PROSPECTUS SUPPLEMENT
(To Prospectus dated March 3, 2015)

Prudential Financial

Retail Medium-Term Notes

Prudential Financial, Inc.

We may offer to sell, from time to time, our Prudential Financial Retail Medium-Term Notes, which may include Prudential Financial InterNotes[®], and which we refer to together as the notes. The specific terms of the notes will be set prior to the time of sale and described in a pricing supplement. You should read this prospectus supplement, the accompanying prospectus, the applicable pricing supplement and any free writing prospectus carefully.

We may offer the notes to or through agents for resale. The applicable pricing supplement will specify the purchase price, agent discounts and commissions and net proceeds for any particular offering of notes. We also may offer the notes directly. We have not set a date for termination of our offering.

The agents have advised us that from time to time they may purchase and sell notes in the secondary market, but they are not obligated to make a market in the notes and may suspend or completely stop that activity without any notice at any time. Unless otherwise specified in connection with a particular offering, we will not list the notes on any securities exchange.

Investing in the notes involves certain risks, including our credit risk. See the section entitled Risk Factors beginning on page S-6 of this prospectus supplement, and if applicable, any risk factors described in any pricing supplement or free writing prospectus and in our periodic reports filed with the Securities and Exchange Commission that are incorporated by reference into this prospectus supplement.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of the notes or passed upon the accuracy or adequacy of this prospectus supplement, the accompanying prospectus, any pricing supplement or any free writing prospectus. Any representation to the contrary is a

criminal offense.

We may use this prospectus supplement and the accompanying prospectus in the initial sale of any note. In addition, we or any of our affiliates may use this prospectus supplement in a market-making transaction involving any note after its initial sale.

ABOUT THIS PROSPECTUS SUPPLEMENT AND THE PRICING SUPPLEMENTS

Except as the context otherwise requires or as otherwise specified in this prospectus supplement or the accompanying prospectus, as used in this prospectus supplement and the prospectus, dated March 3, 2015, the terms the Company, Prudential Financial, Inc., Prudential, we, us and our refer to Prudential Financial, Inc. only and not to any of its consolidated subsidiaries. References in this prospectus supplement to U.S. dollars or U.S. \$ or \$ are to the currency of the United States of America.

This prospectus supplement sets forth certain terms of the notes that we may offer. It supplements the description of the notes contained in the accompanying prospectus, where the notes are included in the defined term debt securities. If information in this prospectus supplement is inconsistent with that in the accompanying prospectus, this prospectus supplement will apply and you should not rely on the information in the prospectus.

Each time we issue notes, we will attach a pricing supplement to this prospectus supplement. We and the agents may also provide you with a free writing prospectus relating to an offering of notes. For each offering, we will provide to you the specific description of the notes being offered and the terms of the offering. In connection with each offering, we may also add, update or change information in this prospectus supplement or the accompanying prospectus. Information in the pricing supplement or free writing prospectus that you have been provided will replace any inconsistent information in this prospectus supplement, including any changes in the method of calculating interest on any note. In those circumstances, you should not rely on the information in this prospectus supplement or the accompanying prospectus.

When we refer to the prospectus, we mean the prospectus that accompanies this prospectus supplement. When we refer to a pricing supplement, we mean the pricing supplement we file describing the specific terms of the notes you purchase. The terms used in your pricing supplement will have the meanings described in this prospectus supplement, unless otherwise specified.

Throughout this prospectus supplement, where we indicate that information may be supplemented in an applicable pricing supplement, that information may also be supplemented in free writing prospectuses provided to you.

You should read and consider all information contained in this prospectus supplement, the accompanying prospectus, the applicable pricing supplement or any free writing prospectus before investing in the notes.

Table of Contents**SUMMARY DESCRIPTION OF NOTES**

This section summarizes the legal and financial terms of the Prudential Financial Retail Medium-Term Notes and Prudential Financial InterNotes[®] that are described in more detail in Description of Retail Medium-Term Notes and Description of InterNotes[®]. Final terms of any particular notes will be determined at the time of sale and will be contained in the pricing supplement relating to those notes. The terms of the notes appearing in that pricing supplement may vary from, and if they do vary, will supersede, the terms contained in this summary and in Description of Retail Medium-Term Notes and Description of InterNotes[®]. In addition, you should read the more detailed information appearing elsewhere in this prospectus supplement, the accompanying prospectus and in the applicable pricing supplement.

Issuer	Prudential Financial, Inc., 751 Broad Street, Newark, New Jersey 07102; phone (973) 802-6000.
Retail Medium-Term Notes Purchasing Agent	As specified in the applicable pricing supplement.
Retail Medium-Term Notes Lead Manager and Lead Agent	Merrill Lynch, Pierce, Fenner & Smith Incorporated.
Retail Medium-Term Notes Agents	Barclays Capital Inc., Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, Deutsche Bank Securities Inc., Fidelity Capital Markets Services, a division of National Financial Services LLC, Member NYSE, SIPC, Incapital LLC, J.P. Morgan Securities LLC, Morgan Stanley & Co. LLC, RBC Capital Markets LLC, Samuel A. Ramirez & Company, Inc., Siebert Brandford Shank & Co., L.L.C. and Wells Fargo Advisors, LLC.
InterNotes[®] Purchasing Agent	Incapital LLC. Incapital LLC and the Retail Medium-Term Notes Purchasing Agent are referred to together herein as the Purchasing Agents.
InterNotes[®] Joint Lead Managers and Lead Agents	Merrill Lynch, Pierce, Fenner & Smith Incorporated and Incapital LLC.
InterNotes[®] Agents	Barclays Capital Inc., Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, Deutsche Bank Securities Inc., Fidelity Capital Markets Services, a division of National Financial Services LLC, Member NYSE, SIPC, J.P. Morgan Securities LLC, Morgan Stanley & Co. LLC, RBC Capital Markets LLC, Samuel A. Ramirez & Company, Inc., Siebert Brandford Shank & Co., L.L.C. and Wells Fargo Advisors, LLC.

Titles of Notes	Prudential Financial Retail Medium-Term Notes and Prudential Financial InterNotes®.
Denominations	The notes will be issued and sold in denominations of \$1,000 and multiples of \$1,000 in excess thereof, unless otherwise specified in the applicable pricing supplement.
Rank	The notes will be our direct, unsecured, senior obligations and will rank equally with all of our other unsecured, senior indebtedness from time to time outstanding. See Description of the Debt Securities We May Offer We are a Holding Company in the accompanying prospectus.

S-2

Table of Contents

Maturities

Each note will mature one year or more from its date of original issuance.

Interest

Except for original issue discount notes, each note will bear interest from its date of original issuance at a fixed or floating rate that may be determined by reference to one or more base interest rates or one or more indices, which in turn may be adjusted by a spread and/or a spread multiplier and may be subject to a maximum interest rate and/or a minimum interest rate, in each case as specified in the applicable pricing supplement. The base rates include:

- the constant maturity swap rate,
- the CMT rate,
- LIBOR,
- the prime rate,
- the treasury rate,
- the federal funds rate, and
- any other domestic or foreign interest rate as we may describe in the note and applicable pricing supplement.

Any indexed notes may bear interest that is determined by reference to one or more commodities, securities, interest rates or any other financial, economic or other measures or instruments or indices or baskets of any of these items as may be described in the note and applicable pricing supplement.

We may also issue notes that bear interest based on the rate of inflation as described under [Description of Retail Medium-Term Notes Inflation-Linked Rate](#) .

Interest on each note will be paid on the interest payment dates specified in the applicable pricing supplement (subject to the applicable business day convention) and on the maturity date, or, if the note is redeemable and is redeemed prior to maturity, the date of redemption.

We may not pay interest on certain notes issued at a discount from the principal amount payable at maturity. We may also issue amortizing notes from time to time.

Principal

The principal amount of each note will be payable on its stated maturity date or upon earlier redemption or repayment at the corporate trust office of the paying agent, which is initially the trustee, or at any other place we may designate.

The amount of principal of indexed notes payable at maturity may be determined by reference to one or more commodities, securities, interest rates or any other financial, economic or other measures or instruments or indices

Table of Contents

or baskets of any of these items as may be described in the applicable pricing supplement.

Redemption and Repayment

Unless otherwise specified in the applicable pricing supplement, we will not have the option to redeem the notes, and noteholders will not have the option to require us to repay the notes, prior to their stated maturities.

Survivor's Option

Some notes may contain a provision permitting the optional repayment of those notes prior to stated maturity, if requested by the authorized representative of the beneficial owner of those notes, following the death of the beneficial owner of the notes, so long as the notes were owned by the beneficial owner or his or her estate at least six months prior to the request. This feature is referred to as a Survivor's Option. Your notes will not be repaid in this manner unless the pricing supplement for your notes specifies that a Survivor's Option applies to your notes. The right to exercise the Survivor's Option is subject to limits set by us on (1) the permitted dollar amount of total exercises by all holders of notes in any calendar year, and (2) the permitted dollar amount of an individual exercise by a holder of a note in any calendar year. Additional details on the Survivor's Option are described in the sections entitled Description of Retail Medium-Term Notes Survivor's Option and Description of InterNotes® Survivor's Option.

Additional Issuances

The notes will not contain any limitations on our ability to issue additional Retail Medium-Term Notes, InterNotes® or any other indebtedness.

Form and Clearance

Unless otherwise specified in the applicable pricing supplement, notes will be issued in global form only. The notes will be represented by a fully registered master global note without coupons deposited with a custodian for, and registered in the name of, a nominee of The Depository Trust Company, or DTC, in New York, New York.

Beneficial interests in the master global note will be shown on, and transfers thereof will be effected only through, records that DTC and its direct and indirect participants maintain. Any beneficial interest in a note may not be exchanged for notes in certificated form except in the limited circumstances described in this prospectus supplement or the applicable pricing supplement.

Trustee and Paying Agent

The trustee for the notes is The Bank of New York Mellon, as successor to JPMorgan Chase Bank N.A., under an indenture, dated as of April 25, 2003 between us and the trustee, as amended and supplemented. Citibank, N.A. will act as paying agent.

Governing Law

The notes described in this prospectus supplement will be governed by the laws of the State of New York.

Selling Group

The Retail Medium-Term Notes and the InterNotes® agents and dealers comprising the selling groups are broker-dealers and securities firms. The agents, including the Purchasing Agents, of each respective selling group have entered into Selling Agent Agreements with us, each dated March 3, 2015, which we refer to together as the Selling Agent Agreements. Dealers who are members of the respective selling groups have executed a master selected dealer agreement with their respective Purchasing Agents.

S-4

Table of Contents

The agents and dealers have agreed to market and sell the notes in accordance with the terms of those respective agreements and all other applicable laws and regulations. You may contact the Retail Notes Purchasing Agent at the e-mail address specified in the applicable pricing supplement and the InterNotes® Purchasing Agent at info@incapital.com for a list of the respective selling group members.

Use of Proceeds

Unless otherwise specified in the applicable pricing supplement, we intend to use the net proceeds from the sales of notes for general corporate purposes, including making loans and capital contributions to our affiliates.

S-5

Table of Contents

RISK FACTORS

You should carefully consider the risks described in this section of this prospectus supplement, in the accompanying prospectus, pricing supplement and any free writing prospectus and in Item 1A of our most recent Annual Report on Form 10-K for our most recent fiscal year ended December 31 and other periodic reports that are incorporated by reference herein. The notes will not be an appropriate investment for you if you are not knowledgeable about significant features of the notes, about our financial condition, operations and business or about financial matters in general. You should not purchase the notes unless you understand, and know that you can bear, these risks. Although we discuss key risks in our periodic filings with the SEC and in the accompanying prospectus, this prospectus supplement, and the applicable pricing supplement or free writing prospectus used in connection with an offering of our notes, new risks may emerge in the future, which may prove to be important. Our subsequent filings with the SEC may contain amended and updated discussions of significant risks to our business and financial performance. We cannot predict future risks or estimate the extent to which they may affect our financial performance.

An investment in the notes involves our credit risk and, among other things, risks related to the fact that we are a holding company. We summarize these risks under **Description of Debt Securities We May Offer** **We are a Holding Company** in the accompanying prospectus.

We May Choose to Redeem Notes When Prevailing Interest Rates are Relatively Low

If your notes will be redeemable at our option and bear interest, we may choose to redeem your notes from time to time, especially when prevailing interest rates are lower than the interest rate of your notes. If prevailing rates are lower at the time of redemption, you would not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the interest rate on the notes being redeemed. Our redemption right also may adversely impact your ability to sell your notes as the optional redemption date or period approaches.

You Are Subject to Our Credit Risk.

An investment in the notes subjects you to our credit risk. Our credit ratings are one type of assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of your notes. Our credit ratings, however, may not reflect the potential impact on the value of your notes of all of the risks to which we are or may be subject discussed in this prospectus supplement. Our credit ratings may also be withdrawn or change at any time.

If a Survivor's Option Applies to Your Notes, the Right to Exercise It May Be Limited

We will have a discretionary right to limit the aggregate principal amount of notes subject to any Survivor's Option that may be exercised in any calendar year to an amount equal to the greater of \$2,000,000 or 2% of the principal amount of all notes outstanding as of the end of the most recent calendar year. We also have the discretionary right to limit to \$250,000 in any calendar year the aggregate principal amount of notes subject to the Survivor's Option that may be exercised in such calendar year on behalf of any individual deceased beneficial owner of notes. Accordingly, no assurance can be given that exercise of the Survivor's Option for a desired amount will be permitted in any single calendar year.

The Notes May Have Limited or No Liquidity

There is currently no secondary market for the notes, and there can be no assurance that a secondary market will develop. If a secondary market does develop, there can be no assurance that it will continue or that it will be

sufficiently liquid to allow you to resell your notes when you want or at a price that you wish to receive for your notes.

S-6

Table of Contents

We May Act As the Calculation Agent for the Notes, Which Could Result in a Conflict of Interest

We expect to act as the calculation agent for the notes from time to time. If we do so, we will specify that we are the calculation agent in the applicable pricing supplement. If we act as calculation agent, potential conflicts of interest may exist between us and you, including with respect to certain determinations and judgments that we as calculation agent must make in determining the amounts due to you under the Notes.

Increased Regulatory Oversight and Changes in the Method Pursuant to Which LIBOR Rates are Determined May Adversely Affect the Value of the Floating Rate Notes We May Issue

Beginning in 2008, concerns were raised that some of the member banks surveyed by the British Bankers' Association (the BBA) in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable to them. A number of BBA member banks have entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations were instigated by regulators and governmental authorities in various jurisdictions. If manipulation of LIBOR or another inter-bank lending rate occurred, it may have resulted in that rate being artificially lower (or higher) than it otherwise would have been.

In September 2012, the U.K. government published the results of its review of LIBOR (commonly referred to as the Wheatley Review). The Wheatley Review made a number of recommendations for changes with respect to LIBOR including the introduction of statutory regulation of LIBOR, the transfer of responsibility for LIBOR from the BBA to an independent administrator, changes to the method of compilation of lending rates and new regulatory oversight and enforcement mechanisms for rate-setting. Based on the Wheatley Review, final rules for the regulation and supervision of LIBOR by the Financial Conduct Authority (the FCA) were published and came into effect on April 2, 2013 (the FCA Rules). In particular, the FCA Rules include requirements that (1) an independent LIBOR administrator monitor and survey LIBOR submissions to identify breaches of practice standards and/or potentially manipulative behavior, and (2) firms submitting data to LIBOR establish and maintain a clear conflicts of interest policy and appropriate systems and controls. In addition, in response to the Wheatley Review recommendations, ICE Benchmark Administration Limited (the ICE Administration) has been appointed as the independent LIBOR administrator, effective February 1, 2014.

It is not possible to predict the effect of the FCA Rules, any changes in the methods pursuant to which the LIBOR rates are determined and any other reforms to LIBOR that may be enacted in the U.K. or elsewhere, but any of them may adversely affect the trading market for LIBOR-based securities. In addition, any changes announced or adopted by the FCA, the ICE Administration or any other successor governance or oversight body in the method pursuant to which the LIBOR rates are determined may result in a sudden or prolonged increase or decrease in reported LIBOR rates. If that were to occur and to the extent that the value of an investor's notes is affected by reported LIBOR rates, the level of interest payments, and the value of those notes may be affected. Further, uncertainty as to the extent, manner and timing of the continued implementation of the Wheatley Review recommendations may adversely affect the trading market for LIBOR-based securities and the value of the floating rate notes we may issue.

Changes in the Method by Which Certain Financial Benchmarks Other than LIBOR Are Determined May Negatively Affect the Value of the Floating Rate Notes Linked to Those Benchmarks That We May Issue

Certain floating rates (in addition to LIBOR) are or have historically been established by a poll of market participants rather than actual trade quotations. This has led to concerns that these rates may be subject to manipulation. In July 2013, the International Organization of Securities Commissions published principles for financial benchmarks that included recommendations for changes to benchmark governance, quality and accountability mechanisms (the IOSCO

Principles). As a result, the publishers of these benchmarks may adopt changes to governance arrangements for the administrators and the determinations and methodologies of these benchmarks. For example, ICE Administration assumed the role of benchmark administrator for ISDAFIX

S-7

Table of Contents

effective August 1, 2014, and ICE Administration recently announced it will introduce a new calculation methodology for ISDAFIX that will move from a polled submission model, where contributing banks submit price estimates, to a methodology based on actual transactions and/or executable quotes posted on regulated trading venues. Additional governance changes aimed at aligning the ISDAFIX benchmark with the IOSCO Principles are expected.

It is not possible to predict the effect of the IOSCO Principles, any changes in the methods pursuant to which these financial benchmarks are determined and any other changes that may result from the implementation of IOSCO Principles by benchmark publishers. Any such changes may result in a sudden or prolonged increase or decrease in the relevant reported rates. To the extent that the value of an investor's notes is affected by these rates, the level of interest payments, and the value of those notes may be affected. Further, uncertainty as to the extent, manner and timing of the continued implementation of the IOSCO Principles may adversely affect the trading market for securities based on these rates and the value of any floating rate notes linked to those rates that we may issue.

Risks Related to an Investment in Inflation-Linked Notes

Historical changes in the CPI are not necessarily indicative of future changes.

Movements in the U.S. Consumer Price Index, or CPI, that have occurred in the past are not necessarily indicative of changes that may occur in the future, which may be wider or more confined than those that have occurred historically. As reported by the Bureau of Labor Statistics of the U.S. Department of Labor, the CPI is a measure of the average change in consumer prices over time in a fixed market basket of goods and services. In calculating the CPI, price changes for the various items are averaged together with weights that represent their relative importance in the spending of urban households in the United States. The contents of the market basket of goods and services and the weights assigned to the various items are updated periodically to take into account changes in consumer expenditure patterns. Changes in the level of the CPI are a function of the changes in specified consumer prices over time, which result from the interaction of many factors that we, the agents and their affiliates do not control and cannot foresee. In addition, changes in the way the CPI is calculated could reduce the level of the CPI and lower the interest payments with respect to inflation-linked notes. Investors should not rely on any historical changes or trends in the CPI as an indicator of future changes in the CPI. Changes in the CPI will impact the rate of interest payable on inflation-linked notes but it is impossible to predict whether the level of the CPI will rise or fall.

During periods of reduced inflation or deflation, the interest rate applicable to the inflation-linked notes for any interest payment period could be as low as zero.

During periods of reduced inflation, the amount of interest payable on inflation-linked notes will decrease, and during periods in which year-over-year inflation is negative, which we refer to as deflation, the applicable interest rate on the notes for such interest periods will be less than the applicable spread and as low as zero. Therefore, for example, if the applicable spread over the inflation index adjustment were 2.00% and the inflation index adjustment were to decrease to 1.00% based on the observed change in the CPI, the interest rate in that period would be 2.00% above the inflation index adjustment, or 3.00%. In a period of deflation, the inflation index adjustment would be negative, which then could result in an interest rate below the applicable spread and as low as zero. For example, if the applicable spread over the inflation index adjustment were 2.00% and the inflation index adjustment were -1.00%, the interest rate in that period would be 1.00%, and if the inflation index adjustment were -2.00%, the interest rate in that period would be zero. The calculation of the inflation index adjustment in respect of the CPI incorporates an approximate three-month lag, as described under Description of Retail Medium-Term Notes Inflation-Linked Rate and Description of InterNotes® Inflation-Linked Rate, which will affect the amount of interest payable on inflation-linked notes and may have an impact on the trading prices of inflation-linked notes, particularly during periods of significant and rapid changes in the CPI.

S-8

Table of Contents

The yield on inflation-linked notes may be lower than the yield on a standard debt security of comparable maturity.

The amounts we will pay you on interest payment dates and the maturity date may be less than the return you could have earned on other investments. Because the level of the CPI as of each interest payment date may be less than, equal to or only somewhat greater than its value as of the previous interest payment date, the effective yield to maturity on inflation-linked notes may be less than that which would be payable on a conventional fixed-rate, non-callable debt security of Prudential Financial, Inc. of comparable maturity. In addition, any such return may not fully compensate you for any opportunity cost to you when other factors relating to the time value of money are taken into account.

An Investment in Indexed Notes Entails Significant Risks Not Associated with a Similar Investment in Fixed or Conventional Floating Rate Notes

An investment in notes that are indexed, as to interest and/or principal, to commodities, securities, baskets of securities or securities indices, interest rates, financial, economic or other measures or other indices, either directly or inversely, entails significant risks that are not associated with similar investments in a fixed rate or conventional floating rate note, and investors in certain indexed notes may lose their entire investment.

These risks include the possibility that an index or indices may be subject to significant changes and that the resulting interest rate will be less than that payable on a fixed or conventional floating rate debt security issued by us at the same time, that the repayment of principal and/or premium, if any, can occur at times other than that expected by the investor, and that you, as the investor, could lose all or a substantial portion of principal and/or premium, if any, payable on the maturity date. Depending on the terms of an indexed note, investors may not receive any periodic interest payments or receive only very low payments on an indexed note. These risks depend on a number of interrelated factors, including economic, financial and political events, over which we have no control.

Additionally, if the formula used to determine the amount of principal, premium, if any, and/or interest payable with respect to such notes contains a multiplier or leverage factor, the effect of any change in the applicable index or indices will be magnified. In recent years, values of certain indices have been highly volatile, and such volatility may be expected to continue in the future. Fluctuations in the value of any particular index that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur in the future.

The secondary market, if any, for indexed notes will be affected by a number of factors independent of our creditworthiness and the value of the applicable index or indices, including the complexity and volatility of the index or indices, the method of calculating the principal, premium, if any, and/or interest in respect of indexed notes, the time remaining to the maturity of such notes, the outstanding amount of such notes, any redemption features of such notes, the amount of other debt securities linked to such index or indices and the level, direction and volatility of market interest rates generally. Such factors also will affect the market value of indexed notes.

In addition, certain notes may be designed for specific investment objectives or strategies and, therefore, may have a more limited secondary market and experience more price volatility than conventional debt securities. Investors may not be able to sell such notes readily or at prices that will enable them to realize their anticipated yield. Prospective investors should not purchase such notes unless they understand and are able to bear the risks that such notes may not be readily saleable, that the value of such notes will fluctuate over time and that such fluctuations may be significant.

Accordingly, prospective investors should consult their own financial and legal advisors as to the risks an investment in the notes may entail and the suitability of the notes in light of their particular circumstances.

S-9

Table of Contents

USE OF PROCEEDS

Unless otherwise specified in the applicable pricing supplement, we intend to use the net proceeds from the sales of notes for general corporate purposes, including making loans and capital contributions to our affiliates.

We will receive the net proceeds only from sales of the notes made in connection with their original issuance. We have not received, and do not expect to receive, any proceeds from market-making transactions in the notes by any of our affiliates.

S-10

Table of Contents

DESCRIPTION OF RETAIL MEDIUM-TERM NOTES

*Investors should carefully read the description of the terms and provisions of our debt securities and our senior debt securities indenture under **Description of Debt Securities We May Offer** in the accompanying prospectus. That section, together with this prospectus supplement, the applicable pricing supplement and any free writing prospectus, summarizes all the material terms of our senior debt securities indenture and the Prudential Financial Retail Medium-Term Notes. They do not, however, describe every aspect of our senior debt securities indenture and the Retail Medium-Term Notes. For example, in this section, the accompanying prospectus and the applicable pricing supplement, we use terms that have been given special meanings in our senior debt securities indenture, but we describe the meanings of only the more important of those terms.*

The Retail Medium-Term Notes being offered by this prospectus supplement, the prospectus and the applicable pricing supplement will be issued pursuant to the senior debt securities indenture, as amended and supplemented, which is a contract between The Bank of New York Mellon, as successor to JPMorgan Chase Bank, N.A., as trustee, and us. The indenture is more fully described in the prospectus. The indenture does not limit the aggregate amount of debt securities that may be issued under it and provides that the debt securities may be issued under it from time to time in one or more series. The Retail Medium-Term Notes and the InterNotes[®] together constitute a single series of debt securities for purposes of the indenture. A copy of the senior debt securities indenture is available for inspection during normal business hours at the office of the trustee.

The trustee under the senior debt securities indenture has two main roles: first, the trustee can enforce your rights against us if we default. Second, the trustee performs administrative duties for us, such as sending you interest payments and notices. However, there are limitations on the extent to which the trustee acts on your behalf, which we describe under **Description of Debt Securities We May Offer Default and Related Matters** in the accompanying prospectus. We and the trustee may treat the person in whose name a note is registered as the owner and holder of that note for the purpose of receiving payments of principal of and premium, if any, and, subject to the record date provisions of the notes, interest on that note and for all other purposes whatsoever.

Any money deposited with the trustee and remaining unclaimed for one year after the date upon which the payment of principal of and/or premium, if any, and/or interest on any note to which that deposit relates will become due and payable will be repaid to us upon our request. After that repayment, the holder of any note entitled to receive the payment to which that deposit relates must look only to us for that payment.

Our senior debt securities indenture and the notes do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the notes or our senior debt securities indenture, except as described under **Description of Debt Securities We May Offer Restrictive Covenants** in the accompanying prospectus.

For a description of our relationship with the Trustee, including possible conflicts of interest, see **Description of Debt Securities We May Offer Our Relationship With the Trustee** in the accompanying prospectus.

Retail Medium-Term Notes issued in accordance with this prospectus supplement, the prospectus and the applicable pricing supplement will have the following general characteristics:

- the notes will be our direct, unsecured, senior obligations and will rank equally with all of our other unsecured, senior indebtedness from time to time outstanding;

- the notes will be effectively subordinated to any existing and future indebtedness of any of our subsidiaries unless the terms of that indebtedness provide otherwise;
- the notes may be offered from time to time by us through the Purchasing Agent and each note will mature on a day that is at least one year from its date of original issuance;

S-11

Table of Contents

- unless otherwise specified in the applicable pricing supplement, each note will bear interest from its date of original issuance at a fixed or floating rate;
- the notes will not be subject to any sinking fund;
- any interest, principal and other amounts payable on the notes will be payable in United States dollars;
- the notes will be issued only in global form and you will not be able to request notes in non-global form, except in the limited circumstances described in this prospectus supplement or the applicable pricing supplement;
- the depositary for your notes will be DTC; and
- the minimum denomination of the notes will be \$1,000, unless otherwise stated in the applicable pricing supplement.

In addition, the pricing supplement relating to each offering of Retail Medium-Term Notes will describe specific terms of the notes, including:

- the Purchasing Agent;
- the stated maturity date;
- whether the note is a fixed rate note, a floating rate note, an inflation-linked note or an indexed note;
- if your note is a fixed rate note, the annual rate at which your note will bear interest, if any, the interest payment dates, the regular record dates, and the method for determining interest, if different from that described below under **Description of the Retail Medium-Term Notes Interest Fixed Rate Retail Medium-Term Notes** in this prospectus supplement;
- if your note is a floating rate note, the interest rate basis, which may be one of the six base rates described in **Description of the Retail Medium-Term Notes Interest Floating Rate Retail Medium-Term Notes** in this prospectus supplement or another base rate set forth in the applicable pricing supplement; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; and the day count fraction and interest reset, determination, calculation (if applicable), regular record and interest payment dates, all of which we describe under **Description of the Retail Medium-Term Notes Interest Floating Rate Retail Medium-Term Notes** in this prospectus supplement;

- if your note is an inflation-linked note, any applicable spread or spread multiplier or initial, maximum or minimum rate, and the day count fraction and interest reset, determination and interest payment dates, all of which we describe under Description of the Retail Medium-Term Notes Inflation-Linked Rate in this prospectus supplement;
- if your note is an indexed note, the principal amount, if any, we will pay you at maturity, the amount of interest, if any, we will pay you on an interest payment date or the formula we will use to calculate these amounts, if any, the interest payment dates, regular record dates, and whether your note will be exchangeable for or payable in cash, securities of an issuer other than us or other property;

S-12

Table of Contents

- the applicable business day convention and business days, if different from those specified in this prospectus supplement, that apply to your notes;
- whether your note is an amortizing note;
- whether your note is an original issue discount note and, if so, the yield to maturity;
- the price, which may be expressed as a percentage of the principal amount of the notes, at which the notes will be issued to the public;
- the date on which the notes will be issued to the public;
- the purchase price, Purchasing Agent's discount and net proceeds to us;
- if applicable to your notes, that the authorized representative of the holder of a beneficial interest in the note will have the right to seek repayment upon the death of the holder as described under "Survivor's Option";
- if applicable, the circumstances under which your note may be redeemed at our option or, in addition to the Survivor's Option if applicable, repaid at the holder's option before the stated maturity and the terms and conditions of that redemption or repayment;
- certain United States federal income tax considerations relating to acquiring, owning, and disposing of your note to the extent such considerations are not set forth below under "Certain Federal Income Tax Considerations" in this prospectus supplement; and
- any other significant terms of the notes in addition to the items specified above.

We may at any time purchase Retail Medium-Term Notes at any price or prices in the open market or otherwise. Notes so purchased by us may, at our discretion, be held, resold or surrendered to the trustee for cancellation.

Payment of Principal and Interest

Unless otherwise specified in the applicable pricing supplement, payments of principal of and interest on the Retail Medium-Term Notes will be made in accordance with the arrangements then in place between the paying agent and The Depository Trust Company, or "DTC", and its participants. You will not receive payments directly from us.

Interest on each Retail Medium-Term Note will be payable either monthly, quarterly, semi-annually or annually on each interest payment date and at the note's stated maturity or on the date of redemption or repayment if a note is redeemed or repaid prior to maturity. Interest is payable to the person in whose name a note is registered at the close

of business on the regular record date before each interest payment date. Unless otherwise specified in the applicable pricing supplement, the regular record date will be the business day preceding an interest payment date (as the interest payment date may be adjusted by any applicable business day convention). Interest due at a note's stated maturity or on a date of redemption or repayment will be payable to the person to whom principal is payable. You should note, however, that the first payment of interest on any Retail Medium-Term Note issued on or after a regular record date and up to and including the related interest payment date will be made on the interest payment date relating to the following regular record date to the person in whose name a note is registered on that following regular record date.

S-13

Table of Contents

Any tax, assessment or governmental charge imposed upon any payments on a note, including, without limitation, any withholding tax, is the responsibility of the holders of beneficial interests in the note in respect of which such payments are made.

Form, Legal Ownership and Transfer of the Notes

Unless otherwise provided in the applicable pricing supplement, the notes will be issued in fully registered form and will be represented by a master global note, which will be deposited with a custodian for DTC and registered in the name of DTC's nominee, Cede & Co. You may transfer or exchange your interests in the master global note only through DTC. For information with respect to payments of principal of and premium, if any, and interest on your interests in the master global note and how to transfer or exchange it, see "Global Securities" in the accompanying prospectus. We will make all payments on the master global note in accordance with the applicable procedures of DTC or any other specified depository for the master global note.

Business Days

Unless otherwise specified in the applicable pricing supplement, "business day" means any day that is neither a Saturday or Sunday, nor a day on which banking institutions in The City of New York are authorized or obligated by law, regulation or executive order to close, and (1) with respect to any floating rate note for which LIBOR is an applicable base rate, a London Business Day, (2) if a note is denominated in a specified currency, currency unit or composite currency other than U.S. dollars or euros, a day that is not a day on which banking institutions are authorized or obligated by law, regulation or executive order to close in the principal financial center of the country issuing the specified currency, currency unit or composite currency, (3) if the specified currency of a note is euros, any day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET2) System or any successor system is open for business, and (4) with respect to a floating rate note that is a CMT note, a prime rate note or a federal funds rate note, a U.S. Government securities business day. *London business day* means a day on which commercial banks are open for business, including for dealings in the designated LIBOR currency, in London. *U.S. Government securities business day* means any day except for a Saturday, Sunday or a day on which the Securities Industry and Financial Markets Association recommends that the fixed income department of its members be closed for the entire day for purposes of trading in U.S. government securities. *Principal financial center* means the capital city of the country to which the index currency (as defined below) relates, or the capital city of the country issuing the specified currency, currency unit or composite currency, as applicable, except that with respect to United States dollars, the "principal financial center" means The City of New York, and with respect to euros the "principal financial center" means London.

Interest***Fixed Rate Retail Medium-Term Notes***

Each fixed rate Retail Medium-Term Note, other than zero coupon notes, will bear interest from and including its original issue date, or from and including the last interest payment date to which interest has been paid or duly provided for, at the annual rate specified in the applicable pricing supplement until its principal amount is paid or duly made available for payment. Unless otherwise specified in the applicable pricing supplement, interest on fixed rate notes will be computed on the basis of a 360-day year of twelve 30-day months.

Unless otherwise specified in the applicable pricing supplement, we will pay interest on fixed rate Retail Medium-Term Notes semi-annually on the interest payment dates specified in the applicable pricing supplement and on the maturity date.

S-14

Table of Contents

The amount of interest that has accrued during each interest period *i.e.*, the period from and including the original issue date, or the last date to which interest has been paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes), to but excluding the next date to which interest will be paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes, as described under **Business Day Conventions** below) on a fixed rate Retail Medium-Term Note, other than zero coupon notes, will be determined by multiplying the principal amount of the note by an accrued interest factor for the interest period. The accrued interest factor will be determined by multiplying the per annum fixed interest rate by a factor resulting from the day count fraction specified in your prospectus supplement if different from a 360-day year of twelve 30-day months, and otherwise on the basis of a 360-day year of twelve 30-day months.

Floating Rate Retail Medium-Term Notes

The amount of interest that has accrued during each interest period *i.e.*, the period from and including the original issue date, or the last date to which interest has been paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes), to but excluding the next date to which interest will be paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes, as described under **Business Day Conventions** below) on a floating rate Retail Medium-Term Note will be determined by multiplying the principal amount or face amount of the note by an accrued interest factor for the interest period. The accrued interest factor will be determined by multiplying the per annum floating interest rate by a factor resulting from the day count fraction specified in your prospectus supplement. Unless otherwise specified in the applicable pricing supplement, the day count fraction applicable to CMT rate notes and treasury rate notes will be the Actual/Actual (ISDA) day count fraction, and for other floating rate notes the day count fraction will be Actual/360. See **Day Count Fractions** below. The floating interest rate will be determined as described below.

Interest Rates. Interest on floating rate Retail Medium-Term Notes will be determined by reference to one or more base rates specified in the applicable pricing supplement, which will include:

- the constant maturity swap rate,
- the CMT rate,
- LIBOR,
- the prime rate,
- the treasury rate,
- the federal funds rate, or

- any other domestic or foreign interest rate or exchange rate indices or other indices as we may describe in the applicable pricing supplement.

The related base rate will be based upon the index maturity, if applicable, and adjusted by a spread and/or spread multiplier, if any, as specified in the applicable pricing supplement. In addition, a floating rate Retail Medium-Term Note may bear interest that is calculated by reference to two or more base rates determined in the same manner as the base rates are determined for the types of floating rate notes described above. Each floating rate Retail Medium-Term Note will specify the base rate or rates applicable to it.

Base Rates, Spreads and Spread Multipliers. The interest rate on each floating rate note will be calculated by reference to one or more specified base rates, in either case plus or minus any applicable spread,

Table of Contents

and/or multiplied by any applicable spread multiplier. The *index maturity* is the period to maturity of the instrument or obligation from which the base rate or rates are calculated, if applicable, as specified in the applicable pricing supplement. The *spread* is the number of basis points to be added to or subtracted from the base rate or rates applicable to a floating rate note, and the *spread multiplier* is the percentage of the base rate or rates applicable to a floating rate note by which the base rate or rates are multiplied to determine the applicable interest rates on the floating rate note, as specified in the applicable pricing supplement. Each floating rate note will initially bear interest at the per annum initial interest rate as described in the applicable pricing supplement.

Reset of Rates. The interest rate on each floating rate note will be reset on each *interest reset date* as specified in the applicable pricing supplement.

Maximum and Minimum Rates. A floating rate note may also have either or both of the following:

- a maximum limit, or ceiling, called the *maximum interest rate*, on the rate at which interest may accrue during any interest period with respect to that floating rate note from time to time and
- a minimum limit, or floor, called the *minimum interest rate*, on the rate at which interest may accrue during any interest period with respect to that floating rate note from time to time. In addition to any maximum interest rate which may apply to any floating rate note, the interest rate on floating rate notes will in no event be higher than the maximum rate permitted by New York law, as the same may be modified by federal law of general applicability.

Determination of Reset Interest Rates. The interest rate applicable to each interest period will be the rate determined as of the applicable interest determination date defined below.

Unless otherwise specified in the applicable pricing supplement, the *interest determination date* with respect to an interest reset date for:

- constant maturity swap rate notes, CMT rate notes, prime rate notes, federal funds rate notes and inflation-linked notes will be the second U.S. government securities business day before the interest reset date;
- LIBOR notes will be the second London business day before the interest reset date unless the designated LIBOR currency is pounds sterling, in which case the interest determination date will be the applicable interest reset date; and
- treasury rate notes will be the day of the week in which the relevant interest reset date falls on which United States government treasury bills are normally auctioned.

