Transfer of loans receivable to foreclosed assets	\$ 5,270	\$ 366

See accompanying notes to unaudited consolidated financial statements.

Table of Contents**Note 2. Acquisition**

On August 11, 2011, the Company's wholly owned subsidiary, The Provident Bank, completed its acquisition of Beacon Trust Company, a New Jersey limited purpose trust company, and Beacon Global Asset Management, Inc., an SEC-registered investment advisor incorporated in Delaware (collectively "Beacon"). Pursuant to the terms of the Stock Purchase Agreement announced on May 19, 2011, Beacon's former parent company, Beacon Financial Corporation may be paid cash consideration in an amount up to \$10.5 million, based upon the acquired companies financial performance in the three years following the closing of the transaction.

The purpose of the Beacon acquisition was to significantly expand the Company's wealth management business throughout the state of New Jersey. Beacon's expertise in trust and wealth management services strategically positions the Company to increase market share and enhance the Company's non-interest earnings growth.

The purchase price was allocated to the acquired assets and liabilities of Beacon based on their fair value as of August 11, 2011. The allocation of the purchase price is presented in the following table.

<i>(in thousands)</i>	
Assets:	
Cash and cash equivalents	\$ 96
Securities	164
Premises and equipment	241
Goodwill	7,124
Core relationship intangible	2,423
Other assets	1,378
Total assets	\$ 11,426
Liabilities:	
Other liabilities	4,076
Total liabilities	\$ 4,076

In connection with the Beacon transaction, the Company recorded goodwill of \$7.1 million, none of which was estimated to be deductible for income tax purposes. In addition, a core relationship intangible ("CRI") of \$2.4 million was recognized in connection with the Beacon acquisition and is being amortized on an accelerated basis over an estimated useful life of twelve years.

Note 3. Investment Securities

At March 31, 2012, the Company had \$1.40 billion and \$351.7 million in available for sale and held to maturity investment securities, respectively. Many factors, including lack of liquidity in the secondary market for certain securities, lack of reliable pricing information, regulatory actions, changes in the business environment or any changes in the competitive marketplace could have an adverse effect on the Company's investment portfolio which could result in other-than-temporary impairment on certain investment securities in future periods. Included in the Company's investment portfolio are private label mortgage-backed securities. These investments may pose a higher risk of future impairment charges as a result of the uncertain economic environment and the potential negative effect on future performance of these private label mortgage-backed securities. The total number of all held to maturity and available for sale securities in an unrealized loss position as of March 31, 2012 totaled 46, compared with 24 at December 31, 2011. This included four private label mortgage-backed securities at March 31, 2012, with an amortized cost of \$13.8 million and unrealized losses totaling \$739,000. Three of these private label mortgage-backed securities were below investment grade at March 31, 2012. All securities with unrealized losses at March 31, 2012 were analyzed for other-than-temporary impairment. Based upon this analysis, no other-than-temporary impairment existed at March 31, 2012.

Table of Contents**Securities Available for Sale**

The following table presents the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for securities available for sale at March 31, 2012 and December 31, 2011 (in thousands):

	March 31, 2012			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 91,995	462		92,457
Mortgage-backed securities	1,260,289	31,046	(1,810)	1,289,525
State and municipal obligations	11,054	520	(2)	11,572
Corporate obligations	6,012	63		6,075
Equity securities	307	25		332
	\$ 1,369,657	32,116	(1,812)	1,399,961

	December 31, 2011			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	105,130	442	(14)	105,558
Mortgage-backed securities	1,221,988	31,206	(2,191)	1,251,003
State and municipal obligations	11,066	553	(5)	11,614
Corporate obligations	7,517	119		7,636
Equity securities	307	1		308
	\$ 1,346,008	32,321	(2,210)	1,376,119

The amortized cost and fair value of securities available for sale at March 31, 2012, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	March 31, 2012	
	Amortized cost	Fair value
Due in one year or less	\$ 41,638	41,780
Due after one year through five years	65,693	66,504
Due after five years through ten years	1,730	1,820
Mortgage-backed securities	1,260,289	1,289,525
Equity securities	307	332
	\$ 1,369,657	1,399,961

Proceeds from the sale of securities available for sale for the three months ended March 31, 2012 were \$47,131,000, resulting in gross gains of \$2,160,000 and gross losses of zero. No securities were sold in the three months ended March 31, 2011.

The following table presents a roll-forward of the credit loss component of other-than-temporary impairment (OTTI) on debt securities for which a non-credit component of OTTI was recognized in other comprehensive income. OTTI recognized in earnings after that date for

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

credit-impaired debt securities is presented as an addition in two components, based upon whether the current period is the first time a debt security was credit-impaired (initial credit impairment) or is not the first time a debt security was credit impaired (subsequent credit impairment). Changes in the credit loss component of credit-impaired debt securities were as follows (in thousands):

	March 31, 2012	March 31, 2011
Beginning credit loss amount	\$ 1,240	938
Add: Initial OTTI credit losses		
Subsequent OTTI credit losses		
Less: Realized losses for securities sold		
Securities intended or required to be sold		
Increases in expected cash flows on debt securities		
Ending credit loss amount	\$ 1,240	938

Table of Contents

The following table represents the Company's disclosure regarding the length of time that securities available for sale with temporary impairment were in an unrealized loss position at March 31, 2012 and December 31, 2011 (in thousands):

	March 31, 2012 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Mortgage-backed securities	\$ 204,869	(1,074)	12,923	(736)	217,792	(1,810)
State and municipal obligations	517	(2)			517	(2)
	\$ 205,386	(1,076)	12,923	(736)	218,309	(1,812)

	December 31, 2011 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Mortgage-backed securities	\$ 64,838	(278)	12,453	(1,913)	77,291	(2,191)
State and municipal obligations	777	(5)			777	(5)
Agency notes	5,032	(14)			5,032	(14)
	\$ 70,647	(297)	12,453	(1,913)	83,100	(2,210)

The temporary loss position associated with debt securities is the result of changes in interest rates relative to the coupon of the individual security and changes in credit spreads. In addition, there remains a lack of liquidity in certain sectors of the mortgage-backed securities market. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company does not have the intent to sell securities in a temporary loss position at March 31, 2012, and it is more likely than not that the Company will not be required to sell the securities before the anticipated recovery.

The Company estimates loss projections for each security by stressing the individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether other-than-temporary impairment existed during the three months ended March 31, 2012.

