Trend Micro Reports Second Quarter Results

All regions achieve double-digit growth; sales in small and medium business sector

highlight quarter

Tokyo, Japan August 10, 2006 Trend Micro, Inc. (TSE: 4704, NASDAQ: TMIC), a leader in network antivirus and Internet content security software and services, today announced earnings results for the second quarter 2006.

Trend Micro posted consolidated net sales of 20.08 billion Yen (or US \$174.98 million, 114.75 JPY = 1USD), operating income of 5.37 billion Yen (or US \$46.81 million) and net income of 3.04 billion Yen (or US \$26.52 million) for the second quarter 2006. These figures reflect an increase of 17% in net sales compared with the same period in the previous year. Operating income was down 2% from the same quarter in the previous year.

Following the revision of its deferred revenues, the company still continued to see steady growth around the world, with each of its regions achieving double-digit revenue growth during the second quarter of 2006. North American operations experienced 18 percent revenue growth year-on-year; Europe, Middle East and Africa (EMEA) experienced 15 percent growth; Japan 14 percent, and the Asia-Pacific region a 13 percent year-over-year increase in revenue. Continued, solid growth in the company's small and medium business solutions and consumer business helped boost worldwide revenue with 22 and 21 percent year-on-year increases respectively.

In the second quarter of 2006, we continue to benefit from solid growth in strategic markets such as North America. We are also very pleased with the growth we have sustained in areas such as the small and medium-sized business sector. said Eva Chen, CEO of Trend Micro. We believe the commitment we have to protecting our customers' digital assets from malicious attacks through security solutions designed to fit the specific needs of the different types of customers we serve, will help enable long-term enduring growth.

Based on information currently available to the company, consolidated net sales for the third quarter ending September 30, 2006 is expected to be 20.50 billion Yen (or US \$178.26 million, based on an exchange rate of 115 JPY = 1USD). Operating income and net income are expected to be 6.00 billion Yen (or US \$52.17 million) and 3.30 billion Yen (or US \$28.70 million), respectively.

Second Quarter Business Highlights

Products and Innovation

Trend Micro introduced the following products in the second quarter 2006: Email Security Services Trend Micro launched a managed email service for Small and Medium-sized businesses in May 2006, available initially in North America and Australia. This service protects a small and medium business network and infrastructure by stopping threats before they reach the customer's gateway.

Table of Contents

Trend Micro PC-cillin Internet Security for Microsoft Vista Beta Customers - offers Windows Vista customers advanced features, beyond standard antivirus and firewall protection, helping to safeguard PCs from new emerging threats like phishing attacks, network viruses, spam, Wi-Fi intrusions and spyware programs.

Corporate and Business Highlights

By the end of the second quarter, Trend Micro HouseCall, the malware scanning service recorded the 100-millionth malware infection of 2006. The web-based solution is designed to scan a PC for a wide range of Internet security threats including viruses, worms, Trojans, and spyware

In April, Trend Micro announced an extension to its agreement with Microsoft Corporation, to provide antivirus scanning to MSN Hotmail customers.

Dave Rand, CTO for Trend Micro Internet Content Security, addressed the Messaging Anti-Abuse Working Group General Meeting in June, where he presented validation that botnets are now the primary source of spam.

The creation of 100 new jobs was announced at the Trend Micro Operations Centre in Cork, Ireland. The central office provides a shared service and serves as the support centre for customers throughout Europe, Middle East and Africa.

New customers and new business in the second quarter included:

Sogique in Canada, Okuma in North America, Koscom and Hanjin Shipping in Korea, Beijing Mobile, Guangdong Telecom, The People's Bank of China and Sinopec (China Petroleum & Chemical Corporation) in China.

Notice Regarding Forward-looking Statements

Certain statements that we make in this release are forward-looking statements. These forward-looking statements are based upon management's current assumptions and beliefs in light of the information currently available to it, but involve known and unknown risks and uncertainties.

Many important factors could cause our actual results to differ materially from those expressed in our forward-looking statements. These factors include:

Difficulties in addressing new virus and other computer security problems

Timing of new product introductions and lack of market acceptance for our new products

The level of continuing demand for, and timing of sales of, our existing products

Rapid technological change within the antivirus software industry

Changes in customer needs for antivirus software

Existing products and new product introductions by our competitors and the pricing of those products

Declining prices for products and services

The effect of future acquisitions on our financial condition and results of operations

The effect of adverse economic trends on our principal markets

The effect of foreign exchange fluctuations on our results of operations

An increase in the incidence of product returns

The potential lack of attractive investment targets and

Edgar Filing: TREND MICRO INC - Form 6-K

Difficulties in successfully executing our investment strategy

We assume no obligation to update any forward-looking statements. For more details regarding risk factors relating to our future performance, please refer to our filings with the U.S. Securities and Exchange Commission.

Report of First Half Year Results (Consolidated)

For Fiscal Year Ending December 31, 2006

[Prepared in accordance with US GAAP]

Company: Trend Micro Incorporated
Code: 4704
(URL <http://www.trendmicro.co.jp/>)

Tokyo Stock Exchange 1st Section
Location : Tokyo

Representative: Title Representative Director and Chief Executive Officer
Name Eva Chen

Contact: Title Representative Director (Chief Operating Officer and Chief Financial Officer)
Name Mahendra Negi (Phone: +81-3-5334-4899)

Date of the board of directors meeting authorizing the first-half year results: August 10, 2006

1. Financial Highlights for the first half of FY 2006 (January 1, 2006 through June 30, 2006)

(All figures except for per share information are rounded to millions of yen.)

(1) Consolidated Results of Operations

	Net sales Millions of yen	Growth rate %	Operating income Millions of yen	Growth rate %	Net income	
					before tax Millions of yen	Growth rate %
The first half of FY 2006	40,673	17.9	13,717	7.4	14,229	6.9
The first half of FY 2005	34,490	21.2	12,771	12.2	13,316	15.5
FY 2005 (annual)	73,030		27,572		29,108	

	Net		Net income	
	income Millions of yen	Growth rate %	per share (basic) Yen	per share (diluted) Yen
The first half of FY 2006	7,997	(5.8)	59.54	59.26
The first half of FY 2005	8,490	21.8	63.67	62.71
FY 2005 (annual)	18,670		139.85	137.83

(Note) 1. Equity in earnings of affiliated companies: 11 million yen (32 million yen in the first half of FY 2005, 67 million yen in FY 2005)

Edgar Filing: TREND MICRO INC - Form 6-K

2. The Company made no changes in accounting principle that had a material effect on the financial position, results of operations, and cash flows during the current period.

3. Weighted average number of common shares outstanding: 134,323,039 shares (133,341,012 shares in the first half of FY 2005, 133,498,438 shares in FY 2005)

4. The percentages for net sales, operating income, net income before tax and net income represent a change from the corresponding financial figures for the first half of prior fiscal year.

(2) Consolidated Financial Position

As of	Shareholders equity			
	Total assets Millions of yen	Shareholders equity Millions of yen	Shareholders equity ratio %	per share Yen
June 30, 2006	145,657	86,465	59.4	642.18
June 30, 2005	111,546	68,549	61.5	513.45
December 31, 2005	132,935	81,863	61.6	610.51

(Note) Number of common shares outstanding : 134,642,555 shares

(133,505,467 shares as of June 30, 2005, 134,090,494 shares as of December 31, 2005)

(3) Consolidated Cash Flows

As of	Cash flows from	Cash flows from	Cash flows from	Ending balance of cash and cash equivalents Millions of yen
	operating activities Millions of yen	investing activities Millions of yen	financing activities Millions of yen	
June 30, 2006	19,978	(3,094)	(5,998)	71,118
June 30, 2005	9,649	(3,218)	(3,635)	55,798
December 31, 2005	20,646	(12,738)	(2,406)	59,613

Table of Contents

(4) Basis of consolidation and application of the equity method:

The number of consolidated subsidiaries	19
The number of unconsolidated subsidiaries accounted by equity method	0
The number of affiliated companies	2

(5) Changes in the basis of consolidation and application of the equity method:

The number of additional consolidated subsidiaries	0
The number of excluded consolidated subsidiaries	1
The number of additional consolidated affiliated companies	0
The number of excluded consolidated affiliated companies	0

2. Projected consolidated earnings

Projected earnings for the next quarter (July 1, 2006 through September 30, 2006)

	Net sales Millions of yen	Operating income Millions of yen	Net income Millions of yen
3rd Qtr	20,500	6,000	3,300

In 3rd quarter, the company expected that (Yen) 1,244 millions of Stock option cost will be incurred as part of Cost of sales and Operating expense .

(Note) Since the business environment surrounding Trend Micro Group tends to fluctuate in the short run, it is difficult to make a highly reliable projection figures on a yearly basis. We, therefore, have decided to announce the earnings on a quarterly basis in the fiscal year ending in December 2006 as well as earnings projection of the succeeding quarter.

When we find through our calculation conducted from time to time that the net sales will fluctuate from the most recent quarterly projection by more than 10%, or operating income or net income fluctuates by more than 30%, we will announce the revision to the earnings projection.

Table of ContentsAttachment to the Report**1. Condition of corporate group**

Trend Micro Group consists of Trend Micro Inc. (Japan) and its subsidiaries which develop and sell anti-virus products and offer other related services. Affiliated companies are Soft Trend Capital Corporation which manages capital funds to be invested into Internet-related ventures and NetSTAR Inc. which develops and offers URL filtering products.

Products related to anti-virus:

PC client products LAN server products Internet server products All Suite products Other products

The business functions in Trend Micro Group are described below.

Function	Operating Segment	Main companies

2. Management Policy and Business Performance

MANAGEMENT POLICY

(1). BASIC POLICY OF MANAGEMENT

Our Vision: To create a world safe for exchanging digital information.

Our Mission: We ensure digital operational continuity against unpredictable threats.

Computer networks, mainly linked to the internet have already become a global infrastructure, as lifelines of the information society regardless of individual, business or national border. In the information society which is flooded with vast amounts of information, the computer network systems are used as communication methods comparable to telephones and faxes and as means to improve and rationalize business process at companies in recent years, and the systems play a roll in improving productivity and efficiency. Today many companies and individuals are being connected via the internet and it has produced various working styles, such as small offices and home offices, which enables employees to work at remote locations and business forms which establish data management operation and customer support operation, etc. in areas where labor cost is relatively low beyond the confines of country, industry, business form. The diffusion of networks on a global scale has already become the foundation for the global economy with eliminating the geological restrictions of business activities.

