PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Unless indicated otherwise, the financial information in this annual report as of and for the years ended December 31, 2002, 2003, 2004, 2005 and 2006 has been prepared in accordance with accounting principles generally accepted in the United States of America, or U.S. GAAP.

On October 26 and December 24, 2004, we acquired an aggregate 27.3% voting interest in LG Investment & Securities, or LGIS. As a result of the acquisition, LGIS became an equity method investee as of December 24, 2004. On March 31, 2005, we merged Woori Securities, our wholly-owned subsidiary, into LGIS and renamed the surviving entity Woori Investment & Securities, which became an equity method investee.

In this annual report:

references to we, us or Woori Finance Holdings are to Woori Finance Holdings Co., Ltd. and, unless the context otherwise requires, its subsidiaries;

references to Korea are to the Republic of Korea;

references to the government are to the government of the Republic of Korea;

references to Won or (Won) are to the currency of Korea; and

references to U.S. dollars, \$ or US\$ are to United States dollars.

Discrepancies between totals and the sums of the amounts contained in any table may be a result of rounding.

For your convenience, this annual report contains translations of Won amounts into U.S. dollars at the noon buying rate of the Federal Reserve Bank of New York for Won in effect on December 29, 2006, which was (Won)930.0 = US\$1.00.

Table of Contents

FORWARD-LOOKING STATEMENTS

The U.S. Securities and Exchange Commission encourages companies to disclose forward-looking information so that investors can better understand a company's future prospects and make informed investment decisions. This annual report contains forward-looking statements.

Words and phrases such as aim, anticipate, assume, believe, contemplate, continue, estimate, expect, future, goal, intend, positioned, predict, project, risk, seek to, shall, should, will likely result, will pursue, plan and words and terms of similar substance in connection with any discussion of future operating or financial performance or our expectations, plans, projections or business prospects identify forward-looking statements. In particular, the statements under the headings Item 3D. Risk Factors, Item 5. Operating and Financial Review and Prospects and Item 4B. Business Overview regarding our financial condition and other future events or prospects are forward-looking statements. All forward-looking statements are management's present expectations of future events and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements.

In addition to the risks related to our business discussed under Item 3D. Risk Factors, other factors could cause actual results to differ materially from those described in the forward-looking statements. These factors include, but are not limited to:

our ability to successfully implement our strategy;

future levels of non-performing loans;

our growth and expansion;

the adequacy of allowance for credit and investment losses;

technological changes;

interest rates;

investment income;

availability of funding and liquidity;

our exposure to market risks; and

adverse market and regulatory conditions.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

By their nature, certain disclosures relating to these and other risks are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains, losses or impact on our income or results of operations could materially differ from those that have been estimated. For example, revenues could decrease, costs could increase, capital costs could increase, capital investment could be delayed and anticipated improvements in performance might not be fully realized.

In addition, other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this annual report could include, but are not limited to:

general economic and political conditions in Korea or other countries that have an impact on our business activities or investments;

the monetary and interest rate policies of Korea;

inflation or deflation;

unanticipated volatility in interest rates;

Table of Contents

foreign exchange rates;

prices and yields of equity and debt securities;

the performance of the financial markets in Korea and globally;

changes in domestic and foreign laws, regulations and taxes;

changes in competition and the pricing environment in Korea; and

regional or general changes in asset valuations.

For further discussion of the factors that could cause actual results to differ, see the discussion under Item 3D. Risk Factors contained in this annual report. We caution you not to place undue reliance on the forward-looking statements, which speak only as of the date of this annual report. Except as required by law, we are not under any obligation, and expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

All subsequent forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this annual report.

Item 3. KEY INFORMATION

Item 3A. *Selected Financial Data*

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Unless otherwise indicated, the selected consolidated financial and operating data set forth below as of and for the years ended December 31, 2002, 2003, 2004, 2005 and 2006 have been derived from our audited consolidated financial statements, which have been prepared in accordance with U.S. GAAP and audited by Deloitte Anjin LLC, an independent registered public accounting firm.

You should read the following data together with the more detailed information contained in Item 5. Operating and Financial Review and Prospects and our consolidated financial statements included elsewhere in this annual report. Historical results do not necessarily predict future results.

Income (loss) per share from continuing operations diluted	394	(871)	2,848	2,241	2,420	2.60
Income (loss) per share from discontinued operations diluted	955					
Extraordinary item diluted			78			
Weighted average common shares outstanding diluted (in thousands)	751,785	771,724	799,233	805,866	806,013	806,013
Cash dividends paid per share ⁽⁷⁾	(Won) 250	(Won) 100	(Won) 150	(Won) 400	(Won) 600	US\$ 0.65

(1) On October 26 and December 24, 2004, we acquired an aggregate 27.3% voting interests in LGIS. As a result of the acquisition, LGIS became an equity method investee as of December 24, 2004. On March 31, 2005, we merged Woori Securities, our wholly-owned subsidiary, into LGIS and renamed the surviving entity Woori Investment & Securities, which became an equity method investee. Accordingly, income statement data for 2004 do not reflect the full-year results of operations of LGIS for 2004, while income statement data for 2005 reflect the three-month results of operations of Woori Securities (prior to its merger with LGIS), as a consolidated subsidiary, and the three-month results of operations of LGIS (prior to the merger) and the nine-month results of operations of Woori Investment & Securities (following the merger), each as an equity method investee.

(2) Won amounts are expressed in U.S. dollars at the rate of (Won)930.0 to US\$1.00, the noon buying rate in effect on December 29, 2006 as quoted by the Federal Reserve Bank of New York in the United States.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

- (3) The reversal of provisions in 2005 resulted from subsequent changes in our estimation of losses related to our credit-related commitments. We determined in 2005 that a portion of our allowances for losses on credit-related commitments were no longer needed, and accordingly reversed the related portions of the provisions we had initially allocated during the year.
- (4) Mainly consists of provisions relating to (a) repurchase obligations with respect to loans sold to the Korea Asset Management Corporation and (b) trade receivables. The reversal of provision in 2004 resulted from subsequent changes in our estimation of losses related to loans sold to the Korea Asset Management Corporation.
- (5) Discontinued operations consisted of Hanvit Leasing and its three subsidiaries, which were sold in June and December 2002, and a subsidiary of Woori Investment Bank, which we entered into an agreement to sell in December 2002.

Table of Contents

- (6) In the diluted earnings per share calculation, our convertible bonds and warrants outstanding in 2002 and our convertible bonds outstanding in 2004 and 2005 are assumed to have been converted into shares of our common stock, while options outstanding to purchase our common stock in 2002, 2003, 2004, 2005 and 2006 are not deemed to have been exercised. We had no convertible bonds outstanding in 2006. See Note 32 of the notes to our consolidated financial statements.
- (7) Amounts shown for each year are cash dividends per share relating to such year, which were declared and paid in the following year. U.S. GAAP requires that dividends be recorded in the period in which they are declared rather than the period to which they relate unless those periods are the same. With respect to the 2002 fiscal year, we paid dividends in 2003 of (Won)250 per common share (\$0.21 per common share at the noon buying rate in effect on December 31, 2002) to our stockholders other than the Korea Deposit Insurance Corporation, or the KDIC. With respect to the 2003 fiscal year, we paid dividends in 2004 of (Won)100 per common share (\$0.08 per common share at the noon buying rate in effect on December 31, 2003) to our stockholders, including the KDIC. With respect to the 2004 fiscal year, we paid dividends in 2005 of (Won)150 per common share (\$0.14 per common share at the noon buying rate in effect on December 31, 2004) to our stockholders, including the KDIC. With respect to the 2005 fiscal year, we paid dividends in 2006 of (Won)400 per common share (\$0.40 per common share at the noon buying rate in effect on December 30, 2005) to our stockholders, including the KDIC. With respect to the 2006 fiscal year, we paid dividends in 2007 of (Won)600 per common share (\$0.65 per common share at the noon buying rate in effect on December 29, 2006) to our stockholders, including the KDIC. See Item 8A. Consolidated Statements and Other Financial Information Dividends.

Cost-to-income ratio ⁽⁵⁾	54.37	54.49	52.22	54.33	48.99
Average stockholders' equity as a percentage of average total assets	4.47	3.25	3.56	5.25	6.06
Total revenue ⁽⁶⁾	(Won) 8,734	(Won) 8,955	(Won) 9,188	(Won) 9,125	(Won) 11,789
Operating expense ⁽⁷⁾	6,570	6,753	6,618	6,660	8,563
Operating margin ⁽⁸⁾	2,164	2,202	2,570	2,465	3,226
Operating margin as a percentage of total revenue	24.78%	24.59%	27.97%	27.01%	27.36%

- (1) Represents net income (loss) as a percentage of average total assets. Average balances are based on daily balances for all of our subsidiaries, except for Woori F&I, Woori CA Asset Management (which was renamed Woori SB Asset Management in February 2006), Woori Finance Information System, Woori Credit Information and our special purpose companies, which are based on quarterly balances.
- (2) Represents net income (loss) as a percentage of average stockholders' equity. Average balances are based on daily balances for all of our subsidiaries, except for Woori F&I, Woori CA Asset Management (which was renamed Woori SB Asset Management in February 2006), Woori Finance Information System, Woori Credit Information and our special purpose companies, which are based on quarterly balances.
- (3) Represents the difference between the yield on average interest-earning assets and cost of average interest-bearing liabilities.
- (4) Represents the ratio of net interest income to average interest-earning assets.
- (5) Represents the ratio of non-interest expense to the sum of net interest income and non-interest income.
- (6) Total revenue represents interest and dividend income plus non-interest income.

The following table shows how total revenue is calculated:

Year ended December 31,				
2002	2003	2004	2005	2006
(in billions of Won)				

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Interest and dividend income	(Won) 6,950	(Won) 7,520	(Won) 7,235	(Won) 7,209	(Won) 9,365
Non-interest income	1,784	1,435	1,953	1,916	2,424
	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total revenue	(Won) 8,734	(Won) 8,955	(Won) 9,188	(Won) 9,125	(Won) 11,789
	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>

(7) Operating expense represents interest expense plus non-interest expense, excluding provisions of (Won)1,499 billion, (Won)2,616 billion, (Won)689 billion, (Won)286 billion and (Won)652 billion for 2002, 2003, 2004, 2005 and 2006, respectively.

Table of Contents

The following table shows how operating expense is calculated:

	Year ended December 31,				
	2002	2003	2004	2005	2006
	(in billions of Won)				
Interest expense	(Won) 3,991	(Won) 4,117	(Won) 3,809	(Won) 3,727	(Won) 5,465
Non-interest expense	2,579	2,636	2,809	2,933	3,098
Operating expense	(Won) 6,570	(Won) 6,753	(Won) 6,618	(Won) 6,660	(Won) 8,563

⁽⁸⁾ Operating margin represents total revenue less operating expenses.

Asset Quality Data

	As of December 31,				
	2002	2003	2004	2005	2006
	(in billions of Won)				
Total loans	(Won) 80,226	(Won) 88,392	(Won) 90,489	(Won) 104,130	(Won) 133,740
Total non-performing loans ⁽¹⁾	3,576	2,594	2,071	1,369	1,354
Other impaired loans not included in non-performing loans	3,143	1,861	1,129	820	391
Total non-performing loans and other impaired loans	6,719	4,455	3,200	2,189	1,745
Total allowance for loan losses	3,770	2,834	1,806	1,525	1,855
Non-performing loans as a percentage of total loans	4.46%	2.93%	2.29%	1.31%	1.01%
Non-performing loans as a percentage of total assets	3.05	2.03	1.58	0.88	0.69
Total non-performing loans and other impaired loans as a percentage of total loans	8.37	5.04	3.54	2.10	1.30
Allowance for loan losses as a percentage of total loans	4.70	3.21	2.00	1.46	1.39

⁽¹⁾ Non-performing loans are defined as those loans that are classified as substandard or below based on the Financial Supervisory Commission's asset classification criteria. See Item 4B. Business Overview Assets and Liabilities Asset Quality of Loans Loan Classifications.

Table of Contents**Segment Information Under Korean GAAP**

- (1) Includes the operations of Woori Investment & Securities, which is not a consolidated subsidiary under U.S. GAAP. We acquired a 27.3% voting interest in LGIS in October and December 2004. As a result of this acquisition, LGIS became a consolidated subsidiary under Korean GAAP (but not under U.S. GAAP) effective December 24, 2004. On March 31, 2005, we merged Woori Securities, a wholly-owned subsidiary, into LGIS and renamed the surviving entity Woori Investment & Securities, which remained a consolidated subsidiary under Korean GAAP (but not under U.S. GAAP).
- (2) Includes eliminations for consolidation, intersegment transactions and certain differences in classification under the management reporting system.

(1) Average balances are based on daily balances for all of our subsidiaries, except for Woori F&I, Woori SB Asset Management, Woori Finance Information System, Woori Credit Information and our special purpose companies, which are based on quarterly balances.

(2) Includes dividends received on securities, as well as cash interest received on non-accruing loans.

(3) Interest income from credit cards is derived from interest-earning credit card receivables, and consists principally of interest on cash advances and card loans.

(4) We do not invest in any tax-exempt securities.

(5) Includes home equity loans.

(6) Includes non-accrual loans.

(7) Includes non-interest-earning credit card receivables, principally monthly lump-sum purchase receivables, the entire balances of which are subject to repayment on the following payment due date.

Table of Contents*Analysis of Changes in Net Interest Income Volume and Rate Analysis*

The following table provides an analysis of changes in interest income, interest expense and net interest income based on changes in volume and changes in rate for 2005 compared to 2004 and 2006 compared to 2005. Information is provided with respect to: (1) effects attributable to changes in volume (changes in volume multiplied by prior rate) and (2) effects attributable to changes in rate (changes in rate multiplied by prior volume). Changes attributable to the combined impact of changes in rate and volume have been allocated proportionately to the changes due to volume changes and changes due to rate changes.

Exchange Rates

The table below sets forth, for the periods and dates indicated, information concerning the noon buying rate for Won, expressed in Won per one U.S. dollar. The noon buying rate is the rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York. Unless otherwise stated, translations of Won amounts into U.S. dollars in this annual report were made at the noon buying rate in effect on December 29, 2006, which was (Won)930.0 to US\$1.00. We do not intend to imply that

Table of Contents

the Won or U.S. dollar amounts referred to herein could have been or could be converted into U.S. dollars or Won, as the case may be, at any particular rate, or at all. On June 26, 2007, the noon buying rate was (Won)926.1 = US\$1.00.

Item 3B. Capitalization and Indebtedness

Not Applicable

Item 3C. Reasons for the Offer and Use of Proceeds

Not Applicable

Item 3D. Risk Factors**Risks relating to our corporate credit portfolio**

The largest portion of our exposure is to small- and medium-sized enterprises, and financial difficulties experienced by companies in this segment may result in a deterioration of our asset quality and have an adverse impact on us.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Our loans to small- and medium-sized enterprises increased from (Won)38,831 billion, or 43.9% of our total loans, as of December 31, 2003 to (Won)55,144 billion, or 41.2% of our total loans, as of December 31, 2006. As of December 31, 2006, on a Korean GAAP basis, Won-denominated loans to small- and medium-sized enterprises that were classified as substandard or below were (Won)716 billion, representing 1.4% of such loans to those enterprises. On a Korean GAAP basis, we recorded charge-offs of (Won)107 billion in respect of our Won-denominated loans to small- and medium-sized enterprises in 2006, compared to charge-offs of (Won)212 billion in 2005. The industry-wide delinquency ratios for Won-denominated loans to small- and medium-sized enterprises rose from 2002 through 2004, although these delinquency ratios stabilized in 2005 and 2006. As of December 31, 2006, the delinquency ratio for loans to small- and medium-sized enterprise was calculated as the ratio of (1) the outstanding balance of such loans in respect of which either principal payments are overdue by one day or more or interest payments are overdue by 14 days or more (unless prior interest payments on a loan were made late on more than three occasions, in which case the loan is considered delinquent if interest payments are overdue by one day or more) to (2) the aggregate outstanding balance of such loans. From January 1, 2007, the delinquency ratio for small- and medium-sized enterprise is calculated as the ratio of (1) the outstanding

Table of Contents

balance of such loans in respect of which either principal or interest payments are over due by one month or more to (2) the aggregate outstanding balance of such loans. Our delinquency ratio for such loans denominated in Won on a Korean GAAP basis increased from 1.7% as of December 31, 2002 to 2.7% as of December 31, 2004, but decreased to 1.9% as of December 31, 2005 and to 1.4% as of December 31, 2006. Despite this recent decrease, our delinquency ratio may increase in 2007 as a result of, among other things, adverse economic conditions in Korea and, accordingly, we may be required to take measures to decrease our exposures to these customers. For example, in order to stem rising delinquencies, we have in the past decided to restrict further lending to small- and medium-sized enterprises in certain industry sectors, such as real property leasing companies and hotels and restaurants, and implemented measures to limit the loan approval authority of branch managers based on the credit performance of the small- and medium-sized enterprise loans provided by their branches.

Many small- and medium-sized enterprises represent sole proprietorships or very small businesses dependent on a relatively limited number of suppliers or customers and tend to be affected to a greater extent than large corporate borrowers by fluctuations in the Korean economy. In addition, small- and medium-sized enterprises often maintain less sophisticated financial records than large corporate borrowers. Therefore, it is generally more difficult for us to judge the level of risk inherent in lending to these enterprises, as compared to large corporations.

Financial difficulties experienced by small- and medium-sized enterprises as a result of, among other things, adverse economic conditions in Korea, as well as aggressive marketing and intense competition among banks to lend to this segment, have led to a deterioration in the asset quality of our loans to this segment in the past and such factors may lead to a deterioration of asset quality in the future. Any such deterioration would result in increased charge-offs and higher provisioning and reduced interest and fee income from this segment, which would have an adverse impact on our financial condition and results of operations. In addition, many small- and medium-sized enterprises have close business relationships with *chaebols*, primarily as suppliers. Any difficulties encountered by those *chaebols* would likely hurt the liquidity and financial condition of related small- and medium-sized enterprises, including those to which we have exposure, also resulting in an impairment of their ability to repay loans. Recently, some *chaebols* have expanded into China and other countries with lower labor costs and other expenses through relocating their production plants and facilities to such countries, which may have a material adverse impact on such small- and medium-sized enterprises.

We have exposure to the largest Korean commercial conglomerates, known as chaebols, and, as a result, recent and any future financial difficulties of chaebols may have an adverse impact on us.

Of our 20 largest corporate exposures (including loans, debt and equity securities, credit-related commitments and other exposures) as of December 31, 2006, nine were to companies that were members of the 30 largest *chaebols* in Korea. As of that date, the total amount of our exposures to the 30 largest *chaebols* was (Won)19,876 billion, or 10.6% of our total exposures. If the credit quality of our exposures to *chaebols* declines, we could require additional loan loss provisions, which would hurt our results of operations and financial condition. See Item 4B. Business Overview Assets and Liabilities Loan Portfolio Exposure to Chaebols.

The allowances we have established against these exposures may not be sufficient to cover all future losses arising from these exposures. In addition, in the case of companies that are in or in the future enter into workout, restructuring, reorganization or liquidation proceedings, our recoveries from those companies may be limited. We may, therefore, experience future losses with respect to these exposures.

A large portion of our exposure is concentrated in a relatively small number of large corporate borrowers, which increases the risk of our corporate credit portfolio.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

As of December 31, 2006, our 20 largest exposures to corporate borrowers totaled (Won)27,521 billion, which represented 14.6% of our total exposures. As of that date, our single largest corporate exposure was to the Bank of Korea, to which we had outstanding credits in the form of debt securities of (Won)10,327 billion, representing

Table of Contents

5.5% of our total exposures. Aside from exposure to the Bank of Korea and other government-related agencies, our next largest exposure was to Industrial Bank of Korea, to which we had outstanding exposure of (Won)1,906 billion representing 1.0% of our total exposures. Any deterioration in the financial condition of our large corporate borrowers may require us to take substantial additional provisions and may have a material adverse impact on our results of operations and financial condition.

We have exposure to companies that are currently or may in the future be put in restructuring, and we may suffer losses as a result of additional loan loss provisions required or the adoption of restructuring plans with which we do not agree.

As of December 31, 2006, our credit exposures to companies that were in workout, corporate restructuring, composition or corporate reorganization amounted to (Won)303 billion or 0.2% of our total credit exposures, of which (Won)177 billion or 58.4% was classified as substandard or below and all of which was classified as impaired. As of the same date, our allowances for loan losses on these credit exposures amounted to (Won)109 billion, or 35.9% of these exposures. These allowances may not be sufficient to cover all future losses arising from our credit exposure to these companies. Furthermore, we have other exposure to such companies, in the form of debt and equity securities of such companies held by us (including equity securities we acquired as a result of debt-to-equity conversions). Including such securities, our exposures as of December 31, 2006 to companies in workout, restructuring, corporate reorganization or composition amounted to (Won)304 billion, or 0.2% of our total exposures.

Risks relating to our consumer credit portfolio

We may experience increases in delinquencies in our consumer loan and credit card portfolios.

In recent years, consumer debt has increased rapidly in Korea. Our portfolio of consumer loans has grown from (Won)30,357 billion as of December 31, 2003 to (Won)55,705 billion as of December 31, 2006. While our credit card portfolio decreased from (Won)3,964 billion as of December 31, 2003 to (Won)2,128 billion as of December 31, 2004 and to (Won)2,092 billion as of December 31, 2005 as a result of increased charge-offs and our efforts to reduce our credit card exposure, it increased to (Won)2,405 billion as of December 31, 2006. As of December 31, 2006, our consumer loans and credit card receivables represented 41.7% and 1.8% of our total lending, respectively.

The rapid growth in our consumer loan portfolio in recent years may lead to increasing delinquencies and a deterioration in asset quality. Our consumer loans classified as substandard or below decreased from (Won)396 billion, or 1.3% of our consumer loan portfolio, as of December 31, 2003 to (Won)362 billion, or 0.7% of our consumer loan portfolio, as of December 31, 2006. We charged off consumer loans amounting to (Won)74 billion in 2006, as compared to (Won)125 billion in 2005, and recorded provisions in respect of consumer loans of (Won)109 billion in 2006, as compared to (Won)166 billion in 2005. Within our consumer loan portfolio, the outstanding balance of general purpose household loans, which, unlike mortgage or home equity loans, are often unsecured and therefore tend to carry a higher credit risk, has increased from (Won)12,765 billion, or 42.1% of our total outstanding consumer loans, as of December 31, 2003 to (Won)28,117 billion, or 50.5% of our total outstanding consumer loans, as of December 31, 2006.

In our credit card segment, outstanding balances overdue by 30 days or more decreased from (Won)938 billion, or 23.7% of our credit card receivables, as of December 31, 2003 to (Won)203 billion, or 8.5% of our credit card receivables, as of December 31, 2006. In line with industry practice, we have restructured a portion of our delinquent credit card account balances as loans and also replaced a portion of our delinquent credit card account balances with cash advances that are rolled over from month to month. We discontinued the practice of providing such substituted cash advances commencing in September 2003. As of December 31, 2006, these restructured loans amounted to (Won)21 billion, or 0.9% of our credit card balances. Because these restructured loans are not initially recorded as being delinquent, our delinquency ratios do not

fully reflect all delinquent amounts relating

Table of Contents

to our credit card balances. Including all restructured loans, outstanding balances overdue by 30 days or more accounted for 0.3% of our credit card balances as of December 31, 2006. We charged off credit card balances amounting to (Won)87 billion in 2006, as compared to (Won)183 billion in 2005, and recorded a reversal of provisions in respect of credit card balances of (Won)5 billion in 2006, as compared to a reversal of provisions of (Won)63 billion in 2005. Delinquencies may increase in the future as a result of, among other things, adverse economic developments in Korea, difficulties experienced by other credit card issuers that adversely affect our customers, additional government regulation or the inability of Korean consumers to manage increased household debt, as reflected, for example, in the practice among some credit card holders of obtaining multiple credit cards and using cash advances from one card to make payments due on others.

A deterioration of the asset quality of our consumer loan and credit card portfolios would require us to increase our loan loss provisions and charge-offs and will adversely affect our financial condition and results of operations. In addition, our large exposure to consumer debt means that we are exposed to changes in economic conditions affecting Korean consumers. Accordingly, economic difficulties in Korea that hurt those consumers could result in further deterioration in the credit quality of our consumer loan and credit card portfolios. For example, a rise in unemployment or an increase in interest rates in Korea, which have been at historically low levels in recent years, could adversely affect the ability of consumers to make payments and increase the likelihood of potential defaults.

A decline in the value of the collateral securing our consumer loans and our inability to realize full collateral value may adversely affect our consumer credit portfolio.

A substantial portion of our consumer loans is secured by real estate, the values of which have fluctuated significantly in recent years. Although it is our general policy to lend up to 50% of the appraised value of collateral (except in areas of high speculation designated by the government where we are required to limit our lending to 40% of the appraised value of collateral) and to periodically re-appraise our collateral, downturns in the real estate markets in Korea from time to time have resulted in declines in the value of the collateral securing some loans to levels below their outstanding principal balance. Future declines in real estate prices, including as a result of measures adopted by the Korean government in recent years to stabilize the real estate market, would reduce the value of the collateral securing our mortgage and home equity loans. If collateral values decline in the future, they may not be sufficient to cover uncollectible amounts in respect of our secured loans. Any declines in the value of the real estate or other collateral securing our consumer loans, or our inability to obtain additional collateral in the event of such declines, could result in a deterioration in our asset quality and may require us to take additional loan loss provisions.

In Korea, foreclosure on collateral generally requires a written petition to a court. An application, when made, may be subject to delays and administrative requirements that may decrease the value of such collateral. We cannot guarantee that we will be able to realize the full value on our collateral as a result of, among other factors, delays in foreclosure proceedings and defects in the perfection of our security interest in collateral. Our failure to recover the expected value of collateral could expose us to potential losses.

Risks relating to our financial holding company structure and strategy

Woori Finance Holdings has a limited operating history as a financial holding company, and our continued success cannot be assured.

Woori Finance Holdings was established in March 2001 by the KDIC as a financial holding company to consolidate the Korean government's interests in four commercial banks (Hanvit Bank, Kyongnam Bank, Kwangju Bank and Peace Bank of Korea), one merchant bank and a number of other financial institutions. Each of these financial institutions was experiencing significant financial difficulties, including a sharp deterioration in asset quality and capital adequacy ratios and a net capital deficit, as a result of the Korean financial crisis that began in 1997, and had been recapitalized by the Korean government using public funds injected through the

Table of Contents

KDIC. Since that time, we have reorganized some of those business operations, and we may decide to implement other transfers or reorganizations with respect to our subsidiaries' business operations in the future. While we believe that we have generally succeeded in improving our overall financial condition and normalizing our operations, we have a limited operating history as a financial holding company, particularly under our current structure and organization, and may experience difficulties in managing a larger and more diverse business. Accordingly, our continued success cannot be assured.

We may not succeed in implementing our current strategy to take advantage of our integrated financial holding company structure.

Our success under a financial holding company structure depends on our ability to take advantage of our large existing base of retail and corporate banking customers and to implement a strategy of developing and cross-selling diverse financial products and services to them. As part of this strategy, we have standardized our subsidiaries' risk management operations (except with respect to credit risk management and operational risk management). We also plan to continue to diversify our product offerings by, among other things, marketing insurance products and expanding our investment banking and investment trust operations. The continued implementation of these plans may require additional investments of capital, infrastructure, human resources and management attention. This strategy entails certain risks, including the possibility that:

we may fail to successfully integrate our diverse systems and operations;

we may lack required capital resources;

we may fail to attract, develop and retain personnel with necessary expertise;

we may face competition from other financial holding companies and more specialized financial institutions in particular segments;
and

we may fail to leverage our financial holding company structure to realize operational efficiencies and to cross-sell multiple products and services.

If our strategy does not succeed, we may incur losses on our investments and our results of operations and financial condition may suffer.

We may fail to realize the anticipated benefits relating to our reorganization and integration plan and any future acquisitions that we make.

Our success under a financial holding company structure depends on our ability to implement our reorganization and integration plan and to realize the anticipated synergies, growth opportunities and cost savings from coordinating and, in certain cases, combining the businesses of our various subsidiaries. As part of this plan, between December 2001 and February 2002 we merged the commercial banking business of Peace Bank of Korea into Woori Bank, converted Peace Bank of Korea into a credit card subsidiary, Woori Credit Card, and transferred the credit card business of Woori Bank to Woori Credit Card. We also transferred the credit card business of Kwangju Bank to Woori Credit Card in March 2003. In light of the deteriorating business performance of Woori Investment Bank and with the objective of restructuring the group platform, we merged Woori Investment Bank with Woori Bank in August 2003. In March 2004, in response to the liquidity problems of Woori Credit Card stemming from the deteriorating asset quality of its credit card portfolio, we merged Woori Credit Card with Woori Bank. Although we currently intend for our commercial banking subsidiaries to continue to operate as separate legal entities within our financial holding company

structure and to maintain separate loan origination and other functions, we have standardized our subsidiaries' risk management operations (except with respect to credit risk management and operational risk management). In October and December 2004, we also acquired a 27.3% voting interest in LGIS, a leading domestic securities firm. In March 2005, we merged Woori Securities into LGIS and renamed the surviving entity Woori Investment & Securities, which became an equity method investee. See Item 4B. Business Overview Business Capital Markets Activities Securities

Table of Contents

Brokerage. As part of our business plan, we have also entered into bancassurance marketing arrangements and may enter into joint venture or acquisition transactions in the future. See Item 4B. Business Overview Business Other Businesses Bancassurance.

Although we have been integrating certain aspects of our subsidiaries' operations in our financial holding company structure, they will generally continue to operate as independent entities with separate management and staff. Further integration of our subsidiaries' separate businesses and operations, as well as those of any companies we may acquire in the future, could require a significant amount of time, financial resources and management attention. Moreover, that process could disrupt our operations (including our risk management operations) or information technology systems, reduce employee morale, produce unintended inconsistencies in our standards, controls, procedures or policies, and affect our relationships with customers and our ability to retain key personnel. The continued implementation of our reorganization and integration plan, as well as any future additional integration plans that we may adopt in connection with our acquisitions or otherwise, and the realization of the anticipated benefits of our financial holding company structure may be blocked, delayed or reduced as a result of many factors, some of which may be outside our control. These factors include:

difficulties in integrating the diverse activities and operations of our subsidiaries or any companies we may acquire, including risk management operations and information technology systems, personnel, policies and procedures;

difficulties in reorganizing or reducing overlapping personnel, branches, networks and administrative functions;

restrictions under the Financial Holding Company Act and other regulations on transactions between our company and, or among, our subsidiaries;

unexpected business disruptions;

loss of customers; and

labor unrest.

Accordingly, we may not be able to realize the anticipated benefits of our current or any future reorganization and integration plan and any future acquisitions that we make, and our business, results of operations and financial condition may suffer as a result.

We may not generate sufficient additional fees to achieve our revenue diversification strategy.

An important element of our overall strategy is increasing our fee income in order to diversify our revenue base, in anticipation of greater competition and declining lending margins. Historically, our primary source of revenues has been net interest income from our banking operations. To date, except for credit card, trust management, bancassurance, brokerage and currency transfer fees (including foreign exchange-related commissions) and fees collected in connection with the operation of our investment funds, we have not generated substantial fee income. We intend to develop new sources of fee income as part of our business strategy, including through our investment banking and asset management businesses. Although we, like many other Korean financial institutions, have begun to charge fees to our customers more regularly, customers may prove unwilling to pay additional fees, even in exchange for more attractive value-added services, and their reluctance to do so would adversely affect the implementation of this aspect of our strategy.

In the first half of 2007, our subsidiary Woori Bank reduced or waived many of the fees it charges on its banking services, in response to customer demand and to similar measures taken by other commercial banks in Korea. Specifically, Woori Bank reduced or waived its fees on fund transfers through its ATMs, and exempted its fees on fund transfers through its mobile banking services through the end of 2007. Woori Bank also waived the fees it charges on the opening of household checking accounts and on the issuance of bankers' checks and certain tax-related statements. These measures may adversely affect our banking-related fee income.

Table of Contents

We depend on limited forms of funding to fund our operations at the holding company level.

We are a financial holding company with no significant assets other than the shares of our subsidiaries. Our primary sources of funding and liquidity are dividends from our subsidiaries, direct borrowings and issuances of equity or debt securities at the holding company level. In addition, as a financial holding company, we are required to meet certain minimum financial ratios under Korean law, including with respect to liquidity, leverage and capital adequacy. Our ability to meet our obligations to our direct creditors and employees and our other liquidity needs and regulatory requirements at the holding company level depends on timely and adequate distributions from our subsidiaries and our ability to sell our securities or obtain credit from our lenders.

In the case of dividend distributions, this depends on the financial condition and operating results of our subsidiaries. In the future, our subsidiaries may enter into agreements, such as credit agreements with lenders or indentures relating to high-yield or subordinated debt instruments, that impose restrictions on their ability to make distributions to us, and the terms of future obligations and the operation of Korean law could prevent our subsidiaries from making sufficient distributions to us to allow us to make payments on our outstanding obligations. See

As a holding company, we depend on receiving dividends from our subsidiaries to pay dividends on our common stock. Any delay in receipt of or shortfall in payments to us from our subsidiaries could result in our inability to meet our liquidity needs and regulatory requirements, including minimum liquidity, double leverage and capital adequacy ratios, may disrupt our operations at the holding company level.

In addition, creditors of our subsidiaries will generally have claims that are prior to any claims of our creditors with respect to their assets. Furthermore, our inability to sell our securities or obtain funds from our lenders on favorable terms, or at all, could also result in our inability to meet our liquidity needs and regulatory requirements and may disrupt our operations at the holding company level.

As a holding company, we depend on receiving dividends from our subsidiaries to pay dividends on our common stock.

Since our principal assets at the holding company level are the shares of our subsidiaries, our ability to pay dividends on our common stock largely depends on dividend payments from those subsidiaries. Those dividend payments are subject to the Korean Commercial Code, the Bank Act and regulatory limitations, generally based on capital levels and retained earnings, imposed by the various regulatory agencies with authority over those entities. The ability of our banking subsidiaries to pay dividends is subject to regulatory restrictions to the extent that paying dividends would impair each of their nonconsolidated profitability, financial condition or other cash flow needs. For example:

under the Korean Commercial Code, dividends may only be paid out of distributable income, an amount which is calculated by subtracting the aggregate amount of a company's paid-in capital and certain mandatory legal reserves from its net assets, in each case as of the end of the prior fiscal period;

under the Bank Act, a bank also must credit at least 10% of its net profit to a legal reserve each time it pays dividends on distributable income until that reserve equals the amount of its total paid-in capital; and

under the Bank Act and the requirements of the Financial Supervisory Commission, if a bank fails to meet its required capital adequacy ratio or otherwise subject to the management improvement measures imposed by the Financial Supervisory Commission, then the Financial Supervisory Commission may restrict the declaration and payment of dividends by that bank.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Our subsidiaries may not continue to meet the applicable legal and regulatory requirements for the payment of dividends in the future. If they fail to do so, they may stop paying or reduce the amount of the dividends they pay to us, which would have an adverse effect on our ability to pay dividends on our common stock.

Table of Contents

In addition, we and our subsidiaries may not be able to pay dividends to the extent that such payments would result in a failure to meet any of the applicable financial targets under our respective memoranda of understanding with the KDIC. See Other risks relating to our business Our failure to meet the financial and other business targets set forth in current terms of the memoranda of understanding among us, our subsidiaries and the KDIC may result in substantial harm to us or our subsidiaries.

Risks relating to competition

Competition in the Korean financial industry is intense, and we may lose market share and experience declining margins as a result.

Competition in the Korean financial market has been and is likely to remain intense. Some of the financial institutions that we compete with are larger in terms of asset size and customer base and have greater financial resources or more specialized capabilities than our subsidiaries. In addition, in the area of our core banking operations, most Korean banks have been targeting retail customers and small and medium-sized enterprises as they scale back their exposure to large corporate borrowers, contributing to some extent to lower profitability and asset quality deterioration in consumer and small- and medium-sized enterprise loans, and have been focusing on developing fee income businesses, including bancassurance and investment products, as increasingly important sources of revenue. In the area of credit cards, Korean banks and credit card companies have in the past engaged in aggressive marketing activities and made significant investments, contributing to some extent to the asset quality problems previously experienced with respect to credit card receivables. The competition and market saturation resulting from this common focus may make it more difficult for us to secure retail and small and medium-sized customers with the credit quality and on credit terms necessary to maintain or increase our income and profitability.

In addition, we believe regulatory reforms and the general modernization of business practices in Korea will lead to increased competition among financial institutions in Korea. We also believe that foreign financial institutions, many of which have greater experience and resources than we do, will seek to compete with us in providing financial products and services either by themselves or in partnership with existing Korean financial institutions. Furthermore, a number of significant mergers and acquisitions in the industry have taken place in Korea over the last few years, including the acquisition of Koram Bank by an affiliate of Citibank in 2004 and the acquisition of Korea First Bank by Standard Chartered Bank in April 2005. We expect that consolidation in the financial industry will continue. Some of the financial institutions resulting from this consolidation may, by virtue of their increased size and business scope, provide greater competition for us. Increased competition and continuing consolidation may lead to decreased margins, resulting in a material adverse impact on our future profitability. Accordingly our results of operations and financial condition may suffer as a result of increasing competition in the Korean financial industry.

Deregulation of interest rate restrictions may lead to increased competition for deposits, resulting in our loss of deposit customers or an increase in our funding costs.

The Bank of Korea has pursued a gradual liberalization of interest rate restrictions since 1991. The final phase of the government's four-stage deregulation policy became effective in February 2004, when the Bank of Korea lifted the 1% ceiling on interest rates for demand deposit products offered by Korean banks. As a result of the easing of interest rate restrictions, we have faced increasing pricing pressure on deposit products from our competitors. If we do not continue to offer competitive interest rates to our deposit customers, we may lose their business. In addition, even if we are able to match our competitors' pricing, doing so may result in an increase in our funding costs, which may have an adverse impact on our results of operations.

Table of Contents

Other risks relating to our business

Our failure to meet the financial and other business targets set forth in current terms of the memoranda of understanding among us, our subsidiaries and the KDIC may result in substantial harm to us or our subsidiaries.

Under the current terms of the memoranda of understanding entered into among us, Woori Bank, Kyongnam Bank, Kwangju Bank and the KDIC, we and our subsidiaries are required to meet certain financial and business targets on a semi-annual and/or quarterly basis until the end of 2008. See Item 4A. History and Development of the Company History Relationship with the Korean Government. Due to its merger with Woori Credit Card, Woori Bank failed to meet its return on assets target and operating profit per employee target as of June 30, 2004. We also failed to meet three of the financial targets as of June 30, 2004, which were return on total assets, expense to revenue ratio, and operating income per employee. The KDIC notified us that we could not improve fringe benefits for our employees (including salaries), and ordered us to devise and report to the KDIC a plan to meet those three financial targets. We negotiated with the KDIC to adjust some of the financial targets applicable to us and our subsidiaries under our memoranda of understanding and, as a result, each of us, Woori Bank, Kyongnam Bank and Kwangju Bank have met all of our financial targets subsequent to such adjustments.

If we or our subsidiaries fail to satisfy our obligations under the current or any new memoranda of understanding in the future, the Korean government, through the KDIC, may impose penalties on us or our subsidiaries. These penalties could include the replacement of our senior management, sale of our assets, restructuring of our organization, restrictions on our business, including a suspension or transfer of our business, and elimination or reduction of existing equity. Accordingly, our failure to meet the obligations in the memoranda of understanding may result in harm to our business, financial condition and results of operations.

We have provided certain assets as collateral in connection with our secured borrowings and could be required to make payments and realize losses in the future relating to those assets.

We have provided certain assets as collateral for our secured borrowings in recent years. These secured borrowings often take the form of asset securitization transactions, where we nominally sell our assets to a securitization vehicle that issues securities backed by those assets, although the assets remain on our balance sheet. These secured borrowings are intended to be fully repaid through recoveries on collateral. Some of these nominal asset sales were with recourse, which means that if delinquencies arise with respect to such assets, we will be required to either repay a proportionate amount of the related secured borrowing (by reversing the nominal sale and repurchasing such assets) or compensate the securitization vehicle for any net shortfalls in its recoveries on such assets. As of December 31, 2006, the aggregate amount of assets we had provided as collateral for our secured borrowings was (Won)3,590 billion. As of that date, we had established allowances of (Won)0.4 billion in respect of possible losses on those assets. If we are required to make payments on such assets, or to repay our secured borrowings on those assets and are unable to make sufficient recoveries on them, we may realize further losses on these assets to the extent those payments or recovery shortfalls exceed our allowances.

An increase in interest rates would decrease the value of our debt securities portfolio and raise our funding costs while reducing loan demand and the repayment ability of our borrowers, which could adversely affect us.

From 2000 to 2004, interest rates in Korea declined to historically low levels as the government sought to stimulate economic growth through active rate-lowering measures. Interest rates started to rebound in the second half of 2005. Approximately 86.0% of the debt securities our banking subsidiaries hold pay interest at a fixed rate. All else being equal, an increase in interest rates would lead to a decline in the value of traded debt securities. A sustained increase in interest rates will also raise our funding costs, while reducing loan demand, especially among

consumers. Rising interest rates may therefore require us to re-balance our assets and liabilities in order to minimize the risk of potential mismatches and maintain our profitability. See Item 11. Quantitative and Qualitative Disclosures About Market Risk. In addition, rising interest rate levels may adversely affect the

Table of Contents

Korean economy and the financial condition of our corporate and consumer borrowers, including holders of our credit cards, which in turn may lead to a deterioration in our credit portfolio. In particular, since most of our consumer and corporate loans bear interest at rates that adjust periodically based on prevailing market rates, a sustained increase in interest rate levels will increase the interest costs of our consumer and corporate borrowers and will adversely affect their ability to make payments on their outstanding loans.

Our funding is highly dependent on short-term deposits, which dependence may adversely affect our operations.

Our banking subsidiaries meet a significant amount of their funding requirements through short-term funding sources, which consist primarily of customer deposits. As of December 31, 2006, approximately 86.2% of these deposits had maturities of one year or less or were payable on demand. In the past, a substantial proportion of these customer deposits have been rolled over upon maturity. We cannot guarantee, however, that depositors will continue to roll over their deposits in the future. In particular, we believe that the increases in these short-term deposits in recent years were attributable in large part to the lack of alternative investment opportunities for individuals and households in Korea, especially in light of the low interest rate environment and volatile stock market conditions. Accordingly, a substantial number of these short-term deposit customers may withdraw their funds or fail to roll over their deposits if higher-yielding investment opportunities emerge. In that event, our liquidity position could be adversely affected. Our banking subsidiaries may also be required to seek more expensive sources of short-term and long-term funding to finance their operations.

Labor union unrest may disrupt our operations and hinder our ability to continue to reorganize and integrate our operations.

Most financial institutions in Korea, including our subsidiaries, have experienced periods of labor unrest. As part of our reorganization and integration plan, we have transferred or merged some of the businesses operations of our subsidiaries into one or more entities and implemented other forms of corporate and operational restructuring. We may decide to implement other organizational or operational changes, as well as acquisitions or dispositions, in the future. Such efforts have in the past been met with significant opposition from labor unions in Korea. For example, in June 2003, members of Chohung Bank's labor union went on strike to express their opposition to the proposed sale by the KDIC of its interest in that bank to Shinhan Financial Group. Furthermore, in July 2004, members of Koram Bank's labor union engaged in a strike to obtain concessions in connection with the acquisition of Koram Bank by an affiliate of Citibank. Although we did not experience any major labor disputes in connection with the merger of Woori Credit Card with Woori Bank, our employees at Woori Securities staged a one-month strike to protest the merger of Woori Securities into LGIS in March 2005. Actual or threatened labor disputes may in the future disrupt the reorganization and integration process and our business operations, which in turn may hurt our financial condition and results of operations.

The secondary market for corporate bonds in Korea is not fully developed, and, as a result, we may not be able to realize the full marked-to-market value of debt securities we hold when we sell any of those securities.

As of December 31, 2006, our banking subsidiaries held debt securities issued by Korean companies and financial institutions (other than those issued by government-owned or -controlled enterprises or financial institutions, which include the KDIC, the Korea Electric Power Corporation, the Bank of Korea, the Korea Development Bank and the Industrial Bank of Korea) with a total book value of (Won)14,160 billion in our trading and investment securities portfolio. The market value of these securities could decline significantly due to various factors, including future increases in interest rates, which may be significant in light of the relatively low level of current interest rates, or a deterioration in the financial and economic condition of any particular issuer or of Korea in general. Any of these factors individually or a combination of these factors would require us to write down the fair value of these debt securities, resulting in impairment losses. Because the secondary market for corporate bonds in Korea is not fully developed, the market value of many of these securities as reflected on our consolidated balance sheet is determined by references to suggested prices posted by Korean rating agencies or

Table of Contents

the Korea Securities Dealers Association. These valuations, however, may differ significantly from the actual value that we could realize in the event we elect to sell these securities. As a result, we may not be able to realize the full marked-to-market value at the time of any such sale of these securities and thus may incur additional losses.

We and our commercial banking subsidiaries may be required to raise additional capital to maintain our capital adequacy ratio or for other reasons, which we or they may not be able to do on favorable terms or at all.

As of December 31, 2006, pursuant to the capital adequacy requirements of the Financial Supervisory Commission, we were required to maintain a minimum requisite capital ratio, which is the ratio of net total equity capital as a percentage of requisite capital, of 100% on a consolidated Korean GAAP basis. Beginning on January 1, 2007, under the new capital adequacy requirements of the Financial Supervisory Commission applicable from such date, we, as a bank holding company, are required to maintain a minimum consolidated equity capital ratio, which is the ratio of equity capital as a percentage of risk-weighted assets on a consolidated Korean GAAP basis, of 8.0%. See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy and Item 5B. Liquidity and Capital Resources Financial Condition Capital Adequacy. In addition, each of our commercial banking subsidiaries is required to maintain a minimum combined Tier I and Tier II capital adequacy ratio of 8.0%, on a consolidated Korean GAAP basis. In both cases, Tier II capital is included in calculating the combined Tier I and Tier II capital adequacy ratio up to 100% of Tier I capital. In addition, the memoranda of understanding among us, our subsidiaries and the KDIC require us and our subsidiaries to meet specified capital adequacy ratio requirements. See Item 4A. History and Development of the Company History Relationship with the Korean Government. As of December 31, 2006, our capital ratio and the capital adequacy ratios of our subsidiaries exceeded the minimum levels required by both the Financial Supervisory Commission and these memoranda. However, our capital base and capital adequacy ratio or those of our subsidiaries may deteriorate in the future if our or their results of operations or financial condition deteriorates for any reason, or if we or they are not able to deploy their funding into suitably low-risk assets. To the extent that our subsidiaries fail to maintain their capital adequacy ratios in the future, Korean regulatory authorities may impose penalties on them ranging from a warning to suspension or revocation of their licenses.

If our capital adequacy ratio or those of our subsidiaries deteriorate, we or they may be required to obtain additional Tier I or Tier II capital in order to remain in compliance with the applicable capital adequacy requirements. As the financial holding company for our subsidiaries, we may be required to raise additional capital to contribute to our subsidiaries. We or our subsidiaries may not be able to obtain additional capital on favorable terms, or at all. The ability of our company and our subsidiaries to obtain additional capital at any time may be constrained to the extent that banks or other financial institutions in Korea or from other Asian countries are seeking to raise capital at the same time. Depending on whether we or our subsidiaries are obtaining any necessary additional capital, and the terms and amount of any additional capital obtained, holders of our common stock or ADSs may experience a dilution of their interest, or we may experience a dilution of our interest in our subsidiaries.

We may face increased capital requirements under the new Basel Capital Accord.

In June 2006, the Financial Supervisory Service announced that it would implement the new Basel Capital Accord, referred to as Basel II, in Korea beginning on January 1, 2008. The implementation of Basel II will have a substantial effect on the way risk is measured among Korean financial institutions, including our commercial banking subsidiaries. Building upon the initial Basel Capital Accord of 1988, which focused primarily on capital adequacy and asset soundness as a measure of risk, Basel II expands this approach to contemplate additional areas of risk such as operational risk. Basel II also institutes new measures that will require our commercial banking subsidiaries to take into account individual borrower credit risk and operational risk when calculating risk-weighted assets.

Table of Contents

In addition, under Basel II, banks are permitted to follow either a standardized approach or an internal ratings-based approach with respect to calculating capital requirements. Woori Bank has voluntarily chosen to establish and follow an internal ratings-based approach, which is more stringent in terms of calculating risk sensitivity with respect to its capital requirements, while Kyongnam Bank and Kwangju Bank have chosen to use a standardized approach. Since Woori Bank will be implementing an internal ratings-based approach for the first time in connection with its implementation of Basel II, its internal rating model may require a significant increase in its capital requirements, which will require it to either improve its asset quality or raise additional capital. See Item 5A. Operating Results Overview New Basel Capital Accord and Item 5B. Liquidity and Capital Resources Financial Condition Capital Adequacy.

Our Internet banking services are subject to security concerns relating to the commercial use of the Internet.

We provide Internet banking services to our retail and corporate customers, which require sensitive customer information, including passwords and account information, to be transferred over a secure connection on the Internet. However, connections on the Internet, although secure, are not free from security breaches. We may experience security breaches in connection with our Internet banking service in the future, which may result in liability to our customers and third parties and materially and adversely affect our business.

We may experience disruptions, delays and other difficulties from our information technology systems.

We rely on our information technology systems for our daily operations including billing, effecting online and offline banking transactions and record keeping. We may experience disruptions, delays or other difficulties from our information technology systems, which may have an adverse effect on our business and adversely impact our customers' confidence in us.

We do not publish interim financial information on a U.S. GAAP basis.

Neither we nor our subsidiaries publish interim financial information on a U.S. GAAP basis. U.S. GAAP differs in significant respects from Korean GAAP, particularly with respect to the establishment of loan loss allowances and provisions. See Item 5B. Financial Condition Selected Financial Information Under Korean GAAP and Reconciliation with Korean GAAP. As a result, our allowance and provision levels, as well as certain other balance sheet and income statement items, reflected in our interim financial statements under Korean GAAP may differ substantially from those required to be reflected under U.S. GAAP.

We are generally subject to Korean corporate governance and disclosure standards, which differ in significant respects from those in other countries.

Companies in Korea, including us, are subject to corporate governance standards applicable to Korean public companies which differ in many respects from standards applicable in other countries, including the United States. As a reporting company registered with the U.S. Securities and Exchange Commission and listed on the New York Stock Exchange, we are subject to certain corporate governance standards as mandated by the Sarbanes-Oxley Act of 2002. However, foreign private issuers, including us, are exempt from certain corporate governance requirements under the Sarbanes-Oxley Act or under the rules of the New York Stock Exchange. There may also be less publicly available information about Korean companies, such as us, than is regularly made available by public or non-public companies in other countries. Such differences in corporate governance standards and less public information could result in less than satisfactory corporate governance practices or disclosure to investors in certain countries.

Risks relating to government control

The KDIC, which is our controlling stockholder, is controlled by the Korean government and could cause us to take actions or pursue policy objectives that may be against your interests.

The Korean government, through the KDIC, currently owns 72.97% of our outstanding common stock. So long as the Korean government remains our controlling stockholder, it will have the ability to cause us to take

Table of Contents

actions or pursue policy objectives that may conflict with the interests of our other stockholders. For example, in order to further its public policy goals, the Korean government could request that we participate with respect to a takeover of a troubled financial institution or encourage us to provide financial support to particular entities or sectors. Such actions or others that are not consistent with maximizing our profits or the value of our common stock may have an adverse impact on our results of operations and financial condition and may cause the price of our common stock and ADSs to decline.

In addition, pursuant to the terms of our memorandum of understanding with the KDIC, we are required to take any necessary actions (including share buybacks and payment of dividends) to return to the KDIC the funds it injected into us and our subsidiaries, so long as those actions do not cause a material adverse effect on the normalization of our business operations as contemplated by the memorandum of understanding. Any actions that we take as a result of this requirement may favor the KDIC over our other stockholders and may therefore be against your interests.

Risks relating to government regulation and policy

New loan loss provisioning guidelines implemented by the Financial Supervisory Commission may require us to increase our provisioning levels under Korean GAAP, which could adversely affect us.

In recent years, the Financial Supervisory Commission has implemented changes to the loan loss provisioning requirements applicable to Korean banks, which have resulted in increases to our provisions and adversely impacted our reported results of operations and financial condition under Korean GAAP. Until 2004, the requirement to establish allowances for possible losses in respect of confirmed acceptances and guarantees under Korean GAAP applied only to those classified as substandard or below. Commencing in the second half of 2005, the requirement was extended to cover confirmed acceptances and guarantees classified as normal or precautionary, as well as unconfirmed acceptances and guarantees and bills endorsed. Similarly, until 2004, the requirement to establish other allowances in respect of unused credit lines under Korean GAAP applied only to the unused credit limit for cash advances on active credit card accounts, defined as those with a transaction recorded during the past year. Commencing in the second half of 2005, the requirement was extended to cover the unused credit limit for credit card purchases on active accounts, as well as the unused credit limit on consumer and corporate loans. Due to these changes, our consolidated allowance for acceptances and guarantees and other allowances under Korean GAAP increased by (Won)23 billion and (Won)134 billion, respectively, as of December 31, 2005, and our consolidated income before income tax under Korean GAAP for 2005 decreased by (Won)157 billion.

Furthermore, in the second half of 2006, the Financial Supervisory Commission increased the minimum required provisioning levels applicable under Korean GAAP to loans, confirmed and unconfirmed acceptances and guarantees, bills endorsed and unused credit lines that are classified as normal and precautionary. The Financial Supervisory Commission also extended the requirement to establish other allowances on unused credit lines under Korean GAAP to cover inactive credit card accounts. As a result of these changes, our consolidated allowance for loan losses, allowance for acceptances and guarantees and other allowances for unused lines of credit under Korean GAAP increased by (Won)283 billion, (Won)17 billion and (Won)125 billion, respectively, as of December 31, 2006, and our consolidated income before income tax under Korean GAAP for 2006 decreased by (Won)425 billion.

In addition, in November 2004, the Financial Supervisory Commission announced that it will implement new loan loss provisioning guidelines, which Korean banks will be required to follow from the end of 2007 in preparing financial statements under Korean GAAP. These guidelines include a new requirement that banks take into account expected losses with respect to credits in establishing their allowance for loan losses, instead of establishing such allowances based on the classification of credits under the current asset classification criteria. Under the new guidelines, all Korean banks were required to establish systems to calculate their expected losses based on their historical losses during 2005. The Financial Supervisory Commission also announced that

Table of Contents

Korean banks could voluntarily comply with the new loan loss provisioning guidelines commencing in 2005. Specifically, in the second half of 2005, banks that had implemented a credible internal system for evaluating expected losses could establish their allowance for loan losses under Korean GAAP based on their historical losses, so long as the total allowance for loan losses established exceeded the levels required under the asset classification-based provisioning guidelines. Similarly, in the first half of 2006, banks that had implemented a credible system for evaluating expected losses could establish their allowance for loan losses under Korean GAAP based on such expected losses, so long as the total allowance established exceeded required levels. We complied with the new guidelines and implemented a system for evaluating expected losses in establishing our allowance for loan losses, which did not in and of itself result in an increase in our provisions for loan losses under Korean GAAP in 2005 or 2006. However, the Financial Supervisory Commission has not since released any further details regarding the new guidelines, and it is unclear whether such new guidelines will be implemented at the end of 2007 as previously announced. Full compliance with the new guidelines may increase our provisions for loan losses under Korean GAAP compared to previously mandated levels. Any future required increases in our provisions for loan losses could have an adverse effect on our reported results of operations and financial condition under Korean GAAP and our reported capital adequacy ratio, which may adversely affect the market price of our common stock and ADSs.

Government regulation of consumer lending, particularly mortgage and home equity lending, has recently become more stringent, which may hurt our consumer banking operations.

In light of concerns regarding the potential risks of excessive consumer lending, particularly mortgage and home equity lending, the Korean government has in recent years adopted more stringent regulations with respect to consumer lending by Korean banks. For example, in October 2003, the government advised Korean banks to limit their loans to a maximum of 40% of the value of the underlying real estate collateral, in the case of mortgage and home equity lending in areas where the average real estate price had increased substantially. In addition, the Korean government announced the implementation of measures to stabilize the real estate market in October 2003, which included:

building more residential apartments and houses;

enforcing more stringent supervision of property speculation; and

increasing the tax burden of those taxpayers who own real estate in excess of prescribed amounts.

The Korean government has also expressed a continuing commitment to stabilize the real estate market and willingness to implement additional measures, as necessary. For example, from 2004 through 2006, the Korean government has:

raised the residential property tax applicable to residential properties in cases where such property represents the third or more residential property owned by a single individual;

placed a ceiling on the sale price of newly constructed residential properties and, under certain circumstances, required developers to disclose the costs incurred in connection with the construction of such properties;

amended the Urban and Residential Environment Improvement Act to require that at least 25% of any increased floor space resulting from the redevelopment of existing residential properties be devoted to the construction of rental residential properties;

adopted more stringent guidelines that require financial institutions to impose debt-to-income limits on customers, in addition to loan-to-value ratio requirements, in connection with mortgage loans for real estate located in areas of wide-spread real property

speculation or excessive investment;

issued unofficial guidance recommending that Korean banks further limit their mortgage and home equity lending; and

adopted new measures to increase the supply of residential properties, including long-term residential lease properties.

Table of Contents

See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Banks Recent Regulations Relating to Retail Household Loans.

These regulations and measures, as well as any similar regulations that the Korean government may adopt in the future, may have the effect of constraining the growth and profitability of our consumer banking operations, especially in the area of mortgage and home equity lending. Furthermore, these regulations and measures may result in substantial future declines in real estate prices in Korea, which will reduce the value of the collateral securing our mortgage and home equity lending. See Other risks relating to our business A decline in the value of the collateral securing our loans and our inability to realize full collateral value may adversely affect our credit portfolio.

Government regulation of the credit card business has increased significantly in recent years, which may hurt our credit card operations.

Due to the rapid growth of the credit card market and rising consumer debt levels in Korea in recent years, the Korean government has heightened its regulatory oversight of the credit card industry. From mid-2002 through early 2003, the Ministry of Finance and Economy and the Financial Supervisory Commission adopted a variety of amendments to existing regulations governing the credit card industry. Among other things, these amendments increased minimum required provisioning levels applicable to credit card receivables, required the reduction in volumes for credit card loans, increased minimum capital ratios and allowed the imposition of new sanctions against credit card companies that failed to meet applicable requirements. The Financial Supervisory Commission and the Financial Supervisory Service also implemented a number of changes to the rules governing the evaluation and reporting of credit card balances and delinquency ratios, as well as procedures governing which persons may receive credit cards. For more details relating to these regulations, see Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Banks Credit Card Business.

The Korean government may adopt further regulatory changes in the future that affect the credit card industry. Depending on their nature, such changes may adversely affect our credit card operations, by restricting its growth or scope, subjecting it to stricter requirements and potential sanctions or greater competition, constraining its profitability or otherwise.

The Korean government promotes lending and financial support by the Korean financial industry to certain types of borrowers as a matter of policy, which financial institutions, including us, may decide to follow.

Through its policy guidelines and recommendations, the Korean government has promoted and, as a matter of policy, may continue to attempt to promote lending by the Korean financial industry to particular types of borrowers. For example, the Korean government has in the past announced policy guidelines requesting financial institutions to participate in remedial programs for troubled corporate borrowers, as well as policies identifying sectors of the economy it wishes to promote and making low interest funding available to financial institutions that lend to these sectors. The government has in this manner encouraged mortgage lending to low-income individuals and lending to small and medium-sized enterprises. We expect that all loans or credits made pursuant to these government policies will be reviewed in accordance with our credit approval procedures. However, these or any future government policies may influence us to lend to certain sectors or in a manner in which we otherwise would not in the absence of that policy.

In the past, the Korean government has also issued policy recommendations encouraging financial institutions in Korea to provide financial support to particular sectors as a matter of policy. For example, in light of the financial market instability in Korea resulting from the liquidity problems faced by credit card companies during the first quarter of 2003, the Korean government announced temporary measures in April 2003 intended to provide liquidity support to credit card companies. These measures included, among other things, requesting banks and other financial institutions to agree to extend the maturity of debt securities of credit card companies

Table of Contents

that they held and to make contributions to mutual funds to enable them to purchase debt securities of credit card companies.

The Korean government may in the future request financial institutions in Korea, including us, to make investments in or provide other forms of financial support to particular sectors of the Korean economy as a matter of policy, which financial institutions, including us, may decide to accept. We may incur costs or losses as a result of providing such financial support.

The Financial Supervisory Commission may impose burdensome measures on us if it deems us or one of our subsidiaries to be financially unsound.

If the Financial Supervisory Commission deems our financial condition or the financial condition of our subsidiaries to be unsound, or if we or our subsidiaries fail to meet applicable regulatory standards, such as minimum capital adequacy and liquidity ratios, the Financial Supervisory Commission may order, among other things:

capital increases or reductions;

stock cancellations or consolidations;

transfers of business;

sales of assets;

closures of branch offices;

mergers with other financial institutions; and

suspensions of a part or all of our business operations.

If any of these measures are imposed on us by the Financial Supervisory Commission, they could hurt our business, results of operations and financial condition. In addition, if the Financial Supervisory Commission orders us to partially or completely reduce our capital, you may lose part or all of your investment.

Risks relating to Korea

Unfavorable financial and economic developments in Korea may have an adverse effect on us.

