D. Major Businesses

(1) Wireless business

The Company provides wireless telecommunications services, characterized by its competitive strengths in handheld devices, affordable pricing, network coverage and an extensive contents library. Since the introduction of services employing LTE technology in July 2011, the telecommunications market for such services has grown, as demand for fast data transfer speeds and differentiated services has increased. Having reached one million subscribers by January 2012 and over 10 million subscribers by April 2013, the Company has solidified its leadership position in LTE services as it has done with its 3G services. In June 2013, the Company became the first telecommunications service provider in the world to provide commercial LTE-Advanced (LTE-A) services using carrier aggregation technology, and in June 2014, the Company reaffirmed its technological leadership by becoming the first to provide commercial 225 Mbps wideband LTE-A services, which is three times faster than LTE. In December 2014, the Company launched tri-band LTE-A, which is four times faster than LTE. The Company also launched unlimited LTE data plans and other innovative data plans, such as Rush hour / Subway Free plans that are unlimited data plans based on time, place and occasion (or, TPO), reflecting the data pattern usage of customers and their lifestyles. T-Phone, T-outdoor and T Kids Phone Joon, introduced in 2014, are customer-focused products that create additional value for customers. In addition, the Company released Pet Fit , a smart healthcare device for pets in April 2015 and T-Pet, which provides a variety of services such as a pet s live location information through a device embedded with USIM and positioning modules in May 2015. The Company expects that these products will have a lock-in effect on existing customers.

The Company plans to increase its profitability by strengthening its retention policy, which is the fundamental basis of competitiveness for telecommunication companies in this data-intensive era. The Company will lead the information and communication technology (ICT) trend by providing products through which customers can have a distinctive experience and by providing innovative services, such as the T-Phone, to transition to service-based competition.

In the business-to-business (B2B) area, the Company has strengthened its solutions business through the implementation of five main solution products: Smart Store, Smart Work, Smart Cloud, Green & Safety and M Ad & Payment. Since the commercial launch of its mobile IPTV services, B tv Mobile, in October 2012, the Company has gained over one million paying subscribers as of March 2014. The Company is the first telecommunications services provider in the world to provide full high definition streaming services using its LTE-A network. In 2014, the number of its mobile IPTV service subscribers increased by 1.56 million to reach 2.37 million subscribers by the end of the year, and as of June 30, 2015, the number of subscribers was 3.19 million.

In the area of healthcare, the Company achieved several tangible milestones in 2014: point-of-care diagnostic devices manufactured by a company of which the Company is the largest shareholder received approval from the U.S. Food and Drug Administration; the Company entered the Chinese healthcare market; and the Company was the first Korean company to export medical information systems. The Company plans to continue to find and develop new growth engines in the mid- to long-term. The Company also plans to seek out new growth engines in existing businesses, including the intelligence business, by utilizing its technologies relating to big data.

In order to strengthen our sales channels, the Company has been offering a variety of fixed-line and wireless telecommunication convergence products to its customers through PS&Marketing Co., Ltd. (PS&Marketing), one of its subsidiaries. Through Service Ace Co., Ltd., another subsidiary, the Company operates customer service centers in Seoul and provides telemarketing services. Furthermore, Network O&S Co., Ltd., the Company s subsidiary responsible for the operation of the Company s 2G to 4G networks (including its CDMA, WCDMA and LTE networks), provides customers with quality network services and provides the Company with technological know-how in network operations.

(2) Fixed-line business

SK Broadband Co., Ltd. (SK Broadband) is engaged in providing telecommunications, broadcasting and new media services and various other services that are permitted to be carried out by SK Broadband under relevant regulations, as well as business activities that are directly or indirectly related to providing those services. In 1999, SK Broadband launched its high-speed Internet service in Seoul, Busan, Incheon and Ulsan and currently provides such services nationwide. SK Broadband also commercialized its TV-Portal service in July 2006 and its IPTV service in January 2009 upon receipt of permit in September 2008.