In typical homes there are many devices with internet functions and fusion of home appliance and IT is emerging as a result of the diffusions technologies such as IP telephone, broadband high-speed communication technology and wireless communication technology. In-home networks become prevalent and several internet devices are introduced into households, and our daily life is evolving, influenced by the advanced information society.

In this way today s computer network systems have much impact on the whole society to bring about changes in business forms and individual lifestyles around the world. When we think about the changes of our life from the viewpoint of information, the benefit of worldwide networking cannot be overestimated. Non standardized manufactures as the obstacle digital information exchanges in the past have gradually disappeared, and as a consequence, improvements in compatibility and convenience are achieved. On the other hand, with the disappearance of diversity, the possibility to use vulnerabilities for attacking the whole network system by computer viruses is acknowledged as a problem. With the standardization of the global infrastructure network, the convenience enabled by the internet and the risks associated with it are on two sides of the same coin. Crimes carried out through the manipulation of computer networks, such as phishing, theft of proprietary information and virus incidents, could have significant impact on our daily life and economic activities. Today the threats on the network such as computer viruses, spyware and spam are not the nature that can be predicted beforehand and treated with all possible measures. It seems there is now a requirement for enterprises and individuals to deploy security measures against new network threats and crimes which could increase causing theft of proprietary information, monetary damages, flattening the networks and all the rest around the world.

For such a great responsibility to protect the global infrastructure, we will provide strongly supportive products and services promptly beyond national boundaries for every phase of operations in the network such as vulnerability prevention, risk management, outbreak prevention, timely update of virus/ spyware / spam pattern files, assessment and restoration. We are not only protecting each enterprise and individual users from the threats over the networks without interrupting economic activities but also would like to contribute to the further development of the information society by improving the safety of the whole network system.

(2). BASIC POLICY OF PROFIT SHARING

We intend to continue to return profits to shareholders based on the net profit on a consolidated basis while striving to enhance financial strength and secure internal reserve in order to deal with significantly changing business environment and maintain competitive edge against competitors. As our basic policy about dividend, we plan to pay a year-end dividend on the basis of the dividend ratio of 40% excluding the effect of stock option compensation expenses. We will add stock option expenses back to accounting net income for pay-out calculations.

(3). VIEWS AND POLICIES FOR INVESTMENT UNIT

While we recognize that securing liquidity of our shares is an important issue, we consider the current liquidity is at a satisfactory level. With that background, we have concluded that reducing the investment unit which will incur considerable expense is not necessarily beneficial to all

shareholders.

Table of Contents

We intend to review in the future the investment unit as needed, taking into consideration the shareholders' interest and influences to the liquidity of our shares.

(4). TARGET MANAGEMENT INDEX

According to a research institute, the antivirus industry, which we belong to, is estimated to expand at an annual growth rate of around 15% from 2004 to 2009 (December 2005, IDC, USA). Making the growth rate of our consolidated net sales to exceed the industry average without fail is an important index that tells us whether we can grow up to a leading company which can contribute to customers in the global market as well as the Japanese market or not.

In view of the fact that we have a relatively small amount of investments in physical fixed assets such as manufacturing equipment, have no significant time-lag between accounting profit and loss and cash flows as a characteristics of software companies, and have uncertainty about the long-term forecast of the whole industry which, including our company, has a relatively short history, we set target as operating income margin rate of 35 - 40% at this time.

(5). ISSUES TO DEAL WITH

In the antivirus industry which we belong to, there have been two competitors having higher market shares than ours in the U.S. In addition to this, Microsoft Corporation, a major OS vendor, announced that it has entered into the security market, so we will face a new, big competitor in the near future.

Microsoft Corporation has started the supply of Windows OneCare™, a security service for consumers since May 2006, and also plans to launch Windows Vista, a new OS which is said to have an enhanced security function. It also announced that it plans to offer a service called Forefront Client Security for corporate users.

It is anticipated that the possibility of their entry into the security market will make the competition in the market more intense.

For such intensification of competition, we are enhancing our wide range of technologies to realize multifaceted security measures against new threats evolving day by day by acquiring InterMute Inc. which provides antispyware technologies and Kelkea Inc. which provides IP filtering and reputation services in 2005.

We, an expert in the antivirus area, have formed several alliances with some of the most respected names in the IT industry including Cisco Systems, Inc. in the U.S., the worldwide leader in networking for the internet. They have been delivering the advanced prevention solution named Cisco Incident Control System (ICS) which contains a part of our antivirus functions into Cisco's routers, switches and security appliance products starting.

We believe this kind of alliance has important for our products and sales strategies, because it has potential effects from the fusion of competitive products in each other's fields and the supplement of sales channels between affiliated vendors.

We would like to continue to develop original solutions faster than the competitors by concentrating our business resources and improve our superiority in products and services with advancing product specifications and performance from the viewpoint of customers. At the same time, we will aim at company growth for the future to strengthen our loyalty for customers with marketing development to be conscious of the customer attributes based on differences in each buying behaviour.

[Overview of Current Business Performance]

The Japanese economy in this term showed a recovery from its stagnant phase and it has kept an expanding trend. According to the Short-term Economic Survey of Enterprise in Japan (Tankan) announced in July 2006, the capital expenditure programs of very large enterprises in 2006 have a massive year-to-year rise, the highest percentage gain since 1990. Such healthy demand indicates that the sentiment in the enterprise sector that has improved, and creates proactive capital expenditures. At the same time, Consumer Price Index has been increasing continuously for 8 months since the end of 2005. This means that the Japan economy is moderately breaking out of the deflation. Under such a situation, the Bank of Japan has decided to lift its zero-interest rate policy. This is the first time in five years and four months that the Bank of Japan has raised short-term interest rate. The possibility of increase in corporate profit and household income will likely lead to expanded capital investments and consumer spending. It means that economic climate is on a gradual recovery trend. On the other hand, there are still possibilities, that the bear tack again and the already high level of crude oil prices continuing to increase. Those are several causes for concern to let us know that now has not still been a time for optimism.

The global economy is in the same situation. There are concerns not only such as a slowdown of growth due to increasing crude oil prices, the possibility of an increase of the inflationary pressure, and the expansion of global trade imbalances with sharp U.S. economic downturns, but also there is an increased geopolitical risk owing to events such as North Korea's missile firings, and others.

In the network security industry, the intent of malicious code flying around the web has shifted to the theft of proprietary information and getting concrete gains such as money since last year, both in Japan and overseas.

Table of Contents

The number of virus infection damage incidents in this term in Japan was 42,741. This number increased compared to the same period last year (16,197 reports). Although recently Bot attacks (where third parties other than the authorized users take control of machines by remote control, creating a network of infected computers that they use to commit misdeeds) have not been in the news so often, such a new type of threat has been doing a harm to us continuously. On the other hand, the WORM type of malicious code, that is routed through both mail and network, used to be the main method to spread a computer virus, has been reported decreasingly year by year. Now the malicious code, aims to get concrete gains such as money, has still been evolving its method of attack since last year. Also, recently Ransomware, a type of malware used for data kidnapping, an exploit in which the attacker encrypts the victim's data and demands payment for the decryption key, has often been reported overseas. The trend of damage diversification and networking brought by the malicious codes has been progressing and its damage costs associated with the fraud and identity theft will also become enormous. Such a threat trend has been becoming prominent since last year, and it will further accelerate in the future continuously.

Under such environment, our group's business conditions are as follows:

First of all, in Japan, the virus which abuses Winny and Share, Japanese indigenous peer-to-peer (P2P) file-sharing program with being controversial since 2003, has flourished from the beginning of this year. Such a virus has been creating many sensational headline related to the theft of proprietary information. In addition, the demand for the security products continues to increase to the SMB market since the full enforcement of the personal information protection law from April 2005. Moreover, our flagship personal product Virus Buster, called PC-Cillin outside of Japan, has still seen healthy growth with the demand of personal users based on their strong awareness to protect against the theft of individual property helping to boost Japan revenue. In those results, the amount of sales for this period in Japan was 16,073 million yen (13% increase from the same period in previous year).

In the North American region, under the situation that the Fed stopping soon based on both 2 points; increasing inflationary pressure caused by high oil price and US economy recession caused by growing rates and slowing housing market, the consumer market in which we had implemented reinforcement measures of sales channels since last year showed a substantial increase. Also, the security demands for especially the small companies in SMB business market increased. The sales for this period in the area came to 8,836 million yen (28% increase from the previous period).

In the European region, the European Central Bank (ECB) has been reviewed its ultra-low interest policy that had kept with the stagnant economy in the background with raising its interest rate in March 2006 as the second times since the end of 2005 for the first time in recent 5 years and fixed. European's business economy is on a gradual recovery based on enterprise-driven with the improved employment picture and brisk exports. According to Institute for Economic Research, Munich (IFO), German business sentiment rose in June to its highest level in over 15 years. It is considered that great opportunities such as the 2006 World Cup and incentives to spend before value-added tax's expires at the beginning of 2007 are increasing. Under these circumstances, sales for the large enterprise market in France and Italy has increased. The sales for this period in the area came to 10,021 million yen (14% increase from the previous period).

In Asia and Pacific regions, although inflationary pressure has concerned as the issue, the economic recovery tone in the background of brisk export stands out. In East Asia, especially mainland China has showed a better-than-expected GDP in this first half of the year. According to such a situation, we have a growth of sales for large enterprise and SMB business market, and also Australia and mainland China have been showing steady performance of sales. The net sales for this period in the regions came to 4,436 million yen (18% increase from the previous period).

At Latin America region, large enterprise business market boosted net sales and its growth rate is the highest in all region for this period. In this region net sales came to 1,308 million yen (71% increase from the previous period).

As a result, the consolidated net sales for this period came to 40,673 million yen (18% increase from the previous period). Meanwhile, operating expenses came to 26,956 million yen (24% increase from the previous period) due to the increases in the expense to deal with stock option expense since 2006 and expanding employee hiring. In spite of 1,766 million of a one time payment (receipt) related to intellectual property usage, the consolidated operating income for this period was 13,717 million yen (7% increase from the same period in previous year) and the consolidated net income for this period was 7,997 million yen (6% decrease from the same period in previous year).

