See page 38 for a glossary of certain terms used in this Report.

Certain prior period amounts have been reclassified to conform with the current period presentation.

- (a) The Executive Summary and Consolidated Income Statement Review portions of the Financial Review section of this Report provide information regarding items impacting the comparability of the periods presented.
- (b) Calculated as annualized taxable-equivalent net interest income divided by average earning assets. The interest income earned on certain earning assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than taxable investments. To provide more meaningful comparisons of margins for all earning assets, we use net interest income on a taxable-equivalent basis in calculating net interest margin by increasing the interest income earned on tax-exempt assets to make it fully equivalent to interest income earned on taxable investments. This adjustment is not permitted under GAAP in the Consolidated Income Statement. The taxable-equivalent adjustments to net interest income for the three months ended June 30, 2008 and June 30, 2007 were \$10 million and \$8 million, respectively. The taxable-equivalent adjustments to net interest income for the six months ended June 30, 2008 and June 30, 2007 were \$19 million and \$14 million, respectively.
- (c) Calculated as noninterest expense divided by total revenue.

FINANCIAL REVIEW

THE PNC FINANCIAL SERVICES GROUP, INC.

This Financial Review should be read together with our unaudited Consolidated Financial Statements and unaudited Statistical Information included elsewhere in this Report and with Items 6, 7, 8 and 9A of our 2007 Annual Report on Form 10-K (2007 Form 10-K). We have reclassified certain prior period amounts to conform with the current period presentation. For information regarding certain business and regulatory risks, see the Risk Management section in this Financial Review and Items 1A and 7 of our 2007 Form 10-K and Item 1A included in Part II of this Report. Also, see the Cautionary Statement Regarding Forward-Looking Information and Critical Accounting Policies And Judgments sections in this Financial Review for certain other factors that could cause actual results or future events to differ, perhaps materially, from historical performance and those anticipated in the forward-looking statements included in this Report. See Note 16 Segment Reporting in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report for a reconciliation of total business segment earnings to total PNC consolidated net income as reported on a generally accepted accounting principles (GAAP) basis.

EXECUTIVE SUMMARY

THE PNC FINANCIAL SERVICES GROUP, INC.

PNC is one of the largest diversified financial services companies in the United States based on assets, with businesses engaged in retail banking, corporate and institutional banking, asset management, and global investment servicing. We provide many of our products and services nationally and others in our primary geographic markets located in Pennsylvania, New Jersey, Washington, DC, Maryland, Virginia, Ohio, Kentucky and Delaware. We also provide certain investment servicing internationally.

KEY STRATEGIC GOALS

We manage our company for the long term by focusing on maintaining a moderate risk profile, investing in our markets and products, and embracing our corporate responsibility to the communities where we do business.

Our strategy to enhance shareholder value centers on driving positive operating leverage by achieving growth in revenue from our balance sheet and diverse business mix that exceeds growth in expenses as a result of disciplined cost management. In each of our business segments, the primary drivers of revenue growth are the acquisition, expansion and retention of customer relationships. We strive to expand our customer base by offering convenient banking options and leading technology solutions, providing a broad range of fee-based products and services, focusing on customer service, and through a significantly enhanced branding initiative. We may also grow revenue through appropriate and targeted acquisitions and, in certain businesses, by expanding into new geographical markets.

We are focused on our strategies for growth. We remain committed to maintaining a moderate risk profile characterized by disciplined credit management and limited exposure to earnings volatility resulting from interest rate fluctuations and the shape of the interest rate yield curve. Our actions have created a well-positioned and strong balance sheet, ample liquidity and investment flexibility to adjust, where appropriate, to changing interest rates and market conditions. We continue to be disciplined in investing capital

in our businesses while returning a portion to shareholders through dividends and share repurchases when appropriate.

RECENT ACQUISITION AND DIVESTITURE ACTIVITY

On April 4, 2008, we acquired Lancaster, Pennsylvania-based Sterling Financial Corporation (Sterling) for approximately 4.6 million shares of PNC common stock and \$224 million in cash. Sterling was a banking and financial services company with approximately \$3.2 billion in assets, \$2.7 billion in deposits, and 65 branches in south-central Pennsylvania, northern Maryland and northern Delaware.

As previously reported, on March 31, 2008, we sold J.J.B. Hilliard, W.L. Lyons, LLC (Hilliard Lyons), a Louisville, Kentucky-based wholly-owned subsidiary of PNC and a full-service brokerage and financial services provider, to Houchens Industries, Inc. We recognized an after-tax gain of \$23 million in the first quarter of 2008 in connection with this divestiture. Business segment information for the periods presented in this report reflects the reclassification of results for Hilliard Lyons, including the gain on the sale of this business, from the Retail

Banking business segment to Other.

KEY FACTORS AFFECTING FINANCIAL PERFORMANCE

Our financial performance is substantially affected by several external factors outside of our control, including:

General economic conditions,
The level of, and direction, timing and magnitude of movement in interest rates, and the shape of the interest rate yield curve,
The functioning and other performance of, and availability of liquidity in, the capital and other financial markets,
Loan demand, utilization of credit commitments and standby letters of credit, and asset quality,
Customer demand for other products and services,
Movement of customer deposits from lower to higher rate accounts or to investment alternatives, and
The impact of market credit spreads on asset valuations.

Table of Contents

Starting in the middle of 2007, and continuing at present, there has been significant turmoil and volatility in worldwide financial markets, accompanied by uncertain prospects for the overall national economy. Our performance for the remainder of 2008 will continue to be impacted by developments in these areas. In addition, our success in 2008 will depend, among other things, upon:

Further success in the acquisition, growth and retention of customers,
 The successful integration of our recent acquisitions,
 Continued development of the markets related to our recent acquisitions, including full deployment of our product offerings,
 Revenue growth,
 A sustained focus on expense management and creating positive operating leverage,
 Maintaining solid overall asset quality,
 Prudent risk and capital management, and
 Actions we take within the capital and other financial markets.

SUMMARY FINANCIAL RESULTS

In millions, except per share data	Three months ended		Six months ended	
	June 30 2008	June 30 2007	June 30 2008	June 30 2007
Net income	\$ 505	\$ 423	\$ 882	\$ 882
Diluted earnings per share	\$ 1.45	\$ 1.22	\$ 2.54	\$ 2.67
Return on				
Average common shareholders' equity	13.99%	11.61%	12.32%	13.39%
Average assets	1.44%	1.38%	1.26%	1.54%

Highlights of the second quarter of 2008 included the following:

Net interest income grew 32% in the second quarter of 2008 compared with the second quarter of 2007 reflecting a significant decline in funding costs. The net interest margin expanded to 3.47% compared with 3.03% in the second quarter of 2007.

Noninterest income increased 9% compared with the second quarter of 2007. Diversity of noninterest revenue continued to differentiate us.

Net income for the second quarter of 2008 included an after-tax gain of \$52 million, or \$.15 per diluted share, on the mark to market of our BlackRock long-term incentive plan (LTIP) shares obligation and \$24 million, or \$.07 per diluted share, of after-tax integration costs.

Average loans increased 15% and average deposits increased 7% in the second quarter of 2008 compared with the second quarter of 2007.

Certain market risk positions were lowered during the second quarter via a reduction of commercial mortgage loans held for sale intended for securitization by approximately 23% and trading assets by approximately 22%, resulting in increased hedge coverage in connection with these activities.

Overall asset quality continued to be manageable in a challenging credit environment. Coverage ratio of the allowance for loan and lease losses to total loans improved to 1.35% at June 30, 2008 from 1.21% at December 31, 2007.

We continued to maintain a strong capital position. Our Tier 1 risk-based capital ratio increased to 8.2% at June 30, 2008 compared with 6.8% at December 31, 2007.

In addition, we created positive operating leverage by growing revenue while controlling noninterest expense. Revenue growth of 16% in the first half of 2008 compared with the same period in 2007 exceeded noninterest expense growth of 9% for the same periods.

Our Consolidated Income Statement Review section of this Financial Review describes in greater detail the various items that impacted our results for the second quarter and first half of 2008 and 2007.

BALANCE SHEET HIGHLIGHTS

Total assets were \$142.8 billion at June 30, 2008 compared with \$138.9 billion at December 31, 2007. Total average assets were \$141.0 billion for the first six months of 2008 compared with \$115.4 billion for the first six months of 2007. This increase reflected a \$20.6 billion increase in average interest-earning assets and a \$5.0 billion increase in average noninterest-earning assets. An increase of \$12.2 billion in loans and a \$5.8 billion increase in securities available for sale were the primary factors for the increase in average interest-earning assets.

The increase in average noninterest-earning assets for the first half of 2008 reflected an increase in average goodwill of \$2.3 billion primarily related to the acquisition of Sterling on April 4, 2008, Yardville National Bancorp (Yardville) on October 26, 2007 and Mercantile Bankshares

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Corporation (Mercantile) on March 2, 2007.

The impact of the Sterling, Yardville and Mercantile acquisitions is also reflected in our year-over-year increases in average total loans, average securities available for sale and average total deposits described further below.

Average total loans were \$71.1 billion for the first six months of 2008 and \$58.8 billion in the first six months of 2007. The increase in average total loans included growth in commercial loans of \$6.7 billion, consumer loans of \$2.3 billion, residential mortgage loans of \$1.7 billion and commercial real estate loans of \$1.6 billion. Loans represented 63% of average interest-earning assets for the first six months of 2008 and 64% for the first six months of 2007.

Average securities available for sale totaled \$30.7 billion for the first half of 2008 and \$24.9 billion for the first half of 2007. Average residential and commercial mortgage-backed securities increased \$4.6 billion on a combined basis in the comparison. In addition, asset-backed securities increased \$.9 billion in the first six months of 2008 compared with the prior

Table of Contents

year six-month period. Securities available for sale comprised 27% of average interest-earning assets for the first six months of both 2008 and 2007.

Average total deposits were \$82.8 billion for the first six months of 2008, an increase of \$8.8 billion over the first six months of 2007. Average deposits grew from the prior year period primarily as a result of increases in money market balances, other time deposits, time deposits in foreign offices, and demand and other noninterest-bearing deposits.

Average total deposits represented 59% of average total assets for the first half of 2008 and 64% for the first half of 2007. Average transaction deposits were \$54.1 billion for the first six months of 2008 compared with \$49.2 billion for the first six months of 2007.

Average borrowed funds were \$31.6 billion for the first six months of 2008 and \$19.1 billion for the first six months of 2007. Increases of \$8.8 billion in Federal Home Loan Bank borrowings, \$1.8 billion in bank notes and senior debt and \$1.4 billion in other borrowed funds drove the increase compared with the first half of 2007.

Shareholders' equity totaled \$15.1 billion at June 30, 2008 compared with \$14.9 billion at December 31, 2007. See the Consolidated Balance Sheet Review section of this Financial Review for additional information.

BUSINESS SEGMENT HIGHLIGHTS

Total business segment earnings were \$663 million for the first six months of 2008 and \$846 million for the first six months of 2007. Second quarter 2008 business segment earnings of \$376 million decreased \$58 million compared with the second quarter of 2007. Results for 2008 were impacted by a lower assigned revenue value for deposits in the current interest rate environment as well as the impact of net valuation adjustments on certain illiquid assets. Notwithstanding these factors, our business segments made significant progress in growing loans and deposits, adding customers and investing in products and services.

Highlights of results for the second quarter and first half of 2008 and 2007 are included below. The Business Segments Review section of this Financial Review includes further analysis of our business segment results over these periods.

We provide a reconciliation of total business segment earnings to total PNC consolidated net income as reported on a GAAP basis in Note 16 Segment Reporting in the Notes To Consolidated Financial Statements in this Report.

Retail Banking

Retail Banking's earnings were \$335 million for the first half of 2008 compared with \$419 million for the first half of 2007. The 20% decline in earnings over the prior year was driven by increases in expenses and the provision for credit losses, partially offset by benefits from the first quarter 2008 gain related to the Visa initial public offering and the net benefits from acquisitions.

Retail Banking's earnings were \$140 million for the second quarter of 2008 compared with \$222 million for the same period in 2007. The decline from the prior year second quarter was driven by an increase in the provision for credit losses and lower net interest income.

Corporate & Institutional Banking

Corporate & Institutional Banking earned \$136 million in the first six months of 2008 compared with \$254 million in the first six months of 2007. Earnings in 2008 were impacted by pretax valuation losses of \$156 million on commercial mortgage loans and commitments held for sale, net of hedges, and increases in the provision for credit losses and noninterest expenses, partially offset by higher net interest income.

For the second quarter of 2008, earnings from Corporate & Institutional Banking totaled \$134 million compared with \$122 million for the second quarter of 2007. Higher earnings in the second quarter of 2008 reflected higher revenue partially offset by increases in the provision for credit losses and noninterest expense.

BlackRock

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Our BlackRock business segment earned \$129 million for the first six months of 2008, a 17% increase compared with \$110 million for the first six months of 2007. Earnings from our BlackRock business segment totaled \$69 million for the second quarter of 2008 compared with \$58 million for the second quarter of 2007.

Global Investment Servicing

Our Global Investment Servicing business segment, formerly PFPC, earned \$63 million for the first six months of both 2008 and 2007. Earnings from Global Investment Servicing totaled \$33 million in the second quarter of 2008 compared with \$32 million in the second quarter of 2007. In the quarter comparison, increases in servicing revenue resulting from the impact of acquisitions and growth in offshore operations were offset by higher operating expenses resulting from investments in technology, a larger employee base to support business growth and costs related to acquisitions.

Other

Other earnings for the first half of 2008 totaled \$219 million compared with earnings of \$36 million for the first half of 2007. The first quarter 2008 gain on the sale of Hilliard Lyons, higher gains from PNC's LTIP obligation in 2008, the first quarter 2008 partial reversal of the Visa indemnification liability and growth in net interest income related to asset and liability management activities, partially offset by lower trading results, drove the higher earnings in the comparison.

For the second quarter of 2008, Other earnings totaled \$129 million compared with a net loss of \$11 million in the second quarter of 2007. Higher earnings in the second quarter of 2008 were mainly due to higher net interest income and a net gain related to PNC's LTIP obligation compared with a net loss in the prior year quarter.

Table of Contents**CONSOLIDATED INCOME STATEMENT REVIEW**

Our Consolidated Income Statement is presented in Part I, Item 1 of this Report. Net income for the first six months of both 2008 and 2007 was \$882 million. Net income for the second quarter of 2008 was \$505 million compared with net income of \$423 million for the second quarter of 2007. Total revenue for the first six months of 2008 increased 16% compared with the first six months of 2007. We created positive operating leverage as total noninterest expense increased 9% in the comparison.

NET INTEREST INCOME AND NET INTEREST MARGIN

Dollars in millions	Three months ended		Six months ended	
	June 30 2008	June 30 2007	June 30 2008	June 30 2007
Net interest income	\$ 977	\$ 738	\$ 1,831	\$ 1,361
Net interest margin	3.47%	3.03%	3.28%	3.00%

Changes in net interest income and margin result from the interaction of the volume and composition of interest-earning assets and related yields, interest-bearing liabilities and related rates paid, and noninterest-bearing sources of funding. See the Statistical Information - Average Consolidated Balance Sheet And Net Interest Analysis section of this Report for additional information.

The 35% increase in net interest income for the first six months of 2008 compared with the first six months of 2007 was favorably impacted by the \$20.6 billion, or 22%, increase in average interest-earning assets. Similarly, the 32% increase in net interest income for the second quarter of 2008 compared with the second quarter of 2007 reflected the \$15.2 billion, or 15%, increase in average interest-earning assets over this period and a decrease in funding costs. Wider net interest margins also benefited the 2008 periods in both the second quarter and first half comparisons. The reasons driving the higher interest-earning assets in these comparisons are further discussed in the Balance Sheet Highlights portion of the Executive Summary section of this Financial Review.

We expect net interest income growth will exceed 28% for full year 2008 compared with 2007, assuming our current expectations for interest rates and economic conditions. We include our current economic assumptions underlying our forward-looking statements in the Cautionary Statement Regarding Forward-Looking Information section of this Financial Review.

The net interest margin was 3.28% for the first half of 2008 and 3.00% for the first half of 2007. The following factors impacted the comparison:

A decrease in the rate paid on interest-bearing liabilities of 114 basis points. The rate paid on interest-bearing deposits, the single largest component, decreased 102 basis points.

These factors were partially offset by a 58 basis point decrease in the yield on interest-earning assets. The yield on loans, the single largest component, decreased 79 basis points.

In addition, the impact of noninterest-bearing sources of funding decreased 28 basis points due to lower interest rates and a lower proportion of noninterest-bearing sources of funding to interest-earning assets.

The net interest margin was 3.47% for the second quarter of 2008 and 3.03% for the second quarter of 2007. The following factors impacted the comparison:

A decrease in the rate paid on interest-bearing liabilities of 151 basis points. The rate paid on interest-bearing deposits, the single largest component, decreased 132 basis points.

These factors were partially offset by a 76 basis point decrease in the yield on interest-earning assets. The yield on loans, the single largest component, decreased 105 basis points.

In addition, the impact of noninterest-bearing sources of funding decreased 31 basis points due to lower interest rates and a lower proportion of noninterest-bearing sources of funding to interest-earning assets.

For comparing to the broader market, during the first six months of 2008 the average federal funds rate was 2.62% compared with 5.25% for the first six months of 2007. The average federal funds rate was 2.09% for the second quarter of 2008 compared with 5.25% for the second quarter of 2007.

We believe that net interest margins for our industry will continue to be impacted by competition for high quality loans and deposits and customer migration from lower to higher rate deposit or other products. We expect our net interest margin to improve for full year 2008 compared with 2007, assuming our current expectations for interest rates and economic conditions.

NONINTEREST INCOME

Summary

Noninterest income totaled \$2.029 billion for the first six months of 2008 compared with \$1.966 billion for the first six months of 2007.

Noninterest income for the first half of 2008 included the following:

Income from Hilliard Lyons totaling \$164 million, including the first quarter gain of \$114 million from the sale of this business,
Gains of \$120 million related to our BlackRock LTIP shares adjustment,

A first quarter gain of \$95 million related to the redemption of a portion of our Visa Class B common shares related to Visa's March 2008 initial public offering,

Table of Contents

Equity management gains and net securities gains totaling \$56 million,
Valuation losses related to our commercial mortgage loans and commitments held for sale, net of hedges, of \$156 million, and
Trading losses of \$23 million.

Noninterest income for the first half of 2007 included the following:

Income from Hilliard Lyons totaling \$113 million,
Trading income of \$81 million,
A net gain related to our equity investment in BlackRock of \$51 million, representing an \$82 million gain recognized in connection with our transfer of BlackRock shares to satisfy a portion of our 2002 LTIP obligation, partially offset by a net mark-to-market loss totaling \$31 million on our remaining BlackRock LTIP shares obligation, and
Equity management gains and net securities losses netting to \$32 million of gains.

Apart from the impact of these items, noninterest income increased \$84 million, or 5%, for the first six months of 2008 compared with the first six months of 2007.

Noninterest income totaled \$1.062 billion for the second quarter of 2008 compared with \$975 million for the second quarter of 2007. The second quarter of 2008 included a gain of \$80 million related to our BlackRock LTIP shares adjustment. In addition, the second quarter of 2007 included income from Hilliard Lyons of \$58 million. Apart from the impact of these items, noninterest income increased \$65 million, or 7%, in this comparison.

Additional Analysis

Fund servicing fees increased \$50 million, to \$462 million, in the first six months of 2008 compared with the first six months of 2007. Fund servicing fees totaled \$234 million in the second quarter of 2008 compared with \$209 million in the second quarter of 2007. The increases in both comparisons primarily resulted from the December 2007 acquisition of Albridge Solutions Inc. and growth in Global Investment Servicing's offshore operations.

Global Investment Servicing provided fund accounting/administration services for \$988 billion of net fund investment assets and provided custody services for \$471 billion of fund investment assets at June 30, 2008, compared with \$868 billion and \$467 billion, respectively, at June 30, 2007. Global Investment Servicing experienced both organic growth and growth from new business in each of its product areas.

Asset management fees totaled \$409 million in the first half of 2008, an increase of \$54 million compared with the first half of 2007. For the second quarter of 2008, asset management fees totaled \$197 million compared with \$190 million in the

second quarter of 2007. Higher equity earnings from our BlackRock investment was reflected in both 2008 increases and our March 2007 acquisition of Mercantile impacted the six-month comparison. These factors more than offset the effect on fees of an \$11 billion decrease in assets managed related to wealth management. Assets managed at June 30, 2008 totaled \$66 billion compared with \$77 billion at June 30, 2007. The decrease reflected the Hilliard Lyons sale and the impact of comparatively lower equity markets in the first six months of 2008.

Consumer services fees declined \$17 million, to \$319 million, for the first six months of 2008 compared with the first six months of 2007. For the second quarter of 2008, consumer services fees totaled \$149 million compared with \$179 million in the second quarter of 2007. In both comparisons, the sale of Hilliard Lyons more than offset the benefits of higher debit card and credit card revenues. The impact of expansion into new markets contributed to higher debit card revenue in the six-month comparison.

Corporate services revenue totaled \$349 million in the first half of 2008 compared with \$335 million in the first half of 2007. Corporate services revenue increased \$9 million, to \$185 million, in the second quarter of 2008 compared with the prior year quarter. Higher revenue from treasury management and third party consumer loan servicing activities, partially offset by lower revenue related to merger and acquisition advisory fees, were the primary factors in both increases.

Service charges on deposits grew \$5 million, to \$174 million, in the first six months of 2008 compared with the first six months of 2007, and reflected the impact of our expansion into new markets. Service charges on deposits totaled \$92 million for the second quarter of both 2008 and 2007.

Net securities gains totaled \$40 million for the first half of 2008 compared with net securities losses of \$2 million in the first half of 2007.

Other noninterest income totaled \$276 million for the first six months of 2008 compared with \$361 million for the first six months of 2007.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Other noninterest income for the first six months of 2008 included the \$114 million gain from the sale of Hilliard Lyons, the \$95 million gain from the redemption of a portion of our investment in Visa related to their March 2008 initial public offering, and gains of \$120 million related to our BlackRock LTIP shares adjustment. The impact of these items was partially offset by valuation losses related to our commercial mortgage loans and commitments held for sale, net of hedges, of \$156 million, impairments relating to our equity investments of \$26 million and trading losses of \$23 million.

Table of Contents

Trading income of \$81 million and a net gain related to our BlackRock LTIP shares adjustment of \$51 million were included in other noninterest income for the first six months of 2007.

For the second quarter of 2008, other noninterest income totaled \$206 million compared with \$128 million for the second quarter of 2007. The second quarter of 2008 included the \$80 million gain related to our BlackRock LTIP shares adjustment.

Additional information regarding our transactions related to Visa is included in Note 15 Commitments And Guarantees in the Notes To Consolidated Financial Statements included in this Report. Further details regarding our trading activities are included in the Market Risk Management Trading Risk portion of the Risk Management section of this Financial Review.

Other noninterest income typically fluctuates from period to period depending on the nature and magnitude of transactions completed.

We expect that total revenue will increase by a mid-teens percentage for full year 2008 compared with full year 2007, assuming our current expectations for interest rates and economic conditions. We also expect to create positive operating leverage for full year 2008 with a percentage growth in total revenue relative to 2007 that will exceed the percentage growth in noninterest expense from 2007.

PRODUCT REVENUE

In addition to credit and deposit products for commercial customers, Corporate & Institutional Banking offers other services, including treasury management and capital markets-related products and services and commercial mortgage loan servicing, that are marketed by several businesses to commercial and retail customers across PNC.

Revenue from capital markets-related products and services totaled \$180 million in the first half of 2008 compared with \$143 million in the first half of 2007. Revenue totaled \$104 million for the second quarter of 2008 compared with \$76 million for the second quarter of 2007. These increases were primarily driven by strong customer interest rate derivative and foreign exchange activity partially offset by a decline in merger and acquisition advisory fees.

Treasury management revenue, which includes fees as well as net interest income from customer deposit balances, increased 19% to \$266 million in the first six months of 2008 compared with \$224 million for the first six months of 2007. The higher revenue reflected the impact of our expansion into new markets and strong growth in the commercial payment card

services and in cash and liquidity management products. For the second quarter of 2008, treasury management revenue totaled \$133 million compared with \$114 million in the second quarter of 2007.

Commercial mortgage banking activities include revenue derived from loan originations, commercial mortgage servicing (including net interest income and noninterest income from loan servicing and ancillary services), gains on sales of loans held for sale, net interest income on loans held for sale, and mark-to-market valuation adjustments on held for sale commercial mortgage loans intended for securitization and related commitments and derivative valuations. Commercial mortgage banking activities resulted in revenue of \$9 million in the first six months of 2008 compared with \$140 million in the first six months of 2007. The first half of 2008 included valuation losses of \$156 million on commercial mortgage loans and commitments held for sale, net of hedges, due to the impact of an illiquid market in most of the first half of 2008.

For the second quarter of 2008, revenue from commercial mortgage banking activities totaled \$105 million compared with \$67 million in the second quarter of 2007. The increase reflected a \$21 million positive valuation adjustment, net of hedges, and higher net interest income in the second quarter of 2008.

PROVISION FOR CREDIT LOSSES

The provision for credit losses totaled \$337 million for the first six months of 2008 compared with \$62 million for the first six months of 2007. The provision for credit losses for the second quarter of 2008 totaled \$186 million compared with \$54 million for the second quarter of 2007. The higher provision in both comparisons was driven by general credit quality migration, especially in the residential real estate development sector of our commercial real estate portfolio. Total residential real estate development outstandings were approximately \$2.1 billion at June 30, 2008. Growth in our total credit exposure also contributed to the higher provision amounts in both comparisons.

Given our projections for loan growth and continued credit deterioration, and our current assumptions for the national economy, we expect that the provision for credit losses will be approximately \$750 million for full year 2008, including the impact of the Sterling acquisition. However,

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

we believe that increased operating leverage will be more than adequate to cover increased credit costs in 2008.

The Credit Risk Management portion of the Risk Management section of this Financial Review includes additional information regarding factors impacting the provision for credit losses.

Table of Contents**NONINTEREST EXPENSE**

Total noninterest expense was \$2.157 billion for the first six months of 2008 and \$1.984 billion for the first six months of 2007. Noninterest expense totaled \$1.115 billion for the second quarter of 2008 compared with \$1.040 billion for the second quarter of 2007.

Noninterest expense for the first half of 2008 included the benefit of the first quarter 2008 reversal of \$43 million of the \$82 million Visa indemnification liability that we established in the fourth quarter of 2007. Additional information regarding our transactions related to Visa is included in Note 15 Commitments And Guarantees in the Notes To Consolidated Financial Statements included in this Report.

Higher noninterest expense in both the second quarter and first half comparisons with 2007 primarily resulted from investments in growth initiatives, including acquisitions, partially offset by the impact of the sale of Hilliard Lyons and disciplined expense management.

Integration costs included in noninterest expense totaled \$27 million for the first half of 2008 and \$26 million for the first

half of 2007. Integration costs in the second quarter of 2008 totaled \$13 million compared with \$15 million in the second quarter of 2007.

We expect noninterest expense to grow at a low-to-mid single digit percentage for full year 2008 compared with 2007.

PERIOD-END EMPLOYEES

	June 30 2008	December 31 2007	June 30 2007
Full-time	25,667	25,480	25,026
Part-time	2,938	2,840	3,028
Total	28,605	28,320	28,054

EFFECTIVE TAX RATE

Our effective tax rate was 35.4% for the first six months of 2008 and 31.1% for the first six months of 2007. The higher effective tax rate for the first six months of 2008 was due to taxes associated with the gain on the sale of Hilliard Lyons. We expect our effective tax rate to be approximately 33% for full year 2008.

Table of Contents**CONSOLIDATED BALANCE SHEET REVIEW****SUMMARIZED BALANCE SHEET DATA**

The summarized balance sheet data above is based upon our Consolidated Balance Sheet that is presented in Part I, Item 1 of this Report.

Various seasonal and other factors impact our period-end balances whereas average balances (discussed under the Balance Sheet Highlights section of this Financial Review above and included in the Statistical Information section of this Report) are more indicative of underlying business trends.

An analysis of changes in certain balance sheet categories follows.