We are incorporated in Korea, and substantially all of our operations are located in Korea. As a result, we are subject to political, economic, legal and regulatory risks specific to Korea. From early 1997 until 1999, Korea experienced a significant financial and economic downturn, from which the country took several years to recover.

The economic indicators in 2004, 2005 and 2006 have shown mixed signs of recovery and uncertainty, and future recovery or growth of the economy is subject to many factors beyond our control. Recent developments in the Middle East, including the war in Iraq and its aftermath, higher oil prices, the general weakness of the global economy and the possibility of an outbreak of avian flu in Asia and other parts of the world have increased the uncertainty of global economic prospects in general and may continue to adversely affect the Korean economy. Any future deterioration of the Korean or global economy could adversely affect our financial condition and results of operations.

Developments that could hurt Korea's economy in the future include:

adverse changes or volatility in foreign currency reserve levels, commodity prices (including a further increase in oil prices), exchange rates (including fluctuation of the U.S. dollar or Japanese yen exchange rates or revaluation of the Chinese renminbi), interest rates and stock markets;

substantial decreases in the market prices of Korean real estate;

Table of Contents

financial problems or lack of progress in restructuring of Korean conglomerates, other large troubled companies, their suppliers or the financial sector;

loss of investor confidence arising from corporate accounting irregularities and corporate governance issues at certain Korean conglomerates;

a slowdown in consumer spending and the overall economy;

adverse developments in the economies of countries that are important export markets for Korea, such as the United States, Japan and China, or in emerging market economies in Asia or elsewhere;

the continued emergence of the Chinese economy, to the extent its benefits (such as increased exports to China) are outweighed by its costs (such as competition in export markets or for foreign investment and the relocation of the manufacturing base from Korea to China);

social and labor unrest;

a decrease in tax revenues and a substantial increase in the Korean government's expenditures for unemployment compensation and other social programs that, together, would lead to an increased government budget deficit;

geo-political uncertainty and risk of further attacks by terrorist groups around the world;

the recurrence of severe acute respiratory syndrome, or SARS, or an outbreak of avian flu in Asia and other parts of the world;

deterioration in economic or diplomatic relations between Korea and its trading partners or allies, including deterioration resulting from trade disputes or disagreements in foreign policy;

political uncertainty or increasing strife among or within political parties in Korea;

hostilities involving oil producing countries in the Middle East and any material disruption in the supply of oil or increase in the price of oil; and

an increase in the level of tensions or an outbreak of hostilities between North Korea and Korea or the United States.

Escalations in tensions with North Korea could have an adverse effect on us and the market price of our ADSs.

Relations between Korea and North Korea have been tense throughout Korea's modern history. The level of tension between the two Koreas has fluctuated and may increase abruptly as a result of current and future events. In recent years, there have been heightened security concerns stemming from North Korea's nuclear weapon and long-range missile programs and increased uncertainty regarding North Korea's actions and possible responses from the international community. In December 2002, North Korea removed the seals and surveillance equipment from its

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Yongbyon nuclear power plant and evicted inspectors from the United Nations International Atomic Energy Agency. In January 2003, North Korea renounced its obligations under the Nuclear Non-Proliferation Treaty. Since the renouncement, Korea, the United States, North Korea, China, Japan and Russia have held numerous rounds of six party multi-lateral talks in an effort to resolve issues relating to North Korea's nuclear weapons program.

In addition to conducting test flights of long-range missiles, North Korea announced in October 2006 that it had successfully conducted a nuclear test, which increased tensions in the region and elicited strong objections worldwide. In response, the United Nations Security Council passed a resolution that prohibits any United Nations member state from conducting transactions with North Korea in connection with any large scale arms and material or technology related to missile development or weapons of mass destruction and from providing luxury goods to North Korea, imposes an asset freeze and travel ban on persons associated with North Korea's weapons program, and calls upon all United Nations member states to take cooperative action, including through

Table of Contents

inspection of cargo to or from North Korea. In response, North Korea agreed in February 2007 at the six-party talks to shut down and seal the Yongbyon nuclear facility, including the reprocessing facility, and readmit international inspectors to conduct all necessary monitoring and verifications. In return, the other five parties in the six-party talks agreed to provide 50,000 tons of heavy fuel oil to North Korea in the initial phase of their energy assistance.

There can be no assurance that the February 2007 accord will be implemented as agreed or that the level of tension on the Korean peninsula will not escalate in the future. Any further increase in tensions, which may occur, for example, if high-level contacts break down or military hostilities occur, could have a material adverse effect on our operations and the market value of our common stock and ADSs.

Labor unrest in Korea may adversely affect our operations.

Any future economic downturn in Korea or an increase in corporate reorganizations and bankruptcies could result in layoffs and higher unemployment. Such developments could lead to social unrest and substantially increase government expenditures for unemployment compensation and other costs for social programs. According to statistics from the Bank of Korea, the unemployment rate increased from 3.3% in 2002 to 3.4% in 2003 and rose further to 3.5% in 2004 and 2005. Although the unemployment rate remained steady at 3.5% in 2006, an increase in unemployment and any resulting labor unrest in the future could adversely affect our operations, as well as the operations of many of our customers and their ability to repay their loans, and could adversely affect the financial condition of Korean companies in general, depressing the price of their securities. These developments would likely have an adverse effect on our financial condition and results of operations.

Financial instability in other countries, particularly emerging market countries in Asia, could adversely impact our business and cause the price of the ADSs to go down.

The Korean market and the Korean economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia, including China. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Korean economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including Korea. A loss of investor confidence in the financial systems of emerging and other markets may cause increased volatility in Korean financial markets. We cannot be certain that financial events of the type that occurred in emerging markets in Asia in 1997 and 1998 will not happen again in Asia or in other markets in which we may invest, or that such events will not have an adverse effect on our business or the price of our common stock and ADSs.

Risks relating to our common stock and ADSs

The market price of our common stock and ADSs could be depressed by the ability of the KDIC to sell large blocks of our common stock.

The KDIC currently owns 588,158,609 shares, or 72.97%, of our outstanding common stock. In the future, the KDIC may choose to sell large blocks of our common stock publicly or privately to a strategic or financial investor, including for the purpose of recovering the public funds it injected into our subsidiaries to recapitalize them. For example, in September 2004, the KDIC sold approximately 45 million of our shares of common stock in a private offering for approximately (Won)324 billion, which constituted 5.7% of our outstanding common stock, and in June 2007, the KDIC disposed of approximately 40 million shares of our common stock, which constituted 5.0% of our outstanding common stock.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Under the Financial Holding Company Act, the KDIC was originally required to dispose of all of its holdings of our common stock by the end of March 2005 but the Korean National Assembly passed a bill to extend the deadline for two years until 2007. An additional one year extension was approved by the Public Fund Oversight Committee of the Korean government in March 2007.

According to the privatization plans announced by the KDIC, the KDIC will seek to dispose of all of its holdings of our common stock through registered or overseas offerings, sales to strategic investors, block sales

Table of Contents

and other available means, in a manner consistent with its mandate from the Public Fund Oversight Committee of the Korean government to maximize its returns and contribute to the development of the Korean financial industry in connection with such disposal. However, such plans are subject to change depending on market conditions and other factors. Accordingly, we do not know when, how or what percentage of our shares owned by the KDIC will be disposed of, or to whom such shares will be sold. As a result, we cannot predict the impact of such sales on us or our stock prices. Any future sales of our common stock or ADSs in the public market or otherwise by the KDIC, or the possibility that such sales may occur, could depress the prevailing market prices of our common stock and ADSs.

Ownership of our common stock is restricted under Korean law.

Under Korean law, a single stockholder, together with its affiliates, is generally prohibited from owning more than 10.0% of the outstanding shares of voting stock of a financial holding company such as us that controls nationwide banks, with the exception of certain stockholders that are non-financial business group companies, whose applicable limit is 4.0%. The Korean government and the KDIC are exempt from this limit, and investors may also exceed the 10.0% limit upon approval by the Financial Supervisory Commission. See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restrictions on Ownership of a Financial Holding Company. To the extent that the total number of shares of our common stock (including those represented by ADSs) that you and your affiliates own together exceeds that limit, you will not be entitled to exercise the voting rights for the excess shares, and the Financial Supervisory Commission may order you to dispose of the excess shares within a period of up to six months. Failure to comply with such an order would result in an administrative fine of up to (Won)50 million and/or up to 0.03% of the book value of such shares per day until the date of disposal.

You will not be able to exercise dissent and appraisal rights unless you have withdrawn the underlying shares of our common stock and become our direct stockholder.

In some limited circumstances, including the transfer of the whole or any significant part of our business and the merger or consolidation of us with another company, dissenting stockholders have the right to require us to purchase their shares under Korean law. However, if you hold our ADSs, you will not be able to exercise such dissent and appraisal rights if the depository refuses to do so on your behalf. Our deposit agreement does not require the depository to take any action in respect of exercising dissent and appraisal rights. In such a situation, holders of our ADSs must withdraw the underlying common stock from the ADS facility (and incur charges relating to that withdrawal) and become our direct stockholder prior to the record date of the stockholders' meeting at which the relevant transaction is to be approved, in order to exercise dissent and appraisal rights.

You may be limited in your ability to deposit or withdraw common stock.

Under the terms of our deposit agreement, holders of common stock may deposit such stock with the depository's custodian in Korea and obtain ADSs, and holders of ADSs may surrender ADSs to the depository and receive common stock. However, to the extent that a deposit of common stock exceeds any limit that we may specify from time to time, that common stock will not be accepted for deposit unless our consent with respect to such deposit has been obtained. We currently have not set any such limit; however, we have the right to do so at any time. Under the terms of the deposit agreement, no consent would be required if the shares of common stock were to be obtained through a dividend, free distribution, rights offering or reclassification of such stock. We have consented, under the terms of the deposit agreement, to any deposit unless the deposit would be prohibited by applicable laws or violate our articles of incorporation. If we choose to impose a limit on deposits in the future, however, we might not consent to the deposit of any additional common stock. In that circumstance, if you surrender ADSs and withdraw common stock, you may not be able to deposit the stock again to obtain ADSs. See Item 9C. Markets Restrictions Applicable to Shares.

Table of Contents

You will not have preemptive rights in some circumstances.

The Korean Commercial Code of 1962, as amended, and our articles of incorporation require us, with some exceptions, to offer stockholders the right to subscribe for new shares of our common stock in proportion to their existing shareholding ratio whenever new shares are issued. If we offer any rights to subscribe for additional shares of our common stock or any rights of any other nature, the depositary, after consultation with us, may make the rights available to holders of our ADSs or use commercially feasible efforts to dispose of the rights on behalf of such holders, in a riskless principal capacity, and make the net proceeds available to such holders. The depositary will make rights available to holders of our ADSs only if:

we have requested in a timely manner that those rights be made available to such holders;

the depositary has received the documents that are required to be delivered under the terms of the deposit agreement, which may include confirmation that a registration statement filed by us under the U.S. Securities Act of 1933, as amended, is in effect with respect to those shares or that the offering and sale of those shares is exempt from or is not subject to the registration requirements of the Securities Act; and

the depositary determines, after consulting with us, that the distribution of rights is lawful and commercially feasible.

Holders of our common stock located in the United States may not exercise any rights they receive absent registration or an exemption from the registration requirements under the Securities Act.

We are under no obligation to file any registration statement with the U.S. Securities and Exchange Commission or to endeavor to cause such a registration statement to be declared effective. Moreover, we may not be able to establish an exemption from registration under the Securities Act. Accordingly, you may be unable to participate in our rights offerings and may experience dilution in your holdings. If a registration statement is required for you to exercise preemptive rights but is not filed by us or is not declared effective, you will not be able to exercise your preemptive rights for additional ADSs and you will suffer dilution of your equity interest in us. If the depositary is unable to sell rights that are not exercised or not distributed or if the sale is not lawful or feasible, it will allow the rights to lapse, in which case you will receive no value for these rights.

Your dividend payments and the amount you may realize upon a sale of your ADSs will be affected by fluctuations in the exchange rate between the U.S. dollar and the Won.

Our common stock is listed on the Stock Market Division of the Korea Exchange and quoted and traded in Won. Cash dividends, if any, in respect of the shares represented by the ADSs will be paid to the depositary in Won and then converted by the depositary into U.S. dollars, subject to certain conditions. Accordingly, fluctuations in the exchange rate between the Won and the U.S. dollar will affect, among other things, the amounts you will receive from the depositary in respect of dividends, the U.S. dollar value of the proceeds that you would receive upon sale in Korea of the shares of our common stock obtained upon surrender of ADSs and the secondary market price of ADSs. Such fluctuations will also affect the U.S. dollar value of dividends and sales proceeds received by holders of our common stock.

The market value of your investment may fluctuate due to the volatility of, and government intervention in, the Korean securities market.

Our common stock is listed on the Stock Market Division of the Korea Exchange, which has a smaller market capitalization and is more volatile than the securities markets in the United States and many European countries. The market value of ADSs may fluctuate in response to the fluctuation of the trading price of shares of our common stock on the Stock Market Division of the Korea Exchange. The Stock Market Division of the Korea Exchange has experienced substantial fluctuations in the prices and volumes of sales of listed securities and has prescribed a fixed range in which share prices are permitted to move on a daily basis. In the past decade,

Table of Contents

the Korea Composite Stock Price Index, known as the KOSPI, reached a peak of 1,138.75 in 1994 and subsequently fell to a low of 280.00 in 1998. On April 17, 2000, the KOSPI experienced a 93.17 point, or 11.6%, drop, which represented the single largest decrease in the history of the KOSPI. On June 26, 2007, the KOSPI closed at 1,749.55. Like other securities markets, including those in developed countries, the Korean securities market has experienced problems including market manipulation, insider trading and settlement failures. The recurrence of these or similar problems could have a material adverse effect on the market price and liquidity of the securities of Korean companies, including our common stock and ADSs, in both the domestic and the international markets.

The Korean government has the potential ability to exert substantial influence over many aspects of the private sector business community, and in the past has exerted that influence from time to time. For example, the Korean government has induced mergers to reduce what it considers excess capacity in a particular industry and has also induced private companies to publicly offer their securities. Similar actions in the future could have the effect of depressing or boosting the Korean securities market, whether or not intended to do so. Accordingly, actions by the government, or the perception that such actions are taking place, may take place or has ceased, may cause sudden movements in the market prices of the securities of Korean companies in the future, which may affect the market price and liquidity of our common stock and ADSs.

If the Korean government deems that emergency circumstances are likely to occur, it may restrict you and the depositary from converting and remitting dividends and other amounts in U.S. dollars.

If the Korean government deems that certain emergency circumstances, including, but not limited to, severe and sudden changes in domestic or overseas economic circumstances, extreme difficulty in stabilizing the balance of payments or implementing currency, exchange rate and other macroeconomic policies, have occurred or are likely to occur, it may impose certain restrictions provided for under the Foreign Exchange Transaction Law, including the suspension of payments or requiring prior approval from governmental authorities for any transaction. See Item 10D. Exchange Controls General.

Other Risks

You may not be able to enforce a judgment of a foreign court against us.

We are a corporation with limited liability organized under the laws of Korea. Substantially all of our directors and officers and other persons named in this annual report reside in Korea, and all or a significant portion of the assets of our directors and officers and other persons named in this annual report and substantially all of our assets are located in Korea. As a result, it may not be possible for you to effect service of process within the United States, or to enforce against them or us in the United States judgments obtained in United States courts based on the civil liability provisions of the federal securities laws of the United States. There is doubt as to the enforceability in Korea, either in original actions or in actions for enforcement of judgments of United States courts, of civil liabilities predicated on the United States federal securities laws.

Item 4. INFORMATION ON THE COMPANY

Item 4A. History and Development of the Company

Overview

Woori Finance Holdings was incorporated as Korea's first financial holding company on March 27, 2001 and commenced commercial operations on April 2, 2001. We were established by the KDIC to consolidate the Korean government's interests in:

four commercial banks (Hanvit Bank (since renamed Woori Bank), Kyongnam Bank, Kwangju Bank and Peace Bank of Korea (since renamed Woori Credit Card and merged with Woori Bank)),

one merchant bank (Hanaro Merchant Bank (since renamed Woori Investment Bank and merged with Woori Bank)), and

a number of other smaller financial institutions.

Table of Contents

We were created pursuant to the Financial Holding Company Act, which was enacted in October 2000 and which, together with associated regulations and a related presidential decree, has enabled banks and other financial institutions, including insurance companies, investment trust companies, credit card companies and securities companies, to be organized and managed under the auspices of a single financial holding company.

Our legal and commercial name is Woori Finance Holdings Co., Ltd. Our registered office and corporate headquarters are located at 203 Hoehyon-dong, 1-ga, Chung-gu, Seoul, Korea. Our website address is <http://www.woorifg.com>.

History

Establishment of Woori Finance Holdings

In response to the financial and economic downturn beginning in late 1997, the Korean government announced and implemented a series of comprehensive policy packages to address structural weaknesses in the Korean economy and the financial sector. As part of these measures, on October 1, 1998, the KDIC purchased 95.0% of the outstanding shares of Hanvit Bank (which was at the time named the Commercial Bank of Korea) and 95.6% of the outstanding shares of Hanil Bank (which was subsequently merged into Hanvit Bank). These banks had suffered significant losses in 1997 and 1998. On a Korean GAAP basis, the Commercial Bank of Korea incurred losses of (Won)164 billion in 1997 and (Won)1,644 billion in the first ten months of 1998, while Hanil Bank incurred losses of (Won)281 billion in 1997 and (Won)1,717 billion in the first ten months of 1998. The Korean government took pre-emptive measures to ensure the survival of these and other banks as it believed that bank failures would have a substantial negative impact on the Korean economy. The KDIC acquired the Commercial Bank of Korea and Hanil Bank in particular because they were two of the largest nationwide banks and it was believed that their continued existence was accordingly important to help preserve the stability of Korea's financial system.

Despite the measures implemented by the government, however, the predecessor operations of substantially all of our subsidiaries recorded significant losses in 1999 and 2000, primarily as a result of high levels of non-performing credits and loan loss provisioning. Based on subsequent audits conducted by the Financial Supervisory Service of a number of Korean commercial and merchant banks, the Financial Supervisory Commission announced in April 2000 that certain financial institutions had a high risk of insolvency and that substantial remedial measures were required.

Commercial Banking Operations. The Korean government, through the Financial Supervisory Commission, decided in December 2000 to write down the capital of each of Hanvit Bank (now Woori Bank), Kyongnam Bank, Kwangju Bank and Peace Bank of Korea (which was renamed Woori Credit Card and eventually merged with Woori Bank) to zero. It accomplished this by having the Financial Supervisory Commission issue a capital reduction order with respect to these banks pursuant to its regulatory authority. Under Korean law, the Financial Supervisory Commission has the power to order a distressed financial institution to effect a capital reduction by requiring it either to cancel the whole or a part of the shares held by certain shareholders with or without consideration or to effect a reverse stock-split with respect to the shares owned by certain shareholders. Although the precise requirements of any particular order will vary on a case by case basis, with respect to these banks, the capital reduction order required them to cancel their outstanding shares without providing consideration to shareholders.

After that order was issued by the Financial Supervisory Commission, it was ratified by the board of directors of each bank. Immediately following that ratification, each bank published a notice in two newspapers in Korea that informed shareholders who dissented as to the capital reduction that the relevant bank would be required to purchase their shares, so long as they made a request in writing no more than ten business days following the publication date. Each bank purchased the shares owned by dissenting shareholders within two months after receiving those

requests, in each case at a price negotiated between the bank and its dissenting

Table of Contents

shareholders. With respect to each of the four banks, the bank and the dissenting shareholders were unable to agree on a purchase price. Accordingly, an accounting expert determined that price. Although the shareholders of each of Hanvit Bank, Kyongnam Bank and Kwangju Bank subsequently requested, pursuant to Korean law, that a court review and adjust the determined price, the court in each case declined to make any such adjustment.

The Korean government also decided to recapitalize these banks by injecting public funds through the KDIC in two parts. The first part of this recapitalization would comprise capital injections of approximately (Won)3.6 trillion, in return for new shares of the relevant banks, to eliminate their capital deficits, while the second part would comprise further capital contributions of approximately (Won)2.6 trillion, without consideration, to increase their capital adequacy ratios to more than 10%. Accordingly, trading of shares of these four commercial banks was suspended in December 2000, and the capital of each was written down to zero after each bank purchased outstanding shares from the then-existing dissenting minority shareholders. On December 22, 2000, the Korean government and the labor unions of the four commercial banks entered into an agreement under which the labor unions consented to a plan to include their respective banks as subsidiaries of a state-run financial holding company that would have full management rights to oversee the restructuring of those banks.

In December 2000, the KDIC made initial capital injections to Hanvit Bank ((Won)2,764 billion), Kyongnam Bank ((Won)259 billion), Kwangju Bank ((Won)170 billion) and Peace Bank of Korea ((Won)273 billion), in return for new shares of those banks. The KDIC also agreed to make additional capital contributions, not involving the issuance of new shares, in the future, which were made in September 2001 to Hanvit Bank ((Won)1,877 billion), Kyongnam Bank ((Won)94 billion), Kwangju Bank ((Won)273 billion) and Peace Bank of Korea ((Won)339 billion). These subsequent capital contributions were made pursuant to a memorandum of understanding entered into among the KDIC and the four commercial banks on December 30, 2000. The terms of the memorandum of understanding provided that the four banks would subscribe for bonds issued by the KDIC in an aggregate principal amount equal to the capital contribution amount agreed to by the KDIC, and that the KDIC would then pay the subscription price back to the banks as capital contributions. From the perspective of the KDIC, the issuance of the bonds avoided the need to raise additional cash in connection with the capital contributions. From the perspective of the banks, the KDIC bonds qualified as low-risk assets that helped increase their capital adequacy ratios. The KDIC bonds also paid interest at market rates and were liquid instruments that could be readily sold in the market by the banks for cash.

Merchant Banking Operations. On November 3, 2000, the KDIC established Hanaro Merchant Bank (which was renamed Woori Investment Bank) to restructure substantially all of the assets and liabilities of four failed merchant banks (Yeungnam Merchant Banking Corporation, Central Banking Corporation, Korea Merchant Banking Corporation and H&S Investment Bank) that were transferred to it.

Formation of Financial Holding Company. Partly as a response to perceived inefficiencies in the mechanism by which Korean financial institutions were managed and partly as a first step to divesting itself of its stake in these and other recapitalized financial institutions, the Korean government implemented a number of significant initiatives relating to the Korean financial industry. One of these initiatives, the Financial Holding Company Act, together with associated regulations and a related presidential decree, created a means by which banks and other financial institutions, including insurance companies, investment trust companies, credit card companies and securities companies, could be organized and managed under the auspices of a single financial holding company.

In January 2001, Hanvit Bank, Kyongnam Bank, Kwangju Bank, Peace Bank of Korea and Hanaro Merchant Bank agreed in principle to consolidate and become subsidiaries of a new financial holding company. In July 2001, each entity entered into a memorandum of understanding with us, and we entered into a separate memorandum of understanding with the KDIC. These memoranda of understanding along with those entered with between our subsidiaries and the KDIC, which are described in more detail below, established the basis for the relationships among us, our subsidiaries and the KDIC. These memoranda set forth, among other things, financial targets and restructuring objectives that we and our subsidiaries were expected to satisfy in order to

Table of Contents

create a fully integrated financial services provider and to enable the KDIC to recover the public funds used to recapitalize our subsidiaries. On March 27, 2001, the KDIC transferred all of its shares in each of Hanvit Bank, Kyongnam Bank, Kwangju Bank, Peace Bank of Korea and Hanaro Merchant Bank to our company in exchange for our newly issued shares. Accordingly, we became the sole owner of those subsidiaries. We subsequently listed our shares on the Stock Market Division of the Korea Exchange on June 24, 2002.

Pursuant to the terms of the Financial Holding Company Act, we are subject to certain limitations on our activities that would not be applicable to most other Korean corporations. For example, we:

may not engage in any business other than managing our subsidiaries;

must obtain prior approval from, or file a prior report with, the Financial Supervisory Commission before we can acquire control of another company;

must obtain permission from the Financial Supervisory Commission to liquidate or to merge with another company;

must inform the Financial Supervisory Commission if there is any change in our officers, directors or largest shareholder; and

must inform the Financial Supervisory Commission if we cease to control any of our direct or indirect subsidiaries by disposing of shares in those subsidiaries.

See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies.

Relationship with the Korean Government

Our relationship with the Korean government is governed by a number of agreements, including in particular the agreements discussed below. In addition, the Korean government, through the KDIC, is our largest shareholder and accordingly has the ability to require us to take a number of actions beyond those specifically covered by these agreements. See Item 3D. Risk Factors Risks relating to government control and Risks relating to government regulation and policy.

Labor-Government Agreement. Under the December 2000 agreement between our subsidiaries labor unions and the Korean government, we control the management strategies of our subsidiaries and have the ability to dispose of overlapping business lines. Pursuant to this agreement, any downsizing that may be required in connection with the reorganization of our subsidiaries operations should be implemented based on separate agreements concluded between us and our subsidiaries labor unions. In July 2002, we reached an agreement with the labor unions of Kyongnam Bank and Kwangju Bank pursuant to which we agreed to maintain the two banks as separate entities, while integrating the operating standards (including risk management operations) and information technology systems of our commercial banking subsidiaries.

Memoranda of Understanding between our Subsidiaries and the KDIC. In December 2000, in connection with the capital contributions made by the KDIC into each of Hanvit Bank, Kyongnam Bank, Kwangju Bank, Peace Bank of Korea and Hanaro Merchant Bank, these subsidiaries

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

entered into separate memoranda of understanding with the KDIC that included business normalization plans. The plans were substantially identical with respect to each bank, other than with respect to specific financial targets, and primarily dealt with each subsidiary's obligation to implement a two-year business normalization plan covering 2001 and 2002. To the extent that any subsidiary fails to implement its business normalization plan or to meet financial targets, the KDIC has the right to impose sanctions on that subsidiary's directors or employees, or to require the subsidiary to take certain actions. In addition, each subsidiary is required to take all actions necessary to enable us to return to the KDIC any public funds injected into them, so long as that action does not cause a material adverse effect on the normalization of business operations as contemplated by the memorandum of understanding.

Table of Contents

Each subsidiary prepared a two-year business normalization plan that was approved by the KDIC. Each plan included recapitalization goals and deadlines, econometric models, plans to dispose of non-performing loans, cost reduction initiatives, future management and business strategies and other restructuring plans. Each plan also set forth six financial targets for each quarter of 2001 and 2002 that the applicable subsidiary was required to meet.

In addition, the directors of each subsidiary executed a letter of undertaking, pursuant to which they assumed responsibility for the relevant subsidiary's performance in executing these obligations.

Under each memorandum of understanding, the KDIC could exercise its discretion in determining whether to take punitive measures against any subsidiary that failed to meet any financial targets. The subsidiaries generally met their targets, other than Peace Bank of Korea, which failed to meet five of its six financial targets as of June 30, 2001. We decided to merge Peace Bank of Korea's commercial banking business into Hanvit Bank and to transform Peace Bank of Korea into our credit card subsidiary, Woori Credit Card. See Reorganization and Integration Plan. In March 2002, Woori Credit Card entered into a memorandum of understanding with the KDIC that included a business normalization plan. This replaced the earlier memorandum of understanding entered into by Peace Bank of Korea and the KDIC in December 2000. The business normalization plan was substantially similar to the business normalization plan agreed to by Peace Bank of Korea.

Woori Investment Bank (formerly known as Hanaro Merchant Bank) also failed to meet three of its six financial targets as of December 31, 2002. In August 2003, we merged Woori Investment Bank with Woori Bank.

The subsidiaries (with the exception of Woori Investment Bank and Woori Credit Card) entered into a new business normalization plan with new restructuring measures and financial targets with the KDIC in January 2003. In May 2003, Woori Credit Card entered into a similar business normalization plan with the KDIC. Woori Credit Card failed to meet three of its five financial targets as of June 30 and September 30, 2003 and failed to meet four of its five financial targets as of December 31, 2003. As a result of these failures, the KDIC imposed penalties on Woori Credit Card, including the termination of certain members of its senior management and the reduction of the compensation of certain others. In December 2003, our board of directors resolved to merge Woori Credit Card with Woori Bank, which merger was completed in March 2004. Kwangju Bank and Kyongnam Bank also failed to meet their respective return on assets target as of December 31, 2003, although they met such target as of March 31, 2004. Due to its merger with Woori Credit Card, Woori Bank also failed to meet its return on assets target and operating profit per employee target as of June 30, 2004. We negotiated with the KDIC to adjust some of the financial targets applicable to us and our subsidiaries under our memoranda of understanding and, as a result, each of Woori Bank, Kyongnam Bank and Kwangju Bank met its financial targets as of December 31, 2004.

Our subsidiaries entered into a new business normalization plan with new restructuring measures and financial targets with the KDIC on April 2005. In addition to the new restructuring measures and financial targets, the plan primarily dealt with ways to reduce labor cost and increase employees' productivity and efficiency in our subsidiaries. Each of Woori Bank, Kyongnam Bank and Kwangju Bank met its financial targets under the plan. Each of Woori Bank, Kyongnam Bank and Kwangju Bank entered into a new business normalization plan with the KDIC in April 2007. See Recent Developments with the KDIC.

Memorandum of Understanding with the KDIC. In July 2001, we entered into a memorandum of understanding with the KDIC, which included financial targets and a business plan. Under this memorandum, we are required to take all actions necessary (including making dividend payments and share buybacks and cancellations) to return the public funds injected into us by the KDIC, but only to the extent that these actions would not cause a material adverse effect on the contemplated normalization of our operations. To the extent that we fail to perform our obligations, the KDIC is entitled to impose sanctions on our directors and employees, ranging from warnings and wage reductions to suspension or termination of employment. The KDIC can also

Table of Contents

order us to take remedial measures against those subsidiaries with whom we have entered into separate memoranda of understanding. See Memoranda of Understanding with our Subsidiaries.

In addition, our directors executed a letter of undertaking, pursuant to which they assumed responsibility for our performance of these obligations.

The business plan included in the memorandum of understanding, which we prepared and which the KDIC approved, set forth the basis on which we were to manage the normalization and integration of our subsidiaries' operations and to return the public funds that were injected into them. The business plan also set financial targets for our capital ratio, return on total assets, expense-to-revenue ratio, operating income per employee, non-performing loan ratio and holding company expense ratio. We were required to meet these financial targets on a semi-annual basis. The memorandum of understanding will terminate once the KDIC loses its status as our largest shareholder.

We failed to meet three of the financial targets as of June 30, 2004, which were return on total assets, expense to revenue ratio, and operating income per employee. The KDIC notified us that we could not improve fringe benefits for our employees (including salaries), and ordered us to devise and report to the KDIC a plan to meet those three financial targets. We negotiated with the KDIC to adjust some of the financial targets applicable to us and our subsidiaries under our memoranda of understanding and, as a result, we met our financial targets as of December 31, 2004.

Pursuant to the terms of this memorandum of understanding, we entered into a new business normalization plan with new restructuring measures and financial targets with the KDIC in April 2005. In addition to the new restructuring measures and financial targets, the plan primarily dealt with ways to increase labor efficiency and to set up a comprehensive financial network for increased synergy among the group members and strengthening our incentive-based management system. We met all of our financial targets under the plan. We entered into a new business normalization plan with the KDIC in April 2007. See Recent Developments with the KDIC.

Memoranda of Understanding with Our Subsidiaries. In July 2001, we entered into separate memoranda of understanding with each of Hanvit Bank, Kyongnam Bank, Kwangju Bank, Peace Bank of Korea and Hanaro Merchant Bank, each of which included financial targets and a business initiative plan. The plans are substantially identical with respect to each subsidiary, other than with respect to specific financial targets, and each plan is primarily intended to define the respective roles of us and each of our subsidiaries within the context of the financial group as a whole, including our rights and our obligations with respect to each subsidiary. These include each subsidiary's obligations to implement its business initiative plan and to meet the financial targets set forth in the respective memorandum of understanding on a quarterly basis, and certain other matters that we may require from time to time. Each business initiative plan sets forth initiatives related to each subsidiary's operational integration. For example, Hanvit Bank's initial business initiative plan included:

cooperating with us to develop an integrated management and support system for us to oversee the operations of our subsidiaries;

disposing of redundant branches and certain subsidiaries;

adopting U.S. GAAP accounting; and

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

cooperating with us to consolidate our risk management operations and information technology systems, establish an information technology subsidiary, consolidate our credit card business, dispose of non-performing assets and establish our asset management subsidiary.

Subsequent business initiative plans have required Woori Bank to continue these activities and undertake new initiatives.

Under the terms of each memorandum of understanding, our role within the group includes supervising the implementation of overall management policies and strategies, determining business targets for each subsidiary

Table of Contents

in order to meet our respective business targets, consulting with each subsidiary with respect to its business plans, budgets, dividend policies and capital increases, evaluating the management of each subsidiary and determining management compensation. The role of each subsidiary includes executing the business targets we set, consulting with us with respect to important management decisions, developing a restructuring execution plan and cooperating with respect to paying consulting fees incurred in connection with developing business strategies.

If we determine that a subsidiary has failed to perform its obligations under its memorandum of understanding, we have the right to impose sanctions on its directors or employees, or to take other remedial measures. Each memorandum of understanding also provides that it will terminate if the subsidiary loses its status as our subsidiary under the Financial Holding Company Act. The memorandum of understanding would not, however, terminate simply if the KDIC were to lose its status as our largest shareholder.

The specified financial targets for 2007 and 2008 that are to be met by Woori Bank, Kyongnam Bank and Kwangju Bank are identical to those imposed by the KDIC on those subsidiaries.

Recent Developments with the KDIC. In April 2007, we and Woori Bank, Kyongnam Bank and Kwangju Bank each entered into a new two-year business normalization plan with the KDIC that included new restructuring measures and financial targets. In addition, the plan primarily dealt with ways to increase labor efficiency and to set up a comprehensive financial network for increased synergy among the group members and strengthening our incentive-based management system. The other terms of the previously agreed memoranda of understanding remain unchanged.

Our two-year business normalization plan sets forth the basis on which we should manage the normalization and integration of our subsidiaries operations as well as return the public funds that were injected into those subsidiaries. The business normalization plan sets forth six financial targets for each quarter of 2007 and 2008 that we are required to meet on a Korean GAAP basis. Our current Korean GAAP targets for each six-month period in 2007 and 2008 are set forth in the following table:

	Six-month period ended			
	2007		2008	
	June	December	June	December
Capital adequacy ratio ⁽¹⁾	10.0%	9.6%	9.5%	9.7%
Return on total assets ⁽²⁾	0.6	0.7	0.6	0.7
Expense-to-revenue ratio ⁽³⁾	51.8	50.7	51.8	50.5
Operating income per employee (Won millions) ⁽⁴⁾	(Won) 350	(Won) 360	(Won) 360	(Won) 370
Non-performing loan ratio ⁽⁵⁾	0.7%	0.7%	0.7%	0.7%
Holding company expense ratio ⁽⁶⁾	0.6	0.6	0.6	0.6

⁽¹⁾ For a description of how the capital adequacy ratio is calculated, see Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

⁽²⁾ Represents the ratio of net income (excluding proceeds from sales of certain equity securities held by Woori Bank as a result of prior debt-to-equity swaps) to total assets.

⁽³⁾ Represents the ratio of general and administrative expenses to adjusted operating income. Adjusted operating income represents operating income before loan loss provisions and general and administrative expenses.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

- (4) Represents the ratio of adjusted operating income to total number of employees.
- (5) Represents the ratio of total credits classified as substandard or below to total credits, net of provisions.
- (6) Represents the ratio of the holding company's expenses to adjusted operating income of its subsidiaries.

Each of Woori Bank, Kyongnam Bank and Kwangju Bank also submitted similar two-year business normalization plans that contain similar financial targets that each subsidiary is required to meet. We expect that we and these subsidiaries will be required to enter into new business normalization plans with the KDIC every two years so long as the KDIC remains our largest shareholder.

Table of Contents

Reorganization and Integration Plan

Following our establishment and our acquisition of our subsidiaries, we developed a reorganization and integration plan designed to reorganize the corporate structure of some of our subsidiaries and integrate our operations under a single management structure. As part of this plan, and after receiving approval from the Financial Supervisory Commission for each of these measures:

From December 2001 through February 2002, we restructured Peace Bank of Korea by:

splitting off its commercial banking operations and merging them into Woori Bank;

changing the name of Peace Bank of Korea to Woori Credit Card; and

transferring the credit card operations of Woori Bank to Woori Credit Card. In connection with this transfer, Woori Credit Card acquired all of the existing credit card accounts of Woori Bank but none of the outstanding receivables with respect to such accounts, which remained with Woori Bank.

In March 2002, we made Woori Investment Trust Management a direct subsidiary by acquiring all of its outstanding capital stock from Woori Bank.

In July 2002, we made Woori Securities a direct subsidiary by acquiring a majority of its outstanding capital stock from Woori Bank.

In March 2003, we transferred the credit card operations of Kwangju Bank to Woori Credit Card.

In August 2003, we merged Woori Investment Bank with Woori Bank by exchanging Woori Investment Bank's shares with shares of Woori Bank.

In March 2004, we merged Woori Credit Card with Woori Bank. In connection with this merger, Woori Credit Card spun off and transferred to Kwangju Bank all of the existing credit card accounts (but none of the outstanding receivables with respect to such accounts) that Woori Credit Card had previously acquired from Kwangju Bank.

In June 2004, we acquired the 39.7% interest in Woori Securities that we did not own, and delisted it from the Stock Market Division of the Korea Exchange in July 2004.

In October and December 2004, we acquired an aggregate 27.3% voting interest in LGIS. In March 2005, we merged Woori Securities into LGIS and renamed the surviving entity Woori Investment & Securities, which became an equity method investee.

In May 2005, we acquired a 90.0% interest in LG Investment Trust Management, or LGITM, from Woori Investment & Securities and merged Woori Investment Trust Management into LGITM. We renamed the surviving entity Woori Asset Management, which remains a consolidated subsidiary. In July and September 2005, Woori Asset Management reacquired the remaining 10.0% interest from its minority shareholders. In May 2006, we transferred 30.0% of our interest in Woori Asset Management to Credit Suisse.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Following this transfer, we renamed the entity Woori Credit Suisse Asset Management.

Furthermore, as part of our integration efforts under the plan:

In 2002, we standardized the logo of certain of our subsidiaries, including Woori Bank, Woori Securities and Woori Investment Trust Management.

In 2002, Woori Bank streamlined its appropriation procedures for goods and services, and we have implemented these procedures on a group-wide level to reduce costs.

As part of our overall reorganization and integration plan, we completed our business process re-engineering project in November 2004, aimed at enhancing our marketing capabilities, reducing expenses and improving our warning and monitoring system for our credit portfolio. As a result of our implementation of this project, we

Table of Contents

have been awarded various patents and other intellectual property rights in connection with the project's implementation and structure.

In addition, we have implemented a group-wide, standardized risk management system (except with respect to credit risk management and operational risk management). With respect to the credit risk management systems of our banking subsidiaries, we are currently in the process of implementing various upgrades to standardize such systems based on the Woori Bank system. In 2006, we completed implementation of various aspects of the operational risk management system (not including the business risk management system) at Kyongnam Bank, Kwangju Bank and Woori Finance Information System, and expect to implement such aspects of the operational risk management system at Woori Investment & Securities by the end of 2007.

Item 4B. Business Overview

Business

We are Korea's first financial holding company, and our operations include the third-largest commercial bank in Korea, in terms of total assets (including loans). Our subsidiaries collectively engage in a broad range of businesses, including commercial banking, credit cards, capital markets activities, international banking, asset management and bancassurance. We provide a wide range of products and services to our customers, which mainly comprise individuals and small- and medium-sized enterprises, as well as some of Korea's largest corporations. As of December 31, 2006, we had consolidated total assets of (Won)195.1 trillion, consolidated total deposits of (Won)126.5 trillion and consolidated stockholders' equity of (Won)10.4 trillion.

We were established as a financial holding company in March 2001, to consolidate the Korean government's interest in a number of distressed financial institutions in the wake of the financial crisis in Korea in the late 1990s. Over the past five years, we have succeeded in restructuring our operations by: securing a solid capital base for our banking subsidiaries; improving the quality of our exposure to and our relationships in the large corporate sector; refocusing our lending activities on individual and small- and medium-sized enterprise customers to take advantage of our network of 1,099 branches nationwide; expanding our activities in the areas of credit cards, full service brokerage, asset management and bancassurance for our over 17 million retail customers; modernizing and strengthening our credit risk review and management capabilities; working to integrate and cross-sell our products and services; and striving to create a customer- and service-oriented culture that measures and rewards performance.

The following chart provides an overview of our structure, including our significant subsidiaries and our ownership of such subsidiaries as of the date of this annual report:

⁽¹⁾ Woori Investment & Securities is accounted for as an equity method investee.

Table of Contents

As one of the leading financial services groups in Korea, we believe our core competitive strengths include the following:

Financial holding company structure. We believe our financial holding company structure gives us a competitive advantage over commercial banks and unaffiliated financial services providers by:

allowing us to offer a more extensive range of financial products and services;

enabling us to share customer information, which is not permitted outside a financial holding company structure, thereby enhancing our risk management and cross-selling capabilities;

enhancing our ability to reduce costs in areas such as back-office processing and procurement; and

enabling us to raise and manage capital on a centralized basis.

Strong and long standing relationships with corporate customers. Historically the operations of Woori Bank, our largest subsidiary, concentrated on large corporate customers. As a result, we believe that we have strong relationships with many of Korea's leading corporate groups, and we are the main creditor bank to 13 of the 30 largest Korean corporations. Further enhancing our corporate loan portfolio is our growing ability to lend to small- and medium-sized enterprise customers, which numbered approximately 499,000 as of December 31, 2006.

Large and loyal retail customer base. With respect to our consumer banking operations, we have the second-largest deposit base of any Korean commercial bank, and over 17 million retail customers, representing about half of the Korean adult population. Of these customers, more than half are active customers, meaning that they have an account with us with a positive balance or have transacted business with us at least once during the last six months.

Extensive distribution and marketing network. We serve our customers primarily through the second-largest banking network in Korea, comprising over 1,099 branches and 8,331 ATMs and cash dispensers. Through Woori Bank, we also operate 13 dedicated corporate marketing centers and over 90 relationship managers for our large corporate customers and over 700 relationship professionals stationed at 623 branches for our small- and medium-sized enterprise customers. In addition, we have constructed new Internet and mobile banking platforms to enhance customer convenience, reduce service delivery costs and allow our branch staff to focus on marketing and sales.

Strong capital base. As of December 31, 2006, our consolidated stockholders' equity totaled (Won)10.4 trillion, and the combined capital adequacy ratio of our banking subsidiaries was 11.4%. Our management team at the holding company carefully coordinates the capital and dividend plans of each of our subsidiaries and for the consolidated group to ensure that we optimize our capital position. We believe our strong capital base and coordinated capital management enable us to support growth of our core businesses and to pursue franchise-enhancing initiatives such as selective investments and acquisitions.

Strong and experienced management team. Our management team comprises both experienced managers from our subsidiaries and their predecessor companies as well as leading experienced financial industry professionals who have recently been recruited from outside our group to complement our team. In March 2007, Byong-Won Bahk, a former Vice Minister of Finance and Economy of Korea, assumed the role of our

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

chairman and chief executive officer, which we believe has enhanced the quality of our management team and our corporate governance. We also believe that the extensive experience of many members of our management team in the financial sector will help us to continue to strengthen our operations.

Table of Contents

Strategy

Our goal is to become a dynamic, leading full-service provider of financial services and products to corporate and consumer customers in Korea, and we will measure our success based on our ability to increase our profitability and shareholder value. We intend to capitalize on our strong market and financial position, which is the result of our restructuring over the past few years, to further strengthen our capabilities, customer penetration, efficiency and profitability. The key elements of our strategy are to:

Further improve our asset quality and strengthen our risk management practices. We were one of the earliest and most aggressive banks in Korea to actively reduce non-performing loans through charge-offs and sales to third parties. Since 2002, we have entered into joint venture arrangements with several financial institutions to facilitate the disposal of our substandard or below loans. As a result of these and other initiatives, our ratio of non-performing loans to total loans decreased from 9.8% at December 31, 2001 to 1.1% as of December 31, 2006.

One of our highest priorities is to maintain our strong asset quality and enhance our risk management practices on an ongoing basis. We created a centralized group-wide risk management organization, installed a comprehensive warning and monitoring system, adopted uniform loan loss provisioning policies across all subsidiaries and implemented an advanced credit evaluation system called CREPIA at Woori Bank. Kyongnam Bank and Kwangju Bank currently use credit evaluation systems based on the Woori Bank system. In preparation for the implementation of Basel II, we recently undertook upgrades to our credit risk management systems, including credit evaluation models, collateral management systems and non-performing credit management systems, which were completed in December 2006 for Woori Bank and in April 2007 for Kyongnam Bank and Kwangju Bank.

In addition, we adopted a value at risk, or VaR, monitoring system for managing market risk. We intend to vigorously maintain a manageable risk profile and balance that risk profile with adequate returns. We believe that our continuous focus on upgrading our risk management systems and practices will enable us to maintain our strong asset quality, improve our financial performance and enhance our competitiveness.

Enhance customer profitability through optimization of channel usage, products and services for each customer segment. Our extensive distribution network and wide range of quality products and services has enabled us to serve our customers effectively. However, we intend to further enhance value proposition to our customers by differentiating products and delivery channels based on the distinct needs of different customer segments.

Retail customers. We have segmented our retail customers into four groups: high net worth; mass affluent; middle class; and mass market. We believe we are relatively competitive in our core customer base, which includes mass affluent and middle class customers, and we serve these customers via our team of financial planners in our branches who sell customized higher margin services and products, such as investment advice, mutual funds, insurance, personal loans and securities brokerage services. For our mass market customers, we offer simple, easy-to-understand and relatively more standardized products such as basic deposit and lending products, including mortgage loans, and we encourage the use of alternative distribution channels such as the Internet, phone banking and ATMs by our mass market customers such that we can serve them in a cost efficient manner. We serve our high net worth individuals via branches and dedicated private banking centers staffed with experienced private bankers who offer sophisticated tailored financial services.

Corporate customers. We continuously and vigorously review our portfolio of corporate and small- and medium-sized enterprise customers to refine our database of core accounts and industries in terms of profitability potential. We seek to expand our relationship beyond a pure lending relationship by promoting our foreign exchange, factoring, trade finance and investment banking services to our core small- and medium-sized enterprise customers and cross-selling our investment banking services, derivatives and other risk hedging products, as well as employee

retirement products to our core large corporate customers.

Table of Contents

Diversify our revenue base with a view to reducing our exposure to interest rate cycles and increasing profitability. Currently, in line with the Korean banking industry, we derive a substantial majority of our revenues from our loan and other credit products. To reduce our traditional reliance on lending as a source of revenue and to increase our profitability, we intend to further diversify our earnings base, in particular by focusing on fee-based services, such as foreign exchange, trade finance and derivatives products, investment banking and advisory investment trust services for our corporate customers and asset management and mutual funds, investment trust products and beneficiary certificates, life and non-life insurance products and securities brokerage services for our retail customers.

In addition, we intend to continue to enter into business alliances with other leading financial service providers so that we can offer a full range of best of class products and services to our targeted customers. We actively evaluate alliances and joint venture opportunities when they arise in order to diversify our revenue stream and provide our customers with a range of sophisticated and tailored products that will complement our existing products and services. We also intend to carefully consider potential acquisitions or other strategic investments that fit within our overall strategy. When considering acquisitions, we will focus on opportunities that (1) supplement the range of products and services we offer and strengthen our existing customer base; (2) enable us to maintain our standard for asset quality and profitability; and (3) provide us with a reasonable return on our investment.

Enhance operational efficiencies to further reduce costs. We intend to improve our operational efficiency and reduce our expenses by integrating our businesses, unifying our business procedures, eliminating duplication, centralizing processes and procurement, implementing continuous automation and migrating to low cost distribution channels. We have standardized the risk management operations (except with respect to credit risk management and operational risk management) of Kyongnam Bank and Kwangju Bank with those of Woori Bank. With respect to the credit risk management systems of Kyongnam Bank and Kwangju Bank, we are currently in the process of implementing various upgrades to standardize such systems based on the Woori Bank system. Credit evaluation and approval processes, foreign exchange operations and back-office functions at Woori Bank were removed from branches and centralized at the head office or regional centers in 2003 in order to reduce cost and free up branch staff for marketing.

We believe that the integration of our accounting system will allow us to further eliminate redundant functions and equipment and reducing our long-term expense. In addition, we are continuing our efforts to reduce procurement costs by coordinating and combining procurement activities among our subsidiaries. We believe the completion of the above integration, centralization and procurement projects together with our effort to encourage migration of our mass market customers to low-cost alternative channels will reduce our costs and enhance our operating efficiencies meaningfully.

Strengthen the performance of our management. We are also taking steps to concentrate the personnel management and performance-monitoring functions with respect to our subsidiaries at the holding company level. We believe such enhanced coordination and management will, in turn, improve our overall long-term operating performance by promoting: (1) more efficient deployment of human resources, based on prioritized strategic and operational objectives of the group as a whole; (2) more effective allocation of capital and management of liquidity at our holding company and subsidiaries; (3) greater flexibility to implement coordinated and timely operational changes in response to new market developments or changes in market conditions; and (4) the development of a uniform corporate culture, founded on the Woori corporate identity.

Corporate Banking

We provide commercial banking services to large corporate customers (including government-owned enterprises) and small- and medium-sized enterprises in Korea. Currently, our corporate banking operations consist mainly of lending to and taking deposits from our corporate customers. We also provide ancillary services on a fee basis, such as inter-account transfers, transfers of funds from branches and agencies of a company to its headquarters and transfers of funds from a company's customer accounts to the company's main

Table of Contents

account. We provide our corporate banking services predominantly through Woori Bank, although Kyongnam Bank and Kwangju Bank provide similar services to small- and medium-sized enterprises in their respective geographical regions.

The following table sets forth the balances and percentages of our total lending and total deposits represented by our large corporate and small- and medium-sized enterprise customer loans and deposits, respectively, and the number of such customers as of the dates indicated:

	As of December 31,					
	2004		2005		2006	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
(in billions of Won, except percentages)						
Loans:

Number of borrowers:						
Small- and medium-sized enterprise	160,391		189,052		172,759	
Large corporate	784		1,097		924	

⁽¹⁾ Includes loans to governmental agencies, foreign loans and other corporate loans.

Corporate loans we provide consist principally of the following:

working capital loans, which are loans used for general working capital purposes, typically with a maturity of one year or less, including notes discounted and trade finance; and

facilities loans, which are loans to finance the purchase of materials, equipment and facilities, typically with a maturity of three years or more.

On the deposit-taking side, we currently offer our corporate customers several types of corporate deposit products. These products can be divided into two general categories: demand deposits that have no restrictions on deposits or withdrawals, but which offer a relatively low interest rate; and time deposits from which withdrawals are restricted for a period of time, but offer higher interest rates. We also offer installment deposits, certificates of deposit and repurchase instruments. We offer varying interest rates on our deposit products depending upon

the rate of return on our income-earning assets, average funding costs and interest rates offered by other nationwide commercial banks.

Small- and Medium-Sized Enterprise Banking

Small- and medium-sized enterprises generally comprise those companies and personal businesses that we do not classify as large corporate customers. Under the Small and Medium Industry Basic Act of Korea, the general criteria used to define small- and medium-sized enterprises is the number of full-time employees (less than 300), paid-in capital (not more than (Won)8 billion) or sales revenues (not more than (Won)30 billion), depending on the industry, but in each case the number of full-time employees must be less than 1,000. The small- and medium-sized enterprise segment of the corporate banking market has grown significantly in recent years, including as a result of government measures to encourage lending to these enterprises. As a result of our efforts

Table of Contents

to target this growing market segment, our loan exposure to small- and medium-sized enterprises has increased from 52.3% of our total corporate loans as of December 31, 2001 to 73.0% as of December 31, 2006. As of December 31, 2006, 32.6% of our small- and medium-sized enterprise loans were extended to borrowers in the manufacturing industry, 15.6% were extended to borrowers in the retail and wholesale industry and 6.5% were extended to borrowers in the hotel and transportation industry.

We service our small- and medium-sized enterprise customers primarily through Woori Bank's network of branches and small- and medium-sized enterprise relationship professionals, as well as through the branches and headquarters of Kyongnam Bank and Kwangju Bank. As of December 31, 2006, Woori Bank had stationed one or more relationship professionals at 623 branches, of which 477 were located in the Seoul metropolitan area. The relationship professionals specialize in servicing the banking needs of small- and medium-sized enterprise customers and concentrate their marketing efforts on developing new customers in this segment. As of December 31, 2006, Woori Bank had a total of 712 small- and medium-sized enterprise relationship professionals stationed at its branches.

In addition to increasing our dedicated staffing and branches, our strategy for this banking segment is to identify promising industry sectors and to develop and market products and services targeted towards customers in these sectors. We have also developed in-house industry specialists who can help us identify leading small- and medium-sized enterprises in, and develop products and marketing strategies for, these targeted industries. In addition, we operate customer loyalty programs at Woori Bank for our most profitable small- and medium-sized enterprise customers and provide them with benefits and services such as preferential rates, free seminars and workshops and complementary invitations to cultural events.

Industry-wide delinquency ratios for Won-denominated loans to small- and medium-sized enterprises rose from 2002 through 2004, although these delinquency ratios stabilized in 2005 and 2006. As of December 31, 2006, the delinquency ratio for loans to small- and medium-sized enterprise was calculated as the ratio of (1) the outstanding balance of such loans in respect of which either principal payments are overdue by one day or more or interest payments are over due by 14 days or more (unless prior interest payments on a loan were made late on more than three occasions, in which case the loan is considered delinquent if interest payments are overdue by one day or more) to (2) the aggregate outstanding balance of such loans. From January 1, 2007, the delinquency ratio for small- and medium-sized enterprise is calculated as the ratio of (1) the outstanding balance of such loans in respect of which either principal or interest payments are over due by one month or more to (2) the aggregate outstanding balance of such loans. Our delinquency ratio for such loans denominated in Won on a Korean GAAP basis increased from 1.5% as of December 31, 2001 to 2.7% as of December 31, 2004, but decreased to 1.9% as of December 31, 2005 and to 1.4% as of December 31, 2006. On a Korean GAAP basis, we charged off (Won)107 billion of our Won-denominated loans to small- and medium-sized enterprises in 2006. See Item 3D. Risk Factors Risks relating to our corporate credit portfolio The largest portion of our exposure is to small- and medium-sized enterprises, and financial difficulties experienced by companies in this segment may result in a deterioration of our asset quality and have an adverse impact on us.

Lending Activities. We provide both working capital loans and facilities loans to our small- and medium-sized enterprise customers. As of December 31, 2006, working capital loans and facilities loans accounted for 76.9% and 16.0%, respectively, of our total small- and medium-sized enterprise loans. As of December 31, 2006, we had approximately 173,000 small- and medium-sized enterprise borrowers.

As of December 31, 2006, secured loans and loans guaranteed by a third party accounted for 57.8% and 15.5%, respectively, of our small- and medium-sized enterprise loans. As of December 31, 2006, approximately 70.5% of the secured loans were secured by real estate and 10.4% were secured by deposits. Working capital loans generally have a maturity of one year, but may be extended on an annual basis for an aggregate term of three to five years if periodic payments are made. Facilities loans have a maximum maturity of ten years.

When evaluating the extension of working capital loans and facilities loans, we review the creditworthiness and capability to generate cash of the small- and medium-sized enterprise customer. Furthermore, we take

Table of Contents

corporate guarantees and credit guarantee letters from other financial institutions and use deposits that the borrower has with us or securities pledged to us as collateral. We receive fees in relation to credit evaluation, collateral appraisal and other services provided in connection with a loan extension.

The value of any collateral is defined using a formula that takes into account the appraised value of the property, any prior liens or other claims against the property and an adjustment factor based on a number of considerations including, with respect to property, the value of any nearby property sold in a court-supervised auction during the previous five years. We generally revalue any collateral on a periodic basis (every two years for real estate, every year for equipment, every month for unlisted stocks and deposits and every week for stocks listed on a major Korean stock exchange) or if a trigger event occurs with respect to the loan in question.

Pricing. We establish the pricing for our small- and medium-sized enterprise loan products based principally on transaction risk, our cost of funding and market considerations. At Woori Bank, lending rates are generally determined using our automated CREPIA system, and we expect to begin determining lending rates at Kyoungnam Bank and Kwangju Bank using similar credit evaluation systems in the second half of 2007. See Item 11. Quantitative and Qualitative Disclosures about Market Risk Credit Risk Management Credit Evaluation and Approval. We measure transaction risk using factors such as the credit rating assigned to a particular borrower and the value and type of collateral. Our system also takes into account cost factors such as the current market interest rate, opportunity cost and cost of capital, as well as a spread calculated to achieve a target rate of return. Depending on the price and other terms set by competing banks for similar borrowers, we may reduce the interest rate we charge to compete more effectively with other banks. Loan officers have limited discretion in deciding what interest rates to offer, and significant variations require review at higher levels. As of December 31, 2006, about two-thirds of our small- and medium-sized enterprise loans had interest rates that varied with reference to current market interest rates.

Large Corporate Banking

Large corporate customers include all companies that are either affiliates of the top six *chaebols* in Korea or have assets of (Won)7 billion and are therefore subject to external audit under the External Audit Act of Korea. As a result of our history and development, particularly the history of Woori Bank, we remain the main creditor bank to many of Korea's largest corporate borrowers.

In terms of our outstanding loan balance, as of December 31, 2006, 58.3% of our large corporate loans were extended to borrowers in the manufacturing industry, 11.3% were extended to borrowers in the retail and wholesale industry and 6.7% were extended to borrowers in the hotel and transportation industry.

We service our large corporate customers primarily through Woori Bank's network of dedicated corporate marketing centers and relationship managers. Woori Bank operates 13 dedicated corporate marketing centers, 11 of which are located in the Seoul metropolitan area. Each center is staffed with several relationship managers and headed by a senior relationship manager. Depending on the center, each relationship manager is responsible for large corporate customers that either are affiliates of a particular *chaebol* or operate in a particular industry or region. As of December 31, 2006, Woori Bank had a total of 93 relationship managers who focus on marketing to and managing the accounts of large corporate customers.

Our strategy for the large corporate banking segment is to develop new products and cross-sell our existing products and services to our core base of large corporate customers. In particular, we have been focusing on marketing fee-based products and services such as foreign exchange and trade finance services, derivatives and other risk hedging products, investment banking services and advisory services. We have also been reviewing the credit and risk profiles of our existing customers as well as those of our competitors, with a view to identifying a target group of

high-quality customers on whom we can concentrate our marketing efforts. In addition, we are seeking to increase the *chaebol*-, region- and industry-based specialization of our relationship managers, including through the operation of a knowledge management database that allows greater sharing of marketing techniques and skills.

Table of Contents

Lending Activities. We provide both working capital loans and facilities loans to our large corporate customers. As of December 31, 2006, working capital loans and facilities loans accounted for 35.6 % and 4.5%, respectively, of our total large corporate loans.

Loans to large corporate customers may be secured by real estate or deposits or be unsecured. As of December 31, 2006, secured loans and loans guaranteed by a third party accounted for 20.1% and 3.2%, respectively, of our large corporate loans. Since a relatively low percentage of our large corporate loan portfolio is secured by collateral, we may be required to establish larger allowances for loan losses with respect to any such loans that become non-performing or impaired. See [Assets and Liabilities](#) [Asset Quality of Loans](#) [Loan Loss Provisioning Policy](#). As of December 31, 2006, approximately 58.5% of the secured loans were secured by real estate and approximately 5.8% were secured by deposits. Working capital loans generally have a maturity of one year but may be extended on an annual basis for an aggregate term of three to five years. Facilities loans have a maximum maturity of ten years.

We evaluate creditworthiness and collateral for our loans to corporate customers in essentially the same way as we do for loans to small- and medium-sized enterprise customers. See [Corporate Banking](#) [Small- and Medium-Sized Enterprise Banking](#) [Lending Activities](#).

Pricing. We determine the pricing of our loans to corporate customers in the same way that we determine the pricing of our loans to small- and medium-sized enterprise customers. See [Corporate Banking](#) [Small- and Medium-Sized Enterprise Banking](#) [Pricing](#). As of December 31, 2006, about one-third of these loans had interest rates that varied with reference to current market interest rates.

Consumer Banking

We provide retail banking services to consumers in Korea. Our consumer banking operations consist mainly of lending to and taking deposits from our retail customers. We also provide ancillary services on a fee basis, such as wire transfers. While we have historically attracted and held large amounts of consumer deposits through our extensive branch network, our substantial consumer lending growth occurred principally in recent years, in line with the increase in the overall level of consumer debt in Korea. We provide our consumer banking services primarily through Woori Bank, although we service a significant portion of our regional retail banking customers through Kyongnam Bank and Kwangju Bank. See [Branch Network and Other Distribution Channels](#).

Woori Bank classifies its consumer banking customers based on their individual net worth and contribution to our consumer banking operations, into four groups: high net worth; mass affluent; middle class; and mass market. We differentiate our products, services and service delivery channels with respect to these segments and target our marketing and cross-selling efforts based on this segmentation. With respect to the high net worth and mass affluent segments, we have established private banking operations to better service customers in these segments. See [Private Banking Operations](#). With respect to the middle class segment, we intend to use our branch-level sales staff to maximize the overall volume of products and services we provide. With respect to the mass market segment, we have focused on increasing our operating efficiency by encouraging customers to migrate to low-cost alternative service delivery channels, such as the Internet, call centers, mobile banking and ATMs. Kyongnam Bank and Kwangju Bank have segmented their customers into similar groups.

