The Markets in Review

Dear Shareholder,

Risk assets, such as stocks and high yield bonds, enjoyed strong performance in the 12 months ended February 28, 2017. It was a different story for higher-quality assets such as U.S. Treasuries, which generated muted returns after struggling in the latter part of 2016 as reflationary expectations in the United States helped drive a pick-up in global growth and investors braced for higher interest rates.

Markets showed great resilience during the period. Big surprises such as the United Kingdom's vote to leave the European Union and the outcome of the U.S. presidential election brought spikes in equity market volatility, but they were ultimately short-lived. Instead, investors used the sell-offs to seize upon buying opportunities, allowing markets to quickly rebound. We believe this reinforces the case for taking the long view rather than reacting to short-term market noise.

The global reflationary theme—rising nominal growth, wages and inflation—was the dominant driver of asset returns during the period, outweighing significant political upheavals and uncertainty. This trend accelerated after the U.S. election and continued into the beginning of 2017, stoked by expectations for an extra boost to U.S. growth via fiscal policy.

Although economic momentum is gaining traction, the capacity for rapid global growth is restrained by structural factors including an aging population, low productivity growth and excess savings. A tempered economic growth trend and high valuations across most assets have set the stage for muted investment returns going forward.

Equity markets still have room to move, although the disparity between winners and losers is widening, making selectivity increasingly important. Fixed income investors are also facing challenges as bond markets recalibrate to accommodate rising rates and higher inflation expectations. And in a world where political risk and policy uncertainty abound, there is no lack of potential catalysts for higher volatility.

In this environment, investors need to think globally, extend their scope across a broad array of asset classes and be nimble as market conditions change. We encourage you to talk with your financial advisor and visit blackrock.com for further insight about investing in today's markets.

Sincerely,

Rob Kapito

FEBRUARY 28, 2017

3

Fund Summary as of February 28, 2017**BlackRock Defined Opportunity Credit Trust****Fund Overview**

BlackRock Defined Opportunity Credit Trust's (BHL) (the Fund) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities). The Fund invests, under normal market conditions, at least 80% of its managed assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt; (iii) credit securities that are rated below investment grade by a nationally recognized credit rating organization or unrated credit securities that are deemed to be of comparable quality by the investment adviser; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

BHL is scheduled to terminate no later than December 31, 2017.

No assurance can be given that the Fund's investment objectives will be achieved.

Performance and Portfolio Management Commentary

Returns for the six months ended February 28, 2017 were as follows:

	Returns Based On	
	Market Price	NAV
BHL ^{1,2}	6.26%	4.02%
Lipper Loan Participation Funds ³	13.07%	6.22%

¹ All returns reflect reinvestment of dividends and/or distributions.

² The Fund moved from a discount to NAV to a premium during the period, which accounts for the difference between performance based on price and performance based on NAV.

³ Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. The following discussion relates to the Fund's absolute performance based on NAV:

What factors influenced performance?

Floating rate loan interests (bank loans) benefited from the strong appetite for credit during the six-month period. From a sector perspective, the largest absolute contributors to performance included technology, healthcare, and consumer cyclical services. On a credit rating basis, B-rated, BB-rated and CCC-rated positions were the largest contributors over the semi-annual period. Finally, from an asset allocation standpoint, the Fund's tactical positions in high yield bonds and collateralized loan obligations benefited performance.

From a sector perspective, exposure to retailers was the sole absolute detractor from Fund performance for the six-month period. From a credit rating perspective, D-rated names posted slightly negative results while all other credit-rating segments posted positive returns.

Describe recent portfolio activity.

During the period, the Fund maintained its overall focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. The Fund has concentrated its investments in strong companies with stable cash flows and high quality collateral, with the ability to meet interest obligations and ultimately return principal. From a sector standpoint, the Fund reduced exposure to consumer cyclical services overall and in particular to retailers, on the view that the outlook for the space continues to deteriorate on the back of weaker revenues. By contrast, the Fund increased its allocation to the health care and pharmaceutical sectors. With the bank loan universe trading over par, the Fund selectively added to its fixed rate high yield bond allocation in order to add price appreciation potential, as well as to garner higher quality energy exposure relative to that available within bank loans.

