Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Ordinary Shares, par value Rs. 10 per share *	The New York Stock Exchange, Inc

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 44,98,32,659 Ordinary Shares, including 58,920,191 Ordinary Shares represented by 58,920,191 American Depositary Shares

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

outstanding as of March 31, 2009.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer
Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing.

U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board

Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow: Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

* Not for trading, but only in connection with listed American Depositary Shares, each representing one share of common stock.

Table of Contents

Table of Contents

In this annual report

References to we , our and us are to Tata Motors Limited and its consolidated subsidiaries, except as the context otherwise requires;

References to dollar , and US\$ are to the lawful currency of the United States of America, and references to rupees and Rs. are to the lawful currency of India;

References to US GAAP are to accounting principles generally accepted in the United States, and references to Indian GAAP are to accounting principles generally accepted in India and references IFRS are to International Financial Reporting Standards and its interpretations issued by International Accounting Standards Board;

References to an ADS are to an American Depositary Share, each of which represents one of our Ordinary Shares of Rs. 10/- each, and references to an ADR are to an American Depositary Receipt evidencing one or more ADSs;

References to light commercial vehicles, or LCVs, medium commercial vehicles, or MCVs, and heavy commercial vehicles, or HCVs, refer to vehicles that have gross vehicle weight, or GVW, of up to 7.5 metric tonnes, between 7.5 and 16.2 metric tonnes, and over 16.2 metric tonnes, respectively;

References to passenger cars refer to vehicles that have a seating capacity of up to six persons, excluding the driver, and is further classified into the following market segments: mini-cars which have a length of up to 3,400 mm; compact cars which have a length between 3,401mm and 4,000mm; mid-size cars which have length of between 4,001mm and 4,500mm; executive cars which have a length between 4,501mm and 4,700mm; and premium and luxury cars which have a length between 4,701 and 5,000mm, and above 5,001mm, respectively.

References to utility vehicles, or UVs, and multi-purpose vehicles, or MPVs, refer to vehicles that have a seating capacity of seven to twelve persons, excluding the driver, and van-type vehicles that have a seating capacity of seven to twelve persons, excluding the driver, respectively.

References to premium cars and SUVs refer to a defined list of premium competitor cars and SUVs for our Jaguar Land Rover business.

Unless otherwise stated, comparative and empirical Indian industry data in this annual report have been derived from published reports of the Society of Indian Automobile Manufacturers, or SIAM; while international industry data have been derived from published reports of IHS Global Insight.

References to a particular fiscal year, such as fiscal 2009 , are to our fiscal year ended on March 31 of that year;

Figures in tables may not add up to totals due to rounding;

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Millimeters or mm are equal to 1/1000 of a meter. A meter is equal to approximately 39.37 inches and a millimeter is equal to approximately 0.039 inch; and

Kilograms or kg are each equal to approximately 2.2 pounds, and metric tonnes are equal to 1,000 kilograms or approximately 2,200 pounds.

Litres are equivalent to 61.02 cubic inches of volume, or approximately 1.057 U.S. quarts of liquid measure.

Revenues refers to Total Revenue net of excise duty unless stated otherwise.

Special Note Regarding Forward-looking Statements

All statements contained in this annual report that are not statements of historical fact constitute forward-looking statements. Generally, these statements can be identified by the use of forward-looking terms such as anticipate, believe, can, could, estimate, expect, intend, may, will and would or similar words. However, these words are not the exclusive means of identifying forward-looking statements. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, our revenue and profitability, planned projects and other matters discussed in this annual report regarding matters that are not historical fact. These forward-looking statements and any other projections contained in this annual report (whether made by us or any third party) involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements or other projections. Although we are a reporting company and will have ongoing disclosure obligations under U.S. federal securities laws, we are not undertaking to publicly update or revise any statements in this annual report, whether as a result of new information, future events or otherwise.

Table of Contents

Table of Contents

The risks and factors that could cause our actual results, performances and achievements to be materially different from the forward-looking statements set out in Item 3.D and elsewhere in this annual report include, among others:

general political, social and economic conditions, and the competitive environment in India, United States, United Kingdom and Rest of Europe and other markets in which we operate and sell our products;

fluctuations in the currency exchange rate of the rupee to all foreign currencies and GBP to all foreign currencies;

accidents and natural disasters;

terms on which we finance our working capital and capital and product development expenditures and investment requirements;

implementation of new projects, including mergers and acquisitions, planned by management;

contractual arrangements with suppliers;

government policies including those specifically regarding the automotive industry, including industrial licensing, environmental regulations, safety regulations, import restrictions and duties, excise duties, sales taxes, value added taxes, product range restrictions, diesel and gasoline prices and road network enhancement projects;

significant movements in the prices of key inputs such as steel, aluminum, rubber and plastics; and

other factors beyond our control.

Exchange Rate Information

For convenience, some of the financial amounts presented in this annual report have been translated from rupee amounts into dollar amounts at the rate of Rs.50.72 = US \$1.00, based on fixing rate in the City of Mumbai on March 31, 2009 for cable transfers in Indian rupees as published by the Foreign Exchange Dealers Association of India (FEDAI), the date of our most recent balance sheet included in this annual report. However, such translations do not imply that the rupee amounts have been, could have been or could be converted into dollars at that or any other rate.

The following table sets forth, for the fiscal years ended March 31, 2009, 2008, 2007, 2006 and 2005 information with respect to the exchange rate between the rupee and the dollar (in rupees per dollar) as published by Bloomberg L.P.

Fiscal year ended March 31,	Period End	Period Average	High	Low
2009	50.73	45.82	51.97	39.77
2008	40.12	40.26	43.15	39.27
2007	43.48	45.24	46.88	43.04
2006	44.62	44.27	46.31	43.18
2005	43.75	44.93	46.47	43.42

The following table sets forth information with respect to the exchange rate between the rupee and the dollar (in rupees per dollar) for the previous six months as published by Bloomberg L.P.

Month	Period End	Period Average	High	Low
April 2009	50.10	50.18	50.64	49.66
May 2009	47.09	48.52	49.91	47.09
June 2009	47.91	47.78	48.61	46.95
July 2009	47.93	48.45	49.08	47.89
August 2009	48.83	48.34	48.97	47.52
September 2009	48.11	48.45	49.03	47.97

Source: Bloomberg L.P.

As of October 07, 2009, the value of the rupee against the dollar was Rs.46.89 per US\$1.00, as published by Bloomberg L.P.

C. Reasons for the Offer and Use of Proceeds.

Not applicable.

D. Risk Factors.

This section describes the risks that we currently believe may materially affect our business. The factors below should be considered in connection with any forward-looking statements in this annual report and the cautionary statements on page i. The risks below are not the only ones we face – some risks may be unknown to us, and some risks that we do not currently believe to be material could later turn out to be material. Although we will be making all reasonable efforts to mitigate or minimize these risks, one or more of a combination of these risks could materially impact our business, revenues, sales, and net assets, results of operations, liquidity and capital resources.

Risk associated with Our Business and the Automotive Industry.

Lack of improvement or worsening global economic conditions could have a significant adverse impact on our sales and results of operations.

The sub-prime financial crisis that caused a collapse of the financial sector and as a consequence a severe tightening of credit has plunged many economies into severe recession and caused significant deterioration of consumer confidence and demand. Even economies that had little exposure to the sub prime assets, such as India, were impacted fairly severely as the credit crisis had a consequential impact on global credit markets combined with a significant fall in exports.

The Indian automotive industry is affected substantially by general economic conditions in India. The demand for automobiles in the Indian market is influenced by factors including the growth rate of the Indian economy, easy availability of credit, increase in disposable income among Indian consumers, interest rates, freight rates and fuel prices. The anti-inflationary policies of the Reserve bank of India in the past quarters had resulted in a significant increase in interest rates, tight liquidity conditions and slowing industrial activity towards the earlier part of the fiscal year. The onslaught of the impact of the crisis together with the tight monetary policy of the central bank affected the growth of the Indian economy which slowed to 6.7% in fiscal 2009 as compared to the average growth of over 9% in the previous three years. This was despite the government's efforts to stimulate the economy in the later part of the year. The automotive industry in general is cyclical and economic slowdowns in the past have affected the manufacturing sector including the automotive and related industries. Unless there is improvement in key economic factors such as growth rate, interest rates and inflation together with availability of financing for vehicles at competitive rates, our automotive sales in India and results of operations may be adversely affected.

We acquired the Jaguar and Land Rover business from Ford Motor Company in June 2008. In addition, we also have automotive operations in South Korea and Thailand. Jaguar and Land Rover have significant presence in the UK, North America, Continental Europe and have operations in most of the major countries across the globe. The global economic meltdown significantly impacted the global automotive markets, particularly the United States, Europe and Japan. Our strategy which includes new product launches and expansion into growing markets such as China and Russia may not be sufficient to mitigate the decrease in demand for our products in established markets, which could have a significant adverse impact on our financial performance. Should industry demand soften beyond our expectations because of a continuing slowdown or negative economic growth in key markets or other factors, our results of operations and financial condition could be substantially adversely affected.

As of March 31, 2009, we had a debt of Rs.435,815 million, including the bridge finance raised for purpose of the Jaguar Land Rover acquisition. While we were able to refinance the bridge loan in May 2009, continuing economic weakness and depressed demand for our products may put further pressure on our liquidity requirements and deterioration of the financial markets may impede our efforts to raise capital and/or raise capital at a reasonable cost in order to meet our future growth plans. These may adversely impact our results of operations.

We have incurred a substantial amount of indebtedness in connection with the acquisition of Jaguar Land Rover, and our proposed repayment of the amended acquisition facility may be delayed, each of which could adversely affect our future business performance and financial condition.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

On June 2, 2008, we acquired Jaguar Land Rover from Ford Motor Company on a debt-free basis, for consideration of US\$2.5 billion, in an all-cash transaction, through JaguarLandRover Limited, a wholly-owned subsidiary of TML Holdings Pte Ltd, Singapore, which is our 100% subsidiary. JaguarLandRover Limited borrowed US\$3 billion under a short-term bridge loan facility, which we guaranteed. In May 2009, against the US\$2 billion outstanding against this facility, US\$852 million was repaid through proceeds of Secured Non-Convertible Credit Enhanced Rupee Debentures. An agreement was also reached with the syndicate of banks to amend the bridge loan facility, extending the final maturity of the residual US\$1 billion by 18 months up to December 31, 2010 (the Amended Acquisition Facility).

As at March 31, 2009, we had a debt of Rs.435,815 million. Our substantial level of indebtedness may: (i) increase the possibility that we will be unable to generate cash sufficient to pay, when due, the principal of, interest on or other amounts due in respect of our indebtedness, (ii) require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and other general corporate purposes, (iii) materially impact our ability to pay dividends in the future and/or (iv) lead to a downgrade of our credit rating by international and domestic rating agencies, thereby adversely impacting our ability to raise additional financing and the interest rates and commercial terms on which such additional financing is available. Our rating for foreign currency borrowings was revised by Standard & Poor's to B (Credit Watch with Negative Implications) and by Moodys to B3 (Stable), while for borrowing in local currency the rating was revised to A (Stable) by Crisil and to LA+ by ICRA.

We intend to refinance the Amended Acquisition Facility through the issuance of ordinary shares and/or securities linked to, or convertible into, ordinary shares, including, but not limited to, the issuance of depositary receipts in the international market and/or through other measures, such as monetization of a part of our investments through a phased divestment plan at prevailing market prices.

The execution of our refinancing plan is subject to various risks, including, among other things: (i) the receipt of any other regulatory or corporate approvals that are necessary, (ii) market conditions, which have been particularly exacerbated by the dislocation of the fixed income and securitization markets following the global credit crisis and (iii) foreign currency movements.

We cannot assure you that any of the conditions for our funding plans will be satisfied. If we or any other relevant parties are unable to satisfy any of the conditions for our funding plans or satisfy these conditions in the time frame that we expect, we may not be able to repay the Amended Acquisition Facility in the time frame that we expect, which could materially adversely affect our future business performance and financial condition. In addition, our costs of borrowing depend in part on our credit ratings by international and domestic rating agencies. A downgrade of our rating for foreign or local currency borrowings could adversely impact our ability to raise the amount proposed under our funding plans through the incurrence of debt and the interest rates at which such financing alternatives may be available to us.

Certain restrictive covenants in our financing agreements may limit our operational and financial flexibility and our future results of operations and financial condition may be adversely affected if we are not able to comply with certain maintenance covenants contained in our financing agreements.

Some of our financing agreements and debt arrangements set limits on, and/or require it to obtain lender consents before, among other things, undertaking certain projects, issuing new securities, changing management, merging, consolidating, selling significant assets, creating subsidiaries or making certain investments. In addition, certain financial covenants may limit our ability to borrow additional funds or to incur additional liens.

In the past, we have been able to obtain required lender consents for such activities. However, there can be no assurance that we will be able to obtain such consents in the future. If our financial or growth plans require such consents, and such consents are not obtained, we may be forced to forgo or alter our plans, which could adversely affect our results of operations and financial condition.

Certain of our financing arrangements also include covenants to maintain certain debt-to-equity ratios, debt-to-earnings ratios, liquidity ratios, capital expenditure ratios and debt coverage ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. In the event that we breach these covenants, the outstanding amounts due under such financing agreements could become due and payable immediately. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such other financing agreements becoming due and payable immediately. Defaults under one or more of our financing agreements could have a material adverse effect on our results of operations and financial condition.

Jaguar Land Rover has incurred losses in previous years and our financial performance will be affected in the future by the performance of Jaguar Land Rover.

The global financial meltdown and high fuel prices, especially after September 2008, combined with vehicle financing and demand drying up, impacted the auto industry worldwide, including Jaguar Land Rover. The sales volume over the 10 months post-acquisition for Jaguar Land Rover decreased by approximately 32% from the comparable period in the previous year, resulting in a loss before tax of GBP427 million. In response, we have taken action to reduce inventory, improve working capital and reduce investments and payroll costs, including through workforce reduction of more than 2,000. However, profitability continues to come under strain given the slow revival of the global economy and

impact of suppressed demand and prices.

Since March 2009, Jaguar Land Rover have secured, or have credit approval for, further financing facilities. This includes approved funding of GBP340 million from the European Investment Bank. While we anticipate that access to this funding can be secured in the near future through appropriate commercial arrangements without necessitating guarantees from the UK Government, for which discussions have been ongoing for some time, no assurance can be made that this or any other facility will be obtained, and the failure to do so could adversely affect our financial condition and results of operations.

In addition, the long-term profitability of Jaguar Land Rover continues to depend on successful execution of its business strategies, including sustained cost savings and successful introduction of its new models. Our financial performance, including our profit margins and our operating ratios, will be affected in the future by the performance of Jaguar Land Rover.

Because of the acquisition of Jaguar Land Rover, our historical financials may not be comparable.

On June 2, 2008, we completed the acquisition of Jaguar Land Rover from Ford. Therefore, our historical consolidated financial statements for the fiscal years ended on and before March 31, 2008 do not include the results of Jaguar Land Rover, and neither pro forma nor historical consolidated financial statements showing our combined results of operations and financial condition, including Jaguar Land Rover, have been prepared or are being provided in this annual report. Our financial statements for the fiscal year ended March 31, 2009 include the results of Jaguar Land Rover for the period from June 2, 2008 to March 31, 2009.

This may make it difficult to compare our past performance and financial condition or to estimate our consolidated performance in the future. Moreover, the global dislocation of the automotive industry, including Jaguar Land Rover's markets, make past performance of the business not necessarily indicative of future demand trends or results.

Currency and exchange rate fluctuations could adversely affect our results of operations.

Our operations are subject to risk arising from fluctuations in exchange rates with reference to countries in which we operate. These risks primarily relate to fluctuations of GBP to US Dollar, Japanese Yen and Euro, and fluctuations of Indian Rupee against GBP, US Dollar and Euro.

We import capital equipment, raw materials and components and also sell our vehicles in various countries. These transactions are denominated in foreign currencies, primarily the U.S. dollar and Euro. Moreover, we have outstanding foreign currency denominated debt and hence we are sensitive to fluctuations in foreign currency exchange rates. We have experienced and expect to continue to experience foreign exchange losses and gains on obligations denominated in foreign currencies in respect of our borrowings and foreign currency assets and liabilities due to currency fluctuations. Although we engage in currency hedging as per our policy in order to decrease our foreign exchange exposure, the weakening of rupee against the dollar or other major foreign currencies may have an adverse effect on our cost of borrowing and consequently may increase our financing costs, which could have a significant adverse impact on our results of operations.

Table of Contents

Adverse fluctuations in the value of the rupee against the dollar and GBP and also fluctuations of GBP against other major foreign currencies during fiscal 2009 had an adverse impact on our financial condition and results of operations. Any further depreciation of rupee against dollar may affect our results of operations in the future periods, mainly due to dollar denominated borrowings.

Intensifying competition could materially and adversely affect our sales and results of operations.

The global automotive industry is intensely competitive and competition is likely to further intensify in light of continuing globalization and consolidation in the worldwide automotive industry. Factors affecting competition include product quality and features, innovation and product development time, ability to control costs, pricing, reliability, safety, fuel economy, customer service and financing terms. There can be no assurance that we will be able to compete successfully in the global automotive industry in the future.

The Indian automobile industry is highly competitive. We face strong competition in the Indian market from domestic as well as foreign automobile manufacturers. Improving infrastructure and robust growth prospects compared to other mature markets is attracting a number of international companies to India who have either created joint ventures with local partners or have established independently owned operations in India. International competitors bring with them decades of international experience, global scale, advanced technology and significant financial resources. Also the recent weakness in demand for passenger vehicles and commercial vehicles in the Indian automobile market has resulted in overcapacity and price competition. Consequently, domestic competition is likely to further intensify in the future. There can be no assurance that we will be able to implement our future strategies in a way that will mitigate the effects of increased competition in the Indian automotive industry.

Our future success depends on our ability to satisfy changing customer demands by offering innovative products in a timely manner and maintaining such products' competitiveness.

In the competitive automotive industry, our competitors can gain significant advantage if they are able to offer products satisfying customer needs earlier than we are able to, which could adversely impact our sales and results of operations. Unanticipated delays in implementing the introduction of new products or in expansion plans resulting in delays in capacity enhancements and/or new product launches and cost overruns could adversely impact our results of operations. Customer preferences especially in many of the developed markets seem to be moving in favour of more fuel efficient vehicles. Further, in many countries there has been a significant pressure on the automotive industries for reduction in carbon dioxide emissions. In many markets these preferences are driven by increasing government regulations and rising fuel prices.

Our operations may be significantly impacted if there is a delay in developing fuel efficient products that reflect changing customer preferences, especially in the premium automotive category and products aimed at reducing carbon dioxide emissions. In addition, there can be no assurance that the market acceptance of our future products will meet our expectations, in which case we could be unable to realize the intended economic benefits of our investments and our results of operations may be adversely affected.

We are subject to risks associated with product liability, warranty and recall.

We are subject to risks and costs associated with product liability, warranties and recalls, should we supply defective products, parts, or related after-sales services, which could generate adverse publicity and adversely affect our business, results of operations and financial condition. Such events could also require us to expend considerable resources in correcting these problems and could adversely affect demand for our products.

We are subject to risk associated with our automobile financing business.

We are subject to risk associated with our automobile financing business. Any defaults by our customers or inability to repay installments as due, could adversely affect our business, results of operations and cash flows. In addition, any downgrades in our credit ratings may increase our borrowing costs and restrict our access to the debt markets. Over time, and particularly in the event of any credit rating downgrades, market volatility, market disruption or otherwise, we may need to reduce the amount of financing receivables we originate, which could adversely affect our ability to support the sale of our vehicles.

Underperformance of our distribution channels and supply chains may adversely affect our sales and results of operations.

Our products are sold and serviced through a network of authorized dealers and service centers across our home markets, and a network of distributors and local dealers in international markets. We monitor the performance of our dealers and distributors and provide them with support to enable them to perform to our expectations. There can be no assurance, however, that our expectations will be met and under-performance by our dealers or distributors could adversely affect our sales and results of operations.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

We rely on third parties to supply us with the raw materials, parts and components used in the manufacture of our products. Furthermore, for some of these parts and components, we are dependent on sole suppliers. Our ability to procure supplies in a cost effective and timely manner is subject to various factors, some of which are not always within our control. While we manage our supply chain as part of our vendor management process, any significant problems with our supply chain in the future could affect our results of operations in an adverse manner.

Table of Contents

Adverse economic conditions and falling vehicle sales have had significant financial impact on some of our suppliers and distributors. Further deterioration of automobile demand and lack of access to sufficient financial arrangements to our supply chain could impair timely availability of components and parts to us while distress of our distributors may impact our performance in some markets.

In respect of our Jaguar Land Rover operations, as part of a separation agreement from Ford, we entered into supply and transitional service agreements with Ford and certain other third parties for critical components and other corporate services. Any disruption of such transitional services could have a material adverse impact on our operations and financial condition.

Increases in input prices may have a material adverse impact on our result of operations.

In fiscal 2009 and 2008 consumption of raw materials, components and aggregates and purchase of products for sale (including change in stock) constituted approximately 67.6% and 66.8% respectively, of total revenues. Prices of commodity items used in manufacturing automobiles, including steel, rubber, copper and zinc, have significantly increased over the past two years. Although, these prices have begun to show some signs of softening lately and we have been pursuing cost reduction programs and product price increases, to partially offset these input price increases, there can be no assurance that we will be able to recover any future cost increases in commodity products through cost-saving measures elsewhere or that we will be able to sufficiently increase the selling prices of our products, which could materially and adversely impact our sales and results of operations. In addition, because of intense price competition and our high level of fixed costs, we may not be able to adequately address changes in commodity prices even if they are foreseeable. Significant increases in these prices could have a substantial adverse effect on our financial condition and results of operations.

Further, after touching a low of approximately US\$40 in February 2009, crude oil prices have begun an upward movement. Increased fuel costs pose a significant challenge to automobile manufacturers worldwide, including us, especially in commercial vehicle segments, where fuel costs represent a significant portion of the operational costs of such vehicles, and premium cars.

The performance of our subsidiaries and affiliates may adversely affect our results of operations.

We have made and may continue to make capital commitments to our subsidiaries and affiliates, and if the business and operations of subsidiaries and affiliates to which we make capital commitments, deteriorate, the value of our investments may be adversely affected.

We are subject to risks associated with growing our business through mergers and acquisitions.

We believe that our acquisitions provide us opportunities to grow significantly in the global automobile markets with access to additional brands, products, technologies and capabilities, and offer potential synergies. However, the scale, scope and nature of the integration required in connection with the acquisitions present significant challenges, and we may be unable to integrate effectively within our expected schedule the various subsidiaries, divisions and facilities. The acquisition may not meet our expectations and the realization of the anticipated benefits may be blocked, delayed or reduced as a result of numerous factors, some of which are outside our control.

We will continue to evaluate growth opportunities through suitable mergers and acquisitions in the future. Growth through mergers and acquisitions involve business risks, including unforeseen contingent risks or latent business liabilities that may only become apparent after the merger or acquisition is finalized. The key success factor will be successful integration and management of the merged/acquired entity with us, retention of key personnel, joint sales and marketing efforts, and management of a larger business. If we are not able to manage these risks successfully, our results of operations could be adversely affected.

Our business is seasonal in nature and a substantial decrease in our sales during certain quarters could have a material adverse impact on our financial performance.

The sales volumes and prices for our vehicles are influenced by the cyclicity and seasonality of demand for these products, primarily in the Indian market. Demand generally peaks between January and March, although there also is a decrease in demand in February just before release of the Indian fiscal budget. Demand is usually lean from April to July and picks up again in the festival season from September onwards, with a decline in December due to year-end. The automotive industry has been cyclical in the past and we expect this cyclicity to continue.

The business of Jaguar Land Rover is impacted by the bi-annual registration of vehicles in the United Kingdom wherein the vehicle registration number changes every six months which, in turn has an impact on the resale value of the vehicles. This leads to a bunching up of sales during the period when the aforementioned change occurs. Most other markets such as the United States are driven by introduction of new model year derivatives which typically occurs in the autumn of each year. Furthermore, western European markets tend to be impacted by main summer and winter holidays. The resulting sales profile influences operating results on a quarter-to-quarter basis.

We may be adversely affected by labor unrest.

All of our permanent employees, other than officers and managers, in India and most of our permanent employees in South Korea and the United Kingdom, including certain officers and managers, in relation to our automotive business, are members of labor unions and are covered by our wage agreements, where applicable with those labor unions which have different tenures at different locations. In general, we consider our labor relations with all of our employees to be good. However, we may in the future be subject to labor unrest, which may delay or disrupt our operations in the affected regions, including the acquisition of raw materials and parts, the manufacture, sales and distribution of products and the provision of services. If work stoppages or lock-outs at our facilities or at the facilities of our major vendors occur or continue for a long period of time, our business, financial condition and results of operations may be adversely affected.

Any inability to manage our growing international business may adversely affect our results of operations.

Our growth strategy also relies on the expansion of our operations by introducing certain automotive products in other parts of the world, including Europe, China, Russia and other parts of Asia. The costs involved in entering and establishing ourselves in new markets, and expanding such operations, may be higher than expected, and we may face significant competition in those regions. In addition, our international business is subject to many actual and potential risks, including language barriers, cultural differences and other difficulties in staffing and managing overseas operations, inherent difficulties and delays in contract enforcement and the collection of receivables through the legal systems of some foreign countries, the risk of non-tariff barriers, other restrictions on foreign trade or investment sanctions, and the burdens of complying with a wide variety of foreign laws and regulations.

Table of Contents

If we are unable to manage risks related to our expansion and growth in other parts of the world, our business, results of operations and financial condition could be adversely affected.

Future pension obligations may prove more costly than currently anticipated and the market value of assets in our pension plans could decline.

We provide post retirement and pension benefits to our employees some of which are defined benefit plans.

Our pension liabilities are generally funded, and the pension plan assets are particularly significant in respect of the Jaguar and Land Rover pension plans. In the event that the actuarially determined liabilities exceed the plan assets at the time of valuation, we would have to agree on new contributions with the trustees of Jaguar and Land Rover pension to fund the deficit over such period of time as agreed.

Lower return on pension fund assets, changes in market conditions, changes in interest rates, changes in inflation rates, and adverse changes in other critical actuarial assumptions, may impact the pension liabilities and consequent increase funding requirements, which will adversely affect our financial condition and results of operations.

Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject, and this may have a material adverse effect on our business.

While we believe that the insurance coverage that we maintain is reasonably adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under our insurance policies will be honored fully or timely. Accordingly, to the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our financial condition may be affected.

Political and Regulatory Risks.

India's obligations under the World Trade Organization Agreement.

India's obligation under its World Trade Organization agreement could lower the present level of tariffs on imports of components and vehicles, particularly with respect to cars in completely built units and/or completely knocked down units, which could adversely affect our sales and results of operations.

Environmental, Fiscal and Other Governmental regulations.

As an automobile company, we are subjected to extensive governmental regulations regarding vehicle emission levels, noise, safety and levels of pollutants generated by our production facilities. These regulations are likely to become more stringent and compliance costs may significantly impact our future results of operations. In particular, the U.S. and Europe have stringent regulations relating to vehicular emissions. The proposed tightening of vehicle emissions regulations by the European Union will require significant costs for compliance. While we are pursuing various technologies in order to meet the required standards in the various countries in which we sell our vehicles, the costs for compliance with these required standards can be significant to our operations and may adversely impact our results of operations.

Imposition of any additional taxes and levies designed to limit the use of automobiles could adversely affect the demand for our products and our results of operations. Changes in corporate and other taxation policies as well as change in export and other incentives given by the various governments could also adversely affect our results of operations.

Regulations in the areas of investments, taxes and levies may also have an impact on Indian securities, including our shares and ADSs. In this regard it is important to note that the Government has recently released a new draft direct tax code which if brought into force will have a significant impact on the current tax regime, including in respect of our shares and ADSs.

We may be adversely impacted by political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages/prices, epidemics and labor strikes.

Our products are exported to a number of geographical markets and we plan to expand our international operations further in the future. Consequently, we are subject to various risks associated with conducting our business outside our home markets and our operations may be subject to political instability in those markets, wars, terrorism, regional and/or multinational conflicts, natural disasters, fuel shortages, epidemics and labor strikes. Any significant or prolonged disruptions or delays in our operations related to these risks could adversely impact

our results of operations.

Compliance with new and changing corporate governance and public disclosure requirements adds uncertainty to our compliance policies and increases our costs of compliance.

Changing laws, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and new Securities and Exchange Commission (SEC) regulations, Securities and Exchange Board of India (SEBI) regulations, New York Stock Exchange (NYSE) listing rules and Indian stock market listing regulations, have increased complexity for us. These new or changed laws, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of ongoing revisions to such governance standards.

Table of Contents

We are committed to maintaining high standards of corporate governance and public disclosure. However, our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management resources and time.

In addition, new laws, regulations and standards regarding corporate governance may make it more difficult for us to obtain director and officer liability insurance. Further, our board members, chief executive officer and chief financial officer could face an increased risk of personal liability in connection with the performance of their duties. As a result, we may face difficulties attracting and retaining qualified board members and executive officers, which could harm our business. If we fail to comply with new or changed laws or regulations and standards differ, our business and reputation may be harmed.

Risks associated with Investments in an Indian Company.

Political changes in the Government in India could delay and/or affect the further liberalization of the Indian economy and adversely affect economic conditions in India generally and our business in particular.

Our business could be significantly influenced by economic policies adopted by the Government. Since 1991, successive Indian Governments have pursued policies of economic liberalization and financial sector reforms.

The Government has at various times announced its general intention to continue India's current economic and financial liberalization and deregulation policies. However, protests against privatizations, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

The Government has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our ADSs and Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

Although the previous Government had announced policies and taken initiatives that supported the economic liberalization policies pursued by earlier Governments, the rate of economic liberalization could change, and specific laws and policies affecting foreign investment and other matters affecting investment in Our securities could change as well. While we expect the new Government to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no assurance that such policies will be continued.

A change in the Government's policies in the future could adversely affect business and economic conditions in India and could also adversely affect our financial condition and results of operations. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally, and specifically those of our company, as a substantial portion of our assets are located in India

Terrorist attacks, civil disturbances, regional conflicts and other acts of violence, particularly in India, may disrupt or otherwise adversely affect the markets in which we operate, our business and our profitability.

India has from time to time experienced social and civil unrest and hostilities, including terrorist attacks and riots and armed conflict with neighboring countries. Events of this nature in the future could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our ADSs and shares, and on the market for our vehicles.

Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, which include regulations applicable to our Board of Directors, and Indian law govern our corporate affairs. Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company incorporated in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions, including the United States. You may have more difficulty in asserting your rights as a shareholder than you would as a shareholder of a corporation organized in another jurisdiction.

The market value of your investment may fluctuate due to the volatility of the Indian securities market.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of their listed securities. The Indian stock exchanges, including the Bombay Stock Exchange Limited (BSE), have experienced problems that, if they continue or recur, could affect the market price and liquidity of the securities of Indian companies, including our shares. These problems in the past included temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

There may be a different level of regulation and monitoring of the Indian securities markets and the activities of investors, brokers and other participants, than in the United States. The Securities and Exchange Board of India (SEBI) received statutory powers in 1992 to assist it in carrying out its responsibility for improving disclosure and other regulatory standards for the Indian securities markets. Subsequently, SEBI has prescribed regulations and guidelines in relation to disclosure requirements, insider dealing and other matters relevant to the Indian securities market. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in the United States.

Table of Contents

Investors may have difficulty enforcing judgments against us or our management.

We are a limited liability company incorporated under the laws of India. Substantially all of our directors and executive officers named in this annual report are residents of India and all or substantial portion of our assets and the assets of these directors and executive officers are located in India. As a result, investors may find it difficult to (i) effect service of process upon us or these directors and executive officers in jurisdictions outside of India, (ii) enforce court judgments obtained outside of India, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and executive officers, (iii) enforce, in an Indian court, court judgments obtained outside of India, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and executive officers, and (iv) obtain expeditious adjudication of an original action in an Indian court to enforce liabilities, including those based upon the U.S. federal securities laws, against us or these directors and executive officers.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided under Section 13 of the Code of Civil Procedure, 1908, or the Civil Code.

Section 13 and Section 44A of the Civil Code provide that a foreign judgment shall be conclusive as to any matter thereby directly adjudicated upon except (i) where it has not been pronounced by a court of competent jurisdiction, (ii) where it has not been given on the merits of the case, (iii) where it appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where Indian law is applicable, (iv) where the proceedings in which the judgment was obtained were opposed to natural justice, (v) where it has been obtained by fraud or (vi) where it sustains a claim founded on a breach of any law in force in India.

Section 44A of the Civil Code provides that where a foreign judgment has been rendered by a superior court in any country or territory outside India which the Government has by notification declared to be a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the Civil Code is applicable only to monetary decrees not being in the nature of any amounts payable in respect of taxes or other charges of a like nature or in respect of a fine or other penalty.

The United States has not been declared by the Government of India to be a reciprocating territory for the purpose of Section 44A of the Civil Code. Accordingly, a judgment of a court in the United States may be enforced only by a suit upon the judgment and not by proceedings in execution. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with public policy. A party seeking to enforce a foreign judgment in India is required to obtain approval from the Reserve Bank of India (RBI) to execute such a judgment or to repatriate outside India any amount recovered.

Risks associated with our Shares and ADSs.

Fluctuations in the exchange rate between the rupee and the dollar may have a material adverse effect on the market value of the ADSs and the shares, independent of our operating results.

Fluctuations in the exchange rate between the rupee and the dollar will affect, among others things, the dollar equivalents of the price of the shares in rupees as quoted on the Indian stock exchanges and, as a result, may affect the market price of the ADSs. Such fluctuations will also affect the dollar equivalent of any cash dividends in rupees received on the shares represented by the ADSs and the dollar equivalent of the proceeds in rupees of a sale of shares in India.

The exchange rate between the rupee and the dollar has changed substantially in the last two decades and may substantially fluctuate in the future. The value of the rupee against the dollar was Rs. 46.89 = US\$ 1.00 as of October 07, 2009.

Holders of ADSs have fewer rights than shareholders and must act through the depositary to exercise those rights.

Although holders of ADSs have a right to receive any dividends declared in respect of shares underlying the ADSs, they cannot exercise voting or other direct rights as a shareholder with respect to the shares underlying the ADSs evidenced by ADRs. Citibank, N.A. as depositary is the registered shareholder of the deposited shares underlying our ADSs, and therefore only Citibank, N.A. can exercise the rights of shareholders in connection with the deposited shares. Only if requested by us, the depositary will notify holders of ADSs of upcoming votes and arrange to deliver our voting materials to holders of ADSs. The depositary will try, in so far as practicable, subject to Indian laws and the provisions of our Articles of Association, to vote or have its agents vote the deposited securities as instructed by the holders of ADSs. If the depositary receives voting instructions in time from a holder of ADSs which fail to specify the manner in which the depositary is to vote the shares underlying such holder's ADSs, such holder will be deemed to have instructed the depositary.

Table of Contents

to vote in favor of the items set forth in such voting instructions. If the depository has not received timely instructions from a holder of ADSs, the holder shall be deemed to have instructed the depository to give a discretionary proxy to a person designated by us, subject to the conditions set forth in the deposit agreement. If requested by us, the depository is required to represent all shares underlying ADSs, regardless whether timely instructions have been received from the holders of such ADSs, for the sole purpose of establishing a quorum at a meeting of shareholders. Additionally, in your capacity as an ADS holder, you will not be able to bring a derivative action, examine our accounting books and records, or exercise appraisal rights. Registered holders of our shares withdrawn from the depository arrangements will be entitled to vote and exercise other direct shareholder rights in accordance with Indian law. However, a holder may not know about a meeting sufficiently in advance to withdraw the underlying shares in time. Furthermore, a holder of ADSs may not receive voting materials, if we do not instruct the depository to distribute such materials, or may not receive such voting materials in time to instruct the depository to vote.

Further, pursuant to Indian regulations, we are required to offer our shareholders pre-emptive rights to subscribe for proportionate number of shares to maintain their existing ownership percentages prior to the issue of new shares. These rights may be waived by a resolution passed by at least 75% of our shareholders present and voting at a general meeting. Holders of ADSs may be unable to exercise pre-emptive rights for subscribing to these new shares unless a registration statement under the Securities Act is effective or an exemption from the registration requirements is available to us. Our decision to file a registration statement would be based on the costs, timing, potential liabilities and the perceived benefits associated with any such registration statement and we do not commit that we would file such a registration statement. If any issue of securities is made to our shareholders in the future, such securities may also be issued to the Depository, which may sell such securities in the Indian securities market for the benefit of the holders of ADSs. There can be no assurance as to the value, if any, the Depository would receive upon the sale of these rights/securities. To the extent that holders of ADSs are unable to exercise pre-emptive rights, their proportionate interest in us would be reduced.

As a result of Indian Government regulation of foreign ownership the price of the ADSs could decline.

Foreign ownership of Indian securities is regulated and is partially restricted. In addition, there are restrictions on the deposit of shares into our ADS facilities. ADSs issued by companies in certain emerging markets, including India, may trade at a discount to the underlying equity shares, in part because of the restrictions on foreign ownership of the underlying equity shares and in part because ADSs are sometimes perceived to offer less liquidity than underlying shares which can be traded freely in local markets by both local and international investors. See Item 10.D Exchange Controls . The ADSs could trade at a discount to the market price of the underlying shares.

Table of Contents

Item 4. Information on the Company.

A. History and Development of the Company.

We were incorporated on September 1, 1945 as a public limited liability company under the Indian Companies Act VII of 1913 as Tata Locomotive and Engineering Company Limited. Our name was changed to Tata Engineering and Locomotive Company Limited on September 24, 1960 and to Tata Motors Limited on July 29, 2003. We commenced operations as a steam locomotive manufacturer. This business was discontinued in 1971. Since 1954, we have been manufacturing automotive vehicles. This business commenced with the manufacture of commercial vehicles under financial and technical collaboration with Daimler-Benz AG (now Daimler AG) of Germany. This agreement ended in 1969. We produced only commercial vehicles until 1991, when we started producing passenger vehicles as well. In September 2004, we became the first company from India's engineering sector to be listed on the New York Stock Exchange.

We are India's largest automobile manufacturer by revenue, the largest commercial vehicle manufacturer and among the top three passenger vehicle manufacturer in terms of units sold in India during fiscal 2009. We are also the world's fourth largest truck manufacturer and we believe we are one of the largest bus manufacturers in the above 6 ton category. We have a broad portfolio of automotive products, ranging from sub 1 ton to 49 ton gross vehicle weight, or GVW, trucks (including pickup trucks) and from small, medium, and large buses and coaches to passenger cars including the world's cheapest car- the Tata Nano, introduced in 2009 and utility vehicles.

We have expanded our international operations through mergers and acquisitions and in India we have made strategic alliances involving non-Indian companies.

In 2004, we acquired the Daewoo Commercial Vehicles Company (renamed as Tata Daewoo Commercial Vehicle Company Limited), South Korea's second largest truck maker. TDCV has launched several new products, such as the Tata Novus in M&HCV category.

In fiscal 2005, we acquired a 21% stake in Hispano Carrocera S.A., or Hispano, a well-known Spanish bus and coach manufacturer with an option to acquire the remaining stake. Hispano's operations are being expanded into other markets.

We have also been distributing and marketing Fiat branded cars in India since March 2006. We have a joint venture with Fiat Group Automobiles, located at Ranjangaon in Maharashtra to manufacture passenger cars, engines and transmissions for the Indian and overseas markets. Established in April 2008, the plant currently manufactures the Fiat Palio, Fiat Linea, Fiat Punto and Indica Vista and engines and transmissions.

In May 2006, we entered into a joint venture agreement with Brazil-based Marcopolo S.A., or Marcopolo, a global leader in body-building for buses and coaches, to manufacture and assemble fully-built buses and coaches in India, wherein we have a 51% ownership, the balance being held by Marcopolo.

In December 2006, we entered into a joint venture agreement with Thonburi Automotive Assembly Plant Co Ltd., Thailand, or Thonburi, to manufacture pickups in Thailand. We owned 70% of the joint venture called Tata Motors (Thailand) Limited, or TMTL, while Thonburi owned the remaining 30% as of March 31, 2009. Currently, we own 86.78% of the joint venture, while Thonburi owns the remaining 13.22%. The joint venture which began vehicle production in March 2008 will enable us to address the Thailand market, which is a major market for pickup trucks, and other potential markets in that region.

For some of our products, we are also expanding our international export operations, which have been continuing since 1961. Our Tata vehicles are being marketed in several countries in Europe, Africa, the Middle East, Australia, South East Asia and South Asia. During fiscal 2008, Tata Motors (SA) Proprietary Limited (TMSA), a joint venture company in which we hold 60% with the remaining 40% being held by Tata Africa Holdings (SA) (Pty.) Limited, was formed for the manufacture and assembly operations of our LCVs and in South Africa. TMSA has not yet started operations.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In June 2008, we acquired the Jaguar Land Rover business from Ford Motor Company. Jaguar Land Rover is a global premium automotive business, which designs, manufactures and sells Jaguar luxury performance cars and Land Rover premium all-terrain vehicles. Jaguar and Land Rover have internationally recognized brands, a strong product portfolio of award winning luxury performance cars and premium all-terrain vehicles, brand specific global distribution networks and strong research and development capabilities. As part of the acquisition, we acquired the global businesses relating to Jaguar Land Rover including three major manufacturing facilities and two advanced design and engineering facilities in the United Kingdom and 26 national sales companies spread across the world.

We have a substantial presence in India and we estimate that more than four million vehicles produced by us are currently being operated in India. We believe that the recent Jaguar Land Rover acquisition represents an important milestone in our growth strategy, allowing us to participate immediately in the luxury performance car and premium all-terrain vehicle segments and enhance our global market presence.

Table of Contents

We produce a wide range of automotive products, including:

Passenger Cars. Our passenger cars include the Indica, a compact car, the new generation of the Indica, the Indica Vista launched in August 2008, the Indigo, a mid-sized car and the Indigo Marina, a station wagon version of the Indigo. These passenger cars are manufactured in gasoline and diesel engine versions. We have expanded our car lines by introducing several variants to suit different customer preferences. For example, the Indica gasoline variant, Xeta, is available also with a dual fuel (petrol and liquified petroleum gas, or LPG) engine. In March 2009 we also announced the commercial launch of the Tata Nano. Also through Jaguar we have established a presence in the premium car market. Jaguar produces four car lines XK, XF, XJ and X-Type. The new Jaguar XF saloon, successor to the S-Type, went on sale in March 2008. In early 2009 Jaguar launched new naturally aspirated and super charged 5.0 litre petrol engines in the XK, XKR, XF and XFR along with a new 3.0 litre diesel engine in the XF, giving significantly improved performance and fuel economy

Utility Vehicles. We manufacture a number of utility vehicles, or UVs, including the Sumo, and the sports utility vehicle or SUV, Tata Safari. Both the Sumo and the Safari have various variants to meet different consumer preferences such as the Safari DICOR 2.2 VTT range, powered by a new 2.2 L Direct Injection Common Rail (DICOR) engine and the Sumo Grande, an SUV with the comforts of a family car. During fiscal 2009 we launched the Xenon XT, a lifestyle pickup. We are present in the premium all-terrain vehicles market through our Land Rover SUVs. Land Rover produces five car lines under the brands of Range Rover and Land Rover. Range Rover is the premium range consisting of Range Rover and Range Rover Sport, with the Land Rover brand being made up of Defender, Discovery and Freelander vehicles

Light Commercial Vehicles. We manufacture a variety of light commercial vehicles, or LCVs, including pickup trucks, trucks and buses with GVW of between 0.7 ton and 7.5 tons. This also includes the Ace, India's first indigenously developed mini-truck with a 0.7 ton payload, the Magic, a passenger variant for commercial transportation developed on the Ace platform and the Winger.

Medium and Heavy Commercial Vehicles. We manufacture a variety of medium and heavy commercial vehicles, or M&HCVs, which include trucks, buses, dumpers and multi-axled vehicles with GVW of between 9 tons to 49 tons. In addition, through Tata Daewoo Commercial Vehicle Company Limited, or TDCV, our wholly-owned subsidiary in South Korea, we manufacture a range of high horsepower trucks ranging from 220 horsepower to 500 horsepower, including dump trucks, tractor-trailers, mixers and cargo vehicles. Recently in May 2009, we unveiled a new range of trucks, that we believe match the best in the world in performance at a lower life-cycle cost, termed as Prima, earlier referred to as World Truck, to be gradually introduced in South Korea, South Africa, the SAARC countries and the Middle East.

We believe that the foundation of our growth over the last 50 years has been a deep understanding of economic conditions and customer needs, and the ability to translate them into customer desired products through leading edge research and development. Our Engineering Research Centre, established in 1966, has enabled us to successfully design, develop and produce our own range of vehicles. We have acquired impressive engineering facilities of Jaguar and Land Rover. In addition, we established a wholly-owned subsidiary under the name Tata Motors European Technical Centre PLC, or TMETC, in the United Kingdom, in the field of automobile research and engineering. TMETC acquired Miljobil Grenland AS (Miljobil Grenland), a Norwegian company specializing in the development and manufacture of electric vehicles, in October 2008. Electric vehicles form a significant part of our ongoing strategy. Miljo Innovasjon AS, a wholly owned subsidiary of Miljobil Grenland, specializes in the development and manufacture of lithium ion batteries. This acquisition has enabled us to secure a route to market for batteries for electric vehicles and enables us to develop convenient and sustainable solutions for electric and hybrid vehicles. We believe this research center along with the capabilities of our Jaguar Land Rover business will also facilitate the development of our products, in particular, our passenger cars.

Through our subsidiary and associate companies, we are engaged in engineering and automotive solutions, construction equipment manufacturing, automotive vehicle components manufacturing and supply chain activities, machine tools and factory automation solutions, high-precision tooling and plastic and electronic components for automotive and computer applications, and automotive retailing and service operations.

Tata Technologies Limited, or TTL our 82.66% owned subsidiary, provides through its operating companies, INCAT and Tata Technologies iKS, specialized engineering & design services, product lifecycle management and product-centric IT services to leading global manufacturers. TTL's customers are among the world's premier automotive, aerospace and consumer durable manufacturers. TTL had 11 functional subsidiary

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

companies as at March 31, 2009. A few of these subsidiaries are being wound-up, liquidated or merged as part of our restructuring initiatives being undertaken with the objective of enhancing operating efficiencies by sharpening focus on its services and product business, fixing territorial responsibility for top and bottom line growth and establishing a global delivery centre supporting the overall business. The consolidated revenue for TTL was Rs.12,286 million in fiscal 2009, an increase of 12.1% from Rs.10,963 million in fiscal 2008, due to augmented relationships with existing global automotive and aerospace customers and the acquisition of new customers.

Telco Construction Equipment Company Ltd, or Telcon, is engaged in the business of manufacturing and sale of construction equipment and providing related supporting services. We own 60% of Telcon, with the remaining 40% being held by Hitachi Construction Machinery Company Limited, (HCM) Japan. In April 2008, Telcon acquired two Spanish Companies, namely Serviplem S.A and Comoplesa Lebrero S.A, by acquiring 79% and 60% shares of the respective companies. These acquisitions are expected to further strengthen the company's product capabilities.

Table of Contents

TML Distribution Company Limited or TDCL, our wholly-owned subsidiary, was incorporated on March 28, 2008. TDCL is engaged in the business of dealing and providing logistics support for distribution of our products throughout India. TDCL has commenced operations in August 2008.