Kyongnam Bank and Kwangju Bank, both regional banks established in their respective regions in 1970 and 1968, are using region-focused strategies to attract customers, market products and create more intimate customer relationships, thereby differentiating themselves from nationwide banks in the same market. Kyongnam Bank is attempting to increase priority customer transaction volume by actively increasing its customer service and management and differentiating services for these customers. Kwangju Bank operates a customer management system that uses diverse strategies to market differentiated products and services to priority customers.

Table of Contents**Lending Activities**

We offer a variety of consumer loan products to households and individuals. We differentiate our product offerings based on a number of factors, including the customer's age group, the purpose for which the loan is used, collateral requirements and maturity. The following table sets forth the balances and percentage of our total lending represented by our consumer loans as of the dates indicated:

	As of December 31,					
	2004		2005		2006	
	Amount	% of Total Loans	Amount	% of Total Loans	Amount	% of Total Loans
	(in billions of Won, except percentage)					
General purpose household loans	(Won) 14,175	15.7%	(Won) 20,183	19.4%	(Won) 28,117	21.0%
Mortgage and home equity loans	18,127	20.0	20,181	19.4	27,588	20.6
Total	(Won) 32,302	35.7%	(Won) 40,364	38.8%	(Won) 55,705	41.6%

Our consumer loans consist of:

general purpose household loans, which are loans made to customers for any purpose (other than mortgage and home equity loans), and include overdraft loans, which are loans extended to customers to cover insufficient funds when they withdraw funds from their demand deposit accounts with us in excess of the amount in such accounts up to a limit established by us; and

mortgage loans, which are loans made to customers to finance home purchases, construction, improvements or rentals, and *home equity loans*, which are loans made to customers secured by their homes to ensure loan repayment.

For secured loans, including mortgage and home equity loans, we generally lend up to 50% of the collateral value (except in areas of high speculation designated by the government where we are required to limit our lending to 40% of the appraised value of collateral) minus the value of any lien or other security interest that is prior to our security interest. In calculating the collateral value for real estate, we generally use the appraisal value of the collateral as determined using our automated CREPIA system and similar systems used by Kyongnam Bank and Kwangju Bank. We generally revalue collateral on a periodic basis. As of December 31, 2006, the revaluation period was every three years for real estate, every year for equipment, every month for deposits and every week for stocks listed on a major Korean stock exchange. From the second half of 2007, we expect to begin revaluing real estate collateral every year, with apartments in particular being revalued every month.

A borrower's eligibility for general purpose household loans is primarily determined by its credit. A borrower's eligibility for our mortgage loans depends on its creditworthiness, the appropriateness of the use of proceeds and our ability to take a first-priority mortgage. A borrower's eligibility for home equity loans is determined by its credit and the value of the property. If the borrower's credit deteriorates, it may be difficult for us to recover the loan. As a result, we review the borrower's creditworthiness, credit scoring, collateral value and third party guarantees when evaluating a borrower.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

In light of concerns regarding the potential risks of excessive consumer lending, particularly mortgage and home equity lending, as well as to stabilize the real estate market in Korea, the Korean government has recently adopted more stringent regulations with respect to consumer lending by Korean banks. See Item 3D. Risk Factors Risks relating to government regulation and policy Government regulation of consumer lending, particularly mortgage and home equity lending, has recently become more stringent, which may hurt our consumer banking operations and Supervision and Regulation Principal Regulations Applicable to Banks Recent Regulations Relating to Retail Household Loans.

We also offer a variety of collective housing loans, including loans to purchase property or finance the construction of housing units, loans to contractors used for working capital purposes, and loans to educational

Table of Contents

establishments and non-profit entities to finance the construction of dormitories. Collective housing loans subject us to the risk that the housing units will not be sold. As a result, we review the probability of the sale of the housing unit when evaluating the extension of a loan. We also review the borrower's creditworthiness and the adequacy of the intended use of proceeds. Furthermore, we take a lien on the land on which the housing unit is to be constructed as collateral. If the collateral is not sufficient to cover the loan, we also take a guarantee from the Housing Finance Credit Guarantee Fund as security.

General Purpose Household Loans

Our general purpose household loans may be secured by real estate (other than homes), deposits or securities. As of December 31, 2006, approximately (Won)19,089 billion, or 67.9% of our general purpose household loans were unsecured, although some of these loans were guaranteed by a third party. Overdraft loans are primarily unsecured and typically have a maturity between one and three years, and the amount of such loans has been steadily declining. As of December 31, 2006, this amount was approximately (Won)4 billion.

Pricing. The interest rates on our consumer loans are either a periodic floating rate (which is based on a base rate determined for three-month, six-month or twelve-month periods derived internally, which reflects our internal cost of funding, further adjusted to account for the borrower's credit score and our opportunity cost) or a fixed rate that reflects those same costs and expenses, but taking into account interest rate risks. Our interest rates also incorporate a margin based on, among other things, the type of collateral (if any), priority with respect to any security, our target loan-to-value ratio and loan duration. We also can adjust the applicable rate based on current or expected profit contribution of the customer. At Woori Bank, lending rates are generally determined by our automated CREPIA system, and we expect to begin determining lending rates at Kyongnam Bank and Kwangju Bank using similar credit evaluation systems in the second half of 2007. The applicable interest rate is determined at the time of the loan. We also charge a termination fee in the event a borrower repays the loan prior to maturity. As of December 31, 2006, approximately 93.5% of our general purpose household loans had floating interest rates.

Mortgage and Home Equity Lending

We provide customers with a number of mortgage and home equity loan products that have flexible features, including terms, repayment schedules, amounts and eligibility for loans. The maximum term of our mortgage and home equity loans is 30 years for each of Woori Bank and Kyongnam Bank and 33 years for Kwangju Bank. Most of our mortgage and home equity loans have an initial maturity of three years or less. With respect to these loans, we determine the eligibility of borrowers based on the borrower's personal information, transaction history and credit history using Woori Bank's CREPIA system and similar systems used by Kyongnam Bank and Kwangju Bank. See Item 11. Quantitative and Qualitative Disclosures about Market Risk Credit Risk Management Credit Evaluation and Approval. The eligibility of a borrower that is participating in a housing lottery will depend on proof that it has paid a deposit or can obtain a guarantee from a Korean government-related housing fund. We receive fee income related to the origination of loans, including fees relating to loan processing and collateral evaluation.

As of December 31, 2006, approximately 90.4% of our mortgage and home equity loans were secured by residential or other property, 1.9% of our mortgage and home equity loans were guaranteed by the government housing-related funds and 7.7% of our mortgage and home equity loans, contrary to general practices in the United States, were unsecured (although the use of proceeds from mortgage and home equity loans is restricted for the purpose of financing home purchases and some of these loans were guaranteed by a third party). Since a comparatively low percentage of our mortgage and home equity loan portfolio is secured by collateral, we may be required to establish larger allowances for loan losses with respect to any such loans that become non-performing. See Assets and Liabilities Asset Quality of Loans Loan Loss Provisioning Policy. One reason that a relatively high percentage of our mortgage and home equity loans are unsecured is that we, along with other Korean banks, provide advance loans to borrowers for the down payment of new housing (particularly

Table of Contents

apartments) that is in the process of being built. Once construction is completed, which may take several years, these mortgage and home equity loans become secured by the new housing purchased by these borrowers. As of December 31, 2006, we had issued unsecured construction loans relating to housing where construction was not completed in the amount of (Won)2,140 billion. For the year ended December 31, 2006, the average initial loan-to-value ratio of our mortgage and home equity loans was approximately 53.1%, compared to 56.2% for the year ended December 31, 2005.

Pricing. The interest rates for our mortgage and home equity loans are determined on essentially the same basis as our general purpose household loans, except that for mortgage and home equity loans we place significantly greater weight on the value of any collateral that is being provided to secure the loan. The base rate we use in determining the interest rate for our mortgage and home equity loans is identical to the base rate we use to determine pricing for our general purpose household loans. As of December 31, 2006, approximately 94.3% of our outstanding mortgage and home equity loans had floating interest rates.

Private Banking Operations

In 2002, we launched our private banking operations within Woori Bank, Kyongnam Bank and Kwangju Bank. These operations currently aim to service our high net worth and mass affluent retail customers who individually maintain a deposit balance of at least (Won)30 million with us. As of December 31, 2006, we had over 325,012 customers who qualified for private banking services, representing 1.9% of our total retail customer base. Of our total retail customer deposits of (Won)49,830 billion as of December 31, 2006, high net worth and mass affluent customers accounted for 71.6%.

Through our private bankers, we provide financial and real estate advisory services to our high net worth and mass affluent customers. We also market differentiated investment and banking products and services to these segments, including beneficiary certificates, overseas mutual fund products, specialized bank accounts and credit cards. In addition, we have developed a customer loyalty program for our private banking customers that provides preferential rate and fee benefits and awards. We have also segmented our private banking operations by introducing exclusive private client services for high net worth customers who individually maintain a combined deposit and loan balance of at least (Won)1 billion with us. We believe that our private banking operations will allow us to increase our revenues from our existing high net worth and mass affluent customers, as well as attract new customers in these segments.

Woori Bank has 247 branches that offer private banking services. These branches are staffed by 307 private bankers and almost all of the branches are located in metropolitan areas, including Seoul. Kyongnam Bank and Kwangju Bank operate one and two dedicated private banking centers, respectively. Both banks also offer private banking services through a select number of branches. As of December 31, 2006, 80 private bankers were dispersed over 71 Kyongnam Bank branches and 30 private bankers were dispersed over 30 Kwangju Bank branches that provided private banking services.

We operate two financial products department stores in Seoul, which function as regular branches and through which we offer and market a variety of financial products and services, including credit cards, foreign currency products, bonds, stocks and insurance policies. These department stores employ 8 specialists in the areas of tax, real estate and fund products. They are also dedicated to offering comprehensive wealth management consulting services for high net worth customers. In addition, Woori Bank operates an advisory center in Seoul for its private banking clients, which employs 20 specialists advising on matters of law, tax, real estate, risk assessment and investments.

Table of Contents**Deposit-Taking Activities**

As of December 31, 2006, we were the second-largest deposit holder on a combined basis (not adjusted for overlap) among Korean banks, in large part due to our nation-wide branch network. The balance of our deposits from retail customers was (Won)45,375 billion, (Won)51,173 billion and (Won)49,830 billion as of December 31, 2004, 2005 and 2006, respectively, which constituted 50.4%, 49.1% and 39.4%, respectively, of the balance of our total deposits.

We offer diversified deposit products that target different customers with different needs and characteristics. These deposit products fall into five general categories:

time deposits, which generally require a customer to maintain a deposit for a fixed term during which interest accrues at a fixed or floating rate. Early withdrawals require penalty payments. The term for time deposits typically ranges from one month to five years;

demand deposits, which either do not accrue interest or accrue interest at a lower rate than time, installment or savings deposits. The customer may deposit and withdraw funds at any time and, if the deposits are interest-bearing, they accrue interest at a fixed or variable rate depending on the period and/or amount of deposit;

savings deposits, which allow the customer to deposit and withdraw funds at any time and accrue interest at a fixed rate set by us depending upon the period and amount of deposit;

installment deposits, which generally require the customer to make periodic deposits of a fixed amount over a fixed term during which interest accrues at a fixed rate. Early withdrawals require penalty payment. The term for installment deposits range from six months to ten years; and

certificates of deposit, the maturities of which range from 30 days to one year, with a required minimum deposit of between (Won)5 million and (Won)10 million. Interest rates on certificates of deposit vary with the length of deposit and prevailing market rates. Certificates of deposit may be sold at face value or at a discount with the face amount payable at maturity.

The following table sets forth the percentage of our total retail and corporate deposits represented by each deposit product category as of December 31, 2006:

<u>Time Deposits</u>	<u>Demand Deposits</u>	<u>Savings Deposits</u>	<u>Installment Deposits</u>	<u>Certificates of Deposit</u>
54.47%	24.23%	8.88%	0.41%	12.01%

We offer varying interest rates on our deposit products depending on market interest rates as reflected in average funding costs, the rate of return on our interest-earning assets and the interest rates offered by other commercial banks. Generally, the interest payable is the highest on installment deposits and decreases with certificate of deposit accounts and time deposits and savings deposit accounts receiving relatively less interest, and demand deposits accruing little or no interest.

We also offer deposits in foreign currencies and various specialized deposits products, including:

Apartment application time deposits, which are special purpose time deposit accounts providing the holder with a preferential right to subscribe for new private apartment units under the Housing Construction Promotion Law. This law sets forth various measures supporting the purchase of houses and the supply of such houses by construction companies. These products accrue interest at a fixed rate for one year, and at an adjustable rate after one year. Deposit amounts per account range from (Won)2 million to (Won)15 million depending on the size and location of the dwelling unit. These deposit products target high and middle income households.

Apartment application installment savings deposits, which are monthly installment savings programs providing the holder with a preferential right to subscribe for new private apartment units under the

Table of Contents

Housing Law. These deposits require monthly installments of (Won)50,000 to (Won)500,000, have maturities of between three and five years and accrue interest at fixed or variable rates depending on the term.

The Monetary Policy Committee of the Bank of Korea imposes a reserve requirement on Won currency deposits of commercial banks based generally on the type of deposit instrument. The reserve requirement is currently up to 5%. See *Supervision and Regulation Principal Regulations Applicable to Banks Liquidity*. Ongoing regulatory reforms have removed all controls on lending rates and deposit rates (except for the prohibition on interest payments on current account deposits).

The Depositor Protection Act provides for a deposit insurance system where the KDIC guarantees to depositors the repayment of their eligible bank deposits. The deposit insurance system insures up to a total of (Won)50 million per depositor per bank. See *Supervision and Regulation Principal Regulations Applicable to Banks Deposit Insurance System*. We pay an annual premium of 0.2% of our average deposits and, for the year ended December 31, 2006, our banking subsidiaries paid an aggregate of (Won)146 billion.

Branch Network and Other Distribution Channels

Our commercial banking subsidiaries had a total of 1,099 branches in Korea as of December 31, 2006, which on a combined basis, was the second-most extensive network of branches among Korean commercial banks. In Korea, consumer transactions are generally conducted in cash or with credit cards, and conventional checking accounts generally are not offered. Recently, demand for mutual funds and other asset management products as well as bancassurance products have been rising. These products require extensive sales force and customer interaction to sell, further emphasizing the need for an extensive branch network. As a result, an extensive branch network is important to attracting and maintaining retail customers, as they generally conduct most of their transactions through bank branches. We believe that our extensive branch network in Korea helps us to maintain our retail customer base, which in turn provides us with a stable and relatively low cost funding source.

The following table presents the geographical distribution of our branch network in Korea as of December 31, 2006:

Area	Woori Bank		Kyongnam Bank		Kwangju Bank		Total	
	Number	% of Total	Number	% of Total	Number	% of Total	Number	% of Total
Seoul	412	49.3%	3	2.2%	4	3.2%	419	38.1%
Six largest cities (other than Seoul)	151	18.0	43	30.9	81	65.3	266	24.2
Other	273	32.7	93	66.9	39	31.5	414	37.7
Total	836	100.0%	139	100.0%	124	100.0%	1,099	100.0%

Our Woori Bank branches are concentrated in the Seoul metropolitan area, while our Kyongnam Bank and Kwangju Bank branches are located mostly in the southeastern and southwestern regions of Korea, respectively, providing extensive overall nationwide coverage.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

As part of our overall reorganization and integration plan, we completed our business process re-engineering project in November 2004, aimed at enhancing our marketing capabilities, reducing expenses and improving our warning and monitoring system of our credit portfolio. See Item 4A. History and Development of the Company History Reorganization and Integration Plan.

Table of Contents

In order to maximize access to our products and services, we have established an extensive network of ATMs and cash dispensers, which are located in branches as well as unmanned outlets. The following table presents the number of ATMs and cash dispensers we had as of December 31, 2006:

	ATMs	Cash Dispensers
Woori Bank	3,667	3,095
Kyongnam Bank	446	438
Kwangju Bank	307	378
Total	4,420	3,911

We also actively promote the use of alternative service delivery channels in order to provide convenient service to customers. We also benefit from customers' increasing use of these outlets, as they allow us to maximize the marketing and sales functions at the branch level, reduce employee costs and improve profitability. The following tables set forth information, for the periods indicated, relating to the number of transactions and the fee revenue of our alternative service delivery channels with respect to Woori Bank, Kyongnam Bank and Kwangju Bank.

Woori Bank

⁽¹⁾ Includes cash dispensers.

Most of our electronic banking transactions do not generate fee income as many of those transactions are free of charge, such as balance enquiries, consultations with customer representatives or transfers of money with our banking subsidiaries. This is particularly true for telephone banking services, where a majority of the transactions are balance inquiries or consultations with customer representatives, although other services such as money transfers are also available.

Our automated telephone banking systems offer a variety of services, including inter-account fund transfers, balance and transaction inquiries and customer service enquiries. We operate three call centers that handle calls from customers, engage in telemarketing and assist in our collection efforts.

Our Internet banking services include balance and transaction inquiries, money transfers, loan applications, bill payment and foreign exchange transactions. We expect to increase our Internet banking customer base by focusing largely on our younger customers and those that are able to access the Internet easily (such as office workers) as well as by developing additional Internet-based financial services and products. We are also developing new products to target different types of customers with respect to our Internet banking services, including a service that will enable private banking customers to access their accounts on a website that will provide specialized investment advice. We also offer escrow services and identification authentication services, such as electronic fingerprinting, for Internet transactions.

We also provide mobile banking services to our customers, which is available to all our Internet-registered users. These services allow our customers to complete selected banking transactions through major Korean telecommunications networks using their cellular phones or other mobile device. Since March 2004, we have entered into strategic alliances with SK Telecom, KT Freetel and LG Telecom to provide a wide-range of services through mobile phones, including bill payment services and credit card services. In addition, we entered into strategic alliances with Woori Investment & Securities, SK Securities, Meritz Securities, Hanwha Securities and Dong Yang Investment Bank to provide M-Stock service, which is a service that enables mobile phone users to execute transactions with respect to listed securities in Korea. From July 2004, our electronic bill presentation and payment system was implemented to provide our customers with the ability to pay taxes, maintenance fees and other public fees electronically.

We have also recently introduced our Win-CMS service to corporate customers of Woori Bank, which provides an integrated electronic cash management system and in-house banking platform for such customers.

In the first half of 2007, Woori Bank reduced or waived many of the fees it charges on its banking services, in response to customer demand and to similar measures taken by other commercial banks in Korea. Specifically,

Table of Contents

Woori Bank reduced or waived its fees on fund transfers through its ATMs, and exempted its fees on fund transfers through its mobile banking services through the end of 2007. Woori Bank also waived the fees it charges on the opening of household checking accounts and on the issuance of bankers' checks and certain tax-related statements.

Credit Cards

We offer credit card products and services to consumers and corporate customers in Korea. In March 2004, we merged our credit card subsidiary, Woori Credit Card, with Woori Bank. Prior to the merger, we operated our credit card business principally through Woori Credit Card, to which we transferred the credit card operations of Woori Bank in February 2002 and the credit card operations of Kwangju Bank in March 2003. As of December 31, 2006, Woori Bank's market share based on transaction volume was approximately 5.7%, which ranked Woori Bank as the sixth largest credit card issuer in Korea, according to BC Research, which is a quarterly report issued by BC Card.

Our credit card operations benefit from our ownership of a 29.6% equity stake in BC Card, which is co-owned by ten other Korean financial institutions and operates the largest merchant payment network in Korea as measured by transaction volume. This ownership stake allows us to outsource production and delivery of new credit cards, the preparation of monthly statements, management of merchants and other ancillary services to BC Card for our Woori Bank credit card and Kyongnam Bank BC Card operations.

Products and Services

We currently have the following principal brands of credit cards outstanding:

- a Woori brand previously offered by Woori Credit Card and currently offered by Woori Bank;
- a BC Card brand offered by Kyongnam Bank;
- a BC Card brand previously offered by Woori Bank; and
- a Visa brand offered by Kwangju Bank.

We issue Visa brand cards under a non-exclusive license agreement with Visa International Service Association and also issue MasterCard and JCB brand cards under a non-exclusive, co-branding agreement with BC Card.

We offer a number of different services to holders of our credit cards. Generally, these services include:

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

credit purchase services, which allow cardholders to purchase merchandise or services on credit and repay such credit on a lump-sum or installment basis;

cash advance services from ATMs and bank branches; and

credit card loans, which are loans that cardholders can obtain based on streamlined application procedures.

Unlike in the United States and many other countries, where most credit cards are revolving cards that allow outstanding balances to be rolled over from month to month so long as a required minimum percentage is repaid, cardholders in Korea are generally required to pay for their non-installment purchases as well as cash advances within approximately 18 to 58 days of purchase or advance, depending on their payment cycle.

Table of Contents

Table of Contents

- (2) From April 2004, excludes the credit card accounts previously acquired from Kwangju Bank (but not the outstanding credit card receivables relating to such accounts) which were spun off and transferred back to Kwangju Bank by Woori Credit Card in March 2004 prior to Woori Credit Card's merger with Woori Bank.
- (3) From April 2004, includes the former Kwangju Bank credit card accounts (but not the outstanding credit card receivables relating to such accounts) which were spun off and transferred back to Kwangju Bank by Woori Credit Card in March 2004 prior to Woori Credit Card's merger with Woori Bank.
- (4) Represents the ratio of accounts used at least once within the last 12 months to total accounts as of the end of the relevant year.
- (5) Our delinquency ratios may not fully reflect all delinquent amounts relating to our outstanding balances since a certain portion of delinquent credit card balances (defined as balances one day or more past due) were restructured into loans and were not treated as being delinquent at the time of conversion or for a period of time thereafter. Including all restructured loans, outstanding balances overdue by 30 days or more accounted for 2.9% of our credit card receivables as of December 31, 2006.
- (6) Represents the ratio of balances that are more than three months overdue to total outstanding balances as of the end of the relevant year. These ratios do not include the following amounts of previously delinquent credit card balances restructured into loans that were classified as normal or precautionary as of December 31, 2004, 2005 and 2006:

	As of December 31,		
	2004	2005	2006
	(in billions of Won)		
Restructured loans	(Won) 43	(Won) 62	(Won) 21

If such restructured loans had been included, the non-performing loan ratio for our credit card operations would have been as follows:

	As of or for the year ended December 31,								
	2004			2005			2006		
	Woori Card	Kyongnam Bank BC Card	Kwangju Bank Visa Card	Woori Card	Kyongnam Bank BC Card	Kwangju Bank Visa Card	Woori Card	Kyongnam Bank BC Card	Kwangju Bank Visa Card
	(in billions of Won, unless indicated otherwise)								
Non-performing loan ratio	6.33%	5.02%	6.63%	2.23%	1.79%	1.67%	1.30%	1.22%	1.08%

- (7) Represents the ratio of gross charge-offs for the year to average outstanding balances for the year. Under U.S. GAAP, our charge-off policy is to charge off balances which are more than six months past due (including previously delinquent credit card balances restructured into loans that are more than six months overdue from the point at which the relevant balances were so restructured), except for those balances with a reasonable probability of recovery. The following table shows, as of the dates indicated, the outstanding amounts of restructured loans greater than six months past due from the initial delinquency date:

	As of December 31,		
	2004	2005	2006
	(in billions of Won)		
Restructured loans greater than six months past due from the initial delinquency date and not charged off	(Won) 49	(Won) 6	(Won) 2

⁽⁸⁾ Represents the ratio of net charge-offs for the year to average outstanding balances for the year.

We offer a diverse range of credit card products within our various brands. Factors that determine which type of card a particular cardholder may receive include net worth, age, location, income level and the particular programs or services that may be associated with a particular card. Targeted products that we offer include:

cards that offer additional benefits, such as frequent flyer miles and award program points that can be redeemed for services, products or cash;

gold cards, platinum cards and other preferential members cards that have higher credit limits and provide additional services;

Table of Contents

corporate and affinity cards that are issued to employees or members of particular companies or organizations; and

revolving credit cards and cards that offer travel services and insurance.

Credit card use in Korea has increased dramatically in recent years as the Korean economy and consumer spending recovered from the financial crisis and as a result of Korean government initiatives promoting the use of credit cards. For example, the government requires merchants to accept credit cards in order to prevent tax evasion by ensuring proper disclosure of transactions, and provides tax benefits to businesses that accept credit cards. For consumers, there is also a tax deduction for certain amounts spent using credit cards. However, there has been significant concern in Korea regarding the high levels of credit card usage (including cash advances) and the deteriorating asset quality of the credit card portfolios of Korean financial institutions. In response to such concerns, the Korean government has increased its regulatory oversight of the credit card industry. See Item 3D. Risk Factors Risks relating to our consumer credit portfolio and Supervision and Regulation Credit Card Business.

In recent years, credit card issuers in Korea have agreed with selected cardholders to restructure their delinquent credit card account balances as loans that have more gradual repayment terms, in order to retain fundamentally sound customers who are experiencing temporary financial difficulties and to increase the likelihood of eventual recovery on those balances. In line with industry practice, we have restructured a portion of our delinquent credit card account balances as loans commencing in 2002. The general qualifications to restructure delinquent credit card balances as loans are that the delinquent amount be more than one month overdue and in excess of (Won)1 million. The terms of the restructured loans usually require the payment of approximately 10% to 20% of the outstanding balance as a downpayment and that they be guaranteed by a third party and carry higher interest rates than prevailing market rates. These loans are usually required to be repaid by the borrower in installments over terms ranging from three months to 60 months. As of December 31, 2006, the total amount of our restructured loans was (Won)21 billion (which also included revolving loans and installment loans). Because restructured loans are not initially recorded as being delinquent, our delinquency ratios do not fully reflect all delinquent amounts relating to our outstanding credit card balances. In addition, in line with industry practice, we have in the past agreed with selected cardholders to replace their delinquent credit card balances with cash advances that are rolled over from month to month. We discontinued this practice commencing in September 2003.

Payments and Charges

Revenues from our credit card operations consist principally of cash advance charges, merchant fees, interest income from credit card loans, interest on late and deferred payments, and annual membership fees paid by cardholders.

Each cardholder is allocated an aggregate credit limit in respect of all cards issued under his or her account and each month. We advise each cardholder of the credit limit relating to the cards in his or her monthly billing statement. Credit limits in respect of card loans are established separately. We conduct ongoing monitoring of all cardholders and accounts, and may reduce the credit limit or cancel an existing cardholder's card based on current economic conditions, receipt of new negative credit data from third party sources or the cardholder's score under the credit risk management systems we use to monitor their behavior, even if the cardholder continues to make timely payments in respect of his or her cards. We consider an account delinquent if the payment due is not received on the first monthly payment date on which such payment was due, and late fees are immediately applied. Late fee charges and computation of the delinquency period are based on each outstanding unpaid transaction or installment, as applicable. See Item 11. Quantitative and Qualitative Disclosures about Market Risk Credit Risk Management Credit Review and Monitoring.

Payments on amounts outstanding on our credit cards must be made (at the cardholder's election at the time of purchase) either in full on each monthly payment date, in the case of lump-sum purchases, or in equal monthly

Table of Contents

installments over a fixed term from two months to 36 months, in the case of installment purchases. Cardholders may prepay installment purchases at any time without penalty. Payment for cash advances must be made on a lump sum basis. Payments for card loans must be made on an equal principal installment basis over a fixed term from three months up to a maximum of 36 months, up to a maximum loan amount of (Won)20 million.

No interest is charged on lump-sum purchases that are paid in full by the monthly payment date. For installment purchases, we charge a fixed rate of interest on the outstanding balance of the transaction amount, based on the installment period selected at the time of purchase. For a new cardholder, we currently apply an interest rate between approximately 10.9% and 19.5% per annum as determined by the cardholder's application system score. See Item 11. Quantitative and Qualitative Disclosures about Market Risk Credit Risk Management Credit Evaluation and Approval Credit Card Approval Process and Credit Review and Monitoring Credit Card Review and Monitoring.

For cash advances, finance charges start accruing immediately following the cash withdrawal. We currently charge a periodic finance charge on the outstanding balance of cash advance of approximately 9.2% to 27.4% per annum. The periodic finance charge assessed on such balances is calculated by multiplying the daily installment balances for each day during the billing cycle by the applicable periodic finance charge rate, and aggregating the results for each day in the billing period. In addition to finance charges, cardholders using cash advance networks operated by companies that are not financial institutions (such as Hantec and NICE) are charged a commission of (Won)800 to (Won)1,000 per withdrawal.

We also charge a basic annual membership fee of (Won)2,000 to (Won)5,000 for regular cards, (Won)10,000 for gold cards and (Won)120,000 for platinum cards. The determination of the annual fee is based on the type of card and whether affiliation options are selected by the cardholder. For certain cards, such as the Woori Card (which can only be used in Korea and is not affiliated with Visa or MasterCard), Woori Christian Card and Hyundai Home Shopping Woori Card, we will waive membership fees if customers charge above a certain amount.

Commencing in July 2006, we outsourced the management of merchants to BC Card. We charge merchant fees to merchants for processing transactions. Merchant fees vary depending on the type of merchant and the total transaction amounts generated by the merchant. As of December 31, 2006, we charged merchants an average of 2.4% of their respective total transaction amounts. In addition to merchant fees, we receive nominal interchange fees for international card transactions.

Capital Markets Activities

We engage in capital markets activities for our own account and for our customers. Our capital markets activities include securities investment and trading, derivatives trading, asset securitization services, investment banking and securities brokerage.

In September 2004, our board approved a plan to buy a significant voting interest in LG Investment & Securities Co., or LGIS, which had been previously held by LG Card, in order to expand our brokerage and investment banking businesses. The plan provided for our purchase of approximately 26 million shares of LGIS for approximately (Won)298 billion, or approximately (Won)11,500 per share. This purchase was completed in December 2004 and was part of the financial rescue package for LG Card. Prior to such purchase, in October 2004, we purchased seven million shares of LGIS in the Korean stock market for approximately (Won)55 billion. As a result, as of December 31, 2004, we owned a 27.3% voting interest in LGIS, which became an equity method investee.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

In January 2005, the board of Woori Securities, a wholly-owned subsidiary, approved a plan to reduce its capital by 42.5% prior to its merger with LGIS. Pursuant to the capital write-down plan, Woori Securities cancelled 14 million of its outstanding shares for (Won)11,000 per share. As a result, Woori Securities, total shares outstanding amounted to approximately 20 million shares immediately after the capital write-down.

Table of Contents

In March 2005, we merged Woori Securities into LGIS, and received 0.654 LGIS share for one Woori Securities share. We also renamed the surviving entity Woori Investment & Securities, which became an equity method investee and, as of the date of the merger, had a capital base of (Won)786 billion, 151 branches within Korea and in other countries and approximately 2,500 employees. The merger was approved by the shareholders of each of Woori Securities and LGIS in extraordinary meetings of shareholders of the respective companies in March 2005. We currently own a 35.0% voting interest in Woori Investment & Securities. As of December 31, 2006, Woori Investment & Securities had consolidated total assets of (Won)12,845 billion, consolidated total liabilities of (Won)10,726 billion and consolidated total shareholders' equity of (Won)2,119 billion, on a Korean GAAP basis. For the year ended December 31, 2006, Woori Investment & Securities generated consolidated revenues of (Won)2,691 billion and consolidated net income of (Won)233 billion, on a Korean GAAP basis.

Securities Investment and Trading

Through Woori Bank and Woori Investment & Securities (which is an equity method investee and whose operations are therefore not included in the figures presented below for 2005 and 2006) and, to a lesser extent, Kyongnam Bank and Kwangju Bank, we invest in and trade securities for our own account, in order to maintain adequate sources of liquidity and to generate interest and dividend income and capital gains. As of December 31, 2006, our investment portfolio, which consists of held-to-maturity securities and available-for-sale securities, and our trading portfolio had a combined total book value of (Won)43,010 billion and represented 22.0% of our total assets.

Our trading and investment portfolios consist primarily of Korean treasury securities and debt securities issued by Korean government agencies, including the KDIC, local governments or government-invested enterprises, and debt securities issued by financial institutions. As of December 31, 2006, we held debt securities with a total book value of (Won)39,861 billion, of which:

held-to-maturity debt securities accounted for (Won)8,614 billion, or 21.6%;

available-for-sale debt securities accounted for (Won)25,788 billion, or 64.7%; and

trading debt securities accounted for (Won)5,459 billion, or 13.7%.

Of these amounts, as of December 31, 2006, debt securities issued by the Korean government and government agencies amounted to (Won)7,039 billion, or 81.7%, of our held-to-maturity debt securities, (Won)11,729 billion, or 45.5%, of our available-for-sale debt securities, and (Won)1,592 billion, or 29.2%, of our trading debt securities.

From time to time, we also purchase and sell equity securities for our securities portfolios. Our equity securities consist primarily of equities listed on the Stock Market Division or the KOSDAQ Market Division of the Korea Exchange. As of December 31, 2006:

equity securities in our available-for-sale portfolio had a book value of (Won)1,605 billion, or 5.7%, of our available-for-sale portfolio; and

equity securities in our trading portfolio had a book value of (Won)636 billion, or 10.2%, of our trading portfolio.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Funds that are not used for lending activities are used for investment and liquidity management purposes, including investment and trading in securities. See Assets and Liabilities Securities Investment Portfolio.

⁽¹⁾ Beneficiary certificates are instruments that are issued by and represent an ownership interest in an investment trust. Investment trusts, which operate like mutual funds in the United States, are managed by investment trust management companies and invest in portfolios of securities and/or other financial instruments, such as certificates of deposit. See [Asset Management](#) [Investment Trust Management](#). Beneficiary certificates give the holder beneficial rights to both the relevant investment trust and the trust property in which the investment trust has invested.

For a discussion of our risk management policies with respect to our securities trading activities, see [Item 11. Quantitative and Qualitative Disclosures about Market Risk](#) [Market Risk Management](#) [Market Risk Management for Trading Activities](#).

Derivatives Trading

We offer derivatives products and engage in derivatives trading, mostly for our corporate customers, primarily through Woori Bank and Woori Investment & Securities (which is an equity method investee and whose operations are therefore not included in the figures presented below for 2005 and 2006). Our trading volume was (Won)52,432 billion in 2004, (Won)71,149 billion in 2005 and (Won)103,589 billion in 2006, respectively. Our net trading revenue from derivatives and foreign exchange spot contracts for the years ended December 31, 2004, 2005 and 2006 was (Won)77 billion, (Won)150 billion and (Won)85 billion, respectively.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

We provide and trade a number of derivatives products principally through sales or brokerage accounts for our customers, including:

interest rate swaps, options and futures, relating principally to Won interest rate risks;

index futures and options, relating to stock market fluctuations;

cross currency swaps, relating to foreign exchange risks, largely for Won against U.S. dollars;

foreign exchange forwards, swaps, options and futures, relating to foreign exchange risks; and

credit derivatives, which we provide to financial institutions that wish to hedge existing credit exposures or take on credit exposure to generate revenue.

Table of Contents

Our regional banking subsidiaries, Kyongnam Bank and Kwangju Bank, are not active with respect to derivatives trading aside from foreign exchange forwards.

Our derivatives operations focus on addressing the needs of our corporate clients to hedge their risk exposure and on hedging our risk exposure resulting from such client contracts. We also engage in derivatives trading activities to hedge the interest rate and foreign currency risk exposure that arises from our own assets and liability positions. Most of these hedging-purpose derivatives contracts, however, do not qualify for hedge accounting under U.S. GAAP and are consequently treated as trading derivatives and the changes in value are reflected in our income statements for the relevant periods. In addition, we engage in proprietary trading of derivatives and arbitrage through Woori Investment & Securities, such as index options and futures within our regulated open position limits, for the purpose of generating capital gains.

The following shows the estimated fair value of derivatives and foreign exchange spot contracts we held or had issued for trading purposes as of the dates indicated:

	As of December 31,					
	2004		2005		2006	
	Estimated Fair Value of Assets	Estimated Fair Value of Liabilities	Estimated Fair Value of Assets	Estimated Fair Value of Liabilities	Estimated Fair Value of Assets	Estimated Fair Value of Liabilities

Other derivatives					5	5
Total	(Won) 1,420	(Won) 1,628	(Won) 815	(Won) 1,339	(Won) 1,353	(Won) 1,701

⁽¹⁾ Our total exposure under credit derivatives outstanding was US\$265 million as of December 31, 2006. In connection with such credit derivatives, we accept credit exposure with respect to foreign currency-denominated corporate debt instruments held by counterparties by guaranteeing payments under such instruments, subject to our overall credit limits with respect to the applicable issuers.

In April 2003, Woori Bank entered into an agreement with Macquarie Bank, an Australian investment bank, pursuant to which the latter will provide fee-based technical assistance and advisory services to us, including in the area of risk management and trading systems, in connection with our plans to further develop our equity derivatives business. This agreement will expire on September 4, 2008 or earlier, depending on certain conditions.

In August 2006, Woori Bank entered into another agreement with Macquarie Bank, pursuant to which Macquarie Bank will provide operational support and cooperation to Woori Bank in the area of commodity derivatives trading, in connection with Woori Bank's plans to develop its commodities derivatives business.

In June 2006, Woori Investment & Securities entered into an alliance with ABN AMRO to share financial techniques and financial systems relating to the over-the-counter derivatives market.

For a discussion of our risk management policies with respect to our derivatives trading activities, see Item 11. Quantitative and Qualitative Disclosures about Market Risk Market Risk Management Market Risk Management for Trading Activities.

Table of Contents

Asset Securitization Services

We are active in the Korean asset-backed securities market. Through Woori Bank, Woori F&I and Woori Investment & Securities, we participate in asset securitization transactions in Korea by acting as arranger, trustee or liquidity provider. In 2006, we were involved in asset securitization transactions with an initial aggregate issue amount of (Won)9,155 billion and generated total fee income under Korean GAAP of approximately (Won)68 billion in connection with such transactions. The securities issued in asset securitization transactions are sold mainly to institutional investors buying through Korean securities firms.

Investment Banking

We engage in investment banking activities in Korea through Woori Bank and Woori Investment & Securities. Through Woori Investment & Securities, we underwrite equity and debt securities offerings in the Korean capital markets, either as lead manager or a member of an underwriting syndicate and provide mergers and acquisitions and financial advisory services. In 2006, Woori Investment & Securities generated investment banking revenue under Korean GAAP of approximately (Won)20 billion, consisting primarily of underwriting fee income from securities offerings. In addition, through Woori Bank, we provide project finance and financial advisory services, in the area of social overhead capital projects such as highway, port, power and water and sewage projects, as well as structured finance, leveraged buy-out financing, equity and venture financing and mergers and acquisitions advisory services. In 2006, Woori Bank generated investment banking revenue of approximately (Won)233 billion from gains on investment in foreign bonds and equity securities and fees from advisory and other services.

We believe that significant opportunities exist for us to leverage our existing base of large corporate and small- and medium-sized banking customers to cross-sell investment banking services, especially in light of our significantly enhanced investment banking capabilities and reputation as a result of our acquisition and integration of LGIS. We intend to expand our investment banking operations to take advantage of these opportunities, with a view to increasing our fee income and further diversifying our revenue base.

Securities Brokerage

We provide securities brokerage services through Woori Investment & Securities. Our activities include brokerage services relating to stocks, futures, options and debt instruments (such as commercial paper). As of December 31, 2006, Woori Investment & Securities had 125 branches. We also provide securities brokerage services through the Internet and through our home trading system software platform via the following systems: W-on Trading, W-on Stox and X-Trade, Web-Trading and Q-Trading. In 2006, Woori Investment & Securities generated fee income under Korean GAAP of approximately (Won)325 billion through its securities brokerage activities.

International Banking

Primarily through Woori Bank, we engage in various international banking activities, including foreign exchange services and dealing, import and export-related services, offshore lending, syndicated loans and foreign currency securities investment. These services are provided primarily to our domestic customers and overseas subsidiaries and affiliates of Korean corporations. We also raise foreign currency funding through our international banking operations. In addition, we provide commercial banking services to retail and corporate customers in select overseas markets.

Table of Contents

The table below sets forth certain information regarding our foreign currency assets and borrowings:

	As of December 31,		
	2004	2005	2006
	(in millions of US\$)		
Total foreign currency assets	US\$ 14,135	US\$ 14,634	US\$ 14,902

⁽¹⁾ Does not include subsidiaries and branches in liquidation or dissolution.

In addition, Woori America Bank currently operates 17 branches in New York, New Jersey, Maryland, Virginia, Pennsylvania and California and provides retail and corporate banking services targeted towards the Korean-American community. Woori America Bank had total assets of US\$944 million as of December 31, 2006 and net income of US\$13 million in 2006. In September 2003, Woori America Bank acquired and merged with Pansia Bank N.A. in the United States from National Penn Bancshares Inc. for US\$34.5 million in cash. Pansia Bank was established in 1993 as the first Asian-American owned lender in the United States and was one of the largest banks specializing in service to the

Korean-American community in the eastern United States.

The principal activities of our overseas branches and subsidiaries, all of which are branches and subsidiaries of Woori Bank, are providing trade financing and local currency funding for Korean companies and Korean nationals operating in overseas markets as well as servicing local customers and providing foreign exchange services in conjunction with our headquarters. On a limited basis, our overseas branches and subsidiaries also engage in the investment and trading of securities of foreign issuers.

Table of Contents

In July 2002, Woori Bank entered into a memorandum of understanding with Bank of China to undertake a joint marketing effort to corporate clients who are expanding their business potential in the region, as well as to promote information exchange between the two institutions. In October 2004, Woori Bank entered into a similar strategic alliance with China Minsheng Bank. In April 2006, Woori Bank entered into a memorandum of understanding with the Bank of East Asia to promote information exchange and cooperation between the two institutions with respect to various financial products.

Asset Management

In May 2005, we purchased a 90.0% direct ownership interest in LGITM from LGIS, at a purchase price of (Won)73 billion. We subsequently merged Woori Investment Trust Management, our wholly-owned asset management subsidiary, into LGITM and renamed the surviving entity Woori Asset Management, which remains a consolidated subsidiary. In July and September 2005, Woori Asset Management reacquired the remaining 10.0% interest from its minority shareholders. In May 2006, we transferred 30.0% of our interest in Woori Asset Management to Credit Suisse. Following this transfer, we renamed the entity Woori Credit Suisse Asset Management.

Trust Management Services

Money Trusts. Through Woori Bank, Kyongnam Bank and Kwangju Bank, we offer money trust products to our customers and manage the funds they invest in money trusts. The money trusts we manage are generally trusts with a fixed life that allow investors to share in the investment performance of the trust in proportion to the amount of their investment in the trust. We currently offer the following types of money trust products:

retirement trusts, which invest funds received from corporations or organizations and manage these funds until they are withdrawn to pay retirement funds to a corporation's officers or employees or an organization's members;

pension trusts, which invest funds received until pension benefits are due to be disbursed to a pension beneficiary; and

specified money trusts, which invest cash received as trust property at the direction of the trustors and, once the trust matures, disburse the principal and any gains to the trust beneficiaries.

We also offer other types of money trusts that have a variety of differing characteristics with respect to, for example, maturities and tax treatment.

Under Korean law, the assets of our money trusts are segregated from our assets and are not available to satisfy the claims of our creditors. We are, however, permitted to maintain deposits of surplus funds generated by trust assets. Except for specified money trusts, we have investment discretion over all money trusts, which are pooled and managed jointly for each type of trust. Specified money trusts are established on behalf of individual customers, typically corporations, which direct our investment of trust assets.

We receive fees for our trust management services consisting of:

basic fees that are based upon a percentage, ranging between 0.5% and 2%, of the net asset value of the assets under management; and

performance fees that are based upon the investment performance of the trust.

We also receive penalty payments when customers terminate their trust deposit prior to the original contract maturity. Money trust management is currently the largest source of our fee income. Fees that we received for our trust management services (including those fees related to property trust management services, described below, but excluding those fees relating to guaranteed trusts, which are eliminated in consolidation), net of expenses, amounted to (Won)40 billion in 2004, (Won)13 billion in 2005 and (Won)24 billion in 2006.

Table of Contents

For some of the money trusts we manage, we have guaranteed the principal amount of an investor's investment as well as a fixed rate of interest. We no longer offer new money trust products where we guarantee both the principal amount and a fixed rate of interest. We continue to offer pension-type money trusts that provide a guarantee of the principal amount of an investor's investment.

The following table shows the balances of our money trusts by type as of the dates indicated as determined in accordance with Korean GAAP. Under U.S. GAAP, we do not consolidate performance trusts on which we do not guarantee principal or interest, due to the fact that the assets invested are not our assets but customer assets and that our customers bear the risk of loss:

	As of December 31,		
	2004	2005	2006
	(in billions of Won)		
Principal and interest guaranteed trusts	(Won) 13	(Won) 14	(Won) 15
Principal guaranteed trusts	1,934	1,896	1,912
Performance trusts	3,465	4,330	7,572
Total	(Won) 5,412	(Won) 6,241	(Won) 9,499

The trust assets we manage consist principally of investment securities and loans made from the trusts. The investment securities consist of government-related debt securities, corporate debt securities, including bonds and commercial paper, equity securities and other securities. As of December 31, 2006, under Korean GAAP, our money trusts had invested in securities with an aggregate book value of (Won)6,349 billion, which accounted for 66.8% of our money trust assets. Debt securities accounted for (Won)3,121 billion of this amount.

Our money trusts also invest, to a lesser extent, in equity securities, including beneficiary certificates issued by investment trust management companies. As of December 31, 2006, equity securities held by our money trusts amounted to (Won)563 billion on a Korean GAAP basis, which accounted for approximately 8.9% of our money trust assets. Of this amount, (Won)315 billion was from specified money trusts and the remaining (Won)248 billion was from money trusts over which we had investment discretion.

Loans made by our money trusts are similar in type to the loans made by our banking operations. As of December 31, 2006, under Korean GAAP, our money trusts had made loans in the aggregate principal amount of (Won)100 billion (excluding loans to our banking operations of (Won)1,772 billion), which accounted for approximately 0.4% of our money trust assets. Because we act as trustee, loans by money trusts are made at our discretion and are subject to the same credit approval process as loans from our banking operations. As of December 31, 2006, substantially all of the loans from our money trusts were collateralized or guaranteed.

If the income from a money trust for which we provide a guarantee is less than the amount of the payments we have guaranteed, we will need to pay the amount of the shortfall with funds from special reserves maintained in our trust accounts, followed by basic fees from that money trust and funds from our banking operations. We net any payments we make as a result of these shortfalls against any gains we receive from other money trusts. In 2006, we made no such payments.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

The Indirect Investment Asset Management Business Act, which applies to unspecified money trust account products, took effect in January 2004. Under that law, unless a bank qualified as an asset management company by July 2004, it cannot offer unspecified money trust products (except under certain limited circumstances). See Supervision and Regulation Trust Business. As a result, commencing in July 2004, we ceased offering unspecified money trust products through our banking subsidiaries and transferred the unspecified money trust operations of those subsidiaries (other than outstanding balances, which they will continue to manage until the withdrawal of the relevant money trust deposits by customers) to Woori Asset Management (currently named Woori Credit Suisse Asset Management).

Table of Contents

Property Trusts. Through Woori Bank and Kyongnam Bank, we also offer property trust management services, where we manage non-cash assets in return for a fee. Non-cash assets include mostly receivables (including those securing asset-backed securities), real property and securities, but can also include movable property such as artwork. Under these arrangements, we render escrow or custodial services for the property in question and collect fees in return.

In 2006, our property trust fees ranged from 0.05% to 1.0% of total assets under management, depending on the type of trust account product. As of December 31, 2006, the balance of our property trusts totaled (Won)15,397 billion.

The property trusts also are not consolidated within our U.S. GAAP financial statements.

Investment Trust Management

Through Woori Credit Suisse Asset Management, we offer investment trust products to our customers and manage the assets invested by them in investment trusts. The investment trust products we offer generally take the form of beneficiary certificates evidencing an ownership interest in a particular investment trust. We currently offer various different types of investment trust products, including:

equity funds, where equity securities or equity-linked securities consist of 60% or more of their assets;

fixed income funds, where fixed income securities consist of 60% or more of their assets;

hybrid funds, the assets of which include both fixed income and equity securities with no minimum requirement to hold either type of security;

money market funds, which invest mostly in short-term financial products, such as call loans, commercial paper, certificates of deposit and short-term treasury notes and corporate bonds; and

alternative investment funds, which invest in derivatives, real estate, commodities, special assets, funds of funds and other assets.

The investment trusts we manage are generally trusts with no fixed term that allow investors to share in the investment performance of the trust in proportion to the amount of their investment in the trust. We have investment discretion over all investment trusts. Investment trusts calculate the value of their assets each day, and any change in the overall valuation of their assets will be reflected in the price of their beneficiary certificates. To the extent such a trust does have a maturity date, at that time the trust will disburse principal and any return on investment based on the price of their beneficiary certificates. In addition to investment trust products, we provide our institutional clients with various investment advisory and discretionary asset investment services.

The following table shows the balances of our investment trusts by type as of the dates indicated as determined in accordance with Korean GAAP. Under U.S. GAAP, we do not consolidate investment trusts due to the fact that the assets invested are not our assets but customer assets:

	As of December 31,		
	2004	2005	2006
	(in billions of Won)		
Equity funds	(Won) 185	(Won) 736	(Won) 1,152
Bond funds	2,742	3,263	1,446
Hybrid funds	1,163	1,311	3,169
Money market funds	1,881	6,770	8,938
Alternative investment funds	368	882	1,845
Total	(Won) 6,339	(Won) 12,962	(Won) 16,550

Table of Contents

We receive fees for our investment trust management services consisting of management fees in connection with establishing, operating and managing the investment trust, asset management fees and related advisory fees. These fees are calculated by multiplying the daily net asset value of the trust by a percentage provided in the trust documentation. Fees accrue on a daily basis and are paid out as expenses periodically.

Fees from our investment trust management services amounted to (Won)17 billion in 2004, (Won)19 billion in 2005 and (Won)28 billion in 2006.

Although our current customer base consists mainly of institutional investors, we have been seeking to market our investment trust products to retail customers through our consumer banking network. We believe that significant opportunities exist for us to enhance our asset management skills and risk asset management techniques through our joint venture arrangement with Credit Suisse, and to leverage our existing base of consumer banking customers to cross-sell our investment trust products. We intend to expand our investment trust management operations to take advantage of these opportunities, with a view to increasing our fee income and further diversifying our revenue base. We also intend to focus on the development of new products tailored to particular customer segments and the enhancement of sales and distribution capabilities through each of our marketing channels to meet our customers' needs.

Trustee and Custodian Services Relating to Securities Investment Trusts

Through Woori Bank, we act as a trustee for approximately 1,182 securities investment trusts. We receive a fee for acting as a trustee and generally perform the following functions:

receiving payments made in respect of such securities;

executing trades in respect of such securities on behalf of the securities investment trust, based on instructions from the relevant securities investment trust management company; and

in certain cases, authenticating beneficiary certificates issued by investment trust management companies and handling settlements in respect of such beneficiary certificates.

For the year ended December 31, 2006, our fee income from such services was (Won)8 billion.

Other Businesses

Merchant Banking

Prior to August 2003, we engaged in merchant banking operations through Woori Investment Bank. Effective August 1, 2003, we merged Woori Investment Bank with Woori Bank, which now engages in such operations. The merchant banking services we currently offer include

principally the following:

commercial paper discounting, which entails purchasing at a discount notes that are issued, endorsed or guaranteed by companies to supply them with short-term working capital;

factoring financing, which entails purchasing at a discount trade receivables held by companies to supply them with capital;

payment guarantees, which entail issuing guarantees in respect of notes in return for fees; and

lending, which entails making medium- to long-term Won-denominated and foreign currency-denominated loans to customers.

Through Woori Investment Bank, we have historically focused on short-term financing, lease financing and international financing and foreign currency exchange activities. Short-term financing was in particular main focus of the predecessor entities of Woori Investment Bank. However, these short-term financing activities caused many merchant banks (including the predecessor entities of Woori Investment Bank) to become insolvent

Table of Contents

during the Korean financial crisis. Since then, short-term financing volumes have declined greatly, with only commercial paper associated with large corporations circulating or discounted on the market.

The lease financing market has also steadily declined since the Korean financial crisis as companies have reduced their investments in facilities, although we believe that this market could improve if conditions in the Korean economy improve. The international financing and foreign exchange market also has not fully recovered since the Korean financial crisis. In particular, market conditions have not been favorable for foreign exchange borrowing due to low credit ratings for Korean companies and the availability of low-cost financing in the domestic market. In addition, we continue to experience difficulty in collecting loans from emerging market debtors, including in Southeast Asia, as they are still experiencing financial difficulties.

As a result, we have been concentrating on improving the asset quality of our merchant banking operations by disposing of non-performing assets through asset sales to KAMCO and to various special purpose companies formed as a result of joint ventures with several financial institutions. See [Assets and Liabilities](#) [Asset Quality of Loans](#) [Sales of Non-Performing Loans](#).

Management of National Housing Fund

In November 2002, we were selected to manage the operations of the National Housing Fund, together with two other financial institutions. The National Housing Fund provides financial support to low-income households in Korea by providing mortgage financing and construction loans for projects to build small- and medium-sized housing. As of December 31, 2006, outstanding housing loans from the National Housing Fund amounted to approximately (Won)55 trillion, of which we originated approximately (Won)8 trillion. The activities of the National Housing Fund are funded primarily by the issuance of national housing bonds, which must be purchased by persons and legal entities wishing to make real estate-related registrations and filings, and by subscription savings deposits held at the National Housing Fund.

In return for managing the operations of the National Housing Fund we receive a monthly fee. This fee consists of a fund raising fee, a loan origination fee and a management fee. The fund raising fee is based on the number of National Housing Fund subscription savings deposit accounts opened and the level of activity for existing accounts and the number of National Housing Fund bonds issued or redeemed. The loan origination fee is based on the number of new National Housing Fund loans and the number of National Housing Fund mortgage loans to contractors constructing housing units that are assumed by the individual buyers of housing units and the level of activity for existing loans during each month. The management fee is based on the monthly average of the number of outstanding accounts and the monthly average of the number of overdue loans owed to the National Housing Fund. In 2006, we received total fees of approximately (Won)41 billion for managing the National Housing Fund compared to approximately (Won)30 billion in 2005.

Bancassurance

The term *bancassurance* refers to the marketing and sale by commercial banks of insurance products manufactured within a group of affiliated companies or by third-party insurance companies. Through Woori Bank, Kyongnam Bank and Kwangju Bank, we currently market a wide range of bancassurance products in connection with a revision to existing regulations in 2003 that liberalized the bancassurance market in Korea. The revision has allowed us to offer insurance products commencing in September 2003. In 2006, we generated fee income of approximately (Won)111 billion through the marketing of bancassurance products. We believe that we will be able to continue to develop an important new source of fee-based revenues by expanding our offering of these products. Woori Bank has entered into bancassurance marketing arrangements with 20 insurance companies, including Samsung Life Insurance, Samsung Fire and Marine Insurance, Korea Life Insurance, Hyundai Fire and Marine Insurance and American International Assurance, and plan to enter into additional insurance product marketing arrangements with other

leading insurance companies whose names and reputation are likely to be familiar to our customer base.

Table of Contents

Private Equity

In October 2005, we established Woori Private Equity Co., Ltd. with the aim of strengthening our principal investment operations. Woori Private Equity will make long-term and strategic investments in buyout target companies, as well as actively involving itself in their management. This would involve identifying potential investees suffering from inefficient management and effecting financial restructuring and strategic reorientation in those investees so as to enhance their enterprise value. We expect Woori Private Equity's operations to provide us with greater investment opportunities and a new source of business for other related segments, especially corporate banking. In July 2006, Woori Private Equity established Woori Private Equity Fund, the size of which is approximately (Won)344 billion, as a limited partnership in which Woori Private Equity serves as a general partner.

Competition

We compete with other financial institutions in Korea, including principally nationwide and regional Korean commercial banks and branches of foreign banks operating in Korea. In addition, in particular segments such as credit cards, asset management, securities brokerage and bancassurance, our subsidiaries compete with specialized financial institutions focusing on such segments. Some of these specialized financial institutions are significantly larger in terms of asset size and customer base and have greater financial resources than our subsidiaries.

Competition in the Korean financial market has been and is likely to remain intense. In particular, in the area of our core banking operations, most Korean banks have been targeting retail customers and small- and medium-sized enterprises as they scale back their exposure to large corporate borrowers, contributing to some extent to the asset quality deterioration in consumer and small- and medium-sized loans, and have been focusing on developing fee income businesses, including bancassurance, as increasingly important sources of revenue. In the area of credit cards, Korean banks and credit card companies have in the past engaged in aggressive marketing activities and made significant investments, contributing to some extent to the asset quality problems recently experienced with respect to credit card receivables.

In addition, we believe regulatory reforms and the general modernization of business practices in Korea will lead to increased competition among financial institutions in Korea. We also believe that foreign financial institutions, many of which have greater experience and resources than we do, will seek to compete with us in providing financial products and services either by themselves or in partnership with existing Korean financial institutions. Furthermore, a number of significant mergers and acquisitions in the industry have taken place in Korea over the last few years, including the acquisition of Koram Bank by an affiliate of Citibank in 2004 and the acquisition of Korea First Bank by Standard Chartered Bank in April 2005. We expect that consolidation in the financial industry will continue. Some of the financial institutions resulting from this consolidation may, by virtue of their increased size and business scope, provide significantly greater competition for us. See Item 3D. Risk Factors Risks relating to competition.

Assets and Liabilities

The tables below and accompanying discussions provide selected financial highlights regarding our assets and liabilities on a consolidated basis.

Loan Portfolio

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

As of December 31, 2006, the balance of our total loan portfolio was (Won)133,740 billion, a 28.4% increase from (Won)104,130 billion as of December 31, 2005. As of December 31, 2006, 90.1% of our total loans were Won-denominated loans and 9.9% of our total loans were denominated in other currencies. Of the (Won)13,245 billion of foreign currency-denominated loans as of that date, approximately 26.7% represented foreign loans

Table of Contents

provided by Woori Bank to offshore entities and individuals. Woori Bank makes foreign loans primarily through its overseas branches to affiliates of large Korean manufacturing companies for trade financing and working capital.

Except where we specify otherwise, all loan amounts stated below are before deduction of allowance for loan losses.

Loan Types

The following table presents loans by type as of the dates indicated. Totals include past due amounts:

	As of December 31,

Loan Concentrations

Each of our banking subsidiaries limits its total exposure to any single borrower as required by Korean regulations and pursuant to its internal policies. Woori Bank determines this limit based on the borrower's credit rating provided by the bank's CREPIA system. Woori Bank may adjust this limit if it would otherwise exceed the limit imposed by Korean regulations. See *Supervision and Regulation - Principal Regulations Applicable to Banks - Financial Exposure to any Individual Customer and Major Shareholder*. Kyongnam Bank limits total exposure to any single borrower or *chaebol* to 10% of the sum of its Tier I and Tier II capital (less any capital deductions). Kwangju Bank limits its total exposure to 10% of the sum of its Tier I and Tier II capital (less any capital deductions) in the case of any single borrower and 15% of the sum of its Tier I and Tier II capital (less any capital deductions) in the case of any single *chaebol*.

Table of Contents*20 Largest Exposures by Borrower*

As of December 31, 2006, our exposures to our 20 largest borrowers totaled (Won)27,521 billion and accounted for 14.6% of our total exposures. The following table sets forth our total exposures to those borrowers as of that date:

Total loans	(Won) 80,380	(Won) 29,665	(Won) 23,690	(Won) 133,735

⁽¹⁾ Includes home equity loans.

A significant portion of our loans with maturities of one year is renewed annually. We typically roll over our working capital loans and consumer loans (other than those payable in installments) after we conduct our normal loan review in accordance with our loan review procedures. Under our internal guidelines, we may extend working capital loans on an annual basis for an aggregate term of three years. Those guidelines also allow us to extend consumer loans for another term on an annual basis for an aggregate term of up to three years.

Interest Rates

The following table shows, as of December 31, 2006, the total amount of our loans due after one year, that have fixed interest rates and variable or adjustable interest rates:

	<u>Domestic</u>	<u>Foreign</u>	<u>Total</u>
	(in billions of Won)		
Fixed rate ⁽¹⁾	(Won) 6,195	(Won) 242	(Won) 6,437
Variable or adjustable rates ⁽²⁾	45,366	1,552	46,918
Total loans	(Won) 51,561	(Won) 1,794	(Won) 53,355

⁽¹⁾ Fixed rate loans are loans for which the interest rate is fixed for the entire term.

⁽²⁾ Variable or adjustable rate loans are loans for which the interest rate is not fixed for the entire term.

For additional information regarding our management of interest rate risk, see Item 11. Quantitative and Qualitative Disclosures about Market Risk Market Risk Management Asset and Liability Management.

Asset Quality of Loans

Loan Classifications

The Financial Supervisory Commission generally requires Korean financial institutions to analyze and classify their assets by quality into one of five categories for Korean GAAP reporting purposes. In making these classifications, we take into account a number of factors, including the financial position, profitability and transaction history of the borrower, and the value of any collateral or guarantee taken as security for the extension of credit. This classification method, and our related provisioning policy, is intended to fully reflect the borrower's capacity to repay.

The following is a summary of the asset classification criteria we apply for corporate and consumer loans, based on the asset classification guidelines of the Financial Supervisory Commission. Credit card receivables are subject to classification based on the number of days past due, as required by the Financial Supervisory Commission. We also apply different criteria for other types of credits such as loans to the Korean government or to government-related or controlled entities, certain bills of exchange and certain receivables.

