executive Officer of Global Food Exchange from January 2001 to March 2002. Prior to joining Global Food Exchange, Mr. Hogue served as President and Chief Executive Officer of E3. Mr. Hogue served as Vice President of Sales of that company from November 1996 until April 1997 and President of North America for E3 from April 1997 to December 1999. He earned a Bachelor of Science degree in Psychology from Florida State University in 1974.

Dr. Jarvis was elected as a Director of American Software on June 1, 2001. He is currently Executive Director of The Logistics Institute Asia Pacific, which is a collaboration between the National University of Singapore and the Georgia Institute of Technology. From 1990 to 2001, he was Chair of the School of Industrial and Systems Engineering at the Georgia Institute of Technology, where he has been a member of the faculty since 1968. Dr. Jarvis was co-founder of CAPS Logistics, Inc., a provider of software and consulting services in logistics, which was acquired by Baan NV in 1998. Dr. Jarvis has served as President of the Institute of Industrial Engineers (IIE), President of TIMS and Secretary of ORSA. He has served on the Councils of ORSA and TIMS and on the Boards of the Institute for Operations Research and Management Sciences (INFORMS) and IIE. Dr. Jarvis holds a Bachelor and Masters of Science degree in Industrial Engineering from the University of Alabama and a Ph.D. from Johns Hopkins University.

Mr. Miller was elected as a Director of American Software on May 15, 2002. He is presently the Chairman, President and Chief Executive Officer of Fidelity National Corporation, the parent company of Fidelity National Bank since 1979. He is also currently Chairman of Fidelity National Bank and Fidelity National Capital Investors, Inc. Mr. Miller serves on the Boards of Directors of many business and civic activities, including Interface, Inc., Vanderbilt University School of Law, Alumni Board, DeKalb County Employees Pension Board, Michael C. Carlos Museum, Emory University. Mr. Miller holds a Bachelor of Arts degree from Florida State University, and a law degree from Vanderbilt University School of Law.

Mr. Newberry, V was elected as a Director of American Software on June 1, 2001. He is the founder of The 1% Club, Inc. and has acted as its Chief Executive Officer since its founding. He is also the author of motivational books and audio programs dedicated to improving performance in business operations and salesmanship. Mr. Newberry, V holds a Bachelor of Science degree from Georgia State University.

Mr. Coombs first joined American Software in January 1985. In 1988 he was elected Vice President of Professional Services. From May 1994 to February 1996, Mr. Coombs was employed by Indus International, Inc. (formerly known as TSW International, Inc.) as Senior Vice President. Mr. Coombs rejoined us in February 1996 as Senior Vice President of Professional Services. In April 2001, Mr. Coombs was promoted to Executive Vice President of American Software USA, Inc. From March 1978 to June 1984 Mr. Coombs was employed by Saudi Arabian Airlines as a Project Manager in Information Technology. Prior to that time Mr. Coombs held various positions with the Northern Bank Ltd., Belfast.

Mr. Klinges joined American Software in February 1998 as Vice President of Finance. In September, 1999 Mr. Klinges was promoted to Chief Financial Officer. In September 1999, Mr. Klinges became the Chief Financial Officer of Logility, Inc. From July 1995 to February 1998, Mr. Klinges was employed by Indus International, Inc. (formerly known as TSW International, Inc.), as Controller. From November 1986 to July 1995, Mr. Klinges held various positions with Dun & Bradstreet, Inc., including Controller of Sales Technologies, a software division of Dun & Bradstreet Inc. Mr. Klinges holds a Bachelor of Business Administration from St. Bonaventure University.

Mr. McGuone was elected as our Secretary in May 1988. He has been a practicing attorney since 1972, and is a partner with the law firm of Holland & Knight, L.L.P., counsel to American Software. Mr. McGuone holds a B.A. degree from Pennsylvania State University and a J.D. degree from Fordham University School of Law.

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

Section 16(a) Beneficial Ownership Reporting Compliance. Section 16(a) of the Securities Exchange Act of 1934 (the Exchange Act) requires our officers and directors, and persons who own more than 10% of a registered class of our equity securities, to file reports of ownership and changes in ownership with the Securities and Exchange Commission (the SEC). Officers, directors and holders of more than 10% of the Common Stock are required by regulations promulgated by the SEC pursuant to the Exchange Act to furnish us with copies of all Section 16(a) forms they file. We assist officers and directors in complying with the reporting requirements of Section 16(a) of the Exchange Act.

