SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2007

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 0-20853

ANSYS, Inc.

(exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

275 Technology Drive, Canonsburg, PA
(Address of principal executive offices)

724-746-3304

04-3219960
(IRS Employer
Identification No.)

15317
(Zip Code)

(Registrant's telephone number, including area code)

Edgar Filing: ANSYS INC - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the Registrant's Common Stock, par value \$.01 per share, outstanding as of October 31, 2007 was 78,282,085 shares.

ANSYS, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2007

(Unaudited)

1. Organization

ANSYS, Inc. (hereafter the Company or ANSYS) develops and globally markets engineering simulation software and technologies widely used by engineers and designers across a broad spectrum of industries, including aerospace, automotive, manufacturing, electronics, biomedical and defense.

The Company operates as one segment, as defined by Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information*. Given the integrated approach to the multi-discipline problem-solving needs of the Company's customers, a single sale of software may contain components from multiple product areas and include combined technologies. There is no means by which the Company can provide accurate historical or current reporting among its various product-line segmentations. Disclosure of such information is impracticable.

2. Summary of Significant Accounting Policies

The accompanying unaudited condensed consolidated financial statements have been prepared by ANSYS, Inc. in accordance with accounting principles generally accepted in the United States for interim financial information for commercial and industrial companies and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the accompanying statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. The accompanying condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements (and notes thereto) included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006. The condensed consolidated December 31, 2006 balance sheet presented is derived from the audited December 31, 2006 balance sheet included in the most recent Form 10-K. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements have been included, and all adjustments are of a normal and recurring nature. Operating results for the three and nine months ended September 30, 2007 are not necessarily indicative of the results that may be expected for any future period.

Stock Split: On May 14, 2007, the Company announced that its Board of Directors approved a two-for-one stock split of the Company's common stock. The stock split was payable in the form of a stock dividend and entitled each stockholder of record at the close of business on May 25, 2007 to receive one share of common stock for every outstanding share of common stock held on that date. The stock dividend was distributed on June 4, 2007. Par value of the stock remains at \$.01 per share. Accordingly, \$392,000 was transferred from additional paid-in capital to common stock for the cumulative number of shares issued as of June 4, 2007. The capital accounts, share data, and earnings per share data in this report give effect to the stock split, applied retroactively, to all periods presented.

Table of Contents

Revenue Recognition: Revenue is derived principally from the licensing of computer software products and from related maintenance contracts. The Company recognizes revenue in accordance with SOP 97-2, *Software Revenue Recognition*, and related interpretations. Revenue from perpetual licenses is classified as license revenue and is recognized upon delivery of the licensed product and the utility that enables the customer to request authorization keys, provided that acceptance has occurred and a signed contractual obligation has been received, the price is fixed and determinable, and collectibility of the receivable is probable. Revenue is recorded net of the distributor fee for sales through the ANSYS distribution network. Revenue for software lease licenses is classified as license revenue and is recognized over the period of the lease contract. The Company estimates the value of post-contract customer support (PCS) sold together with perpetual licenses based on separate sales of PCS. Revenue from PCS contracts is classified as maintenance and service revenue and is recognized ratably over the term of the contract. Revenue from training, support and other services is recognized as the services are performed.

Concentrations of Credit Risk: The Company has a concentration of credit risk with respect to trade receivables due to the use of certain significant third party distributors to market and sell the Company's products. The Company performs periodic credit evaluations of its customers financial condition and generally does not require collateral.

In addition to the concentration of credit risk with respect to trade receivables, the Company's cash and cash equivalents are also exposed to concentration of credit risk. The Company maintains its cash accounts primarily in U.S. banks, which are insured by the F.D.I.C. up to \$100,000 per bank. The Company had cash balances on deposit with a U.S. bank at September 30, 2007 that exceeded the balance insured by the F.D.I.C. in the amount of \$41.8 million. A significant portion of the Company's remaining U.S. cash balance is also uninsured. As a result of the Company's operations in international locations and foreign currencies held by its corporate location, it also has \$98.9 million of uninsured cash balances denominated in foreign currencies.

Income Taxes: Deferred tax assets and liabilities are determined based on temporary differences between the financial statement and tax bases of assets and liabilities, and for loss and credit carryforwards, using enacted tax rates anticipated to be in effect in the years in which the differences are expected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. In July 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (FIN 48) which the Company adopted effective January 1, 2007. The impact of this adoption is further discussed in Note 9.

Reclassifications: Certain reclassifications have been made to (1) the 2006 condensed consolidated balance sheet and the 2006 condensed consolidated statement of cash flows to reclass certain current liabilities to long-term and to reclass certain tax amounts from accrued taxes payable to current assets, (2) the 2006 condensed consolidated statement of income to separately report interest expense, interest income and other income, and (3) the 2006 condensed consolidated statement of cash flows to separately state the utilization of the acquired net operating loss tax carryforward to conform to the 2007 presentation.

Table of Contents**3. Accumulated Other Comprehensive Income**

As of September 30, 2007 and December 31, 2006, accumulated other comprehensive income, as reflected on the Condensed Consolidated Balance Sheets, was comprised of foreign currency translation adjustments.

Comprehensive income for the three and nine months ended September 30, 2007 and 2006 was as follows:

	Three Months Ended		Nine Months Ended	
	September 30,	September 30,	September 30,	September 30,
<i>(in thousands)</i>	2007	2006	2007	2006
Comprehensive income	\$ 24,136	\$ 7,987	\$ 61,872	\$ 4,037

4. Other Current Assets

The Company reports accounts receivable related to the portion of annual lease licenses and software maintenance that has not yet been recognized as revenue as a component of other current assets. These amounts totaled \$37.1 million and \$42.3 million as of September 30, 2007 and December 31, 2006, respectively.

Table of Contents**5. Earnings Per Share**

Basic earnings per share (EPS) amounts are computed by dividing earnings by the average number of common shares outstanding during the period. Diluted EPS amounts assume the issuance of common stock for all potentially dilutive equivalents outstanding. To the extent stock options are anti-dilutive, they are excluded from the calculation of diluted earnings per share. The details of basic and diluted earnings per share, as adjusted for the two-for-one stock split, are as follows:

<i>(in thousands, except per share data)</i>	Three Months Ended		Nine Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Net income	\$ 18,696	\$ 8,372	\$ 53,103	\$ 1,892
Weighted average shares outstanding basic	77,981	76,804	77,653	71,220
Basic earnings per share	\$ 0.24	\$ 0.11	\$ 0.68	\$ 0.03
Effect of dilutive securities:				
Shares issuable upon exercise of dilutive outstanding stock options	3,215	3,776	3,285	3,834
Weighted average shares outstanding diluted	81,196	80,580	80,938	75,054
Diluted earnings per share	\$ 0.23	\$ 0.10	\$ 0.66	\$ 0.03
Anti-dilutive shares/options	1,547	40	1,354	40

6. Acquisitions

On May 1, 2006, the Company completed its acquisition of Fluent Inc (Fluent), a global provider of computational fluid dynamics (CFD)-based computer-aided engineering software and services. The acquisition of Fluent enhances the breadth, functionality, usability and interoperability of the Company's portfolio of simulation solutions. Under the terms of the merger agreement, the Company issued 11,999,896 shares of its common stock, valued at approximately \$274 million based on the average closing market price on the two days preceding and the two days following the announcement of the acquisition (February 16, 2006), and paid approximately \$315 million in cash to acquire Fluent. The total purchase price of approximately \$598 million includes approximately \$9 million in transaction fees. The Company used a combination of existing cash and \$198 million from committed bank financing to fund the transaction. In addition to the \$9 million in transaction-related costs, the Company incurred financing costs of \$1.9 million related to the long-term debt utilized to fund the acquisition.