<u>Asset Classification</u>	<u>Characteristics</u>
Normal	Credits extended to customers that, based on our consideration of their business, financial position and future cash flows, do not raise concerns regarding their ability to repay the credits.
Precautionary	Credits extended to customers that: <ul style="list-style-type: none"> based on our consideration of their business, financial position and future cash flows, show potential risks with respect to their ability to repay the credits, although showing no immediate default risk; or are in arrears for one month or more but less than three months.
Substandard	Either: <ul style="list-style-type: none"> credits extended to customers that, based on our consideration of their business, financial position and future cash flows, are judged to have incurred considerable default risks as their ability to repay has deteriorated; or

the portion that we expect to collect of total loans (1) extended to customers that have been in arrears for three months or more, (2) extended to customers that have incurred serious default risks due to the occurrence of, among other things, final refusal to pay their debt instruments, entry into liquidation or bankruptcy proceedings, or closure of their businesses, or (3) extended to customers who have outstanding loans that are classified as doubtful or estimated loss.

Table of Contents

Asset Classification

Characteristics

Doubtful

Credits exceeding the amount we expect to collect of total credits to customers that:

based on our consideration of their business, financial position and future cash flows, have incurred serious default risks due to noticeable deterioration in their ability to repay; or

have been in arrears for three months or more but less than twelve months.

Estimated Loss

Credits exceeding the amount we expect to collect of total credits to customers that:

based on our consideration of their business, financial position and future cash flows, are judged to have to be accounted as a loss as the inability to repay became certain due to serious deterioration in their ability to repay;

have been in arrears for twelve months or more; or

have incurred serious risks of default in repayment due to the occurrence of, among other things, final refusal to pay their debt instruments, liquidation or bankruptcy proceedings or closure of their business.

Loan Loss Provisioning Policy

We maintain our allowance for loan losses at a level that we believe is sufficient to absorb estimated probable losses inherent in our loan portfolio. We base our allowance for loan losses on our continuing review and evaluation of the loan portfolio, and it represents our best estimate of probable losses that we have incurred as of the balance sheet date. We evaluate the risk characteristics of the loan portfolio and consider factors such as past loss experience and the financial condition of the borrower to determine the level of the allowance. We charge the allowance for loan losses against income in the form of a provision for loan losses. Adjustments to the allowance due to changes in measurement of impaired loans are recognized through the provision for loan losses. Loan losses, net of recoveries, are charged directly to the allowance.

We consider a commercial loan impaired when, after consideration of current information and events, it is probable that we will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the loan. We consider the following types of loans to be impaired:

loans classified as substandard or below according to the Financial Supervisory Commission's asset classification guidelines;

loans that are 30 days or more past due;

loans to companies that have received a warning from the Korean Federation of Banks indicating that companies have exhibited difficulties in making timely payments of principal and interest; and

loans that are troubled debt restructurings as defined under U.S. GAAP.

Once we have identified a loan as impaired, we generally measure the value of the loan based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. If the measured value is less than the book value of the loan, we establish a specific allowance for the amount deemed

Table of Contents

uncollectible. Where the entire impaired loan or a portion of the impaired loan is secured by collateral or a guarantee, we consider the fair value of the collateral or the guarantee payment in establishing the level of the allowance. Alternatively, for impaired loans that are considered collateral dependent, we determine the amount of impairment by reference to the fair value of the collateral. In addition, for certain foreign corporate loans that are considered impaired, we determine the fair value by reference to observable market prices, when available.

We also establish allowances for losses for corporate loans that have not been individually identified as impaired, consumer loans and credit card balances. These allowances are based on the level of our expected loss, which is the product of default probability and loss severity. We establish the expected loss related to corporate loans that we do not deem to be impaired based on historical loss experience, which depends on the internal credit rating of the borrower, characteristics of the lending product and relevant collateral. We establish the expected loss related to consumer loans and credit card balances based on historical loss experience generally for a period of one year, which depends on delinquency and collateral.

In connection with the restructuring of delinquent credit card balances into loans, we do not make any adjustments to our historical loss experience as we incorporate historical loss experience based on the initial date on which the balances became overdue. We separately calculate historical loss experience for both the period from the time when the balances became overdue up to the date when the balances are restructured and after the balances have been restructured as loans.

For leases, we establish allowances using the same method we use to establish allowances for losses for corporate loans.

For credit-related commitments, we establish allowances using the same method we use to establish allowances for our loans.

The actual amount of credit losses we incur may differ from our loss estimates as a result of changing economic conditions, changes in industry or geographic concentrations, or other factors. We monitor the differences between our estimated and actual incurred credit losses, and we undertake detailed periodic assessments of both individual loans and credit portfolios, the models we use to estimate incurred credit losses in those portfolios and the adequacy of our overall allowances.

Non-Accrual Loans and Past Due Accruing Loans

Except as discussed below, we generally cease to accrue interest on a loan and classify that loan as non-accruing when principal or interest payments become one day past due. Any unpaid interest previously accrued on these loans is reversed from income, and thereafter we recognize interest only to the extent we receive payments. In applying payments on delinquent loans, we first apply payments to the delinquent interest outstanding, then to non-delinquent interest, and then to the outstanding loan balance until the loan is paid in full. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current.

Foregone interest is the interest due on non-accrual loans that we have not accrued in our books. If we had not foregone interest on our non-accrual loans, we would have recorded gross interest income of (Won)308 billion, (Won)211 billion and (Won)216 billion for 2004, 2005 and 2006, respectively, on loans accounted for on a non-accrual basis throughout the year, or since origination for loans held for part of the year. The actual amount of interest income on those loans included in our net income for 2004, 2005 and 2006 was (Won)149 billion, (Won)109 billion and (Won)102 billion, respectively.

The category "accruing but past due one day" includes loans that are still accruing interest but on which principal or interest payments are contractually past due one day or more. We continue to accrue interest on loans that are fully secured by deposits or on which there are financial guarantees from the Korean government, the

Table of Contents

KDIC or certain financial institutions. The following table shows, as of the dates indicated, certain information relating to our non-accrual and past due loans.

As of December 31,

(2) Includes accruing loans that are contractually past due 90 days or more in the amount of (Won)4 billion, (Won)4 billion, (Won)3 billion and (Won)2 billion as of December 31, 2003, 2004, 2005 and 2006, respectively.

Loan Aging Schedule

The following table shows our loan aging schedule (excluding accrued interest) as of the dates indicated. In line with industry practice, we have restructured a portion of our delinquent credit card balances as loans and substituted cash advances commencing in 2002. We discontinued the practice of providing such substituted cash advances commencing in September 2003.

Table of Contents*Credit Exposures to Companies in Workout, Restructuring, Corporate Reorganization or Composition*

Workout is a voluntary procedure through which we, together with borrowers and other creditors, restructure a borrower's credit terms. Between 1998 and 2001, we joined with other financial institutions in Korea in establishing and implementing voluntary workout procedures. On July 18, 2001, the National Assembly of Korea adopted the Corporate Restructuring Promotion Act, which became effective in September 2001 and expired on December 31, 2005. The Corporate Restructuring Promotion Act replaced the previously established workout procedures. The Act applied to more than 420 financial institutions in Korea, which included commercial banks, insurance companies, investment trust companies, securities companies, merchant banks, the KDIC and KAMCO. Under the Corporate Restructuring Promotion Act, all creditor financial institutions of a financially troubled borrower were required to participate in a creditors' committee to prepare a restructuring plan. The approval of creditor financial institutions holding not less than 75% of the total debt outstanding of a borrower (as well as 75% of the total outstanding secured debt, if the restructuring plan includes secured debt restructuring) finalized the borrower's restructuring plan, including debt restructuring and provision of additional funds. Once approved, the plan was also binding on all the creditor financial institutions of the borrower. Any creditor financial institution that disagreed with the final restructuring plan approved by the creditors' committee had the right to request the creditors' committee to purchase its claims at a mutually agreed price. In the event that the creditors' committee and the dissenting creditor financial institution failed to come to an agreement on the terms of purchase, a coordination committee consisting of seven experts would be set up to resolve the matter. See Item 3D. Risk Factors Risks relating to our corporate credit portfolio. The Korean government presented an amendment bill to extend the effective term of the Corporate Restructuring Promotion Act until December 31, 2010 to the National Assembly of Korea. The amendment bill not only is designed to extend the validity of the Corporate Restructuring Promotion Act but also contains other amendments which provide, among others, (i) that the Financial Supervisory Commission may request that creditor financial institutions defer from exercising their creditor rights and (ii) relaxations of some of the restrictions previously imposed on the creditor financial institutions disposition of their shares acquired by debt-to-equity swaps. The amendment bill is still pending at the National Assembly of Korea. As a temporary measure until the reenactment of the Corporate Restructuring Promotion Act, certain financial institutions, including us, have recently decided to adopt and implement a voluntary agreement similar to the restructuring procedures under the Corporate Restructuring Promotion Act, beginning at the end of March 2007, to facilitate corporate restructuring of companies with borrowings of not less than (Won)50 billion.

Korean law has also provided for corporate reorganization proceedings, which are court-supervised procedures to rehabilitate an insolvent company. Under these procedures, a restructuring plan is adopted at a meeting of interested parties, including creditors of the company. That restructuring plan is subject to court approval.

The Korean Debtor Recovery and Bankruptcy Law was enacted on March 31, 2005 and became effective on March 31, 2006. Accordingly, each of the Company Reorganization Act, the Composition Act, the Bankruptcy Act and the Individual Debtor Recovery Act was abolished. The Korean Debtor Recovery and Bankruptcy Law contains notable changes to previously existing corporate reorganization and composition procedures, including nullification of the composition procedures previously in place and the modification of reorganization procedures, whereby existing management would continue to oversee a company's reorganization process (except that the court would be empowered to appoint a third-party receiver under certain circumstances). Notwithstanding this legislative change, any composition or company reorganization proceedings that were pending at the time the new law became effective will continue to be governed under the Composition Act and the Company Reorganization Act, respectively.

A portion of our loans to and debt securities of corporate customers are currently in workout or restructuring. As of December 31, 2006, (Won)280 billion, or 0.2%, of our total loans and debt securities were in workout or restructuring. This included (Won)239 billion of loans to and debt securities of large corporate borrowers in workout or restructuring and (Won)4 billion of loans to and debt securities of small- and medium-sized enterprises in workout or restructuring, which represented 85.4% and 0.2% of our loans to and debt securities of such customers and 14.6% and less than 0.1% of our total loans and debt securities, respectively. Currently, a specialized unit in each of our banking subsidiaries manages their workout or restructured loans. At Woori Bank, for example, the Credit Management and Collection Center manages its workout and restructured loans. Upon approval of a workout or restructuring plan, a credit exposure is

Table of Contents

initially classified as precautionary or lower and thereafter cannot be classified higher than precautionary with limited exceptions. If a corporate borrower is in workout or restructuring, corporate reorganization or composition, we take the status of the borrower into account in valuing our loans to and collateral from that borrower for purposes of establishing our allowances for loan losses.

The following table shows, as of December 31, 2006, our ten largest exposures that were in workout or restructuring, including composition or court receivership:

Company (credit rating) ⁽¹⁾	Loans		Equity Securities	Debt Securities	Guarantees and Acceptances	Credit Derivatives	Total Exposures	Collateral ⁽²⁾	Amounts Classified as Substandard or Below ⁽³⁾	Allowance

⁽²⁾ The value of collateral is appraised based on future cash flow and observable market price.

⁽³⁾ Classification is based on the Financial Supervisory Commission's asset classification criteria.

⁽⁴⁾ Credit rating unavailable.

Troubled Debt Restructurings

The following table presents, as of the dates indicated, our loans that are troubled debt restructurings as defined under U.S. GAAP. These loans consist principally of corporate loans that are accruing interest at rates lower than the original contractual terms as a result of a variation of terms upon restructuring.

As of December 31,

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

	2002			2003			2004			2005			2006		
	Domestic	Foreign	Total	Domestic	Foreign	Total	Domestic	Foreign	Total	Domestic	Foreign	Total	Domestic	Foreign	Total
	(in billions of Won)														
Loans not included in non-accrual and past due loans which are classified as troubled debt restructurings	(Won) 1,286	(Won) 2	(Won) 1,288	(Won) 363	(Won) 3	(Won) 366	(Won) 44	(Won) 3	(Won) 47	(Won) 314		(Won) 314	(Won) 251		(Won) 251

Table of Contents

For 2006, interest income that we would have recorded under the original contract terms of restructured loans amounted to (Won)17 billion, of which we reflected (Won)14 billion as interest income for 2006.

Potential Problem Loans

As of December 31, 2006, we had (Won)1,676 billion of corporate loans that were current as to payment of principal and interest but where we had serious doubt as to the borrower's ability to comply with repayment terms in the near future. These amounts were classified as impaired and therefore included in our calculation of specific loan loss allowance under U.S. GAAP. Potential problem loans are precautionary loans that we determine, through our internal loan review process, require close management and increased provisioning due to the borrower's financial condition, our forecast for the industry in which it operates or as a result of other developments relating to its business.

Other Problematic Interest-Earning Assets

We have in the past received certain other interest-earning assets in connection with troubled debt restructurings that, if they were loans, would be required to be disclosed as part of the non-accrual, past due or restructuring or potential problem loan disclosures provided above. However, as of December 31, 2006, we had no such assets.

Non-Performing Loans

Non-performing loans are defined as those loans that are classified as substandard or below based on the Financial Supervisory Commission's asset classification criteria. See "Loan Classifications" above. The following table shows, as of the dates indicated, certain details of our total non-performing loan portfolio:

	As of December 31,				
	2002	2003	2004	2005	2006
	(in billions of Won, except percentages)				
Total non-performing loans	(Won) 3,576 ⁽¹⁾	(Won) 2,594 ⁽²⁾	(Won) 2,071 ⁽³⁾	(Won) 1,369 ⁽⁴⁾	(Won) 1,354 ⁽⁵⁾
As a percentage of total loans	4.5%	2.9%	2.3%	1.3%	1.0%

(1) Excludes (Won)269 billion and (Won)512 billion of previously delinquent credit card balances restructured into loans and replaced with substituted cash advances, respectively, that were classified as normal or precautionary.

(2) Excludes (Won)635 billion and (Won)2 billion of previously delinquent credit card balances restructured into loans and replaced with substituted cash advances, respectively, that were classified as normal or precautionary.

(3) Excludes (Won)189 billion of previously delinquent credit card balances restructured into loans that were classified as normal or precautionary.

(4) Excludes (Won)46 billion of previously delinquent credit card balances restructured into loans that were classified as normal or precautionary.

(5) Excludes (Won)15 billion of previously delinquent credit card balances restructured into loans that were classified as normal or precautionary.

The above amounts do not include loans classified as substandard or below that we or any of our predecessor entities sold to KAMCO or to special purpose companies established as a result of our joint ventures with several financial institutions. See Sales of Non-Performing Loans Joint Ventures.

We have also issued securities backed by non-performing loans and other assets. Some of these transactions involved transfers of loans through securitizations where control of the loans has not been surrendered and, therefore, are not treated as sale transactions. Instead, the assets remain on our balance sheet with the securitization proceeds treated as secured borrowings. These securities are included in the table above. See Funding Secured Borrowings.

Non-Performing Loan Strategy

One of our goals is to improve our asset quality, in part by reducing our non-performing loans. We are in the process of integrating the credit risk management systems of our subsidiaries, which we believe will reduce our risks relating to future non-performing loans. Our credit rating systems are designed to prevent our subsidiaries from extending new loans to high-risk borrowers as determined by their credit rating. Our credit monitoring systems are designed to bring any sudden increase in a borrower's credit risk to the attention of our subsidiaries, which then closely monitor such loans. See Item 11. Quantitative and Qualitative Disclosures about Market Risk - Credit Risk Management.

Each of our subsidiaries has a unit that is responsible for managing non-performing loans. At Woori Bank, for example, the Credit Management and Collection Center generally oversees the process for resolving non-performing loans transferred to it by other Woori Bank business units. We believe that by centralizing the management of our non-performing loans within each subsidiary, we can become more effective in dealing with the issues relating to these loans by pooling institutional knowledge and creating a more specialized workforce.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

When a loan becomes non-performing, the units at our banking subsidiaries that are responsible for monitoring non-performing loans will begin a due diligence review of the borrower's assets, send a notice demanding payment or stating that we will take legal action, and prepare for legal action. At the same time, we initiate our non-performing loan management process, which begins with:

identifying loans subject to a proposed sale by assessing the estimated losses from such sale based on the estimated recovery value of collateral, if any, for such non-performing loans;

Table of Contents

identifying loans subject to charge-off based on the estimated recovery value of collateral, if any, for such non-performing loans and the estimated rate of recovery of unsecured loans; and

on a limited basis, identifying corporate loans subject to normalization efforts based on the cash-flow situation of the borrower.

Once we have confirmed the details of a non-performing loan, we make efforts to recover amounts owed to us. Methods for resolving non-performing loans include the following:

commencing collection proceedings;

commencing legal actions to seize collateral;

writing off these amounts, transferring them to specific subsidiaries in charge of collections and authorizing those subsidiaries to recover what they can with respect to these amounts or to sell these loans to third parties; and

with respect to large corporations, commencing or participating in voluntary workouts or restructurings mandated by Korean courts.

In addition to making efforts to collect on our non-performing loans, we also undertake measures to reduce the overall level of our non-performing loans. These measures include:

selling our non-performing loans to special purpose companies established in connection with our joint ventures with several financial institutions; and

selling our non-performing loans to third parties, including KAMCO.

See Sales of Non-Performing Loans. We generally expect to suffer a partial loss on loans that we sell or securitize, to the extent such sales and securitizations are recognized as such under U.S. GAAP.

Foreclosure and Collateral. We generally foreclose on mortgages or exercise our security interests in respect of other collateral if a collateralized obligation becomes overdue for more than three months. At that time, we will petition a court to foreclose on collateral and to sell that collateral through a court-supervised auction. Under Korean law, that petition must be filed with a court that has jurisdiction over the mortgaged property, and must be filed together with a copy of the mortgage agreement and an extract of the court registry regarding the subject property. The court will then issue an order to commence the foreclosure auction, which will be registered in the court registry of the subject property. If no bidder bids at least the minimum amount set by the court on the first auction date, the court will set another date for a subsequent auction approximately one month later. Each time a new auction date is set, the minimum auction price will be lowered by approximately 20%. Unlike laws relating to foreclosure in the United States, Korean law does not provide for non-judicial foreclosure. During 2003, 2004 and 2005, we foreclosed on collateral we obtained with respect to loan balances representing approximately 1% of our average interest-bearing loan balances in each of those periods. We believe, based on our general understanding of the U.S. banking industry, that we generally foreclose on collateral somewhat less frequently than similarly situated U.S. banks.

Korean financial institutions, including us, maintain general policies to assess a potential customer's eligibility for loans based on that entity's credit quality, rather than requiring a particular level of collateral, especially in the case of large corporate borrowers. As a result, the ratio of our collateral to non-performing corporate loans is relatively low when compared with our total exposures. For secured consumer loans, however, we generally impose limits on loan amounts based on the collateral we receive. See Consumer Banking Lending Activities.

We reflect this collateral level when we estimate the future cash flow for our loans, which we calculate using a discounted cash flow method. With respect to loans to borrowers that we do not believe will be going

Table of Contents

concerns in the future, the lower collateral ratio has a direct effect on cash flow estimates and results in a higher level of allowances. With respect to loans to borrowers that we expect to be going concerns, the lower collateral ratio has an effect on cash flow estimates but we also consider other factors, including future operating income and future asset disposals and restructuring, in determining allowance levels. Accordingly, for these latter borrowers, the effect of lower collateral levels on allowances is mitigated by other characteristics of the borrower, and that lower collateral level will not necessarily result in a higher level of allowances.

Sales of Non-Performing Loans

The overall asset quality of our loan portfolio has changed significantly in recent years as a result of sales of non-performing loans. These sales have been made primarily to KAMCO and, more recently, to special purpose companies established as a result of joint ventures with several financial institutions.

The following table sets forth information regarding our sales of loans for the periods indicated:

Purchaser	Year Ended December 31,								
	2004			2005			2006		
	Principal Amount Sold	Sale Price	Gain (loss)	Principal Amount Sold	Sale Price	Gain (loss)	Principal Amount Sold	Sale Price	Gain (loss)
	(in billions of Won)								
KAMCO	(Won) 767	(Won) 513	(Won)	(Won) 339	(Won) 223	(Won)	(Won) 90	(Won) 71	(Won)
Joint venture special purpose companies							389	276	
Others	1,073	816	(12)	2,709	1,319	(45)	175	27	1
Total	(Won) 1,840	(Won) 1,329	(12)	(Won) 3,048	(Won) 1,542	(45)	(Won) 654	(Won) 374	(Won) 1

Korea Asset Management Corporation. In December 1997, in response to difficulties faced by Korean financial institutions as a result of the severe economic downturn in Korea, the Korean government authorized KAMCO to purchase from those institutions certain assets (which were primarily classified as substandard or below) at discounted prices. From 1997 through December 31, 2006, we and our predecessor entities sold an aggregate of (Won)8,981 billion of substandard or below loans to KAMCO.

Pursuant to the terms of certain of these sales, KAMCO can require us to repurchase substandard or below loans we have sold to it in the event that:

the underlying documentation of the loan is incomplete;

there is a flaw in the perfection of any security interest underlying the loan; or

certain litigation regarding the loan is pending.

In addition, we may be required to repurchase any loan relating to a borrower that has applied to a court for reorganization or that is the subject of reorganization proceedings at the time the loan was sold to KAMCO if a court rejects the application for reorganization, disapproves the reorganization plan or fails to approve the reorganization plan within two years of the sale. We may also be required to repurchase a loan if a court determines that the borrower cannot meet the terms of the repayment schedule developed in the reorganization proceeding. The ability of KAMCO to exercise its right to require us to repurchase loans sold is without limit. As of December 31, 2006, the aggregate principal amount of loans subject to these repurchase rights was (Won)8 billion. As of that date, we recorded a liability of (Won)1 billion relating to those loans, representing our estimated obligation to make repurchases.

Joint Ventures. In April 2005, Woori Bank entered into a joint venture agreement with Merrill Lynch to dispose of approximately US\$111 million of our precautionary loans. A special purpose company was

Table of Contents

established to purchase such loans from Woori Bank and to securitize such loans through the issuance of asset-backed securities.

In February 2006, Woori F&I entered into a joint venture arrangement with CRT9 Yugen Kaisha, a subsidiary of Shinsei Bank, to dispose of our substandard or below loans. Much like the joint venture with Merrill Lynch, a special purpose company was established to purchase such loans from us and to securitize such loans through the issuance of asset-backed securities. In connection with such arrangement, Woori F&I transferred 49% of its 100% interest in Woori CA Asset Management to CRT9 Yugen Kaisha pursuant to a share purchase agreement. Woori CA Asset Management was subsequently renamed Woori SB Asset Management and will manage the substandard or below loans purchased from us by the special purpose company and receive asset management fees from the special purpose company, as well as a performance fee based on a percentage of asset resolutions.

Allocation of Allowances for Loan Losses

Table of Contents

Loan Charge-Offs

Each of our subsidiaries adheres to the credit approval process we have implemented, which includes assessing credit risk before extending loans and monitoring outstanding loans, in order to minimize loans that must be charged off. To the extent charge-offs are required, our subsidiaries follow charge-off policies aimed at maximizing accounting transparency, minimizing any waste of resources in managing loans which have a low probability of being collected and reducing our non-performing loan ratio.

Loans To Be Charged Off. Our subsidiaries charge off loans that are deemed to be uncollectible by virtue of their falling under any of the following categories:

loans for which collection is not foreseeable due to insolvency, bankruptcy, compulsory execution, disorganization, dissolution or the shutting down of the business of the debtor;

loans for which collection is not foreseeable due to the death or disappearance of the debtor;

loans for which expenses of collection exceed the collectable amount;

loans on which collection is not possible through legal or any other means;

payments in arrears in respect of credit cards that have been overdue for more than four payment cycles and have been classified as expected loss (excluding instances where there has been partial payment of the overdue balance, where a related balance is not overdue or where a charge off is not possible due to Korean regulations), and those that have been overdue for more than six months;

payments outstanding on corporate and consumer loans (other than credit card receivables) that have been overdue for more than 12 months, and those on unsecured consumer loans that have been overdue for more than six months; or

the portion of loans classified as estimated loss, net of any recovery from collateral, which is deemed to be uncollectible.

Procedure for Charge-off Approval. In order to charge off corporate loans under Korean GAAP, in the case of Woori Bank, an application for a charge-off must be submitted by a branch to the Credit Management and Collection Center promptly and, in any event, within one month after the corporate loan is classified as estimated loss. The relevant department or team evaluates and approves the application. Then, Woori Bank must seek an approval from the Financial Supervisory Service for our charge-offs, which is typically granted. At the same time, Woori Bank refers the approval of the charge-off by the Credit Management and Collection Center to its Audit Committee for their review to ensure compliance with our internal procedures for charge-offs, which include consultations with the branch submitting the charge-off application. Once Woori Bank receives approval from the Financial Supervisory Service, Woori Bank must also obtain approval from its senior management to charge off those loans. With respect to corporate loans under U.S. GAAP, we follow a similar procedure (although we will not seek approval from the Financial Supervisory Service).

With respect to unsecured consumer loans and credit card balances, we follow a different process to determine which unsecured consumer loans and credit card balances should be charged-off, based on the length of time those loans or balances are past due. Under Korean GAAP, we

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

charge-off unsecured consumer loans which are 12 months overdue and credit card balances which have been overdue for more than four payment cycles and have been classified as expected loss (excluding instances where there has been partial payment of the overdue balance, where a related balance is not overdue or where a charge off is not possible due to Korean regulations). Under U.S. GAAP, we follow a similar procedure, in addition to charging off any unsecured consumer loans or credit card balances which have not been charged off under Korean GAAP but are six months overdue.

Treatment of Loans Charged Off. Once loans are charged off, we classify them as charged-off loans. In the case of Woori Bank, these loans are then transferred to a wholly-owned subsidiary, Woori Credit Information, that is in charge of collections. It will attempt to recover amounts owed or to sell these loans to third parties.

Table of Contents

In the case of collateralized loans, our general policy is to petition a court to foreclose and sell the collateral through a court-supervised auction if a collateralized loan becomes overdue for more than three months. If a debtor still fails to repay and the court grants its approval for foreclosure, we will sell the collateral, net of expenses incurred from the auction.

Credit Rehabilitation Programs for Delinquent Consumer Borrowers

In light of the rapid increase in delinquencies in credit card and other consumer credit in recent years, and concerns regarding potential social issues posed by the growing number of individuals with bad credit, the Korean government has implemented a number of measures intended to support the rehabilitation of the credit of delinquent consumer borrowers. These measures may affect the amount and timing of our collections and recoveries on our delinquent consumer credits.

In 2002, the Financial Supervisory Commission established the Credit Counseling and Recovery Service based upon an agreement among approximately 160 financial institutions in Korea. Upon application to the Credit Counseling and Recovery Service and approval of a majority of unsecured and two-thirds of secured creditor financial institutions, a qualified credit delinquent person with outstanding debts to two or more financial institutions in an aggregate amount not exceeding (Won)300 million may participate in an individual work-out program designed to restructure such person's debt and rehabilitate such person's credit.

On April 1, 2006, the Korean Debtor Recovery and Bankruptcy Law took effect and replaced the Individual Debtor Rehabilitation Law. Under the Korean Debtor Recovery and Bankruptcy Law, a qualified individual debtor with outstanding debts in an aggregate amount not exceeding threshold amounts of (Won)500 million of unsecured debt and/or (Won)1 billion of secured debt may restructure his or her debts through a court-supervised debt restructuring that is binding on creditors.

Securities Investment Portfolio

Investment Policy

Our subsidiaries invest in and trade Won-denominated securities and, to a lesser extent, foreign currency-denominated securities for their own account to:

maintain asset stability and diversification;

maintain adequate sources of back-up liquidity to match funding requirements; and

supplement income from core lending activities.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Team managers of the treasury and investment banking departments of our subsidiaries supervise the respective subsidiary's investment and trading activities. In making securities investments, our subsidiaries take into account a number of factors, including external broker analyses and internal assessments of macroeconomic trends, industry analysis, credit evaluation and trading history in determining whether to make particular investments in securities.

Our investments in debt securities include primarily bonds issued by government-related entities, as well as corporate bonds that have been guaranteed by banks (other than merchant banks), government-related funds or privately capitalized funds that we consider to have a low credit risk. As of December 31, 2006, we owned (Won)2,592 billion of KDIC debentures, which represent 6.0% of our investment securities. See Item 4A. History and Development of the Company History Establishment of Woori Finance Holdings.

Our securities investments are subject to various guidelines, including limitations prescribed under the Bank Act. Under these regulations, each of our subsidiaries must limit its investments in equity securities and bonds with a maturity in excess of three years (other than monetary stabilization bonds issued by the Bank of Korea and

Table of Contents

Korean government bonds) to 60% of the sum of its total Tier I and Tier II capital amount (less any capital deductions). Each of our subsidiaries is also generally prohibited from purchasing or retaining permanent ownership interests in equity securities of other banking institutions or acquiring more than 15% of the shares with voting rights issued by any other corporation. Pursuant to an amendment to the Bank Act which became effective in July 2002, each of our banking subsidiaries and its respective trust accounts are prohibited from acquiring the shares of any of our major shareholders, as defined in Supervision and Regulation Principal Regulations Applicable to Banks Financial Exposure to Any Individual Customer and Major Shareholder, in excess of an amount determined by the Enforcement Decree within a maximum limit of 1% of the sum of our Tier I and Tier II capital (less any capital deductions). Further information on the regulatory environment governing our investment activities is set out in Supervision and Regulation Principal Regulations Applicable to Banks Liquidity and Restrictions on Shareholdings in Other Companies.

Our and our subsidiaries' investments in foreign currencies are subject to certain limits and restrictions specified in our and our subsidiaries' internal guidelines relating to country exposure, a single issuer and type of security exposure, and total investments by individual business units.

The following table sets out the definitions of the four types of securities investments we hold:

<u>Category</u>	<u>Classification</u>	<u>Valuation Method</u>
Trading securities	Securities held in anticipation of short-term market movements, which have been acquired for the purpose of short-term capital gains.	Marked-to-market and reported at fair value. We record unrealized gains and losses in income. Trading securities held by our overseas branches are stated at market value unless otherwise required by regulatory authorities in countries where the overseas branches are located.
Available-for-sale securities	Securities not classified as held to maturity or trading or other investments. Securities are classified as available-for-sale when we intend to hold them for an indefinite period of time or when the securities may be utilized for tactical asset/liability purposes and sold from time to time to effectively manage interest rate exposure and resultant prepayment risk and liquidity needs.	Marked-to-market and reported at fair value, with unrealized gains and losses being recorded in other comprehensive income as unrealized gain or loss on valuation of investment securities. If the fair value of these securities declines below their cost and the decline is deemed other-than-temporary, the difference in value is recorded as a realized loss on our income statement.
Held-to-maturity securities	Debt securities are classified as held-to-maturity securities when we have the positive ability and intent to hold until maturity.	Valued at acquisition cost, adjusted for accretion or amortization of discounts and premiums. However, if the fair value of these securities declines below their cost and the decline is deemed other-than-temporary, the difference in value is recorded as a realized loss on our income statement.

Table of Contents

<u>Category</u>	<u>Classification</u>	<u>Valuation Method</u>
Other investments	Equity securities where we exercise significant influence over the operating and financial policies of an investee.	Valued pursuant to the equity method of accounting, based on net asset value. We reflect our share in net income or net loss of these entities in our income statement. Changes in retained earnings, capital surplus or other capital accounts of these entities are accounted for as adjustments to our retained earnings or capital adjustments, consistent with the manner reflected in these entities' financial statements.
	Equity investment securities that do not have a readily determinable fair value.	Valued at acquisition cost. However, if the fair value of these securities declines below their cost and the decline is deemed other-than-temporary, the difference in value is recorded as a realized loss on our income statement.

Table of Contents*Risk Concentrations*

As of December 31, 2006, we held the following securities of individual issuers where the aggregate book value of those securities exceeded 10% of our stockholders' equity at such date. As of December 31, 2006, our stockholders' equity was (Won)10,426 billion.

	As of December 31, 2006	
	Book Value	Market Value
(in billions of Won)		
Name of issuer:		
KDIC	(Won) 2,592	(Won) 2,584
The Bank of Korea	10,327	10,325
Korean government	4,494	4,490
Korea Development Bank	2,263	2,261
Total	(Won) 19,676	(Won) 19,660

The KDIC and the Bank of Korea are Korean government entities, and the Korean government owns a majority equity interest in the Korea Development Bank.

Funding

We fund our lending and other activities using various sources, both domestic and foreign. Our primary funding strategy is to maintain stable and low-cost funding. We have in the past achieved this in part by increasing the average balances of low-cost customer deposits, in particular demand deposits and savings deposits.

Customer deposits are our principal funding source. Customer deposits accounted for 76.8% of our total funding as of December 31, 2004, 75.0% of our total funding as of December 31, 2005 and 72.0% of our total funding as of December 31, 2006.

We also acquire funding through the following sources:

long-term borrowings, including the issuance of senior and subordinated bonds and borrowings from government-affiliated funds and entities and other financial institutions;

short-term borrowings, including borrowings from the trust accounts of our subsidiaries and from the Bank of Korea, and call money;
and

secured borrowings, including securities sold under repurchase agreements and issuances of asset-backed securities.

As of December 31, 2006, approximately 96.6% of our total funding was denominated in Won.

Table of Contents*Deposits*

Although the majority of our deposits are short-term, it has been our experience that the majority of our depositors generally roll over their deposits at maturity, providing us with a stable source of funding. See Item 3D. Risk Factors Other risks relating to our business Our funding is highly dependent on short-term deposits, which dependence may adversely affect our operations. The following table shows the average balances of our deposits and the average rates paid on our deposits for the periods indicated:

For the year ended December 31,								
2003		2004		2005		2006

(1) Average balances are based on daily balances for all of our subsidiaries, except for Woori F&I, Woori CA Asset Management (which was renamed Woori SB Asset Management in February 2006), Woori Finance Information System, Woori Credit Information and our special purpose companies, which are based on quarterly balances.

(2) Mutual installment deposits are interest-bearing deposits offered by us, which enable customers to become eligible to apply for loans secured by such deposits while they maintain an account with us. In order to qualify to apply for such a loan, a customer must make required periodic deposits to the mutual installment account for a contracted term of less than five years. Any such loan will be secured in an amount up to the holder's mutual installment deposit and will be subject to the same loan underwriting policy we apply for other secured loans. For the portion of the loan, if any, that is not secured, we apply the same loan underwriting policy as we would for other unsecured loans.

For a description of our retail deposit products, see Business Consumer Banking Lending Activities Mortgage and Home Equity Lending and Business Consumer Banking Deposit-Taking Activities.

Maturities of Certificates of Deposit and Other Time Deposits

The following table presents, as of December 31, 2006, the remaining maturities of our time deposits, certificates of deposit and mutual installment deposits which had fixed maturities in excess of (Won)100 million:

As of December 31, 2006

	Certificates of Deposit	Other Time Deposits	Mutual Installment Deposits	Total
	(in billions of Won)			
Maturing within three months	(Won) 5,087	(Won) 15,175	(Won) 13	(Won) 20,275
After three but within six months	3,984	7,836	9	11,829

Average interest rate ⁽²⁾	2.56%	2.92%	4.38%
Year-end interest rate	0.20%~6.00%	0.00%~9.58%	0.00%~10.30%

- (1) Average balances are based on daily balances for all of our subsidiaries, except for Woori F&I, Woori CA Asset Management (which was renamed Woori SB Asset Management in February 2006), Woori Finance Information System, Woori Credit Information and our special purpose companies, which are based on quarterly balances.
- (2) Average interest rates for the year are calculated by dividing the total interest expense by the average amount borrowed.
- (3) Borrowings from the Bank of Korea generally mature within one month for borrowings in Won and six months for borrowings in foreign currencies.
- (4) Other short-term borrowings include borrowings from trust accounts, bills sold, borrowings in domestic and foreign currency, short-term secured borrowings and foreign currency debentures. Other short-term borrowings have maturities of 30 days to one year and are unsecured.

Table of Contents

Secured Borrowings

Asset securitization transactions that are classified as secured borrowings involve the nominal sale of our assets to a securitization vehicle that issues securities backed by those assets. Since control of the assets is not surrendered in these nominal sales, they are not treated as sale transactions for accounting purposes. Instead, the assets remain on our balance sheet with the securitization proceeds treated as secured borrowings. These secured borrowings are intended to be fully repaid through recoveries on the collateral. For some of these nominal asset sales, if delinquencies arise with respect to such assets, we will be required to compensate the securitization vehicle for any net shortfalls in its recoveries on such assets.

See Note 19 of the notes to our consolidated financial statements for a summary of our secured borrowings and relevant collateral as of December 31, 2004, 2005 and 2006.

Supervision and Regulation

Principal Regulations Applicable to Financial Holding Companies

General

The Financial Holding Company Act (Law No. 6274, October 23, 2000), last amended on May 31, 2005, regulates Korean financial holding companies and their subsidiaries. The entities that regulate and supervise Korean financial holding companies and their subsidiaries are the Financial Supervisory Commission and the Financial Supervisory Service.

The Financial Supervisory Commission exerts direct control over financial holding companies pursuant to the Financial Holding Company Act. Among other things, the Financial Supervisory Commission:

approves the establishment of financial holding companies;

issues regulations on the capital adequacy of financial holding companies and their subsidiaries; and

drafts regulations relating to the supervision of financial holding companies.

Following the instructions and directives of the Financial Supervisory Commission, the Financial Supervisory Service supervises and examines financial holding companies and their subsidiaries. In particular, the Financial Supervisory Service sets requirements relating to Korean financial holding companies' liquidity and capital adequacy ratios and establishes reporting requirements within the authority delegated under the Financial Supervisory Commission regulations. Financial holding companies must submit quarterly reports to the Financial Supervisory Service discussing business performance, financial status and other matters identified in the Enforcement Decree of the Financial Holding Company Act.

Under the Financial Holding Company Act, a financial holding company must primarily engage in controlling its subsidiaries by holding equity stakes in them equal in aggregate to at least 50% of the financial holding company's aggregate assets based on its latest balance sheet. A financial holding company may engage only in the following activities:

controlling the management of its subsidiaries;

financially supporting its direct and indirect subsidiaries;

raising capital necessary for investment in its subsidiaries or providing financial support to its direct and indirect subsidiaries;

supporting the business of its direct and indirect subsidiaries for the joint development and marketing of new products and the joint utilization of facilities or information and technology systems; and

any other businesses exempted from authorization, permission or approval under the applicable laws and regulations.

Table of Contents

The Financial Holding Company Act requires every financial holding company and its subsidiaries to obtain prior approval from, or file a prior report with, the Financial Supervisory Commission before acquiring control of another company. In addition, the Financial Supervisory Commission must grant permission to liquidate or to merge with any other company before the liquidation or merger. A financial holding company must report to the Financial Supervisory Commission when its officers or largest shareholder changes, and when it ceases to control any of its direct and indirect subsidiaries by disposing of their shares.

Capital Adequacy

The Financial Holding Company Act does not provide for a minimum paid-in capital requirement related to financial holding companies. However, all financial holding companies are required to maintain a specified level of solvency. In addition, with respect to the allocation of net profit earned in a fiscal term, a financial holding company must set aside in its legal reserve an amount equal to at least 10% of its net income after tax each time it pays dividends on its net profits earned until its legal reserve reaches at least the aggregate amount of its paid-in capital.

As of December 31, 2006, all financial holding companies were required to have, together with their subsidiaries, a minimum requisite capital ratio of 100%, as defined by the Financial Supervisory Commission. Requisite capital ratio is defined as the ratio of net total equity capital as a percentage of requisite capital.

Net total equity capital is defined as the sum of:

(1) in the case of a financial institution subsidiary (including, for example, banks, merchant banks and securities companies), other than a financial holding company's indirect subsidiary that is consolidated to a direct subsidiary of a financial holding company, that is subject to minimum capital requirements under the Financial Supervisory Commission regulations, the actual equity capital maintained by that financial institution; and

(2) in the case of a financial holding company or a financial holding company's financial institution subsidiary, other than a financial holding company's indirect subsidiary that is consolidated to a direct subsidiary of a financial holding company, that has no minimum capital requirements under the Financial Supervisory Commission regulations, the total stockholders' equity as recorded on that financial holding company's balance sheet less (x) intangible assets and (y) deferred tax assets, if any;

less the sum of:

(1) the book value of investments among a financial holding company and its direct and indirect subsidiaries, if any; and

(2) the book value of investments among direct and indirect subsidiaries, if any.

Requisite capital means the sum of:

(1) in the case of a financial institution subsidiary, other than a financial holding company's indirect subsidiary that is consolidated to a direct subsidiary of a financial holding company, that is subject to minimum capital requirements under the Financial Supervisory Commission regulations, the minimum equity capital amount necessary to meet such requirements;

(2) in the case of a financial holding company's financial institution subsidiary that has no minimum capital requirements under Financial Supervisory Commission regulations, 8% of its total assets on its balance sheet (including off-balance sheet assets, if any) (since it is required under the relevant regulation); and

(3) in the case of a financial holding company, 8% of its total assets on its balance sheet (including off-balance sheet assets, if any, but excluding the book value of investments in and financial supports to its direct and indirect subsidiaries, if any).

Table of Contents

Beginning on January 1, 2007, under the new capital adequacy requirements of the Financial Supervisory Commission applicable from such date, we, as a bank holding company, are required to maintain a minimum consolidated equity capital ratio of 8.0%. Consolidated equity capital ratio is defined as the ratio of equity capital as a percentage of risk-weighted assets on a consolidated basis, determined in accordance with Financial Supervisory Commission requirements that have been formulated based on Bank of International Settlements (BIS) standards. Equity capital, as applicable to bank holding companies, is defined as the sum of Tier I capital, Tier II capital and Tier III Capital less any deductible items, each as defined under the Regulation on the Supervision of Financial Holding Companies). Risk-weighted assets is defined as the sum of credit risk-weighted assets and market risk-weighted assets.

Liquidity

All financial holding companies are required to match the maturities of their assets and liabilities on a non-consolidated basis in accordance with the Financial Holding Company Act in order to ensure liquidity. Financial holding companies must:

maintain a Won liquidity ratio (defined as Won assets due within three months, including marketable securities, divided by Won liabilities due within three months) of not less than 100% on a non-consolidated basis;

maintain a foreign currency liquidity ratio (defined as foreign currency liquid assets due within three months divided by foreign currency liabilities due within three months) of not less than 80% on a non-consolidated basis (except that such requirement is not applicable to financial holding companies whose foreign currency liabilities amount is less than 1% of its total assets);

maintain a ratio of foreign currency liquid assets due within seven days less foreign currency liabilities due within seven days as a percentage of total foreign currency assets of not less than 0% on a non-consolidated basis;

maintain a ratio of foreign currency liquid assets due within a month less foreign currency liabilities due within a month as a percentage of total foreign currency assets of not less than negative 10% on a non-consolidated basis; and

make quarterly reports regarding their liquidity to the Financial Supervisory Service.

A financial holding company may not invest in securities (other than those securities issued by its direct and indirect subsidiaries) in excess of the amount of its shareholders' equity less the total amount of investment in subsidiaries, subject to certain exceptions.

Financial Exposure to Any Individual Customer and Major Shareholder

Subject to certain exceptions, the aggregate credit (as defined in the Financial Holding Company Act, the Bank Act, the Merchant Bank Act and the Korean Securities and Exchange Act, respectively) of a financial holding company and its direct and indirect subsidiaries that are banks, merchant banks or securities companies (which we refer to as Financial Holding Company Total Credit) to a single group of companies that belong to the same conglomerate as defined in the Monopoly Regulations and Fair Trade Act will not be permitted to exceed 25% of equity capital (as defined below).

Equity capital is defined as the sum of:

(1) in case of a financial holding company, net assets (which is total assets less total liabilities) on balance sheet as of the end of the most recent quarter;

(2) in case of a bank, the capital amount as defined in Article 2(1), Item 5 of the Bank Act;

Table of Contents

(3) in case of a merchant bank, the capital amount as defined in Article 2, Item 3 of the Merchant Bank Act; and

(4) in case of a securities company, total assets less total liabilities on that company's balance sheet as of the end of the most recent financial year and adjusted as determined by the Financial Supervisory Commission (for example, by including any increase or decrease of paid-in capital after the end of the most recent financial year);

less the sum of:

(1) the amount of shares of direct and indirect subsidiaries held by the financial holding company;

(2) the amount of shares that are cross-held by each direct and indirect subsidiary that is a bank, merchant bank or securities company; and

(3) the amount of shares of a financial holding company held by such direct and indirect subsidiaries that are banks, merchant banks or securities companies.

The Financial Holding Company Total Credit to a single individual or judicial person may not exceed 20% of the equity capital. In addition, the Financial Holding Company Total Credit to a shareholder holding (together with the persons who have a special relationship with the shareholder, as defined in the Enforcement Decree of the Financial Holding Company Act) in aggregate more than 10% of the total issued and outstanding voting shares of a financial holding company generally may not exceed the lesser of (x) 25% of the equity capital and (y) the amount of the equity capital of the financial holding company multiplied by the shareholding ratio of the shareholder (together with the persons who have a special relationship with the shareholder).

Further, the total sum of credits (as defined in the Financial Holding Company Act, the Bank Act, the Merchant Bank Act and the Korean Securities and Exchange Act, respectively) of a bank holding company controlling banks and its direct and indirect subsidiaries that are banks, merchant banks or securities companies as applicable (Bank Holding Company Total Credit) extended to a major shareholder (as defined below) (together with the persons who have a special relationship with that major shareholder) will not be permitted to exceed the lesser of (x) 25% of the equity capital and (y) the amount of the equity capital of the bank holding company multiplied by the shareholding ratio of the major shareholder, except for certain cases.

Major shareholder is defined as:

a shareholder holding (together with persons who have a special relationship with that shareholder), in excess of 10% (or in the case of a bank holding company controlling regional banks only, 15%) in the aggregate of the bank holding company's total issued voting shares; or

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

a shareholder holding (together with persons who have a special relationship with that shareholder), more than 4% in the aggregate of the total issued voting shares of the bank holding company controlling nationwide banks (excluding shares subject to the shareholding restrictions on non-financial business group companies as described below), where the shareholder is the largest shareholder or has actual control over the major business affairs of the bank holding company through, for example, appointment and dismissal of the officers pursuant to the Enforcement Decree of the Financial Holding Company Act.

In addition, the total sum of the Bank Holding Company Total Credit granted to all of a bank holding company's major shareholders must not exceed 25% of the bank holding company's equity capital. Furthermore, any bank holding company that, together with its direct and indirect subsidiaries, intends to extend credit to the bank holding company's major shareholder in an amount exceeding the lesser of (x) the amount equivalent to 0.1% of the equity capital and (y) (Won)5 billion, in any single transaction, must obtain prior unanimous board resolutions and then, immediately after providing the credit, must file a report to the Financial Supervisory Commission and publicly disclose the filing of the report.

Table of Contents

Restrictions on Transactions Among Direct and Indirect Subsidiaries and Financial Holding Company

Generally, a direct or indirect subsidiary of a financial holding company may not extend credits (excluding the amount of corporate credit card payments issued by a direct or indirect subsidiary of a financial holding company that is engaged in the banking business) to that financial holding company. In addition, a direct or indirect subsidiary of a financial holding company that is engaged in the banking, merchant banking or securities business may not extend credits (excluding the amount of corporate credit card payments issued by a direct or indirect subsidiary of a financial holding company that is engaged in the banking business) to other direct or indirect subsidiaries of the financial holding company in excess of 10% of its capital amount on an individual basis or to those subsidiaries in excess of 20% of its capital amount on an aggregate basis. The subsidiary extending the credit must also obtain adequate collateral from the other subsidiaries unless the credit is otherwise approved by the Financial Supervisory Commission.

Subject to certain exceptions, a direct or indirect subsidiary of a financial holding company is prohibited from owning the shares of any other direct or indirect subsidiaries (other than those directly controlled by that direct or indirect subsidiary) under the common control of the financial holding company. Subject to certain exceptions, a direct or indirect subsidiary of a financial holding company is also prohibited from owning the shares of the financial holding company controlling that direct or indirect subsidiary. The transfer of certain loans or credits classified as precautionary or below between a financial holding company and its direct or indirect subsidiary or between the direct and indirect subsidiaries of a financial holding company is prohibited except for:

- (1) transfers to a special purpose company, or entrustment with a trust company, for an asset-backed securitization transaction;
- (2) transfers to a mortgage-backed securities issuance company for a mortgage securitization transaction;
- (3) transfers or in-kind contributions to a corporate restructuring vehicle under the Corporate Restructuring Promotion Act; and
- (4) transfers to a corporate restructuring company under the Industry Promotion Act.

Disclosure of Management Performance

For the purpose of protecting the depositors and investors in the subsidiaries of financial holding companies, the Financial Supervisory Commission requires financial holding companies to disclose certain material matters including:

- (1) financial condition and profit and loss of the financial holding company and its direct and indirect subsidiaries;
- (2) capital raising by the financial holding company and its direct and indirect subsidiaries and the appropriation of such capital;

(3) any sanctions levied on the financial holding company and its direct and indirect subsidiaries under the Financial Holding Company Act or any corrective measures or sanctions under the Law on Improvement of Structure of Financial Industry; and

(4) occurrence of any non-performing assets or financial incident that may have a material adverse effect.

Restrictions on Shareholdings in Other Companies

Generally, a financial holding company may not own (a) more than 5% of the total issued and outstanding shares of another finance-related company or (b) any shares of a non-finance-related company, other than its direct or indirect subsidiaries. However, a bank holding company is allowed to own the shares of a non-finance-

Table of Contents

related company subject to a 5% limit. Nevertheless, if a bank holding company owns the shares of a non-finance-related company, the bank holding company must exercise its voting rights in the same manner and in the same proportion as such company's other shareholders exercise their voting rights. By comparison, a financial holding company may exercise its voting rights with respect to the shares of a finance-related company at its discretion.

Generally, a financial holding company may not own outstanding shares of all subsidiaries in the aggregate with an acquisition price in excess of its net assets (i.e., total assets less total liabilities). Exceptions include where the financial holding company:

(1) invests up to 130% of its net assets in a subsidiary to improve the financial condition of a subsidiary classified as an unsound financial institution under the Law on the Improvement of Structure of Financial Industry or as an unsound or potentially unsound financial institution under the Depositor Protection Act;

(2) invests up to 130% of its net assets to make an indirect subsidiary or a company controlled by a subsidiary into a direct subsidiary of the financial holding company;

(3) already holds the outstanding shares of a subsidiary, where that holding constituted not more than 130% of its net assets at the time when it became a financial holding company;

(4) invests up to 130% of its net assets in a subsidiary in order to make it a wholly-owned subsidiary, or in a special purpose company under the Asset Backed Securitization Act to make it a subsidiary;

(5) has net assets that increase such that, as the amount of investments in subsidiaries increases, the ratio of the total amount of investments in subsidiaries to the financial holding company's net assets does not increase; or

(6) has total investments in its subsidiaries that exceed its net assets due to (a) reduction of the financial holding company's net assets, (b) spin-off, merger or transfer of the entire business of the financial holding company, (c) spin-off, merger or transfer of the entire business of direct or indirect subsidiaries, or (d) foreclosure of collateral or receipts under accord and satisfaction. (This means receipts of subsidiary shares in lieu of its claim to subsidiary.)

The financial holding company, however, must reduce the ownership of excessive shares within two years in case of (1) through (5) and within six months in case of (6), unless this deadline is otherwise extended by the Financial Supervisory Commission.

Restrictions on Shareholdings by Direct and Indirect Subsidiaries

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

A direct subsidiary of a financial holding company may not control any other company other than, as an indirect subsidiary of the financial holding company:

subsidiaries in foreign jurisdictions which are engaged in the same business as the direct subsidiary;

certain financial institutions which are engaged in any business that the direct subsidiary may conduct without any licenses or permits;

certain financial institutions whose business is related to the business of the direct subsidiary as described by the Enforcement Decree of the Financial Holding Company Act (for example, a bank subsidiary may control only credit information companies, credit card companies, trust companies, investment trust management companies, investment advisory companies, futures business companies, and asset management companies);

certain financial institutions whose business is related to the financial business as prescribed by the regulations of the Ministry of Finance and Economy; and

certain companies which are not financial institutions but whose business is related to the financial business of the financial holding company as prescribed by the Enforcement Decree of the Financial

Table of Contents

Holding Company Act (for example, a finance-related research company or a finance-related information technology company).

Acquisition of such indirect subsidiaries by direct subsidiaries of a financial holding company requires prior permission from the Financial Supervisory Commission or the submission of a report to the Financial Supervisory Commission, depending on the types of the indirect subsidiaries and the amount of total assets of the indirect subsidiaries.

An indirect subsidiary of a financial holding company may not control any other company.

Restrictions on Transactions between a Bank Holding Company and its Major Shareholder

A bank holding company and its direct and indirect subsidiaries may not acquire (including through their respective trust accounts) shares issued by the bank holding company's major shareholder in excess of 1% of the equity capital (as defined above). In addition, if those entities intend to acquire shares issued by that major shareholder in any single transaction in excess of the lesser of (x) the amount equivalent to 0.1% of the equity capital and (y) (Won)5 billion, that entity must obtain prior unanimous board resolutions and then, immediately after the acquisition, file a report to the Financial Supervisory Commission and publicly disclose the filing of the report.

Restriction on Ownership of a Financial Holding Company

Under the Financial Holding Company Act, a financial institution generally may not control a financial holding company. In addition, any single shareholder and persons who have a special relationship with that shareholder may acquire beneficial ownership of no more than 10% of the total issued and outstanding shares with voting rights of a bank holding company that controls nationwide banks or 15% of the total issued and outstanding shares with voting rights of a bank holding company that controls only regional banks. The Korean government and the KDIC are not subject to this limit. Non-financial business group companies (as defined below), however, may not acquire the beneficial ownership of shares of a bank holding company controlling nationwide banks in excess of 4% of that bank holding company's outstanding voting shares unless they obtain the approval of the Financial Supervisory Commission and agree not to exercise voting rights in respect of shares in excess of the 4% limit, in which case they may acquire beneficial ownership of up to 10%. Any other person (whether a Korean national or a foreign investor) may acquire no more than 10% of total voting shares issued and outstanding of a bank holding company controlling nationwide banks unless they obtain approval from the Financial Supervisory Commission in each instance where the total holding will exceed 10% (or 15% in the case of a bank holding company controlling only regional banks), 25% or 33% of the total voting shares issued and outstanding of that bank holding company controlling nationwide banks.

Non-financial business group companies as defined under the Financial Holding Company Act include:

(1) any same shareholder group where the aggregate net assets of all non-financial business companies belonging to that group equals or exceeds 25% of the aggregate net assets of all members of that group;

(2) any same shareholder group where the aggregate assets of all non-financial business companies belonging to that group equals or exceeds (Won)2 trillion; or

(3) any mutual fund where a same shareholder group identified in (1) or (2) above owns more than 4% of the total issued and outstanding shares of that mutual fund.

Sharing of Customer Information among Financial Holding Company and its Subsidiaries

Under the Act on Use and Protection of Credit Information, any individual customer's credit information must be disclosed or otherwise used by financial institutions only to determine, establish or maintain existing

Table of Contents

commercial transactions with them and only after obtaining written consent to use that information. Under the Financial Holding Company Act, a financial holding company and its direct and indirect subsidiaries, however, may share certain credit information of individual customers among themselves for business purposes without the customers' written consent. In addition, a subsidiary securities company of a financial holding company may provide that financial holding company and its other direct and indirect subsidiaries information relating to the aggregate of cash or securities that a customer of the securities company has deposited for business purposes at the written request of that customer.

Principal Regulations Applicable to Banks

Capital Adequacy and Allowances

The Bank Act requires nationwide banks, such as Woori Bank, to maintain a minimum paid-in capital of (Won)100 billion and regional banks, such as Kyongnam Bank and Kwangju Bank, to maintain a minimum paid-in capital of (Won)25 billion. All banks, including foreign bank branches in Korea, are also required to maintain a prescribed solvency position. A bank must also set aside in its legal reserve an amount equal to at least 10% of the net income after tax each time it pays dividends on net profits earned until its legal reserve reaches at least the aggregate amount of its paid-in capital.

Under the Bank Act, the capital of a bank is divided into two categories, Tier I and Tier II capital. Tier I capital (core capital) consists of shareholders' equity, capital surplus, retained earnings, unissued stock dividends and hybrid Tier I capital instruments. Tier II capital (supplementary capital) consists of revaluation reserves, gains on valuation of investment securities (up to certain limits), allowance for loan losses set aside for loans classified as normal or precautionary (up to certain limits), perpetual subordinated debt, cumulative preferred shares (with redemption rights after the fifth anniversary of their date of issuance) and certain other subordinated debt.

All banks must meet minimum ratios of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets, determined in accordance with Financial Supervisory Commission requirements that have been formulated based on BIS standards. These standards were adopted and became effective in 1996. All domestic banks and foreign bank branches must meet a minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8%.

In November 2002, the Financial Supervisory Service amended the Enforcement Detailed Rules on the Supervision of the Banking Business to include a more conservative risk-weighting system for certain newly extended home mortgage loans. As a result, for certain home mortgage loans extended after November 13, 2002, Korean banks must apply a risk-weight ratio of 60% if either of the following two conditions are satisfied, and a risk-weight ratio of 70% if both conditions are satisfied:

(1) if the home mortgage loans are overdue for at least 30 consecutive days as of the date of calculating the bank's BIS capital adequacy ratio, or there were at least 30 overdue days during the one year period preceding the date on which the bank's BIS capital adequacy ratio is calculated; and

(2) the borrower's debt ratio (which is the ratio of the borrower's total outstanding borrowings, including borrowings from other financial institutions, to the borrower's annual income) exceeds 250%.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

For all other home mortgage loans, the bank must apply a 50% risk-weight ratio.

Under the Regulation on the Supervision of the Banking Business, banks must generally maintain allowances for credit losses in respect of their outstanding loans and other credits (including credit-related commitments and trust account loans) in an aggregate amount covering not less than:

0.7% of normal credits (or 1.0% in the case of normal credits comprising loans to individuals and households, and 1.5% in the case of normal credits comprising outstanding credit card receivables and card loans);

Table of Contents

7% of precautionary credits (or 10% in the case of precautionary credits comprising loans to individuals and households, and 15% in the case of precautionary credits comprising outstanding credit card receivables and card loans);

20% of substandard credits;

50% of doubtful credits (or 55% in the case of doubtful credits comprising loans to individuals and households, and 60% in the case of doubtful credits comprising outstanding credit card receivables and card loans); and

100% of estimated loss credits.

Furthermore, under a 2006 amendment to the Regulation on the Supervision of the Banking Business, banks must maintain allowances for credit losses in respect of their confirmed guarantees (including confirmed acceptances) and outstanding non-used credit lines as of the settlement date in an aggregate amount calculated at the same rates applicable to normal, precautionary, substandard and doubtful credits comprising their outstanding loans and other credits as set forth above.

See Recent Regulations Relating to Retail Household Loans and Credit Card Business.

Liquidity

All banks are required to ensure adequate liquidity by matching the maturities of their assets and liabilities in accordance with the Bank Act. Banks may not invest an amount exceeding 60% of their Tier I and Tier II capital (less any capital deductions) in stocks and other securities with a maturity of over three years. This stipulation does not apply to Korean government bonds or to Monetary Stabilization Bonds issued by the Bank of Korea. The Financial Supervisory Commission also requires each Korean bank to:

maintain a Won liquidity ratio (defined as Won assets due within three months, including marketable securities, divided by Won liabilities due within three months) of not less than 100% and to make quarterly reports to the Financial Supervisory Service;

maintain a foreign currency liquidity ratio (defined as foreign currency liquid assets due within three months divided by foreign currency liabilities due within three months) of not less than 85%;

maintain a ratio of foreign currency liquid assets due within seven days less foreign currency liabilities due within seven days, divided by total foreign currency assets, of not less than 0%;

maintain a ratio of foreign currency liquid assets due within a month less foreign currency liabilities due within a month, divided by total foreign currency assets, of not less than negative 10%; and

submit monthly reports with respect to the maintenance of these ratios.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

The Monetary Policy Committee of the Bank of Korea is empowered to fix and alter minimum reserve requirements that banks must maintain against their deposit liabilities. The current minimum reserve ratio is:

7% of average balances for Won currency demand deposits outstanding;

0% of average balances for Won currency employee asset establishment savings deposits, employee long-term savings deposits, employee house purchase savings deposits, long-term house purchase savings deposits, household long-term savings deposits and employee preferential savings deposits outstanding; and

2% of average balances for Won currency time and savings deposits, mutual installments, housing installments and certificates of deposit outstanding.

For foreign currency deposit liabilities, a 2% minimum reserve ratio is applied to savings deposits outstanding and a 7% minimum reserve ratio is applied to demand deposits. A 1% minimum reserve ratio applies to offshore accounts, immigrant accounts and resident accounts opened by foreign exchange banks.

Table of Contents*Financial Exposure to Any Individual Customer and Major Shareholder*

Under the Bank Act, the sum of large exposures by a bank – in other words, the total sum of its credits to single individuals, juridical persons or business groups that exceed 10% of the sum of Tier I and Tier II capital (less any capital deductions) – generally must not exceed five times the sum of Tier I and Tier II capital (less any capital deductions). In addition, banks generally may not extend credit (including loans, guarantees, purchases of securities (only in the nature of a credit) and any other transactions that directly or indirectly create credit risk) in excess of 20% of the sum of Tier I and Tier II capital (less any capital deductions) to a single individual or juridical person, or grant credit in excess of 25% of the sum of Tier I and Tier II capital (less any capital deductions) to a single group of companies as defined in the Monopoly Regulations and Fair Trade Act.