Table of Contents

(2). Projection for the Third Quarter of the fiscal year 2006 (from July 1, 2006 to September 30, 2006)

The business environment tends to drastically change over a short term. Consequently, it is difficult to calculate highly reliable values about the projection for the whole fiscal year. Instead, we make it a rule to announce our business forecast for the coming quarter at the time of reporting quarterly results.

In the event the forecast numbers are revised by more than 10% for net sales or 30% for operating income and net income from the last forecast, we will announce a revision to the earnings forecast.

Business forecast for the Third Quarter of FY2006 (July 1 2006 – September 30 2006)

Consolidated net sales	20,500 million yen
Consolidated operating income	6,000 million yen
Consolidated net income	3,300 million yen

In development of the business forecasts the main assumed exchange rates are as follows.

1 US \$	115 yen
1 Euro	147 yen

Table of Contents**II. FINANCIAL CONDITION****CASH FLOW**

(Unit: million yen)

	The first half of			
	FY 2006	FY2005	Increase (Decrease)	
Cash Flows from Operating Activities	19,978	9,649		10,329
Cash Flows from Investing Activity	Δ 3,094	Δ 3,218		124
Cash Flows from Financing Activity	Δ 5,998	Δ 3,635	Δ	2,363
Effect of Exchange Rate Changes on Cash and Cash Equivalents	620	93		527
Net increase (Decrease) in Cash and Cash Equivalents	11,506	2,889		8,617
Cash and Cash Equivalents at end of period	71,118	55,798		15,320

[Overview of Cash Flow]

For the cash flows from operating activity for this period, cash inflows increased by 10,329 million yen compared with the previous period and the balance was ended with a surplus of 19,978 million yen. This increase in cash inflows is mainly due to a substantial increase in deferred revenue and a substantial increase in accrued income and other taxes in spite of a slight decrease in net income.

For the cash flows from investing activity, cash outflows decreased by 124 million yen compared with the previous period and the balance was ended with a deficit of 3,094 million yen. This decrease in cash outflows is mainly due to an increase in proceeds from sales of marketable securities.

For the cash flows from financing activity, cash outflows increased by 2,363 million yen compared with the previous period and the balance was ended with a deficit of 5,998 million yen. This increase in cash outflows is mainly due to a substantial increase in dividends paid.

Taking these increases and decreases and the effect of exchange rate changes on cash and cash equivalents into account, the cash and cash equivalents at the end of this period was 71,118 million yen and was increased by 15,320 million yen compared with the previous period.

Table of Contents**[Trends of Cash Flow Indexes]**

	(US GAAP)			
				The first half of
	FY2003	FY2004	FY2005	FY2006
Shareholder's equity Ratio (%)	54.1	59.2	61.6	59.4
Capital Adequacy Ratio on Market Value Basis (%)	462.2	690.0	449.9	356.8
Debt Redemption Period (years)	0.4			
Interest Coverage Ratio	103.3	218.2	5,566.4	2,498.8

	(Japan GAAP)	
	FY2001	FY2002
Shareholder's equity Ratio (%)	47.3	50.0
Capital Adequacy Ratio on Market Value Basis (%)	626.7	360.4
Debt Redemption Period (years)	1.2	0.8
Interest Coverage Ratio	44.2	49.4

Note

Shareholder's Equity Ratio	: (Total shareholder's Equity)/(Total Assets)
Capital Adequacy Ratio on Market Value Basis	: Total Market Value of Shares/(Total Assets)
Debt Redemption Period	: (Interest-bearing Debt)/(Operating Cash Flow)
Interest Coverage Ratio	: (Operating Cash Flow)/(Interest Payment)

* All indexes are calculated from the financial statement amounts on a consolidated basis.

* Total Market Value of Shares is calculated as follows; closing share price at the term end multiplies by number of shares issued at the term end (net of treasury shares).

* Operating Cash Flow is Net cash flows provided by operating activity in the consolidated statement of cash flows. Interest-bearing Debt is all debts with interest payments among the debts reported in the consolidated balance sheet. Interest Payment is the amount of payment for interest expense in the consolidated statement of cash flows

* With the enforcement of the revision of Rules on the terms, forms and making method of a consolidated financial statement in March 2002, the consolidated financial statements have been prepared based on US GAAP from the year ended December 31, 2003.

Table of Contents

III. RISK FACTORS

The occurrence of any of the following risks could affect our business, financial condition or results of operations. In such case, the trading price of our shares and the ADSs could decline and you could lose all or part of your investment. Other risks and uncertainties not now known to us or that we think are immaterial may also impair our business.

MAJOR SOFTWARE AND HARDWARE VENDORS MAY INCORPORATE ANTIVIRUS PROTECTION IN THEIR PRODUCT OFFERINGS, WHICH COULD RENDER OUR PRODUCTS OBSOLETE OR UNMARKETABLE.

Major vendors of operating system software and other software such as firewall or e-mail software or computer hardware may decide to enhance or bundle their products with their other products to include antivirus functions. These companies may offer antivirus protection as a standard feature in their products, at minimal or no additional cost to customers. This could render our products obsolete or unmarketable, particularly if antivirus products offered by these vendors were comparable or superior to our products. In addition, even if these vendors' antivirus products offered fewer functions than our products, or were less effective in detecting and cleaning virus-infected files, customers could still choose them over our products due to lower cost or for any other reasons.

Microsoft Corp., a major operating system vendor, has acquired some security vendors such as GeCAD Software Srl., an antivirus software vendor in Romania. Microsoft Corp. has launched antivirus products or services such as Windows OneCare for consumer users since May 2006. Also they announced that they will have a plan to start the service for enterprise named Forefront Client Security in the near future. At this time, we do not know the details of those services or products, but if in fact Microsoft will launch those products or services, and/or, if antivirus functions were to be included in its operating system products, this could have a material adverse effect on our business, financial condition and results of operations.

BECAUSE WE GENERATE SUBSTANTIALLY ALL OF OUR SALES FROM A SINGLE PRODUCT LINE, WE ARE VULNERABLE TO DECREASED DEMAND FOR SUCH PRODUCTS.

Unlike software companies with diversified product lines, we derive substantially all of our net sales from licensing and selling antivirus software products. Although we have begun to offer more comprehensive network and internet security and management software and services, we expect antivirus products to continue to account for the largest portion of our net sales for the foreseeable future. If the demand for, or the prices of, antivirus products drop as a result of competition, technological change or other factors such as lower growth or a contraction in the worldwide antivirus software market, this could have a material adverse effect on our business, financial condition and results of operations.

DETERIORATION IN OUR RELATIONSHIP WITH SOFTBANK BB CORP. COULD RESULT IN A DECREASE IN SALES OF OUR PRODUCTS.

We depend on our relationship with SOFTBANK BB (formerly SOFTBANK COMMERCE CORP.), which has played an instrumental role in the development of our business in Japan. SOFTBANK BB also has close relationships with many resellers and systems integrators through which we sell our antivirus software to corporate end users in Japan. An adverse change in our relationship with SOFTBANK BB would result in decreased sales to SOFTBANK BB and could disrupt our relationship with many resellers of our products. This could make it difficult for us to market our products in Japan. Sales to SOFTBANK BB totaled approximately (Yen) 9.2 billion, or 19.1%, of our net sales in fiscal 2003, approximately (Yen) 10.4 billion, or 16.8%, of our net sales in fiscal 2004 and approximately (Yen) 10.6 billion, or 14.5%, of our net sales in fiscal 2005. Because of our dependence on SOFTBANK BB, the price of shares and ADSs could fall as a result of adverse events affecting SOFTBANK BB, even if the events do not relate directly to us.

OUR PRODUCTS MAY BECOME OBSOLETE BECAUSE RAPID TECHNOLOGICAL CHANGE REGULARLY OCCURS IN THE ANTIVIRUS SOFTWARE MARKET.

The antivirus software market is characterized by:

- rapid technological change;
- the proliferation of new and changing computer viruses;
- frequent product introductions and updates; and

changing customer needs.

Table of Contents

These characteristics of our market create significant risks and uncertainties for our business success. For example, our competitors might introduce antivirus products that are technologically superior to our products. Additionally, new software operating system, network system or antivirus software industry standards could emerge. Emerging trends in these systems and standards currently include applications distributed over the Internet and the use of a Web browser to access client-server systems. Our existing products might be incompatible with some or all of such standards. Our business, financial condition and results of operations could materially suffer unless we are able to respond quickly and effectively to these developments.

OUR HARDWARE-BASED PRODUCTS FACE MANUFACTURING AND INVENTORY RISKS.

We rely on a small number of third parties to manufacture some of our hardware-based products, such as the Trend Micro Network VirusWall described in Item 4.B. We expect our reliance on third-party manufacturers to become more important as the number of our hardware-based products increases. Reliance on third-party manufacturers involves a number of risks, including a lack of control over the manufacturing process and the potential absence or unavailability of adequate capacity. If any of our third-party manufacturers cannot or will not manufacture our products in required volumes in compliance with environmental and other regulations in the markets we serve, on a cost-effective basis, in a timely manner, or at all, we will have to secure additional manufacturing capacity. The unexpected loss of any of our manufacturers could disrupt our business. Furthermore, our hardware-based products contain critical components supplied by a single or a limited number of third parties. Any significant shortage of components or the failure of the third-party supplier to maintain or enhance these products could lead to cancellation of customer orders or delays in the placement of orders and adversely affect our financial condition and results of operation.

WE MAY NOT GENERATE EXPECTED RESULTS IN STRATEGIC ALLIANCES

Because we are mainly focusing our business on the field of antivirus software and do not offer other security products such as firewalls, we actively pursue strategic alliances with other companies that allow us to provide customers with integrated or other new products and services derived from the alliances. In fiscal year 2004, we began to provide a third party URL filtering solution and have signed contracts with Cisco Systems to integrate network worm and virus outbreak prevention services with Cisco's products and services. To launch and provide such products and services, we may invest substantial cash and other resources in product developments, marketing promotions and support and maintenance activities. But we may not earn revenue successfully from alliances despite our efforts, and such alliance may be terminated or dissolved by various causes before generating revenue.

WE MAY NOT BE ABLE TO INCREASE OUR MARKET SHARE IN THE U.S. AND EUROPEAN MARKETS BECAUSE OUR COMPETITORS ARE MORE ESTABLISHED THAN WE ARE IN THESE MARKETS.

