**Notes to Consolidated Financial Statements**

**for the quarter ended June 30, 2012 (unaudited)**

**Note 1 Accounting policies**

***Basis of presentation***

The unaudited interim financial information of Kellogg Company (the Company) included in this report reflects normal recurring adjustments that management believes are necessary for a fair statement of the results of operations, comprehensive income, financial position, equity and cash flows for the periods presented. This interim information should be read in conjunction with the financial statements and accompanying footnotes within the Company's 2011 Annual Report on Form 10-K.

The condensed balance sheet data at December 31, 2011 was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States. The results of operations for the quarterly period ended June 30, 2012 are not necessarily indicative of the results to be expected for other interim periods or the full year.

***New accounting standards***

***Presentation of Comprehensive Income.*** In June 2011, the Financial Accounting Standards Board (FASB) issued a new accounting standard requiring most entities to present items of net income and other comprehensive income either in one continuous statement referred to as the statement of comprehensive income or in two separate, but consecutive, statements of net income and comprehensive income. The update does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The new standard included a requirement to present reclassification adjustments out of accumulated other comprehensive income by component on the face of the financial statements. In December 2011, the reclassification requirement within the new standard was deferred until further guidance is issued on this topic. The new standard is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 and was adopted by the Company on a retrospective basis at the beginning of its 2012 fiscal year.

***Goodwill impairment testing.*** In September 2011, the FASB issued an updated accounting standard to allow entities the option to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under the updated standard an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The updated standard is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 and will be adopted by the Company in connection with its annual goodwill impairment evaluation in the fourth quarter of 2012.

**Note 2 Acquisitions, goodwill and other intangibles**

***Pringles® acquisition***

On May 31, 2012, the Company completed its acquisition of the *Pringles®* business (Pringles) from The Procter & Gamble Company (P&G) for \$2.695 billion, or \$2.684 billion net of cash and cash equivalents, subject to certain purchase price adjustments. Through June 30, 2012, the net purchase price adjustments have resulted in a reduction of the purchase price by approximately \$10 million. The purchase price, net of cash and cash equivalents, totals \$2.674 billion. The acquisition was accounted for under the purchase method and was financed through a combination of cash on hand, and short-term and long-term debt. The assets and liabilities of Pringles are included in the Consolidated Balance Sheet as of June 30, 2012 and the results of the Pringles operations subsequent to the acquisition date are included in the Consolidated Statement of Income.

The acquired assets and assumed liabilities include the following:

**Table of Contents**

	<b>\$ 2,674</b>

Goodwill of \$713 million is expected to be deductible for statutory tax purposes.

Goodwill is calculated as the excess of the purchase price over the fair value of the net assets recognized. The goodwill recorded as part of the acquisition primarily reflects the value of providing an established platform to leverage the Company's existing brands in the international snacks category, synergies expected to arise from the combined brand portfolios, as well as any intangible assets that do not qualify for separate recognition.

The above amounts represent the preliminary allocation of purchase price, which will include the allocation to reportable segments, and are subject to revision when appraisals are finalized, which is expected to occur during the remainder of 2012.

As part of the Pringles acquisition, we incurred \$31 million in transaction fees and other integration-related costs in the second quarter of 2012 which are recorded in selling, general and administrative (SGA). In addition, we incurred \$5 million in fees for a bridge financing facility which are recorded in other income (expense), net.

Pringles contributed net revenues of \$119 million and net earnings of \$7 million from June 1, 2012 through June 30, 2012. The unaudited pro forma combined historical second quarter and year-to-date results, as if Pringles had been acquired at the beginning of fiscal 2011 are estimated to be:

**Table of Contents**

The pro forma results include transaction and bridge financing costs, interest expense on the debt issued to finance the acquisition, amortization of the definite lived intangible assets, and depreciation based on estimated fair value and useful lives. The pro forma results are not necessarily indicative of what actually would have occurred if the acquisition had been completed as of the beginning of 2011, nor are they necessarily indicative of future consolidated results.

Changes in the carrying amount of goodwill including the preliminary allocation of goodwill resulting from the Pringles acquisition to the Company's reportable segments for the quarter ended June 30, 2012 are presented in the following table.

**Table of Contents****Note 3 Exit or disposal activities**

The Company views its continued spending on cost-reduction activities as part of its ongoing operating principles to provide greater visibility in achieving its long-term profit growth targets. Initiatives undertaken are expected to recover cash implementation costs within a five-year period of completion. Upon completion (or as each major stage is completed in the case of multi-year programs), the project begins to deliver cash savings and/or reduced depreciation.