(3) Other businesses

With respect to the Company's e-commerce business, 11th Street, a platform service that connects various sellers and purchasers online, continues to gain market share. In the commerce platform business area, the Company, utilizing the existing network of partner businesses of OK Cashbag, Korea's largest loyalty mileage program with 39.0 million members as of June 30, 2015, consumer information from big data, information technology, and other sources of competitive edges that can lead the industry, launched Syrup to provide smart shopping services to consumers and Syrup Store to provide integrated marketing solutions to partner businesses in June 2014. Syrup, a mobile wallet service upgraded and rebranded from its predecessor service, Smart Wallet, reached 14.1 million users as of June 30, 2015 and leads the online-to-offline commerce business.

In the location-based services business area, users of the Company's T-Map Navigation service reached 19.6 million as of June 30, 2015. T-Map Navigation provides real time traffic information and various local information. Utilizing location-based service technology in other services, including leisure, logistics and travel services, the Company provides increased convenience and added value to customers.

In the digital contents business area, the Company provides high-quality digital contents in its leading mobile contents marketplace, T Store, which had 23.8 million subscribers as of June 30, 2015 and which the Company plans to expand.

In the media business area, the Company provides the optimum environment for subscribers to access multimedia contents according to personal taste and preference through Hoppin and Btv mobile, available on various digital devices such as personal computers and mobile devices.

In the advertising business area, the Company is engaged in advertisement production, promotion services and research and consulting services to substantively help businesses increase their value in a rapidly evolving business environment. SK Planet Co., Ltd. (SK Planet) will continue to provide value to customers by constantly developing and improving its services.

SK Communications Co., Ltd. (SK Communications) provides integrated Internet portal services through NATE and instant messaging services through NATE-ON. Key sources of revenue for SK Communications are display advertising, search engine-based advertising, and contents and other services. Display advertising consists of image, video and Flash-based multimedia advertising carried on NATE and NATE-ON and aims to give greater exposure to the advertiser's brand name to the public. The increased effectiveness of online media as an advertising outlet has resulted in a greatly expanded advertiser base, and the increasing variety in the format of advertising has contributed to the growth of display advertising. Search engine-based advertising refers to the type of advertising that embeds advertisements within search results produced by searches of certain keywords on the NATE portal site. Search engine-based advertising has a certain appeal to small and medium-sized advertisers. Contents and other services include contents sales and providing certain types of services. Revenues from contents and other services are generated through revenues from NATE-ON instant messaging, custom decorations for mobile phones, cartoon strips, fortunetelling, movies and other contents services. In addition, SK Planet receives revenue from its services agreement with the Company in connection with operation of WAP wireless NATE services and application development.

The amount was paid in full as of January 6, 2014 and currently there is no amount outstanding.

[SK Broadband]

SK Broadband acquired subscriberships of regional cable and other service providers on several different occasions. Such acquisitions were intended to secure a stable subscriber base for its broadband Internet service, and, at the same time, increase the service coverage area. Because such acquisitions were conducted on a relatively small scale and involved the purchase of subscriberships, SK Broadband did not believe that such acquisitions rose to the level of purchasing an entire business line from another company or were likely to have a material impact on its business and therefore decided that such acquisitions did not require resolutions of its shareholders.

[Wireless Business]**A. Industry Characteristics**

As of June 30, 2015, the Korean mobile communication market can be considered to have reached its maturation stage with more than a 100% penetration rate. However, the Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology and the development of highly advanced LTE-A, LTE and 3G smartphones which enable the provision of convergence services for multimedia contents, mobile commerce, telematics, new media and other related services. In addition, through the commercialization of LTE network in July 2011 and LTE-A network in June 2013, B2B businesses, such as the corporate connected workforce business which can directly contribute to an enhancement in productivity, are expected to grow rapidly. In the first half of 2014, wideband LTE-A service was commercialized and on December 29, 2014, tri-band LTE-A service with a maximum speed of 300 Mbps was also commercialized. Such achievements were the building blocks towards the Company's LTE penetration reaching 62% as of June 30, 2015.

