Gross unrealized depreciation		(444,612)

The Fund is subject to equity price risk in the normal course of pursuing its investment objective. The Fund enters into a series of S&P 500 written call and put option spread transactions to enhance return while limiting any potential loss. A written call option spread on a stock index consists of selling call options on the index and buying an equal number of call options on the same index and with the same expiration, but with a higher exercise price. A written put option spread on a stock index consists of selling put options on an index and buying an equal number of put options on the same index and with the same expiration, but with a lower exercise price. Any net premiums received are reduced by the premiums paid on the purchased options. The risk of loss if written options expire in the money is limited to the difference in exercise price of the written and purchased option positions. The Fund's use of option spreads rather than stand alone options, staggering roll dates across the option position portfolio, and utilizing exchange-traded options guaranteed by the Options Clearing Corporation, a market clearinghouse, serve to mitigate risk in its option strategy.

The fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) and whose primary underlying risk exposure is equity price risk at September 30, 2015 was as follows:

	Fair Value	
Derivative	Asset Derivative	Liability Derivative
Purchased options	\$ 417,404	\$
Written options		(1,740,582)

Edgar Filing: Eaton Vance Tax-Advantaged Bond & Option Strategies Fund - Form N-Q

Total	\$ 417,404	\$ (1,740,582)
--------------	-------------------	-----------------------

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

Edgar Filing: Eaton Vance Tax-Advantaged Bond & Option Strategies Fund - Form N-Q

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At September 30, 2015, the hierarchy of inputs used in valuing the Fund's investments and open derivative instruments, which are carried at value, were as follows:

Asset Description	Level 1	Level 2	Level 3	Total
Tax-Exempt Municipal Securities	\$	\$ 128,087,900	\$	\$ 128,087,900
Taxable Municipal Securities		12,180,752		12,180,752

Short-Term Investments		819,804		819,804
Total Investments	\$ 138,044	\$ 141,367,816	\$	\$ 141,505,860

Total	\$ (493,258)	\$ (1,247,324)	\$	\$ (1,740,582)

The Fund held no investments or other financial instruments as of December 31, 2014 whose fair value was determined using Level 3 inputs. At September 30, 2015, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.

For information on the Fund's policy regarding the valuation of investments and other significant accounting policies, please refer to the Fund's most recent financial statements included in its semiannual or annual report to shareholders.