Describe portfolio positioning at period end.

The Fund held a majority of its portfolio in floating rate bank loans, with a modest position in relatively conservative high yield corporate bonds. The Fund maintained its highest concentration in higher coupon B-rated loans of select issuers while limiting exposure to low coupon BB-rated loans. Additionally, the Fund held a minimal position in loans rated CCC and below, while also avoiding the more volatile segments of that universe, such as oilfield services and retailers. Leading individual positions included Level 3 Communications, Inc. (wirelines), Altice NV (cable & satellite), and First Data Corp. (technology).

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Fund Summary as of February 28, 2017

BlackRock Floating Rate Income Strategies Fund, Inc.

Fund Overview

BlackRock Floating Rate Income Strategies Fund, Inc.'s (FRA) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its managed assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade at the time of investment or, if unrated, are considered by the investment adviser to be of comparable quality. The Fund may invest directly in floating rate debt securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

Performance and Portfolio Management Commentary

Returns for the six months ended February 28, 2017 were as follows:

	Returns Based On	
	Market Price	NAV
FRA ^{1,2}	11.02%	5.13%
Lipper Loan Participation Funds ³	13.07%	6.22%

¹ All returns reflect reinvestment of dividends and/or distributions.

² The Fund's discount to NAV narrowed during the period, which accounts for the difference between performance based on price and performance based on NAV.

³ Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. The following discussion relates to the Fund's absolute performance based on NAV:

What factors influenced performance?

Floating rate loan interests (bank loans) benefited from the strong appetite for credit during the six-month period. On a sector basis, the largest contributors included holdings within technology, health care and chemicals. From a credit-rating perspective, B-rated, BB-rated and CCC-rated names were the largest contributors, as the lower credit-quality portions of the bank loan market drove the overall rally across the asset class. The Fund's tactical allocation to high yield bonds also contributed to performance, as the asset class benefited to a greater degree than bank loans from the rally in the energy and metals & mining sectors. Finally, an out-of-benchmark allocation to collateralized loan obligations added to returns.

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

The sole negative contributor to the Fund's absolute performance over the six months came from exposure to retailers, as the space continued to display fundamental weakness. All other sectors within the bank loan market provided positive returns, as did all credit rating segments within the asset class.

Describe recent portfolio activity.

During the period, the Fund maintained its overall focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. The Fund has concentrated its investments in strong companies with stable cash flows and high quality collateral, with the ability to meet interest obligations and ultimately return principal. From a sector standpoint, the Fund reduced exposure to consumer cyclical services overall and in particular to retailers, on the view that the outlook for the space continues to deteriorate on the back of weaker revenues. By contrast, the Fund increased its allocation to the health care and pharmaceutical sectors. With the bank loan universe trading over par, the Fund selectively added to its fixed rate high yield bond allocation in order to add price appreciation potential, as well as to garner higher quality energy exposure relative to that available within bank loans.

Describe portfolio positioning at period end.

The Fund held a majority of its portfolio in floating rate bank loans, with a moderate position in relatively conservative high yield corporate bonds. The Fund maintained its highest concentration in higher coupon B-rated loans of select issuers, while limiting exposure to both higher quality loans with less compelling risk/reward profiles and lower-rated loans with more equity-like profiles and greater downside risk should credit sentiment weaken. At period-end, top issuer overweights included Ligado Networks LLC (wireless), Altice NV (cable & satellite), and Level 3 Communications, Inc. (wirelines).

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Fund Summary as of February 28, 2017

BlackRock Limited Duration Income Trust

Fund Overview

BlackRock Limited Duration Income Trust's (BLW) (the Fund) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and U.S. Government and agency securities;

senior, secured floating rate loans made to corporate and other business entities; and

U.S. dollar-denominated securities of U.S. and non-U.S. issuers rated below investment grade at the time of investment or unrated and deemed by the investment adviser to be of comparable quality and, to a limited extent, non-U.S. dollar denominated securities of non-U.S. issuers rated below investment grade or unrated and deemed by the investment adviser to be of comparable quality.