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Sales revenue related to data services is expected to increase due to the increasing popularity of smartphones and high-speed wireless networks. There is also a growing importance to the business-to-business segment, which creates added value by selling and developing various solutions. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

D. Business Overview and Competitive Strengths

The Company is seeking to transform itself from a telecommunications service provider into a comprehensive ICT service provider. It has continued to innovate the scope of its services and achieved strong growth in subscribers amid fierce competition and rate cuts. As a result, for the six months ended June 30, 2015, the Company recorded Won 8.5 trillion in revenue and Won 0.8 trillion in operating income on a consolidated basis and Won 6.3 trillion in revenue and Won 0.8 trillion in operating income on a separate basis.

The number of subscribers (including MVNO subscribers) as of June 30, 2015 was 28.7 million, an increase of approximately 290,000 from the previous quarter due to the popularity of the newly launched data-centric tariff plans. In particular, the number of smartphone subscribers as of June 30, 2015 was 20.0 million, an increase of approximately 220,000 from the previous quarter propelled by 17.9 million LTE subscribers, solidifying the Company's market leadership. Following the launch of commercial LTE services in July 2011, the Company became the first telecommunications service provider in the world to launch commercial wideband LTE-A services in June 2014. In December 2014, the Company launched tri-band LTE-A services. By launching various high quality services utilizing the LTE-A and wideband LTE networks such as group video conference call services, full high definition mobile IPTV streaming services, and T Baseball Multiview, which allows users to watch multiple baseball games on one screen, the Company plans to provide an innovative user experience, enhance customer satisfaction and increase profitability.

The Company has proved that it has superior network quality compared to its competitors according to the Korea Communications Commission quality evaluations. The Company has also proved to be the leader in Korea's top three customer satisfaction indices: according to the National Customer Satisfaction Index, Korean Customer Satisfaction Index and Korean Standard Service Quality Index, the Company has continued to

Edgar Filing: SK TELECOM CO LTD - Form 6-K

hold the leading position for 18 years, 17 years and 16 years, respectively.

SK Telink, a consolidated subsidiary of the Company, expanded its operations to the MVNO business based on its technical expertise and know-how obtained in its international telecommunications business and launched its MVNO service, 7Mobile, which is offered at reasonable rates and provides excellent quality. SK Telink is increasing its efforts to develop low-cost distribution channels and create niche markets through targeted marketing towards customers with lower average revenue per user. An MVNO leases the networks of a mobile network operator (MNO) and provides wireless telecommunication services under its own brand and fee structure without owning telecommunication networks or frequencies.

Table of Contents

Network O&S, a subsidiary of the Company responsible for the operation of the Company's base stations and related transmission and power facilities, offers quality fixed-line and wireless network services to customers, including mobile office products to business customers.

PS&Marketing, a subsidiary of the Company, provides a sales platform for products of the Company and SK Broadband, including fixed-line and wireless telecommunication products that address customers' needs for various convergence products. PS&Marketing provides differentiated service to clients through the establishment of new sales channels and product development.

[Fixed-line Business]**A. Industry Characteristics**

As subscribers to various bundled wireless and fixed-line products continue to increase, the IPTV business is evolving to satisfy diverse customer needs for media services through differentiated service offerings, including mobile IPTV, bundled wireless and IPTV products and ultra-high definition services for smart televisions. The market for our corporate business is also growing, with cloud computing, mobile offices and other new information and communications technologies being commercialized. The increased usage of smartphones and tablet computers, the pilot programming of commercial ultra-high definition television broadcasting services and competition for wideband LTE services have greatly increased data traffic, thereby further emphasizing the importance of fixed-line network infrastructure that is capable of handling large capacities of data traffic with stability and efficiency.

C. Cyclical Nature and Seasonality

High-speed Internet, fixed-line telephone and IPTV services are mature markets that are comparatively less sensitive to cyclical economic changes as such services have become more of a necessity and the market has matured. The telecommunications services market overall is not expected to be particularly affected by economic downturns due to the low income elasticity of demand for telecommunication services.