**Costs summary**

During the quarter and year-to-date period ended June 30, 2012, the Company recorded \$4 million of exit costs related to two ongoing programs which will result in cost of goods sold (COGS) and SGA expense savings. The costs included \$2 million for severance in the U.S. Snacks reportable segment, \$1 million for severance in the U.S. Morning Foods and Kashi reportable segment, and \$1 million for asset write-offs in the European reportable segment. During the quarter ended July 2, 2011, the Company recorded \$6 million for pension costs associated with exit or disposal activities in the U.S. Snacks reportable segment. During the year-to-date period ended July 2, 2011, the Company recorded \$11 million of costs associated with exit or disposal activities. The costs included \$6 million for pension costs, \$4 million for severance and \$1 million for asset write-offs. The costs impacted reportable segments, as follows (in millions): U.S. Snacks \$6; and Europe \$5. Based on forecasted exchange rates, the Company currently expects to incur an additional \$3 million in exit costs for these programs in 2012.

For programs that are active as of June 30, 2012, total program costs incurred to date were \$36 million and include \$12 million for severance, \$3 million for other cash costs including relocation of assets and employees, \$17 million for pension costs and \$4 million for asset write-offs. The costs impacted reportable segments as follows (in millions): U.S. Morning Foods and Kashi \$1; U.S. Snacks \$21; and Europe \$14.

Refer to the footnotes within the Company's 2011 Annual Report on Form 10-K for further information on these initiatives.

**Note 4 Equity****Earnings per share**

Basic earnings per share is determined by dividing net income attributable to Kellogg Company by the weighted average number of common shares outstanding during the period. Diluted earnings per share is similarly determined, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all dilutive potential common shares had been issued. Dilutive potential common shares consist principally of employee stock options issued by the Company, and to a lesser extent, certain contingently issuable performance shares. Basic earnings per share is reconciled to diluted earnings per share in the following table. The total number of anti-dilutive potential common shares excluded from the reconciliation were 17 million and 13 million for the quarter and year-to-date periods ended June 30, 2012, respectively, and 5 million and 8 million for the quarter and year-to-date periods ended July 2, 2011.

Quarters ended June 30, 2012 and July 2, 2011:

On April 23, 2010, the Company's board of directors authorized a \$2.5 billion three-year share repurchase program for 2010 through 2012. During the year-to-date period ended June 30, 2012, the Company repurchased slightly more than 1 million shares of common stock for a total of \$63 million. No common stock was repurchased during the second quarter of 2012. During the year-to-date period ended July 2, 2011, the Company repurchased approximately 9 million shares of common stock for a total of \$513 million.

**Comprehensive income**

The Consolidated Statement of Comprehensive Income includes net income and all other changes in equity during a period except those resulting from investments by or distributions to shareholders. Other comprehensive income for all periods presented consists of foreign currency translation adjustments, fair value adjustments associated with cash flow hedges and adjustments for net experience losses and prior service cost related to employee benefit plans.

Accumulated other comprehensive income (loss) as of June 30, 2012 and December 31, 2011 consisted of the following:

(millions)	June 30, 2012	December 31, 2011
Foreign currency translation adjustments	\$ (922)	\$ (896)
Cash flow hedges — unrealized net gain (loss)	(8)	(9)

Prior service cost	(65)	(70)
Total accumulated other comprehensive income (loss)	\$(2,438)	\$(2,458)

**Table of Contents****Note 5 Debt**

The following table presents the components of notes payable at June 30, 2012 and December 31, 2011:

(millions)	June 30, 2012		December 31, 2011	
	Principal amount	Effective interest rate	Principal amount	Effective interest rate

U.S. commercial paper	245	0.26	216	0.24
Bank borrowings	30		18	
Total	\$739		\$234	

In May 2012, the Company issued \$350 million of three-year 1.125% U.S. Dollar Notes, \$400 million of five-year 1.75% U.S. Dollar Notes and \$700 million of ten-year 3.125% U.S. Dollar Notes, resulting in aggregate net proceeds after debt discount of \$1.442 billion. The proceeds from these Notes were used for general corporate purposes, including financing a portion of the acquisition of Pringles from P&G. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions, as well as a change of control provision.