Table of Contents**Investment Securities Held to Maturity**

The following table presents the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for investment securities held to maturity at March 31, 2012 and December 31, 2011 (in thousands):

	March 31, 2012			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 3,947	32	(2)	3,977
Mortgage-backed securities	18,777	814		19,591
State and municipal obligations	320,429	15,698	(486)	335,641
Corporate obligations	8,516	297	(6)	8,807
	\$ 351,669	16,841	(494)	368,016

	December 31, 2011			Fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Agency obligations	\$ 3,647	36		3,683
Mortgage-backed securities	22,321	859		23,180
State and municipal obligations	314,108	16,863	(69)	330,902
Corporate obligations	8,242	296	(7)	8,531
	\$ 348,318	18,054	(76)	366,296

The Company generally purchases securities for long-term investment purposes, and differences between amortized cost and fair values may fluctuate during the investment period. For the three months ended March 31, 2012, the Company recognized a gain of \$23,000 related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling \$2,731,000. For the three months ended March 31, 2011, the Company recognized a gain of \$14,000 related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling \$1,276,000.

The amortized cost and fair value of investment securities held to maturity at March 31, 2012 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	March 31, 2012	
	Amortized cost	Fair value
Due in one year or less	\$ 51,538	51,768
Due after one year through five years	84,119	87,421
Due after five years through ten years	88,812	95,179
Due after ten years	108,423	114,057
Mortgage-backed securities	18,777	19,591
	\$ 351,669	368,016

The following table represents the Company's disclosure regarding the length of time that investment securities held to maturity with temporary impairment were in an unrealized loss position at March 31, 2012 and December 31, 2011 (in thousands)

	March 31, 2012 Unrealized Losses				Total	
	Less than 12 months		12 months or longer		Fair value	Gross unrealized losses
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses		
Agency obligations	\$ 298	(2)			298	(2)
State and municipal obligations	19,048	(486)			19,048	(486)
Corporate obligations	788	(6)			788	(6)
	\$ 20,134	(494)			20,134	(494)

Table of Contents

	December 31, 2011 Unrealized Losses				Total Gross unrealized losses	
	Less than 12 months		12 months or longer			
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
State and municipal obligations	3,868	(63)	316	(6)	4,184	(69)
Corporate obligations	394	(7)			394	(7)
	\$ 4,262	(70)	316	(6)	4,578	(76)

Based on a review of the securities portfolio, the Company believes that as of March 31, 2012, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary. The review of the portfolio for other-than-temporary impairment considers the percentage and length of time the fair value of an investment is below book value, as well as general market conditions, changes in interest rates, credit risk, whether the Company has the intent to sell the securities and whether it is more likely than not that the Company would be required to sell the securities before the anticipated recovery.

Note 4. Loans Receivable and Allowance for Loan Losses

Loans receivable at March 31, 2012 and December 31, 2011 are summarized as follows (in thousands):

	March 31, 2012	December 31, 2011
Mortgage loans:		
Residential	\$ 1,297,437	1,308,635
Commercial	1,262,756	1,253,542
Multi-family	572,491	564,147
Construction	118,714	114,817
Total mortgage loans	3,251,398	3,241,141
Commercial loans	834,211	849,009
Consumer loans	571,010	560,970
Total gross loans	4,656,619	4,651,120
Premiums on purchased loans	5,621	5,823
Unearned discounts	(95)	(100)
Net deferred fees	(3,343)	(3,334)
	\$ 4,658,802	4,653,509

Table of Contents

The following table summarizes the aging of loans receivable by portfolio segment and class as follows (in thousands):

At March 31, 2012							Recorded Investment > 90 days accruing
30-59 Days	60-89 Days	Non-accrual	Total Past Due and Non- accrual	Current	Total Loans Receivable		
Mortgage loans:							
Residential	\$ 11,229	6,908	39,146	57,283	1,240,154	1,297,437

Consumer loans	5,276	1,908	8,533	15,717	545,253	560,970	
Total loans	\$ 24,721	11,525	122,549	158,795	4,492,325	4,651,120	

Within the loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The principal amount of these non-accrual loans was \$120.3 million and \$122.5 million at March 31, 2012 and December 31, 2011, respectively. Included in non-accrual loans were \$41.4 million and \$45.6 million of loans which were less than 90 days past due at March 31, 2012 and December 31, 2011, respectively. There were no loans ninety days or greater past due and still accruing interest at March 31, 2012, or December 31, 2011.

The Company defines an impaired loan as a non-homogenous loan greater than \$1.0 million for which it is probable, based on current information, that the Bank will not collect all amounts due under the contractual terms of the loan agreement. Impaired loans also include all loans modified as troubled debt restructurings (TDRs). A loan is deemed to be a TDR when a loan modification resulting in a concession is made by the Bank in an effort to mitigate potential loss arising from a borrower's financial difficulty. Smaller balance homogeneous loans, including residential mortgages and other consumer loans, are evaluated collectively for impairment and are excluded from the definition of impaired loans, unless modified as TDRs. The Company separately calculates the reserve for loan losses on impaired loans. The Company may recognize impairment of a loan based upon (1) the present value of expected cash flows discounted at the effective interest rate; or (2) if a loan is collateral dependent, the fair value of collateral; or (3) the market price of the loan. Additionally, if impaired loans have risk characteristics in common, those loans may be aggregated and historical statistics may be used as a means of measuring those impaired loans.

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The Company uses third-party appraisals to determine the fair value of the underlying collateral in its analyses of collateral dependent impaired loans. A third party appraisal is generally ordered as soon as a loan is designated as a collateral dependent impaired loan and is updated annually or more frequently, if required.

Table of Contents

A specific allocation of the allowance for loan losses is established for each collateral dependent impaired loan with a carrying balance greater than the collateral's fair value, less estimated costs to sell. Charge-offs are generally taken for the amount of the specific allocation when operations associated with the respective property cease and it is determined that collection of amounts due will be derived primarily from the disposition of the collateral. At each fiscal quarter end, if a loan is designated as a collateral dependent impaired loan and the third party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management's knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value. The Company believes there have been no significant time lapses during the process described.

At March 31, 2012, there were 79 impaired loans totaling \$111.6 million, of which 57 loans totaling \$74.0 million were TDRs. Included in this total were 46 TDRs to 42 borrowers totaling \$49.9 million that were performing in accordance with their restructured terms and which continued to accrue interest at March 31, 2012. At December 31, 2011, there were 65 impaired loans totaling \$103.2 million, of which 48 loans totaling \$63.1 million were TDRs. Included in this total were 38 TDRs to 36 borrowers totaling \$38.9 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2011.

Loans receivable summarized by portfolio segment and impairment method are as follows (in thousands):

	At March 31, 2012			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments
Individually evaluated for impairment	\$ 75,698	35,249	616	111,563
Collectively evaluated for impairment	3,175,700	798,962	570,394	4,545,056
Total	\$ 3,251,398	834,211	571,010	4,656,619

	At December 31, 2011			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments
Individually evaluated for impairment	\$ 76,275	26,974		103,249

Total	\$ 39,443	25,381	5,515	70,339	4,012	74,351
-------	-----------	--------	-------	--------	-------	--------

Table of Contents

Loan modifications to borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, the Company attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following tables present the number of loans modified as TDRs during the three months ended March 31, 2012 and their balances immediately prior to the modification date and post-modification as of March 31, 2012.