D. Business Overview and Competitive Strengths

In 1999, the Company was the first in the world to commence commercial ADSL services. On the back of its premium technology and enhanced competitiveness achieved through bundled products, it is currently expanding subscriber base across all of its businesses, including broadband Internet, telephone and IPTV. In particular, SK Broadband has positioned itself to focus on corporate customer services and IPTV services as key strategic areas for mid- to long-term growth, exploiting opportunities in new ICT-based businesses that have led to revenue growth and providing differentiated contents in its IPTV business by securing popular programming, which includes exclusive children’s channels and live broadcasts of Major League Baseball games. In addition, the Company has reinforced its leadership in the ultra-high definition broadcasting market by launching ultra-high definition services that require no set-top boxes in April 2014 and by commercializing ultra-high definition set-top boxes for the first time in Korea in September 2014. Furthermore, the Company was the first in the industry to adopt solutions to upgrade full high definition to ultra-high definition, and the Company also strengthened the line-up of ultra-high definition contents by securing access to diverse contents provided by Sony and NBC Universal. Moreover, the Company provides the greatest number of channels in full high definition in the IPTV market due to its recent upgrade of all 130 live high definition channels to full high definition.

In September 2013, the Company developed technology that compresses videos for its ultra-high definition IPTV services. During the first quarter of 2014, the Company commercialized new transmission technology that can more efficiently transmit signals on the hybrid fiber-coaxial network despite its limited frequency. Furthermore, the Company solidified its technological leadership for providing ultra-high definition broadcasting for wireless and fixed line in the IPTV industry by commercializing a unique ultra-high-definition service that can be provided directly to smart televisions without the installation of smart set-top boxes in April 2014 and started transmitting ultra-high definition contents to mobile IPTV in May 2014.

SK Telink, a provider of international telecommunications service, has been able to establish itself as a market leader as a result of its affordable pricing, proactive marketing and the quality of its services. It launched a mobile phone-based international calling service under the brand name 00700 in 1998, creating a new niche market within the long-distance telephony market that was otherwise dominated by existing service providers. In 2003, SK Telink was designated a common carrier for international calling services, which allowed us to expand our international calling services to fixed-line international calling services. SK Telink plans to strategically target the convergence of wireless and fixed-line telecommunications and strengthen its existing business, including international and long-distance calling services, value-added services for local calling and B2B services and video conference call services while aiming to satisfy the diverse needs of customers by providing quality solutions at reasonable prices.

A. Industry Characteristics

As the number of smartphones distributed in Korea exceeds 40 million, the growth in various mobile devices has spurred the rise of the service provider with a strong platform business as the leader in the ICT market. It is becoming increasingly important to enhance competitiveness by building a platform with large data capacity to handle the increase in data transmission.

A platform business acts as an intermediary by promoting interactions among various customer groups, thereby generating new values. It is important for a platform business to continually attract subscribers and users and to create an ecosystem with certain lock-in effects. A platform can exist in various forms, including as a technological standard (iOS, Android OS), a subscriber-based service platform (Facebook, Twitter) or a marketplace (Amazon, T Store). Platform businesses are evolving and expanding globally.

Table of Contents

A platform business has strong growth potential due to its connectivity with related services and ease of global expansion. Apple became a world-leading smartphone producer based on its innovative design and the competitive strength of its App Store platform. Google has created a new ecosystem of long-tail advertising by attracting millions of third parties to its advertising platform, as well as showing strong growth in mobile markets with its competitive platform based on Android OS. It is becoming increasingly important to enhance competitiveness through a database that can register and analyze purchase patterns of customers across all areas and a platform with large data capacity with which to utilize this database and provide differentiated services to customers.

B. Growth Potential

The scope and value generated by the platform business, including application and content marketplaces and N-screen services, continue to increase as smartphones and tablet computers become more popular and the bandwidth and speed of network infrastructure improve. As the wireless network evolves to LTE, business opportunities for the platform business exist, including multimedia streaming, N-screen service based on cloud technology and high-definition location-based services. Since the platform business realizes profit by connecting with advertisements or commerce sites after building a critical mass of subscribers and traffic, the recent growth in the advertising and commerce markets is expected to present an opportunity for platform businesses. The importance of building a platform with large data capacity that is connected to various digital contents and commerce is expected to increase in the future.