Our wholly-owned subsidiary, Tata Motors Finance Limited, or TMFL, was incorporated on June 1, 2006 with the objective of becoming a preferred financing provider for our dealer's customers by capturing customer spending over the vehicle life-cycle relating to vehicles sold by us. In India, TMFL is registered with the RBI as a Systemically Important Non-Deposit Taking Non-Banking Financial Company and is classified as an Asset Finance Company under the RBI's regulation on Non-Banking Finance Companies. For the year ended March 31, 2009, TMFL made disbursements of approximately Rs.49,000 million.

Our wholly-owned subsidiary, Tata Motors Insurance Services Limited, now known as Tata Motors Insurance Broking and Advisory Services Limited undertakes the business of insurance and reinsurance broking, which commenced business in July 2008.

As of March 31, 2009, our operations included 74 consolidated subsidiaries and 7 equity method affiliates, in respect of which we exercise significant influence.

As of March 31, 2009, we had approximately 49,473 permanent employees, including approximately 25,835 permanent employees at our consolidated subsidiaries.

Tata Incorporated serves as our authorized United States representative. The address of Tata Incorporated is 3 Park Avenue, 27th Floor, New York, NY 10016, United States of America.

Our Registered Office is located at Bombay House, 24, Homi Mody Street, Mumbai 400 001, India and our telephone number is +91-22-6665-8282 and our website address is www.tatamotors.com. Our website does not constitute a part of this annual report.

B. Business Overview.

We primarily operate in the automotive segment. Our automotive segment operations includes all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. The acquisition of Jaguar Land Rover is intended to expand our presence into the premium car market. The integration of Jaguar Land Rover into our automotive business is in progress, pending which we have bifurcated our automotive segment into Tata vehicles and Jaguar Land Rover business for the year ended March 31, 2009.

Our other operations business segment includes information technology, or IT services, construction equipment manufacturing, machine tools and factory automation solutions, high-precision tooling and plastic and electronic components for certain applications and investment business.

Our Strategy

We believe that we have established a strong position in the Indian automobile industry by launching new products, investing in research and development and maintaining our financial strength. We have also benefited from the expansion of our manufacturing and distribution network. Our goal is to position ourselves as a major international automotive company by offering products across various markets by combining our engineering and other strengths and through strategic acquisitions. Our strategy to achieve these goals consists of the following elements:

Leveraging our capabilities: We have an extensive range of products in commercial vehicles (for both goods and passenger transport) as well as passenger vehicles. We have plans to leverage this broad product base further with our strong brand recognition in India, our understanding of local consumer preferences, well developed in-house engineering capabilities and extensive distribution network.

We believe that our in-house research and development capabilities, our subsidiary TDCV in South Korea, our association with Hispano in Spain, our joint ventures with Marcopolo of Brazil in India and with Thonburi in Thailand, our relationship with Fiat and our acquisition of the Jaguar Land Rover business will enable us to expand our product range and extend our geographical reach. We launched the Ace, the first sub one-ton payload mini-truck in India, in May 2005, which has created a new category in the Indian commercial vehicle industry and we rolled out the 100,000th Ace in a record time of 22 months since its launch. In fiscal 2008 we launched the Magic, a passenger variant from the same platform, to tap into the potential increase in mass passenger transport in both rural and urban regions. We also launched the Winger, India's only maxi-van, to cater to the intra-city and long-distance transportation needs of our customers. Similarly we believe that the manufacturing prowess of the joint venture with Marcopolo was proven in the execution of the 650 buses order we received from Delhi Transport Corporation (DTC) in 2007. Based upon the performance of these vehicles, we received another order of 1625 buses to be supplied to DTC.

Table of Contents

In passenger vehicles, we entered the compact car segment with the Indica in 1998. We sold approximately 100,000 units of Indica within 25 months of its launch in the market. On the same platform, we developed a sedan version, the Indigo, which was launched in 2002. We also launched an estate version in 2004. In 2006, we expanded the Tata Indigo range by launching the Tata Indigo XL – the country's first stretched sedan concept. We are currently working to upgrade and expand our product offerings in the passenger car market. In August 2008, we launched the new generation of the Indica, the Indica Vista, with options of diesel and gasoline engines, from our joint venture with Fiat as well as our own engines and have plans to launch the next generation sedan in the near future. We have also conceptualized, developed and commercially launched the Nano, a low cost car for safe family transportation, breaking several conventional ideas of automobile development. We believe that this product will enable us to capture a strong share of a large potential market for safe and affordable transportation. Our investment in Miljobil Grenland will also enable us to develop convenient and sustainable solutions for electric and hybrid vehicles. The recent acquisition of Jaguar Land Rover has given us the opportunity to participate immediately in the luxury performance car and premium all-terrain vehicle segments with globally recognized brands and has diversified our business across markets and product segments. We will continue to build upon the internationally recognized brands of Jaguar Land Rover.

Mitigating cyclicality: The automobile industry is impacted by cyclicality. To mitigate the impact of cyclicality, we plan to continue to strengthen our operations through significant presence across different segments, wide range of products and geographies. We also plan to continue to strengthen our non-vehicle business, such as spare part sales, annual maintenance contracts, sales of aggregates for non-vehicle businesses, reconditioning of aggregates, sale of castings, production aids and tooling and fixtures to reduce the impact of cyclicality.

Expanding our international business: We have a two-fold strategy of expanding our operations into other geographic areas, through strategic acquisitions and by expanding our product range into select geographies where we have an opportunity to grow in markets with similar characteristics to the Indian market. Our international business strategy has already resulted in the continuous growth of our international operations over the past three fiscal years. For example, we have consolidated our position in the Ukraine to become the largest competitor in the light bus market under seven meters and the third largest competitor in the seven ton GVW light truck segment, in terms of unit sales. TDCV continues to be the largest exporter of heavy commercial vehicles from South Korea. Additionally our acquisition of Jaguar Land Rover has significantly expanded our geographical presence. While we continue to export from India and South Korea into many of these markets, we are also establishing a manufacturing footprint where it is beneficial to do so. We have established a Subsidiary along with Thonburi in Thailand to manufacture pickup trucks and have also received approval from the Thailand government for the Eco-car project. During fiscal 2008, we established a joint venture company to undertake manufacture and assembly operations of our in South Africa, which has been one of our largest export market from India in terms of unit volume.

Reducing costs and breakeven points: We believe that our scale of operations provides us with a significant advantage in reducing costs and we plan to continue to sustain and enhance our cost advantage. While we believe that our commercial vehicle business has scale that is competitive in relation to global standards, with the launch of the Tata Nano, we will be able to benefit from global economies of scale in the passenger vehicle business as well.

Our ability to leverage our technology capabilities and our manufacturing facilities among our commercial vehicle and passenger vehicle businesses enables us to reduce cost. For example, the diesel engine used in our Indica was modified for use in the Ace, which helped to reduce the project cost of the Ace. Similarly, platform sharing for the manufacture of pickup trucks and UVs enables us to reduce capital investment that would otherwise be required while allowing us to improve the utilization levels at our manufacturing facilities. Where it is advantageous for us to do so, we intend to add our existing low cost engineering and sourcing capability to vehicles manufactured under the Jaguar Land Rover umbrella.

Our vendor relationships also contribute to our cost reductions. For example, we believe that the vendor rationalization program that we are undertaking will provide economies of scale to our vendors which would benefit our cost programs. We are also undertaking various internal and external benchmarking exercises that would enable us to improve the cost effectiveness of our components, systems and sub-systems.

In response to the recent economic slowdown, we have further intensified efforts to review and realign our cost structure. We have adjusted our production in line with demand and undertaken steps to reduce overheads such as manpower costs and other fixed costs. In our Indian manufacturing locations we undertook block closures of plants to synchronize supply with demand and also reduced our flexible manpower. Similarly our Jaguar Land Rover business undertook steps to reduce production and also entered into an agreement with its labour unions for a pay freeze until 2010 and also reduced headcount. Further, Jaguar Land Rover is exploring opportunities to reduce the raw material costs through increase in sourcing from low cost countries.

Continuing focus on high quality and enhancing customer satisfaction: One of our principal goal is to achieve international quality standards for our products and services and we are pursuing various quality improvement programs, both internally and at our suppliers' premises. We have established a procedure for ensuring quality control of outsourced components. Products purchased from approved sources undergo a supplier quality improvement process. We also have a program for assisting vendors from whom

Table of Contents

we purchase raw materials or components to maintain quality. Each vendor is reviewed on a quarterly basis on parameters of quality, cost and delivery. Preference is given to vendors with QS-9000 certification. We also maintain a stringent quality assurance program that includes random testing of production samples, frequent re-calibration of production equipment and analysis of post-production vehicle performance and ongoing dialogue with workers to reduce production errors.

Our extensive sales and service network has also enabled us to provide quality and timely customer service. We are in advanced stages of deploying a Siebel customer relations management system at all dealerships and offices across India, which we believe will help to improve our responsiveness to market and customer service needs.

The new Jaguar XF saloon has received more than 20 international awards, most recently 'Britain's Best Car' in the Auto Express Driver Power survey for 2009, 'Best Executive Car' at the What Diesel Magazine awards 2009 and the award for 'Best Executive Car' at the 2009 Fleet World Honours. It was previously voted 'Car of the Year' by What Car? Magazine. The XJ 2.7 Litre Diesel has been named Britain's greenest luxury car in the Environmental Transport Association's 2009 Car Buyers Guide for a third successive year. Jaguar was also ranked No. 1 in J.D. POWER. Customer Service Index (CSI) and Sales Satisfaction Index (SSI) Study for 2008 in the United States.

Enhancing capabilities through the adoption of superior processes: Tata Sons Limited, or Tata Sons, and the entities promoted by Tata Sons, including us, aim at improving the quality of life through leadership in various sectors of national economic significance. In pursuit of this goal, Tata Sons and the Tata Sons promoted entities have institutionalized an approach, called the Tata Business Excellence Model or TBEM, which has been formulated on the lines of the Malcolm Baldrige National Quality Award to enable them to drive performance and attain higher levels of efficiency in their businesses and in discharging social responsibility. The model aims to nurture core values and concepts embodied in various focus areas such as leadership, strategic planning, customers, markets and human resources to be translated to operational performance. Our adoption and implementation of this model seek to ensure that our business can be conducted through superior processes in the future.

We have deployed a balance score card (BSC) management system, developed by Dr. Robert Kaplan and Dr. David Norton of the Harvard Business School for measurement based management and feedback. We have also deployed a new product introduction (NPI) process for systematic product development and product lifecycle management system for effective product data management across our organization. On the human resources front, we have adopted various processes to enhance the skills and competencies of our employees. We have also enhanced our performance management system, with appropriate mechanisms to recognize talent and sustain our leadership base. We believe these will enhance our way of doing business, given the dynamic and demanding global business environment.

Customer financing: With financing increasingly becoming a critical factor in vehicle purchases and the rising aspirations of consumers in India, we intend to expand our vehicle financing activities to enhance our vehicle sales. Further, in a scenario where there is lack of sufficient finance availability to vehicles in the Indian market as was witnessed in last two fiscal years, our captive finance business is expected to play a significant role to fill the gap created by other banks and Non Banking Financial Companies, while we will continue to focus on expanding our vehicle financing activities through our 100% subsidiary, Tata Motors Finance Limited, or TMFL.

Continuing to invest in technology and technical skills: We believe, we are one of the most technologically advanced indigenous vehicle manufacturers in India. Over the years, we have enhanced our technological strengths through extensive internal research and development activities. Our research and development resources, which include those at our subsidiaries, like TMETC, TDCV, TTL and Hispano together with the two advanced engineering and design centers of Jaguar Land Rover we recently acquired, further increase our capabilities in product design, manufacturing and quality control. In our Jaguar Land Rover business, we are committed to continue to invest in new technologies to develop products that meet the opportunities of the premium segment, including developing sustainable technologies to improve fuel economy and reduce CO2 emissions. We consider technological leadership to be a significant factor in continued success, and therefore intend to continue to devote significant resources to upgrade our technological base.

Maintaining financial strength: Our cash flow from operating activities in fiscal 2009 and 2008 was Rs. 25,194 million and Rs. 23,114 million respectively. Our net income declined in fiscal 2009, due to sudden and significant deterioration of the world economy, resulting in a significant decline in sales volumes, which affected our income and operating cash flow. However, our net change in working capital has improved. We continue to work on implementation of cost reduction programs, prudent working capital management to improve the cash flows at our automotive operations. We have established processes for project evaluation and capital investment decisions with an objective to enhance our long term profitability.

Leveraging brand equity: We believe the Tata brand name is associated by Indian customers with reliability, trust and value and is gaining significant international recognition due to the international growth strategies of various Tata Sons promoted entities. The Tata brand is used and its benefits are leveraged by Tata Companies to their mutual advantage. We recognize the need for enhancing our brand recognition in highly competitive markets in which we compete with internationally recognized brands. We, along with Tata Sons and other Tata Companies, will continue to promote the Tata brand and leverage its use in India, as well as in various international markets where we plan to increase our

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

presence. Supported by the corporate level Tata brand, our product brands like Indica, Indigo, Sumo, Safari, Nano and Ace, along with Daewoo, Hispano, Jaguar, Range Rover and Land Rover are highly regarded, and will be nurtured and promoted.

Table of Contents**Automotive Operations**

In total we sold 672,747 and 597,197 vehicles in fiscal 2009 and 2008 respectively, consisting of 505,399 units of Tata vehicles (including TDCV and Hispano) and 167,348 units of Jaguar Land Rover vehicles in fiscal 2009. In terms of units sold our largest market is India where we sold 461,825 and 530,547 units during fiscal 2009 and 2008 (constituting 68.6% of total sales in fiscal 2009) followed by United Kingdom where we sold 38,630 units in fiscal 2009 (constituting 5.7% of total sales). A geographical breakdown of our revenues is set forth in Item 5.A Operating Results Geographical breakdown .

Our total sales (including international business sales and Jaguar Land Rover sales) for fiscal 2009 and 2008 are set forth in the table below:

Category	Fiscal 2009		Fiscal 2008	
	Units	%	Units	%
Passenger Cars	214,019	31.8%	182,291	30.5%
Utility Vehicles	159,340	23.7%	50,130	8.4%
Light Commercial Vehicles	160,787	23.9%	173,382	29.0%
Medium and Heavy Commercial Vehicles	138,601	20.6%	191,394	32.1%
Total	672,747	100.0%	597,197	100.0%

The revenues from our automotive operations were Rs.691,778 million and Rs.337,040 million in fiscal 2009 and 2008, respectively. Tata vehicles (including spares and financing thereof) constituted 43.5% of our total automotive revenues before inter-segment elimination in fiscal 2009 while Jaguar Land Rover constituted 56.5%.

Note: Jaguar Land Rover vehicle sales are included from June 2, 2008.

Tata Vehicles (including spares and financing thereof)

In all we sold 505,399 and 597,197 units of Tata vehicles in fiscal 2009 and 2008 respectively. Of this 461,825 units were sold in India while sales outside of India were 43,533 units in fiscal 2009, compared to 530,547 units and 66,650 units respectively for fiscal 2008. Our share in the Indian four-wheeler automotive vehicle market (i.e., automobile vehicles other than two and three wheeler categories) declined from 26.1% in fiscal 2008 to 24.4% in fiscal 2009 mainly on account of a mature product portfolio in passenger vehicles and a relatively larger decline in M&HCV industry volumes in fiscal 2009, where we are the market leader.

The following table sets forth our Total sales of Tata Vehicles:

Category	Fiscal 2009		Fiscal 2008	
	Units	%	Units	%
Passenger Cars	166,962	33.0%	182,291	30.5%
Utility Vehicles	39,049	7.7%	50,130	8.4%
Light Commercial Vehicles	160,787	31.9%	173,382	29.0%
Medium and Heavy Commercial Vehicles	138,601	27.4%	191,394	32.1%
Total	505,399	100.0%	597,197	100.0%

The following table sets forth our market share in various categories in the Indian market-based on wholesale volumes:

Category	Fiscal 2009	Fiscal 2008
Passenger Cars	13.2%	14.2%
Utility Vehicles	17.6%	20.1%

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Light Commercial Vehicles	65.4%	64.4%
Medium and Heavy Commercial Vehicles	61.9%	60.4%
Total Four-Wheel Vehicles	24.4%	26.1%

Note: Passenger cars include Fiat vehicles distributed by us.

Table of Contents

Our performance in various categories of the Indian market is described below:

Passenger cars: Adverse liquidity conditions, a high interest rate environment and overall negative sentiment significantly impacted the demand for passenger cars during fiscal 2009. Despite new product launches and promotion spends by us and our competitors the domestic passenger car industry declined by 1% in fiscal 2009.

The small car category, which consists of mini and compact cars, constitutes over 60% of total domestic passenger car sales in India. In fiscal 2009, the small car category growth decelerated to just .0.7% to 936,500 units, despite of new product launches. The sales of Indica declined by 21.9% to 105,739 units, mainly due to the phasing out of the older Indica variants during the first half of the fiscal year and a delay in volume ramp after the introduction of the second generation Indica Vista in the later part of the year. In commemoration of 10 years since the launch of the Indica, during which time about 940,000 Indicas and over 1.2 million cars have been produced from the platform, we launched a Limited Edition of the Indica Vista in December 2008. We also expanded customer choice through the launch of an LPG version of the Indica V2 Xeta. The Indica's market share declined from 14.6% in fiscal 2008 to 11.9% in fiscal 2009 in the small car (mini + compact) category. Our market share has been rising since the launch of the Indica Vista in August 2008 growing to 14.5% for March 2009.

The much awaited Tata Nano was launched in March 2009. The Tata Nano is Bharat Stage III emission norms compliant and Bharat Stage IV ready. It comes with an all-new 2-cylinder aluminium MPFI 624 cc petrol engine mated to a four-speed gear box and is available in three variants. With a length of just 3.1 metres, width of 1.5 metres and height of 1.6 metres, the Tata Nano has the smallest exterior footprint for a car in India, but is 21% more spacious than the smallest car available today. A high seating position makes ingress and egress easy. Its small size coupled with a turning radius of just 4 metres, makes it extremely maneuverable in the smallest of parking slots. The car has been certified by the Automotive Research Association of India (ARAI) under mandated test conditions to have a fuel efficiency of 23.6 km/litre, which is the highest for any petrol car in India. Higher fuel efficiency, coupled with a low curb weight of 600 kg, ensures that the Tata Nano has the lowest CO2 emission amongst cars in India. There was an overwhelming response for paid bookings.

We are also present in the entry mid-size car category through our sedan, the Indigo, and its station wagon version, the Indigo Marina, which are both derived from the Indica platform. The entry mid-size car category grew by 54.6% in fiscal 2009 aided by new product launches. The Indigo CS is a sub-4 meter sedan that has the foot print and price point of a hatchback and the appeal of the sedan. Launched in the last quarter of fiscal 2008, the Indigo CS continued to receive an encouraging market response in fiscal 2009. This saw our sales grow by 51.1% to 47,447 vehicles in this category, with a market share of 32.8%.

We have also been distributing Fiat branded cars through the Tata-Fiat dealer network since March 2006. During fiscal 2009, we sold 7,149 Fiat cars. The Fiat 500 was launched in the market as a CBU and has done well to shore up the brand image of Fiat prior to the launch of its locally manufactured new products. We also entered the upper mid size category through the distribution of the newly launched Fiat Linea in January 2009. The product received a good response from the market and became the second highest seller in the segment in the three months of launch in the fiscal. With Fiat 500, Palio and Linea, Fiat acquired a position among the top ten car companies in the country. The joint dealer network has also been expanded from 65 in fiscal 2008 to 79 as of March 31, 2009.

Utility Vehicles: The Utility Vehicle market witnessed severe compression due to the increase in fuel prices and an additional excise duty imposed by the Government on vehicles with higher engine displacements, in the first half of the year. Despite a number of new product launches, the segment declined by 6.5% in fiscal 2009. We sold 38,371 units in our UV category in the Indian domestic market in fiscal 2009, a decline of 19.3% as compared to 47,531 units sold in fiscal 2008, ending the year with a market share of 17.6%, while regaining the second position in the segment this year, compared to the previous year. During fiscal 2009 we launched the Xenon XT – a lifestyle pickup vehicle in its effort to develop a new segment.

Light Commercial Vehicles (including pickups): Our range of LCVs includes small commercial vehicles, pickup trucks, trucks and commercial passenger carriers up to 7.5 GVW. The LCV segment was also impacted due to the lack of liquidity for customer financing and slowing economic activity, growing by a mere 1.2% during fiscal 2009. Our sales declined by 2.9% to 142,985 units. Our market share on a wholesale basis however improved to 65.4% in fiscal 2009 from 64.4% in fiscal 2008. During fiscal 2009, we launched the Winger Ambulance and broke the long standing monopoly of the incumbent in this segment.

Medium and Heavy Commercial Vehicles: Our M&HCVs have a wide range of applications and are generally configured as trucks, tippers, buses, tankers, tractors or concrete mixers. The M&HCV category was the most impacted by the economic slowdown and financing inadequacy shrinking by about 33% during fiscal 2009. Despite the adversities, we continued to strengthen our product portfolio in this segment by introducing multi-axle and heavy duty trucks, tippers and tip trailers to our existing offerings. We also strengthened our M&HCV passenger range by launching the Super Milo range of buses with superior operating economics, and the Hi Deck Coaches in association with Hispano – our Spanish subsidiary. During fiscal 2009, our M&HCV volumes declined 27.7% to 119,745 units, compared to 165,624 units in fiscal 2008. Our market share in the M&HCV category improved from 60.4% to 61.9%.

Table of Contents

During fiscal 2009, the bus manufacturing facility of Tata Marcopolo Motors Limited at Dharwad began commercial production. This joint venture will enable us to address India's growing need for world class fully built buses for intra-city and inter-city transportation with comfort, quality and safety of international standard.

Tata Vehicles Sales and Distribution:

Our sales and distribution network in India as of March 2009 comprised over 1,500 sales outlets for our passenger and commercial vehicle business. In line with our growth strategy, we formed a 100% subsidiary, TML Distribution Company Limited, or TDCL, in March 2008 to act as a dedicated logistics management company to support the sales and distribution operations of our vehicles in India. We believe this will improve the efficiency of our selling and distribution operations and processes.

TDCL will take over and/or set up stocking points for both commercial vehicles and passenger vehicles, in the places of manufacture and also at different places throughout India. TDCL will help improve planning, inventory management, transport management and on-time delivery. As a focused entity, we believe it will make delivery and inventory management more efficient.

Additionally, we have completed the initial rollout of a new customer relations management system, which has been certified by Oracle as the largest Siebel deployment in the automotive market at all our dealerships and offices across the country. Being implemented in phases since 2003, the combined online customer relations management system initiative supports users both within the Company and among our distributors in India and abroad.

Through our vehicle financing division and wholly owned subsidiary, Tata Motors Finance Limited, or TMFL we also provide financing services to purchasers of our vehicles through our independent dealers, who act as our agents, and through our branch network. During fiscal 2008 and 2009, approximately 34% and 31%, respectively, of our vehicle unit sales in India were made by the dealers through financing arrangements where our captive vehicle financing divisions provided the credit. Total vehicle finance receivables outstanding as at March 31, 2009 and 2008 amounted to Rs.158,803 million and Rs.163,960 million, respectively.

We use a network of service centers on highways and a toll-free customer assistance center to provide 24-hour on-road maintenance (including replacement of parts) to vehicle owners. We believe that the reach of our sales, service and maintenance network provides us with a significant advantage over our competitors.

We also market our commercial and passenger vehicles in several countries in Europe, Africa, the Middle East, Australia, South East Asia and South Asia. We have a network of distributors in almost all of the countries where we export our vehicles, who work with us in appointing a local dealer for sales and servicing our product in various regions. We have also stationed overseas resident sales and service representatives in various countries to oversee our operations in their respective territories.

Tata Vehicles Competition:

We face competition from various domestic and foreign automotive manufacturers in the Indian automotive market. Improving infrastructure and robust growth prospects compared to other mature markets, is now attracting a number of international companies to India who have either created joint-ventures with local partners or have established independently owned operations in India. Global competitors bring with them decades of international experience, global scale, advanced technology and significant financial resources. Hence competition is likely to further intensify in the future.

We have designed our products to suit the requirements of the Indian market based on specific customer needs such as safety, driving comfort, fuel efficiency and durability. We believe that our vehicles are suited to the general conditions of Indian roads, and the local climate and they comply with applicable environmental regulations currently in effect. We also offer a wide range of optional configurations to meet the specific needs of our customers. We intend to and are developing products to strengthen our product portfolio in order to meet the increasing customer expectation of owning world class products.

Tata Vehicles Seasonality:

Demand for our vehicles in the Indian market is subject to seasonal variations. Demand generally peaks between January and March, although there is a decrease in demand in February just before release of the Indian Fiscal Budget. Demand is usually lean from April to July and picks up again in the festival season from September onwards with a decline in December due to year end.

Tata Vehicles Exports:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

We are expanding our export operations, which have been ongoing since 1961. We market our commercial and passenger vehicles in several countries in Europe, Africa, the Middle East, Australia, South East Asia and South Asia. Our exports of vehicles manufactured in India declined by 38.6% in fiscal 2009 to 33,536 units from 54,628 units in fiscal 2008. In fiscal 2009, exports volumes were mainly impacted by the global economic slowdown and credit crunch especially, in prime markets which witnessed adverse impact on automotive demand.

Table of Contents

In fiscal 2009, our top five export destinations from India accounted for approximately 48% and 50% of our exports of commercial vehicles and passenger vehicle units respectively. Our exports were adversely impacted during fiscal 2009 due to by the global economic slowdown and credit crunch especially, in prime markets which witnessed adverse impact on automotive demand. We are strengthening our position in the geographic areas we are currently operating in and exploring possibilities of entering new markets with similar market characteristics to the Indian market.

Tata Daewoo Commercial Vehicle Co. Ltd., Korea: TDCV recorded a 21.9% decline in its overall vehicle sales to 9,137 units in fiscal 2009 from 11,692 units in fiscal 2008, before inter-segmental elimination. In the South Korean market, TDCV's performance was impacted by adverse liquidity conditions, high interest rates and higher base effect as a result of pre-purchases by the customers in fiscal 2008 prior to the switch from Euro III to Euro IV, effective in January 2008. In South Korea, TDCV's market share declined to 27.1% in fiscal 2009 from 33.5% in fiscal 2008 in the M&HCV category, adversely impacted largely by vendor constraints. On the exports front, TDCV registered growth of 29% to 4,280 units including CKDs in fiscal 2009, compared to fiscal 2008.

TDCV vehicles are assembled primarily from aggregates and components manufactured in South Korea. However, some major aggregates are sourced from the United States and various European component suppliers. In the South Korean market, TDCV uses Daewoo Motor Sales Corporation's distribution network, which is the largest in South Korea. After-sales service is made available through 69 service centers and over 110 parts outlets. Exports are carried out largely through TDCV's own international distribution channel.

The management initiatives and business processes of Tata Sons and the Tata Sons promoted entities have also been implemented at TDCV. Relations between the management and the labor union of TDCV continue to be cordial.

Hispano Carrocera, S.A. Spain: We believe that our subsidiary Hispano, with its design and development capabilities in manufacturing bodies for high-end buses, will complement our current range of light and medium commercial passenger carriers. We believe that this investment will also help to increase our presence in the international bus market. We own the brand rights of Hispano. Hispano reported sale of 271 units for the period of January 2008 to March 2009. The volume decline from 328 units sold during the calendar year 2007 was mainly on account of the general economic downturn which has resulted in a slow-down of the bus market and increasing competition from original equipment manufacturers.

Jaguar Land Rover

On June 2, 2008, we completed the acquisition of Jaguar Land Rover from Ford. As part of the acquisition we acquired the global businesses relating to Jaguar Land Rover including three vehicle manufacturing facilities, one veneer production facility, two advanced design centers, 26 national sales companies, intellectual property rights (including perpetual royalty free licenses), and brands and trade marks.

The strengths of Jaguar Land Rover include its internationally recognized brands, strong product portfolio of award winning luxury performance cars and premium all-terrain vehicles, global distribution network, strong research and development capabilities, and a strong management team which has strengthened its business operations.

Our total sales of Jaguar Land Rover from June 2, 2008 to March 2009 are set forth in the table below:

Category	June 2, 2008 to March 31, 2009	
	Units	%
Jaguar	47,057	27.1%
Land Rover	120,291	72.9%
Total	167,348	100.0%

Jaguar: Jaguar's principal products are the X-Type, XF, XJ and XK. The Jaguar X-Type is a compact-size four-door sedan available with a range of petrol and diesel engines, manual and automatic transmissions. The Jaguar XF is medium-size four-door sports sedan, available with a range of turbocharged V6 diesel and V6/V8 petrol engines and standard automatic transmission. The Jaguar XJ is an all-aluminium large-size four-door sedan, offered with a range of V6 turbocharged diesel engines or V8 petrol engines, naturally aspirated and supercharged. The Jaguar XK is an all-aluminium sports coupe and convertible available with naturally aspirated and supercharged V8 petrol engines.

Table of Contents

Land Rover: Land Rover's principal products are the Defender, Freelander 2 (LR2), Discovery (LR3), Range Rover Sport and Range Rover. The Defender is Land Rover's most capable off-roader. The Freelander 2 (LR2) is versatile for both urban sophistication and off-road capability. The Range Rover Sport is the most exhilarating Land Rover which fuses the excitement of a Sports Tourer with the versatility of a Land Rover. The Range Rover is the flagship of the brand with a unique blend of pure British luxury, classic design with distinctive, high quality interiors and legendary ability. Land Rover products offer a range of powertrains:- turbocharged V6 diesel, V6 petrol engines and V8 naturally aspirated and supercharged petrol engines; together with manual and automatic transmission. Land Rover's global market share in the Premium SUV market stood at 14.9% in calendar year 2008.

From August 2008, the automotive industry faced extraordinarily difficult market conditions. The global financial crisis has impacted the world automotive industry and the effect on the premium market has been particularly pronounced, with industry volumes estimated to have fallen between 25% and 30%. There had been a progressive weakening of the economies of the United States, the UK and Europe which has had a negative impact on volumes. The credit crunch constrained business and consumer spending, particularly in the United States, the UK and Europe coupled with a significant fall in consumer confidence. Adverse market conditions in the United States, the UK and Europe have been partially offset by growth in developing markets such as China, Russia, Middle East and Eastern Europe.

Jaguar Land Rover unit sales (wholesales) in total were down by 32% during the period June 2, 2008 to March 31, 2009 compared to corresponding period last year. Jaguar volumes fell marginally by 3.6% during this reporting period compared to the same period last year, primarily as a result of the success of the all new XF launched in 2008. Land Rover volumes have fallen by 39.2% during the period June 2008 to March 2009, compared to period June 2007 to March 2008. Strong growth in the early part of the reporting period resulted in Russian volumes growing by 10%. However retail growth continues in Russia and China where volumes have grown by 41% and 40%.

Jaguar Land Rover's performance in key geographical markets on retail basis

United States

The US industry volumes were down 18.1% in the year ended December 2008, compared to the year ended December 2007. The worst performing segment was the Large SUV which was down by 38% in 2008 compared to 2007, Small SUV and Medium SUV were both down by 36%. Of the segments relevant to Jaguar, Luxury Sport and Upper Luxury were down 29% and 30% respectively, with only the Medium Luxury car segment, down by 20%, being close to the overall industry movement.

Jaguar retail volumes for the period January to December 2008 were 5.5% down compared to 2007, relatively strong compared to the relevant segment trends, which was largely due to the positive market reaction to the new Jaguar XF, launched in the United States in March 2008. Jaguar's share of the premium car segment was 1.3% in 2008.

Land Rover retail volumes during the calendar year 2008 were down 40% compared to 2007. Land Rover's share of the premium SUV segment was 5.6% in 2008, compared to 7.2% in 2007.

UK

The UK car market experienced a significant decline during January to December 2008 as a result of the credit crisis and other worsening macro economic factors. Full year industry volumes were down over 12% compared with 2007, with the off road vehicle segment particularly badly affected.

Jaguar retail volumes during the calendar year 2008 grew by 8.6% compared with 2007, a strong performance against the industry trend and largely driven by favourable market reaction to the new Jaguar XF, launched in the UK in March 2008.

Land Rover retail volumes during 2008 declined by 26.9% compared to 2007.

Europe (excluding Russia)

Across the major markets (Germany, France, Spain and Italy), the overall market conditions were broadly similar to those experienced in the UK, with substantial declines between January and March 2009 compared to corresponding period of the previous year. Vehicle scrapping incentive schemes in Germany and France did have some effect on overall volumes, but the impact on the premium car and off road segments is minimal. Full year industry volumes were down over 14.4% compared with 2007.

Table of Contents

Jaguar retail volumes grew 14.5% in 2008 while Land Rover retail volumes declined by 28.2% in 2008 in comparison with 2007.

Russia

Automotive market and Land Rover volume growth continued through 2008. Jaguar retail volumes grew by 51.4% in 2008 while Land Rover retail volumes grew by 61.6% compared with 2007. However demand in recent months has shown some weakness and it appears that future trading conditions may be challenging. Whilst the downturn has slowed Land Rover's expansion plans, Land Rover maintains its position as the number one premium brand in Russia, outselling its competitors. Rouble exchange volatility and credit restrictions, continue to severely affect the total automotive market, including Jaguar Land Rover.

China

For the period June 2008 to March 2009, the imported vehicle segment of the Chinese automotive industry increased by 20% compared to the same period in 2007, outperforming overall industry growth at 8%.

There was a significant increase in consumption tax from September 1, 2008, which affected vehicles with an engine capacity of over 3.0 litres. Vehicles with an engine capacity of between 3.0 and 4.0 litres had taxes and duties increased 23%. On vehicles with an engine capacity in excess of 4.0 litres the combined tax burden increased 61%.

Jaguar retail volume grew by 26.1% compared to 2007 largely due to the success of the new Jaguar XF, launched in China in June 2008.

Land Rover retail volume for the period grew by 69% compared to 2007. A decline in the retail sales rate was noticeable from September/October 2008 and corresponds to the introduction of the consumption tax change mentioned above as many of the Land Rover products sold in China have V8 petrol engines with capacities in excess of 4.0 litres.

Jaguar Land Rover Sales & Distribution:

We distribute Jaguar Land Rover vehicles in 168 markets across the world. Sales locations for Jaguar Land Rover vehicles are operated as independent franchises. Jaguar Land Rover is represented in its key markets through national sales companies as well as third party importers. Jaguar and Land Rover have regional offices in certain select countries that manage customer relationships, vehicle supplies and provide marketing and sales support to their regional importer markets. The remaining importer markets are managed from the UK.

We also sell Jaguar Land Rover vehicles to our dealerships for sale to fleet customers, including rental car companies, commercial fleet customers, leasing companies, and governments. We do not depend on any single customer or group of customers to the extent that the loss of such customer or group of customers would have a material adverse effect on our business.

Prior to our acquisition of Jaguar Land Rover, Ford Motor Credit Company provided automotive financial services to a number of dealers and customers of Jaguar Land Rover. Under agreements with Ford, Jaguar Land Rover's dealers and customers will continue to have access to Ford Motor Credit's financing facilities for a period of up to 12 months in various markets following our acquisition of Jaguar Land Rover, while Jaguar Land Rover migrates to alternative arrangements. Jaguar Land Rover has now transitioned to financing arrangements with FGA Capital (JV between Fiat Auto and Credit Agricole) in UK/Europe and Chase Auto Finance in the US and local providers in certain other key markets.

Jaguar Land Rover Competition:

Jaguar Land Rover operates in a globally competitive environment and faces stiff competition from established premium and other vehicle manufacturers who aspire to move into the luxury performance car and premium SUV segments. Jaguar vehicles compete primarily against other European brands such as BMW, Mercedes Benz and Audi. Land Rover vehicles compete largely against SUVs manufactured by Audi, BMW, Infiniti, Lexus, Mercedes Benz, Porsche and Volkswagen. The Land Rover Defender competes with vehicles manufactured by Isuzu, Nissan and Toyota.

Jaguar Land Rover Seasonality:

The business of Jaguar Land Rover is impacted by the bi-annual registration of vehicles in the United Kingdom where the vehicle registration number changes every six months, which in turn has an impact on the resale value of the vehicles. This leads to a bunching up of sales during the periods when the change occurs. Most other markets are driven by introduction of new model year derivatives. Furthermore, western

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

European markets tend to be impacted by summer and winter holidays. The resulting sales profile influences operating results on a quarter to quarter basis.

Table of Contents

Research and Development:

Our research and development activities focus on product development, environmental technologies and vehicle safety. Our Engineering Research Centre, or ERC, established in 1966, which is one of the few government recognized in-house automotive research and development centers in India. We are also widening the scope of our research and development activities from in-house product and technology development to managing the research and development process across various internal and external agencies, including our research and development centers in South Korea, Spain and the United Kingdom, as well as at various aggregate parts suppliers and outsourcing partners.

One of the most significant achievements of our ERC has been the design and development of our compact car the Indica, which is India's first indigenously developed compact car. ERC also designed our mid-size car the Indigo, which was launched in 2002 and has been the market leader in the entry mid-size market category in India. We have also developed the Tata Nano, an affordable family car, which was launched in March 2009. We believe that the Tata Nano, which has charted a new path in low cost design in the global automobile industry, signifies the progression of our in house capabilities. The customer response to the product has been very encouraging during the initial booking process conducted in April 2009.

During fiscal 2006, we established our wholly-owned subsidiary, TMETC, in the United Kingdom to augment the abilities of our Engineering Research Centre. We believe that TMETC provides us with an access to leading-edge technologies and supports the product development activities, which we currently plan to undertake for the future in order to sustain and enhance our position in the increasingly competitive global markets. TMETC's investment in Miljobil Grenland in fiscal 2009 would enable us to develop convenient and sustainable solutions for electric and hybrid vehicles.

We endeavor to absorb the best of technologies for our product range to meet the requirements of a globally competitive market. All of our vehicles and engines are compliant with the prevalent regulatory norms in India and also in the countries to which they are exported. In addition, our research and development activities also focus on developing vehicles running on alternative fuels, including CNG, liquefied petroleum gas, bio-diesel and compressed air and electric cars. We are in a constant endeavor to develop green vehicles and are presently developing an electric vehicle on the Indica Vista platform. We are pursuing alternative fuel options such as ethanol blending for development of vehicles fuelled by hydrogen. Initiatives in the area of vehicle electronics such as engine management systems, in-vehicle network architecture, telematics for communication and tracking and other emerging technological areas are also being pursued and which could possibly be deployed on our future range of vehicles. Likewise various new technologies and systems that would improve safety, performance and emissions of our product range are under implementation on our passenger cars and commercial vehicles.

Our acquisition of TDCV provided us with a significant advantage in the development process of our World Truck, now referred to as Prima, which will be a sophisticated and contemporary M&HCV with performance standards akin to those in developed markets. The development of the Prima range was nearing completion towards the end of fiscal 2009 and has since been unveiled in the Indian market in May 2009.

We have two engineering facilities in the United Kingdom, supported by powertrain and other test facilities, extensive test track and off-road facilities. We are pursuing various initiatives, such as the introduction of Premium Lightweight Architecture (PLA), to enable our business to comply with the existing and evolving emissions legislations in the developed world, which we believe will be a key enabler of both reduction in CO2 and further efficiencies in manufacturing and engineering. Over recent years Jaguar Land Rover have made significant progress in reducing the development cycle times.

We have a modern crash test facility for testing our new products for passenger safety. We have a pedestrian safety testing facility, a pendulum impact test facility and a bus rollover test facility, to develop products with various safety norms. We also have a hemi-anechoic chamber testing facility for developing vehicles with lower noise and vibration levels and an engine emissions testing facility to develop products meeting international standards.

For providing prompt service to the customer, development of enterprise level vehicle diagnostics system for achieving speedy diagnostics of complex electronics of modern vehicles has been underway. Also the initiative in telematics has further spanned into fleet management and vehicle tracking system using GNSS (*Global Navigation Satellite Systems*).

Our product design and development centers are equipped with computer-aided design, manufacture and engineering tools, with sophisticated hardware, software, and other information technology infrastructure, designed to create a digital product development environment and virtual testing and validation, resulting in a reduction in the product development cycle-time and data management. Rapid prototype development systems, testing cycle simulators, advanced emission test laboratories and styling studios are also a part of our product development infrastructure. We have aligned our end-to-end digital product development objectives and infrastructure with

Table of Contents

our business goals and have made significant investments to enhance the digital product development capabilities especially in the areas of product development through Computer Aided Design/Computer Aided Manufacturing/Computer Aided Engineering/Knowledge Based Engineering/Product Data Management.

Over the years, we have devoted significant resources towards our research and development activities. Our total expenditure on research and development during fiscal years 2009 and 2008 was Rs.50,154 million and Rs.12,507 million respectively.

Intellectual Property

We create, own, and maintain a wide array of intellectual property assets that we believe are among our valuable assets throughout the world. Our intellectual property assets include patents and patent applications related to our innovations and products; trademarks related to our brands, and products, copyrights in creative content, designs for aesthetic features of products/components, trade secrets, and other intellectual property rights. We aggressively seek to protect our intellectual property in India and other countries.

We own a number of patents registered and have applied for new patents which are pending registration in India. We have also filed a number of patent applications outside India under the Patent Corporation Treaty which will be entered in different countries later.

We own registrations for number of trade marks and have pending applications for registration in India and abroad. The registrations mainly include trademarks for our vehicles. We use the Tata brand, which has been licensed to us by Tata Sons Limited. See Item 4.C Organizational Structure . We believe that establishment of the Tata word mark and logo mark in India and world over is material to our operations. As part of our acquisition of TDCV, we have the perpetual and exclusive use of the Daewoo brand and trademarks in Korea and overseas markets for the product range of TDCV.

As part of the acquisition of Jaguar Land Rover business, ownership/co-ownership of core intellectual property were transferred to us. Additionally, perpetual royalty free licenses to use other essential intellectual properties have been licensed to us for use in Jaguar and Land Rover vehicles. Jaguar and Land Rover own registered designs, to protect the design of their vehicles in several countries.

In addition to the above, we also have various copyright and Internet domain name registrations.

Components and Raw Materials

The principal raw materials and components required by us for use in our vehicles are steel sheets and plates, castings, forgings and items such as tires, batteries, electrical items and rubber and plastic parts. We have long term purchase agreement for some critical components such as powertrains and engines. The raw materials, components and consumables that are sourced, include steel (sheet-metal, forgings and castings), tires and tubes, batteries, fuel injection systems, air-oil filters, consumables (paints, oils, thinner, welding consumables, chemicals, adhesives and sealants) and fuels. We also require aggregates like axles, engines, gear boxes and cabs for our vehicles, which are manufactured either by ourselves or by our subsidiaries and affiliates. Most commodities have had huge price volatility during fiscal 2009. We established contracts with the commodity suppliers to cover our own as also our suppliers requirements to moderate the effect of such high volatility. Special initiatives were also undertaken to reduce material consumption through value engineering and value analysis techniques.

We have undertaken an e-commerce initiative through the development of a business-to-business site with the assistance of our subsidiary, TTL, for electronic interchange of data with our suppliers. This has enabled us to have real time information exchange and processing to manage our supply chain effectively. We use external agencies as third party logistic providers. This has resulted in space and cost saving.

As part of our strategy to become a low-cost vehicle manufacturer, we have undertaken various initiatives to reduce our fixed and variable costs including an e-sourcing initiative started in 2002 through which we procure some supplies through reverse auctions.

We have established a procedure for ensuring quality control of outsourced components. Products purchased from approved sources undergo a supplier quality improvement process. We also have a program for assisting vendors from whom we purchase raw materials or components to maintain quality. Each vendor is reviewed on a quarterly basis on parameters of quality, cost and delivery. Preference is given to vendors with QS-9000 certification. We also maintain a stringent quality assurance program that includes random testing of production samples, frequent re-calibration of production equipment and analysis of post-production vehicle performance and ongoing dialogue with workers to reduce production defects. Further, we have established a Strategic Sourcing Group for certain regions to consolidate, strategize and monitor our supply chain activities with respect to major items of purchase as well as major inputs of technology and services. The Strategic Sourcing Group is responsible for recommending, for the approval by the Management Committee, the long-term strategy and purchase decision for these items, negotiation and relationship with vendors with regard to these items, formulating and overseeing our purchasing policies, norms in respect of all

items, evolving guidelines for vendor quality

Table of Contents

improvement, vendor rating and performance monitoring and undertaking company-wide initiatives such as e-sourcing and supply chain management/policies with respect to vehicle spare parts. We are also exploring opportunities for global sourcing of parts and components from lower cost countries, and have embarked on a vendor management program that includes vendor base rationalization, vendor quality improvement and vendor satisfaction surveys. We initiated steps to include our supply chain in our initiatives on social accountability, environment management activities including tree plantation, energy conservation etc.

Suppliers

We have an extensive supply chain for procuring various components. We also outsource many of the manufacturing processes and activities to various suppliers. In such cases, we provide training to outside suppliers who design and manufacture the required tooling and fixtures.

Tata AutoComp Systems Ltd., or TACO, in which now we have 30.56% ownership stake, manufactures auto components and encourages the entry of internationally acclaimed auto component manufacturers into India by setting up joint ventures with them. Some of these joint ventures include: Tata Johnson Controls Limited for seats, Knorr Bremse CV Systems for commercial vehicle air brakes, Tata Yazaki Autocomp Limited for wiring harnesses, JBM Sangwoo Limited for pressed components and Tata Toyo Radiators Limited for radiator assemblies. These joint ventures supply components for our products.

We have embarked upon a vendor management program that includes vendor base rationalization, vendor quality improvement and vendor satisfaction surveys. As part of driving continuous improvement in procurement, we have integrated our system for electronic interchange of data with our suppliers with the ERP. This has facilitated real time information exchange and processing to manage our supply chain more effectively.

We import some components that are either not available in the domestic market or when equivalent domestically- available components do not meet our quality standards. We also import products to take advantage of lower prices in foreign markets, such as special steels, wheel rims and power steering assemblies.

Closer interaction with suppliers acquired top priority in the difficult period of fiscal 2009. In response to the pressure on our suppliers caused by the lower automotive demand and the general lack of liquidity due to the financial crisis, we worked closely with our vendors with short and medium term plans.

Capital and Product Development Expenditures:

Our capital expenditure aggregated to Rs.101,197 million and Rs.51,386 million during fiscal 2009 and 2008, respectively. Our capital expenditure during the past fiscal years has been related mostly to new product development and capacity expansion for new and existing products to meet the market demand and investments towards improving quality, reliability and productivity that are aimed at operational efficiency.

We intend to continue to invest in our business units and research and development over the next several years for improving our existing product range and developing new products and platforms to build and expand our presence in the passenger vehicle and commercial vehicle categories. We believe this would strengthen our position in India and help us to grow our presence in the select international markets.

As a part of this future growth strategy, we plan to make investments in product development, capital expenditure in capacity enhancement, plant renewal and modernization and to pursue other growth opportunities. Our subsidiaries also have their separate growth plans and related capital expenditures plans. These expenditures are expected to be funded largely through cash generated from operations, existing investible surplus in the form of cash and cash equivalents, investment securities and other external financing sources. In July 2008, we obtained shareholders' approval to raise additional long term resources up to US\$ 1 billion and to increase our borrowing limit from Rs.120 billion to Rs.200 billion.

Other Operations

In addition to our automotive operations, we are also involved in various other business activities, of which information technology services and construction equipment manufacturing are the main activities. Net revenues from these activities totaled to Rs.35,434 million and Rs.37,099 million in fiscal 2009 and 2008, respectively, representing nearly 4.9% and 9.9% of our total revenues before inter-segment elimination in fiscal 2009 and fiscal 2008, respectively.