Table of Contents

The operating results of Fluent have been included in the Company's consolidated financial statements since the date of acquisition, May 1, 2006. The total purchase price was allocated to the foreign and domestic assets and liabilities of Fluent based upon management's estimates of the fair market values of the assets acquired and the liabilities assumed. The allocation included \$213.9 million to identifiable intangible assets (including \$88.0 million to developed software to be amortized over seven years, \$65.9 million to customer contracts and related relationships to be amortized over nine and a half years, and \$60.0 million to trade name) and \$381.9 million to goodwill, which is not tax deductible. The Fluent trade name is one of the most recognized in the CFD software industry. The trade name represents a reputation of superior technical capability and strong support service that has been recognized by Fluent customers. Because the trade name continues to gain strength in the market today, as evidenced by Fluent's increased sales over the past several years, the Company expects the trade name to contribute to cash flows indefinitely and, accordingly, has assigned an indefinite life to the trade name.

In valuing deferred revenue on the Fluent balance sheet as of the acquisition date, the Company applied the fair value provisions of Emerging Issues Task Force Issue No. 01-3 (EITF No. 01-3), *Accounting in a Business Combination for Deferred Revenue of an Acquiree*. In accordance with EITF No. 01-3, acquired deferred revenue of \$31.5 million was recorded on the opening balance sheet. This amount was \$20.1 million lower than the historical carrying value. Although this purchase accounting requirement had no impact on the Company's business or cash flow, it adversely impacted the Company's reported software license revenue under accounting principles generally accepted in the United States (GAAP), primarily for the first 12 months post-acquisition. The adverse impact on reported revenue for the three months ended September 30, 2006 was \$7.3 million; there was no meaningful impact for the three months ended September 30, 2007. The adverse impact on reported revenue for the nine months ended September 30, 2007 and September 30, 2006 was \$1.8 million and \$13.2 million, respectively.

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of acquisition:

<i>(in thousands)</i>	At May 1, 2006
Cash and other net tangible assets and liabilities	\$ 24,302
Goodwill	381,854
Identifiable intangible assets	213,900
Net deferred tax liabilities	(49,735)
In-process research and development	28,100
 Total preliminary purchase price allocation	 \$ 598,421

Table of Contents

The Company expensed acquired in-process research and development (IPR&D) of \$28.1 million that represents incomplete Fluent research and development projects that had not reached technological feasibility and had no alternative future use as of the acquisition date.

Technological feasibility is established when an enterprise has completed all planning, designing, coding and testing activities that are necessary to establish that a product can be produced to meet its design specifications, including functions, features and technical performance requirements. The value assigned to IPR&D was determined by considering the importance of each project to the overall development plan, estimating costs to develop the purchased IPR&D into commercially viable products, estimating the resulting net cash flows from the projects when completed and discounting the net cash flows to their present values based on the percentage of completion of the IPR&D projects.

The following unaudited pro forma information presents the 2006 results of operations of the Company as if the acquisition had occurred on January 1, 2006. The unaudited pro forma results are not necessarily indicative of results that would have occurred had the acquisition been in effect for the periods presented, nor are they necessarily indicative of future results. These pro forma results exclude the impacts of IPR&D expense and the purchase accounting adjustment to deferred revenue that are discussed above.

	Three Months Ended	Nine Months Ended
<i>(in thousands, except per share data)</i>	September 30, 2006	September 30, 2006

Table of Contents**7. Long-Term Debt**

Borrowings consist of the following:

<i>(in thousands)</i>	September 30, 2007	December 31, 2006
Term loan payable in quarterly installments with an original final maturity of March 31, 2011	\$ 74,696	\$ 121,934
Capitalized lease obligations	805	1,386
Total	75,501	123,320
Less current portion	(9,348)	(13,927)
Long-term debt and capital lease obligations, net of current portion	\$ 66,153	\$ 109,393

On May 1, 2006, ANSYS borrowed \$198.0 million from a syndicate of banks. The interest rate on the indebtedness is equal to a margin based on the Company's consolidated leverage ratio (generally in the range of 0.50% to 1.25%) plus the then current rate based on (a) the British Bankers Association London Inter-Bank Offered Rate for dollar deposits (LIBOR) or (b) the higher of (i) the Bank of America prime rate and (ii) the Federal Funds rate (Prime Rate) plus 0.50%. For the three and nine months ended September 30, 2007, the Company recorded interest expense related to the term loan of \$1.4 million and \$4.9 million, representing weighted average interest rates of 5.83% and 5.89%, respectively. In addition, during the three and nine months ended September 30, 2007, the Company recorded amortization related to debt financing costs of \$130,000 and \$380,000, respectively. For the three and nine months ended September 30, 2006, the Company recorded interest expense of \$2.8 million and \$4.8 million, respectively. For the three and nine months ended September 30, 2006, the Company recorded amortization related to debt financing costs of \$170,000 and \$320,000, respectively.

The interest rate is set for the quarter ending December 31, 2007 at 5.63% on \$34.7 million of the total outstanding balance, which was based on three-month LIBOR + 0.50%. For the remaining outstanding balance of \$40.0 million, the Company secured a fixed interest rate of 5.64% through March 31, 2008, which is based on six-month LIBOR + 0.50%. As of September 30, 2007, the fair value of the debt approximated the recorded value.

During the first nine months of 2007, the Company made the required quarterly principal payments of \$9.2 million. In addition, the Company made prepayments of \$38.0 million that reduced future quarterly principal installments, including a prepayment of \$20.0 million during the quarter ended September 30, 2007. As of September 30, 2007, required future quarterly principal payments are expected to total \$2.2 million for the remainder of 2007, \$8.8 million in 2008, \$15.4 million in 2009, \$37.3 million in 2010 and \$11.0 million in 2011.

The credit agreement includes covenants related to the consolidated leverage ratio and the consolidated fixed charge coverage ratio, as well as certain restrictions on additional investments and indebtedness. As of September 30, 2007, the Company is in compliance with all affirmative and negative covenants as stated in the credit agreement.

Table of Contents**8. Goodwill and Intangible Assets**

Goodwill represents the excess of the cost over the value of net tangible and identifiable intangible assets of acquired businesses. Identifiable intangible assets acquired in business combinations are recorded based upon fair market value at the date of acquisition.

During the first quarter of 2007, the Company completed the annual impairment test for goodwill and intangible assets with indefinite lives and determined that these assets had not been impaired as of the test date, January 1, 2007. The Company tested the goodwill and identifiable intangible assets attributable to each of its reporting units utilizing estimated cash flow methodologies and market comparable information. No events occurred or circumstances changed during the nine months ended September 30, 2007 that would reduce the fair value of the Company's reporting units below their carrying amounts.

Identifiable intangible assets with finite lives are amortized on either a straight-line basis over their estimated useful lives or under the proportional cash flow method and are reviewed for impairment whenever events or circumstances indicate that the carrying amounts may not be recoverable.