C. Domestic and Overseas Market Conditions

(1) Commerce markets

The Company expects that online commerce markets will continue to grow due to the growth potential of the Internet shopping population, the strengthening of online business models by off-line operators and the rapid rise of mobile commerce. Recently, due to the widespread use of smartphones and social media, the commercialization of location-based services and the development of big data technology, online to offline (or, O2O) business, which is a concept of attracting customers to offline stores using online and mobile environments, is being highlighted as a new field in the online commerce market industry.

(2) Digital contents

The growth of application marketplaces, which started with Apple's App Store, provides the platform business with new opportunities for revenue generation. The competitive paradigm is shifting from a competition among platform operators toward a competition among eco-systems that include application developers as well as platform operators.

(3) Media

Due to an increase in the number of devices owned by each user and an increase in network speed, each user can now enjoy music or video files anywhere and anytime by storing them in cloud servers, called N-screen service. Users can recommend music to other users through social networking services, and this is expected to become a distribution model for digital media contents. Various service providers are competing in this market, expecting a strong growth in the online and mobile video market.

D. Business Overview and Competitive Strengths

The Company plans to expand its platform ecosystem focusing on its "Open & Collaboration" motto in operating its commerce business such as 11th Street, Syrup, and OK Cashbag, its digital contents business such as T Store and its location-based service business such as T-Map Navigation, thereby ultimately increasing its enterprise value.

(1) Commerce

11th Street, an online marketplace, has continued its growth through effective marketing and customer satisfaction. Despite its later entry into the online commerce market (launched in 2008), which was already divided between Auction and G-Market, it is leading the domestic e-commerce market and is also rapidly growing in the mobile commerce market. Growth plans involving overseas joint ventures based on 11th Street's business expertise have resulted in the successful launch of an open online commerce market in Turkey in partnership with Doğuş Group in March 2013. In Indonesia, an open market platform was successfully launched through a joint venture established in July 2013 with PT XM Axiata Tbk, a wireless telecommunications company in Indonesia. In October 2014, SK Planet and Celcom Axiata Berhad, which is a leading telecommunications service provider in Malaysia, established a joint venture, Celcom Planet, and launched online commerce services tailored to the Malaysian market in April 2015.

Table of Contents

Syrup is a consumer-oriented commerce service with the goal of minimizing its customers' time and efforts while maximizing the economic benefits by providing information about coupons and events based on time, place and occasion. To achieve this goal, Syrup combines location-based services, such as geo-fencing, a virtual perimeter technology using a global positioning system (or, GPS) and Bluetooth Low Energy (or, BLE), with big data analysis of consumption patterns. Syrup's business partners can benefit from cost-effective marketing through Syrup by utilizing statistics and analysis regarding consumers' frequency of visits, preferred products, and consumption patterns. Furthermore, Syrup is strengthening its service foundation and competitiveness through the continual release of vertical products such as Syrup Pay, Syrup Order and Syrup Table and the expansion of Merchant.

OK Cashbag is a point-based loyalty marketing program which has grown to become a global top-tier loyalty marketing program since its inception in 1999. Customers have access to increased benefits through accumulation of loyalty reward points and partner companies use OK Cashbag as a marketing resource. With 39.0 million subscribers, OK Cashbag maintains a leading position in the industry and plans to continue strengthening its position by providing customized services befitting customers' needs and market conditions.

(2) Location-based services

T-Map Navigation provides map, local information, real-time traffic information and navigation services. With cumulative subscribers of 19.6 million as of June 30, 2015, T-Map Navigation is one of the leading location-based service platforms in Korea. By entering the Online to Offline service area with T map Taxi, T map Public Transportation and others, the Company is expanding its mobile platform foundation that connects day-to-day life. The Company is broadening the range of its location-based services by also providing infotainment systems to commercial vehicle businesses as well as providing localized content on its products, such as region-specific information and advertisements. The Company plans to further develop the T-Map Navigation platform by initiating open application programming interface-based services, providing services to more diverse types of devices and providing local area-based services.