We believe that our share of the antivirus software market in the U.S. and Europe is significantly smaller relative to the market shares of our principal competitors, despite the growth of our sales in these markets in fiscal 2004 and 2005. Because our competitors are already well-established in these key markets and have greater financial and other resources and brand recognition, we may not be able to compete effectively for market share. If this happens, we may not be able to increase sales or our market share in these markets, which could materially hurt the prospects for growth in our business.

Some of our major competitors have the following advantages over us in the U.S. and European markets:

greater name recognition;

more diversified product lines;

larger customer bases; and

significantly greater financial, technical, marketing and other resources.

Table of Contents

As a result, as compared to us, our competitors may be able to:

better withstand downturns in the antivirus software market and in the computer software market in general;

adapt more quickly to new or emerging technologies or changes in customer requirements; or

more effectively and profitably market, sell and support their products.

WE MAY SUFFER A LOSS OF SALES AND MARKET SHARE IN OUR CORE JAPANESE MARKET IF OUR COMPETITORS ACHIEVE SUCCESS IN JAPAN.

Our major competitors, McAfee, Inc. and Symantec Corporation, are active in the Japanese antivirus software market and have allocated significant resources to achieve success in the Japanese antivirus software market. Although these competitors currently have smaller shares of the Japanese market than us, each has significantly greater financial, marketing and other resources than we do. Additionally, competition in our core Japanese market could intensify in the future if other competitors emerge. As a result of our competitors' efforts, we may not be able to maintain our current leading market position in Japan in the future. Also, in order to respond effectively to increased competition, we may be required to devote more of our product development, marketing and other resources to the Japanese market, which could limit our ability to grow in other markets. A material loss of sales and market share in Japan as a result of our competitors' success could have a material adverse effect on our business, financial condition and results of operations.

BECAUSE WE MAY ACQUIRE COMPANIES TO GROW OUR BUSINESS, FUTURE ACQUISITIONS MAY REDUCE OUR EARNINGS AND RESULT IN INCREASED COSTS IN OUR BUSINESS OPERATIONS.

In a rapidly changing industry, we occasionally review acquisition opportunities. Accordingly, we may seek to expand our business through acquisitions. Unlike some of our major competitors, we have limited experience in acquiring existing businesses. Future acquisitions could result in numerous risks and uncertainties, including:

our inability to retain customers, suppliers and other important business relationships of an acquired business;

difficulties in integrating an acquired company into Trend Micro, including the acquired company's operations, personnel, products and information systems;

diversion of our management's attention from other business concerns; and

adverse effects on our results of operations from acquisition-related charges, impairment of goodwill and purchased technology and possible recognition of impairment charge.

If we make such an acquisition using our stock, our current shareholders' ownership interests will be diluted. Any of these factors could materially hurt our business, financial condition and results of operations.

For example, in 2000, we acquired ipTrend to start a new business selling a Linux based remotely managed server appliance solution to small and medium sized companies. However, ipTrend performed poorly and was liquidated in December 2001. Due to the liquidation of ipTrend, (Yen) 2.3 billion was booked as goodwill write-off in 2001.

IF HACKERS GAIN UNAUTHORIZED ACCESS TO OUR SYSTEMS, WE COULD SUFFER DISRUPTIONS IN OUR BUSINESS AND LONG-TERM DAMAGE TO OUR REPUTATION.

We may be more susceptible to problems caused by hackers than other software companies. As an antivirus software company that delivers virus protection products over the Internet, hackers specifically target us in order to cause us to transmit computer viruses or interrupt the delivery of our antivirus software monitoring and security services over the internet which could result in further interruptions. We could suffer substantial disruptions in our business and material damage to our reputation which could in turn result in a significant loss of our customers and

Edgar Filing: TREND MICRO INC - Form 6-K

other important business relationships. We could also incur costs for public relations efforts following attacks by hackers. Hacker activities could also force us to incur substantial costs to fix technical problems or result in hackers gaining access to our proprietary information.

Table of Contents

WE FACE NEW RISKS RELATED TO OUR ANTI-SPAM AND ANTI-SPYWARE SOFTWARE PRODUCTS.

Our anti-spam and anti-spyware products may falsely identify emails or programs as unwanted spam or potentially unwanted programs, or alternatively fail to properly identify unwanted emails or programs, particularly as spam emails or spyware are often designed to circumvent anti-spam or spyware products. Parties whose emails or programs are blocked by our products may seek redress against us for labeling them as spammers or spyware, or for interfering with their business. In addition, false identification of emails or programs as unwanted spam or potentially unwanted programs may reduce the adoption of these products.

WE MUST EFFECTIVELY MANAGE OUR GROWTH.

Our business has grown rapidly. This growth has placed, and any future growth would continue to place, a significant strain on our limited personnel, management and other resources. Our ability to manage any future growth in our business will require us to:

- attract, train, retain, motivate and manage new employees successfully;
- effectively integrate new employees into our operations; and
- continue to improve our operational, financial, management and information systems and controls.

If we continue to grow, our management systems currently in place may be inadequate or we may not be able to effectively manage our growth. In particular, we may be unable to:

- provide effective customer service;
- develop and deliver products in a timely manner;
- implement effective financial reporting and control systems; and
- exploit new market opportunities and effectively respond to competitive pressures.

WE SELL OUR PRODUCTS THROUGH INTERMEDIARIES WHO MAY NOT VIGOROUSLY MARKET OUR PRODUCTS, OR MAY RETURN OUR PRODUCTS.

We market substantially all of our products to end users through intermediaries, including distributors, resellers and value-added resellers. Our distributors sell other products that are complementary to, or compete with, our products. While we encourage our distributors to focus on our products, these distributors may give greater priority to products of other suppliers, including competitors. They may also return the products to us under certain circumstances.

OUR CUSTOMERS MAY CANCEL OR DELAY THEIR PURCHASES OF OUR PRODUCTS, WHICH COULD ADVERSELY AFFECT OUR BUSINESS.

Our products may be considered to be capital purchases by certain enterprise customers. Capital purchases are often uncertain and, therefore, are canceled or delayed if the customer experiences a downturn in its business prospects or as a result of unfavorable economic conditions. Any cancellation or delay could adversely affect our results of operations.

WEAK FINANCIAL CONDITIONS OF SOME OF OUR DISTRIBUTORS MAY ADVERSELY AFFECT OUR OPERATING RESULTS.

Some of our distributors are experiencing financial difficulties worldwide, which may adversely impact our collection of accounts receivable. We regularly review the collectability and creditworthiness of our distributors to determine an appropriate allowance for doubtful receivables. Our uncollectible accounts could exceed our current or future allowance for doubtful receivables, which would adversely impact our operating results.

Table of Contents

OUR RESULTS OF OPERATIONS MAY SUFFER IF WE ARE REQUIRED TO PAY SIGNIFICANT AMOUNTS OF PENALTY PAYMENTS PURSUANT TO THE TERMS OF OUR SERVICE LEVEL AGREEMENTS.

We guarantee a certain quality of product support to our customers through our service level agreements. Pursuant to the terms of these agreements, under some circumstances, we are required to make penalty payments to our customers. For example, if we fail to provide our customers a virus pattern file within two hours of our receipt of a virus from the customer, the terms of the agreement require us to make a penalty payment to the dissatisfied customer which may amount up to 100% of the initial sale price. We have established reserves based on our assumptions and estimates. However, our assumptions and estimates may be wrong and our actual total penalty payments could materially exceed our reserves and adversely affect our results of operations and financial condition.

WE RELY HEAVILY ON OUR MANAGEMENT AND TECHNICAL PERSONNEL, WHO MAY NOT REMAIN WITH US IN THE FUTURE.

We rely, and will continue to rely, on a number of key technical and management employees, including our Chief Executive Officer, Eva Yi-Fen Chen. While we require our employees to sign employment agreements, our employees are generally not otherwise subject to noncompetition covenants. If any of our key employees leave, our business, results of operations and financial condition could suffer.

FLUCTUATIONS IN OUR QUARTERLY FINANCIAL RESULTS COULD CAUSE THE MARKET PRICE FOR OUR SHARES AND OUR ADSs TO BE VOLATILE.

We believe that our quarterly financial results may fluctuate in ways that do not reflect the long-term trend of our future financial performance. It is likely that in some future quarterly periods, our operating results may be below the expectations of public market analysts and investors. In this event, the price of our shares and our ADSs could fall.

Factors which could cause our quarterly financial results to fluctuate include:

- timing of sales of our products and services due to customers' budgetary constraints, seasonal buying patterns and our promotional activities;
- new product introductions by our competitors;
- significant marketing campaigns, research and development efforts, employee hiring, and other capital expenditures by us to drive the growth of our business;
- changes in customer needs for antivirus software; and
- changes in economic conditions in our major markets.

WEAKNESS IN THE JAPANESE ECONOMY MAY HURT OUR BUSINESS PERFORMANCE BECAUSE JAPAN IS OUR LARGEST MARKET.

While our sales in the US and Europe have increased in recent years, we remain significantly dependent on the Japanese market. Net sales in Japan accounted for approximately 42% of our net sales in fiscal 2003, approximately 41% in fiscal 2004 and approximately 40% in fiscal 2005. In the past three years, the Japanese economy has performed poorly due to a number of factors, including weak consumer spending and lower capital investment by Japanese companies. We believe the sluggish Japanese economy has hindered growth in our net sales during most of the last three fiscal years, although it has shown signs of recovering during the last several months. Because of our dependence on the Japanese market, any deterioration in the condition of the Japanese economy could negatively impact our net sales.

Table of Contents

FOREIGN EXCHANGE FLUCTUATIONS COULD LOWER OUR RESULTS OF OPERATIONS BECAUSE WE EARN REVENUES DENOMINATED IN SEVERAL DIFFERENT CURRENCIES.

Our reporting currency is the Japanese yen and the functional currency of each of our subsidiaries is the currency of the country in which the subsidiary is domiciled. However, a significant portion of our revenues and operating expenses is denominated in currencies other than the Japanese yen, primarily the US dollar, euro and the New Taiwan dollar. As a result, appreciation or depreciation in the value of other currencies as compared to the Japanese yen could result in material transaction or translation gains or losses which could reduce our operating results. These negative effects from currency fluctuations could become more significant if we are successful in increasing our sales in markets outside of Japan. We do not currently engage in currency hedging activities.

BECAUSE OUR BUSINESS DEPENDS SIGNIFICANTLY ON INTELLECTUAL PROPERTY, INFRINGEMENT OF OUR INTELLECTUAL PROPERTY COULD HURT OUR BUSINESS.