Troubled Debt Restructurings	Number of Loans	Three Months Ended March 31, 2012	
		Pre-Modification Outstanding Recorded Investment (\$ in thousands)	Post-Modification Outstanding Recorded Investment
Mortgage loans:			
Residential	5	\$ 1,173	1,008
Commercial			
Total mortgage loans	5	1,173	1,008
Commercial loans	3	10,261	10,261
Consumer loans	1	54	54
Total restructured loans	9	\$ 11,488	11,323

All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. Estimated collateral values of collateral dependent impaired loans modified during the three months ended March 31, 2012 exceeded the carrying amounts of such loans. As a result, there were no charge-offs recorded on collateral dependent impaired loans presented in the preceding tables for the three months ended March 31, 2012. The allowance for loan losses associated with the TDRs presented in the preceding tables totaled \$746,000 at March 31, 2012, and was included in the allowance for loan losses for loans individually evaluated for impairment.

The TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 5.45 percent, compared to a rate of 6.45 percent prior to modification for the three months ended March 31, 2012.

The following table presents loans modified as TDRs within the previous 12 months from March 31, 2012, and for which there was a payment default (90 days or more past due) during the quarter ended March 31, 2012:

Troubled Debt Restructurings	March 31, 2012	
	Number of Loans	Outstanding Recorded Investment (\$ in thousands)
Subsequently Defaulted		
Mortgage loans:		
Residential	4	\$ 791
Commercial		
Multi-family		
Construction		
Total mortgage loans	4	791
Commercial loans		

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Consumer loans	1	44
Total restructured loans	5	835

TDRs that subsequently default are considered collateral dependent impaired loans and are evaluated for impairment based on the estimated fair value of the underlying collateral less expected selling costs.

Table of Contents

The activity in the allowance for loan losses by portfolio segment for the three months ended March 31, 2011 is as follows (in thousands):

	Three Months Ended March 31, 2012					
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments	Unallocated	Total

Specific allocations of the allowance for loan losses attributable to impaired loans totaled \$7,985,000 and \$9,326,000 at March 31, 2012 and December 31, 2011, respectively. At March 31, 2012 and December 31, 2011, impaired loans for which there was no related allowance for loan losses totaled \$46,276,000 and \$25,983,000, respectively. The average balances of impaired loans during the three months ended March 31, 2012, was \$115,534,000.

The Company utilizes an internal nine-point risk rating system to summarize its loan portfolio into categories with similar characteristics. Loans deemed to be acceptable quality (pass) are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

be of questionable quality are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi-family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in his or her portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and by the Credit Administration Department. The risk ratings are also confirmed through periodic

Table of Contents

loan review examinations, which are currently performed by an independent third party. Reports concerning periodic loan review examinations by the independent third party are presented directly to both the Audit and Risk Committees of the Board of Directors.

Note 6. Components of Net Periodic Benefit Cost

The Bank has a noncontributory defined benefit pension plan (the Plan) covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003. The Plan was frozen on April 1, 2003. All participants in the Plan are 100% vested. The Plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006.

Table of Contents

Net periodic benefit (increase) cost for the three months ended March 31, 2012 and 2011 include the following components (in thousands):

	Pension		Other post-retirement	
	Three months ended March 31,			
	2012	2011	2012	2011
Service cost	\$		\$ 63	40
Interest cost	322	313	261	253
Expected return on plan assets	(645)	(561)		
Amortization of prior service cost			(1)	(1)
Amortization of the net loss (gain)	357	180	3	(106)
Net periodic benefit cost (increase)	\$ 34	(68)	\$ 326	186

The Company previously disclosed in its consolidated financial statements for the year ended December 31, 2011, that it does not expect to contribute to the Plan in 2012. As of March 31, 2012, no contributions to the Plan have been made.

The net periodic benefit costs for pension benefits and other post-retirement benefits for the three months ended March 31, 2012 were calculated using the actual January 1, 2012 pension valuation and the estimated results of the other post-retirement benefits January 1, 2012 valuations.

Note 7. Impact of Recent Accounting Pronouncements

Effective March 31, 2012, the Company adopted guidance regarding the presentation of comprehensive income. In June 2011, FASB issued guidance providing an entity with the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both options, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. As originally issued, ASU 2011-5 requires entities to present reclassification adjustments out of accumulated other comprehensive income by component in the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements). This requirement was deferred by ASU 2011-12, Comprehensive Income (Topic 220) Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards. ASU No. 2011-05 is effective for all interim and annual periods beginning on or after December 15, 2011 with early adoption permitted, and must be applied retrospectively. The Company presented comprehensive income in a separate consolidated statement of comprehensive income for the three months ended March 31, 2012 and 2011.

Table of Contents

In May 2011, the FASB issued guidance which results in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP and International Financial Reporting Standards. This guidance is to be applied prospectively and is effective during interim and annual periods beginning after December 15, 2011. Early adoption was not permitted. The Company adopted this guidance effective March 31, 2012, and it did not have a material effect on the Company's consolidated statement of condition or results of operations.

In April 2011, the FASB issued guidance to improve financial reporting of repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. The amendments to this guidance remove from the assessment of effective control: (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. Other criteria applicable to the assessment of effective control are not changed by this new guidance. Those criteria indicate that the transferor is deemed to have maintained effective control over the financial assets transferred (and thus must account for the transaction as a secured borrowing) for agreements that both entitle and obligate the transferor to repurchase or redeem the financial assets before their maturity if all of the following conditions are met: (1) the financial assets to be repurchased or redeemed are the same or substantially the same as those transferred; (2) the agreement is to repurchase or redeem them before maturity, at a fixed or determinable price; and (3) the agreement is entered into contemporaneously with, or in contemplation of, the transfer. This guidance became effective for the first interim or annual period beginning on or after December 15, 2011, and should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption was not permitted. The adoption of this guidance did not have a material effect on the Company's consolidated statement of condition or results of operations.

Note 8. Fair Value Measurements

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value.

Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

- Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Table of Contents

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

Assets Measured at Fair Value on a Recurring Basis

The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of March 31, 2012 and December 31, 2011.

Securities Available for Sale

For securities available for sale, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also may hold equity securities and debt instruments issued by the U.S. government and U.S. government-sponsored agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 inputs.

Assets Measured at Fair Value on a Non-Recurring Basis

The valuation techniques described below were used to estimate fair value of financial instruments measured on a non-recurring basis as of March 31, 2012 and December 31, 2011.

For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell of up to 6%. The Company classifies these loans as Level 3 within the fair value hierarchy.

Table of Contents

Assets acquired through foreclosure or deed in lieu of foreclosure are carried at fair value, less estimated costs to sell of up to 6%. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value, less estimated costs to sell, is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.

There were no changes to the valuation techniques for fair value measurements as of March 31, 2012 and December 31, 2011.

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of March 31, 2012 and December 31, 2011, by level within the fair value hierarchy.