The interest determination date pertaining to a floating rate note the interest rate of which is determined with reference to two or more base rates will be the first business day which is at least two business days prior to the interest reset date for that floating rate note on which each base rate is determined. Each base rate will be determined on that date and the applicable interest rate will take effect on the related interest reset date.

The interest rate in effect with respect to a floating rate note on each day that is not an interest reset date will be the interest rate determined as of the interest determination date for the immediately preceding interest reset date. The interest rate in effect on any day that is an interest reset date will be the interest rate determined as of the interest determination date for that interest reset date, subject in each case to any applicable law and maximum or minimum interest rate limitations. However, the interest rate in effect with respect to a floating rate note for the period from its original issue date to the first interest reset date, to which we refer as the initial interest rate, will be determined as specified in the applicable pricing supplement.

Table of Contents

Calculation Agent. Unless otherwise specified in the applicable pricing supplement, we will be the calculation agent and will calculate the interest rate applicable to a floating rate note on or before any calculation date. Upon the request of the holder of any floating rate note, the calculation agent will provide the interest rate then in effect and, if determined, the interest rate as determined for the then most recent interest reset date with respect to that floating rate note.

All percentages resulting from any calculation on floating rate notes will be rounded, if necessary, to the nearest one-hundred-thousandth of a percentage point, with five one-millionths of a percentage point rounded upward, *e.g.*, 9.876545%, or 0.09876545, will be rounded upward to 9.87655%, or 0.0987655, and all dollar amounts used in or resulting from that calculation on floating rate notes will be rounded to the nearest cent, or in the case of a foreign currency or composite currency, to the nearest corresponding unit, with one-half cent being rounded upward.

As mentioned above, the initial interest rate in effect with respect to a floating rate note from and including the original issue date to but excluding the first interest reset date will be specified in the applicable pricing supplement. The interest rate for each subsequent interest reset date will be determined by the calculation agent as set forth below, plus or minus any spread and/or multiplied by any spread multiplier, and subject to any maximum interest rate and/or minimum interest rate, as specified in the applicable pricing supplement.

Constant Maturity Swap Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the constant maturity swap rate means, with respect to any interest reset date, the rate appearing on the Reuters screen ISDAFIX1 page for U.S. dollar swaps having a maturity equal to the index maturity specified in your pricing supplement as of approximately 11:00 A.M., New York City time, on the relevant interest determination date. If the constant maturity swap rate cannot be determined in this manner, then:

The constant maturity swap rate for the relevant interest reset date will be determined on the basis of the mid-market semi-annual swap rate quotations provided by five leading swap dealers in the New York City interbank market at approximately 11:00 A.M., New York City time, on the relevant interest determination date. For this purpose, the semi-annual swap rate means the mean of the bid and offered rates for the semi-annual fixed leg, calculated on a 30/360 day count basis, of a fixed-for-floating U.S. dollar interest rate swap transaction with a term equal to the specified index maturity, commencing on the relevant interest reset date, with an acknowledged dealer of good credit in the swap market, where the floating leg, calculated on an Actual/360 day count basis, is equivalent to LIBOR with a designated maturity of three months, as such rate may be determined in accordance with the provisions set forth below under LIBOR. The calculation agent will select the five swap dealers in its sole discretion and will request the principal New York City office of each of those dealers to provide a quotation of its rate.

If at least three quotations are provided, the constant maturity swap rate for that interest reset date will be the arithmetic mean of the quotations described above, eliminating the highest and lowest quotations or, in the event of equality, one of the highest and one of the lowest quotations.

If fewer than three quotations are provided, the calculation agent will determine the constant maturity swap rate in its sole discretion.

CMT Rate

Unless otherwise specified in the applicable pricing supplement, the manner in which a base rate designated as the CMT rate is determined for the relevant interest reset date will depend on the designated CMT Reuters screen page

that is specified for your notes in the applicable pricing supplement. If no designated

S-17

Table of Contents

CMT Reuters screen page is specified, Reuters screen FRBCMT page will be the designated CMT Reuters screen page for your notes.

If the designated CMT Reuters screen page for your notes is FRBCMT, the CMT rate for the relevant interest reset date will be the yield for Treasury securities at constant maturity for a period of the designated CMT maturity as set forth in H.15(519) under the caption Treasury constant maturities, as displayed on the designated CMT Reuters screen page on the CMT interest determination date. If the applicable rate described above is not displayed on the designated CMT Reuters screen page, then the CMT rate will be the treasury constant maturity rate for the designated CMT maturity as published in H.15(519) under the caption Treasury constant maturities.

If the rate described in the preceding paragraph does not appear in H.15(519), then the CMT rate for the relevant interest reset date will be the treasury constant maturity rate for the designated CMT maturity that:

is published by the Board of Governors of the Federal Reserve System or the U.S. Department of the Treasury; and

is determined by the calculation agent to be comparable to the applicable rate that would otherwise have been published in H.15(519).

If, on the relevant CMT interest determination date, the rate described in the preceding paragraph is not published by the Board of Governors of the Federal Reserve System or the U.S. Department of the Treasury, then the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for the most recently issued U.S. Treasury securities having an original maturity of approximately the designated CMT maturity and a remaining term to maturity of not less than the designated CMT maturity minus one year, and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant interest determination date, quoted by three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two such bid rates are provided, the CMT rate will be based on the arithmetic mean of the bid prices provided, and neither the highest nor lowest of those quotations will be eliminated.

If the calculation agent is unable to obtain three quotations of the kind described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for U.S. Treasury securities with an original maturity longer than the designated CMT maturity, with a remaining term to maturity closest to the designated CMT maturity and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant CMT interest determination date, of three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five of these primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two of these primary dealers are quoting, then the CMT rate for the relevant interest reset date will be based on the arithmetic mean of the bid rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded. If two U.S. Treasury securities with an original maturity longer than the designated CMT maturity have remaining terms to maturity that are equally close to the designated CMT maturity, the calculation agent will obtain quotations for the U.S. Treasury securities with the shorter original term to maturity.

If two or fewer primary dealers selected by the calculation agent are quoting as described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the rate determined by the calculation agent in its sole discretion, after consulting such sources as it deems comparable to any of the

S-18

Table of Contents

foregoing quotations or display page, or any such source as it deems reasonable from which to estimate the rate for U.S. Treasury securities at constant maturity or any of the foregoing bid rates.

If the designated CMT Reuters screen page for your notes is FEDCMT, the CMT rate for the relevant interest reset date will be the one-week average yield for Treasury securities at constant maturity for a period of the designated CMT maturity as set forth in H.15(519) under the heading *Week Ending* and opposite the heading *Treasury constant maturities* for the week preceding the relevant interest reset date, as such average is displayed on the designated CMT Reuters screen page for the week preceding the relevant interest reset date.

If the applicable average described above is not displayed on the designated CMT Reuters screen page, then the CMT rate for the relevant interest reset date will be the one-week average yield for Treasury securities at constant maturity for a period of the designated CMT maturity and for the week preceding the relevant interest reset date as published in H.15(519) under the heading *Week Ending* and opposite the heading *Treasury constant maturities*.

If the applicable average described in the preceding paragraph does not appear in H.15(519), then the CMT rate for the relevant interest reset date will be the one-week average yield for Treasury securities at constant maturity for a period equal to the designated CMT maturity as otherwise announced by the Federal Reserve Bank of New York for the week preceding the relevant interest reset date.

If for the week preceding the relevant interest reset date the Federal Reserve Bank of New York does not publish a one-week average yield for Treasury securities at constant maturity for a period equal to the designated CMT maturity for the preceding week, then the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for the most recently issued U.S. Treasury securities having an original maturity of approximately the designated CMT maturity and a remaining term to maturity of not less than the designated CMT maturity minus one year, and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant interest determination date, quoted by three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two such bid rates are provided, the CMT rate will be based on the arithmetic mean of the bid prices provided, and neither the highest nor lowest of those quotations will be eliminated.

If the calculation agent is unable to obtain three quotations of the kind described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for U.S. Treasury securities with an original maturity longer than the designated CMT maturity, with a remaining term to maturity closest to the designated CMT maturity and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant CMT interest determination date, of three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five of these primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two of these primary dealers are quoting, then the CMT rate for the relevant interest reset date will be based on the arithmetic mean of the bid rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded. If two U.S. Treasury securities with an original maturity longer than the designated CMT maturity have remaining terms to maturity that are equally close to the designated CMT maturity, the calculation agent will obtain quotations for the U.S. Treasury securities with the shorter original term to maturity.

If two or fewer primary dealers selected by the calculation agent are quoting as described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the rate determined by the calculation agent in its sole

discretion, after consulting such sources as it deems comparable to any of the

S-19

Table of Contents

foregoing quotations or display page, or any such source as it deems reasonable from which to estimate the one-week average for U.S. Treasury securities at constant maturity or any of the foregoing bid rates.

The term *designated CMT maturity* means the maturity for CMT rate notes and will be the original period to maturity of a U.S. treasury security either 1, 2, 3, 5, 7, 10, 20 or 30 years specified in the applicable pricing supplement. If no such original maturity period is so specified, the designated CMT maturity will be 2 years.

LIBOR

Unless otherwise specified in the applicable pricing supplement, a base rate designated as **LIBOR** means, with respect to any interest reset date, the London interbank offered rate for deposits in U.S. dollars or any other index currency, as specified in your pricing supplement, for the index maturity specified in your pricing supplement, appearing on the designated LIBOR page as of approximately 11:00 A.M., London time, on the relevant interest determination date.

If the rate described above does not so appear on the Reuters screen LIBOR page, then LIBOR will be determined on the basis of the rates at which deposits in U.S. dollars or any other index currency, as specified in your pricing supplement, are offered by four major banks in the London interbank market selected by the calculation agent at approximately 11:00 A.M., London time, on the relevant interest determination date, to prime banks in the London interbank market for a period of the specified index maturity, beginning on the relevant interest reset date, and in a representative amount. The calculation agent will request the principal London office of each of these major banks to provide a quotation of its rate. If at least two quotations are provided, LIBOR for the relevant interest reset date will be the arithmetic mean of the quotations.

If fewer than two of the requested quotations described above are provided, LIBOR for the relevant interest reset date will be the arithmetic mean of the rates quoted by major banks in New York City or, if the index currency is not U.S. dollars, in the principal financial center for the country issuing the index currency, selected by the calculation agent, at approximately 11:00 A.M., New York City time (or the time in the relevant principal financial center), on the relevant interest reset date, for loans in U.S. dollars (or the index currency) to leading European banks for a period of the specified index maturity, beginning on the relevant interest reset date, and in a representative amount.

If no quotation is provided as described in the preceding paragraph, then the calculation agent, after consulting such sources as it deems comparable to any of the foregoing quotations or display page, or any such source or sources as it deems reasonable, shall determine LIBOR for that interest reset date.

Designated LIBOR page means, unless otherwise specified in the applicable pricing supplement, the display on Reuters, or any successor service, on Reuters screen page LIBOR01, or any successor page on that service, for the purpose of displaying the London interbank rates of major banks for the index currency.

Index currency means United States dollars unless otherwise specified in the applicable pricing supplement.

Prime Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the **prime rate** means, with respect to any interest determination date, the rate set forth on such date in H.15(519) opposite the heading **Bank prime loan**.

If, by approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, the rate described above is not yet published in H.15(519) then the

S-20

Table of Contents

prime rate will be the rate, for the relevant interest reset date, as published in H.15 daily update or another recognized electronic source used for the purpose of displaying that rate, opposite the heading *Bank prime loan* .

If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source by approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, then the prime rate for the relevant interest reset date will be the rate for the day first preceding the relevant interest reset date for which such rate is set forth in H.15(519) opposite the heading *Bank prime loan* .

Treasury Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the *treasury rate* means, with respect to any interest reset date, the rate for U.S. government treasury bills, as that rate appears on the Reuters screen USAUCTION10 page or USAUCTION11 page on the relevant interest determination date, opposite the index maturity specified in your pricing supplement under the heading *INVEST RATE* .

If the rate described above does not appear on either page for the interest determination date on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, but U.S. government treasury bills having the specified index maturity have been auctioned on the relevant interest determination date, then the treasury rate will be the bond equivalent yield of the rate, for the relevant interest determination date, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, for that day and for the specified index maturity, under the heading *U.S. Government securities/Treasury bills/Auction high* .

If the rate cannot be determined as described in the preceding paragraph, then the treasury rate will be the bond equivalent yield of the auction rate for treasury bills with a remaining maturity equal to the specified index maturity as announced by the U.S. Department of the Treasury.

If no such auction is held during a period of seven consecutive calendar days ending on and including a Friday in which the interest determination date falls, then the treasury rate will be the bond equivalent yield of the rate, for the relevant interest determination date and for treasury bills having the specified index maturity, as published in H.15(519) under the heading *U.S. government securities/Treasury bills/Secondary market* .

If the rate described in the prior paragraph does not appear in H.15(519) on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the treasury rate will be the rate, for the relevant interest determination date and for treasury bills having the specified index maturity, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading *U.S. government securities/Treasury bills/Secondary market* .

If the rate described in the prior paragraph does not appear in H.15 daily update or another recognized electronic source on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, the treasury rate will be the bond equivalent yield of the arithmetic mean of the following secondary market bid rates for the issue of treasury bills with a remaining maturity closest to the specified index maturity: the bid rates as of approximately 3:30 P.M., New York City time, for the relevant interest calculation date, by three primary U.S. government securities dealers in New York City selected by the calculation agent.

If no quotation is provided as described in the preceding paragraph, then the calculation agent, after consulting such sources as it deems comparable to any of the foregoing secondary market bids or any display page or other U.S.

government publication or source, or any other source as it deems reasonable from which to

S-21

Table of Contents

estimate the treasury bills auction rate or any of the foregoing secondary market bid rates, shall determine the treasury rate for that interest determination date in its sole discretion.

Bond equivalent yield means a yield, expressed as a percentage, calculated in accordance with the following formula:

$$\text{Bond equivalent yield} = \frac{D \times N}{360 - (D \times M)} \times 100$$

where *D* is the applicable per annum rate for treasury bills quoted on a bank discount basis and expressed as a decimal, *N* refers to 365 or 366, as the case may be, and *M* is the actual number of days in the applicable interest period.

Interest calculation date means the last day of the applicable interest period on which the treasury rate can be calculated in order to permit the payment due on the related interest payment date to be made.

Federal Funds Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the *federal funds rate* means the rate for U.S. dollar federal funds on the relevant interest reset date, as set forth in H.15(519) opposite the heading *Federal funds (effective)*, as that rate is displayed on the Reuters screen FEDFUNDS1 page for that day.

If, by approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, the federal funds rate for the relevant interest reset date does not appear on Reuters screen FEDFUNDS1 page, then the federal funds rate for that interest reset date will be the rate published on H.15(519) for that day opposite the heading *Federal funds (effective)*.

If the rate described above is not displayed on the Reuters screen FEDFUNDS1 page and does not appear in H.15(519) at approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, then the federal funds rate, for the relevant interest reset date, will be the rate described above as published in H.15 daily update, or another recognized electronic source used for displaying that rate, for that day opposite the heading *Federal funds (effective)*.

If the rate cannot be determined as described in the preceding paragraphs, then the federal funds rate for the relevant interest reset date will be the rate for the first day preceding the relevant interest reset date for which such rate is set forth in H.15(519) opposite the caption *Federal funds (effective)*, as such rate is displayed on the Reuters Screen FEDFUNDS1 page.

Common Definitions for Base Rates

H.15(519) means the weekly statistical release designated as such published by the Federal Reserve System Board of Governors, or its successor, available through the website of the Board of Governors of the Federal Reserve System at <http://www.federalreserve.gov/releases/h15/update/h15upd.htm>, or any successor site or publication.

H.15 daily update means the daily update of H.15(519), available through the website of the Board of Governors of the Federal Reserve System, at <http://www.federalreserve.gov/releases/h15/update/h15upd.htm>, or any successor site or publication.

Index maturity has the meaning specified in the applicable pricing supplement except that, if the base rate is LIBOR and no index maturity is specified in the applicable pricing supplement, the index maturity will be three months.

Table of Contents

The term *representative amount* means an amount that, in the calculation agent's judgment, is representative of a single transaction in the relevant market at the relevant time.

Reuters screen page means the display on Reuters 3000 Xtra Service, or Reuters, or any successor service, on the page specified in the applicable pricing supplement, or any successor page on that service.

Business Day Conventions

If your prospectus supplement specifies that one of the following business day conventions is applicable to your notes, the interest payment dates, interest reset dates and interest periods for your debt securities will be affected (and, consequently, may be adjusted) as described below, except that any payment due at maturity (including any interest payment) will not be affected as described below:

Following business day convention means, for any relevant date other than the maturity, if such date would otherwise fall on a day that is not a business day, then such date will be postponed to the next day that is a business day.

Modified following business day convention means, for any relevant date other than the maturity, if such date would otherwise fall on a day that is not a business day, then such date will be postponed to the next day that is a business day, except that, if the next business day falls in the next calendar month, then such date will be advanced to the immediately preceding day that is a business day.

Following unadjusted business day convention means, for any interest payment date, other than the maturity, that falls on a day that is not a business day, any payment due on such interest payment date will be postponed to the next day that is a business day; provided that interest due with respect to such interest payment date shall not accrue from and including such interest payment date to and including the date of payment of such interest as so postponed. Interest reset dates and interest periods also are not adjusted for non-business days.

Modified following unadjusted business day convention means, for any interest payment date, other than the maturity, that falls on a day that is not a business day, any payment due on such interest payment date will be postponed to the next day that is a business day; provided that interest due with respect to such interest payment date shall not accrue from and including such interest payment date to and including the date of payment of such interest as so postponed, and provided further that, if such day would fall in the next succeeding calendar month, the date of payment with respect to such interest payment date will be advanced to the business day immediately preceding such interest payment date. Interest reset dates and interest periods also are not adjusted for non-business days.

In all cases, if the stated maturity or any earlier redemption date or repayment date with respect to any debt security falls on a day that is not a business day, any payment of principal, premium, if any, and interest otherwise due on such day will be made on the next succeeding business day, and no interest on such payment shall accrue for the period from and after such stated maturity, redemption date or repayment date, as the case may be.

Unless otherwise specified in the applicable pricing supplement, fixed rate Retail Medium-Term Notes will be subject to the following unadjusted business day convention, floating rate notes other than LIBOR notes will be subject to the following business day convention and LIBOR notes will be subject to the modified following business day convention.

Day Count Fractions

As described above, the accrued interest for any interest period is calculated by multiplying the principal amount or face amount of the note by an accrued interest factor. The accrued interest factor will be determined by multiplying the per annum floating interest rate by a factor resulting from the day count fraction that will be

S-23

Table of Contents

specified in the applicable pricing supplement for your notes and may include the following:

If 1/1 (ISDA) is specified, the factor will be equal to 1.

If Actual/Actual (ISDA) or Act/Act (ISDA) is specified, the factor will be equal to the actual number of days in the interest period divided by 365 (or, if any portion of that interest period falls in a leap year, the sum of (1) the actual number of days in that portion of the interest period falling in a leap year divided by 366 and (2) the number of days in that portion of the interest period falling in a non-leap year divided by 365).

If Actual/Actual (ICMA) is specified, the factor will be equal to the number of days in the interest period, including February 29 in a leap year, divided by the product of (1) the actual number of days in such interest period and (2) the number of interest periods in the calendar year.

If Actual/Actual (Bond) is specified, the factor will be equal to the number of calendar days in the interest period, divided by the number of calendar days in the interest period multiplied by the number of interest periods in the calendar year.

If Actual/Actual (Euro) is specified, the factor will be equal to the number of calendar days in the interest period divided by 365 or, if the interest period includes February 29, 366.

If Actual/365 (Fixed) , Act/365 (Fixed) , A/365 (Fixed) or A365F is specified, the factor will be equal to the actual number of days in the interest period divided by 365.

If Actual/360 , Act/360 or A/360 is specified, the factor will be equal to the actual number of days in the interest period divided by 360.

If Actual/360 (ICMA) is specified, the factor will be equal to the number of calendar days in the period, including February 29 in a leap year, divided by 360 days.

If 30/360 is specified, the factor will be calculated on the basis of a 360 day year of twelve 30-day months.

Unless otherwise specified in the applicable pricing supplement, the day count fraction applicable to fixed rate notes will be the 30/360 day count fraction, to constant maturity swap rate notes, CMT rate notes, treasury rate notes and inflation-linked notes will be the Actual/Actual (ISDA) day count fraction, and to other floating rate notes, will be the Actual/360 day count fraction.

Indexed Retail Medium-Term Notes

We may issue indexed Retail Medium-Term Notes that will provide that the amount of interest payable on an interest payment date and/or the amount of principal payable at maturity will be determined by reference to:

- one or more securities;
- one or more commodities;

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 424B2

- any other financial, economic or other measures or instruments, including the occurrence or non-occurrence of any event or circumstances; and/or
- indices or baskets of any of these items.

S-24

Table of Contents

The applicable pricing supplement will include information about the relevant index or indices and how amounts that are to become payable will be determined by reference to that index or those indices. See also Risk Factors An Investment in Indexed Notes Entails Significant Risks Not Associated With a Similar Investment in Fixed or Conventional Floating Rate Notes.

Inflation-Linked Rate

Inflation Index Adjustment. Unless otherwise specified in the applicable pricing supplement, inflation-linked rate means, for any interest determination date relating to an inflation-linked note or any floating rate note for which the CPI (as defined below) is the applicable base rate, the inflation index adjustment plus a specified percentage (also referred to as the spread). The inflation index adjustment for each interest payment period will be based on the percentage change in the CPI. The inflation index adjustment may be a positive or negative rate in any interest payment period and will be calculated monthly and reset the interest rate on the notes monthly. An inflation-linked note will be treated, and interest will be calculated as, a Floating Rate Medium-Term Note.

The inflation index adjustment (expressed as a percentage per year) for an interest payment period will be calculated as follows:

$$\text{Inflation index adjustment} = \left(\frac{\text{Ref CPI}_n}{\text{Ref CPI}_{n-12}} - 1 \right)$$

Ref CPI_{n-12}

The inflation index adjustment will be expressed as a percentage, rounded to the nearest one-hundredth of one percent. All percentages resulting from any intermediate calculation on the notes will be rounded, if necessary, to the nearest one hundred-thousandth of a percentage point, with .000005% rounded up to .00001%. All coupon amounts used in or resulting from such calculation on the notes will be rounded to the nearest one-hundredth of a percentage point, with .005% rounded up to .01%.

Ref CPI_n = As to any interest reset date, the level of CPI for the third calendar month (the Reference Month) preceding the month in which that interest reset date occurs, as reported in the second calendar month prior to such interest reset date.

Ref CPI_{n-12} = As to any interest reset date, the level of CPI for the 12th calendar month preceding the relevant Reference Month.

Example. For example, for the interest payment period from and including December 1, 2014 to but excluding January 1, 2015, CPI_n was 238.031, the CPI for September 2014 (the Reference Month), and Ref CPI_{n-12} was 234.149, the CPI for September 2013 (which is the CPI for the 12th calendar month preceding the Reference Month). Assuming a spread of 2.00%, the rate at which interest would have been paid for that period would have been calculated as follows:

Inflation Index

Adjustment =

(Ref CPI_n - Ref CPI_{n-12})

Ref CPI_{n-12}

(238.031 - 234.149)

234.149

CPI means the non-seasonally adjusted U.S. City Average All Items Consumer Price Index for All Urban Consumers, which is published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor, as reported on Bloomberg page CPURNSA or any successor service.

The Consumer Price Index. The consumer price index is the non-seasonally adjusted U.S. City Average All Items Consumer Price Index published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor. The Bureau of Labor Statistics makes available almost all consumer price index data and press releases immediately at the time of release. This material may be accessed electronically by means of the Bureau of Labor Statistics home page on the Internet at <http://www.bls.gov>. We make no representation or warranty as to the accuracy or completeness of the information obtained from the Bureau of Labor Statistics home page. No information contained on the Bureau of Labor Statistics home page is incorporated by reference in this prospectus supplement or the accompanying prospectus.

According to the publicly available information provided by the Bureau of Labor Statistics, the consumer price index is a measure of the average change in consumer prices over time in a fixed market basket of goods and services, including food, clothing, shelter, fuels, transportation, drugs and charges for the services of doctors and dentists. User fees (such as water and sewer service) and sales and excise taxes paid by the consumer are also included. Income taxes and investment items such as stocks, bonds and life insurance are not included. The consumer price index includes expenditures by urban wage earners and clerical workers, professional, managerial and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force. In calculating the consumer price index, price changes for the various items are averaged together with weights that represent their significance in the spending of urban households in the United States. The contents of the market basket of goods and services and the weights assigned to the various items are updated periodically to take into account changes in consumer expenditure patterns. The consumer price index is expressed in relative terms based on a reference period for which the level is set at 100 (currently the base reference period used by the Bureau of Labor Statistics is 1982-1984). For example, because the CPI for the 1982-1984 reference period is 100, an increase of 16.5 percent from that period would be shown as 116.5.

The Bureau of Labor Statistics has made numerous technical and methodological changes to the consumer price index in the past, and it is likely to continue to do so. Examples of past methodological changes include:

- the use of regression models to adjust for the quality improvements in various goods (televisions, personal computers, etc.);
- the introduction of geometric averages to account for consumer substitution within consumer price index categories; and
- changing the housing/shelter formula to improve rental equivalence estimation.

Additionally, effective February 26, 2015, the Bureau of Labor Statistics will use a new estimation system for the Consumer Price Index, which will introduce several methodological changes including imputation of price changes by a narrower set of item and geographic source data.

S-26

Table of Contents

These changes and any future changes could reduce the level of the consumer price index and therefore lower the interest payable on the notes.

The Bureau of Labor Statistics occasionally rebases the consumer price index. The current standard reference base period is 1982-1984 = 100. The consumer price index was last rebased in January 1988. Prior to the release of the consumer price index for January 1988, the standard reference base was 1967 = 100. If the Bureau of Labor Statistics rebases the consumer price index during the time the notes are outstanding, the calculation agent will continue to calculate inflation using the existing base year in effect for the consumer price index at the time of issuance of the notes as long as the old consumer price index is still published. The conversion to a new reference base does not affect the measurement of the percent changes in a given index series from one time period to another, except for rounding differences. Thus, rebasing might affect the published headline number often quoted in the financial press; however, the inflation calculation for the notes should not be adversely affected by any such rebasing because the old-based consumer price index can be calculated by using the percent changes of the new rebased consumer price index to calculate the levels of the old consumer price index (because the two series should have the same percentage changes).

The notes represent obligations of Prudential Financial, Inc. only. The U.S. government is not involved in any way in this offering and is under no obligation relating to the notes or to the holders of the notes.

CPI Contingencies. If the CPI for a particular month is revised, the previously reported CPI will continue to be used to calculate interest payments on the notes.

In no case will the interest rate for the notes for any monthly interest payment period be less than the minimum interest rate of 0.00% per annum or more than the maximum interest rate of 100% per annum. The amount of interest payable on the notes on each interest payment date will be calculated on an Actual/Actual (ISDA) day count basis. If the CPI for a particular month is revised, the previously reported CPI will continue to be used to calculate interest payments on the notes.

If by 3:00 p.m. on any interest determination date the CPI is not published on Bloomberg CPURNSA for any relevant month, but has otherwise been published by the Bureau of Labor Statistics, the calculation agent will determine the CPI as reported by the Bureau of Labor Statistics for such month using such other source as on its face appears to accurately set forth the CPI as reported by the Bureau of Labor Statistics.

In calculating CPI_n and CPI_{n-12} , the calculation agent will use the most recently available value of the CPI determined as described above on the applicable interest determination date, even if such value has been adjusted from a prior reported value for the relevant month. However, if a value of CPI_n and CPI_{n-12} used by the calculation agent on any interest reset date to determine the interest rate on the notes (an initial CPI) is subsequently revised by the Bureau of Labor Statistics, the calculation agent will continue to use the initial CPI, and the interest rate determined on such interest determination date will not be revised.

If the CPI is rebased to a different year or period and the 1982-1984 CPI is no longer used, the base reference period for the notes will continue to be the 1982-1984 reference period as long as the 1982-1984 CPI continues to be published.

If, while the notes are outstanding, the CPI is discontinued or substantially altered, as determined by the calculation agent in its sole discretion, the calculation agent will determine the interest rate on the notes by reference to the applicable substitute index that is chosen by the Secretary of the Treasury for the Department of The Treasury's Inflation-Linked Treasuries as described at 62 Federal Register 846-874 (January 6, 1997) or, if no such securities are outstanding, the substitute index will be determined by the calculation agent in accordance with general market

practice at the time; provided that the procedure for determining the resulting interest rate is administratively acceptable to the calculation agent.

S-27

Table of Contents

The following table sets forth the CPI from January 2008 to January 2015, as reported by the Bureau of Labor Statistics of the U.S. Department of Labor.

Month	2015	2014	2013	2012	2011	2010	2009	2008
January	233.707	233.916	230.280	226.665	220.223	216.687	211.143	211.080
February		234.781	232.166	227.663	221.309	216.741	212.193	211.693
March		236.293	232.773	229.392	223.467	217.631	212.709	213.528
April		237.072	232.531	230.085	224.906	218.009	213.240	214.823
May		237.900	232.945	229.815	225.964	218.178	213.856	216.632
June		238.343	233.504	229.478	225.722	217.965	215.693	218.815
July		238.250	233.596	229.104	225.922	218.011	215.351	219.964
August		237.852	233.877	230.379	226.545	218.312	215.834	219.086
September		238.031	234.149	231.407	226.889	218.439	215.969	218.783
October		237.433	233.546	231.317	226.421	218.711	216.177	216.573
November		236.151	233.069	230.221	226.230	218.803	216.330	212.425
December		234.812	233.049	229.601	225.672	219.179	215.949	210.228

As previously stated, movements in the CPI that have occurred in the past are not necessarily indicative of changes that may occur in the future, which may be wider or more confined than those that have occurred historically.

Original Issue Discount Retail Medium-Term Notes

We may issue the Retail Medium-Term Notes as original issue discount notes. An original issue discount note is a note, including any note that does not provide for the payment of interest prior to the note's maturity date, which is issued at a price lower than the note's principal amount and which provides that upon redemption, repayment or acceleration of the note's stated maturity an amount less than the note's principal amount will be payable. If an original issue discount note is redeemed, repaid or accelerated prior to the note's stated maturity, the amount payable to the holder of such a note will be determined in accordance with the terms of the note, but will be an amount less than the amount payable at the stated maturity of such a note. Original issue discount notes and other notes may be treated as issued with original issue discount for U.S. federal income tax purposes. See "Certain Federal Income Tax Considerations" in this prospectus supplement.

Amortizing Retail Medium-Term Notes

We may from time to time offer Retail Medium-Term Notes on which we pay principal and interest in installments over the life of the notes. Interest on amortizing notes will be computed on the basis of a 360-day year of twelve 30-day months and, in the case of an incomplete month, the number of days elapsed calculated on the basis of a 30-day month. Unless otherwise specified in the applicable pricing supplement, payments with respect to the amortizing notes will be applied first to interest due and payable and then to the reduction of the unpaid principal amount. We will provide a table with repayment information with respect to each amortizing note to its original purchaser and we will make this information available, upon request, to subsequent noteholders.

Redemption and Repayment

Unless we otherwise provide in the applicable pricing supplement, a Retail Medium-Term Note will not be redeemable or repayable prior to its stated maturity date.

If the applicable pricing supplement states that the Retail Medium-Term Note will be redeemable at our option prior to its stated maturity date, then on such date or dates specified in the pricing supplement, we may

S-28

Table of Contents

redeem that note at our option either in whole or from time to time in part, upon not less than 30 days' written notice to the holder of that note.

If the pricing supplement states that your Retail Medium-Term Note will be repayable at your option prior to its stated maturity date, we will require receipt of notice of the request for repayment at least 30 but not more than 60 days prior to the date or dates specified in the pricing supplement. We also must receive the completed form entitled "Option to Elect Repayment." Exercise of the repayment option by the holder of a note is irrevocable.

Since the notes will be represented by a single master global note in fully registered form, DTC or its nominee will be treated as the holder of the notes; therefore, other than the trustee under the indenture, DTC or its nominee will be the only entity that receives notices of redemption of notes from us and will be the only entity that can exercise the right to have the notes repaid, in the case of optional repayment.

To ensure that DTC or its nominee will timely exercise a right to repayment with respect to a particular beneficial interest in a note, the beneficial owner of the interest in that note must instruct the broker or other direct or indirect participant through which it holds the beneficial interest to notify DTC or its nominee of its desire to exercise a right of repayment. Because different firms have different cut-off times for accepting instructions from their customers, each beneficial owner should consult the broker or other direct or indirect participant through which it holds an interest in a note to determine the cut-off time by which the instruction must be given for timely notice to be delivered to DTC or its nominee. Conveyance of notices and other communications by DTC or its nominee to participants, by participants to indirect participants and by participants and indirect participants to beneficial owners of the notes will be governed by agreements among them and any applicable statutory or regulatory requirements.

The redemption or repayment of a note normally will occur on the interest payment date or dates following receipt of a valid notice. Unless otherwise specified in the pricing supplement, the redemption or repayment price will equal 100% of the principal amount of the note plus unpaid interest accrued to the date or dates of redemption or repayment.

We may at any time purchase notes at any price or prices in the open market or otherwise. We may also purchase notes otherwise tendered for repayment by a holder or tendered by a holder's duly authorized representative through exercise of the Survivor's Option described below. If we purchase the notes in this manner, we have the discretion to hold, resell or surrender the notes to the trustee for cancellation.

Survivor's Option

The Survivor's Option is a provision in a Retail Medium-Term Note pursuant to which we agree to repay that note, if requested by the authorized representative of the beneficial owner of that note, following the death of the beneficial owner of the note, so long as the note was owned by that beneficial owner or the estate of that beneficial owner at least six months prior to the request. The pricing supplement relating to each offering of notes will state whether the Survivor's Option applies to those notes.

If a Retail Medium-Term Note is entitled to a Survivor's Option, upon the valid exercise of the Survivor's Option and the proper tender of that note for repayment, we will, at our option, repay that note, in whole or in part, at a price equal to 100% of the amortized principal amount of the deceased beneficial owner's interest in that note plus unpaid interest accrued to the date of repayment. We will not honor a Survivor's Option if the notes have been previously redeemed or otherwise repaid, or have been declared due and payable before their stated maturity by reason of an event of default under the indenture, as more fully described in the accompanying prospectus under "Description of Debt Securities We May Offer - Default and Related Matters."

S-29

Table of Contents

Depending on market conditions, including changes in interest rates, and our creditworthiness, the secondary market value of the Retail Medium-Term Notes may be greater than the repayment amount pursuant to the Survivor's Option. **Accordingly, the authorized representative should contact his or her broker to determine the secondary market price of the Retail Medium-Term Notes and should carefully consider whether to sell the notes to their broker or another market participant rather than requesting repayment of the Retail Medium-Term Notes at the repayment price pursuant to a Survivor's Option.**

To be valid, the Survivor's Option must be exercised by or on behalf of the person who has authority to act on behalf of the deceased beneficial owner of the note, including, without limitation, the personal representative or executor of the deceased beneficial owner or the surviving joint owner with the deceased beneficial owner, under the laws of the applicable jurisdiction and the right to sell, transfer or otherwise dispose of an interest in a note and the right to receive the proceeds from the note, as well as the principal and interest payable to the holder of the note.

The death of a person holding a beneficial ownership interest in a note as a joint tenant or tenant by the entirety with another person, or as a tenant in common with the deceased holder's spouse, will be deemed the death of a beneficial owner of that note, and the entire principal amount of the note so held will be subject to repayment by us upon request. However, the death of a person holding a beneficial ownership interest in a note as tenant in common with a person other than such deceased holder's spouse will be deemed the death of a beneficial owner only with respect to such deceased person's interest in the note.

The death of a person who, during his or her lifetime, was entitled to substantially all of the beneficial ownership interests in a note will be deemed the death of the beneficial owner of that note for purposes of the Survivor's Option, regardless of whether that beneficial owner was the registered holder of that note, if entitlement to those interests can be established to the satisfaction of us and the paying agent. A beneficial ownership interest will be deemed to exist in typical cases of nominee ownership, ownership under the Uniform Transfers to Minors Act or Uniform Gifts to Minors Act, community property or other joint ownership arrangements between a husband and wife. In addition, a beneficial ownership interest will be deemed to exist in custodial and trust arrangements where one person has all of the beneficial ownership interests in the applicable note during his or her lifetime.

We have the discretionary right to limit the aggregate principal amount of Retail Medium-Term Notes as to which exercises of the Survivor's Option shall be accepted by us from authorized representatives of all deceased beneficial owners in any calendar year to an amount equal to the greater of \$2,000,000 or 2% of the principal amount of all notes outstanding as of the end of the most recent calendar year. We also have the discretionary right to limit to \$250,000 in any calendar year the aggregate principal amount of notes as to which exercises of the Survivor's Option shall be accepted by us from the authorized representative of any individual deceased beneficial owner of notes in such calendar year. In addition, we will not permit the exercise of the Survivor's Option except in principal amounts equal to the minimum denomination (\$1,000, unless otherwise specified in the applicable pricing supplement) and integral multiples of \$1,000 in excess thereof. We may, at our option and pursuant to the exercise of the Survivor's Option, repay interests of any deceased beneficial owner in the notes in any calendar year in excess of the \$250,000 limitation. Any optional repayment by us of this kind, to the extent it exceeds the \$250,000 limitation for any deceased beneficial owner, will not be included in the computation of the two percent aggregate limitation for repayment of the notes for that or any other calendar year. We may also, at our option and pursuant to the exercise of the Survivor's Option, repay interests of deceased beneficial owners in the notes in any calendar year in an aggregate principal amount exceeding the two percent aggregate limitation. Any optional repayment by us of this kind, to the extent it exceeds the two percent aggregate limitation, will not be considered in calculating the two percent aggregate limitation for any other calendar year. Furthermore, any optional repayment with respect to a deceased beneficial owner's interest in the notes is inapplicable with respect to any other deceased beneficial owner's interest in the notes. In other words, we may waive any applicable limitations with respect to a deceased beneficial owner but not make the same or similar waivers

with respect to other deceased beneficial owners.