As of September 30, 2007 and December 31, 2006, the Company's intangible assets have estimated useful lives and are classified as follows:

<i>(in thousands)</i>	September 30, 2007		December 31, 2006	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets:				
Core technology and trademark (3 - 10 years)	\$ 108,938	\$ (42,657)	\$ 107,552	\$ (25,680)
Non-compete agreements (4 - 5 years)	3,775	(3,075)	3,717	(2,797)
Customer lists (3 - 9.5 years)	70,322	(15,119)	67,981	(8,378)
Total	\$ 183,035	\$ (60,851)	\$ 179,250	\$ (36,855)
Unamortized intangible assets:				
Trademarks	\$ 61,781		\$ 61,720	

Amortization expense for intangible assets reflected above was \$7.5 million and \$7.4 million for the three months ended September 30, 2007 and September 30, 2006, respectively. Amortization expense for intangible assets reflected above for the nine months ended September 30, 2007 and September 30, 2006 was \$22.4 million and \$13.5 million, respectively.

Amortization expense for the amortized intangible assets reflected above is expected to be approximately \$30.2 million, \$27.4 million, \$22.9 million, \$19.0 million and \$15.5 million for the years ending December 31, 2007, 2008, 2009, 2010 and 2011, respectively.

Table of Contents

The changes in goodwill during the nine-month period ended September 30, 2007 are as follows:

<i>(in thousands)</i>		
Balance	January 1, 2007	\$ 428,959
	Adoption of FIN 48	1,429
	Tax-related adjustments	(1,124)
	Currency translation & other	1,464
Balance	September 30, 2007	\$ 430,728

9. Uncertain Tax Positions

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, and numerous U.S. states and foreign countries. The parent Company, ANSYS, Inc., has had its tax returns audited by the Internal Revenue Service for tax years through 2003. Tax years beyond 2003 remain subject to examination. ANSYS, Inc. is currently under examination by the Internal Revenue Service and the PA Department of Revenue for the 2005 tax year. The Internal Revenue Service recently completed its examination of the Company's Fluent subsidiary (U.S.) for the 2004 tax year. The Company has multiple operating and legal subsidiaries in various foreign jurisdictions. The statute of limitations and the timing of regulatory audit activities vary in those jurisdictions. Accordingly, the tax years that remain subject to examination within those jurisdictions also vary.

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting For Uncertainty in Income Taxes*, on January 1, 2007. As a result of the implementation of FIN 48, the Company recognized a \$7.4 million increase in the liability for unrecognized tax benefits and related interest and penalties. This increase was partially offset by \$4.4 million in tax benefits that would be recoverable in other jurisdictions if the related liability were incurred. These tax benefits are recorded as a deferred tax asset. The net increase of \$3.0 million was recorded as an increase to the goodwill balance of \$1.4 million and a reduction to the January 1, 2007 balance of retained earnings of \$1.6 million. A reconciliation of the beginning and ending balance of unrecognized tax benefits is as follows:

<i>(in thousands)</i>		
Balance at	January 1, 2007	\$ 7,277
	Additions based on tax positions related to the current year	1,840
	Additions for tax positions of prior years	
	Currency translation	167
	Reductions for tax positions of prior years	(840)
	Settlements	
Balance at	September 30, 2007	\$ 8,444

Table of Contents

As of September 30, 2007, the \$8.4 million liability for unrecognized tax benefits is reflected as an increase to accrued income taxes of \$3.0 million, a reduction in deferred tax assets related to net operating losses of \$0.2 million and an increase in other long-term liabilities of \$5.3 million.

The uncertain tax positions included in the balance at September 30, 2007 relate to permanent tax items and, if recognized, all of these items would impact the effective tax rate.

The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense. The Company has accrued \$4.0 million and \$4.3 million for the payment of interest and penalties at September 30, 2007 and January 1, 2007 (the adoption date), respectively. A portion of the accrued interest would be recoverable in other jurisdictions if the related liability were incurred. This amount is recorded in deferred tax assets. The net impact of interest and penalties was an increase in income tax expense for the three and nine months ended September 30, 2007 of \$160,000 and \$325,000, respectively.

10. Geographic Information

Revenue to external customers is attributed to individual countries based upon the location of the customer. Revenue by geographic area is as follows:

<i>(in thousands)</i>	Three Months Ended		Nine Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
United States	\$ 32,503	\$ 24,862	\$ 94,377	\$ 64,542
Germany	12,962	9,291	36,642	24,010
Japan	12,320	9,675	36,885	24,146
United Kingdom	7,556	4,855	20,259	13,165
Canada	1,147	848	3,225	3,155
Other European	17,861	13,433	55,867	32,462
Other International	9,685	7,153	26,849	16,912
Total revenue	\$ 94,034	\$ 70,117	\$ 274,104	\$ 178,392

Table of Contents

Property and equipment by geographic area is as follows:

<i>(in thousands)</i>	September 30, 2007	December 31, 2006
United States	\$ 18,126	\$ 16,024
India	4,062	3,754
United Kingdom	1,820	1,643
Japan	1,785	1,524
Germany	1,229	964
Canada	639	419
Other European	1,184	1,039
Other International	165	163
Total property and equipment	\$ 29,010	\$ 25,530

11. Stock Repurchase Program

In October 2001, the Company announced that its Board of Directors had amended its common stock repurchase program to acquire up to an additional four million shares, or 16 million shares in total under a program that was initially announced in February 2000. Under this program, during 2007 ANSYS repurchased 100,000 shares in March and no shares in the nine months ended September 30, 2006. As of September 30, 2007, 3.9 million shares remained authorized for repurchase under the program.

Table of Contents**12. Stock Compensation**

Total stock-based compensation expense recognized for the three and nine months ended September 30, 2007 and September 30, 2006 was comprised as follows:

<i>(in thousands)</i>	Three Months Ended		Nine Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Cost of sales:				
Software licenses	\$ 12	\$ 11	\$ 36	\$ 32
Maintenance and service	123	46	358	131
Operating expenses:				
Selling, general and administrative	1,489	862	4,519	2,612
Research and development	451	321	1,479	919
Share-based compensation expense before taxes	2,075	1,240	6,392	3,694
Related income tax benefits	(370)	(209)	(1,133)	(664)
Share-based compensation expense, net of taxes	\$ 1,705	\$ 1,031	\$ 5,259	\$ 3,030

The net impact of stock-based compensation reduced third quarter 2007 basic and diluted earnings per share each by \$0.02, and reduced year-to-date 2007 basic and diluted earnings per share by \$0.07 and \$0.06, respectively. The net impact of stock-based compensation expense reduced third quarter 2006 basic and diluted earnings per share each by \$0.01 and reduced year-to-date 2006 basic and diluted earnings per share each by \$0.04.

13. Contingencies and Commitments

From time to time, the Company is involved in various investigations, claims and legal proceedings that arise in the ordinary course of business activities. Management believes, after consulting with legal counsel, that the ultimate liabilities, if any, resulting from such matters will not materially affect the Company's financial position, liquidity or results of operations.

The Company sells software licenses and services to its customers under proprietary software license agreements. Each license agreement contains the relevant terms of the contractual arrangement with the customer, and generally includes certain provisions for indemnifying the customer against losses, expenses and liabilities from damages that are incurred by or awarded against the customer in the event the Company's software or services are found to infringe upon a patent, copyright, or other proprietary right of a third party. To date, the Company has not had to reimburse any of its customers for any losses related to these indemnification provisions and no material claims asserted under these indemnification provisions are outstanding as of September 30, 2007. For several reasons, including the lack of prior material indemnification claims, the Company cannot determine the maximum amount of potential future payments, if any, related to such indemnification provisions.

Table of Contents

As of December 31, 2006, the Company had an uncommitted and unsecured \$10.0 million line of credit with a bank under which no borrowings had occurred. During the first quarter of 2007, the Company cancelled this line of credit.