(Dollars in thousands)	Fair Value Measurements at Reporting Date Using:			
	March 31, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Agency obligations	\$ 92,457	92,457		
Mortgage-backed securities	1,289,525		1,289,525	
State and municipal obligations	11,572		11,572	
Corporate obligations	6,075		6,075	
Equity securities	332	332		
	\$ 1,399,961	92,789	1,307,172	

Measured on a non-recurring basis:

Loans measured for impairment based on the fair value of the underlying collateral	\$ 54,315			54,315
Foreclosed assets	14,440			14,440
	\$ 68,755			68,755

(Dollars in thousands)	Fair Value Measurements at Reporting Date Using:			
	December 31, 2011	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Agency obligations	\$ 105,558	105,558		
Mortgage-backed securities	1,251,003		1,251,003	
State and municipal obligations	11,614		11,614	
Corporate obligations	7,636		7,636	
Equity securities	308	308		
	\$ 1,376,119	105,866	1,270,253	

Measured on a non-recurring basis:

Loans measured for impairment based on the fair value of the underlying collateral	\$ 56,620			56,620
Foreclosed assets	12,802			12,802

\$ 69,422

69,422

Table of Contents

There were no transfers between Level 1 and Level 2 during the three months ended March 31, 2012.

Other Fair Value Disclosures

The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value and the following is a description of valuation methodologies used for those assets and liabilities.

Cash and Cash Equivalents

For cash and due from banks, federal funds sold and short-term investments, the carrying amount approximates fair value.

Investment Securities Held to Maturity

For investment securities held to maturity fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy.

FHLB-NY Stock

The carrying value of FHLB-NY stock was its cost. The fair value of FHLB-NY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non-performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflect the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date. The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3.

Table of Contents

The fair value for significant non-performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. The Company classifies the estimated fair value of its non-performing loan portfolio as Level 3.

Deposits

The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2.

Borrowed Funds

The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy.

Commitments to Extend Credit and Letters of Credit

The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value estimates of commitments to extend credit and letters of credit are deemed immaterial.

There were no changes to the valuation techniques for fair value measurements as of March 31, 2012 and December 31, 2011.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

Table of Contents

The following tables present the Company's financial instruments at their carrying and fair values as of March 31, 2012 and December 31, 2011. Fair values are presented by level within the fair value hierarchy.

(Dollars in thousands)	Carrying value	Fair value	Fair Value Measurements at March 31, 2012 Using:		
			Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.
Forward Looking Statements**

Certain statements contained herein are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as may, will, believe, expect, estimate, anticipate, continue, or similar terms, variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity.

The Company cautions readers not to place undue reliance on any such forward-looking statements which speak only as of the date made. The Company also advises readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not undertake and specifically declines any obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies

The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company's consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the following as critical accounting policies:

Adequacy of the allowance for loan losses

Goodwill valuation and analysis for impairment

Valuation of securities available for sale and impairment analysis

Valuation of deferred tax assets

The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses.

The Company's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectibility of principal may not be reasonably assured. For residential mortgage and consumer loans, this is determined primarily by delinquency and collateral values. For commercial real estate and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis.

Table of Contents

As part of its evaluation of the adequacy of the allowance for loan losses, each quarter management prepares an analysis that categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating.

When assigning a risk rating to a loan, management utilizes a nine point internal risk rating system. Loans deemed to be acceptable quality are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of questionable quality are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial and construction loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Administration Department. A sample of risk ratings are also reviewed and confirmed through the Loan Review function and periodically, by the Credit Committee in the credit renewal or approval process.

Management assigns general valuation allowance (GVA) percentages to each risk rating category for use in allocating the allowance for loan losses, giving consideration to historical loss experience by loan type and other qualitative or environmental factors such as trends and levels of delinquencies, impaired loans, charge-offs, recoveries, loan volume, as well as, the national and local economic trends and conditions. The appropriateness of these percentages is evaluated by management at least annually and monitored on a quarterly basis, with changes made when they are required. In the first quarter of 2012, management completed its most recent evaluation of the GVA percentages. As a result of that evaluation, GVA percentages applied to the marine portfolio were increased to reflect an increase in historical loss experience.

Management believes the primary risks inherent in the portfolio are a continued decline in the economy, generally, a continued decline in real estate market values, rising unemployment or a protracted period of unemployment at current elevated levels, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio.

Although management believes that the Company has established and maintained the allowance for loan losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing and commercial real estate markets and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies

Table of Contents

periodically review the adequacy of the Company's allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

Additional critical accounting policies relate to judgments about other asset impairments, including goodwill, investment securities and deferred tax assets. Goodwill is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates.

The Company qualitatively determines whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing Step 1 of the goodwill impairment test. If a company concludes that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the entity would be required to perform Step 1 of the assessment and then, if needed, Step 2 to determine whether goodwill is impaired. However, if it is more likely than not that the fair value of the reporting unit is more than its carrying amount, the entity does not need to apply the two-step impairment test. For this analysis, the Reporting Unit is defined as the Bank, which includes all core and retail banking operations of the Company but excludes the assets, liabilities, equity, earnings and operations held exclusively at the Company level. The guidance provides certain factors a company should consider in its qualitative assessment in determining whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. The factors include:

Macroeconomic conditions, such as deterioration in economic condition and limited access to capital.

Industry and market considerations, such as increased competition, regulatory developments and decline in market-dependent multiples.

Cost factors, such as increased labor costs, cost of materials and other operating costs.

Overall financial performance, such as declining cash flows and decline in revenue or earnings.

Other relevant entity-specific events, such as changes in management, strategy or customers, litigation and contemplation of bankruptcy.

Reporting unit events, such as selling or disposing a portion of a reporting unit and a change in composition of assets.

The Company completed its annual goodwill impairment test as of September 30, 2011. Based upon its qualitative assessment of goodwill, the Company concluded it is more likely than not that the fair value of the reporting unit exceeds its carrying amount, goodwill is not impaired and no further quantitative analysis (Step 1) is warranted.

The Company may, based upon its qualitative assessment, or at its option, perform the two-step process to evaluate the potential impairment of goodwill. If, based upon Step 1, the fair value of the Reporting Unit exceeds its carrying amount, goodwill of the Reporting Unit is considered not impaired. However, if the carrying amount of the Reporting Unit exceeds its fair value, an additional test must be performed. The second step test compares the implied fair value of the Reporting Unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

Table of Contents

At March 31, 2012, the carrying value of goodwill was \$353.3 million. Management has evaluated potential goodwill impairment triggers and based upon its interim qualitative assessment of goodwill, has determined that goodwill is not impaired and no further analysis is warranted.