S-30

Table of Contents

An otherwise valid election to exercise the Survivor's Option may not be withdrawn. Each election to exercise the Survivor's Option will be accepted in the order that elections are received by the paying agent, except for any note the acceptance of which would contravene any of the limitations described in the preceding paragraph. Retail Medium-Term Notes accepted for repayment through the exercise of the Survivor's Option normally will be repaid on the first interest payment date that occurs 20 or more calendar days after the date of the acceptance. For example, if the acceptance date of a note tendered through a valid exercise of the Survivor's Option is April 1, 2015, and interest on that note is paid monthly, we would normally, at our option, repay that note on the interest payment date occurring on May 15, 2015, because the April 15, 2015 interest payment date would occur less than 20 days from the date of acceptance. Each tendered note that is not accepted in any calendar year due to the application of any of the limitations described in the preceding paragraph will be deemed to be tendered in the following calendar year in the order in which all such notes were originally tendered. If a note tendered through a valid exercise of the Survivor's Option is not accepted, the paying agent will deliver a notice by first-class mail to the registered holder, at that holder's last known address as indicated in the note register, that states the reason that note has not been accepted for repayment.

Because the Retail Medium-Term Notes will be represented by a master global note, DTC or its nominee is treated as the holder of the notes and will be the only entity that can exercise the Survivor's Option for such notes. To obtain repayment pursuant to exercise of the Survivor's Option for a note, the deceased beneficial owner's authorized representative must provide the following items to the broker or other entity through which the beneficial interest in the note is held by the deceased beneficial owner:

- a written instruction to such broker or other entity to notify DTC of the authorized representative's desire to obtain repayment pursuant to exercise of the Survivor's Option;
- appropriate evidence satisfactory to us and the paying agent (a) that the deceased was the beneficial owner of the note at the time of death and his or her interest in the note was owned by the deceased beneficial owner or his or her estate at least six months prior to the request for repayment, (b) that the death of the beneficial owner has occurred, (c) of the date of death of the beneficial owner, and (d) that the representative has authority to act on behalf of the beneficial owner;
- if the interest in the note is held by a nominee of the deceased beneficial owner, a certificate satisfactory to us and the paying agent from the nominee attesting to the deceased's beneficial ownership of such note;
- a written request for repayment signed by the authorized representative of the deceased beneficial owner with the signature guaranteed by a member firm of a registered national securities exchange or of the Financial Industry Regulatory Authority, Inc., which we refer to as "FINRA", or a commercial bank or trust company having an office or correspondent in the United States;
- if applicable, a properly executed assignment or endorsement;
-

tax waivers and any other instruments or documents that we or the paying agent reasonably require in order to establish the validity of the beneficial ownership of the note and the claimant's entitlement to payment; and

- any additional information we or the paying agent reasonably require to evidence satisfaction of any conditions to the exercise of the Survivor's Option or to document beneficial ownership or authority to make the election and to cause the repayment of the note.

In turn, the broker or other entity will deliver each of these items to the paying agent, together with evidence satisfactory to us and the paying agent from the broker or other entity stating that it represents the deceased beneficial owner.

S-31

Table of Contents

All questions regarding the eligibility or validity of any exercise of the Survivor's Option will be determined by us, in our sole discretion, which determination will be final and binding on all parties.

The broker or other entity will be responsible for disbursing payments received from the paying agent to the authorized representative.

Forms for the exercise of the Survivor's Option may be obtained from the paying agent, Citibank, N.A., at 388 Greenwich Street, 14th Floor, New York, New York 10013, Attention: Agency & Trust Group.

Reopening of Issue

We may, from time to time, without the consent of existing noteholders, reopen an issue of Retail Medium-Term Notes and issue additional Retail Medium-Term Notes with the same terms, including maturity and interest payment terms, as Retail Medium-Term Notes issued on an earlier date, except for the issue date, issue price and the first payment date of interest. After such additional notes are issued, they will be fungible with the previously issued notes (provided that any such additional Retail Medium-Term Notes are treated as part of the same issue as such previously issued Retail Medium-Term Notes for U.S. federal income tax purposes) to the extent specified in the applicable pricing supplement.

Table of Contents**DESCRIPTION OF INTERNOTES®**

Investors should carefully read the description of the terms and provisions of our debt securities and our senior debt securities indenture under Description of Debt Securities We May Offer in the accompanying prospectus. That section, together with this prospectus supplement, the applicable pricing supplement and any free writing prospectus, summarizes all the material terms of our senior debt securities indenture and the Prudential Financial InterNotes®. They do not, however, describe every aspect of our senior debt securities indenture and the InterNotes®. For example, in this section, the accompanying prospectus and the applicable pricing supplement, we use terms that have been given special meanings in our senior debt securities indenture, but we describe the meanings of only the more important of those terms.

The InterNotes® being offered by this prospectus supplement, the prospectus and the applicable pricing supplement will be issued pursuant to the senior debt securities indenture, as amended and supplemented, which is a contract between The Bank of New York Mellon, as successor to JPMorgan Chase Bank N.A., as trustee and us. The indenture is more fully described in the prospectus. The indenture does not limit the aggregate amount of debt securities that may be issued under it and provides that the debt securities may be issued under it from time to time in one or more series. The InterNotes® and the Retail Medium-Term Notes together constitute a single series of debt securities for purposes of the indenture. A copy of the senior debt securities indenture is available for inspection during normal business hours at the office of the trustee.

The trustee under the senior debt securities indenture has two main roles: first, the trustee can enforce your rights against us if we default. Second, the trustee performs administrative duties for us, such as sending you interest payments and notices. However, there are limitations on the extent to which the trustee acts on your behalf, which we describe under Description of Debt Securities We May Offer Default and Related Matters in the accompanying prospectus. We and the trustee may treat the person in whose name a note is registered as the owner and holder of that note for the purpose of receiving payments of principal of and premium, if any, and, subject to the record date provisions of the notes, interest on that note and for all other purposes whatsoever.

Any money deposited with the trustee and remaining unclaimed for one year after the date upon which the payment of principal of and/or premium, if any, and/or interest on any note to which that deposit relates will become due and payable will be repaid to us upon our request. After that repayment, the holder of any note entitled to receive the payment to which that deposit relates must look only to us for that payment.

Our senior debt securities indenture and the notes do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the notes or our senior debt securities indenture, except as described under Description of Debt Securities We May Offer Restrictive Covenants in the accompanying prospectus.

For a description of our relationship with the Trustee, including possible conflicts of interest, see Description of Debt Securities We May Offer Our Relationship With the Trustee in the accompanying prospectus.

InterNotes® issued in accordance with this prospectus supplement, the prospectus and the applicable pricing supplement will have the following general characteristics:

- the notes will be our direct, unsecured, senior obligations and will rank equally with all of our other unsecured, senior indebtedness from time to time outstanding;

- the notes will be effectively subordinated to any existing and future indebtedness of any of our subsidiaries unless the terms of that indebtedness provide otherwise;

S-33

Table of Contents

- the notes may be offered from time to time by us through the Purchasing Agent and each note will mature on a day that is at least one year from its date of original issuance;
- unless otherwise specified in the applicable pricing supplement, each note will bear interest from its date of original issuance at a fixed or floating rate;
- the notes will not be subject to any sinking fund;
- any interest, principal and other amounts payable on the notes will be payable in United States dollars;
- the notes will be issued only in global form and you will not be able to request notes in non-global form, except in the limited circumstances described in this prospectus supplement or the applicable pricing supplement;
- the depositary for your notes will be DTC; and
- the minimum denomination of the notes will be \$1,000, unless otherwise stated in the applicable pricing supplement.

In addition, the pricing supplement relating to each offering of InterNotes® will describe specific terms of the notes, including:

- the stated maturity date;
- whether the note is a fixed rate note, a floating rate note, an inflation-linked note or an indexed note;
- if your note is a fixed rate note, the annual rate at which your note will bear interest, if any, the interest payment dates, the regular record dates, and the method for determining interest, if different from that described below under *Description of the InterNotes® Interest Fixed Rate Notes* in this prospectus supplement;
- if your note is a floating rate note, the interest rate basis which may be one of the six base rates described in *Description of the InterNotes® Interest Floating Rate Notes* in this prospectus supplement or another base rate set forth in the applicable pricing supplement, any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; and the day count fraction and interest reset, determination, calculation (if applicable), regular record and interest payment dates, all of which we describe under *Description of the InterNotes® Interest Floating Rate Notes* in this prospectus supplement;

- if your note is an inflation-linked note, any applicable spread or spread multiplier or initial, maximum or minimum rate, and the day count fraction and interest reset, determination, and interest payment dates, all of which we describe under Description of the InterNote[®] Inflation-Linked Rate in this prospectus supplement;
- if your note is an indexed note, the principal amount, if any, we will pay you at maturity, the amount of interest, if any, we will pay you on an interest payment date or the formula we will use to calculate these amounts, if any, the interest payment dates, regular record dates, and whether your note will be exchangeable for or payable in cash, securities of an issuer other than us or other property;

S-34

Table of Contents

- the applicable business day convention and business days, if different from those specified in this prospectus supplement, that apply to your notes;
- whether your note is an amortizing note;
- whether your note is an original issue discount note and, if so, the yield to maturity;
- the price, which may be expressed as a percentage of the principal amount of the notes, at which the notes will be issued to the public;
- the date on which the notes will be issued to the public;
- the purchase price, Purchasing Agent's discount and net proceeds to us;
- if applicable to your notes, that the authorized representative of the holder of a beneficial interest in the note will have the right to seek repayment upon the death of the holder as described under "Survivor's Option";
- if applicable, the circumstances under which your note may be redeemed at our option or, in addition to the Survivor's Option if applicable, repaid at the holder's option before the stated maturity and the terms and conditions of that redemption or repayment;
- certain United States federal income tax considerations relating to acquiring, owning, and disposing of your note to the extent such considerations are not set forth below under "Certain Federal Income Tax Considerations" in this prospectus supplement; and
- any other significant terms of the notes in addition to the items specified above.

We may at any time purchase InterNotes® at any price or prices in the open market or otherwise. Notes so purchased by us may, at our discretion, be held, resold or surrendered to the trustee for cancellation.

Payment of Principal and Interest

Unless otherwise specified in the applicable pricing supplement, payments of principal of and interest on the InterNotes® will be made in accordance with the arrangements then in place between the paying agent and The Depository Trust Company, or "DTC", and its participants. You will not receive payments directly from us.

Interest on each InterNote® will be payable either monthly, quarterly, semi-annually or annually on each interest payment date and at the note's stated maturity or on the date of redemption or repayment if a note is redeemed or repaid prior to maturity. Interest is payable to the person in whose name an InterNote® is registered at the close of

business on the regular record date before each interest payment date. Unless otherwise specified in the applicable pricing supplement, the regular record date will be the business day preceding an interest payment date (as the interest payment date may be adjusted by any applicable business day convention). Interest due at an InterNote[®] s stated maturity or on a date of redemption or repayment will be payable to the person to whom principal is payable. You should note, however, that the first payment of interest on any InterNote[®] issued on or after a regular record date and up to and including the related interest payment date will be made on the interest payment date relating to the following regular record date to the person in whose name the InterNote[®] is registered on that following regular record date. Because we expect to issue our InterNotes[®] in global form only, the registered holder will be the depository. The depository will make interest payments to beneficial holders (or their banks or brokers) in accordance with its applicable procedures.

S-35

Table of Contents

Any tax, assessment or governmental charge imposed upon any payments on a note, including, without limitation, any withholding tax, is the responsibility of the holders of beneficial interests in the note in respect of which such payments are made.

Form, Legal Ownership and Transfer of the Notes

Unless otherwise provided in the applicable pricing supplement, the notes will be issued in fully registered form and will be represented by a master global note, which will be deposited with a custodian for DTC and registered in the name of DTC's nominee, Cede & Co. You may transfer or exchange your interests in the master global note only through DTC. For information with respect to payments of principal of and premium, if any, and interest on your interests in the master global note and how to transfer or exchange it, see "Global Securities" in the accompanying prospectus. We will make all payments on the master global note in accordance with the applicable procedures of DTC or any other specified depository for the master global note.

Business Days

Unless otherwise specified in the applicable pricing supplement, "business day" means any day that is neither a Saturday or Sunday, nor a day on which banking institutions in The City of New York are authorized or obligated by law, regulation or executive order to close, and (1) with respect to any floating rate note for which LIBOR is an applicable base rate, a London Business Day, (2) if a note is denominated in a specified currency, currency unit or composite currency other than U.S. dollars or euros, a day that is not a day on which banking institutions are authorized or obligated by law, regulation or executive order to close in the principal financial center of the country issuing the specified currency, (3) if the specified currency of a note is euros, any day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET2) System or any successor system is open for business, and (4) with respect to a floating rate note that is a CMT note, a prime rate note or a federal funds rate note, a U.S. Government securities business day. *London business day* means a day on which commercial banks are open for business, including for dealings in the designated LIBOR currency, in London. *U.S. Government securities business day* means any day except for a Saturday, Sunday or a day on which the Securities Industry and Financial Markets Association recommends that the fixed income department of its members be closed for the entire day for purposes of trading in U.S. government securities. *Principal financial center* means the capital city of the country to which the index currency (as defined below) relates, or the capital city of the country issuing the specified currency, currency unit or composite currency, as applicable, except that with respect to United States dollars, the "principal financial center" means The City of New York, and with respect to euros, the "principal financial center" means London.

Interest***Fixed Rate InterNotes***[®]

Each fixed rate InterNote[®], other than zero coupon notes, will bear interest from and including its original issue date, or from and including the last interest payment date to which interest has been paid or duly provided for, at the annual rate specified in the applicable pricing supplement until its principal amount is paid or duly made available for payment. Unless otherwise specified in the applicable pricing supplement, interest on fixed rate notes will be computed on the basis of a 360-day year of twelve 30-day months.

Unless otherwise specified in the applicable pricing supplement, we will pay interest on fixed rate notes semi-annually on the interest payment dates specified in the applicable pricing supplement and on the maturity date.

The amount of interest that has accrued during each interest period i.e., the period from and including the original issue date, or the last date to which interest has been paid or duly provided for (which may be an

S-36

Table of Contents

interest payment date, depending on the business day convention that applies to your notes), to but excluding the next date to which interest will be paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes, as described under **Business Day Conventions** below) on a fixed rate InterNote[®], other than zero coupon notes, will be determined by multiplying the principal amount of the note by an accrued interest factor for the interest period. The accrued interest factor will be determined by multiplying the per annum fixed interest rate by a factor resulting from the day count fraction specified in your prospectus supplement if different from a 360-day year of twelve 30-day months, and otherwise on the basis of a 360-day year of twelve 30-day months.

Floating Rate InterNotes[®]

The amount of interest that has accrued during each interest period *i.e.*, the period from and including the original issue date, or the last date to which interest has been paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes), to but excluding the next date to which interest will be paid or duly provided for (which may be an interest payment date, depending on the business day convention that applies to your notes, as described under **Business Day Conventions** below) on a floating rate note will be determined by multiplying the principal amount or face amount of the note by an accrued interest factor for the interest period. The accrued interest factor will be determined by multiplying the per annum floating interest rate by a factor resulting from the day count fraction specified in your prospectus supplement. Unless otherwise specified in the applicable pricing supplement, the day count fraction applicable to CMT rate notes and treasury rate notes will be the Actual/Actual (ISDA) day count fraction, and for other floating rate notes the day count fraction will be Actual/360. See **Day Count Fractions** below. The floating interest rate will be determined as described below.

Interest Rates. Interest on floating rate InterNotes[®] will be determined by reference to one or more base rates specified in the applicable pricing supplement, which will include:

- the constant maturity swap rate,
- the CMT rate,
- LIBOR,
- the prime rate,
- the treasury rate,
- the federal funds rate, or
- any other domestic or foreign interest rate or exchange rate indices as we may describe in the applicable pricing supplement.

The related base rate will be based upon the index maturity, if applicable, and adjusted by a spread and/or spread multiplier, if any, as specified in the applicable pricing supplement. In addition, a floating rate InterNote® may bear interest that is calculated by reference to two or more base rates determined in the same manner as the base rates are determined for the types of floating rate notes described above. Each floating rate InterNote® will specify the base rate or rates applicable to it.

Base Rates, Spreads and Spread Multipliers. The interest rate on each floating rate note will be calculated by reference to one or more specified base rates, in either case plus or minus any applicable spread, and/or multiplied by any applicable spread multiplier. The index maturity is the period to maturity of the instrument or obligation from which the base rate or rates are calculated, if applicable, as specified in the

Table of Contents

applicable pricing supplement. The spread is the number of basis points to be added to or subtracted from the base rate or rates applicable to a floating rate note, and the spread multiplier is the percentage of the base rate or rates applicable to a floating rate note by which the base rate or rates are multiplied to determine the applicable interest rates on the floating rate note, as specified in the applicable pricing supplement. Each floating rate note will initially bear interest at the per annum initial interest rate as described in the applicable pricing supplement.

Reset of Rates. The interest rate on each floating rate note will be reset on each interest reset date as specified in the applicable pricing supplement.

Maximum and Minimum Rates. A floating rate note may also have either or both of the following:

- a maximum limit, or ceiling, called the maximum interest rate, on the rate at which interest may accrue during any interest period with respect to that floating rate note from time to time; and
- a minimum limit, or floor, called the minimum interest rate, on the rate at which interest may accrue during any interest period with respect to that floating rate note from time to time. In addition to any maximum interest rate which may apply to any floating rate note, the interest rate on floating rate notes will in no event be higher than the maximum rate permitted by New York law, as the same may be modified by federal law of general applicability.

Determination of Reset Interest Rates. The interest rate applicable to each interest period will be the rate determined as of the applicable interest determination date defined below.

Unless otherwise specified in the applicable pricing supplement, the interest determination date with respect to an interest reset date for:

- constant maturity swap rate notes, CMT rate notes, prime rate notes, federal funds rate notes and inflation-linked notes will be the second U.S. government securities business day before the interest reset date;
- LIBOR notes will be the second London business day before the interest reset date unless the designated LIBOR currency is pounds sterling, in which case the interest determination date will be the applicable interest reset date; and
- treasury rate notes will be the day of the week in which the relevant interest reset date falls on which United States government treasury bills are normally auctioned.

The interest determination date pertaining to a floating rate note the interest rate of which is determined with reference to two or more base rates will be the first business day which is at least two business days prior to the interest reset date for that floating rate note on which each base rate is determined. Each base rate will be determined on that date and the applicable interest rate will take effect on the related interest reset date.

The interest rate in effect with respect to a floating rate note on each day that is not an interest reset date will be the interest rate determined as of the interest determination date for the immediately preceding interest reset date. The interest rate in effect on any day that is an interest reset date will be the interest rate determined as of the interest determination date for that interest reset date, subject in each case to any applicable law and maximum or minimum interest rate limitations. However, the interest rate in effect with respect to a floating rate note for the period from its original issue date to the first interest reset date, to which we refer as the initial interest rate, will be determined as specified in the applicable pricing supplement.

Calculation Agent. Unless otherwise specified in the applicable pricing supplement, we will be the calculation agent and will calculate the interest rate applicable to a floating rate note on or before any calculation

Table of Contents

date. Upon the request of the holder of any floating rate note, the calculation agent will provide the interest rate then in effect and, if determined, the interest rate as determined for the then most recent interest reset date with respect to that floating rate note.

All percentages resulting from any calculation on floating rate notes will be rounded, if necessary, to the nearest one-hundred-thousandth of a percentage point, with five one-millionths of a percentage point rounded upward, *e.g.*, 9.876545%, or 0.09876545, will be rounded upward to 9.87655%, or 0.0987655, and all dollar amounts used in or resulting from that calculation on floating rate notes will be rounded to the nearest cent, or in the case of a foreign currency or composite currency, to the nearest corresponding unit, with one-half cent being rounded upward.

As mentioned above, the initial interest rate in effect with respect to a floating rate note from and including the original issue date to but excluding the first interest reset date will be specified in the applicable pricing supplement. The interest rate for each subsequent interest reset date will be determined by the calculation agent as set forth below, plus or minus any spread and/or multiplied by any spread multiplier, and subject to any maximum interest rate and/or minimum interest rate, as specified in the applicable pricing supplement.

Constant Maturity Swap Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the *constant maturity swap rate* means, with respect to any interest reset date, the rate appearing on the Reuters screen ISDAFIX1 page for U.S. dollar swaps having a maturity equal to the index maturity specified in your pricing supplement as of approximately 11:00 A.M., New York City time, on the relevant interest determination date. If the constant maturity swap rate cannot be determined in this manner, then:

- The constant maturity swap rate for the relevant interest reset date will be determined on the basis of the mid-market semi-annual swap rate quotations provided by five leading swap dealers in the New York City interbank market at approximately 11:00 A.M., New York City time, on the relevant interest determination date. For this purpose, the semi-annual swap rate means the mean of the bid and offered rates for the semi-annual fixed leg, calculated on a 30/360 day count basis, of a fixed-for-floating U.S. dollar interest rate swap transaction with a term equal to the specified index maturity, commencing on the relevant interest reset date, with an acknowledged dealer of good credit in the swap market, where the floating leg, calculated on an Actual/360 day count basis, is equivalent to LIBOR with a designated maturity of three months, as such rate may be determined in accordance with the provisions set forth below under *LIBOR*. The calculation agent will select the five swap dealers in its sole discretion and will request the principal New York City office of each of those dealers to provide a quotation of its rate.
- If at least three quotations are provided, the constant maturity swap rate for that interest reset date will be the arithmetic mean of the quotations described above, eliminating the highest and lowest quotations or, in the event of equality, one of the highest and one of the lowest quotations.
- If fewer than three quotations are provided, the calculation agent will determine the constant maturity swap rate in its sole discretion.

U.S. government securities business day means any day except for Saturday, Sunday, or a day on which The Bond Market Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities.

Representative amount means an amount that is representative for a single transaction in the relevant market at the relevant time.

S-39

Table of Contents

Reference banks mean five leading swap dealers in the New York City interbank market, selected by the calculation agent, after consultation with us.

CMT Rate

Unless otherwise specified in the applicable pricing supplement, the manner in which a base rate designated as the CMT rate is determined for the relevant interest reset date will depend on the designated CMT Reuters screen page that is specified for your notes in the applicable pricing supplement. If no designated CMT Reuters screen page is specified, Reuters screen FRBCMT page will be the designated CMT Reuters screen page for your notes.

- If the designated CMT Reuters screen page for your notes is FRBCMT, the CMT rate for the relevant interest reset date will be the yield for Treasury securities at constant maturity for a period of the designated CMT maturity as set forth in H.15(519) under the caption Treasury constant maturities, as displayed on the designated CMT Reuters screen page on the CMT interest determination date. If the applicable rate described above is not displayed on the designated CMT Reuters screen page, then the CMT rate will be the treasury constant maturity rate for the designated CMT maturity as published in H.15(519) under the caption Treasury constant maturities.

- If the rate described in the preceding paragraph does not appear in H.15(519), then the CMT rate for the relevant interest reset date will be the treasury constant maturity rate for the designated CMT maturity that:

is published by the Board of Governors of the Federal Reserve System or the U.S. Department of the Treasury; and

is determined by the calculation agent to be comparable to the applicable rate that would otherwise have been published in H.15(519).

- If, on the relevant CMT interest determination date, the rate described in the preceding paragraph is not published by the Board of Governors of the Federal Reserve System or the U.S. Department of the Treasury, then the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for the most recently issued U.S. Treasury securities having an original maturity of approximately the designated CMT maturity and a remaining term to maturity of not less than the designated CMT maturity minus one year, and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant interest determination date, quoted by three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two such bid rates are provided, the CMT rate will be based on the arithmetic mean of the bid prices provided, and neither the highest nor lowest of those quotations will be eliminated.

- If the calculation agent is unable to obtain three quotations of the kind described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for U.S. Treasury securities with an original maturity longer than the designated CMT maturity, with a remaining term to maturity closest to the designated CMT maturity and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant CMT interest determination date, of three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five of these primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two of these primary dealers are quoting, then the CMT rate for the relevant interest reset date will be based on the arithmetic

S-40

Table of Contents

mean of the bid rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded. If two U.S. Treasury securities with an original maturity longer than the designated CMT maturity have remaining terms to maturity that are equally close to the designated CMT maturity, the calculation agent will obtain quotations for the U.S. Treasury securities with the shorter original term to maturity.

- If two or fewer primary dealers selected by the calculation agent are quoting as described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the rate determined by the calculation agent in its sole discretion, after consulting such sources as it deems comparable to any of the foregoing quotations or display page, or any such source as it deems reasonable from which to estimate the rate for U.S. Treasury securities at constant maturity or any of the foregoing bid rates.

If the designated CMT Reuters screen page for your notes is FEDCMT, the CMT rate for the relevant interest reset date will be the one-week average yield for Treasury securities at constant maturity for a period of the designated CMT maturity as set forth in H.15(519) under the heading *Week Ending* and opposite the heading *Treasury constant maturities* for the week preceding the relevant interest reset date, as such average is displayed on the designated CMT Reuters screen page for the week preceding the relevant interest reset date.

- If the applicable average described above is not displayed on the designated CMT Reuters screen page, then the CMT rate for the relevant interest reset date will be the one-week average yield for Treasury securities at constant maturity for a period of the designated CMT maturity and for the week preceding the relevant interest reset date as published in H.15(519) under the heading *Week Ending* and opposite the heading *Treasury constant maturities*.

- If the applicable average described in the preceding paragraph does not appear in H.15(519), then the CMT rate for the relevant interest reset date will be the one-week average yield for Treasury securities at constant maturity for a period equal to the designated CMT maturity as otherwise announced by the Federal Reserve Bank of New York for the week preceding the relevant interest reset date.

- If for the week preceding the relevant interest reset date the Federal Reserve Bank of New York does not publish a one-week average yield for Treasury securities at constant maturity for a period equal to the designated CMT maturity for the preceding week, then the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for the most recently issued U.S. Treasury securities having an original maturity of approximately the designated CMT maturity and a remaining term to maturity of not less than the designated CMT maturity minus one year, and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant interest determination date, quoted by three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer than five but more than two such bid rates are provided, the CMT rate will be based on the arithmetic mean of the bid prices provided, and neither the highest nor lowest of those quotations will be eliminated.

- If the calculation agent is unable to obtain three quotations of the kind described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the yield to maturity based on the arithmetic mean of the secondary market bid rates for U.S. Treasury securities with an original maturity longer than the designated CMT maturity, with a remaining term to maturity closest to the designated CMT maturity and in a representative amount, as of approximately 3:30 P.M., New York City time, on the relevant CMT interest determination date, of three primary U.S. government securities dealers in New York City selected by the calculation agent. In selecting these bid rates, the calculation agent will request quotations from five of these primary dealers and will disregard the highest quotation or, if there is equality, one of the highest and the lowest quotation or, if there is equality, one of the lowest. If fewer

than five but more than two of these primary dealers are quoting, then the CMT rate for the relevant interest reset date will be based on the arithmetic

S-41

Table of Contents

mean of the bid rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded. If two U.S. Treasury securities with an original maturity longer than the designated CMT maturity have remaining terms to maturity that are equally close to the designated CMT maturity, the calculation agent will obtain quotations for the U.S. Treasury securities with the shorter original term to maturity.

· If two or fewer primary dealers selected by the calculation agent are quoting as described in the preceding paragraph, the CMT rate for the relevant interest reset date will be the rate determined by the calculation agent in its sole discretion, after consulting such sources as it deems comparable to any of the foregoing quotations or display page, or any such source as it deems reasonable from which to estimate the one-week average for U.S. Treasury securities at constant maturity or any of the foregoing bid rates.

The term *designated CMT maturity* means the maturity for CMT rate notes and will be the original period to maturity of a U.S. treasury security either 1, 2, 3, 5, 7, 10, 20 or 30 years specified in the applicable pricing supplement. If no such original maturity period is so specified, the designated CMT maturity will be 2 years.

LIBOR

Unless otherwise specified in the applicable pricing supplement, a base rate designated as *LIBOR* means, with respect to any interest reset date, the London interbank offered rate for deposits in U.S. dollars or any other index currency, as specified in your pricing supplement, for the index maturity specified in your pricing supplement, appearing on the designated *LIBOR* page as of approximately 11:00 A.M., London time, on the relevant interest determination date.

If the rate described above does not so appear on the Reuters screen *LIBOR* page, then *LIBOR* will be determined on the basis of the rates at which deposits in U.S. dollars or any other index currency, as specified in your pricing supplement, are offered by four major banks in the London interbank market selected by the calculation agent at approximately 11:00 A.M., London time, on the relevant interest determination date, to prime banks in the London interbank market for a period of the specified index maturity, beginning on the relevant interest reset date, and in a representative amount. The calculation agent will request the principal London office of each of these major banks to provide a quotation of its rate. If at least two quotations are provided, *LIBOR* for the relevant interest reset date will be the arithmetic mean of the quotations.

If fewer than two of the requested quotations described above are provided, *LIBOR* for the relevant interest reset date will be the arithmetic mean of the rates quoted by major banks in New York City or, if the index currency is not U.S. dollars, in the principal financial center for the country issuing the index currency, selected by the calculation agent, at approximately 11:00 A.M., New York City time (or the time in the relevant principal financial center), on the relevant interest reset date, for loans in U.S. dollars (or the index currency) to leading European banks for a period of the specified index maturity, beginning on the relevant interest reset date, and in a representative amount.

If no quotation is provided as described in the preceding paragraph, then the calculation agent, after consulting such sources as it deems comparable to any of the foregoing quotations or display page, or any such source or sources as it deems reasonable, shall determine *LIBOR* for that interest reset date.

Designated LIBOR page means, unless otherwise specified in the applicable pricing supplement, the display on Reuters, or any successor service, on Reuters screen page *LIBOR01*, or any successor page on that service, for the purpose of displaying the London interbank rates of major banks for the index currency.

Index currency means United States dollars unless otherwise specified in the applicable pricing supplement.

S-42

Table of Contents

Prime Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the *prime rate* means, with respect to any interest determination date, the rate set forth on such date in H.15(519) opposite the heading *Bank prime loan*.

If, by approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, the rate described above is not yet published in H.15(519) then the prime rate will be the rate, for the relevant interest reset date, as published in H.15 daily update or another recognized electronic source used for the purpose of displaying that rate, opposite the heading *Bank prime loan*.

If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source by approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, then the prime rate for the relevant interest reset date will be the rate for the day first preceding the relevant interest reset date for which such rate is set forth in H.15(519) opposite the heading *Bank prime loan*.

Treasury Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the *treasury rate* means, with respect to any interest reset date, the rate for U.S. government treasury bills, as that rate appears on the Reuters screen USAUCTION10 page or USAUCTION11 page on the relevant interest determination date, opposite the index maturity specified in your pricing supplement under the heading *INVEST RATE*.

If the rate described above does not appear on either page for the interest determination date on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, but U.S. government treasury bills having the specified index maturity have been auctioned on the relevant interest determination date, then the treasury rate will be the bond equivalent yield of the rate, for the relevant interest determination date, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, for that day and for the specified index maturity, under the heading *U.S. Government securities/Treasury bills/Auction high*.

If the rate cannot be determined as described in the preceding paragraph, then the treasury rate will be the bond equivalent yield of the auction rate for treasury bills with a remaining maturity equal to the specified index maturity as announced by the U.S. Department of the Treasury.

If no such auction is held during a period of seven consecutive calendar days ending on and including a Friday in which the interest determination date falls, then the treasury rate will be the bond equivalent yield of the rate, for the relevant interest determination date and for treasury bills having the specified index maturity, as published in H.15(519) under the heading *U.S. government securities/Treasury bills/Secondary market*.

If the rate described in the prior paragraph does not appear in H.15(519) on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, the treasury rate will be the rate, for the relevant interest determination date and for treasury bills having the specified index maturity, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading *U.S. government securities/Treasury bills/Secondary market*.

If the rate described in the prior paragraph does not appear in H.15 daily update or another recognized electronic source on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, the treasury rate will be the bond equivalent yield of the arithmetic mean

S-43

Table of Contents

of the following secondary market bid rates for the issue of treasury bills with a remaining maturity closest to the specified index maturity: the bid rates as of approximately 3:30 P.M., New York City time, for the relevant interest calculation date, by three primary U.S. government securities dealers in New York City selected by the calculation agent.

If no quotation is provided as described in the preceding paragraph, then the calculation agent, after consulting such sources as it deems comparable to any of the foregoing secondary market bids or any display page or other U.S. government publication or source, or any other source as it deems reasonable from which to estimate the treasury bills auction rate or any of the foregoing secondary market bid rates, shall determine the treasury rate for that interest determination date in its sole discretion.

Bond equivalent yield means a yield, expressed as a percentage, calculated in accordance with the following formula:

$$\text{Bond equivalent yield} = \frac{D \times N}{360 - (D \times M)} \times 100$$

where *D* is the applicable per annum rate for treasury bills quoted on a bank discount basis and expressed as a decimal, *N* refers to 365 or 366, as the case may be, and *M* is the actual number of days in the applicable interest period.

Interest calculation date means the last day of the applicable interest period on which the treasury rate can be calculated in order to permit the payment due on the related interest payment date to be made.

Federal Funds Rate

Unless otherwise specified in the applicable pricing supplement, a base rate designated as the *federal funds rate* means the rate for U.S. dollar federal funds on the relevant interest reset date, as set forth in H.15(519) opposite the heading *Federal funds (effective)*, as that rate is displayed on the Reuters screen FEDFUNDS1 page for that day.

If, by approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, the federal funds rate for the relevant interest reset date does not appear on Reuters screen FEDFUNDS1 page, then the federal funds rate for that interest reset date will be the rate published on H.15(519) for that day opposite the heading *Federal funds (effective)*.

If the rate described above is not displayed on the Reuters screen FEDFUNDS1 page and does not appear in H.15(519) at approximately 5:00 P.M., New York City time, on the day that is one New York City banking day following the relevant interest reset date, then the federal funds rate, for the relevant interest reset date, will be the rate described above as published in H.15 daily update, or another recognized electronic source used for displaying that rate, for that day opposite the heading *Federal funds (effective)*.

If the rate cannot be determined as described in the preceding paragraphs, then the federal funds rate for the relevant interest reset date will be the rate for the first day preceding the relevant interest reset date for which such rate is set forth in H.15(519) opposite the caption *Federal funds (effective)*, as such rate is displayed on the Reuters Screen FEDFUNDS1 page.

Table of Contents

Common Definitions for Base Rates

H.15(519) means the weekly statistical release designated as such published by the Federal Reserve System Board of Governors, or its successor, available through the website of the Board of Governors of the Federal Reserve System at <http://www.federalreserve.gov/releases/h15/update/h15upd.htm>, or any successor site or publication.

H.15 daily update means the daily update of H.15(519), available through the website of the Board of Governors of the Federal Reserve System, at <http://www.federalreserve.gov/releases/h15/update/h15upd.htm>, or any successor site or publication.

Index maturity has the meaning specified in the applicable pricing supplement except that, if the base rate is LIBOR and no index maturity is specified in the applicable pricing supplement, the index maturity will be three months.

The term *representative amount* means an amount that, in the calculation agent's judgment, is representative of a single transaction in the relevant market at the relevant time.

Reuters screen page means the display on Reuters 3000 Xtra Service, or Reuters , or any successor service, on the page specified in the applicable pricing supplement, or any successor page on that service.

Business Day Conventions

If your prospectus supplement specifies that one of the following business day conventions is applicable to your notes, the interest payment dates, interest reset dates and interest periods for your debt securities will be affected (and, consequently, may be adjusted) as described below, except that any payment due at maturity (including any interest payment) will not be affected as described below:

Following business day convention means, for any relevant date other than the maturity, if such date would otherwise fall on a day that is not a business day, then such date will be postponed to the next day that is a business day.

Modified following business day convention means, for any relevant date other than the maturity, if such date would otherwise fall on a day that is not a business day, then such date will be postponed to the next day that is a business day, except that, if the next business day falls in the next calendar month, then such date will be advanced to the immediately preceding day that is a business day.

Following unadjusted business day convention means, for any interest payment date, other than the maturity, that falls on a day that is not a business day, any payment due on such interest payment date will be postponed to the next day that is a business day; provided that interest due with respect to such interest payment date shall not accrue from and including such interest payment date to and including the date of payment of such interest as so postponed. Interest reset dates and interest periods also are not adjusted for non-business days.

Modified following unadjusted business day convention means, for any interest payment date, other than the maturity, that falls on a day that is not a business day, any payment due on such interest payment date will be postponed to the next day that is a business day; provided that interest due with respect to such interest payment date shall not accrue from and including such interest payment date to and including the date of payment of such interest as so postponed, and provided further that, if such day would fall in the next succeeding calendar month, the date of payment with respect to such interest payment date will be advanced to the business day immediately preceding such interest payment date. Interest reset dates and interest periods also are not adjusted for non-business days.

S-45

Table of Contents

In all cases, if the stated maturity or any earlier redemption date or repayment date with respect to any debt security falls on a day that is not a business day, any payment of principal, premium, if any, and interest otherwise due on such day will be made on the next succeeding business day, and no interest on such payment shall accrue for the period from and after such stated maturity, redemption date or repayment date, as the case may be.

Unless otherwise specified in the applicable pricing supplement, fixed rate InterNotes® will be subject to the following unadjusted business day convention, floating rate notes other than LIBOR notes will be subject to the following business day convention and LIBOR notes will be subject to the modified following business day convention.