LOANS, NET OF UNEARNED INCOME

Loans increased \$4.7 billion, to \$73.0 billion, at June 30, 2008 compared with the balance at December 31, 2007. In February 2008, we transferred the education loans in our held for sale portfolio to the loan portfolio as further described in the Loans Held For Sale section of this Consolidated Balance Sheet Review.

Total, net of unearned income	\$ 73,040	\$ 68,319

(a) Includes loans to customers in the real estate and construction industries.

Total loans represented 51% of total assets at June 30, 2008 and 49% of total assets at December 31, 2007.

Our total loan portfolio continued to be diversified among numerous industries and types of businesses. The loans that we hold are also concentrated in, and diversified across, our principal geographic markets.

Approximately \$2.1 billion of the \$6.5 billion of real estate projects loans at June 30, 2008 were in residential real estate development. These represented approximately 3% of total loans and less than 2% of total assets at June 30, 2008.

Our home equity loan outstandings totaled \$14.7 billion at June 30, 2008. In this portfolio, we consider the higher risk loans to be those with a recent FICO credit score of less than or equal to 660 and a loan-to-value ratio greater than or equal to 90%. We had \$544 million or approximately 4% of the total portfolio in this grouping at June 30, 2008. Consistent with the entire home equity portfolio, approximately 94% of these higher-risk loans are located in our geographic footprint. In our \$9.0 billion residential mortgage portfolio, loans with a recent FICO credit score of less than or equal to 660 and a loan-to-value ratio greater than or equal to 90% totaled \$152 million and comprised approximately 2% of this portfolio at June 30, 2008.

Table of Contents

Commercial lending outstandings in the table above are the largest category and are the most sensitive to changes in assumptions and judgments underlying the determination of the allowance for loan and lease losses. We have allocated approximately \$886 million, or 90%, of the total allowance for loan and lease losses at June 30, 2008 to these loans. We allocated \$90 million, or 9%, of the remaining allowance at that date to consumer loans and \$12 million, or 1%, to all other loans. This allocation also considers other relevant factors such as:

- Actual versus estimated losses,
- Regional and national economic conditions,
- Business segment and portfolio concentrations,
- Industry conditions,
- The impact of government regulations, and
- Risk of potential estimation or judgmental errors, including the accuracy of risk ratings.

Net Unfunded Credit Commitments

In millions	June 30 2008	December 31 2007
Commercial	\$ 37,127	\$ 39,171
Consumer	11,394	10,875
Commercial real estate	2,525	2,734
Other	512	567
Total	\$ 51,558	\$ 53,347

Unfunded commitments are concentrated in our primary geographic markets. Commitments to extend credit represent arrangements to lend funds or provide liquidity subject to specified contractual conditions. Commercial commitments reported net of participations, assignments and syndications totaled \$7.9 billion at June 30, 2008 and \$8.9 billion at December 31, 2007. The decrease from December 31, 2007 was primarily due to Market Street.

Unfunded liquidity facility commitments and standby bond purchase agreements totaled \$7.5 billion at June 30, 2008 and \$9.4 billion at December 31, 2007 and are included in the preceding table primarily within the Commercial and Consumer categories. The decrease from December 31, 2007 was primarily due to Market Street.

In addition to credit commitments, our net outstanding standby letters of credit totaled \$5.7 billion at June 30, 2008 and \$4.8 billion at December 31, 2007. Standby letters of credit commit us to make payments on behalf of our customers if specified future events occur.

SECURITIES AVAILABLE FOR SALE

In millions	Amortized Cost	Fair Value
June 30, 2008		
Debt securities		
Residential mortgage-backed	\$ 22,175	\$ 20,707
Commercial mortgage-backed	5,884	5,754
Asset-backed	3,568	3,162
US Treasury and government agencies	32	33
State and municipal	799	776
Other debt	259	255
Corporate stocks and other	349	345
Total securities available for sale	\$ 33,066	\$ 31,032
December 31, 2007		
Debt securities		
Residential mortgage-backed	\$ 21,147	\$ 20,952
Commercial mortgage-backed	5,227	5,264

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Asset-backed	2,878	2,770
US Treasury and government agencies	151	155
State and municipal	340	336
Other debt	85	84
Corporate stocks and other	662	664
Total securities available for sale	\$ 30,490	\$ 30,225
Securities available for sale represented 22% of total assets at both June 30, 2008 and December 31, 2007.		

At June 30, 2008, securities available for sale included a net pretax unrealized loss of \$2.0 billion, which represented the difference between fair value and amortized cost. The comparable amount at December 31, 2007 was a net unrealized loss of \$265 million. The fair value of securities available for sale is impacted by interest rates, credit spreads, volatility and illiquidity. We believe that substantially all of the decline in value of these securities is attributable to changes in credit spreads and not from deterioration in the credit quality of individual securities or underlying collateral, where applicable. However, if the current issues affecting the US housing market were to continue for the foreseeable future or worsen, or if market volatility and illiquidity were to continue or worsen, or if market interest rates were to increase appreciably, the valuation of our available for sale securities portfolio could be adversely affected. See Note 4 Securities in the Notes To Consolidated Financial Statements included in this Report for further information.

Table of Contents

Net unrealized gains and losses in the securities available for sale portfolio are included in shareholders' equity as accumulated other comprehensive income or loss, net of tax.

The Fair Value Measurements and Fair Value Option section of this Financial Review includes information regarding other-than-temporary impairments totaling \$9 million that we recognized during the second quarter of 2008.

The expected weighted-average life of securities available for sale (excluding corporate stocks and other) was 4 years and 3 months at June 30, 2008 and 3 years and 6 months at December 31, 2007.

We estimate that at June 30, 2008 the effective duration of securities available for sale was 3.4 years for an immediate 50 basis points parallel increase in interest rates and 3.3 years for an immediate 50 basis points parallel decrease in interest rates. Comparable amounts at December 31, 2007 were 2.8 years and 2.5 years, respectively.

LOANS HELD FOR SALE

In millions	June 30 2008	December 31 2007
Commercial mortgage	\$ 1,864	\$ 2,116
Residential mortgage	102	117
Education		1,525
Other	322	169
Total	\$ 2,288	\$ 3,927

During the second quarter of 2008, we reduced our inventory of commercial mortgage loans held for sale via securitizations by approximately \$0.5 billion, to \$1.6 billion, and recognized a positive valuation adjustment for loans and commitments of \$21 million, net of hedges. In early 2008, spreads widened and there was limited activity in the commercial real estate loan securitization market. During the first quarter of 2008, we recorded a negative valuation adjustment for loans and commitments of \$177 million, net of hedges. These loans are recorded at fair value. The valuation adjustments were reflected in the other noninterest income line item in our Consolidated Income Statement and in the results of the Corporate & Institutional Banking business segment.

We value our commercial mortgage loans held for sale based on securitization prices. If conditions similar to early 2008 recur, additional valuation losses may be incurred. If spreads narrow, we may realize valuation gains. However, we do not expect the impact to be significant to our capital position. We are not currently originating commercial mortgages for distribution through commercial real estate loan securitizations. We intend to pursue opportunities to further reduce our commercial mortgage loans held for sale position during the remainder of 2008 if we can receive prices we feel are appropriate.

We previously classified substantially all of our education loans as loans held for sale as we sold education loans to issuers of asset-backed paper when the loans were placed into repayment status. During 2008, the secondary markets for education loans have been impacted by liquidity issues similar to those for other asset classes. In February 2008, given this outlook and the economic and customer relationship value inherent in this product, we transferred these loans at lower of cost or market value from held for sale to the loan portfolio. We did not sell education loans during the second quarter of 2008 and do not anticipate sales of these loans in the foreseeable future.

FUNDING AND CAPITAL SOURCES**Details Of Funding Sources**

In millions	June 30 2008	December 31 2007
Deposits		
Money market	\$ 38,772	\$ 32,785

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Demand	18,171	20,861
Retail certificates of deposit	16,618	16,939
Savings	2,801	2,648
Other time	5,239	2,088
Time deposits in foreign offices	3,088	7,375
Total deposits	84,689	82,696
Borrowed funds		
Federal funds purchased	7,343	7,037
Repurchase agreements	1,887	2,737
Federal Home Loan Bank borrowings	9,572	7,065
Bank notes and senior debt	5,804	6,821
Subordinated debt	5,169	4,506
Other	2,697	2,765
Total borrowed funds	32,472	30,931
Total	\$ 117,161	\$ 113,627

Total funding sources increased \$3.5 billion, or 3%, at June 30, 2008 compared with December 31, 2007.

Total deposits increased \$2.0 billion, or 2%, as higher money market balances and other time deposits more than offset declines in demand and time deposits in foreign offices. Total borrowed funds increased \$1.5 billion, or 5%, at June 30, 2008 compared with the prior year end primarily due to the increase of \$2.5 billion in Federal Home Loan Bank (FHLB) borrowings, partially offset by reductions in bank notes and senior debt and repurchase agreements. The Liquidity Risk Management portion of the Risk Management section of this Financial Review includes additional information regarding our 2008 borrowed funds activities.

Table of Contents**Capital**

We manage our capital position by making adjustments to our balance sheet size and composition, issuing subordinated debt, equity or hybrid instruments, executing treasury stock transactions, maintaining dividend policies and retaining earnings. In April 2008, we announced a 5% increase of the cash dividend on our common stock, to 66 cents per share. Also, the Liquidity Risk Management section of this Report describes our May 2008 Series K preferred stock issuance.

Total shareholders' equity increased \$.3 billion, to \$15.1 billion, at June 30, 2008 compared with December 31, 2007. In addition to net income, the Series K preferred stock issuance and new common shares issued in connection with the Sterling acquisition more than offset the impact of dividends and an increase in accumulated other comprehensive loss in the first six months of 2008. The increase in accumulated other comprehensive loss was primarily due to higher net unrealized losses on available for sale securities that reflected market illiquidity.

Common shares outstanding totaled 346 million at June 30, 2008 and 341 million at December 31, 2007. PNC issued approximately 4.6 million common shares in April 2008 in connection with the closing of the Sterling acquisition.

Our current common stock repurchase program permits us to purchase up to 25 million shares of PNC common stock on the open market or in privately negotiated transactions. This program will remain in effect until fully utilized or until modified, superseded or terminated. The extent and timing of share repurchases under this program will depend on a number of factors including, among others, market and general economic conditions, economic and regulatory capital considerations, alternative uses of capital, regulatory limitations resulting from merger activity, and the potential impact on our credit ratings.

We did not purchase any shares during the first half of 2008 under this program. We do not expect to actively engage in share repurchase activity for the foreseeable future as we look to enhance our capital position.

(a) As of June 30, 2008, deferred taxes on taxable combinations were added to eligible deferred income taxes for non-taxable combinations that are used in the calculation of the tangible common equity ratio.

The tangible common equity information provided in the table above does not reflect the full value of our equity investment in BlackRock. As of June 30, 2008, the market value of our investment exceeded the book value by \$3.3 billion. This unrecognized gain would have resulted in a \$2.1 billion after-tax increase to our tangible common equity, to \$7.9 billion. See additional information regarding our investment in BlackRock on page 26.

The access to, and cost of, funding new business initiatives including acquisitions, the ability to engage in expanded business activities, the ability to pay dividends, the level of deposit insurance costs, and the level and nature of regulatory oversight depend, in part, on a financial institution's capital strength. At June 30, 2008, each of our domestic banking subsidiaries was considered well-capitalized based on US regulatory capital ratio requirements, which are indicated on page 2 of this Report. We believe our current bank subsidiaries will continue to meet these requirements during the remainder of 2008.

Table of Contents**OFF-BALANCE SHEET ARRANGEMENTS AND VARIABLE INTEREST ENTITIES**

We engage in a variety of activities that involve unconsolidated entities or that are otherwise not reflected in our Consolidated Balance Sheet that are generally referred to as off-balance sheet arrangements.

Commitments, including contractual obligations and other commitments, are included within the Risk Management section of this Financial Review and in Note 15 Commitments And Guarantees in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report.

The following provides a summary of variable interest entities (VIEs), including those that we have consolidated and those in which we hold a significant variable interest but have not consolidated into our financial statements as of June 30, 2008 and December 31, 2007.

Consolidated VIEs PNC Is Primary Beneficiary

In millions	Aggregate	
	Assets	Aggregate Liabilities
Partnership interests in low income housing projects		
June 30, 2008	\$ 1,062	\$ 1,062
December 31, 2007	\$ 1,110	\$ 1,110

Additional information on our partnership interests in low income housing projects is included in our 2007 Form 10-K under this same heading in Part I, Item 7 and in Note 3 Variable Interest Entities in the Notes To Consolidated Financial Statements included in Part II, Item 8 of that report.

Non-Consolidated VIEs Significant Variable Interests

In millions	Aggregate Assets	Aggregate Liabilities	PNC Risk of Loss
June 30, 2008			
Market Street	\$ 4,582	\$ 4,628	\$ 7,230(a)
Collateralized debt obligations	47	1	5
Partnership interests in low income housing projects	50	34	8
Total	\$ 4,679	\$ 4,663	\$ 7,243
December 31, 2007			
Market Street	\$ 5,304	\$ 5,330	\$ 9,019(a)
Collateralized debt obligations	255	177	6
Partnership interests in low income housing projects	50	34	8
Total	\$ 5,609	\$ 5,541	\$ 9,033

(a) PNC's risk of loss consists of off-balance sheet liquidity commitments to Market Street of \$7.0 billion and other credit enhancements of \$.2 billion at June 30, 2008. The comparable amounts were \$8.8 billion and \$.2 billion at December 31, 2007. These liquidity commitments are included in the Net Unfunded Credit Commitments table in the Consolidated Balance Sheet Review section of this Report.

Market Street

Market Street Funding LLC (Market Street) is a multi-seller asset-backed commercial paper conduit that is owned by an independent third party. Market Street's activities primarily involve purchasing assets or making loans secured by interests in pools of receivables from US corporations that desire access to the commercial paper market. Market Street funds the purchases of assets or loans by issuing commercial paper which has been rated A1/P1 by Standard & Poor's and Moody's, respectively, and is supported by pool-specific credit enhancements, liquidity facilities and program-level credit enhancement. Generally, Market Street mitigates its potential interest rate risk by entering into agreements with its borrowers that reflect interest rates based upon its weighted average commercial paper cost of funds. During 2007 and the first six months of

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

2008, Market Street met all of its funding needs through the issuance of commercial paper.

Market Street commercial paper outstanding was \$4.4 billion at June 30, 2008 and \$5.1 billion at December 31, 2007. The weighted average maturity of the commercial paper was 31 days at June 30, 2008 compared with 32 days at December 31, 2007.

In the ordinary course of business during the first six months of 2008, PNC Capital Markets, acting as a placement agent for Market Street, held a maximum daily position in Market Street commercial paper of \$75 million with an average of \$19 million and a June 30, 2008 position of zero. This compares with a maximum daily position of \$113 million with an average of \$27 million during the year ended December 31, 2007. PNC Capital Markets owned less than \$1 million of Market Street commercial paper at December 31, 2007. PNC made no other purchases of Market Street commercial paper during 2007 or 2008.

PNC Bank, National Association (PNC Bank, N.A.) provides certain administrative services, a portion of the program-level credit enhancement and 99% of liquidity facilities to Market Street in exchange for fees negotiated based on market rates. PNC recognized program administrator fees and commitment fees related to PNC's portion of the liquidity facilities of \$8 million and \$2 million, respectively, for the six months ended June 30, 2008. The comparable amounts were \$6 million and \$2 million for the six months ended June 30, 2007.

PNC views its credit exposure for the Market Street transactions as limited. Neither creditors nor investors in Market Street have any recourse to our general credit. The commercial paper obligations at June 30, 2008 and December 31, 2007 were effectively collateralized by Market Street's assets. While PNC may be obligated to fund under the \$7.0 billion of liquidity facilities for events such as commercial paper market disruptions, borrower bankruptcies, collateral deficiencies or covenant violations, our credit risk under the liquidity facilities is secondary to the risk of first loss provided by the borrower or another third party in the form of deal-specific credit enhancement – for example, by the over collateralization of the assets. Deal-specific credit enhancement that supports the commercial paper issued by

Table of Contents

Market Street is generally structured to cover a multiple of expected losses for the pool of assets and is sized to generally meet rating agency standards for comparably structured transactions. In addition, PNC would be required to fund \$1.2 billion of the liquidity facilities if the underlying assets are in default. See Note 15 Commitments And Guarantees included in the Notes To Consolidated Financial Statements of this Report for additional information.

Program-level credit enhancement in the amount of 10% of commitments, excluding explicitly rated AAA/Aaa facilities, is provided by PNC and Ambac, a monoline insurer. PNC provides 25% of the enhancement in the form of a cash collateral account funded by a loan facility. This facility expires in March 2013. The monoline insurer provides the remaining 75% of the enhancement in the form of a surety bond. The cash collateral account is subordinate to the surety bond.

Market Street has entered into a Subordinated Note Purchase Agreement (Note) with an unrelated third party. The Note provides first loss coverage whereby the investor absorbs losses up to the amount of the Note, which was \$7.0 million as of June 30, 2008. Proceeds from the issuance of the Note are held by Market Street in a first loss reserve account that will be used to reimburse any losses incurred by Market Street, PNC Bank, N.A. or other providers under the liquidity facilities and the credit enhancement arrangements.

Assets of Market Street Funding LLC

In millions	Outstanding	Commitments	Weighted Average Remaining Maturity In Years
June 30, 2008 (a)			
Trade receivables	\$ 1,522	\$ 3,150	2.60

(a) Market Street did not recognize an asset impairment charge or experience a rating downgrade on its assets during 2007 and the first six months of 2008.

Market Street Commitments by Credit Rating (a)

	June 30, 2008	December 31, 2007
AAA/Aaa	14%	19%
AA/Aa	5	6
A/A	78	72
BBB/Baa	3	3

Total	100%	100%
-------	------	------

(a) Not all facilities are explicitly rated by the rating agencies. Facilities are structured to meet rating agency standards for comparably structured transactions. We evaluated the design of Market Street, its capital structure, the Note, and relationships among the variable interest holders under the provisions of FASB Interpretation No. 46, (Revised 2003) Consolidation of Variable Interest Entities (FIN 46R). Based on this analysis, we are not the primary beneficiary as defined by FIN 46R and therefore the assets and liabilities of Market Street are not reflected in our Consolidated Balance Sheet.

We would consider changes to the variable interest holders (such as new expected loss note investors and changes to program-level credit enhancement providers), terms of expected loss notes, and new types of risks (such as foreign currency or interest rate) related to Market Street as reconsideration events. We review the activities of Market Street on at least a quarterly basis to determine if a reconsideration event has occurred. As indicated earlier, 75% of the program-level credit enhancement is provided by Ambac in the form of a surety bond. PNC Bank, N.A., in the role of program administrator, is closely following market developments relative to the rating agency outlooks of monoline insurers. Ambac is rated AA and Aa3 by Standard and Poor's and Moody's, respectively. This rating change has not impacted the Market Street commercial paper ratings of A1/P1. Various alternatives to the program-level enhancement are available if future rating changes impact either the ratings of Market Street commercial paper or its financial results.

Based on current accounting guidance, we are not required to consolidate Market Street into our consolidated financial statements. However, if PNC would be determined to be the primary beneficiary under FIN 46R, we would consolidate the commercial paper conduit at that time. Based on current accounting guidance, to the extent that the par value of the assets in Market Street exceeded the fair value of the assets upon consolidation, the difference would be recognized by PNC as a loss in our Consolidated Income Statement in that period. Based on the fair value of the assets held by Market Street at June 30, 2008, the consolidation of Market Street would not have had a material impact on our risk-based capital ratios, credit ratings or debt covenants.

Perpetual Trust Securities

We issue certain hybrid capital vehicles that qualify as capital for regulatory and rating agency purposes.

In February 2008, PNC Preferred Funding LLC (the LLC), one of our indirect subsidiaries, sold \$375 million of 8.700%

Table of Contents

Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities of PNC Preferred Funding Trust III (Trust III) to third parties in a private placement. In connection with the private placement, Trust III acquired \$375 million of Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Securities of the LLC (the LLC Preferred Securities). The sale was similar to the March 2007 private placement by the LLC of \$500 million of 6.113% Fixed-to-Floating Rate Non-Cumulative Exchangeable Trust Securities (the Trust II Securities) of PNC Preferred Funding Trust II (Trust II) in which Trust II acquired \$500 million of LLC Preferred Securities and to the December 2006 private placement by PNC REIT Corp. of \$500 million of 6.517% Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities (the Trust I Securities) of PNC Preferred Funding Trust I (Trust I) in which Trust I acquired \$500 million of LLC Preferred Securities.

Each Trust III Security is automatically exchangeable into a share of Series J Non-Cumulative Perpetual Preferred Stock of PNC, each Trust II Security is automatically exchangeable into a share of Series I Non-Cumulative Perpetual Preferred Stock of PNC, and each Trust I Security is automatically exchangeable into a share of Series F Non-Cumulative Perpetual Preferred Stock of PNC Bank, N.A., in each case under certain conditions relating to the capitalization or the financial condition of PNC Bank, N.A. and upon the direction of the Office of the Comptroller of the Currency.

PNC has contractually committed to each of Trust II and Trust III that if full dividends are not paid in a dividend period on the Trust II Securities or the Trust III Securities, as

applicable, or the LLC Preferred Securities held by Trust II or Trust III, as applicable, PNC will not declare or pay dividends with respect to, or redeem, purchase or acquire, any of its equity capital securities during the next succeeding dividend period, other than: (i) purchases, redemptions or other acquisitions of shares of capital stock of PNC in connection with any employment contract, benefit plan or other similar arrangement with or for the benefit of employees, officers, directors or consultants, (ii) purchases of shares of common stock of PNC pursuant to a contractually binding requirement to buy stock existing prior to the commencement of the extension period, including under a contractually binding stock repurchase plan, (iii) any dividend in connection with the implementation of a shareholders' rights plan, or the redemption or repurchase of any rights under any such plan, (iv) as a result of an exchange or conversion of any class or series of PNC's capital stock for any other class or series of PNC's capital stock, (v) the purchase of fractional interests in shares of PNC capital stock pursuant to the conversion or exchange provisions of such stock or the security being converted or exchanged or (vi) any stock dividends paid by PNC where the dividend stock is the same stock as that on which the dividend is being paid.

PNC Bank, N.A. has contractually committed to Trust I that if full dividends are not paid in a dividend period on the Trust Securities, LLC Preferred Securities or any other parity equity

securities issued by the LLC, neither PNC Bank, N.A. nor its subsidiaries will declare or pay dividends or other distributions with respect to, or redeem, purchase or acquire or make a liquidation payment with respect to, any of its equity capital securities during the next succeeding period (other than to holders of the LLC Preferred Securities and any parity equity securities issued by the LLC) except: (i) in the case of dividends payable to subsidiaries of PNC Bank, N.A., to PNC Bank, N.A. or another wholly-owned subsidiary of PNC Bank, N.A. or (ii) in the case of dividends payable to persons that are not subsidiaries of PNC Bank, N.A., to such persons only if, (A) in the case of a cash dividend, PNC has first irrevocably committed to contribute amounts at least equal to such cash dividend or (B) in the case of in-kind dividends payable by PNC REIT Corp., PNC has committed to purchase such in-kind dividend from the applicable PNC REIT Corp. holders in exchange for a cash payment representing the market value of such in-kind dividend, and PNC has committed to contribute such in-kind dividend to PNC Bank, N.A.

PNC Capital Trust E Trust Preferred Securities

In February 2008, PNC Capital Trust E issued \$450 million of 7.75% Trust Preferred Securities due March 15, 2068 (the Trust E Securities). PNC Capital Trust E's only assets are \$450 million of 7.75% Junior Subordinated Notes due March 15, 2068 and issued by PNC (the JSNs). The Trust E Securities are fully and unconditionally guaranteed by PNC. We may, at our option, redeem the JSNs at 100% of their principal amount on or after March 15, 2013.

In connection with the closing of the Trust E Securities sale, we agreed that, if we have given notice of our election to defer interest payments on the JSNs or a related deferral period is continuing, then PNC would be subject during such period to restrictions on dividends and other provisions protecting the status of the JSN debenture holder similar to or in some ways more restrictive than those potentially imposed under the Exchange Agreements with Trust II and Trust III, as described above. PNC Capital Trusts C and D have similar protective provisions with respect to \$500 million in principal amount of junior subordinated debentures.

Acquired Entity Trust Preferred Securities

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

As a result of the Mercantile, Yardville and Sterling acquisitions, we assumed obligations with respect to \$158 million in principal amount of junior subordinated debentures issued by the acquired entities. Under the terms of these debentures, if there is an event of default under the debentures or PNC exercises its right to defer payments on the related trust preferred securities issued by the statutory trusts or there is a default under PNC's guarantee of such payment obligations, PNC would be subject during the period of such default or deferral to restrictions on dividends and other provisions protecting the status of the debenture holders similar to or in some ways more restrictive than those potentially imposed under the Exchange Agreements with Trust II and Trust III, as described above.

Table of Contents***FAIR VALUE MEASUREMENTS AND FAIR VALUE OPTION***

We adopted SFAS 157, *Fair Value Measurements* (SFAS 157), and SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115* (SFAS 159), on January 1, 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Under SFAS 159, we elected to fair value certain commercial mortgage loans classified as held for sale and certain customer resale agreements and bank notes to align the accounting for the

changes in the fair value of these financial instruments with the changes in the value of their related hedges. See Note 6 Fair Value in the Notes To Consolidated Financial Statements included in this Report for further information.

At June 30, 2008, approximately 27% of our total assets were measured at fair value, consisting primarily of securities and other financial assets. Approximately 3% of our total liabilities were measured at fair value at that date. The corresponding amounts at March 31, 2008 were 28% and 4%, respectively.

Assets and liabilities measured at fair value on a recurring basis, including instruments for which PNC has elected the fair value option, are summarized below:

Fair Value Measurements Summary

In millions	June 30, 2008			Total Fair Value
	Level 1	Level 2	Level 3	
Assets				
Securities available for sale	\$ 5,129	\$ 24,749	\$ 1,154	\$ 31,032
Financial derivatives (a)	25	2,283	85	2,393
Trading securities (b)	624	1,509	30	2,163
Commercial mortgage loans held for sale (c)			1,604	1,604
Customer resale agreements (d)		1,001		1,001
Equity investments			572	572
Other assets		224	8	232
Total assets	\$ 5,778	\$ 29,766	\$ 3,453	\$ 38,997
Liabilities				
Financial derivatives (e)	\$ 30	\$ 1,703	\$ 154	\$ 1,887
Trading securities sold short (f)	1,278	93		1,371
Other liabilities		234		234
Total liabilities	\$ 1,308	\$ 2,030	\$ 154	\$ 3,492

(a) Included in other assets on the Consolidated Balance Sheet.

(b) Included in trading securities and other short-term investments on the Consolidated Balance Sheet.

(c) Included in loans held for sale on the Consolidated Balance Sheet. PNC has elected the fair value option under SFAS 159 for certain commercial mortgage loans held for sale intended for CMBS securitization.

(d) Included in federal funds sold and resale agreements on the Consolidated Balance Sheet. PNC has elected the fair value option under SFAS 159 for this item.

(e) Included in other liabilities on the Consolidated Balance Sheet.

(f) Included in other borrowed funds on the Consolidated Balance Sheet.

Valuation Hierarchy

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The following is an outline of the valuation methodologies used for measuring fair value under SFAS 157 for the major items above. The fair value hierarchy (i.e., Level 1, Level 2, and Level 3) is described in detail in Note 6 Fair Value in the Notes To Consolidated Financial Statements included in this Report. Any models used to determine fair values based on the descriptions below are subject to review and independent testing as part of our model validation and internal control testing processes. Significant models are tested by our Model Validation Committee on at least an annual basis. In addition, we have teams independent of the traders verify marks and assumptions used for valuations at each period end.

Securities

Securities include both the available for sale and trading portfolios. We use market prices, sourced from pricing

services, dealer quotes or recent trades to determine the fair value of securities. The majority of our securities are classified as Level 1 or Level 2 in the fair value hierarchy. In circumstances where market prices are limited or unavailable, valuations may require significant management judgments or adjustments to determine fair value. In these cases, the securities are classified as Level 3.