The Fund's portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

Performance and Portfolio Management Commentary

Returns for the six months ended February 28, 2017 were as follows:

	Returns Based On	
	Market Price	NAV
BLW ^{1, 2}	6.64%	5.61%
Lipper High Yield Funds (Leveraged) ³	7.08%	7.59%

¹ All returns reflect reinvestment of dividends and/or distributions.

² The Fund's discount to NAV narrowed during the period, which accounts for the difference between performance based on price and performance based on NAV.

³ Average return.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles. The following discussion relates to the Fund's absolute performance based on NAV:

What factors influenced performance?

The largest contributors to the Fund's absolute performance over the period were its exposures to high yield corporate bonds, floating rate loans and asset-backed securities (ABS).

The largest detractors from the Fund's absolute performance over the period were its allocation to sovereign plus names, as well as its duration (sensitivity to interest rate movements) and yield curve positioning.

The Fund held derivatives during the period, including Treasury futures, currency forwards, options and credit default swaps. The derivatives were primarily used to adjust duration (sensitivity to interest rate movements) and yield curve exposure, and to manage credit risk. The Fund's derivative exposures had a positive impact on performance.

Describe recent portfolio activity.

Over the six-month period, the Fund kept its level of spread duration (sensitivity to changes in credit spreads) essentially unchanged, while rotating sector allocations to reflect the view that the economy is entering a reflationary period. The Fund's allocations to ABS and investment grade credit were reduced and rotated into emerging market debt, high yield corporates and commercial mortgage-backed securities (CMBS). In addition, agency collateralized mortgage obligations were added to the portfolio.

Describe portfolio positioning at period end.

At period end, the Fund maintained a diversified exposure to non-government spread sectors, including high yield corporates, senior loans, investment grade corporate credit, CMBS, and ABS, as well as agency and non-agency residential mortgage-backed securities. The Fund ended the period with a shorter duration stance and a yield curve flattening bias based on the view that the Fed would raise interest rates imminently.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

⁶ For financial reporting purposes, credit quality ratings shown above reflect the highest rating assigned by either S&P or Moody's if ratings differ. These rating agencies are independent, nationally recognized statistical rating organizations and are widely used. Investment grade ratings are credit ratings of BBB/Baa or higher. Below investment grade ratings are credit ratings of BB/Ba or lower. Investments designated N/R are not rated by either rating agency. Unrated investments do not necessarily indicate low credit quality. Credit quality ratings are subject to change.

⁷ Excludes Options Purchased, Options Written and Short-Term Securities.

⁸ The investment adviser evaluates the credit quality of not-rated investments based upon certain factors including, but not limited to, credit ratings for similar investments and financial analysis of sectors, individual investments and/or issuer. Using this approach, the investment adviser has deemed U.S. Government Sponsored Agency Securities and U.S. Treasury Obligations as AAA/Aaa.

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the distribution rate on, and net asset value (NAV) of, their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by a Fund on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Funds (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Funds' shareholders benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Fund's capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, a Fund's financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by a Fund with the proceeds from leverage earn income based on longer-term interest rates. In this case, a Fund's financing cost of leverage is significantly lower than the income earned on a Fund's longer-term investments acquired from such leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed the Funds' return on assets purchased with leverage proceeds, income to shareholders is lower than if the Funds had not used leverage. Furthermore, the value of the [Fund's/Funds'] portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Funds' obligations under their respective leverage arrangements generally does not fluctuate in relation to interest rates. As a result,

changes in interest rates can influence the Funds' NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that the Funds' intended leveraging strategy will be successful.

The use of leverage also generally causes greater changes in each Fund's NAV, market price and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the NAV and market price of a Fund's shares than if the Fund were not leveraged. In addition, each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Funds to incur losses. The use of leverage may limit a Fund's ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund incurs expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income to the shareholders. Moreover, to the extent the calculation of the Funds' investment advisory fees includes assets purchased with the proceeds of leverage, the investment advisory fees payable to the Funds' investment adviser will be higher than if the Funds did not use leverage.

Each Fund may utilize leverage through a credit facility, or reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Funds are permitted to issue debt up to 3 $\frac{1}{3}$ % of their total managed assets. A Fund may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Fund may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by its credit facility, which may be more stringent than those imposed by the 1940 Act.