The Company's available for sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 3 to the consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. The Company conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other-than-temporary. In this evaluation, if such a decline were deemed other-than-temporary, the Company would measure the total credit-related component of the unrealized loss, and recognize that portion of the loss as a charge to current period earnings. The remaining portion of the unrealized loss would be recognized as an adjustment to accumulated other comprehensive income. The fair value of the securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the fair value of fixed-rate securities decreases and as interest rates fall, the fair value of fixed-rate securities increases. Turmoil in the credit markets resulted in a lack of liquidity in certain sectors of the mortgage-backed securities market. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company determines if it has the intent to sell these securities or if it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. If either exists, the decline in value is considered other-than-temporary. In this evaluation, the Company did not recognize other-than-temporary securities impairment losses in earnings for the three months ended March 31, 2012 and 2011.

The determination of whether deferred tax assets will be realizable is predicated on the reversal of existing deferred tax liabilities, utilization against carryback years and estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. At March 31, 2012, the Company maintained a valuation allowance of \$246,000, related to unused capital loss carryforwards.

COMPARISON OF FINANCIAL CONDITION AT MARCH 31, 2012 AND DECEMBER 31, 2011

Total assets increased \$23.7 million, or 0.3%, to \$7.12 billion at March 31, 2012, from \$7.10 billion at December 31, 2011. The increase was primarily due to increases in securities available for sale, investment securities held to maturity, net loans and foreclosed assets, partially offset by a decrease in other assets.

Total investments increased \$27.0 million, or 1.5%, to \$1.79 billion at March 31, 2012, from \$1.76 billion at December 31, 2011. The increase was primarily due to purchases of mortgage-backed securities, partially offset by principal repayments on mortgage-backed securities, the sale of specific mortgage-backed securities which had a high risk of prepayment and maturities of municipal and agency bonds.

Total loans increased \$5.6 million, or 0.1%, during the three months ended March 31, 2012 to \$4.58 billion. Loan originations totaled \$347.0 million and loan purchases totaled \$19.1 million for the three months ended March 31, 2012. The loan portfolio had net increases of \$17.6 million in commercial and multi-family mortgage loans, \$10.0 million in consumer loans and \$3.9 million in construction loans, which were partially offset by decreases of \$14.8 million in commercial loans and \$11.2 million in residential mortgage loans. Commercial real estate, commercial and construction loans represented 59.9% of the loan portfolio at March 31, 2012, compared to 59.8% at December 31, 2011.

Table of Contents

The Company does not originate or purchase sub-prime or option ARM loans. Prior to September 30, 2008, the Company originated Alt-A mortgages in the form of stated income loans with a maximum loan-to-value ratio of 50% on a limited basis. The balance of these Alt-A loans at March 31, 2012 was \$12.0 million. Of this total, 11 loans totaling \$3.6 million were 90 days or more delinquent. General valuation reserves of 6.5%, or \$237,000, were allocated to these loans at March 31, 2012.

The Company participates in loans originated by other banks, including participations designated as Shared National Credits (SNCs). The Company's gross commitments and outstanding balances as a participant in SNCs were \$73.0 million and \$52.4 million, respectively, at March 31, 2012. The Company's participations in SNCs included two relationships classified as substandard (rated 7) under the Company's loan risk rating system with gross commitments and outstanding balances of \$17.1 million at March 31, 2012. Of these adversely classified SNCs, one relationship consisted of a commercial construction loan and the other was a commercial mortgage loan. Both properties are located in New York City. All of the Company's SNCs were current as to the payment of principal and interest at March 31, 2012.

The Company had outstanding junior lien mortgages totaling \$268.7 million at March 31, 2012. Of this total, 54 loans totaling \$5.9 million were 90 days or more delinquent. General valuation reserves of 10%, or \$590,000, were allocated to these loans at March 31, 2012.

The Company had outstanding indirect marine loans totaling \$48.8 million at March 31, 2012. Of this total, 2 loans totaling \$0.2 million were 90 days or more delinquent. General valuation reserves of 60%, or \$0.1 million were allocated to these loans at March 31, 2012. Marine loans are currently made only on a direct, limited accommodation basis to existing customers.

The following table sets forth information regarding the Company's non-performing assets as of March 31, 2012 and December 31, 2011 (in thousands):

	March 31, 2012	December 31, 2011
Mortgage loans:		
Residential	\$ 39,146	40,386
Commercial	29,698	29,522
Multi-family		997
Construction	10,889	11,018
Total mortgage loans	79,733	82,923
Commercial loans	32,621	32,093
Consumer loans	7,989	8,533
Total non-performing loans	120,343	122,549
Foreclosed assets	14,440	12,802
Total non-performing assets	\$ 134,783	135,351

The following table sets forth information regarding the Company's 60-89 day delinquent loans as of March 31, 2012 and December 31, 2011 (in thousands):

	March 31, 2012	December 31, 2011
Mortgage loans:		
Residential	\$ 6,908	7,936
Commercial		1,155
Multi-family	977

Total mortgage loans	7,885	9,091
Commercial loans	997	526
Consumer loans	2,369	1,908

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Total 60-89 day delinquent loans	\$	11,251	11,525
----------------------------------	----	--------	--------

Table of Contents

At March 31, 2012, the allowance for loan losses totaled \$74.0 million, or 1.59% of total loans, compared with \$74.4 million, or 1.60% of total loans at December 31, 2011. Total non-performing loans were \$120.3 million, or 2.58% of total loans at March 31, 2012, compared to \$122.5 million, or 2.63% of total loans at December 31, 2011.

The decrease in non-performing loans at March 31, 2012, compared with the trailing quarter, was largely due to a \$1.2 million decrease in non-performing residential loans, a \$997,000 decrease in non-performing multi-family loans and a \$544,000 decrease in non-performing consumer loans, partially offset by a \$528,000 increase in non-performing commercial loans and a \$176,000 increase in non-performing commercial mortgage loans.

At March 31, 2012, the Company held \$14.4 million of foreclosed assets, compared with \$12.8 million at December 31, 2011. Foreclosed assets at March 31, 2012 are carried at fair value based on recent appraisals and valuation estimates, less estimated selling costs. Foreclosed assets consisted of \$7.1 million of residential real estate, \$6.4 million of commercial real estate and \$876,000 of marine vessels.

Non-performing assets totaled \$134.8 million, or 1.89% of total assets at March 31, 2012, compared to \$135.4 million, or 1.91% of total assets at December 31, 2011.

Other assets decreased \$8.2 million, or 10.4%, to \$70.6 million at March 31, 2012, from \$78.8 million at December 31, 2011, primarily due to the amortization of prepaid FDIC insurance and an increase in income tax accruals.

Total deposits increased \$38.3 million, or 0.7%, during the three months ended March 31, 2012 to \$5.19 billion. Core deposits, which consists of savings and demand deposit accounts, increased \$77.2 million, or 1.9%, to \$4.11 billion at March 31, 2012. The majority of the core deposit increase was in interest bearing demand and savings deposits. Time deposits decreased \$38.9 million, or 3.4%, to \$1.09 billion at March 31, 2012, with the majority of the decrease occurring in the 18- and 24-month maturity categories. The Company remains focused on developing core deposit relationships, while strategically permitting the run-off of time deposits. Core deposits represented 79.0% of total deposits at March 31, 2012, compared to 78.1% at December 31, 2011.