Residential Mortgage-Backed Securities

At June 30, 2008, our residential mortgage-backed securities portfolio was comprised of \$9.8 billion fair value of US government agency-backed securities (substantially all classified as available for sale) and \$11.0 billion fair value of private-issuer securities (substantially all classified as available for sale). The agency securities are generally collateralized by 1-4 family, conforming, fixed-rate residential mortgages. The private-issuer securities are also generally

Table of Contents

collateralized by 1-4 family residential mortgages. The mortgage loans underlying the private-issuer securities are generally non-conforming (i.e., original balances in excess of the amount qualifying for agency securities) and predominately have interest rates that are fixed for a period of time, after which the rate adjusts to a floating rate based upon a contractual spread that is indexed to a market rate (i.e., a hybrid ARM).

Of the total private-issuer securities, we consider that, based on the underlying credit score of the borrower, less than 1% were higher risk (i.e., FICO scores of equal to or less than 660) credit quality. Substantially all of the securities are senior tranches in the subordination structure and have credit protection in the form of credit enhancement, over-collateralization and/or excess spread accounts. Of the total private-issuer securities, approximately 55% are vintage 2005 and earlier, approximately 24% are vintage 2006 and approximately 21% are vintage 2007 and 2008. At June 30, 2008, \$10.9 billion, or 99%, of the private-issuer securities were rated AAA equivalents by at least two nationally recognized rating agencies. There were 11 private-issuer securities totaling \$69 million fair value where at least one national rating agency rated the security either AA or A equivalent.

For one security, we recorded an other-than-temporary impairment charge of \$7 million in the second quarter of 2008. Since June 30, 2008, no significant deterioration in the credit ratings assigned to the private-issuer securities has occurred.

Commercial Mortgage-Backed Securities

The commercial mortgage-backed securities portfolio was \$6.4 billion fair value at June 30, 2008 (\$5.8 billion fair value classified as available for sale), and consisted of fixed-rate, private-issuer securities collateralized by non-residential properties, primarily retail properties, office buildings, and multi-family housing. Substantially all of the securities are the most senior tranches in the subordination structure.

Of the total commercial mortgage-backed securities, approximately 49% are vintage 2005 and earlier, approximately 35% are vintage 2006 and approximately 16% are vintage 2007 and 2008. At June 30, 2008, \$6.3 billion, or 99%, of the commercial mortgage-backed securities were rated AAA equivalents by at least two nationally recognized rating agencies. There were four commercial mortgage-backed securities totaling \$52 million fair value where at least one national rating agency rated the security AA equivalent and three commercial mortgage-backed securities totaling \$4 million where at least one national rating agency rated the security BBB equivalent.

Since June 30, 2008, no significant deterioration in the credit ratings assigned to the commercial mortgage-backed securities has occurred.

Other Asset-Backed Securities

The asset-backed securities portfolio was \$3.2 billion fair value at June 30, 2008 (substantially all classified as available for sale), and consisted of fixed-rate and floating-rate, private-issuer securities collateralized primarily by various consumer credit products, including home equity loans, credit cards, and automobile loans. Substantially all of the securities are senior tranches in the subordination structure and have credit protection in the form of credit enhancement, over-collateralization and/or excess spread accounts.

Of the \$1.3 billion fair value of asset-backed securities collateralized by fixed- and floating-rate home equity loans (all classified as available for sale), we consider that, based on the underlying credit score of the borrower, approximately 23% were higher risk credit quality. Of the total asset-backed securities collateralized by fixed- and floating-rate home equity loans, approximately 39% are vintage 2005 and earlier, approximately 25% are vintage 2006 and approximately 36% are vintage 2007. At June 30, 2008, \$3.0 billion, or 94%, of the other asset-backed securities were rated AAA equivalents by at least two nationally recognized rating agencies. There were five asset-backed securities totaling \$63 million fair value where at least one national rating agency rated the security AA equivalent, 11 asset-backed securities totaling \$130 million fair value where the rating was between AA equivalent and BBB equivalent, and two asset-backed securities totaling \$6 million fair value where the rating was lower than BBB equivalent.

For both of the securities rated lower than BBB equivalent, we recorded other-than-temporary impairment charges totaling approximately \$2 million in the second quarter of 2008. Since June 30, 2008, no significant deterioration in the credit ratings assigned to the other asset-backed securities has occurred.

Financial Derivatives

Exchange-traded derivatives are valued using quoted market prices and are classified as Level 1. However, the majority of derivatives that we enter into are executed over-the-counter and are valued using internal techniques. Readily observable market inputs to these models can be validated to external sources, including industry pricing services, or corroborated through recent trades, dealer quotes, yield curves, implied

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

volatility or other market related data. Certain derivatives, such as total rate of return swaps, are corroborated to the CMBX index. These derivatives are classified as Level 2. Derivatives priced using significant management judgment or assumptions are classified as Level 3. The fair values of our derivatives are adjusted for nonperformance risk as appropriate.

Table of Contents

Commercial Mortgage Loans and Commitments Held for Sale

This portfolio of loans is held for securitization. As such, a synthetic securitization methodology is used to value the loans and the related unfunded commitments on an aggregate basis based upon current commercial mortgage-backed securities (CMBS) market structures and conditions. Observable inputs include the pricing of CMBS with similar collateral and using tranche interest rates from end of period yield curves. Management assumptions include subordination levels, CMBS bond spreads, and the value of the mortgage servicing rights. Adjustments are made to the valuations to account for securitization uncertainties, including the composition of the portfolio, market conditions, and liquidity. Based on the significance of unobservable inputs, we classify this portfolio as Level 3.

Equity Investments

The valuation of direct and partnership private equity investments requires significant management judgment due to the absence of quoted market prices, inherent lack of liquidity and the long-term nature of such investments. The carrying values of direct investments and affiliated partnership interests reflect the expected exit price and are based on various techniques including multiples of adjusted earnings of the entity, independent appraisals, anticipated financing and sale transactions with third parties or the pricing used to value the entity in a recent financing transaction. The limited partnership investments are generally valued based on the financial statements received from the general partner with the underlying investments being valued utilizing techniques similar to those noted above. These investments are classified as Level 3.

Level 3 Assets and Liabilities

Under SFAS 157, financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable.

Our Level 3 assets and liabilities represented 2% of our total assets and less than 1% of our total liabilities at both June 30, 2008 and March 31, 2008.

Assets and liabilities measured using Level 3 inputs represented \$3.5 billion or 9% of total assets measured at fair value and \$154 million or 4% of total liabilities measured at fair value at June 30, 2008. Assets and liabilities measured using Level 3 inputs represented \$2.9 billion or 7% of total assets measured at fair value and \$239 million or 5% of total liabilities measured at fair value at March 31, 2008.

During the second quarter of 2008, securities transferred into Level 3 from Level 2 exceeded securities transferred out by \$527 million. These primarily related to asset-backed securities, taxable auction rate securities, and residential mortgage-backed securities, and occurred due to reduced volume of recently executed transactions and the lack of corroborating market price quotations for these instruments.

As indicated in the table on page 17, our largest category of Level 3 assets consists of certain commercial mortgage loans held for sale.

We originated the loans held in the commercial real estate portfolio that are classified as held for sale and accounted for at fair value. The values of these loans were based on exit prices at June 30, 2008 reflecting an illiquid securitization market for these loans. However, it is our intention to continue to reduce the size of this portfolio.

Total securities measured at fair value at June 30, 2008 included securities available for sale and trading securities consisting primarily of residential and commercial mortgage-backed securities and other asset-backed securities. Unrealized gains and losses on available for sale securities do not impact liquidity or risk-based capital. However, reductions in the credit ratings of these securities would have an impact on the determination of risk-weighted assets which could reduce our regulatory capital ratios. In addition, other-than-temporary impairments on available for sale securities would reduce our regulatory capital ratios.

Table of Contents***BUSINESS SEGMENTS REVIEW***

We have four major businesses engaged in providing banking, asset management and global investment servicing products and services. Business segment results, including inter-segment revenues, and a description of each business are included in Note 16 Segment Reporting included in the Notes To Consolidated Financial Statements under Part I, Item 1 of this Report. Certain revenue and expense amounts included in this Financial Review differ from the amounts shown in Note 16 primarily due to the presentation in this Financial Review of business net interest revenue on a taxable-equivalent basis and income statement classification differences related to Global Investment Servicing.

Results of individual businesses are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to GAAP; therefore, the financial results of our individual businesses are not necessarily comparable with similar information for any other company. We refine our methodologies from time to time as our management accounting practices are enhanced and our businesses and management structure change. Financial results are presented, to the extent practicable, as if each business operated on a stand-alone basis. As permitted under GAAP, we have aggregated the business results for certain similar operating segments for financial reporting purposes.

Assets receive a funding charge and liabilities and capital receive a funding credit based on a transfer pricing methodology that incorporates product maturities, duration and other factors. Capital is intended to cover unexpected losses and is assigned to the banking and servicing businesses

using our risk-based economic capital model. We have assigned capital equal to 6% of funds to Retail Banking to reflect the capital required for well-capitalized domestic banks and to approximate market comparables for this business. The capital assigned for Global Investment Servicing reflects its legal entity shareholder's equity.

We have allocated the allowances for loan and lease losses and unfunded loan commitments and letters of credit based on our assessment of risk inherent in the business segment loan portfolios. Our allocation of the costs incurred by operations and other shared support areas not directly aligned with the businesses is primarily based on the use of services.

Total business segment financial results differ from total consolidated results. The impact of these differences is reflected in the Other category.

Other for purposes of this Business Segments Review and the Business Segment Highlights in the Executive Summary includes residual activities that do not meet the criteria for disclosure as a separate reportable business, such as gains or losses related to BlackRock transactions including LTIP share distributions and obligations, earnings and gains or losses related to Hilliard Lyons, integration costs, asset and liability management activities including net securities gains or losses and certain trading activities, equity management activities, differences between business segment performance reporting and financial statement reporting (GAAP), intercompany eliminations, and most corporate overhead.

Employee data as reported by each business segment in the tables that follow reflect staff directly employed by the respective businesses and excludes corporate and shared services employees.

- (a) Period-end balances for BlackRock and Global Investment Servicing.
- (b) Amounts for the periods presented reflect the reclassification of the results of Hilliard Lyons, which we sold on March 31, 2008, and the related gain on sale, from Retail Banking to Other.
- (c) For our segment reporting presentation in this Financial Review, after-tax integration costs of \$2 million related to Albridge Solutions and Coates Analytics have been reclassified from Global Investment Servicing to Other for the first six months of 2008. Other for the first six months of 2008 also includes \$48 million of pretax other integration costs while Other for the first six months of 2007 includes \$29 million of pretax integration costs primarily related to Mercantile.
- (d) Global Investment Servicing revenue represents the sum of servicing revenue and nonoperating income (expense) less debt financing costs.
- (e) Other average assets are comprised primarily of securities available for sale and residential mortgage loans associated with asset and liability management activities.

- (k) Calculated as of origination date.
- (l) Represents the most recent FICO scores we have on file.

Table of Contents

Retail Banking's earnings were \$335 million for the first six months of 2008 compared with \$419 million for the same period in 2007. The 20% decline in earnings over the prior year was driven by increases in expenses and the provision for the credit losses, partially offset by benefits from the first quarter 2008 gain related to the Visa initial public offering and the net benefits from acquisitions.

Highlights of Retail Banking's performance during the first half of 2008 include the following:

The April 2008 acquisition of Sterling added 65 branches and 62 ATMs to our network. This acquisition has resulted in a leading deposit share in the central Pennsylvania footprint and enhanced our presence in surrounding markets.

Total reported checking relationships increased by a net 56,000 since December 31, 2007, reflecting both the conversion of Yardville accounts and strong organic growth. Without Yardville, we increased reported checking relationships by approximately 35,000 in the first half of the year, which compares favorably to the 13,000 reported relationships we added during the same period last year. This strong organic growth was driven by strength in both customer acquisition and retention with significant contributions coming from the former Mercantile franchise and our Workplace Banking Channel.

Our investment in online banking capabilities continues to pay off. Since June 30, 2007, the percentage of consumer checking households using online bill payment increased from 29% to 37%. We will continue to seek customer growth by expanding our use of technology. We recently launched our new Virtual Wallet product, which was specifically designed to provide a distinctive online money management experience for Generation Y customers in our footprint. This product features three accounts: a spend account to be used for purchases, a reserve account for short-term savings and a growth account for long-term savings. We expect to add long-term, loyal customers by attracting this customer segment now with a tech-driven solution and exceptional service.

In the first six months of 2008, we opened 8 new branches, consolidated 29 branches, and acquired 65 branches for a total of 1,153 branches at June 30, 2008. We continue to work to optimize our network by opening new branches in high growth areas, relocating branches to areas of higher market opportunity, and consolidating branches in areas of declining opportunity.

Total revenue for the first six months of 2008 was \$1.848 billion, an 8% increase compared with \$1.707 billion for the same period in 2007. Net interest income of \$997 million increased \$12 million, or 1%, compared with the first six months of 2007. The growth was driven by acquisitions, partially offset by a lower value attributed to deposits in the lower interest rate environment in 2008 versus 2007.

Noninterest income increased \$129 million, or 18%, compared with the first six months of 2007. This growth was attributed primarily to the following:

- A gain of \$95 million from the redemption of a portion of our Visa Class B common shares related to Visa's March 2008 initial public offering,
- Acquisitions,
- Increased volume-related consumer fees, and
- Customer growth.

The Market Risk Management Equity and Other Investment Risk section of this Financial Review includes further information regarding Visa.

The provision for credit losses for the first six months of 2008 was \$194 million compared to \$60 million for the same period last year. Net charge-offs were \$160 million for the first six months of 2008 and \$52 million in the first six months of 2007. The increases in provision and net charge-offs were primarily a result of the following:

- Aligning small business and consumer loan charge-off policies,
- Downward credit migration of commercial loan portfolios primarily in Maryland, Virginia and New Jersey related to residential real estate development and related sectors,
- Continued growth in our commercial loan portfolio, and
- Increased levels of charge-offs given the current credit environment.

Based upon the current environment, we believe the provision and nonperforming assets will continue to increase in 2008 versus 2007 levels.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Noninterest expense for the first six months of 2008 totaled \$1.107 billion, an increase of \$129 million, or 13%, compared with the same period in 2007. The increase was primarily attributable to acquisitions, with the remainder related to expenses directly associated with fee income-related businesses and continued investments in the business.

Full-time employees at June 30, 2008 totaled 11,671, an increase of 885 over the prior year. Part-time employees have increased by 27 since June 30, 2007. The increase in full-time and part-time employees was primarily the result of the Yardville and Sterling acquisitions.

Growing core checking deposits as a lower-cost funding source and as the cornerstone product to build customer relationships is the primary objective of our deposit strategy. Furthermore, core checking accounts are critical to our strategy of expanding our payments business. Average total deposits increased \$3.3 billion, or 6%, compared with the first half of 2007.

Average money market deposits increased \$2.1 billion, and average certificates of deposits declined \$.3 billion.

Table of Contents

Money market deposits experienced core growth and both deposit categories benefited from the acquisitions. The decline in certificates of deposits was a result of a focus on relationship customers rather than pursuing higher-rate single service customers. The deposit strategy of Retail Banking is to remain disciplined on pricing, target specific products and markets for growth, and focus on the retention and growth of balances for relationship customers.

Average demand deposit growth of \$1.4 billion, or 8%, was almost solely due to acquisitions as organic growth was impacted by current economic conditions, such as lower average balances per account.

Small business and consumer-related checking relationships retention remained strong and stable. Consumer-related checking relationship retention has benefited from improved penetration rates of debit cards, online banking and online bill payment.

Currently, we are focused on a relationship-based lending strategy that targets specific customer sectors (homeowners, small businesses and auto dealerships) while seeking to maintain a moderate risk profile in the loan portfolio.

Average commercial and commercial real estate loans grew \$3.6 billion, or 33%, compared with the first half of 2007. The increase was primarily attributable to acquisitions. Organic loan growth reflecting the strength of increased small business loan demand from existing customers and the acquisition of new relationships through our sales efforts was also a factor in the increase. At June 30, 2008, commercial and commercial real estate loans totaled \$15.1 billion. This portfolio included \$3.7 billion of commercial real estate loans, of which approximately \$3.0 billion were related to our expansion from acquisitions into the greater Maryland and Washington, DC markets.

Average home equity loans grew \$440 million, or 3%, compared with the first half of 2007 primarily due to acquisitions. Consumer loan growth has slowed as a result of lower demand from our customers as well as tightening of credit standards. Our home equity loan portfolio is relationship based, with 93% of the portfolio attributable to borrowers in our primary geographic footprint. We monitor this portfolio closely and the nonperforming assets and charge-offs that we have experienced are within our expectations given current market conditions.

Average indirect loans increased \$289 million, or 16%, compared with the first half of 2007. The increase is primarily attributable to acquisitions.

Average education loans grew \$1.4 billion compared with the first half of 2007. The increase was primarily the result of the transfer of approximately \$1.8 billion of education loans previously held for sale to the loan portfolio during the first quarter of 2008. The Loans Held For Sale portion of the Consolidated Balance Sheet Review section of this Financial Review includes additional information related to this transfer.

Average residential mortgage loans increased \$727 million primarily due to the addition of loans from acquisitions.

Assets under management of \$66 billion at June 30, 2008 decreased \$6 billion compared with the balance at June 30, 2007. The decline in assets under management was primarily due to comparatively lower equity markets and the effects of the divestiture of a Mercantile asset management subsidiary during the fourth quarter, partially offset by the Sterling acquisition and positive net inflows.

Nondiscretionary assets under administration of \$111 billion at June 30, 2008 remained flat when compared with the balance at June 30, 2007. The effects of net positive client flows were offset by comparatively lower equity markets.

(a) Includes lease financing.

Corporate & Institutional Banking earned \$136 million in the first six months of 2008 compared with \$254 million in the first six months of 2007. Earnings in 2008 were impacted by pretax valuation losses of \$156 million on commercial mortgage loans and commitments held for sale, net of hedges, and increases in the provision for credit losses and noninterest expenses, partially offset by higher net interest income.

(c) Includes net interest income and noninterest income from loan servicing and ancillary services.

(d) At June 30.

(e) Includes nonperforming loans of \$321 million at June 30, 2008 and \$87 million at June 30, 2007.

Net interest income grew \$114 million, or 30%, in the first six months of 2008 compared with the first six months of 2007. The increase over the prior year was primarily a result of acquisitions, organic loan growth and an increase in commercial mortgage loans held for sale. Corporate service fees increased slightly in the first half of 2008 compared with the prior year first half, to \$268 million. Increases in treasury management, syndication and structured finance fees more than offset decreases in merger and acquisition advisory fees and mortgage servicing fees, net of amortization.

Other noninterest income was negative \$35 million for the first six months of 2008 compared with income of \$108 million in the first six months of 2007. The first six months of 2008 included losses of \$156 million related to valuations of commercial mortgage loans and commitments held for sale, net of hedges. These losses are net of the \$21 million positive valuation adjustment described below. These valuation losses reflect the illiquid market conditions and are non-cash losses. During the second quarter of 2008, we sold approximately \$.5 billion of commercial mortgage loans held for sale via securitizations and recognized a positive

Table of Contents

valuation adjustment for loans and commitments of \$21 million, net of hedges. As previously reported, PNC adopted SFAS 159 beginning January 1, 2008 and elected to account for its loans held for sale and intended for securitization at fair value. Given the current market disruption, we have stopped originating these loans. We intend to continue pursuing opportunities to reduce our loans held for sale position if we can receive prices we feel are appropriate. Excluding the impact of these valuation losses, other income increased approximately 12% due to higher interest rate derivative and foreign exchange trading revenue from customer activity.

Noninterest expense increased \$40 million, or 10%, compared with the first half of 2007. The increase was primarily due to the impact of the Mercantile and ARCS Commercial Mortgage acquisitions, and other growth initiatives.

The provision for credit losses was \$121 million in the first six months of 2008 compared with \$1 million in the first six months of 2007. The increase in the provision compared with the year-ago period was primarily due to credit quality migration mainly related to residential real estate development and related sectors along with growth in total credit exposure. Nonperforming assets increased \$229 million in the comparison, the majority of which was due to acquisitions. The largest component of the increase was in commercial real estate and commercial real estate related loans. Based upon the current environment, we believe the provision will continue to increase in 2008 versus 2007 levels.

Average loan balances increased \$4.7 billion, or 23%, from the prior year first half. The increase in corporate and commercial real estate loans resulted from higher utilization of facilities, new business and the impact of the Mercantile and Yardville acquisitions.

Average deposit balances increased \$2.1 billion, or 16%, compared with the first six months of 2007. The increase resulted primarily from higher client time deposits and the impact of acquisitions.

The commercial mortgage servicing portfolio was \$248 billion at June 30, 2008, an increase of \$26 billion, or 12%, from June 30, 2007.

The increase resulted from strong growth in the third quarter of 2007 including the ARCS acquisition, which added \$13 billion of commercial mortgage servicing. Servicing portfolio additions have been modest since the third quarter of 2007 due to the declining volumes in the commercial mortgage securitization market.

Average other assets and other liabilities increased \$1.7 billion and \$2.4 billion, respectively. These increases were due to customer driven trading and related hedging transactions. In addition, an increase in customer driven money management activities contributed to the higher other liabilities balance.

See the additional revenue discussion regarding treasury management, capital markets-related products and services, and commercial mortgage banking activities on page 8.

Table of Contents

BLACKROCK

Our BlackRock business segment earned \$129 million in the first six months of 2008 and \$110 million in the first six months of 2007. These results reflect our approximately 33.3% share of BlackRock's reported GAAP earnings and the additional income taxes on these earnings incurred by PNC.

Our investment in BlackRock was \$4.3 billion at June 30, 2008 and \$4.1 billion at December 31, 2007. Based upon BlackRock's closing market price of \$177.00 per common share at June 30, 2008, the market value of our investment in BlackRock was \$7.6 billion at that date. As such, an additional \$3.3 billion of pretax value was not recognized in our equity investment or shareholders' equity account at that date.

BLACKROCK LTIP PROGRAMS

BlackRock adopted the 2002 LTIP program to help attract and retain qualified professionals. At that time, PNC agreed to transfer up to four million of the shares of BlackRock common stock then held by us to help fund the 2002 LTIP and future programs approved by BlackRock's board of directors, subject to certain conditions and limitations. Prior to 2006, BlackRock granted awards of approximately \$233 million under the 2002 LTIP program, of which approximately \$208 million were paid on January 30, 2007. The award payments were funded by 17% in cash from BlackRock and approximately one million shares of BlackRock common stock transferred by PNC and distributed to LTIP participants. We recognized a pretax gain of \$82 million in the first quarter of 2007 from the transfer of BlackRock shares. The gain was included in other noninterest income and reflected the excess

of market value over book value of the one million shares transferred in January 2007. Additional BlackRock shares were distributed to LTIP participants during the first quarter of 2008, resulting in a \$3 million pretax gain in other noninterest income.

PNC's noninterest income for the first half of 2008 included a \$117 million pretax gain related to our commitment to fund additional BlackRock LTIP programs. This gain represented the mark-to-market adjustment related to our remaining BlackRock LTIP shares obligation as of June 30, 2008 and resulted from the decrease in the market value of BlackRock common shares during the first six months of 2008. In the first six months of 2007, we recognized a pretax charge of \$31 million for an increase in the market value of BlackRock common shares during that period.

BlackRock granted awards in 2007 under an additional LTIP program, all of which are subject to achieving earnings performance goals prior to the vesting date of September 29, 2011. Of the shares of BlackRock common stock that we have agreed to transfer to fund their LTIP programs, approximately 1.6 million shares have been committed to fund the awards vesting in 2011 and the amount remaining would then be available for future awards.

We may continue to see volatility in earnings as we mark to market our LTIP shares obligation each quarter end. However, additional gains based on the difference between the market value and the book value of the committed BlackRock common shares will generally not be recognized until the shares are distributed to LTIP participants.

OTHER INFORMATION		
Full-time employees (at June 30)	4,946	4,522
(a) Certain out-of-pocket expense items which are then client billable are included in both servicing revenue and operating expense above, but offset each other entirely and therefore have no net effect on operating income. Distribution revenue and expenses which relate to 12b-1 fees that are received from certain fund clients for the payment of marketing, sales and service expenses also entirely offset each other, but are netted for presentation purposes above.		
(b) Net of nonoperating expense.		
(c) Total operating income divided by servicing revenue.		
(d) Includes alternative investment net assets serviced.		

Global Investment Servicing, formerly PFPC, earned \$63 million for both the first six months of 2008 and 2007. While servicing revenue growth of 14% was realized through new business, organic growth, and the completion of two acquisitions in December 2007, increased costs

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

related to this growth and the acquisitions offset the increase.

Highlights of Global Investment Servicing's performance for the first six months of 2008 included:

Total fund accounting assets serviced increased 14% over the prior year, despite declines in major stock market indices over the same time frame, due to a 13% increase in the number of funds serviced.

Initiatives in the offshore arena have resulted in a 34% increase in servicing revenue and a 22% increase in assets serviced, which now stand at \$126 billion.

Subaccounting shareholder accounts rose by 5 million, or 10%, to 55 million, as existing clients continued to convert additional fund families to this platform. Global Investment Servicing remains a leading provider of subaccounting services.

Servicing revenue for the first half of 2008 reached \$482 million, an increase of \$58 million, or 14%, over the first half of 2007. This increase resulted primarily from the growth in offshore operations and the acquisitions of Albridge Solutions Inc. and Coates Analytics, LP in December 2007.

Operating expense increased \$56 million, or 18%, to \$367 million, in the first six months of 2008 compared with the first six months of 2007. Investments in technology, a larger employee base to support business growth, and costs related to the recent acquisitions drove the higher expense level.

Total assets serviced by Global Investment Servicing amounted to \$2.6 trillion at June 30, 2008 compared with \$2.4 trillion at June 30, 2007 as this business segment continued to see both organic growth and growth from new business in each of its product lines.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND JUDGMENTS

Note 1 Accounting Policies in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report and in Part II, Item 8 of our 2007 Form 10-K describe the most significant accounting policies that we use. Certain of these policies require us to make estimates and strategic or economic assumptions that may prove to be inaccurate or subject to variations that may significantly affect our reported results and financial position for the period or in future periods.

We must use estimates, assumptions, and judgments when financial assets and liabilities are measured and reported at fair value. Assets and liabilities carried at fair value inherently result in a higher degree of financial statement volatility. Fair values and the information used to record valuation adjustments for certain assets and liabilities are based on either quoted market prices or are provided by other independent third-party sources, when available. When such third-party information is not available, we estimate fair value primarily by using cash flow and other financial modeling techniques. Changes in underlying factors, assumptions, or estimates in any of these areas could materially impact our future financial condition and results of operations. See Fair Value Measurements And Fair Value Option in this Financial Review for a description of fair value measurement under SFAS 157.

We discuss the following critical accounting policies and judgments under this same heading in Item 7 of our 2007 Form 10-K:

- Allowances For Loan And Lease Losses And Unfunded Loan Commitments And Letters of Credit
- Private Equity Asset Valuation
- Lease Residuals
- Goodwill
- Revenue Recognition
- Income Taxes

Additional information regarding these policies is found elsewhere in this Financial Review and in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report.

In addition, see Note 1 Accounting Policies in the Notes To Consolidated Financial Statements regarding our adoption in the first quarter of 2008 of the following:

- EITF Issue 06-4, *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements* ,
- SFAS 157, *Fair Value Measurements* ,
- SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities* including an amendment of FASB Statement No. 115 , and
- SEC Staff Accounting Bulletin No. 109

STATUS OF QUALIFIED DEFINED BENEFIT PENSION PLAN

We have a noncontributory, qualified defined benefit pension plan (plan or pension plan) covering eligible employees. Benefits are derived from a cash balance formula based on compensation levels, age and length of service. Pension contributions are based on an actuarially determined amount necessary to fund total benefits payable to plan participants. Consistent with our investment strategy, plan assets are primarily invested in equity investments and fixed income instruments. Plan fiduciaries determine and review the plan s investment policy, which is described more fully in Note 17 Employee Benefit Plans in the Notes To Consolidated Financial Statements included under Part II, Item 8 of our 2007 Form 10-K.