Table of Contents

Information Technology Services:

Tata Technologies Limited, or TTL, is our 82.66% owned subsidiary as of March 31, 2009. Through its operating companies, INCAT and Tata Technologies iKS, TTL provides specialized engineering and design services, product lifecycle management and product-centric IT services to leading manufacturers. TTL responds to customers' needs through its subsidiary companies and through its two offshore development centers. TTL's customers include automobile, aerospace and consumer durable manufacturers. TTL has 11 functional subsidiary companies as at March 31, 2009.

INCAT is a leading independent provider of engineering and design services, product and information lifecycle management, enterprise solutions and plant automation. INCAT's services include product design, analysis and production engineering, Knowledge Based Engineering, PLM, Enterprise Resource Planning and Customer Relationship Management systems. INCAT also distributes implements and supports PLM products from leading solution providers in the world such as Dassault Systèmes, UGS and Autodesk. With a combined global work force of more than 4,000 employees, INCAT has operations in the United States (Novi, Michigan), Germany (Stuttgart) and India (Pune).

Tata Technologies iKS is a global leader in engineering knowledge transformation technology. For over 15 years, iKS has enabled engineering knowledge transformation through i get it, the only web application in the world offering 100,000 hours of engineering knowledge for AutoCAD, INVENTOR, Solid Works, Solid Edge, UG/NX, Teamcenter, COSMOS Works and CATIA on a single delivery platform application.

The downturn in the global economy significantly impacted the engineering design services industry last year. During this challenging period TTL won a multi-year multi-million dollar contract to provide Engineering Design, PLM and IT support services from a major Global Auto OEM and also expanded presence in aerospace design and aero structures market with the help of strategic group alliances and enhanced capability. It also won several projects in the PLM consulting arena.

Through sustained focus on growing the share of offshore business and tight cost management, Tata Technologies witnessed growth in their profitability last year. The consolidated revenue for the TTL Group was Rs. 12,286 million in fiscal 2009, an increase of 12.1% against Rs.10,963 million in the previous year. Due to augmented relationships with existing global automotive and aerospace customers and the acquisition of new customers.

Construction Equipment:

Telco Construction Equipment Company Limited, or Telcon, is engaged in the business of manufacturing and sale of construction equipment and providing related supporting services. We own 60% of Telcon, with the remaining 40% being held by Hitachi Construction Machinery Company Limited, Japan.

The global financial meltdown had a telling effect on the financial sector in India, and the flow of credit to the customers of the Construction Equipment (CE) industry significantly contracted with the impact to the end customers in the form of interest rate increases, increased margin money requirements and stringent credit checks and lack of risk appetite. The impact of global developments on India contributed to a market contraction of 24% for excavators, and a pronounced fall of over 45% in the demand for backhoe loaders. Also, the whole of the CE industry slowed down dramatically with investments dropping off and postponement or shelving of a number of Infrastructure Projects, due to heightened uncertainty. Most of the domestic manufacturers, including the Telcon, had to restrict production with periodic shut downs and short closures, so as to clear the stockpile of inventories. Consequently Telcon registered a total sale of 5,194 units during the year compared with 7,698 machines in the previous year. Telcon consolidated net revenue was Rs.21,417 million in fiscal 2009 compared to Rs.24,097 million in fiscal 2008. Introduction of new models and improved versions helped it widen the range of its products to facilitate a variety of applications. Also, this enabled Telcon in addressing and capturing the opportunities in demand, especially in the mining sector. In April 2008, Telcon acquired 79% and 60% shares of two Spanish Companies, Serviplem S.A and Comoplesa Lebrero S.A, respectively. These acquisitions provide Telcon with the opportunity to enter the concrete value chain.

Government Regulations

India

Emission and Safety:

In 1992, the government of India issued emission and safety standards, which were further tightened in April 1996, under the Indian Motor Vehicle Act. Currently Bharat Stage III norms (equivalent to Euro III norms) are in force for four wheelers in 11 cities in India and Bharat Stage

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

II norms (equivalent to Euro II norms) are in force in rest of India. Our vehicles comply with these norms. The next change in emission regulations is currently expected to be implemented by fiscal 2010, when 11 major cities in India are expected to move to Bharat Stage IV norms (equivalent to Euro IV norms) and the rest of India to Bharat Stage III norms.

Table of Contents

The vehicles manufactured by TDCV comply with the emission regulatory requirements in South Korea and also of countries where its vehicles are exported. Our vehicle exports to Europe comply with Euro IV norms, and we believe our vehicles also comply with the various safety regulations in effect in the other international markets we operate. We are also working on meeting all the regulations which we believe are likely to come into force in various markets in future.

The Indian automobile industry is progressively harmonizing its safety regulations with international standards in order to facilitate sustained growth of the Indian automobile industry as well as to make India a large exporter of automobiles.

India has become a signatory to 1998 UNECE Agreement on Global Technical Regulations (GTR) since April 22, 2006 and has voted in favour of all the 7 Global Technical Regulations, Tata Motors works closely with the Government of India to participate in WP 29 World Forum Harmonisation activities.

India has a well established regulatory framework administered by the Indian Ministry of Shipping, Road Transport and Highways. The ministry issues notifications under the Central Motor Vehicles Rules and the Motor Vehicles Act. Chapter V of the Central Motor Vehicles Rules, 1989 which deals with construction, equipment and maintenance of vehicles. Vehicles being manufactured in the country have to comply with relevant Indian standards and automotive industry standards. The Indian Ministry of Shipping, Road Transport and Highways had finalized a road map on automobile safety standards in January 2002. The road map is based on current traffic conditions, traffic density, driving habits and road user behavior in India and is generally aimed at increasing safety requirements for vehicles considering Indian markets.

Our manufacturing plants have received /are in the process of obtaining the Indian government's environmental clearances required for our operations. We are fully committed to our role as a responsible corporate citizen with respect to reducing environmental pollution. We treat the effluents at our plants and have made significant investments in lowering the emissions from our products.

Excise Duty:

In the Indian Union Budget 2008-09, the Government of India reduced the Excise duty on small cars from 16% to 12%. The Government of India further reduced the excise duty rate from 12% to 8% in December 2008. This reduction was a part of Government initiative towards revival of Automobile industry from the recessionary situation. The excise duty on cars other than small cars was also reduced from 24% to 20%. Small cars are defined to mean cars of length not exceeding 4,000 mm and with an engine capacity not exceeding 1,500 cc for cars with diesel engines and not exceeding 1,200 cc for cars with gasoline engines.

The excise duty on motor vehicles for transport of more than 13 persons, including the driver, from 16% to 12% and this was further reduced to 8% in December 2008. Excise duty on chassis fitted with engines for such vehicles was also reduced from 16% + Rs.10,000 per chassis to 12% + Rs.10,000 per chassis which was further reduced to 8% + Rs.10,000 per chassis in December 2008.

Excise duty on Trucks was reduced from 16% to 14%, which was further reduced to 10% in December 2008. The excise duty on Trucks was again reduced from 10% to 8% in the Union Budget 2009-10.

In December 2008, the excise duty on Safari, SUVs & UVs was reduced from 24% + Rs. 20,000 per vehicle to 20% + Rs. 20,000 per vehicle which was further reduced to 20% + Rs. 15,000 per vehicle in the Union Budget of 2009-10.

Import Regulations and Duties:

Automobiles and automotive components can, generally, be imported into India without a license from the Indian government subject to their meeting Indian standards and regulations as specified by designated testing agencies. Cars, UVs and SUVs in completely built up or CBU condition can be imported at 60% Basic Customs duty, and commercial vehicles can be imported at Basic Custom duty of 10% and components can be imported at Basic Customs Duty ranging from at 10% to at 7.5% (for engine component).

In addition, vehicle and component imports are also subject to countervailing duty which is equivalent to Excise Duty indicated above plus an additional Customs duty at 4%, NCCD at 1% (only for vehicles), Educational Cess at 2%, Higher Education Cess at 1%, Vehicle Cess (only in case of vehicles) at 0.125%.

Table of Contents**Valued Added Tax:**

Value Added Tax (VAT) has been implemented throughout India. VAT enables set-off from sales tax paid on inputs by traders and manufacturers against the sales tax collected by them on behalf of the government, thereby eliminating the cascading effect of taxation. Two main brackets of 4% and 12.5%, along with special brackets of 0%, 1% and 20%, have been announced for various categories of goods and commodities sold in the country and certain states have introduced additional VAT of 1% & 3% on specified commodities including Automobiles. In one of the states, surcharge of 10% on VAT has been introduced on Automobiles. Central Sales Tax, however, continues to exist, although it is proposed to be abolished in a phased manner. Since its implementation, VAT has had a positive impact on us. Prior to the implementation of VAT, sales tax formed part of our total cost of material. However, the implementation of VAT would result in savings on sales tax component as VAT paid on inputs can be set off against tax paid on outputs.

In the Indian Union Budget of 2008-09, the Government of India reduced the Central Sales Tax rate from 3% to 2%.

Economic Stimulus Package:

In January 2009, the government of India announced an Economic Stimulus Package targeting the Automotive Industry. The Public Sector banks will step forward to fund the auto sector along with providing a line of credit to NBFCs, specifically for the CVs. States shall be provided a one time assistance to purchase 15,000 buses for their urban transport system. There was a 4% cut in the Cenvat rate on Cars and Trucks and 2% cut in Cenvat rate on motor vehicles for transport of more than 13 persons, including the driver. Further in February 2009, the Cenvat was reduced from 10% to 8% for Trucks & Buses and Service Tax was also reduced from 12% to 10%. The government of India has also provided for an accelerated tax depreciation of 50% for commercial vehicles purchased between January 1 and September 30, 2009.

Europe/UK/United States**Emission and Safety:**

There has been a greater emphasis by governments on the emission and safety levels for the automobile industry. Existing EU4 and EU5 regulations, and planned EU6 regulations place limits on particulate emissions and emissions of pollutants other than CO₂ and encourage fuel economy. The EU has indicated that it will introduce legislation to reduce CO₂ emissions from passenger cars. Jaguar Land Rover carefully monitors environmental requirements and has plans to reduce the average CO₂ emissions of its vehicle fleet through the introduction of sustainable technologies including modular lightweight vehicle architectures, smaller and more fuel efficient SUVs, and development of technologies that use hybrid and alternative fuels. While Jaguar Land Rover has plans to reduce emissions, the risk remains that eventual legislation may impose requirements in excess of currently planned design actions. Also, consumers may demand further fuel efficiency and reductions in emissions. To comply with current and future environmental norms, Jaguar Land Rover may have to incur substantial capital expenditure and research and development costs to upgrade products and manufacturing facilities, which would have an impact on its cost of production and results of operation.

The regulatory environment continues to intensify with EU draft regulations, U.S. CAFE and national CO₂ actions/incentives. These have had a potentially negative impact on larger vehicles/premium segments, influenced by significant tax related impacts, particularly in smaller European markets.

Safety:

Vehicles sold in Europe are subject to vehicle safety regulations established by the EU or by individual countries which are similar to those in the United States Major regulatory changes in Europe are:

The EU Commission has recently proposed new requirements for enhanced (phase 2) pedestrian protection. Pedestrian protection legislation may have a significant impact on the design of our future passenger cars;

The cooling agent currently used in vehicle air conditioning systems may not be used in all-new vehicle types beginning in 2011, and will be banned in pre-existing vehicle lines beginning in 2017. Alternative cooling agents will have to be developed, which are expected to result in significantly higher costs;

The EU Commission has proposed mandating tire pressure monitoring systems in the context of fuel economy legislation;

The EU Commission has passed regulatory requirements to fit active safety systems, such as electronic stability control systems, collision mitigation braking systems and lane departure warning systems for heavy duty commercial vehicles.

Table of Contents

In addition, within the framework of the United Nations Economic Commission for Europe (UNECE), the EU may establish new vehicle safety regulations (e.g. regarding head restraints).

The U.S. National Highways Transport Safety Agency (NHTSA) issues federal motor vehicle safety standards covering a wide range of vehicle components and systems such as airbags, seatbelts, brakes, windshields, tires, steering columns, displays, lights, door locks, side impact protection, and fuel systems. We are required to test new vehicles and equipment and assure their compliance with these standards before selling them in the United States. We are also required to recall vehicles found to have defects that present an unreasonable risk to safety or which do not conform to the required Federal Motor Vehicle Safety Standards, and to repair them without charge to the owner. The financial cost and impact on consumer confidence of such recalls be significant depending on the repair required and the number of vehicles affected. Jaguar Land Rover has no investigations relating to alleged safety defects or potential compliance issues pending before NHTSA.

These standards add to the cost and complexity of designing and producing vehicles and equipment. In recent years the NHTSA has mandated, among other things:

- i a system for collecting information relating to vehicle performance and customer complaints, and foreign recalls to assist in the early identification of potential vehicle defects as required by the Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act; and
- j enhanced requirements for frontal and side impact, including a lateral pole impact.

Furthermore, the Cameron Gulbransen Kids Transportation Safety Act of 2007 (Kids and Cars Safety Act) passed into law in 2008 requires NHTSA to enact regulations related to rearward visibility and brake-to-shift interlock, and requires that NHTSA consider regulating the automatic reversal functions on power windows. The cost to meet with these proposed regulatory requirements may be significant.

Vehicle safety regulations in Canada are similar to those in the United States; however, many other countries have vehicle regulatory requirements which differ to those in the United States. The differing requirements among various countries create complexity and increase costs such that the development/production of a common product that meets all country regulatory requirements is not possible. Global Technical Regulations (GTRs), developed under the auspices of the United Nations (UN), continue to have increasing impact on automotive safety activities. In 2008, GTRs on Electronic Stability Control, Head Restraints, and Pedestrian Protection were adopted by the UN World Forum for the Harmonisation of Vehicle Regulations, and are now in different stages of national implementation. While global harmonization is fundamentally supported by the auto industry in order to reduce complexity, national implementation yet may introduce subtle differences into the system.

Economic Stimulus Package/Incentives:

Some of the European governments have introduced support schemes for the motor industry within their countries. The US government has also provided support to the US car manufacturers. The UK government announced the Automotive Assistance Program, a program of support for the British car industry back in January 2009. The EIB has also announced a support package of aid to the car industry.

In January 2009, the UK government announced the UK Automotive Assistance Programme (AAP) to address funding requirements of the UK automotive industry. The AAP will facilitate the government loan guarantees on a case by case basis, for projects for which EIB (European Investment Bank) funding has been approved and to bring special value to the UK through the preservation of jobs and new investments which fulfill government objectives of low carbon emission. In March 2009, it was confirmed that the UK government was to make available a grant of up to £27 million to support the production of a new model based on the compact and sustainable LRX Concept to be produced at the Halewood factory. The vehicle, which is subject to final production confirmation later in 2009, would be the smallest, lightest and most fuel efficient addition to the Range Rover family of luxury vehicles. This vehicle is planned to further enhance the Jaguar Land Rover commitment to sustainability.

The UK government also introduced a vehicle scrappage incentive scheme on vehicles that are aged 10 years plus in order to stimulate car purchases within the UK market. Limited sales activity has been witnessed by the Jaguar Land Rover brands. Several European countries have also introduced versions of vehicle scrappage schemes and incentives, including Cyprus, France, Germany, Italy, Luxembourg, Portugal, Romania and Spain. In July 2009, the US government introduced a \$1 billion scrappage scheme which has been concluded.

Table of Contents

Insurance Coverage:

We have insurance coverage which we consider reasonably sufficient to cover all normal risks associated with our operations (including business interruptions) and which we believe is in accordance with industry standards in India. We have obtained coverage for product liability for some of our vehicle models in several countries to which we export vehicles. We have also taken insurance coverage on directors and officers liability to minimize risks associated with international litigations for us and some of our subsidiaries.

Jaguar Land Rover has global insurance coverage which Jaguar Land Rover considers to be reasonably sufficient to cover normal risks associated with our operations and insurance risks (including property, business interruption, Marine and Product/General Liability).

Legal Proceedings

In the normal course of business, we face claims and assertions by various parties. We assess such claims and assertions and monitor the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. We record a liability for any claims where a potential loss is probable and capable of being estimated, and disclose such matters in our financial statements, if material. For potential losses which are considered reasonably possible, but not probable, we provide disclosure in the financial statements, but do not record a liability in our financial statements unless the loss becomes probable. Should any new developments arise, such as a change in law or rulings against us, we may need to make provisions in our financial statements, which could adversely impact our reported financial condition and results of operations. Furthermore, if significant claims are determined against us and we are required to pay all or a portion of the disputed amounts, there could be a material adverse effect on our business and profitability. Certain claims that are above Rs.200 million in value are described in Note 38 to our consolidated financial statements included in this annual report. In respect of claims against us below Rs.200 million, the majority of cases pertain to motor accident claims (involving vehicles that were damaged in accidents while being transferred from our manufacturing plants to regional sales offices) and consumer complaints. Some of these cases relate to replacement of parts of vehicles and/or compensation for deficiency in services provided by us or our dealers. There are some indirect tax, labour and other civil cases as well which fall under this category.

There are outstanding litigation proceedings against Jaguar Land Rover and its subsidiaries. These legal proceedings are pending at different levels of adjudication before various courts and tribunals.

We believe that none of the contingencies, either individually or in the aggregate, would have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

C. Organizational Structure

Tata Sons Limited, or Tata Sons, is a principal holding company that has equity holdings in a range of businesses. The various companies promoted by Tata Sons, including us, are based substantially in India and had combined revenues of approximately US \$ 70.8 billion for fiscal 2009.

The operations of Tata Sons promoted entities are highly diversified and can be categorized under seven business sectors, namely, engineering, materials, energy, chemicals, consumer products, services, communications and information systems. These companies do not constitute a group under Indian Law.

Tata Sons has its origins in the trading business founded by Jamsetji Tata in 1874 that was developed and expanded in furtherance of his ideals by his two sons, Sir Dorabji Tata and Sir Ratan Tata, following their father's death in 1904. The family interests subsequently vested largely in the Sir Ratan Tata Trust, the Sir Dorabji Tata Trust and other related trusts. These trusts were established for philanthropic and charitable purposes and together own a substantial majority of the shares of Tata Sons Limited.

By 1970, the operations of Tata Sons promoted entities had expanded to encompass a number of major industrial and commercial enterprises including The Indian Hotels Company Limited (1902), The Tata Steel Limited (Tata Steel) (1907), The Tata Power Company Limited (1910), Tata Chemicals Limited (1939), Tata Motors Limited (1945), Voltas Limited (1954), and Tata Tea Limited (1962). Tata Sons also promoted India's first airline, Tata Airlines, which later became Air India (India's national carrier), as well as India's largest general insurance company, New India Assurance Company Limited, both of which were subsequently taken over by the Government as part of the Government's nationalization program. Tata Consultancy Services Limited (TCS) is Asia's leading software services provider and the first Indian software firm to exceed sales of US\$ 4 billion. In 1999, Tata Sons has also invested in several telephony and telecommunication ventures, including acquiring a portion of the Indian Government's equity stake in the state owned Tata Communications Limited (formerly known as Videsh Sanchar Nigam Limited (VSNL)).

We have for many years been a licensed user of the Tata brand owned by Tata Sons Limited, and thus have both gained from the use of the Tata brand as well as helped to sustain its brand equity. Tata Sons along with the Tata Sons promoted entities instituted a corporate identity program to re-position itself to compete in a global environment. A substantial ongoing investment and recurring expenditure is planned to develop and promote a strong, well-recognized and common brand equity, which is intended to represent for the consumer a level of quality, service and reliability associated with products and services offered by the Tata Sons promoted entities.

Each Tata Sons promoted consenting entities pays a subscription fee to participate in and gain from the Tata brand identity. We believe that we benefit from the association with the Tata Brand identity and, accordingly, Tata Motors Limited and certain of our subsidiaries have agreed to pay an annual subscription fee to Tata Sons Limited which is equal to 0.15%-0.25% of annual net income (defined as net revenues exclusive of excise duties and other governmental taxes and non-operating income), subject to a ceiling of 5% of annual profit before tax (defined as profit after interest and depreciation but before income tax). Tata Sons also has lowered in the past the subscription fee, considering its requirement of outlay for activities related to brand promotion and protection. For the fiscal years ended March 31, 2008 and 2009, Tata Motors on a standalone basis paid an amount less than 0.25% of its annual net income as per Indian GAAP. Pursuant to our licensing agreement with Tata Sons Limited, we have also undertaken certain obligations for the promotion and protection of the new Tata brand identity licensed to us under the agreement. The agreement can be terminated by written agreement between the parties, by Tata Sons Limited upon our breach of the agreement and our failure to remedy the same, or by Tata Sons Limited upon providing six months notice for reasons to be recorded in writing. The agreement can also be terminated by Tata Sons Limited upon the occurrence of certain specified events, including liquidation.

The Tata Sons promoted entities have sought to continue to follow the ideals, values and principles of ethics, integrity and fair business practices originally established by the founder of Tata Sons, Mr. Jamsetji Tata, and his successors. To further protect and enhance the Tata brand equity, these values and principles have been articulated in the Tata code of conduct, which has been adopted by most of the Tata Companies that have access to the larger resources and services of the Tata Sons promoted entities. These companies have endeavored to maintain high standards of management efficiency and to promote the commercial success of Indian enterprises. The Tata Sons promoted entities have also made significant contributions towards national causes through promotion of public institutions in the field of science, such as the Indian Institute of Science and the Tata Institute of Fundamental Research, and in the field of social services through the Tata Institute of Social Sciences, the Tata Memorial Hospital and the National Center of the Performing Arts. Tata trusts are among the largest charitable foundations in the country.

Table of Contents

A large number of the Tata Sons promoted entities hold shares in one another and some of our directors hold directorships on the boards of Tata Sons and/or Tata Sons promoted entities. However, there are no voting agreements, material supply or purchase agreements or any other relationships or agreements that have the effect of tying us together with other Tata Sons promoted entities at management, financial or operational levels. With the exception of Tata Steel Limited, which under our Articles of Association has the right to appoint one director to the Board, Tata Sons Limited and its subsidiaries do not have any special contractual or other power to appoint our directors or management beyond the voting power of their shareholdings in us. Except as set forth in the tables below under the heading **Subsidiaries and Affiliates** and except for an approximately 12.3% stake in Tata Industries Limited, our shareholdings in other the Tata Sons promoted entities are generally insignificant as a percentage of their respective outstanding shares or in terms of the amount of our investment or the market value of our shares of those companies.

Subsidiaries and Affiliates

We have the following consolidated subsidiaries and equity method affiliates as of March 31, 2009:

Name of the Subsidiary Company	Country of incorporation	% of holding
1 Sheba Properties Ltd.	India	100.00
2 Concorde Motors (India) Ltd.	India	100.00
3 HV Axles Ltd.	India	85.00
4 HV Transmissions Ltd.	India	85.00
5 TAL Manufacturing Solutions Ltd.	India	100.00
6 Tata Motors Insurance Broking and Advisory Services Ltd.	India	100.00
7 Tata Daewoo Commercial Vehicle Co. Ltd.	South Korea	100.00
8 Tata Motors European Technical Centre plc and its 2 subsidiaries	UK	100.00 ⁵
9 Tata Technologies Ltd. and its 11 functional subsidiaries	India ¹	82.66 ²
10 Telco Construction Equipment Co. Ltd. and its 5 subsidiaries	India	60.00 ⁴
11 Tata Precision Industries Pte. Ltd., Singapore and its subsidiary	Singapore	51.07
12 Tata Motors Finance Ltd.	India	100.00
13 Tata Motors (Thailand) Ltd.	Thailand	70.00
14 Hispano Carrocera S.A. and its 2 subsidiaries	Spain ³	21.01
15 TML Holdings PTE Ltd., Singapore and its 35 subsidiaries	Singapore ¹	100.00
16 Tata Motors (SA) (Proprietary) Ltd.	South Africa	60.00
17 TML Distribution Company Ltd.	India	100.00
18 Tata Marcopolo Motors Ltd.	India	51.00

1 The subsidiaries are based in many countries abroad.

2 The holdings in these subsidiaries range between 82.66% to 82.80%.

3 The subsidiary is based in Morocco.

4 The holdings in these subsidiaries range between 26.65% to 60.00%.

5 The holding in its subsidiaries is 71.69%.

Name of the Affiliate Company	Country of incorporation	% of holding
1 Tata Cummins Ltd.	India	50.00
2 Nita Co. Ltd.	Bangladesh	40.00
3 Fiat India Automobiles Ltd.	India	50.00
4 Tata AutoComp Systems Ltd. and its 8 subsidiaries and Affiliates	India	30.56 ¹
5 Telcon Ecoroad Resurfaces Pvt Ltd. ²	India	24.55
6 Automobile Corporation of Goa Ltd.	India	42.37
7 TATA HAL Technologies Ltd. ³	India	41.33

- 1 *The holdings in these subsidiaries range between 15.59% to 30.56%.*
- 2 *Is an affiliate of Telco Construction Equipment Co. Ltd.*
- 3 *Is an affiliate of Tata Technologies. Ltd.*

Table of Contents

D. Property, Plants and Equipment.

Facilities:

We currently operate four principal automotive manufacturing facilities in India. The first facility was established in 1945 at Jamshedpur in the State of Jharkhand in eastern India. We commenced construction of a second facility in 1966 (with production commencing in 1976) at Pune, in the State of Maharashtra in western India, and a third in 1985 (with production commencing in 1992) at Lucknow, in the State of Uttar Pradesh in northern India. We have set up our fourth manufacturing plant in Uttarakhand, in India commenced operations in fiscal 2008. The Jamshedpur, Pune and Lucknow manufacturing facilities have been accredited with ISO/TS 16949:2000(E) certification. We are also in the process of setting up a plant in Sanand in Gujarat, for the manufacture of the Nano. We have set up plant for the manufacture of Tata Marcopolo buses under our joint venture with Marcopolo at Dharwad in Karnataka. We have also set up research and development facilities in the United Kingdom.

The manufacturing facilities of TDCV are based in Gunsan, South Korea. TDCV has received the ISO/TS 16949 certification, an international quality systems specification given by SGS UK Ltd., an International Automotive Task Force (IATF) accredited certification body. It is the first Korean automobile original equipment manufacturer to be awarded the same.

The manufacturing facilities of Telcon are located at Jamshedpur in the State of Jharkhand in eastern India and at Dharwad in the State of Karnataka in Southern India. The newly acquired Telcon subsidiaries have their operations based at Zaragoza, Spain which are in the business of manufacture of concrete Transit mixers, dry bulk tanks, pumps, compactors and Tandem Rollers of various capacities for road making and at China which engaged in manufacturing of Compactors.

Fiat India Automobiles Limited, our joint venture with Fiat Group Automobiles S.p.A, has its manufacturing facility located at Ranjangaon, Maharashtra. The plant would be used for the manufacture of Tata and Fiat branded cars as well as engines and transmissions for use by both the partners.

Tata Motors (Thailand) Limited is our joint venture with Thonburi Automotive Assembly Plant Co Ltd for the manufacture and assembly of pickup trucks. We presently own 86.78% and Thonburi Automotive owns 13.22% of this venture. The manufacturing facility is located in Samutprakarn province, Thailand.

Our 21% stake in Hispano provides us with access to two manufacturing units, one in Spain and another one in Morocco.

Following our acquisition of Jaguar Land Rover, we currently operate three principal automotive manufacturing facilities in the United Kingdom:

Solihull, in the West Midlands;
Castle Bromwich, in the West Midlands; and
Halewood, in Liverpool.

We have also established two product development facilities in the United Kingdom:

Gaydon, in Warwickshire; and
Whitley, Coventry in the West Midlands.

Most of these facilities are owned freehold or held through long-term leaseholds, generally with nominal rents.

Tata Motors European Technical Centre Plc, along with its Norwegian subsidiaries, are specialized in the development and manufacture of electric cars and lithium ion batteries.

Installed Capacity:

As of March 31, 2009, our total vehicle production capacity in India determined on the basis of two production shifts per day and including capacity for the manufacture of replacement parts, was 870,156 units annually. In addition, we also have vehicle production capacity of 20,000

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

units annually in South Korea through the manufacturing facilities of TDCV. Our Marcopolo plant has capacity of 6,600 units; we have bus body building capacity of 330 units in Spain and 240 units in Morocco, and our joint venture in Thailand has capacity of 25,000 units.

The following table shows our installed capacity as of March 31, 2009, and production levels by plant and product type in fiscal 2009 and 2008:

Table of Contents

	Fiscal Year ended March 31,		
	Installed Capacity ⁽¹⁾	Production (Units)	
		2009	2008
Jamshedpur			
Medium and Heavy Commercial Vehicles	108,000	64,396	95,145
Pune			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles, Passenger Cars	513,125	307,279	436,177
Lucknow			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles	30,000	21,295	26,900
Pantnagar			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles	210,000	95,546	23,136
Jamshedpur & Dharwad			
Construction Equipment	9,776	4,948	7,364
Lucknow & Dharwad			
Bus bodies	6,600	873	
Republic of Korea			
Gunsan			
Medium & Heavy Commercial Vehicles	20,000	9,341	11,821
Spain*			
Buses and bus body	330	151	222
Morocco*			
Buses and bus body	240	37	61
Thailand			
Pick-up trucks	25,000	870	27

(1) On double shift basis including capacity for manufacture of replacement parts as of March 31, 2009.

* On single shift basis.

At Jaguar Land Rover, manned capacity has been reduced in response to falling demand to 170,000 units, and we are currently operating at 97% of that capacity.

Properties:

We produce vehicles and related components and carry out other businesses through various manufacturing facilities. In addition to our manufacturing facilities, our properties include sales offices and other sales facilities in major cities, repair service facilities, and research and development facilities.

The following table sets forth information, with respect to our principal facilities, a substantial portion of which are owned by us as of March 31, 2009. The remaining facilities are on leased premises.

(1) Land at these locations have been taken under operating lease.

(2) Some of the facilities are under operating lease and some are owned.

Substantially all of our owned properties are subject to mortgages in favor of secured lenders and debenture trustees for the benefit of secured debenture holders. A significant portion of our property, plant and equipment is pledged as collateral securing indebtedness incurred by us. We believe that there are no material environmental issues that may affect our utilization of these assets.

We have additional property interests throughout the world for limited manufacturing, sales offices, dealer training and testing. The majority of these are housed within leased premises.

Property, plant and equipment as of March 31, 2009 includes building under construction of Rs 3,620 million for the purposes of manufacturing automobiles. Consequent to the decision to relocate and construct a similar manufacturing facility at another location, the management is in the process of evaluating several options, under all of which, no adjustment to the carrying amount of the building is considered necessary based on

the information available at the balance sheet date.

Since the end of the year, a substantial proportion of our owned properties have become subject to mortgages in favor of secured lenders. In addition, a significant portion of our property, plants and equipment is pledged as collateral securing indebtedness incurred by us. We believe that there are no material environmental issues that may affect our utilization of these assets.

Table of Contents

We consider all of our principal manufacturing facilities and other significant properties to be in good condition and adequate to meet the needs of our operations.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

You should read the following discussion of our financial condition and results of operations together with our consolidated financial statements prepared in conformity with IFRS and information included in this annual report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors including, but not limited to, those set forth in Item 3.D and elsewhere in this annual report.

A. Operating Results.

Our financial statements included in this Annual Report on Form 20-F have been prepared in accordance with International Financial Reporting Standards as issued by International Accounting Standards Board. Pursuant to General Instruction G of Form 20-F, the financial statements included herein are for our two most recent fiscal years. Accordingly the information set forth in Operating and Financial Review and Prospects is also for our two most recent fiscal years.

On June 2, 2008, we acquired the Jaguar Land Rover business. Consequently, the operating results discussed in this section for the year ended March 31, 2009 are not comparable with the previous year.

Overview

In fiscal 2009, our total revenue (net of excise duties) including finance revenues was Rs. 722,806 million as compared to Rs. 370,255 million for fiscal 2008. The entire increase in revenue is attributable to Jaguar Land Rover business. Excluding Jaguar Land Rover, there was a decrease of 10.4% in total revenue in fiscal 2009 compared to fiscal 2008. We recorded a net loss (excluding the share of loss attributable to minority interest) of Rs. 60,142 million in fiscal 2009 compared with a net income of Rs. 21,977 million in fiscal 2008.

Automotive operations.

Automotive operations is our most significant segment, accounting for 95.7 % and 91.0% for fiscal 2009 and 2008 respectively, of our total revenues. For Fiscal 2009, revenue from automotive operations before inter segment eliminations was Rs. 691,778 million as compared to Rs. 337,040 million for fiscal 2008. For fiscal 2009 Jaguar Land Rover contributed 56.5 % of our total automotive revenue and the balance Rs. 300,889 million (43.5% of total) was contributed by Tata products in India and outside of India. Our automotive operations were negatively impacted in fiscal 2009 by the sudden and significant deterioration in the world economy, the effect of which was more severe on our premium car business.

Our automotive operations includes:

All activities relating to development, design, manufacture, assembly and sale of vehicles as well as related spare parts and accessories;

Automotive component business, both captive and non-captive;

Distribution and service of vehicles; and

Financing of our vehicles in certain markets.

The acquisition of Jaguar Land Rover in June 2008 has expanded the Company's presence in the international markets. Pending completion of the integration process of Jaguar Land Rover, with the Company's automotive business, which is being undertaken following the acquisition, the Company has disclosed two reportable segments in its automotive business – Tata vehicles and Jaguar Land Rover, for the year ended March 31, 2009.

Tata Vehicles (including spares and financing thereof)

Table of Contents

In fiscal 2009, the automotive sector in India suffered severe contraction in demand, arising from major financial and other market upheavals. This exacerbated the lack of liquidity and unavailability of financing, which led to a fall in automotive demand. High interest rates and peak commodity prices also affected the industry and the supply chain. Consequently, our vehicle sales declined by 15.4% to 505,399 units in fiscal 2009 from 597,197 units in fiscal 2008, resulting in a revenue (before inter-segment elimination) decline of 10.7% to Rs.300,889 million in fiscal 2009, compared to Rs.337,040 million in fiscal 2008.

Sales of our commercial vehicles in India declined by 16% to 262,730 units in fiscal 2009. Contraction in freight movement in many segments of the industry and a decline in consumer confidence led to a massive drop in the M&HCV category. The M&HCV was the most impacted by the slowdown and financing inadequacy shrinking by about 33% compared with the previous fiscal year. Our M&HCV volumes declined by 27.7% to 119,745 units in fiscal 2009. Despite the adversities, we continued to strengthen our product portfolio in this segment by introducing multi-axle and heavy duty trucks, tippers and tip trailers to our existing offerings. Our LCV volumes declined by 2.9% to 142,985 units in fiscal 2009 from 147,311 units in fiscal 2008. New products introduced in-recent years such as the Ace, Magic and Winger continued to receive encouraging response.

Our Passenger vehicle sales in India declined by 8.5% to 199,095 units in fiscal 2009, primarily due to a 21.9% decline in our small car sales due to a delay in volume ramp up of our newly introduced Indica Vista and a 19.3% decline in our UV sales. We sold 38,371 units in our UV category in the Indian domestic market in fiscal 2009 compared to 47,531 units in fiscal 2008. Continuing encouraging response to our mid-size sedan the Indigo CS launched in the last quarter of fiscal 2008, saw our sales grow by 51.1%. During fiscal 2009, we sold 7,149 Fiat cars.

Our overall sales in international markets declined by 34.6% to 43,574 units in fiscal 2009 as compared to 66,650 units in fiscal 2008. Our exports of vehicles manufactured in India declined by 38.6% in fiscal 2009 to 33,536 units from 54,628 units in fiscal 2008, affected by slowdown in our prime markets.

TDCV volumes in fiscal 2009 declined by 21.9% to 9,137 units affected by a severe slowdown in domestic consumption, industrial production and lack of funds for vehicle financing and higher interest rates in South Korea. In addition, demand was also impacted due to advancement of purchase by customers in the previous year preceding the change in emission norms from Euro III to Euro IV effective January 1, 2008. Exports from South Korea, however have increased by 37.8% in fiscal 2009 to 4,280 units. TDCV's major export markets were Algeria, UAE, Libya and South Africa.

In an environment of severe credit crunch in the economy, our vehicle financing operations ensured sufficient availability of funding support. Our revenue from financing business increased by 14.8% to Rs.20,170 million in fiscal 2009 as compared to fiscal 2008.

Segment results before inter-segment eliminations from Tata vehicles/spares and financing thereof declined by 50.5% to Rs.17,121 million in fiscal 2009, compared to Rs.34,612 million in fiscal 2008. Our results were adversely impacted by steep significant volume decline, higher raw material costs and impact of fixed overheads. These negative effects were partly offset by vehicle price increases and various cost reduction initiatives undertaken-during the year.

Jaguar Land Rover Business

The severe global credit crisis, weakening economic environment and steep decline in consumer confidence, adversely impacted Jaguar Land Rover's sales volumes and more particularly in the developed markets such as the United States, the UK and Europe in fiscal 2009. Furthermore a decline in residual values, lack of finance availability and movement away from vehicles with large engine capacity due to high fuel prices, affected demand for premium cars and SUVs in the developed markets. Jaguar Land Rover business posted a 32% decline in sales volumes for the period June 2008 to March 2009, compared the corresponding period of the previous year. In response to the declining demand, Jaguar Land Rover worked to adjust production and stocks in line with the external environment. This caused wholesale sales volumes to be lower than retail volumes for the period. Revenues were Rs.390,889 million for the period June to March 2009.

For the period June 2008 to March 2009, Jaguar Land Rover reported a segment loss before inter segment eliminations of Rs.30,529 million, due to steep fall in volumes, increase in incentives in key markets to drive sales volume, higher raw material costs, lower absorption of fixed costs and volatility in foreign exchange rates. In addition to aligning of production with demand, Jaguar Land Rover is also working to reduce costs through headcount reduction, lowering of fixed marketing and selling costs and other overhead costs.

Other Operations.

Other operations comprise primarily activities relating to production, designing and selling of construction equipment, engineering solutions and software operations. Our revenue from other operations before inter segment eliminations was Rs. 35,434 million in fiscal 2009, a decline of

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

4.5% from Rs. 37,099 million in fiscal 2008. This decline was mainly due to the sluggish demand experienced by our construction equipment subsidiary, Telcon, on account of the economic slowdown and lower infrastructural spending. Revenues from other

Table of Contents

operations represent 4.9% and 9.9% of our total revenues, before inter-segment eliminations, in fiscal 2009 and 2008 respectively. Segment results before inter-segment eliminations was Rs. 2,902 million and Rs. 5,522 million before inter-segment eliminations in fiscal 2009 and 2008 respectively.

Geographical breakdown

We have been pursuing a strategy of focusing on growth of revenues outside India. It has been achieved in the recent past through exports of Tata products in the international markets including through our acquisition of TDCV. Following our acquisition of the Jaguar Land Rover business, there has been a significant shift in our geographic revenue break-down.

The following table sets forth our revenue from our key geographical markets:

Revenue	Fiscal 2009		Fiscal 2008	
	Rs in million	Percentage	Rs in million	Percentage
India	272,889	37.8%	298,315	80.6%
United Kingdom	167,605	23.2%	1,576	0.4%
United States of America	60,070	8.3%	5,973	1.6%
Rest of Europe	91,071	12.6%	12,091	3.3%
Rest of the World	131,171	18.1%	52,300	14.1%
Total	722,806		370,255	

Significant Factors Influencing Our Results of Operations.

Our results of operations are dependent on a number of factors, which include mainly the following:

General economic conditions. We, similar to the rest of the automotive industry, are substantially affected by general economic conditions. See Item 3.D Risk Factors Risks associated with Our Business and the Automotive Industry .

Interest rates and availability of credit for vehicle purchases. India witnessed an upward movement in interest rates in the second half of fiscal 2009, while in the United States and the UK interest rates have been cut drastically in the second half of the fiscal 2009, in response to recession. For further discussion of our credit support programs, see Item 4.B Business Overview Automotive Operations Sales and Distribution of Vehicles .

Excise duty and sales tax rates. In India the excise / sales tax rate structure affects the cost of vehicles to the end user and hence impacts demand significantly. For a detailed discussion regarding tax rates applicable to us, please see Item 4.B Business Overview Government Regulations Excise Duty .

Our competitive position in the market. For a detailed discussion regarding our competitive position, see Item 4.B Business Overview Automotive Operations Competition .

Cyclicality. Our results of operations are also dependent on the cyclicality in demand in the automotive market, new government and environmental regulations.

Environmental Regulations. There has been a greater emphasis on the emission and safety norms for the automobile industry by governments in the various countries in which we operate. Compliance with these norms will have a significant bearing on the costs and product life cycles in the automotive industry. For further details with respect to these regulations, please see Item 4.B Business Overview Government Regulations Emission and Safety .

Foreign Currency Rates. We are sensitive to fluctuations in foreign currency rates. Jaguar Land Rover operates mainly in the United States, the United Kingdom and Europe resulting in potential exchange exposure in terms of movement of foreign exchange rates. We have significant borrowings in foreign currencies denominated mainly in US Dollars. Due to significant fluctuation in the exchange rate of Indian Rupees, there have been significant exchange losses during the year. Fluctuations in exchange rates also have an impact on the reported result of operations through translation differences. Our consolidated financial results are affected by foreign currency exchange fluctuations through both translation risk and transaction risk. Changes in foreign currency exchange rates may positively or negatively affect our revenues, results of operations and net income.

To the extent that our financial results for a particular period will be affected by changes in the prevailing exchange rates at the end of the period, such fluctuations may have a substantial impact on comparisons with prior periods. However, the translation effect is a reporting consideration and does not impact our underlying results of operations.

Transaction risk is the risk that the currency structure of our costs and liabilities will deviate from the currency structure of sales proceeds and assets. However, we enter into hedging instruments to mitigate some of these transaction risks. These instruments enable us to reduce, but not eliminate, the impact of fluctuations in foreign currency rates. Please see Item 11. Quantitative and Qualitative Disclosures About Market Risk for further detail.

Table of Contents

Results of operations

Fiscal 2009 was impacted by a severe economic crisis across the world. The sudden deterioration in the economic environment had a negative impact on consumer confidence. The impact was more pronounced in the United States, the UK and Europe, which significantly affected our volumes in fiscal 2009. The impact was less severe in India. The Indian GDP growth slowed to 6.7% in the year compared to 9% growth achieved in the prior year. The Indian markets also witnessed a steep increase in interest rates coupled with restricted funding by vehicle financiers, which negatively affected vehicle sales volumes.

Table of Contents

The following table sets forth selected items from our consolidated statements of income for the periods indicated and shows these items as a percentage of total revenues:

	Percentage of Total Revenue		Percentage Change 2008 to 2009
	Fiscal 2009	Fiscal 2008	
Total Revenues	100%	100%	95.2
Raw materials and Purchase of product for sale (including change in stock)	67.6	66.8	97.7
Employee Cost	10.4	7.8	161.4
Other expenses	24.3	15.6	203.2
Depreciation and Amortization	3.9	2.2	238.8
Expenditure capitalised	-6.3	-2.6	362.4
Other income*	-2.2	-2.1	104.5
Interest Income	-0.4	-0.4	87.4
Interest Expense (net)	4.7	4.4	107.9
Foreign exchange (gain) / loss (net)	6.7	-0.5	-2630.6
Excess of fair value of net assets acquired over cost of acquisition	-0.9		
Income Tax expense	0.1	2.6	-91.1
Share of (profit) / loss of equity accounted investees	0.5	**	-6748.8
Net income / (loss) attributable to equity holders of the parent	-8.3	5.9	-373.7
Net income / (loss) attributable to minority interest	-0.1	0.3	-151.5

* Includes gain on sale of available for sale securities and gain on sale of equity interest in subsidiary companies with respect to fiscal 2009 and gain on sale of equity interest in subsidiary companies in fiscal 2008.

** Less than 0.1

The following table sets forth selected data regarding our automotive operations for the periods indicated and the percentage change from period to period.

	Fiscal 2009	Fiscal 2008	Percentage Change 2008 to 2009
Total Revenues (Rs.Millions)	691,778	337,040	105.3
Segment Results Profit / (loss) (Rs.Millions)	(13,408)	34,612	-138.7
Segment Results Profit / (loss) (%)	(1.9)%	10.3%	

The following table sets forth selected data regarding our other operations for the periods indicated and the percentage change from period to period.

	Fiscal 2009	Fiscal 2008	Percentage Change 2008 to 2009
Total Revenues (Rs.Millions)	35,434	37,099	-4.5
Segment Results (Rs.Millions)	2,902	5,522	-47.4
Segment Results (%)	8.2%	14.9%	

Fiscal 2009 Compared to Fiscal 2008**Revenues.**

Our total consolidated revenues (net of excise duty, where applicable) including finance revenues were Rs. 722,806 million in fiscal 2009, an increase of 95.2%, from Rs. 370,255 million in fiscal 2008. The entire increase in revenue is attributable to the Jaguar Land Rover business. Excluding Jaguar Land Rover there was a decrease of 10.4% in total revenue in fiscal 2009 compared to fiscal 2008.

The following is a discussion of our revenues for each of our business segments.

Table of Contents

Revenues from Automotive Operations.

Automotive operations constitute the largest proportion of our total revenues. Revenues from automotive operations (before inter-segment elimination) increased by Rs. 354,738 million to Rs. 691,778 million, or 105.3%, from Rs. 337,040 million in fiscal 2008. While revenue from the Jaguar Land Rover business for the period from June 2, 2008 to March 31, 2009 was Rs. 390,889 million, Tata vehicles/spares revenue declined 10.7% to Rs. 300,889 million. This decrease in Tata vehicles/spares revenue was primarily due to:

a 13.0% decline in vehicle unit sales in India and

a 34.6% decline in sales of vehicles outside of India.

which were partly offset by:

a vehicle price increase and

a 14.8% increase in automotive financing revenues.

A steep decline in sales volume in many of the traditionally large developed markets significantly reduced the revenue of the Jaguar Land Rover business. While the success of the new Jaguar XF helped to provide some support, the deteriorating economic conditions caused volumes to decline by about 32%.

Revenues from Other Operations

Revenues (net of excise duty, where applicable) from other operations were Rs. 35,434 million in fiscal 2009, a decline of 4.5% from Rs. 37,099 million in fiscal 2008. This decline was mainly due to the sluggish demand experienced by our construction equipment subsidiary, TELCON, on account of the economic slowdown. However, TELCON continues to maintain its market leadership in the Indian excavator market and expanded its offering with new product introductions. With the integration of the INCAT business, TTL consolidated its position as one of the top solutions and software providers of leading engineering and PLM products in all major economic geographies. This business saw revenue growth of 12.1% in fiscal 2009 compared with fiscal 2008. Revenues from other operations represented 4.9% and 9.9% of our total revenues, before inter-segment eliminations, in fiscal 2009 and 2008 respectively.

Cost and Expenses

Raw Materials and Purchase of Products for Sale (including change in stock): Raw material costs as a percentage to sales was 67.6% in fiscal 2009 as compared to 66.8% in fiscal 2008. Raw material costs for fiscal 2009 were Rs. 488,733 million compared to Rs. 247,243 million in fiscal 2008. We consume a number of raw materials in the manufacture of vehicles such as steel, aluminum, copper, precious metals and resins. During fiscal 2009, the prices of steel, non ferrous and precious metals and rubber witnessed unprecedented increases, in a short period which could be only partially offset by our cost reduction initiatives.

Employee Cost: Our employee cost increased to Rs. 75,200 million in fiscal 2009 from Rs. 28,764 million in fiscal 2008. The increase is attributable to differences in salary/wage structure between India and UK/Europe. The increase in our employee cost as a percentage of total revenues (excluding other income) increased to 10.4% in fiscal 2009 from 7.8% in fiscal 2008, primarily on account of the level of salaries in the UK as expressed in rupees. Our permanent employee level increased from 36,364 persons to 49,473 persons in fiscal 2009. Several measures to lower the employee cost have been taken, such as block closures, reduction in temporary head count and voluntary retirement.