Our success depends upon the development of proprietary software technology. We rely on a combination of contractual rights and patent, copyright, trademark and trade secret laws to establish and protect proprietary rights in our software. If we are unable to establish and protect these rights, our competitors may be able to use our intellectual property to compete against us. This could limit our growth and hurt our business. At present, our US consolidated subsidiary holds seven issued US patents and our Taiwan consolidated subsidiary holds four issued US patents. It is possible that no additional patents will be issued to us or any of our subsidiaries. In addition, our issued patents may not prevent other companies from competing with us. We also enter into confidentiality agreements with our employees and license agreements with our customers, and limit access to our proprietary information and its distribution. However, we cannot guarantee that any of these measures will discourage others from misappropriating our technology or independently developing similar technology.

PRODUCT LIABILITY CLAIMS ASSERTED AGAINST US IN THE FUTURE COULD HURT OUR BUSINESS.

Our products are designed to protect customers' network systems and personal computers from damage caused by computer viruses. As a result, if a customer suffers damage from viruses, the customer could sue us on product liability or related grounds, claim damages for data loss or make other claims. Additionally, as viruses are constantly evolving, purchasers of our software products must regularly update the software they have purchased from us with virus protection files that we make available for download from our website. Should we fail to properly test these virus protection files and distribute a defective file, these files could cause damage to the personal computers of our customers who have downloaded a defective file. For example, a file that we distributed on April 23, 2005 for an approximately 90 minute period caused the computers of those updating with the file to slow and, in some cases, shut down. Cases of our files damaging the computers or our customers could lead to significant damage to our reputation and customers could sue on product liability or related grounds. Furthermore, starting in 2001, we began selling hardware devices which could give rise to a higher incidence of product liability claims than we have up until now experienced. Our license agreements typically contain provisions, such as disclaimers of warranty and limitations of liability, which seek to limit our exposure to certain types of product liability claims. However, in some jurisdictions these provisions may not be enforceable on statutory, public policy or other grounds. We currently do not carry product liability insurance covering claims arising in the US. Damage to our reputation or successful product liability or related claims brought against us could materially harm our business.

OUR BUSINESS FACES THE RISK OF INTERRUPTION FROM POWER SHORTAGES, EARTHQUAKES, OUTBREAK OF BIOLOGICAL VIRUSES AND OTHER HAZARDS.

We face a number of potential business interruption risks that are beyond our control. The State of California experienced intermittent power shortages in 2000, sharp increases in the cost of energy and even interruptions of service to some business customers. If power shortages continue to be a problem, our business may be materially adversely affected. Additionally, we may experience natural disasters that could interrupt our business.

Tokyo, where our corporate headquarter is located, is near a major earthquake fault. The impact of a major earthquake on our facilities, infrastructure and overall operations is not known. There is no guarantee that an earthquake would not seriously disturb our entire business operations. We are largely uninsured for losses and business disruptions caused by an earthquake and other natural disasters.

Table of Contents

In addition, many of the key countries and regions in which we operate have sustained negative economic impact from events such as the continued fear of future terrorist attacks and the outbreak of severe acute respiratory syndrome, or SARS. Prolonged continuation of these adverse factors may hurt our results of operations and financial condition.

WE MAY HAVE TO CONSTRAIN OUR BUSINESS ACTIVITIES TO AVOID BEING DEEMED AN INVESTMENT COMPANY UNDER THE US INVESTMENT COMPANY ACT OF 1940.

In general, a company which is or holds itself out as being engaged primarily in the business of investing, reinvesting or trading in securities, may be deemed to be an investment company under the US Investment Company Act of 1940. We do not believe that we are an investment company as defined under the US Investment Company Act of 1940. However, if we were to be deemed an investment company, we would be prohibited from issuing our securities in the United States and may have to terminate our US listing or other sponsorship promoting a US trading market for our issued securities. In order to avoid these prohibitions, we may be forced to forego otherwise attractive business opportunities, potentially limiting our growth and our profitability.

BECAUSE OF THE INFLUENCE OF OUR PRINCIPAL SHAREHOLDERS, OUR OTHER SHAREHOLDERS MAY BE UNABLE TO INFLUENCE OUR BUSINESS.

Our principal shareholders, including major shareholders who beneficially own more than 5% of the issued shares of our common stock and directors, beneficially owned approximately 34.4% of our outstanding shares as of December 31, 2005. These shareholders, if they act together, would be able to significantly influence all matters requiring approval by our shareholders, including the election of directors and the approval of mergers or other business combination transactions. Our principal shareholders may have strategic or other interests that conflict with the interests of our other shareholders. As a result, the concentration in our shareholdings may have the effect of delaying or preventing a change in control of Trend Micro, which could result in the loss of a significant financial gain to our shareholders.

OUR STOCK PRICE IS VOLATILE, AND INVESTORS BUYING THE SHARES OR ADSs MAY NOT BE ABLE TO RESELL THEM AT OR ABOVE THEIR PURCHASE PRICE.

Shares of our common stock are traded on the Tokyo Stock Exchange, which is the principal market for our shares. Recently, the US and Japanese securities markets have experienced significant price and volume fluctuations. The market prices of securities of high-tech companies, and internet companies in particular, have been especially volatile. Since trading in our shares commenced on the Tokyo Stock Exchange on August 17, 2000, our stock price has fluctuated between a low of (Yen) 1,440 and a high of (Yen) 9,005. Since trading in our ADSs commenced on the Nasdaq National Market on July 8, 1999, the price of our ADSs has fluctuated between a low of \$12.16 and a high of \$159.38. The closing price on the Tokyo Stock Exchange for our stock on June 30, 2006 was (Yen) 3,860, and the closing price on the Nasdaq National Market for our ADSs on June 30, 2006 was \$33.90 per ADS. The market price of our shares and ADSs is likely to fluctuate in the future.

NOTES TO INTERIM CONSOLIDATED FINANCIAL INFORMATION

1. Accounting Principles, Accounting Procedures and Methods for Presenting Interim Consolidated Financial Statements

The accompanying consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP), including Accounting Principles Board Opinions (APB), Statements of Financial Accounting Standards (SFAS), Emerging Issues Task Force Consensus (EITF) and the American Institute of Certified Public Accountants' Statements of Position (SOP). The Company is listed on the NASDAQ since July 1999, and prepares its consolidated financial statements pursuant to the terminology, forms and preparation methods required in order to issue American Depositary Shares, which are registered with the U.S. Securities and Exchange Commission. The Company maintains its books and records in conformity with accounting principles and practices generally accepted in Japan (Japan GAAP), while its foreign subsidiaries maintain their records in conformity with those generally accepted in the respective countries of their domicile. Certain adjustments and reclassifications, including those relating to their tax effects have been incorporated in the accompanying consolidated financial statements to conform with U.S. GAAP. These adjustments were not recorded in the statutory books of account. In addition, certain reclassifications have been made in the 2005 consolidated financial statements to conform to the classifications used in 2006.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The significant differences between accounting principles, accounting procedures and methods of presentation which are adopted by the Company and its subsidiaries (U.S. GAAP) and those in Japan (Japan GAAP) are as follows:

(1) Pension Accounting

The Company and its subsidiaries account for the retirement benefit plan in accordance with SFAS No. 87 Employers' Accounting for Pensions . The transition obligations, when SFAS No. 87 was first adopted, shall be amortized on a straight-line basis over the average remaining service period. However, in our non-consolidated financial statements, the transition obligations were all charged to income in the first year of application of local pension accounting, in accordance with Japan GAAP.

(2) Classification of losses on disposal of fixed assets

Under Japan GAAP, losses on disposal of fixed assets are disclosed in unusual profit and loss . We have disclosed such amount in Other incomes (expenses) in our consolidated statement of income.

(3) Common stock issue costs

Common stock issue costs, net of tax, are directly charged to retained earnings in the accompanying consolidated financial statements. Under Japan GAAP, these costs are charged to income as incurred.

(4) Goodwill

The Company accounts for goodwill in accordance with SFAS No. 142, Goodwill and Other Intangible Assets which requires the discontinuance of amortization for goodwill and at least an annual test for impairment.

(5) Stock option

The Company accounts for stock option in accordance with SFAS No. 123 (revised 2004), Share-Based Payments .

2. Summary of significant accounting policies

Basis of consolidation

The consolidated financial statements include the accounts of the parent company and those of its majority-owned subsidiaries. All intercompany transactions and accounts are eliminated upon consolidation.

Edgar Filing: TREND MICRO INC - Form 6-K

Investments in affiliated companies (20 to 50 percent-owned companies) in which the ability to exercise significant influence exists are stated at cost plus the equity in undistributed earnings (losses). Consolidated net income includes the Company's equity in the current net earnings (losses) of such companies, after elimination of unrealized intercompany profit.

Consolidated subsidiaries:

All subsidiaries which are composed of the following 19 companies are consolidated:

[North America]

Trend Micro Inc. (USA)

[Europe]

Trend Micro (EMEA) Limited (Ireland)

Trend Micro France SA

Trend Micro Deutschland GmbH (Germany)

Trend Micro Italy S.r.l.

Trend Micro (UK) Limited

[Asia Pacific]

Trend Micro Australia Pty.Ltd.

Trend Micro (China) Incorporated

Trend Micro Hong Kong Limited (China)

Trend Micro India Private Limited

Trend Micro Korea Inc.

Trend Micro Malaysia Sdn. Bhd.

Trend Micro (NZ) Limited (New Zealand)

Trend Micro (Singapore) Private Limited

Trend Micro Incorporated (Taiwan)

Trend Micro (Thailand) Limited

[Latin America]

Trend Micro do Brasil Ltda. (Brazil)

Servicentro TMLA, S. A. de C.V. (Mexico)

Trend Micro Latinoamerica S. A. de C.V. (Mexico)

Affiliated companies:

Edgar Filing: TREND MICRO INC - Form 6-K

The equity method of accounting is applied to investments in the following affiliated companies.

Soft Trend Capital Corporation (Japan)

Net STAR, Inc. (Japan)

Table of Contents

Translation of foreign currencies

All asset and liability accounts of foreign subsidiaries are translated into Japanese yen at year-end rates of exchange and all income and expense accounts are translated at rates of exchange that approximate to those prevailing at the time of transactions. The resulting foreign currency translation adjustments are included in accumulated other comprehensive income (loss).

Foreign currency denominated receivables and payables are translated into Japanese yen at year-end rates of exchange and the resulting translation gains or losses are taken into current income.