Day Count Fractions

As described above, the accrued interest for any interest period is calculated by multiplying the principal amount or face amount of the note by an accrued interest factor. The accrued interest factor will be determined by multiplying the per annum floating interest rate by a factor resulting from the day count fraction that will be specified in the applicable pricing supplement for your notes and may include the following:

If 1/1 (ISDA) is specified, the factor will be equal to 1.

If Actual/Actual (ISDA) or Act/Act (ISDA) is specified, the factor will be equal to the actual number of days in the interest period divided by 365 (or, if any portion of that interest period falls in a leap year, the sum of (1) the actual number of days in that portion of the interest period falling in a leap year divided by 366 and (2) the number of days in that portion of the interest period falling in a non-leap year divided by 365).

If Actual/Actual (ICMA) is specified, the factor will be equal to the number of days in the interest period, including February 29 in a leap year, divided by the product of (1) the actual number of days in such interest period and (2) the number of interest periods in the calendar year.

If Actual/Actual (Bond) is specified, the factor will be equal to the number of calendar days in the interest period, divided by the number of calendar days in the interest period multiplied by the number of interest periods in the calendar year.

If Actual/Actual (Euro) is specified, the factor will be equal to the number of calendar days in the interest period divided by 365 or, if the interest period includes February 29, 366.

If Actual/365 (Fixed) , Act/365 (Fixed) , A/365 (Fixed) or A365F is specified, the factor will be equal to the actual number of days in the interest period divided by 365.

If Actual/360 , Act/360 or A/360 is specified, the factor will be equal to the actual number of days in the interest period divided by 360.

If Actual/360 (ICMA) is specified, the factor will be equal to the number of calendar days in the period, including February 29 in a leap year, divided by 360 days.

If 30/360 is specified, the factor will be calculated on the basis of a 360 day year of 12 30-day months.

Unless otherwise specified in the applicable pricing supplement, the day count fraction applicable to fixed rate notes will be the 30/360 day count fraction, to constant maturity swap rate notes, CMT rate notes,

S-46

Table of Contents

treasury rate notes and inflation-linked notes will be the Actual/Actual (ISDA) day count fraction, and to other floating rate notes, will be Actual/360 day count fraction.

Indexed InterNotes®

We may issue indexed InterNotes® that will provide that the amount of interest payable on an interest payment date and/or the amount of principal payable at maturity will be determined by reference to:

- one or more securities;
- one or more commodities;
- any other financial, economic or other measures or instruments, including the occurrence or non-occurrence of any event or circumstances; and/or
- indices or baskets of any of these items.

The applicable pricing supplement will include information about the relevant index or indices and how amounts that are to become payable will be determined by reference to that index or those indices. See also Risk Factors An Investment in Indexed Notes Entails Significant Risks Not Associated With a Similar Investment in Fixed or Conventional Floating Rate Notes.

Inflation-Linked Rate

Inflation Index Adjustment. Unless otherwise specified in the applicable pricing supplement, inflation-linked rate means, for any interest determination date relating to an inflation-linked note or any floating rate note for which the CPI (as defined below) is the applicable base rate, the inflation index adjustment plus a specified percentage (also referred to as the spread). The inflation index adjustment for each interest payment period will be based on the percentage change in the CPI. The inflation index adjustment may be a positive or negative rate in any interest payment period and will be calculated monthly and reset the interest rate on the notes monthly. An inflation-linked note will be treated, and interest will be calculated as, a Floating Rate Medium-Term Note.

The inflation index adjustment (expressed as a percentage per year) for an interest payment period will be calculated as follows:

$$\text{Inflation index adjustment} = (\text{Ref CPI}_n - \text{Ref CPI}_{n-12})$$

$$\text{Ref CPI}_{n-12}$$

The inflation index adjustment will be expressed as a percentage, rounded to the nearest one-hundredth of one percent. All percentages resulting from any intermediate calculation on the notes will be rounded, if necessary, to the nearest

one hundred-thousandth of a percentage point, with .000005% rounded up to .00001%. All coupon amounts used in or resulting from such calculation on the notes will be rounded to the nearest one-hundredth of a percentage point, with .005% rounded up to .01%.

Ref CPI_n = As to any interest reset date, the level of CPI for the third calendar month (the Reference Month) preceding the month in which that interest reset date occurs, as reported in the second calendar month prior to such interest reset date.

Ref CPI_{n-12} = As to any interest reset date, the level of CPI for the 12th calendar month preceding the relevant Reference Month.

S-47

Table of Contents

Example. For example, for the interest payment period from and including December 1, 2014 to but excluding January 1, 2015, CPI_n was 238.031, the CPI for September 2014 (the Reference Month), and $Ref\ CPI_{n-12}$ was 234.149, the CPI for September 2013 (which is the CPI for the 12th calendar month preceding the Reference Month). Assuming a spread of 2.00%, the rate at which interest would have been paid for that period would have been calculated as follows:

Inflation Index
Adjustment =

$$\left(\frac{Ref\ CPI_n}{Ref\ CPI_{n-12}} - 1 \right)$$

$Ref\ CPI_{n-12}$

$$\left(\frac{238.031}{234.149} - 1 \right)$$

234.149

.01657

Spread

2.00%

Interest Rate

$$.01657 + .0200 = .03657 = 3.66\%$$

CPI_n means the non-seasonally adjusted U.S. City Average All Items Consumer Price Index for All Urban Consumers, which is published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor, as reported on Bloomberg page CPURNSA or any successor service.

The Consumer Price Index. The consumer price index is the non-seasonally adjusted U.S. City Average All Items Consumer Price Index published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor. The Bureau of Labor Statistics makes available almost all consumer price index data and press releases immediately at the time of release. This material may be accessed electronically by means of the Bureau of Labor Statistics home page on the Internet at <http://www.bls.gov>. We make no representation or warranty as to the accuracy or completeness of the information obtained from the Bureau of Labor Statistics home page. No information contained on the Bureau of Labor Statistics home page is incorporated by reference in this prospectus supplement or the accompanying prospectus.

According to the publicly available information provided by the Bureau of Labor Statistics, the consumer price index is a measure of the average change in consumer prices over time in a fixed market basket of goods and services, including food, clothing, shelter, fuels, transportation, drugs and charges for the services of doctors and dentists. User fees (such as water and sewer service) and sales and excise taxes paid by the consumer are also included. Income taxes and investment items such as stocks, bonds and life insurance are not included. The consumer price index includes expenditures by urban wage earners and clerical workers, professional, managerial and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force. In calculating the

consumer price index, price changes for the various items are averaged together with weights that represent their significance in the spending of urban households in the United States. The contents of the market basket of goods and services and the weights assigned to the various items are updated periodically to take into account changes in consumer expenditure patterns. The consumer price index is expressed in relative terms based on a reference period for which the level is set at 100 (currently the base reference period used by the Bureau of Labor Statistics is 1982-1984). For example, because the CPI for the 1982-1984 reference period is 100, an increase of 16.5 percent from that period would be shown as 116.5.

S-48

Table of Contents

The Bureau of Labor Statistics has made numerous technical and methodological changes to the consumer price index in the past, and it is likely to continue to do so. Examples of past methodological changes include:

- the use of regression models to adjust for the quality improvements in various goods (televisions, personal computers, etc.);
- the introduction of geometric averages to account for consumer substitution within consumer price index categories; and
- changing the housing/shelter formula to improve rental equivalence estimation.

Additionally, effective February 26, 2015, the Bureau of Labor Statistics will use a new estimation system for the Consumer Price Index, which will introduce several methodological changes including imputation of price changes by a narrower set of item and geographic source data.

These changes and any future changes could reduce the level of the consumer price index and therefore lower the interest payable on the notes.

The Bureau of Labor Statistics occasionally rebases the consumer price index. The current standard reference base period is 1982-1984 = 100. The consumer price index was last rebased in January 1988. Prior to the release of the consumer price index for January 1988, the standard reference base was 1967 = 100. If the Bureau of Labor Statistics rebases the consumer price index during the time the notes are outstanding, the calculation agent will continue to calculate inflation using the existing base year in effect for the consumer price index at the time of issuance of the notes as long as the old consumer price index is still published. The conversion to a new reference base does not affect the measurement of the percent changes in a given index series from one time period to another, except for rounding differences. Thus, rebasing might affect the published headline number often quoted in the financial press; however, the inflation calculation for the notes should not be adversely affected by any such rebasing because the old-based consumer price index can be calculated by using the percent changes of the new rebased consumer price index to calculate the levels of the old consumer price index (because the two series should have the same percentage changes).

The notes represent obligations of Prudential Financial, Inc. only. The U.S. government is not involved in any way in this offering and is under no obligation relating to the notes or to the holders of the notes.

CPI Contingencies. If the CPI for a particular month is revised, the previously reported CPI will continue to be used to calculate interest payments on the notes.

In no case will the interest rate for the notes for any monthly interest payment period be less than the minimum interest rate of 0.00% per annum or more than the maximum interest rate of 100% per annum. The amount of interest payable on the notes on each interest payment date will be calculated on an Actual/Actual (ISDA) day count basis. If the CPI for a particular month is revised, the previously reported CPI will continue to be used to calculate interest payments on the notes.

If by 3:00 p.m. on any interest determination date the CPI is not published on Bloomberg CPURNSA for any relevant month, but has otherwise been published by the Bureau of Labor Statistics, the calculation agent will determine the CPI as reported by the Bureau of Labor Statistics for such month using such other source as on its face appears to

accurately set forth the CPI as reported by the Bureau of Labor Statistics.

In calculating CPI_n and CPI_{n-12} , the calculation agent will use the most recently available value of the CPI determined as described above on the applicable interest determination date, even if such value has been adjusted from a prior reported value for the relevant month. However, if a value of CPI_n and CPI_{n-12} used by the

S-49

Table of Contents

calculation agent on any interest reset date to determine the interest rate on the notes (an initial CPI) is subsequently revised by the Bureau of Labor Statistics, the calculation agent will continue to use the initial CPI, and the interest rate determined on such interest determination date will not be revised.

If the CPI is rebased to a different year or period and the 1982-1984 CPI is no longer used, the base reference period for the notes will continue to be the 1982-1984 reference period as long as the 1982-1984 CPI continues to be published.

If, while the notes are outstanding, the CPI is discontinued or substantially altered, as determined by the calculation agent in its sole discretion, the calculation agent will determine the interest rate on the notes by reference to the applicable substitute index that is chosen by the Secretary of the Treasury for the Department of The Treasury's Inflation-Linked Treasuries as described at 62 Federal Register 846-874 (January 6, 1997) or, if no such securities are outstanding, the substitute index will be determined by the calculation agent in accordance with general market practice at the time; provided that the procedure for determining the resulting interest rate is administratively acceptable to the calculation agent.

The following table sets forth the CPI from January 2008 to January 2015, as reported by the Bureau of Labor Statistics of the U.S. Department of Labor.

Month	2015	2014	2013	2012	2011	2010	2009	2008
January	233.707	233.916	230.280	226.665	220.223	216.687	211.143	211.080
February		234.781	232.166	227.663	221.309	216.741	212.193	211.693
March		236.293	232.773	229.392	223.467	217.631	212.709	213.528
April		237.072	232.531	230.085	224.906	218.009	213.240	214.823
May		237.900	232.945	229.815	225.964	218.178	213.856	216.632
June		238.343	233.504	229.478	225.722	217.965	215.693	218.815
July		238.250	233.596	229.104	225.922	218.011	215.351	219.964
August		237.852	233.877	230.379	226.545	218.312	215.834	219.086
September		238.031	234.149	231.407	226.889	218.439	215.969	218.783
October		237.433	233.546	231.317	226.421	218.711	216.177	216.573
November		236.151	233.069	230.221	226.230	218.803	216.330	212.425
December		234.812	233.049	229.601	225.672	219.179	215.949	210.228

As previously stated, movements in the CPI that have occurred in the past are not necessarily indicative of changes that may occur in the future, which may be wider or more confined than those that have occurred historically.

Original Issue Discount InterNotes®

We may issue the InterNotes® as original issue discount notes. An original issue discount note is a note, including any note that does not provide for the payment of interest prior to the note's maturity date, which is issued at a price lower than the note's principal amount and which provides that upon redemption, repayment or acceleration of the note's stated maturity an amount less than the note's principal amount will be payable. If an original issue discount note is redeemed, repaid or accelerated prior to the note's stated maturity, the amount payable to the holder of such a note will be determined in accordance with the terms of the note, but will be an amount less than the amount payable at the stated maturity of such a note. Original issue discount notes and other notes may be treated as issued with original issue discount for U.S. federal income tax purposes. See "Certain Federal Income Tax Considerations" in this prospectus

supplement.

S-50

Table of Contents

Amortizing InterNotes®

We may from time to time offer InterNotes® on which we pay principal and interest in installments over the life of the notes. Interest on amortizing notes will be computed on the basis of a 360-day year of twelve 30-day months, and, in the case of an incomplete month, the number of days elapsed calculated on the basis of a 30-day month. Unless otherwise specified in the applicable pricing supplement, payments with respect to the amortizing notes will be applied first to interest due and payable and then to the reduction of the unpaid principal amount. We will provide a table with repayment information with respect to each amortizing note to its original purchaser and we will make this information available, upon request, to subsequent noteholders.

Redemption and Repayment

Unless we otherwise provide in the applicable pricing supplement, an InterNote® will not be redeemable or repayable prior to its stated maturity date.

If the applicable pricing supplement states that the InterNote® will be redeemable at our option prior to its stated maturity date, then on such date or dates specified in the pricing supplement, we may redeem that note at our option either in whole or from time to time in part, upon not less than 30 days' written notice to the holder of that note.

If the pricing supplement states that your InterNote® will be repayable at your option prior to its stated maturity date, we will require receipt of notice of the request for repayment at least 30 but not more than 60 days prior to the date or dates specified in the pricing supplement. We also must receive the completed form entitled "Option to Elect Repayment." Exercise of the repayment option by the holder of a note is irrevocable.

Since the notes will be represented by a single master global note in fully registered form, DTC or its nominee will be treated as the holder of the notes; therefore, other than the trustee under the indenture, DTC or its nominee will be the only entity that receives notices of redemption of notes from us and will be the only entity that can exercise the right to have the notes repaid, in the case of optional repayment.

To ensure that DTC or its nominee will timely exercise a right to repayment with respect to a particular beneficial interest in a note, the beneficial owner of the interest in that note must instruct the broker or other direct or indirect participant through which it holds the beneficial interest to notify DTC or its nominee of its desire to exercise a right of repayment. Because different firms have different cut-off times for accepting instructions from their customers, each beneficial owner should consult the broker or other direct or indirect participant through which it holds an interest in a note to determine the cut-off time by which the instruction must be given for timely notice to be delivered to DTC or its nominee. Conveyance of notices and other communications by DTC or its nominee to participants, by participants to indirect participants and by participants and indirect participants to beneficial owners of the notes will be governed by agreements among them and any applicable statutory or regulatory requirements.

The redemption or repayment of a note normally will occur on the interest payment date or dates following receipt of a valid notice. Unless otherwise specified in the pricing supplement, the redemption or repayment price will equal 100% of the principal amount of the note plus unpaid interest accrued to the date or dates of redemption or repayment.

We may at any time purchase notes at any price or prices in the open market or otherwise. We may also purchase notes otherwise tendered for repayment by a holder or tendered by a holder's duly authorized representative through exercise of the Survivor's Option described below. If we purchase the notes in this manner, we have the discretion to hold, resell or surrender the notes to the trustee for cancellation.

S-51

Table of Contents**Survivor's Option**

The Survivor's Option is a provision in an InterNote[®] pursuant to which we agree to repay that note, if requested by the authorized representative of the beneficial owner of that note, following the death of the beneficial owner of the note, so long as the note was owned by that beneficial owner or the estate of that beneficial owner at least six months prior to the request. The pricing supplement relating to each offering of notes will state whether the Survivor's Option applies to those notes.

If an InterNote[®] is entitled to a Survivor's Option, upon the valid exercise of the Survivor's Option and the proper tender of that note for repayment, we will, at our option, repay that note, in whole or in part, at a price equal to 100% of the amortized principal amount of the deceased beneficial owner's interest in that note plus unpaid interest accrued to the date of repayment. We will not honor a Survivor's Option if the notes have been previously redeemed or otherwise repaid, or have been declared due and payable before their stated maturity by reason of an event of default under the indenture, as more fully described in the accompanying prospectus under "Description of Debt Securities We May Offer - Default and Related Matters".

Depending on market conditions, including changes in interest rates, and our creditworthiness, the secondary market value of the InterNotes[®] may be greater than the repayment amount pursuant to the Survivor's Option. **Accordingly, the authorized representative should contact his or her broker to determine the secondary market price of the InterNotes[®] and should carefully consider whether to sell the InterNotes[®] to their broker or another market participant rather than requesting repayment of the InterNotes[®] at the repayment price pursuant to a Survivor's Option.**

To be valid, the Survivor's Option must be exercised by or on behalf of the person who has authority to act on behalf of the deceased beneficial owner of the note, including, without limitation, the personal representative or executor of the deceased beneficial owner or the surviving joint owner with the deceased beneficial owner, under the laws of the applicable jurisdiction and the right to sell, transfer or otherwise dispose of an interest in a note and the right to receive the proceeds from the note, as well as the principal and interest payable to the holder of the note.

The death of a person holding a beneficial ownership interest in a note as a joint tenant or tenant by the entirety with another person, or as a tenant in common with the deceased holder's spouse, will be deemed the death of a beneficial owner of that note, and the entire principal amount of the note so held will be subject to repayment by us upon request. However, the death of a person holding a beneficial ownership interest in a note as tenant in common with a person other than such deceased holder's spouse will be deemed the death of a beneficial owner only with respect to such deceased person's interest in the note.

The death of a person who, during his or her lifetime, was entitled to substantially all of the beneficial ownership interests in a note will be deemed the death of the beneficial owner of that note for purposes of the Survivor's Option, regardless of whether that beneficial owner was the registered holder of that note, if entitlement to those interests can be established to the satisfaction of us and the paying agent. A beneficial ownership interest will be deemed to exist in typical cases of nominee ownership, ownership under the Uniform Transfers to Minors Act or Uniform Gifts to Minors Act, community property or other joint ownership arrangements between a husband and wife. In addition, a beneficial ownership interest will be deemed to exist in custodial and trust arrangements where one person has all of the beneficial ownership interests in the applicable note during his or her lifetime.

We have the discretionary right to limit the aggregate principal amount of InterNotes[®] as to which exercises of the Survivor's Option shall be accepted by us from authorized representatives of all deceased beneficial owners in any calendar year to an amount equal to the greater of \$2,000,000 or 2% of the principal amount of all notes outstanding

as of the end of the most recent calendar year. We also have the discretionary right to limit to \$250,000 in any calendar year the aggregate principal amount of notes as to which exercises of

S-52

Table of Contents

the Survivor's Option shall be accepted by us from the authorized representative of any individual deceased beneficial owner of notes in such calendar year. In addition, we will not permit the exercise of the Survivor's Option except in principal amounts equal to the minimum denomination (\$1,000, unless otherwise specified in the applicable pricing supplement) and integral multiples of \$1,000 in excess thereof. We may, at our option and pursuant to the exercise of the Survivor's Option, repay interests of any deceased beneficial owner in the notes in any calendar year in excess of the \$250,000 limitation. Any optional repayment by us of this kind, to the extent it exceeds the \$250,000 limitation for any deceased beneficial owner, will not be included in the computation of the two percent aggregate limitation for repayment of the notes for that or any other calendar year. We may also, at our option and pursuant to the exercise of the Survivor's Option, repay interests of deceased beneficial owners in the notes in any calendar year in an aggregate principal amount exceeding the two percent aggregate limitation. Any optional repayment by us of this kind, to the extent it exceeds the two percent aggregate limitation, will not be considered in calculating the two percent aggregate limitation for any other calendar year. Furthermore, any optional repayment with respect to a deceased beneficial owner's interest in the notes is inapplicable with respect to any other deceased beneficial owner's interest in the notes. In other words, we may waive any applicable limitations with respect to a deceased beneficial owner but not make the same or similar waivers with respect to other deceased beneficial owners.

An otherwise valid election to exercise the Survivor's Option may not be withdrawn. Each election to exercise the Survivor's Option will be accepted in the order that elections are received by the paying agent, except for any note the acceptance of which would contravene any of the limitations described in the preceding paragraph. InterNotes® accepted for repayment through the exercise of the Survivor's Option normally will be repaid on the first interest payment date that occurs 20 or more calendar days after the date of the acceptance. For example, if the acceptance date of a note tendered through a valid exercise of the Survivor's Option is April 1, 2015, and interest on that note is paid monthly, we would normally, at our option, repay that note on the interest payment date occurring on May 15, 2015, because the April 15, 2015 interest payment date would occur less than 20 days from the date of acceptance. Each tendered note that is not accepted in any calendar year due to the application of any of the limitations described in the preceding paragraph will be deemed to be tendered in the following calendar year in the order in which all such notes were originally tendered. If a note tendered through a valid exercise of the Survivor's Option is not accepted, the paying agent will deliver a notice by first-class mail to the registered holder, at that holder's last known address as indicated in the note register, that states the reason that note has not been accepted for repayment.

Because the InterNotes® will be represented by a master global note, DTC or its nominee is treated as the holder of the notes and will be the only entity that can exercise the Survivor's Option for such notes. To obtain repayment pursuant to exercise of the Survivor's Option for a note, the deceased beneficial owner's authorized representative must provide the following items to the broker or other entity through which the beneficial interest in the note is held by the deceased beneficial owner:

- a written instruction to such broker or other entity to notify DTC of the authorized representative's desire to obtain repayment pursuant to exercise of the Survivor's Option;
- appropriate evidence satisfactory to us and the paying agent (a) that the deceased was the beneficial owner of the note at the time of death and his or her interest in the note was owned by the deceased beneficial owner or his or her estate at least six months prior to the request for repayment, (b) that the death of the beneficial owner has occurred, (c) of the date of death of the beneficial owner, and (d) that the representative has authority to act on behalf of the beneficial owner;

- if the interest in the note is held by a nominee of the deceased beneficial owner, a certificate satisfactory to us and the paying agent from the nominee attesting to the deceased s beneficial ownership of such note;

S-53

Table of Contents

- a written request for repayment signed by the authorized representative of the deceased beneficial owner with the signature guaranteed by a member firm of a registered national securities exchange or of FINRA, or a commercial bank or trust company having an office or correspondent in the United States;
- if applicable, a properly executed assignment or endorsement;
- tax waivers and any other instruments or documents that we or the paying agent reasonably require in order to establish the validity of the beneficial ownership of the note and the claimant's entitlement to payment; and
- any additional information we or the paying agent reasonably require to evidence satisfaction of any conditions to the exercise of the Survivor's Option or to document beneficial ownership or authority to make the election and to cause the repayment of the note.

In turn, the broker or other entity will deliver each of these items to the paying agent, together with evidence satisfactory to us and the paying agent from the broker or other entity stating that it represents the deceased beneficial owner.

All questions regarding the eligibility or validity of any exercise of the Survivor's Option will be determined by us, in our sole discretion, which determination will be final and binding on all parties.

The broker or other entity will be responsible for disbursing payments received from the paying agent to the authorized representative.

Forms for the exercise of the Survivor's Option may be obtained from the paying agent, Citibank, N.A., at 388 Greenwich Street, 14th Floor, New York, New York 10013, Attention: Agency & Trust Group.

Reopening of Issue

We may, from time to time, without the consent of existing noteholders, reopen an issue of InterNotes® and issue additional InterNotes® with the same terms, including maturity and interest payment terms, as InterNotes® issued on an earlier date, except for the issue date, issue price and the first payment date of interest. After such additional notes are issued, they will be fungible with the previously issued notes (provided that any such additional InterNotes® are treated as part of the same issue as such previously issued InterNotes® for U.S. federal income tax purposes) to the extent specified in the applicable pricing supplement.

Table of Contents

CERTAIN FEDERAL INCOME TAX CONSIDERATIONS

This section describes certain United States federal income tax consequences of acquiring, owning, and disposing of notes. This section applies only to notes held as capital assets by purchasers that acquire notes in the original offering.

This section does not apply to special classes of holders that are subject to special rules, such as dealers in securities or currencies, traders in securities that elect to use a mark-to-market method of accounting for their securities holdings, banks, life insurance companies, tax-exempt organizations, persons that own notes that are a hedge or that are hedged against interest rate or currency risks, persons that own notes as part of a straddle or conversion transaction for tax purposes, persons that purchase or sell notes as part of a wash sale for tax purposes, or United States holders (as defined below) whose functional currency for tax purposes is not the U.S. dollar.

This section deals only with notes that are due to mature 30 years or less from the date on which the notes are issued. The United States federal income tax consequences of owning notes that are due to mature more than 30 years from their date of issue will be discussed in an applicable pricing supplement. This section also does not deal with (i) notes the payments on which are determined by reference to any index, (ii) other notes that are subject to the rules governing contingent payment obligations, (iii) extendible notes, or (iv) any notes providing for the periodic payment of principal over the life of the note. The applicable pricing supplement will discuss certain United States federal income tax consequences of acquiring, owning, and disposing of such notes.

If a partnership holds the notes, the United States federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the notes should consult the partner's tax advisor with regard to the United States federal income tax treatment of an investment in the notes.

Prospective purchasers of notes should consult their own tax advisors concerning the consequences, in their particular circumstances, under the Internal Revenue Code of 1986, as amended (the Code) and the laws of any other taxing jurisdiction, of the ownership of notes.

United States Holders

This subsection describes the tax consequences to a United States holder. A United States holder is a beneficial owner of a note that is:

- a citizen or resident of the United States,
- a domestic corporation,
- an estate whose income is subject to United States federal income tax regardless of its source, or
- a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

This section does not apply to holders that are not United States holders. Such holders should read Non-United States Holders in this prospectus supplement.

Payments of Interest

Except as described below in the case of interest on a discount note that is not qualified stated interest, each as defined below under Original Issue Discount General, any interest on a note, whether payable in

S-55

Table of Contents

U.S. dollars or a foreign currency, including a composite currency or basket of currency other than U.S. dollars, will be taxable to a United States holder as ordinary income at the time it is received or accrued, depending on the United States holder's method of accounting for tax purposes.

Foreign-Currency Notes Cash Basis Taxpayers. A United States holder that uses the cash receipts and disbursements method of accounting for tax purposes that receives an interest payment that is denominated in, or determined by reference to, a foreign currency must recognize income equal to the U.S. dollar value of the interest payment, based on the exchange rate in effect on the date of receipt, regardless of whether the United States holder actually converts the payment into U.S. dollars.

Foreign-Currency Notes Accrual Basis Taxpayers. A United States holder that uses an accrual method of accounting for tax purposes may determine the amount of recognized income with respect to an interest payment denominated in, or determined by reference to, a foreign currency by using one of two methods. Under the first method, the United States holder will determine the amount of income accrued based on the average exchange rate in effect during the interest accrual period or, with respect to an accrual period that spans two taxable years, that part of the period within the taxable year.

If the United States holder elects the second method, such holder would determine the amount of income accrued on the basis of the exchange rate in effect on the last day of the accrual period, or, in the case of an accrual period that spans two taxable years, the exchange rate in effect on the last day of the part of the period within the taxable year. Additionally, under this second method, if the United States holder receives a payment of interest within five business days of the last day of the United States holder's accrual period or taxable year, such holder may instead translate the interest accrued into U.S. dollars at the exchange rate in effect on the day that the United States holder actually receives the interest payment. If the United States holder elects the second method, such method will apply to all debt instruments that such holder holds at the beginning of the first taxable year to which the election applies and to all debt instruments that such holder subsequently acquires. A United States holder may not revoke this election without the consent of the Internal Revenue Service.

When a United States holder actually receives an interest payment, including a payment attributable to accrued but unpaid interest upon the sale or retirement of a note, denominated in, or determined by reference to, a foreign currency for which such holder accrued an amount of income, the United States holder will recognize ordinary income or loss measured by the difference, if any, between the exchange rate that such holder used to accrue interest income and the exchange rate in effect on the date of receipt, regardless of whether the United States holder actually converts the payment into U.S. dollars.

Original Issue Discount

General. A note, other than a short-term note with a term of one year or less, will be treated as a discount note issued at an original issue discount if the amount by which the note's stated redemption price at maturity exceeds the note's issue price is more than a *de minimis* amount.

Generally, a note's issue price will be the first price at which a substantial amount of notes included in the issue of which the note is a part is sold to persons other than bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, agents, or wholesalers. A note's stated redemption price at maturity is the total of all payments provided by the note that are not payments of qualified stated interest. In the case of a fixed rate note, an interest payment generally will be qualified stated interest if such payment is one of a series of stated interest payments on a note that are unconditionally payable at least annually at a single fixed rate, with certain exceptions for lower rates paid during some periods, applied to the outstanding principal amount of the note. Special rules that apply

in the case of variable rate debt instruments, which include floating rate notes, are discussed below under Variable Rate Notes.

S-56

Table of Contents

In general, a note is not a discount note if the amount by which the note's stated redemption price at maturity exceeds the note's issue price is less than the *de minimis* amount of 1/4 of 1 percent of the note's stated redemption price at maturity multiplied by the number of complete years to the note's maturity. A note will have *de minimis* original issue discount if the amount of the excess is less than the *de minimis* amount. If a note has *de minimis* original issue discount, a United States holder must include the *de minimis* amount in income as stated principal payments are made on the note, unless the United States holder makes the election described below under Election to Treat All Interest as Original Issue Discount. The includible amount with respect to each such payment can be determined by multiplying the total amount of a note's *de minimis* original issue discount by a fraction, the numerator of which is the amount of the principal payment made and the denominator of which is the stated principal amount of the note.

United States holders of discount notes having a maturity of more than one year from their date of issue generally must include original issue discount, or OID, in income before they receive cash attributable to that income. The amount of OID that must be included in a United States holder's income is calculated using a constant-yield method, and generally will result in increasingly greater amounts of OID being included in the United States holder's income over the life of the note. The amount of OID that a United States holder must include in income can be calculated by adding the daily portions of OID with respect to the discount note for each day during the taxable year or portion of the taxable year that the United States holder holds the discount note. The daily portion is determined by allocating to each day in any accrual period a *pro rata* portion of the OID allocable to that accrual period. A United States holder may select an accrual period of any length with respect to the United States holder's discount note and may vary the length of each accrual period over the term of the discount note. However, no accrual period may be longer than one year and each scheduled payment of interest or principal on the discount note must occur on either the first or final day of an accrual period.

The amount of OID allocable to an accrual period can be calculated by (a) multiplying a discount note's adjusted issue price at the beginning of the accrual period by the note's yield to maturity, and then (b) subtracting from this figure the sum of the payments of qualified stated interest on the note allocable to the accrual period. The discount note's yield to maturity must be determined on the basis of compounding at the close of each accrual period and adjusting for the length of each accrual period. The adjusted issue price of a discount note at the beginning of any accrual period is calculated by:

- adding the discount note's issue price and any accrued OID for each prior accrual period, and then
- subtracting any payments previously made on the discount note that were not qualified stated interest payments.

If an interval between payments of qualified stated interest on a discount note contains more than one accrual period, then, when determining the amount of OID allocable to an accrual period, a United States holder must allocate the amount of qualified stated interest payable at the end of the interval, including any qualified stated interest that is payable on the first day of the accrual period immediately following the interval, *pro rata* to each accrual period in the interval based on their relative lengths. In addition, the United States holder must increase the adjusted issue price at the beginning of each accrual period in the interval by the amount of any qualified stated interest that has accrued prior to the first day of the accrual period but that is not payable until the end of the interval. The amount of OID allocable to an initial short accrual period may be computed by using any reasonable method if all other accrual periods, other than a final short accrual period, are of equal length. The amount of OID allocable to the final accrual period is equal to the difference between:

- the amount payable at the maturity of a note, other than any payment of qualified stated interest, and
- the note's adjusted issue price as of the beginning of the final accrual period.

S-57

Table of Contents

All payments on a discount note (other than payments of qualified stated interest) will generally be viewed first as payments of previously-accrued OID (to the extent thereof), with payments attributed first to the earliest-accrued OID, and then as payments of principal.

In the case of a discount note that is denominated in, or determined by reference to, a foreign currency, a United States holder should determine the U.S. dollar amount includible in income as OID for each accrual period by (a) calculating the amount of OID allocable to each accrual period in the foreign currency using the constant-yield method described above, and (b) translating the amount of the foreign currency so derived at the average exchange rate in effect during that accrual period (or portion thereof within a United States holder's taxable year) or, at the United States holder's election (as described above under *Payments of Interest*), at the exchange rate on the last day of the accrual period (or the last day of the taxable year within such accrual period if the accrual period spans more than one taxable year), or at the exchange rate on the date of receipt, if such date is within five business days of the last day of the accrual period. Because exchange rates may fluctuate, a United States holder of a discount note that is denominated in, or determined by reference to, a foreign currency may recognize a different amount of OID income in each accrual period than would the United States holder of an otherwise similar discount note that is denominated in, and determined by reference to, U.S. dollars. Upon the receipt of an amount attributable to OID (whether in connection with a payment of an amount that is not qualified stated interest or the sale or retirement of the discount note), a United States holder will recognize ordinary income or loss measured by the difference between the amount received (translated into U.S. dollars at the exchange rate in effect on the date of receipt or on the date of disposition of the discount note, as the case may be) and the amount accrued (using the exchange rate applicable to such previous accrual).

Acquisition Premium. If a United States holder purchases a note for an amount that is less than or equal to the sum of all amounts, other than qualified stated interest, payable on such note after the purchase date but is greater than the amount of such note's adjusted issue price, as determined above under *General*, the excess is acquisition premium. Unless the United States holder makes the election described below under *Election to Treat All Interest as Original Issue Discount*, then the United States holder must reduce the daily portions of OID by a fraction equal to:

- the excess of the United States holder's adjusted basis in the note immediately after purchase over the adjusted issue price of the note

divided by:

- the excess of the sum of all amounts payable, other than qualified stated interest, on the note after the purchase date over the note's adjusted issue price.

Pre-Issuance Accrued Interest. An election may be made to decrease the issue price of a note by the amount of pre-issuance accrued interest if:

- a portion of the initial purchase price of the note is attributable to pre-issuance accrued interest,
- the first stated interest payment on the note is to be made within one year of the note's issue date, and

· the payment will equal or exceed the amount of pre-issuance accrued interest. If this election is made, a portion of the first stated interest payment will be treated as a return of the excluded pre-issuance accrued interest and not as an amount payable on the note.

Election to Treat All Interest as Original Issue Discount. A United States holder may elect to include in gross income all interest that accrues on a note using the constant-yield method described above under General, with the modifications described below. For purposes of this election, interest will include stated

Table of Contents

interest, OID, *de minimis* original issue discount and unstated interest, as adjusted by any amortizable bond premium, described below under **Notes Purchased at a Premium**.

If a United States holder makes this election for a note, then for purposes of applying the constant-yield method:

- the issue price of the note will equal the United States holder's cost,
- the issue date of the note will be the date the United States holder acquired it, and
- no payments on the note will be treated as payments of qualified stated interest.

Generally, this election will apply only to the note for which the election is made; however, if the note has amortizable bond premium, the United States holder will be deemed to have made an election to apply amortizable bond premium against interest for all debt instruments with amortizable bond premium, other than debt instruments the interest on which is excludible from gross income, that the United States holder holds as of the beginning of the taxable year to which the election applies or any taxable year thereafter. Additionally, if a United States holder makes this election for a market discount note, the United States holder will be treated as having made the election described below under

Market Discount to include market discount in income currently over the life of all debt instruments having market discount that the United States holder acquires on or after the first day of the first taxable year to which the election applies. The election to apply the constant-yield method to all interest on a note or the deemed election with respect to amortizable bond premium may not be revoked without the consent of the Internal Revenue Service.

Notes Subject to Contingencies Including Optional Redemption. A note is subject to a contingency if the note provides for an alternative payment schedule or schedules applicable upon the occurrence of a contingency or contingencies, other than a remote or incidental contingency, whether such contingency relates to payments of interest or of principal. In such a case, a United States holder would determine the yield and maturity of the United States holder's note by assuming that the payments would be made according to the payment schedule most likely to occur if:

- the timing and amounts of the payments that comprise each payment schedule are known as of the issue date, and
- one of such schedules is significantly more likely than not to occur.

If there were no single payment schedule that is significantly more likely than not to occur, other than because of a mandatory sinking fund, the United States holder would include income on the holder's note in accordance with the general rules that govern contingent payment obligations. These rules will be discussed in the applicable pricing supplement.

Notwithstanding the general rules for determining yield and maturity, if a note is subject to contingencies, and either the United States holder or we have an unconditional option or options that, if exercised, would require payments to be made on the note under an alternative payment schedule or schedules, then:

- in the case of an option or options that we may exercise, we would be deemed to exercise or not exercise an option or combination of options in the manner that minimizes the yield on the note, and
- in the case of an option or options that the United States holder may exercise, the United States holder would be deemed to exercise or not exercise an option or combination of options in the manner that maximizes the yield on the United States holder's note.

S-59

Table of Contents

If both the United States holder and the Company hold options described in the preceding sentence, those rules would apply to each option in the order in which they may be exercised. The United States holder may determine the yield on the United States holder's note for the purposes of those calculations by using any date on which the United States holder's note may be redeemed or repurchased as the maturity date and the amount payable on the date that the United States holder chose in accordance with the terms of the United States holder's note as the principal amount payable at maturity.

If a contingency, including the exercise of an option, actually occurs or does not occur contrary to an assumption made according to the above rules then, except to the extent that a portion of the United States holder's note is repaid as a result of this change in circumstances and solely to determine the amount and accrual of OID, the United States holder would redetermine the yield and maturity of the United States holder's note by treating such note as having been retired and reissued on the date of the change in circumstances for an amount equal to such note's adjusted issue price on that date.