The Bank Act also provides for certain restrictions on extending credits to a major shareholder. A – major shareholder – is defined as:

a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 10% (or 15% in the case of regional banks) in the aggregate of the bank – s total issued voting shares; or

a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 4% in the aggregate of the bank – s (excluding regional banks) total issued voting shares (excluding shares subject to the shareholding restrictions on – non-financial business group companies – as described below), where the shareholder is the largest shareholder or has actual control over the major business affairs of the bank through, for example, appointment and dismissal of the officers pursuant to the Enforcement Decree of the Bank Act. Non-financial business group companies primarily consist of: (i) any single shareholding group whose non-financial company assets comprise no less than 25% of its aggregate net assets; (ii) any single shareholding group whose non-financial company assets comprise no less than (Won)2 trillion in aggregate; or (iii) any mutual fund of which any single shareholding group identified in (i) or (ii) above, owns more than 4% of the total issued and outstanding shares.

Under these restrictions, banks may not extend credits to a major shareholder (together with persons who have a special relationship with that shareholder) in an amount greater than the lesser of (x) 25% of the sum of the bank – s Tier I and Tier II capital (less any capital deductions) and (y) the relevant major shareholder – s shareholding ratio multiplied by the sum of the bank – s Tier I and Tier II capital (less any capital deductions). In addition, the total sum of credits granted to all major shareholders must not exceed 25% of the bank – s Tier I and Tier II capital (less any capital deductions). However, the foregoing restrictions do not apply to the Korea Deposit Insurance Corporation, in the event that the Korea Deposit Insurance Corporation becomes a major shareholder in the process of restructuring of banks.

Interest Rates

Korean banks generally depend on deposits as their primary funding source. There are no legal controls on interest rates on loans in Korea. Historically, interest rates on deposits and lending rates were regulated by the Monetary Policy Committee of the Bank of Korea. Controls on deposit interest rates in Korea have been gradually reduced and, in February 2004, the Korean government removed restrictions on all interest rates, except for the prohibition on interest payments on current account deposits. This deregulation process has increased competition for deposits based on interest rates offered and, therefore, may increase a bank – s interest expense.

Table of Contents

Lending to Small- and Medium-Sized Enterprises

In order to obtain funding from the Bank of Korea at concessionary rates for their small- and medium-sized enterprise loans, banks are required to allocate a certain minimum percentage of any monthly increase in their Won currency lending to small- and medium-sized enterprises. Currently, this minimum percentage is 45% in the case of nationwide banks and 60% in the case of regional banks. If a bank does not comply with this requirement, the Bank of Korea may:

require the bank to prepay all or a portion of funds provided to that bank in support of loans to small- and medium-sized enterprises;
or

lower the bank's credit limit.

Disclosure of Management Performance

In order to assist the general public, especially depositors and shareholders, in monitoring bank management performance, the Financial Supervisory Commission requires commercial banks to make mandatory public disclosures of the following:

loans bearing no profit made to a single business group in an amount exceeding 10% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) as of the end of the previous month (where the loan exposure to that borrower is calculated as the sum of substandard credits, doubtful credits and estimated loss credits), unless the loan exposure to that group is not more than (Won)4 billion;

the occurrence of any financial incident involving embezzlement, malfeasance or misappropriation of funds in an amount exceeding 1% of the sum of the bank's Tier I and Tier II capital (less any capital deductions), unless the bank has lost or expects to lose not more than (Won)1 billion as a result of that financial incident, or the governor of the Financial Supervisory Service has made a public announcement regarding the incident; and

any loss due to court judgments or similar decisions in civil proceedings in an amount exceeding 1% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) as of the end of the previous month, unless the loss is not more than (Won)1 billion.

Restrictions on Lending

Pursuant to the Bank Act, commercial banks may not provide:

loans for the purpose of speculation in commodities or securities;

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

loans directly or indirectly secured by a pledge of a bank's own shares, or secured by a pledge of shares in excess of 20% of the issued and outstanding shares of any other corporation (subject to certain exceptions with respect to financing for infrastructure projects);

loans directly or indirectly to enable a natural or juridical person to buy the bank's own shares;

loans directly or indirectly to finance political campaigns or related activities;

loans to any of the bank's officers or employees, other than petty loans of up to (Won)20 million in the case of a general loan, (Won)50 million in the case of a general loan plus a housing loan or (Won)60 million in the aggregate for general loans, housing loans and loans to pay damages arising from wrongful acts of employees in financial transactions;

credit (including loans) secured by a pledge of shares of a subsidiary corporation of the bank or to enable a natural or juridical person to buy shares of a subsidiary corporation of the bank; or

loans to any officers or employees of a subsidiary corporation of the bank, other than general loans of up to (Won)20 million or general and housing loans of up to (Won)50 million in the aggregate.

Table of Contents*Recent Regulations Relating to Retail Household Loans*

The Financial Supervisory Commission recently implemented a number of changes to the mechanisms by which a bank evaluates and report its retail household loan balances and has proposed implementing further changes. As a result of the rapid increase in retail household loans and related credit risks, the Financial Supervisory Commission and the Financial Supervisory Service increased the minimum provisioning requirements for retail household loans. These requirements, set forth in the following table, became effective on December 31, 2006:

Asset Quality Classification	Provisioning Ratio on Retail Household Loans	
	Before	Current
Normal	0.75% or above	1.0% or above
Precautionary	8.0% or above	10.0% or above
Substandard	20.0% or above	20.0% or above
Doubtful	55.0% or above	55.0% or above
Estimated loss	100.0%	100.0%

In addition, due to a rapid increase in the number of loans secured by homes and other forms of housing, the Financial Supervisory Commission and the Financial Supervisory Service have implemented regulations designed to curtail extension of new or refinanced loans secured by housing, including the following:

as to loans secured by collateral of housing located nationwide, the loan-to-value ratio (the aggregate principal amount of loans secured by such collateral over the appraised value of the collateral) should not exceed 60%;

as to loans secured by collateral of housing located in areas of excessive investment as designated by the Korean government, (i) the loan-to-value ratio for loans with a maturity of not more than three years should not exceed 50% and (ii) the loan-to-value ratio for loans with a maturity of more than three years should not exceed 60%;

as to loans secured by apartments located in areas of high speculation as designated by the Korean government,

(i) the loan-to-value ratio for loans with a maturity of not more than ten years should not exceed 40%; and

(ii) the loan-to-value ratio for loans with a maturity of more than ten years should not exceed (a) 40%, if the price of such apartment is over (Won)600 million, and (b) 60%, if the price of such apartment is (Won)600 million or lower;

as to loans secured by apartments with appraisal value of more than (Won)600 million in areas of high speculation as designated by the Korean government or certain metropolitan areas designated as areas of excessive investment by the Korean government, the borrower's debt-to-income ratio (calculated as (i) the aggregate annual total payment amount of (x) the principal of and interest on loans secured by such apartment(s) and (y) the interest on other debts of the borrower over (ii) the borrower's annual income) should not exceed 40%;

as to apartments located in areas of high speculation as designated by the Korean government, a borrower is permitted to have only one new loan secured by such apartment;

where a borrower has two or more loans secured by apartments located in areas of high speculation as designated by the Korean government, the loan with the earliest maturity date must be repaid first and the number of loans must be eventually reduced to one; and

in the case of a borrower (i) whose spouse already has a loan secured by housing or (ii) who is single and under 30 years old, the debt-to-income ratio of the borrower in respect of loans secured by apartment(s) located in areas of high speculation as designated by the Korean government should not exceed 40%.

Table of Contents

See Item 3D. Risk Factors Risks relating to our consumer credit portfolio Government regulation of consumer lending, particularly mortgage and home equity lending, has recently become more stringent, which may hurt our consumer banking operations.

Restrictions on Investments in Property

A bank may possess real estate property only to the extent necessary for the conduct of its business, unless the aggregate value of that property does not exceed 60% of the sum of the bank's Tier I and Tier II capital (less any capital deductions). Any property that a bank acquires by exercising its rights as a secured party, or which a bank is prohibited from acquiring under the Bank Act, must be disposed of within one year.

Restrictions on Shareholdings in Other Companies

Under the Bank Act, a bank may not own more than 15% of shares outstanding with voting rights of another corporation, except where, among other reasons:

that corporation engages in a category of financial businesses set forth by the Financial Supervisory Commission; or

the acquisition is necessary for the corporate restructuring of the corporation and is approved by the Financial Supervisory Commission.

In the above exceptional cases, a bank must satisfy either of the following requirements:

the total investment in corporations in which the bank owns more than 15% of the outstanding shares with voting rights does not exceed 15% of the sum of Tier I and Tier II capital (less any capital deductions); or

the acquisition satisfies the requirements determined by the Financial Supervisory Commission.

The Bank Act provides that a bank using its bank accounts and its trust accounts may not acquire the shares of another corporation that is a major shareholder of the bank in excess of an amount equal to 1% of the sum of Tier I and Tier II capital (less any capital deductions).

Restrictions on Bank Ownership

Under the Bank Act, a single shareholder and persons who have a special relationship with that shareholder generally may acquire beneficial ownership of no more than 10% of a nationwide bank's total issued and outstanding shares with voting rights and no more than 15% of a regional bank's total issued and outstanding shares with voting rights. The Korean government, the KDIC and bank holding companies qualifying under the Financial Holding Company Act are not subject to this limit. However, non-financial business group companies may not acquire beneficial

ownership of shares of a nationwide bank in excess of 4% of that bank's outstanding voting shares, unless they obtain the approval of the Financial Supervisory Commission and agree not to exercise voting rights in respect of shares in excess of the 4% limit, in which case they may acquire beneficial ownership of up to 10% of a nationwide bank's outstanding voting shares. In addition, if a foreign investor, as defined in the Foreign Investment Promotion Act, owns in excess of 4% of a nationwide bank's outstanding voting shares, non-financial business group companies may acquire beneficial ownership of up to 10% of that bank's outstanding voting shares, and in excess of 10%, 25% or 33% of that bank's outstanding voting shares with the approval of the Financial Supervisory Commission in each instance, up to the number of shares owned by the foreign investor. Any other person (whether a Korean national or a foreign investor), with the exception of non-financial business group companies described above, may acquire no more than 10% of a nationwide bank's total voting shares issued and outstanding, unless they obtain approval from the Financial Supervisory Commission in each instance where the total holding will exceed 10% (or 15% in the case of regional banks), 25% or 33% of the bank's total voting shares issued and outstanding provided that, in addition to the foregoing

Table of Contents

threshold shareholding ratios, the Financial Supervisory Commission may, at its discretion, designate a separate and additional threshold shareholding ratio.

Deposit Insurance System

The Depositor Protection Act provides insurance for certain deposits of banks in Korea through a deposit insurance system. Under the Depositor Protection Act, all banks governed by the Bank Act are required to pay an insurance premium to the KDIC on a quarterly basis. The rate is determined under the Enforcement Decree to the Depositor Protection Act, and may not exceed 0.5% of the bank's insurable deposits in any given year. The current insurance premium is 0.025% of insurable deposits for each quarter. If the KDIC makes a payment on an insured amount, it will acquire the depositors' claims with respect to that payment amount. The KDIC insures a maximum of (Won)50 million for deposits and interest, regardless of when the deposits were made and the size of the deposits. This limit does not apply to interest-free settlement accounts (for example, a checking account) during the period from January 1, 2001 to December 31, 2003 and therefore the whole amount deposited in such accounts is protected.

Restrictions on Foreign Exchange Position

Under the Korean Foreign Exchange Transaction Law, each of a bank's net overpurchased and oversold positions may not exceed 50% of its shareholders' equity as of the end of the prior month.

Laws and Regulations Governing Other Business Activities

A bank must register with the Ministry of Finance and Economy to enter the foreign exchange business, which is governed by the Foreign Exchange Transaction Law. A bank must obtain the permission of the Financial Supervisory Commission to enter the securities business, which is governed by regulations under the Korean Securities and Exchange Act. Under these laws, a bank may engage in the foreign exchange business, securities repurchase business, governmental/public bond underwriting business and governmental bond dealing business.

Trust Business

A bank must obtain approval from the Financial Supervisory Commission to engage in trust businesses. The Trust Act and the Trust Business Act govern the trust activities of banks, and they are subject to various legal and accounting procedures and requirements, including the following:

under the Bank Act, assets accepted in trust by a bank in Korea must be segregated from other assets in the accounts of that bank, which requires that banks engaged in both banking and trust businesses must maintain two separate accounts and two separate sets of records; and

depositors and other general creditors cannot obtain the assets comprising the trust accounts if the bank is liquidated or wound-up.

The bank must make a special reserve of 25% or more of fees and commissions from each unspecified money trust account for which a bank guarantees the principal amount and a minimum yield until the total reserve for that account equals 5% of the trust amount. Since January 1999, the Korean government has prohibited Korean banks from offering new guaranteed fixed rate trust account products whose principal and interest are guaranteed. In addition, a bank engaging in trust business must deposit with a court an amount equal to 0.02% of its paid-in capital each fiscal year until the aggregate amount of those deposits equals 2.5% or more of its paid-in capital. If that bank breaches its duty of care as a trustee and causes losses to its customers, the court deposits are available as compensation.

The Indirect Investment Asset Management Business Act, which applies to unspecified money trust account products under the Trust Business Act, securities investment trusts under the Securities Investment Trust

Table of Contents

Business Act, securities investment companies under the Securities Investment Company Act and variable insurance products under the Insurance Business Act, took effect on January 5, 2004. Under the Indirect Investment Asset Management Business Act, a bank will not be permitted to offer current unspecified money trust account products after July 5, 2004 (except under certain limited circumstances) and will be required to qualify as an asset management company by such date in order to be able to manage any investment trust products. Investment trust products will need to be established pursuant to a trust deed entered into between an asset management company and a trustee.

In the event that a bank qualifies and operates as an asset management company, a trustee or a custodian under the Indirect Investment Asset Management Business Act, it is required to establish relevant operation and management systems to prevent potential conflicts of interest among the banking business, the asset management business and the trustee or custodian business. These measures include:

prohibitions against officers, directors and employees of one particular business operation from serving as an officer, director and employee in another business operation;

prohibitions against the joint use or sharing of computer equipment or office equipment; and

prohibitions against the sharing of information by and among officers, directors and employees engaged in the different business operations.

In addition, a bank is also required to establish an Indirect Investment Asset Management Committee consisting of three directors, two of whom must be non-standing directors of such bank.

Credit Card Business

General

In order to enter the credit card business, a bank must register with the Financial Supervisory Commission. Credit card businesses are governed by the Specialized Credit Financial Business Act, enacted on August 28, 1997 and last amended on April 11, 2007. A registered bank engaging in the credit card business is regulated by the Financial Supervisory Commission and the Financial Supervisory Service.

Disclosure and Reports

Pursuant to the Specialized Credit Financial Business Act, a registered bank engaging in the credit card business must submit its business reports and reports with respect to its results of operations to the Governor of the Financial Supervisory Service within one month from the end of each quarter.

Risk of Loss Due to Lost, Stolen, Forged or Altered Credit Cards

Under the Specialized Credit Financial Business Act, a registered bank engaging in the credit card business is liable for any losses arising from the unauthorized use of credit cards or debit cards after it has received notice from the cardholder of the loss or theft of the card, and is also liable for any unauthorized use during the period beginning 60 days before the registered bank engaging in the credit card business receives notice of the loss or theft from the cardholder.

However, if the registered bank engaging in the credit card business has entered into agreements which allow it to transfer all or part of its burden of liability for loss or theft of credit cards to holders of the credit cards, then the registered bank engaging in the credit card business may transfer the liability to those holders of the credit cards in accordance with the terms and conditions of the agreements. Even in such case, the risk of liability cannot be transferred to the holders of the credit cards if there was no willful misconduct or negligence attributable to the holders of the credit cards, such as in the case where the cardholder's password was disclosed under irresistible force or threat to the cardholder's or his/her relatives' life or health.

Table of Contents

A registered bank engaging in the credit card business is also liable for any loss arising from the use of forged or altered credit cards, debit cards or pre-paid cards. However, if the registered bank engaging in the credit card business has entered into an agreement allowing it to transfer all or part of its burden of liability for loss or theft of the credit card, debit card, or pre-paid card to the holder of the credit card, debit card, or pre-paid card, and it has proved willful misconduct or gross negligence of the holder of the credit card, debit card, or pre-paid card, then the registered bank engaging in the credit card business may transfer the liability to the such holder of the credit card, debit card, or pre-paid card in accordance with the terms and conditions of the agreement. For these purposes, willful misconduct or gross negligence means either disclosure of the cardholder's password, or the transfer of the credit card or debit card, or providing such credit card or debit card as security, all through willful misconduct or gross negligence.

Any agreement between a registered bank engaging in the credit card business and a cardholder allowing the transfer of burden of liability for the loss, theft, forgery or alteration of credit cards, debit cards, or pre-paid cards, as applicable, will be effective only if it is in writing, and an act of gross negligence by the cardholder will be acknowledged as such only if it is expressly provided as falling under such act in the agreement.

Each registered bank engaging in the credit card business must institute appropriate measures to fulfill these obligations, such as establishing provisions, purchasing insurance or joining a cooperative association.

Pursuant to the Specialized Credit Financial Business Act, the Financial Supervisory Commission may either restrict the limit or take other necessary measures against the registered bank engaging in the credit card business with respect to the following:

maximum limits for cash advances on credit cards;

use restrictions on debit cards with respect to per day or per transaction usage; or

aggregate issuance limits and maximum limits on the amount per card on pre-paid cards.

Lending Ratio in Ancillary Business

Pursuant to the Enforcement Decree to the Specialized Credit Financial Business Act issued in December 2003, a registered bank engaging in the credit card business must maintain an aggregate quarterly average outstanding lending balance to credit card holders (including cash advances and credit card loans, but excluding restructured loans and revolving cash advances) no greater the sum of (i) its aggregate quarterly average outstanding credit card balance arising from the purchase of goods and services and (ii) the aggregate quarterly debit card transaction volume; provided that, in the case that any bank engaged in the credit card business was unable to meet this lending ratio as of December 31, 2003, such bank would have been granted an extended compliance period until December 31, 2007 during which to achieve such lending ratio. Any bank availing itself of such extended compliance period was also required to submit to the Financial Supervisory Commission, no later than January 31, 2004, a detailed plan setting forth how such bank intended to achieve compliance by December 31, 2007.

Issuance of New Cards and Solicitation of New Card Holders

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

The Enforcement Decree to the Specialized Credit Financial Business Act establishes the conditions under which a registered bank engaging in the credit card business may issue new cards and solicit new members. New credit cards may be issued only to the following persons:

persons who are at least 18 years old when they apply for a credit card;

persons whose capability to pay bills as they come due has been verified using standards established by the registered bank engaging in the credit card business; and

in the case of minors who are at least 18 years and younger than 20 years, persons who submit a guardian's consent along with documents evidencing income, such as an employment certificate or a tax certificate.

Table of Contents

In addition, a registered bank engaging in the credit card business may not solicit credit card members by:

providing economic benefits or promising to provide economic benefits in excess of 10% of the annual credit card fee (in the case of no-annual fee credit cards, the average annual fees will be deemed to be (Won)10,000) in connection with issuing a credit card;

soliciting applicants on roads, public places or along corridors used by the general public;

soliciting applicants through visits, except those visits made upon prior consent and visits to a business area;

soliciting applicants through the Internet without verifying whether the applicant is who he or she purports to be, by means of a certified digital signature under the Digital Signature Act; and

soliciting applicants through pyramid sales methods.

Compliance Rules on Collection of Receivable Claims

Pursuant to Supervisory Regulation on the Specialized Credit Financial Business, a registered bank engaging in the credit card business may not:

exert violence or threaten violence;

inform a related party (a guarantor of the debtor, blood relative or fiancée of the debtor, a person living in the same household as the debtor or a person working in the same workplace as the debtor) of the debtor's obligations without just cause;

provide false information relating to the debtor's obligation to the debtor or his or her related parties;

threaten to sue or sue the debtor for fraud despite lack of affirmative evidence to establish that the debtor has submitted forged or false documentation with respect to his/her capacity to make payment;

visit or telephone the debtor during late evening hours (between the hours of 9:00 p.m. and 8:00 a.m.); and

utilize other uncustomary methods to collect the receivables that interfere with the privacy or the peace in the workplace of the debtor or his or her related parties.

Regulations on the Class Actions Regarding Securities

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

The Law on Class Actions Regarding Securities was enacted as of January 20, 2004 and an amendment to such law was enacted as of March 13, 2005. The Law on Class Actions Regarding Securities governs class actions suits instituted by one or more representative plaintiff(s) on behalf of 50 or more persons who claim to have been damaged in a capital markets transaction involving securities issued by a listed company in Korea.

Applicable causes of action with respect to such suits include:

claims for damages caused by misleading information contained in a securities statement;

claims for damages caused by the filing of a misleading business report, semi-annual report, or quarterly report;

claims for damages caused by insider trading or market manipulation; and

claims instituted against auditors for damages caused by accounting irregularities.

Any such class action may be instituted upon approval from the presiding court and the outcome of such class action will have a binding effect on all potential plaintiffs who have not joined the action, with the exception of those who have filed an opt out notice with such court.

Table of Contents

The Law on Class Actions Regarding Securities came into effect on January 1, 2005 with respect to companies with a total asset value equal to or greater than (Won)2 trillion and came into effect on January 1, 2007 with respect to companies with a total asset value of less than (Won)2 trillion, and applies retroactively to all applicable claims arising out of acts committed since its enactment.

An amendment of the new law delayed its effectiveness until December 31, 2006, with respect to claims against companies and their auditors in cases where such companies took steps to correct any accounting irregularities.

Principal Regulations Applicable to Securities Companies

General

The Korean Securities and Exchange Act regulates and governs the securities business. The entities that regulate and supervise securities companies are the Financial Supervisory Commission, the Financial Supervisory Service and the Securities and Futures Commission.

Under the Korean Securities and Exchange Act, a company must obtain permission from the Financial Supervisory Commission to commence a primary securities business such as a brokerage business, a dealing business or an underwriting business. A securities company may also engage in certain businesses ancillary to that business without obtaining any separate license and certain other businesses if it obtains separate licenses from the Financial Supervisory Commission. A securities company must also obtain permission from the Financial Supervisory Commission to merge with any other entity or transfer all or a part of its business.

If the Financial Supervisory Commission deems a securities company's financial condition to be unsound or if a securities company fails to meet the applicable net operating equity ratio (as defined below), the Financial Supervisory Commission may order the securities company to:

increase or reduce its capital;

cancel or consolidate its stock;

transfer all or part of its business;

close branch offices;

merge with another financial institution;

suspend a part or all of its business operations; or

assign contractual rights and obligations relating to its financial transactions.

Regulations on Financial Soundness

The Financial Supervisory Commission regulations require that the financial soundness of a securities company be assessed in accordance with its net operating equity ratio, which is calculated as follows and expressed as a percentage:

$$\text{Net operating equity ratio} = (\text{net operating equity} / \text{total risk}) \times 100$$

The terms net operating equity and total risk for the purpose of the above formula are defined in the Financial Supervisory Commission's regulations. Generally, the net operating equity and the total risk are calculated according to the following formulas:

$$\text{Net operating equity} = \text{net assets} (\text{total assets} - \text{total liabilities}) - \text{total deductible items} + \text{total creditable items}$$

$$\text{Total risk} = \text{market risk} + \text{counterparty risk} + \text{basic risk} + \text{credit concentration risk} - \text{risk offsetting factor}$$

Table of Contents

The regulations require that securities companies maintain their net operating equity ratio at a level equal to or higher than 150%.

Other Provisions on Financial Soundness

The Korean Securities and Exchange Act, the Enforcement Decree of the Korean Securities and Exchange Act and Financial Supervisory Commission regulations also include provisions designed to regulate certain types of activities relating to the management of the assets of a securities company. These provisions include:

restrictions on the holdings by a securities company of securities issued by another company which is the largest shareholder or the major shareholder (each as defined under the Korean Securities and Exchange Act) of that securities company;

restrictions on providing money or credit to the largest shareholder, major shareholder, officers and related persons of the securities company; and

special provisions concerning payment guarantees by a securities company. For instance, a securities company may not provide payment guarantees for third parties other than its overseas subsidiaries or provide new guarantees for corporate bonds, other than, subject to certain restrictions, roll-over guarantees in connection with the repayment of bonds previously guaranteed by it.

Business Conduct Rules

Effective from August 2001, the Financial Supervisory Commission adopted business conduct rules applicable to securities companies. These rules impose greater responsibilities on securities companies, strictly banning certain unfair practices and ensuring that the potential investors solicited by securities companies are suitable.

Disclosure and Reports

Pursuant to the Korean Securities and Exchange Act, a securities company is required to disclose certain material matters, including:

its financial condition, including profit and loss;

any sanctions levied on it under the Korean Securities and Exchange Act or any corrective measures or sanctions under the Law on Improvement of Structure of Financial Industry; and

the occurrence of any matters which may have a material adverse effect on its operation or management.

A securities company must submit a report on its financial results to the Financial Supervisory Commission within 45 days from the end of each quarter.

Table of Contents**Item 4C. Organizational Structure**

As a financial holding company, we conduct substantially all of our operations through our subsidiaries. The following chart provides an overview of our current structure, including certain significant subsidiaries and our direct and indirect ownership of each such subsidiary:

(1) Woori Investment & Securities is accounted for as an equity method investee.

Our largest subsidiary is Woori Bank, the assets of which represented approximately 78.5% of our total assets as of December 31, 2006. The following table identifies each of our major subsidiaries and their contributions to our total assets and net income as of and for the year ended December 31, 2006 (after allocating eliminations for consolidation, inter-segment transactions and certain differences in classification under our management reporting system for assets and net income in proportion to total assets and absolute net income, respectively):

	As of or for the year ended December 31, 2006		
	Total Assets ⁽¹⁾		Net Income ⁽²⁾
Subsidiary	Amount	% of Total	
(in billions of Won, except percentages)			
Woori Bank	(Won) 153,135	78.5%	(Won) 842
Kyongnam Bank	15,309	7.8	80
Kwangju Bank	13,002	6.7	50
Others	13,635	7.0	979
Total	(Won) 195,081	100.0%	(Won) 1,951

(1) After allocating eliminations of (Won)13,964 billion representing consolidation, inter-segment transactions and certain differences in classification under our management reporting system. This amount has been allocated in proportion to the ratio of segment assets before eliminations to total assets before eliminations. See Note 40 of the notes to our consolidated financial statements.

(2) After allocating a loss of (Won)1,987 billion representing consolidation, inter-segment transactions and certain differences in classification under our management reporting system. This amount has been allocated in proportion to the ratio of absolute segment net income to the sum of the absolute net income of all segments. See Note 40 of the notes to our consolidated financial statements.

Table of Contents

The following is a summary of the activities of our principal subsidiaries:

Woori Bank

Established in December 1998, Woori Bank (formerly known as Hanvit Bank) was formed as a result of the merger of two nationwide commercial banks, the Commercial Bank of Korea (established in 1899) and Hanil Bank (established in 1932). Woori Bank provides a wide range of banking and other financial services to large corporations, small- and medium-sized enterprise and individuals in Korea. As of December 31, 2006, Woori Bank was the second-largest commercial bank in Korea based upon total assets (including loans) and deposits. As of December 31, 2006, Woori Bank had more than 14 million customers, with 836 branches nationwide.

Kyongnam Bank

Established in April 1970, Kyongnam Bank is a regional commercial bank that provides financial services in Masan and Ulsan and other parts of the South Kyongsang province in southeastern Korea. Kyongnam Bank concentrates on consumer banking, as well as corporate banking for small- and medium-sized enterprises and, to a lesser extent, large corporate customers. As of December 31, 2006, Kyongnam Bank had approximately 1.7 million customers, with 139 branches throughout southeastern Korea and Seoul.

Kwangju Bank

Established in September 1968, Kwangju Bank is a regional commercial bank that provides financial services in Kwangju and southwestern Korea. Kwangju Bank concentrates on the consumer and small- and medium-sized enterprise banking sectors, offering various deposit and loan products to customers in those sectors and, to a lesser extent, large corporate customers. As of December 31, 2006, Kwangju Bank had approximately 1.9 million customers, with 120 branches throughout southwestern Korea and four branches in Seoul.

Other Subsidiaries

The following table provides summary Korean GAAP information regarding our other significant consolidated subsidiaries (other than special purpose companies) as of or for the year ended December 31, 2006:

<u>Subsidiary</u>	<u>Percentage of Ownership ⁽¹⁾</u>	<u>Total Assets</u>	<u>Stockholders Equity</u>	<u>Operating Revenue</u>	<u>Net Income</u>
(in millions of Won)					
Woori Credit Suisse Asset Management Co., Ltd.	70.0%	(Won) 72,855	(Won) 68,079	(Won) 17,457	(Won) 12,561
Woori Private Equity	100.0	10,643	10,106	104	309
Woori F&I Co., Ltd.	100.0	225,630	129,632	40,855	28,293
Woori Finance Information System Co., Ltd.	100.0	209,101	9,520	14,873	2,444

(1) Including both direct and indirect ownership.

Table of Contents**Item 4D. Property, Plants and Equipment**

Our registered office and corporate headquarters, with a total area of approximately 97,222 square meters, are located at 203, 1-ga, Hoehyon-dong, Chung-Gu, Seoul, Korea. Information regarding certain of our properties in Korea is presented in the following table:

<u>Type of Facility/Building</u>	<u>Location</u>	<u>Area</u> (square meters)
Woori Finance Holdings and Woori Bank registered office and corporate headquarters	203 Hoehyon-dong, 1-ga, Chung-gu, Seoul, Korea 100-792	97,222
Kyongnam Bank registered office and corporate headquarters	246-1 Seockcheon-dong, Masan City, Kyongnam Province, Korea 630-010	29,457
Kwangju Bank registered office and corporate headquarters	7-12 Daein-dong, Dong-gu, Kwangju, Korea 501-030	47,007
Woori Finance Information System registered office and corporate headquarters	11-4 Shincheon-dong, Songpa-gu, Seoul, Korea	21,309

As of December 31, 2006, we had a network of 1,099 banking branches in Korea. With respect to Woori Bank, approximately 250 of its branches are housed in buildings owned by us, while the remaining branches are leased properties. Lease terms are generally from two to three years and seldom exceed five years. We also have subsidiaries in the United States and Indonesia and branches, agencies and representative offices in Asia, the United States and Europe. We do not own any material properties outside of Korea.

The net book value of all the properties owned by us at December 31, 2006 was (Won)2,149 billion.

Item 4.A. UNRESOLVED STAFF COMMENTS

We do not have any unresolved comments from the Securities and Exchange Commission staff regarding our periodic reports under the Securities Exchange Act of 1934.

Item 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**Item 5A. Operating Results****Overview**

We maintain our accounts in accordance with accounting principles and practices employed by financial institutions and other enterprises in the Republic of Korea, whereas the accompanying consolidated financial statements reflect certain adjustments not recorded on our books to present

these statements in accordance with U.S. GAAP. Our management uses Korean GAAP information to allocate resources and evaluate the performance of our subsidiaries.

The following discussion is based on our consolidated financial statements, which have been prepared in accordance with U.S. GAAP, except for (1) the segment analyses, which are prepared based on Korean GAAP and (2) the selected financial information under Korean GAAP, which is based on our consolidated financial statements prepared in accordance with Korean GAAP. Our consolidated financial statements include the accounts of Woori Finance Holdings and its predecessor entities acquired by the KDIC during 1998 and 2000. The consolidated financial statements include the accounts of subsidiaries over which substantive control is exercised through either majority ownership of voting stock and/or other means. Investments in affiliated companies (companies over which we have the ability to exercise significant influence) are accounted for by the equity method of accounting and are reported in other investment assets.

Acquisitions and Dispositions

The KDIC established our company as a financial holding company in March 2001 to consolidate the Korean government's interests in four commercial banks, one merchant bank and a number of other financial

Table of Contents

institutions. As a financial holding company, we conduct substantially all of our operations through our subsidiaries. For a more detailed discussion of the history of our establishment, see History and Development of the Company.

On September 30, 1998, the KDIC acquired the banking operations of the predecessor banks of our principal subsidiary, Woori Bank. The KDIC subsequently established Hanaro Merchant Bank (since renamed Woori Investment Bank), effective November 3, 2000, to restructure substantially all of the assets and liabilities of four failed merchant banks that the KDIC had previously acquired, which were transferred to Hanaro Merchant Bank effective November 21, 2000. The KDIC also acquired Kyongnam Bank, Kwangju Bank and Peace Bank of Korea, effective December 30, 2000. We have accounted for all such acquisitions under the purchase method of accounting.

We recorded the assets and liabilities of Woori Bank's predecessor banks, as well as those of each of Kyongnam Bank, Kwangju Bank and Peace Bank of Korea, at fair value and recorded the amount by which the fair value of the acquired liabilities exceeded the fair value of the acquired identifiable assets as deficit equity, which is presented as a reduction of additional paid-in capital. In connection with the acquisition of Woori Bank's predecessor banks in 1998, we recorded deficit equity of (Won)3,093 billion. In connection with the acquisitions of Kyongnam Bank, Kwangju Bank and Peace Bank of Korea in 2000, we recorded deficit equity of (Won)685 billion.

In connection with these acquisitions, we also recorded a core deposit intangible asset, which represents the fair value of the acquired base of demand and savings deposit accounts of the acquired entities which we can expect to maintain for an extended period because we have generally stable customer relationships. We have been amortizing this intangible asset in proportion to our estimated run-off of depositors on an accelerated basis over a weighted average life of approximately eight years. We recorded amortization expense of (Won)41 billion in 2004, (Won)15 billion in 2005 and (Won)16 billion in 2006, relating to the core deposit intangible asset.

During 2002, we sold our indirect subsidiary, Hanvit Leasing, and its three subsidiaries to third parties for an aggregate sale price of (Won)119 billion. We accounted for these sales as discontinued operations in 2002, and reclassified the assets and liabilities to be disposed of as held for sale in 2001. At the time of these sales, the (Won)534 billion carrying amount of the assets sold exceeded the (Won)511 billion carrying amount of the liabilities sold by (Won)23 billion. We recorded (Won)96 billion as gain on disposal of discontinued components in our consolidated income statement for 2002. We also recognized (Won)929 billion of income from Hanvit Leasing and its subsidiaries as income from operations of discontinued components in our consolidated income statement for 2002. This income related primarily to gain on forgiveness of outstanding debt of Hanvit Leasing by its creditors in connection with its debt restructuring in 2002. In addition, during 2002, Woori Investment Bank entered into an agreement to sell one of its subsidiaries, which was subsequently sold in February 2003. In connection with that sale, we recorded (Won)7 billion as loss on disposal of discontinued components and recognized (Won)3 billion of income as income from operations of discontinued components in our consolidated income statement for 2002.

In October 2004, we purchased seven million shares of LGIS in the Korean stock market for approximately (Won)55 billion. In addition, in December 2004, we purchased approximately 26 million shares of LGIS from LG Card for approximately (Won)298 billion. As a result, as of December 31, 2004, we owned a 27.3% voting interest in LGIS, which became an equity method investee.

In June 2004, we acquired the 39.7% minority interest in Woori Securities that we did not own, and issued 8,571,262 new shares of our common stock valued at (Won)56 billion as the purchase price. The acquisition was accounted for under the purchase method of accounting. In connection with this acquisition, we recognized (Won)63 billion of extraordinary gain, which represented the excess of the fair value of the net assets acquired over the purchase consideration after allocations. In January 2005, we reduced the capital of Woori Securities by 42.5% or (Won)154 billion in anticipation of its planned merger with LGIS. In March 2005, we merged Woori Securities into

Table of Contents

LGIS, and renamed the surviving entity Woori Investment & Securities, which became an equity method investee. We currently own a 35.0% voting interest in Woori Investment & Securities. As of December 31, 2006, Woori Investment & Securities had consolidated total assets of (Won)12,845 billion, consolidated total liabilities of (Won)10,726 billion and consolidated total shareholders' equity of (Won)2,119 billion, on a Korean GAAP basis. For the year ended December 31, 2006, Woori Investment & Securities generated consolidated revenues of (Won)2,691 billion and consolidated net income of (Won)233 billion, on a Korean GAAP basis.

Trends in the Korean Economy

Our financial position and results of operations have been and will continue to be significantly affected by financial and economic conditions in Korea. As part of the Korean government's structural reform program, which stemmed from the economic difficulties in Korea in 1997 and 1998, the government made significant changes to the regulations governing financial institutions, including changes in loan classification and loss provisioning guidelines, Korean GAAP, securities valuation methods and liquidity and minimum capital requirements.

Financial and economic conditions generally improved in Korea from 1999 to 2006. The general level of interest rates decreased, consumer spending and consumer demand for credit cards and other financial products increased, the overall level of non-performing corporate loans decreased and overall profitability increased. Nonetheless, certain large corporations, including those to which we have credit and other exposure, are experiencing significant financial difficulties. Furthermore, substantial growth in lending to small- and medium-sized enterprises may lead to increasing delinquencies and a deterioration in overall asset quality. In 2006, on a Korean GAAP basis, we recorded charge-offs of (Won)107 billion in respect of our Won-denominated loans to small- and medium-sized enterprises, compared to charge-offs of (Won)212 billion in 2005. See Item 3D. Risk Factors Risks relating to our corporate credit portfolio The largest portion of our exposure is to small- and medium-sized enterprises, and financial difficulties experienced by companies in this segment may result in a deterioration of our asset quality and have an adverse impact on us.

In addition, the significant increase in consumer and credit card debt has led to a deterioration in the asset quality of the consumer lending and credit card portfolios of Korean financial institutions. In recent years, commercial banks, credit card companies, consumer finance companies and other financial institutions in Korea made significant investments and engaged in aggressive marketing in these areas, leading to substantially increased competition in the consumer finance and credit card segments. However, the rapid growth in consumer credit has led to increasing delinquencies, loan loss provisions, non-performing loans and charge-offs in recent years. In 2006, we recorded charge-offs of (Won)87 billion and a reversal of provisions of (Won)5 billion in respect of our credit card portfolio, compared to charge-offs of (Won)183 billion and a reversal of provisions of (Won)63 billion in 2005. We also recorded charge-offs of (Won)74 billion and provisions of (Won)109 billion in respect of our consumer loan portfolio in 2006, compared to charge-offs of (Won)125 billion and provisions of (Won)166 billion in 2005. See Item 3D. Risk Factors Risks relating to our consumer credit portfolio.

As a result of growing concerns regarding the high levels of consumer borrowing and credit card usage in Korea and the deterioration in the asset quality of the consumer lending and credit card portfolios of Korean financial institutions, the Korean government has implemented various changes to the regulations governing consumer loans and credit card operations generally. See Item 3D. Risk Factors Risks relating to government regulation and policy and Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Banks Credit Card Business.

As a result of the developments in the Korean economy described above, as well as factors such as high oil prices, the weakness of the economy in certain parts of the world, the war in Iraq and its aftermath and tensions with North Korea, the economic outlook for the financial services sector in Korea in 2007 and for the foreseeable future is uncertain.

Table of Contents***New Basel Capital Accord***

In June 2006, the Financial Supervisory Service announced that it would implement Basel II in Korea beginning on January 1, 2008. The implementation of Basel II will have a substantial effect on the way risk is measured among Korean financial institutions, including us. Building upon the initial Basel Capital Accord of 1988, which focused primarily on capital adequacy and asset soundness as a measure of risk, Basel II expands this approach to contemplate additional areas of risk such as operational risk. Basel II also institutes new measures that will require our commercial banking subsidiaries to take into account individual borrower credit risk and operational risk when calculating risk-weighted assets.

In addition, under Basel II, banks are permitted to follow either a standardized approach or an internal ratings-based approach with respect to calculating capital requirements. Woori Bank has voluntarily chosen to establish and follow an internal ratings-based approach, which is more stringent in terms of calculating risk sensitivity with respect to its capital requirements, while Kyongnam Bank and Kwangju Bank have chosen to use a standardized approach. Since Woori Bank will be implementing an internal ratings-based approach for the first time in connection with its implementation of Basel II, its internal ratings-based approach may require a significant increase in its capital requirements, which will require it to either improve its asset quality or raise additional capital.

Changes in Securities Values, Exchange Rates and Interest Rates

Fluctuations of exchange rates, interest rates and stock prices affect, among other things, the demand for our products and services, the value of and rate of return on our assets, the availability and cost of funding and the financial condition of our customers. The following table shows, for the dates indicated, the stock price index of all equities listed on the Stock Market Division of the Korea Exchange as published in the KOSPI, the Won to U.S. dollar exchange rates and benchmark Won borrowing interest rates.

	Dec. 31, 2002	June 30, 2003	Dec. 31, 2003	June 30, 2004	Dec. 31, 2004	June 30, 2005	Dec. 31, 2005	June 30, 2006	Dec. 31, 2006
KOSPI	627.55	669.93	810.71	785.79	895.92	1,008.16	1,379.37	1,295.15	1,434.15
Exchange rate (KRW/US\$)	(Won) 1,186.3	(Won) 1,196.0	(Won) 1,192.0	(Won) 1,156.0	(Won) 1,035.1	(Won) 1,034.5	(Won) 1,010.0	(Won) 948.5	(Won) 933.0
Corporate bond yield ⁽¹⁾	5.8%	5.6%	5.7%	5.0%	3.9%	4.4%	5.7%	5.3%	5.3%
Treasury bond yield ⁽²⁾	5.1%	4.2%	4.8%	4.2%	3.3%	4.0%	5.1%	4.9%	4.9%

(1) Represents the noon buying rate on the dates indicated.

(2) Measured by the yield on three-year Korean corporate bonds rated as A+ by the Korean credit rating agencies.

(3) Measured by the yield on three-year treasury bonds issued by the Ministry of Finance and Economy of Korea.

Change in Accounting Policy

In 2006, there were no material changes to our accounting policies. See Note 1 of the notes to our consolidated financial statements.

Critical Accounting Estimates

The notes to our consolidated financial statements contain a summary of our significant accounting policies, including a discussion of recently issued accounting pronouncements. Certain of our policies involve accounting estimates and are critical to the portrayal of our financial condition, since they require management to make difficult, complex or subjective judgments, some of which may relate to matters that are inherently uncertain. We discuss these critical accounting estimates below.

Table of Contents

Allowance for Credit Losses

We have established an allowance for losses on loans, leases and other credits, which is available to absorb losses that we incur in our credit portfolio. This allowance is based on our continuing review of the credit portfolio, which we evaluate for impairment on an ongoing basis, and represents our best estimate of probable losses that have been incurred as of the balance sheet date. If we believe that additions or changes to the allowance for credit losses are required, then we record provisions for credit losses, which are treated as charges against current income. Credit exposures that we deem to be uncollectible, including actual credit losses, net of recoveries of previously charged-off amounts, are charged directly against the allowance for credit losses.

We base the level of our allowance for credit losses on an evaluation of the risk characteristics of our credit portfolio. That evaluation considers factors such as past loss experience, the financial condition of our borrowers and current economic conditions. We evaluate corporate loans and consumer loans in different ways, due to their respective characteristics, as follows:

We generally evaluate impaired corporate loans individually, due to the unique characteristics of the individual corporate borrowers, and establish an allowance for loan losses for individual impaired corporate loans. As described in Note 1 of the notes to our consolidated financial statements included elsewhere in this annual report, we consider a loan impaired when, after considering current information and events, we believe it is probable that we will be unable to collect all amounts due, including principal and interest, under the contractual terms of the loan. Once we have identified a loan as impaired, we generally measure the value of the loan based on the present value of expected future cash flows discounted at the loan's effective interest rate. Alternatively, as a practical expedient, we measure the value of the loan at the loan's observable market price or, if the loan is collateral dependent, at the fair value of the collateral. If the measured value is less than the book value of the loan, we establish a specific allowance for the amount deemed uncollectible.

We also establish an allowance for loan losses for corporate loans that we do not believe are impaired using an expected loss methodology. Expected losses are determined using the probability of default and the likely severity of any resulting loss and are established based on historical loss experience.

We establish an allowance for loan losses related to leases using the same method we use to establish allowance for losses for corporate loans.

We generally evaluate consumer loans, including mortgage and home equity loans, and credit card balances as individual pools for loan loss reserve purposes due to their homogeneous nature, and establish an allowance for loan losses relating to each pool using an expected loss methodology, based on historical loss experience. For loans originating from our credit card operations, we generally evaluate these loans for loan loss reserve purposes as two pools of homogeneous loans: the loans held in our credit card accounts; and the securitized loans held in our special purpose entities. Our loan loss reserves for credit card loans are established based on expected loss methodology. This methodology is the product of expected default frequency and loss severity. Expected default frequency is calculated using the delinquency roll-rate for the past fiscal year. We also generally compare our loan loss reserve with expected charge-offs for the next fiscal year for the purpose of evaluating the sufficiency of our loan loss reserve.

We establish an allowance for losses for credit-related commitments using the same method we use to establish allowances for our loans.

We believe that the accounting estimate related to our allowance for credit losses is a critical accounting policy because: (1) it is highly susceptible to change from period to period because we must make assumptions about future default rates and losses relating to our credit portfolio; and (2) any significant difference between our estimated credit losses (as reflected in our allowance for credit losses) and actual credit losses could require us to take additional provisions which, if significant, could have a material impact on our net income. Our assumptions

about estimated losses require significant judgment because actual losses have fluctuated in the past and are expected to continue to do so, based on a variety of factors.

Table of Contents

Our consolidated financial statements for the year ended December 31, 2006 included a total allowance for credit losses of (Won)2,076 billion as of that date (including allowances of (Won)221 billion with respect to credit-related commitments). Our total loan charge-offs, net of recoveries, amounted to (Won)187 billion and our provision for credit losses amounted to (Won)637 billion (which reflects provisions for credit-related commitments of (Won)128 billion) in 2006.

Valuation of Securities and Financial Instruments

We invest in various financial instruments including debt and equity securities, derivatives and investments in venture capital activities. Depending on the accounting treatment specific to each type of financial instrument, an estimate of fair value determines the instrument's effect on our consolidated financial statements.

Trading assets and liabilities: Trading assets include securities that are bought and held principally for the purpose of selling them in the near term. Trading positions are carried at fair value and recorded on a trade date basis. Trading assets and liabilities also include derivatives and foreign exchange contracts used for trading purposes that do not qualify for hedge accounting, as well as those used for other than trading purposes, all of which we carry at fair value. We recognize changes in the fair value of any of these assets and liabilities in net trading revenue as they occur. While the majority of fair value estimates for trading assets and liabilities are made based on quoted market prices, in 2006, approximately 32.9%, or (Won)3,054 billion, of the fair value of these assets and liabilities was determined using third-party broker quotations or through our discounted cash flow model. That model discounts the expected cash flows using market interest rates commensurate with the credit quality and duration of the investment.

Available-for-sale debt and marketable equity securities: We classify our investments in debt and marketable equity securities as available-for-sale when we intend to hold the securities for an indeterminate period of time or when the securities may be sold from time to time to effectively manage interest rate exposure and liquidity needs. We generally designate all securities not classified as held-to-maturity securities or trading securities as available-for-sale securities. We record available-for-sale securities at fair value. For debt securities, we amortize premiums and accrete discounts using the effective interest rate method. Realized gains and losses on available-for-sale securities are determined using the specific identification method for debt securities and moving average method for equity securities. Unrealized gains and losses on available-for-sale securities are excluded from earnings and reported in accumulated other comprehensive income, net of tax. Any other-than-temporary declines in the fair value of available-for-sale securities results in the recognition of the related loss in earnings. In 2006, approximately 32.4%, or (Won)8,343 billion, of the fair value of available-for-sale debt was determined using third-party broker quotations or through our discounted cash flow model.

Held-to-maturity debt securities: We classify our investments in debt securities as held-to-maturity when we have the positive ability and intent to hold those securities until maturity. We record these securities at amortized cost and adjust those values for accretion and amortization of discounts and premiums. Declines in fair value of individual held-to-maturity securities below their amortized cost that are other-than-temporary result in write-downs of the securities to their fair value.

Non-marketable equity securities: Non-marketable equity securities, restricted stock and investments in limited partnerships do not have readily determinable fair values. To the extent we do not have significant influence over the investee, we record such securities using the cost method of accounting. Under this method, we will not change the cost basis of individual securities unless there is other-than-temporary decline in value, which results in write-downs of those securities to their fair value. The fair values of non-marketable equity securities are based on the latest obtainable net asset value of the investees, which often reflect cost or other reference events. Any changes in the information or assumptions used in obtaining the fair values could significantly affect the fair value of these investments. If we have significant influence over the operations and financial policies of the investee,

Table of Contents

we record such securities using the equity method of accounting, pursuant to which we record our equity ownership share of the net income or loss of the investee.

If available, quoted market prices provide the best indication of fair value. We determine the fair value of our securities and financial instruments using quoted market prices when available. If quoted market prices are not available, we determine the fair value based on pricing models, quoted prices of instruments with similar characteristics, discounted cash flows or the net asset value of the investee. The fair values calculated based on pricing and valuation models or the discounted cash flow analyses are subject to various assumptions used which, if changed, could significantly affect the fair values of the investments. These assumptions relate to discount rates, cash flows and certain modeling techniques, among other things.

In connection with the recognition of other-than-temporary impairment, the length of time a security has been below cost is the primary factor we consider in assessing whether an impairment loss should be recognized. Other factors we consider include the financial condition and near-term prospects of the issuer, including any specific events that may influence the issuer's operations such as changes in technology that may impair its earnings potential or the discontinuance of a segment of its business that may affect future earnings potential, our intent and ability to retain its investment in the security for a period of time sufficient to allow for any recovery in market value, and (for domestic securities only) the state of the Korean economy. Any changes in these assumptions could significantly affect the valuation and timing of recognition of an other-than-temporary impairment.

We believe that the accounting estimates related to the fair market value of our various securities is a critical accounting policy because: (1) they may be highly susceptible to change from period to period based on factors beyond our control; and (2) any significant difference between our estimated fair value of these securities on any particular date and either their estimated fair value on a different date or the actual proceeds that we receive upon sale of these securities could result in valuation losses or losses on disposal which may have a material impact on our net income. Our assumptions about the fair market value of securities we hold, and in particular whether any decline in the value of our available-for-sale or held-to-maturity securities is temporary, require significant judgment because actual valuations have fluctuated in the past and are expected to continue to do so, based on a variety of factors.

Valuation Allowance for Deferred Tax Assets

As a result of the substantial losses incurred by certain of our subsidiaries, including Woori Bank, we had an aggregate of (Won)1,327 billion of net operating loss carry-forwards as of December 31, 2006, which expire from 2007 to 2011. We may be able to use these net operating loss carry-forwards, as well as temporary differences in the amount of tax recorded for tax purposes and accounting purposes, to reduce the amount of tax that we would otherwise be required to pay in future periods. We recognize all existing future tax benefits arising from these tax attributes as deferred tax assets and then, based on our internal estimates of our future profits, establish a valuation allowance equal to the extent that it is more likely than not that deferred tax assets will not be realized. We record an expense or benefit under the income tax expense/benefit line of our income statement when there is a net change in our total deferred tax assets and liabilities in a period. In 2004, we reduced the valuation allowance substantially based on our expectations as of year-end regarding the future profitability of our consumer and corporate banking business and the resulting belief that it would be more likely than not that we would realize a significant amount of net deferred tax assets. Principally as a result of such reduction, we recorded an income tax benefit of (Won)392 billion in 2004. In 2005, we further reduced the valuation allowance by (Won)244 billion based on our expectations as of year-end regarding the future profitability of our credit card business and due to the realization of net operating loss carry-forwards with respect to such business and recorded income tax expenses of (Won)366 billion in 2005. In 2006, we further reduced the valuation allowance by (Won)45 billion based on our expectations as of the year-end regarding the future profitability of our subsidiaries' businesses, including our credit card business, and the resulting belief that it would be more likely than not that the realization of our subsidiaries' net operating loss carry-forwards would be higher over the next few years. We

Table of Contents

recorded income tax expenses of (Won)615 billion in 2006, which reflected the realization of parts of such net operating loss carry-forwards relating to such businesses of our subsidiaries.

We believe that the estimates related to our establishment of the valuation allowance for deferred tax assets is a critical accounting policy because: (1) they may be highly susceptible to change from period to period based on our assumptions regarding our future profitability; and (2) any significant difference between our estimates of future profits on any particular date and such estimates of future profits on a different date could result in income tax benefits which may have a material impact on our net income from period to period. Our assumptions about future profitability require significant judgment and are inherently subjective.

Results of Operations**Net Interest Income**

The following table shows, for the periods indicated, the principal components of our interest and dividend income:

	Year ended December 31,			% Change	
	2004	2005	2006	2004/2005	2005/2006
	(in billions of Won)				
Interest and dividend income					
Loans	(Won) 5,674	(Won) 5,727	(Won) 7,560	0.9%	32.0%
Deposits in other banks	37	46	49	24.3	7.3
Trading securities	163	158	216	(3.1)	36.6
Investment securities	1,319	1,214	1,473	(7.9)	21.4
Call loans and securities purchased under resale agreements	42	64	67	52.4	4.2
Total interest and dividend income	7,235	7,209	9,365	(0.4)	29.9
Interest expense					
Deposits	2,579	2,501	3,504	(3.0)	40.1
Call money	30	29	71	(3.3)	143.9
Other borrowed funds	243	294	453	21.0	54.1
Secured borrowings	126	114	115	(9.5)	0.9
Long-term debt	831	789	1,322	(5.1)	67.6

Net interest income	(Won) 3,426	(Won) 3,482	(Won) 3,900	1.6	12.0
Net interest margin ⁽¹⁾	2.84%	2.73%	2.50%		

⁽¹⁾ The ratio of net interest income to average interest-earning assets.

Comparison of 2006 to 2005

Interest and dividend income. Interest and dividend income increased 29.9% from (Won)7,209 billion in 2005 to (Won)9,365 billion in 2006, primarily as a result of a 32.0% increase in interest on loans, enhanced by a 21.4% increase in interest and dividends on investment securities. The average balance of our interest-earning assets increased by 22.0% from (Won)127,619 billion in 2005 to (Won)155,750 billion in 2006, which was primarily due to the growth in our loan portfolio. This increase was enhanced by a 36 basis point increase in average yields on our interest-earning assets from 5.65% in 2005 to 6.01% in 2006, principally due to the increase in the general levels of interest rates in Korea from 2005 to 2006.

The 32.0% increase in interest on loans from (Won)5,727 billion in 2005 to (Won)7,560 billion in 2006 was primarily the result of:

a 43.3% increase in average volume of general purpose household loans from (Won)32,112 billion in 2005 to (Won)46,032 billion in 2006; and

Table of Contents

a 22.7% increase in the average volume of commercial and industrial loans from (Won)45,667 billion in 2005 to (Won)56,055 billion in 2006, enhanced by a 34 basis points increase in the average yields on such loans from 5.95% in 2005 to 6.29% in 2006.

The increase in the average volume of general purpose household loans reflected increased lending to consumers due to higher loan demand and our continuing focus on the retail loan segment. The increase in the average volume of commercial and industrial loans was mainly due to our increased marketing efforts to corporate borrowers including and small- and medium-sized enterprises. The average yields for commercial and industrial loans increased mainly due to the general rise in market interest rates in 2006.

Overall, the average volume of our loans increased 25.3%, from (Won)95,583 billion in 2005 to (Won)119,758 billion in 2006, while the average yields on our loans increased 32 basis points, from 5.99% in 2005 to 6.31% in 2006, reflecting the higher interest rate environment in Korea.

Our securities portfolio consists primarily of investment securities, of which a substantial majority was debt securities issued by government-owned or -controlled enterprises or financial institutions (including the Bank of Korea, the KDIC and the Korea Development Bank). Interest and dividends on trading and investment securities increased 23.0% from (Won)1,373 billion in 2005 to (Won)1,689 billion in 2006, primarily due to a 11.5% increase in the average volume of investment securities from (Won)24,296 billion in 2005 to (Won)27,091 in 2006, which was enhanced by a 44 basis point increase in average yields on such securities from 5.00%, in 2005 to 5.44% in 2006. The increase in average volume was primarily a result of an increase in the average volume of available-for-sale securities, while the increase in average yields was principally due to the general rise in market interest rates in 2006.

Interest Expense. Interest expense increased 46.6% from (Won)3,727 billion in 2005 to (Won)5,465 billion in 2006, primarily due to a 40.1% increase in interest expense on deposits, a 67.6% increase in interest expense on long-term debt and a 54.1% increase in interest expense on other borrowed funds. The average balance of our interest-bearing liabilities increased 23.4% from (Won)121,754 billion in 2005 to (Won)150,223 billion in 2006, principally due to increased deposits and long-term debt. This increase was enhanced by a 58 basis point increase in the average cost of our interest-bearing liabilities from 3.06% in 2005 to 3.64% in 2006, which reflected the general rise in market interest rates in 2006.

The 40.1% increase in interest expense on deposits from (Won)2,501 billion in 2005 to (Won)3,504 billion in 2006 was primarily the result of:

a 18.2% increase in the average volume of other time deposits (other than certificate of deposit accounts) from (Won)52,277 billion in 2005 to (Won)61,814 billion in 2006, which was enhanced by a 53 basis point increase in the average cost of such deposits from 3.63% in 2005 to 4.16% in 2006; and

a 51.9% increase in the average volume of certificate of deposit accounts from (Won)6,931 billion in 2005 to (Won)10,525 billion in 2006, enhanced by a 91 basis point increase in the average cost of such deposit accounts from 3.73% in 2005 to 4.64% in 2006.

Overall, the average volume of our deposits increased by 18.7% from (Won)91,035 billion in 2005 to W108,083 billion in 2006, primarily due to our increased marketing efforts for deposits in order to fund our higher lending levels, while the average cost of our deposits increased by 49 basis points from 2.75% in 2005 to 3.24% in 2006, principally due to the higher interest rate environment in Korea.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

The 67.6% increase in interest expense on long-term debt from (Won)789 billion in 2005 to (Won)1,322 billion in 2006 was mainly the result of a 63.6% increase in the average volume of such debt from (Won)16,494 billion in 2005 to (Won)26,980 billion in 2006, which was primarily due to our efforts to increase stable funding sources. This was enhanced by a 12 basis point increase in the average cost of such debt from 4.78% in 2005 to 4.90% in 2006, due primarily to the higher interest rate environment.

Table of Contents

The 54.1% increase in interest expense on other borrowed funds, which consist primarily of short-term borrowings from other banks, borrowings from our trust accounts, short-term debentures and borrowings from the Bank of Korea, from (Won)294 billion in 2005 to (Won)452 billion in 2006, was primarily due to a 146 basis point increase in the average cost of short-term borrowings (other than from the Bank of Korea) from 2.92% in 2005 to 4.38% in 2006, which reflected the higher interest rate environment.

Net interest margin. Net interest margin represents the ratio of net interest income to average interest-earning assets. Our overall net interest margin decreased from 2.73% in 2005 to 2.50% in 2006, as the increase in the average volume of our interest-earning assets outpaced the increase in our net interest income. The average volume of our interest-earning assets increased 22.0% from (Won)127,619 billion in 2005 to (Won)150,750 billion in 2006, while net interest income increased 12.0% from (Won)3,482 billion in 2005 to (Won)3,900 billion in 2006. The growth in average interest-earning assets was substantially matched by a 23.2% increase in the average balance of our interest-bearing liabilities from (Won)121,754 billion in 2005 to (Won)150,022 billion in 2006, while the increase in interest and dividend income was largely matched by an increase in interest expense. However, net interest spread, which represents the difference between the average yield on our interest-earning assets and the average cost of our interest-bearing liabilities, decreased from 2.59% in 2005 to 2.37% in 2006. The decrease in net interest spread reflected a larger increase in the average cost of interest-bearing liabilities from 2005 to 2006 (including as a result of sharp growth in the average volume of other time deposits and certificate of deposit accounts, where the increase in average cost was also relatively large), which outpaced the increase in average yield of our interest-bearing assets (which was slowed by a relatively small increase in average yield on general purpose household loans, where the growth in average volume was relatively large).

Comparison of 2005 to 2004

Interest and dividend income. Interest and dividend income decreased slightly from (Won)7,235 billion in 2004 to (Won)7,209 billion in 2005, primarily as a result of a 7.9% decrease in interest and dividends on investment securities, which was largely offset by a 1.1% increase in interest on loans. The average yields on our interest-earning assets decreased 35 basis points from 6.00% in 2004 to 5.65% in 2005, which was driven by the decline in the general levels of interest rates in Korea from 2004 to 2005. This decrease was largely offset by a 5.9% increase in the average balance of our interest-earning assets from (Won)120,513 billion in 2004 to (Won)127,619 billion in 2005, principally due to growth in our loan portfolio.

The 1.1% increase in interest on loans from (Won)5,674 billion in 2004 to (Won)5,727 billion in 2005 was primarily the result of:

a 91 basis point increase in the average yields of trade financing loans from 3.25% in 2004 to 4.16% in 2005, enhanced by a 2.0% increase in the average volume of such loans from (Won)7,191 billion in 2004 to (Won)7,331 billion in 2005;

a 13.2% increase in the average volume of general purpose household loans from (Won)28,370 billion in 2004 to (Won)32,112 billion in 2005, partially offset by a 55 basis point decrease in the average yields on such loans from 6.47% in 2004 to 5.92% in 2005; and

a 27.0% increase in the average volume of mortgage loans from (Won)4,086 billion in 2004 to (Won)5,187 billion in 2005, partially offset by a 38 basis point decrease in the average yields on such loans from 5.70% in 2004 to 5.32% in 2005.