Revenue recognition

The Company's revenue is derived primarily from product sales, which includes software product license and post-contract customer support services. Other revenue is composed of hardware sales, royalty income and supplementary service income. Royalty is comprised of fees from Application service providers and Internet service providers, and supplementary services are comprised of fees from services based on Premium support program and Service level agreement. Product sales include the type of limited sales of our products to other companies for inclusion in their products.

The Company licenses its software products under perpetual licensing. The Company sells its products and services via its direct sales force and through domestic and foreign intermediaries.

The Company applies the provisions of SOP 97-2, *Software Revenue Recognition*, as amended by SOP 98-9 *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions*, to all transactions involving the sale of software products and hardware transactions where software is not incidental. For hardware transactions where software is not incidental, the Company does not bifurcate the fee and apply separate accounting guidance to the hardware and software elements.

Revenue from the Company's software product license and hardware where software is not incidental is recognized when persuasive evidence of an arrangement exists, the product has been delivered, the fee is fixed and determinable, and collection of the resulting receivable, net of allowances for doubtful accounts and sales returns, is reasonably assured. Post-contract customer support services revenue which includes virus pattern updates, unspecified product version updates, telephone and online technical support, and supplementary services revenue are deferred and recognized ratably over the service period. The Company allocates revenue to post-contract customer support services based on the fair value of the post-contract customer support services, which are determined based on separate sales of renewals to customers. Royalty income is recognized as earned unless collection of the related receivables is not assured in which case, it is recognized upon receipt of cash.

For all sales, the Company uses either a binding purchase order or signed license agreement as evidence of an arrangement. Sales through our intermediaries are evidenced by a master agreement governing the relationship together with binding purchase orders on a transaction-by-transaction basis.

At the time of the transaction, the Company assesses whether the fee associated with our revenue transactions is fixed and determinable and whether or not collection is reasonably assured. The Company assesses whether the fee is fixed and determinable based on the payment terms associated with the transaction. If a significant portion of a fee is due after our normal payment terms, which are 30 to 90 days from the invoice date, the Company accounts for the fee as not being fixed and determinable. In these cases, the Company recognizes revenue as the fees become due. The Company assesses collection based on a number of factors, including past transaction history with the customer and the credit-worthiness of the customer. The Company does not request collateral from our customers. If the Company determines that collection of a fee is not reasonably assured, the Company defers the fee and recognizes revenue until the time collection becomes reasonably assured, which is generally upon receipt of cash.

The Company recognizes revenue from sales to intermediaries when products are delivered to the intermediary. The Company primarily sells retail packages through intermediaries. After sale of a retail package, the Company may approve certain returns from intermediaries or end-users; therefore, the Company makes an estimate of sales returns from intermediaries or end-users based on its historical experience. The provision for estimated returns is recorded as a reduction of revenue at the time of sales.

The sales rebates to intermediaries are recognized as a reduction of revenue. Measurement of the sales rebates is based on two types of rebate arrangements. In one arrangement, the amount of the rebate is calculated by multiplying fixed contractual rebate rate by the actual sales amount to intermediaries. In another arrangement, the rebate is paid only if the intermediaries achieve a targeted level of quarterly sales. The rebate rates vary depending on the level of targets and the matrix table of targets and rebate rate is agreed with intermediaries at the beginning of each quarter.

Edgar Filing: TREND MICRO INC - Form 6-K

The Company applies the provisions of EITF 01-9 Accounting for consideration given by a vendor to a customer or a reseller of the vendor's products to all transactions where rebates are paid.

Table of Contents

Cash and cash equivalents

Cash and cash equivalents include cash on hand, cash on deposit with banks and all highly liquid investments, with original maturities of three months or less, that are readily convertible to known amounts of cash and are so near maturity that they present insignificant risk of changes in value because of changes in interest rates.

Marketable securities and investment securities

Marketable securities and investment securities consist of debt securities, equity securities and mutual funds. Debt securities, equity securities and mutual funds designated as available-for-sale are carried at fair value with unrealized holding gains or losses included in accumulated other comprehensive income (loss), net of applicable taxes. Debt securities designated as held-to-maturity are carried at amortized cost. The Company classifies available-for-sale debt securities with maturities longer than one year as investment securities in investments and other assets. Individual securities classified as either available-for-sale or held-to-maturity are reduced to their net realizable value for other than temporary declines in market value. Realized gains and losses, which are determined on the average cost method, are reflected in income.

Inventories

Finished products and raw materials are valued at the lower of weighted average cost or net realizable value. Work in process is stated at accumulated production costs.

Property and equipment

Property and equipment are stated at cost less accumulated depreciation. Major renewals and improvements are capitalized; minor replacements, maintenance and repairs are charged to current income. Depreciation of property and equipment is computed on the declining-balance method for the parent company and on the straight-line method for foreign subsidiaries at rates based on estimated useful lives of the assets according to general class, type of construction and use. Estimated useful lives range mainly from 3 to 6 years for office furniture and equipment, and mainly from 3 to 6 years for other properties.

Intangible assets

Intangible assets, which mainly consist of software development costs and purchased software, are amortized on a straight-line basis over the estimated economic lives of the products, generally over twelve-month period for software development costs and a five-year period for purchased software for internal use and other intangibles.

Goodwill and other intangible assets

Goodwill is the excess of the purchase price of the acquired business over the fair value of its net tangible and identifiable intangible assets. Other intangible assets consist primarily of existing technology purchased by business acquisition.

We account for goodwill in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. SFAS No. 142 requires, among other things, the discontinuance of amortization for goodwill and at least an annual test for impairment. An impairment review may be performed more frequently in the event circumstances indicate that the carrying value may not be recoverable.

SFAS No. 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives. Existing technology is amortized over 4 years.

Impairment of long-lived assets

The Company evaluates long-lived assets and definite-lived intangible assets to be held and used whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Determination of recoverability is based on the sum of expected future cash flows (undiscounted and without interest charges) from the use and eventual disposition of the asset. If the fair value is less than the carrying amount of the asset, an impairment loss is recognized, based on the fair value of the asset.

Research and development costs and software development costs

Edgar Filing: TREND MICRO INC - Form 6-K

All costs relating to research and development, to establish the technological feasibility of software products, are expensed as incurred. Under the Company's software development process, technological feasibility is established on completing all substantial testing for the original English language version of the software. Local language versions of software, such as Japanese or Chinese, are produced from the English language version, by adding Japanese language or Chinese language related functions. Production costs for such local language versions of software product masters, incurred subsequent to the availability of original English language version software, are capitalized. Production costs of the local language software product masters, which include direct labor and overhead costs, are amortized to cost of sales using the straight-line method over the current estimated economic lives of the products, generally up to twelve months.

Management considers the Company's capitalized software development costs to be fully recoverable from future product sales. Management estimates are based upon supporting facts and circumstances, and may be significantly impacted based upon subsequent changes in business conditions.

Table of Contents**Advertising costs**

Advertising costs are expensed as incurred.

Stock-based compensation

The Company previously accounted for its stock-based incentive awards in accordance with the intrinsic value method as per APB No. 25, Accounting for Stock Issued to Employees and related interpretations. Effective January 1, 2006, the Company adopted the provisions of SFAS No. 123 (revised 2004), Share-Based Payments .

Had compensation cost for the stock purchase warrants and the stock acquisition rights been determined based on the fair value at the grant dates, as prescribed by SFAS No. 123, the Company's pro forma net income and net income per share for the year ended December 31, 2005 would have been as follows:

(Thousands of Yen, except per share data)

	For the six months ended		For the year ended	
	June 30, 2005		December 31, 2005	
Net income:				
As reported		8,490,156		18,669,954
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects		(1,653,877)		(3,594,158)
Pro forma net income		6,836,279		15,075,796
Net income per share:				
As reported				
Basic	(Yen)	63.67	(Yen)	139.85
Diluted		62.71		137.83
Pro forma net income				
Basic	(Yen)	51.27	(Yen)	112.93
Diluted		50.49		111.30

The fair values of the stock options with warrants and the stock options with stock acquisition rights were estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions used for grants during fiscal year ended December 31, 2005; expected life of 3.06 years, volatility of 47.69-48.77 %; dividend yield of 0.91-0.94%; and risk-free interest rates of ranging from 0.16 % to 0.47 %. The fair values per share of options granted as above during fiscal 2005 were (Yen) 1,203 to 1,225, respectively. There was no additional issuance of stock acquisition rights as stock options during the six months ended June 30, 2006.

Income taxes

The current provision for income taxes is computed based on the pretax income included in the consolidated statement of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred assets (including deferred tax assets and liabilities on net unrealized gain or loss on available-for-sale securities) of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized.

Net income per share

Edgar Filing: TREND MICRO INC - Form 6-K

Basic net income per share is computed based on the average number of shares of common stock outstanding for the period. Diluted net income per share assumes the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock, or resulted in the issuance of common stock. Net income per share is appropriately adjusted for any stock splits or free distributions of common stock.

Free distribution of common stock

On occasion, the Company has made free distributions of common stock to its shareholders which were accounted for either by a transfer of the applicable par value from additional paid-in capital to the common stock account or with no accounting entry if free shares were distributed from the portion of previously issued shares accounted for as excess of par value in the common stock account in accordance with the Japanese Commercial Code. However, as a result of the amendments to the Japanese Commercial Code in 2001 in which the concept of par-value of shares was eliminated effective from October 1, 2001, a free distribution of common stock to its shareholders is accounted for with no accounting entry. Under the Japanese Commercial Code, a stock dividend which is paid out of profits can be effected by an appropriation of retained earnings to the common stock account by resolution of the general shareholders' meeting, followed by a free distribution with respect to the amount as appropriated by resolution of the Board of Directors.

Table of Contents**Common stock issue costs**

Common stock issue costs, net of tax, are directly charged to retained earnings in the accompanying consolidated financial statements as the Japanese Commercial Code prohibits charging such stock issue costs to paid-in capital accounts, which is the prevailing practice in the United States of America.

Comprehensive income

Other comprehensive income refers to revenues, expenses, gains and losses that under U.S. GAAP are included in comprehensive income but are excluded from net income as these amounts are recorded directly as adjustments to shareholders' equity. The Company's other comprehensive income primarily comprises unrealized gains or losses on available-for-sale securities and foreign currency translation adjustments.