If a Fund segregates or designates on its books and records cash or liquid assets having values not less than the value of a Fund's obligations under the reverse repurchase agreement (including accrued interest), then such transaction is not considered a senior security and is not subject to the foregoing limitations and requirements under the 1940 Act.

Derivative Financial Instruments

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

The Funds may invest in various derivative financial instruments. These instruments are used to obtain exposure to a security, commodity, index, market, and/or other asset without owning or taking physical custody of securities, commodities and/or other referenced assets or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage and involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the

transaction or illiquidity of the instrument. The Funds' successful use of a derivative financial instrument depends on the investment adviser's ability to predict pertinent market movements accurately, which cannot be assured. The use of these instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Fund can realize on an investment and/or may result in lower distributions paid to shareholders. The Funds' investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

¹ Includes net capital gain distributions.

² Represents net shares purchased.

³ Represents net shares sold.

(g) Current yield as of period end.

For Fund compliance purposes, the Fund's industry classifications refer to one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such industry subclassifications for reporting ease.

Derivative Financial Instruments Outstanding as of Period End

Futures Contracts

Contracts	Issue	Expiration	Notional Value	Unrealized Appreciation
Short				
(4)	10-Year U.S. Treasury Note	June 2017	\$498,313	\$ 1,182

Forward Foreign Currency Exchange Contracts

Currency Purchased	Currency Sold	Counterparty	Settlement Date	Unrealized Appreciation
USD 817,081	GBP 654,000	Barclays Bank PLC	3/06/17	\$ 5,517

See Notes to Financial Statements.

Schedule of Investments (continued)

BlackRock Defined Opportunity Credit Trust (BHL)

Centrally Cleared Interest Rate Swaps

Fixed Rate	Floating Rate	Effective Date	Expiration Date	Notional Amount (000)	Unrealized Appreciation
1.92% ¹	3-Month LIBOR	N/A	12/14/21	USD 260	\$ 616
1.92% ¹	3-Month LIBOR	N/A	12/14/21	USD 390	888
1.91% ¹	3-Month LIBOR	N/A	12/16/21	USD 400	1,137
Total					\$ 2,641

¹ Fund pays a fixed rate and receives the floating rate.

Derivative Financial Instruments Categorized by Risk Exposure

As of period end, the fair values of derivative financial instruments located in the Statements of Assets and Liabilities were as follows:

Assets	Derivative Financial Instruments	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Futures contracts	Net unrealized appreciation ¹					\$ 1,182		\$ 1,182
Forward foreign currency exchange Contracts	Unrealized appreciation on forward foreign currency exchange contracts				\$ 5,517			5,517
Swaps centrally cleared	Net unrealized appreciation ¹					2,641		2,641
Total					\$ 5,517	\$ 3,823		\$ 9,340

¹ Includes cumulative appreciation (depreciation) on futures contracts and centrally cleared swaps, if any, as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statements of Assets and Liabilities. For the six months ended February 28, 2017, the effect of derivative financial instruments in the Statements of Operation was as follows:

Net Realized Gain (Loss) from:	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Futures contracts					\$ 19,012		\$ 19,012
Forward foreign currency exchange contracts				\$ (7,059)			(7,059)
Swaps		\$ 61,842			3,922		65,764
Total		\$ 61,842		\$ (7,059)	\$ 22,934		\$ 77,717

Net Change in Unrealized Appreciation (Depreciation) on:

Futures contracts					\$ 1,522		\$ 1,522
Forward foreign currency exchange contracts				\$ 4,430			4,430
Swaps					(4,073)		(4,073)
Total				\$ 4,430	\$ (2,551)		\$ 1,879

Average Quarterly Balances of Outstanding Derivative Financial Instruments

Futures contracts:	
Average notional value of contracts short	\$ 498,188
Forward foreign currency exchange contracts:	
Average amounts purchased in USD	\$ 1,193,679
Credit default swaps:	
Average notional value sell protection	\$ 592,000
Interest rate swaps:	
Average notional value pays fixed rate	\$ 525,000
Total return swaps:	
Average notional value	\$ 62,500
For more information about the Fund's investment risks regarding derivative financial instruments, refer to the Notes to Financial Statements.	