The increase in the average yields for trade financing loans was primarily a result of an increase in the benchmark interest rate with respect to such loans. The average volume of trade financing loans increased mainly as a result of higher demand for such loans. The increase in the average volume of general purpose household loans (including home equity loans) and mortgage loans mainly reflected increased lending to consumers due to higher loan demand and our continuing focus on providing loans to the retail segment. The decrease in the

Table of Contents

average yields on such loans was due primarily to the decline in the general levels of interest rates in Korea, as well as increased competition among Korean banks to lend to this segment.

These increases were partially offset by decreases in interest on loans resulting from:

a 43.7% decrease in the average volume of our interest-earning credit card balances from (Won)1,559 billion in 2004 to (Won)878 billion in 2005, partially offset by an increase of 559 basis points in the average yields on such balances from 19.82% in 2004 to 25.41% in 2005;

a 6.6% decrease in the average volume of our other commercial loans from (Won)4,623 billion in 2004 to (Won)4,317 billion in 2005, partially offset by an increase of one basis point in the average yields on such balances from 6.90% in 2004 to 6.91% in 2005; and

a 30 basis point decrease in the average yields on commercial and industrial loans from 6.25% in 2004 to 5.95% in 2005, partially offset by a 4.3% increase in the average volume of such loans from (Won)43,799 billion in 2004 to (Won)45,667 billion in 2005.

The decrease in the average volume of interest-earning credit card balances was primarily a result of substantial charge-offs of delinquent balances and continued measures to reduce the overall level of outstanding credit card balances, including lower credit limits for cardholders and reduced availability of new credit card loans. The average yields for interest-earning credit card balances increased as a result of lower delinquencies and an improvement in the overall asset quality of our credit card portfolio.

Overall, the average volume of our loans increased 6.5%, from (Won)89,786 billion in 2004 to (Won)95,583 billion in 2005, while the average yields on our loans decreased 33 basis points, from 6.32% in 2004 to 5.99% in 2005, reflecting the lower interest rate environment.

Interest and dividends on trading and investment securities decreased 7.4% from (Won)1,482 billion in 2004 to (Won)1,373 billion in 2005, primarily due to a 62 basis point decline in average yields on investment securities from 5.62%, in 2004 to 5.00% in 2005, which was partially offset by a 3.6% increase in the average volume of such securities from (Won)23,451 billion in 2004 to (Won)24,296 billion in 2005. The decline in average yields reflected the lower interest rate environment, while the increase in average volume was primarily a result of an increase in the average volume of available-for-sale securities resulting from the allocation of increased deposit funding to purchases of these securities.

Interest Expense. Interest expense decreased 2.8% from (Won)3,809 billion in 2004 to (Won)3,727 billion in 2005, primarily due to a 3.0% decrease in interest expense on deposits, a 5.1% decrease in interest expense on long-term debt and a 9.5% decrease in interest expense on secured borrowings. The average cost of our interest-bearing liabilities decreased 26 basis points from 3.32% in 2004 to 3.06% in 2005, which was driven by the decline in the general levels of interest rates in Korea from 2004 to 2005. This decrease was partially offset by a 6.1% increase in the average balance of our interest-bearing liabilities from (Won)114,752 billion in 2004 to (Won)121,754 billion in 2005, principally due to increased deposits and long-term debt.

The 3.0% decrease in interest expense on deposits from (Won)2,579 billion in 2004 to (Won)2,501 billion in 2005 was primarily the result of:

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

a 34 basis point decrease in the average cost of demand deposits from 0.54% in 2004 to 0.20% in 2005, partially offset by a 9.1% increase in the average volume of such deposits from (Won)19,498 billion in 2004 to (Won)21,271 billion in 2005; and

a 20 basis point decrease in the average cost of time deposits (other than certificate of deposit accounts) from 3.83% in 2004 to 3.63% in 2005, partially offset by a 2.6% increase in the average volume of such deposits from (Won)50,936 billion in 2004 to (Won)52,277 billion in 2005.

These decreases were partially offset by a 47.3% increase in the average volume of certificate of deposit accounts from (Won)4,705 billion in 2004 to (Won)6,931 billion in 2005, which in turn was partially offset by a decrease

Table of Contents

of 39 basis points in the average cost of such deposits from 4.12% in 2004 to 3.73% in 2005. Overall, the average cost of our deposits decreased by 23 basis points from 2.98% in 2004 to 2.75% in 2005, principally due to the lower interest rate environment, while the average volume of our deposits increased by 5.4% from (Won)86,416 billion in 2004 to (Won)91,035 billion in 2005, primarily due to increased overall demand for bank deposit products in Korea, as well as improvements in our marketing capability for such products.

The 5.1% decrease in interest expense on long-term debt from (Won)831 billion in 2004 to (Won)789 billion in 2005 was mainly due to a 65 basis point decrease in the average cost of such debt from 5.43% in 2004 to 4.78% in 2005, due primarily to the lower interest rate environment and as we replaced maturing long-term debt with lower cost long-term debt. This was partially offset by a 7.8% increase in the average volume of such debt from (Won)15,301 billion in 2004 to (Won)16,494 billion in 2005, which was primarily due to our efforts to increase stable funding sources.

Under U.S. GAAP, transfers of assets through securitizations where control of the assets has not been surrendered are not treated as sale transactions. Instead, the assets remain on our balance sheet, and the securitization proceeds are accounted for as secured borrowings. The 9.5% decrease in interest expense on secured borrowings from (Won)125 billion in 2004 to (Won)114 billion in 2005 was due to a 115 basis point decrease in the average cost of such borrowings from 5.18% in 2004 to 4.03% in 2005, due primarily to the lower interest rate environment. This was offset by a 17.6% increase in the average volume of such borrowings from (Won)2,415 billion in 2004 to (Won)2,839 billion in 2005, which resulted primarily from an increase in the number of repurchase arrangements entered into by us in connection with new investment products we offered to our customers.

The decreases in interest expense on deposits, long-term debt and secured borrowings were partially offset by a 21.0% increase in interest expense on other borrowed funds, which consist primarily of short-term borrowings from other banks, borrowings from our trust accounts, short-term debentures and borrowings from the Bank of Korea, from (Won)243 billion in 2004 to (Won)294 billion in 2005. This increase was mainly due to a 36 basis point increase in the average cost of short-term borrowings (other than from the Bank of Korea) from 2.56% in 2004 to 2.92% in 2005, enhanced by a 10.4% increase in the average volume of such borrowings from (Won)8,328 billion in 2004 to (Won)9,194 billion in 2005. The increase in the average volume and average cost of such short-term borrowings was primarily due to our increased use of foreign currency borrowings based on floating rates, which increased due to the higher interest rate environment outside of Korea.

Net interest margin. Net interest margin represents the ratio of net interest income to average interest-earning assets. Our overall net interest margin decreased from 2.84% in 2004 to 2.73% in 2005, as the increase in the average volume of our interest-earning assets outpaced the increase in our net interest income. The average volume of our interest-earning assets increased 5.9% from (Won)120,513 billion in 2004 to (Won)127,619 billion in 2005, while net interest income increased 1.6% from (Won)3,426 billion in 2004 to (Won)3,482 billion in 2005. The growth in average interest-earning assets was substantially matched by a 6.1% increase in the average balance of our interest-bearing liabilities from (Won)114,752 billion in 2004 to (Won)121,754 billion in 2005, while the decrease in interest and dividend income was outpaced by a decrease in interest expense. However, net interest spread, which represents the difference between the average yield on our interest-earning assets and the average cost of our interest-bearing liabilities, declined from 2.68% in 2004 to 2.59% in 2005. The decline in net interest spread reflected a larger decline in the average yield on interest-earning assets from 2004 to 2005, which was accelerated by the replacement of high-yield credit card balances with lower-yielding investment securities (partially offset by the effects of average volume increases in higher margin segments such as general purpose household loans), compared to the decline in the average cost of interest-bearing liabilities between the two periods, particularly for demand deposits and other time deposits where growth in average volume was relatively large.

Table of Contents

Provision for Loan Losses

We use provisions for loan losses to bring our allowance for loan losses to a level we deem appropriate. For a discussion of our loan loss provisioning policy, see [Item 4B. Business Overview](#) [Assets and Liabilities](#) [Asset Quality of Loans](#) [Loan Loss Provisioning Policy](#).

Comparison of 2006 to 2005

Our provision for loan losses increased from (Won)308 billion in 2005 to (Won)509 billion in 2006, primarily as a result of overall growth in the size of our loan portfolio.

Our loan charge-offs, net of recoveries, decreased 70.3% from (Won)626 billion in 2005 to (Won)187 billion in 2006. This decrease was attributable mainly to the decrease in impaired and non-performing loans in our overall loan portfolio, due to the improved financial condition of certain of our large corporate borrowers as well as a decrease in net charge-offs of outstanding credit card balances, which reflected the improvement in the asset quality of our credit card portfolio.

Our provisions with respect to credit-related commitments changed from a reversal of provision of (Won)39 billion in 2005 to a provision of (Won)107 billion in 2006, which was mainly attributable to an increase in our provisions for unused lines of credit.

Our other provisions increased from (Won)16 billion in 2005 to (Won)36 billion in 2006. This resulted primarily from an increase in provisions in connection with our customer loyalty programs.

Comparison of 2005 to 2004

Our provision for loan losses decreased from (Won)652 billion in 2004 to (Won)308 billion in 2005, primarily as a result of an overall improvement in the asset quality of our corporate loan portfolio and credit card portfolio, as reflected in a decrease in delinquency rates and non-performing loans.

Our loan charge-offs, net of recoveries, decreased 67.7% from (Won)1,936 billion in 2004 to (Won)626 billion in 2005. This decrease was attributable mainly to a (Won)867 billion decrease in net charge-offs of outstanding credit card balances, which reflected the improvement in the asset quality of our credit card portfolio.

Our provisions with respect to credit-related commitments decreased from (Won)43 billion for 2004 to a reversal of provision of (Won)39 billion in 2005, due to our determination in 2005 that a portion of our allowances for losses on credit-related commitments were no longer needed.

Our other provisions changed from a reversal of provision of (Won)6 billion for 2004 to provision of (Won)16 billion in 2005. This resulted primarily from an increase in expected losses with respect to litigation and an increase in provisions in connection with our customer loyalty programs.

Allowance for Loan Losses

We seek to maintain our allowance for loan losses at a level that we believe is sufficient to absorb estimated probable losses inherent in our loan portfolio, based on our continuing review and evaluation of that portfolio. As of December 31, 2006, our coverage ratio, which is the ratio of our total allowance to non-performing loans, was 137.0%. For a discussion of allowance for loan losses, see Item 4B. Business Overview Assets and Liabilities Asset Quality of Loans Allocation of Allowances for Loan Losses.

Table of Contents

Corporate Loans. We establish specific allowances for loan losses for corporate loans based on whether a particular loan is impaired or not. In addition, we establish an allowance for loan losses for corporate loans that are not deemed to be impaired using an expected loss methodology based primarily on our historical loss experience, which takes into account the default probability and the potential severity of any resulting loss. See Item 4B. Business Overview Assets and Liabilities Asset Quality of Loans Loan Loss Provisioning Policy. The following table shows, for the periods indicated, certain information regarding our impaired and non-performing corporate loans:

	As of December 31,		
	2004	2005	2006
Impaired corporate loans as a percentage of total corporate loans	4.62%	3.45%	2.22%
Non-performing corporate loans as a percentage of total corporate loans	2.60	1.53	1.27
Allowance for loan losses for corporate loans as a percentage of total corporate loans	2.44	1.48	1.84
Allowance for loan losses for corporate loans as a percentage of impaired corporate loans	52.84	70.52	82.80
Allowance for loan losses for corporate loans as a percentage of non-performing corporate loans	94.06	116.10	144.79
Net charge-offs as a percentage of total corporate loans	1.45	0.24	0.19

During 2006, impaired and non-performing corporate loans as a percentage of total corporate loans decreased primarily due to the growth of our corporate loan portfolio, as well as decreases in impaired loans resulting from the improved financial condition of certain of our large corporate borrowers. However, the level of allowance for loan losses for corporate loans as a percentage of total, impaired and non-performing corporate loans increased as a result of the proportional growth in the level of allowance due to the growth of our corporate loan portfolio, which outpaced the decline of both our impaired corporate loans and non-performing corporate loans.

During 2005, impaired and non-performing corporate loans and the level of allowance for loan losses for corporate loans, in each case as a percentage of total corporate loans, decreased due to the growth of our corporate loan portfolio and an overall improvement in the asset quality of our corporate loans. However, the level of allowance for loan losses for corporate loans as a percentage of both impaired and non-performing corporate loans increased as a result of the proportional growth in the level of allowance due to the growth of our corporate loan portfolio, which outpaced the decline of both our impaired corporate loans and non-performing corporate loans.

Consumer Credits. For consumer credits (including consumer loans and outstanding credit card balances), we establish allowances for loan losses using expected loss methodology, based primarily on our historical loss experience. See Item 4B. Business Overview Assets and Liabilities Asset Quality of Loans Loan Loss Provisioning Policy. For additional information with respect to the asset quality of our consumer credit portfolio, see Item 3D. Risk Factors Risks relating to our consumer credit portfolio.

The following table shows, for the periods indicated, certain information regarding our non-performing loans to the consumer sector, excluding credit card balances:

As of December 31,		
2004	2005	2006

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Non-performing consumer loans as a percentage of total consumer loans ⁽¹⁾	1.53%	0.93%	0.65%
Allowance for loan losses for consumer loans as a percentage of total consumer loans ⁽¹⁾	0.85	0.85	0.75
Allowance for loan losses for consumer loans as a percentage of non-performing consumer loans ⁽¹⁾	55.37	90.52	115.00
Net charge-offs of consumer loans as a percentage of total consumer loans ⁽¹⁾	0.41	0.28	0.06

⁽¹⁾ Excludes credit card balances.

Table of Contents

During 2006, non-performing consumer loans, allowance for loan losses for consumer loans and net charge-offs of consumer loans, each as a percentage of total consumer loans, decreased due to the growth of our consumer loan portfolio and an overall improvement in the asset quality of our consumer loans. However, the level of allowance for loan losses for consumer loans as a percentage of non-performing consumer loans increased as a result of the proportional growth in the level of allowance due to the growth of our consumer loan portfolio, which outpaced the decline of our non-performing consumer loans.

During 2005, non-performing consumer loans as a percentage of total consumer loans decreased due to the growth of our consumer loan portfolio and an overall improvement in the asset quality of our consumer loans, while the level of allowance for loan losses for consumer loans as a percentage of total consumer loans remained relatively stable. However, the level of allowance for loan losses for consumer loans as a percentage of non-performing consumer loans increased as a result of the proportional growth in the level of allowance due to the growth of our consumer loan portfolio, which outpaced the decline of our non-performing consumer loans. The growth in our consumer loan portfolio also led to a decrease in net charge-offs as a percentage of total consumer loans.

The following table shows, for the periods indicated, certain information regarding our non-performing credit card balances:

	As of December 31,		
	2004	2005	2006
Non-performing credit card balances as a percentage of total credit card balances	5.92%	2.20%	1.38%
Allowance for loan losses for credit card balances as a percentage of total credit card balances	7.92	3.06	2.10
Allowance for loan losses for credit card balances as a percentage of non-performing credit card balances	133.94	139.34	151.88
Net charge-offs as a percentage of total credit card balances	46.71	4.06	0.38

During 2006, non-performing credit card balances, the level of allowance for loan losses for credit card balances and net charge-offs, in each case as a percentage of total credit card balances, decreased due to an overall improvement in the asset quality of our credit card portfolio. However, the level of allowance for loan losses for credit card balances as a percentage of non-performing credit card balances increased as a result of the further deterioration in the asset quality of existing non-performing credit card balances.

During 2005, non-performing credit card balances, the level of allowance for loan losses for credit card balances and net charge-offs, in each case as a percentage of total credit card balances, decreased due to an overall improvement in the asset quality of our credit card portfolio. However, the level of allowance for loan losses for credit card balances as a percentage of non-performing credit card balances increased as a result of the further deterioration in the asset quality of existing non-performing credit card balances.

Non-Interest Income

The following table sets forth for the periods indicated the components of our non-interest income:

Year ended December 31,	% Change
-------------------------	----------

	2004	2005	2006	2004/2005	2005/2006
	(in billions of Won)				
Fees and commission income	(Won) 1,079	(Won) 1,203	(Won) 1,397	11.5%	16.1%
Net trading revenue	436	256	331	(41.3)	29.3
Trust fees, net	40	13	24	(67.5)	84.6
Net gain (loss) on investment securities	127	244	462	92.1	89.3
Other non-interest income	271	200	210	(26.2)	5.0
Total non-interest income	(Won) 1,953	(Won) 1,916	(Won) 2,424	(1.9)	26.5

Table of Contents

Comparison of 2006 to 2005

Non-interest income increased 26.5% from (Won)1,916 billion in 2005 to (Won)2,424 billion in 2006. This increase was primarily attributable to:

a (Won)218 billion increase in net gain on investment securities from (Won)244 billion in 2005 to (Won)462 billion in 2006;

a (Won)194 increase in fees and commission income from (Won)1,203 billion in 2005 to (Won)1,397 billion in 2006; and

a (Won)75 increase in net trading revenue from (Won)256 billion in 2005 to (Won)331 billion in 2006.

Net gain on investment securities represents net realized gains (or losses) and impairment losses on securities in our investment portfolio. The 89.3% increase in net gain on investment securities from 2005 to 2006 resulted primarily from an increase in the volume of transactions with respect to our investment securities.

Fees and commission income consists of fees on trade finance and other commercial fees, including commissions from Internet-based banking and bancassurance and commissions from credit card sales. The 16.1% increase in fees and commission income from 2005 to 2006 resulted primarily from increases in fees and commissions relating to our sales of bancassurance products and beneficiary certificates as well as fees from Woori Bank's investment banking activities.

Net trading revenue represents net realized and unrealized gains (or losses) on securities and derivatives in our trading portfolio. The 29.3% increase in net trading revenue was primarily the result of an increase in gains on disposal and valuation of our trading securities due to favorable market conditions.

Comparison of 2005 to 2004

Non-interest income decreased 1.9% from (Won)1,953 billion in 2004 to (Won)1,916 billion in 2005. This decrease was primarily attributable to:

a (Won)180 billion decrease in net trading revenue from (Won)436 billion in 2004 to (Won)256 billion in 2005; and

a (Won)71 decrease in other non-interest income from (Won)271 billion in 2004 to (Won)200 billion in 2005.

These decreases were partially offset by:

a (Won)124 billion increase in fees and commission income from (Won)1,079 billion in 2004 to (Won)1,203 billion in 2005; and

a (Won)117 increase in net gain on investment securities from (Won)127 billion in 2004 to (Won)244 billion in 2005.

The 41.3% decrease in net trading revenue was primarily the result of a net loss on debt securities of (Won)45 billion in 2005 compared to a net gain on such securities of (Won)107 billion in 2004. This change was due to an increase in the benchmark interest rate with respect to debt securities in our trading portfolio in 2005 compared to 2004, which resulted in net realized and unrealized losses in our debt security trading portfolio.

Other non-interest income consists primarily of gains on disposal of premises and equipment and gains on sales of loans. The 26.2% decrease in other non-interest income was mainly due to lower gains on disposal of premises and equipment.

The 11.5% increase in fees and commission income from 2004 to 2005 resulted primarily from an increase in the rate of commissions we charged on internet and telephone banking, ATM and credit card transactions.

The 92.1% increase in net gain on investment securities from 2004 to 2005 resulted primarily from a higher gain on valuation using the equity method of accounting with respect to Woori Investment & Securities, in which we hold a 35.0% interest.

Table of Contents**Non-Interest Expense**

The following table shows, for the periods indicated, the components of our non-interest expense:

	Year ended December 31,			% Change	
	2004	2005	2006	2004/2005	2005/2006
	(in billions of Won)				
Salaries and employee benefits	(Won) 978	(Won) 1,009	(Won) 1,096	3.2%	8.6%
Other administrative expenses	778	827	860	6.3	4.0
Fees and commissions	243	214	216	(11.9)	0.9
Depreciation and amortization	268	237	250	(11.6)	5.5
Other non-interest expenses	541	646	676	19.4	4.6
Total non-interest expense	(Won) 2,808	(Won) 2,933	(Won) 3,098	4.5	5.6

Comparison of 2006 to 2005

Non-interest expense increased 5.6% from (Won)2,933 billion in 2005 to (Won)3,098 billion in 2006. This increase was primarily due to:

- a (Won)87 billion increase in salaries and employee benefits from (Won)1,009 billion in 2005 to (Won)1,096 billion in 2006;
- a (Won)33 billion increase in other administrative expenses from (Won)827 billion in 2005 to (Won)860 billion in 2006; and
- a (Won)30 billion increase in other non-interest expenses from (Won)646 billion in 2005 to (Won)676 billion in 2006.

The 8.6% increase in salaries and employee benefits resulted mainly from an increase to the total salary payments made to our officers and employees (including contractual employees).

Other administrative expenses consist mainly of rent, outside service fees and advertising expenses. The 4.0% increase in other administrative expenses was mainly due to an increase in rent for employee housing and outside service provider fees.

Other non-interest expense consists of losses on loans sold in prior years, losses on disposal of premises and equipment, and various other items. The 4.6% increase in other non-interest expense was mainly due to increases in contributions to credit guarantee funds and expenses relating to our voluntary early retirement program.

Comparison of 2005 to 2004

Non-interest expense increased 4.5% from (Won)2,808 billion in 2004 to (Won)2,933 billion in 2005. This increase was primarily due to:

a (Won)105 billion increase in other non-interest expenses from (Won)541 billion in 2004 to (Won)646 billion in 2005;

a (Won)49 billion increase in other administrative expenses from (Won)778 billion in 2004 to (Won)827 billion in 2005; and

a (Won)31 billion increase in salaries and employee benefits from (Won)978 billion in 2004 to (Won)1,009 billion in 2005.

These increases were partially offset by:

a (Won)31 billion decline in depreciation and amortization from (Won)268 billion in 2004 to (Won)237 billion in 2005; and

a (Won)29 billion decline in fees and commissions from (Won)243 billion in 2004 to (Won)214 billion in 2005.

Table of Contents

The 19.4% increase in other non-interest expense was mainly due to higher losses associated with loans sold to third parties.

The 6.3% increase in other administrative expenses was mainly due to an increase in rent for employee housing and an increase in advertising expenses.

The 3.2% increase in salaries and employee benefits resulted mainly from increased salary and bonus levels, principally at Woori Bank.

The 11.6% decrease in depreciation and amortization was primarily due to a decrease in the depreciation of our accounting system and a decrease in the amortization of our intangible assets in 2005 compared to 2004.

Fees and commission expenses consist primarily of fees paid on remittances and collections, fees paid on credit cards and fees paid on letters of credit. The 11.9% decrease in fees and commission expenses was primarily due to a decrease in fees paid on letters of credit and collections.

Income Tax Expense (Benefit)

In accordance with Korean tax regulations, income tax is calculated for each legal entity, subsidiary or otherwise, on a stand-alone basis. As a result, losses incurred by a subsidiary cannot be offset against profits earned by another subsidiary. Deferred income taxes are recorded, using the liability method, as a result of all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. A deferred income tax benefit or expense is recognized as a result of changes in deferred tax assets or liabilities between periods. Currently enacted tax rates are used to determine deferred tax amounts.

Because certain of our subsidiaries, including Woori Bank, have significant net operating loss carry-forwards relating to their operations prior to our acquisition of those subsidiaries, the substantial majority of our income tax expense is applied, in effect, to reduce our deficit equity, which is a component of our additional paid-in capital. This accounting treatment will be allowed with respect to the income tax expense of those subsidiaries so long as pre-acquisition net operating loss carry-forwards remain with respect to those subsidiaries. Certain of our subsidiaries also have significant post-acquisition net operating loss carry-forwards. Based on our internal estimates of our future profits, we establish a valuation allowance to the extent that it is more likely than not that such carry-forwards and other deferral tax assets will not be realized. Increases or decreases in such valuation allowance are recorded as income tax expense or benefit, respectively. See Note 31 of the notes to our consolidated financial statements included elsewhere in this annual report.

Comparison of 2006 to 2005

Income tax expense increased from (Won)365 billion in 2005 to (Won)620 billion in 2006, as income before income taxes increased 18.2% from (Won)2,178 billion in 2005 to (Won)2,574 billion in 2006. The increase in income tax expense resulted from the increase to our income before income taxes, as well as a decrease in valuation allowance for net operating loss carry-forwards, which is recorded as part of income tax expense, in 2005, which was repeated to a much lesser degree in 2006. See Critical Accounting Estimates Valuation Allowance for Deferred Tax Assets.

Comparison of 2005 to 2004

Income tax expense changed from a benefit of (Won)392 billion in 2004 to an expense of (Won)365 billion in 2005, as income before income taxes increased 15.7% from (Won)1,882 billion in 2004 to (Won)2,178 billion in 2005. The change in income tax expense resulted primarily from a substantial decrease in valuation allowance for net operating loss carry-forwards, which is recorded as part of income tax expense, in 2004, which was repeated to a much lesser degree in 2005. See Critical Accounting Estimates Valuation Allowance for Deferred Tax Assets.

Table of Contents**Net Income (Loss)**

Due to the factors described above, our net income in 2006 was (Won)1,951 billion, compared to net income of (Won)1,806 billion in 2005 and (Won)2,335 billion in 2004.

Results under Korean GAAP by Principal Business Segment

We compile and analyze financial information for our business segments based upon our internal management accounts, which are prepared in accordance with Korean GAAP. Under Korean GAAP, we currently have six operational business segments: Woori Bank, Kyongnam Bank, Kwangju Bank, credit card operations, securities brokerage services and other operations. Prior to 2004, we had five business segments. In October and December 2004, we acquired a 27.3% voting interest in LGIS, as a result of which LGIS became a consolidated subsidiary under Korean GAAP (but not under U.S. GAAP) effective December 24, 2004. Accordingly, securities brokerage services was added as a separate segment in 2004 and includes the former operations of Woori Securities (which was merged with LGIS in March 2005) and of LGIS after the date it became a consolidated subsidiary. Because LGIS did not become a consolidated subsidiary until December 24, 2004, the income statement data presented below for the securities brokerage services segment for 2004 does not reflect most of the results of operations of LGIS for that year.

The credit card operations segment comprises the former operations of Woori Credit Card, which was merged into Woori Bank in March 2004. Accordingly, the segment information appearing below for Woori Bank does not include the credit card operations it acquired as a result of this merger.

The following table shows, for the periods indicated, our results of operations by segment:

	Net income ⁽¹⁾			Total operating income ⁽²⁾		
	Year ended December 31,			Year ended December 31,		
	2004	2005	2006	2004	2005	2006
	(in billions of Won)					
Woori Bank	(Won) 1,787	(Won) 1,240	(Won) 1,480	(Won) 11,480	(Won) 11,078	(Won) 14,499
Kyongnam Bank	109	133	155	793	817	985
Kwangju Bank	72	125	91	613	674	793

⁽¹⁾ After deduction of income tax and minority interest allocated among each segment.

⁽²⁾ Comprises interest and dividend income, non-interest income, extraordinary gain and reversal of credit loss and other allowances.

- ⁽³⁾ Before eliminations for consolidation, inter-segment transactions and certain differences in classification under our management reporting system.

Table of Contents**Woori Bank**

Woori Bank provides a wide range of banking and other financial services to large corporations, small- and medium-sized enterprises and individuals in Korea. The Woori Bank segment does not include the credit card operations of Woori Bank acquired as a result of its merger with Woori Credit Card in March 2004, which are reported as a separate business segment.

	Year ended December 31,			% Change	
	2004	2005	2006	2004/2005	2005/2006
	(in billions of Won)

Net interest margin	3.0%	3.0%	3.0%		

⁽¹⁾ N/M = not meaningful.

Comparison of 2006 to 2005

Our net income before tax and minority interest expense for this segment increased 38.9% from (Won)1,393 billion in 2005 to (Won)1,935 billion in 2006. Net income after tax also increased 19.4% from (Won)1,240 billion in 2005 to (Won)1,480 billion in 2006.

Interest and dividend income from our Woori Bank operations increased 33.0% from (Won)5,659 billion in 2005 to (Won)7,524 billion in 2006, primarily due to an increase in average lending volumes as well as an overall increase in average yields on interest-earning assets. The average volume of Woori Bank's loans (excluding credit card receivables) on a non-consolidated basis increased 29.8% from (Won)79,039 billion in 2005 to (Won)102,614 billion in 2006, with the majority of this increase resulting from increases in the average volumes of loans to small- and medium-sized enterprises and general purpose household loans (including home equity loans), reflecting increased demand for these loan products as well as Woori Bank's increased marketing efforts. The increase in average yields on interest-earning assets was attributable mainly to the general increase in market rates.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Interest expense increased 54.0% from (Won)2,878 billion in 2005 to (Won)4,433 billion in 2006. The increase in interest expense was primarily due to a 26.1% increase in the average volume of interest-bearing liabilities on a non-consolidated basis from (Won)96,564 billion in 2005 to (Won)121,754 billion in 2006, which was attributable mainly to an increase in the average volume of deposits (principally other time deposits and certificate of deposit accounts) due to Woori Bank's increased marketing efforts to attract deposits in order to fund its higher lending levels, as well as an increase in the average volume of long-term debt due to Woori Bank's efforts to increase stable funding sources. This increase was enhanced by an increase in the average cost of interest-bearing liabilities resulting from the higher interest rate environment in Korea.

Net interest income increased 11.1% from (Won)2,781 billion in 2005 to (Won)3,091 billion in 2006. The increase in net interest income primarily reflected the increase in interest on loans, which was partially offset by a

Table of Contents

decrease in net interest spread, which in turn resulted from a larger increase in the cost of interest-bearing liabilities, particularly for other time deposits and certificate of deposit accounts where the growth in average volume was relatively large, compared to the relatively smaller increase in the average yield on interest-earning assets.

Provision for loan losses and credit-related commitments increased 52.2% from (Won)391 billion in 2005 to (Won)595 billion in 2006. The increase was primarily attributable to the increased minimum provisioning levels applicable to loans classified as normal and precautionary under Korean GAAP as required by the Financial Supervisory Commission, as well as increased lending volumes.

Non-interest income increased 28.7% from (Won)5,419 billion in 2005 to (Won)6,975 billion in 2006, primarily due to an increase in gains on derivatives and foreign exchange trading as well as an increase in gains on disposal of available-for-sale securities.

Non-interest expense, including depreciation and amortization, increased 17.5% from (Won)6,416 billion in 2005 to (Won)7,536 billion in 2006, primarily as a result of increased losses on derivatives and foreign exchange trading.

Comparison of 2005 to 2004

Our net income before tax and minority interest expense for this segment remained relatively stable at (Won)1,393 billion in 2005 compared to (Won)1,395 billion in 2004. In 2004, Woori Bank recognized additional deferred tax assets under Korean GAAP, which resulted in income tax benefit and a positive effect on net income after tax in that year. This was not repeated in 2005 and, accordingly, net income after tax decreased 30.6% from (Won)1,787 billion in 2004 to (Won)1,240 billion in 2005.

Interest and dividend income from our Woori Bank operations remained relatively stable at (Won)5,659 billion in 2005 compared to (Won)5,694 billion in 2004, primarily due to an overall decrease in average yields on interest-earning assets which was largely offset by an increase in average lending volumes. The decline in average yields on interest-earning assets was attributable mainly to the general decline in market rates. The average volume of Woori Bank's loans (excluding credit card receivables) on a non-consolidated basis increased 4.4% from (Won)75,698 billion in 2004 to (Won)79,039 billion in 2005, with the majority of this increase resulting from increases in the average volumes of loans to small- and medium-sized enterprises, general purpose household loans (including home equity loans) and mortgage loans, reflecting increased demand for these loan products.

Interest expense increased 1.1% from (Won)2,847 billion in 2004 to (Won)2,878 billion in 2005. The increase in interest expense was primarily due to a 4.6% increase in the average volume of interest-bearing liabilities on a non-consolidated basis from (Won)92,338 billion in 2004 to (Won)96,564 billion in 2005, which was attributable mainly to an increase in the average volume of deposits (principally certificate of deposit accounts and demand deposits) reflecting increased demand for such products in Korea, as well as an increase in the average volume of long-term debt due to Woori Bank's efforts to increase stable funding sources. This increase was partially offset by a decrease in the average cost of interest-bearing liabilities resulting from the lower interest rate environment and as Woori Bank replaced maturing debentures with lower cost debentures.

Net interest income decreased 2.3% from (Won)2,847 billion in 2004 to (Won)2,781 billion in 2005. The decrease in net interest income reflected a decrease in net interest spread, which in turn resulted from a larger decrease in the average yield on interest-earning assets from 2004 to 2005 compared to the decrease in the average cost of interest-bearing liabilities, particularly for demand deposits and other time deposits

where growth in average volume was relatively large.

Provision for loan losses and credit-related commitments decreased 29.3% from (Won)553 billion in 2004 to (Won)391 billion in 2005. The decrease was primarily attributable to a decrease in provisions in respect of Woori

Table of Contents

Bank's corporate loan portfolio due to the improvement in its overall asset quality in 2005 compared to 2004, including as a result of continued sales of non-performing corporate loans. This decrease was partially offset by increased provisions due to the growth in, and a decline in the overall asset quality of, Woori Bank's lending to small- and medium-sized enterprises and its consumer loan portfolio.

Non-interest income decreased 5.9% from (Won)5,759 billion in 2004 to (Won)5,419 billion in 2005, primarily due to a decrease in gains on derivatives trading and foreign exchange trading and a decrease in gains on disposal of premises and equipment.

Non-interest expense, including depreciation and amortization, decreased 3.6% from (Won)6,658 billion in 2004 to (Won)6,416 billion in 2005, primarily as a result of decreased losses on derivatives trading and foreign exchange trading as a result of the relative stabilization of exchange rates in 2005 compared to 2004.

Kyongnam Bank

Kyongnam Bank is a regional commercial bank that provides financial services in Masan and Ulsan and other parts of the South Kyongsang province in southeastern Korea. Kyongnam Bank concentrates on consumer banking, as well as corporate banking for small- and medium-sized enterprises.

	Year ended December 31,			% Change

Comparison of 2006 to 2005

Our net income before tax and minority interest expense for this segment increased 43.8% from (Won)144 billion in 2005 to (Won)207 billion 2006. Net income after tax also increased 16.5% from (Won)133 billion in 2005 to (Won)155 billion in 2006.

Interest and dividend income from our Kyongnam Bank operations increased 17.0% from (Won)702 billion in 2005 to (Won)821 billion in 2006, primarily due to an increase in average lending volumes and an overall increase in average yields on interest-earning assets. The average volume of Kyongnam Bank's loans increased 21.9% from (Won)7,535 billion in 2005 to (Won)9,185 billion in 2006, with substantially all of this increase resulting from an increase in the average volume of loans to small- and medium-sized enterprises and general purpose household loans, reflecting increased demand for, and Kyongnam Bank's continued focus on providing, these loan products. The increase in interest income resulting mainly from the increased volume of interest-earning assets was enhanced by an increase in the average yields on interest-earning assets resulting from the general increase in market interest rates.

Interest expense increased 31.8% from (Won)324 billion in 2005 to (Won)427 billion in 2006. The increase in interest expense resulted principally from an 8.5% increase in the average volume of deposits from

Table of Contents

(Won)9,477 billion in 2005 to (Won)10,287 billion in 2006, primarily as a result of increased overall demand for bank deposit products (principally other time deposits and certificate of deposit accounts) in Korea as well as an increase in long-term debt. This increase was enhanced by an increase in the average cost of interest-bearing liabilities due to the higher interest rate environment.

Provision for loan losses and credit-related commitments decreased 39.3% from (Won)61 billion in 2005 to (Won)37 billion in 2006, primarily due to an improvement in the asset quality of Kyongnam Bank's consumer and small- and medium-sized enterprise loan portfolios, which was partially offset by increased lending volumes.

Non-interest income increased 42.6% from (Won)115 billion in 2005 to (Won)164 billion in 2006, primarily due to an increase in gains on derivatives and foreign exchange trading as well as an increase in valuation of derivatives held by Kyongnam Bank.

Non-interest expense, including depreciation and amortization, increased 9.0% from (Won)288 billion in 2005 to (Won)314 billion in 2006, primarily due to increases in losses on derivatives and foreign exchange trading and valuation loss for derivatives held by Kyongnam Bank.

Comparison of 2005 to 2004

Our net income before tax and minority interest expense for this segment increased 28.6% from (Won)112 billion in 2004 to (Won)144 billion in 2005. Net income after tax also increased 22.0% from (Won)109 billion in 2004 to (Won)133 billion in 2005.

Interest and dividend income from our Kyongnam Bank operations increased 6.8% from (Won)657 billion in 2004 to (Won)702 billion in 2005, primarily due to an increase in average lending volumes, which was partially offset by an overall decrease in average yields on interest-earning assets. The average volume of Kyongnam Bank's loans increased 10.6% from (Won)6,813 billion in 2004 to (Won)7,535 billion in 2005, with substantially all of this increase resulting from an increase in the average volume of loans to small- and medium-sized enterprises and general purpose household loans, reflecting increased demand for, and Kyongnam Bank's continued focus on providing, these loan products. The increase in interest income resulting mainly from the increased volume of interest-earning assets was partially offset by a decline in the average yields on interest-earning assets resulting from the general decline in market rates.

Interest expense increased 2.9% from (Won)315 billion in 2004 to (Won)324 billion in 2005. The increase in interest expense resulted principally from a 10.4% increase in the average volume of deposits from (Won)8,494 billion in 2004 to (Won)9,477 billion in 2005, primarily as a result of increased overall demand for bank deposit products (principally certificate of deposit accounts and demand deposits) in Korea. This increase was partially offset by decline in the average cost of interest-bearing liabilities due to the lower interest rate environment.

Provision for loan losses and credit-related commitments decreased 39.6% from (Won)101 billion in 2004 to (Won)61 billion in 2005, primarily due to an improvement in the asset quality of Kyongnam Bank's consumer and small- and medium-sized enterprise loan portfolios, which was partially offset by increased lending volumes.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Non-interest income decreased 14.2% from (Won)134 billion in 2004 to (Won)115 billion in 2005, primarily due to decreases in gains on the disposal of available-for-sale securities and recoveries of impairment loss previously recognized on such securities.

Non-interest expense, including depreciation and amortization, increased 9.5% from (Won)263 billion in 2004 to (Won)288 billion in 2005, primarily due to increases in administrative expenses, fees paid on remittances and collections, and losses in connection with the disposal of short-term debt securities.

Table of Contents**Kwangju Bank**

Kwangju Bank is a regional bank that provides financial services in Kwangju and southwestern Korea. Kwangju Bank concentrates on the consumer and small- and medium-sized enterprise banking sectors, offering deposit and loan products to customers in those sectors and, to a lesser extent, large corporate customers.

⁽¹⁾ N/M = not meaningful

Comparison of 2006 to 2005

Our net income before tax and minority interest expense for this segment increased 26.5% from (Won)98 billion in 2005 to (Won)124 in 2006. In 2005, Kwangju Bank recognized additional deferred tax assets under Korean GAAP, which resulted in income tax benefit and a positive effect on net income after tax in that year. This was not repeated in 2006 and, accordingly, net income after tax decreased 21.2% from (Won)125 billion in 2005 to (Won)91 billion in 2006.

Interest and dividend income from our Kwangju Bank operations increased 19.5% from (Won)589 billion in 2005 to (Won)704 billion in 2006, primarily due to an increase in average lending volumes as a result of increased efforts to market loans to small- and medium-sized enterprises. The average volume of Kwangju Bank's loans increased 22.6% from (Won)6,338 billion in 2005 to (Won)7,769 billion in 2006, with the majority of this increase resulting from an increase in the average volume of loans to small- and medium-sized enterprises, reflecting Kwangju Bank's continued focus on providing these loan products. The increase in interest income resulting mainly from the increased volume of interest-earning assets was enhanced by an increase in average yields on interest-earning assets resulting from the general increase in market rates in Korea from 2005 to 2006.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Interest expense increased 32.4% from (Won)296 billion in 2005 to (Won)392 billion in 2006. The increase in interest expense resulted principally from a 18.8% increase in the average volume of deposits from (Won)7,495 billion in 2005 to (Won)8,905 billion in 2006, primarily as a result of Kwangju Bank's increased marketing efforts with respect to bank deposit products (principally other time deposits and certificate of deposit accounts). This increase was enhanced by an increase in the average cost of interest-bearing liabilities due to the higher interest rate environment.

Provision for loan losses and credit-related commitments decreased 32.9% from (Won)72 billion in 2005 to (Won)49 billion in 2006, primarily due to an improvement in the asset quality of Kwangju Bank's existing consumer and small- and medium-sized enterprise loan portfolios, which was partially offset by an increase in lending volume.

Non-interest income increased 4.7% from (Won)85 billion in 2005 to (Won)89 billion in 2006. This increase was due primarily to an increase in recoveries of impairment loss previously recognized on available-for-sale securities.

Table of Contents

Non-interest expense, including depreciation and amortization, increased 10.1% from (Won)207 billion in 2005 to (Won)228 billion in 2006. This increase was due primarily to an increase in expenses in connection with a voluntary early retirement program.

Comparison of 2005 to 2004

Our net income before tax and minority interest expense for this segment decreased 2.0% from (Won)100 billion in 2004 to (Won)98 billion in 2005. In 2005, Kyongnam Bank recognized additional deferred tax assets under Korean GAAP, which resulted in income tax benefit and a positive effect on net income after tax in that year. Accordingly, net income after tax increased 73.6% from (Won)72 billion in 2004 to (Won)125 billion in 2005.

Interest and dividend income from our Kwangju Bank operations increased 10.9% from (Won)531 billion in 2004 to (Won)589 billion in 2005, primarily due to an increase in average lending volumes as a result of greater loan demand and increased efforts to market loans to small- and medium-sized enterprises. The average volume of Kwangju Bank's loans increased 14.6% from (Won)5,530 billion in 2004 to (Won)6,338 billion in 2005, with the majority of this increase resulting from an increase in the average volume of loans to small- and medium-sized enterprises, reflecting increased demand for, and Kwangju Bank's continued focus on providing, these loan products. The increase in interest income resulting mainly from the increased volume of interest-earning assets was partially offset by a decline in average yields on interest-earning assets resulting from the general decline in market rates in Korea from 2004 to 2005.

Interest expense increased 6.1% from (Won)279 billion in 2004 to (Won)296 billion in 2005. The increase in interest expense resulted principally from a 14.4% increase in the average volume of deposits from (Won)6,549 billion in 2004 to (Won)7,495 billion in 2005, primarily as a result of increased overall demand for bank deposit products (principally certificate of deposit accounts and demand deposits) in Korea. This increase was partially offset by a decline in the average cost of interest-bearing liabilities due to the lower interest rate environment.

Provision for loan losses and credit-related commitments increased 20.0% from (Won)60 billion in 2004 to (Won)72 billion in 2005, primarily due to increased lending volumes, which was partially offset by an improvement in the asset quality of Kwangju Bank's existing consumer and small- and medium-sized enterprise loan portfolios.

Non-interest income remained relatively stable at (Won)85 billion in 2005 compared to (Won)82 billion in 2004.

Non-interest expense, including depreciation and amortization, increased 19.0% from (Won)174 billion in 2004 to (Won)207 billion in 2005. This increase was due primarily to an increase in fees paid to collection agencies, an increase in losses associated with derivatives transactions and an increase in provisions associated with other liabilities.

Credit Card Operations

Our credit card operations segment comprises the former operations of Woori Credit Card, which were transferred to Woori Bank as a result of the merger of Woori Credit Card into Woori Bank in March 2004. Woori Credit Card, prior to the merger, provided a variety of credit

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

card-related services and card loans, which are provided by Woori Bank following the merger. This segment does not include the significantly smaller credit card operations of Kyongnam Bank and Kwangju Bank. See Item 4B. Business Overview Credit Cards.

⁽¹⁾ N/M = not meaningful.

Comparison of 2006 to 2005

Our net income before tax and minority interest expense for this segment decreased 12.9% from (Won)256 billion in 2005 to (Won)223 billion in 2006. Net income after tax also decreased 12.9% from (Won)186 billion in 2005 to (Won)162 billion in 2006.

Interest and dividend income for this segment increased 8.7% from (Won)515 billion in 2005 to (Won)560 billion in 2006. This increase was attributable primarily to growth in the average volume of outstanding credit card balances due to increased credit purchases by our cardholders.

Interest expense increased 26.3% from (Won)38 billion in 2005 to (Won)48 billion in 2006 principally due to an increase in our internal funding rate applicable to inter-segment allocation of funds to our credit card segment. This increase was attributable primarily to the general increase in market interest rates.

Provision for loan losses and credit-related commitments increased 507.1% from (Won)14 billion in 2005 to (Won)85 billion in 2006, primarily due to the increased minimum provisioning levels applicable to credit card balances classified as normal and precautionary under Korean GAAP as required by the Financial Supervisory Commission. In 2006, our credit card operations charged off credit card balances amounting to (Won)80 billion, as compared to (Won)168 billion in 2005.

Non-interest income decreased 61.8% from (Won)55 billion in 2005 to (Won)21 billion in 2006. This decrease resulted principally from a decrease in gains on sales of our credit card receivables.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Non-interest expense, which includes depreciation and amortization, decreased 14.1% from (Won)262 billion in 2005 to (Won)225 billion in 2006. This decrease was primarily due to a decrease in selling, general and administrative expenses related to this segment.

Comparison of 2005 to 2004

Our net income (loss) before tax and minority interest expense for this segment changed from a loss of (Won)258 billion in 2004 to income of (Won)256 billion in 2005. In 2005, we recorded (Won)70 billion of income tax expense for this segment, as a result of our net income before tax. In 2004, we had no such income tax expense.

Interest and dividend income for this segment increased 71.1% from (Won)301 billion in 2004 to (Won)515 billion in 2005. This increase was attributable primarily to a reclassification of interest and fees on credit card

Table of Contents

installment purchases and merchant fees from commissions under non-interest income to interest income, as a result of a change in accounting policy under Korean GAAP in 2005.

Interest expense decreased 53.7% from (Won)82 billion in 2004 to (Won)38 billion in 2005 principally due to a decrease in interest expense on debentures and borrowings. This decrease was attributable primarily to a lower average volume of debentures outstanding in 2005 compared to 2004, resulting from reduced funding requirements in light of the decrease in outstanding credit card balances.

Provision for loan losses and credit-related commitments decreased 97.4% from (Won)547 billion in 2004 to (Won)14 billion in 2005, primarily due to an improvement in the asset quality, as well as a decrease in volume, of the credit card portfolio. Delinquencies decreased as a result of continued charge-offs of delinquent balances as well as increased collections on previously delinquent balances. In 2005, our credit card operations charged off credit card balances amounting to (Won)168 billion, as compared to (Won)1,027 billion in 2004.

Non-interest income decreased 81.7% from (Won)300 billion in 2004 to (Won)55 billion in 2005. This decrease resulted principally from the reclassification of interest on credit card installment purchases and merchant fees from non-interest income to interest income in 2005, as discussed above.

Non-interest expense, which includes depreciation and amortization, increased 13.9% from (Won)230 billion in 2004 to (Won)262 billion in 2005. This increase was primarily due to an increase in fees paid to collection agencies.

Securities Brokerage Services

Our securities brokerage services segment currently consists of the operations of Woori Investment & Securities, which was created when we merged Woori Securities with LGIS in March 2005. Woori Investment & Securities is engaged in securities brokerage, investment banking, securities investment and trading and other capital markets activities. In October and December 2004, we acquired a 27.3% voting interest in LGIS, as a result of which LGIS became a consolidated subsidiary under Korean GAAP effective December 24, 2004. However, because the acquisition occurred toward the end of the year, it did not have a material impact on our results of operations for this segment in 2004. Prior to this acquisition, our securities brokerage services segment consisted of the operations of Woori Securities.

Table of Contents

Comparison of 2006 to 2005

Our net income before tax and minority interest expense for this segment increased 38.1% from (Won)239 billion in 2005 to (Won)330 billion in 2006. Net income after tax also increased 45.6% from (Won)160 billion in 2005 to (Won)233 billion in 2006.

Interest and dividend income for this segment increased 68.6% from (Won)210 billion in 2005 to (Won)354 billion in 2006, primarily as a result of increases in interest and dividend payments due to growth in the average volume of securities held by Woori Investment & Securities, particularly government-related debt securities.

Interest expense increased 109.7% from (Won)93 billion in 2005 to (Won)195 billion in 2006, primarily as a result of interest expenses relating to our increased sales of securities subject to repurchase agreements and increased issuances of notes payable.

Provision for loan losses and credit-related commitments changed from a provision of (Won)28 billion in 2005 to a reversal of provision of (Won)7 billion in 2006, primarily as a result of an improvement in the asset quality of Woori Investment & Securities' loan portfolio.

Non-interest income, which includes commission income from our brokerage operations, increased 82.1% from (Won)1,326 billion in 2005 to (Won)2,414 billion in 2006, primarily as a result of increases in trading gains on, and fees and commissions related to, structured securities (including equity-linked securities).

Non-interest expense, which includes depreciation and amortization, increased 91.3% from (Won)1,176 billion in 2005 to (Won)2,250 billion in 2006, primarily as a result of an increase in trading losses on structured securities.

Comparison of 2005 to 2004

Our net income before tax and minority interest expense for this segment increased from (Won)1 billion in 2004 to (Won)239 billion in 2005, primarily as a result of the acquisition of LGIS and its operations, the effects of which were fully reflected commencing in 2005.

Interest and dividend income for this segment increased 707.7% from (Won)26 billion in 2004 to (Won)210 billion in 2005, primarily as a result of the acquisition of LGIS and its operations.

Interest expense increased from (Won)4 billion in 2004 to (Won)93 billion in 2005, primarily as a result of the acquisition of LGIS and its operations.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Provision for loan losses and credit-related commitments increased 833.3% from (Won)3 billion in 2004 to (Won)28 billion in 2005, primarily as a result of the acquisition of LGIS and its operations.

Non-interest income, which includes commission income from our brokerage operations, increased 766.7% from (Won)153 billion in 2004 to (Won)1,326 billion in 2005, primarily as a result of the acquisition of LGIS and its operations.

Non-interest expense, which includes depreciation and amortization, increased 591.8% from (Won)171 billion in 2004 to (Won)1,176 billion in 2005, primarily as a result of the acquisition of LGIS and its operations.

Other Operations

Other operations include the operations of Woori Finance Holdings and all of our subsidiaries that were consolidated under Korean GAAP at December 31, 2006 except Woori Bank, Kyongnam Bank, Kwangju Bank and Woori Investment & Securities, including principally Woori Finance Information System, Woori F&I, Woori

Table of Contents

Credit Suisse Asset Management (which was created as a result of the merger of our subsidiary, Woori Investment Trust Management, into LGITM in March 2005), one special purpose company and a number of other smaller subsidiaries, none of which constituted a separate reportable segment.

Non-interest income	1,848	2,249	2,614	21.7	16.2
Non-interest expense including depreciation and amortization	380	342	576	(10.0)	68.4
Net income before tax and minority interest	1,344	1,801	1,972	34.0	9.5
Income tax expense	11	27	18	145.5	(33.3)
Minority interest	2	2	1		(50.0)
Net income	(Won) 1,331	(Won) 1,772	(Won) 1,953	33.1	10.2

Comparison of 2006 to 2005

Our net income before tax and minority interest expense for this segment increased 9.5% from (Won)1,801 billion in 2005 to (Won)1,972 billion in 2006.

Interest and dividend income increased 48.6% from (Won)37 billion in 2005 to (Won)55 billion in 2006. This increase was primarily due to interest and dividend income from Woori Bank's investments in a private fund operated by Woori Credit Suisse Asset Management that was allocated to this segment in 2006 due to a change in accounting treatment under Korean GAAP.

Interest expense decreased 15.3% from (Won)144 billion in 2005 to (Won)122 billion in 2006. This decrease was primarily due to a decline in interest payments in connection with debt issued by us at the holding company level as a result of a decrease in the average volume of such debt.

Reversal of provision for loan losses remained stable at (Won)1 billion in 2005 and 2006.

Non-interest income increased 16.2% from (Won)2,249 billion in 2005 to (Won)2,614 billion in 2006. This increase was attributable primarily to gains recorded by Woori Finance Holdings in 2006 on valuation of investments in affiliates accounted for under the equity method,

principally Woori Bank, due to increases in net income recorded by our subsidiaries.

Non-interest expense, including depreciation and amortization, increased 68.4% from (Won)342 billion in 2005 to (Won)576 billion in 2006 primarily due to an increase in administrative expenses.

Comparison of 2005 to 2004

Our net income before tax and minority interest expense for this segment increased 33.9% from (Won)1,344 billion in 2004 to (Won)1,801 billion in 2005.

Interest and dividend income decreased 19.6% from (Won)46 billion in 2004 to (Won)37 billion in 2005. This decrease was primarily due to a decrease in average loan volumes in 2005 compared to 2004 due to sales of loans held by the special purpose companies included in this segment.

Table of Contents

Interest expense decreased 15.8% from (Won)172 billion in 2004 to (Won)144 billion in 2005. This decrease was primarily due to a decline in interest payments in connection with debt issued by us at the holding company level as a result of a decrease in the average volume of such debt.

Reversal of provision for loan losses decreased 50.0% from (Won)2 billion in 2004 to (Won)1 billion in 2005.

Non-interest income increased 21.7% from (Won)1,848 billion in 2004 to (Won)2,249 billion in 2005. This increase was attributable primarily to gains recorded by Woori Finance Holdings in 2005 on valuation of investments in affiliates accounted for under the equity method, principally Woori Bank, due to increases in net income recorded by our subsidiaries.

Non-interest expense, including depreciation and amortization, decreased 10.0% from (Won)380 billion in 2004 to (Won)342 billion in 2005 primarily due to a decrease in administrative expenses and a decrease in losses attributed to derivatives trading at the holding company level.

Table of Contents**Item 5B. Liquidity and Capital Resources****Financial Condition****Assets**

The following table sets forth, as of the dates indicated, the principal components of our assets:

	As of December 31,			% Change

(2) Includes home equity loans.

Table of Contents

For further information on our assets, see Item 4B. Business Overview Assets and Liabilities.

Comparison of 2006 to 2005

Our total assets increased 25.9% from (Won)154,915 billion as of December 31, 2005 to (Won)195,081 billion as of December 31, 2006 principally due to a 28.0% increase in domestic commercial loans and consumer credits from (Won)101,662 billion as of December 31, 2005 to (Won)130,116 billion as of December 31, 2006 and a 54.1% increase in available-for-sale securities from (Won)18,288 billion as of December 31, 2005 to (Won)28,174 billion as of December 31, 2006. The increase in domestic commercial loans and consumer credits was largely due to a 47.9% increase in general purpose household loans, including home equity loans, from (Won)34,906 billion as of December 31, 2005 to (Won)51,636 billion as of December 31, 2006 and a 24.2% increase in commercial and industrial loans from (Won)47,232 billion as of December 31, 2005 to (Won)58,681 billion as of December 31, 2006, partially offset by a 25.5% decrease in mortgage loans, from (Won)5,458 billion as of December 31, 2005 to (Won)4,068 billion as of December 31, 2006

Comparison of 2005 to 2004

Our total assets increased 18.3% from (Won)130,914 billion as of December 31, 2004 to (Won)154,915 billion as of December 31, 2005 principally due to a 15.1% increase in domestic commercial loans and consumer credits (including mortgage loans and general purpose household loans) from (Won)88,350 billion as of December 31, 2004 to (Won)101,662 billion as of December 31, 2005 and a 48.7% increase in available-for-sale securities from (Won)12,302 billion as of December 31, 2004 to (Won)18,288 billion as of December 31, 2005. These increases were partially offset by a 30.0% decrease in trading securities from (Won)6,989 billion as of December 31, 2004 to (Won)4,889 billion as of December 31, 2005.

Liabilities and Stockholders Equity

The following table sets forth, as of the dates indicated, the principal components of our liabilities, as well as our stockholders equity:

	As of December 31,			% Change

For further information on our liabilities, see Item 4B. Business Overview Assets and Liabilities.

Table of Contents

Comparison of 2006 to 2005

Our total liabilities increased 25.9% from (Won)146,583 billion as of December 31, 2005 to (Won)184,600 billion as of December 31, 2006. The increase was primarily due to increases in interest-bearing deposits and long-term debt. Our interest-bearing deposits increased 22.2% from (Won)99,609 billion as of December 31, 2005 to (Won)121,688 billion as of December 31, 2006, primarily due to increases in other time deposits and certificate of deposit accounts. Our long-term debt increased 47.8% from (Won)21,850 billion as of December 31, 2005 to (Won)32,298 billion as of December 31, 2006, primarily due to increases in debentures.

Our stockholders' equity increased by 25.3% from (Won)8,321 billion as of December 31, 2005 to (Won)10,426 billion as of December 31, 2006. This increase resulted principally from a substantial reduction in our accumulated deficit, which was attributable to the net income we generated in 2006.

Comparison of 2005 to 2004

Our total liabilities increased 17.8% from (Won)124,412 billion as of December 31, 2004 to (Won)146,583 billion as of December 31, 2005. The increase was primarily due to increases in interest-bearing deposits and long-term debt. Our interest-bearing deposits increased 15.4% from (Won)86,339 billion as of December 31, 2004 to (Won)99,609 billion as of December 31, 2005, primarily due to increases in certificate of deposit and other time deposits. Our long-term debt increased 39.5% from (Won)15,662 billion as of December 31, 2004 to (Won)21,850 billion as of December 31, 2005, primarily due to increases in debentures.

Our stockholders' equity increased by 28.7% from (Won)6,464 billion as of December 31, 2004 to (Won)8,321 billion as of December 31, 2005. This increase resulted principally from a substantial reduction in our accumulated deficit, which was attributable to the net income we generated in 2005. In addition, approximately 9,560 thousand shares of our common stock were issued as a result of the conversion of outstanding convertible bonds held by an affiliate of Lehman Brothers, which in the aggregate added (Won)62 billion to our stockholders' equity. The increase was enhanced by a (Won)110 billion of net unrealized gains on available-for-sale securities.

Realized and Unrealized Losses on Investment Securities

Gross Realized Losses

In 2006, we recognized other-than-temporary impairment losses on equity securities and debt securities of (Won)19 billion and (Won)53 billion, respectively. Most of these losses resulted primarily from an increase in the benchmark interest rate with respect to debt securities in 2006 compared to 2005.

We periodically review our fixed maturity securities and equity securities to determine if any decline in fair value below the carrying value is other-than-temporary on a case-by-case basis. Unrealized gains and losses on available-for-sale securities are excluded from earnings and reported in accumulated other comprehensive income, net of tax pursuant to the guidance of FASB Statement 115, *Accounting for Certain*

Investments in Debt and Equity Securities. Any other-than-temporary declines in the fair value of available-for-sale securities results in the recognition of the related loss in earnings.

In performing reviews, we consider the relevant facts and circumstances relating to each investment and exercise our judgment in determining whether a security is other-than-temporarily impaired. For a discussion of the factors we consider in making that determination, see Item 5A. Operating Results Critical Accounting Estimates Valuation of Securities and Financial Instruments. The risks inherent in reviewing the impairment of any investment include the risks that (1) market results may differ from expectations, (2) facts and circumstances may change in the future and differ from our estimates and assumptions or (3) we may later decide to sell the security as a result of changed circumstances.

To the extent factors contributing to the impairment losses recognized in 2006 affected other investments, we reviewed those investments for other-than-temporary impairment and recorded losses if appropriate.

Table of Contents

There are inherent uncertainties in assessing the fair values we assign to our investments and in determining whether a decline in market value is deemed other-than-temporary. The accounting estimates relating the fair market value of our various securities may be highly susceptible to change from period to period based on factors beyond our control, including market liquidity, the widening of bid/ask spreads or changes in cash flow assertions. Any significant differences between our estimated fair values of our securities on any particular date and either their estimated fair value on a different date or the actual proceeds that we receive upon sale of those securities could result in valuation losses or losses on disposals. See Item 5A. Operating Results Critical Accounting Estimates Valuation of Securities and Financial Instruments.

With respect to securities we sold at a loss in 2006, the amount of the loss recorded at the sales date was (Won)13 billion. These losses related primarily to the disposal of fixed maturity securities of issuers whose deteriorating credit fundamentals, coupled with the continued weakness in general economic conditions in Korea, led to rating downgrades of their securities and increasing uncertainty regarding the future value of their securities.

Securities are classified as available-for-sale when we intend to hold them for an indefinite period of time or when the securities may be utilized for tactical asset/liability purposes and sold from time to time to effectively manage interest rate exposure and resultant prepayment risk and liquidity needs. We currently intend to hold available-for-sale securities with unrealized losses not considered other-than-temporary until they mature, or recover in value. However, if the specific facts and circumstances surrounding a security or the outlook for its industry sector change, we may sell the security and realize a loss.

Gross Unrealized Losses

As of December 31, 2006, the amount of gross unrealized losses on available-for-sale securities included in accumulated other comprehensive income in stockholders' equity was (Won)159 billion. As of that date, we also had (Won)37 billion of gross unrealized losses related to held-to-maturity securities, none of which was recorded in our consolidated financial statements. For a breakdown of these gross unrealized losses by type of security, see Item 4B. Business Overview Capital Markets Activities Securities Investment and Trading.