We calculate the expense associated with the pension plan in accordance with SFAS 87, *Employers Accounting for Pensions*, and we use assumptions and methods that are compatible with the requirements of SFAS 87, including a policy of reflecting trust assets at their fair market value. On an annual basis, we review the actuarial assumptions related to the pension plan, including the discount rate, the rate of compensation increase and the expected return on plan assets.

The discount rate and compensation increase assumptions do not significantly affect pension expense. However, the expected long-term return on assets assumption does significantly affect pension expense. The expected long-term return on plan assets for determining net periodic pension cost for 2008 was 8.25%, unchanged from 2007. Under current accounting rules, the difference between expected long-term returns and actual returns is accumulated and amortized to pension expense over future periods. Each one percentage point difference in actual return

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

compared with our expected return causes expense in subsequent years to change by up to \$4 million as the impact is amortized into results of operations.

The table below reflects the estimated effects on pension expense of certain changes in annual assumptions, using 2008 estimated expense as a baseline.

Change in Assumption	Estimated Increase to 2008 Pension Expense
	(In millions)
.5% decrease in discount rate	\$1
.5% decrease in expected long-term return on assets	\$10
.5% increase in compensation rate	\$2

Table of Contents

We currently estimate a pretax pension benefit of \$32 million in 2008 compared with a pretax benefit of \$30 million in 2007.

Our pension plan contribution requirements are not particularly sensitive to actuarial assumptions. Investment performance has the most impact on contribution requirements and will drive the amount of permitted contributions in future years. Also, current law, including the provisions of the Pension Protection Act of 2006, sets limits as to both minimum and maximum contributions to the plan. In any event, any contributions to the plan in the near term will be at our discretion, as we expect that the minimum required contributions under the law will be minimal or zero for several years.

We maintain other defined benefit plans that have a less significant effect on financial results, including various nonqualified supplemental retirement plans for certain employees.

RISK MANAGEMENT

We encounter risks as part of the normal course of our business and we design risk management processes to help manage these risks. The Risk Management section included in Item 7 of our 2007 Form 10-K provides a general overview of the risk measurement, control strategies and monitoring aspects of our corporate-level risk management processes. Additionally, our 2007 Form 10-K provides an analysis of the risk management processes for what we view as our primary areas of risk: credit, operational, liquidity and market, as well as a discussion of our use of financial derivatives as part of our overall asset and liability risk management process. The following updates our 2007 Form 10-K disclosures in these areas.

CREDIT RISK MANAGEMENT

Credit risk represents the possibility that a customer, counterparty or issuer may not perform in accordance with contractual terms. Credit risk is inherent in the financial services business and results from extending credit to customers, purchasing securities, and entering into financial derivative transactions. Credit risk is one of our most significant risks.

Nonperforming, Past Due And Potential Problem Assets

We continued to experience credit deterioration at a manageable pace and overall asset quality performed as anticipated in the challenging environment during the first six months of 2008. We remained focused on maintaining a moderate risk profile.

Nonperforming Assets by Type

	June 30	December 31
In millions	2008	2007
Nonaccrual loans		
Commercial		
Retail/wholesale	\$ 58	\$ 39
Manufacturing	34	35
Other service providers	66	48
Real estate related (a)	70	45
Financial services	10	15
Health care	7	4
Other	8	7
Total commercial	253	193
Commercial real estate		
Real estate projects	330	184
Mortgage	35	28
Total commercial real estate	365	212
Consumer	24	17

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Residential mortgage (b)	49	27
Lease financing	4	3
Total nonaccrual loans (b)	695	452
Restructured loans		2
Total nonperforming loans (b)	695	454
Foreclosed and other assets		
Residential mortgage	28	16
Lease financing		11
Other	10	14
Total foreclosed and other assets	38	41
Total nonperforming assets (b) (c) (d)	\$ 733	\$ 495

(a) Includes loans related to customers in the real estate and construction industries.

(b) We have adjusted the December 31, 2007 amounts to be consistent with the current methodology for recognizing nonaccrual residential mortgage loans serviced under master servicing arrangements.

(c) Excludes equity management assets carried at estimated fair value of \$44 million at June 30, 2008 and \$4 million at December 31, 2007.

(d) Excludes loans held for sale carried at lower of cost or market value of \$59 million at June 30, 2008 (amount includes troubled debt restructured assets of \$20 million) and \$25 million at December 31, 2007.

Total nonperforming assets at June 30, 2008 increased \$238 million, to \$733 million, from the balance at December 31, 2007. Our nonperforming assets represented .51% of total assets at June 30, 2008 compared with .36% at December 31, 2007. The increase in nonperforming assets reflected higher nonaccrual residential real estate development loans, commercial real estate related loans and residential mortgage loans, partially offset by the impact of aligning small business and consumer loan charge-off policies.

The amount of nonperforming loans that was current as to principal and interest was \$209 million at June 30, 2008 and \$178 million at December 31, 2007.

See Note 5 Asset Quality in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report and included here by reference for details of the types of nonperforming assets that we held at June 30, 2008 and December 31, 2007. In addition, certain performing assets have interest payments that are past due or have the potential for future repayment problems.

Table of Contents**Changes In Nonperforming Assets**

In millions	2008	2007
January 1	\$ 495	\$ 184
Transferred from accrual	602	195
Acquisition (a)	9	35
Charge-offs and valuation adjustments	(185)	(51)
Principal activity including payoffs	(153)	(90)
Returned to performing	(31)	(9)
Asset sales	(4)	(4)
June 30	\$ 733	\$ 260

(a) Sterling in 2008 and Mercantile in 2007.

In the first quarter of 2008, we more closely aligned our charge-off policies for consumer and small business loans, which had the effect of reducing nonperforming assets by \$44 million in that period.

Accruing Loans Past Due 90 Days Or More

Dollars in millions	Amount		Percent of Total Outstandings	
	June 30	Dec. 31	June 30	Dec. 31
	2008	2007	2008	2007
Commercial	\$ 22	\$ 14	.07%	.05%
Commercial real estate	10	18	.11	.20
Consumer	70	49	.34	.27
Residential mortgage	46	43	.51	.45
Other	12	12	4.12	2.91
Total loans	\$ 160	\$ 136	.22	.20

Loans that are not included in nonperforming or past due categories but cause us to be uncertain about the borrower's ability to comply with existing repayment terms over the next six months totaled \$262 million at June 30, 2008 compared with \$134 million at December 31, 2007.

Allowances For Loan And Lease Losses And Unfunded Loan Commitments And Letters Of Credit

We maintain an allowance for loan and lease losses to absorb losses from the loan portfolio. We determine the allowance based on quarterly assessments of the probable estimated losses inherent in the loan portfolio. While we make allocations to specific loans and pools of loans, the total reserve is available for all loan and lease losses.

We refer you to Note 5 Asset Quality in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report regarding changes in the allowance for loan and lease losses and changes in the allowance for unfunded loan commitments and letters of credit for additional information which is included herein by reference.

Allocation Of Allowance For Loan And Lease Losses

Dollars in millions	June 30, 2008		December 31, 2007	
	Allowance	Loans to	Allowance	Loans to
	Total		Total	

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

		Loans		Loans
Commercial	\$ 664	42.3%	\$ 560	41.8%
Commercial real estate	187	12.9	153	13.0
Consumer	90	28.5	68	26.9
Residential mortgage	9	12.4	9	14.0
Lease financing	35	3.5	36	3.7
Other	3	.4	4	.6
Total	\$ 988	100.0%	\$ 830	100.0%

In addition to the allowance for loan and lease losses, we maintain an allowance for unfunded loan commitments and letters of credit. We report this allowance as a liability on our Consolidated Balance Sheet. We determine this amount using estimates of the probability of the ultimate funding and losses related to those credit exposures. This methodology is similar to the one we use for determining the adequacy of our allowance for loan and lease losses.

The provision for credit losses totaled \$337 million for the first six months of 2008 and \$62 million for the first six months of 2007. The higher provision in the first half of 2008 compared with the prior year period was driven by general credit quality migration, especially in the residential real estate development sector of our commercial real estate portfolio. See the Consolidated Balance Sheet Review section of this Financial Review for further information. In addition, the provision for credit losses for the first six months of 2008 and the evaluation of the allowances for loan and lease losses and unfunded loan commitments and letters of credit as of June 30, 2008 reflected loan and total credit exposure growth, changes in loan portfolio composition, and other changes in asset quality. The provision includes amounts for probable losses on loans and credit exposure related to unfunded loan commitments and letters of credit.

Given our projections for loan growth and continued credit deterioration, and our current assumptions for the national economy, we expect that the provision for credit losses will be approximately \$750 million for full year 2008, including the impact of the Sterling acquisition. However, we believe that increased operating leverage will be more than adequate to cover increased credit costs in 2008.

The allowance as a percent of nonperforming loans was 142% and as a percent of total loans was 1.35% at June 30, 2008. The comparable percentages at December 31, 2007 were 183% and 1.21%. We expect to continue to increase our allowance as a percent of total loans as the market and our credit quality migration dictates.

Table of Contents**Charge-Offs And Recoveries**

Six months ended June 30 Dollars in millions	Charge- offs	Recoveries	Net Charge- offs	Percent of Average Loans
2008				
Commercial	\$ 141	\$ 19	\$ 122	.82%
Consumer	61	7	54	.55
Commercial real estate	35	3	32	.70
Lease financing	3	1	2	.16
Total	\$ 240	\$ 30	\$ 210	.59
2007				
Commercial	\$ 58	\$ 15	\$ 43	.37%
Consumer	32	7	25	.29
Commercial real estate	1	1		
Total	\$ 91	\$ 23	\$ 68	.23

In the first quarter of 2008, we more closely aligned our charge-off policies for consumer and small business loans, which had the effect of increasing charge-offs by \$44 million during that period.

We establish reserves to provide coverage for probable losses not considered in the specific, pool and consumer reserve methodologies, such as, but not limited to, the following:

- industry concentrations and conditions,
- credit quality trends,
- recent loss experience in particular sectors of the portfolio,
- ability and depth of lending management,
- changes in risk selection and underwriting standards, and
- timing of available information.

The amount of reserves for these qualitative factors is assigned to loan categories and to business segments primarily based on the relative specific and pool allocation amounts. The amount of reserve allocated for qualitative factors represented 4.3% of the total allowance and .06% of total loans, net of unearned income, at June 30, 2008.

CREDIT DEFAULT SWAPS

From a credit risk management perspective, we buy and sell credit loss protection via the use of credit derivatives. When we buy loss protection by purchasing a credit default swap (CDS), we pay a fee to the seller, or CDS counterparty, in return for the right to receive a payment if a specified credit event occurs for a particular obligor or reference entity. We purchase CDSs to mitigate the risk of economic loss on a portion of our loan exposures.

We also sell loss protection to mitigate the net premium cost and the impact of fair value accounting on the CDS in cases where we buy protection to hedge the loan portfolio and to take proprietary trading positions. These activities represent additional risk positions rather than hedges of risk.

We approve counterparty credit lines for all of our trading activities, including CDSs. Counterparty credit lines are approved based on a review of credit quality in accordance with our traditional credit quality standards and credit policies.

The credit risk of our counterparties is monitored in the normal course of business. In addition, all counterparty credit lines are subject to collateral thresholds and exposures above these thresholds are secured.

Credit default swaps are included in the Free-Standing Derivatives table in the Financial Derivatives section of this Risk Management discussion. Net gains from credit default swaps used to hedge our loan portfolio and take proprietary trading positions, reflected in other noninterest income in our Consolidated Income Statement, totaled \$7 million for the first six months of 2008 compared with \$8 million for the first six months of 2007.

LIQUIDITY RISK MANAGEMENT

Liquidity risk is the risk of potential loss if we were unable to meet our funding requirements at a reasonable cost. We manage liquidity risk to help ensure that we can obtain cost-effective funding to meet current and future obligations under both normal business as usual and stressful circumstances.

Our largest source of liquidity on a consolidated basis is the deposit base that comes from our retail and corporate and institutional banking activities. Other borrowed funds come from a diverse mix of short and long-term funding sources. Liquid assets and unused borrowing capacity from a number of sources are also available to maintain our liquidity position.

Liquid assets consist of short-term investments (federal funds sold, resale agreements, trading securities and other short-term investments) and securities available for sale. At June 30, 2008, our liquid assets totaled \$36.8 billion, with \$21.0 billion pledged as collateral for borrowings, trust, and other commitments.

Bank Level Liquidity

PNC Bank, N.A. can borrow from the Federal Reserve Bank of Cleveland's (Federal Reserve Bank) discount window to meet short-term liquidity requirements. These borrowings are secured by securities and commercial loans. PNC Bank, N.A. is also a member of the Federal Home Loan Bank (FHLB)-Pittsburgh and as such has access to advances from FHLB-Pittsburgh secured generally by residential mortgage and other mortgage-related loans. At June 30, 2008, we maintained significant unused borrowing capacity from the Federal Reserve Bank discount window and FHLB-Pittsburgh under current collateral requirements.

At June 30, 2008, we pledged \$4.1 billion of loans and \$15.4 billion of securities to the Federal Reserve Bank with a combined collateral value of \$18.1 billion. Also, we pledged \$31.7 billion of loans and \$5.0 billion of securities to FHLB-Pittsburgh under a blanket lien with a combined collateral value of \$18.1 billion as of that date. We pledged this collateral with the Federal Reserve Bank and FHLB-Pittsburgh for the ability to borrow if necessary. At June 30, 2008 we had no outstanding borrowings with the Federal Reserve Bank and \$9.3 billion outstanding with FHLB-Pittsburgh resulting in unused borrowing capacity of \$18.1 billion and \$8.8 billion, respectively, for a combined unused borrowing capacity under these arrangements of \$26.9 billion, which is based on current collateral requirements.

Table of Contents

At December 31, 2007, we had \$1.6 billion of loans and \$18.8 billion of securities pledged to the Federal Reserve Bank with a combined collateral value of \$18.2 billion. Also at December 31, 2007, we pledged \$33.5 billion of loans and \$4.3 billion of securities to FHLB-Pittsburgh with a combined collateral value of \$23.5 billion. At December 31, 2007 we had no outstanding borrowings with the Federal Reserve Bank and \$6.8 billion outstanding with FHLB-Pittsburgh resulting in unused borrowing capacity of \$18.2 billion and \$16.7 billion, respectively, for a combined unused borrowing capacity under these arrangements of \$34.9 billion.

In the first half of 2008 we increased FHLB borrowings, which provided us with additional liquidity at relatively attractive rates. Total FHLB borrowings were \$9.6 billion at June 30, 2008 compared with \$7.1 billion at December 31, 2007.

We can also obtain funding through traditional forms of borrowing, including federal funds purchased, repurchase agreements, and short and long-term debt issuances. In July 2004, PNC Bank, N.A. established a program to offer up to \$20 billion in senior and subordinated unsecured debt obligations with maturities of more than nine months. Through June 30, 2008, PNC Bank, N.A. had issued \$6.9 billion of debt under this program.

PNC Bank, N.A. established a program in December 2004 to offer up to \$3.0 billion of its commercial paper. As of June 30, 2008, there were no issuances outstanding under this program.

As of June 30, 2008, there were \$1.5 billion of PNC Bank, N.A. short- and long-term debt issuances with maturities of less than one year.

Parent Company Liquidity

Our parent company's routine funding needs consist primarily of dividends to PNC shareholders, share repurchases, debt service, the funding of non-bank affiliates, and acquisitions.

Parent company liquidity guidelines are designed to help ensure that sufficient liquidity is available to meet these requirements over the succeeding 12-month period. In managing parent company liquidity we consider funding sources, such as expected dividends to be received from PNC Bank, N.A. and potential debt issuance, and discretionary funding uses, the most significant of which is the external dividend to be paid on PNC's stock.

The principal source of parent company cash flow is the dividends it receives from PNC Bank, N.A., which may be impacted by the following:

- Capital needs,
- Laws and regulations,
- Corporate policies,
- Contractual restrictions, and
- Other factors.

Also, there are statutory and regulatory limitations on the ability of national banks to pay dividends or make other capital

distributions or to extend credit to the parent company or its non-bank subsidiaries. Dividends may also be impacted by the bank's capital needs and by contractual restrictions. We provide additional information on certain contractual restrictions under the "Perpetual Trust Securities," "PNC Capital Trust E Trust Preferred Securities," and "Acquired Entity Trust Preferred Securities" sections of the Off-Balance Sheet Arrangements And Variable Interest Entities section of this Financial Review. The amount available for dividend payments to the parent company by PNC Bank, N.A. without prior regulatory approval was approximately \$510 million at June 30, 2008.

In addition to dividends from PNC Bank, N.A., other sources of parent company liquidity include cash and short-term investments, as well as dividends and loan repayments from other subsidiaries and dividends or distributions from equity investments. As of June 30, 2008, the parent company had approximately \$679 million in funds available from its cash and short-term investments.

We can also generate liquidity for the parent company and PNC's non-bank subsidiaries through the issuance of securities in public or private markets.

In July 2006, PNC Funding Corp established a program to offer up to \$3.0 billion of commercial paper to provide the parent company with additional liquidity. As of June 30, 2008, \$384 million of commercial paper was outstanding under this program.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

In May 2008, we issued \$500 million of Depositary Shares, each representing a fractional interest in a share of PNC Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series K. Dividends are payable if and when declared beginning November 21, 2008 and then each May 21 and November 21 until May 21, 2013. After that date, dividends will be payable each 21st of August, November, February and May. Dividends will be paid at a rate of 8.25% prior to May 21, 2013 and at a rate of three-month LIBOR plus 422 basis points beginning May 21, 2013.

We have effective shelf registration statements which enable us to issue additional debt and equity securities, including certain hybrid capital instruments.

As of June 30, 2008, there were \$1.7 billion of parent company contractual obligations, including commercial paper, with maturities of less than one year.

We also provide tables showing contractual obligations and various other commitments representing required and potential cash outflows as of June 30, 2008 under the heading *Commitments* below.

MARKET RISK MANAGEMENT OVERVIEW

Market risk is the risk of a loss in earnings or economic value due to adverse movements in market factors such as interest rates, credit spreads, foreign exchange rates, and equity prices.

Table of Contents**MARKET RISK MANAGEMENT INTEREST RATE RISK**

Interest rate risk results primarily from our traditional banking activities of gathering deposits and extending loans. Many factors, including economic and financial conditions, movements in interest rates, and consumer preferences, affect the difference between the interest that we earn on assets and the interest that we pay on liabilities and the level of our noninterest-bearing funding sources. Due to the repricing term mismatches and embedded options inherent in certain of these products, changes in market interest rates not only affect expected near-term earnings, but also the economic values of these assets and liabilities.

Asset and Liability Management centrally manages interest rate risk within limits and guidelines set forth in our risk management policies approved by the Asset and Liability Committee and the Risk Committee of the Board.

Sensitivity estimates and market interest rate benchmarks for the second quarters of 2008 and 2007 follow:

Interest Sensitivity Analysis

	Second Quarter 2008	Second Quarter 2007
Net Interest Income Sensitivity Simulation		
Effect on net interest income in first year from gradual interest rate change over following 12 months of:		
100 basis point increase	(2.6)%	(2.5)%
100 basis point decrease	2.4%	2.5%
Effect on net interest income in second year from gradual interest rate change over the preceding 12 months of:		
100 basis point increase	(5.2)%	(5.7)%
100 basis point decrease	2.5%	4.4%
Duration of Equity Model		
Base case duration of equity (in years):	2.6	3.2
Key Period-End Interest Rates		
One-month LIBOR	2.46%	5.32%
Three-year swap	3.89%	5.39%

In addition to measuring the effect on net interest income assuming parallel changes in current interest rates, we routinely simulate the effects of a number of nonparallel interest rate environments. The following Net Interest Income Sensitivity To Alternate Rate Scenarios table reflects the percentage change in net interest income over the next two 12-month periods assuming (i) the PNC Economist's most likely rate forecast, (ii) implied market forward rates, and (iii) a Two-Ten Inversion (a 200 basis point inversion between two-year and ten-year rates superimposed on current base rates) scenario. We are inherently sensitive to a flatter or inverted yield curve.

Net Interest Income Sensitivity To Alternate Rate Scenarios (Second Quarter 2008)

	PNC Economist	Market Forward	Two-Ten Inversion
First year sensitivity	.3%	(4.3)%	(7.4)%
Second year sensitivity	(7.1)%	(11.3)%	(7.1)%

All changes in forecasted net interest income are relative to results in a base rate scenario where current market rates are assumed to remain unchanged over the forecast horizon.

When forecasting net interest income, we make assumptions about interest rates and the shape of the yield curve, the volume and characteristics of new business, and the behavior of existing on- and off-balance sheet positions. These assumptions determine the future level of simulated net

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

interest income in the base interest rate scenario and the other interest rate scenarios presented in the following table. These simulations assume that as assets and liabilities mature, they are replaced or repriced at market rates.

The graph below presents the yield curves for the base rate scenario and each of the alternate scenarios one year forward.

Our risk position is currently liability sensitive, which has been the objective of our balance sheet management strategies. We believe that we have the deposit funding base and balance sheet flexibility to adjust, where appropriate, to changing interest rates and market conditions.

MARKET RISK MANAGEMENT TRADING RISK

Our trading activities include customer-driven trading in fixed income securities, equities, derivatives, and foreign exchange contracts. They also include the underwriting of fixed income and equity securities and proprietary trading.

We use value-at-risk (VaR) as the primary means to measure and monitor market risk in trading activities. The Risk Committee of the Board establishes an enterprise-wide VaR limit on our trading activities.

During the first six months of 2008, our VaR ranged between \$9.1 million and \$13.8 million, averaging \$11.7 million. During the first six months of 2007, our VaR ranged between \$6.1 million and \$9.3 million, averaging \$7.6 million. The increase in VaR compared with the first half of 2007 reflected ongoing market volatility.

To help ensure the integrity of the models used to calculate VaR for each portfolio and enterprise-wide, we use a process known

Table of Contents

as backtesting. The backtesting process consists of comparing actual observations of trading-related gains or losses against the VaR levels that were calculated at the close of the prior day. Under typical market conditions, we would expect an average of two to three instances a year in which actual losses exceeded the prior day VaR measure at the enterprise-wide level. As a result of increased volatility in certain markets, there were five such instances during the first six months of 2008.

The following graph shows a comparison of enterprise-wide trading-related gains and losses against prior day VaR for the period.

Total trading revenue for the first half and second quarter of 2008 and 2007 was as follows:

Six months ended June 30 in millions	2008	2007
Net interest income	\$ 39	\$ 1
Noninterest income	(23)	81
Total trading revenue	\$ 16	\$ 82
Securities underwriting and trading (a)	\$ 10	\$ 17
Foreign exchange	33	27
Financial derivatives	(27)	38
Total trading revenue	\$ 16	\$ 82

Three months ended June 30 in millions	2008	2007
Net interest income	\$ 23	\$ 1
Noninterest income	53	29
Total trading revenue	\$ 76	\$ 30
Securities underwriting and trading (a)	\$ 19	\$ 8
Foreign exchange	17	13
Financial derivatives	40	9
Total trading revenue	\$ 76	\$ 30

(a) Includes changes in fair value for certain loans accounted for at fair value.

The decline in total trading revenue for the first six months of 2008 primarily related to our first quarter 2008 proprietary trading activities and reflected the negative impact of a very illiquid market on the assets that we held. In response to first quarter 2008 market volatility, during the second quarter of 2008 we substantially reduced our trading positions and increased our hedges in connection with proprietary trading activities.

Average trading assets and liabilities consisted of the following:

Six months ended June 30 in millions	2008	2007
Trading assets		
Securities (a)	\$ 3,177	\$ 1,858
Resale agreements (b)	2,046	1,254
Financial derivatives (c)	2,420	1,166
Loans at fair value (c)	103	177
Total trading assets	\$ 7,746	\$ 4,455
Trading liabilities		
Securities sold short (d)	\$ 1,642	\$ 1,348
Repurchase agreements and other borrowings (e)	864	653
Financial derivatives (f)	2,460	1,178
Borrowings at fair value (f)	28	39
Total trading liabilities	\$ 4,994	\$ 3,218

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Three months ended June 30 in millions	2008	2007
Trading assets		
Securities (a)	\$ 2,471	\$ 2,144
Resale agreements (b)	1,731	1,247
Financial derivatives (c)	2,028	1,221

(a) Included in Interest-earning assets-Other on the Average Consolidated Balance Sheet And Net Interest Analysis.

(b) Included in Federal funds sold and resale agreements.

(c) Included in Noninterest-earning assets-Other.

(d) Included in Borrowed funds Other.

(e) Included in Borrowed funds Repurchase agreements and Other.

(f) Included in Accrued expenses and other liabilities.

MARKET RISK MANAGEMENT EQUITY AND OTHER INVESTMENT RISK

Equity investment risk is the risk of potential losses associated with investing in both private and public equity markets.

BlackRock

PNC owns approximately 43 million shares of BlackRock common stock, accounted for under the equity method. Our total investment in BlackRock was \$4.3 billion at June 30, 2008 compared with \$4.1 billion at December 31, 2007. The market value of our investment in BlackRock was \$7.6 billion at June 30, 2008. The primary risk measurement, similar to other equity investments, is economic capital.

Low Income Housing Projects

Included in our equity investments are limited partnerships that sponsor affordable housing projects. These investments, consisting of partnerships accounted for under the equity method as well as equity investments held by consolidated partnerships, totaled \$1.0 billion at June 30, 2008 and

Table of Contents

\$1.0 billion at December 31, 2007. PNC's equity investment at risk was \$209 million at June 30, 2008 compared with \$188 million at year-end 2007. We also had commitments to make additional equity investments in affordable housing limited partnerships of \$97 million at June 30, 2008 compared with \$98 million at December 31, 2007. These commitments are included in other liabilities on the Consolidated Balance Sheet.

Visa

Our remaining investment in Visa Class B common shares totals approximately 3.6 million and is recorded at zero book value. At the IPO conversion ratio, these shares would convert to approximately 2.5 million of the publicly traded Visa Class A common shares. Based on the June 30, 2008 closing price of \$81.31 for the Visa shares, our remaining investment had an unrecognized pretax value of approximately \$207 million. The Visa Class B common shares we own generally will not be transferable until they can be converted into shares of the publicly traded class of stock, which cannot happen until the later of three years after the IPO or settlement of all of the specified litigation. Additionally, Visa is allowed to reduce the number of shares that we own to fund any litigation liabilities that are above and beyond the initial escrow amount set aside at the time of the IPO. Note 15 Commitments And Guarantees in our Notes To Consolidated Financial Statements included in this Report has further information on our Visa indemnification obligation.

Private Equity

The private equity portfolio is comprised of equity and mezzanine investments that vary by industry, stage and type of investment. At June 30, 2008, private equity investments carried at estimated fair value totaled \$584 million compared with \$561 million at December 31, 2007. As of June 30, 2008, \$306 million was invested directly in a variety of companies and \$278 million was invested in various limited partnerships. Included in direct investments are investment activities of two private equity funds that are consolidated for financial reporting purposes. The minority and noncontrolling interests of these funds totaled \$111 million as of June 30, 2008. Our unfunded commitments related to private equity totaled \$254 million at June 30, 2008 and \$270 million at December 31, 2007.

Other Investments

We also make investments in affiliated and non-affiliated funds with both traditional and alternative investment strategies. The economic values could be driven by either the fixed-income market or the equity markets, or both. At June 30, 2008, other investments totaled \$541 million compared with \$389 million at December 31, 2007. During the second quarter of 2008, we recognized impairments relating to these investments of \$26 million. Given the nature of these investments and if current market conditions affecting their valuation were to continue or worsen, we could incur future impairment charges.

Our unfunded commitments related to other investments totaled \$74 million at June 30, 2008 compared with \$79 million at December 31, 2007.

COMMITMENTS

The following tables set forth contractual obligations and various other commitments representing required and potential cash outflows as of June 30, 2008.