See Notes to Financial Statements.

Schedule of Investments (continued)

BlackRock Defined Opportunity Credit Trust (BHL)

Derivative Financial Instruments Offsetting as of Period End

The Fund's derivative assets and liabilities (by type) were as follows:

	Assets	Liabilities
Derivative Financial Instruments:		
Futures contracts	\$ 62	
Forward foreign currency exchange contracts	5,517	
Swaps Centrally cleared	11	
Total derivative assets and liabilities in the Statement of Assets and Liabilities	\$ 5,590	
Derivatives not subject to a Master Netting Agreement or similar agreement (MNA)	\$ (73)	
Total derivative assets and liabilities subject to an MNA	\$ 5,517	

The following table presents the Fund's derivative assets and liabilities by counterparty net of amounts available for offset under an MNA and net of the related collateral received by the Fund:

Counterparty	Derivative Assets Subject to an MNA by Counterparty	Derivatives Available for Offset	Non-cash Collateral Received	Cash Collateral Received	Net Amount of Derivative Assets ^{1,2}
Barclays Bank PLC	\$ 5,517				\$ 5,517

¹ Net amount represents the net amount receivable from the counterparty in the event of default.

² Net amount may also include forward foreign currency exchange contracts that are not required to be collateralized.

Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of investments and derivative financial instruments. For information about the Fund's policy regarding valuation of investments and derivative financial instruments, refer to the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 1,463,171		\$ 1,463,171
Corporate Bonds		7,478,035		7,478,035
Floating Rate Loan Interests		130,268,982	\$ 7,264,369	137,533,351
Rights			14,102	14,102
Warrants			180	180
Unfunded Floating Rate Loan Interests ¹		1,245		1,245
Short-Term Securities	\$ 337,646			337,646
Total	\$ 337,646	\$ 139,211,433	\$ 7,278,651	\$ 146,827,730

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

Derivative Financial Instruments ²

Assets:

Foreign currency exchange contracts		\$	5,517		\$	5,517
Interest rate contracts	\$	1,182		2,641		3,823
Total	\$	1,182	\$	8,158	\$	9,340

¹ Unfunded floating rate loan interests are valued at the unrealized appreciation (depreciation) on the commitment.

² Derivative financial instruments are forward foreign currency exchange contracts, futures contracts, and swaps. Forward foreign currency exchange contracts, futures contracts, and swaps are valued at the unrealized appreciation (depreciation) on the instrument.

The Fund may hold assets and/or liabilities in which the fair value approximates the carrying amount for financial statement purposes. As of period end bank borrowings payable of \$28,000,000 are categorized as Level 2 within the disclosure hierarchy.

During the six months ended February 28, 2017, there were no transfers between Level 1 and Level 2.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2017

19

Schedule of Investments (concluded)

BlackRock Defined Opportunity Credit Trust (BHL)

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Floating Rate Loan Interests	Rights	Warrants	Total
Assets:					
Opening balance, as of August 31, 2016	\$ 489,393	\$ 7,792,714		\$ 1,408	\$ 8,283,515
Transfers into Level 3 ¹		3,379,601			3,379,601
Transfers out of Level 3 ²	(489,393)	(4,024,602)			(4,513,995)
Accrued discounts/premiums		15,621			15,621
Net realized gain (loss)		14,258			14,258
Net change in unrealized appreciation (depreciation) ^{3,4}		58,156	\$ 14,102	(1,228)	71,030
Purchases		1,629,076			1,629,076
Sales		(1,600,455)			(1,600,455)
Closing Balance, as of February 28, 2017		\$ 7,264,369	\$ 14,102	\$ 180	\$ 7,278,651
Net change in unrealized appreciation (depreciation) on investments still held at February 28, 2017 ⁴		\$ 42,015	\$ 14,102	\$ (1,228)	\$ 54,889

¹ As of August 31, 2016, the Fund used observable inputs in determining the value of certain investments. As of February 28, 2017, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments at beginning of period value were transferred from Level 2 to Level 3 in the disclosure hierarchy.