Other Expenses: Other expenses increased to Rs. 175,614 million in fiscal 2009 from Rs. 57,921 million in fiscal 2008. As a percentage of revenue these represented 24.3% in fiscal 2009 compared to 15.6% in fiscal 2008. The major components of expenses are as follows:

	Year ended March 31,		
	2009	2008	Increase
	(Rs. in millions)		
Freight, Transportation and Port Charges	24,129	10,472	13,657
Works Operation & Other Expenses	62,055	16,476	45,579
Publicity	26,154	3,475	22,679
Impairment loss pertaining to loans and receivables including finance receivables	8,525	5,954	2,571
Warranty and product liability expenses	23,862	3,257	20,605

The increase in works operation expenses was mainly due to the change in composition and differences in cost structure following our acquisition of Jaguar Land Rover. The increase in freight and transportation expenses is attributable to increases in freight rates. Impairment loss pertaining to finance receivables increased due to general increase in delays/defaults on account of changes in market conditions. The company has stepped up the monitoring process of the delinquent cases. Warranty expenses are significantly higher in our Jaguar Land Rover business because of a longer warranty period and higher cost of settlement. The increase in publicity related expenses was mainly due to the new product launches at Jaguar Land Rover and in our Indian operations. We have embarked upon initiatives to reduce our costs across all areas including raw material costs.

Table of Contents

Expenditure capitalized: These represent employee costs, store and other manufacturing supplies and other works expenses incurred for in-house capital projects, mainly product development projects. The increase relates to increased spending on product development.

Depreciation and Amortization: Our depreciation and amortization cost increased to Rs.28,040 million in fiscal 2009, compared to Rs.8,276 million in fiscal 2008. The increase reflects significant increase in our asset base by way of expansion, product development and acquisition.

Other income: Our other income increased to Rs.15,700 million in fiscal 2009, compared to Rs.7,678 million in fiscal 2008. The increase is mainly due to gain on sale of held for sale investments of Rs. 6,058 million in fiscal 2009. It also includes gain due to change in fair value conversion option of Rs. 2,807 million for fiscal 2009 and Rs. 3,156 million for fiscal 2008.

Interest expense: We availed a bridge loan of US \$ 3 billion for our acquisition of Jaguar Land Rover in fiscal 2009. We had plans to prepay the bridge loan from the proceeds of fresh issuance of capital, divestments and internal cash generation. Due to the sudden deterioration in the economic environment, affecting our cash flows, we had to borrow further to finance our capital expenditure plans and working capital requirements. In order to support our vehicle sales, we increased our vehicle financing to customers, which, in turn, required additional borrowings. As a result of the above, total borrowings increased from Rs. 220,348 million in fiscal 2008 to Rs. 435,815 million in fiscal 2009. Further, there was a significant increase in borrowing rates in fiscal 2009.

Foreign exchange (gain)/loss (net): We incurred a foreign exchange loss of Rs.48,143 million in fiscal 2009, compared to a gain of Rs.1,902 million in fiscal 2008. A significant portion of the exchange losses in the fiscal 2009 reflect (a) exchange loss on foreign currency borrowing; (b) notional exchange loss on year end valuation of foreign currency borrowings; and (c) the Jaguar Land Rover business and the Indian operations suffered foreign exchange losses on account of fluctuations in US Dollar, GBP, Euro and Rupee during the year.

Income Taxes: We had an income tax expense of Rs.842 million in fiscal 2009, compared to Rs. 9,470 million in fiscal 2008.

Minority Interest in Consolidated Subsidiaries and Share of profit of equity accounted investees, net of tax: In fiscal 2009 share of minority interest was a loss of Rs. 632 million, as compared to income of Rs. 1,226 million in fiscal 2008. This is due to a decrease in profitability of some of our subsidiaries and losses incurred in a few subsidiaries which started operations in fiscal 2008. Share of loss of equity method investees was Rs.3,464 million in fiscal 2009, compared to a profit of Rs.52 million in fiscal 2008. This change was primarily due to our proportionate share of loss in some of our affiliates, which are yet to scale operations, and also the impact of a slowdown in the automotive industry.

Net Income/Loss

Our consolidated net loss for fiscal 2009 excluding the share of minority was Rs.60,142 million, compared to net income of Rs.21,977 million in fiscal 2008. This decline was the result of the following factors:

a sharp decline in sales volumes at our Indian and Jaguar Land Rover operations;

a significant increase in interest expenses; and

losses on account of exchange fluctuation.

Recent Accounting Pronouncements

In September 2007, IASB issued revised IAS 1 *Presentation of Financial Statements*, which is applicable for annual periods beginning on or after January 1, 2009. This standard replaced IAS 1 revised in 2003. The revised standard aims to improve users' ability to analyze and compare information given in the financial statements. The adoption of the revised standard will have no effect on reported results. It will, however, result in changes in the presentation of financial statements.

In January 2008, IASB issued revised IFRS 3 *Business Combinations*, which is applicable to business combinations for which the acquisition date is on or after the first annual reporting period beginning on or after July 1, 2009. This standard replaced IFRS 3 issued in 2004. The main changes are:

Acquisition-related costs are recognised as expenses in the income statement in the period in which they are incurred. In business combinations achieved in stages, any previously held equity interest in the acquiree is remeasured to its acquisition date fair value and the resulting gain or loss is recognized in the statement of operations. Any changes in contingent consideration classified as a liability at the acquisition date are recognized in the statement of operations.

Table of Contents

Non-controlling interests in the entity acquired may be measured either at fair value, or at the proportionate share of the acquiree's net identifiable assets.

We are evaluating the impact of adoption of this Standard.

In January 2008, IASB amended IAS 27 *Consolidated and Separate Financial Statements*, which is applicable for annual periods beginning on or after July 1, 2009. The main changes are:

Changes in the ownership interest in a subsidiary that do not result in the loss of control are accounted for as equity transactions not affecting the statement of operations.

At the date control is lost, retained equity interests are remeasured to fair value.

Total other components of equity are allocated to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

We are evaluating the impact of adoption of the amendments.

In November 2006, IASB issued IFRS 8 *Operating Segments*, which is applicable for annual periods beginning on or after January 1, 2009. This standard replaced IAS 14 *Segment Reporting*. This standard specifies how an entity should disclose information about its segments which enables users to evaluate the nature and financial effects of its business activities and the economic environments in which it operates. We are evaluating the application of this Standard.

IFRIC 13 *Customer Loyalty Programs* was issued in June 2007, which is applicable for annual periods beginning on or after July 1, 2008. IFRIC 13 addresses as to how companies that grant their customers loyalty award credits (often called "points") when buying goods or services, should account for their obligation to provide free or discounted goods and services, if and when the customers redeem the points. IFRIC 13 requires companies to allocate some of the proceeds of the initial sale to the award credits and recognize these proceeds as revenue when they have fulfilled their obligations to provide goods or services. We are evaluating the application of this Interpretation.

IFRIC 16, *Hedges of a Net Investment in a Foreign Operation*, was issued in July, 2008, which is applicable for annual periods beginning on or after October 1, 2008. IFRIC 16 applies to an entity that hedges the foreign currency risk arising from its net investments in foreign operations and wishes to qualify for hedge accounting in accordance with IAS 39. The Company is evaluating the application of this Interpretation.

IAS 23 *Borrowing Costs* removes the option to expense borrowing costs and requires that an entity capitalize borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. The revised IAS 23 will become mandatory for our consolidated financial statements for the year ending March 31, 2010. Because we currently follow a policy of capitalizing borrowing costs, this new standard will not have any material impact on our consolidated financial statements.

In May 2008 and April 2009, the IASB issued *Improvements to IFRS* a collection of amendments to certain International Financial Reporting Standards as part of its program of annual improvements to its standards, which is intended to make necessary, but non-urgent, amendments to standards that will not be included as part of another major project. The amendments resulting from these improvements mainly have effective dates for annual periods beginning on or after January 1, 2009, although entities are permitted to adopt them earlier. The Company is evaluating the application of other improvements.

Exemptions to which we have availed in accordance with IFRS 1, First time adoption of IFRS

Exemptions from retrospective application

For transition to IFRS our previous GAAP is considered as Indian GAAP. Following are the optional exemptions which we have opted.

- a. **Business combinations** We have applied the exemption as provided in IFRS 1 towards non-application of IFRS 3, Business Combinations to business combinations consummated prior to April 1, 2007 (Transition Date). Accordingly, the business combinations prior to the transition date have been accounted for as per Indian GAAP.
- b. **Employee benefits** We have applied the exemption as provided in IFRS 1 relating to application of recognizing cumulative actuarial gains and losses on defined benefit pension schemes and other post retirement benefits in reserves as of the transition date.

Exceptions from full retrospective application

a Derecognition of financial assets and liabilities exception

Financial assets and liabilities derecognized before January 1, 2004 are not re-recognized under IFRS. The Company has chosen not to apply the IAS 39 derecognition criteria to an earlier date.

b Estimates exception

Upon an assessment of the estimates made under previous GAAP, the Company has concluded that there was no necessity to revise such estimates under IFRS, except where estimates were required by IFRS and not required by previous GAAP.

Table of Contents**Critical Accounting Policies**

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected. In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation. Freehold land is measured at cost and is not depreciated. Cost includes purchase price, taxes and duties, labor cost and direct overheads for self constructed assets and other direct costs incurred up to the date the asset is ready for its intended use. Interest cost incurred for constructed assets is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is provided on a straight-line basis over estimated useful lives of the assets. Depreciation on finance lease assets is recorded over the shorter of the estimated useful life of the asset or the period of the lease. Depreciation is not recorded on capital work-in-progress until construction and installation are complete and the asset is ready for its intended use.

Intangible assets

Intangible assets purchased including acquired in business combinations, are measured at cost or fair value, where applicable, less accumulated amortization. Intangible assets with indefinite lives are reviewed annually to determine whether indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

The amortization period for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates.

Internally generated intangible asset

Research costs are charged to the statement of operations in the year in which they are incurred.

Product development costs incurred on new vehicle platform, engines, transmission and new products are recognized as intangible assets, when feasibility has been established, the Company has committed technical, financial and other resources to complete the development and it is probable that asset will generate probable future and economic benefits.

The costs capitalized include the cost of materials, direct labor and directly attributable overhead expenditure incurred up to the date the asset is available for use. Interest cost incurred is capitalized up to the date the asset is ready for its intended use based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortized over a period of 36 months to 120 months or on the basis of actual production to planned production volume over such period after commencement of the commercial production of the underlying product.

Capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment loss.

Impairment of property, plant and equipment and intangible assets

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier there is an indication that the asset may be impaired.

Financial instruments

Classification, initial recognition and measurement: A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities.

Financial instruments are recognized on the balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognized at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognized in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

For discussion on various types of Financial Instruments refer to Note 2(t) to our consolidated financial statements included in this annual report.

Product Warranty

Vehicle warranties are provided for a specified period of time. Our vehicle warranty obligations vary depending upon the type of the product, geographical location of its sale and other factors.

Table of Contents

The estimated liability for vehicle warranties is recorded at the time products are sold. These estimates are established using historical information on the nature, frequency, and average cost of warranty claims and our estimates regarding possible future incidence based on actions on product failures.

Changes in warranty liability as a result of changes in estimated future warranty costs and any additional costs in excess of estimated costs, can materially affect our net income. Determination of warranty liability is based on the estimated frequency and amount of future claims, which are inherently uncertain. Our policy is to continuously monitor warranty liabilities to determine the adequacy of our estimate of such liabilities. Actual claims incurred in the future may differ from our original estimates, which may materially affect warranty expense.

Employee Benefits

Employee benefit costs and obligations are dependent on assumptions used in calculating such amounts. These assumptions include salary increase, discount rates, health care cost trend rates, benefits earned, interest cost, expected return on plan assets, mortality rates and other factors.

While we believe that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect our employee benefit costs and obligations.

B. Liquidity and Capital Resources

We finance our capital requirements by cash from operations, debt, capital market borrowings and sale of investments. As of March 31, 2009, our borrowings (including short term debt) were Rs.435,815 million. For our loan maturity profile, see Liabilities and Sources of Financing . We raised bridge financing of US \$ 3 billion for financing the acquisition of Jaguar Land Rover in June 2008.

We raised equity of Rs. 41,393 million through rights issue of shares and divested certain investments to prepay part of the bridge loan. Upto March 31, 2009, US \$ 984 million was prepaid. We further raised in May 2009, debentures of Rs. 42000 million with maturities ranging from 23 months to 83 months. The Company used the proceeds to repay a part of the bridge loan outstanding as of March 31, 2009. The balance of the bridge loan will be repaid in four tranches by December 2010.

During the fiscal 2009, there had been a sudden and significant deterioration in global economic conditions, which has affected the auto industry severely. In view of our current debt position and considering the current economic environment, our strategy includes ensuring that we have sufficient funding available with high degree of certainty throughout the business cycle. We have set up plans for aggressive cost reduction to improve generation of operating cash. We believe that our working capital is sufficient for our present requirements.

Table of Contents**Cash Flow Data**

The following table sets forth selected items from our consolidated statements of cash flows for the periods indicated and shows the percentage change between periods.

	Rs. in million		Percentage Change
	2009	2008	2008 to 2009
Net Cash provided by Operating Activities:	25,194	23,114	9.0%
Net income/ (loss) after tax	(60,774)	23,203	
Adjustments to net income/ (loss) after tax	93,676	31,512	
Changes in Operating Assets and Liabilities	(2,039)	(24,748)	
Income tax paid	(5,668)	(6,853)	
Net Cash used in Investing Activities	(162,380)	(87,362)	85.9%
Purchase of Property, Plant and Equipment and Intangible Assets (Net)	(88,857)	(50,295)	
Net Investment, short term deposit , margin money and loans given	8,760	(28,367)	
Acquisitions	(98,644)	(90)	
Realization (deposit) of foreign currency deposit with banks	11,338	(11,224)	
Dividend and Interest received	5,023	2,614	
Net Cash provided by Financing Activities	155,437	67,989	128.6%
Equity Issuance (Net of Issue expenses)	41,097		
Proceeds from issue of shares by a subsidiary to minority shareholders	3	645	
Dividends Paid (including to minority shareholders of subsidiaries)	(7,492)	(7,016)	
Interest paid	(32,047)	(16,232)	
Net Borrowings	153,876	90,592	
Net change in cash and cash equivalents	18,251	3,741	387.8%
Effect of foreign exchange on cash flows	(6,840)	20	
Cash and cash equivalents, beginning of the year	11,416	7,655	
Cash and cash equivalents, end of the year	22,827	11,416	

See consolidated statement of cash flows on Pages F-6 and F-7 for details.

Our cash flow statement for fiscal 2009 includes activities pertaining to acquired businesses of Jaguar Land Rover , Serviplem S.A and Comoplesa Lebrero S.A. from the respective dates of acquisition.

Net cash provided by operating activities was Rs. 25,194 million and Rs. 23,114 million in fiscal 2009 and 2008 respectively.

Our net income as adjusted for non-cash and other items declined to Rs. 32,902 million in fiscal 2009 from Rs. 54,715 million in fiscal 2008. Sudden and significant deterioration of the world economy, resulting in a significant decline in sales volumes, adversely affected our income and operating cash flows.

The following factors contributed to cash decrease on account of change in operating assets and liabilities of Rs 2,039 million in 2009.

Decrease in other current liabilities amounting Rs 38,610 million due to reduction in manufacturing activity.
The above decrease was partially offset by the following factors:

Decrease in trade receivables amounting Rs. 19,487 million due to decrease in sales volume.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Decrease in inventories amounting Rs. 15,049 million mainly on account of reduction actions and reduction in manufacturing activity due to lower sales volume.

Net cash used in investing activities increased to Rs.162,380 million in fiscal 2009 from Rs. 87,362 million in fiscal 2008, mainly on account of our acquisition of Jaguar Land Rover and investments in property, plant and equipment as highlighted below.

Payment made for the Jaguar Land Rover and Serviplem acquisitions during the year was Rs. 98,644 million (net of cash acquired).

Purchase of property, plant and equipment and expenditure on intangible assets (product development projects) in fiscal 2009 were Rs. 47,608 million and Rs. 42,082 million respectively. Our capital expenditure relates mostly to capacity expansion of our production facilities, especially at Uttarakhand and Pune, setting up the facility at Sanand and the introduction of new products, quality and reliability improvement projects.

We sold during fiscal 2009 held for sale investments and equity interests in subsidiaries, which released Rs.16,125 million and Rs. 1,610 million respectively. These mainly represent sale of our shares in Tata Steel, TCS, Tata Teleservices and our former subsidiary TACO.

A foreign currency deposit of Rs. 11,338 million was encashed during fiscal 2009 for acquisition investment. Net cash inflow from financing activities was Rs. 155,437 million and Rs. 67,989 million in fiscal 2009 and 2008 respectively. Our acquisition of Jaguar Land Rover during fiscal 2009 and the impact on operating results due to economic downturn affected our financing. The following are the major changes in financing during fiscal 2009.

Rights issue of shares net of issue expenses were Rs. 41,097 million.

Net change in short term borrowings was Rs. 144,116 million . This mainly relates to the bridge loan for the Jaguar and Land Rover acquisition.

We paid interest of Rs. 32,047 million.

Certain of our subsidiaries and equity method affiliates have contractual and other limitations in respect of their ability to transfer funds to us in the form of cash dividends, loans or advances. However this has not had and is not expected to have any impact on our ability to meet our cash obligations.

Table of Contents***Balance Sheet Data***

Total assets were Rs.782,629 million and Rs. 474,136 million and as of March 31, 2009 and 2008, respectively. The increase in total assets during fiscal 2009 was primarily due to acquisitions which added Rs.373,682 million to our total assets in fiscal 2009 and also increase in property, plant and equipment of Rs.56,615 million and intangible assets of Rs.44,582 million on account of our ongoing capital expenditure programme. Total assets of Rs.373,682 million on acquisition includes Rs.103,982 million of property, plant and equipment and Rs.74,550 million of intangible assets.

Total shareholders' equity was Rs.38,726 million and Rs. 124,316 million as of March 31, 2009 and 2008, respectively. In October 2008, we raised Rs.41,393 million through a simultaneous but unlinked rights issue of ordinary shares and a new group of A ordinary shares with differential voting rights. We issued 64,175,655 shares each of ordinary shares and A ordinary shares of face value Rs.10 in the ratio of one ordinary and/or one A ordinary share for every six ordinary shares at a premium of Rs.330 per share and Rs.295 per share respectively. Proceeds from the rights issue were used to prepay part of the bridge loan availed for the acquisition of Jaguar Land Rover.

In addition, 153,025 ordinary shares were allotted consequent to conversion of a portion of our outstanding convertible debt securities in fiscal 2009. Consequently, our ordinary share capital increased from Rs.3,855 million as of March 31, 2008 to Rs.4,499 million as of March 31, 2009 and A ordinary share capital stood at Rs.642 million as on March 31, 2009. Issuance of shares at the premium resulted in an increase in our additional paid in capital from Rs.38,258 million in fiscal 2008 to Rs.78,170 million in fiscal 2009.

Our reserves (including other components of equity) declined from Rs.75,851 million as of March 31, 2008 to a deficit of Rs.48,765 million as of March 31, 2009, primarily due to our net loss for fiscal 2009, foreign currency translation differences, actuarial losses in pension plans and decline in fair value of available for sale securities during the year.

Our total debt increased to Rs.435,815 million as of March 31, 2009 compared to Rs.220,348 million as of March 31, 2008. We acquired Jaguar Land Rover. Further, due to sudden and significant deterioration in the economic scenario, our operating results in fiscal 2009 were impacted and this has also affected our capital raising plans. As a result of combination of these factors the loans have considerably increased. The short term debt, including the current portion of the long-term debt, was Rs. 319,629 million as of March 31, 2009 compared to Rs.112,320 million as of March 31, 2008. Of the US\$ 3 billion short term bridge loan taken for acquisition of Jaguar Land Rover US \$ 2.016 billion (Rs. 102,291 million, including exchange fluctuation) is outstanding as at March 31, 2009. Increased working capital and other business requirements due to slowdown in our automotive demand caused an increase in short term borrowings. Excluding the current portion of long-term debt, the short-term debt was Rs.251,252 million as of March 31, 2009, compared to Rs.55,645 million as of March 31, 2008. Many of these incremental borrowings had to be contracted at higher levels of interest rates due to a near freeze in lending markets causing borrowing cost to spike during the year.

The long-term debt, excluding the current portion, increased from Rs.108,028 million as of March 31, 2008 to Rs. 116,186 million as of March 31, 2009. In December 2008, we launched public fixed deposit scheme in India (with maturities of 1,2 and 3 years) to meet a part of our funding requirements. The scheme has received an overwhelming response and we collected an aggregate amount of Rs.12,325 million from 1,44,000 depositors. During the year, we repurchased and cancelled US\$ 17 million of our outstanding convertible debt securities due 2012 and ¥ 300 million of our outstanding convertible debt securities due 2011. In line with our short term borrowing rates, long term borrowing rates also increased in fiscal 2009. The long-term debt include Rs. 90,776 million as at March 31, 2009 and Rs. 91, 866 million as at March 31, 2008 by way of collateralized debt obligation representing finance receivables securitized which do not meet derecognition criteria as per IFRS. The outstanding foreign currency convertible note have increased from Rs. 37,504 million as at March 31, 2008 to Rs. 46,437 million as at March 31, 2009, mainly due to exchange fluctuations. The company continued its investment plan in expansion and product development.

Table of Contents

Current liabilities other than short-term debt increased from Rs.106,581 million as of March 31, 2008 to Rs.262,530 million as of March 31, 2009, primarily due to liabilities assumed as part of the acquisitions. We assumed current liabilities of Rs. 217,039 million excluding short term debt.

As of March 31, 2009, we had cash and cash equivalents of Rs.22,827 million, compared to Rs.11,416 million as of March 31, 2008. The increase mainly relates to Jaguar Land Rover.

Finance receivables (net of allowances) were Rs.158,803 million as of March 31, 2009 compared to Rs. 163,960 million as of March 31, 2008.

As of March 31, 2009, inventories stood at Rs.107,956 million compared to Rs.34,337 million as of March 31, 2008, which included inventory on acquisition of Jaguar Land Rover business of Rs.98,404 million. Due to lower volumes and reduction actions, the inventory has been lowered in fiscal 2009.

Trade receivables increased from Rs. 30,041 million as of March 31, 2008 to Rs.51,697 million as of March 31, 2009. As part of acquisitions we acquired Rs.50,212 million of trade receivables. Our focus on improved collections to meet liquidity requirements helped us to reduce our accounts receivables towards the later part of the fiscal year.

Our investment (short term and long term investments) declined from Rs.40,659 million as of March 31, 2008 to Rs.9,265 million as of March 31, 2009. In fiscal 2009, we sold investments of Rs.9,595 million available for sale securities and Rs.9,673 million investment in mutual fund to repay bridge loan, meet our capital expenditure and other business requirements. A significant part of our investments are in available for sale equity shares whose fair value as on March 31, 2009 is Rs.5,502 million. Due to the significant fall in market prices in fiscal 2009 the value of available for sale equity shares declined by Rs. 10,798 million. Equity investments recognized at cost (due to lack of readily determinable market value), investment in mutual funds, corporate bonds and other debt, loans and receivables etc accounted for the balance amount. More than 90% of investments are non-current in nature.

Our investments in equity accounted investees was Rs.8,012 million as of March 31, 2009, compared to Rs.9,784 million as of March 31, 2008. Decline is primarily due to losses in some of our associates.

Our other current assets increased from Rs.11,072 million as of March 31, 2008 to Rs.27,714 million as March 31, 2009. The increase is attributable to the Jaguar Land Rover acquisition. Our current tax receivables increased from Rs.5,792 million as of March 31, 2008 to Rs.7,466 million as of March 31, 2009.

Our other financial assets including non-current financial assets increased from Rs.22,966 million as of March 31, 2008 to Rs.28,790 million as of March 31, 2009. A major portion of our other financial assets is margin money (Rs.19,037 million and Rs.15,999 as at March 31, 2009 and 2008 respectively) with banks in the nature of restricted cash, and consists of collateral provided in support of guarantees issued by banks towards securitization of finance receivables on the Company's behalf as may be required in the transaction of transfer of finance receivables.

Capital Expenditure

Capital expenditure increased from Rs.51,386 million during fiscal 2008 to Rs.101,197 million in fiscal 2009. Our automotive operations accounted for majority of this capital expenditure. Within automotive segment capital expenditure in Tata vehicle business was Rs.52,577 million in fiscal 2009, compared to Rs.49,925 million in fiscal 2008. Our capital expenditures during the past two years related mostly to capacity expansion of our production facilities, the introduction of new products such as the Ace Magic, Winger, Sumo Grande, Indica Vista and development of planned future products and technologies as well as quality and reliability improvements aimed at operating cost reductions. During the fiscal 2009, we announced that the mother plant for the Nano will be relocated from Singur in West Bengal to Sanand in Gujarat. The integrated project, comprising the mother plant and the vendor park, will come up on an area of about 1100 acres. The plant, to begin with, will produce 250,000 cars per annum. The capacity is expandable up to 500,000 cars per annum.

Capital expenditure in the Jaguar Land Rover business amounted to Rs.46,090 million for the period post our acquisition mainly representing product development projects. Jaguar Land Rover continues to invest in new technologies through its research and development activities to develop products that meet the requirements of the premium segment including developing sustainable technologies to improve fuel economy and reduce CO2 emissions. Jaguar Land Rover has committed to comply with European emissions legislation and has announced an £800million program specifically aimed at reducing CO2 emissions which is supported by a carbon offset programme balancing emissions from the manufacture of all Land Rover vehicles as well as the first 45,000 miles of Land Rover customer vehicle use in the UK and other countries. The UK government has recently offered a grant of £27million to help enable the development.

Table of Contents

We will continue to invest in our business units and research and development over the next several years, including committed capital expenditure for our ongoing projects, new projects, product development programs, mergers, acquisitions and strategic alliances to build and expand our presence in the passenger vehicle and commercial vehicle categories.

Liabilities and Sources of Financing

We fund our short-term working capital requirements with cash generated from operations, overdraft facilities with banks, short and medium term borrowings from lending institutions, banks and commercial paper. The maturities of these short and medium term borrowings and debentures are generally matched to particular cash flow requirements. We had short-term borrowings (including the current portion of long-term debt) of Rs. 319,629 million and Rs.112,320 million as of March 31, 2009 and 2008 respectively. We had unused short-term credit facilities of Rs.10,422 million and Rs.41,052 million as of March 31, 2009 and 2008, respectively.

On April 27, 2004, Tata Motors raised US\$ 100 million by way of Zero Coupon Convertible Notes due for redemption on April 27, 2009. The noteholders have an option to convert these Notes into ordinary shares or ADSs determined at an initial conversion price of Rs. 573.106 per share with a fixed rate of exchange on conversion of Rs.43.85 per USD, from and including June 7, 2004 to and including March 28, 2009. The conversion price will be subject to certain adjustments. Further, Tata Motors has a right to redeem in whole, but not in part, these Notes at any time on or after April 27, 2005, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on April 27, 2009, at 95.111% of the principal amount. 7,313,842 ordinary shares were allotted during the period April 27, 2004 to March 31, 2008, consequent to conversion of 95,590 Notes with carrying value of Rs. 5,792 million. During the year ended March 31, 2009, 153,025 ordinary shares were allotted consequent to conversion of 2,000 Notes with carrying value, net of Rs. 0.1 million being stamp duty expenses on conversion, of Rs. 100 million (US\$ 1.7 million). Further, 2,410 Notes with carrying value of Rs. 148.6 million (US\$ 2.9 million) outstanding as at March 31, 2009 have been redeemed on maturity.

On April 27, 2004, Tata Motors also raised US\$ 300 million by way of one percent Convertible Notes due for redemption on April 27, 2011. The note holders have an option to convert these Notes into ordinary shares / ADSs determined at an initial conversion price of Rs. 780.40 per share at a fixed rate of conversion of Rs. 43.85 per USD, from and including June 7, 2004 to and including March 28, 2011. The conversion price of the notes was reset to a price of Rs.737.29 per share at a fixed rate of conversion of Rs. 43.85 per USD, on account of our Rights Issue in fiscal 2009. The conversion price will be subject to certain adjustments. In the event of certain changes affecting taxation, Tata Motors has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on April 27, 2011 at 121.781% of the principal amount. There have been no conversions during the year ended March 31, 2009. Outstanding notes may at the option of the Note holders be converted into 17,842,482 ADSs or shares at any time upto March 28, 2011.

In March 2006, Tata Motors issued Yen 11,760 million (Rs. 4,500.3 million) Zero Coupon Convertible Notes due for redemption on March 21, 2011. The noteholders have an option to convert these Notes into ordinary shares or ADSs determined at an initial conversion price of Rs.1,001.39 per share with a fixed rate of exchange on conversion of Rs.1.00 per Yen 2.66, from and including May 2, 2006 to and including February 19, 2011. The conversion price of the notes was subsequently reset to a price of Rs.946.07 per share at a fixed rate of conversion of Rs.1.00 per Yen 2.66, on account of our Rights Issue in fiscal 2009. The conversion price will be subject to certain adjustments. Further, Tata Motors has a right to redeem in whole, or in part, these Notes at any time on or after March 20, 2009 but prior to February 8, 2011, subject to certain conditions. In the event of certain changes affecting taxation, Tata Motors has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on March 21, 2011, at 99.253% of the principal amount. During the year, the company bought back and cancelled 30 notes (Principal value of JPY 300 million). There has been no conversion during the year ended March 31, 2009. Further 1146 outstanding notes may at the option of the Note holders be converted into 4,553,878 ADSs or shares at any time upto February 19, 2011.

In July 2007, Tata Motors has raised funds aggregating US\$ 490 million (Rs. 19,927.1 million at issue) by issue of Zero Coupon Convertible Alternative Reference Securities (CARS) due on July 12, 2012. The noteholders have an option, subject to the terms and conditions of the issue, to convert these notes into Qualified Securities or the Company's newly issued ordinary shares or ADSs. The conversion may be made by the noteholders from and including October 11, 2011 to and including June 12, 2012 at an initial conversion price of Rs. 960.96 per Share (equivalent to US\$23.67 at a fixed rate of exchange on conversion of Rs. 40.59 = US\$1.00) that is subject to adjustment in certain circumstances. The conversion price of the notes was reset to a price of Rs.907.87 per share at a fixed rate of conversion of Rs. 40.59 per USD, on account of our Rights Issue in fiscal 2009. The Company has a right to redeem in whole, but not in part, these notes at any time on or after October 11, 2011, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled as per the terms of issue, these will be redeemed on July 12, 2012 at 131.82% of the outstanding principal amount. During the year, the company bought back and cancelled 170 notes (Principal value of US\$ 17 million).

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

On June 2, 2008, we completed the acquisition of Jaguar Land Rover from Ford Motor Company for a purchase consideration of US\$ 2.5 billion in an all cash transaction from Ford Motor Company, which contributed about US\$600 million to the Jaguar Land Rover pension plans. The purchase consideration of US\$ 2.5 billion paid by JaguarLandRover Limited was financed through a capital contribution of US\$ 500 million and a short term bridge loan of US\$ 3,000 million from a group of lenders including the Bank of

Tokyo-Mitsubishi UFJ Limited, Citigroup Global Markets Asia Limited, ING Bank N.V., Singapore Branch, J.P. Morgan Securities (Asia Pacific) Limited, Mizuho Corporate Bank Limited, Standard Chartered Bank, State Bank of India and BNP Paribas, Singapore Branch. As on March 31, 2009 US \$ 2,016 million of bridge loan is outstanding.

Table of Contents

In October 2008, we raised an aggregate of Rs.41,393.3 million through a simultaneous but unlinked rights issue of ordinary shares and A ordinary shares of 64,276,164 ordinary shares of Rs.10 each at a premium of Rs.330/- per share aggregating Rs.21,854 million in the ratio of one Ordinary Share for every six ordinary shares; and 64,276,164 A ordinary shares of Rs.10 each at a premium of Rs.295/- per A ordinary share aggregating Rs.19,604 million in the ratio of one A ordinary share for every six ordinary shares. Proceeds of rights issue were used to prepay part of bridge loan availed by us for the acquisition of Jaguar Land Rover business.

Subsequent to March 31, 2009, in May 2009 we raised funds through secured non-convertible credit enhanced rupee debentures in four tranches, having tenors up to 7 years, aggregating Rs.42,000 million on a private placement basis. Proceeds were used to repay part of the short term bridge loan availed for acquisition of Jaguar Land Rover.

The following table sets forth our short-term and long-term debt position:

	Fiscal 2009	Fiscal 2008
	(Rs. in millions)	
Total short-term debt (excluding current portion of long-term debt)	251,253	55,645
Total current portion of long-term debt	68,376	56,675
Long-term debt net of current portion	116,186	108,028
Total Debt	435,815	220,348

During fiscal 2009 and 2008, the effective weighted average interest rate on our long-term debt was 9.4% and 8.4% per annum, respectively.

As of March 31, 2009, approximately 68.7% of our long-term debt (including current portion) was denominated in rupees and the balance was denominated in dollars and other non-rupee currencies. During fiscal 2009, our effective cost of borrowing increased due to increase in interest rates in India and severe global credit crunch during the fiscal year.

The following table sets forth a summary of the maturity profile for our outstanding long-term debt obligations as of March 31, 2009

Payments Due by Period	Rs. in millions
Within one year	68,376
After one year and up to two years	46,558
After two year and up to five years	69,628
After five year and up to ten years	
Total	184,562

Some of the long-term debt agreements contain financial covenants that require us to satisfy and/or maintain financial ratios and other specified conditions on a non-consolidated basis under Indian GAAP, including debt service coverage ratio, long term debt to equity ratio, minimum net worth and external liabilities to net worth ratio level of capital expenditure, dividend payout and maintaining non-performing assets of less than 3% of finance receivables. The terms of certain of our long-term debt agreements require us to obtain prior consent for certain specified actions including amendment of our charter documents and for creation of any lien on our properties other than for specified purposes.

As a result of our increase in our long-term debt during fiscal 2009 as compared to fiscal 2008, the ratio of net debt to shareholders' equity (total debt less cash and cash equivalents and liquid marketable securities divided by total shareholders' equity) under IFRS increased from 1.68 as of March 31, 2008 to 10.64 as of March 31, 2009. Details of the calculation of this ratio are set forth in Exhibit 7.1 to this annual report.

(1) The following table sets forth our contingent liabilities as of the dates indicated.

Fiscal 2009	Fiscal 2008
(Rs. in millions)	

Income Tax	4,454	4,563
Excise Duties	1,821	1,062

Table of Contents

Sales Tax	5,424	3,138
Other Taxes and Claims*	2,045	1,208
Other Contingencies	54	50
Total	13,798	10,021

* Other taxes and claims include claims by other revenue authorities and distributors. See Item 4.B Business Overview Legal Proceedings , of this annual report.

(2) Rs.46,314 million and Rs.35,732 million in fiscal 2009 and 2008, respectively, represent executory contracts on capital accounts not otherwise provided for.

On an ongoing basis, our legal department reviews pending cases, claims by third parties against us and other contingencies. For the purposes of financial reporting, we periodically classify these matters into gain contingencies and loss contingencies. Gain contingencies are not recognized until the contingency has been resolved and amounts are received or receivable. For loss contingencies that are considered probable, an estimated loss is recorded as an accrual in our accounts and, if the matter is material, the estimated loss is disclosed in our financial statements. We do not consider any of these matters to be individually sufficiently material to warrant disclosure in our financial statements. Loss contingencies that are considered reasonably possible are not provided for in our financial statements, but if we consider such contingencies to be material, individually or in the aggregate, they are disclosed in our financial statements. Most loss contingencies are classified as reasonably possible unless clearly frivolous, in which case they are classified as remote and are monitored by our legal department on an ongoing basis for possible deterioration. We do not disclose remote matters in our financial statements. See note 38 of our audited consolidated financial statements for additional information regarding our material claims and contingencies.

Since fiscal 1997, we have benefited from participation in the Export Promotion Capital Goods Scheme, or the EPCG Scheme, which permits us to import capital equipment under a special license at a substantially reduced customs duty, subject to us fulfilling an obligation to export goods manufactured or produced by the use of capital equipment imported under the EPCG Scheme to the value of a multiple of the cost insurance and freight value of these imports or customs duty saved, over a period of 8 or 12 years from the date of obtaining the special license. We currently hold 57 licenses that require us to export our products of a value of approximately Rs.105 million between 2002 and 2017 and we carefully monitor our progress in meeting our incremental milestones. After fulfilling some of the export obligations, the remaining obligation to exports products of value is Rs.17 million by March 2017. In the event that the export obligation under the EPCG Scheme is not fulfilled, we would have to pay the differential between the reduced and normal duty on the goods imported along with interest. In view of our past record of exceeding our export milestones, and our current plans with respect to our export markets, we do not currently foresee any impediments to meeting our export obligations in the required time frame.

Finance Receivables

In fiscal 2009 and fiscal 2008, 31% and 34%, respectively, of our sales volumes were financed under loan contracts to our dealer s customers. As of March 31, 2009 and 2008, our customer finance receivable portfolio was comprised 588,055 and 528,307 contracts, respectively, with gross finance receivable of approximately Rs.195,445 million, and Rs.196,640 million respectively. We follow specified internal procedures including quantitative guidelines for selection of our finance customers to assist in managing default and repayment risk in our portfolio. We originate all the contracts through our authorized dealers and direct marketing agents with whom we have agreements. All our marketing, sales and collection activities are undertaken through dealers or directly by us including our division known as Tata Motor finance and our subsidiary company Tata Motors Finance Limited.

We securitize or sell most of our finance receivables in the normal course of business. We undertake a sale of the receivables in respect of finance agreements due from pools of purchasers. The constitution of these pools is based on criteria that are decided by credit rating agencies and/or based on the advice that we receive as to the marketability of a pool. We undertake these securitizations of our receivables in either or both of the following forms:

assignment of the receivables due from purchasers under hire-purchase / loan agreements; and

securitization of receivables due from purchasers by means of private placement.

We act as collection agent on behalf of the investors, representatives, special purpose vehicles or banks in whose favor the receivables have been assigned, for the purpose of collecting receivables from the purchasers on the terms and conditions contained in the applicable deeds of

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

securitization in respect of which pass-through certificates are issued to investors in case of special purpose vehicles, or SPVs. We also secure the payments to be made by the purchasers of amounts constituting the receivables under the hire-purchase/loan agreements to the extent specified by rating agencies by any one or all of the following methods:

Table of Contents

by furnishing to the investors collateral, in respect of the obligations of the purchasers and the undertakings to be provided by us;

by furnishing, in favor of the investors, 10% to 30% of the gross receivables as cash collateral either by way of a fixed deposit or bank guarantee to secure the obligations of the purchasers and our obligations as the collection agent, based on the quality of receivables and rating assigned to the individual pool of receivables by the rating agency (ies); and

by way of over-collateralization or by investing in subordinate pass-through certificates to secure the obligations of the purchasers. The following table sets forth details of the transfer of finance receivables undertaken by us as of the periods indicated:

	Fiscal 2009	Fiscal 2008
	(Rs. million)	
Securitized value	277,341	218,635
Balance payable	111,779	111,345
Overdue as a % of amount securitized	2.6%	1.7%

See Note 40(c) of our audited consolidated financial statements for accounting of finance receivables.

Recent Developments

New Product Launches

In April 2009, Jaguar Land Rover revealed the 2010 model year Range Rover, Range Rover Sport and Discovery 4 models which feature a range of powertrain changes together with exterior and interior modification. The new models are intended to go on sale in the second half of 2009 starting with the Range Rover in July 2009, with Discovery 4 and Range Rover Sport in September 2009.

In May 2009, we unveiled a new range of trucks, that we believe match the best in the world in performance at a lower life-cycle cost, termed as Prima , to be gradually introduced in South Korea, South Africa, the SAARC countries and the Middle East.

In May 2009, Jaguar Land Rover introduced the Freelander 2 TD4_e, with intelligent stop-start and effects a 7% improvement in CO2 emissions and giving up to a 20% improvement in fuel economy in real world test. The new Freelander 2 TD4_e is Land Rover s most fuel efficient to date featuring a new intelligent Stop/Start system, it is the first production vehicle to incorporate technologies from the company s programme of sustainable engineering initiatives, collectively named e TERRAIN TECHNOLOGIES .

Refinancing of Bridge Loan

In May 2009, we raised Rs. 42,000 million through issue of secured non-convertible rupee debentures. The debentures, issued in four tranches with maturities ranging from 23 to 83 months, carry a coupon of 2% and will be redeemed at varying premia on maturity. Proceeds of the debenture issue were used to prepay part of the bridge loan raised to finance Jaguar Land Rover acquisition. We also amended our original acquisition finance facility of US\$3 billion via the amendment and restatement of acquisition facility arrangement of US\$1 billion to be repaid in four tranches by December 2010. The facilities carry certain covenants in terms of certain financial ratios and minimum earnings levels as per Indian GAAP and limitations on capital expenditure and dividends.

EIB Loan

We along with Jaguar Land Rover have been in discussions with commercial banks for Jaguar Land Rover funding facilities, Tata Motors and Jaguar Land Rover also expect that the long term loan from the European Investment Bank (EIB) of GBP 340 million, sanctioned to Jaguar Land Rover, can also be successfully secured through appropriate commercial arrangements. With the positive trend in the external environment in financial markets and improvement in general liquidity, these arrangements have been and are expected to be concluded without necessitating guarantees from the UK Government, for which discussions had been ongoing for some time.

Table of Contents**Working Capital Lines**

In August 2009, we increased our short term working capital limits from Rs.8,000 crores to Rs.12,000 crores from a consortium of 25 bankers. These limits are in the form of fund based and non fund based limits and as a market practice in India are uncommitted short tem lines which are renewed every year.

Board of Directors

Mr Ravi Kant superannuated as Managing Director on June 1, 2009 as per our Retirement Policy and the terms of his appointment. He has been appointed as the Non-Executive Vice-Chairman on the Board of Directors of the Company with effect from June 2, 2009. Mr P M Telang, Executive Director (Commercial Vehicles Business Unit) was appointed as the Managing Director-India Operations with effect from June 2, 2009.

C. Research and Development, Patents and Licenses, etc.

Please see Item 4.B of this annual report for the information required by this item.

D. Trend Information.

Please see Item 5.A of this annual report for the information required by this item.

E. Off-balance Sheet Arrangements

We have provided guarantees aggregating Rs 8,565.3 million as of March 31, 2009 to banks and others in respect of loans/credit facilities availed by our joint venture.

Item 6. Directors, Senior Management and Employees.**A. Directors and Senior Management.****Board of Directors.**

Under our Articles of Association, the number of our Directors cannot be less than three nor more than fifteen. At present, there are twelve Directors, including a nominee Director of Tata Steel Limited, or Tata Steel. Our Board of Directors, or the Board, has the power to appoint Managing Directors and Executive Directors.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Our Articles of Association provide that the Board of Directors of Tata Steel, which, with its subsidiary, owns, as of March 31, 2009, 8.62% of our Ordinary shares and 8.63% of A Ordinary shares, has the right to nominate one Director (the Steel Director) to the Board. Dr. J.J. Irani is the current nominee Director of Tata Steel.

Table of Contents

In addition, our Articles of Association provide that (a) our debenture holders have the right to nominate one Director (the Debenture Director) if the trust deeds relating to outstanding debentures require the holders to nominate a Director; and (b) Financial Institutions in India, have the right to nominate two Directors, (the Financial Institutions Director) to the Board pursuant to the terms of loan agreements. Currently, there is no Debenture Director or Financial Institutions Director on the Board.

The Directors may be appointed by the Board or by a General Meeting of the shareholders. The Board may appoint any person as an additional Director, but such a Director must retire at the next Annual General Meeting unless re-elected by the shareholders after complying with the provisions of the Companies Act. A casual vacancy caused on the Board due to death or resignation of a sitting member can be filled by the Board; but such a person can remain in office only for the unexpired term of the person in whose place he was appointed. On the expiry of the term, he will retire unless re-elected by the shareholders. The Board may appoint an Alternate Director in accordance with the provisions of the Companies Act to act for a Director during his absence, which period of absence shall not be less than three months.

Under the Companies Act, 1956 at least two-thirds of the total numbers of Directors on the Board are subject to retirement by rotation, and of these Directors, one third must retire every year. The Directors to retire are those who have been the longest in office. Our Directors are not required to hold any of our shares by way of qualification shares.

As of March 31, 2009, our Directors and Executive Officers, in their sole and joint names, beneficially held an aggregate of 2,00,391 Ordinary shares (approximately 0.04% of our issued share capital) and 24,212 A Ordinary shares (approximately 0.03% of our issued share capital). In addition, some of our Directors hold as trustees for various non-affiliated trusts, an aggregate of 354,976 shares (representing approximately 0.09% of our issued share capital).

The following table provides information about our current Directors, Executive Officers and Chief Financial Officer as at June 30, 2009:

Name	Position	Date of Birth/ Business Address ⁽¹⁾	Year appointed as Director or Executive Officer or Chief Financial Officer	Expiration of Term	Number of Ordinary shares beneficially owned as of June 30, 2009,	Number of A Ordinary shares beneficially owned as of June 30, 2009

(2) Each of our Directors, Executive Officers and Chief Financial Officer beneficially owns less than 1% of our shares as of March 31, 2009.

Biographies

Set forth below is a short biography of each of our Directors, Executive Officers and Chief Financial Officer:

Mr Ratan N Tata (Chairman), Mr Tata holds a B.Sc. (Architecture) degree with structural engineering from Cornell University, USA and has completed the Advanced Management Program at Harvard Business School, USA. He joined the Tata Group in 1962. As Chairman of Tata Industries Limited since 1981, he was responsible for transforming the company into a Group strategy think-tank and a promoter of new ventures in high technology businesses. In 1991, Mr Tata was appointed Chairman of Tata Sons Limited, the holding company of the Tata Entities and currently holds the chairmanships of major Tata companies. During his tenure, the Group's revenues have grown over ten-fold to annualized Group revenues of \$70.8 billion

Mr Tata is on the Central Board of the Reserve Bank of India, a Member of the Prime Minister's Council on Trade and Industry besides being a member of various global councils. He is also the chairman of two of the largest private sector promoted philanthropic trusts in India. Mr Tata is associated with various organizations in India and abroad.

The Government of India honored Mr Tata with its second highest civilian award, the Padma Vibhushan, in 2008. Mr Tata was conferred with NDTV Automotive Man of the Year 2008 award. He has also been conferred an honorary doctorate in business administration by the Ohio State University, an honorary doctorate in technology by the Asian Institute of Technology, Bangkok, an honorary doctorate in science by the University of Warwick, and an honorary fellowship by the London School of Economics. Mr Tata has been on the Company's Board since August 14, 1981 including 14 years in an executive capacity and is actively involved with product development and other business strategies pursued by the Company. One of his achievements include designing and developing an indigenous Indian car - Indica which besides creating a record of sorts, is one of the leading products in its category in the car market. The Nano -the fuel efficient, low-cost, eco-friendly people's car envisioned by Mr Tata was commercially launched in March 2009 and deliveries have commenced in July 2009. The Company was also awarded the Wall Street Journal Technology Innovation Award for the Tata Nano, in the transportation sector.