Contractual Obligations

June 30, 2008 in millions	Total
Remaining contractual maturities of time deposits	\$ 24,945
Borrowed funds	32,472
Minimum annual rentals on noncancellable leases	1,309
Nonqualified pension and post-retirement benefits	315
Purchase obligations (a)	420
Total contractual cash obligations	\$ 59,461

(a) Includes purchase obligations for goods and services covered by noncancellable contracts and contracts including cancellation fees.

Other Commitments (a)

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

June 30, 2008 in millions	Total
Loan commitments	\$ 51,558
Standby letters of credit (b)	5,672
Other commitments (c)	445
Total commitments	\$ 57,675

- (a) Other commitments are funding commitments that could potentially require performance in the event of demands by third parties or contingent events. Loan commitments are reported net of participations, assignments and syndications.
- (b) Includes \$2.5 billion of standby letters of credit that support remarketing programs for customers variable rate demand notes.
- (c) Includes unfunded commitments related to private equity investments of \$254 million and other investments of \$74 million which are not on our Consolidated Balance Sheet. Also includes commitments related to low income housing projects of \$97 million and historic tax credits of \$20 million which are included in other liabilities on the Consolidated Balance Sheet.

FINANCIAL DERIVATIVES

We use a variety of financial derivatives as part of the overall asset and liability risk management process to help manage interest rate, market and credit risk inherent in our business activities. Substantially all such instruments are used to manage risk related to changes in interest rates. Interest rate and total return swaps, interest rate caps and floors and futures contracts are the primary instruments we use for interest rate risk management.

Financial derivatives involve, to varying degrees, interest rate, market and credit risk. For interest rate swaps and total return swaps, options and futures contracts, only periodic cash payments and, with respect to options, premiums are exchanged. Therefore, cash requirements and exposure to credit risk are significantly less than the notional amount on these instruments. Further information on our financial derivatives is presented in Note 1 Accounting Policies and Note 10 Financial Derivatives in the Notes To Consolidated Financial Statements included in this Report.

Not all elements of interest rate, market and credit risk are addressed through the use of financial or other derivatives, and such instruments may be ineffective for their intended purposes due to unanticipated market characteristics, among other reasons.

Table of Contents

The following tables provide the notional or contractual amounts and estimated net fair value of financial derivatives used for risk management and designated as accounting hedges or free-standing derivatives at June 30, 2008 and December 31, 2007. Weighted-average interest rates presented are based on contractual terms, if fixed, or the implied forward yield curve at each respective date, if floating.

Financial Derivatives 2008

		89,939	(52)			
		\$188,410	\$(87)			

(a) The floating rate portion of interest rate contracts is based on money-market indices. As a percent of notional amount, 48% were based on 1-month LIBOR, 40% on 3-month LIBOR and 12% on Prime Rate.

(b) Fair value amount includes net accrued interest receivable of \$219 million.

(c) The increases in the negative fair values from December 31, 2007 to June 30, 2008 for equity, interest rate contracts and foreign exchange were due to the changes in fair values of the existing contracts along with new contracts entered into during 2008.

(d) Due to the adoption of SFAS 159 as of January 1, 2008, we discontinued hedge accounting with our commercial mortgage banking pay fixed interest rate swaps; therefore, the fair value of these are now reported in this category.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

- (e) Relates to PNC's obligation to help fund certain BlackRock LTIP programs and to certain customer-related derivatives. Additional information regarding the BlackRock/MLIM transaction and our BlackRock LTIP shares obligation is included in Note 2 Acquisitions and Divestitures included in the Notes To Consolidated Financial Statements in Item 8 of our 2007 Form 10-K.

Table of Contents

INTERNAL CONTROLS AND DISCLOSURE CONTROLS AND PROCEDURES

As of June 30, 2008, we performed an evaluation under the supervision and with the participation of our management, including the Chairman and Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures and of changes in our internal control over financial reporting.

Based on that evaluation, our management, including the Chairman and Chief Executive Officer and the Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of June 30, 2008, and that there has been no change in internal control over financial reporting that occurred during the second quarter of 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

GLOSSARY OF TERMS

Accounting/administration net fund assets - Net domestic and foreign fund investment assets for which we provide accounting and administration services. We do not include these assets on our Consolidated Balance Sheet.

Adjusted average total assets - Primarily comprised of total average quarterly (or annual) assets plus (less) unrealized losses (gains) on available for sale debt securities, less goodwill and certain other intangible assets (net of eligible deferred taxes).

Annualized - Adjusted to reflect a full year of activity.

Assets under management - Assets over which we have sole or shared investment authority for our customers/clients. We do not include these assets on our Consolidated Balance Sheet.

Basis point - One hundredth of a percentage point.

Charge-off - Process of removing a loan or portion of a loan from our balance sheet because it is considered uncollectible. We also record a charge-off when a loan is transferred to held for sale by reducing the carrying amount by the allowance for loan losses associated with such loan or, if the market value is less than its carrying amount, by the amount of that difference.

Common shareholders equity to total assets - Common shareholders equity divided by total assets. Common shareholders equity equals total shareholders equity less the liquidation value of preferred stock.

Credit derivatives - Contractual agreements, primarily credit default swaps, that provide protection against a credit event of one or more referenced credits. The nature of a credit event is established by the protection buyer and protection seller at the inception of a transaction, and such events include bankruptcy, insolvency and failure to meet payment

obligations when due. The buyer of the credit derivative pays a periodic fee in return for a payment by the protection seller upon the occurrence, if any, of a credit event.

Credit spread - The difference in yield between debt issues of similar maturity. The excess of yield attributable to credit spread is often used as a measure of relative creditworthiness, with a reduction in the credit spread reflecting an improvement in the borrower's perceived creditworthiness.

Custody assets - Investment assets held on behalf of clients under safekeeping arrangements. We do not include these assets on our Consolidated Balance Sheet. Investment assets held in custody at other institutions on our behalf are included in the appropriate asset categories on the Consolidated Balance Sheet as if physically held by us.

Derivatives - Financial contracts whose value is derived from publicly traded securities, interest rates, currency exchange rates or market indices. Derivatives cover a wide assortment of financial contracts, including forward contracts, futures, options and swaps.

Duration of equity - An estimate of the rate sensitivity of our economic value of equity. A negative duration of equity is associated with asset sensitivity (*i.e.*, positioned for rising interest rates), while a positive value implies liability sensitivity (*i.e.*, positioned for declining interest

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

rates). For example, if the duration of equity is +1.5 years, the economic value of equity declines by 1.5% for each 100 basis point increase in interest rates.

Earning assets - Assets that generate income, which include: federal funds sold; resale agreements; trading securities and other short-term investments; loans held for sale; loans, net of unearned income; securities; and certain other assets.

Economic capital - Represents the amount of resources that a business segment should hold to guard against potentially large losses that could cause insolvency. It is based on a measurement of economic risk, as opposed to risk as defined by regulatory bodies. The economic capital measurement process involves converting a risk distribution to the capital that is required to support the risk, consistent with our target credit rating. As such, economic risk serves as a common currency of risk that allows us to compare different risks on a similar basis.

Effective duration - A measurement, expressed in years, that, when multiplied by a change in interest rates, would approximate the percentage change in value of on- and off- balance sheet positions.

Efficiency - Noninterest expense divided by the sum of net interest income (GAAP basis) and noninterest income.

Fair value - The price that would be received to sell an asset or the price that would be paid to transfer a liability on the measurement date using the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants.

Table of Contents

Foreign exchange contracts - Contracts that provide for the future receipt and delivery of foreign currency at previously agreed-upon terms.

Funds transfer pricing - A management accounting methodology designed to recognize the net interest income effects of sources and uses of funds provided by the assets and liabilities of a business segment. We assign these balances LIBOR-based funding rates at origination that represent the interest cost for us to raise/invest funds with similar maturity and repricing structures.

Futures and forward contracts - Contracts in which the buyer agrees to purchase and the seller agrees to deliver a specific financial instrument at a predetermined price or yield. May be settled either in cash or by delivery of the underlying financial instrument.

GAAP - Accounting principles generally accepted in the United States of America.

Interest rate floors and caps - Interest rate protection instruments that involve payment from the protection seller to the protection buyer of an interest differential, which represents the difference between a short-term rate (e.g., three-month LIBOR) and an agreed-upon rate (the strike rate) applied to a notional principal amount.

Interest rate swap contracts - Contracts that are entered into primarily as an asset/liability management strategy to reduce interest rate risk. Interest rate swap contracts are exchanges of interest rate payments, such as fixed-rate payments for floating-rate payments, based on notional principal amounts.

Intrinsic value - The amount by which the fair value of an underlying stock exceeds the exercise price of an option on that stock.

Leverage ratio - Tier 1 risk-based capital divided by adjusted average total assets.

Net interest income from loans and deposits - A management accounting assessment, using funds transfer pricing methodology, of the net interest contribution from loans and deposits.

Net interest margin - Annualized taxable-equivalent net interest income divided by average earning assets.

Nondiscretionary assets under administration - Assets we hold for our customers/clients in a non-discretionary, custodial capacity. We do not include these assets on our Consolidated Balance Sheet.

Noninterest income to total revenue - Noninterest income divided by the sum of net interest income (GAAP basis) and noninterest income.

Nonperforming assets - Nonperforming assets include nonaccrual loans, troubled debt restructured loans, foreclosed assets and other assets. We do not accrue interest income on assets classified as nonperforming.

Nonperforming loans - Nonperforming loans include loans to commercial, commercial real estate, lease financing, consumer, and residential mortgage customers as well as troubled debt restructured loans. Nonperforming loans do not include loans held for sale or foreclosed and other assets. We do not accrue interest income on loans classified as nonperforming.

Notional amount - A number of currency units, shares, or other units specified in a derivatives contract.

Operating leverage - The period to period percentage change in total revenue (GAAP basis) less the percentage change in noninterest expense. A positive percentage indicates that revenue growth exceeded expense growth (*i.e.*, positive operating leverage) while a negative percentage implies expense growth exceeded revenue growth (*i.e.*, negative operating leverage).

Options - Contracts that grant the purchaser, for a premium payment, the right, but not the obligation, to either purchase or sell the associated financial instrument at a set price during a period or at a specified date in the future.

Recovery - Cash proceeds received on a loan that we had previously charged off. We credit the amount received to the allowance for loan and lease losses.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Return on average assets - Annualized net income divided by average assets.

Return on average capital - Annualized net income divided by average capital.

Return on average common shareholders' equity - Annualized net income less preferred stock dividends divided by average common shareholders' equity.

Return on average tangible common shareholders' equity - Annualized net income less preferred stock dividends divided by average common shareholders' equity less goodwill and other intangible assets (net of deferred taxes for both taxable and nontaxable combinations), and excluding mortgage servicing rights.

Risk-weighted assets - Primarily computed by the assignment of specific risk-weights (as defined by the Board of Governors of the Federal Reserve System) to assets and off-balance sheet instruments.

Securitization - The process of legally transforming financial assets into securities.

Swaptions - Contracts that grant the purchaser, for a premium payment, the right, but not the obligation, to enter into an interest rate swap agreement during a period or at a specified date in the future.

Tangible common equity ratio - Period-end common shareholders' equity less goodwill and other intangible assets (net of deferred taxes), and excluding mortgage servicing rights, divided by period-end assets less goodwill and other intangible assets (net of deferred taxes), and excluding mortgage servicing rights.

Table of Contents

Taxable-equivalent interest - The interest income earned on certain assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than taxable investments. To provide more meaningful comparisons of yields and margins for all interest-earning assets, we use interest income on a taxable-equivalent basis in calculating average yields and net interest margins by increasing the interest income earned on tax-exempt assets to make it fully equivalent to interest income earned on other taxable investments. This adjustment is not permitted under GAAP on the Consolidated Income Statement.

Tier 1 risk-based capital - Tier 1 risk-based capital equals: total shareholders' equity, plus trust preferred capital securities, plus certain minority interests that are held by others; less goodwill and certain other intangible assets (net of eligible deferred taxes relating to nontaxable combinations), less equity investments in nonfinancial companies and less net unrealized holding losses on available for sale equity securities. Net unrealized holding gains on available for sale equity securities, net unrealized holding gains (losses) on available for sale debt securities and net unrealized holding gains (losses) on cash flow hedge derivatives are excluded from total shareholders' equity for Tier 1 risk-based capital purposes.

Tier 1 risk-based capital ratio - Tier 1 risk-based capital divided by period-end risk-weighted assets.

Total fund assets serviced - Total domestic and offshore fund investment assets for which we provide related processing services. We do not include these assets on our Consolidated Balance Sheet.

Total return swap - A non-traditional swap where one party agrees to pay the other the total return of a defined underlying asset (e.g., a loan), usually in return for receiving a stream of LIBOR-based cash flows. The total returns of the asset, including interest and any default shortfall, are passed through to the counterparty. The counterparty is therefore assuming the credit and economic risk of the underlying asset.

Total risk-based capital - Tier 1 risk-based capital plus qualifying subordinated debt and trust preferred securities, other minority interest not qualified as Tier 1, and the allowance for loan and lease losses, subject to certain limitations.

Total risk-based capital ratio - Total risk-based capital divided by period-end risk-weighted assets.

Transaction deposits - The sum of money market and interest-bearing demand deposits and demand and other noninterest-bearing deposits.

Value-at-risk (VaR) - A statistically-based measure of risk which describes the amount of potential loss which may be incurred due to severe and adverse market movements. The measure is of the maximum loss which should not be exceeded on 99 out of 100 days.

Watchlist - A list of criticized loans, credit exposure or other assets compiled for internal monitoring purposes. We define criticized exposure for this purpose as exposure with an internal risk rating of other assets especially mentioned, substandard, doubtful or loss.

Yield curve - A graph showing the relationship between the yields on financial instruments or market indices of the same credit quality with different maturities. For example, a normal or positive yield curve exists when long-term bonds have higher yields than short-term bonds. A flat yield curve exists when yields are the same for short-term and long-term bonds. A steep yield curve exists when yields on long-term bonds are significantly higher than on short-term bonds. An inverted or negative yield curve exists when short-term bonds have higher yields than long-term bonds.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

We make statements in this Report, and we may from time to time make other statements, regarding our outlook or expectations for earnings, revenues, expenses and/or other matters regarding or affecting PNC that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Forward-looking statements are typically identified by words such as believe, expect, anticipate, intend, outlook, estimate, forecast, will, project and other similar words and expressions.

Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made. We do not assume any duty and do not undertake to update our forward-looking statements. Actual results or future events could differ, possibly materially, from those that we anticipated in our forward-looking statements, and future results could differ materially from our historical performance.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Our forward-looking statements are subject to the following principal risks and uncertainties. We provide greater detail regarding some of these factors in our 2007 Form 10-K and elsewhere in this Report, including in the Risk Factors and Risk Management sections of these reports. Our forward-looking statements may also be subject to other risks and uncertainties, including those discussed elsewhere in this Report or in our other filings with the SEC.

Our businesses and financial results are affected by business and economic conditions, both generally and specifically in the principal markets in which we operate. In particular, our businesses and financial results may be impacted by:

Changes in interest rates and valuations in the debt, equity and other financial markets.

Disruptions in the liquidity and other functioning of financial markets, including such disruptions in the markets for real estate and other assets commonly securing financial products.

Table of Contents

Actions by the Federal Reserve and other government agencies, including those that impact money supply and market interest rates.

Changes in our customers , suppliers and other counterparties performance in general and their creditworthiness in particular. Changes in customer preferences and behavior, whether as a result of changing business and economic conditions or other factors.

A continuation of recent turbulence in significant portions of the global financial markets could impact our performance, both directly by affecting our revenues and the value of our assets and liabilities and indirectly by affecting the economy generally.

Given current economic and financial market conditions, our forward-looking financial statements are subject to the risk that these conditions will be substantially different than we are currently expecting. These statements are based on our current expectations that interest rates will remain low through 2008 with continued wide market credit spreads, and our view that national economic conditions currently point toward a mild recession followed by a subdued recovery.

Our operating results are affected by our liability to provide shares of BlackRock common stock to help fund certain BlackRock long-term incentive plan (LTIP) programs, as our LTIP liability is adjusted quarterly (marked-to-market) based on changes in BlackRock s common stock price and the number of remaining committed shares, and we recognize gain or loss on such shares at such times as shares are transferred for payouts under the LTIP programs.

Legal and regulatory developments could have an impact on our ability to operate our businesses or our financial condition or results of operations or our competitive position or reputation. Reputational impacts, in turn, could affect matters such as business generation and retention, our ability to attract and retain management, liquidity, and funding. These legal and regulatory developments could include: (a) the unfavorable resolution of legal proceedings or regulatory and other governmental inquiries; (b) increased litigation risk from recent regulatory and other governmental developments; (c) the results of the regulatory examination process, our failure to satisfy the requirements of agreements with governmental agencies, and regulators future use of supervisory and enforcement tools; (d) legislative and regulatory reforms, including changes to laws and regulations involving tax, pension, education lending, and the protection of confidential customer information; and (e) changes in accounting policies and principles.

Our business and operating results are affected by our ability to identify and effectively manage risks inherent in our businesses, including, where appropriate, through the effective use of third-party insurance, derivatives, and capital management techniques.

The adequacy of our intellectual property protection, and the extent of any costs associated with obtaining rights in intellectual property claimed by others, can impact our business and operating results.

Our ability to anticipate and respond to technological changes can have an impact on our ability to respond to customer needs and to meet competitive demands.

Our ability to implement our business initiatives and strategies could affect our financial performance over the next several years.

Competition can have an impact on customer acquisition, growth and retention, as well as on our credit spreads and product pricing, which can affect market share, deposits and revenues.

Our business and operating results can also be affected by widespread natural disasters, terrorist activities or international hostilities, either as a result of the impact on the economy and capital and other financial markets generally or on us or on our customers, suppliers or other counterparties specifically.

Also, risks and uncertainties that could affect the results anticipated in forward-looking statements or from historical performance relating to our equity interest in BlackRock, Inc. are discussed in more detail in BlackRock s filings with the SEC, including in the Risk Factors sections of BlackRock s reports. BlackRock s SEC filings are accessible on the SEC s website and on or through BlackRock s website at www.blackrock.com.

We grow our business from time to time by acquiring other financial services companies. Acquisitions in general present us with risks in addition to those presented by the nature of the business acquired. In particular, acquisitions may be substantially more expensive to complete (including as a result of costs incurred in connection with the integration of the acquired company) and the anticipated benefits (including anticipated cost savings and strategic gains) may be significantly harder or take longer to achieve than expected. In some cases, acquisitions involve our entry into new businesses or new geographic or other markets, and these situations also present risks resulting from our inexperience in these new areas. As a regulated financial institution, our pursuit of attractive acquisition opportunities could be negatively impacted due to regulatory delays or other regulatory issues. Regulatory and/or legal issues related to the pre-acquisition operations of an acquired business may cause reputational harm to PNC following the acquisition and integration of the acquired business into ours and may result in additional future costs arising as a result of those issues. Our recent acquisition of Sterling Financial Corporation (Sterling) presents regulatory and litigation risk, as a result of financial irregularities at Sterling s commercial finance subsidiary, that may adversely impact our financial results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

THE PNC FINANCIAL SERVICES GROUP, INC.

Business

We are one of the largest diversified financial services companies in the United States based on assets, with businesses engaged in:

Retail banking,
Corporate and institutional banking,
Asset management, and
Global investment servicing.

We provide many of our products and services nationally and others in our primary geographic markets located in Pennsylvania, New Jersey, Washington, DC, Maryland, Virginia, Ohio, Kentucky, and Delaware. We also provide certain investment servicing internationally. We are subject to intense competition from other financial services companies and are subject to regulation by various domestic and international authorities.

NOTE 1 ACCOUNTING POLICIES

BASIS OF FINANCIAL STATEMENT PRESENTATION

Our consolidated financial statements include the accounts of the parent company and its subsidiaries, most of which are wholly owned, and certain partnership interests and variable interest entities.

We prepared these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles or GAAP). We have eliminated intercompany accounts and transactions. We have also reclassified certain prior year amounts to conform with the 2008 presentation. These reclassifications did not have a material impact on our consolidated financial condition or results of operations.

In our opinion, the unaudited interim consolidated financial statements reflect all normal, recurring adjustments needed to present fairly our results for the interim periods.

When preparing these unaudited interim consolidated financial statements, we have assumed that you have read the audited consolidated financial statements included in our 2007 Annual Report on Form 10-K (2007 Form 10-K).

USE OF ESTIMATES

We prepare the consolidated financial statements using financial information available at the time, which requires us to make estimates and assumptions that affect the amounts reported. Actual results may differ from these estimates and the differences may be material to the consolidated financial statements.

BUSINESS COMBINATIONS

We record the net assets of companies that we acquire at their estimated fair value at the date of acquisition and we include

the results of operations of the acquired companies in our consolidated income statement from the date of acquisition. We recognize as goodwill the excess of the acquisition price over the estimated fair value of the net assets acquired.

SPECIAL PURPOSE ENTITIES

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Special purpose entities are defined as legal entities structured for a particular purpose. We use special purpose entities in various legal forms to conduct normal business activities. We review the structure and activities of special purpose entities for possible consolidation under the guidance contained in Financial Accounting Standards Board (FASB) Interpretation No. 46 (Revised 2003), Consolidation of Variable Interest Entities (FIN 46R) and Accounting Research Bulletin No. 51, Consolidated Financial Statements, as appropriate.

A variable interest entity (VIE) is a corporation, partnership, limited liability company, or any other legal structure used to conduct activities or hold assets that either:

Does not have equity investors with voting rights that can directly or indirectly make decisions about the entity's activities through those voting rights or similar rights, or

Has equity investors that do not provide sufficient equity for the entity to finance its activities without additional subordinated financial support.

A VIE often holds financial assets, including loans, receivables, real estate or other property.

Based on the guidance contained in FIN 46R, we consolidate a VIE if we are considered to be its primary beneficiary. The primary beneficiary, determined based on variability of expected cash flows, will absorb the majority of the expected losses from the VIE's activities, is entitled to receive a majority of the entity's residual returns, or both. Upon consolidation of a VIE, we recognize all of the VIE's assets, liabilities and noncontrolling interests on our Consolidated Balance Sheet. See Note 3 Variable Interest Entities for information about VIEs that we do not consolidate but in which we hold a significant variable interest.

REVENUE RECOGNITION

We earn net interest income and noninterest income from various sources, including:

Lending,
Securities portfolio,
Asset management and fund servicing,
Customer deposits,
Loan servicing,
Brokerage services, and
Securities and derivatives trading activities, including foreign exchange.

Table of Contents

We also earn revenue from selling loans and securities, and we recognize income or loss from certain private equity activities.

We earn fees and commissions from:

- Issuing loan commitments, standby letters of credit and financial guarantees,
- Selling various insurance products,
- Providing treasury management services,
- Providing merger and acquisition advisory and related services, and
- Participating in capital markets transactions.

Revenue earned on interest-earning assets is recognized based on the effective yield of the financial instrument.

Asset management fees are generally based on a percentage of the fair value of the assets under management and performance fees are generally based on a percentage of the returns on such assets. Certain performance fees are earned upon attaining specified investment return thresholds and are recorded as earned. The caption asset management also includes our share of the earnings of BlackRock recognized under the equity method of accounting.

Fund servicing fees are primarily based on a percentage of the fair value of the fund assets and the number of shareholder accounts we service.

Service charges on deposit accounts are recognized when earned. Brokerage fees and gains on the sale of securities and certain derivatives are recognized on a trade-date basis.

We record private equity income or loss based on changes in the valuation of the underlying investments or when we dispose of our interest. Dividend income from private equity investments is generally recognized when received and interest income from subordinated private equity debt investments is recorded on an accrual basis.

We recognize revenue from loan servicing, securities, derivatives and foreign exchange trading, and securities underwriting activities as they are earned based on contractual terms, as transactions occur or as services are provided. We recognize any gains from the sale of loans upon cash settlement of the transaction.

When appropriate, revenue is reported net of associated expenses in accordance with GAAP.

INVESTMENTS

We have interests in various types of investments. The accounting for these investments is dependent on a number of factors including, but not limited to, items such as:

- Ownership interest,
- Our plans for the investment, and
- The nature of the investment.

Debt Securities

Debt securities are recorded on a trade-date basis. We classify debt securities as held to maturity and carry them at amortized cost if we have the positive intent and ability to hold the securities to maturity. Debt securities that we purchase for short-term appreciation or other trading purposes are carried at fair value and classified as trading securities and other short-term investments on our Consolidated Balance Sheet. Realized and unrealized gains and losses on these securities are included in other noninterest income.

Interest income related to trading securities (both debt and equity) totaled \$75 million for the first six months of 2008 and \$37 million for the first six months of 2007. For the second quarter of 2008 and 2007, interest income related to trading securities totaled \$31 million and \$22 million, respectively. These amounts are included in other interest income on the Consolidated Income Statement.

Debt securities not classified as held to maturity or trading are designated as securities available for sale and carried at fair value with unrealized gains and losses, net of income taxes, reflected in accumulated other comprehensive income (loss). We review all debt securities that are in an unrealized loss position for other than temporary impairment on a quarterly basis. Declines in the fair value of available for sale debt securities

that are deemed other than temporary are recognized on our Consolidated Income Statement in net securities gains/(losses) in the period in which the determination is made.

We include all interest on debt securities, including amortization of premiums and accretion of discounts, in net interest income. We compute gains and losses realized on the sale of debt securities available for sale on a specific security basis and include them in net securities gains/(losses).

Equity Securities and Other Interests

We account for equity securities and equity investments other than BlackRock and private equity investments under one of the following methods:

Marketable equity securities are recorded on a trade-date basis and are accounted for based on the securities' quoted market prices from a national securities exchange. Dividend income on these securities is recognized in net interest income. Those purchased with the intention of recognizing short-term profits are classified as trading and included in trading securities and other short-term investments on our Consolidated Balance Sheet. Both realized and unrealized gains and losses on trading securities are included in other noninterest income. Marketable equity securities not classified as trading are designated as securities available for sale with unrealized gains and losses, net of income taxes, reflected in accumulated other comprehensive income (loss). Any unrealized losses that we have determined to be other than temporary on securities classified as available for sale are recognized in current period earnings.

Table of Contents

For investments in limited partnerships, limited liability companies and other investments that are not required to be consolidated, we use either the cost method or the equity method of accounting. We use the cost method for investments in which we are not considered to have influence over the operations of the investee and when cost appropriately reflects our economic interest in the underlying investment. Under the cost method, there is no change to the cost basis unless there is an other-than-temporary decline in value. If the decline is determined to be other than temporary, we write down the cost basis of the investment to a new cost basis that represents realizable value. The amount of the write-down is accounted for as a loss included in other noninterest income. Distributions received from income on cost method investments are included in interest income or noninterest income depending on the type of investment. We use the equity method for all other general and limited partner ownership interests and limited liability company investments. Under the equity method, we record our equity ownership share of net income or loss of the investee in other noninterest income. Investments described above are included in the caption equity investments on the Consolidated Balance Sheet.

Private Equity Investments

We report private equity investments, which include direct investments in companies, interests in limited partnerships, and affiliated partnership interests, at estimated fair values. These estimates are based on available information and may not necessarily represent amounts that we will ultimately realize through distribution, sale or liquidation of the investments. The valuation procedures applied to direct investments include techniques such as multiples of adjusted earnings of the entity, independent appraisals, anticipated financing and sale transactions with third parties, or the pricing used to value the entity in a recent financing transaction. We generally value limited partnership investments based on the financial statements we receive from the general partner. We value affiliated partnership interests based on the underlying investments of the partnership using procedures consistent with those applied to direct investments. We include all private equity investments on the Consolidated Balance Sheet in the caption equity investments. Changes in the fair value of private equity investments are recognized in other noninterest income.

We consolidate private equity investments when we are the general partner in a limited partnership and have determined that we have control of the partnership. The portion we do not own is reflected in the caption minority and noncontrolling interests in consolidated entities on the Consolidated Balance Sheet.

Investment in BlackRock

We account for our investment in BlackRock under the equity method of accounting. The investment in BlackRock is

reflected on our Consolidated Balance Sheet in the caption equity investments, while our equity share in the earnings of BlackRock is reported on our Consolidated Income Statement in the caption asset management.