² As of August 31, 2016, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2017, the Fund used observable inputs in determining the value of the same investments. As a result, investments at beginning of period value were transferred from Level 3 to Level 2 in the disclosure hierarchy.

³ Included in the related net change in unrealized appreciation (depreciation) in the Statements of Operations.

⁴ Any difference between net change in unrealized appreciation (depreciation) on investments still held at February 28, 2017 is generally due to investments no longer held or categorized as Level 3 at period end.

The Fund's investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.

Swaps		(15,879)	(15,879)
Total	\$ 27,014	\$ (10,272)	\$ 16,742

Average Quarterly Balances of Outstanding Derivative Financial Instruments

Futures contracts:	
Average notional value of contracts short	\$ 1,992,750
Forward foreign currency exchange contracts:	
Average amounts purchased in USD	\$ 8,933,475
Average amounts sold in USD	\$ 3,784,927
Credit default swaps:	
Average notional value sell protection	\$ 2,634,000
Interest Rate swaps:	
Average notional value pays fixed rate	\$ 4,337,500
Total return swaps:	
Average notional value	\$ 285,000

For more information about the Fund's investment risks regarding derivative financial instruments, refer to the Consolidated Notes to Financial Statements.

See Notes to Financial Statements.

Consolidated Schedule of Investments (continued)

BlackRock Floating Rate Income Strategies Fund, Inc.
(FRA)**Derivative Financial Instruments Offsetting as of Period End**

The Fund's derivative assets and liabilities (by type) were as follows:

	Assets	Liabilities
Futures contracts	\$ 250	
Forward foreign currency exchange contracts	62,937	\$ 26,749
Swaps Centrally Cleared	7	
Total derivative assets and liabilities in the Consolidated Statement of Assets and Liabilities	\$ 63,194	\$ 26,749
Derivatives not subject to a master netting agreement or similar agreement (MNA)	(257)	
Total derivative assets and liabilities subject to an MNA	\$ 62,937	\$ 26,749

The following table presents the Fund's derivative assets and liabilities by counterparty net of amounts available for offset under an MNA and net of the related collateral received and pledged by the Fund:

Counterparty	Derivative Assets Subject to an MNA by Counterparty	Derivatives Available for Offset	Non-cash Collateral Received	Cash Collateral Received	Net Amount of Derivative Assets ^{1,3}
Barclays Bank PLC	\$ 23,476				\$ 23,476
HSBC Bank PLC	37,855				37,855
Morgan Stanley & Co. International PLC	1,606				1,606
Total	\$ 62,937				\$ 62,937

Counterparty	Derivative Liabilities Subject to an MNA by Counterparty	Derivatives Available for Offset	Non-cash Collateral Pledged	Cash Collateral Pledged	Net Amount of Derivative Liabilities ^{2,3}
Northern Trust Co.	\$ 26,749				\$ 26,749

¹ Net amount represents the net amount receivable from the counterparty in the event of default.

² Net amount represents the net amount payable to the counterparty in the event of default.

³ Net amount may also include forward foreign currency exchange contracts that are not required to be collateralized.

Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of investments and derivative financial instruments. For information about the Fund's policy regarding valuation of investments and derivative financial instruments, refer to the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy:

Level 1	Level 2	Level 3	Total
---------	---------	---------	-------

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 12,175,305	\$ 2,030,750	\$ 14,206,055
Common Stocks	\$ 16,294	15,845	699,684	731,823
Corporate Bonds		43,292,558	2,402,004	45,694,562
Floating Rate Loan Interests		722,606,101	43,767,964	766,374,065
Other Interests			2	2
Rights			92,721	92,721
Trust Preferred	1,561,577			1,561,577
Warrants			625	625
Unfunded floating rate loan interests ¹		5,425		5,425
Total	\$ 1,577,871	\$ 778,095,234	\$ 48,993,750	\$ 828,666,855

Derivative Financial Instruments ²				
Assets:				
Foreign currency exchange contracts		\$ 62,937		\$ 62,937
Interest rate contracts	\$ 4,086	15,613		19,699
Liabilities:				
Foreign currency exchange contracts		(26,749)		(26,749)
Interest rate contracts		(875)		(875)
Total	\$ 4,086	\$ 50,926		\$ 55,012

¹ Unfunded floating rate loan interests are valued at the unrealized appreciation/depreciation on the commitment.

