Table of Contents

3.2 Significant events and their impacts and solutions

There was no significant event during the Reporting Period.

3.3 Fulfillment of commitments for by the Company and shareholders holding more than 5% of shares

The Company disclosed The Explanatory Memorandum for the A-Share Reform Proposal of the Company (Revised draft) on 20 June 2013 in which Sinopec Corp., the Company's controlling shareholder, has given four undertakings. One of the undertakings is as follow:

Sinopec Corp. shall, within 12 months from the date on which its non-circulating shares of Company acquiring the right to circulate in the market (meaning the first trading day after the implementation of the A-share reform proposal), submit a stock option incentive scheme to the Board that complies with the relevant rules of the State-owned Assets Supervision and Administration Commission of the State Council and the China Securities Regulatory Commission, under which the initial exercise price for the stock options under the scheme shall not be lower than the closing price of the Company's shares on 30 May 2013 (being RMB6.43 per share) (in case of ex-rights or ex-dividends prior to the announcement of the draft of the stock option incentive scheme, the exercise price of the options shall be adjusted accordingly).

With regard to the undertaking mentioned above, the Company has been notified by its controlling shareholder Sinopec Corp. that in accordance with The Explanatory Memorandum for the A-Share Reform Proposal of the Company (Revised Draft), Sinopec Corp. will submit a stock option incentive scheme which complies with the relevant rules of SASAC and the CSRC to the Board as soon as practicable. Sinopec Shanghai Petrochemical Company Limited Ashare option incentive scheme (Draft) has been discussed and endorsed in the second Meeting of the Eighth Session of the Board held on 15 August 2014 by way of correspondence. For further details, please refer to the announcement published in the China Securities Journal, Securities Times and Shanghai Securities News on 18 August 2014, and posted on the websites of the Shanghai Stock Exchange, the Hong Kong Stock Exchange and the Company.

Table of Contents

Undertakings being fulfilled during the Reporting Period include the following:

1. Sinopec Corp. shall not, within 12 months from the date on which its non-circulating shares of the Company acquiring the right to circulate in the market (meaning the first trading day after the implementation of the A-share reform proposal), deal in or transfer such shares through the stock exchanges. Also, after the expiration of the aforesaid undertaking, the amount of existing non-circulating shares to be disposed by Sinopec Corp. through trading on the stock exchange shall not represent more than 5% of the total amount of shares held by Sinopec Corp. within the next 12 months, and not more than 10% within the next 24 months.
2. Sinopec Corp. shall continue to support the subsequent development of the Company upon the completion of the A-share reform scheme, and shall consider the Company as a platform for the development of related businesses in future.

For more details, please refer to the full version of The Explanatory Memorandum for the A-share Reform Proposal of the Company (the Revised Draft) published on the websites of Shanghai Stock Exchange, Stock Exchange of Hong Kong and the Company, as well as posted on Shanghai Securities News and China Securities Journal on 20 June 2013.

With regard to these two undertakings, the Company did not notice any conditions that violated the undertakings or any unfulfilled matters during the required period.

3.4 Warning and reasons for estimated loss or significant change in net profit year-on-year between the start of 2014 and the end of next reporting period

In the first three quarters of 2014, given the continuous downturn in petrochemical demand in the PRC, the price of petrochemical products weakened, which leads to a significant year-on-year decline in the prices of the Group's major petrochemical products, thus enlarging the loss of the petrochemical segment. Meanwhile, the substantial depreciation of Renminbi resulted in a correspondingly substantial increase in the Group's financial expenses compared with the same period last year. In addition, in view of the market conditions and upstream and downstream material balance, the Group lowered its crude oil processing volume compared with the year-ago period, which reduced the profit of the Group's refinery segment to a certain degree. Last but not least, China's domestic prices of refined oils fell as a consequence of the continuous decrease in international crude oil prices since the third quarter. As there is a lag effect from the Company's crude oil procurement to sales of refined oil products, this has led to reduced profit of the refinery segment in the short term. The Company expects that the situation mentioned above will not improve significantly in the fourth quarter, and the full-year results are expected to be substantially worse compared to the previous year.

3.5 Effect of the application of new accounting standards on consolidated financial statements

The Company has adopted new or revised accounting standards for business enterprises issued by the Ministry of Finance since 1 July 2014. Based on the Company's evaluation, changes in the financial standards do not have a significant impact on this financial report and disclosure.