Borrowed funds were reduced \$27.1 million, or 2.9% during the three months ended March 31, 2012, to \$893.1 million, as core deposit growth replaced wholesale funding. Borrowed funds represented 12.5% of total assets at March 31, 2012, a reduction from 13.0% at December 31, 2011.

Total stockholders' equity increased \$13.0 million, or 1.4%, to \$965.5 million at March 31, 2012. This increase was due to net income of \$18.4 million, a \$2.5 million increase due to shares issued through the Company's dividend reinvestment plan and a net increase due to the allocation of shares to stock-based compensation plans of \$1.6 million, partially offset by \$7.3 million in cash dividends, common stock purchases of \$1.9 million and a net decrease of \$255,000 in other comprehensive income. At March 31, 2012, book value per share and tangible book value per share were \$16.04 and \$10.06, respectively, compared with \$15.88 and \$9.87, respectively, at December 31, 2011. Common stock repurchases during the quarter ended March 31, 2012, totaled 139,845 shares at an average cost of \$13.86 per share. At March 31, 2012, 1.6 million shares remained eligible for repurchase under the current stock repurchase program authorized by the Company's Board of Directors.

Liquidity and Capital Resources. Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases, deposit outflows and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of investments, cash flows from mortgage-backed securities and the ability to borrow funds from the FHLB of New York and approved broker dealers.

Table of Contents

Cash flows from loan payments and maturing investment securities are a fairly predictable source of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage-backed securities and deposit flows.

As of March 31, 2012, the Bank and the Company exceeded all current minimum regulatory capital requirements as follows:

	At March 31, 2012			
	Required		Actual	
	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)			
Bank:				
Regulatory Tier 1 leverage capital	\$ 269,719	4.00%	\$ 516,670	7.66%
Tier 1 risk-based capital	181,014	4.00	516,670	11.42
Total risk-based capital	362,029	8.00	573,452	12.67
Company:				
Regulatory Tier 1 leverage capital	\$ 269,727	4.00%	\$ 597,677	8.86%
Tier 1 risk-based capital	181,007	4.00	597,677	13.21
Total risk-based capital	362,015	8.00	654,457	14.46

Table of Contents**COMPARISON OF OPERATING RESULTS FOR THE THREE MONTHS ENDED MARCH 31, 2012 AND 2011**

General. The Company reported net income of \$18.4 million for the three months ended March 31, 2012, compared to net income of \$12.9 million for the same period in 2011. Basic and diluted earnings per share were \$0.32 for the quarter ended March 31, 2012, compared with basic and diluted earnings per share of \$0.23 for the same quarter in 2011. The improvement in net income for the first quarter of 2012 compared to the prior year period was due in part to a \$2.9 million reduction in the provision for loan losses resulting from improvement in the weighted average risk rating of the portfolio, as well as decreases in both early stage loan delinquencies and non-performing loan formation. The Company also recognized \$2.2 million in gains on the strategic sale of specific mortgage-backed securities identified as having a significant risk of accelerated prepayment. Further contributing to the improvement in net income versus the prior year period was an increase in net interest income of \$1.4 million primarily due to an increase in average loans outstanding, funded by growth in average core deposits. These increases were partially offset by a \$1.4 million increase in non-interest expense and a \$2.9 million increase in income tax expense.

Net Interest Income. Total net interest income increased \$1.4 million, or 2.6%, to \$54.8 million for the quarter ended March 31, 2012, compared to \$53.4 million for the quarter ended March 31, 2011. Interest income for the first quarter of 2012 decreased \$2.6 million, or 3.8%, to \$66.9 million, compared to \$69.5 million for the same period in 2011. Interest expense decreased \$4.0 million, or 24.9%, to \$12.0 million for the quarter ended March 31, 2012, compared to \$16.0 million for the quarter ended March 31, 2011. The improvement in net interest income resulted from the favorable effects of an increase in average interest earning assets, primarily average loans outstanding, funded with the growth in lower-cost core deposits, largely interest and non-interest bearing demand deposits. This improvement in net interest income was partially offset by compression in the net interest margin.

The Company's net interest margin decreased 9 basis points to 3.42% for the quarter ended March 31, 2012, compared to 3.51% for the quarter ended March 31, 2011. The net interest margin for the quarter ended March 31, 2012, increased 3 basis points from the trailing quarter of 3.39%. The net interest spread was 3.29% for the quarter ended March 31, 2012, compared with 3.25% for the trailing quarter and 3.35% for the same period in 2011. The decrease in the net interest margin for the three months ended March 31, 2012, versus the same quarter in 2011, was primarily attributable to a reduction in the weighted average yield on interest-earning assets, while the increase in the net interest margin compared to the trailing quarter ended December 31, 2011, was principally due to a decline in the weighted average cost of interest-bearing liabilities.

The average yield on interest-earning assets decreased 39 basis points to 4.19% for the quarter ended March 31, 2012, compared to 4.58% for the comparable quarter in 2011. The yield on interest-earning assets decreased 5 basis points from 4.24% for the quarter December 31, 2011.

The average cost of interest-bearing liabilities decreased 33 basis points to 0.90% for the quarter ended March 31, 2012, compared to 1.23% for the quarter ended March 31, 2011. Compared to the trailing quarter, the average cost of interest-bearing liabilities decreased 9 basis points from 0.99%.

The average balance of net loans increased \$231.0 million, or 5.3%, to \$4.58 billion for the quarter ended March 31, 2012, compared to \$4.35 billion for the same period in 2011. Income on all loans secured by real estate decreased \$1.3 million, or 3.3%, to \$39.0 million for the three months ended March 31, 2012, compared to \$40.3 million for the three months ended March 31, 2011. Interest income on commercial loans increased \$288,000, or 2.9%, to \$10.4 million for the quarter ended March 31, 2012, compared to \$10.1 million for the quarter ended March 31, 2011. Consumer loan interest income decreased \$230,000, or 3.5%, to \$6.3 million for the quarter ended March 31, 2012, compared to \$6.5 million for the quarter ended March 31, 2011. The average loan yield for the three months ended March 31, 2012, was 4.83%, compared with 5.24% for the same period in 2011, reflecting decreases in market interest rates in all loan categories.

Table of Contents

Interest income on investment securities held to maturity decreased \$175,000, or 5.7%, to \$2.9 million for the quarter ended March 31, 2012, compared to \$3.1 million for the quarter ended March 31, 2011. Average investment securities held to maturity totaled \$343.7 million for the quarter ended March 31, 2012, compared with \$342.7 million for the same period last year, and the average yield earned on investment securities held to maturity decreased to 3.40% for the quarter ended March 31, 2012, compared with 3.61% for the same period in 2011.