This subsection (as this section) does not apply to notes that are subject to the rules governing contingent payment debt instruments. The applicable pricing supplement will discuss certain United States federal income tax consequences of acquiring, owning, and disposing of such notes.

Variable Rate Notes. Floating rate notes generally will be treated as variable rate notes, which are subject to special rules discussed below. A floating rate note will be a variable rate note if:

- the note's issue price does not exceed the total noncontingent principal payments by more than the lesser of
 - 0.015 multiplied by the product of the total noncontingent principal payments and the number of complete years to maturity from the issue date, or
 - 15 percent of the total noncontingent principal payments, and
- the note provides for stated interest, compounded or paid at least annually, only at
 - one or more qualified floating rates,
 - a single fixed rate and one or more qualified floating rates,
 - a single objective rate, or
 - a single fixed rate and a single objective rate that is a qualified inverse floating rate.

A note will have a variable rate that is a qualified floating rate if:

- variations in the value of the rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which the note is denominated, or

- the rate is equal to such a rate multiplied by either:
 - a fixed multiple that is greater than 0.65 but not more than 1.35, or

 - a fixed multiple greater than 0.65 but not more than 1.35, increased or decreased by a fixed rate, and

S-60

Table of Contents

- the value of the rate on any date during the term of the note is set no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

If a note provides for two or more qualified floating rates that are within 0.25 percentage points of each other on the issue date or can reasonably be expected to have approximately the same values throughout the term of the note, the qualified floating rates together constitute a single qualified floating rate.

A note will not have a qualified floating rate, however, if the rate is subject to certain restrictions, including caps, floors, governors, or other similar restrictions, unless such restrictions are fixed throughout the term of the note or are not reasonably expected to significantly affect the yield on the note.

A note will have a variable rate that is a single objective rate if:

- the rate is not a qualified floating rate,
- the rate is determined using a single, fixed formula that is based on objective financial or economic information that is not within the control of or unique to the circumstances of the issuer or a related party, and
- the value of the rate on any date during the term of the note is set no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

A note will not have a variable rate that is an objective rate, however, if it is reasonably expected that the average value of the rate during the first half of the note's term will be either significantly less than or significantly greater than the average value of the rate during the final half of the note's term.

An objective rate as described above is a qualified inverse floating rate if:

- the rate is equal to a fixed rate minus a qualified floating rate, and
- the variations in the rate can reasonably be expected to inversely reflect contemporaneous variations in the cost of newly borrowed funds.

A note will also have a single qualified floating rate or an objective rate if interest on the note is stated at a fixed rate for an initial period of one year or less followed by either a qualified floating rate or an objective rate for a subsequent period, and either:

- the fixed rate and the qualified floating rate or objective rate have values on the issue date of the note that do not differ by more than 0.25 percentage points, or
- the value of the qualified floating rate or objective rate is intended to approximate the fixed rate.

CMT rate, LIBOR, prime rate, treasury rate, and federal funds rate notes generally will be treated as variable rate notes under these rules.

In general, if a floating rate note that is treated as a variable rate note provides for stated interest at a single qualified floating rate or objective rate, or in certain cases one of those rates after a single fixed rate for an initial period of one year or less, all stated interest on the note is qualified stated interest. In this case, the amount of OID, if any, is determined by using, in the case of a qualified floating rate or qualified inverse floating rate, the value as of the issue date of the qualified floating rate or qualified inverse floating rate, or, for any other objective rate, a fixed rate that reflects the yield reasonably expected for the note.

Table of Contents

If a floating rate note that is treated as a variable rate note does not provide for stated interest at a single qualified floating rate or a single objective rate, and also does not provide for interest payable at a fixed rate other than a single fixed rate for an initial period, interest and OID accruals on the note are generally determined by:

- determining a fixed rate substitute for each variable rate provided under the note,
- constructing the equivalent fixed rate debt instrument, using the fixed rate substitute described above,
- determining the amount of qualified stated interest and OID with respect to the equivalent fixed rate debt instrument, and
- adjusting for actual variable rates during the applicable accrual period.

When determining the fixed rate substitute for each variable rate provided under the note, a United States holder generally will use the value of each variable rate as of the issue date or, for an objective rate that is not a qualified inverse floating rate, a rate that reflects the reasonably expected yield on the note.

If a floating rate note that is treated as a variable rate note provides for stated interest either at one or more qualified floating rates or at a qualified inverse floating rate, and also provides for stated interest at a single fixed rate other than at a single fixed rate for an initial period, interest and OID accruals generally must be determined using the method described in the previous paragraph. However, the floating rate note will be treated, for purposes of the first three steps of the determination, as if the note had provided for a qualified floating rate, or a qualified inverse floating rate, rather than the fixed rate. The qualified floating rate, or qualified inverse floating rate, that replaces the fixed rate must be such that the fair market value of the note as of the issue date approximates the fair market value of an otherwise identical debt instrument that provides for the qualified floating rate, or qualified inverse floating rate, rather than the fixed rate.

Short-Term Notes. In general, a cash basis United States holder of a short-term note (a note that matures one year from the note's issue date) is not required to accrue OID, as specially defined below for the purposes of this paragraph, for United States federal income tax purposes unless the United States holder elects to do so, although such a holder will generally be required to include any stated interest in income as the interest is received. An accrual basis taxpayer, a taxpayer in a special class, including, but not limited to, a regulated investment company, common trust fund, or a certain type of pass-through entity, or a cash basis taxpayer who so elects, will be required to accrue OID on short-term notes on either a straight-line basis or under the constant-yield method, based on daily compounding.

In the case of a United States holder not required and not electing to include OID in income currently, any gain realized on the sale or retirement of a short-term note will be ordinary income to the extent of the accrued OID, which will be determined on a straight-line basis, unless an election is made to accrue the OID under the constant-yield method, through the date of sale or retirement. United States holders who are not required and do not elect to accrue OID on their short-term notes will be required to defer deductions for interest on borrowings allocable to the short-term notes in an amount not exceeding the deferred income until the deferred income is realized.

When determining the amount of OID subject to these rules, a United States holder must include all interest payments on a short-term note, including stated interest, in the short-term note's stated redemption price at maturity.

S-62

Table of Contents*Market Discount*

A United States holder will be treated as if it purchased a note, other than a short-term note, at a market discount, and such note would be a market discount note if:

- the United States holder purchases such note for less than its issue price as determined above under Original Issue Discount General , and
- the difference between the note's stated redemption price at maturity or, in the case of a discount note, the note's revised issue price, and the price the United States holder paid for such note is equal to or greater than 1/4 of 1 percent of such note's stated redemption price at maturity or revised issue price, respectively, multiplied by the number of complete years to the note's maturity. To determine the revised issue price of such note for these purposes, the United States holder would generally add any OID that has accrued on such note to such issue price.

If a note's stated redemption price at maturity or, in the case of a discount note, its revised issue price, exceeds the price the United States holder paid for the note by less than 1/4 of 1 percent multiplied by the number of complete years to the note's maturity, the excess constitutes *de minimis* market discount, and the rules discussed below are not applicable to the United States holder.

The United States holder must treat any gain the United States holder recognizes on the maturity or disposition of the United States holder's market discount note as ordinary income to the extent of the accrued market discount on the United States holder's note. Alternatively, the United States holder may elect to include market discount in income currently over the life of the United States holder's note. If the United States holder makes this election, it will apply to all debt instruments with market discount that the United States holder acquires on or after the first day of the first taxable year to which the election applies. The United States holder may not revoke this election without the consent of the Internal Revenue Service. If the United States holder owns a market discount note and does not make this election, the United States holder will generally be required to defer deductions for interest on borrowings allocable to the United States holder's note in an amount not exceeding the accrued market discount on the United States holder's note until the maturity or disposition of the United States holder's note.

If the United States holder owns a market discount note, the market discount will accrue on a straight-line basis unless an election is made to accrue market discount using a constant-yield method. If the United States holder makes this election, it will apply only to the note with respect to which such election is made and the United States holder may not revoke it. The United States holder would, however, not include accrued market discount in income unless such holder elects to do so, as described above.

Notes Purchased at a Premium

If a United States holder purchases a note for an amount in excess of its principal amount (or, in the case of a discount note, in excess of its stated redemption price at maturity), the United States holder may elect to treat the excess as amortizable bond premium. A United States holder that makes this election must reduce the amount required to be included in the United States holder's income each year with respect to interest on the note by the amount of amortizable bond premium allocable to that year, based on the note's yield to maturity. If the note is denominated in, or determined by reference to, a foreign currency, a United States holder will compute the amortizable bond premium in units of the foreign currency and such amortizable bond premium will reduce the United States holder's interest

income in units of the foreign currency. Gain or loss recognized that is attributable to changes in exchange rates between the time the amortized bond premium offsets interest income and the time of the acquisition of the note is generally taxable as ordinary income or loss. The election to amortize bond premium will apply to all debt instruments, other than debt instruments the interest on which is excludible from gross income, that the United States holder holds at the beginning of the first taxable year to which the election

S-63

Table of Contents

applies or that the United States holder thereafter acquires, and the election may not be revoked without the consent of the Internal Revenue Service. We also refer holders to the discussion under *Original Issue Discount Election to Treat All Interest as Original Issue Discount*.

Purchase, Sale and Retirement of the Notes

A United States holder's tax basis in a note will generally be the U.S. dollar cost, as defined below, of the note, adjusted by:

- adding any OID or de minimis original issue discount previously included in income with respect to the note, and then
- subtracting any payments on the note that are not qualified stated interest payments and any amortizable bond premium applied to reduce interest on the note.

If a United States holder purchases a note with foreign currency, the U.S. dollar cost of such note will generally be the U.S. dollar value of the purchase price on the date of purchase. However, if the United States holder is a cash basis taxpayer, or an accrual basis taxpayer if the United States holder so elects, and the note is traded on an established securities market, as defined in the applicable treasury regulations, the U.S. dollar cost of such note will be the U.S. dollar value of the purchase price on the settlement date of the purchase.

A United States holder will generally recognize gain or loss on the sale or retirement of a note equal to the difference between the amount realized on the sale or retirement, excluding any amounts attributable to accrued but unpaid interest (which will be treated as interest payments), and the United States holder's tax basis in the note. If a note is sold or retired for an amount in foreign currency, the amount realized will be the U.S. dollar value of such amount on the date the note is disposed of or retired, except that in the case of a note that is traded on an established securities market, as defined in the applicable treasury regulations, a cash basis taxpayer, or an accrual basis taxpayer that so elects, will determine the amount realized based on the U.S. dollar value of the foreign currency on the settlement date of the sale. Such gain or loss generally will be capital gain or loss, except to the extent:

- described above under *Original Issue Discount Short-Term Notes* or *Market Discount*, or
- attributable to changes in exchange rates as described below.

Capital gain of a noncorporate United States holder is generally taxed at preferential rates where the property is held for more than one year.

A United States holder must treat any portion of the gain or loss recognized on the sale or retirement of a note as ordinary income or loss to the extent attributable to changes in exchange rates. However, the United States holder takes exchange gain or loss into account only to the extent of the total gain or loss realized on the transaction.

Exchange of Amounts in Other Than U.S. Dollars

If a United States holder receives foreign currency as interest on a note or on the sale or retirement of a note, the United States holder's tax basis in the foreign currency will equal its U.S. dollar value when the interest is received or at the time of the sale or retirement. If the United States holder purchases foreign currency, the United States holder's tax basis will generally be equal to the U.S. dollar value of the foreign currency on the date of the purchase. The amount of any gain or loss recognized upon the sale or disposition of a foreign currency, including if the United States holder uses such foreign currency to purchase notes or exchange such

S-64

Table of Contents

foreign currency for U.S. dollars, will be equal to the difference between (i) the amount of U.S. dollars (or the fair market value in U.S. dollars of the other property received in such sale or disposition), and (ii) the United States holder's tax basis in such foreign currency. Any such gain or loss recognized generally will be ordinary income or loss.

Medicare Tax

A United States holder that is an individual or estate, or a trust that does not fall into a special class of trusts that is exempt from such tax, is subject to a 3.8% tax on the lesser of (1) the United States holder's net investment income (or undistributed net investment income in the case of an estate or trust) for the relevant taxable year and (2) the excess of the United States holder's modified adjusted gross income for the taxable year over a certain threshold (which in the case of individuals is between \$125,000 and \$250,000, depending on the individual's circumstances). A United States holder's net investment income generally includes the United States holder's interest income and the United States holder's net gains from the disposition of notes, unless such interest income or net gains are derived in the ordinary course of the conduct of a trade or business (other than a trade or business that consists of certain passive or trading activities). United States holders that are individuals, estates or trusts are urged to consult their tax advisors regarding the applicability of the Medicare tax to their income and gains in respect of their investment in the notes.

Non-United States Holders

This subsection describes the tax consequences to a non-United States holder. This subsection does not apply to United States holders. A non-United States holder is a beneficial owner of a note that is, for United States federal income tax purposes:

- a nonresident alien individual,
- a foreign corporation,
- a foreign partnership, or
- an estate or trust that in either case is not subject to United States federal income tax on a net basis on income or gain from a note.

This discussion assumes that interest payments on the notes are not determined by reference to the income, profits, changes in the value of property or other attributes of the debtor or a related party. The United States federal income tax consequences to a non-United States holder of owning such notes will be discussed in an applicable pricing supplement.

Payments on the Notes

Under United States federal income tax law, and subject to the discussions of FATCA withholding and backup withholding below, the Company and other U.S. payors generally will not be required to deduct United States withholding tax from payments of principal, premium, if any, and interest, including original issue discount, on a note to a non-United States holder if, in the case of payments of interest:

- I. the holder does not actually or constructively own 10% or more of the total combined voting power of all classes of stock of the Company entitled to vote,

- II. the holder is not a controlled foreign corporation (within the meaning of the Code) that is related to the Company through stock ownership,

S-65

Table of Contents

- III. the U.S. payor does not have actual knowledge or reason to know that the holder is a United States person and:
- A. the holder has furnished to the U.S. payor an Internal Revenue Service Form W-8BEN or W-8BEN-E or an acceptable substitute form upon which the holder certifies, under penalties of perjury, that a holder is, or in the case of a non-United States holder that is a partnership or an estate or trust, such forms certifying that each partner in the partnership or beneficiary of the estate or trust is, not a United States person,
 - B. the holder has furnished to the U.S. payor an Internal Revenue Service Form W-8ECI or an acceptable substitute form upon which the holder certifies, under penalties of perjury, that such payments are effectively connected with such holder's trade or business in the U.S.
 - C. in the case of payments made outside the United States to the holder at an offshore account, generally, an account maintained by the holder at a bank or other financial institution at any location outside the United States, the holder has furnished to the U.S. payor documentation that establishes the holder's identity and the holder's status as the beneficial owner of the payment for United States federal income tax purposes and that the holder is not a United States person,
 - D. the U.S. payor has received a withholding certificate, furnished on an appropriate Internal Revenue Service Form W-8 or an acceptable substitute form, from a person claiming to be:
 - 1. a withholding foreign partnership, generally a foreign partnership that has entered into an agreement with the Internal Revenue Service to assume primary withholding responsibility with respect to distributions and guaranteed payments the partnership makes to its partners,
 - 2. a qualified intermediary, generally a non-United States financial institution or clearing organization or a non-United States branch or office of a United States financial institution or clearing organization that is a party to a withholding agreement with the Internal Revenue Service, or
 - 3. a U.S. branch of a non-United States bank or of a non-United States insurance company, and the withholding foreign partnership, qualified intermediary or U.S. branch, as applicable, has received documentation upon which it may rely to treat the payment as made to a non-United States person or other person that is exempt from withholding (or, in the case of a qualified intermediary, has complied with its agreement with the Internal Revenue Service and applicable U.S. treasury regulations) that is, for United States federal income tax purposes, the beneficial owner of payments on the notes in accordance with U.S. treasury regulations, or, in the case of a qualified intermediary, in accordance with its agreement with the Internal Revenue Service,

- E. the U.S. payor receives a statement from a securities clearing organization, bank or other financial institution that holds customers' securities in the ordinary course of its trade or business:
 - 1. certifying to the U.S. payor under penalties of perjury that an Internal Revenue Service Form W-8BEN or W-8BEN-E or an acceptable substitute form has been received from the holder by such securities clearing organization, bank or other financial institution or by a similar financial institution between such securities clearing organization, bank or other financial institution and the holder, and

S-66

Table of Contents

2. to which is attached a copy of the Internal Revenue Service Form W-8BEN or W-8BEN-E or acceptable substitute form, or

- F. the U.S. payor otherwise possesses documentation upon which the U.S. payor may rely to treat the payment as made to a non-United States person that is, for United States federal income tax purposes, the beneficial owner of payments on the notes in accordance with U.S. treasury regulations.

If a non-United States holder cannot satisfy the requirements described above, payments of interest generally will be subject to a 30% U.S. federal withholding tax unless a tax treaty applies. If a tax treaty applies, a non-United States holder may be eligible for a reduction of or exemption from U.S. federal withholding tax. To claim any exemption from or reduction in the 30% withholding tax under a treaty, the non-United States holder must provide a properly executed IRS Form W-8BEN or W-8BEN-E or an acceptable substitute form claiming a reduction of or an exemption from withholding tax under an applicable tax treaty.

A non-United States holder that is engaged in a trade or business in the U.S. (and, if a tax treaty applies, maintains a permanent establishment within the U.S.) and receives interest on a note that is effectively connected with the conduct of such trade or business (and, if a tax treaty applies, attributable to such permanent establishment) will be subject to U.S. federal income tax on such interest on a net income basis in generally the same manner as a United States holder. In addition, in certain circumstances, a non-United States holder that is a foreign corporation may be subject to a 30% (or, if a tax treaty applies, such lower rate as provided) branch profits tax.

If a non-United States holder is subject to withholding at a rate in excess of a reduced rate for which the non-United States holder is eligible under a tax treaty or otherwise, such holder may be able to obtain a refund of or credit for any amounts withheld in excess of the applicable rate. Investors are encouraged to consult with their own tax advisors regarding the possible implications of these withholding requirements on their investment in the notes.

Sale, Exchange or Retirement of the Notes

Under United States federal income tax law, and subject to the discussions of FATCA withholding and backup withholding below, a non-United States holder of a note will not be subject to United States federal income or withholding tax on any gain realized on the sale or exchange of a note, unless:

- such gain is effectively connected with the conduct of the non-United States holder's trade or business in the United States (and, where an applicable tax treaty so provides, is also attributable to a U.S. permanent establishment maintained by the non-United States holder), or
- the non-United States holder is an individual who is present in the United States for 183 days or more in the taxable year of the disposition and certain other conditions are met.

Federal Estate Taxes

A note held by an individual who at death is not a citizen or resident of the United States will not be includible in the individual's gross estate for United States federal estate tax purposes if:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 424B2

- the decedent did not actually or constructively own 10% or more of the total combined voting power of all classes of stock of the Company entitled to vote at the time of death, and
- the income on the note would not have been effectively connected with a United States trade or business of the decedent at the same time.

S-67

Table of Contents

Different rules apply in the case of notes that provide for interest payments that are determined by reference to the income, profits, changes in the value of property or other attributes of the debtor or a related party.

FATCA Withholding

A 30% withholding tax (FATCA withholding) may be imposed on certain payments to a non-United States holder or to certain foreign financial institutions, investment funds and other non-U.S. persons receiving payments on the non-United States holder's behalf if the non-United States holder or such persons fail to comply with certain information reporting requirements. Such payments include U.S.-source interest and the gross proceeds from the sale or other disposition of notes that can produce U.S.-source interest. Payments of interest that a non-United States holder receives in respect of its notes could be affected by this withholding if the non-United States holder is subject to the FATCA information reporting requirements and fails to comply with them or if the non-United States holder holds notes through a non-U.S. person (e.g., a foreign bank or broker) that fails to comply with these requirements (even if payments to the non-United States holder would not otherwise have been subject to FATCA withholding). Payments of gross proceeds from a sale or other disposition of notes could also be subject to FATCA withholding unless such disposition occurs before January 1, 2017. Holders should consult their own tax advisors regarding the relevant U.S. law and other official guidance on FATCA withholding.

Treasury Regulations Requiring Disclosure of Reportable Transactions

Treasury regulations require United States taxpayers to report certain transactions that give rise to a loss in excess of certain thresholds (a Reportable Transaction). Under these regulations, if the notes are denominated in a foreign currency, a United States holder (or a non-United States holder that holds the notes in connection with a U.S. trade or business) that recognizes a loss with respect to the notes that is characterized as an ordinary loss due to changes in currency exchange rates (under any of the rules discussed above) would be required to report the loss on Internal Revenue Service Form 8886 (Reportable Transaction Statement) if the loss exceeds the thresholds set forth in the regulations. For individuals and trusts, this loss threshold is \$50,000 in any single taxable year. For other types of taxpayers and other types of losses, the thresholds are higher. Holders should consult with their tax advisor regarding any tax filing and reporting obligations that may apply in connection with acquiring, owning and disposing of notes.

Backup Withholding and Information Reporting*Payments on the Notes*

In general, the Company and other payors are required to report to the Internal Revenue Service all payments of principal, any premium and interest on notes held by noncorporate United States holders, and the accrual of original issue discount on discount notes held by such holders. In addition, the Company and other payors are required to report to the Internal Revenue Service any payment of proceeds of the sale of a note before maturing in the United States. Additionally, backup withholding will apply to any payments, including payments of original issue discount, on a note held by a noncorporate United States holder if such holder fails to provide an accurate taxpayer identification number on Internal Revenue Service Form W-9, or is notified by the Internal Revenue Service that the holder has failed to report all interest and dividends required to be shown on the holder's federal income tax returns.

In general, payments of principal, premium or interest, including original issue discount, made by the Company and other payors to a non-United States holder will not be subject to backup withholding and information reporting, provided that the certification requirements described above under Non-United States Holders are satisfied or the holder otherwise establishes an exemption. However, the Company and other payors are required to report on Internal Revenue Service Form 1042-S payments of interest to a non-United States holder of a note even if the payments are

not otherwise subject to information reporting requirements.

S-68

Table of Contents

Sale of the Notes

In general, payment of the proceeds from the sale of notes effected at a United States office of a broker is subject to both United States backup withholding and information reporting rules. If, however, the seller is a non-United States holder, backup withholding and information reporting will not apply to such a sale provided that:

- the broker does not have actual knowledge or reason to know that the seller is a United States person and the seller has furnished to the broker
- an appropriate Internal Revenue Service Form W-8 or an acceptable substitute form upon which the seller certifies, under penalties of perjury, that the seller is not a United States person,
- other documentation upon which the broker may rely to treat the payment as made to a non-United States person in accordance with U.S. treasury regulations, or
- the seller otherwise establishes an exemption.

If the seller fails to establish an exemption and the broker does not possess adequate documentation of the seller's status as a non-United States person, the payments may be subject to information reporting and backup withholding. However, backup withholding will not apply with respect to payments made outside the United States to an offshore account maintained by the seller unless the payor has actual knowledge that the seller is a United States person.

In general, payment of the proceeds from the sale of notes effected at a foreign office of a broker will not be subject to information reporting or backup withholding. However, a sale effected at a foreign office of a broker will be subject to information reporting and backup withholding if:

- the proceeds are transferred to an account maintained by the seller in the United States,
- the payment of proceeds or the confirmation of the sale is mailed to the seller at a United States address, or
- the sale has some other specified connection with the United States as provided in U.S. treasury regulations,

unless the broker does not have actual knowledge or reason to know that the seller is a United States person and the documentation requirements described above, relating to a sale of notes effected at a United States office of a broker, are met or the seller otherwise establishes an exemption.

In addition, payment of the proceeds from the sale of notes effected at a foreign office of a broker will be subject to information reporting if the broker is:

- a United States person,
- a controlled foreign corporation for United States tax purposes,
- a foreign person 50% or more of whose gross income is effectively connected with the conduct of a United States trade or business for a specified three-year period or

S-69

Table of Contents

- a foreign partnership, if at any time during its tax year:
 - one or more of the partnership's partners are U.S. persons, as defined in U.S. treasury regulations, who in the aggregate hold more than 50% of the income or capital interest in the partnership, or
 - such foreign partnership is engaged in the conduct of a United States trade or business, unless the broker does not have actual knowledge or reason to know that the seller is a United States person and the documentation requirements described above, relating to a sale of notes effected at a United States office of a broker, are met or the seller otherwise establishes an exemption. Backup withholding will apply if the sale is subject to information reporting and the broker has actual knowledge that the seller is a United States person.

A holder generally may obtain a refund of any amounts withheld under the backup withholding rules that exceed the holder's income tax liability by filing a refund claim with the Internal Revenue Service.

S-70

Table of Contents**CERTAIN ERISA CONSIDERATIONS**

The following is a summary of certain considerations associated with the purchase of the notes by (i) employee benefit plans that are subject to Title I of the U.S. Employee Retirement Income Security Act of 1974, as amended (ERISA), (ii) plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the Code) or provisions under any federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, Similar Laws), and (iii) entities whose underlying assets are considered to include plan assets of any such plan, account or arrangement (each, a Plan).

This summary is based on the fiduciary responsibility provisions of ERISA, relevant regulations issued by the United States Department of Labor, and on the pertinent provisions of the Code and regulations issued thereunder. No assurance can be given that future legislation, administrative regulations or rulings or court decisions will not significantly modify the requirements summarized herein. Any such changes may be retroactive and thereby apply to transactions entered into prior to the date of their enactment or release.

The following summary is not intended to be exhaustive. Prior to making an investment in the notes of a portion of the assets of any Plan, the fiduciaries of the Plan should consult with independent counsel regarding whether an investment in the notes is appropriate and as to the consequences under ERISA, the Code and other applicable laws of an investment in the notes.

General Fiduciary Matters

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code related to standards of conduct and the management and disposition of Plan assets and prohibit certain transactions involving the assets of a Plan and its fiduciaries or other *parties in interest* or *disqualified persons* (as those terms are defined in ERISA and the Code). Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of a Plan or the management or disposition of the assets of a Plan, or who renders investment advice for a fee or other compensation to such a Plan, is generally considered to be a fiduciary of the Plan.

In considering an investment in the notes of a portion of the assets of any Plan, a fiduciary, taking into account the facts and circumstances of the Plan, should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code or any Similar Law relating to a fiduciary's duties to the Plan including, without limitation, the prudence, diversification, delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable Similar Laws.

A fiduciary can be personally liable for losses incurred by a Plan resulting from a breach of fiduciary duties and can be subject to other adverse consequences.

Prohibited Transaction Issues

Section 406 of ERISA and Section 4975 of the Code prohibit Plans from engaging in specified transactions involving plan assets with persons or entities who are *parties in interest*, within the meaning of ERISA, or *disqualified persons*, within the meaning of Section 4975 of the Code (including, without limitation, loans or other extensions of credit between a Plan and any such person or entity), unless an exemption is available. A party in interest or disqualified person who engages in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, a fiduciary of the Plan that engages in a non-exempt prohibited

transaction may be subject to penalties and liabilities under ERISA and the Code. The acquisition and/or holding of notes by a Plan with respect to which we (or any of our affiliates) are considered a party in interest or a disqualified person may constitute or result in a direct or indirect

S-71

Table of Contents

prohibited transaction under Section 406 of ERISA and/or Section 4975 of the Code, unless the investment is acquired and is held in accordance with an applicable statutory, class or individual prohibited transaction exemption. In this regard, the U.S. Department of Labor (the *DOL*) has issued prohibited transaction class exemptions, or *PTCEs*, that may apply to the acquisition and holding of the notes. These class exemptions include, without limitation, PTCE 84-14 respecting transactions determined by independent qualified professional asset managers, PTCE 90-1 respecting insurance company pooled separate accounts, PTCE 91-38 respecting bank collective investment funds, PTCE 95-60 respecting life insurance company general accounts and PTCE 96-23 respecting transactions determined by in-house asset managers, although there can be no assurance that all of the conditions of any such exemptions will be satisfied. In addition, ERISA Section 408(b)(17) and Code Section 4975(d)(20) provide a limited exemption for the purchase and sale of securities and related lending transactions, *provided* that neither the issuer of the securities nor any of its affiliates have or exercise any discretionary authority or control or render any investment advice with respect to the assets of the Plan involved in the transaction, and *provided* further that the Plan pays no more than adequate consideration in connection with the transaction (the so-called *service provider exemption*).

Because of the foregoing, the notes should not be purchased or held by any person investing plan assets of any Plan, unless such purchase and holding will not constitute a non-exempt prohibited transaction under ERISA or the Code or a similar violation of any applicable Similar Laws.

Representation

By acceptance of a note, each purchaser and subsequent transferee of a note will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire and hold the notes constitutes assets of any Plan or (ii) the purchase, holding and, to the extent relevant, disposition of the notes by such purchaser or transferee will not constitute a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or similar violation under any applicable Similar Laws.

The foregoing discussion is general in nature and is not intended to be all inclusive. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries, or other persons considering purchasing the notes on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code and any Similar Laws to such investment and whether an exemption would be applicable to the purchase and holding of the notes. Purchasers of the notes have exclusive responsibility for ensuring that their purchase and holding of the notes do not violate the fiduciary or prohibited transaction rules of ERISA, the Code or any Similar Laws. The sale of any notes to a Plan is in no respect a representation by us or any of our affiliates or representatives that such investment meets all relevant legal requirements with respect to investments by any such Plan generally or any particular Plan, or that such investment is appropriate for such Plans generally or any particular Plan.

Table of Contents

SUPPLEMENTAL PLAN OF DISTRIBUTION

Under the terms of the Selling Agent Agreements, we will offer the notes from time to time to the applicable Purchasing Agent for subsequent resale to the applicable agents and dealers, which are broker-dealers and securities firms. Each agent is a party to a Selling Agent Agreement. Dealers that are members of the respective selling groups have executed a master selected dealer agreement with their respective Purchasing Agents. We also may appoint from time to time in the future additional agents to sell the notes. Any sale of the notes through those additional agents, however, will be on the same terms and conditions to which the original agents have agreed. The Purchasing Agents will purchase the notes at a discount ranging from 0.2% to 3.15% of the non-discounted price for each note sold. However, we also may sell the notes to the Purchasing Agents at a discount greater than or less than the range specified above. The discount at which we sell the notes to the Purchasing Agents will be set forth in the applicable pricing supplement. The Purchasing Agents also may sell notes to dealers at a concession not in excess of the discount they received from us. In certain cases, the Purchasing Agents and other agents and dealers may agree that the applicable Purchasing Agent will retain the entire discount. We will disclose any particular arrangements in the applicable pricing supplement.

Following the solicitation of orders, each of the agents, severally and not jointly, may purchase notes as principal for its own account from the applicable Purchasing Agent. Unless otherwise set forth in the applicable pricing supplement, these notes will be purchased by the agents and resold by them to one or more investors at a fixed public offering price. After the initial public offering of notes, the public offering price, in the case of notes to be resold at a fixed public offering price, discount and concession may be changed.

We have the sole right to accept offers to purchase notes and may reject any proposed offer to purchase notes in whole or in part. Each agent also has the right, in its discretion reasonably exercised, to reject any proposed offer to purchase notes in whole or in part. We reserve the right to withdraw, cancel or modify any offer without notice. We also may change the terms, including the interest rate we will pay on the notes, at any time prior to our acceptance of an offer to purchase.

Each agent, including the Purchasing Agent, may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended, which we refer to as the Securities Act. We have agreed to indemnify the agents against certain liabilities, including liabilities under the Securities Act, or to contribute to any payments they may be required to make in respect of such liabilities. We also have agreed to reimburse the agents for certain expenses.

No note will have an established trading market when issued. Unless otherwise stated in the applicable pricing supplement, we do not intend to apply for the listing of the notes on any securities exchange. However, we have been advised by the agents that they may purchase and sell notes in the secondary market as permitted by applicable laws and regulations. The agents are not obligated to make a market in the notes, and they may discontinue making a market in the notes at any time without notice. Neither we nor the agents can provide any assurance regarding the development, liquidity or maintenance of any trading market for any notes.

The agents, including the Purchasing Agents, and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the Purchasing Agents and their respective affiliates have provided, and may in the future provide, a variety of these services to us, our affiliates and to persons and entities with relationships with us, for which they received or will receive customary fees and expenses.

In addition, in the ordinary course of their business activities, the Purchasing Agents, and dealers to or through which we may sell notes may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own

S-73

Table of Contents

account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. Certain of the Purchasing Agents, and dealers to or through which we may sell notes that have a lending relationship with us routinely hedge their credit exposure to us consistent with their customary risk management policies. Typically, such Purchasing Agents, and dealers to or through which we may sell notes would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the notes offered hereby. Any such short positions could adversely affect future trading prices of the notes offered hereby. The Purchasing Agents, and dealers to or through which we may sell notes may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

The Notes may not be offered or sold outside the United States.

VALIDITY OF THE NOTES

The validity of the notes that may be issued after the date of this prospectus supplement will be passed upon for Prudential Financial, Inc. by corporate counsel for Prudential Financial, Inc. and for the agents by Cleary Gottlieb Steen & Hamilton LLP. The opinion of such corporate counsel for Prudential Financial, Inc. will be based on assumptions about future actions required to be taken by Prudential Financial, Inc. and the trustee in connection with the issuance and sale of each note, about the specific terms of each note and about other matters that may affect the validity of the notes but which cannot be ascertained on the date of that opinion. As of the date of this prospectus supplement, each such corporate counsel for Prudential Financial, Inc. owned less than 1% of the common stock of Prudential Financial, Inc. Cleary Gottlieb Steen & Hamilton LLP regularly provides legal services to us and our subsidiaries.

We or either of the trusts named above may offer the securities listed above, or any combination thereof, from time to time in amounts, at prices and on other terms to be determined at the time of the offering. We or either of the trusts named above may sell these securities to or through one or more underwriters, dealers and agents, or directly to purchasers, on a continuous or delayed basis. In addition, selling securityholders may also sell these securities, from time to time, if so identified and on terms described in the applicable prospectus supplement or pricing supplement.

This prospectus describes some of the general terms that may apply to these securities and the general manner in which they may be offered. The specific terms of any securities to be offered, and the specific manner in which they may be offered, will be described in a supplement or supplements to this prospectus and any pricing supplement.

Prudential Financial, Inc.'s common stock is listed on the New York Stock Exchange under the symbol **PRU**.

Investing in the securities involves risks, including our credit risk. See the section entitled Risk Factors beginning on page 2 and, if applicable, any risk factors described in any accompanying prospectus supplement, pricing supplement or free writing prospectus or in our periodic reports filed with the Securities and Exchange Commission that are incorporated by reference into this prospectus.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

This prospectus and applicable prospectus supplement may be used in the initial sale of the securities or in any sales by selling securityholders if so specified in the applicable prospectus supplement or pricing supplement.

Prospectus dated March 3, 2015.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we filed with the Securities and Exchange Commission, which we refer to as the SEC, utilizing a shelf registration or continuous offering process. Under this shelf registration or continuous offering process, we or the trusts may sell any combination of the securities described in this prospectus in one or more offerings.

This prospectus describes some of the general terms that may apply to the securities that we or the trusts may offer and the general manner in which the securities may be offered. Each time we or the trusts sell securities, we or the applicable trust will provide a prospectus supplement or supplements (which may include a pricing supplement) containing specific information about the terms of the securities being offered and the manner in which they may be offered. We and any underwriter or agent that we may from time to time retain may also provide you with one or more free writing prospectuses containing other information about the offering, which we refer to as a free writing prospectus. A prospectus supplement or supplements or any such free writing prospectus provided to you may include a discussion of any risk factors or other special considerations applicable to those securities or to us and may also include, if applicable, a discussion of material United States federal income tax considerations and considerations under the Employee Retirement Income Security Act of 1974, as amended, which we refer to as ERISA. A prospectus supplement or supplements or free writing prospectus may also add, update or change information in this prospectus. When we discuss a prospectus supplement in this prospectus, we mean any or all of a prospectus supplement, pricing supplement and free writing prospectus, as applicable, unless the context otherwise requires. If there is any inconsistency between the information in this prospectus and the applicable prospectus supplement, you must rely on the information in the prospectus supplement. You should read this prospectus and any prospectus supplement together with additional information described under the heading **Where You Can Find More Information**.

The registration statement containing this prospectus, including exhibits to the registration statement, provides additional information about us and the securities offered under this prospectus. The registration statement can be read at the SEC's web site or at the SEC's public reference room mentioned under the heading **Where You Can Find More Information**.

Neither we nor any underwriter or agent that we may from time to time retain take any responsibility for any other information that others may provide to you, nor can we or any underwriters or agents provide any assurance as to the accuracy thereof. Neither we nor any underwriters or agents that we may from time to time retain have authorized anyone to provide you with different information from that contained in or incorporated by reference into this prospectus and any applicable prospectus supplement.

The applicable prospectus supplement or supplements for each offering will contain the names of the underwriters, dealers or agents, if any, together with the terms of offering, the compensation of those underwriters and the net proceeds to us. Any underwriters, dealers or agents participating in the offering may be deemed underwriters within the meaning of the Securities Act of 1933, as amended, which we refer to as the Securities Act.

References in this prospectus to the Company, Prudential Financial, Inc., Prudential Financial, we, us or our Prudential Financial, Inc. only and do not include its consolidated subsidiaries.

Unless otherwise stated, currency amounts in this prospectus and any prospectus supplement are stated in United States dollars, or \$.

Table of Contents

RISK FACTORS

Investing in our securities involves risk. We urge you to carefully consider the risk factors described in Item 1A of our most recent annual report filed with the SEC and incorporated by reference in this prospectus, our other periodic reports incorporated by reference in this prospectus, and, if applicable, in any prospectus supplement used in connection with an offering of our securities before making an investment decision. Although we discuss key risks in our periodic reports filed with the SEC and in any applicable prospectus supplement used in connection with an offering of our securities, new risks may emerge in the future, which may prove to be important. Our subsequent filings with the SEC may contain amended and updated discussions of significant risks to our business and financial performance. We cannot predict future risks or estimate the extent to which they may affect our financial performance.