(3) Digital contents

T Store, launched in September 2009, reached 23.8 million subscribers and cumulative downloads of 2.8 billion as of June 30, 2015, solidifying its leadership position in the application market and plans to widen its services to tablets and navigation devices. The Company intends to further develop T Store into a personalized gateway and mobile playground through expansion of the scope of serviceable devices, reinforcement of digital content offerings and enhancement of search services, among other things.

(4) Social networking services (SNS) and Internet portal services

The Company's instant messenger service, Nate-On, had a market share of 27.6% in the instant messenger market in Korea, with 4.6 million net users who logged in during the month of June 2015. The Company's Internet search portal service, Nate, had a page-view market share of 4.5% as of June 30, 2015. (Source: Korean Click, based on fixed-line access)

Satellite DMB service

The Company launched its Hanbyul satellite in 2004 and received government approval in December 30, 2004 to provide satellite DMB services. Broadcasting through satellite DMB commenced in May 2005 and satellite DMB services expanded nationwide thereafter. On August 23, 2012, the board of directors of SK Telink resolved to discontinue operation of its satellite DMB services due to the rapid decrease in satellite DMB subscribers and the continued burden of fixed costs.

(3) Policies for Allowance for Doubtful Accounts

The Company establishes allowances for doubtful accounts based on the likelihood of recoverability of trade and other receivables based on their aging at the end of the period and past customer default experience for the past two years. With respect to trade receivables relating to wireless telecommunications services, the Company considers the likelihood of recovery based on past customer default experience and the length of default in connection with the type of default (e.g., whether the customer's service has been terminated or is continued). For such trade receivables that have been overdue for more than two years after the customer's service has been terminated, the Company records an allowance of 100% of such receivables. For such trade receivables that have been overdue for less than two years after the customer's service has been terminated, or relates to a customer that is continuing his service, the Company records an allowance of a certain percentage of such receivable. Consistent with customary practice, the Company writes off trade and other receivables for which the prescription period has passed or that are determined to be impossible or economically too costly to collect, including receivables that are less than Won 200,000 and more than six months overdue and receivables that have been determined to be the subject of identity theft.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To The Board of Directors and Shareholders

SK Telecom Co., Ltd.:

Reviewed financial statements

We have reviewed the accompanying condensed consolidated interim financial statements of SK Telecom Co., Ltd. and its subsidiaries (the Group), which comprise the condensed consolidated statement of financial position as of June 30, 2015, the related condensed consolidated statements of income and comprehensive income for the three and six-month periods ended June 30, 2015 and 2014, the condensed consolidated interim statements of changes in equity and cash flows for the six-month periods ended June 30, 2015 and 2014, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards (K-IFRS) No.1034 Interim Financial Reporting, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements referred to above are not prepared fairly, in all material respects, in accordance with K-IFRS No.1034 Interim Financial Reporting.

Other matters

The consolidated statement of financial position of the Group as of December 31, 2014, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this report, were audited by us in accordance with Korean Standards on Auditing and our report thereon, dated February 23, 2015, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2014, presented for comparative purposes, is not different from that audited by us in all material respects.

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

(2) List of subsidiaries, Continued

- (*1) On March 20, 2015, the Board of Directors of the Parent Company decided to grant 0.0168936 share of its treasury stock in exchange for 1 share of SK Broadband Co., Ltd., a subsidiary of the Parent Company, to the shareholders of SK Broadband Co., Ltd. as of June 9, 2015. After the stock exchange, SK Broadband Co., Ltd. became a wholly-owned subsidiary of the Parent Company.
- (*2) Due to the shareholders' agreement which grants put option to the non-controlling shareholders, this entity is consolidated as a wholly owned subsidiary in the consolidated financial statements. The Parent Company newly acquired 50,377 and 326,748 shares of Neosnetworks Co., Ltd. by participating in the capital increase and capital increase without consideration respectively during the six-month period ended June 30, 2015.
- (*3) Although the Group has less than 50% of the voting rights of IRIVER LIMITED, it is considered to have de facto control since the Group holds significantly more voting rights than any other vote holder or organized group of vote holders, and the other shareholdings are widely dispersed.
- (*4) Changes in subsidiaries are explained in Note 1-(4).