Interest income on securities available for sale and dividends on FHLB stock decreased \$1.2 million, or 12.2%, to \$8.3 million for the quarter ended March 31, 2012, compared to \$9.5 million for the quarter ended March 31, 2011. Average securities available for sale increased to \$1.37 billion for the three months ended March 31, 2012, compared with \$1.33 billion for the same period in 2011. The decrease in interest income from securities available for sale was attributable to a reduction in the average yield earned, partially offset by the increase in the average balance. The average yield on securities available for sale was 2.29% for the three months ended March 31, 2012, compared with 2.69% for the same period in 2011. The decrease in the yield on securities available for sale for the three months ended March 31, 2012, compared with the same period in 2011, was attributable to the reinvestment of cash flows from sales, maturities and paydowns at lower market rates and to a lesser extent, the impact of accelerated premium amortization related to higher repayments on mortgage backed securities.

The average balance of interest-bearing core deposit accounts increased \$333.7 million, or 10.9%, to \$3.40 billion for the quarter ended March 31, 2012, compared to \$3.06 billion for the quarter ended March 31, 2011. Average certificate of deposit account balances decreased \$160.1 million, or 12.6%, to \$1.11 billion for the quarter ended March 31, 2012, compared to \$1.27 billion for the same period in 2011. Interest paid on deposit accounts decreased \$2.8 million, or 28.8%, to \$7.0 million for the quarter ended March 31, 2012, compared to \$9.8 million for the quarter ended March 31, 2011. The average cost of interest-bearing deposits was 0.62% for the three months ended March 31, 2012, compared with 0.92% for the three months ended March 31, 2011, reflecting market interest rate reductions and a shift in deposit composition to lower-costing core deposit accounts. The Company remains focused on cultivating core deposit relationships, while strategically permitting the run-off of certain single-service time deposits.

Average borrowings decreased \$32.9 million, or 3.5%, to \$900.8 million for the quarter ended March 31, 2012, compared to \$933.7 million for the quarter ended March 31, 2011, as core deposit growth replaced wholesale funding. Interest paid on borrowed funds decreased \$1.2 million, or 18.8%, to \$5.0 million for the quarter ended March 31, 2012, from \$6.2 million for the quarter ended March 31, 2011. The average cost of borrowings decreased to 2.25% for the three months ended March 31, 2012, compared with 2.70% for the three months ended March 31, 2011.

Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable credit losses inherent in the loan portfolio. In determining the level of the allowance for loan losses, management considers past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance. The Company's emphasis on continued diversification of the loan portfolio through the origination of commercial loans has been one of the more significant factors management has considered in evaluating the allowance for loan losses and the provision for loan losses for the past several years. In the event the Company further increases the amount of such types of loans in the portfolio, management may determine that additional or increased provisions for loan losses are necessary, which could adversely affect earnings.

The provision for loan losses was \$5.0 million for the three months ended March 31, 2012, compared with \$7.9 million for the three months ended March 31, 2011. The decrease in the provision for loan losses for

Table of Contents

the three months ended March 31, 2012, compared with the same period in 2011, was primarily attributable to improvement in the weighted average risk rating of the loan portfolio, as well as decreases in both early stage loan delinquencies and non-performing loan formation during the quarter ended March 31, 2012. For the three-month period ended March 31, 2012, the Company had net charge-offs of \$5.4 million, compared with net charge-offs of \$3.9 million for the same period in 2011. The allowance for loan losses was \$74.0 million, or 1.59% of total loans at March 31, 2012, compared to \$74.4 million, or 1.60% of total loans at December 31, 2011, and \$72.7 million, or 1.63% of total loans at March 31, 2011.

Non-Interest Income. Non-interest income totaled \$12.7 million for the quarter ended March 31, 2012, an increase of \$5.6 million, or 77.5%, compared to the same period in 2011. Fee income increased \$2.5 million to \$8.1 million for the three months ended March 31, 2012, from \$5.6 million for the three months ended March 31, 2011, due primarily to increases in commercial loan prepayment fee income and increased wealth management fees attributable to Beacon Trust Company (Beacon), acquired in August 2011. Net gains on securities transactions totaled \$2.2 million for the three months ended March 31, 2012, compared to \$14,000 for the same period in 2011, as the Company identified and sold specific securities which had a high risk of accelerated prepayment. The proceeds from the sales were reinvested in similar securities with more stable projected cash flows. These increases were partially offset by lower deposit-based fee revenue. Additionally, other income increased \$920,000 for the three months ended March 31, 2012, compared to the same period in 2011, primarily due to income associated with the discontinuance of the Company's debit card rewards program, an increase in gains resulting from a larger number of loan sales and increased net gains on the sale of foreclosed real estate.

Non-Interest Expense. For the three months ended March 31, 2012, non-interest expense increased \$1.4 million, or 4.1%, to \$36.8 million, compared to \$35.4 million for the three months ended March 31, 2011. Compensation and benefits increased \$2.0 million for the quarter ended March 31, 2012, compared to the quarter ended March 31, 2011, due to annual merit increases and personnel added as a result of the Beacon acquisition, increased incentive compensation, increased post-retirement and pension costs and increased employee health and medical costs. Other operating expenses increased \$650,000, or 12.5%, to \$5.9 million for the quarter ended March 31, 2012, from \$5.2 million for the same period in 2011, due primarily to increased loan collection expense and additional operating expenses associated with Beacon. Data processing expense increased \$324,000 for the quarter ended March 31, 2012, compared to the same period in 2011, because of increased software maintenance and core processing fees. Additionally, advertising and promotion expense increased \$87,000 for the three months ended March 31, 2012, compared with same period last year. Partially offsetting these increases, FDIC insurance expense decreased \$490,000, to \$1.4 million for the three months ended March 31, 2012, from \$1.9 million for the same period in 2011, due to the change in assessment methodology in April 2011 from deposit-based to asset-based. Also, net occupancy expense decreased \$248,000 for the three months ended March 31, 2012, compared with the same period in 2011, primarily due to lower seasonal expenses attributable to the milder winter and reduced operating expenses resulting from the consolidation of the Company's administrative offices in April 2011. The amortization of intangibles decreased \$101,000 for the three months ended March 31, 2012, compared with the same period in 2011, due to scheduled reductions in the amortization of core deposit intangibles, partially offset by the amortization of the customer relationship intangible arising from the Beacon acquisition. During the quarter ended March 31, 2011, the Company recognized an impairment charge of \$807,000 related to the then-anticipated sale and relocation of its loan center, which was subsequently sold in November 2011.

The Company's annualized non-interest expense as a percentage of average assets was 2.08% for the quarter ended March 31, 2012, compared to 2.11% for the same period in 2011. The efficiency ratio (non-interest expense divided by the sum of net interest income and non-interest income) was 54.45% for the quarter ended March 31, 2012, compared with 58.32% for the same period in 2011.