Based upon a review by the Company of filings made under Section 16(a) of the Exchange Act and representations from its directors and officers, all Section 16(a) filing requirements applicable to its directors, officers and greater than 10% beneficial owners were complied with, except that the Company inadvertently filed on behalf of its outside directors the report of the October 31, 2002 stock option grants eight days after they were required to be filed.

ITEM 11. EXECUTIVE COMPENSATION

This information is set forth under the caption "Certain Information Regarding Executive Officers and Directors" in the Company's Proxy Statement for the 2003 Annual Meeting of Shareholders (the "Proxy Statement"), which information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

This information is set forth under the captions "Certain Information Regarding Executive Officers and Directors - Stock Option Exercises and Outstanding Options" and "Voting Securities Security Ownership" in the Proxy Statement, which information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Relationship with Logility, Inc. and Certain Transactions

On October 10, 1997, we completed an initial public offering of 2,200,000 shares of common stock in our subsidiary, Logility, Inc. ("Logility"). Prior to that time, Logility was a wholly-owned subsidiary of ours, operating as the supply chain planning software group, warehouse management software group and transportation management group. In anticipation of such offering, American Software and Logility entered into a number of agreements for the purpose of defining certain relationships between the parties (the "Intercompany Agreements"). The more significant of the Intercompany Agreements are summarized below. As a result of our ownership interest in Logility, the terms of such agreements were not the result of arms-length negotiation. Management of the Company believes, however, that the fees for the various services provided would not exceed fees that would be paid if such services were provided for independent third parties.

Services Agreement

American Software and Logility have entered into a Services Agreement (the "Services Agreement") with respect to certain services to be provided by us (or our subsidiaries) to Logility. The Services Agreement provides that such services are provided in exchange for fees equivalent to fees that would be paid if such services were provided by independent third parties. The services provided by us to Logility under the Services Agreement include, among other things, certain accounting, audit, cash management, corporate development, employee benefit plan administration, human resources and compensation, general and administration services, and risk management and tax services. In addition to these services, we have agreed to allow eligible employees of Logility to participate in certain employee benefit plans. Logility has agreed to reimburse us for costs (including any contributions and premium costs and including third-party expenses and allocations of certain personnel expenses), generally in accordance with past practice, relating to the participation by Logility's employees in any of our benefit plans.

The Services Agreement had an initial term of three years and is renewed automatically thereafter for successive one-year terms unless either American Software or Logility elects not to renew its term by giving proper notice. Logility will indemnify us against any damages that we may incur in connection with our performance of services under the Services Agreement (other than those arising from our gross negligence or willful misconduct), and we will indemnify Logility against any damages arising out of our gross negligence or willful misconduct in connection with our rendering of services under the Services Agreement. For the fiscal years 2003 and 2002 the services related to this agreement were valued at \$1.2 million and \$1.7 million, respectively.

Facilities Agreement

American Software and Logility have entered into a Facilities Agreement (the "Facilities Agreement"), which provides that Logility may occupy space located in certain facilities owned or leased by us (or our subsidiaries).

The Facilities Agreement has an initial term of two years and is renewed automatically thereafter for successive one-year terms unless either American Software or Logility elects not to renew its term. The Facilities Agreement may be terminated by Logility for any reason with respect to any particular facility upon thirty days' written notice. Logility's lease of space at any facility under the Facilities Agreement is limited by the term of the underlying lease between American Software and a landlord with respect to any facility leased by American Software and by the disposition by American Software of any facility owned by American Software. For the fiscal years 2003 and 2002 the services related to this agreement were valued at \$469,000 and \$509,000, respectively. Included in these costs are lease expense, utilities expense, telephone expense, and security expense.