Mr. Ravi Kant (Vice-Chairman): Mr. Ravi Kant holds a Bachelor of Technology degree from the Indian Institute of Technology, Kharagpur and a Masters in Science from the University of Aston, Birmingham, UK. Mr. Kant has wide and varied experience in the manufacturing and marketing field, particularly in the automobile industry. Prior to joining the Company, he was with Philips India Limited as director of Consumers Electronics business and prior to which with LML Limited as senior executive director (marketing) and Titan Watches Limited as vice president (sales & marketing). Mr. Kant was also employed with Kinetic Engineering Limited and Hawkins Cookers Limited. Mr. Kant has been with the Company since July 2000 as the executive director (commercial vehicle business unit) responsible for manufacturing & marketing of the Commercial Vehicle Business Unit and was appointed as the Managing Director on July 29, 2005. Mr Kant superannuated on June 1, 2009 as per the Company's Retirement Policy and the terms of his appointment. Taking into consideration, the contribution made by Mr Kant during his tenure and the critical phase through which the Company was passing, the Board decided to continue availing the benefit of Mr Kant's counsel and have appointed him as the Non-Executive Vice-Chairman on the Board of Directors of the Company with effect from June 2, 2009.

Mr. N A Soonawala: Mr. N A Soonawala is a commerce graduate from the University of Bombay and a Chartered Accountant from the Institute of Chartered Accountants of India. He has wide exposure in the field of Finance, having worked with ICICI, the World Bank and the International Finance Corporation, Washington. He joined Tata Sons Limited in 1968 and is a director of various Tata Companies and committees. Mr. Soonawala has been on the Board of the Company since May 1989.

Dr. J J Irani: Dr. Jamshed Irani obtained a B.Sc. degree from Science College, Nagpur in 1956 with a Gold Medal in Geology and a M.Sc. (Geology) degree from the Nagpur University in 1958, both with first class. He also obtained M.Met. and Ph.D. degrees from the University of Sheffield, UK, in 1960 and 1963 respectively, with a Gold Medal for the Ph.D. Thesis. In 1993, the University of Sheffield conferred upon him the honorary degree of Doctor of Metallurgy. In 1996, the Royal Academy of Engineering, London elected him as a foreign member and he is amongst the five Indians who have been bestowed with this honour. Dr. Irani was conferred honorary knighthood in 1997 by the Queen of England for his contribution towards strengthening the Indo-British Partnership. He is also on the boards of various Tata Companies and has been on the Company's Board as a Tata Steel Nominee since June 1993.

Mr. R Gopalakrishnan: Mr. Gopalakrishnan holds a Bachelor's degree in Science and a B.Tech (Electronics) degree from the IIT, Kharagpur. He is also an executive director of Tata Sons Limited and a member of the group executive office of Tata Sons Limited, besides being on the Boards of various Tata Companies. Prior to joining the Tata Group in August 1998, Mr. Gopalakrishnan was the vice chairman of Hindustan Lever Limited. Mr. Gopalakrishnan has been a non-executive Director on the Board of the Company since December 22, 1998.

Table of Contents

Mr. Nusli N Wadia: Educated in the UK, Mr. Wadia is the chairman of Bombay Dyeing & Manufacturing Company Limited and heads the Wadia Group. He is also the chairman/trustee of various charitable institutions and non-profit organizations. Mr. Wadia has been on the Company's Board since December 22, 1998.

Mr. S M Palia: Mr S M Palia, a B.Com., LLB., CAIIB and AIB (London) is a Development Banker by profession. He was with IDBI from 1964-1989 during which period he held various responsible positions including that of an executive director. He has also acted as an advisor to Industrial Bank of Yeman, Saana (North Yeman) and Industrial Bank of Sudan, Khartoum (Sudan) under World Bank Assistance programmes. He was also the managing director of Kerala Industrial and Technical Consultancy Organisation Limited, set up to provide consultancy services to micro enterprises and small and medium enterprises. Mr. P M Telang: Mr. Prakash Telang holds a Bachelor's Degree in Mechanical Engineering and a MBA from IIM, Ahmedabad. Mr. Telang has over three decades of functional expertise in the automotive industry and machinery manufacturing. After spending the first three years of his career with M/s Larsen & Toubro, he joined the Tata Group through the Tata administrative service cadre. He is responsible for product development, manufacturing, sales and marketing functions of the strategic business unit of light & small commercial vehicles. Mr. Telang had been appointed as Executive Director (Commercial Vehicles) of the Company on May 18, 2007 and now has been appointed as the Managing Director - India Operations with effect from June 2, 2009.

Mr. C. Ramakrishnan (Chief Financial Officer). Mr. C. Ramakrishnan, aged 52 years, joined Tata Motors Limited in 1980. He handled corporate treasury and accounting functions as well as management accounting. After a two-year company-wide IT project responsibility covering R&D, manufacturing, sourcing and sales & service, he had worked in the Chairman's Office. Mr. Ramakrishnan holds a B.Com. degree and is a qualified Chartered Accountant and Cost Accountant. Mr. Ramakrishnan was appointed as the Chief Financial Officer of Tata Motors

with effect from September 18, 2007.

Table of Contents

There is no family relationship between any of our Directors, Executive officers or Chief Financial Officer.

Table of Contents**B. Compensation.**

Mr. Ravi Kant our non-executive Vice Chairman retired as Managing Director w.e.f June 1, 2009 and is paid retiring benefits as per the Company's policy.

Our Managing Director is entitled to six months' salary as severance fees upon termination of their contracts by us.

C. Board Practices.

The Board size of twelve directors is commensurate with our size and in line with the industry. The Board consists of executive, non-executive and independent directors. Appointments of new directors are considered by the full Board and our shareholders at each year's Annual General Meeting.

The roles of the Chairman and the Chief Executive Officer are distinct and separate with appropriate powers being delegated to the Managing Director to perform the day to day activities of the Company.

The Board, along with its Committees, provides leadership and guidance to our management, in particular with respect to corporate governance, business strategies and growth plans, the identification of risks and their mitigation strategies, entry into new businesses, product launches, demand fulfillment and capital expenditure requirements, and the review of our plans and targets.

The Board has delegated powers to the Committees of the Board through written/stated terms of reference and oversees the functioning operations of the Committees through various circulars/minutes circulated to it. The Board also undertakes our subsidiaries' oversight functions through review of their performance against their set targets, advises them on growth plans and, where necessary, gives strategic guidelines.

Committees.

The Audit Committee comprises the following three independent directors: Mr. V. R. Mehta, Chairman (up to January 2009), Mr. S. M. Palia, Dr. R. A. Mashelkar and Mr. N Munjee, Chairman (with effect from March 26, 2009). The scope of the Audit Committee includes:

Reviewing the quarterly financial statements before submission to the Board, focusing primarily on:

any changes in accounting policies and practices and reasons for any such change;

Table of Contents

major accounting entries involving estimates based on an exercise of judgment by Management;

qualifications in draft audit reports;

significant adjustments arising out of audits;

compliance with accounting standards;

analysis of the effects of alternative GAAP requirements on the financial statements;

compliance with listing and other legal requirements concerning financial statements;

disclosure of related party transactions;

review Reports on the Management Discussion and Analysis of financial condition Report, Results of Operations and the Directors Responsibility Statement;

overseeing our financial reporting process and the disclosure of its financial information, including any earnings press release, to ensure that the financial statements are correct, sufficient and credible; and

disclosures made under the CEO and CFO certification to the Board and investors.

Reviewing with the management, external auditor and internal auditor the adequacy of our internal control systems and recommending improvements to the management.

Reviewing, with the management, the statement of uses / application of funds raised through an issue (public issue, rights issue, preferential issue, etc.) , the statement of funds utilized for purposes other than those stated in the offer document/ prospectus/ notice and the report submitted by the monitoring agency monitoring the utilization of proceeds of a public or rights issue, and making appropriate recommendations to the Board to take up steps in this matter.

Recommending the appointment / removal of the statutory auditor, fixing audit fees and approving non-audit, consulting services provided by the firms of statutory auditors to us and our subsidiaries; evaluating auditors performance, qualifications and independence.

Reviewing the adequacy of the internal audit function, including the structure of the internal audit department, coverage and frequency of internal audits, appointment, removal, performance and terms of remuneration of the chief internal auditor.

Oversight of the companies external financial reporting and monitoring components of internal control over financial reporting.

Discussing with the internal auditor and senior management, significant internal audit findings and follow-up thereon.

Reviewing the findings of any internal investigation by the internal auditor into matters involving suspected fraud or irregularity or a failure of internal control systems of a material nature and reporting any such matters to the Board.

Discussing with the external auditor before the audit commences the nature and scope of such audit, as well as conducting post-audit discussions to ascertain any area of concern.

Reviewing our financial and risk management policies.

Reviewing the effectiveness of the system for monitoring compliance with laws and regulations.

Initiating investigations into the reasons for substantial defaults in payments to the depositors, debenture holders, shareholders (in case of non-payment of declared dividends) and creditors.

Reviewing the functioning of the Whistle-Blower mechanism (which is an extension of the Tata Code of Conduct).

Reviewing the financial statements and investments made by our subsidiary companies.

Look into the reasons for any substantial defaults in payment to the depositors, debenture-holders, shareholders (in case of non-payment of declared dividend) and creditors, if any;

The Committee has also adopted policies for the approval of services to be rendered by our independent statutory auditor, based on a procedure for ensuring such auditor's independence and objectivity, as well as for the oversight of audit work for streamlining the audit process across our subsidiaries.

The Remuneration Committee is empowered to review the remuneration of whole-time directors, retirement benefits to be paid to them and dealing with matters pertaining to Employees' Stock Option Scheme.

We have not issued any stock options to our directors/employees. The Remuneration Committee comprises two independent and two non-executive directors, namely N.N. Wadia, Chairman, V.R. Mehta (part of the year), Ratan N. Tata, N.A. Soonawala and S.Bhargava (part of the year).

Table of Contents

The Investor Grievance Committee oversees the redressing of investors' complaints pertaining to securities transfers, interest/dividend payments, non-receipt of annual reports, issue of duplicate certificates and other miscellaneous complaints. Its scope also includes delegation of powers to the executives of the Company or the share transfer agents to process share transfers and other investor-related matters. The Investor Grievance Committee comprises R. Gopalakrishnan, S. M. Palia and Ravi Kant.

The Executive Committee of the Board is comprised of Ratan N. Tata, Chairman, Ravi Kant, Vice Chairman Non Executive Director, N. A. Soonawala, J. J. Irani, R. Gopalakrishnan, N. N. Wadia, Directors, PM Telang Managing Director-India Operations. This Committee came into effect from July 25, 2006, upon the dissolution of the Finance Committee and the Committee of the Board. The Committee reviews revenue and capital expenditure budgets, long-term business strategy, the organizational structure, raising of finance, property related issues, review and sale of investments and the allotment of securities within established limits.

The Ethics and Compliance Committee sets forth policies relating to the implementation of the Tata Code of Conduct for Prevention of Insider Trading, and takes on record the monthly reports and dealings in securities by the Specified Persons. It also implements appropriate actions in respect of violations of the Tata Code of Conduct. The Ethics and Compliance Committee comprises S.M. Palia, Chairman and R. Gopalakrishnan. Mr. C. Ramakrishnan, our Chief Financial Officer, is the Compliance Officer under the said Code.

The Nominations Committee was constituted with the objective of identifying independent directors to be inducted on the Board from time to time to refresh its constitution. The Nominations Committee comprised N. N. Wadia, Chairman, Ratan N. Tata, N. A. Soonawala and S. M. Palia.

Apart from the Committees described above, the Board of Directors also constitutes committee(s) of directors with specific terms of reference as it may deem fit.

D. Employees.

We consider our human capital as a critical factor to our success. Under the aegis of Tata Sons and the Tata Sons promoted entities, we have drawn up a comprehensive human resource strategy that addresses key aspects of human resource development such as:

Code of conduct and fair business practices.

A fair and objective performance management system linked to the performance of the businesses which identifies and differentiates high performers while offering separation avenues for non-performers.

Creation of a common pool of talented managers across Tata Sons and the Tata Sons promoted entities with a view to increasing their mobility through inter-company job rotation.

Evolution of performance based compensation packages to attract and retain talent within Tata Sons and the Tata Sons promoted entities.

Development of comprehensive training programs to impart and continuously upgrade the industry/function specific skills. In line with the Human Resource strategy, we, in turn, have recently implemented various initiatives in order to build better organizational capability that we believe will enable us to sustain competitiveness in the global market place. Our human resources focus is to attract talent, retain the better and advance the best.

Some of the initiatives to meet this objective include:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Recruitment across the country to meet the requirements of the expansion plans.

Extensive process mapping exercise to benchmark and align the human resource processes with global best practices.

Introduction of a globally benchmarked employee engagement survey.

Succession planning through identification of second level of managers for all units, locations, functions.

Implementation of a Fast Track Selection Scheme , which is a system for identifying potential talent in the areas of general, commercial and operations management and offering them opportunities for growth within the organization. Our human resources team has been invited to replicate this system in other Tata Companies.

Our Talent Management Scheme which includes the identification of high performers and high potentials through various routes such as our Performance Management System and Development Centers. Subsequent to the identification process, we provide them with challenging assignments for faster development.

Introduction of performance rating based salary review and quality linked variable payment for supervisory category of employees. Other initiatives include:

Extensive brand building initiatives at university campuses to increase recruiting from premium universities

Introduction of an employee self service portal and employee help desk for the benefit of employees.

Table of Contents

We employed approximately 36,364 and 49,473 (includes Jaguar Land Rover) permanent employees as of March 31, 2008 and 2009 respectively. The average number of temporary employees for the fiscal year ended March 31, 2009, was approximately 16,693.

The following table set forth a breakdown of persons employed by our business segments and by geographic location as of March 31, 2009.

Segment	No. of Employees	Location	No. of Employees
Automotive	43,875	India	31,475
Other	5,598	Abroad	17,998
Total	49,473	Total	49,473

Training and Development

We are committed to building the competences of our employees and improving their performance through training and development. Our focus is on identifying gaps in our employees' competencies and preparing employees for changes in competitive environments, as well as to meet organizational challenges.

Some of the focus areas in training in the last year centered on leadership, innovation management and internationalization besides other training programmes to drive a change in our employees' outlook as we continue to develop as a global competitor. Developmental initiatives for our senior leadership were undertaken through international programs at various premier institutions around the world. The entire senior leadership was also taken through cultural sensitivity programme conducted by world renowned faculty. Certain employees have also been selected for the Fulbright fellowships for leadership in management. In addition, in order to emphasize the sharing of skills across our locations and functions extensive technical training programs were organized in Pune, Jamshedpur and Lucknow. The technical exposure was enhanced further through international training and participation at international seminars.

At Jamshedpur, Pune and Lucknow in India, we have also established training divisions that impart basic skills in various trades like milling, grinding and welding to our young apprentices. We received the National Best Training Establishment award from the Government of India for the eighth time.

Union Wage Settlements

All our regular employees in India, other than management, are members of labor unions. We have generally enjoyed cordial relations with our employees at our factories and offices.

Employee wages are paid in accordance with wage agreements that have varying terms (typically three years) at different locations. The expiration dates of the wage agreements with respect to various locations are as follows:

Location	Wage Agreement valid until
Pune CVBU	August 31, 2009*
Pune PCBU	March 31, 2010
Jamshedpur	March 31, 2010
Mumbai	December 31, 2009
Lucknow	March 31, 2011
Jaguar Land Rover	October 31, 2010

* Negotiations are in process.

A cordial industrial relations environment prevailed in all our manufacturing units.

The performance rating system, introduced for the first time, for the bargainable category in Mumbai and PCBU, has completed two full cycles and the feedback of the process received from all the quarters has been encouraging. Return-ability in wage settlements was built in by introducing quality linked payments based on a quality index as perceived by the customer.

Table of Contents

Operatives support in the outsourcing low value added activities and in the implementation of other reforms that impact quality, cost cutting and productivity improvements across all locations.

E. Share Ownership.

The information required by this item is set forth in Item 6.A of this annual report.

Item 7. Major Shareholders and Related Party Transactions.**A. Major Shareholders**

We are a widely held, listed company with approximately 389,541 shareholders for Ordinary Shares and 7673 shareholders for A Ordinary Shares of record. To our knowledge, as of June 30, 2009, the following persons beneficially owned 1% or more of 449,832,659 Ordinary Shares and 64,175,655 outstanding at that time:

Ordinary Shares		
Name of Shareholder	Holding	Percentage
Tata Sons and subsidiaries	136,872,752	30.43
Citibank N.A., as Depositary(1)	58,924,712	13.10
Life Insurance Corporation of India Ltd.	49802224	11.07
Tata Steel and subsidiaries	38,764,112	8.62
DaimlerChrysler AG	25,596,476	5.69

A Ordinary Shares		
Name of Shareholder	Holding	Percentage
Tata Sons and subsidiaries	47,094,639	73.38
IFCI Ltd	8,196,720	12.77
Tata Steel and subsidiaries	5,537,729	8.63
JM Financial Consultants Pvt. Ltd.	1406255	2.19
Tata Industries Ltd	1289042	2.01

- (1) Citibank, N.A. as depositary for our ADRs, was the holder on record on June 30, 2009 of 58,924,712 shares on behalf of the beneficial owners of deposited shares.

From March 31, 2006 to March 31, 2009, the holdings of our largest shareholder, Tata Sons Limited (together with its subsidiaries), have increased from 22.11% to 36.10%, in view of them subscribing to the Rights Issue 2008 including any subscribed portion thereto. Tata Steel Ltd. (together with its subsidiaries) has substantially increased its shareholdings by subscribing to its rights entitlement in the Rights Issue 2008, but its percentage shareholding has decreased marginally from 8.68% as of March 31, 2006 to 8.62% as of March 31, 2009. Daimler Chrysler AG has kept its shareholdings steady, but its percentage shareholding has declined from 6.69% to 4.98%. Citibank N.A. as depositary for our ADRs, has increased its shareholding from 8.02% to 11.46% because of the ADR holders utilizing the headroom available under the two-way fungibility of Depositary Receipts and Ordinary Shares. Life Insurance Corporation of India Ltd. has increased its shareholding and has seen its shareholding percentage increase from 5.30% to 8.98%.

According to our register of shareholders and register of beneficial shareholders, as of July 24, 2009, there were 78 record holders of our shares with addresses in the United States, whose shareholdings represented approximately 0.03% of our outstanding Ordinary Shares on that date, excluding any of our shares held by United States residents in the form of depositary shares. Because some of these shares were held by brokers or other nominees, the number of record holders with addresses in the United States may be fewer than the number of beneficial owners in the United States.

The total permitted holding of Foreign Institutional Investors, or FIIs, in our paid up share capital has been increased to 35% by a resolution passed by our shareholders on January 22, 2004. The holding of FIIs in us as of June 30, 2009, was approximately 7.62%. See Item 10.D Exchange Controls for further details.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

None of our shares of common stock entitles the holder to any preferential voting rights.

Under the Takeover Regulations of India, any person who acquires more than 5%, 10% , 14%, 54% or 74% of our shares or who is entitled to exercise voting rights with respect to more than 5%, 10%, 14%, 54% or 74% of our shares must file a report concerning the shareholding or the voting rights with us and the stock exchanges on which our ordinary shares are traded. Please see Item 9.A The Offer and Listing Markets for information with respect to these stock exchanges. Similar disclosures would be applicable under the Insider Trading Regulations of India with respect to any person who acquires more than 5% of our shares or voting rights with respect to the shares. Any increases or decreases by 2% or more in the shareholding by such persons must also be disclosed. Furthermore, under our listing agreement with the stock exchanges where our shares are listed, we are required to periodically

Table of Contents

disclose to such stock exchanges the name and percentage of shares held by persons or entities that hold more than 1% of our Ordinary Shares. For the purposes of the above, reporting and takeover requirements under our listing agreements, shares withdrawn from our ADS facility will be included as part of a person's shareholding in us.

To our knowledge, we are not, directly or indirectly, owned or controlled by any other corporation or by any government or by any other natural or legal persons severally or jointly. We are not aware of any arrangements the operation of which may at a later time result in our change of control.

For details regarding voting rights, please refer to Item 10.B Memorandum and Articles of Association Voting Rights .

B. Related Party Transactions.

Business Relationships

We purchase materials, supplies, assets and services from numerous suppliers throughout the world in the ordinary course of business, including from our affiliates and firms with which certain members of our board of directors are interested. We purchased materials, supplies, fixed assets and services from these entities in the amount of Rs.30,703 million and Rs.29,500 million in fiscals 2009 and 2008, respectively. We also sell our products, assets and services to our affiliates and firms with which certain members of our board of directors are interested. We sold products, assets and services to these entities in the amount of Rs.3,290 million and Rs.2,320 million in fiscals 2009 and 2008, respectively. In fiscal 2008, we sold equity interest in subsidiaries (15% holding in both HVAL and HVTL) for a consideration of Rs 1,643 million and recorded a gain of Rs.1,100 million. In fiscal 2008 we sold certain finance receivables for a consideration of Rs 10,226 million and recorded a gain of Rs.924 million.

See note 42 of our audited consolidated financial statements for additional information regarding our related party transactions with our affiliates and other related parties. The foregoing do not include transactions with and among our consolidated subsidiaries, the amounts of which are eliminated upon consolidation when preparing our financial statements.

Loans

We regularly have trade accounts and other receivables payable by, and accounts payable to, our affiliates and firms with which certain members of our board of directors are interested. We had outstanding trade accounts and other receivables by these entities in the amount of Rs.1,437 million and Rs.629 million as of March 31, 2009 and 2008, respectively. We had accounts payable to these entities in the amount of Rs.3,148 million and Rs.2,134 million as of March 31, 2009 and 2008, respectively.

From time to time, we provide short to medium-term loans to our affiliates, as well as loans under a loan program established by us and our affiliates to assist executives and directors with the purchase of housing. We believe that each of these loans was entered into in the ordinary course of business. As of March 31, 2009, the total amount receivable by us in respect of outstanding related party loans was Rs. 2,937 million. We had amounts payable for medium term loans taken from our affiliates to the tune of Rs.2,850 million and Rs.Nil as at March 31, 2009 and 2008, respectively. The interest rates for these loans range from 11% to 19%.

From time to time, we also provide security deposits to the lessors of residential properties that we lease for our employees, including our Executive Directors. No extension of credit has been made, arranged or renewed by us, directly or indirectly, in the form of a personal loan to or for any of our directors or executive officers, nor has there been any material modification to any term of any such extension of credit or any renewal of any such extension of credit on or after July 30, 2002.

C. Interests of Experts and Counsel.

Not applicable.

Item 8. Financial Information.

A. Consolidated Statements and Other Financial Information. Financial Statements.

The information required by this item is set forth beginning on page F-1 of this annual report.

Legal or Arbitration Proceedings.

The information on legal or arbitration proceedings required by this item is set forth in Item 4.B of this annual report.

Dividend Policy.

Based on the net income available for appropriation, dividends are recommended by the Board of Directors for approval by the shareholders at our Annual General Meeting. Further, the Board of Directors may also pay an interim dividend at its discretion. Since fiscal year 1956, we have had an uninterrupted dividend distribution except for the fiscal years 2001 and 2002. We returned to dividend distribution in fiscal 2003. In view of our profitable performance, we declared dividends (excluding dividend tax) totaling Rs5,781 million and Rs.5,784 million for fiscal 2008 and 2009 to the shareholders.

Table of Contents

B. Significant Changes.

Other than as set forth in this annual report, no significant change has occurred with respect to us since the date of our audited consolidated IFRS financial statements included elsewhere in this annual report.

Item 9. The Offer and Listing

A. Offer and Listing Details.

There has been no SEC-registered offering of our shares in the United States.

The details on our share and ADS price history are included in Item 9.C Markets below.

B. Plan of Distribution.

Not applicable.

Table of Contents**C. Markets.**

Our ADSs have been listed on the New York Stock Exchange or NYSE, since September 27, 2004. Each ADS represents one ordinary share. Our shares are listed on The Bombay Stock Exchange Limited, which is also referred to as the Bombay Stock Exchange, Mumbai or the BSE, and the National Stock Exchange of India, or NSE. The following table shows closing price and trading volume data for our ordinary shares on the NSE and BSE and for our ADSs on the NYSE:

Additional Information.

A. Share Capital

Our Authorized Share Capital is Rs.39,000,000,000 divided into 700,000,000 Ordinary Shares of Rs.10/- each, 200,000,000 A Ordinary Shares of Rs.10/- each (The Ordinary Shares and the A Ordinary Shares are hereinafter together referred to as Ordinary Shares or shares unless otherwise specifically mentioned to the contrary) and 300,000,000 Convertible Cumulative Preference Shares of Rs.100/- each.

Under the Companies Act, as well as our Articles of Association, if our share capital is divided into different classes of shares, all or any of the rights or privileges attached to each class of shares may be varied, modified or abrogated with the consent in writing of the holders of not less than three-fourths of the issued shares of that class, or with the sanction of a special resolution passed at a separate meeting of the holders of the issued shares of that class. Our Articles of Association further provide that the rights conferred upon the holders of the shares of any class issued with preferential or other rights shall not, unless otherwise expressly prohibited by the terms of the issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking *pari passu* thereto.

In accordance with the Articles and under the Companies Act, we may issue Ordinary Shares with differential rights as to voting and/or dividend (A Ordinary Shares) up to an amount not exceeding 25% of the total issued Ordinary Share Capital of the Company or such other limit as may be prescribed by applicable laws/regulations.

B. Memorandum and Articles of Association

Objects and Purposes

Our principal objects, as provided by Clause 3 of our Memorandum of Association, include:

manufacturing, marketing, import, export, hiring and letting on hire of commercial vehicles, automobile cars, two wheeler vehicles, heavy and construction equipment including components, accessories and spare parts in relation thereto;

to carry on the business as manufacturers and dealers of machinery articles and goods of all classes;

to carry on the business of manufacturing materials which may be usefully combined with our manufacturing and engineering business; and

to carry on the business of financing and re-financing of all types of vehicles, construction equipment, capital equipment and services by way of credit, hire purchases, leases and loans.

Directors

Under the Companies Act, as well as our Articles of Association, each of our Directors, who is in any way directly or indirectly concerned or interested in a contract or arrangement or proposed contract or arrangement entered into or to be entered into by or on our behalf is required to disclose the nature of his interest at a meeting of the first meeting of the Board held after the Director becomes concerned. Under the Companies Act, as well as the Articles of Association, an interested Director is not allowed to take part in the discussion of, or vote on, any contract, arrangement or proposal in which the Director is interested.

Under the Companies Act and our Articles of Association, we are restricted from making loans to Directors and the prior approval of the Central Government is required before we can make any loans, directly or indirectly, to any Director or provide, directly or indirectly, any guarantees or security in connection with any loan made by a third party to a Director.

Under our Articles of Association, a director is not required to hold any qualification shares. Our Articles of Association do not prescribe an age limit for the retirement of the Directors. As per the policy adopted by our Board, executive directors retire at the age of 65 and non-executive directors retire at the age of 75.

Under our Articles of Association, the number of our Directors cannot be less than three nor more than fifteen.

Table of Contents

Dividends

Under the Companies Act, unless the Board recommends the payment of a dividend, the shareholders at a general meeting have no power to declare any dividend. Subject to certain conditions laid down by Section 205 of the Companies Act, no dividend can be declared or paid by a company for any fiscal year except out of the profits of the company calculated in accordance with the provisions of the Companies Act or out of the profits of the company for any previous fiscal year(s) calculated pursuant to the provisions of the Companies Act.

Under our Articles of Association, the shareholders at a general meeting may declare a lower, but not higher, dividend than that recommended by the Board. Dividends are generally declared as a percentage of the par value. The dividend recommended by the Board and approved by the shareholders at a general meeting is distributed and paid to shareholders in proportion to the paid-up value of their shares as on the record date for which such dividend is payable. In addition, the Board may declare and pay interim dividends. The shares to be issued upon the conversion of the ADSs will be fully paid-up when delivered as provided herein. Under the Companies Act, dividends can only be paid in cash to shareholders listed on the register of shareholders on the date which is specified as the record date or book closure date. No shareholder is entitled to a dividend while any lien in respect of unpaid calls on any of their shares is outstanding.

Shares issued upon conversion of ADSs will rank *pari passu* with our existing Ordinary Shares of Rs. 10/- each in all respects including entitlement of the dividend declared.

Dividends must be paid within 30 days from the date of the declaration and any dividend which remains unpaid or unclaimed after that period must be transferred within seven days to a special unpaid dividend account held at a scheduled bank. Any money which remains unpaid or unclaimed for seven years from the date of such transfer must be transferred by us to the Investor Education and Protection Fund established by the Government pursuant to which no claim shall lie against us or the said Fund.

Under the Companies Act, we may only pay a dividend in excess of 10% of paid-up capital in respect of any year out of the profits of that year after we have transferred to our reserves a percentage of our non consolidated Indian GAAP profits for that year ranging between 2.5% to 10% depending on the rate of dividend proposed to be declared in that year. The Companies Act further provides that if the profit for a year is insufficient, the dividend for that year may be declared out of the non consolidated Indian GAAP accumulated profits earned in previous years and transferred to reserves, subject to the following conditions: (i) the rate of dividend to be declared may not exceed the lesser of the average of the rates at which dividends were declared in the five years immediately preceding the year, or 10% of paid-up capital; (ii) the total amount to be drawn from the accumulated profits from previous years may not exceed an amount equivalent to 10% of paid-up capital and free reserves and the amount so drawn is first to be used to set off the losses incurred in the financial year before any dividends in respect of preference or equity shares; and (iii) the balance of reserves after withdrawals must not be below 15% of paid-up capital.

A Ordinary shareholders will receive dividend for any financial year at five percentage points more than the aggregate rate of dividend declared on Ordinary Shares for that financial year.

Capitalization of Reserves and Issue of Bonus Shares

Our Articles of Association permit us by a resolution of our shareholders in a general meeting to resolve that amounts standing to the credit of reserves or securities premium can be capitalized by the issue of fully paid bonus shares (also referred to as a stock dividend) or by crediting shares not fully paid-up with the whole or part of any sum outstanding. Bonus shares must be issued pro rata to the amount of capital paid-up on existing shareholdings. Any issue of bonus shares would be subject to the guidelines issued by SEBI in this regard.

Calls on Shares, Pre-Emptive Rights and Alteration of Share Capital

Under the Companies Act, as well as our Articles of Association, the Board of Directors may from time to time make such calls as they think fit upon the members of the Company in respect of all moneys unpaid on the shares held by them respectively and each member is required to pay the amount of every call so made on him to the Company.

Subject to the provisions of the Companies Act, we may increase our share capital by issuing new shares on such terms and with such rights as we, by action of shareholders in a general meeting, determine. These new shares will be offered to existing shareholders listed on the members register on the record date in proportion to the amount paid-up on these shares at that date. The offer will be made by notice specifying the number of shares offered and the date (being not less than 15 days from the date of the offer) after which the offer, if not accepted, will be deemed to have been declined. After this date, the Board may dispose of the shares offered in respect of which no acceptance has been received, in such manner as the Board thinks most beneficial to us. The offer is deemed to include a right exercisable by the person concerned to renounce the shares offered to such person in favor of any other person provided that the person in whose favor these shares have been renounced is

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

approved by the Board in their absolute discretion.

Under the Companies Act, new shares may be offered to any persons whether or not those persons include existing shareholders, if a special resolution to that effect is passed by the shareholders of the company in a general meeting. The issuance of shares upon

conversion of our outstanding Convertible Notes has been duly approved by a special resolution of our shareholders and our shareholders have waived their pre-emptive rights with respect to these shares.

Table of Contents

The Company can also alter its share capital by way of a reduction of capital or by undertaking a buy-back of shares under the prescribed SEBI guidelines.

Our Articles of Association provide that, by a special resolution passed at the general meeting, we may consolidate or sub-divide our share capital, convert all or any of our fully paid-up shares into stock and re-convert that stock into fully paid-up shares or cancel shares which have not been taken up by any person. The Company may also from time to time by special resolution reduce its capital.

General Meetings of Shareholders

We must hold our Annual General Meeting each year within 15 months of the previous Annual General Meeting and in any event not later than six months after the end of each accounting year, unless extended by the Registrar of Companies at our request for any special reason. Our Board of Directors may convene an Extraordinary General Meeting of shareholders when necessary or at the request of a shareholder or shareholders holding in the aggregate not less than 10% of our capital. Written notices convening a meeting setting out the date, place and agenda of the meeting must be given to members at least 21 days prior to the date of the proposed meeting. A general meeting may be called after giving shorter notice if consent is received from all shareholders in the case of an Annual General Meeting, and from shareholders holding not less than 95% of our paid-up capital in the case of any other general meeting. Currently, we give written notices to all members and, in addition, give public notice of general meetings of shareholders in a daily newspaper of general circulation in Mumbai. General meetings are generally held at some place in Mumbai. The quorum for a general meeting of the company is five shareholders personally present.

A company intending to pass a resolution relating to matters such as, but not limited to, amendment in the objects clause of the memorandum, buy back of shares under the Companies Act, giving loans or extending guarantee in excess of limits prescribed under the Companies Act, and guidelines issued thereunder, is required to obtain the resolution passed by means of a postal ballot instead of transacting the business in the general meeting of the company. A notice to all the shareholders shall be sent along with a draft resolution explaining the reasons therefore and requesting them to send their assent or dissent in writing on a postal ballot within a period of 30 days from the date of posting the letter. Postal ballot voting also allows shareholders to cast their votes by electronic means.

Voting Rights

At a general meeting upon a show of hands, every member holding shares and entitled to vote and present in person has one vote. Upon a poll, the voting rights of each shareholder entitled to vote and present in person or by proxy is in the same proportion as the capital paid-up on each share held by such holder bears to the total paid-up capital. Voting is by show of hands, unless a poll is ordered by the Chairman of the meeting or demanded by shareholder or shareholders holding at least 10% of the voting rights in respect of the resolution or by those holding paid-up capital of at least Rs.50,000. The Chairman of the meeting has a casting vote.

Holders of ADSs may exercise voting rights with respect to the Ordinary Shares represented by ADSs only in accordance with the provisions of our ADS deposit agreement and Indian law. Holders of ADSs are not entitled to attend or vote at shareholders meetings. A holder of ADSs may withdraw from the ADS facility the related underlying shares and vote as a direct shareholder, but there may not be sufficient time to do so after the announcement of an upcoming vote. If requested by us, the depository will notify holders of ADSs of upcoming votes and arrange to deliver our voting materials to holders of ADSs. The materials will describe the matters to be voted on and explain how holders of ADSs on a record date specified by the depository may instruct the depository to vote on the deposited securities underlying the ADSs as directed by the holders of ADSs. For the instructions to be valid, the depository must receive them in writing on or before a date specified by the depository. The depository will try, insofar as practicable, subject to Indian laws and the provisions of our Articles of Association, to vote or have its agents vote the deposited securities as instructed. The depository will only vote as instructed and is not entitled to exercise any voting discretion. If the depository timely receives voting instructions from a holder of ADSs and which fails to specify the manner in which the depository is to vote the shares underlying such holder's ADSs, such holder will be deemed to have instructed the depository to vote in favor of the items set forth in such voting instructions. If the depository does not receive timely instructions from a holder of ADSs, the holder shall be deemed to have instructed the depository to give a discretionary proxy to a person designated by us, subject to the conditions set forth in the deposit agreement. If requested by us, the depository is required to represent all shares underlying the outstanding ADSs, regardless whether timely instructions have been received from the holders of such ADSs, for the sole purpose of establishing a quorum at a meeting of shareholders.

Ordinary resolutions may be passed by simple majority of those shareholders present and voting at the meeting. Special resolutions require that the votes cast in favor of the resolution must be at least three times the votes cast against the resolution. The Companies Act provides that in order to amend the Articles of Association, a special resolution is required to be passed in a general meeting. Dissolutions, mergers or consolidations, transfers of the whole or a significant part of our business to another company or taking over the whole of the business of any other company and, in any case where shareholding of public financial institutions and banks exceeds 25%, appointment of statutory auditors, each require a special resolution. Our Articles of Association do not permit cumulative voting for the election of our directors.

Table of Contents

A shareholder may exercise his voting rights by proxy to be given in the form required by our Articles of Association. The instrument appointing a proxy is required to be lodged with the company at least 48 hours before the time of the meeting. A shareholder may, by a single power of attorney, grant a general power of representation regarding several general meetings of shareholders. Any of our shareholders may appoint a proxy. A corporate shareholder is also entitled to nominate a representative to attend and vote on its behalf at general meetings. A proxy may not vote except on a poll and does not have a right to speak at meetings. A shareholder which is a legal entity may appoint an authorized representative who can vote in all respects as if a shareholder both on a show of hands and a poll.

The Companies Act allows for a company to issue shares with differential rights as to dividend, voting or otherwise subject to other conditions prescribed under applicable law. In this regard, the laws require that for a company to issue shares with differential voting rights the company must have had distributable profits in terms of the Companies Act for a period of three financial years, the company has not defaulted in filing annual accounts and annual returns for the immediately preceding three years, the articles of association of such company must allow for the issuance of such shares with differential voting rights and such other conditions set forth in the Companies (Issue of Share Capital with Differential Voting Rights) Rules, 2001 must be fulfilled.

In the case where a resolution is put to vote on a poll, such voting entitlement (excluding fractions, if any), will be applicable to holders of A Ordinary Shares. As per the terms of issue, the outstanding A Ordinary Shares shall be entitled to one vote for every ten A Ordinary Shares held.

In the case where a resolution is put to vote in the meeting and is to be decided on a show of hands, the holders of A Ordinary Shares shall be entitled to the same number of votes as available to holders of Ordinary Shares.

Convertible Securities/Warrants

We may issue from time to time debt instruments that are partly and fully convertible into shares and/or warrants to purchase shares.

Register of Shareholders and Record Dates

We are obliged to maintain a register of shareholders at our registered office in Mumbai or at some other place in the same city. The register and index of our beneficial owners maintained by a depository under the Depositories Act, 1996 is deemed to be a part of the index of members and register of shareholders. We recognize as shareholders only those persons who appear on our register of shareholders and we cannot recognize any person holding any Share or part of it upon any trust, express, implied or constructive, except as permitted by law. In the case of shares held in physical form, we register transfers of shares on the register of shareholders upon lodgment of the share transfer form duly complete in all respects accompanied by a share certificate or if there is no certificate, the letter of allotment in respect of shares transferred together with duly stamped transfer forms. In respect of electronic transfers, the depository transfers shares by entering the name of the purchaser in its books as the beneficial owner of the shares. In turn, we enter the name of the depository in our records as the registered owner of the shares. The beneficial owner is entitled to all the rights and benefits as well as the liabilities with respect to the shares that are held by the depository.

For the purpose of determining the shareholders, the register may be closed for periods not exceeding 45 days in any one year or 30 days at any one time. In order to determine the shareholders entitled to dividends, we keep the register of shareholders closed for approximately 21 days, generally in June or July of each year. Under the listing regulations of the stock exchanges on which our outstanding shares are listed, we may, upon at least 15 days advance notice to these stock exchanges, set a record date and/or close the register of shareholders in order to ascertain the identity of shareholders entitled to the dividend. The trading of shares and the delivery of certificates in respect thereof may continue while the register of shareholders is closed.

Table of Contents

Annual Report and Financial Results

Our Indian GAAP audited financial statements for the relevant fiscal year, the directors' report and the auditors' report, (collectively the Annual Report), must be laid before the Annual General Meeting. These also include other financial information, a corporate governance section and management's discussion and analysis report and general shareholders' information and are also made available for inspection at our registered office during normal working hours for 21 days prior to our annual general meeting.

Under the Companies Act, we must file the Annual Report with the Registrar of Companies within seven months from the close of the accounting year or within 30 days from the date of the annual general meeting, whichever is earlier. As required under listing agreements with the applicable stock exchanges, copies are required to be simultaneously sent to all the stock exchanges on which our shares are listed. We must also publish our financial results in at least one English language daily newspaper circulating in the whole or substantially the whole of India and also in a newspaper published in the language of the region where our registered office is situated.

We submit information, including our Annual Report, half yearly financial statements, report on corporate governance and the shareholding pattern statement, in accordance with the requirements of the listing agreement with the Singapore Stock Exchange.

Transfer of Shares

Shares held through depositories are transferred in book-entry form or in electronic form in accordance with the regulations laid down by the SEBI. These regulations provide the regime for the functioning of the depositories and the participants and set out the manner in which the records are to be kept and maintained and the safeguards to be followed in this system. Transfers of beneficial ownership of shares held through a depository are exempt from stamp duty. We have entered into an agreement for these depository services with National Securities Depository Limited and the Central Depository Services (India) Limited.

The SEBI requires that all investors hold our shares in book-entry form for trading and settlement purposes, except for transactions that are not made on a stock exchange and transactions that are not required to be reported to the stock exchange.

The requirement to hold shares in book-entry form will apply to ADS holders when the shares are withdrawn from the depository facility upon surrender of the ADSs. In order to trade in our shares in the Indian market, the withdrawing ADS holder will be required to comply with the procedures above.

Our ordinary shares are freely transferable, subject only to the provisions of the Companies Act under which, if a transfer of shares contravenes the SEBI provisions or the regulations issued under it or any other law for the time being in force or the Sick Industrial Companies (Special Provisions) Act, 1985, or SICA, or any other similar law, the Indian Company Law Board may, on an application made by the company, a depository incorporated in India, an investor, the SEBI or other parties, direct a rectification of the register of records. If a company without sufficient cause refuses to register a transfer of shares within two months from the date on which the instrument of transfer is delivered to the company, the transferee may appeal to the Indian Company Law Board seeking to register the transfer of equity shares. The Indian Company Law Board may in its discretion, issue an interim order suspending the voting rights attached to the relevant equity shares before completing its investigation of the alleged contravention. Under the Companies (Second Amendment) Act, 2002, the operative provisions of which are yet to come into force, the Indian Company Law Board is proposed to be replaced with the National Company Law Tribunal. Further, under the Sick Industrial Companies (Special Provisions) Repeal Act, 2003, the SICA is sought to be repealed and the Board of Industrial and Financial Reconstruction, as constituted under the SICA, is to be replaced with the National Company Law Tribunal.

Pursuant to the Listing Agreement, in the event we have not effected the transfer of shares within one month or where the Issuer has failed to communicate to the transferee any valid objection to the transfer within the stipulated time period of one month, the Issuer is required to compensate the aggrieved party for the opportunity loss caused during the period of the delay.

The Companies Act provides that the shares or debentures of the public listed company (like the Issuer) shall be freely transferable. Our Articles of Association provide for restrictions on the transfer of shares, including granting power to the board of directors in certain circumstances to refuse to register or acknowledge transfer of shares or other securities issued by us. However, under the Companies Act the enforceability of these transfer restrictions is unclear.

Table of Contents

Acquisition of Our Own Shares

The Company is prohibited from acquiring its own shares unless the consequent reduction of capital is effected by an approval of at least 75% of its shareholders voting on the matter in accordance with the Companies Act, 1956 and is also sanctioned by a High Court of competent jurisdiction. Moreover, subject to certain conditions, a company is prohibited from giving, whether directly or indirectly and whether by means of a loan, guarantee, the provision of security or otherwise, any financial assistance for the purpose of or in connection with a purchase or subscription made or to be made by any person of or for any shares in the company or its holding company. However, pursuant to amendments to the Companies Act, a company has been empowered to purchase its own shares or other specified securities out of its free reserves, or the securities premium account or the proceeds of any shares or other specified securities (other than the kind of shares or other specified securities proposed to be bought back) subject to the following conditions:

- (i) the buy back should be authorized by the Articles of Association;
- (ii) a special resolution has been passed at our general meeting authorizing the buy back;
- (iii) the buy back is limited to 25% of the total paid up capital and free reserves;
- (iv) the debt owed by us (including all amounts of unsecured and secured debt) is not more than twice the capital and free reserves after the buy back; and
- (v) the buy-back is in accordance with the Securities and Exchange Board of India (Buy-Back of Securities) Regulations, 1998.

The condition mentioned above in (ii) would not be applicable if the buy-back is for less than 10% of the total paid-up equity capital and free reserves of the company and provided that this buy-back has been authorized by the board of directors of the company. A company buying back its securities is required to extinguish and physically destroy the securities so bought back within seven days of the last date of completion of the buy-back. Further, a company buying back its securities is not permitted to buy-back any securities for a period of one year from the buy-back and to issue securities for six months. The aforesaid restriction relating to the one year period does not apply to a buyback authorized by a special resolution of the shareholders in general meeting. Every buy-back has to be completed within a period of one year from the date of passing of the special resolution or resolution of the Board, as the case may be.

A company is also prohibited from purchasing its own shares or specified securities through any subsidiary company including its own subsidiary companies or through any investment company (other than a purchase of shares in accordance with a scheme for the purchase of shares by trustees of or for shares to be held by or for the benefit of employees of the company) or if the company is defaulting on the repayment of deposit or interest, redemption of debentures or preference shares or payment of dividend to a shareholder or repayment of any term loan or interest payable thereon to any financial institution or bank, or in the event of non-compliance with other provisions of the Companies Act.

Liquidation Rights

Subject to the rights of creditors, workmen and of the holders of any other shares entitled by their terms of issue to preferential repayment over the shares, in the event of our winding up, the holders of our shares are entitled to be repaid the amounts of capital paid-up or credited as paid-up on these shares, or in case of shortfall, proportionately. All surplus assets after payments due to workmen, the holders of any preference shares and other creditors belong to the holders of the equity shares in proportion to the amount paid up or credited as paid-up on these shares respectively at the commencement of the winding-up.

C. Material Contracts.

Except as given below, neither Tata Motors Limited nor any of its consolidated subsidiaries or associated companies is a party to any material contract other than contracts entered into in the ordinary course of business:

the Tata Brand Equity and Business Promotion Agreement incorporated by reference into this annual report as Exhibit 4.1, which is described in Item 4.C of this annual report;

the agreement entered into by us with Mr. P.M. Telang for his appointment as Managing Director, which is included as Exhibit 4.2 in this annual report; and

the agreement for the sale and purchase of Jaguar and Land Rover, which is incorporated by reference in this annual report as Exhibit 4.3.

Table of Contents

D. Exchange Controls.

General

Prior to June 1, 2000, foreign investment in Indian securities, including the acquisition, sale and transfer of securities of Indian companies, was regulated by the Foreign Exchange Regulation Act, 1973, or FERA, and the notifications issued by the Reserve Bank of India or RBI thereunder.

With effect from June 1, 2000, foreign investment in Indian securities is regulated by the Foreign Exchange Management Act 1999, or FEMA (as amended from time to time), and the rules, regulations and notifications made under FEMA. A person resident outside India can transfer any security of an Indian company or any other security to an Indian resident only under the terms and conditions specified in FEMA and the rules and regulations made thereunder or as permitted by the RBI.

The RBI issued the Foreign Exchange Management (Transfer or issue of Security by a Person Resident Outside India) Regulations 2000, or the Regulations, to regulate the issue of Indian securities including American depository receipts to persons resident outside India and the transfer of Indian securities by or to persons resident outside India.

The Regulations provide that an Indian entity may issue securities to a person resident outside India or record in its books any transfer of security from or to such person only in the manner set forth in FEMA and the rules and regulations made thereunder or as permitted by the RBI.