During the third quarter of 2007, the Company cancelled the irrevocable standby letter of credit, valued at \$1.9 million as of December 31, 2006, which had been issued as a guarantee for damages that could be awarded related to a legal matter in which the Company was involved. No material losses on this commitment were incurred.

14. Recently Issued Accounting Pronouncements

The Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, as of January 1, 2007. This interpretation clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company applied the provisions of FIN 48 to all tax positions upon initial adoption and the cumulative effect adjustment was recognized as an adjustment to retained earnings and goodwill. Refer to additional disclosures regarding the adoption of this statement in Note 9 above.

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements* (Statement No. 157). This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosure about fair value measurements. This statement is effective for fiscal periods beginning after November 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the impact of Statement No. 157 on its financial position, results of operations and cash flows.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (Statement No. 159). Statement No. 159 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. Statement No. 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of Statement No. 159 on its financial position, results of operations and cash flows.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

ANSYS, Inc.

Canonsburg, Pennsylvania

We have reviewed the accompanying condensed consolidated balance sheet of ANSYS, Inc. and subsidiaries (the Company) as of September 30, 2007 and the related condensed consolidated statements of income for the three-month and nine-month periods ended September 30, 2007 and 2006 and of cash flows for the nine-month periods ended September 30, 2007 and 2006. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the condensed consolidated financial statements, on January 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of ANSYS, Inc. and subsidiaries as of December 31, 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 28, 2007, we expressed an unqualified opinion on those consolidated financial statements and included an explanatory paragraph relating to the Company's adoption of Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*, on January 1, 2006. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2006 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview:

ANSYS, Inc. (hereafter the Company or ANSYS) quarterly results for the three months ended September 30, 2007 reflect a revenue increase of 34% and basic and diluted earnings per share of \$0.24 and \$0.23, respectively. ANSYS results for the nine months ended September 30, 2007 reflect a revenue increase of 54% and basic and diluted earnings per share of \$0.68 and \$0.66, respectively.

The Company experienced higher revenues in the quarterly and nine-month periods of 2007 from the Fluent acquisition (included for only five months in 2006) and from the Company's other software products and services. These revenues were partially offset by increased operating expenses, including higher salaries and related headcount costs, increases in amortization expense associated with acquired intangible assets, additional stock-based compensation expense and an increase in the Company's effective tax rate. The Company's operating results in 2007 were also favorably impacted by changes in foreign currency exchange rates as compared to the prior year. In addition to the impacts of these items, the 2006 nine-month results include a \$28.1 million non-tax deductible charge related to acquired Fluent in-process research and development (recorded in the second quarter of 2006). The Company's financial position includes \$150.9 million in cash and short-term investments, and working capital of \$88.6 million as of September 30, 2007.

ANSYS develops and globally markets engineering simulation software and services widely used by engineers and designers across a broad spectrum of industries, including aerospace, automotive, manufacturing, electronics, biomedical and defense. Headquartered at Southpointe in Canonsburg, Pennsylvania, the Company and its subsidiaries employ approximately 1,400 people as of September 30, 2007 and focus on the development of open and flexible solutions that enable users to analyze designs directly on the desktop, providing a common platform for fast, efficient and cost-conscious product development, from design concept to final-stage testing and validation. The Company distributes its ANSYS® suite of simulation technologies, including ANSYS Workbench®, ANSYS CFX®, ANSYS ICEM CFD®, ANSYS AUTODYN®, and ANSYS FLUENT® products through a global network of channel partners and direct sales offices in strategic, global locations. It is the Company's intention to continue to maintain this mixed sales and distribution model.

The Company licenses its technology to businesses, educational institutions and governmental agencies. Growth in the Company's revenue is affected by the strength of global economies, general business conditions, customer budgetary constraints and the competitive position of the Company's products. The Company believes that the features, functionality and integrated multiphysics capabilities of its software products are as strong as they have ever been. However, the software business is generally characterized by long sales cycles. These long sales cycles increase the difficulty of predicting sales for any particular quarter. As a result, the Company believes that its overall performance is best measured by fiscal year results rather than by quarterly results.

Table of Contents

The following discussion should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and notes thereto for the three and nine months ended September 30, 2007 and 2006, and with the Company's audited financial statements and notes thereto for the year ended December 31, 2006 filed on Form 10-K with the Securities and Exchange Commission.

This Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, but not limited to, the following statements, as well as statements that contain such words as anticipates, intends, believes, plans and other similar expressions:

The Company's intentions related to investments in global sales and marketing, global IT and business infrastructure, and research and development

Increased exposure to volatility of foreign exchange rates

Exposure to changes in domestic and foreign tax laws in future periods

Plans related to future capital spending

The Company's intentions regarding its mixed sales and distribution model

The sufficiency of existing cash and cash equivalent balances to meet future working capital and capital expenditure requirements

Management's assessment of the ultimate liabilities arising from various investigations, claims and legal proceedings

The Company's statements regarding the strength of its financial position

The Company's statements regarding the benefits of its acquisitions

The Company's intentions related to acquiring or investing in complementary companies, products, services and technologies. Forward-looking statements should not be unduly relied upon because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the Company's control. The Company's actual results could differ materially from those set forth in forward-looking statements. Certain factors that might cause such a difference include risks and uncertainties detailed in the Management's Discussion and Analysis of Financial Condition and Results of Operations section in the 2006 Annual Report to Stockholders and any such changes to these factors have been included within Part II, Item 1A of this Form 10-Q.

Table of Contents**Results of Operations****Three Months Ended September 30, 2007 Compared to Three Months Ended September 30, 2006****Revenue:**

<i>(in thousands, except percentages)</i>	Three Months Ended		Change	
	2007	September 30, 2006	Amount	%
Revenue:				
Software licenses	\$ 61,099	\$ 42,213	\$ 18,886	44.7
Maintenance and service	32,935	27,904	5,031	18.0
Total revenue	94,034	70,117	23,917	34.1

Software license revenue increased as follows:

Lease license revenue increased from \$27.3 million in the 2006 period to \$39.1 million in the 2007 period

Perpetual license revenue increased from \$14.9 million in the 2006 period to \$22.0 million in the 2007 period

The increases in software license revenue were the result of overall growth in both lease and perpetual license sales, along with a \$7.3 million adverse impact on 2006 lease license revenue related to purchase accounting adjustments to acquired deferred revenue (see below).

Maintenance and service revenue increased as follows:

Maintenance revenue increased from \$22.0 million in the 2006 period to \$26.5 million in the 2007 period

Service revenue increased from \$5.9 million in the 2006 period to \$6.5 million in the 2007 period

The increase in maintenance revenue was primarily the result of annual maintenance subscriptions sold in connection with new perpetual license sales in recent quarters. The increase in service revenue was primarily the result of increased revenue from engineering consulting services.

With respect to revenue, on average, for the third quarter of 2007, the U.S. Dollar was approximately 6.1% weaker, when measured against the Company's primary foreign currencies, than for the third quarter of 2006. The U.S. Dollar weakened against the British Pound, the Indian Rupee, the Euro, the Chinese Renminbi, the Canadian Dollar and the Swedish Krona while it strengthened against the Japanese Yen. The overall weakening resulted in increased revenue and operating income during the 2007 third quarter, as compared with the corresponding 2006 third quarter, of approximately \$2.5 million and \$750,000, respectively.