Income Tax Expense. For the three months ended March 31, 2012, the Company's income tax expense was \$7.3 million, compared with \$4.4 million for the same period in 2011. The increase in income tax expense was a function of growth in pre-tax income from taxable sources. The Company's effective tax rate was 28.5% and 25.5% for the three months ended March 31, 2012 and 2011, respectively.

Table of Contents**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. While municipal securities may have maturities up to 15 years, other investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.

The Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income.

The Company's strategy for liabilities has been to maintain a stable core-funding base by focusing on core deposit account acquisition and increasing products and services per household. The Company's ability to retain maturing certificate of deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLB of New York during periods of pricing dislocation.

Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analyses capture changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the projections presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.

Specific assumptions used in the simulation model include:

Parallel yield curve shifts for market rates;

Current asset and liability spreads to market interest rates are fixed;

Traditional savings and interest bearing demand accounts move at 10% of the rate ramp in either direction;

Retail Money Market and Business Money Market accounts move at 25% and 75% of the rate ramp in either direction; respectively; and

Higher-balance demand deposit tiers and promotional demand accounts move at up to 75% of the rate ramp in either direction.

Table of Contents

The following table sets forth the results of a twelve-month net interest income projection model as of March 31, 2012 (dollars in thousands):

Change in Interest Rates in Basis Points (Rate Ramp)	Net Interest Income		
	Dollar Amount	Dollar Change	Percent Change
-100	207,671	(6,839)	(3.2)
Static	214,510		
+100	214,053	(457)	(0.2)
+200	209,257	(5,253)	(2.4)
+300	204,188	(10,322)	(4.8)

The preceding table indicates that, as of March 31, 2012, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease 4.8%, or \$10.3 million. In the event of a 100 basis point decrease in interest rates, net interest income is projected to decrease 3.2%, or \$6.8 million.

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of March 31, 2012 (dollars in thousands):

Change in Interest Rates (Basis Points)	Present Value of Equity			Present Value of Equity as Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change	Present Value Ratio	Percent Change
-100	1,236,185	2,895	0.2	16.6	(0.1)
Flat	1,233,290			16.6	
+100	1,182,603	(50,687)	(4.1)	16.1	(3.0)
+200	1,115,406	(117,884)	(9.6)	15.4	(7.2)
+300	1,028,505	(204,785)	(16.6)	14.4	(13.1)

The preceding table indicates that as of March 31, 2012, in the event of an immediate and sustained 300 basis point increase in interest rates, the present value of equity is projected to decrease 16.6%, or \$204.8 million. If rates were to decrease 100 basis points, the model forecasts a 0.2%, or \$2.9 million increase in the present value of equity.

Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

Item 4. CONTROLS AND PROCEDURES.

Under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

The Company is involved in various legal actions and claims arising in the normal course of business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company's financial condition and results of operations.

Item 1A. Risk Factors

There have been no material changes to the risk factors that were previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**ISSUER PURCHASES OF EQUITY SECURITIES**

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1)
January 1, 2012 Through January 31, 2012	5,796	\$ 14.22	5,796	1,767,534
February 1, 2012 Through February 29, 2012	36,349	14.88	36,349	1,731,185
March 1, 2012 Through March 31, 2012	97,700	13.46	97,700	1,633,485
Total	139,845	\$ 13.86	139,845	

- (1) On October 24, 2007, the Company's Board of Directors approved the purchase of up to 3,107,077 shares of its common stock under a seventh general repurchase program which commenced upon completion of the previous repurchase program. The repurchase program has no expiration date.

Item 6. Exhibits.

The following exhibits are filed herewith:

- 3.1 Certificate of Incorporation of Provident Financial Services, Inc. (Filed as an exhibit to the Company's Registration Statement on Form S-1, and any amendments thereto, with the Securities and Exchange Commission/Registration No. 333-98241.)
- 3.2 Amended and Restated Bylaws of Provident Financial Services, Inc. (Filed as an exhibit to the Company's December 31, 2011 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2012/File No. 001-31566)
- 4.1 Form of Common Stock Certificate of Provident Financial Services, Inc. (Filed as an exhibit to the Company's Registration Statement on Form S-1, and any amendments thereto, with the Securities and Exchange Commission/Registration No. 333-98241.)
- 10.1 Employment Agreement by and between Provident Financial Services, Inc and Christopher Martin dated September 23, 2009. (Filed as an exhibit to the Company's September 30, 2009 Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission on November 9, 2009/ File No. 001-31566.)
- 10.2 Form of Amended and Restated Change in Control Agreement between Provident Financial Services, Inc. and certain executive officers. (Filed as an exhibit to the Company's December 31, 2009 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 1, 2010 /File No. 001-31566.)
- 10.3 Amended and Restated Employee Savings Incentive Plan, as amended. (Filed as an exhibit to the Company's June 30, 2004 Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission /File No. 001-31566.)
- 10.4 Employee Stock Ownership Plan (Filed as an exhibit to the Company's Registration Statement on Form S-1, and any amendments thereto, with the Securities and Exchange Commission/Registration No. 333-98241) and Amendment No. 1 to the Employee Stock Ownership Plan (Filed as an exhibit to the Company's June 30, 2004 Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission /File No. 001-31566).
- 10.5 Supplemental Executive Retirement Plan of The Provident Bank. (Filed as an exhibit to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009/File No. 001-31566.)
- 10.6 Amended and Restated Supplemental Executive Savings Plan. (Filed as an exhibit to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009/File No. 001-31566.)
- 10.7 Retirement Plan for the Board of Managers of The Provident Bank. (Filed as an exhibit to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009 /File No. 001-31566.)
- 10.8 The Provident Bank Amended and Restated Voluntary Bonus Deferral Plan. (Filed as an exhibit to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009/File No. 001-31566.)
- 10.9 Provident Financial Services, Inc. Board of Directors Voluntary Fee Deferral Plan. (Filed as an exhibit to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009/File No. 001-31566.)
- 10.10 First Savings Bank Directors' Deferred Fee Plan, as amended. (Filed as an exhibit to the Company's September 30, 2004 Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission /File No. 001-31566.)
- 10.11 The Provident Bank Non-Qualified Supplemental Defined Contribution Plan. (Filed as an exhibit to the Company's May 27, 2010 Current Report on Form 8-K filed with the Securities and Exchange Commission on June 3, 2010/File No. 001-31566.)
- 10.12 Provident Financial Services, Inc. 2003 Stock Option Plan. (Filed as an exhibit to the Company's Proxy Statement for the 2003 Annual Meeting of Stockholders filed with the Securities and Exchange Commission on June 4, 2003/File No. 001-31566.)
- 10.13 Provident Financial Services, Inc. 2003 Stock Award Plan. (Filed as an exhibit to the Company's Proxy Statement for the 2003 Annual Meeting of Stockholders filed with the Securities and Exchange Commission on June 4, 2003/File No. 001-31566.)