Market and credit risks

The anti-virus software market is characterized by rapid technological changes and evolving industry standards in computer hardware and software technologies. In addition, the markets for the Company's products are highly competitive and are rapidly changing. The Company could incur substantial operating losses if it is unable to offer products, which address technological and market place changes in the anti-virus software industry.

Other financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash equivalents, marketable securities and accounts receivable. The Company invests primarily in time deposits, money market funds and marketable securities, and places its investments with high rating financial institutions. The Company performs ongoing credit evaluations of its customers' financial condition and maintains an allowance for uncollectible accounts receivable, if any, based upon the expected collectibility of accounts receivable.

3. Reconciliation of the difference between basic and diluted net income per share (EPS)

Reconciliation of the differences between basic and diluted EPS for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005, is as follows:

	For the six months ended June 30, 2005	For the six months ended June 30, 2006	For the year ended December 31, 2005
	(Yen)	Thousands of Yen (Yen)	(Yen)
Net income available to common shareholders	8,490,156	7,996,972	18,669,954
		Thousands of Shares	
Weighted-average number of common shares	133,341	134,323	133,498
Effect of dilutive securities:			
Stock options	2,045	621	1,958
Weighted-average number of common shares for diluted EPS computation	135,386	134,944	135,456
		Yen	
Basic EPS:	(Yen) 63.67	(Yen) 59.54	(Yen) 139.85
Diluted EPS:	62.71	59.26	137.83

Shareholders' equity per share as of June 30, 2005 and 2006 and December 31, 2005, was as follows:

	June 30, 2005	June 30, 2006	December 31, 2005
	(Yen)		(Yen)
Shareholders' equity per share	513.45	642.18	610.51

Table of Contents**4. Cash and cash equivalents**

Cash and cash equivalents as of June 30, 2005 and 2006 and December 31, 2005, were as follows:

	(Thousands of yen)		
	June 30, 2005	June 30, 2006	December 31, 2005
Cash	49,444,324	63,821,857	52,665,059
Time deposits with original maturities of three months or less	6,353,530	7,296,499	6,947,518
	55,797,854	71,118,356	59,612,577

5. Time deposits

The U.S. subsidiary had (Yen) 29,005 thousand, (Yen) 90,522 thousand and (Yen) 31,751 thousand of restricted cash set aside in accordance with the terms of building lease agreement as at June 30, 2005 and 2006 and December 31, 2005, respectively. The restricted cash is included in time deposits.

6. Marketable securities and securities investments

Marketable securities include mutual funds and debt and equity securities, for which the aggregate fair value, gross unrealized gains and losses, and cost pertaining to available-for-sale securities as of June 30, 2005 and 2006 and December 31, 2005, were as follows:

< Available-for-sale: > (Thousands of yen)

	Cost	June 30, 2005		Fair value
		Gains	Losses	
Mutual funds	8,169,757	49,018		8,218,775
Equity securities				
Debt securities	15,378,111	98,745	113,363	15,363,493
Total	23,547,868	147,763	113,363	23,582,268

< Available-for-sale: > (Thousands of yen)

	Cost	June 30, 2006		Fair value
		Gains	Losses	
Mutual funds	12,867,391	678,040	11,409	13,534,022
Equity securities				
Debt securities	20,128,157	167,868	98,855	20,197,170
Total	32,995,548	845,908	110,264	33,731,192

< Available-for-sale: > (Thousands of yen)

	December 31, 2005			
	Cost	Gains	Losses	Fair value
Mutual funds	8,825,910	310,291		9,136,201
Equity securities				
Debt securities	22,985,181	263,558	138,138	23,110,601
Total	31,811,091	573,849	138,138	32,246,802

The net unrealized gain on available-for-sale securities included in the separate component of shareholders' equity, net of applicable taxes, decreased by (Yen) 291,206 thousand, increased by (Yen) 170,993 thousand, and decreased by (Yen) 65,902 thousand, for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005, respectively.

Proceeds from sales of available-for-sale securities for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005 were (Yen) 8,545,586 thousand, (Yen) 8,974,014 thousand and (Yen) 22,079,575 thousand, respectively. Realized gains on sales of available-for-sale securities for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005 were (Yen) 20,534 thousand, (Yen) 73,829 thousand and (Yen) 370,326 thousand, respectively.

7. Research and development and maintenance costs, and software development costs

Research and development costs incurred up to the point where all substantial testing for the original English version product is complete, are charged to income as operating expense. Such research and development costs charged to income were (Yen) 2,196,929 thousand, (Yen) 2,373,496 thousand and (Yen) 4,395,207 thousand for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005, respectively.

Maintenance costs are expenses incurred in connection with product version updates to enable the product to cope with newly prevailing computer viruses and bug fixing, and are recorded as cost of sales. The maintenance costs included in cost of sales were (Yen) 694,846 thousand, (Yen) 1,699,983 thousand and (Yen) 1,671,320 thousand for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005, respectively.

Table of Contents

Software development costs relating to the local language related functions (representing software development costs as shown in the consolidated balance sheets after netting the related accumulated amortization), are capitalized and amortized to cost of sales as follows:

	(Thousands of yen)		
	For the six months ended	For the six months ended	For the year ended
	June 30, 2005	June 30, 2006	December 31, 2005
Software development costs:			
Balance at beginning of period	438,464	1,174,691	438,464
Additions, at cost	421,614	598,687	1,446,248
Amortization for the period	(219,500)	(761,139)	(710,021)
Balance at end of period	640,578	1,012,239	1,174,691

8. Debt

Debt comprises of the following:

	(Thousands of yen)		
	June 30, 2005	June 30, 2006	December 31, 2005
Unsecured 1.9% bonds, due 2006 with detachable warrants	4,000,000		4,000,000
	4,000,000		4,000,000
Less treasury bonds:			
Unsecured 1.9% bonds, due 2006 with detachable warrants	(4,000,000)		(4,000,000)

Based on the Company's incentive plans, the parent company issued unsecured bonds with detachable warrants and bought all of the warrants at the same time for the purpose of distributing such instruments to the directors and certain employees of the parent company and its subsidiaries as a part of their remuneration.

The Japanese Commercial Code restricts redemptions and extinguishments of these bonds in case the amount of each outstanding bond is less than the aggregate amount of exercise price of each outstanding warrant. Therefore, in order to reduce interest costs, the parent company repurchased a part of the bonds through the market with an intention to hold the treasury bonds until they can be extinguished legally. However, as the repurchase transaction is deemed as redemption of the bonds in substance, the treasury bonds are offset with the bonds on the face of consolidated balance sheets. There was no repurchase transaction for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005. (Yen) 4,000,000 thousands of the bonds was redeemed during the period ended June 30, 2006.

9. Stock option

Based on the Company's 2002 incentive plans, the Company issued the following bonds with detachable warrants to the public.

Edgar Filing: TREND MICRO INC - Form 6-K

1.	Board meeting approval	March 26,2002 and April 2,2002
2.	Date of bond issuance	April 18, 2002
3.	Maturity date	April 18, 2006
4.	Amount of each bond (Thousands of yen)	4,000,000
5.	Issued to	Public
6.	Date on which the bonds were fully redeemed	
7.	Exercise price per each warrant	(Yen) 3,450
8.	Warrant exercise period	From April 3, 2003 to April 11, 2006
9.	Number of shares represented by warrants	1,159,420
10.	Outstanding as of December 31, 2005	575,942
11.	Outstanding as of June 30, 2006	

Upon issuance of each bond, the Company bought all of the warrants and distributed such instruments to the directors and certain employees of the Company and its subsidiaries as a part of their remuneration.

These transactions were accounted for as issuance of debt to the public, and as an issuance of warrants to the directors and certain employees of the Company and its subsidiaries. The issuance of warrants to the directors and employees was accounted for under APB No. 25.

(Yen) 1,955 to (Yen) 5,090	11,892	3.41 years	3,874	3,657	3,686

The grants of stock acquisition rights to the directors and employees are accounted for under revision of SFAS No. 123, Share-Based Payments, since 2006. The exercise price per share for the rights granted of (Yen) 2,230 issued on February 12, 2003, (Yen) 1,955 issued on May 28, 2003, (Yen) 2,695 issued on November 14, 2003, (Yen) 4,310 issued on April 28, 2004, (Yen) 5,090 issued on October 28, 2004, (Yen) 3,840 issued on July 22, 2005 and (Yen) 3,950 issued on December 14, 2005, was determined as an amount equal to or less than the fair market value of the Company's share at the time of the grants.

Stock option expense was (Yen) 2,478,850 thousand for the six months ended June 30, 2006.

10. Employee benefit plans**Pension and severance plans**

The parent company has an unfunded retirement allowance plan (Plan) covering substantially all of its employees who meet eligibility requirements under the Plan. Under the Plan, employees whose service with the Company is terminated are, under most circumstances, entitled to lump-sum severance indemnities, determined by reference to current basic rate of pay, length of service and conditions under which the termination occurs.

Additionally, the parent company has been a member of Kanto IT Software welfare pension plan, which is categorized as a multi-employer pension plan. Total pension expense for the multi-employer pension plan were (Yen) 53,529 thousand, (Yen) 65,628 thousand and (Yen) 116,081 thousand for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005, respectively.

Effective from March 1, 1998, the Taiwan subsidiary introduced a defined benefit pension plan, which covers substantially all of its employees. Under the plan, only employees who are 55 years or older with services for more than 15 years or who have been employed for more than 25 years at the retirement date are entitled to receive benefits. Benefits awarded under the plan are based primarily on current rate of pay and length of service.

Effective from July 2005, the Taiwan subsidiary had a defined contribution pension plan called Labor Pension Act (LPA). Some employees who had joined a defined benefit pension plan transferred to the new plan. New employees who joined the Taiwan subsidiary after July 2005 can choose the new pension plan only.

Edgar Filing: TREND MICRO INC - Form 6-K

Effective from July 1, 1998, the Company's U.S. subsidiary established a 401(k) retirement plan, which covers substantially all of its employees. Under the plan, employees contribute a certain percentage of their pre-tax salary up to the maximum dollar limitation prescribed by the United States Internal Revenue Code.

Total pension expense for the defined contribution pension plan in Taiwan and U.S. was (Yen) 27,825 thousand, (Yen) 93,424 thousand and (Yen) 129,644 thousand for the six months ended June 30, 2005 and 2006 and for the year ended December 31, 2005, respectively.