Table of Contents

A substantial portion of the Company's license and maintenance revenue is derived from annual lease and maintenance contracts. These contracts are generally renewed on an annual basis and have a high rate of customer renewal. In addition to the recurring revenue base associated with these contracts, a majority of customers purchasing new perpetual licenses also purchase related annual maintenance contracts. As a result of the significant recurring revenue base, the Company's license and maintenance revenue growth rate in any period does not necessarily correlate to the growth rate of new license and maintenance contracts sold during that period. To the extent the rate of customer renewal for lease and maintenance contracts remains at current levels, incremental lease contracts and maintenance contracts sold with new perpetual licenses will result in license and maintenance revenue growth.

International and domestic revenues, as a percentage of total revenue, were 65.4% and 34.6%, respectively, in the quarter ended September 30, 2007 and 64.5% and 35.5%, respectively, in the quarter ended September 30, 2006.

In accordance with EITF No. 01-3, acquired deferred software revenue of \$31.5 million was recorded on the Fluent opening balance sheet. This amount was \$20.1 million lower than the historical carrying value. The adverse impact on reported revenue was \$7.3 million for the three months ended September 30, 2006; there was no meaningful impact for the three months ended September 30, 2007.

Cost of Sales and Gross Profit:

	Three Months Ended September 30,				Change	
	2007		2006		Amount	%
<i>(in thousands, except percentages)</i>	Amount	% of Revenue	Amount	% of Revenue		
Cost of sales:						
Software licenses	\$ 2,236	2.4	\$ 1,748	2.5	\$ 488	27.9
Amortization of software and acquired technology	5,395	5.7	5,138	7.3	257	5.0
Maintenance and service	11,760	12.5	10,434	14.9	1,326	12.7
Total cost of sales	19,391	20.6	17,320	24.7	2,071	12.0
Gross profit	74,643	79.4	52,797	75.3	21,846	41.4

The change in cost of sales is due to the following primary reasons:

Increase in salaries and headcount-related costs of \$800,000

Increase in third party royalties of \$300,000

Additional amortization of \$200,000 associated with acquired software

Increase in stock-based compensation costs of \$100,000

Table of Contents

The improvement in the gross profit was a result of the increase in revenue offset by a smaller increase in related cost of sales.

Operating Expenses:

	Three Months Ended September 30, 2007		2006		Change	
	Amount	% of Revenue	Amount	% of Revenue	Amount	%
<i>(in thousands, except percentages)</i>						
Operating expenses:						
Selling, general and administrative	\$ 26,596	28.3	\$ 24,333	34.7	\$ 2,263	9.3
Research and development	14,198	15.1	13,295	19.0	903	6.8
Amortization	2,239	2.4	2,314	3.3	(75)	(3.2)
Total operating expenses	43,033	45.8	39,942	57.0	3,091	7.7

Selling, General and Administrative: The increase in selling, general and administrative costs was a result of additional salary and headcount-related costs of \$700,000, an increase in stock-based compensation expense of \$600,000, and an increase in each of consulting costs and third party commissions of \$400,000.

The Company anticipates that it will continue to make investments in its global sales and marketing organization to enhance major account sales activities and to support its worldwide sales distribution and marketing strategies. The Company will also continue to make significant investments related to its global IT and business infrastructure.

Research and Development: The increase in research and development was primarily related to an increase in salary and headcount-related costs, including incentive compensation, of \$200,000, an increase in third party consulting and technical support costs of \$200,000, a decrease in capitalized labor costs of \$100,000, and an increase in stock-based compensation expense of \$100,000 as compared to the prior year quarter.

Table of Contents

As a percentage of revenue, research and development expenses declined in 2007 as compared to the prior-year quarter. There were certain development activities that existed in both the former ANSYS and Fluent development organizations that were duplicative and through the integration efforts have been rationalized in line with the future product direction. During this rationalization process, certain personnel that formerly existed in the research and development function were reassigned to other functions to maximize both efficiency and the related contribution to the strategy of the combined organization.

The Company has traditionally invested significant resources in research and development activities and intends to continue to make significant investments in this area, particularly as it relates to ongoing integration of its portfolio of software technologies.

Amortization: The decrease in amortization was primarily related to a reduction in Fluent-related amortization of \$100,000 for the quarter ended September 30, 2007 as compared to the prior-year quarter.

Interest Expense: In connection with the acquisition of Fluent on May 1, 2006, the Company borrowed \$198 million and assumed certain capital lease obligations. These borrowings incurred interest expense, including the amortization of debt financing costs, of \$1.6 million during the quarter ended September 30, 2007, as compared to \$3.0 million for the quarter ended September 30, 2006. The significantly lower interest costs for the 2007 period are primarily a result of the following: (1) a lower average outstanding debt balance, (2) a lower market interest rate, and (3) a decrease in the marginal rate, which is based on the Company's consolidated leverage ratio.

Interest Income: Interest income increased as a result of additional funds invested in the 2007 period as compared to the 2006 period.

Other Expense, net: The Company recorded other expense of \$337,000 during the quarter ended September 30, 2007 as compared to other income of \$412,000 for the quarter ended September 30, 2006. The net change was a result of the following two factors:

Foreign Currency Transaction During the quarter ended September 30, 2007, the Company had a net foreign exchange loss of \$290,000 as compared with a gain of \$230,000 in the prior year comparable quarter. During the third quarter of 2007, the U.S. Dollar weakened against the British Pound, the Indian Rupee, the Euro, the Canadian Dollar, the Swedish Krona, Japanese Yen and the Chinese Renminbi. As the Company's presence in foreign locations continues to expand, the Company, for the foreseeable future, will have increased exposure to volatility of foreign exchange rates.

Other Income from other non-operating transactions decreased \$220,000 during the quarter ended September 30, 2007 as compared to the quarter ended September 30, 2006.

Table of Contents

Income Tax Provision: The Company recorded income tax expense of \$12.3 million and had income before income tax provision of \$30.9 million for the quarter ended September 30, 2007. This represents an effective tax rate of 39.6% in the 2007 third quarter. The adoption of FIN 48 adversely affected the 2007 income tax expense by \$600,000 and the effective tax rate by 1.9%. The 2007 tax rate was also adversely affected by the phase-out of export benefits under the American Jobs Creation Act and higher stock-based compensation costs from incentive stock options (which include no tax benefit until the stock option is disqualified). During the quarter ended September 30, 2006, the Company recorded income tax expense of \$2.8 million and had income before income tax provision of \$11.2 million. The Company's effective tax rate was 25.3% in the 2006 third quarter.

During the third quarter of 2007, the Company filed its 2006 U.S. federal and state tax returns. In conjunction with the completion of these returns, the Company adjusted its estimate for 2006 taxes to reflect the actual results and recorded additional tax expense of \$162,000. The effect of this adjustment increased the third quarter effective tax rate from 39.1% to 39.6%. During the third quarter of 2006, the Company filed its 2005 U.S. federal and state tax returns. In conjunction with the completion of these returns, the Company adjusted its estimate for 2005 taxes to reflect the actual results and recorded a \$413,000 tax benefit. The effect of this adjustment reduced the third quarter effective tax rate from 29.0% to 25.3%.

As compared to the federal and state combined statutory rate, these rates are favorably impacted by Section 199 manufacturing deductions, as well as research and experimentation credits. Additionally, Fluent has historically had an effective tax rate that has been higher than the Company's. The Company currently expects that the effective tax rate will be in the range of 37%-39% for the year ending December 31, 2007.

Net Income: The Company's net income in the 2007 third quarter was \$18.7 million as compared to net income of \$8.4 million in the 2006 third quarter. Diluted earnings per share increased from earnings of \$0.10 in the 2006 quarter to earnings of \$0.23 in the 2007 quarter. The weighted average shares used in computing diluted earnings per share were 81.2 million in the 2007 third quarter and 80.6 million in the 2006 third quarter.