We mark to market our obligation to transfer BlackRock shares related to certain BlackRock long-term incentive plan (LTIP) programs. As we transfer the shares for payouts under such LTIP programs, we recognize a gain or loss on those shares. The impact of those transactions is shown on a net basis on our Consolidated Income Statement in other noninterest income. Our obligation to transfer BlackRock shares related to the LTIP programs and the resulting accounting are described in more detail in our 2007 Form 10-K.

LOANS AND LEASES

Except as described below, loans held for investment are stated at the principal amounts outstanding, net of unearned income, unamortized deferred fees and costs on originated loans, and premiums or discounts on loans purchased. Interest on performing loans is accrued based on the principal amount outstanding and recorded in interest income as earned using the effective yield method. Loan origination fees, direct loan origination costs, and loan premiums and discounts are deferred and accreted or amortized into net interest income, over periods not exceeding the contractual life of the loan.

Certain loans are accounted for at fair value in accordance with Statement of Financial Accounting Standards No. (SFAS) 155, Accounting for Certain Hybrid Financial Instruments – an amendment of FASB Statements No. 133 and 140, with changes in the fair value reported in other noninterest income. The fair value of these loans was \$77 million, or less than .5% of the total loan portfolio, at June 30, 2008.

In addition to originating loans, we also acquire loans through portfolio purchases or business acquisitions. For certain acquired loans that experienced a deterioration of credit quality prior to our acquisition, we follow the guidance contained in AICPA Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3). Under SOP 03-3, the excess of the cash flows expected to be collected over the purchase price of the loan at acquisition is accreted into interest income over the remaining life of the loan. Any valuation allowance for these loans reflects only those losses incurred after acquisition. The carrying value of loans accounted for under SOP 03-3 at June 30, 2008 was \$36 million, or less than .5% of the total loan portfolio.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We also provide financing for various types of equipment, aircraft, energy and power systems, and rolling stock through a variety of lease arrangements. Direct financing leases are carried at the aggregate of lease payments plus estimated residual value of the leased property, less unearned income. Leveraged leases, a form of financing lease, are carried net of nonrecourse debt. We recognize income over the term of the lease using the interest method. Lease residual values are

Table of Contents

reviewed for other-than-temporary impairment on a quarterly basis. Gains or losses on the sale of leased assets are included in other noninterest income while valuation adjustments on lease residuals are included in other noninterest expense.

LOAN SALES, SECURITIZATIONS AND RETAINED INTERESTS

We recognize the sale of loans or other financial assets when the transferred assets are legally isolated from our creditors and the appropriate accounting criteria are met. We also may sell mortgage and other loans through secondary market securitizations. In certain cases, we may retain a portion or all of the securities issued, interest-only strips, one or more subordinated tranches, servicing rights and, in some cases, cash reserve accounts, all of which are considered retained interests in the transferred assets.

When loans are redesignated from held for investment to held for sale, specific reserves and allocated pooled reserves included in the allowance for loan and lease losses are charged-off to reduce the basis of the loans to lower of cost or market. Gains or losses recognized on the sale of the loans depend on the allocation of carrying value between the loans sold and the retained interests, based on their fair market values at the date of sale. We generally estimate the fair value of the retained interests based on the present value of future expected cash flows using assumptions as to discount rates, interest rates, prepayment speeds, credit losses and servicing costs, if applicable. Gains or losses on loan sales transactions are reported in other noninterest income.

Our loan sales and securitizations are generally structured without recourse to us and with no restrictions on the retained interests with the exception of loan sales to certain US government chartered entities.

When we are obligated for loss-sharing or recourse in a sale, our policy is to record such liabilities at fair value upon closing of the transaction based on the guidance contained in FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, or as a contingent liability recognized at inception of the guarantee under SFAS 5, *Accounting for Contingencies*.

We originate, sell and service mortgage loans under the Fannie Mae Delegated Underwriting and Servicing (DUS) program. Under the provisions of the DUS program, we participate in a loss-sharing arrangement with Fannie Mae. We participate in a similar program with Freddie Mac. Refer to Note 15 Commitments And Guarantees for more information about our obligations related to sales of loans under these programs.

SFAS 156, *Accounting for Servicing of Financial Assets* an amendment of FASB Statement No. 140, requires all newly recognized servicing rights and obligations to be initially measured at fair value. For subsequent measurement of the asset or obligation, the standard permits the election of either

the amortization method or the fair value method by class of recognized servicing rights and obligations. For servicing rights and obligations related to commercial loans and commercial mortgages, we have elected the amortization method. This method requires the amortization of the servicing assets or liabilities in proportion to and over the periods of estimated net servicing income or net servicing loss.

In securitization transactions, we classify securities retained as debt securities available for sale or other assets, depending on the form of the retained interests. Retained interests that are subject to prepayment risk are reviewed for impairment on a quarterly basis. If the fair value of the retained interests is below its carrying amount and the decline is determined to be other than temporary, then the decline is reflected as a charge in other noninterest income.

LOANS HELD FOR SALE

We designate loans and related unfunded loan commitments as held for sale when we have a positive intent to sell them. We transfer loans to the loans held for sale category at the lower of cost or fair market value. At the time of transfer, write-downs on the loans and the related unfunded loan commitments are recorded as charge-offs or as a reduction in the liability for unfunded commitments. We establish a new cost basis upon transfer except for certain commercial mortgages held for sale discussed below. Any subsequent lower of cost or market adjustment is determined on an individual loan and unfunded loan commitment basis and is recognized as a valuation allowance with any charges included in other noninterest income. Gains or losses on the sale of these loans and/or related unfunded loan commitments are included in other noninterest income when realized.

Effective January 1, 2008, we adopted SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities* Including an amendment of FASB Statement No. 115, and elected to fair value certain commercial mortgage loans held for sale intended for commercial mortgage-backed securities (CMBS) securitization. Under SFAS 159, changes in the fair value of these loans are measured and recorded in other noninterest income each period. See Note 6 Fair Value for additional information.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Interest income with respect to loans held for sale classified as performing is accrued based on the principal amount outstanding.

In certain circumstances, loans designated as held for sale may be transferred to the loan portfolio based on a change in strategy. We transfer these loans to the loan portfolio at the lower of cost or fair market value; however, any loans designated under SFAS 159 will remain at fair value.

NONPERFORMING ASSETS

Nonperforming assets include:

- Nonaccrual loans,
- Troubled debt restructurings, and
- Foreclosed assets.

Table of Contents

Measurement of delinquency and past due status are based on the contractual terms of each loan.

We generally classify commercial loans as nonaccrual when we determine that the collection of interest or principal is doubtful or when a default of interest or principal has existed for 90 days or more and the loans are not well-secured or in the process of collection. When the accrual of interest is discontinued, any accrued but uncollected interest previously included in net interest income is reversed. We charge off small business commercial loans less than \$1 million at 120 days after transfer to nonaccrual status. We charge off other nonaccrual loans based on the facts and circumstances of the individual loans.

Most consumer loans, not secured by residential real estate, are charged off after 120 to 180 days past due and are not placed on nonaccrual status.

Home equity installment loans and lines of credit, as well as residential mortgage loans, that are well secured by residential real estate are classified as nonaccrual at 12 months past due, consistent with regulatory guidance. These loans are considered well secured if the fair market value of the property, less 15% to cover potential foreclosure expenses, is greater than or equal to the recorded investment in the loan including any superior liens. A fair market value assessment of the property is initiated when the loan becomes 80 to 90 days past due.

Home equity installment loans and residential real estate loans that are not well secured, but are in the process of collection, are classified as nonaccrual at 120 days past due. Home equity lines of credit and residential purchase money mortgages that are not well secured, but are in the process of collection, are classified as nonaccrual at 180 days past due. These loans are recorded at the lower of cost or market value, less liquidation costs, and the unsecured portion of these loans is charged off in accordance with regulatory guidelines. The remaining portion of the loan is placed on nonaccrual status.

Additionally, residential mortgage loans serviced by others under master servicing arrangements that are in the process of foreclosure are also classified as nonaccrual.

A loan is categorized as a troubled debt restructuring if a significant concession is granted due to deterioration in the financial condition of the borrower.

Nonperforming loans are generally not returned to performing status until the obligation is brought current and the borrower has performed in accordance with the contractual terms for a reasonable period of time and collection of the contractual principal and interest is no longer doubtful. Nonaccrual commercial and commercial real estate loans and troubled debt restructurings are designated as impaired loans. We recognize interest collected on these loans on the cost recovery method.

Foreclosed assets are comprised of any asset seized or property acquired through a foreclosure proceeding or

acceptance of a deed-in-lieu of foreclosure. Depending on various state statutes, legal proceedings are initiated on or about the 65th day of delinquency. If no other remedies arise from the legal proceedings, the final outcome will result in the sheriff's sale of the property. When we acquire the deed, the transfer of loans to other real estate owned will be completed. These assets are recorded on the date acquired at the lower of the related loan balance or market value of the collateral less estimated disposition costs. We estimate market values primarily based on appraisals, when available, or quoted market prices on liquid assets. Subsequently, foreclosed assets are valued at the lower of the amount recorded at acquisition date or the current market value less estimated disposition costs. Valuation adjustments on these assets and gains or losses realized from disposition of such property are reflected in other noninterest expense.

ALLOWANCE FOR LOAN AND LEASE LOSSES

We maintain the allowance for loan and lease losses at a level that we believe to be adequate to absorb estimated probable credit losses inherent in the loan portfolio as of the balance sheet date. Our determination of the adequacy of the allowance is based on periodic evaluations of the loan and lease portfolios and other relevant factors. This evaluation is inherently subjective as it requires material estimates, all of which may be susceptible to significant change, including, among others:

- Probability of default,
- Loss given default,
- Exposure at date of default,
- Amounts and timing of expected future cash flows on impaired loans,
- Value of collateral,
- Historical loss experience, and

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Amounts for changes in current economic conditions that may not be reflected in historical results.

In determining the adequacy of the allowance for loan and lease losses, we make specific allocations to impaired loans, allocations to pools of watchlist and non-watchlist loans, and allocations to consumer and residential mortgage loans. We also allocate reserves to provide coverage for probable losses based upon current market results which may not be reflected in historical loss data. While allocations are made to specific loans and pools of loans, the total reserve is available for all credit losses. Specific allocations are made to significant individual impaired loans and are determined in accordance with SFAS 114, Accounting by Creditors for Impairment of a Loan, with impairment measured based on the present value of expected cash flows, observable market price or the fair value of collateral. We establish a specific allowance on all other impaired loans based on their loss given default credit risk rating.

Allocations to loan pools are developed by product and industry with estimated losses based on probability of default and loss given default credit risk ratings by using historical loss trends and our judgment concerning those trends and other relevant factors. These factors may include, among others:

Actual versus estimated losses,

Table of Contents

Regional and national economic conditions, and
Industry and portfolio concentrations.

Loss factors are based on industry and/or internal experience and may be adjusted for issues or conditions that, based on our judgment, impact the collectibility of the portfolio as of the balance sheet date. Consumer and residential mortgage loan allocations are made at a total portfolio level based on historical loss experience adjusted for current risk factors.

While our pool reserve methodologies strive to reflect all risk factors, there continues to be a certain element of uncertainty associated with, but not limited to, potential imprecision in the estimation process due to the inherent time lag of obtaining information. We provide additional reserves that are designed to provide coverage for losses attributable to such risks. These reserves also include factors which may not be directly measured in the determination of specific or pooled reserves. Such factors include:

Credit quality trends,
Recent loss experience in particular segments of the portfolio,
Ability and depth of lending management, and
Changes in risk selection and underwriting standards.

ALLOWANCE FOR UNFUNDED LOAN COMMITMENTS AND LETTERS OF CREDIT

We maintain the allowance for unfunded loan commitments and letters of credit at a level we believe is adequate to absorb estimated probable losses related to these unfunded credit facilities. We determine the adequacy of the allowance based on periodic evaluations of the unfunded credit facilities, including an assessment of the probability of commitment usage, credit risk factors for loans outstanding to these same customers, and the terms and expiration dates of the unfunded credit facilities. The allowance for unfunded loan commitments and letters of credit is recorded as a liability on the Consolidated Balance Sheet. Net adjustments to the allowance for unfunded loan commitments and letters of credit are included in the provision for credit losses.

COMMERCIAL MORTGAGE SERVICING RIGHTS

We provide servicing under various commercial mortgage loan servicing contracts. These contracts are either purchased in the open market or retained as part of a commercial mortgage loan securitization or loan sale. Prior to January 1, 2006, purchased contracts were recorded at cost and the servicing rights retained from the sale or securitization of loans were recorded based on their relative fair value to all of the assets securitized or sold. As a result of the adoption of SFAS 156, beginning January 1, 2006 all newly acquired servicing rights are initially measured at fair value. Fair value is based on the present value of the expected future cash flows, including assumptions as to:

Interest rates,
Discount rates,
Estimated prepayment speeds, and
Estimated servicing costs.

For subsequent measurements, we have elected to account for our commercial mortgage loan servicing rights as a class of assets and use the amortization method. This election was made based on the unique characteristics of the commercial mortgage loans underlying these servicing rights with regard to market inputs used in determining fair value and how we manage the risks inherent in the commercial mortgage servicing rights assets. Specific risk characteristics of commercial mortgages include loan type, currency or exchange rate, interest rates and expected cash flows. We record these servicing assets as other intangible assets and amortize them over their estimated lives based on estimated net servicing income or loss. On a quarterly basis, we test the assets for impairment by categorizing the pools of assets underlying the servicing rights into various stratum. If the estimated fair value of the assets is less than the carrying value, an impairment loss is recognized and a valuation reserve is established. Servicing fees are recognized as they are earned and are reported net of amortization expense and any impairments in the line item corporate services on the Consolidated Income Statement.

DEPRECIATION AND AMORTIZATION

For financial reporting purposes, we depreciate premises and equipment, net of salvage value, principally using the straight-line method over their estimated useful lives.

We use estimated useful lives for furniture and equipment ranging from one to 10 years, and depreciate buildings over an estimated useful life of up to 40 years. We amortize leasehold improvements over their estimated useful lives of up to 15 years or the respective lease terms, whichever is shorter. We purchase, as well as internally develop and customize, certain software to enhance or perform internal business functions.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Software development costs incurred in the planning and post-development project stages are charged to noninterest expense. Costs associated with designing software configuration and interfaces, installation, coding programs and testing systems are capitalized and amortized using the straight-line method over periods ranging from one to seven years.

DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We use a variety of financial derivatives as part of our overall asset and liability risk management process to help manage interest rate, market and credit risk inherent in our business activities. Interest rate and total return swaps, interest rate caps and floors and futures contracts are the primary instruments we use for interest rate risk management.

Financial derivatives involve, to varying degrees, interest rate, market and credit risk. We manage these risks as part of our asset and liability management process and through credit policies and procedures. We seek to minimize counterparty credit risk by entering into transactions with only high-quality institutions, establishing credit limits, and generally requiring bilateral netting and collateral agreements.

We recognize all derivative instruments at fair value as either other assets or other liabilities on the Consolidated Balance

Table of Contents

Sheet. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship. For derivatives not designated as an accounting hedge, the gain or loss is recognized in other noninterest income.

For those derivative instruments that are designated and qualify as accounting hedges, we must designate the hedging instrument, based on the exposure being hedged, as a fair value hedge or a cash flow hedge. We have no derivatives that hedge the net investment in a foreign operation.

We formally document the relationship between the hedging instruments and hedged items, as well as the risk management objective and strategy, before undertaking an accounting hedge. To qualify for hedge accounting, the derivatives and related hedged items must be designated as a hedge at inception of the hedge relationship. For accounting hedge relationships, we formally assess, both at the inception of the hedge and on an ongoing basis, if the derivatives are highly effective in offsetting designated changes in the fair value or cash flows of the hedged item. If it is determined that the derivative instrument is not highly effective, hedge accounting is discontinued.

For derivatives that are designated as fair value hedges (i.e., hedging the exposure to changes in the fair value of an asset or a liability attributable to a particular risk), changes in the fair value of the hedging instrument are recognized in earnings and offset by recognizing changes in the fair value of the hedged item attributable to the hedged risk. To the extent the hedge is not highly effective, the changes in fair value will not offset and the difference or ineffectiveness is reflected in the same financial statement category in the income statement as the hedged item.

For derivatives designated as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows), the effective portions of the gain or loss on derivatives are reported as a component of accumulated other comprehensive income (loss) and subsequently reclassified to interest income in the same period or periods during which the hedged transaction affects earnings. The change in fair value of any ineffective portion of the hedging derivative is recognized immediately in other noninterest income.

We discontinue hedge accounting when it is determined that the derivative is no longer qualifying as an effective hedge; the derivative expires or is sold, terminated or exercised; or the derivative is de-designated as a fair value or cash flow hedge or it is no longer probable that the forecasted transaction will occur by the end of the originally specified time period. If we determine that the derivative no longer qualifies as a fair value or cash flow hedge and hedge accounting is discontinued, the derivative will continue to be recorded on the balance sheet at its fair value with changes in fair value included in current earnings. For a discontinued fair value hedge, the previously hedged item is no longer adjusted for changes in fair value.

When hedge accounting is discontinued because it is no longer probable that a forecasted transaction will occur, the derivative will continue to be recorded on the balance sheet at its fair value with changes in fair value included in current earnings, and the gains and losses in accumulated other comprehensive income (loss) will be recognized immediately into earnings. When we discontinue hedge accounting because the hedging instrument is sold, terminated or no longer designated, the amount reported in accumulated other comprehensive income (loss) up to the date of sale, termination or de-designation, continues to be reported in other comprehensive income or loss until the forecasted transaction affects earnings. We did not terminate any cash flow hedges in the first six months of 2008 or 2007 due to a determination that a forecasted transaction was no longer probable of occurring.

We occasionally purchase or originate financial instruments that contain an embedded derivative. At the inception of the transaction, we assess if economic characteristics of the embedded derivative are clearly and closely related to the economic characteristics of the financial instrument (host contract), whether the financial instrument that embodied both the embedded derivative and the host contract are measured at fair value with changes in fair value reported in earnings, and whether a separate instrument with the same terms as the embedded instrument would not meet the definition of a derivative. If the embedded derivative does not meet these three conditions, the embedded derivative would qualify as a derivative and be recorded apart from the host contract and carried at fair value with changes recorded in current earnings.

We enter into commitments to make loans whereby the interest rate on the loan is set prior to funding (interest rate lock commitments). We also enter into commitments to purchase or sell commercial mortgage loans. Both interest rate lock commitments and commitments to buy or sell mortgage loans are accounted for as free-standing derivatives when appropriate. Interest rate lock commitments and purchase commitments that are considered to be derivatives are recorded at fair value in other assets or other liabilities on the Consolidated Balance Sheet. Any gain or loss from the change in fair value after the inception of the commitment is recognized in other noninterest income.

RECENT ACCOUNTING PRONOUNCEMENTS

We adopted the guidance in Staff Accounting Bulletin No. (SAB) 109 on January 1, 2008. SAB 109 provides the SEC staff's view that the expected future cash flows related to servicing should be included in the fair value measurement of all written loan commitments that are

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

accounted for at fair value through earnings. The impact of this guidance on our consolidated financial statements has not been significant.

We adopted SFAS 157, Fair Value Measurements on January 1, 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. See Note 6 Fair Value for additional information.

Table of Contents

As indicated above, we adopted SFAS 159 on January 1, 2008. SFAS 159 permits entities to choose to measure many financial instruments and certain other assets and liabilities at fair value. We elected to fair value certain commercial mortgage loans classified as held for sale and certain other financial instruments. See Note 6 Fair Value for additional information.

As required, we adopted the provisions of Emerging Issues Task Force Issue No. (EITF) 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements, on January 1, 2008. EITF 06-4 requires the recognition of a liability and related compensation costs for endorsement split-dollar life insurance arrangements that provide a benefit to retired employees. The adoption of the guidance resulted in a reduction of retained earnings at January 1, 2008 of approximately \$12 million and is not expected to have a material effect on our future results of operations or financial position.

In March 2008, the FASB issued SFAS 161, Disclosures about Derivative Instruments and Hedging Activities. This standard will require revisions to our derivative disclosures to provide greater transparency as to the use of derivative instruments and hedging activities. This guidance will be effective for interim and annual financial statements beginning with the first quarter 2009 Form 10-Q.

In May 2008, the FASB issued SFAS 162, The Hierarchy of Generally Accepted Accounting Principles. This standard formalizes minor changes in prioritizing accounting principles used in the preparation of financial statements that are presented in conformity with GAAP.

In May 2008, the FASB issued SFAS 163, Accounting for Financial Guarantee Insurance Contracts an Interpretation of FASB Statement No. 60. This standard changes the current practice of accounting for financial guarantee insurance contracts by insurance companies and enhances related disclosure requirements. This guidance will be effective for interim and annual financial statements beginning in 2009. The adoption of this guidance is not expected to have a material effect on our results of operations or financial position.

In February 2008, the FASB issued FSP FAS 140-3, Accounting for Transfers of Financial Assets and Repurchase Financing Transactions. This FSP provides guidance on how the transferor and transferee should separately account for a transfer of a financial asset and a related repurchase financing if certain criteria are met. This guidance will be effective January 1, 2009 for PNC and will impact our accounting for structured repurchase agreements entered into after that date.

In May 2008, the FASB issued FSP APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement). This FSP clarifies that certain convertible debt instruments should be separately accounted for as liability and equity components. This guidance will be effective beginning with our first quarter 2009 Form 10-Q. We do not expect the adoption of this guidance to have a material effect on our results of operations or financial position.

In June 2008, the FASB issued FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities. This FSP clarifies that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are considered participating securities and should be included in the calculation of basic earnings per share using the two-class method prescribed by SFAS 128, Earnings Per Share. This guidance will be effective for disclosure beginning with our first quarter 2009 Form 10-Q with retrospective application required. We do not expect the adoption of this guidance to have a material effect on our basic earnings per share disclosures.

NOTE 2 ACQUISITIONS AND DIVESTITURES

On April 4, 2008, we acquired Lancaster, Pennsylvania-based Sterling Financial Corporation (Sterling). Sterling shareholders received an aggregate of approximately \$224 million in cash and 4.6 million shares of PNC common stock.

On March 31, 2008, we sold J.J.B. Hilliard, W.L. Lyons, LLC (Hilliard Lyons), a Louisville, Kentucky-based wholly-owned subsidiary of PNC and a full-service brokerage and financial services provider, to Houchens Industries, Inc. We recognized an after-tax gain of \$23 million in the first quarter of 2008 in connection with this divestiture.

NOTE 3 VARIABLE INTEREST ENTITIES

As discussed in our 2007 Form 10-K, we are involved with various entities in the normal course of business that may be deemed to be VIEs. We consolidated certain VIEs as of June 30, 2008 and December 31, 2007 for which we were determined to be the primary beneficiary. These consolidated VIEs and relationships with PNC are described in our 2007 Form 10-K.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Consolidated VIEs PNC Is Primary Beneficiary

In millions	Aggregate Assets	Aggregate Liabilities
<u>Partnership interests in low income housing projects</u>		
June 30, 2008	\$ 1,062	\$ 1,062
December 31, 2007	\$ 1,110	\$ 1,110

Table of Contents

We hold significant variable interests in VIEs that have not been consolidated because we are not considered the primary beneficiary. Information on these VIEs follows:

Non-Consolidated VIEs Significant Variable Interests

In millions	Aggregate	Aggregate	PNC Risk
	Assets	Liabilities	of Loss
June 30, 2008			
Market Street	\$ 4,582	\$ 4,628	\$ 7,230(a)
Collateralized debt obligations	47	1	5
Partnership interests in low income housing projects	50	34	8
Total	\$ 4,679	\$ 4,663	\$ 7,243
December 31, 2007			
Market Street	\$ 5,304	\$ 5,330	\$ 9,019(a)
Collateralized debt obligations	255	177	6
Partnership interests in low income housing projects	50	34	8
Total	\$ 5,609	\$ 5,541	\$ 9,033

(a) PNC's risk of loss consists of off-balance sheet liquidity commitments to Market Street of \$7.0 billion and other credit enhancements of \$.2 billion at June 30, 2008. The comparable amounts were \$8.8 billion and \$.2 billion at December 31, 2007.

Market Street

Market Street Funding LLC (Market Street) is a multi-seller asset-backed commercial paper conduit that is owned by an independent third party. Market Street's activities primarily involve purchasing assets or making loans secured by interests in pools of receivables from US corporations that desire access to the commercial paper market. Market Street funds the purchases of assets or loans by issuing commercial paper which has been rated A1/P1 by Standard & Poor's and Moody's, respectively, and is supported by pool-specific credit enhancements, liquidity facilities and program-level credit enhancement. Generally, Market Street mitigates its potential interest rate risk by entering into agreements with its borrowers that reflect interest rates based upon its weighted average commercial paper cost of funds. During 2007 and the first six months of 2008, Market Street met all of its funding needs through the issuance of commercial paper.

PNC Bank, N.A. provides certain administrative services, a portion of the program-level credit enhancement and 99% of liquidity facilities to Market Street in exchange for fees negotiated based on market rates. PNC recognized program administrator fees and commitment fees related to PNC's portion of the liquidity facilities of \$8 million and \$2 million, respectively, for the six months ended June 30, 2008. The comparable amounts were \$6 million and \$2 million for the six months ended June 30, 2007.

Neither creditors nor investors in Market Street have any recourse to our general credit. The commercial paper obligations at June 30, 2008 and December 31, 2007 were effectively collateralized by Market Street's assets. While PNC may be obligated to fund under the \$7.0 billion of

liquidity facilities for events such as commercial paper market disruptions, borrower bankruptcies, collateral deficiencies or covenant violations, our credit risk under the liquidity facilities is secondary to the risk of first loss provided by the borrower or another third party in the form of deal-specific credit enhancement—for example, by the over collateralization of the assets. Deal-specific credit enhancement that supports the commercial paper issued by Market Street is generally structured to cover a multiple of expected losses for the pool of assets and is sized to generally meet rating agency standards for comparably structured transactions. In addition, PNC would be required to fund \$1.2 billion of the liquidity facilities if the underlying assets are in default. See Note 15 Commitments And Guarantees for additional information.

Program-level credit enhancement in the amount of 10% of commitments, excluding explicitly rated AAA/Aaa facilities, is provided by PNC and a monoline insurer. PNC provides 25% of the enhancement in the form of a cash collateral account funded by a loan facility. This facility expires in March 2013. The monoline insurer provides the remaining 75% of the enhancement in the form of a surety bond. The cash collateral account is subordinate to the surety bond.

Market Street has entered into a Subordinated Note Purchase Agreement (Note) with an unrelated third party. The Note provides first loss coverage whereby the investor absorbs losses up to the amount of the Note, which was \$7.0 million as of June 30, 2008. Proceeds from the issuance of the Note are held by Market Street in a first loss reserve account that will be used to reimburse any losses incurred by Market Street, PNC Bank, N.A. or other providers under the liquidity facilities and the credit enhancement arrangements.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We evaluated the design of Market Street, its capital structure, the Note and relationships among the variable interest holders under the provisions of FIN 46R. Based on this analysis, we are not the primary beneficiary as defined by FIN 46R and therefore the assets and liabilities of Market Street are not reflected in our Consolidated Balance Sheet.

PNC considers changes to the variable interest holders (such as new expected loss note investors and changes to program-level credit enhancement providers), changes to the terms of expected loss notes, and new types of risks (such as foreign currency or interest rate) related to Market Street as reconsideration events. PNC reviews the activities of Market Street on at least a quarterly basis to determine if a reconsideration event has occurred.

PERPETUAL TRUST SECURITIES

We issue certain hybrid capital vehicles that qualify as capital for regulatory purposes.