Table of Contents

Tax Sharing Agreement

Logility is included in our federal consolidated income tax group, and Logility's federal income tax liability will be included in the consolidated federal income tax liability of American Software and its subsidiaries. Logility and American Software have entered into a Tax Sharing Agreement (the "Tax Sharing Agreement") pursuant to which American Software and Logility will make payments between them such that the amount of taxes to be paid by Logility, subject to certain adjustments, will be determined as though Logility were to file separate federal, state, and local income tax returns, rather than as a consolidated subsidiary of American Software. Pursuant to the Tax Sharing Agreement, under certain circumstances, Logility will be reimbursed for tax attributes that it generates after deconsolidation of Logility from the consolidated tax group of American Software, such as net operating losses and loss carryforwards. Such reimbursement, if any, will be made for utilization of Logility's losses only after such losses are utilized by American Software. For that purpose, all losses of American Software and its consolidated income tax group will be deemed utilized in the order in which they are recognized. Logility will pay American Software a fee intended to reimburse American Software for all direct and indirect costs and expenses incurred with respect to our share of the overall costs and expense incurred by us with respect to tax related services.

Technology License Agreement

American Software and Logility have entered into a Technology License Agreement (the "Technology License Agreement") pursuant to which Logility has granted us a non-exclusive, worldwide license to use, execute, reproduce, display, modify, and prepare derivatives of the *Logility Voyager Solutions* product line, provided such license is limited to maintaining and supporting users that have licensed *Logility Voyager Solutions* products from us. Pursuant to the Technology License Agreement, American Software and Logility are required to disclose to one another any and all enhancements and improvements which they may make or acquire in relation to a *Logility Voyager Solutions* product, subject to confidentiality requirements imposed by third parties. The term of the Technology License Agreement is indefinite, although Logility may terminate the Technology License Agreement for cause, and we may terminate the Technology License Agreement at any time upon sixty (60) days' prior written notice to Logility. Upon termination of the Technology License Agreement, all rights to *Logility Voyager Solutions* products licensed by Logility to American Software revert to Logility, while all rights to enhancements and improvements made by American Software to *Logility Voyager Solutions* products revert to us.

Marketing License Agreement

American Software USA, Inc. ("USA"), a wholly-owned subsidiary of American Software, and Logility have entered into a Marketing License Agreement (the "Marketing License Agreement") pursuant to which USA has agreed to act as a non-exclusive marketing representative of Logility for the solicitation of license agreements relating to the *Logility Voyager Solutions* product line. The Marketing License Agreement provides for the payment to USA of a commission equal to 30% of the net license revenue collected by Logility under license agreements for the *Logility Voyager Solutions* product line with certain end-users who are also licensees of software products of American Software which are secured and forwarded to Logility by USA and accepted by Logility. The Marketing License Agreement has a one-year term ending August 1, 2003, although either party may terminate the Marketing License Agreement at any time for its own convenience upon written notice to the other party. For the fiscal years 2003 and 2002 the services related to this agreement and a predecessor agreement were valued at \$102,000 and \$107,000, respectively.

Item 14. CONTROLS AND PROCEDURES

- (a) *Evaluation of Disclosure Controls and Procedures.* The Company's Chief Executive Officer and Chief Financial Officer have, within 90 days of the filing date of this report, evaluated the Company's internal controls and procedures designed to ensure that information

Edgar Filing: AMERICAN SOFTWARE INC - Form 10-K/A

required to be disclosed in reports under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within specified time periods. After such review, the Company's Chief Executive Officer and Chief Financial Officer have concluded that said information was accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

- (b) *Changes in Internal Controls.* There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the evaluation referred to in paragraph (a) above.

Item 15. PRINCIPAL ACCOUNTANT FEES AND SERVICES

This information is set forth under the caption "Independent Auditors' Audit Fees and All Other Fees" in the Proxy Statement, which information is incorporated herein by reference.

Independent Auditors Report

The Board of Directors and Shareholders

American Software, Inc.:

Under date of June 6, 2003, except as to note 14, which is as of July 9, 2003, we reported on the consolidated balance sheets of American Software, Inc. and subsidiaries as of April 30, 2003 and 2002, and the related consolidated statements of operations, shareholders' equity and comprehensive income (loss), and cash flows for each of the years in the three-year period ended April 30, 2003, which are included in the April 30, 2003 annual report on Form 10-K. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related consolidated financial statement schedule included in the Form 10-K. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.