Foreign Direct Investment

The Government of India, pursuant to its liberalization policy, set up the Foreign Investment Promotion Board, or the FIPB, to regulate all foreign direct investment into India. Foreign Direct Investment, means investment by way of subscription and/or purchase of securities of an Indian company by a non resident investor. FIPB approval is required for investment in some sectors, including housing, petroleum (other than refining), defense and strategic industries. Also, the following investments would require the prior permission of the FIPB:

investments, including a transfer of shares, in excess of specified sectoral caps;

investments by a foreign investor who has an existing joint venture or technology transfer/trade mark agreement in the same field as at January 12, 2005. However, prior FIPB approval will not be required in case of investment made by a venture capital fund registered with SEBI or where the investment in the existing joint venture is less than 3.0 per cent. or where the existing joint venture is defunct or sick;

investments by an unincorporated entity;

investment in industries for which industrial licensing is compulsory; and

all proposals relating to acquisition of shares of an Indian company by a foreign investor (including individuals of Indian nationality or origin residing outside India (a Non-Resident Indian), the activities of which company are not under the automatic route under existing Indian foreign investment policy or where the Indian company is engaged in the financial services sector or where the acquisition of shares attracts the provisions of the Takeover Code. However, pursuant to a recent Press Note issued by the Government of India, the prior permission of the FIPB would not be required for the transfer of shares from residents to non-residents in the financial services sector or, in transactions subject to the Indian Takeover Code in cases where approvals are required from the RBI, under the Takeover Code, or the Insurance Regulatory and Development Authority.

Subject to certain exceptions, Foreign Direct Investment and investment by individuals of Indian nationality or origin residing outside India, or Non-Resident Indians, in Indian companies does not require the prior approval of the FIPB or the RBI. The Government has indicated that in all cases where Foreign Direct Investment is allowed on an automatic basis without FIPB approval the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

required, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The foregoing description applies only to an issuance of shares by, and not to a transfer of shares of, Indian companies.

The Government has set up the Foreign Investment Implementation Authority, or the FIIA in the Ministry of Commerce and Industry. The FIIA has been mandated to (i) translate foreign direct investment approvals into implementation, (ii) provide a proactive one-stop after-care service to foreign investors by helping them obtain necessary approvals, (iii) sort out operational problems and (iv) meet with various Government agencies to find solutions to foreign investment problems and maximize opportunities through a co-operative approach.

Pricing

The price of shares of a listed Indian company issued to non-residents under the foreign direct investment scheme on an automatic basis cannot be less than the price worked out in accordance with the guidelines issued by the SEBI for the preferential

Table of Contents

allotment of shares where the shares of such company are listed. Where an Indian company is not listed on any recognized stock exchange in India the minimum issue price of the shares would be based on a fair valuation of shares done by a chartered accountant as per the guidelines issued by the erstwhile Controller of Capital Issues.

Every Indian company issuing shares or convertible debentures in accordance with the Regulations is required to submit a report to the RBI within 30 days of receipt of the consideration and another report within 30 days from the date of issue of the shares to the non-resident purchaser. The above description applies only to an initial issue of shares or convertible debentures by an Indian company.

The above description applies only to a fresh issue of shares or convertible debentures by an Indian company.

Portfolio Investment by Foreign Institutional Investors

In September 1992, the Government issued guidelines that enable foreign institutional investors, including institutions such as pension funds, investment trusts, asset management companies, nominee companies and incorporated/institutional portfolio managers referred to as Foreign Institutional Investors, or FIIs, to make portfolio investments in all securities of listed and unlisted companies in India. Investments by registered Foreign Institutional Investors or Non-Resident Indians made through a stock exchange are known as Portfolio Investments. Foreign investors wishing to invest and trade in Indian securities in India under these guidelines are required to register with the SEBI and obtain a general permission from the RBI under the Foreign Exchange Management Act, 1999. However, since the SEBI provides a single window clearance, a single application must be made to the SEBI. Foreign investors are not necessarily required to register with the SEBI under the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations 1995 (the Foreign Institutional Investor Regulations) as Foreign Institutional Investors and may invest in securities of Indian companies pursuant to the Foreign Direct Investment route discussed above.

Foreign Institutional Investors who are registered with the SEBI are required to comply with the provisions of the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations, 1995, or Foreign Institutional Investor Regulations. A registered foreign institutional investor may buy, subject to the ownership restrictions discussed below, and sell freely securities issued by any Indian company, realize capital gains on investments made through the initial amount invested in India, subscribe to or renounce rights offerings for shares, appoint a domestic custodian for custody of investments made and repatriate the capital, capital gains, dividends, income received by way of interest and any compensation received towards sale or renunciation of rights offerings of shares. A Foreign Institutional Investor may not hold more than 10% of the total issued capital of a company in its own name; a corporate/individual sub-account of the Foreign Institutional Investor may not hold more than 5% of the total issued capital of a company, and a broad based sub-account may not hold more than 10% of the total issued capital of a company. The total holding of all Foreign Institutional Investors in a company is subject to a cap of 24% of the total paid up capital of a company, which can be increased to the relevant sectoral cap/ceiling applicable to the said company under the Foreign Direct Investment Regime with the passing of a special resolution by the shareholders of the company in a general meeting.

FIIs are permitted to purchase shares and convertible debentures, subject to the FII limits, of an Indian company either through:

a public offer, where the price of the shares to be issued is not less than the price at which the shares are issued to Indian residents, or

a private placement, where the price of the shares to be issued is not less than the price according to the terms of the relevant guidelines or the guidelines issued by the former Controller of Capital Issues.

Registered FIIs are generally subject to tax under Section 115AD of the Income Tax Act of 1961. There is uncertainty under Indian law as to the tax regime applicable to FIIs that hold and trade in ADSs and Shares. See Item 10.E Taxation Taxation of Capital Gains and Losses Indian Taxation .

Portfolio Investment by Non-Resident Indians

A variety of methods for investing in shares of Indian companies are available to Non-Resident Indians. These methods allow Non-Resident Indians to make Portfolio Investments in shares and other securities of Indian companies on a basis not generally available to other foreign investors. In addition to Portfolio Investments in Indian companies, non-resident Indians may also make foreign direct investments in Indian companies pursuant to the Foreign Direct Investment route discussed above.

Transfer of shares and convertible debentures of an Indian company by a person resident outside India

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The sale of shares of an Indian company from a non-resident to a resident required RBI approval, unless the sale was made on a stock exchange at the market price. The Government has granted general permission to persons residing outside India to transfer shares and convertible debentures held by them to an Indian resident, subject to compliance with certain terms and conditions and reporting requirements. A resident who wishes to purchase shares from a non-resident must, pursuant to the relevant notice requirements, file a declaration with an authorised dealer in the prescribed Form FC-TRS, together with the relevant documents and file an acknowledgment thereof with the Indian company to effect transfer of the shares to his name. However, in such cases, the

person to whom the shares are being transferred is required to obtain the prior permission of the Central Government of India to acquire the shares if such person has an existing venture in the same field as at January 12, 2005 (subject to the exceptions set out above). Further, a non-resident may transfer any security held by such resident to a person resident in India by way of gift.

Table of Contents

Moreover, the transfer of shares between an Indian resident and a non-resident (except NRI) does not require the prior approval of the Government or RBI, provided that: (i) the activities of the investee company are under the automatic route pursuant to FDI Policy and the transfer is not subject to regulations under the Indian Takeover Code; (ii) the non-resident shareholding complies with sector limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Indirect Foreign Investment

In February 2009, the Indian Government issued three press notes setting out guidelines for foreign investment in India. Press Note 2 of 2009 prescribes the guidelines for the calculation of total indirect foreign investment in Indian companies. Press Note 3 of 2009 prescribes the guidelines for transfer of ownership or control of Indian companies in sectors with caps from resident Indian citizens to non-resident entities. Additionally, Press Note 4 of 2009 issued on 25 February 2009 clarifies the guidelines on downstream investments by Indian companies. Pursuant to Press Note 2 of 2009 for the purposes of computation of indirect foreign investment in an Indian company, foreign investments in its parent company, by FIIs (holding as on 31 March), NRIs, ADRs, GDRs, FCCBs, FDI, convertible preference shares and convertible currency debentures are required to be taken together.

Sponsored ADR Schemes

By notification dated November 23, 2002, the RBI has permitted existing shareholders of Indian companies to sell their shares through the issuance of ADRs against the block of existing shares of the Indian company, subject to the following conditions:

The facility to sell the shares would be available *pari passu* to all categories of shareholders.

The sponsoring company whose shareholders propose to divest existing shares in the overseas market through issue of ADRs will give an option to all its shareholders indicating the number of shares to be divested and the mechanism how the price will be determined under the ADR norms. If the shares offered for divestment are more than the pre-specified number to be divested, shares would be accepted from the existing shareholders in proportion to their existing shareholdings.

The proposal for divestment of the shares would have to be approved by a special resolution of the Indian company.

The proceeds of the ADR issue raised abroad shall be repatriated into India within a period of one month from the closure of the issue. However, the proceeds of the ADR issue can also be retained abroad to meet the future foreign exchange requirements of the company and by a recent notification this facility has been extended indefinitely until further notice.

The issue related expenses in relation to public issue of ADRs under this scheme would be subject to a ceiling of 4% of the issue size in the case of public issues and 2% of the issue size in the case of private placements. The issue related expenses would include underwriting commissions, lead managers charges, legal expenses and reimbursable expenses. The issue expenses shall be passed on to the shareholders participating in the sponsored issue on a *pro rata* basis.

Transfer of ADRs by Non-residents

The Ministry of Finance, Government of India, has granted general permission for the transfer of ADRs outside India and also permitted non-resident holders of ADRs to surrender ADRs in exchange for the underlying shares. Pursuant to the terms of the Deposit Agreement an investor who surrenders ADRs and withdraws shares is permitted to re-deposit such shares subject to the total issued ADRs and obtain ADRs at a later time.

Fungibility of ADRs/GDRs

In March 2001, the RBI permitted the re-conversion of shares of Indian Companies into ADRs/GDRs, subject to the following conditions:

the Indian company has issued ADRs/GDRs;

the shares of the Indian company are purchased by a registered stock broker in India in the name of the Depository, on behalf of the non-resident investor who wishes to convert such shares into ADRs/GDRs;

shares are purchased on a recognized stock exchange;

the shares are purchased with the permission of the custodian of the ADRs/GDRs of the Indian company and are deposited with the custodian;

the issuer company has authorized the custodian to accept shares from non-resident investors for re-issuance of ADRs/GDRs;

the number of shares so purchased do not exceed the ADRs/GDRs converted into underlying shares, and are in compliance with the sectoral caps applicable under the Foreign Direct Investment regime; and

Table of Contents

the non-resident investor, broker, custodian and the overseas depository comply with the provisions of the Depository Receipt Mechanism and the guidelines issued thereunder from time to time.

Also the RBI has prescribed that the domestic custodians are the entity required to ensure compliance with the RBI guidelines and to file reports with the RBI from time to time. The domestic custodian is also required to perform the following functions:

provide a certificate to the RBI and the SEBI stating that the sectoral caps for foreign investment in the relevant company have not been breached;

monitor the total number of ADRs/GDRs that have been converted into underlying shares by non-resident investors;

liaise with the issuer company to ensure that the foreign investment restrictions, if any, are not being breached; and

file a monthly report about the ADRs/GDRs transactions under the two-way fungibility arrangement with the RBI and the SEBI.

E. Taxation

This section describes the material U.S. federal income tax consequences to U.S. holders (as defined below) and the Indian stamp duty and income and service tax consequences to non-residents (as defined below) of owning shares or ADSs. It applies to you only if you hold your shares or ADSs as capital assets for tax purposes. This section does not apply to you if you are a member of a special class of holders subject to special rules, including:

a dealer in securities,

a trader in securities that elects to use a mark-to-market method of accounting for securities holdings,

a tax-exempt organization,

a life insurance company,

a person liable for alternative minimum tax,

a person that actually or constructively owns 10% or more of our voting stock,

a person that holds shares or ADSs as part of a straddle or a hedging or conversion transaction, or

a U.S. holder (as defined below) whose functional currency is not the U.S. dollar.

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions, and the laws of India, all as currently in effect, as well as on the Convention Between the Government of the United States of America and the Government of the Republic of India for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Respect to Taxes on Income (the Treaty). These laws are subject to change, possibly on a retroactive basis. In addition, this section is based in part upon the representations of the Depository and the assumption that each obligation in the Deposit Agreement and any related agreement will be performed in accordance with its terms.

With regard to United States tax, the following discussion addresses only the material U.S. federal income tax consequences for persons that are U.S. holders . You are a U.S. holder if you are a beneficial owner of shares or ADSs and you are, for U.S. federal income tax purposes:

a citizen or resident of the United States,

a domestic corporation,

an estate whose income is subject to U.S. federal income tax regardless of its source, or

a trust if a United States court can exercise primary supervision over the trust s administration and one or more United States persons are authorized to control all substantial decisions of the trust.

With regard to Indian tax, the following discussion addresses only the tax consequences for persons that are non-residents of India, as defined in the Indian Income Tax Act of 1961 (the Income Tax Act), and is based on the provisions of Section 115AC and other applicable provisions of the Income Tax Act and the Issue of Foreign Currency Convertible Bonds and Ordinary Shares (Through Depository Receipt Mechanism) Scheme, 1993 promulgated by the Government of India (together, the Section 115AC Regime).

Table of Contents

If a partnership holds shares or ADSs, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. If you hold shares or ADSs as a partner in a partnership, you should consult your tax advisor with regard to the U.S. federal income tax treatment of an investment in our shares or ADSs.

This discussion addresses only U.S. federal income taxation and Indian stamp duty and income and service taxation.

In general, and taking into account the earlier assumptions, for U.S. federal income and Indian tax purposes, if you hold ADRs evidencing ADSs, you will be treated as the owner of the shares represented by those ADRs. Exchanges of shares for ADRs, and ADRs for shares, generally will not be subject to U.S. federal income tax or to Indian tax, but such exchange may give rise to Indian stamp duty as described below under Indian Stamp Duty .

Taxation of Dividends

Indian Taxation

Dividends paid to non-residents of India will not be subject to Indian tax. However, the Company will be liable to pay a dividend distribution tax , currently at the rate of 15% (plus a surcharge at 10% and an additional education tax (cess) at the rate of 3% on the sum of the dividend distribution tax and surcharge) on the total amount distributed as a dividend. The effective rate of dividend distribution tax is 17%.

Distributions to non-residents of India of additional ADSs or shares or rights to subscribe for such shares made with respect to ADSs or shares are not subject to Indian tax.

U.S. Federal Income Taxation

Under the U.S. federal income tax laws, and subject to the passive foreign investment company (PFIC) rules described below, if you are a U.S. holder, the gross amount of any dividend we pay out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) is subject to U.S. federal income taxation. If you are a non-corporate U.S. holder, dividends paid to you in taxable years beginning before January 1, 2011, that constitute qualified dividend income will be taxable to you at a maximum tax rate of 15% provided that you hold the shares or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meet other holding period requirements. Dividends we pay with respect to our shares or ADSs generally will be qualified dividend income.

The dividend is taxable to you when you, in the case of shares, or the Depository, in the case of ADSs, receive the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend distribution that you must include in your income as a U.S. holder will be the U.S. dollar value of the rupee payments made, determined at the spot rupee/U.S. dollar rate on the date the dividend distribution is includible in your income, regardless of whether the payment is in fact converted into U.S. dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date you include the dividend payment in income to the date you convert the payment into U.S. dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for U.S. federal income tax purposes, will be treated as a non-taxable return of capital to the extent of your basis in the shares or ADSs and thereafter as capital gain.

For foreign tax credit purposes, dividends will generally be income from sources outside the United States and will, depending on your circumstances, be either passive or general income for purposes of computing the foreign tax credit limitation allowable to you.

Distributions of additional shares to you with respect to shares or ADSs that are made as part of a pro rata distribution to all of our shareholders generally will not be subject to U.S. federal income tax.

Table of Contents

Taxation of Capital Gains and Losses

Indian Taxation

Capital Gains. Under Section 115AC and other applicable provisions of the Income Tax Act, any gain realized on the sale outside India of the ADSs from one non-resident of India to another non-resident of India is not subject to Indian capital gains tax. However, it is unclear whether a capital gain derived from the sale of rights by a non-resident of India to another non-resident of India outside of India may be subject to Indian capital gains tax.

Capital gains arising to the non-resident investor on the transfer of the equity shares (including shares received in exchange of the ADSs) whether in India or outside India to a non-resident investor or Indian resident, will be liable for income tax under the provisions of the Income Tax Act.

Equity shares (including shares issuable on the exchange of the ADSs) held by the non-resident investor for a period of more than 12 months are treated as long-term capital assets. If the equity shares are held for a period of 12 months or less, the capital gains arising on the sale thereof are to be treated as short-term capital gains. A non-resident holder's holding period (for purposes of determining the applicable Indian capital gains tax rate) in respect of shares received in exchange for ADSs commences on the date of the advice of withdrawal of such shares by the relevant depository to its custodian.

For the purpose of computing capital gains tax on the sale of the equity shares, the cost of acquisition of equity shares received in exchange for ADSs will be determined on the basis of the prevailing price of the shares on the Indian Stock Exchanges as on the date on which the relevant depository gives notice to its custodian for the delivery of such equity shares upon redemption of the ADSs, while the cost of acquisition of shares directly converted from the ADSs will be determined on the basis of the price prevailing on the Indian Stock Exchanges on the date of conversion into equity shares.

Gain realized on the sale of listed equity shares held for more than 12 months will not be subject to Indian capital gains tax if the Securities Transaction Tax (STT) has been paid on the transaction. The STT will be levied on and collected by a domestic stock exchange on which equity shares are sold at the rate of 0.025% to 0.125% depending upon the nature of the transaction.

Any gain realized on the sale of equity shares held for more than 12 months on which no STT has been paid will be subject to Indian capital gains tax at the rate of 10% plus applicable surcharge on income tax and education cess at the applicable rates.

Capital gains realized in respect of equity shares held (calculated in the manner set forth in the prior paragraph) for 12 months or less (short-term gain) on which STT is paid in the manner and rates set out above, is subject to tax at the rate of 10% plus applicable surcharge on income tax and an education cess at the applicable rate. In the event that no STT is paid, short term gain is subject to tax at variable rates with the maximum rate of 40% plus applicable rate of surcharge on income tax and education cess at the rate of 3% of the tax and surcharge. The actual rate of tax on short term gains depends on a number of factors, including the legal status of the non-resident holder and the type of income chargeable in India.

Tax on capital gains is to be deducted at source by the person paying for the shares in accordance with the relevant provisions of the Income Tax Act.

Capital Losses. The Section 115AC Regime does not deal with capital losses arising on a transfer of shares. In general terms, losses arising from a transfer of a capital asset in India can only be set off against capital gains and not against any other income. A short-term capital loss can be set off against a capital gain, whether short-term or long-term. However, long-term capital loss can only be set off against long-term capital gain and not against short-term capital gain. To the extent that the losses are not absorbed in the year of transfer, they may be carried forward for a period of eight assessment years immediately succeeding the assessment year for which the loss was first determined and may be set off against the capital gains assessable for such subsequent assessment years. In order to set off capital losses in this manner, the non-resident investor would be required to file appropriate and timely tax returns in India. The long-term capital loss arising on a sale of equity shares in respect of which STT is paid may not be available for set-off against any capital gains.

U.S. Federal Income Taxation

Generally. Subject to the PFIC rules discussed below, if you are a U.S. holder and you sell or otherwise dispose of your shares or ADSs, you will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the dollar value of the amount that you realize and your tax basis, determined in dollars, in your shares or ADSs. Capital gain of a non-corporate U.S. holder that is recognized in

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

taxable years beginning before January 1, 2011, is generally taxed at a maximum rate of 15% where the holder has a holding period greater than one year. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

Passive Foreign Investment Companies. We believe that shares and ADSs should not be treated as stock of a PFIC for U.S. federal income tax purposes, but this conclusion is a factual determination that is made annually and thus may be subject to change. If we were to be treated as a PFIC, then unless you elect to be taxed annually on a mark-to-market basis with respect to your shares or ADSs, gain realized on the sale or other disposition of your shares or ADSs would in general not be treated as capital gain. Instead, if

Table of Contents

you are a U.S. holder, you would be treated as if you had realized such gain and certain excess distributions ratably over your holding period for the shares or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, together with an interest charged in respect of the tax attributable to each such year. With certain exceptions, your shares or ADSs will be treated as stock in a PFIC if we were a PFIC at any time during your holding period in your shares or ADSs. Dividends that you receive from us will not be eligible for the special tax rates applicable to qualified dividend income if we are treated as a PFIC with respect to you either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

Indian Tax Treaties

The provisions of the tax treaty entered into by India and the country of residence of the non-resident investor will be applicable to the extent they are more beneficial to the non-resident investor.

Dividend income is not subject to tax in India in the hands of the non-resident holder of the shares. If any shares are held by a non-resident investor following withdrawal thereof from the depository facility under the Deposit Agreement, the provisions of a tax treaty, if any, entered into by India and the country of residence of such non-resident investor will be applicable to determine the taxation of any capital gain arising from a transfer of such shares.

However, during the period of fiduciary ownership of shares in the hands of the overseas depository bank, the provisions of the tax treaty entered into by India and the country of residence of the overseas depository bank will be applicable to determine the taxation of any capital gains in respect of ADSs.

Indian Stamp Duty

Under Indian law, any transfer of ADSs will be exempt from liability to Indian stamp duty. Purchasers of shares who seek to register such shares on the share register of the company are required to pay Indian stamp duty at the rate of Rs. 0.25 for every Rs. 100 or part thereof of the market value of such shares. In order to register a transfer of shares in physical form with the company, it is necessary to present a stamped deed of transfer. An acquisition of shares in physical form from the Depository in exchange for ADSs representing such shares will not render an investor liable to Indian stamp duty but the company will be required to pay stamp duty at the applicable rate on the share certificate. However, since our shares are compulsorily deliverable in dematerialized form (except for trades of up to 500 shares which may be delivered in physical form), no stamp duty is payable on the acquisition or transfer of shares in dematerialized form.

Indian Service Tax

Brokerage or commission fees paid to stockbrokers in India in connection with the sale or purchase of shares are now subject to an Indian service tax of 12% (plus a 2% education cess). A stockbroker is responsible for collecting such service tax at such rate and for paying the same to the relevant authority.

F. Dividends and Paying Agents

H. Documents on Display.

You may review a copy of this annual report at the Securities and Exchange Commission's public reference room at 100 F Street, N.E., Washington, D.C. 20549. You may call the SEC at 1-800-732-0330 for additional information on how to obtain copies of all or any portion of the documents we file with or furnish to the SEC. The Securities and Exchange Commission also maintains a web site www.sec.gov that contains reports, proxy statements and other information regarding registrants that file electronically with the Securities and Exchange Commission.

We are subject to the information requirements of the Securities Exchange Act of 1934 and, in accordance therewith, will file annual reports on Form 20-F within the time specified by the Securities and Exchange Commission and furnish other reports and information on Form 6-K with

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

the Securities and Exchange Commission. These reports and other information can be inspected at the public reference room at the Securities and Exchange Commission. You can also obtain copies of this material from the public reference room or by calling or writing the Securities and Exchange Commission upon payment of a prescribed fee. As a foreign private issuer, we are exempt from the rules under the Securities Exchange Act of 1934 prescribing the furnishing and content of proxy statements to shareholders.

Table of Contents

I. Subsidiary Information

Not applicable.

Item 11. Quantitative and Qualitative Disclosures about Market Risk

Our exposure to financial risks derives primarily from changes in interest rates and foreign exchange rates. To mitigate these risks, we utilize derivative financial instruments, including interest rate option contracts and currency swap agreements, the application of which is primarily for hedging purposes and not for speculative purposes.

Commodity price risk

Commodity price risk is the possibility of impact from changes in the price of commodities, such as non-ferrous metals (like aluminum), ferrous alloys (like steel) and others (like rubber), which we use in production of automotive vehicles and their components. We do not use derivative instruments to hedge the price risk associated with the purchase of these commodities.

See Note 40 of our audited consolidated financial statements for additional disclosures on financial instruments

Item 12. Description of Securities Other than Equity Securities.

Not applicable.

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies.

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds.

None.

Item 15: Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this Annual Report on Form 20-F, we carried out an evaluation, under the supervision and with the participation of our management, including our Managing Director until June 1, 2009 and Vice-Chairman with effect from June 2, 2009, Mr. Ravi Kant, Managing Director and Chief Executive Officer with effect from June 2, 2009, Mr. P M Telang and Chief Financial Officer, Mr. C Ramakrishnan, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934).

Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective, as of March 31, 2009, to provide reasonable assurance that the information required to be disclosed in filings and submissions under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions about required disclosure.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Management's Annual Report on Internal Control Over Financial Reporting

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is a process designed under the supervision of our principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with IFRS issued by the International Accounting Standards Board. Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management conducted an assessment of the effectiveness of our internal control over financial reporting based on the framework established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that our internal control over financial reporting as at March 31, 2009 is effective.

Our management excluded from its assessment of the effectiveness of the internal control over financial reporting, the internal controls of Jaguar Cars Limited and Land Rover and their subsidiaries, which were acquired on June 2, 2008 and whose financial statements constitute Rs.91,442 million and Rs.311,490 million of net assets and total assets, respectively, Rs.390,889 million of revenues and Rs.32,616 million of net loss of the consolidated financial statements of the Company as of and for the year ended March 31, 2009. Such exclusion was in accordance with Securities and Exchange Commission guidance that an assessment of a recently acquired business may be omitted in management's report on internal controls over financial reporting (ICFR) in the year of acquisition.

Changes to certain processes, information technology systems, and other components of internal control resulting from the acquisition of Jaguar Cars Limited and Land Rover and their subsidiaries may occur and will be evaluated by management as such integration activities are implemented.

The effectiveness of our internal control over financial reporting as at March 31, 2009 has been audited by Deloitte Haskins and Sells, an independent registered public accounting firm, as stated in their report appearing on the accompanying consolidated financial statements in Item 18, which expresses an unqualified opinion on the effectiveness of our internal control over financial reporting as at March 31, 2009.

Changes in Internal Control Over Financial Reporting

During the period covered by this annual report, there were no changes in our internal control over financial reporting that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

Item 16A. Audit Committee Financial Expert.

Our Board has determined that Mr. Palia, an independent director and a member of our Audit Committee, is an audit committee financial expert as defined under the applicable rules of the SEC issued pursuant to Section 407 of the Sarbanes Oxley Act of 2002.

Item 16B. Code of Ethics

We have adopted the Tata Code of Conduct (hereinafter referred as to the Code) a written Code of Ethics which is applicable to all our employees, including the chief executive officer, chief financial officer, principal accounting officer, senior management, as well as all officers working in accounts, finance, treasury, internal audit, taxation, legal, secretarial, investor relations, Disclosure Committee, Audit Committee, Board of Directors and other departments. We have a separate Code of Conduct applicable to Non-Executive Directors. The Codes are available at all our offices and are publicly available on our website.

In August 2004, our Audit Committee adopted a Policy (the Whistle Blower Policy) that provided a formal mechanism for all our employees to approach our Management (or the Audit Committee in cases where the concern involves the Senior Management) and make protective disclosures to the Management about unethical behaviour, actual or suspected fraud or violations of the Company's Code of Conduct or ethics policy. The Whistle Blower Policy is an extension of the Tata Code of Conduct, which requires every employee to promptly report to the Management any actual or possible violation of the Code or an event such employee becomes aware of that could affect our business or reputation. The disclosures reported are addressed in the manner and within the time frames prescribed in the Whistle Blower Policy.

Item 16C. Principal Accountant Fees and Services.

Our financial statements prepared in accordance with IFRS, are audited by Deloitte Haskins and Sells, or DHS, a firm registered with the Public Company Accounting Oversight Board (PCAOB) in the United States and an Indian firm of Chartered Accountants registered with the Institute of Chartered Accountants of India (ICAI).

DHS has served as our independent public accountant for each of the years ended March 31, 2009 and March 31, 2008, for which audited financial statements appear in this annual report.

Table of Contents

The following table presents the aggregate fees for professional services and other services rendered by DHS and the various member firms of Deloitte to us including some of our subsidiaries in fiscal 2009 and 2008.

	2009 US\$ in million	2009 Rs. in million	2008	
Audit Fees	5.2	263.5	124.3	Audit and review of financial statements
Tax Fees	0.3	16.0	8.7	Tax audit, certification of foreign remittances and tax advisory services
All Other Fees	0.2	8.0	8.9	Other certifications and advisory services
Total	5.7	287.5	141.9	

Audit Committee pre-approval for services rendered by independent accountants:

We have adopted a policy for pre-approval of services to be rendered by our independent accountants for us and our subsidiaries based on an elaborate procedure for ensuring auditor independence and objectivity.

At the beginning of each year, the Audit Committee approves the proposed services, including the nature, type and scope of services contemplated and/or the related fees to be rendered by these firms during the year.

In addition, Audit committee pre-approval is also required for those engagements that may arise during the course of the year that are outside the scope of the initial services and such fees are pre-approved by the audit Committee.

We do not engage our independent accountants for prohibited services .

Our Audit Committee recommends the appointment and compensation of independent accountants.

In case of urgent requirements, our CFO and the Chairman of our Audit Committee jointly approve any services that may be rendered by our independent accountants or their member firms and such services are subsequently ratified at the next Audit Committee meeting.

The pre-approval is not required where the fees proposed to be paid for the non-audit services do not exceed 5% of the total amount of fees paid by us to our independent accountants and their member firms during the fiscal year, provided that such services were not recognized as non audit services at the time of the engagement of services. Such services are also brought to the attention of the Audit Committee at the next meeting.

Item 16D. Exemptions from the Listing Standards for Audit Committees.

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

None.

Item 16F. Change in Registrant's Certifying Accountant

None.

Item 16G. Corporate Governance

The following is a summary comparison of significant differences between our corporate governance practices and those required by the NYSE for non-U.S. issuers.

Independent directors: The Board has determined the independence of its directors pursuant to applicable Indian listing requirements. Six directors of the Board of Directors are independent directors pursuant to such requirements. Under such requirements, a non-executive director is considered independent if he:

apart from receiving director's remuneration, does not have any material pecuniary relationships or transactions with us or our promoters, our directors, our senior management or our holding company, its subsidiaries and associates which may affect the independence of the director;

Table of Contents

is not related to promoters or person occupying management position at the board level or at one level below the board;

has not been our executive in the immediately preceding three financial years;

is not a partner or an executive or was not a partner or an executive during the preceding three years, of our statutory audit firm or internal audit firm or a legal/consulting firm that has a material association with us.

is not a material supplier, service provider or customer or a lessor or lessee of the Company, which may affect their independence; and

is not our substantial shareholders, owning two percent or more of our voting shares.

is not below 21 years of age.

Non-management directors meetings: There is no such requirement under applicable Indian legal requirements.

Remuneration Committee and the Audit Committee: The requisite number of members of our Remuneration Committee are independent, as defined under applicable Indian legal requirements. All members of our Audit Committee are independent as defined under Rule 10A-3 under the Exchange Act. The constitution and main functions of these committees as approved by our Board are described above and, we believe, comply with the spirit of the NYSE requirements for non-U.S. issuers.

Item 17. Financial Statements.

We have elected to provide the financial statements and related information specified in Item 18 in lieu of Item 17.

Item 18. Financial Statements.

The information required by this item is set forth beginning on page F-1 of this annual report.

Item 19. EXHIBITS.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Tata Motors Limited

Mumbai, India

We have audited the accompanying consolidated balance sheets of Tata Motors Limited and subsidiaries (the Company or Tata Motors) as of March 31, 2009 and 2008, and the related consolidated statements of operations, recognized income and expense, and cash flows for each of the two years in the period ended March 31, 2009. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Tata Motors Limited and subsidiaries as of March 31, 2009 and 2008, and the results of their operations and their cash flows for each of the two years in the period ended March 31, 2009, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of March 31, 2009, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated October 7, 2009, expressed an unqualified opinion on the Company's internal control over financial reporting.

Our audit for the year ended and as of March 31, 2009, also comprehended the translation of Indian rupee amounts into United States dollar amounts and in our opinion, such translation has been made in conformity with the basis stated in Note 2(x). The translation of the consolidated financial statements amounts into United States dollars has been made solely for the convenience of the readers.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Tata Motors Limited

Mumbai, India

We have audited the internal control over financial reporting of Tata Motors Limited and subsidiaries (the Company) as of March 31, 2009, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. As described in Item 15 under Controls and Procedures of the accompanying Form 20-F titled Management’s Annual Report on Internal Control Over Financial Reporting, management excluded from its assessment the internal control over financial reporting at Jaguar Cars Limited and Land Rover and their subsidiaries, which were acquired on June 2, 2008 and whose financial statements constitute Rs.91,442 million and Rs.311,490 million of net assets and total assets, respectively, Rs.390,889 million of revenues and Rs.32,616 million of net loss of the consolidated financial statements as of and for the year ended March 31, 2009. Accordingly, our audit did not include the internal control over financial reporting at Jaguar Cars Limited and Land Rover and their subsidiaries. The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Item 15 under Controls and Procedures of the accompanying Form 20-F titled Management’s Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company has maintained, in all material respects, effective internal control over financial reporting as of March 31, 2009, based on the criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended March 31, 2009 of the Company and our report dated October 7, 2009, expressed an unqualified opinion on those financial statements.

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements

1. Background and operations

Tata Motors Limited and its subsidiaries, collectively referred to as (the Company or Tata Motors), designs, manufactures and sells a wide range of automotive vehicles. The Company provides financing for the vehicles sold by it in certain markets. The Company also manufactures engines for industrial and marine applications, as well as construction equipment, including hydraulic excavators, cranes and wheel loaders, aggregates such as axles and transmissions for commercial vehicles and factory automation equipment, and provides information technology services.

The Company is a public limited company incorporated and domiciled in India and has its registered office at Mumbai, Maharashtra, India.

On June 2, 2008, the Company acquired Jaguar Land Rover businesses (referred to as JLR) which includes three manufacturing facilities and two advanced engineering centers in the UK, and a worldwide sales network.

Tata Sons Limited (or Tata Sons), together with its subsidiaries, owns 30.78% of ordinary shares and 73.39% of A ordinary shares of Tata Motors, and has the ability to significantly influence the Company s operations.

2. Significant accounting policies

a. Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (referred to as IFRS) as issued by the International Accounting Standards Board (referred to as IASB).

The Company changed its accounting policies from Indian GAAP (referred to as Previous GAAP) to comply with IFRS from April 1, 2008. The transition from Previous GAAP to IFRS has been accounted for in accordance with IFRS 1- First time Adoption of International Financial Reporting Standards, with April 1, 2007 as the transition date. The reconciliation of effects of transition from Previous GAAP on the equity as of April 1, 2007 and March 31, 2008, and on the net income and cash flows for the year ended March 31, 2008, is disclosed in note 4 to these financial statements.

In previous years, the Company s consolidated financial statements filed on Form 20-F were prepared in accordance with accounting principles generally accepted in the United States of America (referred to as U.S. GAAP). Consequently, in note 4.1 the Company has presented reconciliation of the effects of differences between Previous GAAP and U.S .GAAP on equity, net income and cash flows for the same periods as the effect of transition from Previous GAAP to IFRS.

Table of Contents

b. Basis of preparation

The consolidated financial statements have been prepared on historical cost basis except for revaluation of certain financial instruments.

c. Basis of consolidation

Subsidiaries

The consolidated financial statements include Tata Motors Limited and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Under the Jaguar Land Rover acquisition process, certain distribution divisions / National Sales Companies were carved out of Ford entities and are to be transferred by Ford Motor Company upon completion of formalities and receipt of local regulatory approvals. As per the sale and purchase agreement, the Company is entitled to receive / liable to post acquisition profits and losses and therefore, the results of operations and financial position of such divisions / companies are incorporated in the consolidated financial statements.

Inter-company transactions and balances including unrealized profits are eliminated in full on consolidation.

Minority interests in the net assets (excluding goodwill) of consolidated subsidiaries are identified separately from the Company's equity. Minority interests consist of the amount of those interests at the date of the original business combination and the minority share of changes in equity since the date of combination. Losses applicable to the minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the Company except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

Associates and jointly controlled entities (equity accounted investees)

Associates are those entities in which the Company has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the Company holds between 20 and 50 percent of the voting power of another entity. Jointly controlled entities are those entities over whose activities the Company has joint control, established by contractual agreement and requiring unanimous consent for strategic financial and operating decisions.

Associates and jointly controlled entities (equity accounted investees) are accounted for using the equity method and are recognized initially at cost. The Company's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Company's share of the income and expenses and equity movements of equity accounted investees, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Company's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee.

d. Business combination

Acquisitions of subsidiaries and businesses are recorded using the purchase method. The acquiree's identifiable assets, liabilities and contingent liabilities are recognized at fair values.

Purchase consideration in excess of the Company's interest in the acquiree's net fair value of identifiable assets, liabilities and contingent liabilities is recognized as goodwill. Excess of the Company's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over the purchase consideration is recognized, after reassessment of fair value of net assets acquired, in the statement of operations.

Minority interest in an acquiree is initially measured at the minority's proportion of the net fair value of the identifiable assets, liabilities and contingent liabilities recognized.

Table of Contents

e. Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

- i) Note 2(m) and note 13 Useful life of property, plant and equipment
- ii) Note 15 Impairment of goodwill
- iii) Note 16(1) Impairment of indefinite useful life intangible assets
- iv) Note 13(4) Property, Plant and equipment

f. Revenue recognition

Revenue is measured at fair value of consideration received or receivable.

i. Sale of products

The Company recognizes revenues on the sale of products, net of discounts, sales incentives, customer bonuses and rebates granted, when products are delivered to dealers or when delivered to a carrier for export sales, which is when title and risks and rewards of ownership pass to the customer. Sale of products includes export and other recurring and non-recurring incentives from Governments at the national and state levels. Sale of products is presented net of excise duty where applicable, and other indirect taxes.

Revenues are recognized when collectibility of the resulting receivable is reasonably assured.

ii. Revenue from sale of vehicles with guaranteed repurchase option/repurchase arrangement

Some of the subsidiary companies sell vehicles to rental car companies and other fleet customers subject to guaranteed repurchase options and to Ford Motor Group management employees, with repurchase arrangements. At the time of sale, the proceeds are recorded as deferred revenue in other current liabilities and the cost of the vehicles are recorded as inventories. The difference between the proceeds and the guaranteed repurchase amount is recognized in revenue over the term of the arrangement, using the straight-line method. The difference between the cost of the vehicle and the estimated auction value is amortized as changes in finished stocks and work in-progress over the term.

iii. Finance revenues

Finance and service charges are accrued on the unpaid principal balance of finance receivables using the effective interest method.

Table of Contents

g. Cost recognition

Costs and expenses are recognized when incurred and are classified according to their nature.

Expenditure capitalized represents employee costs, stores and other manufacturing supplies, and other expenses incurred for construction including product development undertaken by the Company.

h. Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

i) Product warranty expenses

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidences based on actions on product failures. The timing of outflows will vary as and when warranty claim will arise- being typically up to five years.

ii) Residual risk

In certain markets, the Company is responsible for the residual risk arising on vehicles sold by dealers under leasing arrangements. The provision is based on the latest available market expectations of future residual value trends. The timing of the outflows will be at the end of the lease arrangements being typically up to three years.

i. Foreign currency

The functional currency of the Company is Indian Rupees and subsidiaries functional currencies are determined on the basis of the primary economic environment in which they operate.

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated monetary assets and liabilities are remeasured into the functional currency at the exchange rate prevailing on the balance sheet date. Exchange differences are recognized in the statement of operations except to the extent that exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings are capitalized as cost of assets under construction.

For the purpose of consolidation, the assets and liabilities of the Company's foreign operations, are translated to Indian Rupee at the exchange rate prevailing on the balance sheet date, and the income and expenses at the average rate of exchange for the period. Exchange differences arising are classified as equity and recognized as currency translation reserve under equity.

j. Income taxes

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the statement of operations except to the extent it relates to items recognized directly in equity, in which case it is recognized in equity.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

F-11

Table of Contents

Deferred tax liabilities are recognized for taxable temporary differences arising on investments in subsidiaries and associates, and interests in jointly controlled entities, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

k. Earnings per share

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Partly paid up shares are included as fully paid equivalents according to the fraction paid up. Diluted earnings per share has been computed using the weighted average number of shares and weighted average number of shares outstanding, for the effects of all dilutive potential shares.

l. Inventories

Inventories (other than those recognized consequent to the sale of vehicles with a guaranteed repurchase option) are valued at the lower of cost and net realizable value. Cost of raw materials and consumables are ascertained on a first in first out basis. Cost, including variable and fixed overheads, are allocated to work-in-progress and finished goods determined on a full absorption cost basis. Net realizable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses.

m. Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation.

Freehold land is measured at cost and is not depreciated.

Cost includes purchase price, taxes and duties, labor cost and direct overheads for self constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

Depreciation is provided on a straight-line basis over estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

	Estimated useful life (years)
Buildings	20 to 40
Plant and equipment	9 to 30
Computers	3 to 6
Vehicles	3 to 10
Furniture and fixtures	3 to 20

Depreciation on finance lease assets is recorded over the shorter of the estimated useful life of the asset or the period of the lease.

Depreciation is not recorded on capital work-in-progress until construction and installation are complete and the asset is ready for its intended use. Capital-work-in-progress includes capital advances.

Table of Contents**n. Intangible assets**

Intangible assets purchased including acquired in business combinations, are measured at cost or fair value, as of the date of acquisition where applicable less accumulated amortization. Intangible assets with indefinite lives are reviewed annually to determine whether indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

The amortization period for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates.

Customer related intangible consists of order backlog and dealer network.

	Estimated amortization period
Patents and technological know-how	2 to 12 years
Order backlog	3 months
Dealer network	20 years
Intellectual property rights	7 to 9 years
Software	2 to 8 years

Internally generated intangible asset

Research costs are charged to the statement of operations in the year in which they are incurred.

Product development costs incurred on new vehicle platform, engines, transmission and new products are recognized as intangible assets, when feasibility has been established, the Company has committed technical, financial and other resources to complete the development and it is probable that asset will generate probable future economic benefits.

The costs capitalized include the cost of materials, direct labor and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Interest cost incurred is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortized over a period of 36 months to 120 months or on the basis of actual production to planned production volume over such period.

Capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment loss.

o. Leases

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

Finance leases

A finance lease is recognized as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Initial direct costs, if any, are also capitalized and, subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Operating leases

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Leases other than finance leases, are operating leases, and the leased assets are not recognized on the Company's balance sheet. Payments under operating leases are recognized in statement of operations on a straight-line basis over the term of the lease.

F-13

Table of Contents**p. Impairment****i) Goodwill**

Cash generating unit to which goodwill is allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to that unit and then to the other assets of the unit pro rata on the basis of carrying amount of each asset in the unit. Goodwill impairment loss recognized is not reversed in subsequent period.

ii) Property, plant and equipment and other intangible assets

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, or earlier, if there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value, using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of operations.

As of March 31, 2009 and 2008, none of the Company's property, plant and equipment and intangible assets were considered impaired.

q. Employee benefits**i) Pension plans**

One of the major subsidiary group, Jaguar Land Rover, operates several defined benefit pension plan, which are contracted out of the second state pension scheme. The assets of the plan are held in separate trustee administered funds. The plans provide for monthly pension after retirement as per salary drawn and service period as set out in rules of each fund.

Contributions to the plans by the subsidiary group take into consideration the results of actuarial valuations. The plans with a surplus position at the year end have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognized.

A separate defined contribution plan is available to employees of a major subsidiary group, Jaguar Land Rover. Costs in respect of this plan are charged to the statement of operations as incurred.

ii) Gratuity

Tata Motors and some of its subsidiaries in India have an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. Tata Motors and such subsidiaries make annual contributions to gratuity funds established as trusts. Some subsidiaries have

obtained insurance policies with the Life Insurance Corporation of India. Tata Motors and some of its subsidiaries in India account for the liability for gratuity benefits payable in the future based on an actuarial valuation.

iii) Superannuation

Tata Motors and some of its subsidiaries in India have two superannuation plans, a defined benefit plan and a defined contribution plan. An eligible employee on April 1, 1996 could elect to be a member of either plan.

Table of Contents

Employees who are members of the defined benefit superannuation plan are entitled to benefits depending on the years of service and salary drawn. The monthly pension benefits after retirement range from 0.75% to 2% of the annual basic salary for each year of service. Tata Motors and such subsidiaries account for superannuation benefits payable in future under the plan based on an actuarial valuation.

With effect from April 1, 2003, this plan was amended and benefits earned by covered employees have been protected as at March 31, 2003. Employees covered by this plan are prospectively entitled to benefits computed on a basis that ensures that the annual cost of providing the pension benefits would not exceed 15% of salary.

Separate irrevocable trusts are maintained for employees covered and entitled to benefits. Tata Motors and its subsidiaries contribute up to 15% of the eligible employees' salary to the trust every year. Such contributions are recognized as an expense when incurred. Tata Motors and such subsidiaries have no further obligation beyond this contribution.

iv) Bhavishya kalyan yojana (BKY)

Bhavishya Kalyan Yojana is an unfunded defined benefit plan for employees of Tata Motors and some of its subsidiaries. The benefits of the plan accrue to an eligible employee at the time of death or permanent disablement, while in service, either as a result of an injury or as certified by the appropriate authority. The monthly payment to dependents of the deceased/disabled employee under the plan equals 50% of the salary drawn at the time of death or accident or a specified amount, whichever is higher. Tata Motors and these subsidiaries account for the liability for BKY benefits payable in the future based on an actuarial valuation.

v) Provident fund and family pension

In accordance with Indian law, eligible employees of Tata Motors and some of its subsidiaries are entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The contributions, as specified under the law, are made to the provident fund and pension fund set up as an irrevocable trust by Tata Motors and its subsidiaries or to respective Regional Provident Fund Commissioner and the Central Provident Fund under the State Pension scheme. Tata Motors and its subsidiaries are generally liable for any shortfall in the fund assets based on the government specified minimum rates of return or pension and recognizes such shortfall, if any, as an expense in the year incurred.

vi) Severance indemnity

Tata Daewoo Commercial Vehicle Company Limited (TDCV) a subsidiary company incorporated in Korea has an obligation towards severance indemnity, a defined benefit retirement plan, covering eligible employees. The plan provides for a lump sum payment to all employees with more than one year of employment equivalent to 30 days' salary payable for each completed year of service.

vii) Post-retirement medicare scheme

Under this unfunded scheme, employees of Tata Motors and some of its subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from the Company as part of an Early Separation Scheme, on medical grounds or due to permanent disablement are also covered under the scheme. Tata Motors and such subsidiaries account for the liability for post-retirement medical scheme based on an actuarial valuation.

viii) Compensated absences

The Company and some of its subsidiaries provide for the encashment of leave or leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits, for future encashment. The liability is provided based on the number of days of unutilized leave at each balance sheet date on the basis of an actuarial valuation.

Table of Contents

Actuarial gains and losses

Actuarial gains and losses relating to retirement benefit plans are recognized directly in statement of recognized income and expense in the period in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognized in the statements of operations in the period in which they arise.

Measurement date

The measurement date of retirement plans is March 31.

r. *Dividends*

Any dividend declared by Tata Motors is based on the profits available for distribution as reported in the unconsolidated statutory financial statements of Tata Motors prepared in accordance with Indian GAAP. Further, Indian law mandates that dividend be declared out of distributable profits only after the transfer of a specified percentage of net income computed in accordance with current regulations to a general reserve. Accordingly, in certain years the net income reported in these financial statements may not be fully distributable. As of March 31, 2009 and March 31, 2008, the amounts available for distribution were Rs.60,213.0 million and Rs. 64,190.3 million respectively.

s. *Segments*

The Company primarily operates in the automotive segment. The automotive segment comprises of two reportable segments i.e. Tata vehicles and Jaguar Land Rover. Other operating segments do not meet the quantitative thresholds for disclosure and have been aggregated.

t. *Financial instruments*

i) Classification, initial recognition and measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities.

Financial instruments are recognized on the balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognized at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognized in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Financial assets and financial liabilities at fair value through profit or loss: Derivatives, including embedded derivatives separated from the host contract, unless they are designated as hedging instruments, for which hedge accounting is applied, are classified into this category. These are measured at fair value with changes in fair value recognized in the statements of operations.

Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortized cost using the effective interest method less any impairment losses.

These includes trade receivables, finance receivables, balances with banks, short-term deposits with banks, other financial assets and investments with fixed or determinable payments.

Table of Contents

Available-for-sale financial assets: Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial asset categories. Subsequently, these are measured at fair value and changes therein, other than impairment losses and foreign exchange gains and losses on available-for-sale monetary items are recognized directly in statement of recognized income and expense, net of applicable deferred income taxes.

Dividends from available-for-sale debt securities are recognized in the statement of operations when the right to receive payment has been established.

Equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, are measured at cost.

When the financial asset is derecognized, the cumulative gain or loss in equity is transferred to the statement of operations.

Foreign currency convertible notes: Convertible notes issued in foreign currency are convertible at the option of the holder into ordinary shares of the Company as per the terms of the issue. Conversion option which is not settled by exchanging a fixed amount of cash for a fixed number of shares is accounted for separately from the liability component as derivative and initially accounted for at fair value. The liability component is recognized initially at the difference between the fair value of the note and the fair value of the conversion option. Directly attributable costs are allocated to the liability component and the conversion option in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The conversion option is subsequently measured at fair value at each reporting date, with changes in fair value recognized in statement of operations.

The conversion option is presented together with the related liability.

Equity instruments: An equity instrument is any contract that evidences residual interests in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Other financial liabilities: These are measured at amortized cost using the effective interest method.

ii) Determination of fair value:

The fair value of a financial instrument on initial recognition is normally the transaction price (fair value of the consideration given or received). Subsequent to initial recognition, the Company determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets) or quoted ask prices (financial liabilities) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

iii) Derecognition of financial assets and financial liabilities:

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

Financial liabilities are derecognized when these are extinguished, that is when the obligation is discharged, cancelled or has expired.

iv) Impairment of financial assets:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

F-17

Table of Contents

Loans and receivables:

Impairment loss in respect of loans and receivables is calculated as the difference between their carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognised in the statement of operations. If the amount of an impairment loss decreases in a subsequent period, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. The reversal is recognized in the statement of operations.

Available-for-sale financial asset:

If the available-for-sale financial asset is impaired, the difference between the financial asset's acquisition cost (net of any principal repayments and amortization) and the current fair value, less any previous impairment loss recognized in the statement of operations, is reclassified from equity to statements of operations. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized, the impairment loss is reversed. The reversal is recognized in the statement of operations. Reversal of impairment loss on equity investments classified as available-for-sale, are not recognized in the statement of operations. Increases in their fair value after impairment is recognized in equity.

Impairment loss on equity investments carried at cost is not reversed.

u. *Hedge accounting:*

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to highly probable forecast transactions. The Company designates these forward contracts in a cash flow hedging relationship by applying the hedge accounting principles.

These forward contracts are stated at fair value at each reporting date. Changes in the fair value of these forward contracts that are designated and effective as hedges of future cash flows are recognized in equity (net of tax), and the ineffective portion is recognized immediately in the statement of operations. Amounts accumulated in equity are reclassified to the statement of operations in the periods in which the forecasted transactions occurs.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognized in equity is retained until the forecast transaction occurs.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognized in equity is immediately transferred to the statement of operations for the period.

v. *Repossessed vehicles:*

Vehicles repossessed from delinquent financing customers and held for auction are recorded at the lower of the unpaid principal balance and estimated realizable value. Gains or losses on disposal are recorded when the vehicles are sold.

w. *New accounting pronouncements:*

In September 2007, IASB issued revised IAS 1, *Presentation of Financial Statements* which is applicable for annual periods beginning on or after January 1, 2009. This standard replaced IAS 1 revised in 2003. The revised standard aims to improve users' ability to analyze and compare information given in the financial statements. The adoption of the revised standard will have no effect on the reported results. It will, however, result in changes in the presentation of financial statements.

In January 2008, IASB issued revised IFRS 3, *Business Combinations* which is applicable to business combinations for which the acquisition date is on or after the first annual reporting period beginning on or after July 1, 2009. This standard replaced IFRS 3 issued in 2004. The main changes are:

Acquisition-related costs are recognized as expenses in the statement of operations in the period in which these are incurred.

F-18

Table of Contents

In business combinations achieved in stages, any previously held equity interest in the acquiree is re measured to its acquisition date fair value and the resulting gain or loss is recognized in the statement of operations.

Any change in contingent consideration classified as a liability at the acquisition date is recognized in the statement of operations.

Non-controlling interests in the entity acquired may be measured either at fair value, or at the proportionate share of the acquiree's net identifiable assets.

The Company is evaluating the impact of adoption of this Standard.

In January 2008, IASB amended IAS 27 *Consolidated and Separate Financial Statements* which is applicable for annual periods beginning on or after July 1, 2009. The main changes are:

Changes in the ownership interest in a subsidiary that do not result in the loss of control are accounted for as equity transactions, not affecting the statement of operations.

At the date control is lost, any retained equity interests are remeasured to fair value.

Total comprehensive income is allocated to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

The Company is evaluating the impact of adoption of the amendments.

In November 2006, IASB issued IFRS 8 *Operating Segments* which is applicable for annual periods beginning on or after January 1, 2009. This standard replaced IAS 14 *Segment Reporting*. This standard specifies how an entity should disclose information about its segments, which enables users to evaluate the nature and financial effects of its business activities and the economic environments in which it operates. The Company is evaluating the application of this Standard.

IFRIC 13 *Customer Loyalty Programmes* was issued in June 2007 which is applicable for annual periods beginning on or after July 1, 2008. IFRIC 13 addresses how companies that grant their customers loyalty award credits (often called "points") when buying goods or services should account for their obligation to provide free or discounted goods and services, if and when the customers redeem the points. IFRIC 13 requires an entity to allocate some of the proceeds of the initial sale to the award credits and recognize these proceeds as revenue when they have fulfilled their obligations to provide goods or services. The Company is evaluating the application of this Interpretation.

IFRIC 16, *Hedges of a Net Investment in a Foreign Operation*, was issued in July, 2008, which is applicable for annual periods beginning on or after October 1, 2008. IFRIC 16 applies to an entity that hedges the foreign currency risk arising from its net investments in foreign operations and wishes to qualify for hedge accounting in accordance with IAS 39. The Company is evaluating the application of this Interpretation.

IAS 23, *Borrowing Costs* removes the option to expense borrowing costs and requires that an entity capitalize borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. The revised IAS 23 will become mandatory for the Company's consolidated financial statements for the year ended March 31, 2010. As the Company currently follows a policy of capitalizing borrowing costs, this new standard will not have any material impact on the Company's consolidated financial statements.

In May 2008 and April 2009, the IASB issued *Improvements to IFRS* a collection of amendments to certain International Financial Reporting Standards as part of its program of annual improvements to its standards, which is intended to make necessary, but non-urgent, amendments to standards that will not be included as part of another major project. The amendments resulting from these improvements mainly have effective dates for annual periods beginning on or after January 1, 2009, although entities are permitted to adopt them earlier. The Company is evaluating the application of improvements.

x. Convenience translation

The consolidated financial statements have been expressed in Indian rupees (Rs.), Tata Motors functional currency. For the convenience of the reader, the financial statements as at and for the year ended March 31, 2009 have been translated into U.S. dollars at US\$1.00 = Rs. 50.72 based on fixing rate in the City of Mumbai on March 31, 2009 for cable transfers in Indian rupees as published by the FEDAI.

Such translation should not be construed as representation that the rupee amounts have been or could be converted into U.S. dollars at that or any other rate, or at all.

Table of Contents

3. Transition to IFRS

The Company's consolidated financial statements for the year ended March 31, 2009 are the first annual financial statements to comply with IFRS. In preparing these financial statements, the Company has applied following exemptions and exceptions in accordance with IFRS 1.

I. Exemptions from retrospective application

a Business combinations

Business combinations prior to April 1, 2007 have been accounted in accordance with Indian GAAP. Goodwill arising from business combination has been stated at the carrying amount under Previous GAAP. Intangible assets which were subsumed in goodwill under Previous GAAP, have not been recognized in the opening statement of financial position as at April 1, 2007, since these did not qualify for recognition in the separate statement of financial position of the acquired entities.

b Employee benefits

The Company has applied the exemption as provided in IFRS 1 relating to application of recognizing cumulative actuarial gains and losses on defined benefit pension plans and other post retirement benefits in reserves as of the transition date.

II. Exceptions from full retrospective application

a Derecognition of financial assets and liabilities exception

Financial assets and liabilities derecognized before January 1, 2004 are not re-recognized under IFRS. The Company has chosen not to apply the IAS 39 derecognition criteria to an earlier date.

b Estimates exception

Upon an assessment of the estimates made under Previous GAAP, the Company has concluded that there was no necessity to revise such estimates under IFRS, except where estimates were required by IFRS and not required by Previous GAAP.

Table of Contents**4. Reconciliations between Indian GAAP and IFRS****i) Equity reconciliation**

	As of March 31, 2008		As of April 1, 2007	
			(In millions)	
	Rs.	86,975.2	Rs.	77,216.7
Equity under Indian GAAP				
(a) Consolidation of subsidiaries and equity accounted investees		(1,861.6)		(1,925.5)
(b) Property, plant and equipment				
Foreign exchange (net of depreciation)	(219.7)		(351.4)	
Pre-operative expenses (net of depreciation)	(553.2)		(446.1)	
Interest capitalized (net of depreciation)	684.7	(88.2)	301.2	(496.3)

(i) Dividends		6,596.8		6,763.2
(j) Foreign currency translation adjustment		52.0		456.5
(k) Others, (net)		(365.0)		592.2
(l) Minority interest		6,352.0		4,374.8
Equity under IFRS		Rs. 124,316.5		Rs. 101,251.0

ii) Net Income

	For the year ended March 31, 2008	
	(In millions)	
	Rs.	21,677.0
Net income under Indian GAAP		
(a) Consolidation of subsidiaries and equity accounted investees		324.0
(b) Property, plant and equipment		
Foreign exchange (net of depreciation)		131.7
Pre-operative expenses (net of depreciation)		(107.1)
Interest capitalized (net of depreciation)		383.5
		408.1
(c) Employee separation cost		40.6
(d) Interest including debt issue expenses		(1,941.7)
(e) Foreign currency convertible notes conversion option		3,155.5
(f) Deferred taxes		(857.8)
(g) Transfer of finance receivables		336.2
(h) Others, (net)		61.1
Net income under IFRS		Rs. 23,203.0

iii) Notes to reconciliations between Indian GAAP to IFRS

a. Consolidation of subsidiaries and equity accounted investees

While both IFRS and Indian GAAP require consolidation of subsidiaries, the basis for determining whether an investee is a subsidiary is different. IFRS requires the consolidation of entities where the Company has control over another entity. Control is presumed to exist when the parent owns, directly or indirectly through subsidiaries, more than one half of an entity's voting power. The existence and effect of potential voting rights is also taken into consideration for the purpose of determining control. Indian GAAP requires the consolidation of entities where the Company exercises

Table of Contents

control through a direct holding or through another subsidiary of more than one half of the voting power so as to obtain economic benefit from its activities. These differences have resulted into consolidation of three entities (Hispano Carrocera S.A. , Tata Autocomp Systems Ltd and Tata Precision Industries Pte. Ltd.) as subsidiaries in IFRS, which were considered to be Equity method investees under Indian GAAP.

b. Property, plant and equipment

Under IFRS, all foreign exchange transaction gains and losses are included in net income except to the extent these are treated as an adjustment to interest cost and considered for capitalization. Under Indian GAAP, foreign exchange gains and losses arising on foreign currency denominated borrowings that are incurred to acquire property, plant and equipment are included in the cost of the asset and depreciated over their remaining useful life.

Further under Indian GAAP, the cost of property, plant and equipment also includes indirectly attributable expenses that are incurred before a property, plant and equipment is ready for its intended use. Under IFRS, such costs are expensed as incurred.

Under IFRS, interest costs are higher than under Indian GAAP resulting into higher interest capitalization (refer to note (d) and (e) below).

Consequently, depreciation relating to the above differences in the cost of property, plant and equipment under IFRS and Indian GAAP has also been adjusted.

c. Employee separation cost

Under IFRS, expenses relating to voluntary employee separation programs are expensed when the Company is demonstrably committed to provide termination benefits as a result of an offer made in order to encourage voluntary redundancy. Under Indian GAAP, such costs are deferred and amortized.

d. Interest including debt issue expenses

Under IFRS, redemption premium and debt issue expenses are recognized as interest cost over the life of the debt instrument / borrowing using the effective interest method. Further interest costs under IFRS are higher because of accounting for conversion option embedded in foreign currency convertible notes (refer to note (e) below).

Under Indian GAAP, entire redemption premium associated with the notes is charged directly to additional paid-in capital and issue expenses are either charged directly to the additional paid-in capital and/or are deferred and amortized over the life of the notes. Further, there is no requirement under Indian GAAP to account for conversion option separately.

e. Foreign currency convertible notes

Under IFRS, conversion option embedded in foreign currency convertible notes is accounted for separately as derivative instrument. At the inception, issue proceeds from notes are allocated to conversion option with residual allocated to the notes to establish its initial carrying cost. Subsequently the conversion option is measured at fair value through profit or loss with changes in fair value recognized in the statement of operations and the notes are carried at amortized cost. Under Indian GAAP conversion option is not separately accounted for and full proceeds are allocated to the notes. This results into following differences between IFRS and Indian GAAP in addition to fair value movements of conversion option recorded in the statement of operations under IFRS:

- i) Higher interest costs under IFRS as described above (refer to note (d)); and
- ii) Higher interest capitalization as described above (refer to note (b)).

Table of Contents

f. Deferred taxes

Under IFRS, deferred taxes are recognized for future tax consequences of temporary differences between the carrying value of assets and liabilities and their respective tax bases. Under Indian GAAP, deferred taxes are recognized for the tax effect of timing differences between book and tax income for the year. Additionally, no deferred taxes are recorded for consolidation adjustments under Indian GAAP.

Deferred taxes have been recorded under IFRS for undistributed earnings of subsidiaries and associates, consolidation adjustments and certain other temporary differences, which were not recorded under Indian GAAP.

Further, in the IFRS financial statements, consequential tax effect of other IFRS to Indian GAAP differences are recognized.

g. Transfer of finance receivable

The Company transfers finance receivables in securitization transactions / direct assignments. In such transactions the Company surrenders control over the receivables though continues to act as an agent for the collection of receivables. In most of the transactions, the Company also provides credit enhancements to the transferee.

Consequent to existence of credit enhancements in such transactions, the Company continues to have the obligation to pay to the transferee, limited to the extent of credit enhancement, even if it does not collect the equivalent amounts from the original asset and continues to retain substantially all risks and rewards associated with the receivables, and hence under IFRS such transfer /assignments do not meet the derecognition criteria resulting into the transfer not being recorded as sale. Consequently, the proceeds received from the transfer are recorded as collateralized debt obligation.

Under Indian GAAP, the de-recognition criteria are different and are based on surrender of control. The Company meets the criteria under Indian GAAP for de-recognition and accordingly records such transfers as sale.

h. Investments

Under IFRS, available-for-sale investments consisting of debt securities and equity securities are measured at fair value at each reporting date except for investment in equity instruments which do not have quoted market price in an active market and whose fair value cannot be reliably measured. Unrealized gains or losses (net of tax) are recognized directly in statement of recognized income and expense.

Under Indian GAAP, investments are classified into current and long-term investments. Current investments are carried at the lower of cost or market value, while long-term investments are carried at cost less any impairment that is other than temporary.

i. Dividends

Under IFRS, dividends payable are recorded as a liability in the year in which these are declared and approved. Under Indian GAAP, dividends payable are recorded as a liability in the year to which they relate.

j. Foreign currency translation adjustment

These are consequential translation adjustments on Indian GAAP to IFRS adjustments.

Table of Contents***l. Minority interest***

Under IFRS, minority interest is presented as part of equity. Under Indian GAAP minority interest is presented outside equity.

iv) Explanation of material adjustments to cash flow statement for the year ended March 31, 2008

Under Previous GAAP, restricted cash of Rs 27,300.7 million and Rs 4,047.5 million as of March 31, 2008 and March 31, 2007 respectively, was considered as cash and cash equivalents. Under IFRS, these have been reclassified as investing cash flows.

The Company transfers finance receivables in securitization transaction /direct assignments. Most of these transactions do not meet derecognition criteria under IFRS. Consequently, proceeds received from these transactions are recorded as collateralized debt obligation and the finance receivables continue to be recognized in the financial statements. Under Indian GAAP, such transactions meet the derecognition criteria and accordingly, recorded as sale. As a result, the cash flows from operating activities under IFRS are lower by Rs 41,649.9 million and cash flows from financing activities are higher by Rs 41,649.9 million.

Under Indian GAAP, there are certain financial assets and financial liabilities permitted to be offset. Under IFRS, these financial assets and financial liabilities do not meet the criteria to offset and hence, presented gross in the balance sheet. As a result, the cash flows from operating activities under IFRS are lower by Rs 5,242.5 million and cash flows from financing activities are higher to the same extent.

4.1 Reconciliations between U.S.GAAP and Indian GAAP***i) Equity reconciliation***

Particulars	As of March 31,		As of April 1,	
	2008	2008	2007	2007
	(In millions)			
Equity under U.S.GAAP		Rs.105,264.1		Rs.91,368.9

(j) Foreign currency translation adjustment		(166.8)		(475.0)
(k) Others, (net)		(219.8)		(128.7)
Equity under Indian GAAP		Rs. 86,975.2		Rs.77,216.7

Table of Contents**ii) Net income**

	For the year ended March 31, 2008	
	(In millions)	
Net income under U.S. GAAP	Rs.14,205.9	
(a) Consolidation of subsidiaries, equity accounted investees and accounting for business combinations	778.6	
(b) Property, plant and equipment		
Foreign exchange (net of depreciation)	(131.7)	
Pre-operative expenses (net of depreciation)	107.1	
Interest capitalized (net of depreciation)	(117.8)	(142.4)
(c) Product development cost		8,451.0
(d) Employee separation cost		(40.6)
(e) Compensated absences		435.0
(f) Interest including debt issue expenses		1,161.7
(g) Deferred taxes		(2,633.6)
(h) Others, (net)		(538.6)
Net income under Indian GAAP	Rs.21,677.0	

iii) Notes to reconciliations between U.S. GAAP to Indian GAAP:**a. Consolidation of subsidiaries and equity accounted investees and accounting for business combinations**

While both U.S. GAAP and Indian GAAP require consolidation of subsidiaries, the basis for determining whether an investee is a subsidiary or an equity accounted investee is different. U.S. GAAP requires the consolidation of entities where there is a direct or indirect majority voting interest or if the company is a primary beneficiary in a variable interest entity. Indian GAAP requires the consolidation of entities where the Company exercises control through a direct holding or through another subsidiary. These differences have resulted into consolidation of three entities (Hispano Carrocera S.A. , Tata Autocomp Systems Ltd and Tata Precision Industries Pte. Ltd.) as subsidiaries in U.S. GAAP which were considered to be Equity method investees under Indian GAAP.

Further as per U.S. GAAP, business combinations are accounted for using the purchase method, and the net assets acquired are recorded at fair values. Purchase consideration paid in excess of the fair value of net assets acquired is recognized as goodwill. The excess of fair value over the purchase consideration is first allocated to reduce the amounts otherwise assigned to the eligible acquired long-term assets, and any excess remaining is recognized as an extraordinary gain in the income statement in the period in which the business combination is consummated. Under Indian GAAP business combination are recorded at cost. Purchase consideration paid in excess of the cost of net assets acquired is recognized as goodwill. The excess of cost of net assets over the purchase consideration is recognized as capital reserve under equity.

b. Property, plant and equipment

Under U.S. GAAP, all foreign exchange transaction gains and losses are included in net income. Under Indian GAAP, foreign exchange gains and losses arising on foreign currency denominated borrowings that are incurred to acquire property, plant and equipment are included in the cost of the asset and depreciated over their remaining useful life.

In addition, under Indian GAAP, the cost of property, plant and equipment also includes indirectly attributable expenses that are incurred before a property, plant and equipment is ready for its intended use. Under U.S. GAAP, such costs are expensed as incurred.

Under U. S. GAAP, interest costs are higher than under Indian GAAP resulting into higher interest capitalization (refer to note (f) below).

Table of Contents

Consequently, depreciation relating to the above differences in the cost of property, plant and equipment between U.S. GAAP and Indian GAAP have also been adjusted.

c. Product development costs

Under U.S. GAAP, expenses relating to the product development cost are expensed when incurred. Under Indian GAAP, product development costs that meet certain specified criteria are recognized as intangible assets.

d. Employee separation cost

Under U.S. GAAP, expenses relating to voluntary employee separation programs are expensed when incurred. Under Indian GAAP, such costs are deferred and amortized.

e. Compensated absences

Under U.S. GAAP, a liability for compensated absences is established based on leave earned but not utilized at each balance sheet date, and changes in the liability are included in net income. Under Indian GAAP, a liability is established for the actuarially determined present value of the amount of long-term leave.

f. Interest including debt issue expenses

Under U.S. GAAP, redemption premium and debt issue expenses are recognized as interest cost over the life of the debt instrument / borrowing, using the effective interest method.

Under Indian GAAP, entire redemption premium associated with the notes is charged directly to additional paid-in capital and issue expenses are either charged directly to the additional paid-in capital and/or are deferred and amortized over the life of the notes.

g. Deferred tax

Under U.S. GAAP, deferred taxes are recognized for future tax consequences of temporary differences between the carrying value of assets and liabilities and their respective tax bases. The tax rate used to establish deferred tax assets and liabilities is the enacted tax rate expected to apply when the temporary differences reverse. Under Indian GAAP, deferred taxes are recognized for the tax effect of timing differences between book and tax income for the year at the substantively enacted tax rate applicable on the balance sheet date. Additionally, deferred taxes are not recorded for consolidation adjustments under Indian GAAP.

Deferred taxes have been recorded under U.S. GAAP for undistributed earnings of subsidiaries and associates, consolidation adjustments and certain other temporary differences which were not recorded under Indian GAAP.

In U.S. GAAP financial statements, the consequent deferred tax effect of other U.S. GAAP to Indian GAAP differences is recognized.

h. Investments

Under U.S. GAAP, investments are classified into trading or held to maturity or available-for-sale categories, based on nature and management's holding intent on the date of acquisition. The Company does not have any trading investments. Available-for-sale, consisting of debt securities and equity securities with readily determinable market values are carried at their fair values with the unrealized gains or losses recorded in other component of equity. Held-to-maturity investments are carried at amortized cost. Equity securities without a readily determinable market value are carried at cost. An impairment loss is recognized for any impairment that is other than temporary.

Table of Contents

Under Indian GAAP, investments are classified into current and long-term investments. Current investments are carried at the lower of cost or market value, while long-term investments are carried at cost less any impairment that is other than temporary.

i. Dividends

Under U.S. GAAP, dividends payable are recorded as a liability in the year in which these are declared and approved. Under Indian GAAP, upon declaration dividends payable are recorded as a liability in the year to which they relate.

j. Foreign currency translation adjustment

These are consequential translation adjustments on Indian GAAP to U.S. GAAP adjustments.

iv) Explanation of material adjustments to cash flow statement for the year ended March 31, 2008 Indian GAAP to U.S. GAAP

Under Indian GAAP, restricted cash of Rs 27,300.7 million and Rs 4,047.5 million as at March 31, 2008 and March, 31 2007 was considered as cash and cash equivalents. Under U.S. GAAP, these have been reclassified as cash flows from investing activities.

Under U.S. GAAP, all expenses relating to product development are expensed when incurred. Under Indian GAAP, the product development costs are capitalised as intangible assets. Consequently cash flows from operating activities under U.S. GAAP were lower by Rs 9,143.2 million and cash flows from investing activities were higher to the same extent.

Under Indian GAAP, interest paid was shown as part of cash flows from financing activities, whereas under U.S. GAAP, these were considered as cash flows from operating activities. As a result, cash flows from operating activities under U.S. GAAP were lower by Rs 10,947.9 million and cash flows from financing activities were higher to the same extent.

Under Indian GAAP, there are certain financial assets and financial liabilities permitted to be offset. Under U.S. GAAP, these financial assets and financial liabilities do not meet the criteria for offset and hence, presented gross in the balance sheet. As a result, the cash flows from operating activities under U.S. GAAP were lower by Rs 5,242.5 million and cash flows from financing activities were higher to the same extent.

5. Cash and cash equivalents

Cash and cash equivalents consist of the following:

	2009	As of March 31, 2009 (In millions)	2008
Cash balances	US\$ 7.5	Rs. 379.0	Rs. 52.0
Balances with banks	442.6	22,448.2	11,363.8
Total	US\$ 450.1	Rs. 22,827.2	Rs. 11,415.8

Table of Contents**6. Finance receivables**

Finance receivables primarily consist of loans, the details of which are as follows:

	2009	As of March 31, 2009 (In millions)	2008
Total loan installments to be received	US\$ 3,853.4	Rs. 195,445.2	Rs. 196,639.6
Less: unearned interest income	576.2	29,227.2	29,892.1
	3,277.2	166,218.0	166,747.5
Less: allowance for credit losses	146.2	7,415.2	2,788.0
Total	US\$ 3,131.0	Rs. 158,802.8	Rs. 163,959.5
Current portion	1,380.7	70,027.9	65,863.5
Non-current portion	1,750.3	88,774.9	98,096.0
Total	US\$ 3,131.0	Rs. 158,802.8	Rs. 163,959.5

Changes in the allowance for credit losses in finance receivables are as follows:

	2009	As of March 31, 2009 (In millions)	2008
Beginning balance	US\$ 55.0	Rs. 2,788.0	Rs. 1,809.4
Allowances made during the year	141.0	7,153.2	4,343.4
Written off	(49.8)	(2,526.0)	(3,364.8)
Ending balance	US\$ 146.2	Rs. 7,415.2	Rs. 2,788.0

7. Allowances for trade and other receivables

Changes in the allowances for trade and other receivables are as follows:

	2009	As of March 31, 2009 (In millions)	2008
Beginning balance	US\$ 38.2	Rs. 1,937.0	Rs. 1,712.6
Acquisition/sale of subsidiary (net)	14.1	713.3	
Allowance made during the year	27.0	1,371.9	1,610.1
Written off	(22.4)	(1,135.2)	(1,372.4)
Foreign exchange translation differences	(1.7)	(88.2)	(13.3)
Ending balance	US\$ 55.2	Rs. 2,798.8	Rs. 1,937.0

8. Investments

Investments consist of the following:

	2009	As of March 31, 2009 (In millions)	2008
Available-for-sale, at fair value	US\$ 126.6	Rs. 6,418.8	Rs. 37,447.7
Unquoted equity investments, at cost	46.8	2,376.0	2,695.0
Loans and receivables	9.2	469.9	516.6
Total	US\$ 182.6	Rs 9,264.7	Rs. 40,659.3

F-28

Table of Contents

Available-for-sale, financial assets are as follows:

	2009	As of March 31, 2009 (In millions)	2008
Quoted equity shares	US\$ 108.4	Rs. 5,501.6	Rs. 27,273.9
Mutual funds	15.1	765.5	9,672.9
Corporate bonds and other debt instruments	3.1	151.7	500.9
Total	US\$ 126.6	Rs. 6,418.8	Rs. 37,447.7

The contractual maturity of the Company's available-for-sale corporate bonds and other debt instruments as of March 31, 2009 is as follows:

	Amortized Cost (In millions)	Fair value
Due in year ending March 31,		
2010	Rs. 10.1	Rs. 13.3
2011	11.8	21.0
2012	13.8	26.5
2013	15.8	22.4
2014	18.4	18.9
Thereafter	62.1	49.6
	Rs. 132.0	Rs. 151.7
	US\$ 2.6	US\$ 3.1

The contractual maturity of the Company's loans and receivables as of March 31, 2009 is as follows:

	In millions
Due in year ending March 31,	
2010	Rs. 67.3
2011	237.5
2012	7.5
2013	157.6
	Rs. 469.9
	US\$ 9.2

The current and non-current classification of investments are as follows:

	2009	As of March 31, 2009 (In millions)	2008
Current investments	US\$ 16.4	Rs. 834.1	Rs. 730.7
Non-current investments	166.2	8,430.6	39,928.6

Total	US\$ 182.6	Rs. 9,264.7	Rs. 40,659.3
--------------	-------------------	--------------------	---------------------

Unrealized gains of Rs. 8,011.5 million and Rs. 17.0 million were reclassified from equity to statement of operations on sale of available for sale securities for the years ended March 31, 2009 and 2008 respectively.

The fair value of the unquoted equity investments cannot be reliably measured as the variability in the range of fair value estimates is significant and the probabilities of the various estimates cannot be reasonably assessed.

Table of Contents**9. Other financial assets-current**

Other financial assets consist of the following:

	2009	As of March 31, 2009 (In millions)	2008
Derivative financial instruments	US\$ 2.7	Rs. 137.6	Rs. 204.0
Advances and other receivables recoverable in cash	24.0	1,215.5	2,864.7
Inter corporate deposits	56.5	2,864.9	633.0
Margin money (see note 12)	16.5	838.2	1,151.0
Others	55.9	2,833.4	278.6
Total	US\$ 155.6	Rs. 7,889.6	Rs. 5,131.3

Others as of March 31, 2009 and March 31, 2008 include Rs. 2,447.9 million and Rs. Nil due from Ford Motor Company, in respect of national sales companies, which are being transferred, to the Company.

10. Inventories

Inventories consist of the following:

	2009	As of March 31, 2009 (In millions)	2008
Raw materials and consumables	US\$ 390.7	Rs. 19,815.9	Rs. 16,378.3
Work-in-progress	222.1	11,261.1	4,031.5
Finished goods	1,515.7	76,878.7	13,926.7
Total	US\$ 2,128.5	Rs. 107,955.7	Rs. 34,336.5

Inventories of finished goods include Rs. 7,301.2 million and Rs. Nil as of March 31, 2009 and March 31, 2008, respectively relating to vehicles sold to rental car companies, fleet customers and others with guaranteed repurchase options.

During the years ended March 31, 2009 and March 31, 2008, the Company recorded inventory write-down of Rs. 4,923.2 million and Rs. 438.4 million respectively.

11. Other current assets

Other current assets consist of the following:

	2009	As of March 31, 2009 (In millions)	2008
Advances to suppliers, contractors and others	US\$ 39.6	Rs. 2,004.4	Rs. 1,492.1
Statutory deposits	235.7	11,952.8	3,640.4
Prepaid expenses	103.4	5,244.2	1,544.8
Others	167.7	8,512.1	4,394.4

Total	US\$ 546.4	Rs. 27,713.5	Rs. 11,071.7
--------------	-------------------	---------------------	---------------------

Others as of March 31, 2008 include Rs.1,380.6 million of debt issue costs incurred for arranging a financing facility for the acquisition of Jaguar Land Rover businesses, being amortized over the tenor of the loan.

F-30

Table of Contents**12. Other financial assets-non-current**

Restricted deposits with banks

The unutilized proceeds from issuance of Zero Coupon Convertible Alternative Reference Securities due 2012 (CARS) of Rs.11,224.0 million as of March 31,2008 have been classified as non-current since these were held for the acquisition of Jaguar Land Rover businesses.

Other financial assets-non-current consist of the following:

	2009	As of March 31, 2009 (In millions)	2008
Margin money	US\$ 358.8	Rs. 18,198.4	Rs. 14,847.5
Loans to employees	16.7	849.1	943.2
Others	36.6	1,853.3	2,044.3
Total	US\$ 412.1	Rs. 20,900.8	Rs. 17,835.0

Margin money with banks is restricted cash, and consists of collateral provided in exchange of guarantees issued by banks for transfer of finance receivables.

13. Property, plant and equipment

	Land and buildings	Plant and equipment	Vehicles	Computers	Furniture and fixtures	Total
	(In millions)

Total						Rs. 220,854.2
						US\$ 4,354.4
Depreciation for the year	Rs. (1,247.4)	Rs. (19,905.4)	Rs. (247.1)	Rs. (1,140.1)	Rs. (268.8)	Rs. (22,808.8)

Notes:

- Net carrying amounts of property, plant and equipment under lease arrangements were as follows:

	2009	As of March 31, 2009 (In millions)	2008
Buildings	US\$ 7.9	Rs. 402.2	Rs. 344.2
Plant and equipment	51.6	2,619.1	232.1
Computers	6.7	340.3	263.1
Furniture and fixtures	0.3	12.9	11.0
Total	US\$ 66.5	Rs. 3,374.5	Rs. 850.4

- Land and building includes freehold land of Rs. 9,841.4 million and Rs.3,355.8 million as of March 31, 2009 and March 31, 2008 respectively.
- Property, plant and equipment with a carrying amount of Rs. 18,627.6 million and Rs 5,903.5 million as of March 31, 2009 and March 31, 2008, respectively are pledged as collateral against borrowings.
- Property, plant and equipment as of March 31, 2009 includes building under construction of Rs 3,620 million for the purposes of manufacturing automobiles. Consequent to the decision to relocate and construct a similar manufacturing facility at another location, the management is in the process of evaluating several options, under all of which, no adjustment to the carrying amount of the

building is considered necessary based on the information available at the balance sheet date.

Table of Contents**14. Leases**

The Company has taken land and buildings, plant and equipment, computers, furniture and fixtures and vehicles under operating and finance leases. The following is a summary of future minimum lease rental payments under non-cancelable operating leases and finance leases entered into by the Company:

	As of March 31,					
	2009			2008		
	Operating	Finance	Present value of minimum lease payments	Operating	Finance	Present value of minimum lease payments
Minimum Lease Payments	Minimum Lease Payments	Minimum Lease Payments	Minimum Lease Payments	Minimum Lease Payments	Minimum Lease Payments	
Not later than one year	Rs. 668.2	Rs. 550.9	Rs. 534.1	Rs. 280.4	Rs. 110.8	Rs. 95.3
Later than one year but not later than five years	1,218.6	1,715.9	1,474.3	789.9	224.4	206.2
Later than five years	8,980.2	919.3	664.1	8,692.6		
Total minimum lease commitments	Rs. 10,867.0	Rs. 3,186.1	Rs. 2,672.5	Rs. 9,762.9	Rs. 335.2	Rs. 301.5
	US\$ 214.3	US\$ 62.8	US\$ 52.7			
Less: future finance charges		(513.6)			(33.7)	
Present value of minimum lease payments		Rs. 2,672.5	Rs. 2,672.5		Rs. 301.5	Rs. 301.5
Included in the financial statements as:						
Other current financial liabilities (included as others)			Rs. 534.1			Rs. 95.3
Other non-current financial liabilities:			2,138.4			206.2
			Rs. 2,672.5			Rs. 301.5

Total operating lease rental expense was Rs. 1,167.5 million and Rs.293.2 million in the years ended March 31, 2009 and March 31, 2008 respectively.

Significant leasing arrangements include lease of land under operating lease for a period of 90 years with a renewal option for a further period of 90 years.

Table of Contents**15. Goodwill**

	2009	As of March 31, 2009 (In millions)	2008
Balance at the beginning	US\$ 79.4	Rs. 4,029.6	Rs. 4,407.6
Goodwill arising on business combination	28.4	1,440.3	
Write off of goodwill	(0.3)	(17.0)	
On sale of subsidiary	(0.2)	(13.0)	(106.5)
Currency translation differences	(1.8)	(89.1)	(271.5)
Balance at the end	US\$ 105.5	Rs 5,350.8	Rs. 4,029.6

As of March 31, 2009, goodwill of Rs. 180.7 million and Rs. 5,170.1 million relates to the automotive and related activity segment and other segment respectively. As of March 31, 2008 goodwill of Rs. 154.7 million and Rs. 3,874.9 million relates to the automotive segment and other segment respectively.

The Company tests annually whether goodwill suffered any impairment. As of March 31, 2009, goodwill has been allocated to the following cash generating units: a) Software consultancy and services Rs 3,678.2 million and b) construction equipment Rs 1,485.4 million.

The recoverable amount of the cash generating units has been determined based on value in use. Value in use has been determined based on future cash flows after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions and availability of necessary technology and network infrastructure.

As of March 31, 2009, the estimated cash flows for a period of 5 years were developed using internal forecasts, and a pre-tax discount rate of 14.08% and 9% for software consultancy and services, and construction equipment division respectively. The cash flows beyond 5 years have been extrapolated assuming zero growth rates. The management believes that any possible change in the key assumptions would not cause the carrying amounts to exceed the recoverable amounts of the cash generating units.

16. Intangible assets

Intangible assets consist of the following:

	Software	Patents and technological know how	Intellectual property rights and other intangibles (In millions)	Product development	Total
Cost as of April 1,2007	Rs. 1,686.4	Rs. 430.3	Rs. 15.8	Rs. 2,356.6	Rs. 4,489.1

Total							Rs. 124,370.3
							US\$ 2,452.1
Amortization for the year	Rs. (678.5)	Rs. (998.5)	Rs. (2,351.0)	Rs. (193.2)	Rs. (1,009.8)	Rs.	Rs. (5,231.0)

Notes:

- 1) The useful life of trade marks and brands in respect of the acquired Jaguar Land Rover businesses have been determined to be indefinite as the Company expects to generate future economic benefits indefinitely from these assets.

The indefinite life intangible assets have been allocated to the Jaguar Land Rover businesses. The recoverable amount of the cash generating units has been determined based on value in use. Value in use has been based on future cash flows after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions.

The estimated cash flows for a period of five years were developed using internal forecasts, and a pre-tax discount rate of 9.3%. The cash flows beyond five years have been extrapolated assuming zero growth rate. The management believes that any possible change in the key assumptions would not cause the carrying amounts to exceed the recoverable amounts of the cash generating units.

- 2) In -process development project of Rs. 1,903.2 million was acquired on business combination (refer note 37(a)).

- 3) The weighted average remaining useful lives of product development cost, patents and technological know how and customer related intangibles as of March 31, 2009 are approximately 91 months ,113 months and 230 months respectively.

F-35

Table of Contents**17. Investments in equity accounted investees:**

Summarized financial information in respect of the Company's associates is as follows:

	2009	As of March 31, 2009 (In millions)	2008
Total assets	US\$ 386.0	Rs. 19,579.6	Rs. 9,736.4
Total liabilities	279.5	14,177.9	4,240.2
Carrying amount of investment in associates	US\$ 60.1	Rs. 3,048.3	Rs. 2,920.2

	2009	Years ended March 31, 2009 (In millions)	2008
Total revenue	US\$ 496.8	Rs. 25,196.6	Rs. 19,684.5
Total profits/(loss) for the period	(10.6)	(540.1)	1,403.4
Company's share in profit/ (loss)	US\$ (1.7)	Rs. (88.4)	Rs. 653.8

During the year ended March 31, 2008, the Company acquired 27.79% equity shareholding of Automobile Corporation of Goa Ltd (ACGL), which is engaged in the business of bus body building, for a total cash consideration of Rs. 919.1 million. The Company's 27.79% share of the fair values of net assets of ACGL when acquired by the Company amounted to Rs. 499.1 million. With this acquisition, the Company's total ownership interest in ACGL is 37.79% as of March 31, 2008. The Company acquired additional equity shareholding and increased its ownership to 42.37% during the year ended March 31, 2009, for a total consideration of Rs. 68.8 million.

Fair value of investment in an equity accounted associate for which published price quotation is available was Rs. 364.4 million and Rs. 546.8 million as of March 31, 2009 and 2008, respectively.

Summarized financial information in respect of the Company's jointly controlled entities (adjusted for the percentage of the ownership held by the Company) is as follows:

	2009	As of March 31, 2009 (In millions)	2008
Current assets	US\$ 145.6	Rs. 7,384.2	Rs. 3,974.2
Non-current assets	318.1	16,134.2	10,296.6
Current liabilities	395.0	20,034.6	6,987.4
Non-current liabilities	2.8	141.3	2,159.8
Carrying amount of investment in jointly controlled entities	97.9	4,963.9	6,863.9

	2009	Years ended March 31, 2009 (In millions)	2008
Total revenue	US\$ 68.1	Rs. 3,451.5	Rs. 8,514.7
Company's share of profit/ (loss)	(66.6)	(3,375.6)	(601.7)

During the year ended March 31, 2008, the Company entered into a joint venture agreement with Fiat Group Automobiles SpA and acquired 49% share in the jointly controlled entity, Fiat India Automobiles Pvt. Ltd. (FIAPL) (now known as Fiat India Automobiles Limited (FIAL)), for a total consideration of Rs.4,420.9 million. The Company's 49% share of the fair value of net assets of the jointly controlled entity, when acquired by the Company amounted to Rs. 3,430.0 million. The Company increased its holding to 49.48% in FIAL in the year ended March 31, 2008 and to 50% in the year ended March 31, 2009.

Others	1.7	82.1	27.5
Net deferred income tax liability at the end	US\$ (69.8)	Rs. (3,543.7)	Rs. (10,466.3)

Deferred tax assets and liabilities are offset if they arise in the same legal entity and taxing jurisdiction but not otherwise.

Temporary differences, unused tax losses and tax credits for which no deferred tax asset is recognized amount to Rs 42,743.1 million as of March 31, 2009 .These relate primarily to business losses, capital allowances, which can be carried forward indefinitely. The deferred tax asset has not been recognized on the basis that its recovery is not sufficiently certain in the foreseeable future.

Tata Motors (on standalone basis, being its tax status) is liable to tax under Minimum Alternate Tax (MAT). Under the Indian Income tax laws, the tax paid under MAT provisions can be carried forward and set-off against future income tax liabilities computed under normal tax provisions within a period of ten years. Deferred tax assets as at March 31, 2009 of Rs 3,279 million towards depreciation and Rs 3,162.4 million towards business loss and Rs. 2,200.5 million towards credit for MAT paid has been recognized on the basis of estimated taxable income for future years and computation of tax liability.

Business loss carry forwards for which no deferred tax asset has been recognized expire unutilized based on the year of origination as follows:

March 31,	In millions	
	Rs.	US\$

Foreign currency convertible notes*Zero coupon foreign currency convertible notes (USD) due 2009*

On April 27, 2004, Tata Motors raised US\$ 100 million by way of Zero coupon convertible notes due for redemption on April 27, 2009. The note holders have an option to convert these notes into ordinary shares or ADSs determined at an initial conversion price of Rs. 573.106 per share (converted at fixed rate of exchange on conversion of Rs.43.85 per USD), from and including June 7, 2004 to and including March 28, 2009. The conversion price will be subject to certain adjustments. Further, Tata Motors has a right to redeem in whole, but not in part, these Notes at any time on or after April 27, 2005, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on April 27, 2009, at 95.111% of the principal amount.

7,183,773 ordinary shares were allotted during the period April 27, 2004 to March 31, 2007, consequent to conversion of 93,890 Notes with an aggregate value of Rs. 5,713.9 million.

During the year ended March 31, 2008, 130,069 ordinary shares were allotted consequent to conversion of 1700 notes with an aggregate value of Rs.78.4 million.

During the year ended March 31, 2009, 153,025 ordinary shares were allotted consequent to conversion of 2,000 Notes with an aggregate value, net of Rs. 0.1 million being stamp duty expenses on conversion, of Rs. 100 million (US\$ 1.7 million). Further, 2,410 Notes with an aggregate value of Rs. 148.6 million (US\$ 2.9 million) outstanding as at March 31, 2009 were redeemed on maturity.

1% Foreign Currency Convertible Notes (USD) due 2011

On April 27, 2004, Tata Motors also raised US\$ 300 million by way of 1% Convertible Notes due for redemption on April 27, 2011. The note holders have an option to convert these notes into ordinary shares / ADSs determined at an initial conversion price of Rs. 780.400 per share (converted at fixed rate of conversion of Rs. 43.85 per USD), from and including June 7, 2004 to and including March 28, 2011. The conversion price of the notes was reset to a price of Rs 737.29 per share at a fixed rate of conversion of Rs. 43.85 per USD, on account of our rights issue in fiscal 2009. The conversion price will be subject to certain adjustments. In the event of certain changes affecting taxation, Tata Motors has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on April 27, 2011 at 121.781% of the principal amount. There has been no conversion during the year ended March 31, 2009. Outstanding notes may at the option of the Note holders be converted into 17,842,482 ADSs or shares at any time up to March 28, 2011.

Zero coupon foreign currency convertible notes (JPY) due 2011

On March 20, 2006, Tata Motors issued Yen 11,760 million (Rs. 4,500.3 million) Zero Coupon Convertible Notes due for redemption on March 21, 2011. The note holders have an option to convert these Notes into ordinary shares or ADSs determined at an initial conversion price of Rs.1,001.39 per share (converted at fixed rate of exchange on conversion of Rs.1.00 per Yen 2.66), from and including May 2, 2006 to and including February 19, 2011. The conversion price of the notes was reset to a price of Rs 946.07 per share at a fixed rate of conversion of Rs. 1 per Yen 2.66, on account of our rights issue in fiscal 2009. The conversion price will be subject to certain adjustments. Further, Tata Motors

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

has a right to redeem in whole, or in part, these Notes at any time on or after March 20, 2009 but prior to February 8, 2011, subject to certain conditions. In the event of certain changes affecting taxation, Tata Motors has an option to redeem in whole but not in part, these Notes at any time. Unless previously converted, redeemed or purchased and cancelled, these Notes will be due for redemption on March 21, 2011, at 99.253% of the principal amount.

There has been no conversion till March 31, 2009. During the year ended March 31, 2009 the Company bought back and cancelled 30 notes (Principal value of JPY 300 million). Further 1146 outstanding notes may at the option of the Note holders be converted into 4,553,878 ADSs or shares at any time up to February 19, 2011.

F-43

Table of Contents*Zero coupon convertible alternative references securities (USD) due 2012(CARS)*

On July 12, 2007, Tata Motors raised funds aggregating US\$ 490 million (Rs. 19,927.1 million at issue) by issue of Zero Coupon Convertible Alternative Reference Securities (CARS) due on July 12, 2012. The note holders have an option, subject to the terms and conditions of the issue, to convert these notes into Qualified Securities or the Company's newly issued ordinary shares or ADSs. The conversion may be made by the note holders from and including October 11, 2011 to and including June 12, 2012 at an initial conversion price of Rs. 960.96 per share (equivalent to US\$23.67 at a fixed rate of exchange on conversion of Rs. 40.59 per US\$1.00) that is subject to adjustment in certain circumstances. The conversion price of the notes was reset to a price of Rs 907.87 per share at a fixed rate of conversion of Rs. 40.59 per USD, on account of our rights issue in fiscal 2009. The Company has a right to redeem in whole, but not in part, these notes at any time on or after October 11, 2011, subject to certain conditions. Unless previously converted, redeemed or purchased and cancelled as per the terms of issue, these will be redeemed on July 12, 2012 at 131.82% of the outstanding principal amount.

During the year ended March 31, 2009, the Company bought back and cancelled 170 notes (Principal value of US\$ 17 million).

The embedded conversion options are not closely related to the host debt contracts as the conversion options will be settled by delivery of fixed number of shares for fixed amounts of foreign currency which represents variable amount of cash in Indian Rupees, the Company's functional currency. The fair values of the call options is insignificant. Changes in the fair value of the conversion options is recognized in the statement of operations.

Table of Contents***Capital redemption reserve***

The Indian Companies Act, 1956 (the Companies Act) requires that where a company purchases its own shares not out of proceeds of a fresh issue but out of free reserves, then a sum equal to the nominal value of the shares so purchased shall be transferred to a capital redemption reserve account, which may be applied to issue fully paid bonus shares. The Company established this reserve pursuant to the redemption of preference shares issued in earlier years.