Certain other subsidiaries have defined benefit pension plans or retirement plans, which cover substantially all of their employees, under which the cost of benefits is currently funded or accrued. Benefits awarded under these plans are based primarily on current rate of pay and length of service.

Employer contributions in foreign subsidiaries

For the six months ended June 30, 2006, foreign subsidiaries made (Yen) 3,072 thousand contributions to their pension plans. The foreign subsidiaries anticipate contributing an additional (Yen) 14,890 thousand to fund the foreign subsidiaries pension plans in 2006 for a total of (Yen) 17,962 thousand.

11. Financial instruments**(1) Derivative instruments**

The Company has a policy not to utilize any derivative financial instruments with off-balance sheet risk. In accordance with the policy, the parent company and its subsidiaries did not employ any derivative financial instruments.

(2) Fair value of financial instruments

Other than debt and equity securities, the fair value of which are disclosed in marketable securities and investment securities, the Company's involvement in financial assets and liabilities with market risk is limited to cash and cash equivalents, time deposits, notes and accounts receivable, trade, notes and accounts payable, trade, and long-term debt. The estimated fair values of cash and cash equivalents, time deposits, notes and accounts receivable, trade, and notes and accounts payable, trade approximate their carrying amounts. At June 30, 2005 and 2006, there was substantially no long-term debt including current portion.

12. Commitments and contingent liabilities

The Company provides services based on service level agreement (the Agreement) under which the Company guarantees a certain level of services rendered to the customers. The Company is required to pay penalties up to the limited amounts defined in the Agreement if the Company cannot perform the services as specified in the Agreement. The Company has established (Yen) 2,376 thousand of reserves for specific liabilities, as of June 30, 2006, in connection with the Agreement that we currently deem to be probable and estimable. Based on yearly experiences of payment, the Company has established no reserve for specific liabilities as of June 30, 2005 and December 31, 2005.

13. Segment information

The Company has been specializing in the security software business.

The Company discloses segment information as required by SFAS No. 131 Disclosures about Segments of an Enterprise and Related Information.

The information provided to the chief operating decision maker for assessing the Company's performance includes 5 regional segments and the corporate segment. The five operating segments by region are Japan, North America, Europe, Asia Pacific and Latin America. The other operating segment is Corporate, which is comprised of research and development, marketing, customer support and administrative departments that operate and bring benefits to the Company worldwide.

Exercise price per share	(Yen) 3,995
Individuals who were be granted the stock acquisition rights:	The directors and employees of and staff seconded to the Company and its affiliates (1,372 people)

16. Status of manufacturing and actual sales

As stated in Note 13. Segment Information, from the fiscal year ending December 31, 2006, the Company reports sales information by customer size in addition to the sales information by five regional segments for the chief operating decision maker to assess the Company's performance. The products of Trend Micro, however, have difficulty in determining to which customer segment they belong at the phase of manufacturing. Therefore the results of manufacturing and actual sales have been disclosed on a product category basis.

136,051,155 shares as of June 30, 2005

134,090,494 shares as of December 31, 2005

2. Number of treasury stocks at the end of period:

2,536,949 shares as of June 30,2006

2,545,688 shares as of June 30,2005

2,513,231 shares as of December 31, 2005

Table of Contents

2. Dividend information

Cash dividend

	Dividend per share (Yen)		Total
	End of the first half	End of the fiscal year	
Fiscal year 2005	0.00	56.00	56.00
Fiscal year 2006 (Actual)	0.00		
Fiscal year 2006 (Forecast)		Undetermined	

(Note) Since the business environment surrounding Trend Micro Group tends to fluctuate in the short run, it is difficult to make the highly reliable projection figures on a yearly basis. The company, therefore, decided to announce the consolidated financial results on a quarterly basis in the fiscal year ending December 31, 2006 as well as consolidated earnings projection of the succeeding quarter.

The consolidated projection for the third quarter of the fiscal year 2006 is mentioned at 2. Projected consolidated earnings of Report of Earning Results (Consolidated) For Fiscal Year Ending December 31, 2005 .

Table of Contents

Significant accounting policies and practices for preparing non-consolidated semi-annual financial statements.

1. Accounting for evaluation of assets
 - (1) Securities
 - Investments in affiliates and in subsidiaries
 - Cost basis by moving average method
 - Available-for-sale
 - Available-for-sale with fair market value:
The securities are stated at the market value method based on the value at the end of the period (Valuated differences are recognized in equity directly, not to reflect to net earnings. Cost of selling is determined by the moving average method.)
 - Available-for-sale without a market value:
Cost basis by moving average method
 - (2) Inventories
 - Finished goods Raw materials Supplies
 - Cost basis by moving average method

2. Depreciation and amortization method for fixed assets
 - (1) Property and equipment
 - Declining-balance method
 - Building (excluding facilities and leasehold improvement) acquired after April 1, 1998 are depreciated by straight- line method.
 - Useful lives of the main property and equipment are following :
 - Buildings : 3 28 years

 - Equipments : 2 10 years
 - (2) Intangibles
 - <Software for sale>
 - Straight -line method over the estimated useful lives

 - (12 months).
 - <Software for internal use>

 - Straight-line method over the estimated useful lives (5 years).
 - <Other intangibles>

 - Straight-line method over the estimated useful lives

3. Accounting for deferred assets
 - Stock issue costs and bond issue costs are charged to expenses when incurred.

Table of Contents

4. Accounting policies for allowances	<p>(1) Allowance for bad debt</p> <p>In order to reserve future losses from default of notes and account receivable, allowance for bad debt is provided.</p> <p>The amount is determined using the percentage based on actual doubtful account loss against total of debts. As for high-risk receivables, expected unrecoverable amount is considered individually.</p> <p>(2) Allowance for loss on investments in subsidiaries and affiliates</p> <p>In order to reserve future loss from investments in subsidiaries and affiliates, allowance for loss on investments in subsidiaries and affiliates is provided based on consideration of subsidiary's financial condition and expected recoverability.</p> <p>(3) Allowance for bonuses</p> <p>Bonuses for employees are provided at an estimate of the amount.</p> <p>(4) Allowance for sales return</p> <p>In order to reserve future losses from sales return subsequent to the fiscal year end, allowance for sales return is provided based on the past experience in the sales return.</p> <p>(5) Allowance for retirement benefits</p> <p>In order to reserve future losses arising from retirement of employees, allowance for retirement benefits is provided based on retirement benefit liabilities projected at the end of the period.</p> <p>Actuarial gains and losses are recognized in the following accounting period.</p> <p>(6) Allowance for retirement benefits for directors and corporate auditors</p> <p>Retirement benefits for directors and corporate auditors are provided at an estimate of the amount to be paid in accordance with the internal rules if all eligible directors and corporate auditors resigned their offices at the balance sheet date.</p>
5. Policy for translation of major foreign-currency assets and liabilities into Yen.	<p>Foreign-currency financial assets and liabilities are translated into yen at the spot rate effective at the end of the period. Exchange difference is treated as a profit/loss.</p>
6. Accounting policy for revenue and expense recognition	<p>Revenue recognition method for Post Contract Customer Support Service.</p> <p>Basically, the product license agreement contracted with the end-user states the article for PCS (customer support and upgrading of products and its pattern files).</p> <p>The company applies the following revenue recognition method for the portion of PCS. Portion of PCS revenue is recognized based on estimated fair value and is deferred as deferred revenues under current liabilities and long-term liabilities based on the contracted period.</p> <p>Deferred revenue is finally recognized evenly over the contracted period.</p>
7. Accounting policy for leased assets	<p>Finance leases without transfer of ownership of the leased assets are accounted for in the same manner as applied for operating leases.</p>

Table of Contents

8. Other important matters for preparing semi-annual financial statements

(1) Consumption tax

Transactions subject to consumption tax are stated at the amount net of the related consumption tax.

(2) Accounting for stock warrants and stock option that were granted to some officers and employees.

The Company adopts incentive plans where warrants to purchase parent company's shares are granted to directors and certain employees after parent company issues bonds with detachable warrants and immediately repurchases all of the warrants. Compensation costs are measured at repurchase costs of warrant securities at the point of grant because that is the only compensation scheme which grants warrants to directors and employees.

Warrant portion of the bonds is recorded as other current liability (warrant) upon issuance and then transferred to additional paid-in capital upon exercise.

In addition, the Company has adopted the incentive plans of Stock Option (Stock acquisition rights method) for directors and certain employees of the company based on section 280-20 and 280-21 of the previous Business Law. The company does not recognize compensation expense for these schemes.

Change in account processing

(Accounting standards for impairment of long-lived assets)

Effective from this period, the Company adopted the accounting standards for impairment of long-lived assets, Statement of Opinion on Establishment of Accounting Standards for Impairment of Long-lived Assets (issued by Business Accounting Council on August 9, 2002) and Application Guidance on Accounting Standards for Impairment of Long-lived Assets (Accounting Standard Application Guidance No.6, which was issued on October 31, 2003). The adoption of these standards had no impact on net income for the six month ended June 30, 2006.

(Accounting standards for presentation of net assets in the balance sheet)

Effective from this period, the Company adopted Accounting Standard for Presentation of Net Assets in the Balance Sheet (Accounting Standard No.5, which was issued on December 9, 2005) and Application Guidance on Accounting Standard for Presentation of Net Assets in the Balance Sheet (Accounting Standard Application Guidance No.8, which was issued on December 9, 2005). The total amount if calculated as existing Stockholders' equity is 61,482,753 thousands yen.

(Accounting standards for stock holders' equity statements)

Effective from this period, the Company adopted Accounting Standard for stock holders' equity statements (Accounting Standard No.6 which was issued on December 9, 2005) and Application Guidance on Accounting Standard for stock holders' equity statements (Accounting Standard Application Guidance No.9 which was issued on December 27, 2005).

(Accounting standards for stock option)

Effective from this period, the Company adopted Accounting Standard for stock option (Accounting Standard No.8 which was issued on December 27, 2005) and Application Guidance on Accounting Standard for stock option (Accounting Standard Application Guidance No.11 which was issued on December 27, 2005). The adoption of these standards had no impact on net income for the six month ended June 30, 2006.

Change in Presentation

(Balance sheet)

The company changed its balance sheet disclosure of allowance of bonuses from Others to Allowance for bonuses in Current liabilities component. The amounts of allowance of bonuses for the previous semiannual period and previous annual period are 41,824 thousand yen and 80,360 thousand yen, respectively, which are presented as Others in Current liabilities component.