Table of Contents

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. Our SEC filings are available to the public over the Internet at the SEC's web site at <http://www.sec.gov>. You may also read and copy any document we file at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference room.

The SEC allows us to incorporate by reference the information we file with it, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is an important part of this prospectus, and information that we file later with the SEC will automatically update and supersede this information. Information that is furnished, rather than filed, on our Current Reports on Form 8-K is not incorporated by reference in this registration statement and prospectus. We incorporate by reference the documents listed below and filings that we will make after the date of filing the initial registration statement and prior to the effectiveness of the registration statement, and any future filings made by us with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, which we refer to as the Exchange Act :

Annual Report on Form 10-K for the year ended December 31, 2014;

Definitive proxy statement filed on March 25, 2014, pursuant to Section 14 of the Exchange Act; and

Current Reports on Form 8-K filed on January 2, 2015, January 22, 2015 and February 10, 2015.

Any person to whom this prospectus is delivered may request a copy of these filings at no cost, by writing or telephoning us at the following address:

Corporate Secretary

Prudential Financial, Inc.

751 Broad Street

Newark, New Jersey 07102

(973) 802-6000

We have not included or incorporated by reference in this prospectus any separate financial statements of the trusts. We do not believe that these financial statements would provide holders of preferred securities with any important information for the following reasons:

we will own all of the voting securities of the trusts;

the trusts do not and will not have any independent operations other than to issue securities and to purchase and hold our debt securities; and

we are fully and unconditionally guaranteeing the obligations of the trusts as described in this prospectus. We do not expect that the trusts will be required to file information with the SEC on an ongoing basis for as long as we continue to file our information with the SEC.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Business

Prudential Financial, Inc., a financial services leader with approximately \$1.176 trillion of assets under management as of December 31, 2014, has operations in the United States, Asia, Europe and Latin America. Through our subsidiaries and affiliates, we offer a wide array of financial products and services, including life insurance, annuities, retirement-related services, mutual funds and investment management. We offer these products and services to individual and institutional customers through proprietary and third party distribution networks.

We are a holding company, and our principal asset is investments in subsidiaries. As a holding company, the principal sources of funds available to meet our obligations are dividends, returns of capital, loans or advances, or other intercompany transfers of funds from our subsidiaries. Our subsidiaries are separate and distinct legal entities and have no obligation to pay any amounts due under our obligations or to make any funds available for such payment. Because we are principally a holding company, our right to participate in any distribution of assets of any of our subsidiaries, including The Prudential Insurance Company of America, upon the subsidiary's liquidation or reorganization or otherwise, is subject to the prior claims of its creditors, except to the extent we may be recognized as a creditor of that subsidiary. Accordingly, our obligations under the debt securities will be effectively subordinated to all existing and future indebtedness and liabilities of our subsidiaries, including liabilities under contracts of insurance and annuities written by our insurance subsidiaries, and you, as holders of debt securities, should look only to our assets for payment thereunder.

Prudential Financial currently has one class of common stock outstanding: our Class A Common Stock, which we refer to as our Common Stock in this prospectus and which began trading on December 13, 2001 on the New York Stock Exchange under the symbol PRU. Prior to January 2, 2015, we also had a series of Class B Stock outstanding, which reflected the performance of our Closed Block Business. Pursuant to a share repurchase agreement, on January 2, 2015, we repurchased from the Class B holders 2.0 million shares of the Class B Stock, representing all of the outstanding shares of the Class B Stock. For reporting periods commencing after December 31, 2014, our earnings per share of Common Stock will reflect the consolidated earnings of Prudential Financial, Inc., and the distinction between the Financial Services Business and the Closed Block Business will be eliminated for financial statement purposes.

We are incorporated under the laws of the State of New Jersey.

Our Executive Offices

Our registered office and principal executive offices are located at 751 Broad Street, Newark, New Jersey 07102. Our telephone number is (973) 802-6000.

PRUDENTIAL FINANCIAL CAPITAL TRUSTS

Prudential Financial Capital Trust II and Prudential Financial Capital Trust III are statutory trusts created under Delaware law. Each trust exists only for the purposes of:

issuing the preferred securities, which represent preferred undivided beneficial ownership interests in each trust's assets;

issuing the common securities, which represent common undivided beneficial ownership interests in each trust's assets, to us;

using the proceeds from the issuances to purchase one or more series of securities issued by us, including senior debt securities, subordinated debt securities and warrants;

maintaining each trust's status as a grantor trust for federal income tax purposes; and

engaging in only those other activities necessary, advisable or incidental to these purposes, such as registering the transfer of preferred securities.

Table of Contents

Any senior or subordinated, convertible or non-convertible, debt securities or any warrants that we sell to each trust will be its sole assets, and, accordingly, payments under those securities will be its sole revenues and that trust's ability to distribute shares of our Common Stock or other securities upon conversion of the preferred securities, if convertible, will depend solely on our performance under the warrants sold by us to that trust.

We will acquire and own all of the common securities of each trust. The common securities will rank equally with, and payments will be made on the common securities *pro rata* with, the preferred securities, except that upon an event of default under the amended and restated declaration of trust resulting from an event of default under the senior or subordinated debt securities, our rights as holder of the common securities to distributions and payments upon liquidation or redemption will be subordinated to the rights of the holders of the preferred securities. We will guarantee distributions on the preferred and common securities to the extent of available trust funds. See Effect of Obligations Under the Debt Securities and the Trust Guarantees .

Each trust will dissolve on a date certain, but may dissolve earlier, in either case, as provided in its respective amended and restated declaration of trust. Each trust's business and affairs are conducted by the trustees. The trustees for the trusts are The Bank of New York Mellon, a New York banking corporation, as successor to JPMorgan Chase Bank, N.A., as property trustee, BNY Mellon Trust of Delaware, a Delaware corporation, as successor to Chase Bank USA, N.A., as the Delaware trustee, and three regular trustees or administrative trustees who are officers of us. The Bank of New York Mellon, as property trustee, acts as sole indenture trustee under each declaration of trust, and also acts as guarantee trustee under the guarantees and as indenture trustee under the senior and subordinated debt indentures. The duties and obligations of each trustee are governed by the amended and restated declaration of trust for each trust.

As issuer of the debt securities to be purchased by each trust and as sponsor of each trust, we will pay all fees, expenses, debts and obligations (other than the payment of distributions and other payments on the preferred securities) related to each trust and any offering of each trust's preferred securities and will pay, directly or indirectly, all ongoing costs, expenses and liabilities of each trust. The registered offices of the trusts in Delaware are c/o BNY Mellon Trust of Delaware, 301 Bellevue Parkway, 3rd Floor, Wilmington, Delaware 19809, and their telephone number is (302) 791-3610.

The accounting treatment of the trusts will be specified in the applicable prospectus supplement.

Table of Contents

USE OF PROCEEDS

We intend to use the net proceeds from the sale of the securities referenced in this prospectus for (a) general corporate purposes, which may include, among other things, working capital, contributions of capital or loans to our insurance underwriting and other subsidiaries, capital expenditures, the repurchase of shares of Common Stock, the repayment of short-term borrowings or other debt, or acquisitions, or (b) any other purpose disclosed in the applicable prospectus supplement or supplements. Unless otherwise indicated in an accompanying prospectus supplement or supplements, the trusts will use all proceeds received from the sale of their preferred securities to purchase our senior or subordinated debt securities.

Table of Contents

DESCRIPTION OF DEBT SECURITIES WE MAY OFFER

The following briefly summarizes some provisions of our senior debt indenture and our subordinated debt indenture that would be important to holders of debt securities. The following description may not be complete, may be supplemented in prospectus supplements, and is subject to, and qualified in its entirety by reference to, the terms and provisions of our senior debt indenture and our subordinated debt indenture that are exhibits to the registration statement that contains this prospectus.

Overview

We may issue senior or subordinated debt securities. Neither the senior debt securities nor the subordinated debt securities will be secured by any of our property or assets. Thus, by owning a debt security, you will be one of our unsecured creditors.

The senior debt securities will constitute part of our senior debt, will be issued under a senior debt indenture described below and will rank equally with all of our other unsecured and unsubordinated obligations.

The subordinated debt securities will constitute part of our subordinated debt, will be issued under a subordinated debt indenture described below and will be subordinate in right of payment to all of our senior indebtedness, as defined in the subordinated debt indenture. Neither indenture limits our ability to incur additional senior indebtedness.

In this prospectus, debt securities refers to both the senior debt securities and the subordinated debt securities.

We are a Holding Company

Because we are a holding company, our right to participate in any distribution of assets of any of our subsidiaries, including The Prudential Insurance Company of America, upon the subsidiary's liquidation or reorganization or otherwise, is subject to the prior claims of its creditors, except to the extent we may be recognized as a creditor of that subsidiary. Accordingly, our obligations under the debt securities will be effectively subordinated to all existing and future indebtedness and liabilities of our subsidiaries, including liabilities under contracts of insurance and annuities written by our insurance subsidiaries, and you, as holders of debt securities, should look only to our assets for payment thereunder.

Indentures and Trustees

Our senior debt securities and our subordinated debt securities each are governed by a document called an indenture—the senior debt indenture, in the case of the senior debt securities, and the subordinated debt indenture, in the case of the subordinated debt securities. The senior debt indenture is a contract between us and The Bank of New York Mellon, as successor to JPMorgan Chase Bank, N.A., which acts as trustee. The subordinated debt indenture is a contract between us and The Bank of New York Mellon (formerly known as The Bank of New York), which acts as trustee. The indentures are substantially identical, except for the covenant described below under Restrictive Covenants—Limitation on Liens and Other Encumbrances on Voting Stock of Designated Subsidiary, which is included only in the senior debt indenture, and the event of default described below relating to sinking fund obligations and the provisions relating to subordination, which are included only in the subordinated debt indenture.

Reference to the indenture or the trustee with respect to any debt securities means the indenture under which those debt securities are issued and the trustee under that indenture.

Table of Contents

The trustee has two main roles:

First, the trustee can enforce your rights against us if we default on our obligations under the terms of the applicable indenture or the debt securities. There are some limitations on the extent to which the trustee acts on your behalf, described later under [Default and Related Matters](#) [Events of Default](#) [Remedies if an Event of Default Occurs](#) ; and

Second, the trustee performs administrative duties for us, such as sending you interest payments, transferring your debt securities to a new holder if you sell them and sending you notices.

The indentures and their associated documents contain the full legal text of the matters described in this section. A copy of the senior debt indenture, the second and third supplemental indentures to the senior debt indenture and the subordinated debt indenture appear as exhibits to our registration statement. See [Where You Can Find More Information](#) for information on how to obtain a copy.

Different Series of Debt Securities

We may issue as many distinct series of debt securities under either indenture as we wish. The provisions of each indenture allow us not only to issue debt securities with terms different from those of debt securities previously issued under that indenture, but also to reopen a previously issued series of debt securities and issue additional debt securities of that series. This section summarizes the material terms of the debt securities that are common to all series, although the prospectus supplement which describes the terms of each series of debt securities will also describe any differences with the material terms summarized here.

Because this section is a summary, it does not describe every aspect of the debt securities. This summary is subject to and qualified in its entirety by reference to all the provisions of the indentures, including definitions of some of the terms used in the indentures. We discuss only the more important terms in this prospectus. Whenever we refer to the defined terms of the indentures in this prospectus or in a prospectus supplement, those defined terms are incorporated by reference here or in the prospectus supplement. You must look to the indentures for the most complete description of what we describe in summary form in this prospectus.

This summary also is subject to and qualified by reference to the description of the particular terms of your series described in the prospectus supplement. Those terms may vary from the terms described in this prospectus. The prospectus supplement relating to each series of debt securities will be attached to the front of this prospectus. There may also be a further prospectus supplement, known as a pricing supplement, or a free writing prospectus, which contains the precise terms of debt securities you are offered.

We expect to issue the debt securities only in fully registered global form. For information regarding the form of the debt securities we may issue and how your rights may be affected as an indirect holder, see the subsection entitled [Legal Ownership and Global Security Issuance](#) . **In the remainder of this description, you means direct holders and not street name or other indirect holders of debt securities.**

Tax Treatment of Original Issue Discount and Other Debt Securities

The prospectus supplement relating to specific debt securities will describe the U.S. federal income tax considerations applicable to such specific debt securities. We may issue debt securities as original issue discount securities, which are

securities that are offered and sold at a substantial discount to their stated principal amount and which may provide that, upon redemption or acceleration of maturity, an amount less than their principal amounts will be payable. An original issue discount debt security may be a zero-coupon debt security. A debt security issued at a discount to its principal may, for U.S. federal income tax purposes, be considered an original issue discount debt security, regardless of the amount payable upon redemption or acceleration of maturity. The prospectus supplement relating to original issue discount securities will describe U.S. federal income tax consequences and other special considerations applicable to them. We also may issue debt securities as indexed

Table of Contents

securities or securities denominated in foreign currencies, currency units or composite currencies, which may trigger special U.S. federal income tax, accounting and other consequences, all as described in more detail in the prospectus supplement relating to any of the particular debt securities.

A Prospectus Supplement Will Describe the Specific Terms of a Series of Debt Securities

The specific financial, legal and other terms particular to a series of debt securities will be described in the prospectus supplement or supplements relating to the series. The prospectus supplement relating to a series of debt securities will describe the following terms of the series:

the title of the series of debt securities;

whether it is a series of senior debt securities or a series of subordinated debt securities;

if the series of debt securities are subordinated debt securities, whether the subordination provisions summarized below or different subordination provisions will apply;

the aggregate principal amount of the series of debt securities and any limit thereon;

the date or dates on which the series of debt securities will mature;

the price at which we originally issue your debt security, expressed as a percentage of the principal amount, and the original issue date;

the rate or rates, which may be fixed, variable or indexed, per annum at which the series of debt securities will bear interest, if any, the date or dates from which that interest, if any, will accrue, and any applicable day count fraction and other provisions for calculating interest;

the place or places where the principal of (and premium, if any) and interest on the debt securities is payable;

the dates on which interest, if any, on the series of debt securities will be payable, the regular record dates for the interest payment dates if different from those specified in this prospectus, the person to whom interest on a debt security is payable, if that person is not a holder on the regular record date, and the business day convention and business days applicable to the debt securities;

if the series of debt securities are subordinated debt securities, the right, if any, to defer payment of interest or extend the interest payment periods and the duration of any such deferral or extension period, including

the maximum consecutive period during which interest payment periods may be extended;

any mandatory or optional sinking funds or analogous provisions or provisions for redemption at our option or the option of the holder;

the date, if any, on or after which and the price or prices at which the series of debt securities may, in accordance with any optional or mandatory redemption provisions, be redeemed and the other detailed terms and provisions of those optional or mandatory redemption provisions, if any;

if the debt securities may be converted into or exercised or exchanged for our Common Stock or preferred stock or any other of our securities, or of securities of any third party, the terms on which conversion, exercise or exchange may occur, including whether conversion, exercise or exchange is mandatory, at the option of the holder or at our option, the date on or the period during which conversion, exercise or exchange may occur, the initial conversion, exercise or exchange price or rate and the circumstances or manner in which the amount of Common Stock or preferred stock or such other securities issuable upon conversion, exercise or exchange may be adjusted;

whether the debt securities are subject to mandatory or optional remarketing or other mandatory or optional resale provisions, and, if applicable, the date or period during which a resale may occur, any conditions to the resale and any right of a holder to substitute securities for the securities subject to resale;

Table of Contents

the denominations in which the series of debt securities will be issuable, including if other than in denominations of \$1,000 and any integral multiple thereof;

if other than the principal amount thereof, the portion of the principal amount of the series of debt securities which will be payable upon the declaration of acceleration of the maturity of that series of debt securities;

the currency or currencies, including currency units or composite currencies, of payment of principal, premium, if any, and interest on the series of debt securities and any special considerations relating to that currency or those currencies;

if the currency or currencies, including currency units or composite currencies, of payment for principal, premium, if any, and interest on the series of debt securities is subject to our or a holder's election, the currency or currencies in which payment can be made and the period within which, and the terms and conditions upon which, the election can be made;

any index, formula or other method used to determine the amount of payment of principal or premium, if any, and interest, if any, on the series of debt securities;

the applicability of the provisions described below under Restrictive Covenants and Defeasance ;

any event of default under the series of debt securities if different from those described below under Default and Related Matters Events of Default What Is an Event of Default? ;

if the series of debt securities will be issuable only in the form of a global security, as described below under Legal Ownership Global Securities , the depositary or its nominee with respect to the series of debt securities and the circumstances under which the global security may be registered for transfer or exchange in the name of a person other than the depositary or its nominee;

a discussion of certain U.S. federal income tax considerations applicable to specific debt securities, if different from those discussed in this prospectus;

any proposed listing of the series of debt securities on any securities exchange; and

any other special feature of the series of debt securities.

Those terms may vary from the terms described here. Accordingly, this summary also is subject to and qualified by reference to the description of the terms of the series described in the applicable prospectus supplement.

Modification and Waiver of Indenture Provisions

There are four types of changes we can make to either indenture and the applicable series of debt securities issued under that indenture.

Changes Requiring Your Approval. First, there are changes that cannot be made to your debt securities without your specific approval. Following is a list of those types of changes:

change to the payment due date of the principal or interest on a debt security;

reduction of any amounts due on a debt security;

reduction of the amount of principal payable upon acceleration of the maturity of a debt security, including the amount payable on an original issue discount security, following a default;

change to the place or currency of payment on a debt security;

impairment of your right to sue for payment of any amount due on your debt security;

impairment of any right that you may have to exchange or convert the debt security for or into other securities or property;

Table of Contents

reduction of the percentage of direct holders of debt securities whose consent is needed to modify or amend the applicable indenture;

reduction of the percentage of direct holders of debt securities whose consent is needed to waive our compliance with certain provisions of the applicable indenture or to waive certain defaults; and

modification of any other aspect of the provisions dealing with modification and waiver of the applicable indenture.

Changes Requiring a Majority Vote. The second type of change to a particular indenture and the debt securities is the kind that requires a vote in favor by direct holders of debt securities owning a majority of the principal amount of each series affected thereby. Most changes, including waivers, as described below, fall into this category, except for changes noted above as requiring the approval of the holders of each security affected thereby, and, as noted below, changes not requiring approval.

Each indenture provides that a supplemental indenture which changes or eliminates any covenant or other provision of the applicable indenture which has expressly been included solely for the benefit of one or more particular series of securities, or which modifies the rights of the holders of securities of such series with respect to such covenant or other provision, shall be deemed not to affect the rights under the applicable indenture of the holders of securities of any other series.

Changes Not Requiring Approval. The third type of change does not require any vote by holders of debt securities. This type is limited to clarifications and certain other changes referenced in our indentures that would not adversely affect holders of the debt securities.

Changes by Waiver Requiring a Majority Vote. Fourth, we need the approval of direct holders of senior debt securities owning a majority of the principal amount of the particular series affected to obtain a waiver of certain of the restrictive covenants, including the one described below under **Restrictive Covenants** **Limitation on Liens and Other Encumbrances on Voting Stock of Designated Subsidiaries** . We also need such majority approval to obtain a waiver of any past default, except a payment default listed in the first category described later under **Default and Related Matters** **Events of Default** .

Modification of Subordination Provisions. In addition, we may not modify the subordination provisions of the subordinated debt indenture in a manner that would adversely affect the outstanding subordinated debt securities of any one or more series in any material respect without the consent of the direct holders of a majority in aggregate principal amount of each affected series.

Further Details Concerning Voting. When taking a vote, we will use the following rules to decide how much principal amount to attribute to a debt security:

for original issue discount securities, we will use the principal amount that would be due and payable on the voting date if the maturity of the debt securities were accelerated to that date because of a default;

for debt securities whose principal amount is not known, for example, because it is based on an index, we will use a special rule for that debt security described in the applicable prospectus supplement; or

for debt securities denominated in one or more foreign currencies, currency units or composite currencies, we will use the U.S. dollar equivalent.

Debt securities will not be considered outstanding, and therefore will not be eligible to vote, if we have deposited or set aside in trust for you money for their payment or redemption. Debt securities will also not be eligible to vote if they have been fully defeased as described below under Defeasance Full Defeasance .

We will generally be entitled to set any day as a record date for the purpose of determining the direct holders of outstanding debt securities that are entitled to vote or take other action under the applicable indenture. In some circumstances, the trustee will be entitled to set a record date for action by direct holders. If we or the

Table of Contents

trustee set a record date for a vote or other action to be taken by holders of a particular series, that vote or action may be taken only by persons who are direct holders of outstanding securities of that series on the record date and must be taken on or before the expiration date designated by us or the trustee, as applicable. If no such expiration date is so designated, the expiration date will be the 180th day following the record date.

If you are a street name holder or other indirect holder, you should consult your bank or broker for information on how you may grant or deny approval if we seek to change an indenture or the debt securities or request a waiver.

Subordination Provisions

Direct holders of subordinated debt securities must recognize that contractual provisions in the subordinated debt indenture may prohibit us from making payments on those securities. Subordinated debt securities are subordinate and junior in right of payment, to the extent and in the manner stated in the subordinated debt indenture, to all of our senior indebtedness, as defined in the subordinated debt indenture, including all debt securities we have issued and will issue under the senior debt indenture.

Senior Indebtedness

Under the subordinated debt indenture, senior indebtedness includes all of our obligations to pay principal, premium, if any, interest, penalties, fees and other charges:

for borrowed money;

in the form of or evidenced by other instruments, including obligations incurred in connection with our purchase of property, assets or businesses;

under capital leases;

under letters of credit, bankers' acceptances or similar facilities;

issued or assumed in the form of a deferred purchase price of property or services, such as master leases;

under swaps and other hedging arrangements; and

pursuant to our guarantee of another entity's obligations and all dividend obligations guaranteed by us. The following types of our indebtedness will not rank senior to the subordinated debt securities:

indebtedness incurred in the form of trade accounts payable or accrued liabilities arising in the ordinary course of business;

indebtedness which, by its terms, expressly provides that it does not rank senior to the subordinated debt securities;

indebtedness we owe to a subsidiary of ours; and

indebtedness we owe to any trust, including Prudential Financial Capital Trust II and Prudential Financial Capital Trust III, or a trustee of such trust, partnership or other entity affiliated with us, that is our financing vehicle, and which has issued equity securities or other securities that are similar to the preferred securities, unless the terms of that indebtedness expressly provide otherwise.

Payment Restrictions on our Subordinated Debt

The subordinated debt indenture provides that, unless all principal of and any premium or interest on the senior indebtedness has been paid in full, no payment or other distribution may be made in respect of any subordinated debt securities in the following circumstances:

in the event of any insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets; or

Table of Contents

(a) in the event and during the continuation of any default in the payment of principal, premium, if any, or interest on any senior indebtedness beyond any applicable grace period, or (b) in the event that any event of default, or event which, with notice or lapse of time or both, would become an event of default with respect to any senior indebtedness has occurred and is continuing, permitting the direct holders of that senior indebtedness (or a trustee) to accelerate the maturity of that senior indebtedness, whether or not the maturity is in fact accelerated (unless, in the case of either (a) or (b), the payment default or event of default has been cured or waived or ceased to exist and any related acceleration has been rescinded or, in the case of (b) only, a specified period of time has elapsed).

If the trustee under the subordinated debt indenture or any direct holders of the subordinated debt securities receive any payment or distribution that is prohibited under the subordination provisions, then the trustee or the direct holders will have to repay that money to the direct holders of the senior indebtedness.

Even if the subordination provisions prevent us from making any payment when due on the subordinated debt securities of any series, we will be in default on our obligations under that series if we do not make the payment when due. This means that the trustee under the subordinated debt indenture and the direct holders of that series can take action against us, but they will not receive any money until the claims of the direct holders of senior indebtedness have been fully satisfied.

Restrictive Covenants

General

We have made certain promises in each indenture called covenants where, among other things, we promise to maintain our corporate existence and all licenses and material permits necessary for our business.

Mergers and Similar Events

We are generally permitted to consolidate or merge with another company or firm. We are also permitted to sell or lease substantially all of our assets to another company or firm, or to buy or lease substantially all of the assets of another company or firm. However, we may not take any of these actions unless the following conditions, among others, are met:

If we merge out of existence or sell or lease substantially all our assets, the other company or firm may not be organized under a foreign country's laws; that is, it must be a corporation, partnership or trust organized under the laws of a State of the United States or the District of Columbia or under federal law, and it must agree to be legally responsible for the debt securities.

The merger, sale of assets or other transaction must not cause a default on the debt securities, and we must not already be in default, unless the merger or other transaction would cure the default. For purposes of this no-default test, a default would include an event of default that has occurred and not been cured. A default for this purpose would also include any event that would be an event of default if the requirements for giving us notice of our default or our default having to exist for a specific period of time were disregarded.

It is possible that the merger, sale of assets or other transaction would cause some of our property to become subject to a mortgage or other legal mechanism giving lenders preferential rights in that property over other lenders, including the direct holders of the senior debt securities, or over our general creditors if we fail to pay them back. We have promised in our senior debt indenture to limit these preferential rights on voting stock of any designated subsidiary, called liens, as discussed under **Limitation on Liens and Other Encumbrances on Voting Stock of Designated Subsidiary** . If a merger or other transaction would create any liens on the voting stock of our designated subsidiary, we must comply with that restrictive covenant. We would do this either by deciding that the liens were permitted, or by following the requirements of the restrictive covenant to grant an equivalent or higher-ranking lien on the same voting stock to the direct holders of the senior debt securities.

Table of Contents

In addition, in the senior debt indenture, but not in the subordinated debt indenture, we have made the promise described in the next paragraph.

Limitation on Liens and Other Encumbrances on Voting Stock of Designated Subsidiary

Some of our property may be subject to a mortgage or other legal mechanism that gives our lenders preferential rights in that property over other lenders, including the direct holders of the senior debt securities, or over our general creditors if we fail to pay them back. These preferential rights are called liens. In the senior debt indenture, we promise not to create, issue, assume, incur or guarantee any indebtedness for borrowed money that is secured by an encumbrance such as a mortgage, pledge, lien, security interest or other encumbrance on the common stock of our designated subsidiary, of any successor to substantially all of the business of the designated subsidiary which is also a subsidiary of Prudential Financial, or of any corporation, other than Prudential Financial, directly or indirectly controlling the designated subsidiary. We do not need to comply with this restriction if we also secure all the senior debt securities that are deemed outstanding under the senior debt indenture equally with, or prior to, the indebtedness being secured, together with, if we so choose, any of our designated subsidiary's other indebtedness. This promise does not restrict our ability to sell or otherwise dispose of our interests in our designated subsidiary.

Our designated subsidiary means The Prudential Insurance Company of America.

Defeasance

The following discussion of full defeasance and covenant defeasance will apply to your series of debt securities only if we choose to have them apply to that series. If we do so choose, we will state that in the applicable prospectus supplement.

Full Defeasance

If there is a change in U.S. federal income tax law, as described below, we can legally release ourselves from any payment or other obligations on the debt securities, called full defeasance, if we put in place the following arrangements for you to be repaid:

we must deposit in trust for your benefit and the benefit of all other direct holders of the debt securities a combination of money and U.S. government or U.S. government agency notes or bonds that will generate enough cash to make interest, principal and any other payments on the debt securities on their various due dates;

there must be a change in current U.S. federal income tax law or a U.S. Internal Revenue Service ruling that lets us make the above deposit without causing you to be taxed on the debt securities any differently than if we did not make the deposit and just repaid the debt securities ourselves. (Under current federal tax law, the deposit and our legal release from the debt securities would be treated as though we took back your debt securities and gave you your share of the cash and notes or bonds deposited in trust. In that event, you could recognize gain or loss on the debt securities you give back to us.);

we must deliver to the trustee a legal opinion of our counsel confirming the tax law change described above;
and

in the case of the subordinated debt securities, the following requirements must also be met:

no event or condition may exist that, under the provisions described above under Subordination Provisions Payment Restrictions on our Subordinated Debt , would prevent us from making payments of principal, premium or interest on those subordinated debt securities on the date of the deposit referred to above or during the 90 days after that date; and

Table of Contents

we must deliver to the trustee an opinion of counsel to the effect that (a) the trust funds will not be subject to any rights of direct holders of senior indebtedness and (b) after the 90-day period referred to above, the trust funds will not be subject to any applicable bankruptcy, insolvency, reorganization or similar laws affecting creditors' rights generally, except that if a court were to rule under any of those laws in any case or proceeding that the trust funds remained our property, then the relevant trustee and the direct holders of the subordinated debt securities would be entitled to some enumerated rights as secured creditors in the trust funds.

If we ever did accomplish full defeasance, as described above, you would have to rely solely on the trust deposit for repayment on the debt securities. In addition, in the case of subordinated debt securities, the provisions described above under Subordination Provisions would not apply. You could not look to us for repayment in the event of any shortfall. Conversely, the trust deposit would most likely be protected from claims of our lenders and other creditors if we ever become bankrupt or insolvent.

Covenant Defeasance

Under current U.S. federal income tax law, we can make the same type of deposit described above and be released from some of the restrictive covenants in the debt securities without causing tax consequences to you. This type of release is called covenant defeasance. If we ever accomplished covenant defeasance, you would lose the protection of those restrictive covenants but would gain the protection of having money and securities set aside in trust to repay the debt securities. In order to achieve covenant defeasance, we must do the following:

we must deposit in trust for your benefit and the benefit of all other direct holders of the debt securities a combination of money and U.S. government or U.S. government agency notes or bonds that will generate enough cash to make interest, principal and any other payments on the debt securities on their various due dates; and

we must deliver to the trustee a legal opinion of our counsel confirming that under current federal income tax law we may make the above deposit without causing you to be taxed on the debt securities any differently than if we did not make the deposit and just repaid the debt securities ourselves.

in the case of the subordinated debt securities, the following requirements must also be met:

no event or condition may exist that, under the provisions described above under Subordination Provisions Payment Restrictions on our Subordinated Debt, would prevent us from making payments of principal, premium or interest on those subordinated debt securities on the date of the deposit referred to above or during the 90 days after that date; and

we must deliver to the trustee an opinion of counsel to the effect that (a) the trust funds will not be subject to any rights of direct holders of senior indebtedness and (b) after the 90-day period referred to above, the trust funds will not be subject to any applicable bankruptcy, insolvency, reorganization or similar laws affecting creditors' rights generally, except that if a court were to rule under any of those laws in any case or proceeding that the trust funds remained our property, then the relevant trustee and the direct holders of the subordinated debt securities would be entitled to some enumerated rights as

secured creditors in the trust funds.

If we accomplish covenant defeasance, the following provisions, among others, of the indentures and the debt securities would no longer apply:

our promises regarding conduct of our business previously described above under Restrictive Covenants Limitation on Liens and Other Encumbrances on Voting Stock of Designated Subsidiary , and any other covenants applicable to the series of debt securities and described in the prospectus supplement;

Table of Contents

the condition regarding the treatment of liens when we merge or engage in similar transactions, as described above under **Restrictive Covenants Mergers and Similar Events** ; and

the events of default relating to breach of covenants, described below under **Default and Related Matters Events of Default What Is an Event of Default?** .

In addition, in the case of subordinated debt securities, the provisions described above under **Subordination Provisions** will not apply if we accomplish covenant defeasance.

If we accomplish covenant defeasance, you could still look to us for repayment of the debt securities if there were a shortfall in the trust deposit. In fact, if one of the remaining events of default occurs, such as our bankruptcy, and the debt securities become immediately due and payable, there may be a shortfall in the trust deposit. Depending on the event causing the default, you may not be able to obtain payment of the shortfall.

Default and Related Matters

The debt securities are not secured by any of our property or assets. Accordingly, your ownership of debt securities means that you are one of our unsecured creditors. The senior debt securities are not subordinated to any of our debt obligations and therefore they rank equally with all of our other unsecured and unsubordinated indebtedness. The subordinated debt securities are subordinate and junior in right of payment to all of our senior indebtedness, as defined in the subordinated debt indenture and as described above under **Subordination Provisions** .

Events of Default

You will have special rights if an event of default occurs and is not cured or waived, as described later in this subsection.

What Is an Event of Default? The term **event of default** means any of the following:

we do not pay the principal or any premium on a debt security on its due date;

we do not pay interest on a debt security within 30 days of its due date;

with respect only to subordinated debt securities, we do not deposit money into a separate custodial account, known as a sinking fund, when such deposit is due if we agree to maintain any such sinking fund;

we remain in breach of the restrictive covenant described previously under **Restrictive Covenants Limitation on Liens and Other Encumbrances on Voting Stock of Designated Subsidiary** or default in the observance or performance of any other covenant, warranty or agreement contained in the applicable indenture that continues for a period of 90 days after we have received written notice specifying the default and demanding that such default be remedied from the trustee or the holders of at least 25% in principal amount of the outstanding securities of the affected series, except in the case of a default with respect to the **Consolidation, Merger and Sale of Assets** covenant, which will constitute an event of default with such notice requirement

but without such passage of time requirement; provided that our failure to comply with the requirements of Section 314(a) of the Trust Indenture Act of 1939, as amended (the Trust Indenture Act), or our filing obligation, as defined below, or to file a report with the SEC as contemplated in the indenture or otherwise will not constitute an event, which with the giving of notice and the passage of time pursuant to this bullet, would constitute an event of default;

we file for bankruptcy or certain other events of bankruptcy, insolvency or reorganization occur; or

any other event of default described in the prospectus supplement occurs.

Table of Contents

Remedies If an Event of Default Occurs. If you are the holder of a subordinated debt security, all remedies available to you upon the occurrence of an event of default under the subordinated debt indenture will be subject to the restrictions on the subordinated debt securities described above under **Subordination Provisions** . If an event of default has occurred and has not been cured or waived, the trustee or the direct holders of 25% in principal amount of the debt securities of the affected series may declare the entire principal amount, or, in the case of original issue discount securities, the portion of the principal amount that is specified in the terms of the affected debt security, of all the debt securities of that series to be due and immediately payable. This is called a declaration of acceleration of maturity. However, a declaration of acceleration of maturity may be canceled by the direct holders of at least a majority in principal amount of the debt securities of the affected series.

You should refer to the prospectus supplement relating to any series of debt securities that are original issue discount securities for the particular provisions relating to acceleration of the maturity of a portion of the principal amount of original issue discount securities upon the occurrence of an event of default and its continuation.

Except in cases of default, where the trustee has some special duties, the trustee is not required to take any action under the indentures at the request of any holders unless the direct holders offer the trustee reasonable protection from expenses and liability, called an indemnity. If reasonable indemnity is provided, the direct holders of a majority in principal amount of the outstanding debt securities of the relevant series may direct the time, method and place of conducting any lawsuit or other formal legal action seeking any remedy available to the trustee. These majority direct holders may also direct the trustee in performing any other action under the applicable indenture with respect to the debt securities of that series.

Before you bypass the trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to the debt securities, the following must occur:

you must give the trustee written notice that an event of default has occurred and remains uncured;

the direct holders of 25% in principal amount of all outstanding debt securities of the relevant series must make a written request that the trustee take action because of the default, and must offer reasonable indemnity to the trustee against the cost and other liabilities of taking that action;

the trustee must have not received from direct holders of a majority in principal amount of the outstanding debt securities of that series a direction inconsistent with the written notice; and

the trustee must have not taken action for 60 days after receipt of the above notice and offer of indemnity. You are, however, entitled at any time to bring a lawsuit for the payment of money due on your debt security on or after its due date.

If you are a street name holder or other indirect holder, you should consult your bank or your broker for information on how to give notice or direction to or make a request of the trustee and to make or cancel a declaration of acceleration.

We will furnish to the trustee every year a written statement of certain of our officers certifying that to their knowledge we are in compliance with the applicable indenture and the debt securities issued under it, or else specifying any default.

Reports

The indentures provide that any documents or reports that we may be required to file with the SEC pursuant to Section 13 or 15(d) of the Exchange Act will be filed with the trustee within 15 days after we have filed those documents or reports with the SEC (the filing obligation). Under the Trust Indenture Act, we may have a separate obligation to file with the trustee documents or reports that we are required to file with the SEC. Our

Table of Contents

failure to comply with either the filing obligation or any such filing obligation we may have under the Trust Indenture Act is not an event that will result in an event of default under the indentures. Accordingly, acceleration of our obligations under the debt securities will not be a remedy for our failure to file those documents or reports with the trustee, and you may have no remedy for the failure other than an action for damages.

Conversion or Exchange for Common Stock

The terms on which debt securities of any series are convertible into or exchangeable for our Common Stock or other securities or property of ours or of third parties will be set forth in the applicable prospectus supplement. These terms will include:

the conversion or exchange price, or manner for calculating such a price;

the exchange or conversion period; and

whether the conversion or exchange is mandatory, at the option of the holder, or at our option.

The terms may also include calculations pursuant to which the number of shares of our or a third party's common stock or other securities or property to be received by the holders of debt securities would be determined according to the market price of our Common Stock or other securities or property of ours or of third parties as of a time stated in the prospectus supplement. The conversion or exchange price of any debt securities of any series that is convertible into our Common Stock may be adjusted for any stock dividends, stock splits, reclassification, combinations or similar transactions, in each case as we may describe in the applicable prospectus supplement.

Redemption

Unless we state otherwise in an applicable prospectus supplement, debt securities will not be subject to any sinking fund.

If we issue redeemable debt securities, the dates and terms on which those securities are mandatorily or optionally redeemable will be set forth in the applicable prospectus supplement. We may, as applicable, redeem any series of those debt securities after its issuance date in whole or in part at any time and from time to time. We may redeem debt securities in denominations larger than \$1,000 but only in integral multiples of \$1,000.