Substantially all of the fixed maturity securities in our portfolio are rated by external Korean or international rating agencies. Fixed maturity securities are considered investment grade if they are rated BBB-/Baa3 or better. For fixed maturity securities in an unrealized loss position at December 31, 2006, 40.7% (based on fair value) were investment grade, none were below investment grade and 59.3% were not rated. At December 31, 2006, unrealized losses from fixed maturity securities that were below investment grade or not rated represented approximately 43.2% of gross unrealized losses on such securities. We had no material unrealized losses on individual fixed maturity securities or equity securities at December 31, 2006.

As of December 31, 2006, the amount of gross unrealized losses for fixed maturity securities and equity securities (including beneficiary certificates) continuously in an unrealized loss position for the time periods indicated were as follows:

	Fixed Maturities	Equity Securities	Total
	(in billions of Won)		
Less than one year	(Won) 168	4	(Won) 172
More than one year	24		24

Total gross unrealized losses	(Won) 192	4	(Won) 196
-------------------------------	-----------	---	-----------

Table of Contents***Liquidity***

Our primary source of funding has historically been and continues to be customer deposits, particularly lower-cost retail deposits. Deposits amounted to (Won)90,053 billion as of December 31, 2004, (Won)104,146 billion as of December 31, 2005 and (Won)126,539 billion as of December 31, 2006, which represented approximately 76.8%, 75.0% and 72.0% of our total funding, respectively. We have been able to use increases in customer deposits in recent years to finance our operations generally, including meeting a portion of our liquidity requirements. Although the majority of deposits are short-term, it has been our experience that the majority of our depositors generally roll over their deposits at maturity, thus providing us with a stable source of funding.

We also obtain funding through long-term debt, secured borrowings and other borrowed funds to meet our liquidity needs. Long-term debt represented 13.3%, 15.7% and 18.4% of our total funding as of December 31, 2004, 2005 and 2006, respectively. Secured borrowings represented 1.6%, 1.8% and 1.5% of our total funding as of December 31, 2004, 2005 and 2006, respectively. Other borrowed funds, which are borrowings with original maturities of less than one year, represented 7.8%, 7.1% and 6.8% of our total funding as of December 31, 2004, 2005 and 2006, respectively. For further information on our sources of funding, see [Item 4B. Business Overview](#) [Assets and Liabilities](#) [Funding](#).

Our liquidity risks arise from withdrawals of deposits and maturities of our borrowings, as well as our need to fund our lending, trading and investment activities and to manage our trading positions. Our goal in managing our liquidity is to be able, even under adverse conditions, to meet all of our liability repayments on time and to fund all investment opportunities. For a discussion of how we manage our liquidity risk, see [Item 11. Quantitative and Qualitative Disclosures about Market Risk](#) [Liquidity Risk Management](#).

The Financial Supervisory Commission requires each Korean bank to maintain specific Won and foreign currency liquidity ratios. These ratios require each of our banking and credit card subsidiaries to keep its ratio of liquid assets to liquid liabilities above certain minimum levels. For a description of these requirements, see [Item 4B. Business Overview](#) [Supervision and Regulation](#) [Principal Regulations Applicable to Banks](#) [Liquidity](#).

We are a financial holding company, and substantially all of our operations are in our subsidiaries. Accordingly, we rely on distributions from our subsidiaries, direct borrowings and issuances of debt and equity securities to fund our liquidity obligations. We received aggregate dividends from our subsidiaries of (Won)700 billion for 2004, (Won)78 billion for 2005 and (Won)830 billion for 2006. See [Item 3D. Risk Factors](#) [Risks](#) relating to our financial holding company structure and strategy.

In October 2004, we purchased seven million shares of LGIS in the Korean stock market for approximately (Won)55 billion. In addition, in December 2004, we purchased approximately 26 million shares of LGIS from LG Card for approximately (Won)298 billion. As a result, as of December 31, 2004, we owned a 27.3% voting interest in LGIS, which became an equity method investee. We financed these acquisitions through interim dividends of (Won)400 billion from Woori Bank. On March 31, 2005, we merged Woori Securities, our wholly-owned subsidiary, into LGIS and renamed the surviving entity Woori Investment & Securities, which became an equity method investee. See [Item 4B. Business Overview](#) [Capital Markets Activities](#) [Securities Brokerage](#).

Table of Contents**Contractual Obligations and Off-Balance Sheet Arrangements**

The following table sets forth our contractual obligations as of December 31, 2006:

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
(in billions of Won)					
Contractual obligations					
Long-term debt obligations	(Won) 32,298	(Won) 6,813	(Won) 16,258	(Won) 3,844	(Won) 5,383
Deposits ⁽¹⁾	84,639	73,000	8,594	947	2,098

Purchase obligations	356	97	96	105	58
Secured borrowings	2,630	2,230	214	186	
Employee severance plan obligations	34			3	31
Total	(Won) 120,322	(Won) 82,229	(Won) 25,285	(Won) 5,187	(Won) 7,621

⁽¹⁾ Comprising certificate of deposits, other time deposits and mutual installment deposits.

We enter into credit-related financial instruments with off-balance sheet risk in our normal course of business. The primary purpose of those instruments is to generate fee income for us, in return for making credit support and funds available to our customers as required. Such instruments consist primarily of guarantees, commercial letters of credit and unused lines of credit. Guarantees include guarantees for loans, debentures, trade financing arrangements and guarantees for other financings. Contingent liabilities for which guaranteed amounts are not finalized appear as off-balance sheet items in the notes to the financial statements. Such contingent liabilities include, among others, contingent liabilities relating to trade financings and derivatives contracts with respect to foreign exchange rates and interest rates.

We also enter into transactions with certain special purpose entities and variable interest entities, including through the purchase of their subordinated debt and the provision of credit facilities to them.

The following table sets forth our off-balance sheet commitments as of the dates indicated:

	As of December 31,		
	2004	2005	2006
(in billions of Won)			
Guarantees	(Won) 1,276	(Won) 1,793	(Won) 4,011

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Commercial letters of credit	2,911	2,666	3,153
Unused lines of credit:			
Commercial	26,450	40,082	50,550
Credit cards ⁽¹⁾	14,359	14,223	15,733
Consumer	4,823	4,925	6,029
Commitments to extend credit:			
Original term to maturity of less than one year	31		
Original term to maturity of more than one year	1,320	1,749	4,278
Retained interests in special purpose entities	199	182	136
Credit facilities to special purpose entities ⁽²⁾	1,198	2,298	4,215
Investments in special purpose entities ⁽²⁾	864	1,559	3,470
Investments in variable interest entities	85	384	297

⁽¹⁾ Relates to the unused credit card limits that may be cancelled by us at any time.

⁽²⁾ Structured by third parties.

Table of Contents

We analyze our off-balance sheet legally binding credit-related commitments for possible losses associated with such commitments. We review the ability of the counterparties of the underlying credit-related commitments to perform their obligations under the commitments and, if we determine that a loss is probable and estimable, we establish allowances for possible losses in a manner similar to allowances that we would establish with respect to a loan granted under the terms of the applicable commitment. These allowances are reflected as other liabilities in our balance sheet. As of December 31, 2006, we had established allowances for possible losses of (Won)221 billion with respect to our credit-related commitments.

Capital Adequacy

Our subsidiaries Woori Bank, Kyongnam Bank and Kwangju Bank are subject to the capital adequacy requirements of the Financial Supervisory Commission. Those requirements were formulated based on, and are consistent in all material respects with, the capital adequacy accord reached by the Basel Committee of Banking Supervision, Bank for International Settlements in 1988. These subsidiaries are required to maintain a minimum ratio of total capital (Tier I and Tier II capital, less any capital deductions) to risk-weighted assets, as determined by a specified formula, of 8.0%. The computation is based on their consolidated financial statements prepared in accordance with Korean GAAP. The Bank for International Settlements adopted changes to its capital adequacy standards to take into account market risk from equity securities, foreign exchange and derivatives instruments held by banks. These changes became applicable to most Korean banks commencing in 2002. See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Banks Capital Adequacy and Allowances. Beginning on January 1, 2007, we, as a bank holding company, also became subject to the capital adequacy requirements of the Financial Supervisory Commission. See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Capital Adequacy.

Tier I capital is core capital, which consists of paid-in capital, capital surplus, retained earnings, minority interests in consolidated subsidiaries and unpaid share dividends minus deductions. Tier II capital is supplemental capital, which includes allowances for certain loan losses up to 1.25% of total risk-weighted assets, subordinated debts with an initial maturity of at least five years and revaluation surplus. Risk-weighted assets consist of on-balance sheet risk-weighted assets and off-balance sheet risk-weighted assets multiplied by the applicable credit translation rate provided by the Financial Supervisory Commission's guidelines.

Table of Contents

The following tables set forth a summary of the capital and capital adequacy ratios of Woori Bank, our principal banking subsidiary, and the capital adequacy ratios of Kyongnam Bank and Kwangju Bank, as of December 31, 2004, 2005 and 2006, based on applicable Korean GAAP and regulatory reporting standards:

	As of December 31,		
	2004	2005	2006
(in billions of Won)			
Woori Bank			
Tier I capital			
Paid-in capital	(Won) 3,180	(Won) 3,180	(Won) 3,180
Capital reserves	466	465	466
Retained earnings	3,177	3,979	5,196
Minority interests in consolidated subsidiaries	23	3	3
Consolidated adjustment credit/debit			
Others	(893)	(374)	(228)
Total Tier I capital	5,953	7,253	8,617
Tier II capital			
Revaluation reserves			
Allowance for loan losses ⁽¹⁾	665	943	1,511
Subordinated debt ⁽²⁾	1,791	1,660	3,040
Valuation gain on investment securities	356	675	904
Others	574		
Investment in non-consolidated equity investees ⁽³⁾	(45)	(83)	(59)
Total Tier II capital	3,341	3,195	5,396
Total core and supplementary capital	(Won) 9,294	(Won) 10,448	(Won) 14,013
Risk-weighted assets			
On-balance sheet	(Won) 73,512	(Won) 86,224	(Won) 113,484
Off-balance sheet	2,666	3,485	7,360
Total	(Won) 76,178	(Won) 89,709	(Won) 120,844
Tier I capital ratio	7.81%	8.09%	7.13%
Tier II capital ratio	4.39	3.56	4.47
Capital adequacy ratio	12.20	11.65	11.60

(1) Allowances for loan losses in respect of credits classified as normal or precautionary are used to calculate Tier II capital only to the extent such allowances represent up to 1.25% of risk-weighted assets.

(2) Subordinated debt representing up to 50% of Tier I capital is used in the calculation of Tier II capital.

(3) Equity method investees engaged in banking and financial activities of which Woori Bank owns more than 15% are deducted from Tier II capital pursuant to the guidelines of the Financial Supervisory Commission.

Table of Contents**As of December 31, 2004**

	<u>Kyongnam Bank</u>	<u>Kwangju Bank</u>
Tier I capital ratio	8.33%	6.93%
Tier II capital ratio	3.06	4.88
Capital adequacy ratio	11.34	11.81

As of December 31, 2005

	<u>Kyongnam Bank</u>	<u>Kwangju Bank</u>
Tier I capital ratio	7.83%	7.34%
Tier II capital ratio	2.81	4.26
Capital adequacy ratio	10.59	11.60

As of December 31, 2006

	<u>Kyongnam Bank</u>	<u>Kwangju Bank</u>
Tier I capital ratio	7.49%	7.04%
Tier II capital ratio	3.81	4.40
Capital adequacy ratio	11.26	11.44

In June 2006, the Financial Supervisory Service announced that it would implement Basel II in Korea beginning on January 1, 2008. Basel II, which builds upon the initial Basel Capital Accord of 1988, focuses its attention on risk assessment and credit risk in particular. Basel II institutes new measures that will require our commercial banking subsidiaries to:

take into account individual borrower credit when calculating their risk-weighted assets, unlike in the past; and

quantify their operational risk to include explicit capital requirements in their financial statements.

In addition, under Basel II, banks are permitted to follow either a standardized approach, or an internal ratings-based approach with respect to calculating capital requirements. Woori Bank has voluntarily chosen to establish and follow an internal ratings-based approach, which is more stringent in terms of calculating risk sensitivity with respect to its capital requirements, which Kyongnam Bank and Kwangju Bank have chosen to use a standardized approach. Since Woori Bank will be implementing an internal ratings-based approach for the first time in connection with its implementation of Basel II, its internal rating model may require a significant increase in its capital requirements under Korean GAAP, which will require it to either improve its asset quality or raise additional capital.

Recent Accounting Pronouncements

Statement of Financial Accounting Standards (SFAS) No. 159, The Fair Value Option for Financial Assets and Financial Liabilities

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. This Statement provides an option under which a company may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and liabilities. This fair value option will be available on a contract-by-contract basis with changes in fair value recognized in earnings as those changes occur. The statement is effective at the beginning of an entity's first fiscal year that begins after November 15, 2007. Our management is currently evaluating the impact this guidance will have on our financial position, operating results and cash flows.

SFAS No. 157, Fair Value Measurements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This Statement establishes, among other things, a framework for measuring fair value and expands disclosure requirements as

Table of Contents

they relate to fair value measurements. The Statement is effective at the beginning of an entity's first fiscal year that begins after November 15, 2007, with early adoption permitted as of January 1, 2007. Our management is currently evaluating the impact this guidance will have on our financial position, operating results and cash flows.

FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement 109

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement 109. The Interpretation prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. This Interpretation is effective for fiscal years beginning after December 15, 2006. Our management is currently evaluating the impact this guidance will have on our financial position, operating results and cash flows. The effect of adopting FIN 48, if material, will be a transition adjustment to beginning retained earnings in the year of adoption.

FASB Staff Position (FSP) FIN 46(R)-6, Determining the Variability in a Potential VIE

The FASB issued FSP FIN 46(R)-6, Determining the Variability to be Considered in Applying FASB Interpretation No. 46(R) (FSP FIN 46(R)-6), in April 2006. FSP FIN 46(R)-6 addresses the application of FIN 46(R) in determining whether certain contracts or arrangements with a VIE are variable interests by requiring companies to base such evaluations on an analysis of the VIE's purpose and design, rather than its legal form or accounting classification. FSP FIN 46(R)-6 is required to be applied for all reporting period beginning after June 15, 2006. Our management is currently evaluating the effect of FSP FIN 46(R)-6, but does not expect that it will have a significant impact on our financial condition and results of operations.

SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of SFAS No. 140

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of SFAS No. 140. SFAS No. 156 requires that an entity separately recognize a servicing asset or a servicing liability when it undertakes an obligation to service a financial asset under a servicing contract in certain situations. Such servicing assets or servicing liabilities are required to be initially measured at fair value, if practicable. SFAS No. 156 also allows an entity to choose one of two methods when subsequently measuring its servicing assets and servicing liabilities: (1) the amortization method or (2) the fair value measurement method. The amortization method existed under SFAS No. 140 and remains unchanged in (1) allowing entities to amortize their servicing assets or servicing liabilities in proportion to and over the period of estimated net servicing income or net servicing loss and (2) requiring the assessment of those servicing assets or servicing liabilities for impairment or increased obligation based on fair value at each reporting date. The fair value measurement method allows entities to measure their servicing assets or servicing liabilities at fair value on each reporting date and report changes in fair value in earnings in the period in which the change occurs. The statement is effective for fiscal years beginning after September 15, 2006. The adoption of the statement is not expected to have a material impact on our financial position, operating results or cash flows.

SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of SFAS No. 133 and 140

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of SFAS No. 133 and 140, which permits fair value remeasurement of certain hybrid financial instruments, clarifies the scope of SFAS No. 133 regarding interest-only and principal-only strips, and provides further guidance on certain issues regarding beneficial interests in securitized financial assets, concentrations of

Table of Contents

credit risk and qualifying special purpose entities. SFAS No. 155 is effective for all instruments acquired or issued as of the first fiscal year beginning after September 15, 2006 and may be applied to certain other financial instruments held prior to the adoption date. Earlier adoption is permitted as of the beginning of an entity's fiscal year provided that the entity has not yet issued financial statements. The adoption of the statement is not expected to have a material impact on our financial position, operating results or cash flows.

FSP Nos. FAS 115-1 and FAS 124-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments

In March 2004, the Emerging Issue Task Force (EITF) issued EITF Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments. EITF Issue No. 03-1 provides guidance for evaluating whether an investment is other-than-temporarily impaired and requires disclosures about unrealized losses on investments in debt and equity securities. In September 2004, the FASB issued FSP EITF Issue 03-1-1, Effective Date of Paragraphs 10-20 of EITF Issue 03-1, which deferred the effective date of the recognition and measurement provisions of the consensus until further guidance is issued.

In November 2005, the FASB issued FSP Nos. FAS 115-1 and FAS 124-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments, revising the recognition and measurement provisions of EITF Issue No. 03-1. This FSP clarified and reaffirmed existing guidance as to when an investment is considered impaired, whether that impairment is other than temporary, and the measurement of an impairment loss. Certain disclosures about unrealized losses on available-for-sale debt and equity securities that have not been recognized as other-than-temporary impairments are required under the FSP. The FSP is effective for fiscal years beginning after December 15, 2005. The adoption of the FSP did not have a significant impact on our financial position, operating results or cash flows.

The disclosures required by EITF Issue No. 03-1 are included in notes 9 and 10 of the notes to our consolidated financial statements.

EITF Issue No. 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights.

In June 2005, the EITF of the FASB issued EITF Issue No. 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights. EITF Issue No. 04-5 provides that the general partner(s) is presumed to control the limited partnership, unless the limited partners possess either substantive participating rights or the substantive ability to dissolve the limited partnership or otherwise remove the general partner(s) without cause (kick-out rights). Kick-out rights are substantive if they can be exercised by a simple majority of the limited partners' voting interests. The guidance applies to general partners of all new limited partnerships formed and for existing limited partnerships for which the partnership agreements are modified after June 29, 2005, and to general partners in all other limited partnerships no later than the beginning of the first reporting period in fiscal years beginning after December 15, 2005. The adoption of the guidance did not have a material impact on our financial position, operating results or cash flows.

SFAS No. 154, Accounting Changes and Error Corrections a replacement of APB Opinion No. 20 and FASB Statement No. 3

In May 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections a replacement of APB Opinion No. 20 and FASB Statement No. 3. SFAS No. 154 generally requires retrospective application to prior periods' financial statements of all voluntary changes in accounting principle and changes required when a new pronouncement does not include specific transition provisions. The statement applied to us beginning January 1, 2006 and did not have a material impact on our financial position, operating results or cash flows.

Table of Contents

SFAS No. 123 (Revised 2004), Share-Based Payment and Staff Accounting Bulletin No. 107, Share-Based Payment

In December 2004, the FASB issued SFAS No. 123 (Revised 2004), *Share-Based Payment* (SFAS 123R). SFAS 123R replaces SFAS No. 123, *Accounting for Stock-Based Compensation*, and supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*. SFAS 123R requires compensation cost related to share-based payments to employees to be recognized in the financial statements based on their fair value. In April 2005, the U.S. Securities and Exchange Commission issued a rule which delayed the required effective date to the beginning of an entity's fiscal year which begins after June 15, 2005. Accordingly, we adopted SFAS 123R effective January 1, 2006, using the modified prospective method of transition. This method requires the provisions of SFAS 123R to be applied to new awards and awards modified, repurchased or cancelled after the effective date. Additionally, compensation expense attributable to any unvested awards outstanding at the date of adoption must be recognized over the remaining requisite service period. In November 2005, the FASB issued FSP No. FAS 123R-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards*. The FSP provides a transition election for calculating the pool of excess tax benefits available to absorb tax deficiencies recognized subsequent to the adoption of SFAS 123R which may be made up to one year from the initial adoption of SFAS 123R. The adoption of the statement did not have a significant impact on our financial position, operating results or cash flows.

On March 29, 2005, the U.S. Securities and Exchange Commission released Staff Accounting Bulletin No. 107, *Share-Based Payment* (SAB No. 107), which provides guidance on several technical issues regarding the required adoption of SFAS No. 123R. We have adopted SAB No. 107 on January 1, 2006 in conjunction with the adoption of SFAS No. 123R. Compliance with the bulletin did not have a material impact upon our financial position, operating results or cash flows.

Selected Financial Information Under Korean GAAP

The selected consolidated financial and other data shown below have been derived from our consolidated financial statements prepared in accordance with Korean GAAP, including financial accounting standards generally accepted for banking institutions issued by the Korean Securities and Futures Commission. Under Korean GAAP, our inception date is March 27, 2001, which is the date of establishment of the financial holding company.

Under Korean GAAP, consolidated financial statements include the accounts of fully- or majority-owned subsidiaries and substantially controlled affiliates that have assets in excess of (Won)7 billion. Substantial control is deemed to exist when the investor is the largest shareholder and owns more than 30% of the investee's voting shares.

Capital adequacy ratios have been calculated from the consolidated financial statements prepared in accordance with Korean GAAP and using the guidelines issued by the Financial Supervisory Commission.

2. Securities	(1,958)
3. Derivatives	(43)
4. Deferred loan costs	58
5. Fixed assets	(117)
6. Intangible assets	2
7. Tax effect of deficit equity reduction	0
8. Minority interest	28
9. Reversal effect of Daewoo Construction sale	(147)
10. Others	(66)
Total of adjustments	(2,005)
Tax effect of adjustments	494
U.S. GAAP stockholders' equity	(Won) 10,426

The following is a summary of the significant adjustments made to consolidated net income and stockholders' equity to reconcile the U.S. GAAP results with Korean GAAP. The numbered paragraphs below refer to the corresponding item numbers set forth above.

1. We have established the U.S. GAAP allowance for loan losses for impaired non-homogeneous loans based on (1) the present value of expected future cash flows discounted at the loan's effective interest rate, (2) the fair value of the collateral if the loan is collateral dependent or (3) observable market prices if available. For credit card balances and consumer loans, we have established the allowance for loan losses based on an evaluation of the historical performance of the loan portfolios. Allowance for loan losses for corporate loans that are not impaired is based principally on expected loss methodology. See Item 4B. Business Overview Assets and Liabilities Asset Quality of Loans Loan Loss Provisioning Policy.

Table of Contents

Under Korean GAAP, the allowance for loan losses is generally established based on the classification guidelines promulgated by the Financial Supervisory Commission, which require that the minimum allowance be established based on the classification of the loan. We have generally used these guidelines in establishing the minimum reserves and have additionally considered new loan loss provisioning guidelines announced by the Financial Supervisory Commission in November 2004. These guidelines include a new requirement that banks take into account expected losses with respect to credits in establishing their allowances for loan losses.

This adjustment also reflects the effect of the consolidation of certain securitized loans and related reserves, which we recorded as sold under Korean GAAP.

2. Under U.S. GAAP, decreases in fair value with respect to securities classified as available-for-sale or held-to-maturity below the cost basis of an individual security and deemed to be other-than-temporary must be written off through a charge to income. In determining whether a decrease in fair value is other-than-temporary, the following are considered: the length of time and the extent to which the market value has been less than cost; the financial condition and near-term prospects of the issuer; and the intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value. Under Korean GAAP, when the recoverable value of available-for-sale or held-to-maturity securities is less than their amortized acquisition costs (in the case of equity securities, their acquisition costs), and there is any objective evidence of impairment, then their book value is adjusted to their recoverable amount and the amount of their amortized acquisition costs (in the case of equity securities, their acquisition costs) in excess of the recoverable amount less the amount of impairment loss already recognized in the prior periods. This is reflected in current loss as impairment loss. There are other securities which under Korean GAAP are not determined to be permanently impaired for which under U.S. GAAP the impairment has been determined to be other-than-temporary. The adjustment for the cumulative impact of this difference reduces our Korean GAAP stockholders' equity.

3. Under U.S. GAAP, to qualify for hedge accounting, derivatives must be highly effective at reducing the risk associated with the exposure being hedged. Each derivatives instrument must be designated as a hedge, with documentation of the risk management objective and strategy for the hedge, identification of the hedging instrument, the hedged item and risk exposure, and how effectiveness is assessed prospectively and retrospectively. Under Korean GAAP, the criteria that must be met in order to apply hedge accounting are less prescriptive. The majority of the derivatives hedge accounting relationships that we have established under Korean GAAP did not qualify as hedges under U.S. GAAP, except for certain derivatives which qualify as fair value hedges under the short-cut method. This adjustment reflects the effects of the reversal of the hedge accounting treatment under Korean GAAP.

4. Under U.S. GAAP, certain employee and other costs associated with originating loans are deferred and amortized as a yield adjustment over the life of the related loans, net of any related fees received. These costs relate to direct loan origination activities performed by us which include evaluating the prospective borrower's financial condition, recording guarantees, collateral and other security arrangements, negotiating loan terms, preparing and processing loan documents and closing the transaction. Prior to 2003, Korean GAAP required these origination fees to be recognized in income or expense when received or paid and did not provide for deferral. Commencing in 2003, certain origination fees and costs are required to be deferred and amortized as a yield adjustment over the life of the related loans.

5. In 1998 and 2000, we revalued certain fixed assets in accordance with Korean GAAP with the revaluation increment credited to capital surplus. As a result of this revaluation, depreciation expense on these assets was adjusted to reflect the increased basis. Under U.S. GAAP, such a revaluation is not permitted and depreciation expense should be based on historical cost. As part of our normal operations, we occasionally dispose of fixed assets. Due to the difference in carrying value under U.S. GAAP and Korean GAAP noted above, there was an adjustment to reflect the gain or loss from the U.S. GAAP historic cost basis as opposed to the Korean GAAP carrying value.

Table of Contents

6. Under U.S. GAAP, in connection with the acquisition of subsidiaries, we recognized the amount resulting from liabilities in excess of identified assets of the acquired subsidiaries as deficit equity which has been presented as a reduction of additional paid-in capital. Also, we recognized a core deposits intangible as identifiable intangible assets and amortized based on the estimated useful life.

Under Korean GAAP, we recorded the amount resulting from liabilities in excess of identified assets of the acquired subsidiaries as goodwill and amortized based on the estimated useful life.

This adjustments reflect offsetting effect of (1) amortization of core deposits intangible under U.S. GAAP and (2) reversal of amortization of goodwill under Korean GAAP.

7. Under U.S. GAAP, we recorded a tax expense related to the utilization of pre-acquisition net operating loss carry-forwards and deductible temporary differences, both of which were credited to a reduction of deficit equity and core deposit intangible. Under Korean GAAP, the utilization of such items results in a decrease of current income tax expense with a reduction in gross deferred tax assets.

8. The results of each of our subsidiaries have been affected by the conversion to U.S. GAAP from Korean GAAP. Consequently, this adjustment reflects the allocation of the other adjustments to the minority interest.

9. This adjustment reflects the effect of miscellaneous items, which are not individually material.

Item 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Item 6A. *Directors and Senior Management*

Board of Directors

Our board of directors has the ultimate responsibility for managing our affairs. The board currently comprises one standing director and six non-standing directors. Standing directors are directors who are full-time executive officers of Woori Finance Holdings, while non-standing directors are directors who are not full-time executive officers.

Our articles of incorporation provide that the board can have no more than 15 directors. Standing directors must comprise less than 50% of the total number of directors and there must be at least three non-standing directors. Each standing director is elected for a three-year term of office, and each non-standing director is

Table of Contents

elected for a one-year term of office. However, such term of office is extended until or reduced to, as the case may be, the close of the annual general meeting of stockholders convened in respect of the last fiscal year of the director's term of office. These terms are subject to the Korean Commercial Code, the Financial Holding Company Act and related regulations. Each director may be re-elected, subject to these laws and regulations.

Our board of directors meets regularly on a quarterly basis to discuss and resolve various corporate matters. The board may also convene for additional extraordinary meetings at the request of any of the directors.

The names and positions of our directors are set forth below. The business address of all of the directors is our registered office at 203 Hoehyon-dong, 1-ga, Chung-gu, Seoul, Korea.

Standing Directors

Our standing director is as follows:

<u>Name</u>	<u>Age</u>	<u>Position</u>	<u>Director Since</u>	<u>Date Term Ends</u>
Byong-Won Bahk	55	Chairman and Chief Executive	March 30, 2007	March 30, 2010

Our standing director is not involved in any significant business activities outside Woori Finance Holdings and our subsidiaries.

Byong-Won Bahk was elected executive director in March 2007. Prior to that, he was Vice Minister of Finance and Economy of the Republic of Korea. Mr. Bahk holds a Bachelor of Business Administration and a Masters in Law from Seoul National University and a Masters in Economics from the University of Washington.

Non-Standing Directors

Our non-standing directors are selected based on their experience and knowledge in diverse areas, which include law, finance, economics, management and accounting. We currently have six non-standing directors. All were nominated by the Non-standing Director Candidate Nomination Committee and approved by our shareholders.

Our non-standing directors are as follows:

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

<u>Name</u>	<u>Age</u>	<u>Position</u>	<u>Director Since</u>	<u>Year Term Ends</u> ⁽¹⁾
Bong-Soo Park	59	Non-Standing Director	March 28, 2006	2008
Woon-Youl Choi	57	Non-Standing Director	March 28, 2005	2008
Pyoung-Wan Har	62	Non-Standing Director	March 30, 2007	2008
Kwang-Dong Kim	59	Non-Standing Director	March 30, 2007	2008
In-Bong Ha	57	Non-Standing Director	March 30, 2007	2008
Myoung-Soo Choi	50	Non-Standing Director	March 30, 2007	2008

⁽¹⁾ The date on which each term will end will be the date of the general stockholders' meeting in the relevant year.

Bong-Soo Park was elected as a non-standing director in March 2006. He is currently the executive advisor to Korea Institute for International Economics Policy and, prior to that, was president and CEO of Korea Technology Credit Guarantee Fund. He holds a Bachelor of Business Administration from Seoul National University and an M.A. in economics from George Washington University.

Woon-Youl Choi has been a non-standing director since 2005. He currently is the vice president of Sogang University and, prior to that, was a member of the Monetary Policy Committee. He holds a Bachelor of Business Administration from Seoul National University and a Ph.D. in finance from the University of Georgia.

Pyoung-Wan Har was elected a non-standing director in March 2007. He was formerly a standing audit committee member of Korea Exchange Bank. He holds a Bachelor of Business Administration from Sungkyunkwan University and a Masters degree in Business Administration from Yonsei University.

Table of Contents

Kwang-Dong Kim was elected a non-standing director in March 2007. He is currently a professor at the College of Economics and Business Administration, Cheongju University. He holds a B.S. in Political Science and International Studies from Yonsei University and also studied at the Institut International d Administration Publique.

In-Bong Ha was elected a non-standing director in March 2007. He is currently a professor at the School of Economics and Trade, Kyungpook National University. He was formerly President of the Institute of Korean Business Administration and Economy. He holds a B.S. in Geology from Kyungpook National University, a Masters degree in Economics from Kyungpook National University and a Ph.D. in Economics from University of Minnesota.

Myoung-Soo Choi was elected a non-standing director in March 2007. He is currently Director General of Fund Management & Planning Department at KDIC, and was formerly Director General of the Investigation Department at KDIC. He holds a B.S. in Economics from Kyonggi University.

If any director wishes to enter into a transaction with us in his or her personal capacity, he or she must obtain the prior approval of our board of directors. The director having an interest in the transaction may not vote at the meeting during which the board approves the transaction.

Executive Officers

In addition to the standing director who is also our executive officer, we currently have the following three executive officers.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Dongil Kim	54	Senior Managing Director
Seong Mok Park	54	Senior Managing Director
Young-Gaeng Kim	48	Senior Managing Director

Dongil Kim serves as a senior managing director in charge of finance, accounting and risk management. Prior to that, he was an executive director of the KDIC. He holds a Masters degree in business administration from Seogang University.

Seong Mok Park serves as a senior managing director in charge of strategic planning, synergy management and audit and management inspection. Prior to that, he was an executive vice president of Woori Bank. He holds a Bachelor of Business Administration from Korea University.

Young-Gaeng Kim serves as a senior managing director in charge of human resources, IT planning and investor relations. Prior to that, he was a senior managing director of Woori Investment & Securities. He holds a B.A. in economics from Seoul National University and a Masters degree in economics from Illinois University.

None of the executive officers is involved in any significant business activities outside Woori Finance Holdings and our subsidiaries.

Item 6B. Compensation

The aggregate remuneration and benefits-in-kind we paid in 2006 to our chairman and chief executive officer, our non-standing directors and our other executive officers was (Won)3,251 million. We did not set aside any amounts in 2006 for allowances for severance and retirement benefits for those directors and officers. We do not have service contracts with any of these directors or officers that provide for benefits if employment with us is terminated.

On December 4, 2002, our board of directors approved a stock option plan for our chairman and chief executive officer and 61 of our other directors and officers and those of our subsidiaries. In accordance with this

Table of Contents

plan, we have granted stock options to our directors and officers, as well as to directors and officers of our subsidiaries, as described below. See Item 6E. Share Ownership. For all of the options granted in 2002, we will pay in cash the difference between the exercise price and the market price at the date of exercise. Restrictions on the grants, including continued employment for a specified period, lapse after a three-year vesting period. Once vested, options may be exercised until six years from the grant date.

In 2006, we did not grant any stock options and, accordingly, did not recognize any compensation expense for stock options granted under our stock option plan.

Item 6C. Board Practices

See Item 6A. Directors and Senior Management Board of Directors for information concerning the terms of office and contractual employment arrangements with our directors and executive officers.

Committees of the Board of Directors

We currently have eight management committees that serve under the board:

the Board of Directors Management Committee;

the Management Compensation Committee;

the Risk Management Committee;

the Audit Committee;

the Executive Management Committee;

the Ethics Management Committee;

the Non-Standing Director Candidate Nomination Committee; and

the MOU Review Committee.

The board appoints each member of these committees except for members of the Audit Committee, who are elected by our stockholders at the annual general meeting.

Board of Directors Management Committee

This committee consists of one standing director and four non-standing directors: Byong-Won Bahk, Pyoung-Wan Har, Kwang-Dong Kim, Bong-Soo Park and Woon-Youl Choi. The chairman is Byong-Won Bahk. This committee, which functions as a steering committee, enables broad management oversight of our operations. It is responsible for the following:

setting rules and procedures for operations of our board and its various committees;

resolving issues relating to critical management-related matters like restructuring;

formulating management strategies and policies; and

determining policies to enhance our corporate governance structure.

This committee holds regular meetings every six months.

Management Compensation Committee

This committee consists of three non-standing directors: Pyoung-Wan Har, Bong-Soo Park, and Woon-Youl Choi. The chairman is Woon-Youl Choi. It is responsible for all matters relating to the following:

management's performance in developing our business;

Table of Contents

setting goals and targets with respect to and evaluating executive performance; and

fixing executive compensation, including incentives and bonuses.

This committee holds regular meetings every six months.

Risk Management Committee

This committee consists of one standing director and five non-standing directors: Byong-Won Bahk, Pyoung-Wan Har, Bong-Soo Park, Woon-Youl Choi, In-Bong Ha and Myoung-Soo Choi. The chairman is Byong-Won Bahk. It oversees and makes determinations on all issues relating to our group-wide, standardized risk management system. It implements policies regarding, monitors and has ultimate responsibility for managing credit, market and liquidity risk and asset and liability management. The major roles of the Group Risk Management Committee include:

determining and amending risk management policies, guidelines and limits in conformity with the strategy established by the board of directors;

determining the appropriate level of risks that we should be willing to undertake;

allocating risk capital to each subsidiary and approving our subsidiaries' risk limit requests;

reviewing our group-wide risk profile, including the level of risks we are exposed to and the status of our risk management operations; and

monitoring our subsidiaries' compliance with our risk policies.

The Group Risk Management Committee regularly receives reports from the Group Risk Management Council, which is the body that coordinates execution of the commission risk-related policies and decisions with the subsidiary-level risk management committees. See Item 11. Quantitative and Qualitative Disclosures about Market Risk. The committee holds regular meetings every three months.

Audit Committee

This committee consists of six non-standing directors: Bong-Soo Park, Woon-Youl Choi, Pyoung-Wan Har, Kwang-Dong Kim, In-Bong Ha and Myoung-Soo Choi. The chairman is Bong-Soo Park. It reviews all audit and compliance-related matters and makes recommendations to our board. This committee also is responsible for the following:

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

formulating, executing, evaluating and managing internal audit plans (including the financial and operational audits);

approving the appointment and dismissal of the head of the audit team;

approving the appointment of external auditors and evaluating the activities carried out by external auditors;

formulating appropriate measures to correct problems identified from internal audits;

overseeing the reporting systems within our holding company structure and all disclosure rules and requirements to ensure compliance with applicable regulations; and

examining internal procedures or making decisions on material matters that are related to audits as determined by the regulatory authorities, our board or other committees.

This committee also makes recommendations on regulatory issues to the Financial Supervisory Service, if and when deemed necessary. In addition, in connection with general meetings of stockholders, the committee examines the agenda for, and financial statements and other reports to be submitted by, the board of directors to

Table of Contents

each general meeting of stockholders. The internal and external auditors report directly to the Audit Committee chairman. Our external auditor is invited to attend meetings of this committee when needed or when matters pertaining to the audit are discussed. The subsidiary-level Audit Committees, which review subsidiary-level internal practices, report to the Audit Council that in turn reports to this committee.

The committee holds regular meetings every three months.

Executive Management Committee

This committee currently consists of our standing director, Byong-Won Bahk, who is the chairman. This committee is an operational committee that oversees decisions with respect to our operational and management matters. The committee holds meetings whenever it is deemed necessary.

Ethics Management Committee

This committee consists of one standing director and two non-standing directors: Byong-Won Bahk, Kwang-Dong Kim and Myoung-Soo Choi. The chairman is Kwang-Dong Kim. It is responsible for the following:

implementing our code of ethics and amending it when necessary;

managing our ethics policies, including developing procedures and standards of conduct to ensure compliance; and

evaluating our performance under our code of ethics.

This committee holds regular meetings every year.

Non-Standing Director Candidate Nomination Committee

This committee consists of one standing director and four non-standing directors: Byong-Won Bahk, Pyoung-Wan Har, Kwang-Dong Kim, Bong-Soo Park and In-Bong Ha. The chairman is Pyoung-Wan Har. It is responsible for the following:

searching for potential non-standing director candidates; and

reviewing and nominating non-standing director candidates.

This committee holds meetings when a non-standing director needs to be appointed.

MOU Review Committee

This committee consists of the entire board of directors: Byong-Won Bahk, Bong-Soo Park, Woon-Youl Choi, Pyoung-Wan Har, Kwang-Dong Kim, In-Bong Ha and Myoung-Soo Choi. The chairman is Byong-Won Bahk. It is responsible for the following:

evaluating MOU target attainment performances of us and our subsidiaries; and

overseeing and managing the MOU steering committee.

This committee holds regular meetings every three months.

Differences in Corporate Governance Practices

Pursuant to the rules of the New York Stock Exchange applicable to foreign private issuers like us that are listed on the New York Stock Exchange, we are required to disclose significant differences between the

Table of Contents

New York Stock Exchange's corporate governance standards and those that we follow under Korean law. The following is a summary of such significant differences.

NYSE Corporate Governance Standards

Director independence

Listed companies must have a majority of independent directors.

Executive Session

Listed companies must hold meetings solely attended by non-management directors to more effectively check and balance management directors.

Nomination/Corporate Governance Committee

Listed companies must have a nomination/corporate governance committee composed entirely of independent directors.

Compensation Committee

Listed companies must have a compensation committee composed entirely of independent directors.

Audit Committee

Listed companies must have an audit committee that satisfies the requirements of Rule 10A-3 under the Exchange Act.

Audit Committee Additional Requirements

Listed companies must have an audit committee that is composed of more than three directors.

Shareholder Approval of Equity Compensation Plan

Listed companies must allow its shareholders to exercise their voting rights with respect to any material revision to the company's equity compensation plan.

Corporate Governance Guidelines

Listed companies must adopt and disclose corporate governance guidelines.

Code of Business Conduct and Ethics

Listed companies must adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers.

Woori Finance Holdings

The majority of our board of directors is independent (as defined in accordance with the New York Stock Exchange's standards), as six of our seven directors are non-executive directors.

Our non-executive directors hold quarterly meetings, which coincide with the quarterly audit committee meetings, to discuss matters relating to management issues. The audit committee is comprised of six non-executive directors.

We have established a separate non-executive director nomination committee.

We maintain a management compensation committee composed of three non-executive directors.

We maintain an audit committee comprised of six non-executive directors. Accordingly, we are in compliance with Rule 10A-3 under the Exchange Act.

Our audit committee has six members, as described above.

We currently have one equity compensation plan, providing for the grant of stock options to officers and directors.

All material matters related to the granting stock options are provided in our Articles of Incorporation, and any amendments to the Articles of Incorporation are subject to shareholders' approval.

We are currently in the process of drafting and adopting corporate governance guidelines.

We have adopted a Code of Ethics and Business Conduct for Employees, a copy of which is available on our website.

Table of Contents**Item 6D. Employees**

As of December 31, 2006, we had a total of 64 full-time employees, including four officers, at our financial holding company. The following table sets forth information regarding our employees at both our financial holding company and our subsidiaries as of the dates indicated:

	As of December 31,		
	2004	2005	2006
Full-time employees	16,227	15,333	15,528
Contractual employees	5,984	6,303	7,745
Total	22,211	21,636	23,273

Approximately 75.4% of our employees are members of the Korea Financial Industry Union. Since we were established in April 2001, neither we nor any of our subsidiaries has had any significant labor disputes, although we have made certain concessions to our labor unions. See Item 3D. Risk Factors Other risks relating to our business Labor union unrest may disrupt our operations and hinder our ability to continue to reorganize and integrate our operations. In connection with our restructuring process, we have placed a high priority on improving our relationships with our employees and maintaining an atmosphere of trust and cooperation between our labor and management.

At the holding company level and at each of our subsidiaries, our employees have a labor union.

At the holding company level, the duration of our standard employment contract for both management and non-management employees is three years. Our salary system with respect to our employees is based on a combination of the agreed-upon base salary and bonuses reflecting the work productivity of each employee. We believe that the salaries we pay to our employees and management are similar to those of other large financial institutions in Korea. We evaluate employees twice a year (usually in January and July), based on our business performance and evaluations provided by co-workers and superiors. With respect to our compensation program, we do not provide housing leases or loans to our employees.

We have introduced a wage peak system as a result of an agreement reached with our employees in 2005. Under the system, an employee's wages reach a certain peak and then are gradually reduced as the employee reaches retirement age. This will allow the retirement age to be extended by one year to age 59 under the new system, while our employees' wages would be cut incrementally from age 55. We believe that this system is beneficial both for us and our employees as it will encourage early retirements and reduce costs, while allowing employees to defer their retirement by one year. We are also planning to extend a performance-based pay system to all of our employees, as it currently applies only to those who are in the position of vice chief of a department or higher as well as certain departments (such as the Investment Finance department).

We have an employee stock ownership association, which purchases our shares at the request of our employees using their own funds. We do not provide any compensation benefits to employees through such purchases, although the association is entitled to certain pre-emptive rights. See Item 10B. Memorandum and Articles of Association Pre-emptive Rights and Issuances of Additional Shares.

At our subsidiaries, the standard employment contract for management-level and certain non-management employees is three years. Employee compensation is based on a combination of the agreed-upon base salary and bonuses. The bonus system is based on individual performance and business unit performance. We believe that our compensation package for our subsidiaries are similar to those institutions in the same industries. We provide a wide range of benefits to our employees, including medical insurance, employment insurance, workers compensation, life insurance, financial aid for children's tuition, low-interest housing loans and pension plans.

In accordance with our internal policy and the Korean Labor Standard Law, employees with one year or more of service are entitled, upon termination of their employment, to receive a lump sum severance payment

Table of Contents

based upon the length of their service and the rate of pay at the time of termination. Such employees are entitled to receive a lump-sum equivalent to the average of 30 days' pay for each year of service. We make provisions for accrued severance benefits based upon the assumption that all employees terminate their employment with us at the same time. As of December 31, 2006, accrued severance benefits were (Won)351 billion, which represented 100% of the amount required under Financial Supervisory Commission guidelines. As of December 31, 2006, approximately 63% of accrued severance benefits were deposited with insurance companies and other banks. Under Korean law, we may not terminate full time employees except under certain circumstances.

In 2004, 2005 and 2006, we paid (Won)17 billion, (Won)17 and (Won)16 billion for the training of our employees in specialist areas by local and foreign training institutes.

Item 6E. Share Ownership**Common Stock**

The persons who are currently our directors or executive officers, as a group, held no shares of common stock of Woori Finance Holdings as of December 31, 2006.

Stock Options

The following table sets forth information regarding the stock options we have granted to our directors and executive officers, as well as those of our subsidiaries, as of December 31, 2006. All of the stock options listed below relate to common stock of Woori Finance Holdings.

	Total				1,200,000	764,750	375,250

⁽¹⁾ Calculation formula: Exercise price = (Won)6,800 x (1 + the increase rate of the KOSPI Bank Industry Index). The increase rate of the KOSPI Banking Industry Index = ((the average closing index announced for the three months prior to the commencement of the exercise period) (the average closing index announced for the three months prior to the grant of the stock options)) / (the average closing index announced for the three months prior to the grant of the stock options).

⁽²⁾ Granted prior to the merger with Woori Bank in August 2003.

Table of Contents**Item 7. MAJOR STOCKHOLDERS AND RELATED PARTY TRANSACTIONS****Item 7A. Major Stockholders**

The following table presents information regarding the beneficial ownership of our shares at December 31, 2006 by each person or entity known to us to own beneficially more than 5% of our outstanding shares:

Except as otherwise indicated, each stockholder identified by name has:

sole voting and investment power with respect to its shares; and

record and beneficial ownership with respect to its shares.

<u>Beneficial Owner</u>	<u>Number of Shares of Common Stock</u>	<u>Percentage of Total Shares of Common Stock</u>	<u>Percentage of Total Shares on a Fully Diluted Basis</u>
KDIC ⁽¹⁾	628,458,609	77.97%	77.97%

⁽¹⁾ On June 21, 2007, the KDIC disposed of 40,300,000 shares of our common stock, as a result of which the KDIC currently holds 588,158,609 shares of our common stock representing 72.97% of our total shares of common stock.

As of December 31, 2006, none of our standing and non-standing directors owned any shares of our common stock, and our executive officers, excluding standing directors, owned no shares of our common stock.

Other than as set forth above, no other person or entity known by us to be acting in concert, directly or indirectly, jointly or separately, owned 5.0% or more of the outstanding shares of our common stock or exercised control or could exercise control over us as of December 31, 2006.

Item 7B. Related Party Transactions

We regularly engage in transactions with entities affiliated with the government, which as of December 31, 2006 owned 77.97% of our shares through the KDIC. Generally, these transactions include the extension of loans, the purchase of debt securities and other ordinary course activities relating to our banking business. For a description of such transactions, see Item 4B. Business Overview Assets and Liabilities.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

We and our subsidiaries have entered into memoranda of understanding with the KDIC, under which we and our subsidiaries must meet business normalization targets or specific financial targets, or the KDIC has the right to impose sanctions on our directors or employees or to require us or our subsidiaries to take certain actions. In addition, as of December 31, 2006, we owned (Won)2,592 billion of debentures issued by the KDIC, representing 6.0% of our investment securities. As of December 31, 2006, we also had loans outstanding to the KDIC in the aggregate amount of (Won)26 billion. These loans were provided in connection with the public funds injected into us and our subsidiaries. The loans bore interest at the weighted average rate of 4.93% in 2006.

As of December 31, 2004, we had loans outstanding to our executive officers and directors in the aggregate amount of (Won)49 million. As of December 31, 2005, we had loans outstanding to our executive officers and directors in the aggregate amount of (Won)65 million. As of December 31, 2006, we had loans outstanding to our executive officers and directors in the aggregate amount of (Won)39 million. For additional information regarding our transactions with related parties, see Note 38 of the notes to our consolidated financial statements.

All of these loans were made in the ordinary course of business, on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and did not involve more than the normal risk of collectibility or present other unfavorable features.

None of our directors or officers have or had any interest in any transactions effected by us that are or were unusual in their nature or conditions or significant to our business which were effected during the current or immediately preceding year or were effected during an earlier year and remain in any respect outstanding or unperformed.

Legal Proceedings

As a financial institution with diverse operations, we are subject to legal proceedings and regulatory actions in the ordinary course of our business.

Woori Finance Holdings

In April 2005, Shinhan Bank and eight other Korean banks filed a lawsuit at the Seoul Division of the Korean Intellectual Property Tribunal against us, claiming that the trademark Woori Bank is invalid and in violation of the Trademark Law of Korea and the Unfair Competition Prevention and Trade Secret Protection Act of Korea. In October 2005, the tribunal dismissed the lawsuit. In November 2005, these banks filed another related lawsuit at the Patent Court of Korea. This lawsuit is currently pending.

Woori Bank

In December 1998, Hanil Bank (since renamed Woori Bank) was named as the defendant in a lawsuit filed by Ilsung Pharmaceuticals Co., Ltd, which claimed damages of (Won)30 billion. Ilsung Pharmaceuticals alleged that Hanil Bank had illegally reduced its capital. In December 2003, the Seoul District Court dismissed the claim, and Ilsung Pharmaceuticals appealed the decision to the appellate court in January 2004. In January 2007, the appellate court dismissed the appeal, and Ilsung Pharmaceuticals has appealed to the Supreme Court of Korea, where the lawsuit is currently pending.

In October 2001 and October 2002, Hanvit Bank, three other domestic banks and others were named as defendants in three lawsuits filed in the United States by investors claiming damages of US\$880 million. The investors alleged that the defendants aided and abetted Lernout & Hauspie Speech Products in the commission of an alleged fraud. Under U.S. securities laws, the investors alleged the defendants to be jointly liable for

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

their losses arising from the presentation of fraudulent financial statements relating to Lernout & Hauspie. The investors also filed claims under the Racketeer Influenced and Corrupt Organizations (RICO) Act, which could result in treble damages. In February and March 2003, the District Court of New York ruled in favor of Woori Bank (the successor to Hanvit Bank) with respect to all three lawsuits. In June 2003, the District Court of New York reinstated Woori Bank as a defendant due to a ruling in a related case. However, the court ruled that the investors could not claim damages under the RICO Act and the securities laws of the United States and subsequently dismissed the complaint without prejudice due to the lack of diversity and federal jurisdiction. In November 2004, the court also dismissed the common law fraud claims due to the lack of requisite specificity required for federal claims. In December 2004, the investors appealed this decision to the United States Court of Appeals for the Second Circuit. In December 2005, the Court of Appeals affirmed the November 2004 judgment of the District Court dismissing all of plaintiffs' claims filed against the defendant banks. This lawsuit ended in March 2006, as the plaintiffs did not appeal the decision of the Court of Appeals.

In connection with the above lawsuits, in August 2005, Lernout & Hauspie filed a lawsuit in the U.S. District Court for the Southern District of New York against Woori Bank and the other domestic banks named as defendants in the previous lawsuits, alleging that the banks' non-recourse loan transaction with Lernout & Hauspie's subsidiary had contributed to Lernout & Hauspie's improper accounting. In October 2006, the U.S.

Table of Contents

District Court for the Southern District of New York dismissed the complaint, and the plaintiff filed an amended complaint with the same court in November 2006 which is currently pending.

In September 2005, Daewoo Motors brought a lawsuit against Woori Bank in the Seoul District Court, claiming that Woori Bank had improperly set-off Daewoo Motor's deposits to satisfy Daewoo Motor's outstanding debts, resulting in damages of (Won)47.7 billion. Woori Bank countersued with respect to an outstanding loan of (Won)21.2 billion. The Seoul District Court ruled in favor of Woori Bank, and Daewoo Motors appealed the decision. The lawsuit is currently pending at the appellate court.

In June 2004, Ssyangyong filed a lawsuit against Woori Bank as a co-defendant with respect to an incident in which Ssyangyong employees conspired with Bank of New York employees to produce fraudulent import-export documents, causing losses in the aggregate of (Won)113.7 billion for the defendant banks. Woori Bank suffered a loss of (Won)39.3 billion. In August 2005, Seoul District Court ruled in favor of the defendant banks. Ssangyong subsequently appealed the decision, and the appeal was dismissed by the court in May 2007.

Kyobo Life Insurance had brought a lawsuit against Woori Bank in July 2000, claiming damages of (Won)10 billion on the allegation that Woori Bank had violated a trust agreement with Kyobo Life by investing entrusted funds in Saehan's unsecured corporate debt securities, which subsequently underwent an out-of-court workout. The Seoul District Court's decision in September 2001 in favor of Woori Bank was reversed by the appellate court in 2004. Woori Bank subsequently appealed the appellate court's decision to the Supreme Court of Korea. The Supreme Court of Korea's ruling in October 2006 found contributory negligence on the part of Kyobo Life Insurance while recognizing that the entrusted funds should not have been invested in unsecured instruments, and the case was remanded to the appellate court where the lawsuit is currently pending.

Kwangju Bank

On October 24, 2001, The Export-Import Bank of Korea filed a lawsuit in Seoul District Court against Kwangju Bank with respect to its obligations relating to a certificate of guarantee to be issued on behalf of Daewoo Corporation in favor of The Export-Import Bank of Korea in the amount of US\$100 million, of which Kwangju Bank's exposure amounts to US\$41 million. Kwangju Bank has established (Won)38 billion of allowances relating to the lawsuit. In December 2003, the Seoul District Court ruled against Kwangju Bank and required it to issue a certificate of guarantee on behalf of Daewoo Corporation in favor of The Export-Import Bank of Korea. Kwangju Bank appealed this decision to the Seoul High Court, which dismissed the appeal in December 2005. We appealed the decision of the appellate court to the Supreme Court of Korea in January 2006, and the Supreme Court dismissed such appeal in July 2006. Subsequently, The Export-Import Bank filed an additional lawsuit in the Seoul District Court in December 2006 requesting monetary damages in satisfaction of our obligations relating to the certificate of guarantee, and the lawsuit is currently pending.

Other than the legal proceedings discussed above, we and our subsidiaries are not a party to any legal or administrative proceedings and no proceedings are known by us to be contemplated by governmental authorities or third parties, which, if adversely determined, may have a material adverse effect on our financial condition or results of operations.

Dividends

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

We declare our dividend annually at the annual general meeting of stockholders. We generally hold this meeting within three months after the end of each fiscal year. We must pay the annual dividend to the stockholders of record as of the end of the preceding fiscal year within one month after that meeting. We can distribute the annual dividend either in cash or in stock. Cash dividends may be paid out of retained earnings that have not been appropriated to statutory reserves. See [Item 4B. Business Overview](#) [Supervision and Regulation](#) [Principal Regulations Applicable to Financial Holding Companies](#) [Capital Adequacy](#).

Table of Contents

The table below sets forth the dividend per share of common stock and the total amount of dividends declared by Woori Finance Holdings and its predecessor with respect to each of the five years ended December 31, 2006. The dividends set forth below with respect to each year were declared, paid and recorded in the following year.

<u>Fiscal year</u>	<u>Dividends Per Common Share</u>	<u>Dividends Per Preferred Share</u>	<u>Total Amount Of Cash Dividends Paid</u>
	(in Won)		(in millions of Won)
2002 ⁽¹⁾	(Won) 250		(Won) 57,262
2003	100		77,550
2004	150		119,468
2005	400		322,405
2006	600		483,608

⁽¹⁾ The KDIC received dividends of (Won)50 per share of common stock. The total amount of cash dividends paid reflects this lesser amount paid with respect to the shares of common stock owned by the KDIC.

Future dividends will depend upon our revenues, cash flow, financial condition and other factors. As an owner of ADSs, you will be entitled to receive dividends payable in respect of the shares of common stock represented by such ADSs.

For a description of the tax consequences of dividends paid to our shareholders, see Item 10E. Taxation United States Taxation Dividends and Korean Taxation Taxation Dividends.

Item 9B. *Plan of Distribution*

Not Applicable

Item 9C. *Markets*

The Stock Market Division of the Korea Exchange began its operations in 1956. Currently it is the only stock exchange in Korea. It has a single trading floor located in Seoul. The Stock Market Division of the Korea Exchange is a membership organization consisting of most of the Korean securities companies and some Korean branches of foreign securities companies.

As of December 31, 2006, the aggregate market value of equity securities listed on the Stock Market Division of the Korea Exchange was approximately (Won)705 trillion. The average daily trading volume of equity securities for 2006 was approximately 279 million shares with an average transaction value of (Won)3,435 billion.

The Stock Market Division of the Korea Exchange has the power in some circumstances to suspend trading in the shares of a given company or to de-list a security pursuant to the Listing Regulation of the Stock Market Division of the Korea Exchange. The Stock Market Division of the Korea Exchange also restricts share price movements. All listed companies are required to file accounting reports annually, semiannually and quarterly and to release immediately all information that may affect trading in a security.

The Stock Market Division of the Korea Exchange publishes the KOSPI every ten seconds, which is an index of all equity securities listed on the Stock Market Division of the Korea Exchange. On January 1, 1983, the method of computing KOSPI was changed from the Dow Jones method to the aggregate value method. In the new method, the market capitalizations of all listed companies are aggregated, subject to certain adjustments, and this aggregate is expressed as a percentage of the aggregate market capitalization of all listed companies as of the base date, January 4, 1980.

Table of Contents

The following table sets out movements in KOSPI:

	<u>Opening</u>	<u>High</u>	<u>Low</u>	<u>Closing</u>
1982	123.60	134.48	105.99	128.99
1983	122.52	134.46	115.59	121.21

2007 (through June 26)	1,435.26	1,807.85	1,355.79	1,749.55

Source: The Stock Market Division of the Korea Exchange

Shares are quoted ex-dividend on the first trading day of the relevant company's accounting period. Since the calendar year is the accounting period for the majority of listed companies, this may account for the drop in KOSPI between its closing level at the end of one calendar year and its opening level at the beginning of the following calendar year.

With certain exceptions, principally to take account of a share being quoted ex-dividend and ex-rights, permitted upward and downward movements in share prices of any category of shares on any day are limited under the rules of the Stock Market Division of the Korea Exchange to 15% of the previous day's closing price of the shares, rounded down as set out below:

<u>Previous Day's Closing Price (Won)</u>	<u>Rounded Down To Won</u>
Less than 5,000	5
5,000 to less than 10,000	10
10,000 to less than 50,000	50
50,000 to less than 100,000	100

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

100,000 to less than 500,000	500
500,000 or more	1,000

As a consequence, if a particular closing price is the same as the price set by the fluctuation limit, the closing price may not reflect the price at which persons would have been prepared, or would be prepared to continue, if so permitted, to buy and sell shares. Orders are executed on an auction system with priority rules to deal with competing bids and offers.

Table of Contents

Due to deregulation of restrictions on brokerage commission rates, the brokerage commission rate on equity securities transactions may be determined by the parties, subject to commission schedules being filed with the Stock Market Division of the Korea Exchange by the securities companies. In addition, a securities transaction tax of 0.15% of the sales price will generally be imposed on the transfer of shares or certain securities representing rights to subscribe for shares. See Item 3D. Risk Factors Risks relating to our common stock and ADSs. An agriculture and fishery special surtax of 0.15% of the sales prices will also be imposed on transfer of these shares and securities on the Stock Market Division of the Korea Exchange. See Item 10E. Taxation Korean Taxation.

The number of companies listed on the Stock Market Division of the Korea Exchange, the corresponding total market capitalization at the end of the periods indicated and the average daily trading volume for those periods are set forth in the following table:

Year	Market Capitalization on the					
	Last Day of Each Period			Average Daily Trading Volume, Value		
	Number of Listed Companies	(billions of (Won))	(millions of US\$) ⁽¹⁾	(thousands of Shares)	(millions of (Won))	(thousands of US\$) ⁽¹⁾

The Korean securities markets are principally regulated by the Financial Supervisory Commission and the Korean Securities and Exchange Act. The Korean Securities and Exchange Act was fundamentally amended numerous times in recent years to broaden the scope and improve the effectiveness of official supervision of the securities markets. As amended, the law imposes restrictions on insider trading and price manipulation, requires specified information to be made available by listed companies to investors and establishes rules regarding margin trading, proxy solicitation, takeover bids, acquisition of treasury shares and reporting requirements for stockholders holding substantial interests.

Further Opening of the Korean Securities Market

A stock index futures market was opened on May 3, 1996 and a stock index option market was opened on July 7, 1997, in each case at the Stock Market Division of the Korea Exchange. Remittance and repatriation of funds in connection with foreign investment in stock index futures and options are subject to regulations similar to those that govern remittance and repatriation in the context of foreign investment in Korean stocks.

In addition, on January 28, 2002 the Stock Market Division of the Korea Exchange opened a new options market for seven stocks (Samsung Electronics, SK Telecom, KT Corporation, Korea Electric Power Corporation, POSCO, Kookmin Bank and Hyundai Motor Company). Foreigners are permitted to invest in such options subject to the same procedural requirements and investment limitations applicable to Korean investors.

Starting from May 1, 1996, foreign investors were permitted to invest in warrants representing the right to subscribe for shares of a company listed on the Stock Market Division of the Korea Exchange or registered on the KOSDAQ Market Division of the Korea Exchange, subject to certain investment limitations. A foreign investor may not acquire such warrants with respect to shares of a class of a company for which the ceiling on aggregate investment by foreigners has been reached or exceeded.

As of December 30, 1997, foreign investors were permitted to invest in all types of corporate bonds, bonds issued by national or local governments and bonds issued in accordance with certain special laws without being subject to any aggregate or individual investment ceiling. The Financial Supervisory Commission sets forth procedural requirements for such investments. The government announced on February 8, 1998 its plans for the liberalization of the money market with respect to investment in money market instruments by foreigners in 1998. According to the plan, foreigners have been permitted to invest in money market instruments issued by corporations, including commercial paper, starting February 16, 1998 with no restrictions as to the amount. Starting May 25, 1998, foreigners have been permitted to invest in certificates of deposit and repurchase agreements.

