Item 4.02. Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review.

On February 1, 2006, Community Bancshares, Inc. (the Company) announced that it will restate its previously reported quarterly and year end results for 2004 and the first three quarters of 2005 as a result of its conclusion that an interest rate swap did not qualify for an abbreviated method of fair value hedge accounting.

In December 2003, the Company entered into a swap to hedge a pool of fixed rate certificates of deposit and accounted for the swap using an abbreviated method of fair value hedge accounting under SFAS 133, known as the short-cut method, which assumes that the hedging transactions are effective. In light of recent interpretations of SFAS 133 within the industry and discussions between the Company's officers and its independent accountants in consultation with the Chairman of the Company's Audit Committee, the Company's officers reevaluated this transaction and determined on February 1, 2006 that the swap did not qualify for the short-cut method in prior periods. While the Company believes that the swap has been and will continue to be a highly effective hedge of economic risk on a specified group of certificates of deposit, the Company will be restating its previously reported quarterly and year end results for 2004 and the first three quarters of 2005. The cumulative impact of this revised treatment reduced unaudited earnings by \$133,200, or \$0.01 per basic share, for the nine months ended September, 30, 2005 and \$172,800, or \$0.02 per basic share, for the year ended 2004. The restatement will have no impact on the Company's cash flows and no material impact on the Company's 2003 financial statements. In fact, since the Company intends to hold this swap until its maturity date on June 8, 2007, the Company expects to completely offset the impact on 2004 and 2005 as the fair market value increases to zero up until its maturity date notwithstanding quarterly fluctuations. If the swap is held to maturity as is intended, there will be no overall effect on book value per share as a result of fluctuations in the swap's fair market value over its 3.5 year life. Between the dates the interest rate swap was entered into and maturity or termination or sale of the swap, our earnings will fluctuate based upon changes in the fair value of the swap. The changes in earnings and shareholders' equity shown in the following tables will have the same effects on our book value per share.

The effect this restatement had on earnings for the affected periods is as follows (unaudited):