If a series of debt securities is redeemable, the redemption price for any debt security that we redeem will equal 100% of the principal amount plus any accrued and unpaid interest up to, but excluding, the redemption date, unless otherwise specified in the applicable prospectus supplement.

Governing Law

The indentures are, and the debt securities will be, governed by and construed in accordance with the laws of the State of New York.

Our Relationship With the Trustee

The trustee under our senior indenture is The Bank of New York Mellon, as successor to JPMorgan Chase Bank, N.A. The trustee under our subordinated indenture is The Bank of New York Mellon (formerly known as The Bank of New York). We and our subsidiaries maintain banking and other service relationships with The Bank of New York Mellon.

If an actual or potential event of default occurs with respect to any of our debt securities, the trustee may be considered to have a conflicting interest for purposes of the Trust Indenture Act. In that case, unless the default is

Table of Contents

cured or waived within 90 days, the trustee may be required to resign under one or more of the indentures, and we would be required to appoint a successor trustee. For this purpose, a potential event of default means an event that would be an event of default if the requirements for giving us default notice or for the default having to exist for a specific period of time were disregarded.

In addition, affiliates of the trustee have underwritten our securities from time to time in the past and may underwrite our securities from time to time in the future. The trustee may be required to resign if an actual or potential event of default occurs with respect to the debt securities within one year after any offering of our securities underwritten by an affiliate of the trustee, such as BNY Mellon Capital Markets, LLC, since the trustee would likely be considered to have a conflicting interest for purposes of the Trust Indenture Act. In that event, except in very limited circumstances, the trustee would be required to resign as trustee under one or more of the indentures and we would be required to appoint a successor trustee, unless the default is cured or waived within 90 days. In addition, the trustee can resign for any reason by giving written notice, and we would be required to appoint a successor trustee. If the trustee resigns following a default or for any other reason, it may be difficult to identify and appoint a qualified successor trustee. The trustee will remain the trustee under the indenture until a successor is appointed. During the period of time until a successor is appointed, the trustee will have both (a) duties to noteholders under the indenture and (b) a conflicting interest under the indenture for purposes of the Trust Indenture Act.

Foreign Currency

If a debt security is denominated in other than U.S. dollars and the specified currency is not available due to the imposition of exchange controls or other circumstances beyond our control, is no longer used by the government of the relevant country (unless otherwise replaced by the euro), or is no longer used for the settlement of transactions by public institutions of the international banking community, then we will be entitled to satisfy our obligations to holders by making payments in U.S. dollars on the basis of the most recently available exchange rate. The exchange rate means the noon buying rate in The City of New York for cable transfers for the specified currency. Any payment made under the circumstances and in a manner described above will not constitute an event of default under the applicable indenture.

If the applicable specified currency is redenominated or converted into or replaced by another currency pursuant to law having general and direct applicability in the jurisdiction which issued that specified currency (which may include European Community law), any payments in respect of a debt security otherwise required to be made in the specified currency shall be made in the currency into or by which the specified currency has been so redenominated, converted or replaced, based on the conversion or equivalency rate prescribed by law having general and direct applicability in such jurisdiction (which may include European Community law), and the specified currency shall not be deemed to be unavailable to the Company solely by reason of any such redenomination, conversion or replacement.

If any currency is introduced in the jurisdiction issuing the specified currency on the basis of legally enforceable equivalency to the specified currency pursuant to law having general and direct applicability in such jurisdiction (which may include European Community law) in preparation for conversion of the specified currency into, or replacement of the specified currency by, such other currency, we shall be entitled, at our option, to make any payments in respect of the relevant debt security otherwise required to be made in the specified currency in such other currency based on the equivalency rate prescribed by law having general and direct applicability in such jurisdiction (which may include European Community law). Any payment so made shall not, by itself, constitute a default in our obligations to make payments on the debt security. No occurrence of a currency conversion, replacement or introduction of a type described in this paragraph or the preceding paragraph involving the specified currency shall, by itself, entitle us to avoid its obligations under the relevant debt security or entitle us or any registered holder of a debt security to rescission of the purchase and sale of that debt security or to reformation of any of the terms hereof on the

grounds of impossibility or impracticality of performance, frustration of purpose or otherwise.

Table of Contents

If the registered holder of a debt security denominated in a specified currency other than U.S. dollars has elected to receive payments in U.S. dollars, payment in respect of that debt security will be based upon the exchange rate as determined by the exchange rate agent named in the applicable prospectus supplement or supplements based on the highest firm bid quotation for U.S. dollars received by the exchange rate agent as of 11:00 A.M., New York City time, on the second business day next preceding the applicable payment date from three recognized foreign exchange dealers in The City of New York, one of which may be the exchange rate agent, for purchase by the quoting dealer of the specified currency for U.S. dollars for settlement on such payment date of the aggregate amount of the specified currency payable to all holders of debt securities electing to receive U.S. dollar payments and at which the applicable dealer commits to execute a contract. All currency exchange costs will be borne by the holders of the debt securities by deductions from such payments. If three bid quotations are not available on the second business day preceding the payment of principal (and premium, if any) or interest with respect to any debt security, the payment will be made in the specified currency.

Legal Ownership and Global Security Issuance

Our obligations, as well as the obligations of the trustee and those of any third parties employed by us or the trustee, run only to persons or entities who are the direct holders of debt securities, which means those who are registered as holders of debt securities. As noted above, we will not have obligations to you if you hold in street name or through other indirect means, either because you choose to hold debt securities in that manner or because the debt securities are issued in the form of global securities as described below. For example, once we make payment to the registered holder, we will have no further responsibility for that payment even if that registered holder is legally required to pass the payment along to you as a street name holder but does not do so.

Global Securities

Because we will issue debt securities in the form of global securities, the ultimate beneficial owners can only be indirect holders. We do this by requiring that the global security be registered in the name of a financial institution we select and by requiring that the debt securities included in the global security not be transferred to the name of any other direct holder unless the special circumstances described below occur. The financial institution that acts as the sole direct holder of the global security is called the depositary.

Any person wishing to own a debt security included in the global security must do so indirectly by virtue of an account with a broker, bank or other financial institution that in turn has an account with the depositary. The prospectus supplement will indicate whether your series of debt securities will be issued only in the form of global securities.

Special Investor Considerations for Global Securities. As an indirect holder, an investor's rights relating to a global security will be governed by the account rules of the investor's financial institution and of the depositary, as well as general laws relating to securities transfers. We will not recognize this type of investor as a registered holder of debt securities and instead deal only with the depositary that holds the global security.

If you are an investor in debt securities that are issued only in the form of global securities, you should be aware that:

you cannot get debt securities registered in your own name except in certain limited circumstances as described below under **Special Situations When Global Security Will Be Terminated** ;

you cannot receive physical certificates for your interest in the debt securities;

you will be a street name holder and must look to your own bank or broker for payments on the debt securities and protection of your legal rights relating to the debt securities. See Street Name and Other Indirect Holders ;

you may not be able to sell interests in the debt securities to some insurance companies and other institutions that are required by law to own their securities in the form of physical certificates;

Table of Contents

the depositary's policies will govern payments, transfers, exchange and other matters relating to your interest in the global security. We and the trustee have no responsibility for any aspect of the depositary's actions or for its records of ownership interests in the global security. We and the trustee also do not supervise the depositary in any way; and

the depositary will require that interests in a global security be purchased or sold within its system using same-day funds for settlement.

Special Situations When Global Security Will Be Terminated. In a few special situations described below, the global security will terminate and interests in it will be exchanged for physical certificates representing debt securities. After that exchange, the choice of whether to hold debt securities directly or in street name will be up to you. You must consult your own bank or broker to find out how to have your interests in debt securities transferred to your own name, so that you will be a direct holder.

The special situations for termination of a global security are:

when the depositary notifies us that it is unwilling, unable or no longer qualified to continue as depositary and we notify the trustee that we are unable to locate a qualified successor depositary;

when we notify the trustee that that global security shall be so transferable and exchangeable (which we do not expect will occur); or

when an event of default on the debt securities has occurred and has not been cured.

Defaults are discussed under "Default and Related Matters" above.

The prospectus supplement may also list additional situations for terminating a global security that would apply only to the particular series of debt securities covered by the prospectus supplement. When a global security terminates, the depositary, not we or the trustee, is responsible for deciding the names of the institutions that will be the initial direct holders.

Street Name and Other Indirect Holders

We generally will not recognize investors who hold debt securities in accounts at banks or brokers in "street name" as legal holders of debt securities. Instead, we would recognize only the bank or broker, or the financial institution the bank or broker uses to hold its debt securities. These intermediary banks, brokers and other financial institutions pass along principal, interest and other payments on the debt securities, either because they agree to do so in their customer agreements or because they are legally required to do so. If you hold debt securities in street name, you are responsible for checking with your own institution to find out:

how it handles securities payments and notices;

how it would handle a request for the holders' consent if ever required;

whether it imposes fees or charges;

how it would handle voting if ever required; and

how it would pursue rights under the debt securities if there were a default or other event triggering the need for holders to act to protect their interests.

Additional Mechanics

Form, Exchanges and Transfer of our Debt Securities

Form. The debt securities will be issued:

only in fully registered global form;

Table of Contents

without interest coupons; and

unless otherwise indicated in the applicable prospectus supplement, in denominations that are integral multiples of \$1,000.

A registered holder may have its debt securities broken into more debt securities of smaller denominations or combined into fewer debt securities of larger denominations, as long as the total principal amount is not changed. The registered holder may not exchange its debt securities for securities of a different series or having different terms, unless the prospectus supplement says it may.

Exchanges and Transfers. A registered holder may exchange or transfer debt securities at the office of the trustee. It may also replace lost, stolen, destroyed or mutilated debt securities at that office. The trustee acts as our agent for registering debt securities in the names of holders and transferring debt securities. We may change this appointment to another entity or perform the service ourselves. The entity performing the role of maintaining the list of registered direct holders is called the security registrar. It will also register transfers of the debt securities.

A registered holder will not be required to pay a service charge to transfer or exchange debt securities, but it may be required to pay for any tax or other governmental charge associated with the exchange or transfer. The transfer or exchange will only be made if the security registrar is satisfied with the registered holder's proof of ownership.

If we designate additional transfer agents, they will be named in the prospectus supplement. We may cancel the designation of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If the debt securities are redeemable and we redeem less than all of the debt securities of a particular series, we may block the transfer or exchange of debt securities during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers or exchanges of debt securities selected for redemption, except that we will continue to permit transfers and exchanges of the unredeemed portion of any debt security being partially redeemed.

Payment and Paying Agents

On each interest payment date we will pay interest to the registered holder listed in the trustee's records at the close of business on a particular day, called the regular record date, in advance of each due date for interest. Unless otherwise specified in a prospectus supplement or supplements, the regular record date will be the business day preceding an interest payment date (as the interest payment date may be adjusted by any applicable business day convention). Because we expect to issue all of our debt securities in global form, we will pay interest to the relevant depositary in accordance with its applicable procedures. Each depositary has its own procedures for determining to whom it will pay interest, and it is not bound by the regular record date we establish. If our debt securities become held in registered non-global form in one of the special situations we have described in this prospectus, we will pay interest on the applicable interest payment dates to the registered holders on the regular record date.

We will pay interest, principal and any other money due on the debt securities in accordance with the procedures of the applicable depositary, in the case of global securities, and otherwise at the corporate trust office of the trustee in The City of New York. That office is currently located at 101 Barclay Street, 7W, New York, New York 10286. Registered holders must make arrangements to have their payments picked up at or wired from that office. We may also choose to pay interest by mailing checks.

Table of Contents

If you are a street name holder or other indirect holder, you should consult your bank or your broker for information on how you will receive payments.

We may also arrange for additional payment offices, and may cancel or change these offices, including our use of the trustee's corporate trust office. These offices are called paying agents. We may also choose to act as our own paying agent. We must notify registered holders of changes in the paying agents for any particular series of debt securities.

Notices

We and the trustee will send notices regarding the debt securities only to direct holders, using the procedures of the applicable depository, in the case of global securities, and otherwise to their addresses as listed in the trustee's records.

Unclaimed Payments

Regardless of who acts as paying agent, all money paid by us to a paying agent that remains unclaimed at the end of one year after the amount is due to direct holders will be repaid to us. After that one-year period, registered holders may look only to us for payment and not to the trustee, any other paying agent or anyone else.

Table of Contents

DESCRIPTION OF PREFERRED STOCK WE MAY OFFER

We may issue preferred stock in one or more series, as described below. The following briefly summarizes some provisions of our amended and restated certificate of incorporation that would be important to holders of our preferred stock. See [Description of Our Common Stock Provisions of Our Amended and Restated Certificate of Incorporation and Amended and Restated By-Laws](#) for additional information about these documents. The following description may not be complete and is subject to, and qualified in its entirety by reference to, the terms and provisions of our amended and restated certificate of incorporation, which is an exhibit to the registration statement that contains this prospectus.

The description of most of the financial and other specific terms of your series will be in the prospectus supplement accompanying this prospectus. Those terms may vary from the terms described here.

As you read this section, please remember that the specific terms of your series of preferred stock as described in your prospectus supplement will supplement and, if applicable, may modify or replace the general terms described in this section. If there are differences between your prospectus supplement and this prospectus, your prospectus supplement will control. Thus, the statements we make in this section may not apply to your series of preferred stock.

Reference to a series of preferred stock means all of the shares of preferred stock issued as part of the same series under a certificate of designations filed as part of our amended and restated certificate of incorporation.

Our Board is Authorized to Issue Many Classes or Series of Preferred Stock

We have authorized 10,000,000 shares of preferred stock with a par value of \$0.01 per share. Under our amended and restated certificate of incorporation, our board of directors is expressly authorized, without further action by our shareholders, to provide for the issuance of all or any of the authorized shares of preferred stock in one or more classes or series and to fix for each class or series the voting powers (which means, full, limited, or no voting powers), and the distinctive designations, preferences and relative, participating, optional or other special rights and the qualifications, limitations or restrictions thereof, and to issue such shares. These rights and preferences may be superior to Common Stock as to dividends, voting rights and distributions of assets, upon liquidation or otherwise.

Without limitation, the shares of preferred stock may be convertible into, or exchangeable for, shares of any other class or classes of stock or of any other series of the same or any other class or classes of stock, if our board of directors so determines. Our board of directors has the authority to change the designation or number of shares of preferred stock, or the relative rights, preferences and limitations of any class or series of preferred stock previously established and issued. Our board of directors will fix the terms of the series of preferred stock it designates by resolution adopted as may be permitted by the New Jersey Business Corporation Act before we issue any shares of the series of preferred stock.

The prospectus supplement relating to the particular series of preferred stock will contain a description of the specific terms of that series as fixed by our board of directors, including, as applicable:

the offering price at which we will issue the preferred stock;

the title, designation, number of shares and stated value of the preferred stock;

the dividend rate or method of calculation, the payment dates for dividends and the place or places where the dividends will be paid, whether dividends will be cumulative or noncumulative, and, if cumulative, the dates from which dividends will begin to accumulate;

any conversion or exchange rights;

whether the preferred stock will be subject to redemption and the redemption price and other terms and conditions relative to the redemption rights;

Table of Contents

any liquidation rights;

any sinking fund provisions;

any voting rights; and

any other rights, preferences, privileges, limitations and restrictions that are not inconsistent with the terms of our amended and restated certificate of incorporation.

When we issue and receive payment for shares of preferred stock, the shares will be fully paid and nonassessable, which means that its holders will have paid their purchase price in full and that we may not ask them to surrender additional funds. Holders of preferred stock will not have any preemptive or subscription rights to acquire more of our stock. Unless otherwise specified in the prospectus supplement relating to a particular series of preferred stock, each series of preferred stock will rank equally in all respects with each other series of preferred stock and prior to our Common Stock as to dividends and any distribution of our assets.

The rights of holders of the preferred stock offered may be adversely affected by the rights of holders of any shares of preferred stock that may be issued in the future. Our board of directors may cause shares of preferred stock to be issued in public or private transactions for any proper corporate purpose and may include issuances to obtain additional financing in connection with acquisitions, and issuances to officers, directors and employees pursuant to benefit plans. Our board of directors' ability to issue shares of preferred stock may discourage attempts by others to acquire control of us without negotiation with our board of directors, as it may make it difficult for a person to acquire us without negotiating with our board of directors.

Dividends

Holders of each series of preferred stock will be entitled to receive dividends only when, as and if declared by our board of directors from funds legally available for payment of dividends. The rates and dates of payment of dividends, if any, will be set forth in the applicable prospectus supplement relating to each series of preferred stock.

Dividends will be payable to holders of record of preferred stock as they appear on our books on the record dates fixed by the board of directors. Dividends on any series of preferred stock may be cumulative or noncumulative, as set forth in the applicable prospectus supplement.

We may not declare, pay or set apart funds for payment of dividends on a particular series of preferred stock unless full dividends on any other series of preferred stock that ranks equally with or senior to the series of preferred stock have been paid or sufficient funds have been set apart for payment for either of the following:

all prior dividend periods of the other series of preferred stock if it pays dividends on a cumulative basis; or

the immediately preceding dividend period of the other series of preferred stock if it pays dividends on a noncumulative basis.

Partial dividends declared on shares of any series of preferred stock and other series of preferred stock ranking on an equal basis as to dividends will be declared *pro rata*. A *pro rata* declaration means that the ratio of dividends declared per share to accrued dividends per share will be the same for each series of preferred stock.

Voting Rights

The holders of shares of preferred stock will have no voting rights, except:

as otherwise stated in the applicable prospectus supplement;

as otherwise stated in the certificate of designations establishing the series; or

as required by applicable law.

Table of Contents

Liquidation Preferences

In the event of our voluntary or involuntary liquidation, dissolution or winding-up, holders of each series of our preferred stock will have the right, as described in the applicable prospectus supplement, to receive distributions upon liquidation in the amount specified, plus an amount equal to any accrued and unpaid dividends. These distributions will be made before any distribution is made on the Common Stock or on any securities ranking junior to the preferred stock upon liquidation, dissolution or winding-up.

If the liquidation amounts payable relating to the preferred stock of any series and any other securities ranking equally regarding liquidation rights are not paid in full, the holders of the preferred stock of that series and the other securities will have the right to a ratable portion of our available assets, up to the full liquidation preference of each security. Holders of these series of preferred stock or other securities will not be entitled to any other amounts from us after they have received their full liquidation preference.

Redemption

If so specified in the applicable prospectus supplement, a series of preferred stock may be redeemable at any time, in whole or in part, at our option or the holder's, and may be mandatorily redeemed.

Any restriction on the repurchase or redemption by us of our preferred stock while we are in arrears in the payment of dividends will be described in the applicable prospectus supplement.

Any partial redemptions of preferred stock will be made in a way that our board of directors decides is equitable.

Unless we default in the payment of the redemption price, dividends will cease to accrue after the redemption date on shares of preferred stock called for redemption and all rights of holders of these shares will terminate except for the right to receive the redemption price.

Conversion or Exchange Rights

The prospectus supplement relating to any series of preferred stock that is convertible, exercisable or exchangeable will state the terms on which shares of that series are convertible into or exercisable or exchangeable for shares of Common Stock, another series of our preferred stock or any other securities registered pursuant to the registration statement of which this prospectus forms a part, or for securities of any third party.

Transfer Agent and Registrar

The transfer agent, registrar and dividend disbursement agent for the preferred stock will be stated in the applicable prospectus supplement. The registrar for shares of preferred stock will send notices to shareholders of any meetings at which holders of the preferred stock have the right to elect directors or to vote on any other matter.

Table of Contents

DESCRIPTION OF DEPOSITARY SHARES WE MAY OFFER

The following briefly summarizes some provisions of the depositary shares and depositary receipts that we may issue from time to time and which would be important to holders of depositary shares or depositary receipts, other than pricing and related terms which will be disclosed in the applicable prospectus supplement. The prospectus supplement will also state whether any of the generalized provisions summarized below do not apply to the depositary shares or depositary receipts being offered, and it will provide any additional provisions applicable to the depositary shares or depositary receipts being offered, including their tax treatment. The following description and any description in a prospectus supplement may not be complete and each is subject to, and qualified in its entirety by reference to the terms and provisions of the form of deposit agreement to be filed as an exhibit to the registration statement which contains this prospectus.

Description of Depositary Shares

We may offer depositary shares evidenced by depositary receipts. Each depositary share represents a fraction or a multiple of a share of the particular series of preferred stock issued and deposited with a depositary to be designated by us. The fraction or the multiple of a share of preferred stock which each depositary share represents will be set forth in the applicable prospectus supplement.

We will deposit the preferred shares of any series of preferred stock represented by depositary shares according to the provisions of a deposit agreement to be entered into between us and a bank or trust company which we will select as our preferred stock depositary. We will name the depositary in the applicable prospectus supplement. Each holder of a depositary share will be entitled to all the rights and preferences of the underlying preferred stock in proportion to the applicable fraction or multiple of a share of preferred stock represented by the depositary share. These rights may include dividend, voting, redemption, conversion and liquidation rights. The depositary will send the holders of depositary shares all reports and communications that we deliver to the depositary and which we are required to furnish to the holders of depositary shares.

Depositary Receipts

The depositary shares will be evidenced by depositary receipts issued pursuant to the deposit agreement. Depositary receipts will be distributed to anyone who is buying the fractional shares of preferred stock in accordance with the terms of the applicable prospectus supplement.

While definitive engraved depositary receipts (certificates) are being prepared, we may instruct the depositary to issue temporary depositary receipts, which will entitle holders to all the rights of the definitive depositary receipts and be substantially in the same form. The depositary will prepare definitive depositary receipts without unreasonable delay, and we will pay for the exchange of your temporary depositary receipts for definitive depositary receipts.

Withdrawal of Preferred Stock

Unless the related depositary shares have previously been called for redemption, a holder of depositary shares may receive the number of whole shares of the related series of preferred stock and any money or other property represented by the holder's depositary receipts after surrendering the depositary receipts at the corporate trust office of the depositary, paying any taxes, charges and fees provided for in the deposit agreement and complying with any other requirement of the deposit agreement. Partial shares of preferred stock will not be issued. If the surrendered depositary shares exceed the number of depositary shares that represent the number of whole shares of preferred stock the holder wishes to withdraw, then the depositary will deliver to the holder at the same time a new depositary receipt evidencing

the excess number of depositary shares. Once the holder has withdrawn the preferred stock, the holder will not be entitled to re-deposit that preferred stock under the deposit agreement or to receive depositary shares in exchange for such preferred stock. We do not expect that there will be any public trading market for withdrawn shares of preferred stock.

Table of Contents

Dividends and Other Distributions

The depositary will distribute to record holders of depositary shares any cash dividends or other cash distributions it receives on preferred stock, after deducting its fees and expenses. Each holder will receive these distributions in proportion to the number of depositary shares owned by the holder. The depositary will distribute only whole U.S. dollars and cents. The depositary will add any fractional cents not distributed to the next sum received for distribution to record holders of depositary shares.

In the event of a non-cash distribution, the depositary will distribute property to the record holders of depositary shares, unless the depositary determines that it is not feasible to make such a distribution. If this occurs, the depositary may, with our approval, sell the property and distribute the net proceeds from the sale to the holders.

The amounts distributed to holders of depositary shares will be reduced by any amounts required to be withheld by the depositary or by us on account of taxes or other governmental charges.

Redemption of Depositary Shares

If the series of preferred stock represented by depositary shares is subject to redemption, we will give the necessary proceeds to the depositary. The depositary will then redeem the depositary shares using the funds they received from us for the preferred stock. The redemption price per depositary share will be equal to the redemption price payable per share for the applicable series of the preferred stock and any other amounts per share payable with respect to the preferred stock multiplied by the fraction or multiple of a share of preferred stock represented by one depositary share. Whenever we redeem shares of preferred stock held by the depositary, the depositary will redeem the depositary shares representing the shares of preferred stock on the same day, provided we have paid in full to the depositary the redemption price of the preferred stock to be redeemed and any accrued and unpaid dividends. If fewer than all the depositary shares of a series are to be redeemed, the depositary shares will be selected by lot or ratably or by any other equitable methods as the depositary will decide.

After the date fixed for redemption, the depositary shares called for redemption will no longer be considered outstanding. Therefore, all rights of holders of the depositary shares will then cease, except that the holders will still be entitled to receive any cash payable upon the redemption and any money or other property to which the holder was entitled at the time of redemption. To receive this amount or other property, the holders must surrender the depositary receipts evidencing their depositary shares to the depositary. Any funds that we deposit with the depositary for any depositary shares that the holders fail to redeem will be returned to us after a period of one year from the date we deposit the funds.

Voting the Preferred Stock

Upon receipt of notice of any meeting at which the holders of preferred stock are entitled to vote, the depositary will notify holders of depositary shares of the upcoming vote and arrange to deliver our voting materials to the holders. The record date for determining holders of depositary shares that are entitled to vote will be the same as the record date for the preferred stock. The materials the holders will receive will describe the matters to be voted on and explain how the holders, on a certain date, may instruct the depositary to vote the shares of preferred stock underlying the depositary shares. For instructions to be valid, the depositary must receive them on or before the date specified. To the extent possible, the depositary will vote the shares as instructed by the holder. We agree to take all reasonable actions that the depositary determines are necessary to enable it to vote as a holder has instructed. If the depositary does not receive specific instructions from the holders of any depositary shares, it will vote all shares of that series held by it proportionately with instructions received.

Table of Contents

Conversion or Exchange

The depositary, with our approval or at our instruction, will convert or exchange all depositary shares if the preferred stock underlying the depositary shares is converted or exchanged. In order for the depositary to do so, we will need to deposit the other preferred stock, Common Stock or other securities into which the preferred stock is to be converted or for which it will be exchanged.

The exchange or conversion rate per depositary share will be equal to:

the exchange or conversion rate per share of preferred stock, multiplied by the fraction or multiple of a share of preferred stock represented by one depositary share;

plus all money and any other property represented by one depositary share; and

including all amounts per depositary share paid by us for dividends that have accrued on the preferred stock on the exchange or conversion date and that have not been paid.

The depositary shares, as such, cannot be converted or exchanged into other preferred stock, Common Stock, securities of another issuer or any other of our securities or property. Nevertheless, if so specified in the applicable prospectus supplement, a holder of depositary shares may be able to surrender the depositary receipts to the depositary with written instructions asking the depositary to instruct us to convert or exchange the preferred stock represented by the depositary shares into other shares of our preferred stock or Common Stock or to exchange the preferred stock for any other securities registered pursuant to the registration statement of which this prospectus forms a part. If the depositary shares carry this right, we would agree that, upon the payment of any applicable fees, we will cause the conversion or exchange of the preferred stock using the same procedures as we use for the delivery of preferred stock. If a holder is only converting part of the depositary shares represented by a depositary receipt, new depositary receipts will be issued for any depositary shares that are not converted or exchanged.

Amendment and Termination of the Deposit Agreement

We may agree with the depositary to amend the deposit agreement and the form of depositary receipt without consent of the holder at any time. However, if the amendment adds or increases fees or charges, other than any change in the fees of any depositary, registrar or transfer agent, or prejudices an important right of holders, it will only become effective with the approval of holders of at least a majority of the affected depositary shares then outstanding. We will make no amendment that impairs the right of any holder of depositary shares, as described above under **Withdrawal of Preferred Stock**, to receive shares of preferred stock and any money or other property represented by those depositary shares, except in order to comply with mandatory provisions of applicable law. If an amendment becomes effective, holders are deemed to agree to the amendment and to be bound by the amended deposit agreement if they continue to hold their depositary receipts.

The deposit agreement automatically terminates if:

all outstanding depositary shares have been redeemed or converted or exchanged for any other securities into which they or the underlying preferred stock are convertible or exchangeable;

each share of preferred stock has been converted into or exchanged for Common Stock; or

a final distribution in respect of the preferred stock has been made to the holders of depositary receipts in connection with our liquidation, dissolution or winding-up.

We may also terminate the deposit agreement at any time we wish. If we do so, the depositary will give notice of termination to the record holders not less than 30 days before the termination date. Once depositary receipts are surrendered to the depositary, it will send to each holder the number of whole or fractional shares of the series of preferred stock underlying that holder's depositary receipts.

Table of Contents

Charges of Depositary and Expenses

We will pay the fees, charges and expenses of the depositary provided in the deposit agreement to be payable by us. Holders of depositary receipts will pay any taxes and governmental charges and any charges provided in the deposit agreement to be payable by them. If the depositary incurs fees, charges or expenses for which it is not otherwise liable at the election of a holder of a depositary receipt or other person, that holder or other person will be liable for those fees, charges and expenses.

Limitations on Our Obligations and Liability to Holders of Depositary Receipts

The deposit agreement expressly limits our obligations and the obligations of the depositary. It also limits our liability and the liability of the depositary as follows:

we and the depositary are only liable to the holders of depositary receipts for negligence or willful misconduct;

we and the depositary have no obligation to become involved in any legal or other proceeding related to the depositary receipts or the deposit agreement on your behalf or on behalf of any other party, unless you provide us with satisfactory indemnity; and

we and the depositary may rely upon any written advice of counsel or accountants and on any documents we believe in good faith to be genuine and to have been signed or presented by the proper party.

Resignation and Removal of Depositary

The depositary may resign at any time by notifying us of its election to do so. In addition, we may remove the depositary at any time. Within 60 days after the delivery of a notice of resignation or removal of the depositary, we will appoint a successor depositary.

Table of Contents

DESCRIPTION OF OUR COMMON STOCK

The following briefly summarizes some provisions of our amended and restated certificate of incorporation and amended and restated by-laws that would be important to holders of our Common Stock. The following description may not be complete and is subject to, and qualified in its entirety by reference to, the terms and provisions of our amended and restated certificate of incorporation and amended and restated by-laws which are exhibits to the registration statement that contains this prospectus. See [Where You Can Find More Information](#) for information about where you can obtain a copy of these documents.

Our Common Stock

We have authorized 1,500,000,000 shares of Common Stock with a par value of \$0.01 per share. As of January 31, 2015, approximately 454,000,000 shares of Common Stock were outstanding. The outstanding shares of Common Stock are, and the shares of Common Stock offered by this prospectus when issued will be, fully paid and non-assessable.

Our Common Stock is listed on the New York Stock Exchange under the symbol [PRU](#) .

Dividend Rights

Holders of Common Stock may receive dividends as declared by our board of directors out of funds legally available for that purpose under the New Jersey Business Corporation Act, subject to the rights of any holders of any preferred stock.

Voting Rights

Each share of Common Stock gives the owner of record one vote on all matters submitted to a shareholder vote. The Common Stock votes together as a single class on all matters as to which common shareholders are generally entitled to vote.

Actions requiring approval of shareholders will generally require approval by a majority vote at a meeting at which a quorum is present. Our amended and restated certificate of incorporation provides that, with respect to shares of Common Stock and any shares of preferred stock voting together with the Common Stock as a class, the holders of at least 50% of the shares entitled to cast votes at a meeting of shareholders shall constitute a quorum at all meetings of shareholders for the transaction of business.

Liquidation Rights

In the event of a liquidation, dissolution or winding-up of Prudential Financial, each share of Common Stock will be entitled to receive an equal share in our net assets that remain after paying all liabilities and the liquidation preferences of any preferred stock.

Neither a merger nor a consolidation of us with any other entity, nor a sale, transfer or lease of all or any part of our assets would alone be deemed a liquidation, dissolution or winding-up for these purposes.

Pre-emptive Rights

Holders of our Common Stock have no pre-emptive rights with respect to any shares of capital stock that we may issue in the future.

Provisions of Our Amended and Restated Certificate of Incorporation and Amended and Restated By-Laws

A number of provisions of our amended and restated certificate of incorporation and amended and restated by-laws concern corporate governance and the rights of shareholders. Some provisions, including those granting

Table of Contents

our board of directors the ability to issue shares of preferred stock and to set the voting rights, preferences and other terms of preferred stock without shareholder approval, may be viewed as having an anti-takeover effect and may discourage takeover attempts not first approved by our board of directors, including takeovers that some shareholders may consider to be in their best interests. To the extent takeover attempts are discouraged, fluctuations in the market price of the Common Stock, which may result from actual or rumored takeover attempts, may be inhibited.

The amended and restated certificate of incorporation and the amended and restated by-laws have provisions that also could delay or frustrate the removal of directors from office or the taking of control by shareholders, even if that action would be beneficial to shareholders. These provisions also could discourage or make more difficult a merger, tender offer or proxy contest, even if they were favorable to the interests of shareholders, and could potentially depress the market price of the Common Stock.

The following is a summary of the material terms of these provisions of our amended and restated certificate of incorporation and amended and restated by-laws. The statements below are only a summary, and we refer you to the amended and restated certificate of incorporation and amended and restated by-laws, copies of which are filed as exhibits to the registration statement of which this prospectus forms a part. Each statement is qualified in its entirety by such reference. See [Where You Can Find More Information](#) for information about where you can obtain a copy of these documents.

Board of Directors; Number of Directors; Removal; Vacancies

Our amended and restated by-laws provide that the board of directors consists of not less than 10 nor more than 24 members, with the exact number to be determined by the board of directors from time to time. All directors are elected for terms expiring at the next annual meeting of shareholders and until such directors' successors have been elected and qualified. The amended and restated by-laws also provide that the directors may be removed with or without cause upon the affirmative vote of a majority of the votes cast at a meeting of shareholders by the holders of shares entitled to vote for the election of directors.

Unless otherwise required by law, vacancies on the board of directors, including vacancies resulting from an increase in the number of directors or the removal of directors, may only be filled by an affirmative vote of a majority of the directors then in office or by a sole remaining director.

Limitations on Call of Special Meetings of Shareholders

The amended and restated by-laws provide that special meetings of shareholders may only be called by the chairman of the board of directors, the chief executive officer, the president, or the board of directors or shareholders representing at least 10% of the shares entitled to vote at a meeting.

Limitation on Written Consent of Shareholders

The amended and restated certificate of incorporation generally provides that action by holders of Common Stock cannot be taken by written consent without a meeting unless such written consents are signed by all shareholders entitled to vote on the action to be taken.

Advance Notice Requirements for Nomination of Directors and Presentation of New Business at Meetings

Our amended and restated by-laws establish advance notice procedures for shareholder proposals concerning nominations for election to the board of directors and new business to be brought before meetings of shareholders.

These procedures require that notice of such shareholder proposals must be timely given in writing to our corporate secretary prior to the meeting at which the action is to be taken. Generally, to be timely, we must receive the notice at our principal executive offices not less than 120 nor more than 150 days prior to the anniversary date of the annual meeting of shareholders before the one in which the shareholder proposal is to be

Table of Contents

considered. The notice must contain information required by the amended and restated by-laws. These provisions make it procedurally more difficult for a shareholder to place a proposed nomination or new business proposal on the meeting agenda and therefore may reduce the likelihood that a shareholder will seek to take independent action to replace directors or with respect to other matters that are not supported by management.

Limitation of Liability and Indemnification Matters

Amended and Restated Certificate of Incorporation. Our amended and restated certificate of incorporation states that a director will not be held personally liable to us or any of our shareholders for damages for a breach of duty as a director except for liability:

for any breach of the director's duty of loyalty to us or our shareholders,

for any act or omission not in good faith or involving a knowing violation of law, or

for any transaction from which such director derived or received an improper personal benefit.

This provision prevents a shareholder from pursuing an action for damages for breach of duty against one of our directors unless the shareholder can demonstrate one of these specified bases for liability. The inclusion of this provision in the amended and restated certificate of incorporation may discourage or deter shareholders or management from bringing a lawsuit against a director for a breach of his or her duties, even though an action, if successful, might otherwise benefit us and our shareholders. This provision does not affect the availability of non-monetary remedies like an injunction or rescission based upon a director's breach of his or her duty of care.

Amended and Restated By-Laws. Our amended and restated by-laws provide that we must indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding because such person is or was a director or officer of us, or is or was serving at our request as a director or officer, employee or agent of another entity. This indemnification covers expenses, judgments, fines, penalties and amounts paid in settlement actually and reasonably incurred by the indemnified person in connection with such action, suit or proceeding. To receive indemnification, a person must have acted in good faith and in a manner the person reasonably believed to be in or not opposed to our best interests. In the case of any criminal action or proceeding, the indemnified person also must have had no reasonable cause to believe his or her conduct was unlawful. The amended and restated by-laws limit indemnification in cases when a person has been held liable to us.

Anti-Takeover Effect of New Jersey Business Corporation Act

New Jersey Shareholders Protection Act

We are subject to the provisions of Section 14A-10A of the New Jersey Business Corporation Act, which is known as the Shareholders Protection Act .

Generally, the Shareholders Protection Act prohibits a publicly held New Jersey corporation with its principal executive offices or significant business operations in New Jersey, like us, from engaging in any business combination with any interested stockholder of that corporation for a period of five years following the time at which that stockholder became an interested stockholder . An exception applies if (1) the business combination is approved by the

board of directors before the stockholder becomes an interested stockholder ; or (2) the transaction or series of related transactions which caused the stockholder to become an interested stockholder was approved by the board of directors prior to the stockholder becoming an interested stockholder and any subsequent business combinations with that interested stockholder are approved by the board of directors, provided that any such subsequent business combination is approved by (a) the board of directors, or a committee of that board, consisting solely of persons who are not employees, officers, directors, stockholders, affiliates or associates of that interested stockholder, and (b) the affirmative vote of the holders of a majority of the voting stock not beneficially owned by such interested stockholder at a meeting called for such purpose.

Table of Contents

Covered business combinations include certain mergers, dispositions of assets or shares and recapitalizations. An interested stockholder is (1) any person that directly or indirectly beneficially owns 10% or more of the voting power of the outstanding voting stock of Prudential Financial; or (2) any affiliate or associate of ours that directly or indirectly beneficially owned 10% or more of the voting power of the then-outstanding stock of Prudential Financial at any time within a five-year period immediately prior to the date in question.