Table of Contents**Nine Months Ended September 30, 2007 Compared to Nine Months Ended September 30, 2006****Revenue:**

<i>(in thousands, except percentages)</i>	Nine Months Ended		Change	
	September 30, 2007	September 30, 2006	Amount	%
Revenue:				
Software licenses	\$ 177,723	\$ 103,728	\$ 73,995	71.3
Maintenance and service	96,381	74,664	21,717	29.1
Total revenue	274,104	178,392	95,712	53.7

Software license revenue increased as follows:

Lease license revenue increased from \$53.9 million in the 2006 period to \$109.3 million in the 2007 period

Perpetual license revenue increased from \$49.9 million in the 2006 period to \$68.4 million in the 2007 period

The increases in software license revenue were the result of overall growth in both lease and perpetual license sales, the impact of the Fluent operations for a full nine months in 2007 as compared to five months in 2006, as well as a \$13.2 million adverse impact on 2006 lease license revenue, as compared to a \$1.8 million adverse impact on 2007, related to purchase accounting adjustments to acquired deferred revenue (see below).

Maintenance and service revenue increased as follows:

Maintenance revenue increased from \$60.6 million in the 2006 period to \$76.0 million in the 2007 period

Service revenue increased from \$14.1 million in the 2006 period to \$20.4 million in the 2007 period

The increase in maintenance revenue was primarily the result of annual maintenance subscriptions sold in connection with new perpetual license sales in recent quarters. The increase in service revenue was primarily the result of increased revenue from engineering consulting services, partially offset by approximately \$600,000 in revenue related to the 2006 biennial ANSYS users' conference. The increases in both maintenance and service revenue were also positively impacted by the inclusion of a full nine months of Fluent operations in 2007 as compared to five months in 2006.

With respect to revenue, on average, for the nine-month period of 2007, the U.S. Dollar was approximately 6.0% weaker, when measured against the Company's primary foreign currencies, than for the nine-month period of 2006. The U.S. Dollar weakened against the British Pound, the Indian Rupee, the Euro, the Chinese Renminbi, the Canadian Dollar and the Swedish Krona while it strengthened against the Japanese Yen. The overall weakening resulted in increased revenue and operating income during the 2007 nine-month period, as compared with the corresponding 2006 period, of approximately \$5.4 million and \$1.9 million, respectively.

Table of Contents

International and domestic revenues, as a percentage of total revenue, were 65.6% and 34.4%, respectively, in the nine months ended September 30, 2007 and 63.8% and 36.2%, respectively, in the nine months ended September 30, 2006.

As previously mentioned above, in accordance with EITF No. 01-3, acquired deferred software revenue of \$31.5 million was recorded on the Fluent opening balance sheet. This amount was \$20.1 million lower than the historical carrying value. The adverse impact on reported revenue was \$1.8 million and \$13.2 million for the nine months ended September 30, 2007 and September 30, 2006, respectively.

Cost of Sales and Gross Profit:

	Nine Months Ended September 30,		2006		Change	
	2007	% of	2006	% of	Amount	%
(in thousands, except percentages)	Amount	Revenue	Amount	Revenue	Amount	%
Cost of sales:						
Software licenses	\$ 6,756	2.5	\$ 4,938	2.8	\$ 1,818	36.8
Amortization of software and acquired technology	16,119	5.9	9,785	5.5	6,334	64.7
Maintenance and service	34,327	12.5	22,918	12.8	11,409	49.8
Total cost of sales	57,202	20.9	37,641	21.1	19,561	52.0
Gross profit	216,902	79.1	140,751	78.9	76,151	54.1

The change in cost of sales is due to the following primary reasons:

Increase in Fluent related costs of \$17.1 million, including an additional \$6.1 million in acquired software amortization expense, primarily associated with nine months of Fluent activity in the current year period as compared to two months of activity in the prior year period

Costs of \$400,000 related to the completion of a third party development project

Increase in third party royalties of \$700,000

Additional salary and headcount-related costs of \$500,000 and stock-based compensation expense of \$200,000

The improvement in the gross profit was a result of the increase in revenue offset by a smaller increase in related cost of sales.

Table of ContentsOperating Expenses:

<i>(in thousands, except percentages)</i>	Nine Months Ended September 30,					
	2007		2006		Change	
	Amount	% of Revenue	Amount	% of Revenue	Amount	%
Operating expenses:						
Selling, general and administrative	\$ 80,582	29.4	\$ 58,192	32.6	\$ 22,390	38.5
Research and development	40,846	14.9	34,274	19.2	6,572	19.2
Amortization	6,647	2.4	4,018	2.2	2,629	65.4
In-process research and development			28,100	15.8	(28,100)	(100.0)
Total operating expenses	128,075	46.7	124,584	69.8	3,491	2.8

Selling, General and Administrative: Fluent-related selling, general and administrative costs increased \$16.1 million, primarily associated with nine months of activity for the period ended September 30, 2007 as compared to five months of activity for the period ended September 30, 2006. In addition to the Fluent costs, salary and headcount-related costs, including incentive compensation, increased by \$2.3 million, stock-based compensation expense increased by \$1.9 million, consulting costs increased by \$800,000, tax compliance costs increased by \$500,000, professional fees, including legal and accounting, increased by \$300,000 and third party commissions increased by \$500,000. These costs were partially offset by \$550,000 of costs related to the biennial ANSYS users conference which was held in the second quarter of 2006.

Research and Development: Fluent-related research and development costs increased \$3.5 million, primarily associated with nine months of activity for the period ended September 30, 2007 as compared to five months of activity for the period ended September 30, 2006. In addition, salary and headcount-related costs, including incentive compensation, increased by \$1.7 million, stock-based compensation expense increased by \$600,000 and capitalized labor costs decreased by \$400,000 as compared to the prior-year period.

Table of Contents

As a percentage of revenue, research and development expenses declined during the period. This decline can primarily be attributed to two items. The first is that research and development expenditures as a percentage of revenue have historically been lower for the Fluent business than they have for the ANSYS business. Because the 2007 period contains more Fluent operational activity than the 2006 period, there is a reduction in the 2007 research and development expenditures as a percentage of revenue. Additionally, there were certain development activities that existed in both the former ANSYS and Fluent development organizations that were duplicative and through the integration efforts have been rationalized in line with the future product direction. During this rationalization process, certain personnel that formerly existed in the research and development function were reassigned to other functions to maximize both efficiency and the related contribution to the strategy of the combined organization.

Amortization: Fluent-related amortization increased \$2.6 million for the nine months ended September 30, 2007 as compared to the prior-year period. The increase relates to nine months of amortization expense in 2007 associated with certain acquired intangible assets as compared to five months of amortization in the 2006 period.

In-Process Research and Development: The non-tax deductible charge in 2006 of \$28.1 million represents the fair value assigned to incomplete Fluent research and development projects that had not reached technological feasibility and had no alternative future value when acquired on May 1, 2006.

Interest Expense: In connection with the acquisition of Fluent on May 1, 2006, the Company borrowed \$198 million and assumed certain capital leases. These borrowings incurred interest expense, including the amortization of debt financing costs, of \$5.4 million during the nine months ended September 30, 2007 as compared to \$5.2 million for the period ended September 30, 2006.

Interest Income: As a result of lower funds invested due to funds utilized to acquire Fluent and to fund debt service on the borrowings described above, interest income decreased \$500,000 in the nine-month period of 2007 as compared to the prior-year period.