In February 2008, PNC Preferred Funding LLC (the LLC), one of our indirect subsidiaries, sold \$375 million of 8.700% Fixed-to-Floating Rate Non-Cumulative Exchangeable

Table of Contents

Perpetual Trust Securities of PNC Preferred Funding Trust III (Trust III) to third parties in a private placement. In connection with the private placement, Trust III acquired \$375 million of Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Securities of the LLC (the LLC Preferred Securities). The sale was similar to the March 2007 private placement by the LLC of \$500 million of 6.113% Fixed-to-Floating Rate Non-Cumulative Exchangeable Trust Securities (the Trust II Securities) of PNC Preferred Funding Trust II (Trust II) in which Trust II acquired \$500 million of LLC Preferred Securities and to the December 2006 private placement by PNC REIT Corp. of \$500 million of 6.517% Fixed-to-Floating Rate Non-Cumulative Exchangeable Perpetual Trust Securities (the Trust I Securities) of PNC Preferred Funding Trust I (Trust I) in

which Trust I acquired \$500 million of LLC Preferred Securities. PNC REIT Corp. owns 100% of LLC s common voting securities. As a result, LLC is an indirect subsidiary of PNC and is consolidated on our Consolidated Balance Sheet. Trust I, II and III s investment in LLC Preferred Securities is characterized as a minority interest on our Consolidated Balance Sheet since we are not the primary beneficiary of Trust I, Trust II and Trust III. This minority interest totaled approximately \$1.3 billion at June 30, 2008.

Our 2007 Form 10-K includes additional information regarding the Trust I and Trust II Securities, including descriptions of replacement capital and dividend restriction covenants. The Trust III Securities include dividend restriction covenants similar to those described for Trust II Securities.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

At June 30, 2008, securities available for sale included a net unrealized loss of \$2.0 billion, which represented the difference between fair value and amortized cost. The comparable amount at December 31, 2007 was a net unrealized loss of \$265 million.

The fair value of securities available for sale is impacted by interest rates, credit spreads, volatility and illiquidity. Net unrealized gains and losses in the securities available for sale portfolio are included in shareholders' equity as accumulated other comprehensive income or loss, net of tax.

Table of Contents

The following table presents unrealized loss and fair value of securities at June 30, 2008 and December 31, 2007 for which an other-than-temporary impairment has not been recognized. These securities are segregated between investments that have been in a continuous unrealized loss position for less than twelve months and twelve months or more.

Asset-backed	(87)	1,519	(25)	655	(112)	2,174
State and municipal	(4)	79	(1)	82	(5)	161
Other debt	(1)	40		3	(1)	43
Total	\$ (252)	\$ 8,997	\$ (195)	\$ 6,574	\$ (447)	\$ 15,571

Of the \$2.2 billion of gross unrealized losses at June 30, 2008, \$1.3 billion related to securities that had been in a loss position for 12 months or more. At December 31, 2007, the comparable amounts were \$447 million in gross unrealized losses and \$195 million related to securities that had been in a loss position for 12 months or more. During the first half of 2008, unprecedented market volatility and relative illiquidity in certain asset sectors had an adverse impact on the valuation of certain of our securities available for sale. This occurred even as market interest rates (i.e., interest rate swap rates) remained relatively unchanged at June 30, 2008 compared with December 31, 2007. Ongoing mortgage issues and general uncertainty in the broader US housing market have adversely affected market spreads underlying the valuation of certain security classes.

At June 30, 2008, \$9.8 billion (fair value) of our residential mortgage-backed securities portfolio was US government agency-backed securities. The remaining \$10.9 billion (fair value) are private-issuer securities, which accounted for approximately \$1.5 billion of unrealized losses as of June 30, 2008. We considered less than 1% of these securities higher-risk credit quality (i.e., FICO scores equal to or less than 660). Of the private-issuer total, \$10.8 billion (fair value) were rated AAA equivalents by at least two nationally recognized rating agencies, with the remainder of the portfolio rated at least A equivalents.

At June 30, 2008, \$1.3 billion (fair value) of our asset-backed portfolio was private-issuer securities collateralized by fixed- and floating-rate home equity loans. These securities had unrealized losses of approximately \$0.4 billion at June 30, 2008. We considered 23% of these securities higher-risk credit quality. Of the private-issuer total, \$1.2 billion (fair value) were rated AAA equivalents by at least two nationally recognized rating agencies, \$0.1 billion were rated between AA and BBB equivalents, with two positions, totaling \$6 million, rated lower than BBB equivalent.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Through the first half of 2008, we determined that three available for sale security positions were other-than-temporarily impaired, including the two asset-backed securities rated less than BBB equivalents referred to above. During the second quarter of 2008, we recognized other-than-temporary impairment charges totaling \$9 million related to these securities. These charges are reflected in net securities gains (losses) on our Consolidated Income Statement.

The expected weighted-average life of securities available for sale (excluding corporate stocks and other) was 4 years and 3 months at June 30, 2008 and 3 years and 6 months at December 31, 2007.

Table of Contents

Information relating to securities sold follows:

Securities Sold (a)

Six months ended

June 30		Gross	Gross	Net	Income
In millions	Proceeds	Gains	Losses	Gains	Tax
			(a)	(Losses)	Expense
					(Benefit)
2008	\$ 3,506	\$ 49	\$ 9	\$ 40	\$ 14
2007	3,872	10	12	(2)	(1)

(a) Includes losses of \$9 million recorded for the first six months of 2008 that represent other-than-temporary impairment charges.

The fair value of securities pledged to secure public and trust deposits and repurchase agreements and for other purposes was \$21.0 billion at June 30, 2008 and \$24.2 billion at December 31, 2007. The pledged securities include positions held in our portfolio of securities available for sale, trading securities, and securities accepted as collateral from others that we are permitted by contract or custom to sell or repledge.

The fair value of securities accepted as collateral that we are permitted by contract or custom to sell or repledge was \$2.5 billion at June 30, 2008 and \$2.3 billion at December 31, 2007 and is a component of federal funds sold and resale agreements on our Consolidated Balance Sheet. Of the permitted amount, \$1.4 billion was repledged to others at June 30, 2008 and \$1.5 billion was repledged to others at December 31, 2007.

NOTE 5 ASSET QUALITY

The following table sets forth nonperforming assets and related information:

Dollars in millions	June 30, 2008	December 31, 2007
Nonaccrual loans		
Commercial	\$ 253	\$ 193
Commercial real estate	365	212
Consumer	24	17
Residential mortgage	49	27
Lease financing	4	3
Total nonaccrual loans	695	452
Restructured loans		2
Total nonperforming loans	695	454
Foreclosed and other assets		
Residential mortgage (c)	28	16
Lease financing		11
Other	10	14
Total foreclosed and other assets	38	41

Lease financing	1	
Total recoveries	30	23
Net charge-offs		
Commercial	(122)	(43)
Commercial real estate	(32)	
Consumer	(54)	(25)
Lease financing	(2)	
Total net charge-offs	(210)	(68)
Provision for credit losses	337	62
Acquired allowance (a)	20	137
Net change in allowance for unfunded loan commitments and letters of credit	11	12
Allowance at June 30	\$ 988	\$ 703

(a) Sterling in 2008 and Mercantile in 2007.

Net interest income less the provision for credit losses was \$1.494 billion for the first six months of 2008 compared with \$1.299 billion for the first six months of 2007. Comparable amounts for the second quarter of 2008 and the second quarter 2007 were \$791 million and \$684 million, respectively.

Changes in the allowance for unfunded loan commitments and letters of credit were as follows:

In millions	2008	2007
Allowance at January 1	\$ 134	\$ 120
Acquired allowance (a)	1	17
Net change in allowance for unfunded loan commitments and letters of credit	(11)	(12)
Allowance at June 30	\$ 124	\$ 125

(a) Sterling in 2008 and Mercantile in 2007.

NOTE 6 FAIR VALUE

Fair Value Measurement

SFAS 157 defines fair value as the price that would be received to sell an asset or the price paid to transfer a liability on the measurement date. The standard focuses on the exit price in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants.

SFAS 157 establishes a fair value reporting hierarchy to maximize the use of observable inputs when measuring fair value and defines the three levels of inputs as noted below. The financial instruments in Level 3 are typically less liquid.

Table of ContentsLevel 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities may include debt securities, equity securities and listed derivative contracts that are traded in an active exchange market and certain US Government and agency-backed securities that are actively traded in over-the-counter markets.

Level 2

Observable inputs other than Level 1 such as: quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated to observable market data for substantially the full term of the asset or liability. Level 2 assets and liabilities may include debt securities, equity securities and listed derivative contracts with quoted prices that are traded in markets that are not active, and certain debt and equity securities and over-the-counter derivative contracts whose fair

value is determined using a pricing model without significant unobservable inputs. This category generally includes certain US Government and agency mortgage-backed debt securities, private-issuer securities, other asset-backed securities, corporate debt securities, and derivative contracts.

Level 3

Unobservable inputs that are supported by minimal or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities may include financial instruments whose value is determined using pricing models with internally developed assumptions, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain commercial mortgage loans held for sale, private equity investments, certain available for sale securities, certain trading securities and certain financial derivative contracts.

Assets and liabilities measured at fair value on a recurring basis, including instruments for which PNC has elected the fair value option, are summarized below:

Fair Value Measurements - Summary

In millions	June 30, 2008			Total Fair Value
	Level 1	Level 2	Level 3	
Assets				
Securities available for sale	\$ 5,129	\$ 24,749	\$ 1,154	\$ 31,032
Financial derivatives (a)	25	2,283	85	2,393

(c) We elected the fair value option under SFAS 159 for this item.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The after-tax adjustment to beginning retained earnings from the adoption of SFAS 157 and SFAS 159 related to Level 3 fair value measurements was approximately \$1 million each.

Net losses (realized and unrealized) relating to Level 3 assets and liabilities for the first six months of 2008 were \$39 million and net gains (realized and unrealized) for the second quarter of 2008 were \$28 million. These amounts include net unrealized losses of \$150 million and \$29 million, respectively. These amounts were included in other noninterest income in the Consolidated Income Statement.

During the second quarter of 2008, securities transferred into Level 3 from Level 2 exceeded securities transferred out by \$527 million. These primarily related to asset-backed securities, taxable auction rate securities, and residential mortgage-backed securities, and occurred due to reduced volume of recently executed transactions and the lack of corroborating market price quotations for these instruments.

Table of Contents**Nonrecurring Fair Value Changes**

We may be required to measure certain other financial assets at fair value on a nonrecurring basis. These adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment. The fair value determination of the equity investment resulting in an impairment loss included below was based on observable market data for other comparable entities as adjusted for internal assumptions and unobservable inputs. The amounts below for nonaccrual loans and loans held for sale represent the carrying value of loans for which adjustments are primarily based on the appraised value of collateral or the present value of expected future cash flows, which often results in significant management assumptions and input with respect to the determination of fair value.

Fair Value Measurements Nonrecurring

In millions	June 30, 2008				Total losses for three months ended June 30, 2008	Total losses for six months ended June 30, 2008
	Level 1	Level 2	Level 3	Total Fair Value		
Assets						
Nonaccrual loans			\$ 98	\$ 98		\$ (26)
Loans held for sale		\$ 2	114	116		(8)
Equity investment			74	74	\$ (26)	(26)
Total assets		\$ 2	\$ 286	\$ 288	\$ (26)	\$ (60)

Fair Value Option**Commercial Mortgage Loans Held For Sale**

Effective January 1, 2008, we elected to account for certain commercial mortgage loans classified as held for sale and intended for securitization at fair value under the provisions of SFAS 159. The election of the fair value option aligns the accounting for the commercial mortgages with the related hedges. It also eliminates the requirements of hedge accounting under SFAS 133.

PNC has not elected the fair value option for the remainder of our loans held for sale portfolio as the amounts are not significant and hedge accounting is not used for these loans.

We determine the fair value of commercial mortgage loans held for sale by using a synthetic securitization methodology. Observable inputs include the pricing of CMBS with similar collateral and using tranche interest rates from end of period yield curves. Management assumptions include subordination levels, CMBS bond spreads, and the value of the mortgage servicing rights. Adjustments are made to the valuations to account for securitization uncertainties, including the composition of the portfolio, market conditions, and liquidity.

At June 30, 2008, commercial mortgage loans held for sale for which the fair value option had been elected had an aggregate fair value of \$1.6 billion and an aggregate outstanding principal balance of \$1.7 billion.

Interest income on these loans is recorded as earned and reported in the Consolidated Income Statement in the caption Interest Income - Other. Net losses resulting from changes in fair value of these loans of \$180 million were recorded in other noninterest income for the first six months of 2008, including \$50 million during the second quarter of 2008. Changes in fair value due to instrument-specific credit risk for the first six months and second quarter of 2008 were not material. The changes in fair value of these loans were partially offset by changes in the fair value of the related financial derivatives that economically hedged these loans.

Customer Resale Agreements and Bank Notes

Also effective January 1, 2008, we elected to account for structured resale agreements and structured bank notes at fair value, which are economically hedged using free-standing financial derivatives.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The fair value for structured resale agreements and structured bank notes is determined using a model which includes observable market data as inputs. At June 30, 2008, structured resale agreements with an aggregate fair value of \$1.0 billion were included in federal funds sold and resale agreements on our Consolidated Balance Sheet. At June 30, 2008, structured bank notes with an aggregate fair value of \$11 million were included in borrowed funds.

Table of Contents

The following table summarizes the financial instruments for which we elected the fair value option effective January 1, 2008 and the related cumulative-effect adjustment to retained earnings.

Fair Value Option Adoption

In millions	Retained Earnings		
	December 31, 2007	Net Gain (Loss)	January 1, 2008
Assets			
Customer resale agreements (a)	\$ 738	\$ 23	\$ 761
Commercial mortgage loans held for sale	2,018	2	2,020
Liabilities			
Bank notes	11		11
Cumulative effect adjustment, before taxes		25	
Tax impact		(9)	
Cumulative-effect adjustment, after taxes		\$ 16	

(a) Includes structured resale agreements that are economically hedged with derivatives.

The following table summarizes the changes in fair value included in other noninterest income in the Consolidated Income Statement for items for which we elected the fair value option.

Fair Value Option Changes in Fair Value

In millions	Total gains (losses)	
	Three months ended June 30, 2008	Six months ended June 30, 2008
Assets		
Customer resale agreements (a)	\$ (32)	\$ (3)
Commercial mortgage loans held for sale (a)	(50)	(180)

(a) The impact on earnings of offsetting hedges is not reflected in these amounts.

The following table provides fair values and aggregate unpaid principal balances of items for which we elected the fair value option.

Fair Value Option Fair Value and Principal Balances

In millions	Fair Value	Aggregate Unpaid Principal Balance	Difference
	June 30, 2008	June 30, 2008	
Assets			
Customer resale agreements	\$ 1,001	\$ 980	\$ 21
Commercial mortgage loans held for sale (a)	1,604	1,745	(141)
Liabilities			
Bank notes	11	11	

(a) Includes loans held for sale which are 90 days or more past due.

\$6

NOTE 7 GOODWILL AND OTHER INTANGIBLE ASSETS

Assets and liabilities of acquired entities are recorded at estimated fair value as of the acquisition date and are subject to refinement as information relative to the fair values at that date becomes available. We are awaiting certain information relating to pre-acquisition contingencies. Revisions would likely result in subsequent adjustments to goodwill.

The gross carrying amount, accumulated amortization and net carrying amount of other intangible assets by major category consisted of the following:

Other Intangible Assets

	June 30, 2008	December 31, 2007
In millions		
Customer-related and other intangibles		
Gross carrying amount	\$ 724	\$ 708
Accumulated amortization	(312)	(263)
Net carrying amount	\$ 412	\$ 445
Mortgage and other loan servicing rights		
Gross carrying amount	\$ 1,043	\$ 1,001
Accumulated amortization	(351)	(300)
Net carrying amount	\$ 692	\$ 701
Total	\$ 1,104	\$ 1,146

While certain of our other intangible assets have finite lives and are amortized primarily on a straight-line basis, commercial mortgage and other loan servicing rights and certain core deposit intangibles are amortized on an accelerated basis.

For customer-related intangibles, the estimated remaining useful lives range from less than one year to 14 years, with a weighted-average remaining useful life of approximately 8 years. Our mortgage and other loan servicing rights are amortized primarily over a period of five to 10 years in proportion to the estimated net servicing cash flows from the related loans.

A summary of the changes in goodwill by business segment for the six months ended June 30, 2008 follows:

Goodwill

	December 31, 2007	Additions/ Adjustments	June 30, 2008
In millions			
Retail Banking	\$ 5,628	\$ 353	\$ 5,981
Corporate & Institutional			
Banking	1,491	75	1,566
Global Investment Servicing	1,229	(1)	1,228
BlackRock	57	(8)	49
Total	\$ 8,405	\$ 419	\$ 8,824

Table of Contents

The changes in the carrying amount of goodwill and net other intangible assets for the six months ended June 30, 2008 are as follows:

Changes in Goodwill and Other Intangibles

In millions	Goodwill	Customer- Related	Servicing Rights
Balance at December 31, 2007	\$ 8,405	\$ 445	\$ 701
Additions/adjustments:			
Sterling acquisition	589	16	4
Hilliard Lyons divestiture	(141)		
Yardville acquisition	(11)		
Mercantile acquisition	(11)		
Other acquisitions	1		(3)
Mortgage and other loan servicing rights			41
BlackRock	(8)		
Amortization		(49)	(51)
Balance at June 30, 2008	\$ 8,824	\$ 412	\$ 692

Our investment in BlackRock changes when BlackRock repurchases its shares in the open market or issues shares for an acquisition or pursuant to its employee compensation plans. We record goodwill when BlackRock repurchases its shares at an amount greater than book value per share and this results in an increase in our percentage ownership interest.

Servicing revenue from both commercial and residential mortgage servicing assets and liabilities generated contractually specified servicing fees, net interest income from servicing portfolio deposit balances, and ancillary fees totaling \$95 million for the six months ended June 30, 2008 and \$88 million for the six months ended June 30, 2007. Comparable amounts for the three months ended June 30, 2008 and June 30, 2007 totaled \$52 million and \$45 million, respectively. We also generate servicing revenue from fee-based activities provided to others.

Amortization expense on intangible assets for the first half of 2008 was \$100 million. Amortization expense on existing intangible assets for the remainder of 2008 and for 2009 through 2013 is estimated to be as follows:

Remainder of 2008: \$100 million,
2009: \$164 million,
2010: \$146 million,
2011: \$135 million,
2012: \$115 million, and
2013: \$94 million.

NOTE 8 CAPITAL SECURITIES OF SUBSIDIARY TRUSTS

In February 2008, PNC Capital Trust E was formed and issued \$450 million of 7.75% capital securities due March 15, 2068 that are redeemable on or after March 15, 2013 at par.

In April 2008, the following Sterling Trusts were added as part of the Sterling acquisition.

Sterling Financial Statutory Trust II, formed in June 2003, issued \$36 million of capital securities due June 26, 2033 at a fixed rate of 5.55%. The fixed rate remained in effect until June 26, 2008 at which time the securities began paying a floating rate of LIBOR plus 310 basis points. The rate in effect at June 30, 2008 was 5.88%. Sterling Financial Statutory Trust II securities are redeemable on or after June 26, 2008 at par.

Sterling Financial Statutory Trust III, formed in December 2004, issued \$15 million of capital securities due December 15, 2034 at a fixed rate of 6%. The fixed rate remains in effect until December 15, 2009 at which time the securities pay a floating rate of LIBOR plus 189 basis points. Sterling Financial Statutory Trust III securities are redeemable on or after December 15, 2009 at par.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Sterling Financial Statutory Trust IV, formed in February 2005, issued \$15 million of capital securities due March 15, 2035 at a fixed rate of 6.19%. The fixed rate remains in effect until March 15, 2010 at which time the securities pay a floating rate of LIBOR plus 187 basis points. Sterling Financial Statutory Trust IV securities are redeemable on or after March 15, 2010 at par.

Sterling Financial Statutory Trust V, formed in March 2007, issued \$21 million of capital securities due March 15, 2037 at a fixed rate of 7%. The fixed rate remained in effect until June 15, 2007 at which time the securities began paying a floating rate of LIBOR plus 165 basis points. The rate in effect at June 30, 2008 was 4.43%. Sterling Financial Statutory Trust V securities are redeemable on March 15, 2012 at par.

At June 30, 2008, our other capital securities of subsidiary trusts are as described in Note 12 Capital Securities of Subsidiary Trusts in our 2007 Form 10-K. All of these trusts, including PNC Capital Trust E and the Sterling Trusts described above, are wholly owned finance subsidiaries of PNC. The financial statements of the Trusts are not included in PNC's consolidated financial statements in accordance with GAAP.

The obligations of PNC, as the direct parent of each Trust, when taken collectively, are the equivalent of a full and unconditional guarantee of the obligations of such Trust under the terms of the Capital Securities. Such guarantee is subordinate in right of payment in the same manner as other junior subordinated debt. There are certain restrictions on PNC's overall ability to obtain funds from its subsidiaries. For additional disclosure on these funding restrictions, including an explanation of dividend and intercompany loan limitations, see Note 22 Regulatory Matters in our 2007 Form 10-K.

Table of Contents

PNC is subject to restrictions on dividends and other provisions similar to or in some ways more restrictive than those potentially imposed under the Exchange Agreements with Trust II and Trust III, as described in Note 3 Variable Interest Entities.

NOTE 9 CERTAIN EMPLOYEE BENEFIT AND STOCK-BASED COMPENSATION PLANS**Pension and PostRetirement Plans**

As more fully described in our 2007 Form 10-K, we have a noncontributory, qualified defined benefit pension plan covering eligible employees. Benefits are derived from a cash balance formula based on compensation levels, age and length of service. Pension contributions are based on an actuarially determined amount necessary to fund total benefits payable to plan participants.

We also maintain nonqualified supplemental retirement plans for certain employees. We provide certain health care and life insurance benefits for qualifying retired employees (post-retirement benefits) through various plans. The nonqualified retirement and postretirement benefit plans are unfunded.

The components of our net periodic pension and post-retirement benefit cost for the second quarter and first half of 2008 and 2007 were as follows:

Three months ended	Qualified Pension Plan		Nonqualified Retirement Plans		Postretirement Benefits	
	2008	2007	2008	2007	2008	2007
In millions						
Net periodic cost consists of:						
Service cost	\$10	\$10			\$1	\$1
Interest cost	21	20	\$2	\$2	3	4
Expected return on plan assets	(40)	(39)				
Amortization of prior service cost	(1)				(2)	(2)
Amortization of actuarial losses		1		1		
Net periodic cost (benefit)	\$(10)	\$(8)	\$2	\$3	\$2	\$3

Six months ended	Qualified Pension Plan		Nonqualified Retirement Plans		Postretirement Benefits	
	2008	2007	2008	2007	2008	2007
In millions						
Net periodic cost consists of:						
Service cost	\$22	\$20	\$ 1	\$ 1	\$2	\$1
Interest cost	43	39	3	3	7	7
Expected return on plan assets	(80)	(76)				
Amortization of prior service cost	(1)				(4)	(3)
Amortization of actuarial losses		1	1	1		
Net periodic cost (benefit)	\$(16)	\$(16)	\$5	\$5	\$5	\$5

Stock-Based Compensation Plans

We have long-term incentive award plans (Incentive Plans) that provide for the granting of incentive stock options, nonqualified stock options, stock appreciation rights, incentive shares/performance units, restricted stock, restricted share units, other share-based awards and

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

dollar-denominated awards to executives and, other than incentive stock options, to non-employee directors. Certain Incentive Plan awards may be paid in stock, cash or a combination of stock and cash. We grant a substantial portion of our stock-based compensation awards during the first quarter of the year. As of June 30, 2008, no stock appreciation rights were outstanding. The Incentive Plans are more fully described in Note 18 Stock-Based Compensation Plans of our 2007 Form 10-K.

Nonqualified Stock Options

Options are granted at exercise prices not less than the market value of common stock on the grant date. Generally, options granted since 1999 become exercisable in installments after the grant date. Options granted prior to 1999 are mainly exercisable 12 months after the grant date. No option may be exercisable after 10 years from its grant date. Payment of the option exercise price may be in cash or shares of common stock at market value on the exercise date. The exercise price may be paid in previously owned shares.

Generally, options granted under the Incentive Plans vest ratably over a three-year period as long as the grantee remains an employee or, in certain cases, retires from PNC. For all options granted prior to the adoption of SFAS 123R Share-Based Payment (SFAS 123R), we recognized compensation expense over the three-year vesting period. If an employee retired prior to the end of the three-year vesting period, we accelerated the expensing of all unrecognized compensation costs at the retirement date. As required under SFAS 123R, we recognize compensation expense for options granted to retirement-eligible employees after January 1, 2006 during the first twelve months subsequent to the grant, in accordance with the service period provisions of the options. Total compensation expense recognized related to stock options during the first six months of 2008 and 2007 was \$10 million and \$12 million, respectively.

Options Issued for Sterling Acquisition

On April 4, 2008, in connection with the closing of the Sterling acquisition, we issued 325,489 of PNC stock options upon conversion of all outstanding and unexercised Sterling options at that date. Of the total options issued, 159,676 were issued as nonqualified stock options, and the remaining 165,813 were issued as incentive stock options. These PNC options carry generally the same terms and conditions as the original Sterling options. Per the merger agreement, all outstanding options were deemed fully vested at the acquisition date. Accordingly, no ongoing stock option expense will be recognized for these options. The final purchase price consideration for the Sterling acquisition included approximately \$3.3 million of value related to these options.

Table of Contents**Option Pricing Assumptions**

For purposes of computing stock option expense, we estimated the fair value of stock options using the Black-Scholes option-pricing model. The model requires the use of numerous assumptions, many of which are very subjective.

We used the following assumptions in the option-pricing model to determine 2008 and 2007 stock option expense:

The risk-free interest rate is based on the US Treasury yield curve,
 The dividend yield represents average yields over the previous three-year period,
 Volatility is measured using the fluctuation in month-end closing stock prices over a period which corresponds with the average expected option life, but in no case less than a five-year period, and
 The expected life assumption represents the period of time that options granted are expected to be outstanding and is based on a weighted average of historical option activity.

Weighted average for the six months ended

June 30	2008	2007
Risk-free interest rate	2.8%	4.8%
Dividend yield	3.3%	3.4%
Volatility	18.1%	19.2%
Expected life	5.4 yrs.	4.4 yrs.

The following table summarizes stock option information as of and for the six months ended June 30, 2008:

	Shares	Weighted-Average Exercise Price
	(thousands)	
Outstanding at December 31, 2007	14,326	\$ 62.15
Granted	2,011	57.82
Issued for Sterling acquisition	325	63.94
Exercised	(582)	51.65
Cancelled	(177)	52.43
Outstanding at June 30, 2008	15,903	\$ 62.13
Exercisable at June 30, 2008	12,079	\$ 61.53

The weighted-average grant-date fair value of options granted during the first six months of 2008 and 2007 was \$7.51 and \$11.76 per option, respectively. To determine stock-based compensation expense under SFAS 123R, the grant-date fair value is applied to the options granted with a reduction made for estimated forfeitures.

During the first six months of 2008 we issued approximately 533,000 shares from treasury stock in connection with stock option exercise activity. As with past exercise activity, we currently intend to utilize treasury stock for future stock option exercises.

Incentive/Performance Unit Share Awards and Restricted Stock/Unit Awards

The fair value of nonvested incentive/performance unit share awards and restricted stock/unit awards is initially determined

based on prices not less than the market value of our common stock price on the date of grant. Incentive/performance unit share awards are subsequently valued subject to the achievement of one or more financial and other performance goals over a three-year period. The Personnel and Compensation Committee of the Board of Directors approves the final award payout with respect to incentive/performance unit share awards. Restricted stock/unit awards have various vesting periods ranging from 12 months to 60 months. There are no financial or performance goals associated with any of our restricted stock/unit awards.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We recognize compensation expense for incentive/performance unit share awards and restricted stock/unit awards ratably over the corresponding vesting and/or performance periods for each type of program. Total compensation expense recognized related to incentive/performance unit share awards and restricted stock/unit awards during the first six months of 2008 was approximately \$24 million compared with \$21 million during the first six months of 2007.

The following table summarizes nonvested incentive/performance unit share awards and restricted stock/unit awards as of and for the six months ended June 30, 2008:

	Nonvested Incentive/ Performance Unit Shares	Weighted- Average Grant Date Fair Value	Nonvested Restricted Stock/ Units	Weighted- Average Grant Date Fair Value
Shares in thousands				
Dec. 31, 2007	316	\$ 66.31	1,869	\$ 60.20
Granted	166	52.80	499	55.18
Vested			(612)	50.87
Forfeited			(8)	60.49
June 30, 2008	482	\$ 61.66	1,748	\$ 62.04

The weighted-average grant-date fair value of incentive/performance unit share awards and restricted stock/unit awards is measured by reducing the grant date price by the present value of dividends expected to be paid on the underlying shares and for estimated forfeitures on restricted stock/unit awards.