In May 2012, the Company issued Cdn.\$300 million (approximately \$292 million USD at June 30, 2012, which reflects the discount and translation adjustments) of two-year 2.10% fixed rate Canadian Dollar Notes, using the proceeds from these Notes for general corporate purposes, which included repayment of intercompany debt. This repayment resulted in cash available to be used for a portion of the acquisition of Pringles from P&G. The Notes contain customary covenants that limit the ability of the Company and its restricted subsidiaries (as defined) to incur certain liens or enter into certain sale and lease-back transactions, as well as a change of control provision.

In the first quarter of 2012, the Company entered into interest rate swaps with notional amounts totaling \$1.6 billion, which effectively converted the associated U.S. Dollar Notes from fixed rate to floating rate obligations. The effective interest rates on debt obligations resulting from the Company's interest rate swaps as of June 30, 2012 were as follows: 1) seven-year 4.45% U.S. Dollar Notes due 2016 3.345%; 2) five-year 1.875% U.S. Dollar Notes due 2016 1.208%, 3) seven-year 3.25% U.S. Dollar Notes due 2018 2.293% and 4) ten-year 4.15% U.S. Dollar Notes due 2019 2.797%. These derivative instruments were designated as fair value hedges.

In March 2012, the Company entered into an unsecured 364-Day Term Loan Agreement (the New Credit Agreement) to fund, in part, the acquisition of Pringles from P&G. The New Credit Agreement allowed the Company to borrow up to \$1 billion to fund, in part, the acquisition and pay related fees and expenses. The loans under the New Credit Agreement were to mature and be payable in full 364 days after the date on which the loans were made. The New Credit Agreement contained customary representations, warranties and covenants, including restrictions on indebtedness, liens, sale and leaseback transactions, and a specified interest expense coverage ratio. If an event of default occurred, then, to the extent permitted under the New Credit Agreement, the administrative agent could (i) not earlier than the date on which the acquisition is or is to be consummated, terminate the commitments under the New Credit Agreement and (ii) accelerate any outstanding loans under the New Credit Agreement. The Company had no borrowings against the New Credit Agreement, and in May 2012, upon issuance of the U.S. dollar notes described above, the available commitments under the New Credit Agreement were automatically and permanently reduced to \$0.

**Table of Contents****Note 6 Stock compensation**

The Company uses various equity-based compensation programs to provide long-term performance incentives for its global workforce. Currently, these incentives consist principally of stock options, and to a lesser extent, executive performance shares and restricted stock grants. Additionally, the Company awards restricted stock to its non-employee directors.

The Company classifies pre-tax stock compensation expense in SGA expense principally within its corporate operations. For the periods presented, compensation expense for all types of equity-based programs and the related income tax benefit recognized were as follows:

(millions)	Quarter ended		Year-to-date period ended	
	June 30, 2012	July 2, 2011	June 30, 2012	July 2, 2011
Pre-tax compensation expense	<b>\$10</b>	\$12	<b>\$22</b>	\$22
Related income tax benefit	<b>\$ 4</b>	\$ 4	<b>\$ 8</b>	\$ 8

As of June 30, 2012, total stock-based compensation cost related to non-vested awards not yet recognized was \$60 million and the weighted-average period over which this amount is expected to be recognized was 2 years.

**Stock options**

During the year-to-date periods ended June 30, 2012 and July 2, 2011, the Company granted non-qualified stock options to eligible employees as presented in the following activity tables. Terms of these grants and the Company's methods for determining grant-date fair value of the awards were consistent with that described within the stock compensation footnote in the Company's 2011 Annual Report on Form 10-K.

Year-to-date period ended June 30, 2012:

Grants within the year-to-date period ended July 2, 2011:	17%	6.98	3.07%	3.10%

The total intrinsic value of options exercised was \$13 million for the year-to-date period ended June 30, 2012 and \$56 million for the year-to-date period ended July 2, 2011.

**Performance shares**

In the first quarter of 2012, the Company granted performance shares to a limited number of senior executive-level employees, which entitle these employees to receive a specified number of shares of the Company's common stock on the vesting date, provided cumulative three-year operating profit and internal net sales growth targets are achieved.