In addition, under the Shareholders Protection Act, we may not engage in a business combination with an interested stockholder at any time unless:

our board of directors approved the business combination prior to the time the stockholder became an interested stockholder;

the holders of two-thirds of our voting stock (which includes Common Stock) not beneficially owned by the interested stockholder affirmatively vote to approve the business combination at a meeting called for that purpose;

the consideration received by the non-interested stockholders in the business combination meets the standards of the statute, which is designed to ensure that all other shareholders receive at least the highest price per share paid by the interested stockholder; or

a business combination is approved by (a) the board of directors, or a committee of the board of directors consisting solely of persons who are not employees, officers, directors, stockholders, affiliates or associates of the interested stockholder prior to the consummation of the business combination; and (b) the affirmative vote of the holders of a majority of the voting stock (excluding that beneficially owned by the interested stockholder) at a meeting called for that purpose if the transaction or series of related transactions with the interested stockholder which caused the person to become an interested stockholder was approved by the board of directors prior to the consummation of that transaction or series of related transactions.

A New Jersey corporation that has publicly traded voting stock may not opt out of these restrictions.

Board Consideration of Certain Factors

Under the New Jersey Business Corporation Act, in discharging their duties, our directors may consider the effects that an action taken by us may have on interests and people in addition to our shareholders, such as employees, customers and the community. The directors may also consider the long-term as well as the short-term interests of us and our shareholders, including the possibility that these interests may best be served by our continued independence.

Transfer Agent

The transfer agent and registrar for our Common Stock is Computershare Limited.

Table of Contents

DESCRIPTION OF WARRANTS WE MAY OFFER

General

We may issue warrants to purchase our senior debt securities, subordinated debt securities, preferred stock, depository shares, Common Stock, any of these securities of a third party or any combination of these securities, and these warrants may be issued independently or together with any underlying securities and may be attached or separate from those underlying securities. We will issue each series of warrants under a separate warrant agreement to be entered into between us and a warrant agent. The warrant agent will act solely as our agent in connection with the warrants of such series and will not assume any obligation or relationship of agency for or with holders or beneficial owners of warrants.

The following outlines some of the general terms and provisions of the warrants. Further terms of the warrants and the applicable warrant agreement will be stated in the applicable prospectus supplement. The following description and any description of the warrants in a prospectus supplement may not be complete and is subject to and qualified in its entirety by reference to the terms and provisions of the warrant agreement, a form of which will be filed as an exhibit to the registration statement that contains this prospectus.

A Prospectus Supplement Will Describe the Specific Terms of Warrants

The applicable prospectus supplement will describe the terms of any warrants that we may offer, including the following:

the title of the warrants;

the total number of warrants;

the price or prices at which the warrants will be issued;

the currency or currencies, including currency units or composite currencies, investors may use to pay for the warrants;

the designation and terms of the underlying securities purchasable upon exercise of the warrants;

the price at which and the currency or currencies, including currency units or composite currencies, in which investors may purchase the underlying securities purchasable upon exercise of the warrants;

the date on which the right to exercise the warrants will commence and the date on which the right will expire;

whether the warrants will be issued in registered form or bearer form;

information with respect to book-entry procedures, if any;

if applicable, the minimum or maximum amount of warrants that may be exercised at any one time;

if applicable, the designation and terms of the underlying securities with which the warrants are issued and the number of warrants issued with each underlying security;

if applicable, the date on and after which the warrants and the related underlying securities will be separately transferable;

a discussion of certain U.S. federal income tax considerations;

the identity of the warrant agent;

the procedures and conditions relating to the exercise of the warrants; and

any other terms of the warrants, including terms, procedures and limitations relating to the exchange and exercise of the warrants.

Table of Contents

We may also issue warrants, on terms to be determined at the time of sale, for the purchase or sale of, or whose cash value is determined by reference to the performance, level or value of, one or more of the following:

securities of one or more issuers, including our common or preferred stock or other securities described in this prospectus or debt or equity securities of third parties;

one or more currencies;

one or more commodities;

any other financial, economic or other measure or instrument, including the occurrence or nonoccurrence of any event or circumstance; and

one or more indices or baskets of the items described above.

We refer to this type of warrant as a universal warrant. We refer to each property described above as a warrant property.

We may satisfy our obligations, if any, and the holder of a universal warrant may satisfy its obligations, if any, with respect to any universal warrants by delivering:

the warrant property;

the cash value of the warrant property; or

the cash value of the warrants determined by reference to the performance, level or value of the warrant property. The applicable prospectus supplement will describe what we may deliver to satisfy our obligations, if any, and what the holder of a universal warrant may deliver to satisfy its obligations, if any, with respect to any universal warrants.

Warrant certificates may be exchanged for new warrant certificates of different denominations, and warrants may be exercised at the warrant agent's corporate trust office or any other office indicated in the applicable prospectus supplement. Prior to the exercise of their warrants, holders of warrants exercisable for debt securities will not have any of the rights of holders of the debt securities purchasable upon such exercise and will not be entitled to payments of principal, or premium, if any, or interest, if any, on the debt securities purchasable upon such exercise. Prior to the exercise of their warrants, holders of warrants exercisable for shares of preferred stock or Common Stock will not have any rights of holders of the preferred stock or Common Stock purchasable upon such exercise and will not be entitled to dividend payments, if any, or voting rights of the preferred stock or Common Stock purchasable upon such exercise.

Exercise of Warrants

A warrant will entitle the holder to purchase for cash an amount of securities at an exercise price that will be stated in, or that will be determinable as described in, the applicable prospectus supplement. Warrants may be exercised at any time up to the close of business on the expiration date set forth in the applicable prospectus supplement. After the close of business on the expiration date, unexercised warrants will become void.

Warrants may be exercised as set forth in the applicable prospectus supplement. Upon receipt of payment and the warrant certificate properly completed and duly executed at the corporate trust office of the warrant agent or any other office indicated in the prospectus supplement, we will, as soon as practicable, forward the securities purchasable upon such exercise. If less than all of the warrants represented by such warrant certificate are exercised, a new warrant certificate will be issued for the remaining warrants.

Table of Contents

Enforceability of Rights; Governing Law

The holders of warrants, without the consent of the warrant agent, may, on their own behalf and for their own benefit, enforce, and may institute and maintain any suit, action or proceeding against us to enforce their rights to exercise and receive the securities purchasable upon exercise of their warrants. Unless otherwise stated in the prospectus supplement, each issue of warrants and the applicable warrant agreement will be governed by the laws of the State of New York.

Table of Contents

DESCRIPTION OF PREFERRED SECURITIES THAT THE TRUSTS MAY OFFER

The following briefly summarizes some provisions of the preferred securities that each trust may offer that would be important to holders of preferred securities. The applicable prospectus supplement will state whether any of the generalized provisions summarized below do not apply to the preferred securities being offered, and it will provide any additional provisions applicable to the preferred securities being offered, including their tax treatment.

Each trust will issue the preferred securities under an amended and restated declaration of trust, which we will enter into at the time of any offering of preferred securities by each trust. The amended and restated declaration of trust for each trust is subject to and governed by the Trust Indenture Act. BNY Mellon Trust of Delaware, as successor to Chase Bank USA, N.A., will act as Delaware trustee and The Bank of New York Mellon, as successor to JPMorgan Chase Bank, N.A., will act as property trustee under the declarations of trust for the purposes of compliance with the provisions of the Trust Indenture Act. The terms of the preferred securities will be those contained in the applicable amended and restated declarations of trust and those made part of the amended and restated declarations of trust by the Trust Indenture Act and the Delaware Statutory Trust Act. The following summary may not be complete and is subject to and qualified in its entirety by reference to the forms of amended and restated declarations of trust, which are filed as exhibits to the registration statement which contains this prospectus, the Trust Indenture Act and the Delaware Statutory Trust Act.

Terms

The amended and restated declarations of trust will provide that each trust may issue, from time to time, only one series of preferred securities and one series of common securities. The preferred securities will be offered to investors and the common securities will be held by us. The terms of the preferred securities, as a general matter, will mirror the terms of the senior or the subordinated debt securities that we will issue to each trust in exchange for the proceeds of the sales of the preferred and common securities, and any conversion feature applicable to the preferred securities will mirror the terms of the convertible debt securities or warrants, if any, that we will have issued to each trust. If we fail to make a payment on the senior or the subordinated debt securities, the trusts holding those debt securities will not have sufficient funds to make related payments, including cash distributions, on their preferred securities. If the preferred securities are convertible into or exchangeable for shares of our Common Stock or other securities, in the event that we fail to perform under any convertible debt securities or warrants we issue to the trusts, the trusts will be unable to distribute to the holders any of our shares of Common Stock or other securities to be distributed to the holders of the preferred securities upon their conversion.

You should refer to the applicable prospectus supplement relating to the preferred securities for specific terms of the preferred securities, including, but not limited to:

the distinctive designation of the preferred securities and common securities;

the total and per-security-liquidation amount of the preferred securities;

the annual distribution rate, or method of determining the rate at which each trust issuing the securities will pay distributions, on the preferred securities and the date or dates from which distributions will accrue;

the date or dates on which the distributions will be payable and any corresponding record dates;

whether distributions on preferred securities will be cumulative, and, in the case of preferred securities having cumulative distribution rights, the date or dates or method of determining the date or dates from which distributions on preferred securities will accumulate;

the right, if any, to defer distributions on the preferred securities upon extension of the interest payment period of the related subordinated debt securities;

Table of Contents

whether the preferred securities are to be issued in global form and represented by one or more global certificates and, if so, the depositary for the global certificates and the specific terms of the depositary arrangement;

the amount or amounts which will be paid out of the assets of each trust issuing the securities to the holders of preferred securities upon voluntary or involuntary dissolution, winding-up or termination of each trust;

any obligation of each trust to purchase or redeem preferred securities issued by it and the terms and conditions relating to any redemption obligation;

any voting rights of the preferred securities;

certain U.S. federal income tax considerations;

any terms and conditions upon which the debt securities held by each trust issuing the preferred securities may be distributed to holders of preferred securities;

if the preferred securities may be converted into or exercised or exchanged for our Common Stock or preferred stock or any other of our securities, the terms on which conversion, exercise or exchange is mandatory, at the option of the holder or at the option of each trust, the date on or the period during which conversion, exercise or exchange may occur, the initial conversion, exercise or exchange price or rate and the circumstances or manner in which the amount of Common Stock or preferred stock or other securities issuable upon conversion, exercise or exchange may be adjusted;

whether the preferred securities are subject to mandatory or optional remarketing or other mandatory or optional resale provisions, and, if applicable, the date or period during which such resale may occur, any conditions to such resale and any right of a holder to substitute securities for the securities subject to resale;

any securities exchange on which the preferred securities will be listed; and

any other relevant rights, preferences, privileges, limitations or restrictions of the preferred securities not inconsistent with the declarations of trust or with applicable law.

We will guarantee the preferred securities to the extent described below under [Description of Trust Guarantees](#) . Our guarantees, when taken together with our obligations under the related debt securities and the related indenture and any warrants and related warrant agreement, and our obligations under the amended and restated declarations of trust, would provide a full, irrevocable and unconditional guarantee of amounts due on any preferred securities and the distribution of any securities to which the holders would be entitled upon conversion of the preferred securities, if the preferred securities are convertible into or exchangeable for shares of our Common Stock or other securities.

Liquidation Distribution Upon Dissolution

Unless otherwise specified in the applicable prospectus supplement, the amended and restated declarations of trust state that each trust will be dissolved:

on the expiration of the term of the trust;

upon bankruptcy, dissolution or liquidation of us or the holder of the common securities of the trust;

upon our written direction to the property trustee to dissolve the trust and distribute the related debt securities directly to the holders of the preferred securities and common securities;

upon the redemption by the trust of all of the preferred and common securities in accordance with their terms; or

upon entry of a court order for the dissolution of the trust.

Table of Contents

Unless otherwise specified in an applicable prospectus supplement, in the event of a dissolution as described above other than in connection with redemption, after each trust satisfies all liabilities to its creditors as provided by applicable law, each holder of the preferred or common securities issued by each trust will be entitled to receive:

the related debt securities in an aggregate principal amount equal to the aggregate liquidation amount of the preferred or common securities held by the holder; or

cash equal to the aggregate liquidation amount of the preferred or common securities held by the holder, plus accumulated and unpaid distributions to the date of payment.

If a trust cannot pay the full amount due on its preferred and common securities because it has insufficient assets available for payment, then the amounts payable by such trust on its preferred and common securities will be paid on a *pro rata* basis. However, if an event of default under the indenture has occurred and is continuing with respect to any series of related debt securities, the total amounts due on the preferred securities will be paid before any distribution on the common securities.

Events of Default

The following will be events of default under each amended and restated declaration of trust:

an event of default under the subordinated debt indenture occurs with respect to any related series of subordinated debt securities; or

any other event of default specified in the applicable prospectus supplement occurs.

At any time after a declaration of acceleration has been made with respect to a related series of debt securities and before a judgment or decree for payment of the money due has been obtained, the holders of a majority in liquidation amount of the affected preferred securities may rescind any declaration of acceleration with respect to the related debt securities and its consequences

if we deposit with the trustee funds sufficient to pay all overdue principal of and premium and interest on the related debt securities and other amounts due to the indenture trustee and the property trustee; and

if all existing events of default with respect to the related subordinated debt securities have been cured or waived except non-payment of principal on the related subordinated debt securities that has become due solely because of the acceleration.

The holders of a majority in liquidation amount of the affected preferred securities may waive any past default under the indenture with respect to related debt securities, other than a default in the payment of principal of, or any premium or interest on, any related debt security or a default with respect to a covenant or provision that cannot be amended or modified without the consent of the holder of each affected outstanding related debt security. In addition, the holders of at least a majority in liquidation amount of the affected preferred securities may waive any past default

under the amended and restated declarations of trust.

The holders of a majority in liquidation amount of the affected preferred securities shall have the right to direct the time, method and place of conducting any proceedings for any remedy available to the property trustee or to direct the exercise of any trust or power conferred on the property trustee under the amended and restated declarations of trust.

A holder of preferred securities may institute a legal proceeding directly against us, without first instituting a legal proceeding against the property trustee or anyone else, for enforcement of payment to the holder of principal and any premium or interest on the related series of debt securities having a principal amount equal to the aggregate liquidation amount of the preferred securities of the holder, if we fail to pay principal and any premium or interest on the related series of debt securities when payable.

Table of Contents

We are required to furnish annually, to the property trustee for each trust, officers' certificates to the effect that, to the best knowledge of the individuals providing the certificates, we and the trusts are not in default under the applicable amended and restated declarations of trust or, if there has been a default, specifying the default and its status.

Consolidation, Merger or Amalgamation of the Trust

A trust may not consolidate or merge with or into, or be replaced by, or convey, transfer or lease its properties and assets substantially as an entirety to, any entity, except as described below or as described above in "Liquidation Distribution Upon Dissolution". A trust may, with the consent of the administrative trustees but without the consent of the holders of the outstanding preferred securities or the other trustees of the trust, consolidate or merge with or into, or be replaced by, or convey, transfer or lease its properties and assets substantially as an entirety to, a trust organized under the laws of any state if:

the successor entity either:

expressly assumes all of the obligations of the trust relating to its preferred and common securities; or

substitutes for the trust's preferred securities other securities having substantially the same terms as the preferred securities, so long as the substituted successor securities rank the same as the preferred securities for distributions and payments upon liquidation, redemption and otherwise;

we expressly acknowledge a trustee of the successor entity who has substantially the same powers and duties as the property trustee of the trust;

the successor securities are listed or traded, or any substituted successor securities will be listed upon notice of issuance, on the same national securities exchange or other organization on which the preferred securities are then listed or traded, if any;

the merger event does not cause the preferred securities or any substituted successor securities to be downgraded by any national rating agency;

the merger event does not adversely affect the rights, preferences and privileges of the holders of the preferred or common securities or any substituted successor securities in any material respect;

the successor entity has a purpose substantially identical to that of the trust; and

prior to the merger event, we shall provide to the trust an opinion of counsel from a nationally recognized law firm stating that:

the merger event does not adversely affect the rights, preferences and privileges of the holders of the trust's preferred or common securities in any material respect;

following the merger event, neither the trust nor the successor entity will be required to register as an investment company under the Investment Company Act of 1940, as amended; and

following the merger event, the trust or the successor entity will continue to be classified as a grantor trust for United States federal tax purposes;

we own, or our permitted transferee owns, all of the common securities of the successor entity and we guarantee or our permitted transferee guarantees the obligations of the successor entity under the substituted successor securities at least to the extent provided under the applicable preferred securities guarantee; and

prior to the merger event, the property trustee receives an officer's certificate and an opinion of counsel stating that all conditions precedent under the amended and restated declaration of trust to such transaction have been satisfied.

In addition, unless all of the holders of the preferred securities approve otherwise, a trust may not consolidate, amalgamate or merge with or into, or be replaced by, or convey, transfer or lease its properties and

Table of Contents

assets substantially as an entirety to, any other entity, or permit any other entity to consolidate, amalgamate, merge with or into or replace it, if the transaction would cause such trust or the successor entity to be taxable as a corporation or classified other than as a grantor trust for United States federal income tax purposes.

Voting Rights

Unless otherwise specified in the applicable prospectus supplement, the holders of the preferred securities will have no voting rights, except as discussed below and under Amendment to the Declarations of Trust and Description of Trust Guarantees Modification of the Trust Guarantees; Assignment , and as otherwise required by law.

If any proposed amendment to the amended and restated declarations of trust provides for, or the trustee of a trust otherwise proposes to effect:

any action that would adversely affect the powers, preferences or special rights of the preferred securities in any material respect, whether by way of amendment to the declaration of trust or otherwise; or

the dissolution, winding-up or termination of the trust other than pursuant to the terms of the declaration of trust,

then the holders of the affected preferred securities as a class will be entitled to vote on the amendment or proposal. In that case, the amendment or proposal will be effective only if approved by the holders of at least a majority in aggregate liquidation amount of the affected preferred securities.

The holders of a majority in aggregate liquidation amount of the preferred securities issued by each trust have the right to direct the time, method and place of conducting any proceeding for any remedy available to the property trustee, or direct the exercise of any trust or power conferred upon the property trustee under the applicable declaration of trust, including the right to direct the property trustee, as holder of the debt securities and, if applicable, the warrants, to:

direct the time, method and place of conducting any proceeding for any remedy available to the indenture trustee for any related subordinated debt securities or exercise any trust or power conferred on the indenture trustee with respect to the related debt securities;

waive certain past defaults under the indenture with respect to any related debt securities;

cancel an acceleration of the maturity of the principal of any related debt securities; or

consent to any amendment, modification or termination of the indenture or any related debt securities.

In addition, before taking any of the foregoing actions, we will provide to the property trustee an opinion of counsel experienced in such matters to the effect that, as a result of such actions, the trust will not be taxable as a corporation or classified as other than a grantor trust for U.S. federal income tax purposes.

The property trustee will notify all preferred securities holders of each trust of any notice of default received from the indenture trustee with respect to the debt securities held by the trust.

Any required approval of the holders of preferred securities may be given at a meeting of the holders of the preferred securities convened for that purpose or pursuant to written consent. The administrative trustees will cause a notice of any meeting at which holders of securities are entitled to vote to be given to each holder of record of the preferred securities at the holder's registered address in accordance with the declarations of trust.

No vote or consent of the holders of the preferred securities will be required for a trust to redeem and cancel its preferred securities in accordance with its declaration of trust.

Notwithstanding that holders of the preferred securities are entitled to vote or consent under any of the circumstances described above, any of the preferred securities that are owned by us, or any affiliate of ours will, for purposes of any vote or consent, be treated as if they were not outstanding.

Table of Contents

Amendment to the Declarations of Trust

Each amended and restated declaration of trust may be amended from time to time by us and the property trustee and the administrative trustees of each trust, without the consent of the holders of the preferred securities, to:

cure any ambiguity or correct or supplement any provision which may be defective or inconsistent with any other provision;

add to the covenants, restrictions or obligations of the sponsor; or

modify, eliminate or add to any provisions to the extent necessary to ensure that the trust will not be classified as other than a grantor trust for U.S. federal income tax purposes or to ensure that the trust will not be required to register as an investment company under the Investment Company Act of 1940, as amended; provided, however, that, in each case, the amendment would not adversely affect in any material respect the interests of the holders of the preferred securities.

Other amendments to the amended and restated declarations of trust may be made by us and the trustees of each trust upon approval of the holders of a majority in aggregate liquidation amount of the outstanding preferred securities of each trust and receipt by the trustees of an opinion of counsel to the effect that the amendment will not cause the trust to be classified as other than a grantor trust for U.S. federal income tax purposes, reduce or otherwise adversely affect the powers of the property trustee in contravention of the Trust Indenture Act or affect the trust's exemption from the Investment Company Act of 1940, as amended.

Removal and Replacement of Trustees

Unless an event of default exists under the debt securities or, if the preferred securities are convertible and there is a separate warrant agreement, under the warrant agreement, we may remove the property trustee and the Delaware trustee at any time. If an event of default exists, the property trustee and the Delaware trustee may be removed only by the holders of a majority in liquidation amount of the outstanding preferred securities. In no event will the holders of the preferred securities have the right to vote to appoint, remove or replace the administrative trustees, because these voting rights are vested exclusively in us as the holder of all the trusts' common securities. No resignation or removal of the property trustee or the Delaware trustee and no appointment of a successor trustee shall be effective until the acceptance of appointment by the successor trustee in accordance with the amended and restated declarations of trust.

Merger or Consolidation of Trustees

Any entity into which the property trustee or the Delaware trustee may be merged or converted or with which it may be consolidated, or any entity resulting from any merger, conversion or consolidation to which the trustee shall be a party, or any entity succeeding to all or substantially all of the corporate trust business of the trustee, shall be the successor of the trustee under the applicable declarations of trust; provided, however, that the entity shall be otherwise qualified and eligible.

Global Preferred Securities

Unless otherwise set forth in the applicable prospectus supplement, any preferred securities will be represented by fully registered global certificates issued as global preferred securities that will be deposited with, or on behalf of, a depository with respect to that series instead of paper certificates issued to each individual holder. The depository arrangements that will apply, including the manner in which principal of and premium, if any, and interest on preferred securities and other payments will be payable are discussed in more detail in the applicable prospectus supplement.

Table of Contents

Payment and Paying Agent

Payments in respect of preferred securities that are represented by global certificates will be made in accordance with the applicable policies of The Depository Trust Company, as described in the applicable prospectus supplement. If any preferred securities are not represented by global certificates, payments will be made by check mailed to the holder entitled to them at his or her address shown on the property trustee's records as of the close of business on the record date established by the board for such interest payment. Unless otherwise specified in the applicable prospectus supplement, the paying agent will initially be the property trustee.

Information Concerning the Property Trustee

For matters relating to compliance with the Trust Indenture Act, the property trustee for each trust will have all of the duties and responsibilities of an indenture trustee under the Trust Indenture Act. Except if an event of default exists under the amended and restated declarations of trust, the property trustee will undertake to perform only the duties specifically set forth in the declarations of trust. While such an event of default exists, the property trustee must exercise the same degree of care and skill as a prudent person would exercise or use in the conduct of his or her own affairs. Subject to this provision, the property trustee is not obligated to exercise any of the powers vested in it by the amended and restated declarations of trust at the request of any holder of preferred securities, unless it is offered reasonable indemnity against the costs, expenses and liabilities that it might incur. But the holders of preferred securities will not be required to offer indemnity if the holders, by exercising their voting rights, direct the property trustee to take any action following an event of default under the declarations.

The Bank of New York Mellon, which is the property trustee for the trusts, also serves as the senior debt indenture trustee, the subordinated debt indenture trustee and the guarantee trustee under the trust guarantee described below. We and certain of our affiliates maintain banking and other service relationships with The Bank of New York Mellon, which are described under "Description of Debt Securities We May Offer" and "Our Relationship With the Trustee".

Miscellaneous

The administrative trustees of each trust are authorized and directed to conduct the affairs of and to operate each trust in such a way that:

the trust will not be classified as other than a grantor trust for U.S. federal income tax purposes;

the debt securities held by the trust will be treated as indebtedness of ours for U.S. federal income tax purposes; and

the trust will not be deemed to be an investment company required to be registered under the Investment Company Act of 1940, as amended.

We and the trustees are authorized to take any action, so long as it is consistent with applicable law, the certificates of trust or the amended and restated declarations of trust, that we and the trustees determine to be necessary or desirable for the above purposes, as long as it does not materially and adversely affect the holders of the preferred securities.

Registered holders of the preferred securities have no preemptive or similar rights.

A trust may not, among other things, incur indebtedness or place a lien on any of its assets.

Governing Law

The amended and restated declarations of trust and the preferred securities will be governed by and construed in accordance with the laws of the State of Delaware, without regard to the conflict of laws provisions thereof.

Table of Contents

DESCRIPTION OF TRUST GUARANTEES

The following briefly summarizes some general terms and provisions of the trust guarantees that we will execute and deliver for the benefit of the holders from time to time of preferred securities. Each trust guarantee will be separately qualified as an indenture under the Trust Indenture Act, and The Bank of New York Mellon will act as indenture trustee under the trust guarantee for the purposes of compliance with the provisions of the Trust Indenture Act. The terms of each trust guarantee will be those contained in such trust guarantee and those made part of the trust guarantee by the Trust Indenture Act. The following summary may not be complete and is subject to and qualified in its entirety by reference to the form of trust guarantee, which is filed as an exhibit to the registration statement that contains this prospectus, and the Trust Indenture Act. Each trust guarantee will be held by the guarantee trustee of each trust for the benefit of the holders of the preferred securities.

General

We will irrevocably and unconditionally agree to pay or make the following payments or distributions with respect to preferred securities, in full, to the holders of the preferred securities, as and when they become due regardless of any defense, right of set-off or counterclaim that each trust may have except for the defense of payment:

any accrued and unpaid distributions that are required to be paid on the preferred securities, to the extent the trust does not make such payments or distributions but has sufficient funds available to do so; and

upon a voluntary or involuntary dissolution, winding-up or termination of the trust, other than in connection with the distribution of related subordinated debt securities to the holders of preferred securities or the redemption of all of the preferred securities, the lesser of:

the total liquidation amount and all accrued and unpaid distributions on the preferred securities to the date of payment, to the extent the trust does not make such payments or distributions but has sufficient funds available to do so; and

the amount of assets of the trust remaining available for distribution to holders of such preferred securities in liquidation of the trust.

Our obligation to make a payment under each trust guarantee may be satisfied by our direct payment of the required amounts to the holders of preferred securities to which each trust guarantee relates or by causing the applicable trust to pay the amounts to the holders.

Modification of the Trust Guarantees; Assignment

Except with respect to any changes that do not adversely affect the rights of holders of preferred securities in any material respect, in which case no vote will be required, a trust guarantee may be amended only with the prior approval of the holders of not less than a majority in liquidation amount of the outstanding preferred securities to which the trust guarantee relates. The manner of obtaining the approval of holders of the preferred securities will be described in an accompanying prospectus supplement. All guarantees and agreements contained in a trust guarantee will bind our successors, assigns, receivers, trustees and representatives and will be for the benefit of the holders of

the outstanding preferred securities to which the trust guarantee relates.

Termination

Each trust guarantee will terminate when any of the following has occurred:

the debt securities held by the related trust have been distributed to the holders of the preferred securities; or

the amounts payable in accordance with the declarations of trust upon liquidation of the related trust have been paid in full.

Table of Contents

Each trust guarantee will continue to be effective or will be reinstated, as the case may be, if at any time any holder of preferred securities to which the trust guarantee relates must restore payment of any amounts paid on the preferred securities or under the related trust guarantee.

Events of Default

There will be an event of default under each trust guarantee if we fail to perform any of our payment or other obligations under that trust guarantee. However, other than with respect to a default in payment of any guarantee payment, we must have received notice of default and not have cured the default within 90 days after receipt of the notice. We, as guarantor, will be required to file annually with the guarantee trustee a certificate regarding our compliance with the applicable conditions and covenants under our trust guarantees.

Each trust guarantee will constitute a guarantee of payment and not of collection. The holders of a majority in liquidation amount of the preferred securities to which the trust guarantee relates will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the guarantee trustee in respect of the trust guarantee or to direct the exercise of any trust or power conferred upon the guarantee trustee under the trust guarantee. If the guarantee trustee fails to enforce the trust guarantee, any holder of preferred securities to which the trust guarantee relates may institute a legal proceeding directly against us to enforce the holder's rights under the trust guarantee, without first instituting a legal proceeding against the trust, the guarantee trustee or any one else. If we do not make a guarantee payment, a holder of preferred securities may directly institute a proceeding against us for enforcement of the trust guarantee for such payment.

Status of the Trust Guarantees

The applicable prospectus supplement relating to the preferred securities will indicate whether each trust guarantee is our senior or subordinated obligation. If a trust guarantee is our senior obligation, it will be our general unsecured obligation and will rank equal to our other senior and unsecured obligations.

If a trust guarantee is our subordinated obligation, it will be our general unsecured obligation and will rank as follows:

subordinate and junior in right of payment to all of our senior indebtedness, as defined in the subordinated debt indenture;

equally with our most senior preferred or preference stock currently outstanding or issued in the future, with any subordinated guarantees of other preferred securities we or our affiliates may issue and with other issues of subordinated debt securities; and

senior to our Common Stock.

The terms of the preferred securities provide that each holder of preferred securities by acceptance of the preferred securities agrees to any subordination provisions and other terms of the trust guarantees relating to applicable subordination.

Information Concerning the Guarantee Trustee

The guarantee trustee, except if we default under the trust guarantees, will undertake to perform only such duties as are specifically set forth in each trust guarantee and, in case a default with respect to a trust guarantee has occurred, must exercise the same degree of care and skill as a prudent person would exercise or use in the conduct of his or her own affairs. Subject to this provision, the guarantee trustee will not be obligated to exercise any of the powers vested in it by any trust guarantee at the request of any holder of the preferred securities unless it is offered reasonable indemnity against the costs, expenses and liabilities that it may incur.

Governing Law

Each trust guarantee will be governed by and construed in accordance with the laws of the State of New York.

Table of Contents

Effect of Obligations Under the Debt Securities and the Trust Guarantees

As long as we may make payments of interest and any other payments when they are due on the debt securities held by a trust, those payments will be sufficient to cover distributions and any other payments due on the preferred securities issued by such trust because of the following factors:

the total principal amount of the debt securities held by the trust will be equal to the total stated liquidation amount of the preferred securities and common securities issued by the trust;

the interest rate and the interest payment dates and other payment dates on the debt securities held by the trust will match the distribution rate and distribution payment dates and other payment dates for the preferred securities and common securities issued by the trust;

we will pay, and the trust will not be obligated to pay, directly or indirectly, all costs, expenses, debt, and obligations of the trust, other than obligations under the trust securities; and

the declaration of trust will further provide that the trust is not authorized to engage in any activity that is not consistent with its limited purposes.

We will irrevocably guarantee payments of distributions and other amounts due on the preferred securities to the extent a trust has funds available to pay such amounts as and to the extent set forth under this section. Taken together, our obligations under the debt securities, the related indenture, the declaration of trust and the trust guarantee will provide a full, irrevocable and unconditional guarantee of a trust's payments of distributions and other amounts due on the preferred securities. No single document standing alone or operating in conjunction with fewer than all of the other documents constitutes a trust guarantee. Only the combined operation of these documents effectively provides a full, irrevocable and unconditional guarantee of a trust's obligations under the preferred securities.

If and to the extent that we do not make the required payments on the debt securities, the trusts will not have sufficient funds to make its related payments, including distributions on the preferred securities. A trust guarantee will not cover any payments when a trust does not have sufficient funds available to make those payments. Your remedy, as a holder of preferred securities, will be to institute a direct action against us.

Table of Contents

PLAN OF DISTRIBUTION

Initial Offering and Sale of Securities

We and the trusts may offer and sell the securities from time to time as follows:

to or through underwriters or dealers for resale;

directly to other purchasers;

through designated agents; or

through a combination of any of these methods of sale.

In addition, we may issue the securities as a dividend or distribution or in a subscription rights offering to our existing security holders. In some cases, we or dealers acting with us or on our behalf may also purchase securities and reoffer them to the public by one or more of the methods described above. This prospectus may be used in connection with any offering of our securities or preferred securities of the trusts through any of these methods or other methods described in the applicable prospectus supplement.

If we offer securities in a subscription rights offering to our existing security holders, we may enter into a standby underwriting agreement with dealers, acting as standby underwriters. We may pay the standby underwriters a commitment fee for the securities they commit to purchase on a standby basis. If we do not enter into a standby underwriting arrangement, we may retain a dealer-manager to manage a subscription rights offering for us.

Any underwriter or agent involved in the offer and sale of our or the trusts' securities, and the compensation, discounts and commissions, if applicable, to be paid to such underwriter or agent, will be specified in the applicable prospectus supplement.

The securities, including securities issued or to be issued by us or the trusts in connection with arrangements under which we or the trusts agree to issue securities to underwriters or their affiliates on a delayed or contingent basis, that we and any trust distribute by any of these methods may be sold to the public, in one or more transactions, at:

a fixed price or prices, which may be changed;

market prices prevailing at the time of sale;

prices related to prevailing market prices; or

negotiated prices.

In connection with the sale of securities, underwriters may receive compensation from us or the trusts or from purchasers of the securities, for whom they may act as agents, in the form of discounts, concessions or commissions. Underwriters may sell the securities to or through dealers, and such dealers may receive compensation in the form of discounts, concessions or commissions from the underwriters and/or commissions from the purchasers for whom they may act as agents. Underwriters, dealers and agents that participate in the distribution of the securities may be deemed to be underwriters, and any discounts or commissions they receive from us or the trusts, and any profit on the resale of the securities they realize may be deemed to be underwriting discounts and commissions under the Securities Act. Any such underwriter, dealer or agent will be identified, and any such compensation received will be described, in the applicable prospectus supplement.

Unless otherwise specified in the applicable prospectus supplement, each series of the securities will be a new issue with no established trading market, other than the Common Stock. Any Common Stock sold pursuant to a prospectus supplement will be listed on the NYSE, subject to official notice of issuance. We and the trusts may elect to list any of the other securities on an exchange, but are not obligated to do so. It is possible that one

Table of Contents

or more underwriters may make a market in a series of the securities, but will not be obligated to do so and may discontinue any market making at any time without notice. Therefore, no assurance can be given as to the liquidity of the trading market for the securities.

If dealers are utilized in the sale of the securities, we and the trusts may sell the securities to the dealers as principals or the dealers may act as our agents. If the dealers act as principal, they may then resell the securities to the public at varying prices to be determined by such dealers at the time of resale. The names of the dealers and the terms of the transaction will be set forth in the applicable prospectus supplement.

We and the trusts may enter into agreements with underwriters, dealers and agents who participate in the distribution of the securities which may entitle these persons to indemnification by us and any trust against certain liabilities, including liabilities under the Securities Act, or to contribution with respect to payments which such underwriters, dealers or agents may be required to make. Any agreement in which we or the trusts agree to indemnify underwriters, dealers and agents against civil liabilities will be described in the applicable prospectus supplement.

In connection with an offering, the underwriters may purchase and sell securities in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of securities than they are required to purchase in an offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the securities while an offering is in progress.

The underwriters also may impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the underwriters have repurchased securities sold by or for the account of that underwriter in stabilizing or short-covering transactions.

These activities by the underwriters may stabilize, maintain or otherwise affect the market price of the securities. As a result, the price of the securities may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters at any time. These transactions may be effected on an exchange or automated quotation system, if the securities are listed on that exchange or admitted for trading on that automated quotation system, or in the over-the-counter market or otherwise.

If so indicated in the applicable prospectus supplement, we will authorize underwriters or other persons acting as our agents to solicit offers by certain purchasers to purchase the securities from us at the public offering price stated in the prospectus supplement pursuant to delayed delivery contracts providing for payment and delivery on a future date. These contracts will be subject to only those conditions stated in the prospectus supplement, and the prospectus supplement will state the commission payable to the solicitor of such offers.

Underwriters, dealers and agents, and their respective affiliates and associates, may engage in transactions with or perform services for us or the trusts, or be customers of ours or the trusts, in the ordinary course of business.

Sales by Selling Securityholders

Selling securityholders may use this prospectus in connection with resales of the securities. The applicable prospectus supplement will identify the selling securityholders and the terms of the securities. Selling securityholders may be deemed to be underwriters in connection with the securities they resell and any profits on the sales may be deemed to be underwriting discounts and commissions under the Securities Act. The selling securityholders will receive all the proceeds from the sale of the securities. We will not receive any proceeds from sales by selling securityholders.

Table of Contents

VALIDITY OF SECURITIES

Unless otherwise indicated in the applicable prospectus supplement, the validity of the securities that may be issued after the date of this prospectus has been passed upon for Prudential Financial by corporate counsel for Prudential Financial and for the underwriters, dealers or agents by Cleary Gottlieb Steen & Hamilton LLP. Unless otherwise indicated in the applicable prospectus supplement, certain matters of Delaware law relating to the trusts and its preferred securities will be passed upon for the trusts and us by Richards, Layton & Finger, P.A. Richards, Layton & Finger, P.A. may rely as to matters of New York and New Jersey law upon the opinion of our corporate counsel. Our corporate counsel may rely as to matters of Delaware law upon the opinion of Richards, Layton & Finger, P.A. As of the date of this prospectus, each such corporate counsel for Prudential Financial owned less than 1% of the Common Stock of Prudential Financial. Cleary Gottlieb Steen & Hamilton LLP regularly provides legal services to us and our subsidiaries. The opinion of our corporate counsel was based on assumptions about future actions required to be taken by Prudential Financial and the trustee in connection with the issuance and sale of the securities, about the specific terms of the securities and about other matters that may affect the validity of the securities but which could not be ascertained on the date of that opinion.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal controls over financial reporting (which is included in Management's Report on Internal Control Over Financial Reporting) incorporated in this prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2014 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.