Debenture redemption reserve

The Companies Act requires that where a company issues debentures, it shall create a debenture redemption reserve from profits every year until such debentures are redeemed. Manufacturing companies are required to maintain a minimum proportion of the outstanding redeemable debentures as a reserve. The amounts credited to the debenture redemption reserve may not be utilized by the Company except to redeem debentures.

Special reserve

The special reserve represents the reserve created by two subsidiaries of Tata Motors pursuant to the Reserve Bank of India Act, 1934 (the RBI Act) and related regulations applicable to those companies. Under the RBI Act, a non-banking finance company is required to transfer an amount not less than 20 per cent of its net profit to a reserve fund before declaring any dividend. Appropriation from this reserve fund is permitted only for the purposes specified by the RBI.

Earned surplus reserve

Under the Korean commercial code Tata Daewoo Commercial Vehicle Company Limited (TDCV, a subsidiary company) is required to appropriate at least 10% of cash dividend declared each year to a legal reserve until such reserves equal to 50% of capital stock. This reserve may not be utilized for cash dividends, but may only be used to offset against future deficit, if any, or may be transferred to capital stock.

Reserve for research and human resource development

In terms of Article 9 of the Act on Special Taxation Restriction in Korea, Tata Daewoo Commercial Vehicle Company Limited (TDCV, a subsidiary company) is entitled for deferment of tax in respect of expenditure incurred on product development cost subject to fulfillment of certain conditions, by way of deduction from the taxable income, provided TDCV appropriates an equivalent amount from Retained Earnings to Reserve for Research and Human Resource Development .

The deferment is for a period of three years and from the fourth year onwards one-third of the reserve is offered to tax and an equal amount is then transferred from the reserve to Retained earnings available for appropriation .

29. Dividends

Final dividends on equity shares (including dividend tax of Rs 982.0 million and Rs. 982.5 million for the year ended March 31, 2009 and 2008 respectively on distribution of such dividends) are recorded as a liability on the date of their approval by the shareholders. The Company paid dividends including dividend tax thereon of Rs. 6,766.3 million and Rs. 6,763.2 million during the years ended March 31, 2009 and March 31, 2008, respectively. The dividend per share was Rs. 15 for both the years ended March 31, 2009 and March 31, 2008. In the Company's Board of Directors meeting held on May 29, 2009, the Board recommended a dividend in the aggregate amount of Rs. 3,645.7 including dividend tax of Rs. 529.6 million on the distribution of such dividends amounting to Rs 6 per share for Ordinary shares and Rs 6.5 per share for A Ordinary shares.

Table of Contents**30. Employee Cost**

Employee cost consists of the following:

	2009	Years ended March 31, 2009 (In millions)	2008
Salaries, wages and bonus	US\$ 1,316.0	Rs. 66,748.9	Rs. 24,141.0
Contribution to provident fund and other funds	51.5	2,611.3	2,200.9
Workmen and Staff welfare Expenses	115.1	5,839.5	2,421.7
Total	US\$ 1,482.6	Rs. 75,199.7	Rs. 28,763.6

31. Other Expenses

Other expenses consist of the following:

	2009	Years ended March 31, 2009 (In millions)	2008
Stores, spare parts and tools consumed	US\$ 157.4	Rs. 7,984.0	Rs. 5,547.1
Freight, transportation and port charges	475.7	24,129.1	10,472.4
Product development cost	68.5	3,474.2	661.6
Warranty and product liability expenses	470.5	23,862.0	3,256.7
Works operation and other expenses *	1,391.5	70,580.3	22,429.7
Repairs to building, plant and machinery	63.1	3,201.6	1,000.0
Processing charges	98.1	4,975.2	5,128.8
Power and fuel	136.0	6,898.1	4,077.7
Rent, rates and taxes	56.7	2,878.1	1,291.9
Insurance	29.1	1,476.6	579.7
Publicity	515.8	26,154.4	3,475.3
Total	US\$ 3,462.4	Rs. 175,613.6	Rs. 57,920.9

* Includes allowance pertaining to trade and other receivables including finance receivables of Rs.8,525.1 million and Rs 5,953.5 million for the years ended March 31, 2009 and March 31, 2008 respectively.

32. Interest expense (net)

Interest expense (net) consists of the following:

	2009	Years ended March 31, 2009 (In millions)	2008
Gross interest expense	US\$ 752.1	Rs. 38,147.1	Rs. 18,236.7
Less: Interest capitalized *	(77.4)	(3,924.8)	(1,773.2)
Total	US\$ 674.7	Rs. 34,222.3	Rs. 16,463.5

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

* Represents borrowings cost capitalized during the year on qualifying assets (property plant and equipment and product development cost). The rate for capitalization of interest relating to general borrowings was approximately 9.5% and 7% for the year ended March 31, 2009 and 2008 respectively.

F-49

Table of Contents**33. Other income**

	2009	Years ended March 31, 2009 (In millions)	2008
Miscellaneous income *	US\$ 93.1	Rs. 4,721.3	Rs. 1,449.4
Gain on sale of equity interest in subsidiaries and associates (net)	27.1	1,374.7	1,436.7
Dividends and income on mutual funds	15.4	783.6	1,218.0
Gain on sale of investments	119.5	6,058.0	175.0
Change in fair value of conversion options	55.3	2,806.5	3,155.5
Gain/(loss) on sale of assets and others	(0.9)	(44.6)	243.4
Total	US\$ 309.5	Rs. 15,699.5	Rs. 7,678.0

* Includes gain on buyback of foreign currency convertible notes of Rs.493.9 million and Rs Nil for the year ended March 31, 2009 and 2008 respectively.

34. Gain on sale of equity interests in subsidiary

During the year ended March 31, 2009, Tata Motors sold a part of its equity interest in its subsidiary Tata AutoComp Systems Ltd (TACO) to a related party for a cash consideration of Rs. 1,610.2 million. A gain of Rs.1,404.7 million has been recorded on this transaction. Subsequent to this TACO is an associate of Tata Motors.

During the year ended March 31, 2008, Tata Motors sold a part of its equity interest in its subsidiaries, HV Axles Limited (HVAL) and HV Transmission Limited (HVTL) to a related party for a cash consideration of Rs. 1,012.5 million and Rs. 630.0 million respectively. A gain of Rs.1,100.1 million has been recorded on these transactions. Consequently, Tata Motors' holding in both of these subsidiaries has been reduced from 100% to 85%.

During the year ended March 31, 2008, TACO the then subsidiary of Tata Motors Ltd sold part of its equity interest in its subsidiary, Automotive Stampings and Assemblies Ltd (ASAL) to Gestamp Auto (joint venture partner of TACO) for a cash consideration of Rs.364.3 million. A gain of Rs. 148.0 million has been recorded on this transaction. Consequently, TACO's holding in ASAL has been reduced from 81.35% to 43.86%.

35. Sale of finance receivables

During the year ended March 31, 2008, Tata Motors sold certain finance receivables and certain other rights related to this activity to a related party for a cash consideration of Rs10,226.0 million resulting in a gain of Rs.923.5 million.

Table of Contents**36. Employee benefits****Defined Benefit Plan****Pension and postretirement medical plans**

The following table sets out the funded and unfunded status and the amounts recognized in the financial statements for the pension and the post retirement medical plans in respect of Tata Motors and its Indian subsidiaries:

	2009	Pension Benefits 2009	As of March 31,		Post retirement medical Benefits

Other changes in plan assets and benefit obligation recognized in statements of recognized income and expense.

	2009	Pension Benefits 2009	Years ended March 31,		2009	2008
			2008	Post retirement medical Benefits		
			(In millions)			
Actuarial loss/(gain)	US\$ (0.3)	Rs. (13.0)	Rs. 552.2	US\$ 2.1	Rs. 105.7	Rs. 57.4
Total recognized in statement of recognized income and expense	US\$ (0.3)	Rs. (13.0)	Rs. 552.2	US\$ 2.1	Rs. 105.7	Rs. 57.4
Total recognized in net periodic cost and statement of recognized income and expense	US\$ 6.8	Rs. 343.6	Rs. 813.8	US\$ 3.8	Rs. 191.6	Rs. 137.0

The assumptions used in accounting for the pension and post retirement medical plans are set out below:

	Years ended March 31,		2009	2008
	Pension Benefits	Post retirement medical Benefits		
	2009	2008		
Discount rate	6.75%-8.50%	7.75%-8.50%	8.50%	8.50%
Rate of increase in compensation level of covered employees	0.00%-7.50%	5.00%-8.50%	NA	NA
Increase in health care cost	NA	NA	4.00%	4.00%
Expected long term rate of return on plan assets	8.00%	8.00%	NA	NA

The expected return on plan assets is determined considering several applicable factors mainly including the composition of the plan assets held, assessed risks of asset management, historical results of the return on plan assets and the Company's policy for plan asset management.

Table of Contents**Plan Assets**

The Company's pension plan asset allocation as of March 31, 2009 and 2008 by category are as follows:

Asset category:	Pension benefits Plan assets as of March 31,	
	2009	2008
Debt securities	78%	69%
Balances with banks	22%	31%
	100%	100%

The Company's policy is driven by considerations of maximizing returns while ensuring credit quality of the debt instruments. The asset allocation for plan assets is determined based on investment criteria prescribed under the Indian Income Tax Act, 1961, and is also subject to other exposure limitations. The Company evaluates the risks, transaction costs and liquidity for potential investments. To measure plan asset performance, the Company compares actual returns for each asset category with published bench marks.

The Company expects to contribute Rs. 417.4 million to the funded pension plans in fiscal 2010.

The table below outlines the effect on the service cost, the interest cost and the Defined benefit obligation in the event of an increase of 1% in the assumed rate of increase in health care cost:

	Years ended March 31,		
	2009	2009	2008
	(In millions)		
Effect on defined benefit obligation	US\$ 1.7	Rs. 85.6	Rs. 16.1
Effect on service cost and interest cost	0.1	5.8	7.0

The table below outlines the effect on the service cost, the interest cost and the Defined benefit obligation in the event of a decrease of 1% in the assumed rate of decrease in health care cost:

	Years ended March 31,		
	2009	2009	2008
	(In millions)		
Effect on defined benefit obligation	US\$ (1.5)	Rs. (73.9)	Rs. (58.1)
Effect on service cost and interest cost	(0.2)	(7.9)	(10.7)

Table of Contents**Defined contribution plan**

The Company's contribution to defined contribution plans aggregated Rs. 2,077.7 million and Rs.1,528.6 million for years ended March 31, 2009 and March 31, 2008 respectively.

37. Acquisitions

During the year ended March 31, 2009, the Company had the following acquisitions.

a) Jaguar Land Rover (JLR)

On June 2, 2008, the Company acquired Jaguar Land Rover businesses (JLR) from Ford Motor Company.

JLR is engaged in the design, development, manufacture and sale of high performance luxury saloons, specialist sports cars and four wheel drive off-road vehicles and related components. The JLR businesses includes three major manufacturing facilities and two advanced design and engineering centers in the United Kingdom, a worldwide sales and dealership network, intellectual property rights, patents and trade marks.

The consideration was Rs. 107,652 million (US\$ 2.5 billion) which was financed through a bridge loan facility provided by a syndicate of banks. The cost of acquisition includes Rs 2,159.6 million being expenses directly attributable to the acquisition.

The excess of fair value of net assets acquired over the cost of acquisition of Rs. 6,569.6 million represents 6% of the total acquisition cost. This excess is mainly attributable to significant potential value of two iconic brands Jaguar and Land Rover.

The Company has accounted for the acquisition under the purchase method in accordance with IFRS 3 Business Combinations. Accordingly the financial results of the acquired businesses for the period from June 2, 2008 to March 31, 2009 have been included in the consolidated financial statements of the Company.

The acquisition had the following effect on the Company's assets and liabilities on the acquisition date.

Table of Contents

Since the date of acquisition, the acquired entities contributed loss of Rs 32,615.6 million to the consolidated net loss for the period.

- * Includes indefinite life trade marks and brands of Rs. 51,570.2 million, patents and technological know-how of Rs. 12,259.7 million, customer related intangibles of Rs. 7,398.9 million and in process research and development of Rs.1,903.2 million.

Deferred tax liability of Rs. 13,519.3 million has been recognized on the fair value adjustments. Also, a deferred tax of an equivalent amount has been recognized on unused tax losses and capital allowances. It is expected that any reversals of the deferred tax liability would be able to offset against the reversal of the deferred tax asset.

b) Serviplem S.A.

Telco Construction Equipment Co. Ltd. (TELCON), the Company's subsidiary on April 2, 2008, completed the acquisition of Serviplem S. A., Zaragoza, Spain (Serviplem) by acquiring 79% of its share capital, for a cash consideration of Rs 2,221.5 million. A part of the consideration of Rs 1,200 million is payable to the erstwhile shareholders in installments by 2011. The cost of acquisition includes Rs. 44.5 million being expenses directly attributable towards acquisition.

Serviplem is in the business of manufacturing Concrete Transit Mixers, Dry Bulk Tanks and Pumps with the brand name Baryval. Baryval Assistencia Tecnica S.L. is a 60% subsidiary of Serviplem S.A. engaged in the business of assembling transit mixers on trucks. Inner Mongolia North Baryval Engineering Special Vehicle Corporation Ltd (NBSV), a 56% subsidiary of Serviplem, has a manufacturing base in Baotou, China.

c) Comoplesa Lebrero, S. A.

On April 9, 2008, TELCON completed the acquisition of Comoplesa Lebrero, S. A., Zaragoza, Spain (Lebrero) by acquiring 60% of its ordinary shares for a cash consideration of Rs 226.6 million. The cost of acquisition includes Rs. 17.1 million being expenses directly attributable towards acquisition. Lebrero with whom TELCON was associated since 2002 as its technology partners, is in the business of manufacturing compactors and tandem rollers. Eurl Lebrero France is a 100% subsidiary of Comoplesa Lebrero S.A. (Lebrero) and is functioning as a trading office of compactors manufactured by Lebrero.

Table of Contents**Allocation of purchase price of Serviplem S.A. and Comoplesa Lebrero, S. A.**

Direct acquisition costs			61.6	1.2
Total cost of acquisition			2,509.7	49.5
Goodwill			Rs. 1,401.3	US\$ 27.6

The acquired entities contributed a loss of Rs 249.0 million to the consolidated net loss attributable to the equity holders of the Company.

d) Total consolidated revenue of the Company and net loss of the Company would have been Rs. 849,364.8 million (unaudited) and Rs.43,540.0 million (unaudited) respectively, had all the acquisitions been effective for the full year 2008-09.

38. Commitments and contingencies

In the normal course, the Company faces claims and assertions by various parties. The Company assesses such claims and assertions and monitors the legal environment on an ongoing basis, with the assistance of external legal counsel wherever necessary. The Company records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its financial statements, if material. For potential losses that are considered reasonably possible, but not probable, the Company provides disclosure in the financial statements but does not record a liability in its accounts unless the loss becomes probable.

The following is a description of claims and assertions where a potential loss is reasonably possible, but not probable. Management believes that none of the contingencies described below, either individually or in aggregate, would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Litigation

The Company is involved in legal proceedings in various states in India, both as plaintiff and as defendant. There are claims which management does not believe to be of material nature, other than those described below.

Income Tax

The Company has ongoing disputes with Income Tax authorities relating to tax treatment of certain items. These mainly include disallowed expenses, tax treatment of certain expenses claimed by the Company as deductions, and the computation of,

Table of Contents

or eligibility of, certain tax incentives or allowances. Some of the disputes relate to the year in which the tax consequences of financial transactions were recognized and in the event these disputes are not resolved in the Company's favor in that year, the tax consequences can be reflected in the tax year in which it is allowed by the income tax authorities and are, therefore, timing differences.

Most of these disputes/disallowances, being repetitive in nature, have been raised by the Income Tax authorities consistently in most of the years.

The Company has a right of appeal to the High Court or Supreme Court against adverse decisions by the appellate authorities for matters involving substantial question of law. The Income Tax authorities have similar rights of appeal.

As of March 31, 2009, the income tax demands by the Income Tax authorities aggregated Rs. 1,534 million (Rs.1,540 million as of March 31, 2008), (all figures are net of consequential relief) which are being contested by the Company in appeal and in respect of which the Company expects to succeed based on favorable decisions in earlier assessment years. There are matters aggregating Rs.1,072 million as of March 31, 2009 (Rs.1,031 million as of March 31, 2008) in respect of which the Company has won in appeals which have been further contested by the Income Tax authorities before the higher appellate authorities. There are other matters/disputes pending in appeal aggregating Rs. 1,848 million (Rs.1,993 million as of March 31, 2008).

Excise Duty and Service Tax

As of March 31, 2009, there were pending litigations on various counts relating to Excise Duty and Service Tax involving demand of Rs.1,821 million (Rs.1,062 million as of March 31, 2008). These demands challenged the basis of valuation of the Company's products and denial of the Central Value Added Tax (CENVAT) on inputs. The details of the demands involving more than Rs.200 million are as follows:

The excise authorities had denied CENVAT credit of Rs. 269 million as of March 31, 2009 (Rs.143 million as of March 31, 2008) in earlier years, on certain accessories supplied with the vehicles and on other technical grounds. The matter is being contested by the Company before the appellate authorities. On the basis of judicial precedents and favorable decisions in Company's own earlier cases, the Company believes that it has a strong case. Further, valuation dispute of Tata Motors Limited amounting to Rs.219 million includes an amount of Rs.205 million pertaining to valuation of chassis sent to body builders for building body on its enroute to regional sales offices.

The excise authorities have raised a demand of Rs 371 million as of March 31, 2009 (Rs.371 million as of March 31, 2008). This is a Classification Dispute wherein the excise department had alleged that certain models of the Company's commercial vehicle- Tippers will attract NCCD (National Calamity Cess Duty) of 1% on the ground that there are similarities between Tippers and Dumpers. The Company is contending that there are many technical differences between the two products. The appeal is pending before the Tribunal.

Sales Tax

The total sales tax demands (including interest and penalty), which are being contested by the Company amount to Rs.5,424 million as of March 31, 2009 (Rs.3,138 million as of March 31, 2008). The details of the demands for more than Rs.200 million are as follows:

The Sales Tax authorities in certain states have raised disputes totaling up to Rs.721 million as of March 31, 2009 (Rs.529 million as of March 31, 2008), treating the stock transfers of vehicles from the Company's manufacturing plants to sales offices and the transfers between two sales offices as sales liable for levy of sales tax.

Under the notification issued by the sales tax authority, Jharkhand, the rate of sales tax was reduced to 4%. Consequently, the interstate sales tax also became 4% and since it was not concessional rate against a Declaration Form, the collection of Declaration Forms was not mandatory. However, the Jharkhand sales tax authorities raised the demand aggregating Rs.909 million, on the ground that Declaration Forms were not collected. The Company on the above notification has a strong case. The notification was valid until May 10, 2002. In addition to the above issue, the sales tax authorities have raised demands aggregating Rs.123 million as of March 31, 2009 (Rs.74 million as of March 31, 2008), for Non-Submission of Declaration Forms at various locations. The Company is confident of getting relief in appeal on submission of Forms.

Table of Contents

Sales tax demand aggregating Rs.2,473 million as of March 31, 2009 (Rs.626 million as of March 31, 2008) has been raised by Jamshedpur Sales Tax authorities disallowing the purchase of raw material from Jharkhand vendors at concessional rate of 2% in case the final product is stock transferred for sale outside the state. The Sales Tax authorities are relying on a notification issued by the Jharkhand Government which is not applicable on the Company's transactions.

Other Taxes and Dues

Other amounts for which the Company may contingently be liable aggregating Rs.2045 million as of March 31, 2009 (Rs.1,208 million as of March 31, 2008) include the following cases involving more than Rs. 200 million:

The municipal authorities in certain states levy octroi duty (a local indirect tax) on goods brought inside the municipal limits at rates based on the classification of goods. Demands aggregating Rs.572 million as of March 31, 2009 (Rs.496 million as of March 31, 2008) have been raised demanding higher octroi duties on account of classification disputes relating to components purchased for the manufacture of vehicles. The dispute relating to classification is presently pending before the Supreme Court and the other dispute is pending before the Bombay High Court on remand by the Supreme Court.

Other claims

There are other claims against the Company, majority of which pertains to motor accident claims (involving third parties affected in accidents while the Company's vehicles were being transferred from the Company's manufacturing plants to regional sales offices or from one sales office to the other) and consumer complaints. Some of the cases also relate to replacement of parts of vehicles and/or compensation for deficiency in the services by the Company or its dealers.

Guarantees

The Company has provided guarantees aggregating Rs 8565.3 million as of March 31, 2009 and Rs Nil as of March 31, 2008, to banks and others in respect of loans/credit facilities availed by its joint venture.

Commitments

The Company has entered into various contracts with vendors and contractors for the purchase of plant and machinery, equipment, product development cost and various civil contracts of a capital nature aggregating Rs 46,314 million as of March 31, 2009 (Rs.35,732 million as of March 31, 2008) which are yet to be executed.

For commitments related to leases, see Note no 14.

39. Capital Management

The Company's objectives when managing capital is to safeguard continuity and providing adequate return to shareholders through continuing growth.

The Company sets the amount of capital required on the basis of annual business and long-term operating plans which include capital and other strategic investments

The funding requirements are met through mixture of equity, convertible debt securities and other long term borrowings. The Company's policy is to use short-term and long-term borrowings to meet anticipated funding requirements.

The Company monitors capital on basis of total debt to equity ratio.

Total debt includes all long and short-term debts as disclosed in notes 20 and 24 to the financial statements. Equity comprises all components excluding loss on cash flow hedges and foreign currency translation reserve.

The following table summarizes the capital of the Company:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

	2009	As of March 31, 2009 (In millions)	2008
Equity	US\$ 1,183.6	Rs. 60,033.5	Rs. 123,767.8
Short-term debt	6,301.8	319,628.6	112,319.9
Long-term debt	2,290.7	116,185.9	108,028.1
Total debt	8,592.5	435,814.5	220,348.0
Total capital (Debt + Equity)	US\$ 9,776.1	Rs. 495,848.0	Rs. 344,115.8

F-63

Table of Contents**40. Disclosures on financial instruments**

This section gives an overview of the significance of financial instruments for the Company and provides additional information on balance sheet items that contain financial instruments.

Details of significant accounting policies, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognized, in respect of each class of financial asset, financial liability and equity instrument are disclosed in note 2 to the financial statements.

a) Collateral

The Company gives financial assets as collateral primarily towards borrowings and legal cases. The terms of the pledge/collateral normally gives the right to such party to utilize the collateral in case of non-performance by the Company or by other third party as per the terms of the respective agreement. Finance receivable/trade receivable which does not meet the criteria for de-recognition are considered as securities against the borrowings recognized.

The carrying amounts of such financial assets are as follows:

	2009	As of March 31, 2009 (In millions)	2008
Margin money (refer note 9 and 12)	US\$ 375.3	Rs. 19,036.6	Rs. 15,998.5
Deposits against legal cases	12.7	644.9	516.7
Trade receivables and finance receivables	3,339.7	169,387.2	149,629.3

Table of Contents**b) Financial assets and liabilities**

The following table presents the carrying amounts and fair value of each category of financial assets and liabilities as of March 31, 2009.

Financial assets	Cash and loans and receivables	Available-for-sale financial assets	Derivative other than in hedging relationship	Total carrying Value (In millions)	Total fair Value	Total carrying Value	Total fair Value

Table of Contents

The following table shows the carrying amounts and fair value of each category of financial assets and liabilities as of March 31, 2008.

Financial Assets	Cash and loans and receivables	Available-for-sale financial assets	Derivative other than in hedging relationship (In millions)	Total carrying value	Total fair value
Cash and cash equivalents	Rs. 11,415.8	Rs.	Rs.	Rs. 11,415.8	Rs. 11,415.8
Short term deposits	14.8			14.8	14.8
Finance receivables	163,959.5			163,959.5	159,329.9
Trade receivables	30,040.9			30,040.9	30,040.9
Investments	516.6	40,142.7		40,659.3	40,659.3
Other financial assets-current	4,927.3		204.0	5,131.3	5,131.3
Other financial assets-non-current	17,835.0			17,835.0	17,429.6
Restricted deposits with banks*	11,224.0			11,224.0	11,224.0
Total	Rs. 239,933.9	Rs. 40,142.7	Rs. 204.0	Rs. 280,280.6	Rs. 275,245.6

* Restricted deposits with banks represent short term deposits that were to be utilized for acquisition of Jaguar Land Rover businesses.

Financial Liabilities	Derivative other than in hedging relationship	Other financial liabilities	Total carrying value	Total fair value
			(In millions)	
Accounts payable	Rs.	Rs. 44,548.0	Rs. 44,548.0	Rs. 44,548.0
Acceptances		41,420.5	41,420.5	41,420.5
Short term debt		112,319.9	112,319.9	112,319.9
Long-term debt	2,932.2	105,095.9	108,028.1	103,643.6
Other financial liabilities - current	897.2	5,722.8	6,620.0	6,620.0
Other financial liabilities - non current		5,506.5	5,506.5	4,837.3
Total	Rs. 3,829.4	Rs. 314,613.6	Rs. 318,443.0	Rs. 313,389.3

The amount in respect of cash and cash equivalents, short-term deposits with banks, trade receivable, other financial assets-current, accounts payable, acceptances, other financial liabilities-current, and short-term borrowings and current portion of long-term debt, approximate their fair values largely due to the short term maturities of these instruments.

The fair value of finance receivables is estimated by discounting expected cash flows using rates at which loans of similar credit quality and maturity would be made as of March 31, 2009 and March 31, 2008.

Available-for-sale securities are carried at their fair values, which are generally based on market price quotations. The fair value in respect of the unquoted equity investments cannot be reliably measured and are stated at cost. The fair values of borrowings which have a quoted market price in an active market is based on its market price and for others it is estimated by discounting expected future cash flows using a discount rate equivalent to the risk free rate of return adjusted for the market spread considered by the lenders for instruments of the similar maturity.

Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Company could have realized in a sales transaction as of respective dates. The estimated fair value amounts as of March 31, 2009 and March 31, 2008 have been measured as of the respective dates. As such, the fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year-end.

Table of Contents**c) Transfer of financial assets**

The Company transfers finance receivables in securitization transactions / direct assignments. In such transactions the Company surrenders control over the receivables though continues to act as an agent for the collection of receivables. In most of the transactions, the Company also provides credit enhancements to the transferee.

Consequent to existence of credit enhancements in such transactions, the Company continues to have the obligation to pay to the transferee, limited to the extent of credit enhancement even if it does not collect the equivalent amounts from the original asset and continues to retain substantially all risks and rewards associated with the receivables, and hence such transfer /assignments do not meet the derecognition criteria resulting into the transfer not being recorded as sale. Consequently the proceeds received from the transfer are recorded as collateralized debt obligation.

Further the Company transfers amounts receivable under debt factoring arrangements and discounts certain trade receivables. These do not qualify for derecognition due to the recourse arrangement in place.

The carrying amount of trade receivables and finance receivable along with the associated liabilities is as follows:

Nature of Asset	2009		Years ended March 31, 2009		2008	
	Carrying amount of asset sold	Carrying amount of associated liabilities	Carrying amount of asset sold	Carrying amount of associated liabilities	Carrying amount of asset sold	Carrying amount of associated liabilities
	(In millions)					
Trade receivables	US\$ 238.7	US\$ 238.7	Rs. 12,106.9	Rs. 12,106.9	Rs. 1,703.3	Rs. 1,703.3
Finance receivables	1,754.8	1,802.5	89,004.9	91,422.7	88,657.9	92,272.0

d) Cash flow hedging

As per its risk management policy, the company uses foreign currency forward contracts to hedge its risk associated with foreign currency fluctuations relating to highly probable forecast sale transactions. The fair value of such forward contracts as of March 31, 2009 and March 31, 2008 was net loss of Rs. 1,396.9 million and Rs Nil respectively.

Changes in fair value of forward exchange contracts to the extent determined to be an effective hedge is recognized in statement of recognized income and expense and the ineffective portion of the fair value change is recognized in statement of operations. Accordingly, the fair value change of net loss of Rs 875.1 million (net of tax) was recognized in statement of recognized income and expense during the year ended March 31, 2009. The cash flows relating to these transactions are expected to occur during the year ended March 31, 2010 and consequently may impact the statement of operations for that year, depending on foreign exchange rate movements.

e) Financial risk management

In the course of its business, the Company is exposed primarily to fluctuations in foreign currency exchange rates, interest rates, equity price, liquidity and credit risk, which may impact the fair value of its financial instruments.

The Company has a risk management policy which not only covers the foreign exchange risks but also other risks associated with the financial assets and liabilities like interest rate risks and credit risks. The risk management policy is approved by the board of directors. The risk management framework aims to:

Improve financial risk awareness and risk transparency

Identify, control and monitor key risks

Identify risk accumulations

Provide the management with reliable information on the Company's risk situation

Improve the financial returns

i) Market risk

Market risk is the risk of any loss in future earnings in realizable fair values or in future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rate, equity price fluctuations, liquidity and other market changes. Future specific market movements cannot be normally predicted with reasonable accuracy.

F-67

Table of Contents**a Foreign currency exchange rate risk:**

The fluctuation in foreign currency exchange rates may have potential impact on the statement of operations, equity, where any transaction references more than one currency or where assets/liabilities are denominated in a currency other than the functional currency of the respective consolidated entities.

Considering the countries and economic environment in which the Company operates, its operations are subject to risks arising from fluctuations in exchange rates in those countries. The risks primarily relate to fluctuations in GBP, US Dollar, Japanese Yen and Euro against the respective functional currencies of the Company and its subsidiaries.

The Company, as per its risk management policy, uses derivative instruments primarily to hedge foreign exchange exposure, and also to hedge interest rate exposure. Further, any weakening of the functional currencies of the various operations of the Company against major foreign currencies may have an adverse effect on the Company's cost of borrowing and cost of imports reported and consequently may increase the cost of financing our capital expenditures. This also may impact the earnings of foreign operations.

The Company evaluates the impact of foreign exchange rate fluctuations by assessing its exposure to exchange rate risks. It hedges a part of these risks by using derivative financial instruments in line with its risk management policies.

The foreign exchange rate sensitivity is calculated by aggregation of the net foreign exchange rate exposure and a simultaneous parallel foreign exchange rates shift in the foreign exchange rates of all the currencies by 10% against the respective functional currency of Tata Motors and its subsidiaries.

The following analysis has been worked out based on the gross exposure as of the Balance Sheet date which could affect the statement of operations. There is no exposure to the statement of operations on account of translation of financial statements of consolidated foreign entities. Further the exposure as indicated below is mitigated by some of the derivative contracts entered into by the Company as disclosed at clause (iv) below.

The following table set forth information relating to foreign currency exposure (other than risk arising from derivatives disclosed at clause (iv)) below as of March 31, 2009:

	US Dollar	Euro	JPY	Russian Ruble (In millions)	Brazilian real	Others*	Total
Financial assets	Rs. 11,923.3	Rs. 8,368.4	Rs. 99.0	Rs. 2,752.2	Rs. 1,436.0	Rs. 4,400.5	Rs. 24,791.2
Financial liabilities	196,148.0	12,926.2	10,783.1	2,752.2	1,436.0	839.8	224,885.3
Net exposure asset/(liability)	Rs. (184,224.7)	Rs. (4,557.8)	Rs. (10,684.1)	Rs. (2,752.2)	Rs. (1,436.0)	Rs. 3,560.7	Rs. (200,094.1)

* Others include currencies such as GBP, Singapore dollars, Swiss Franc, Australian dollars, etc.

10% appreciation/ depreciation of the respective foreign currencies with respect to functional currency of Tata Motors and its subsidiaries would result in increase/ decrease in the Company's net loss before tax by approximately Rs 20,009.4 million for the year ended March 31, 2009,

The following table set forth information relating to foreign currency exposure (other than risk arising from derivatives disclosed at clause (iv) below) as of March 31, 2008:

	US Dollar	Euro	JPY (In millions)	GBP	Others*	Total
Financial assets	Rs. 15,881.8	Rs. 3,356.3	Rs. 25.0	Rs. 193.4	Rs. 254.3	Rs. 19,710.9
Financial liabilities	49,768.9	6,070.2	6,347.4	1,943.1	607.1	64,736.7

Net exposure asset/(liability)	Rs. (33,887.1)	Rs. (2,713.9)	Rs. (6,322.4)	Rs. (1,749.7)	Rs. (352.8)	Rs. (45,025.8)
---------------------------------------	-----------------------	----------------------	----------------------	----------------------	--------------------	-----------------------

* Others include currencies such as Swiss Franc, Singapore dollars, Remnibi, Australian dollars, etc.

F-68

Table of Contents

10% appreciation/depreciation of the respective foreign currencies with respect to functional currency of Tata Motors and its subsidiaries would result in decrease/increase in the Company's net profit before tax by approximately Rs 4,502.6 million for the year ended March 31, 2008.

b Interest rate risk

Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rates. Any movement in the reference rates could have an impact on the cash flows as well as costs.

The Company is subject to variable interest rates on some of its interest bearing liabilities. The Company's interest rate exposure is mainly related to debt obligations. The Company also uses a mix of interest rate sensitive financial instruments to manage the liquidity and fund requirements for its day to day operations like non-convertible bonds and short term loans.

In its financing business, the Company enters into transactions with customers which primarily result in receivables at fixed rates. In order to manage this risk, the Company has a policy to match funding in terms of maturities and interest rates and also for certain part of the portfolio, the Company does not match funding with maturities in order to take advantage of market opportunities.

The Company also enters into arrangements of securitization of receivables in order to reduce the impact of interest rate movements.

As of March 31, 2009 and March 31, 2008, net financial liability of Rs. 202,756.4 million and Rs. 40,101.0 million respectively, was subject to the variable interest rate. Increase/decrease of 100 basis points in interest rates at the balance sheet date would result in an impact of Rs 2,027.6 million and Rs 401.0 million on loss/income for the year ended March 31, 2009 and March 31, 2008 respectively.

The model assumes that interest rate changes are instantaneous parallel shifts in the yield curve. Although some assets and liabilities may have similar maturities or periods to re-pricing, these may not react correspondingly to changes in market interest rates. Also, the interest rates on some types of assets and liabilities may fluctuate with changes in market interest rates, while interest rates on other types of assets may change with a lag.

The risk estimates provided assume a parallel shift of 100 basis points interest rate across all yield curves. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The period end balances are not necessarily representative of the average debt outstanding during the period.

This analysis assumes that all other variables, in particular foreign currency rates, remain constant

c Equity Price risk

Equity Price Risk is related to the change in market reference price of the investments in equity securities.

The fair value of some of the Company's investments in available-for-sale securities exposes the Company to equity price risks. In general, these securities are not held for trading purposes. These investments are subject to changes in the market price of securities. The fair value of available-for-sale equity securities as of March 31, 2009 and March 31, 2008 was Rs 5,501.6 million and Rs 27,273.9 million respectively. A 10 % change in equity prices of available-for-sale securities held as of March 31, 2009 and March 31, 2008 would result in an impact of Rs 550.2 million and Rs 2,727.4 million on equity, respectively.

The Company has investments in unquoted shares, the fair value of which cannot be reliably measured, of Rs. 2,376.0 million as of March 31, 2009 and Rs. 2,695.0 million as of March 31, 2008

ii) Credit risk

Credit risk is the risk of financial loss arising from counterparty failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks.

Table of Contents

Financial instruments that are subject to concentrations of credit risk principally consist of investments classified as loans and receivables, trade receivables, finance receivables, loans and advances, derivative financial instruments, financial guarantee issued for equity accounted entities (other than the Company's share). None of the financial instruments of the Company result in material concentrations of credit risks.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk was Rs. 271,333.8 million as of March 31, 2009 and Rs. 240,586.8 million as of March 31, 2008, being the total of the carrying amount of cash equivalents, bank deposit, margin money, financial assets and financial guarantee, excluding cash, equity investments and investment in mutual funds.

Financial assets that are neither past due nor impaired

None of the company's cash equivalents, including time deposits with banks, are past due or impaired. Regarding trade receivables and other receivables, and other loans or receivables that are neither impaired nor past due, there were no indications as of March 31, 2009, that defaults in payment obligations will occur.

Credit quality of financial assets and impairment loss

The ageing of trade receivables and finance receivables as of balance sheet date is given below. The age analysis have been considered from the due date.

	2009		As of March 31, 2009		2008	
	Gross	Allowance	Gross	Allowance	Gross	Allowance
Trade receivables						
Period (in months)						
Not due	US\$ 768.1	US\$ (2.8)	Rs. 38,958.1	Rs. (143.5)	Rs. 22,200.3	Rs. (65.2)
Overdue 1-3 months	181.1	(0.5)	9,186.5	(23.1)	6,331.0	
Overdue 3-6 months	60.3	(16.4)	3,057.3	(830.4)	635.3	(38.9)
Overdue more than 6 months	49.4	(19.9)	2,504.0	(1,011.8)	1,879.1	(900.7)
Total	US\$ 1,058.9	US\$ (39.6)	Rs. 53,705.9	Rs. (2,008.8)	Rs. 31,045.7	Rs. (1,004.8)

	2009		As of March 31, 2009		2008	
	Gross	Allowance	Gross	Allowance	Gross	Allowance
Finance receivables						
Period (in months)						
Not due	US\$ 3,038.5	US\$ (86.5)	Rs. 154,114.6	Rs. (4,387.3)	Rs. 159,379.6	Rs. (1,697.7)
Overdue up to 11 months	139.5	(13.1)	7,069.8	(665.6)	5,112.2	(120.1)
Overdue more than 11 months	99.2	(46.6)	5,033.6	(2,362.3)	2,255.7	(970.2)
Total	US\$ 3,277.2	US\$ (146.2)	Rs. 166,218.0	Rs. (7,415.2)	Rs. 166,747.5	Rs. (2,788.0)

iii) Liquidity risk

Liquidity risk refers to the risk that the Company cannot meet its financial obligations.

The Company has obtained working capital lines from a consortium of bankers. Further, the Company has access to funds from debt markets via commercial paper programs, non-convertible debentures, fixed deposits from public, etc. The Company also constantly monitors funding options available in the debt and capital markets with a view to maintaining financial flexibility. The Company is also pursuing alternatives for meeting

its long term funding requirements. The Company's subsidiaries establish their own lines of credit with banks and other lenders.

F-70

Table of Contents

The table below provides details regarding the contractual maturities of financial liabilities, including estimated interest payments as of March 31, 2009:

	Carrying amount	Due in 1st Year	Due in 2nd Year	Due in 3rd to 5th Year (In millions)	Due after 5 Years	Total contractual cash flows	Total contractual cash flows
Non derivative financial liabilities							
Accounts payable and acceptances	Rs. 193,609.7	Rs. 193,609.7	Rs.	Rs.	Rs.	Rs. 193,609.7	US\$ 3,817.2
Borrowings and interest accrued thereon	437,317.5	333,152.6	54,048.6	84,880.9		472,082.1	9,307.6
Other finance liabilities	15,395.0	4,443.7	6,194.7	3,896.9	1,399.0	15,934.3	314.2
Derivative liabilities	2,086.4	2,086.4				2,086.4	41.1
Total	Rs. 648,408.6	Rs. 533,292.4	Rs. 60,243.3	Rs. 88,777.8	Rs. 1,399.0	Rs. 683,712.5	US\$ 13,480.1

The above assumes that the foreign currency convertible debt securities are repaid on maturity. However if converted the amount repayable in 1st year, 2nd year and 3rd to 5th year will reduce by Rs 213.6 million, Rs. 6,029.0 million and Rs. 51,521.7 million respectively.

The table below provides details regarding the contractual maturities of financial liabilities, including estimated interest payments as of March 31, 2008.

Financial Liabilities	Carrying amount	Due in 1st Year	Due in 2nd Year	Due in 3rd to 5th Year (In millions)	Due after 5 Years	Total contractual cash flows
Non derivative financial liabilities						
Accounts payable and Acceptances	Rs. 85,968.5	Rs. 85,968.5	Rs.	Rs.	Rs.	Rs. 85,968.5
Borrowings and interest accrued thereon	221,133.0	121,510.9	48,727.8	75,990.0	82.4	246,311.1
Other finance liabilities	10,444.3	4,937.8	2,086.0	2,986.3	560.6	10,570.7
Derivative liabilities	897.2	897.2				897.2
Total	Rs. 318,443.0	Rs. 213,314.4	Rs. 50,813.8	Rs. 78,976.3	Rs. 643.0	Rs. 343,747.5

The above assumes that the foreign currency convertible debt securities are repaid on maturity. However if converted the amount repayable in 1st year, 2nd year and 3rd to 5th year will reduce by Rs. 79.9 million, Rs. 302.9 million and Rs. 46,523.5 million respectively.

iv) Derivative financial instruments and risk management

The Company has entered into variety of interest rate and foreign currency forward contracts and options to manage its exposure to fluctuations in foreign exchange rates and interest rates. The counter party is generally a bank. These financial exposures are managed in accordance with its risk management policies and procedures.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The Company enters into interest rate swaps and interest rate currency swap agreements mainly to manage exposure on its fixed-rate or variable-rate debt. The Company uses interest rate derivatives or currency swaps to hedge exposure to exchange rate fluctuations on principal and interest payments for borrowings denominated in foreign currencies.

Specific transactional risks include risks like liquidity and pricing risks, interest rate and exchange rates fluctuation risks, volatility risks, counterparty risks, settlement risks and gearing risks.

F-71

Table of Contents

The Company is also exposed to equity price risk, interest rate risk and currency risk on embedded derivative, i.e., conversion option in foreign currency convertible notes/convertible alternative reference securities accounted for separately.

Fair value of derivative financial instruments other than conversion options are generally based on quotations obtained from inter-bank market participants.

Fair value of conversion option in foreign currency convertible notes is determined using various option valuation models such as Black Scholes Merton model, Cox Ross Rubinstein model and Monte Carlo simulation. These models consider various inputs, such as stock price as at the date of valuation, strike price of the option as per terms of issue of the instrument, time to expiry, volatility of the underlying share price, risk free interest rate, expected dividend etc.

The main assumptions used for the purpose of valuations are as follows:

Assumptions used in valuation of foreign currency convertible notes (FCCN)/ convertible alternative reference securities (CARS) as of March 31, 2009

	Currency	Share price in foreign currency	Assumptions Volatility in share price	Risk free interest rate
FCCN due in 2011	USD	3.0	72.9%	0.8%
CARS due in 2012	USD	2.7	72.9%	1.2%
FCCN due in 2011	JPY	292.0	77.8%	0.4%

Assumptions used in valuation of foreign currency convertible notes (FCCN)/ convertible alternative reference securities (CARS) as of March 31, 2008

	Currency	Share price in foreign currency	Assumptions Volatility in share price	Risk free interest rate
FCCN due in 2011	USD	13.9	37.0%	1.8%
CARS due in 2012	USD	15.0	37.0%	2.1%
FCCN due in 2011	JPY	1,387.7	39.1%	0.6%

The fair value of derivative financial instruments including embedded derivative is as follows:

	2009	As of March 31, 2009 (In millions)	2008
Forward exchange contracts, options, interest rate swaps and currency swaps	US\$ (38.4)	Rs. (1,948.8)	Rs. (693.2)
Embedded derivative-conversion option	(2.5)	(125.7)	(2,932.2)
Total	US\$ (40.9)	Rs. (2,074.5)	Rs. (3,625.4)

The loss on derivative contracts recognized in the statement of operations was Rs. 659.3 million for the year ended March 31, 2009. The loss on forward contracts recognized in statement of recognized income and expense during the year ended March 31, 2009 was Rs 875.1 million (net of tax).

The gain on derivative contracts recognized in the statement of operations was Rs. 3,971.1 million for the year ended March 31, 2008.

In respect of Company's forward and option contracts, a 10% appreciation/depreciation of the foreign currency underlying such contracts would have resulted in an approximate loss of Rs. 649.9 million and an approximate gain of Rs. 683.2 million respectively, in the Company's hedging reserve as of March 31, 2009 and an approximate loss of Rs.337.6 million and an approximate gain of Rs. 365.3 million respectively in the Company's statement of operations for the year ended March 31, 2009.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In respect of Company's forward and option contracts, a 10% appreciation/depreciation of the foreign currency underlying such contracts would have resulted in an approximate loss of Rs. 2,853.9 million and gain of Rs. 2,771.5 million respectively for the year ended March 31, 2008.

In respect of embedded derivative, conversion option:

A 10% increase/decrease in Company's share price would have resulted in an approximate loss of Rs 37.5 million and an approximate gain of Rs 30.1 million respectively for the year ended March 31, 2009.

A 10% increase/decrease in Company's share price would have resulted in an approximate loss of Rs 1,001.1 million and an approximate gain of Rs 673.0 million respectively for the year ended March 31, 2008.

A 10% appreciation/depreciation in the underlying foreign currency would have resulted in an approximate gain of Rs. 16.6 million and loss of Rs 18.4 million respectively, for the year ended March 31, 2009.

A 10% appreciation/depreciation in the underlying foreign currency would have resulted in an approximate gain of Rs 321.7 million and loss of Rs. 513.9 million respectively for the year ended March 31, 2008.

A 50 basis points and 25 basis points appreciation/depreciation in US interest rates and Japan interest rates would have resulted in an approximate loss of Rs. 2.1 million and gain of Rs 1.9 million respectively, for the year ended March 31, 2009.

A 100 basis points and 25 basis points appreciation/depreciation in US interest rates and Japan interest rates would have resulted in an approximate loss of Rs 34.9 million and gain of Rs. 22.9 million respectively, for the year ended March 31, 2008.

Table of Contents

The above analysis assumes that all other variables (other than variable under consideration) remain constant.

(Note: The impact is indicated on the income/loss before tax basis).

Table of Contents**41. Segment reporting**

In accordance with IAS 14 Segment Reporting, the Company's primary segments are based on business segments as the risks and rewards are affected predominantly by the products and services it produces and renders.

The Company primarily operates in the automotive segment. The Automotive segment includes all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. The Company provides financing for vehicles sold by it in India. The vehicle financing is intended to drive sale of vehicles by providing financing to the dealers customers and as such is an integral part of automotive business. The financing activity is assessed as an integral part of the overall automotive business. The operating results of the financing activity does not include all of the interest or cost of funds employed for the purposes of financing, and therefore the operating results of this activity is not used to make decisions about resources to be allocated or to assess performance.

The acquisition of Jaguar Land Rover in June 2008 has expanded the Company's presence in the international markets. Pending completion of the integration process of Jaguar Land Rover, with the Company's automotive business, which is being undertaken following the acquisition, the Company has disclosed two reportable segments in its automotive business Tata vehicles and Jaguar Land Rover, for the year ended March 31, 2009.

The Company's other segment comprises primarily activities relating to production, designing and selling of construction equipment, engineering solutions and software operations. None of the other operating segments meets the quantitative thresholds specified in IAS 14, and accordingly, have been aggregated.

The segment information presented is in accordance with the accounting policies adopted for preparing the consolidated financial statements of the Company.

Proceeds from issue of shares	0.2	14.2	

Refer Note 36 for information on transactions with post-employment benefit plans.

43. Subsequent events

In May 2009, the Company raised Rs. 42,000 million through secured non-convertible rupee debentures issued in four tranches with maturities ranging from 2 to 7 years, the proceeds of which were used to repay part of the outstanding bridge loan.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The Company used the proceeds of the above debentures and proceeds from the sale of available-for-sale securities of Rs. 9,529 million to repay a part of the bridge loan outstanding as of March 31, 2009.

In May 2009, the Company renegotiated the terms of the bridge loan and accordingly, the outstanding bridge loan of USD 1 billion is repayable in tranches by December 2010.