Other Expense, net: The Company recorded other expense of \$735,000 during the nine months ended September 30, 2007 as compared to other income of \$335,000 for the nine months ended September 30, 2006. The net increase in expense was a result of the following two factors:

Foreign Currency Transaction During the nine months ended September 30, 2007, the Company had a net foreign exchange loss of \$800,000, as compared with a loss of \$150,000 in the prior year comparable period. During the nine months ended September 30, 2007, the U.S. Dollar weakened against the British Pound, the Indian Rupee, the Euro, the Canadian Dollar, the Swedish Krona, Japanese Yen and the Chinese Renminbi. As the Company's presence in foreign locations continues to expand, the Company, for the foreseeable future, will have increased exposure to volatility of foreign exchange rates.

Other Income from other non-operating transactions decreased \$400,000 during the nine months ended September 30, 2007 as compared to the nine months ended September 30, 2006.

Table of Contents

Income Tax Provision: The Company recorded income tax expense of \$32.7 million and had income before income tax provision of \$85.8 million for the nine months ended September 30, 2007. This represents an effective tax rate of 38.1%. The adoption of FIN 48 adversely affected the 2007 income tax expense by \$1.6 million and the effective tax rate by 1.9%. The 2007 tax rate was also adversely affected by the phase-out of export benefits under the American Jobs Creation Act and higher stock-based compensation costs from incentive stock options (which include no tax benefit until the stock option is disqualified). During the nine months ended September 30, 2006, the Company recorded income tax expense of \$13.1 million and had income before income tax provision of \$15.0 million. The Company expensed a non-tax deductible charge related to in-process research and development in connection with the Fluent acquisition of \$28.1 million. The non-tax deductible charge increased the Company's 2006 effective tax rate from 30.5% to 87.4% for the nine months ended September 30, 2006.

As compared to the federal and state combined statutory rate, these rates are favorably impacted by Section 199 manufacturing deductions, as well as research and experimentation credits.

Net Income: The Company's net income for the nine months ended September 30, 2007 was \$53.1 million as compared to a net income of \$1.9 million for the nine months ended September 30, 2006. The 2006 period was significantly impacted by the \$28.1 million non-tax deductible in-process research and development charge related to the Fluent acquisition. Diluted earnings per share increased from earnings of \$0.03 in the 2006 period to \$0.66 in the 2007 period. The weighted average shares used in computing diluted earnings per share were 80.9 million and 75.1 million during the nine months ended September 30, 2007 and 2006, respectively.

Table of Contents

Liquidity and Capital Resources

As of September 30, 2007, the Company had cash, cash equivalents and short-term investments totaling \$150.9 million and working capital of \$88.6 million, as compared to cash, cash equivalents and short-term investments of \$104.5 million and working capital of \$36.4 million at December 31, 2006. The short-term investments are generally investment-grade and liquid, which allow the Company to minimize interest rate risk and to facilitate liquidity in the event an immediate cash need arises.

The net \$25.1 million increase in operating cash flows between the nine months ended September 30, 2007 (\$85.5 million) and September 30, 2006 (\$60.4 million) was primarily related to:

Increased net income of \$51.2 million from a net income of \$1.9 million for the nine months ended September 30, 2006 to net income of \$53.1 million for the nine months ended September 30, 2007

A \$13.4 million decrease in cash flows from working capital fluctuations whereby these fluctuations resulted in a net cash inflow of \$4.4 million during the nine months ended September 30, 2007 and a net cash inflow of \$17.8 million during the nine months ended September 30, 2006

A decrease in other non-cash operating items of \$12.7 million from \$40.7 million for the nine months ended September 30, 2006 to \$28.0 million for the nine months ended September 30, 2007. This decrease was most significantly impacted by the \$28.1 million non-tax deductible in-process research and development charge related to the Fluent acquisition, partially offset by an increase in the depreciation and amortization expense of \$11.0 million primarily associated with the amortization of the Fluent intangibles.

The Company's investing activities used net cash of \$8.8 million for the nine months ended September 30, 2007 and \$290.8 million for the nine months ended September 30, 2006. Total capital spending was \$8.6 million in 2007 and \$3.7 million in 2006. In addition, during 2006, the Company paid \$297.9 million, net of cash acquired, for Fluent, and had other acquisition-related cash outlays of approximately \$6.8 million. In 2006, maturing short-term investments exceeded related purchases by \$18.0 million. The Company currently plans additional capital spending of approximately \$2.0 million to \$4.0 million throughout the remainder of 2007; however, the level of spending will be dependent upon various factors, including growth of the business and general economic conditions.

Financing activities used cash of \$37.1 million in the nine months ended September 30, 2007 and provided cash of \$154.4 million in the nine months ended September 30, 2006. This change of \$191.5 million was primarily a net result of \$145.0 million generated during 2006 through \$198.0 million provided from term loans to finance the Fluent acquisition, partially offset by \$51.1 million in related principal payments and \$1.9 million in loan issuance costs. In addition, during 2007, the Company made \$47.2 million in term loan principal payments and spent \$2.5 million to repurchase treasury stock.

Table of Contents

The Company believes that existing cash and cash equivalent balances of \$150.7 million, together with cash generated from operations, will be sufficient to meet the Company's working capital, capital expenditure and debt service requirements through fiscal 2008. The Company's cash requirements in the future may also be financed through additional equity or debt financings. There can be no assurance that such financings can be obtained on favorable terms, if at all.

The Company continues to generate positive cash flows from operating activities and believes that the best use of its excess cash is to repay its long-term debt, to grow the business and, under certain favorable conditions, to repurchase stock. Additionally, the Company has in the past and expects in the future to acquire or make investments in complementary companies, products, services and technologies.

During the third quarter of 2007, the Company cancelled the irrevocable standby letter of credit, valued at \$1.9 million as of December 31, 2006, which had been issued as a guarantee for damages that could be awarded related to a legal matter in which the Company was involved. No material losses on this commitment were incurred.

Off - Balance Sheet Arrangements

The Company does not have any special purpose entities or off-balance sheet financing.

Contractual Obligations

The Company had no borrowings under an uncommitted and unsecured \$10.0 million line of credit. During the first quarter of 2007, the Company cancelled this line of credit.

As a result of the Company's adoption of FIN 48, the Company increased its liability for uncertain tax benefits, including interest and penalties, as of January 1, 2007 by approximately \$5.5 million. The Company cannot reasonably estimate the amounts and timing of future payments with respect to this liability.

There were no material changes to the Company's significant contractual obligations during the nine months ended September 30, 2007.

Table of Contents

Critical Accounting Policies and Estimates

Except as stated below, no other significant changes have occurred to the Company's critical accounting policies and estimates as previously reported within Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's most recent Form 10-K.

The Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, as of January 1, 2007. This interpretation clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes* and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company applied the provisions of FIN 48 to all tax positions upon initial adoption and the cumulative effect adjustment was recognized as an adjustment to retained earnings and goodwill. The adoption of this interpretation resulted in an increase to the Company's liability for unrecognized tax benefits of \$5.5 million and adversely impacted the Company's effective tax rate in the first nine months of 2007 by 1.9%.

Recently Issued Accounting Pronouncements

The Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, as of January 1, 2007. Refer to additional disclosures regarding the adoption of this interpretation in Critical Accounting Policies and Estimates above and in Note 9 to the Condensed Consolidated Financial Statements.