At June 30, 2008, there was \$53 million of unrecognized deferred compensation expense related to nonvested share-based compensation arrangements granted under the Incentive Plans. This cost is expected to be recognized as expense over a period of no longer than 5 years.

NOTE 10 FINANCIAL DERIVATIVES

We use a variety of derivative financial instruments to help manage interest rate, market and credit risk and reduce the effects that changes in interest rates may have on net income, fair value of assets and liabilities, and cash flows. These instruments include interest rate swaps, interest rate caps and floors, futures contracts, and total return swaps.

Table of Contents

Fair Value Hedging Strategies

We enter into interest rate swaps, caps, floors and futures derivative contracts to hedge bank notes, Federal Home Loan Bank borrowings, senior debt and subordinated debt for changes in fair value primarily due to changes in interest rates. Adjustments related to the ineffective portion of fair value hedging instruments are recorded in interest income, interest expense or noninterest income depending on the hedged item.

Cash Flow Hedging Strategies

We enter into interest rate swap contracts to modify the interest rate characteristics of designated commercial loans from variable to fixed in order to reduce the impact of changes in future cash flows due to interest rate changes. We hedged our exposure to the variability of future cash flows for all forecasted transactions for a maximum of 10 years for hedges converting floating-rate commercial loans to fixed. The fair value of these derivatives is reported in other assets or other liabilities and offset in accumulated other comprehensive income (loss) for the effective portion of the derivatives. We subsequently reclassify any unrealized gains or losses related to these swap contracts from accumulated other comprehensive income (loss) into interest income in the same period or periods during which the hedged forecasted transaction affects earnings. Ineffectiveness of the strategies, if any, is recognized immediately in earnings.

During the next twelve months, we expect to reclassify to earnings \$156 million of pretax net gains, or \$101 million after-tax, on cash flow hedge derivatives currently reported in accumulated other comprehensive income (loss). This amount could differ from amounts actually recognized due to changes in interest rates and the addition of other hedges subsequent to June 30, 2008. These net gains are anticipated to result from net cash flows on receive fixed interest rate swaps that would impact interest income recognized on the related floating rate commercial loans.

As of June 30, 2008 we have determined that there were no hedging positions where it was probable that certain forecasted transactions may not occur within the originally designated time period.

Any ineffectiveness present in the hedge relationship is recognized in current earnings. The ineffective portion of the change in value of these derivatives resulted in a net gain of \$2 million for the first six months of 2008 and a net loss of \$1 million for the first six months of 2007.

Free-Standing Derivatives

To accommodate customer needs, we also enter into financial derivative transactions primarily consisting of interest rate swaps, interest rate caps and floors, futures, swaptions, and foreign exchange and equity contracts. We primarily manage our market risk exposure from customer positions through transactions with third-party dealers. The credit risk associated with derivatives executed with customers is essentially the same as that involved in extending loans and is subject to

normal credit policies. We may obtain collateral based on our assessment of the customer. For derivatives not designated as an accounting hedge, the gain or loss is recognized in noninterest income.

Also included in free-standing derivatives are transactions that we enter into for risk management and proprietary purposes that are not designated as accounting hedges, primarily interest rate, basis and total rate of return swaps, interest rate caps, floors and futures contracts, credit default swaps, option and foreign exchange contracts and certain interest rate-locked loan origination commitments as well as commitments to buy or sell mortgage loans.

Basis swaps are agreements involving the exchange of payments, based on notional amounts, of two floating rate financial instruments denominated in the same currency, one pegged to one reference rate and the other tied to a second reference rate (e.g., swapping payments tied to one-month LIBOR for payments tied to three-month LIBOR). We use these contracts to mitigate the impact on earnings of exposure to a certain referenced interest rate.

We purchase credit default swaps (CDS) to mitigate the risk of economic loss on a portion of our loan exposure. We also sell loss protection to mitigate the net premium cost and the impact of mark-to-market accounting on the CDS in cases where we buy protection to hedge the loan portfolio and to take proprietary trading positions. The fair values of these derivatives typically are based on the change in value, due to changing credit spreads.

Interest rate lock commitments for, as well as commitments to buy or sell, mortgage loans that we intend to sell are considered free-standing derivatives. Our interest rate exposure on certain commercial mortgage interest rate lock commitments as well as commercial mortgage loans held for sale is economically hedged with total rate of return swaps, pay-fixed interest rate swaps and forward sales agreements. These contracts

mitigate the impact on earnings of exposure to a certain referenced rate. The fair value of loan commitments has been recorded pursuant to guidance in SAB 109.

Free-standing derivatives also include positions we take based on market expectations or to benefit from price differentials between financial instruments and the market based on stated risk management objectives.

Derivative Counterparty Credit Risk

By purchasing and writing derivative contracts we are exposed to credit risk if the counterparties fail to perform. We minimize credit risk through credit approvals, limits, monitoring procedures and collateral requirements. We generally enter into transactions with counterparties that carry high quality credit ratings. Nonperformance risk including credit risk is included in the determination of the estimated net fair value.

Table of Contents

We enter into risk participation agreements to share some of the credit exposure with other counterparties related to interest rate derivative contracts or to take on credit exposure to generate revenue. We will make/receive payments under these guarantees if a customer defaults on its obligation to perform under certain credit agreements. Risk participation agreements entered into prior to July 1, 2003 were considered financial guarantees and therefore are not included in derivatives. Agreements entered into subsequent to June 30, 2003 are included in the derivatives table that follows. We determine that we meet our objective of reducing credit risk associated with certain counterparties to derivative contracts when the participation agreements share in the proportional credit losses of those counterparties.

We generally have established agreements with our major derivative dealer counterparties that provide for exchanges of marketable securities or cash to collateralize either party's positions. At June 30, 2008, we held short-term investments, US government securities and mortgage-backed securities with a fair value of \$381 million. We pledged short-term investments with a fair value of \$230 million under these agreements.

Table of Contents

The total notional or contractual amounts, estimated net fair values and credit risk for derivatives at June 30, 2008 and December 31, 2007 follow:

In millions	June 30, 2008			December 31, 2007		
	Notional/ Contract amount	Estimated net fair value	Credit risk	Notional/ Contract amount	Estimated net fair value	Credit risk
ACCOUNTING HEDGES						
Fair value hedges	\$9,275	\$279	\$307	\$10,568	\$190	\$283
Cash flow hedges	10,813	314	325	7,856	325	325
Total	\$20,088	\$593	\$632	\$18,424	\$515	\$608
FREE-STANDING DERIVATIVES						
Interest rate contracts	\$136,148	\$(102)	\$1,042	\$170,889	\$4	\$1,224
Equity contracts	1,258	(34)	99	1,824	(69)	144

Common (\$1.29 per share)				(444)			(444)
Common stock activity-acquisition	4	23	289				312
Treasury stock activity	1		(36)			99	63
Preferred stock issuance (b)			492				492
Tax benefit of stock option plans			3				3
Stock options granted			10				10
Effect of BlackRock equity transactions			14				14
Restricted stock/unit and incentive/performance unit share transactions			(3)				(3)
Balance at June 30, 2008	346	\$ 1,787	\$ 3,387	\$ 11,940	\$ (1,227)	\$ (779)	\$ 15,108

Comprehensive income for the six months ended June 30, 2007 totaled \$678 million.

A summary of the components of the change in accumulated other comprehensive income (loss) follows:

Six months ended June 30, 2008

In millions	Pretax	Tax (Expense) Benefit	After-tax
Change in net unrealized securities losses:			
Increase in net unrealized losses on securities held at period end	\$ (1,738)	\$ 640	\$ (1,098)
Less: Net gains realized in net income (c)	33	(12)	21
Change in net unrealized securities losses	(1,771)	652	(1,119)
Change in net unrealized gains on cash flow hedge derivatives:			

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Decrease in net unrealized gains on cash flow hedge derivatives	(13)	5	(8)
Less: Net gains realized in net income	7	(2)	5
Change in net unrealized gains on cash flow hedge derivatives	(20)	7	(13)
Change in pension, other postretirement and postemployment benefit plan adjustments	87	(32)	55
Change in other (a)	(8)	5	(3)
Change in other comprehensive income (loss)	\$ (1,712)	\$ 632	\$ (1,080)

The accumulated balances related to each component of other comprehensive income (loss) are as follows:

In millions	June 30, 2008		December 31, 2007	
	Pretax	After-tax	Pretax	After-tax
Net unrealized securities losses	\$ (2,036)	\$ (1,286)	\$ (265)	\$ (167)
Net unrealized gains on cash flow hedge derivatives	257	162	277	175
Pension, other postretirement and postemployment benefit plan adjustments	(194)	(122)	(281)	(177)
Other, net (a)	43	19	51	22
Accumulated other comprehensive loss	\$ (1,930)	\$ (1,227)	\$ (218)	\$ (147)

(a) Consists of foreign currency translation adjustments and deferred tax adjustments on BlackRock's other comprehensive income.

(b) During May 2008, PNC issued 50,000 shares of Series K preferred stock, par value \$1 per share and liquidation value \$10,000 per share.

(c) The pretax amount represents net unrealized losses at December 31, 2007 that were realized in 2008 when the related securities were sold. This amount differs from net securities losses included in the Consolidated Income Statement primarily because it does not include gains or losses realized on securities that were purchased and then sold during 2008.

Table of Contents**NOTE 13 SUMMARIZED FINANCIAL INFORMATION OF BLACKROCK**

As required by SEC Regulation S-X, summarized consolidated financial information of BlackRock follows (in millions):

	June 30	December 31
	2008	2007
Total assets	\$ 22,017	\$ 22,562
Total liabilities	\$ 9,343	\$ 10,387
Non-controlling interests	544	578

NOTE 14 LEGAL PROCEEDINGS

The disclosure below updates the description of legal proceedings in Note 23 Legal Proceedings in Part II, Item 8 of our 2007 Form 10-K and in Note 14 Legal Proceedings in Part I, Item 1 of our first quarter 2008 Quarterly Report on Form 10-Q.

Adelphia

In June 2008, in the lawsuit currently being prosecuted by the Adelphia Recovery Trust, the United States District Court for the Southern District of New York granted in part defendants' motion to dismiss. The court dismissed the principal bankruptcy law claims that had not previously been dismissed by the Bankruptcy Court, including claims alleging voidable preference payments, fraudulent transfers, and equitable disallowance. The effect of the June ruling is to dismiss from this lawsuit all claims against most of the defendants but leave pending against PNC and other original members of Adelphia loan syndicates and then-affiliated investment banks the other claims described in our 2007 Form 10-K. Counsel for a number of defendants have moved to enter final judgment on the dismissed claims to permit immediate appellate review of the issues resolved in June 2008 by the District Court and in June 2007 by the Bankruptcy Court. That motion is pending.

CBNV Mortgage Litigation

We have appealed to the North Carolina Court of Appeals the order of the General Court of Justice, Superior Court Division, for Wake County, North Carolina, granting plaintiffs' motion for summary judgment on their individual claims.

Sterling Financial Corporation Matters

Other Civil Litigation Relating to EFI. In July 2008, we reached an agreement to settle the lawsuits brought by two of the banks that had purchased equipment loans from Equipment Finance LLC, which we refer to as EFI. The amounts involved in these settlements are not significant to PNC.

NOTE 15 COMMITMENTS AND GUARANTEES

EQUITY FUNDING AND OTHER COMMITMENTS

Our unfunded commitments at June 30, 2008 included private equity investments of \$254 million and other investments of \$74 million.

STANDBY LETTERS OF CREDIT

We issue standby letters of credit and have risk participations in standby letters of credit and bankers' acceptances issued by other financial institutions, in each case to support obligations of our customers to third parties, such as remarketing programs for customers' variable rate demand notes. Net outstanding standby letters of credit totaled \$5.7 billion at June 30, 2008. If the customer fails to meet its financial or performance obligation to the third party under the terms of the contract or there is a need to support a remarketing program, then upon the request of the guaranteed party, we would be obligated to make payment to them. The standby letters of credit and risk participations in standby letters of credit and bankers' acceptances outstanding on June 30, 2008 had terms ranging from less than one year to 21 years. The aggregate maximum amount of future payments PNC could be required to make under outstanding standby letters of credit and risk participations in standby letters of credit and bankers' acceptances was \$8.0 billion at June 30, 2008, of which \$2.5 billion support remarketing programs.

Assets valued as of June 30, 2008 of approximately \$1.1 billion secured certain specifically identified standby letters of credit. Approximately \$2.3 billion in recourse provisions from third parties was also available for this purpose as of June 30, 2008. In addition, a portion of the remaining standby letters of credit and letter of credit risk participations issued on behalf of specific customers is also secured by collateral or guarantees that secure the customers' other obligations to us. The carrying amount of the liability for our obligations related to standby letters of credit and risk participations in standby letters of credit and bankers' acceptances was \$80 million at June 30, 2008.

STANDBY BOND PURCHASE AGREEMENTS AND OTHER LIQUIDITY FACILITIES

We enter into standby bond purchase agreements to support municipal bond obligations. At June 30, 2008, the aggregate of our commitments under these facilities was \$313 million. We also enter into certain other liquidity facilities to support

Table of Contents

individual pools of receivables acquired by commercial paper conduits including Market Street. At June 30, 2008, our total commitments under these facilities were \$7.2 billion, of which \$7.0 billion was related to Market Street.

INDEMNIFICATIONS

We are a party to numerous acquisition or divestiture agreements under which we have purchased or sold, or agreed to purchase or sell, various types of assets. These agreements can cover the purchase or sale of:

- Entire businesses,
- Loan portfolios,
- Branch banks,
- Partial interests in companies, or
- Other types of assets.

These agreements generally include indemnification provisions under which we indemnify the third parties to these agreements against a variety of risks to the indemnified parties as a result of the transaction in question. When PNC is the seller, the indemnification provisions will generally also provide the buyer with protection relating to the quality of the assets we are selling and the extent of any liabilities being assumed by the buyer. Due to the nature of these indemnification provisions, we cannot quantify the total potential exposure to us resulting from them.

We provide indemnification in connection with securities offering transactions in which we are involved. When we are the issuer of the securities, we provide indemnification to the underwriters or placement agents analogous to the indemnification provided to the purchasers of businesses from us, as described above. When we are an underwriter or placement agent, we provide a limited indemnification to the issuer related to our actions in connection with the offering and, if there are other underwriters, indemnification to the other underwriters intended to result in an appropriate sharing of the risk of participating in the offering. Due to the nature of these indemnification provisions, we cannot quantify the total potential exposure to us resulting from them.

As further described in our 2007 Form 10-K, we enter into certain types of agreements that include provisions for indemnifying third parties. We also enter into certain types of agreements, including leases, assignments of leases, and subleases, in which we agree to indemnify third parties for acts by our agents, assignees and/or sublessees, and employees. In addition, we enter into contracts for the delivery of technology service in which we indemnify the other party against claims of patent and copyright infringement by third parties. Due to the nature of these indemnification provisions, we cannot calculate our aggregate potential exposure under them.

We engage in certain insurance activities which require our employees to be bonded. We satisfy this bonding requirement by issuing letters of credit in a total amount of approximately \$2 million.

In the ordinary course of business, we enter into contracts with third parties under which the third parties provide services on behalf of PNC. In many of these contracts, we agree to indemnify the third party service provider under certain circumstances. The terms of the indemnity vary from contract to contract and the amount of the indemnification liability, if any, cannot be determined.

We are a general or limited partner in certain asset management and investment limited partnerships, many of which contain indemnification provisions that would require us to make payments in excess of our remaining funding commitments. While in certain of these partnerships the maximum liability to us is limited to the sum of our unfunded commitments and partnership distributions received by us, in the others the indemnification liability is unlimited. As a result, we cannot determine our aggregate potential exposure for these indemnifications.

Pursuant to their bylaws, PNC and its subsidiaries provide indemnification to directors, officers and, in some cases, employees and agents against certain liabilities incurred as a result of their service on behalf of or at the request of PNC and its subsidiaries. PNC and its subsidiaries also advance on behalf of covered individuals costs incurred in connection with certain claims or proceedings, subject to written undertakings by each such individual to repay all amounts advanced if it is ultimately determined that the individual is not entitled to indemnification. We generally are responsible for similar indemnifications and advancement obligations that companies we acquire, including Riggs and Sterling, had to their officers, directors and sometimes employees and agents at the time of acquisition. We advanced such costs on behalf of several such individuals (including some from Riggs and Sterling) with respect to pending litigation or investigations during 2008. It is not possible for us to determine the aggregate potential exposure resulting from the obligation to provide this indemnity or to advance such costs.

In connection with the lending of securities facilitated by Global Investment Servicing as an intermediary on behalf of certain of its clients, we provide indemnification to those clients against the failure of the borrowers to return the securities. The market value of the securities lent is

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

fully secured on a daily basis; therefore, the exposure to us is limited to temporary shortfalls in the collateral as a result of short-term fluctuations in trading prices of the loaned securities. At June 30, 2008, the total maximum potential exposure as a result of these indemnity obligations was \$11.4 billion, although the collateral at the time exceeded that amount.

VISA INDEMNIFICATION

Our payment services business issues and acquires credit and debit card transactions through Visa U.S.A. Inc. card association or its affiliates (Visa).

Table of Contents

As further described in our 2007 Form 10-K, in October 2007 Visa completed a restructuring and issued shares of Visa Inc. common stock to its financial institution members (Visa Reorganization) in contemplation of its initial public offering (IPO). As part of the Visa Reorganization, we received our proportionate share of a class of Visa Inc. common stock allocated to the US members. Prior to the IPO, the US members were obligated to indemnify Visa for judgments and settlements related to specified litigation. In accordance with GAAP, during the fourth quarter of 2007 we recorded a liability and pretax operating expense of \$82 million representing our estimate of the fair value of our indemnification obligation for potential losses arising from this litigation.

Visa's IPO occurred in March 2008. Visa redeemed 2.2 million of our investment in Visa Class B common shares for cash out of the proceeds of the IPO. Accordingly, we recognized a pretax gain of \$95 million during the first quarter of 2008 in other noninterest income in connection with this redemption. In addition, Visa set aside \$3 billion of the IPO proceeds in an escrow account for the benefit of the US member financial institutions to fund the expenses of the litigation as well as the members' proportionate share of any judgments or settlements that may arise out of the litigation. Therefore, we reduced our indemnification liability proportionately based upon the escrowed amount via a credit to noninterest expense of \$43 million pretax during the first quarter of 2008. At June 30, 2008, our remaining recorded Visa indemnification liability totaled \$39 million.

RECOURSE AGREEMENT WITH GOVERNMENT AGENCIES

We are authorized to originate, underwrite, close and service commercial mortgage loans and then sell them to Fannie Mae under Fannie Mae's DUS program. We have similar arrangements with Freddie Mac.

Under these programs, we assume up to one-third of the risk of loss on unpaid principal balances. At June 30, 2008, the maximum recourse liability was \$3.7 billion. Accordingly, we maintain a reserve for such potential losses which approximates the fair value of this liability. At June 30, 2008, the unpaid principal balance outstanding of loans sold as a participant in these programs was \$12.1 billion. The fair value of the guarantee, in the form of reserves for losses under these programs, totaled \$41 million as of June 30, 2008 and is included in other liabilities on our Consolidated Balance Sheet. If payment is required under these programs, we would not have an interest in the collateral underlying the mortgage loans on which losses occurred, although the value of the collateral is taken into account in determining the amounts of such losses. The serviced loans are not included on our Consolidated Balance Sheet.

OTHER GUARANTEES

We write caps and floors for customers, risk management and proprietary trading purposes. At June 30, 2008, the fair value of the written caps and floors liability on our Consolidated Balance Sheet was \$9 million. Our ultimate obligation under written options is based on future market conditions and is only quantifiable at settlement. We manage our market risk exposure from customer positions through transactions with third-party dealers.

We also enter into credit default swaps under which we buy loss protection from or sell loss protection to a counterparty for the occurrence of a credit event of a reference entity. The fair value of the contracts sold on our Consolidated Balance Sheet was a net liability of \$73 million at June 30, 2008. The maximum amount we would be required to pay under the credit default swaps in which we sold protection, assuming all reference obligations experience a credit event at a total loss, without recoveries, was \$1.6 billion at June 30, 2008.

We have entered into various contingent performance guarantees through credit risk participation arrangements with terms ranging from less than one year to 23 years. We will be required to make payments under these guarantees if a customer defaults on its obligation to perform under certain credit agreements with third parties. Our exposure under these agreements was approximately \$768 million at June 30, 2008.

CONTINGENT PAYMENTS IN CONNECTION WITH CERTAIN ACQUISITIONS

A number of the acquisition agreements to which we are a party and under which we have purchased various types of assets, including the purchase of entire businesses, partial interests in companies, or other types of assets, require us to make additional payments in future years if certain predetermined goals are achieved or not achieved within a specific time period. Due to the nature of the contract provisions, we cannot quantify our total exposure that may result from these agreements.

NOTE 16 SEGMENT REPORTING

We have four major businesses engaged in providing banking, asset management and global investment servicing products and services:

Retail Banking,
Corporate & Institutional Banking,
BlackRock, and
Global Investment Servicing, formerly PFPC

Results of individual businesses are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to GAAP; therefore, the financial results of our individual businesses are not necessarily comparable with similar information for any other company. We refine our methodologies from time to time as our management accounting practices are enhanced and our businesses and management structure change. Financial results are presented, to the extent practicable, as if each business operated on a stand-alone basis. As permitted under GAAP, we have aggregated the business results for certain similar operating segments for financial reporting purposes.

Information for the periods presented reflects the reclassification of results for Hilliard Lyons, including the first quarter 2008 gain on the sale of this business, from the Retail Banking business segment to Other.

Assets receive a funding charge and liabilities and capital receive a funding credit based on a transfer pricing methodology that incorporates product maturities, duration and other factors. Capital is intended to cover unexpected losses and is assigned to the banking and servicing businesses using our risk-based economic capital model. We have assigned to Retail Banking capital equal to 6% of funds to reflect the capital required for well-capitalized domestic banks and to approximate market comparables for this business. The capital assigned for Global Investment Servicing reflects its legal entity shareholder's equity.

We have allocated the allowances for loan and lease losses and unfunded loan commitments and letters of credit based on our assessment of risk inherent in the business segment loan portfolios. Our allocation of the costs incurred by operations and other shared support areas not directly aligned with the businesses is primarily based on the use of services.

Total business segment financial results differ from total consolidated results. The impact of these differences is reflected in the Intercompany Eliminations and Other categories in the business segment tables. Intercompany Eliminations reflects activities conducted among our businesses that are eliminated in the consolidated results. Other includes residual activities that do not meet the criteria for disclosure as a separate reportable business, such as gains or losses related to BlackRock transactions including LTIP share distributions and obligations, earnings and gains or losses related to Hilliard Lyons, integration costs, asset and liability management activities including net securities gains or losses and certain trading activities, equity management activities, differences between business segment performance reporting and financial statement reporting (GAAP), and most corporate overhead.

Assets, revenue and earnings attributable to foreign activities were not material in the periods presented for comparative purposes.

Table of Contents

BUSINESS SEGMENT PRODUCTS AND SERVICES

Retail Banking provides deposit, lending, brokerage, trust, investment management, and cash management services to approximately 2.9 million consumer and small business customers within our primary geographic markets. Our customers are serviced through 1,153 offices in our branch network, the call center located in Pittsburgh and the Internet www.pncbank.com. The branch network is located primarily in Pennsylvania, New Jersey, Washington, DC, Maryland, Virginia, Ohio, Kentucky and Delaware. Brokerage services are provided through PNC Investments, LLC.

Retail Banking also serves as investment manager and trustee for employee benefit plans and charitable and endowment assets and provides nondiscretionary defined contribution plan services. These services are provided to individuals and corporations primarily within our primary geographic markets.

Corporate & Institutional Banking provides lending, treasury management, and capital markets-related products and services to mid-sized corporations, government entities, and selectively to large corporations. Lending products include secured and unsecured loans, letters of credit and equipment leases. Treasury management services include cash and investment management, receivables management, disbursement services, funds transfer services, information reporting, and global trade services. Capital markets-related products and services include foreign exchange, derivatives, loan syndications, mergers and acquisitions advisory and related services to middle-market companies, securities underwriting, and securities sales and trading. Corporate &

Institutional Banking also provides commercial loan servicing, real estate advisory and technology solutions for the commercial real estate finance industry. Corporate & Institutional Banking provides products and services generally within our primary geographic markets, with certain products and services provided nationally.

BlackRock is one of the largest publicly traded investment management firms in the United States with \$1.428 trillion of assets under management at June 30, 2008. BlackRock manages assets on behalf of institutional and individual investors worldwide through a variety of fixed income, cash management, equity and balanced and alternative investment separate accounts and funds. In addition, BlackRock provides risk management, investment system outsourcing and financial advisory services globally to institutional investors. At June 30, 2008, PNC's ownership interest in BlackRock was approximately 33.3%.

Global Investment Servicing is a leading full service provider of processing, technology and business solutions for the global investment industry. Securities services include custody, securities lending, and accounting and administration for funds registered under the 1940 Act and alternative investments. Investor services include transfer agency, subaccounting, and distribution. Financial advisor services include managed accounts and information management. This business segment serviced \$2.6 trillion in total assets and 74 million shareholder accounts as of June 30, 2008 both domestically and internationally from locations in Ireland, Poland and Luxembourg.

(a) Period-end balances for BlackRock and Global Investment Servicing.

Certain revenue and expense amounts shown in the preceding table differ from amounts included in the Business Segments Review section of Part I, Item 2 of this Form 10-Q due to the presentation in Item 2 of business revenues on a taxable-equivalent basis, the inclusion of second quarter 2007 and first six months of 2007 BlackRock/MLIM transaction integration costs and second quarter 2008 and first six months of 2008 Albridge Solutions and Coates Analytics integration costs in Other in the Item 2 presentation, and classification differences related to Global Investment Servicing. Global Investment Servicing income classified as net interest income (expense) in the preceding table represents the interest components of other nonoperating income (net of nonoperating expense) and debt financing as disclosed in the Business Segments Review section.

Loan fees for the six months ended June 30, 2008 and June 30, 2007 were \$25 million and \$19 million, respectively. Loan fees for the three months ended June 30, 2008, March 31, 2008, and June 30, 2007 were \$14 million, \$11 million, and \$10 million, respectively. Interest income includes the effects of taxable-equivalent adjustments using a marginal federal income tax rate of 35% to increase tax-exempt interest income to a taxable-equivalent basis. The taxable-equivalent adjustments to interest income for the six months ended June 30, 2008 and June 30, 2007 were \$19 million and \$14 million, respectively. The taxable-equivalent adjustments to interest income for the three months ended June 30, 2008, March 31, 2008, and June 30, 2007 were \$10 million, \$9 million, and \$8 million, respectively.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

See Note 14 Legal Proceedings in the Notes To Consolidated Financial Statements under Part I, Item 1, of this Report, which is incorporated by reference in response to this item.

ITEM 1A. RISK FACTORS

There are no material changes from any of the risk factors previously disclosed in PNC's 2007 Form 10-K in response to Part I, Item 1A other than the changes previously reported in PNC's first quarter 2008 Form 10-Q in response to Part II, Item 1A.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) Details of our repurchases of PNC common stock during the second quarter of 2008 are included in the following table:

In thousands, except per share data

2008 period	Total shares purchased (a)	Average price paid per share	Total shares purchased as part of publicly announced programs (b)	Maximum number of shares that may yet be purchased under the programs (b)
April 1 - April 30	211	\$ 68.37		24,710
May 1 - May 31	164	\$ 69.18		24,710
June 1 - June 30	142	\$ 60.46		24,710
Total	517	\$ 66.46		

(a) Reflects PNC common stock purchased in connection with our various employee benefit plans. No shares were purchased under the program referred to in note (b) to this table during the second quarter of 2008.

(b) Our current stock repurchase program allows us to purchase up to 25 million shares on the open market or in privately negotiated transactions. This program was authorized on October 4, 2007 and will remain in effect until fully utilized or until modified, superseded or terminated.

ITEM 6. EXHIBITS