In accordance with the Group's accounting policy relating to the scope of consolidation, small-sized subsidiaries including IM Shopping Inc. were excluded from the list of subsidiaries as the effects on the Group's consolidated financial statements are not material considering both individual and overall quantitative and qualitative effects.

Notes to the Condensed Consolidated Interim Financial Statements

For the six-month periods ended June 30, 2015 and 2014

2. Basis of Preparation

(1) Statement of compliance

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRS), as prescribed in the Act on External Audits of Stock Companies.

These condensed consolidated interim financial statements were prepared in accordance with K-IFRS No. 1034, Interim Financial Reporting as part of the period covered by the Group s K-IFRS annual financial statements. Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the last annual consolidated financial statements as at and for the year ended December 31, 2014. These condensed consolidated interim financial statements do not include all of the disclosures required for full annual financial statements.

(2) Use of estimates and judgments

1) Critical judgments, assumptions and estimation uncertainties

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as of and for the year ended December 31, 2014.

2) Fair value measurement

Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Group has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the finance executive.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of K-IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- ü Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- ü Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- ü Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Information about assumptions used for fair value measurements are included in Note 33.

(3) Common control transactions

SK Holdings Co., Ltd. (the Ultimate Controlling Entity) is the Ultimate Controlling Entity of the Parent Company because it controls the Parent Company. Accordingly, gains and losses from business acquisitions and dispositions involving entities that are under the control of the Ultimate Controlling Entity are accounted for as common control transactions within equity.

3. Significant Accounting Policies

Except as described below, the accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as of and for the year ended December 31, 2014. The following changes in accounting policy are also expected to be reflected in the Group's consolidated financial statements as at and for the year ending December 31, 2015.

(1) Changes in accounting policies

The following amendment to existing standards has been published and are mandatory for the Group for annual periods beginning on or after July 1, 2014.

1) K-IFRS 1019 Employee Benefits Employee contributions Amendments to K-IFRS 1019 introduced a practical expedient to accounting for defined benefit plan, when employees or third parties pay contributions if certain criteria are met. According to the amendments, the entity is permitted to recognize those contributions as a reduction of the service cost in the period in which the related service is rendered, instead of forecast future contributions from employees or third parties and attribute them to periods or service as negative benefits.

There is no material impact of the application of this amendment on the consolidated financial statements.

4. Operating Segments

The Group's operating segments have been determined to be each business unit, for which the Group provides independent services and merchandise. The Group's reportable segments are: 1) cellular services, which include cellular voice service, wireless data service and wireless internet services, and 2) fixed-line telecommunication services, which include telephone services, internet services, and leased line services. All other operating segments, which include the Group's internet portal services and other operations, do not meet the quantitative thresholds to be considered reportable segments and are presented as Others.

Intersegment sales and purchases are conducted on an arms-length basis and eliminated on consolidation. Since there are no intersegment sales of inventory, there is no unrealized intersegment profit to be eliminated on consolidation. The Group principally operates its business in its domestic market in Korea and the amounts outside of Korea are immaterial, therefore no entity-wide geographical information is presented.

No single customer contributed 10% or more to the Group's total revenue for the six-month periods ended June 30, 2015 and 2014.

33. Financial Risk Management

(1) Financial risk management

The Group is exposed to credit risk, liquidity risk and market risk. Market risk is the risk related to the changes in market prices, such as foreign exchange rates, interest rates and equity prices. The Group implements a risk management system to monitor and manage these specific risks.

The Group's financial assets under financial risk management consist of cash and cash equivalents, financial instruments, available-for-sale financial assets, trade and other receivables. Financial liabilities consist of trade and other payables, borrowings, and debentures.