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements* (Statement No. 157). This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosure about fair value measurements. This statement is effective for fiscal periods beginning after November 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the impact of Statement No. 157 on its financial position, results of operations and cash flows.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (Statement No. 159). Statement No. 159 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. Statement No. 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the impact of Statement No. 159 on its financial position, results of operations and cash flows.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Interest Income Rate Risk. Changes in the overall level of interest rates affect the interest income that is generated from the Company's cash and short-term investments. For the three and nine months ended September 30, 2007, total interest income was \$1.3 million and \$3.2 million, respectively. Cash and cash equivalents consist primarily of highly liquid investments such as time deposits held at major banks, money market mutual funds and other securities with remaining maturities of three months or less. The Company considers investments backed by government agencies or U.S. financial institutions to be highly liquid and, accordingly, classifies such investments as short-term investments.

Interest Expense Rate Risk. The Company entered into two credit agreements with variable interest rates as of May 1, 2006 for a total of \$198 million. The amounts borrowed with respect to one of the credit agreements were paid in full as of December 31, 2006. Borrowings outstanding as of September 30, 2007 totaled \$74.7 million. For the three and nine months ended September 30, 2007, the Company recorded interest expense related to the term loans of \$1.4 million and \$4.9 million, representing weighted average interest rates of 5.83% and 5.89%, respectively. In addition, during the three and nine months ended September 30, 2007, the Company recorded amortization related to debt financing costs of \$130,000 and \$380,000, respectively. Based on the effective interest rates and outstanding borrowings at September 30, 2007, a 50 basis point increase in interest rates on the Company's borrowings would not impact the Company's interest expense for the quarter ending December 31, 2007 and would increase the Company's interest expense by approximately \$340,000 for the year ending December 31, 2008.

<i>(in thousands)</i>	September 30, 2007
Term loan payable in quarterly installments with an original final maturity of March 31, 2011	\$ 74,696
Total borrowings subject to variable interest rate fluctuations	\$ 74,696

The interest rate is based on the Company's consolidated leverage ratio and generally ranges from LIBOR + (0.50% - 1.25%) or, at the Company's election, Prime Rate + (0.00% - 0.25%). The interest rate is set for the quarter ending December 31, 2007 at 5.63% on \$34.7 million of the total outstanding balance, which is based on three-month LIBOR + 0.50%. For the remaining outstanding balance of \$40.0 million, the Company secured a fixed interest rate of 5.64% through March 31, 2007, which is based on six-month LIBOR + 0.50%.

Table of Contents

Foreign Currency Transaction Risk. As the Company continues to expand its business presence in international regions, the portion of its revenue, expenses, cash, accounts receivable and payment obligations denominated in foreign currencies continues to increase. As a result, changes in currency exchange rates from time to time may affect the Company's financial position, results of operations and cash flows. The Company is most impacted by movements in and among the British Pound, the Euro, the Canadian Dollar, the Japanese Yen, the Indian Rupee, the Swedish Krona and the Chinese Renminbi.

With respect to revenue, on average, for the third quarter of 2007, the U.S. Dollar was approximately 6.1% weaker, when measured against the Company's primary foreign currencies, than for the third quarter of 2006. The overall weakening resulted in increased revenue and operating income during the 2007 third quarter, as compared with the corresponding 2006 third quarter, of approximately \$2.5 million and \$750,000, respectively.

With respect to revenue, on average, for the nine-month period of 2007, the U.S. Dollar was approximately 6.0% weaker, when measured against the Company's primary foreign currencies, than for the nine-month period of 2006. The overall weakening resulted in increased revenue and operating income during the 2007 nine-month period, as compared with the corresponding 2006 period, of approximately \$5.4 million and \$1.9 million, respectively.

For both the three months and nine months ended September 30, 2007, the U.S. Dollar weakened against the British Pound, the Indian Rupee, the Euro, the Chinese Renminbi, the Canadian Dollar and the Swedish Krona while it strengthened against the Japanese Yen.

The largest fluctuations and the most significant impact on revenue and operating income were primarily attributable to the Euro and the British Pound. This is exhibited by the average month-end exchange rates provided in the chart below.

Period	USD/GBP	USD/EUR
December 2005	1.745	1.186
September 2006	1.872	1.268
December 2006	1.963	1.320
September 2007	2.046	1.426

As of September 30, 2007, Fluent Inc, a domestic subsidiary, had Japanese Yen denominated intercompany loans/advances with its foreign subsidiaries. In order to provide a natural hedge, ANSYS, Inc., the U.S. parent company, purchased 700 million Japanese Yen and held these currencies in cash as of September 30, 2007. This natural hedge substantially mitigates a portion of the foreign currency exchange risk on the intercompany loans/advances. If ANSYS sells some or all of the foreign currency held, without a corresponding change in the intercompany balances, the natural hedge will be eliminated and the Company will be exposed to additional foreign currency exchange risk.

Other Risks. Based on the nature of the Company's business, it has no direct exposure to commodity price risk.

No other material change has occurred in the Company's market risk subsequent to December 31, 2006.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. As required by Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, the Company has evaluated, with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that such disclosure controls and procedures were functioning effectively to provide reasonable assurance that the information required to be disclosed by the Company in reports filed or submitted under the Exchange Act was recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules.

Disclosure controls and procedures are the Company's controls and other procedures that are designed to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Exchange Act, such as this quarterly report, are recorded, processed, summarized and reported within the time periods specified in the SEC's rule. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company has a Disclosure Review Committee to assist in the quarterly evaluation of the Company's internal disclosure controls and procedures and in the review of the Company's periodic filings under the Exchange Act. The membership of the Disclosure Review Committee consists of the Company's Chief Executive Officer, Chief Financial Officer, Controller, General Counsel, Investor Relations Officer, Vice President of Sales and Support, Vice President of Human Resources, Vice President of Marketing and Business Unit General Managers, as well as certain other members of Fluent financial management. This committee is advised by external counsel, particularly on SEC-related matters. Additionally, other members of the Company's global management team advise the committee with respect to disclosure via a sub-certification process.

The Company believes, based on its knowledge, that the financial statements and other financial information included in this report fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this report. The Company is committed to both a sound internal control environment and to good corporate governance.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

From time-to-time, the Company reviews the disclosure controls and procedures, and may from time-to-time make changes aimed at enhancing their effectiveness and to ensure that the Company's systems evolve with its business.

Table of Contents

Changes in Internal Controls. The Company is in the process of extending its internal controls to its acquisition of Fluent Inc., including controls primarily related to revenue recognition, expenses, entity level governance, financial review, income tax accounting and financial reporting. Changes to internal controls were made during the first nine months of 2007 relative to this process. The Company has implemented its entity level controls at Fluent and its subsidiaries, including the Company's standard business processes, procedures and policies, and re-alignment of the Fluent general and administrative reporting structure.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

The Company is subject to various legal proceedings from time to time that arise in the ordinary course of business. These proceedings currently include customary audit activities by various taxing authorities among other matters. Each of these matters is subject to various uncertainties and it is possible that these matters may be resolved unfavorably to the Company. Management believes, after consulting with legal counsel, that the ultimate liabilities, if any, resulting from such legal proceedings will not materially affect the Company's financial position, liquidity or results of operations.

Item 1A. Risk Factors

The Company cautions investors that its performance (and, therefore, any forward-looking statement) is subject to risks and uncertainties. Various important factors may cause the Company's future results to differ materially from those projected in any forward-looking statement. These factors were disclosed in, but are not limited to, the items within the Company's most recent Form 10-K, Part I, Item 1A. No material changes have occurred during the nine months ended September 30, 2007 to the risk factors previously presented.