Currently, foreigners are permitted to invest in certain securities including shares of Korean companies that are not listed on the Stock Market Division of the Korea Exchange nor registered on the KOSDAQ Market Division of the Korea Exchange and in bonds that are not listed.

Protection of Customer's Interest in Case of Insolvency of Securities Companies

Under Korean law, the relationship between a customer and a securities company in connection with a securities sell or buy order is deemed to be consignment and the securities acquired by a consignment agent (i.e., the securities company) through such sell or buy order are regarded as belonging to the customer in so far as the customer and the consignment agent's creditors are concerned. Therefore, in the event of a bankruptcy or reorganization procedure involving a securities company, the customer of the securities company is entitled to the proceeds of the securities sold by the securities company.

When a customer places a sell order with a securities company which is not a member of the Stock Market Division of the Korea Exchange, and that securities company places a sell order with another securities company, which is a member of the Stock Market Division of the Korea Exchange, the customer is still entitled to the proceeds of the securities sold and received by the non-member company from the member company regardless of the bankruptcy or reorganization of the non-member company.

Under the Korean Securities and Exchange Act, the Stock Market Division of the Korea Exchange is obliged to indemnify any loss or damage incurred by a counterparty as a result of a breach by its members. If a securities company which is a member of the Stock Market Division of the Korea Exchange breaches its obligation in connection with a buy order, the Stock Market Division of the Korea Exchange is obliged to pay the purchase price on behalf of the breaching member. Therefore, the customer can acquire the securities that have been ordered to be purchased by the breaching member.

Table of Contents

When a customer places a buy order with a non-member company and the non-member company places a buy order with a member company, the customer has the legal right to the securities received by the non-member company from the member company because the purchased securities are regarded as belonging to the customer in so far as the customer and the non-member company's creditors are concerned.

As the cash deposited with a securities company is regarded as belonging to the securities company, which is liable to return the same at the request of its customer, the customer cannot take back deposited cash from the securities company if a bankruptcy or reorganization procedure is instituted against the securities company and, therefore, can suffer from loss or damage as a result. However, the Depositor Protection Act provides that the Korea Deposit Insurance Corporation will, upon the request of the investors, pay investors an amount equal to the full amount of cash deposited with a securities company prior to August 1, 1998 in case of the securities company's bankruptcy, liquidation, cancellation of securities business license or other insolvency events. However, this indemnification was available only until the end of 2000. From 2001, the maximum amount to be paid to each customer is limited to (Won)50 million. Pursuant to the Korean Securities and Exchange Act, as amended, securities companies are required to deposit the cash received from its customers to the extent the amount is not covered by the insurance with the Korea Securities Finance Corporation, a special entity established pursuant to the Korean Securities and Exchange Act. Set-off or attachment of cash deposits by securities companies is prohibited. The premiums related to this insurance are paid by securities companies.

Reporting Requirements for Holders of Substantial Interests

Any person who directly or beneficially owns shares of our common stock that have voting rights, whether in the form of shares, ADSs, certificates representing the rights to subscribe for shares or equity-related debt securities (including convertible bonds and bonds with warrants) (which we refer to collectively as "Equity Securities") that, when taken together with the Equity Securities beneficially owned by specified related persons or by any person acting in concert with that person, account for 5% or more of our total issued and outstanding shares (plus the Equity Securities other than the shares held by such persons) must report that holding to the Financial Supervisory Commission and the Stock Market Division of the Korea Exchange no more than five business days after reaching 5%. That person must also report any subsequent change in the ownership interest of 1% or more of our total outstanding shares (plus the Equity Securities other than the shares held by such persons) to the same entities no more than five business days after the change.

Anyone violating these reporting requirements may suffer criminal sanctions, including fines, imprisonment and/or a loss of voting rights with respect to the ownership of Equity Securities exceeding 5%. Furthermore, the Financial Supervisory Commission may order that person to dispose of the unreported Equity Securities.

In addition to the reporting requirements described above, any person whose direct or beneficial ownership of our stock accounts for 10% or more of the total issued and outstanding stock (which we refer to as a "major stockholder") must report the status of its shareholding to the Korea Securities Futures Commission and the Stock Market Division of the Korea Exchange within ten days after it becomes a major stockholder. In addition, the major stockholder must report any subsequent change in its ownership interest to those same entities no later than the tenth day of the month following the month in which the change occurred. A major stockholder that violates these reporting requirements may suffer criminal sanctions, including fines or imprisonment.

Pursuant to the Financial Holding Company Act, any single stockholder (together with any person considered to be a related party to that stockholder) that acquires more than 10% of the voting stock of a Korean financial holding company will be subject to approval requirements. See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restriction on Ownership of a Financial Holding Company.

Table of Contents

Restrictions Applicable to ADSs

An investor does not need Korean governmental approval to sell or purchase our ADSs in the secondary market outside Korea or to withdraw shares of our common stock from our ADS deposit facility or deliver those withdrawn shares in Korea. However, a foreign investor who intends to acquire shares must obtain an investment registration card from the Financial Supervisory Service as described below. Either the foreign investor or its standing proxy in Korea must immediately report its acquisition of the shares to the governor of the Financial Supervisory Commission.

Persons who acquire shares of our common stock by withdrawing those shares from our ADS deposit facility may exercise their preemptive rights for new shares, participate in free distributions and receive dividends on shares without any further Korean governmental approval.

Restriction Applicable to Shares

As a result of amendments to the Foreign Exchange Transaction Laws and Financial Supervisory Commission regulations (which we refer to collectively as the Investment Rules) adopted since January 1992 in connection with the opening and operation of Korea's stock market, foreign investors may generally invest, with limited exceptions and subject to procedural requirements, in all shares of Korean companies, whether listed on the Stock Market Division of the Korea Exchange or registered on the KOSDAQ Market Division of the Korea Exchange. Foreign investors may trade shares listed on the Stock Market Division of the Korea Exchange or registered on the KOSDAQ Market Division of the Korea Exchange only through the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange, except in limited circumstances. These circumstances include:

odd-lot share trading;

acquiring shares (which we refer to as Converted Shares) by exercising warrants, conversion rights or exchange rights under bonds with warrants, convertible bonds or exchangeable bonds or withdrawal rights under depositary receipts issued outside of Korea by a Korean company;

acquiring shares through inheritance, donation, bequest or exercise of stockholders' rights, including pre-emptive rights or rights to participate in free distributions and receive dividends; or

subject to certain exceptions, over-the-counter transactions between foreign investors of a class of shares for which the limit on aggregate acquisition by foreign investors, as explained below, has been reached or exceeded.

For over-the-counter transactions between foreign investors outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange involving a class of shares for which the limit on aggregate acquisition by foreign investors has been reached or exceeded, a securities company licensed in Korea must act as an intermediary. Odd-lot trading of shares outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange must involve a licensed securities company in Korea as the other party. Foreign investors may not engage in margin transactions by borrowing shares from securities companies with respect to shares that are subject to a foreign ownership limit.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

The Investment Rules require a foreign investor who wishes to invest in shares on the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange (including Converted Shares and shares being issued for initial listing on the Stock Market Division of the Korea Exchange or registration on KOSDAQ Market Division of the Korea Exchange) to register with the Financial Supervisory Service before making an investment. This registration requirement does not apply to foreign investors who acquire Converted Shares with the intention of selling the Converted Shares within three months from the acquisition date. The Financial Supervisory Service will issue an investment registration card to each registering

Table of Contents

foreign investor. This card must be presented each time the foreign investor opens a brokerage account with a securities company. Foreign investors eligible to obtain an investment registration card include:

foreign nationals who have not been residing in Korea for a consecutive period of six months or more;

foreign governments;

foreign municipal authorities;

foreign public institutions;

international financial institutions or similar international organizations;

corporations incorporated under foreign laws; and

any person in any additional category designated by decree of the Ministry of Finance and Economy under the Korean Securities and Exchange Act.

All Korean offices of a foreign corporation (as a group) are treated as a separate foreign investor from the offices of the corporation outside Korea for these purposes. However, a foreign corporation or depository issuing depository receipts may obtain one or more investment registration cards in its name in certain circumstances identified in the relevant regulations.

When a foreign investor purchases shares through the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange, it need not make a separate report because the investment registration card system is designed to control and oversee foreign investment through a computer system. If, however, a foreign investor acquires or sells shares outside the Stock Market Division of the Korea Exchange or the KOSDAQ Market Division of the Korea Exchange, that investor or its standing proxy must report that transaction to the governor of the Financial Supervisory Service at that time. In addition, if a foreign investor acquires or sells its shares in connection with a tender offer, odd-lot trading of shares or trades of a class of shares for which the aggregate foreign ownership limit has been reached or exceeded, that investor must ensure that the securities company engaged to facilitate the transaction reports the transaction to the governor of the Financial Supervisory Service. A foreign investor may appoint a standing proxy to exercise stockholders' rights or perform any matters related to the foregoing activities if that investor does not perform these activities itself. A foreign investor may be exempted from complying with the standing proxy rules with the approval of the governor of the Financial Supervisory Service in cases deemed unavoidable by reason of conflict between laws of Korea and the home country of the foreign investor.

Certificates evidencing shares of Korean companies must be kept in the custody of an eligible custodian in Korea. The same entities eligible to act as a standing proxy are eligible to act as a custodian of shares for a non-resident or foreign investor. A foreign investor must ensure that its custodian deposits its shares with the Korea Securities Depository. A foreign investor may be exempted from complying with this deposit requirement with the approval of the governor of the Financial Supervisory Service in circumstances where compliance with that requirement is made impracticable, including cases where compliance would contravene the laws of the foreign investors' home country.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Under the Investment Rules, with certain limitations, foreign investors may acquire shares of a Korean company without being subject to any foreign investment limit. Under one of these limitations, foreign investors may acquire no more than 40% of the outstanding share capital of designated public corporations. Designated public corporations may set a limit on the acquisition of shares by a single person in their articles of incorporation. Currently, the Korea Electric Power Corporation is the only designated public corporation that has set this limit. If a foreign investor acquires 10% or more of the outstanding shares with voting rights of a Korean company, that investment constitutes a foreign direct investment under the Foreign Investment Promotion Act of Korea. Generally, a foreign direct investment must be reported to a foreign exchange bank or the Korea Trade Investment Promotion Agency. The acquisition of a Korean company's shares by a foreign investor may be

Table of Contents

subject to certain foreign or other shareholding restrictions in the event that the restrictions are prescribed in a specific law that regulates the business of the Korean company. For a description of the restrictions applicable to Korean financial holding companies, see Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies.

Under the Foreign Exchange Transaction Laws, a foreign investor who intends to acquire shares must designate a foreign exchange bank at which he must open a foreign currency account and a Won account exclusively for stock investments. Approval is not required for remittance into Korea and deposit of foreign currency funds in the foreign currency account. Foreign currency funds may be transferred from the foreign currency account at the time required to place a deposit for, or settle the purchase price of, a stock purchase transaction to a Won account opened at a securities company. Funds in the foreign currency account may be remitted abroad without any Korean governmental approval.

Dividends on shares of Korean companies are paid in Won. Korean governmental approval is not required for foreign investors to receive dividends on, or the Won proceeds from the sale of, any shares to be paid, received and retained in Korea. Dividends paid on, and the Won proceeds of the sale of, any shares held by a non-resident of Korea must be deposited either in a Won account with the investor's securities company or in its own Won account. Funds in a foreign investor's Won account may be transferred to its foreign currency account or withdrawn for local living expenses up to certain limits. These funds may also be used to make future investments in shares or to pay the subscription price of new shares obtained through the exercise of pre-emptive rights.

Securities companies and asset management companies may open foreign currency accounts with foreign exchange banks exclusively to accommodate foreign investors' stock investments in Korea. Through these accounts, securities companies and asset management companies may enter into limited foreign exchange transactions, such as converting foreign currency funds and Won funds, either as a counterparty to or on behalf of foreign investors, without the investors having to open their own accounts with foreign exchange banks.

Description of Capital Stock

We have set forth below information relating to our capital stock, including brief summaries of some of the provisions of our articles of incorporation, the Korean Commercial Code, the Korean Securities and Exchange Act of 1962, as amended (the Korean Securities and Exchange Act), and other related laws of Korea. These

Table of Contents

summaries do not purport to be complete and are subject to our articles of incorporation, and the applicable provisions of the Korean Securities and Exchange Act, the Korean Commercial Code and those related laws.

Our authorized share capital is 2,400,000,000 shares. Our articles of incorporation authorize us to issue:

shares of common stock, par value (Won)5,000 per share;

shares of non-voting preferred stock, par value (Won)5,000 per share;

shares of non-voting redeemable preferred stock, par value (Won)5,000 per share; and

shares of non-voting convertible preferred stock, par value (Won)5,000 per share.

Subject to applicable laws and regulations, our articles of incorporation authorize us to issue a number of shares of preferred stock equal to as much as one-half of all of the issued and outstanding shares.

As of the date of this annual report, 806,015,340 shares of common stock were issued and 806,012,782 shares of common stock were outstanding. There are no shares of preferred stock currently outstanding. All of the issued and outstanding shares are fully paid and non-assessable and are in registered form. As of the date of this annual report, our authorized but unissued share capital was 1,593,984,660 shares. We may issue the unissued shares without further stockholder approval, but these issuances are subject to a board resolution as provided in the articles of incorporation. See [Pre-emptive Rights and Issuances of Additional Shares](#) and [Dividends and Other Distributions Distribution of Free Shares](#). For a discussion of the history of our share capital, see Note 23 of the notes to our consolidated financial statements and [Item 4A. History and Development of the Company History Establishment of Woori Finance Holdings](#).

Our articles of incorporation allow our stockholders, by special resolution, to grant to our officers, directors and employees stock options exercisable for up to 15% of the total number of our issued and outstanding shares. Our board of directors may also grant stock options exercisable for up to 1% of our issued and outstanding shares. However, any grant by our board of directors must be approved by our stockholders at their next general meeting convened immediately after the grant date. As of December 31, 2006, our officers, directors and employees held options to purchase 375,250 shares of common stock. See [Item 6E. Share Ownership](#).

We issue share certificates in denominations of one, five, ten, 50, 100, 500, 1,000 and 10,000 shares.

Organization and Register

We are a financial holding company established under the Financial Holding Company Act. We were incorporated under the laws of Korea on March 27, 2001 and commenced operations on April 2, 2001. We are registered with the commercial registry office of Seoul District Court. We maintain the register of our stockholders at our principal office in Seoul, Korea. We register transfers of shares on the register of stockholders

upon presentation of the share certificates.

Dividends and Other Distributions

Dividends. We distribute dividends to stockholders in proportion to the number of shares of the relevant class of capital stock they own. Subject to the requirements of the Korean Commercial Code and other applicable laws and regulations, we expect to pay full annual dividends on newly issued stock for the year in which it is issued.

We declare our dividend annually at the annual general meeting of stockholders. We generally hold this meeting within three months after the end of each fiscal year. We must pay the annual dividend to the stockholders of record as of the end of the preceding fiscal year within one month after that meeting. We can distribute the annual dividend either in cash or in stock. However, if we distribute stock, that stock must be

Table of Contents

distributed at par value and, if the market price of the stock is less than their par value, stock dividends cannot exceed one-half of the annual dividend. In addition, we may declare, and distribute in cash, interim dividends once a year pursuant to a board resolution.

Under the Korean Commercial Code and our articles of incorporation, we do not have an obligation to pay any annual or interim dividend unclaimed for five years from the payment date.

The Financial Holding Company Act and related regulations require that each time a Korean financial holding company pays an annual dividend, it must set aside in its legal reserve to stated capital an amount equal to at least one-tenth of its net income after tax until the amount set aside reaches at least the aggregate amount of its stated capital. Unless it sets aside this amount, a Korean financial holding company may not pay an annual dividend. We intend to set aside allowances for loan losses and reserves for severance pay in addition to this legal reserve.

For information regarding taxation of dividends, see Item 10E. Taxation United States Taxation Dividends and Korean Taxation Taxation of Dividends.

Distribution of Free Shares. The Korean Commercial Code permits us to pay dividends in the form of shares out of retained or current earnings. It also permits us to distribute to our stockholders, in the form of free shares, an amount transferred from the capital surplus or legal reserve. We would be required to distribute those free shares pro rata to all stockholders.

Pre-emptive Rights and Issuances of Additional Shares

We may issue authorized but unissued shares as our board of directors may determine, unless otherwise provided in the Korean Commercial Code. We must, however, offer any new shares on uniform terms to all stockholders who have preemptive rights and are listed on our stockholders' register as of the applicable record date. Those stockholders are entitled to subscribe for any newly issued shares in proportion to their existing shareholdings. Our articles of incorporation provide, however, that we may issue new shares to persons other than existing stockholders if those shares are:

publicly offered pursuant to Article 189-3 of the Korean Securities and Exchange Act (where the number of shares so offered may not exceed 50% of our total number of issued shares);

issued to directors or employees as a result of the exercise of stock options we granted to them pursuant to Article 189-4 of the Korean Securities and Exchange Act;

issued to the members of our employee stock ownership association pursuant to Article 191-7 of the Korean Securities and Exchange Act;

issued to specified foreign investors or foreign or domestic financial institutions for managerial needs, strategic technology alliances, emergency financing or debt-to-equity swaps by those financial institutions (where the number of shares so offered may not exceed 50% of our total number of issued shares); or

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

issued to a depositary for the purpose of issuing depositary receipts pursuant to Article 192 of the Korean Securities and Exchange Act (where the number of shares so offered may not exceed 50% of our total number of issued shares).

We must give public notice of pre-emptive rights for new shares and their transferability not less than two weeks before the record date (excluding the period during which the stockholders' register is closed). We will notify the stockholders who are entitled to subscribe for newly issued shares of the deadline for subscription at least two weeks prior to the deadline. If a stockholder fails to subscribe on or before the deadline, its pre-emptive

Table of Contents

rights will lapse. Our board of directors may determine how to distribute shares in respect of which preemptive rights have not been exercised or where fractions of shares occur.

Under the Korean Securities and Exchange Act, each member of our employee stock ownership association, whether or not they are stockholders, has a preemptive right, subject to certain exceptions, to subscribe for up to 20% of any shares we publicly offer. This right is exercisable only so long as the total number of shares so acquired and held by the member does not exceed 20% of the total number of shares then outstanding. As of December 31, 2006, through the stock ownership association our employees owned 41,403 shares, or 0.005%, of our common stock.

In addition, our articles of incorporation permit us to issue convertible bonds or bonds with warrants, each up to an aggregate principal amount of (Won)2 trillion, to persons other than existing stockholders. Under the Korean Commercial Code, we are permitted to distribute convertible bonds or bonds with warrants to persons other than existing stockholders only when we deem that this distribution is necessary for managerial purposes, such as obtaining new technology or improving our financial condition. In the event we issue new shares, the foregoing provision would be applicable notwithstanding any provision in the articles of incorporation allowing issuance of new shares to persons other than existing stockholders. As of December 31, 2006, we had no convertible bonds or bonds with warrants outstanding.

Voting Rights

Each outstanding share of our common stock is entitled to one vote. However, voting rights may not be exercised for shares that we hold or shares that a corporate stockholder holds, if we directly or indirectly own more than one-tenth of the outstanding capital stock of that stockholder. Our articles of incorporation do not prohibit cumulative voting. Accordingly, the Korean Securities and Exchange Act permits holders of an aggregate of 1% or more of our outstanding shares with voting rights to request cumulative voting when electing two or more directors.

The Korean Commercial Code and our articles of incorporation provide that an ordinary resolution may be adopted if the holders of at least a majority of those shares of common stock present or represented at a meeting approve the resolution and the majority also represents at least one-fourth of the total of our issued and outstanding shares of common stock. Holders of non-voting shares (other than enfranchised non-voting shares) are not entitled to vote on any resolution or to receive notice of any general meeting of stockholders, unless the meeting agenda includes considering a resolution on which they are entitled to vote. If our annual general meeting resolves not to pay to holders of preferred stock the annual dividend determined by the board of directors when we issued those shares, those holders will be entitled to exercise voting rights from the general meeting following the meeting adopting that resolution until the end of a meeting where a resolution is passed declaring payment of a dividend on the preferred stock. Holders of the enfranchised preferred stock will have the same rights as holders of common stock to request, receive notice of, attend and vote at a general meeting of stockholders.

The Korean Commercial Code provides that the holders of at least two-thirds of those shares present or represented at a meeting must approve the adoption of a special resolution, and the special majority must represent at least one-third of the total issued and outstanding shares with voting rights of the company. Special resolutions are required to:

amend the articles of incorporation;

change the authorized share capital of the company;

remove a director;

dissolve, merge or consolidate us;

transfer of the whole or a significant part of our business;

Table of Contents

acquire all of the business of another company;

acquire a part of the business of another company that has a material effect on our business of the company; and

issue new shares at a price lower than their par value.

In addition, the holders of our preferred stock must adopt a separate resolution in connection with an amendment to our articles of incorporation, any merger or consolidation or in certain other cases where their rights or interests are adversely affected. Holders of at least two-thirds of the preferred stock present or represented at a meeting must approve the adoption of that resolution, and those holders must hold preferred stock representing at least one-third of our total issued and outstanding preferred stock.

A stockholder may exercise its voting rights by proxy given to another person. The proxy must present the power of attorney before the start of the meeting.

Liquidation Rights

If we are liquidated, the assets remaining after the payment of all our debts, liquidation expenses and taxes will be distributed to stockholders in proportion to the number of shares they hold. Holders of preferred stock have no preferences in liquidation.

General Meetings of Stockholders

There are two types of general meetings of stockholders: annual general meetings and extraordinary general meetings. We are required to convene our annual general meeting within three months after the end of each fiscal year. Subject to a board resolution or court approval, an extraordinary general meeting of stockholders may be held:

when we deem one necessary;

at the request of the holders of an aggregate of 3% or more of our outstanding shares;

at the request of the holders of an aggregate of 0.75% or more of our outstanding shares with voting rights who have held those shares for at least six months; or

at the request of our audit committee.

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

Holders of non-voting shares are entitled to request a general meeting only if their non-voting shares have become enfranchised. Meeting agendas will be determined by our board of directors or proposed by holders of an aggregate of 3% or more of our outstanding shares with voting rights or by holders of an aggregate of 0.25% or more of those shares who have held those shares for at least six months by way of a written proposal to our board of directors at least six weeks before the meeting. We must give stockholders written notices or e-mail notices stating the date, place and agenda of the meeting at least two weeks before the date of the meeting. However, we may give notice to holders of 1% or less of the total number of issued and outstanding shares that are entitled to vote by placing at least two public notices at least two weeks in advance of the meeting in at least two daily newspapers. Stockholders who are not on the stockholders' register as of the record date will not be entitled to receive notice of the general meeting of stockholders or to attend or vote at the meeting. Unless their non-voting shares have been enfranchised, holders of non-voting shares are not entitled to receive notice of or vote at general meetings of stockholders. Holders of enfranchised non-voting shares who are on the stockholders' register as of the record date will be entitled to receive notice of the general meeting of stockholders and to attend and vote at the meeting.

We will generally hold our general meeting of stockholders at our head office, which is our registered head office. If necessary, we may hold the meeting anywhere in the vicinity of our head office.

Table of Contents

Rights of Dissenting Stockholders

Pursuant to the Korean Securities and Exchange Act and the Law on the Improvement of the Structure of the Financial Industry, in certain limited circumstances dissenting holders of shares of our common stock and our preferred stock will have the right to require us to purchase their shares. These circumstances include:

if we transfer all or any significant part of our business;

if we acquire a part of the business of any other company and the acquisition has a material effect on our business; or

if we merge or consolidate with another company.

To exercise this right, stockholders must submit to us a written notice of their intention to dissent prior to the general meeting of stockholders called to approve the transaction in question. Within 20 days (or ten days, in the case of a merger or consolidation under the Law on Improvement of the Structure of the Financial Industry) after the date on which stockholders pass the relevant resolution at the general meeting, the dissenting stockholders must request in writing that we purchase their shares. We must purchase those shares within one month after the end of the request period (within two months after the receipt of the request in the case of a merger or consolidation under the Law on Improvement of the Structure of Financial Industry) at a negotiated price. If we cannot agree with the stockholder on a purchase price through negotiations, the price will be the arithmetic mean of the weighted average of the daily stock prices on the Stock Market Division of the Korea Exchange for:

the two-month period prior to the date the relevant board of directors' resolution was adopted;

the one-month period prior to the date the relevant board of directors' resolution was adopted; and

the one-week period prior to the date the relevant board of directors' resolution was adopted.

Pursuant to the Korean Securities and Exchange Act, the Financial Supervisory Commission may adjust this price if we or at least 30% of the dissenting stockholders do not accept the purchase price and request an adjustment not later than ten days before the end of the one-month purchase period.

In the case of a merger or consolidation pursuant to the Law on the Improvement of the Structure of Financial Industry where the Korean government or the KDIC provides financial support, procedures different from those in the case of a merger or consolidation pursuant to the Korean Securities and Exchange Act will apply. For example, if the relevant parties cannot agree on a purchase price, the price will be determined by an accounting expert and not by the Financial Supervisory Commission. However, a court may adjust this price if we or holders of at least 30% of the shares we must purchase do not accept the purchase price determined by the accounting expert and request an adjustment no later than 30 days from the date of the determination of the purchase price.

Required Disclosure of Ownership

Under Korean and U.S. law, stockholders who beneficially hold more than a certain percentage of our common stock, or who are related to or are acting in concert with other holders of certain percentages of our common stock or our other equity securities, must report their holdings to various governmental authorities. For a description of the required disclosure of ownership, see Item 9C. Markets Reporting Requirements for Holders of Substantial Interests and Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restriction on Ownership of a Financial Holding Company.

Table of Contents

Other Provisions

Record Date. The record date for annual dividends is December 31. For the purpose of determining the holders of shares entitled to annual dividends, we may close the register of our stockholders for the period from January 1 until January 31. Further, the Korean Commercial Code and our articles of incorporation permit us, upon at least two weeks' public notice, to set a record date and/or close the register of stockholders for not more than three months for the purpose of determining the stockholders entitled to certain rights pertaining to the shares. The trading of shares and the related delivery of share certificates may continue while the register of stockholders is closed.

Annual and Interim Reports. At least one week before the annual general meeting of stockholders, we must make our annual report and audited financial statements available for inspection at our head office and at all of our branch offices. We must make copies of our annual reports, our audited financial statements and any resolutions adopted at the general meeting of stockholders available to our stockholders.

Under the Korean Securities and Exchange Act, we must file with the Financial Supervisory Commission and the Stock Market Division of the Korea Exchange:

an annual report within 90 days after the end of each fiscal year;

a half-year report within 45 days after the end of the first six months of each fiscal year; and

quarterly reports within 45 days after the end of the first three months and nine months of each fiscal year.

Copies of these reports will be available for public inspection at the Financial Supervisory Commission and the Stock Market Division of the Korea Exchange.

Transfer of Shares. Under the Korean Commercial Code, share transfers are effected by the delivery of share certificates. The Korean Securities and Exchange Act provides, however, that in case of a company listed on the Stock Market Division of the Korea Exchange (like us), share transfers can be effected using a book-entry system. The transferee must have its name and address registered on our register of stockholders in order to assert its stockholder's rights. For this purpose, stockholders must file their name, address and seal with us. Non-resident stockholders must tell us the name of their proxy in Korea to which we can send notices. Under current Korean regulations, the following entities may act as agents and provide related services for foreign stockholders:

the Korea Securities Depository;

internationally recognized foreign custodians;

investment trust management companies;

futures trading companies;

foreign exchange banks (including domestic branches of foreign banks); and

securities companies (including domestic branches of foreign securities companies).

Foreign stockholders may appoint a standing proxy from the foregoing and generally may not allow any person other than the standing proxy to exercise rights to the acquired shares or perform any tasks related thereto on their behalf.

Foreign exchange controls and securities regulations apply to the transfer of shares by non-residents or non-Koreans. See Item 9C. Markets.

Table of Contents

Except as provided in the Financial Holding Company Act, the maximum aggregate shareholdings of a single stockholder or a person in a special relationship with any stockholder is 10% of our issued and outstanding voting shares. See Item 4B. Business Overview Supervision and Regulation Principal Regulations Applicable to Financial Holding Companies Restriction on Ownership of a Financial Holding Company.

Our Acquisition of Our Shares. We generally may not acquire our own capital stock except in certain limited circumstances, including a reduction in capital.

Notwithstanding the foregoing restrictions, pursuant to the Korean Securities and Exchange Act and after submission of certain reports to the Financial Supervisory Commission, we may purchase our own capital stock on the Stock Market Division of the Korea Exchange or through a tender offer. We may also acquire interests in our capital stock through agreements with trust companies, securities investment companies or investment trust management companies. The aggregate purchase price of our capital stock may not exceed the total amount available for distribution of dividends at the end of the preceding fiscal year.

In general, subsidiaries of which we own 50% or more are not permitted to acquire our capital stock.

Item 10C. Material Contracts

In connection with the receipt of public funds by us and our subsidiaries, we entered into memoranda of understanding with the KDIC. Under the current terms of the memoranda of understanding entered into among us, Woori Bank, Kyongnam Bank, Kwangju Bank and the KDIC, we and our subsidiaries are required to meet financial and business targets and recapitalization goals on a semi-annual and/or quarterly basis until the end of 2008. See Item 4A. History and Development of the Company History Relationship with the Korean Government.

Item 10D. Exchange Controls

General

The Foreign Exchange Transaction Act of Korea and the Presidential Decree and regulations under that Act and Decree regulate investment in Korean securities by non-residents and issuance of securities outside Korea by Korean companies. We collectively refer to these laws and regulations as the Foreign Exchange Transaction Laws. Non-residents may invest in Korean securities only to the extent specifically allowed by the Foreign Exchange Transaction Laws or otherwise permitted by the Ministry of Finance and Economy. The Financial Supervisory Commission has also adopted regulations that restrict foreign investment in Korean securities and regulate the issuance of securities outside Korea by Korean companies, pursuant to its authority under the Korean Securities and Exchange Act.

Under the Foreign Exchange Transaction Laws, if the Korean government deems that:

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

the need to do so is inevitable due to the outbreak of natural calamities, wars, conflict of arms or grave and sudden changes in domestic or foreign economic circumstances or other similar situations, the Ministry of Finance and Economy may temporarily suspend payment, receipt or the whole or part of transactions to which the Foreign Exchange Transaction Laws apply, or impose an obligation to safe-keep, deposit or sell means of payment in or to certain Korean governmental agencies or financial institutions; and

international balance of payments and international finance are confronted or are likely to be confronted with serious difficulty or the movement of capital between Korea and abroad brings or is likely to bring about serious obstacles in carrying out its currency policies, exchange rate policies and other macroeconomic policies, the Ministry of Finance and Economy may take measures to require any

Table of Contents

person who intends to perform capital transactions to obtain permission or to require any person who performs capital transactions to deposit part of the payments received in these transactions at certain Korean governmental agencies or financial institutions.

Both of these actions are subject to limitations specified by the Foreign Exchange Transaction Laws.

Restrictions Applicable to Shares

Under the Foreign Exchange Transaction Laws, a foreign investor who intends to acquire shares must designate a foreign exchange bank at which he must open a foreign currency account and a Won account exclusively for stock investments. Approval is not required for remittance into Korea and deposit of foreign currency funds in the foreign currency account. Foreign currency funds may be transferred from the foreign currency account at the time required to place a deposit for, or settle the purchase price of, a stock purchase transaction to a Won account opened at a securities company. Funds in the foreign currency account may be remitted abroad without any Korean governmental approval.

Dividends on shares of Korean companies are paid in Won. Korean governmental approval is not required for foreign investors to receive dividends on, or the Won proceeds from the sale of, any shares to be paid, received and retained in Korea. Dividends paid on, and the Won proceeds of the sale of, any shares held by a non-resident of Korea must be deposited either in a Won account with the investor's securities company or in its own Won account. Funds in a foreign investor's Won account may be transferred to its foreign currency account or withdrawn for local living expenses up to certain limits. These funds may also be used to make future investments in shares or to pay the subscription price of new shares obtained through the exercise of pre-emptive rights.

Securities companies and investment trust management companies may open foreign currency accounts with foreign exchange banks exclusively to accommodate foreign investors' stock investments in Korea. Through these accounts, securities companies and investment trust management companies may enter into limited foreign exchange transactions, such as converting foreign currency funds and Won funds, either as a counterparty to or on behalf of foreign investors, without the investors having to open their own accounts with foreign exchange banks.

Item 10E. Taxation

United States Taxation

This summary describes certain material U.S. federal income tax consequences for a U.S. holder (as defined below) of acquiring, owning, and disposing of common shares or ADSs. This summary applies to you only if you hold the common shares or ADSs as capital assets for tax purposes. This summary does not apply to you if you are a member of a class of holders subject to special rules, such as:

a dealer in securities or currencies;

a trader in securities that elects to use a mark-to-market method of accounting for securities holdings;

a bank;

a life insurance company;

a tax-exempt organization;

a person that holds common shares or ADSs that are a hedge or that are hedged against interest rate or currency risks;

a person that holds common shares or ADSs as part of a straddle or conversion transaction for tax purposes;

Table of Contents

a person whose functional currency for tax purposes is not the U.S. dollar; or

a person that owns or is deemed to own 10% or more of any class of our stock.

This summary is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations promulgated thereunder, and published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis.

Please consult your own tax advisers concerning the U.S. federal, state, local, and other tax consequences of purchasing, owning, and disposing of common shares or ADSs in your particular circumstances.

For purposes of this summary, you are a U.S. holder if you are the beneficial owner of a common share or an ADS and are:

a citizen or resident of the United States;

a U.S. domestic corporation; or

otherwise subject to U.S. federal income tax on a net income basis with respect to income from the common share or ADS.

In general, if you are the beneficial owner of ADSs, you will be treated as the beneficial owner of the common shares represented by those ADSs for U.S. federal income tax purposes, and no gain or loss will be recognized if you exchange an ADS for the common share represented by that ADS.

Dividends

The gross amount of cash dividends that you receive (prior to deduction of Korean taxes) generally will be subject to U.S. federal income taxation as foreign source dividend income and will not be eligible for the dividends received deduction. Dividends paid in Won will be included in your income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date of your receipt of the dividend, in the case of common shares, or the depository's receipt, in the case of ADSs, regardless of whether the payment is in fact converted into U.S. dollars. If such a dividend is converted into U.S. dollars on the date of receipt, you generally should not be required to recognize foreign currency gain or loss in respect of the dividend income.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual prior to January 1, 2011 with respect to the ADSs will be subject to taxation at a maximum rate of 15% if the dividends are qualified dividends. Dividends paid on the ADSs will be treated as qualified dividends if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid a passive foreign investment company (PFIC). The ADSs are listed on the New York Stock Exchange, and will qualify as readily tradable on an established securities market in the United States so long as they are so listed. Based on our audited financial statements and relevant market and shareholder data, we believe that we were not treated as a PFIC for U.S. federal income tax purposes with respect to our 2005 or

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

2006 taxable year. In addition, based on our audited financial statements and our current expectations regarding the value and nature of our assets, the sources and nature of our income, and relevant market and shareholder data, we do not anticipate becoming a PFIC for our 2007 taxable year.

Distributions of additional shares in respect of common shares or ADSs that are made as part of a pro-rata distribution to all of our stockholders generally will not be subject to U.S. federal income tax.

Table of Contents

Sale or Other Disposition

For U.S. federal income tax purposes, gain or loss you realize on a sale or other disposition of common shares or ADSs generally will be treated as U.S. source capital gain or loss, and will be long-term capital gain or loss if the common shares or ADSs were held for more than one year. Your ability to offset capital losses against ordinary income is limited. Long-term capital gain recognized by an individual U.S. holder generally is subject to taxation at reduced rates.

Foreign Tax Credit Considerations

You should consult your own tax advisers to determine whether you are subject to any special rules that limit your ability to make effective use of foreign tax credits, including the possible adverse impact of failing to take advantage of benefits under the income tax treaty between the United States and Korea. If no such rules apply, you may claim a credit against your U.S. federal income tax liability for Korean taxes withheld from dividends on the common shares or ADSs, so long as you have owned the common shares or ADSs (and not entered into specified kinds of hedging transactions) for at least a 16-day period that includes the ex-dividend date. Instead of claiming a credit, you may, if you so elect, deduct such Korean taxes in computing your taxable income, subject to generally applicable limitations under U.S. tax law. Korean taxes withheld from a distribution of additional shares that is not subject to U.S. tax may be treated for U.S. federal income tax purposes as imposed on general limitation income. Such treatment could affect your ability to utilize any available foreign tax credit in respect of such taxes.

Any Korean securities transaction tax or agriculture and fishery special surtax that you pay will not be creditable for foreign tax credit purposes.

Foreign tax credits will not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions in securities and may not be allowed in respect of arrangements in which a U.S. holder's expected economic profit is insubstantial.

The calculation of foreign tax credits and, in the case of a U.S. holder that elects to deduct foreign taxes, the availability of deductions involve the application of complex rules that depend on a U.S. holder's particular circumstances. You should consult your own tax advisers regarding the creditability or deductibility of such taxes.

U.S. Information Reporting and Backup Withholding Rules

Payments of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries are subject to information reporting and may be subject to backup withholding unless the holder (i) is a corporation or other exempt recipient and demonstrates this when required or (ii) provides a taxpayer identification number and certifies that no loss of exemption from backup withholding has occurred. Holders that are not U.S. persons generally are not subject to information reporting or backup withholding. However, such a holder may be required to provide a certification of its non-U.S. status in connection with payments received within the United States or through a U.S.-related financial intermediary.

Korean Taxation

The following summary of Korean tax considerations applies to you so long as you are not:

a resident of Korea;

a corporation organized under Korean law; or

engaged in a trade or business in Korea through a permanent establishment or a fixed base to which the relevant income is attributable or with which the relevant income is effectively connected.

Table of Contents

Taxation of Dividends on Common Shares or ADSs

We will deduct Korean withholding tax from dividends paid to you (whether payable in cash or in shares) at a rate of 27.5% (inclusive of resident surtax). If you are a beneficial owner of the dividends in a country that has entered into a tax treaty with Korea, you may qualify for a reduced rate of Korean withholding tax. See **Tax Treaties** below for a discussion on treaty benefits. If we distribute to you shares representing a transfer of certain capital reserves or asset revaluation reserves into paid-in capital, that distribution may be subject to Korean withholding tax.

In order to obtain a reduced rate of withholding tax pursuant to an applicable tax treaty, you must submit to us, prior to the dividend payment date, such evidence of tax residence as the Korean tax authorities may require in order to establish your entitlement to the benefits of the applicable tax treaty (which will include a certificate of your tax residency issued by a competent authority of your country of tax residence).

If you hold ADSs, evidence of tax residence may be submitted to us through the depository.

Taxation of Capital Gains From Transfer of Common Shares or ADSs

As a general rule, capital gains earned by non-residents upon transfer of our common shares or ADSs are subject to Korean withholding tax at the lower of (1) 11% (inclusive of resident surtax) of the gross proceeds realized or (2) subject to the production of satisfactory evidence of acquisition costs and certain direct transaction costs of the common shares or ADSs, 27.5% (inclusive of resident surtax) of the net realized gain, unless exempt from Korean income taxation under the applicable Korean tax treaty with the non-resident's country of tax residence. See **Tax Treaties** below for a discussion on treaty benefits. Even if you do not qualify for an exemption under a tax treaty, you will not be subject to the foregoing withholding tax on capital gains if you qualify under the relevant Korean domestic tax law exemptions discussed in the following paragraphs.

In regard to the transfer of our common shares through the Korea Exchange, you will not be subject to the withholding tax on capital gains (as described in the preceding paragraph) if you (1) have no permanent establishment in Korea and (2) did not own or have not owned (together with any shares owned by any entity with which you have a certain special relationship) 25% or more of our total issued and outstanding common shares, which may include the common shares represented by the ADSs, at any time during the calendar year in which the sale occurs and during the five calendar years prior to the calendar year in which the sale occurs.

In regard to the transfer of ADSs outside Korea, under a tax ruling issued by the Korean tax authority in 1995 (the 1995 tax ruling), ADSs are treated as securities separate from the underlying shares represented by such ADSs and, based on such ruling, (i) capital gains earned by you from the transfer of ADSs to another non-resident (other than to such transferee's permanent establishment in Korea) will not be subject to Korean income taxation or withholding tax and (ii) capital gains earned by you (regardless of whether you have a permanent establishment in Korea) will be exempt from Korean income taxation by virtue of the Special Tax Treatment Control Law of Korea, or the STTCL, provided that the issuance of the ADSs is deemed to be an overseas issuance under the STTCL.

If you are subject to tax on capital gains with respect to the sale of ADSs, or of common shares you acquired as a result of a withdrawal, the purchaser or, in the case of the sale of common shares on the Korea Exchange or through a licensed securities company in Korea, the licensed securities company, is required to withhold Korean tax from the sales price in an amount equal to 11% (inclusive of resident surtax) of the gross realization proceeds and to make payment of these amounts to the Korean tax authority, unless you establish your entitlement to an exemption

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

under an applicable tax treaty or domestic tax law or produce satisfactory evidence of your acquisition cost and transaction costs for the common shares or ADSs. To obtain the benefit of an exemption from tax pursuant to an applicable tax treaty, you must submit to the purchaser or the securities company, or through the ADR depository, as the case may be, prior to or at the time of payment, such evidence of your tax residence as

Table of Contents

the Korean tax authorities may require in support of your claim for treaty benefits. See the discussion under **Tax Treaties** below for an additional explanation on claiming treaty benefits.

Tax Treaties

Korea has entered into a number of income tax treaties with other countries (including the United States), which would reduce or exempt Korean withholding tax on dividends on, and capital gains on transfer of, our common shares or ADSs. For example, under the Korea-United States income tax treaty, reduced rates of Korean withholding tax of 16.5% or 11.0% (depending on your shareholding ratio and inclusive of resident surtax) on dividends and an exemption from Korean withholding tax on capital gains are available to residents of the United States that are beneficial owners of the relevant dividend income or capital gains, subject to certain exceptions.

You should inquire for yourself whether you are entitled to the benefit of a tax treaty between Korea and the country where you are a resident. It is the responsibility of the party claiming the benefits of an income tax treaty in respect of dividend payments or capital gains to submit to us, the purchaser or the securities company, as applicable, a certificate as to his tax residence. In the absence of sufficient proof, we, the purchaser or the securities company, as applicable, must withhold tax at the normal rates. Furthermore, in order for you to obtain the benefit of a tax exemption on certain Korean source income (such as dividends or capital gains) under an applicable tax treaty, Korean tax law requires you (or your agent) to submit an application for tax exemption along with a certificate of your tax residency issued by a competent authority of your country of tax residence, subject to certain exceptions. Such application should be submitted to the relevant district tax office by the ninth day of the month following the date of the first payment of such income.

Inheritance Tax and Gift Tax

If you die while holding an ADS or donate an ADS, it is unclear whether, for Korean inheritance and gift tax purposes, you will be treated as the owner of the common shares underlying the ADSs. If the tax authority interprets depositary receipts as the underlying share certificates, you may be treated as the owner of the common shares and your heir or the donee (or in certain circumstances, you as the donor) will be subject to Korean inheritance or gift tax presently at the rate of 10% to 50%, provided that the value of the ADSs or common shares is greater than a specified amount.

If you die while holding a common share or donate a common share, your heir or donee (or in certain circumstances, you as the donor) will be subject to Korean inheritance or gift tax at the same rate as indicated above.

At present, Korea has not entered into any tax treaty relating to inheritance or gift taxes.

Securities Transaction Tax

If you transfer our common shares on the Korea Exchange, you will be subject to securities transaction tax at the rate of 0.15% and an agriculture and fishery special surtax at the rate of 0.15% of the sale price of the common shares. If your transfer of the common shares is not

Edgar Filing: WOORI FINANCE HOLDINGS CO LTD - Form 20-F

made on the Korea Exchange, subject to certain exceptions, you will be subject to securities transaction tax at the rate of 0.5% and will not be subject to an agriculture and fishery special surtax.

With respect to transfers of ADSs, a tax ruling issued in 2004 by the Korean tax authority (the 2004 tax ruling) appears to hold that depositary shares (such as the ADSs) constitute share certificates subject to the securities transaction tax; provided that, under the Securities Transaction Tax Law, the transfer of depositary receipts listed on the New York Stock Exchange, the Nasdaq National Market, or other qualified foreign exchanges is exempt from the securities transaction tax.

In principle, the securities transaction tax, if applicable, must be paid by the transferor of the common shares or ADSs. When the transfer is effected through a securities settlement company, such settlement company is

Table of Contents

generally required to withhold and pay the tax to the tax authorities. When such transfer is made through a securities company only, such securities company is required to withhold and pay the tax. Where the transfer is effected by a non-resident without a permanent establishment in Korea, other than through a securities settlement company or a securities company, the transferee is required to withhold the securities transaction tax.

Item 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Overview

Our lending and trading businesses, our deposit taking activities and our operating environment expose us to various risks. Our risk management goal is to understand, measure and monitor these risks and to ensure that our employees strictly adhere to the policies and procedures that we establish. We seek to take a conservative approach to risk management in order to better insulate our operations from adverse events. Risks we

face include:

credit risk;

market risk (primarily interest rate risk, equity risk and foreign exchange risk);

liquidity risk; and

operational and business risk (including legal risk).

In 2004, we completed the implementation of a group-wide, standardized risk management system (except with respect to credit risk management and operational and business risk management). This system has enhanced our risk management capabilities by enabling us to exchange information among our and our subsidiaries risk management operations. With respect to the credit risk management systems of our banking subsidiaries, we are currently in the process of implementing various upgrades to standardize such systems based on the Woori Bank system. We use our risk management systems to manage our risks within acceptable limits and to otherwise ensure the soundness of our assets and the stability of our operations.

Table of Contents

Standardization Strategy

We began the process of implementing a group-wide, standardized risk management system in connection with the establishment of our financial holding company structure in 2001. At that time, with the assistance of a third-party consultant, we established a task force to review and evaluate the risk management systems that our subsidiaries were using. Following this review, we determined our basic structure of risk management governance and established basic risk management policies and guidelines for our group. This required us to establish a new risk management system, including a centralized risk control system, in order to better measure and address the risks we face and to anticipate potential risks more precisely. We completed the implementation of a group-wide, standardized risk management system (except with respect to credit risk management and operational risk management).

We allocate our total risk capital in accordance with the guidelines set by our Group Risk Management Committee. As described in more detail below, the committee allocates:

risk capital with respect to credit risk, market risk, interest rate risk and operational and business risk with respect to each of our banking subsidiaries;

risk capital with respect to credit risk, market risk, operational and business risk with respect to Woori Investment & Securities; and

operational and business risk with respect to our asset management subsidiaries.

Through our group-wide, standardized risk management system we allocate our risk capital:

with respect to our market risk based on a market value at risk, or VaR, system established in 2003; and

with respect to our interest rate risk based on a Stochastic Simulation which simulates the current portfolio's net present value at a 99.9% confidence level for a one-year holding period.

We do not have a group-wide, standardized risk management system for risk capital with respect to credit risk, although we are currently in the process of implementing various upgrades to standardize the credit risk management systems of our banking subsidiaries based on the Woori Bank system. As a result, we allocate such risk to each subsidiary according to the results of its own system and, on that basis, we allocate risk capital with respect to credit risk.

We allocate our risk capital with respect to operational risk through a standardized approach in accordance with Basel II. We also apply business risk when allocating such risk capital which is based on earnings at risk (a measurement of the relativity of our total earnings).

In 2006, we, in preparation for compliance with the new Basel II capital adequacy requirements to which we will become subject in 2008, began reflecting the correlation between credit risk, market risk, interest rate risk, operational risk and business risk in allocating our risk capital. The correlation between such risks reflects applicable guidelines of the Financial Supervisory Service and the correlation used by our peer banks. In

addition, we also broadened the scope of business risk to cover risks arising from changes in operational environment and increased market competition, and added a new risk type, miscellaneous risk, which covers risk not covered by the existing five types but for which risk capital must be allocated.

Table of Contents

Our risk capital allocation as a percentage of available capital, on a non-consolidated basis, with respect to 2007 is as follows:

	Available capital	Risk capital	Risk appetite	Credit	Market	Interest rate	Operational	Business	Miscellaneous	Correlation Effect	Buffer
(in millions of Won, except percentages)											
Woori Finance Holdings	(Won) 13,425	(Won) 12,124	90.3%	68.0%	9.3%	2.1%	6.5%	5.7%	7.5%	(8.7)%	9.7%
Woori Bank	11,301	9,388	83.1	66.5	7.6	2.2	5.7	3.4	4.7	(7.0)	16.9
Kyongnam Bank	795	687	86.4	66.4	8.7	5.0	8.6	2.9	4.0	(9.2)	13.6
Kwangju Bank	627	543	86.6	71.6	5.4	3.7	8.6	1.4	3.7	(7.8)	13.4
Woori Investment & Securities	2,121	1,575	74.3	25.1	19.8	0.0	4.8	15.4	19.8	(10.6)	25.7
Woori Credit Suisse Asset Management ⁽¹⁾	68.1	28.0	41.1	0.0	0.0	0.0	7.9	34.9	1.5	(3.2)	59.0

⁽¹⁾ Formerly known as Woori Asset Management.

Organization

We have a multi-tiered risk management governance structure. Our Group Risk Management Committee is ultimately responsible for group-wide risk management, and directs the various subordinate risk management entities. The Group Risk Management Council answers directly to the Group Risk Management Committee and coordinates the execution of these directives with the risk management units of our subsidiaries. Each Subsidiary Risk Management Committee, based on the Group Risk Management Committee's directives, determines risk management strategies and implements risk management policies and guidelines for the relevant subsidiary, sets the subsidiary's operational and business risk management policies and guidelines and directs the subsidiary's risk management units, but must keep within the group's risk guidelines. The Subsidiary Risk Management Committees generally receive input from their respective subsidiary risk management units, who report directly to the Group Risk Management Council.

Table of Contents

The following chart sets out our risk management governance structure as of the date of this annual report:

From July 2004, we instituted a "double report" system with respect to our risk management procedures. Each of our subsidiary risk management units is required to submit risk management reports directly to the Group Risk Management Team. Through this internal reporting system, we are able to better ascertain and strengthen the monitoring of our subsidiaries' risk management and are able to quickly address any deviation from our group-wide risk policies.

The Group Risk Management Committee, the Group Risk Management Council and the Subsidiary Risk Management Committees are responsible for managing risks relating to credit, markets, asset and liability management and liquidity. A number of other entities are responsible for managing our operational risks, including the following:

the Audit Council, which reports to our board-level Audit Committee, coordinates the execution of our operational and business risk management policy, particularly with regard to internal subsidiary practices;

the Legal and Compliance Department monitors compliance risk and makes suggestions regarding regulatory issues to the Financial Supervisory Service; and

each Subsidiary Risk Management Committee manages operational risks at the relevant subsidiary.

Table of Contents

Group Risk Management Committee

The Group Risk Management Committee is our highest decision-making body with respect to our risk management operations. Our board of directors has delegated to it the authority and responsibility for ensuring effective executive-level management of the risks we face. The committee's major activities include:

determining and amending risk management strategies, policies, guidelines and limits in conformity with the strategy established by our board of directors;

determining the appropriate level of risks that we should be willing to undertake;

allocating risk capital to each subsidiary and approving our subsidiaries' risk limit requests;

reviewing our group-wide risk profile, including the level of risks we are exposed to and the status of our risk management operations; and

monitoring our subsidiaries' compliance with our risk policies.

The Group Risk Management Committee is comprised of our chief executive officer and five non-standing outside directors. It operates independently from all business units and individual board members, and reports directly to our board of directors. In addition, since our chief executive officer is a member of the committee, he is kept aware of risk-related issues. Our Group Risk Management Committee convenes at least quarterly, and makes decisions by majority vote of the attending members. At least a majority of the committee members must attend to constitute a quorum.

Group Risk Management Council

Our Group Risk Management Council is responsible for coordinating with the risk management units of our subsidiaries to ensure that they execute the policies, guidelines and limits established by the Group Risk Management Committee. The council's major activities include:

analyzing our risk status using information provided by our subsidiary-level risk management units;

adjusting the integrated risk-adjusted capital allocation plan and risk limits for each of our subsidiaries;

reviewing the key decisions of each Subsidiary Risk Management Committee, and discussing and resolving any risk management issues raised by those committees;

coordinating issues relating to the integration of our risk management functions; and

performing any other duties delegated by the Group Risk Management Committee.

The Group Risk Management Council is comprised of our chief risk management officer and the head of our risk management department and the managing directors of the risk management units of all of our operating subsidiaries. It operates independently from all business units, and reports directly to the Group Risk Management Committee. Our Group Risk Management Council convenes on a monthly basis.

Our subsidiaries, in most cases through their respective risk management units, provide a variety of information to the Group Risk Management Council, including:

reports regarding the status of overall risk management, the status of limit compliance, and analysis and results of quarterly credit reviews, stress testing and back testing; and

reports regarding asset and liability management matters, including changes in risk-weighted assets and the status of our credit portfolio on a periodic basis.

Table of Contents

Subsidiary Risk Management Committees

Each of our subsidiaries has delegated risk management authority to its Subsidiary Risk Management Committee. Each Subsidiary Risk Management Committee measures and monitors the various risks faced by the relevant subsidiary and reports to that subsidiary's board of directors regarding decisions that it makes on risk management issues. It also makes strategic decisions regarding the operations of the relevant subsidiary, such as allocating credit risk limits, setting total exposure limits and market risk-related limits and determining which market risk derivatives instruments the subsidiary can trade. The major activities of each Subsidiary Risk Management Committee include:

determining and monitoring risk policies, guidelines, limits and tolerance levels and the level of subsidiary risk in accordance with group policy;

reviewing and analyzing the subsidiary's risk profile;

setting limits for and adjusting the risk-adjusted capital allocation plan and risk levels for each business unit within the subsidiary; and

monitoring compliance with our group-wide risk management policies and practices at the business unit and subsidiary level.

Each Subsidiary Risk Management Committee is comprised of the subsidiary's chief executive officer, the non-standing members of its board of directors and the director of its risk management unit.

Each of Woori Bank, Kyongnam Bank and Kwangju Bank has established a similar multi-tiered risk management governance structure for its own operations. For example, Woori Bank's Subsidiary Risk Management Committee is ultimately responsible for risk management for that subsidiary. It provides subsidiary board-level direction regarding risk management strategies and policies to the risk management bodies that are subordinate to it. Woori Bank's Executive Risk Management Committee, which reports directly to Woori Bank's Subsidiary Risk Management Committee and chief executive officer, implements the execution of these strategies and policies. The Executive Risk Management Committee works with various Woori Bank business units, including its risk management unit and its individual business units. The risk management unit directly implements and ensures compliance with Woori Bank's risk policies and guidelines at an operational level. It monitors market risk and liquidity risk on a daily basis and credit risk and interest rate repricing gap risk on a monthly basis and makes quarterly reports to the Subsidiary Risk Management Committee and to the Group Risk Management Council.

Our non-banking subsidiaries generally have more simplified risk management governance structures.

Credit Risk Management

Our credit risk management policy objectives are to improve our asset quality, reduce our non-performing loans and minimize our concentration risk through a diversified, balanced and risk-weighted loan portfolio. Through our subsidiaries, we manage credit risk and continually monitor and improve our credit risk-related policies and guidelines to reflect changing risks in our business and the industries and sectors in which our customers operate.

We believe that an essential part of achieving our credit risk management objectives is implementing a group-wide, standardized risk management system so that we can identify and manage the risks generated by our businesses using a standardized system. Each of Woori Bank, Kyongnam Bank and Kwangju Bank is currently using its own credit risk management system. In particular, Woori Bank, together with several external consultants, has since 2003 developed and implemented a centralized credit risk management system called the CREPIA system. In September 2004, we completed the development and implementation of the CREPIA system. CREPIA is a credit risk management system which combines credit risk management and the credit approval

Table of Contents

process on a transactional level with respect to individual borrowers and approval with respect to each individual loan or credit. This system quantifies credit risk using a distance of default methodology. This methodology relies on a review of a borrower's cash flow and the level of its outstanding credit, and identifies the point at which a borrower will default based on the interaction of these and other factors. In the second half of 2007, Woori Bank plans to implement a mark-to-market methodology in quantifying credit risk, which will reflect both the likelihood of a default by a borrower as well as the likelihood of a change in such borrower's credit rating. We believe that CREPIA is a systematic and efficient credit evaluation system and that Woori Bank has expedited its loan review process and improved its ability to monitor and evaluate its overall risk profile by using this system. The main characteristics of CREPIA are as follows:

automation of credit risk management system, which allows us to centralize and automate many tasks relating to our credit risk management system;

automatic recognition and processing of different forms of credit, which allows us to process and approve different types of credit, such as new applicants, renewing applicants and changes in the condition of the loan or credit approved;

incorporation of credit risk management prior to approval of credit, which allows us to consider individualized characteristics of a borrower and enables us to calculate a more accurate price with respect to the loan or credit approved;

automatic credit risk monitoring after approval of credit, which allows us to evaluate and re-rate the loan or credit on a real-time basis as a result of any change in the characteristics of the borrower (including the condition of the underlying collateral, change in borrowing limit and early warning characteristics); and

automatic verification of internal procedures and regulations with respect to approval of credit, which reduces our operational risk and ensures that there are no material deviations from our loan and credit policies.

Kyongnam Bank and Kwangju Bank currently use credit evaluation systems based on the Woori Bank system. In preparation for the implementation of Basel II, we recently undertook upgrades to our credit management systems, including credit evaluation models, collateral management systems and non-performing credit risk management systems, which were completed in December 2006 for Woori Bank and in April 2007 for Kyongnam Bank and Kwangju Bank.

From 2004, we also established a credit risk limit for each of our banking subsidiaries with respect to large exposures. We aim to avoid concentrations of exposure with respect to any single corporate borrower or affiliated group of corporate borrowers. Accordingly, we have established aggregate exposure limits based on each of our banking subsidiaries' capital adequacy levels and, with respect to individual corporate borrowers, established limits by dividing the expected loss with respect to companies affiliated with such corporate borrower with the unexpected loss (a measurement of credit risk) of such borrower and converting that into an exposure amount. We use this as the basis for our large exposure limits with respect to such corporate borrower.

From 2005, we also established a similar credit risk limit for each of our banking subsidiaries, Woori Investment & Securities and Woori F&I with respect to investment in private equity funds. Much like large exposure limits with respect to corporate borrowers, we aim to avoid concentrations of exposure with respect to any single private equity fund or affiliated group of funds. Accordingly, we have established aggregate investment limits based on the capital adequacy levels of each of our banking subsidiaries, Woori Investment & Securities and Woori F&I and, with respect to limits on each opportunity to invest, established limits depending on whether the target fund is an affiliate, or our participation or the participation by our subsidiaries is as a limited or general partner. In 2006, we also established a principal investment limit for investment activities that any of our banking subsidiaries, Woori Investment & Securities, Woori F&I and Woori Private Equity

undertakes as a principal (as opposed to as an agent). The principal investment limit for each subsidiary is set as a certain percentage of the capitalization of such subsidiary.

We use our credit risk management systems to measure and control credit risk, to evaluate and approve new credit and to review and monitor outstanding credit. We conduct various quantitative and qualitative analyses to establish acceptable risk levels that provide what we believe are appropriate levels of return on investments. The credit risk management systems that we use to do this integrate various data, including customers' financial and economic condition, limits on loans and guarantee amounts, cash flow evaluations, collateral levels, our desired profit margin and the likelihood of unexpected loan losses.

Each subsidiary monitors its level of risk, determines how that level compares to our target optimized level of risk on a monthly basis and produces risk analysis reports and optimization reports on a monthly basis and stress test reports on an ad hoc basis. These reports, which are sent monthly to the respective Subsidiary Risk Management Committees and quarterly to the Group Risk Management Committee, provide a basis to set risk limits for, and allocate capital to, a subsidiary's business units.

Credit Evaluation and Approval

Our subsidiaries evaluate the credit of every loan applicant and guarantor before approving any loans, except for:

loans guaranteed by letters of guarantee issued by the Korea Credit Guarantee Fund, the Korea Technology Credit Guarantee Fund or certain other specified Korean government-controlled funds;

loans guaranteed by highly rated banks;

loans fully secured by deposits with us; and

loans against commercial promissory notes issued by creditworthy companies at a discount to the face value of the note determined by the issuer's creditworthiness.

The evaluation and approval process differs depending on whether the loan is a corporate loan, a general household consumer loan, or a mortgage or home equity loan, and there is a separate process for credit card applications. Although each of our commercial banking subsidiaries currently uses slightly different credit scoring and approval systems in determining whether to approve a loan, we are currently in the process of implementing a standardized expected loss and unexpected loss credit risk system at each of our operating subsidiaries. Implementing a standardized system will enable us to better allocate risk capital on a group-wide basis by evaluating unexpected loss (a measurement of credit risk), VaR (a measurement of market risk) and earnings at risk (a measurement of whether our assets and liabilities are mismatched). We also intend to standardize our risk-adjusted performance measurement system and implement that system on a group-wide basis.

Our subsidiaries have undertaken a number of initiatives to develop credit evaluation and loan approval procedures that are more systematic and efficient. We prefer to use credit rating systems in our credit evaluation and loan approval process because they:

yield a uniform result regardless of the user;

can be used effectively by employees who do not have extensive experience in credit evaluation;

can be easil