The 2012 target grant currently corresponds to approximately 239,000 shares, with a grant-date fair value of \$47 per share. The actual number of shares issued on the vesting date could range from 0 to 200% of target, depending on actual performance achieved. Based on the market price of the Company's common stock at June 30, 2012, the maximum future value that could be awarded to employees on the vesting date for all outstanding performance share awards was as follows:

(millions)	June 30, 2012
2010 Award	\$19
2011 Award	\$21
2012 Award	\$24

The 2009 performance share award, payable in stock, was settled at 82% of target in February 2012 for a total dollar equivalent of \$7 million.

**Note 7 Employee benefits**

The Company sponsors a number of U.S. and foreign pension, other nonpension postretirement and postemployment plans to provide various benefits for its employees. These plans are described within the footnotes to the Consolidated Financial Statements included in the Company's 2011 Annual Report on Form 10-K. Components of Company plan benefit expense for the periods presented are included in the tables below.

Plan funding strategies may be modified in response to management's evaluation of tax deductibility, market conditions, and competing investment alternatives.

**Note 8 Income taxes**

The consolidated effective tax rate for the quarter ended June 30, 2012 of 25% was lower than the prior year's rate of 30%. The consolidated effective tax rate for the year-to-date period ended June 30, 2012 of 28% was lower than the prior year's rate of 29%. The lower 2012 rate was primarily due to an elimination of a tax liability related to certain international earnings now considered indefinitely reinvested.

**Table of Contents**

As of June 30, 2012, the Company classified \$9 million related to uncertain tax positions as a net current liability, representing several income tax positions under examination in various jurisdictions. Management's estimate of reasonably possible changes in unrecognized tax benefits during the next twelve months consists of the current liability balance, expected to be settled within one year, offset by \$8 million of projected additions. Management is currently unaware of any issues under review that could result in significant additional payments, accruals or other material deviation in this estimate.

Following is a reconciliation of the Company's total gross unrecognized tax benefits for the quarter ended June 30, 2012; \$52 million of this total represents the amount that, if recognized, would affect the Company's effective income tax rate in future periods.

For the year-to-date period ended June 30, 2012, the Company recognized an increase of \$2 million of tax-related interest and penalties and had \$17 million accrued at June 30, 2012.

**Note 9 Derivative instruments and fair value measurements**

The Company is exposed to certain market risks such as changes in interest rates, foreign currency exchange rates, and commodity prices, which exist as a part of its ongoing business operations. Management uses derivative financial and commodity instruments, including futures, options, and swaps, where appropriate, to manage these risks. Instruments used as hedges must be effective at reducing the risk associated with the exposure being hedged.

The Company designates derivatives as cash flow hedges, fair value hedges, net investment hedges, and uses other contracts to reduce volatility in interest rates, foreign currency and commodities. As a matter of policy, the Company does not engage in trading or speculative hedging transactions.

Total notional amounts of the Company's derivative instruments as of June 30, 2012 and December 31, 2011 were as follows:

(millions)	<b>June 30,</b>	December 31,
	<b>2012</b>	2011
Foreign currency exchange contracts	<b>\$ 921</b>	\$ 1,265
Interest rate contracts	<b>2,150</b>	600
Commodity contracts	<b>102</b>	175
Total	<b>\$ 3,173</b>	\$ 2,040

Following is a description of each category in the fair value hierarchy and the financial assets and liabilities of the Company that were included in each category at June 30, 2012 and December 31, 2011, measured on a recurring basis.

*Level 1* Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market. For the Company, level 1 financial assets and liabilities consist primarily of commodity derivative contracts.

## Edgar Filing: KELLOGG CO - Form 10-Q

*Level 2* Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. For the Company, level 2 financial assets and liabilities consist of interest rate swaps and over-the-counter commodity and currency contracts.

**Table of Contents**

The Company's calculation of the fair value of interest rate swaps is derived from a discounted cash flow analysis based on the terms of the contract and the interest rate curve. Over-the-counter commodity derivatives are valued using an income approach based on the commodity index prices less the contract rate multiplied by the notional amount. Foreign currency contracts are valued using an income approach based on forward rates less the contract rate multiplied by the notional amount. The Company's calculation of the fair value of level 2 financial assets and liabilities takes into consideration the risk of nonperformance, including counterparty credit risk.

*Level 3* Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability. The Company did not have any level 3 financial assets or liabilities as of June 30, 2012 or December 31, 2011.

