FORM 6-K

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Report of Foreign Private Issuer
Pursuant to Rule 13a-16 or 15d-16
of the Securities Exchange Act of 1934
For the month of February 2016

CGG

Tour Maine Montparnasse - 33 Avenue du Maine BP 191 - 75755 PARIS CEDEX 15
(address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F Form 40-F

Edgar Filing: CGG - Form 6-K

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82

Sercel 508^{XT} land acquisition system passes 1 million VP milestone in Saudi Arabia

Paris, France February 23, 2016

CGG announced today the successful large-scale deployment of Sercel's new-generation 508^{XT} land seismic acquisition system on a high-productivity super crew conducting a seismic survey in Saudi Arabia. The system is currently deployed on a crew operated by ARGAS, CGG's joint venture with TAQA, and achieved the milestone of one million VPs (Vibrated Points) in January 2016. Since its launch in 2013, the 508^{XT} has been successfully field-proven in the toughest conditions in various environments, such as Arctic, farmland and desert areas.

The ARGAS land crew has been working in Saudi Arabia since October 2015, where it has consistently provided outstanding vibroseis production rates while recording highly accurate seismic data. The crew is currently operating with 12 fleets of two Sercel Nomad 65 *Neo* all-terrain broadband vibrators using the DS4 (Distance-Separated Simultaneous Slip-Sweep) vibroseis source method. For data recording, the crew is employing nearly 40,000 channels and 360,000 sensors in a 150 km² active spread.

Its deployment on this high-channel-count survey enables the Sercel 508^{XT} system to demonstrate the full benefits of its game-changing cross-technology (X-Tech) architecture, which combines the best of cabled and wireless system characteristics to optimize crew productivity and reduce operational downtime.

Pascal Rouiller, Sercel CEO, said: "This new performance milestone underlines Sercel's success at designing the most advanced equipment solutions to meet the needs of high-productivity seismic acquisition programs. We believe that our 508^{XT}'s unique X-Tech recording capabilities represent a breakthrough for all our customers, whether they wish to maximize crew productivity or increase their operating flexibility."

Saad S. Al-Akeel, ARGAS CEO, said: "In addition to the direct benefits of its X-Tech architecture, the 508^{XT}'s low power consumption combined with a requirement for less field units and batteries brings a significant weight saving, directly impacting our crew productivity and minimizing our HSE exposure. In addition, the 508^{XT} equipment is easy to manage and its reliability so far has been excellent."

About CGG

CGG (www.cgg.com) is a fully integrated Geoscience company providing leading geological, geophysical and reservoir capabilities to its broad base of customers primarily from the global oil and gas industry. Through its three complementary businesses of Equipment, Acquisition and Geology, Geophysics & Reservoir (GGR), CGG brings value across all aspects of natural resource exploration and exploitation.

CGG employs more than 7,000 people around the world, all with a Passion for Geoscience and working together to deliver the best solutions to its customers.

CGG is listed on the Euronext Paris SA (ISIN: 0000120164) and the New York Stock Exchange (in the form of American Depositary Shares. NYSE: CGG).