1) Market risk

(i) Currency risk

The Group is exposed to currency risk mainly on exchange fluctuations on recognized assets and liabilities. The Group manages currency risk by currency forward, etc. if needed to hedge currency risk on business transactions. Currency risk occurs on forecasted transaction and recognized assets and liabilities which are denominated in a currency other than the functional currency of the Group.

CHF			299,163	363,241
Others	1,411	487	1	1
		225,165		2,740,539

In addition, the Group has entered into cross currency swaps to hedge against currency risk related to foreign currency borrowings and debentures. (See Note 21)

As of June 30, 2015, effects on income (loss) before income tax as a result of change in exchange rate by 10% are as follows:

(In millions of won)

	If increased by 10%	If decreased by 10%

EUR	1,363	(1,363)
JPY	31	(31)
Others	48	(48)
	8,491	(8,491)

(ii) Equity price risk

The Group has equity securities which include listed and non-listed securities for its liquidity and operating purpose. As of June 30, 2015, available-for-sale equity instruments measured at fair value amount to 1,097,621 million.

(iii) Interest rate risk

Since the Group's interest bearing assets are mostly fixed-interest bearing assets, as such, the Group's revenue and operating cash flow are not influenced by the changes in market interest rates. However, the Group still has interest rate risk arising from borrowings and debentures.

Accordingly, the Group performs various analysis of interest rate risk, which includes refinancing, renewal, alternative financing and hedging instrument option, to reduce interest rate risk and to optimize its financing.

33. Financial Risk Management, Continued

(1) Financial risk management, Continued

1) Market risk, Continued

(iii) Interest rate risk, Continued

The Group's interest rate risk arises from floating-rate borrowings and debentures. As of June 30, 2015, floating-rate borrowings and debentures amount to 29,300 million and 337,230 million respectively, the Group has entered into interest rate swaps to hedge interest rate risk related to floating-rate debentures. (See Note 21) If interest rate only increases (decreases) by 1%, income before income taxes for the six-month period ended June 30, 2015 would have been changed 293 million due to the interest expense from floating-rate borrowings.

2) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet his/her contractual obligations. The maximum credit exposure as of June 30, 2015 and December 31, 2014 are as follows:

(In millions of won)

	June 30, 2015	December 31, 2014
Cash and cash equivalents	829,462	833,129
Financial instruments	286,218	313,699
Available-for-sale financial assets	30,805	15,498
Accounts receivable - trade	2,508,496	2,460,686
Loans and receivables	1,103,092	1,123,507
Derivative financial assets	67,494	70,035
Financial assets at fair value through profit or loss		7,817
	4,825,567	4,824,371

To manage credit risk, the Group evaluates the credit worthiness of each customer or counterparty considering the party's financial information, its own trading records and other factors; based on such information, the Group establishes credit limits for each customer or counterparty.

For the six-month period ended June 30, 2015, the Group has no trade and other receivables or loans which have indications of significant impairment loss or are overdue for a prolonged period. As a result, the Group believes that the possibility of default is remote. Also, the Group's credit risk can rise due to transactions with financial institutions related to its cash and cash equivalents, financial instruments and derivatives. To minimize such risk, the Group has a policy to deal with high credit worthy financial institutions. The amount of maximum exposure to credit risk of the Group is the carrying amount of financial assets as of June 30, 2015.

In addition, the aging of trade and other receivables that are overdue at the end of the reporting period but not impaired is stated in Note 6 and the analysis of financial assets that are individually determined to be impaired at the end of the reporting period is stated in Note 29.

3) Liquidity risk

The Group's approach to managing liquidity is to ensure that it will always maintain sufficient cash equivalents balance and have enough liquidity through various committed credit lines. The Group maintains flexibly enough liquidity under credit lines through active operating activities.

Contractual maturities of financial liabilities as of June 30, 2015 are as follows:

(In millions of won)

	Carrying amount	Contractual cash flows	Less than 1 year	1 - 5 years	More than 5 years