The following table presents assets and liabilities that were measured at fair value in the Consolidated Balance Sheet on a recurring basis as of June 30, 2012 and December 31, 2011:

Derivatives designated as hedging instruments (millions)	Level 1		Level 2		Total	
	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011	June 30, 2012	December 31, 2011

**Table of Contents**

During the next 12 months, the Company expects \$7 million of net deferred losses reported in accumulated other comprehensive income (AOCI) at June 30, 2012 to be reclassified to income, assuming market rates remain constant through contract maturities.

Certain of the Company's derivative instruments contain provisions requiring the Company to post collateral on those derivative instruments that are in a liability position if the Company's credit rating is at or below BB+ (S&P), or Ba1 (Moody's). The fair value of all derivative instruments with credit-risk-related contingent features in a liability position on June 30, 2012 was \$33 million. If the credit-risk-related contingent features were triggered as of June 30, 2012, the Company would be required to post additional collateral of \$30 million. In addition, certain derivative instruments contain provisions that would be triggered in the event the Company defaults on its debt agreements. There were no collateral posting requirements as of June 30, 2012 triggered by credit-risk-related contingent features, however, there was \$3 million of collateral posted under the reciprocal collateralization agreements as discussed under counterparty credit risk concentration below.

**Financial instruments**

The carrying values of the Company's short-term items, including cash, cash equivalents, accounts receivable, accounts payable and notes payable approximate fair value. The fair value of the Company's long-term debt, which are level 2 liabilities, is calculated based on broker quotes and was as follows at June 30, 2012:

(millions)	Fair Value	Carrying Value
Current maturities of long-term debt	\$ 1,534	\$ 1,518
Long-term debt	6,760	6,030
Total	\$ 8,294	\$ 7,548

**Counterparty credit risk concentration**

The Company is exposed to credit loss in the event of nonperformance by counterparties on derivative financial and commodity contracts. Management believes a concentration of credit risk with respect to derivative counterparties is limited due to the credit ratings and use of master netting and reciprocal collateralization agreements with the counterparties and the use of exchange-traded commodity contracts.

Master netting agreements apply in situations where the Company executes multiple contracts with the same counterparty. Certain counterparties represent a concentration of credit risk to the Company. If those counterparties fail to perform according to the terms of derivative contracts, this would result in a loss to the Company of \$21 million as of June 30, 2012.

For certain derivative contracts, reciprocal collateralization agreements with counterparties call for the posting of collateral in the form of cash, treasury securities or letters of credit if a fair value loss position to the Company or its counterparties exceeds a certain amount. As of June 30, 2012 the Company had posted collateral of \$3 million in the form of cash, which was reflected as an increase in accounts receivable, net on the Consolidated Balance Sheet.

Management believes concentrations of credit risk with respect to accounts receivable is limited due to the generally high credit quality of the Company's major customers, as well as the large number and geographic dispersion of smaller customers. However, the Company conducts a disproportionate amount of business with a small number of large multinational grocery retailers, with the five largest accounts encompassing approximately 28% of consolidated trade receivables at June 30, 2012.

**Note 10 Reportable segments**

Kellogg Company is the world's leading producer of cereal, second largest producer of cookies and crackers, and the world's second largest savory snacks company. In addition Kellogg is a leading producer of frozen foods. Additional product offerings include toaster pastries, cereal bars, fruit-flavored snacks and veggie foods. Kellogg products are manufactured and marketed globally. Principal markets for these products include the United States and United Kingdom.

The Company currently manages its operations through nine operating segments that are based on product category or geographic location. These operating segments are evaluated for similarity with regards to economic characteristics,

products, production processes, types or classes of customers, distribution methods and regulatory environments to determine if they can be aggregated into reportable segments. Beginning in the fourth quarter of 2011, the Company has the following reportable segments: U.S. Morning Foods and Kashi; U.S. Snacks; U.S. Specialty; North America Other; Europe; Latin America; and Asia Pacific. In addition, subsequent to the filing of the Company's Annual Report on Form 10-K, the Company reclassified certain customers between reportable segments within North America. Segment results of prior periods were recast to conform to the current presentation. The reportable segments are discussed in greater detail below.

U.S. Morning Foods and Kashi aggregates the U.S. Morning Foods and U.S. Kashi operating segments. The U.S. Morning Foods operating segment includes cereal, toaster pastries, and health and wellness products generally marketed under the Kellogg's name. The U.S. Kashi operating segment represents Kashi-branded cereal, cereal bars, crackers, cookies and Stretch Island fruit snacks.

U.S. Snacks represents the U.S. snacks business which includes products such as cookies, crackers, cereal bars, savory snacks and fruit-flavored snacks.

U.S. Specialty primarily represents the food service, convenience and Girl Scouts businesses. The food service business is mostly non-commercial, servicing institutions such as schools and hospitals.

North America Other represents the U.S. Frozen and Canada operating segments. As these operating segments are not considered economically similar enough to aggregate with other operating segments and are immaterial for separate disclosure, they have been grouped together as a single reportable segment.

The three remaining reportable segments are based on geographic location – Europe which consists principally of European countries; Latin America which is comprised of Central and South America and includes Mexico; and Asia Pacific which is comprised of South Africa, Australia and other Asian and Pacific markets.

Refer to Note 2 for discussion regarding changes in intangible assets by reportable segment associated with Pringles acquisitions. No other changes to total assets by reportable segment were considered significant.

The measurement of reportable segment results is based on segment operating profit which is generally consistent with the presentation of operating profit in the Consolidated Statement of Income. Intercompany transactions between operating segments were insignificant in all periods presented.

**Results of operations**

***Overview***

For more than 100 years, consumers have counted on Kellogg for great-tasting, high-quality and nutritious foods. Kellogg is the world's leading producer of cereal, second largest producer of cookies and crackers, and the second largest savory snacks company. In addition, Kellogg is a leading producer of frozen foods. Additional product offerings include toaster pastries, cereal bars, fruit-flavored snacks and veggie foods. Kellogg products are manufactured and marketed globally.

We manage our operations through nine operating segments that are based on product category or geographic location. These operating segments are evaluated for similarity with regards to economic characteristics, products, production processes, types or classes of customers, distribution methods and regulatory environments to determine if they can be aggregated into reportable segments. We report results of operations in the following reportable segments: U.S. Morning Foods & Kashi; U.S. Snacks; U.S. Specialty; North America Other; Europe; Latin America; and Asia Pacific. In addition, subsequent to the filing of our Annual Report on Form 10-K, we reclassified certain customers between reportable segments within North America. Segment results of prior periods were modified to conform to the current presentation.

We manage our Company for sustainable performance defined by our long-term annual growth targets. These targets are 3 to 4% for internal net sales, mid single-digit (4 to 6%) for internal operating profit, and high single-digit (7 to 9%) for diluted net earnings per share. Internal net sales and internal operating profit exclude the impact of foreign currency translation and if applicable, acquisitions and dispositions. In addition to these items, internal operating profit growth also excludes the impact of transaction and integration costs associated with the Pringles acquisition.

On May 31, 2012 we completed the acquisition of the *Pringles*<sup>®</sup> business (Pringles) from The Procter & Gamble Company (P&G) for \$2.685 billion, including initial working capital adjustments, which was funded from cash-on-hand and the issuance of \$2.3 billion of short and long-term debt.

For the quarter ended June 30, 2012, our reported net sales increased by 3% and internal net sales increased by 2%, in line with our expectations communicated with the announcement of 1<sup>st</sup> quarter earnings. Operating environments in Europe and Australia continued to be difficult, resulting in internal net sales decline of 1% for the International business. Reported operating profit, which includes the impact of transactional and integration costs related to the acquisition of Pringles, decreased by 11%. Internal operating profit, which was negatively impacted by timing of supply chain investments, anticipated commodity inflation and soft performance in Europe and Australia, declined by 5%, in line with our expectations communicated with the announcement of 1<sup>st</sup> quarter earnings. Diluted earnings per share (EPS) of \$.84 was down 10.6% compared to the prior year EPS of \$.94. EPS includes \$.07 negative impact of transaction and integration costs as well as a \$.02 one-time, below-the-line benefit due to a lower tax rate which was partially offset by hedging losses related to the acquisition of Pringles. This EPS performance was in line with expectations communicated with the announcement of 1<sup>st</sup> quarter earnings.

(a) Internal net sales and operating profit growth for 2012, exclude the impact of acquisitions, divestitures, transaction and integration costs and impact of currency. Internal net sales and operating profit growth are non-GAAP financial measures which are reconciled to the directly comparable measures in accordance with U.S. GAAP within these tables.

(b) Impact of results for the quarter ended June 30, 2012 from the acquisition of Pringles.

(c) Impact of results for the quarter ended June 30, 2012 from the divestiture of Navigable Foods.

(d) Includes impact of transaction and integration costs associated with the Pringles acquisition.

Our reported consolidated net sales increased by 3% and net sales increased 2% on an internal basis. Internal net sales improved 3% for pricing/mix, and was unfavorably impacted 1% by volume.

Internal net sales in our North America business increased by 4%. This increase was driven by a 4% improvement in pricing/mix with only a slight increase in volume.

Internal net sales for U.S. Morning Foods & Kashi increased 1% as a result of favorable pricing/mix which was partially offset by decreased volume. This segment has two product groups, cereal and select snacks and drinks. Cereal's internal net sales declined as a result of softer volumes. Snacks (toaster pastries, Kashi-branded cereal bars, crackers, cookies, Stretch Island fruit snacks, and health and wellness products) internal net sales increased as a result of strong performance in each of our *Pop-Tarts*<sup>®</sup>, health and wellness, and Kashi businesses.

## Edgar Filing: KELLOGG CO - Form 10-Q

Internal net sales in U.S. Snacks increased by 4% as a result of favorable pricing/mix and flat volume. This business consists of cookies, crackers, cereal bars, fruit-flavored snacks, and Pringles. The sales growth was the result of strong

crackers and cereal bars consumption behind *Special K Cracker Chips*<sup>®</sup>, *Cheez-it*<sup>®</sup>, and *Special K Pastry Crisps*<sup>®</sup> innovation which contributed to a solid improvement in our cracker and wholesome snacks category share. The cookies business posted solid sales growth and continues to be favorably impacted by the Keebler<sup>®</sup> master brand initiative.

Internal net sales in U.S. Specialty increased by 6% as a result of favorable pricing/mix and a slight decrease in volume. Sales growth was due to increased consumption of *Special K Cracker Chips*<sup>®</sup> and health and wellness products, as well as innovations in frozen foods.

Internal net sales in North America Other (U.S. Frozen and Canada) increased by 9% due to favorable pricing/mix and increased volume. Sales growth was the result of both businesses posting high single-digit growth. U.S. Frozen grew as a result of increased brand-building support behind innovation activity, while Canada benefitted from favorable comparables due to a customer dispute in 2011.

Our International segments' internal net sales were down 1% as a result of a 3% decline in volume which was partially offset by improved pricing/mix. Europe's internal net sales declined 4% driven by a 3% decline in volume and a 1% decline in pricing/mix. The decline was due to the continued difficult operating environment. Latin America's internal net sales growth was 7% due to an 8% increase in pricing/mix, partially offset by a decline in volume. Latin America results were driven by more competitive commercial plans and increased brand building support. Internal net sales in Asia Pacific declined 2% as a result of a decline in both volume and pricing/mix. Asia Pacific's decline was driven by category weakness and retailer inventory reductions in Australia, which offset solid performance in most of the remaining markets.

Consolidated operating profit declined by 11% on a reported basis and 5% on an internal basis. The decline was due to favorable pricing/mix and favorable timing of marketing investment being more than offset by timing of supply chain investments, anticipated higher input costs and weak results in Europe and Australia. Internal operating profit in U.S. Morning Foods & Kashi improved by 3% due to favorable timing of marketing investment. U.S. Snacks was flat due to improved pricing/mix being offset by unfavorable timing of investments. U.S. Specialty declined by 3% as a result of favorable pricing/mix being more than offset by unfavorable timing of investments. North America Other grew by 15% as a result of improved pricing/mix and cost savings initiatives being partially offset by increased marketing investments. Europe declined by 20% due to a difficult operating environment and increased input costs being partially offset by favorable timing of marketing investment. Latin America declined by 15% due to lapping of the prior year sale of a closed facility, increased input costs and double-digit increases in marketing investments more than offsetting favorable pricing/mix. Asia Pacific declined by 32% due to a difficult operating environment in Australia, unfavorable pricing/mix and increased input costs being partially offset by favorable timing of marketing investment.

The following tables provide analysis of our net sales and operating profit performance for the year-to-date periods of 2012 as compared to 2011. Our internal net sales increase of 1% was the result of favorable pricing/mix across most reportable segments, which was partially offset by unfavorable volume in all reportable segments except Asia Pacific. Our internal operating profit decline of 6% was due primarily to timing of supply chain investments, continued higher input costs and weak performance in Europe and Australia. This decline in internal operating profit was partially offset by improved pricing/mix.