² Derivative financial instruments are swaps, futures contracts and forward foreign currency exchange contracts. Swaps, futures contracts and forward foreign currency exchange contracts are valued at the unrealized appreciation (depreciation) on the instrument.

See Notes to Financial Statements.

Consolidated Schedule of Investments (concluded)

BlackRock Floating Rate Income Strategies Fund, Inc.
(FRA)

The Fund may hold assets and/or liabilities in which the fair value approximates the carrying amount for financial statement purposes. As of period end, bank borrowings payable of \$213,000,000 is categorized as Level 2 within the disclosure hierarchy.

During the six months ended February 28, 2017, there were no transfers between Level 1 and Level 2.

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Rights	Warrants	Total
Assets:								
Opening balance, as of August 31, 2016	\$ 2,218,460	\$ 140,083	\$ 1,527,870	\$ 44,995,306	\$ 1,562,503		\$ 4,902	\$ 50,449,124
Transfers into Level 3 ¹				14,721,797				14,721,797
Transfers out of Level 3 ²	(1,967,885)			(21,661,901)				(23,629,786)

Closing Balance, as of February 28, 2017	\$ 2,030,750	\$ 699,684	\$ 2,402,004	\$ 43,767,964	\$ 2	\$ 92,721	\$ 625	\$ 48,993,750
Net change in unrealized appreciation (depreciation) on investments still held at February 28, 2017 ⁴	\$ (221)	\$ 589,301	\$ 810,287	\$ 394,614		\$ 63,021	\$ (4,277)	\$ 1,852,725

¹ As of August 31, 2016 the Fund used observable inputs in determining the value of certain investments. As of February 28, 2017, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments at beginning of period value were transferred from Level 2 to Level 3 in the disclosure hierarchy.

² As of August 31, 2016, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2017, the Fund used observable inputs in determining the value of the same investments. As a result, investments at beginning of period value were transferred from Level 3 to Level 2 in the disclosure hierarchy.

³ Certain Level 3 investments were re-classified between Common Stocks and Rights.

⁴ Included in the related net change in unrealized appreciation (depreciation) in the Consolidated Statement of Operations.

⁵ Any difference between net change in unrealized appreciation (depreciation) on investments still held at February 28, 2017 is generally due to investments no longer held or categorized as Level 3 at period end.

The Fund's investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.

Notes to Schedule of Investments

- (a) Non-income producing security.
- (b) Issuer filed for bankruptcy and/or is in default.
- (c) Restricted security as to resale, excluding 144A securities. As of period end, the Fund held restricted securities with a current value of \$121,738 and an original cost of \$27,096, which was less than 0.05% of its net assets.
- (d) Variable rate security. Rate as of period end.
- (e) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (f) When-issued security.
- (g) All or a portion of security has been pledged as collateral in connection with outstanding reverse repurchase agreements.
- (h) Payment-in-kind security which may pay interest/dividends in additional par/shares and/or in cash. Rates shown are the current rate and possible payment rates.
- (i) Convertible security.
- (j) Step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate as of period end.
- (k) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (l) Perpetual security with no stated maturity date.
- (m) Current yield as of period end.

See Notes to Financial Statements.

Schedule of Investments (continued)

BlackRock Limited Duration Income Trust (BLW)

(n) During the six months ended February 28, 2017, investments in issuers considered to be affiliates of the Fund for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliate	Shares Held at August 31, 2016	Shares Purchased	Shares Sold	Shares Held at February 28, 2017	Value at February 28, 2017	Income	Realized Gain (Loss) ¹	Change in Unrealized Depreciation
BlackRock Liquidity Funds, T-Fund, Institutional Class		2,168,959 ²		2,168,959	\$ 2,168,959	\$ 11,280	\$ 12	
BlackRock Liquidity Funds, TempFund, Institutional Class	2,911,779		(2,911,779) ³			33		
iShares iBoxx \$ High Yield Corporate Bond ETF	8,500		(8,500)			9,713	(3,886)	\$ (3,377)
Total					\$ 2,168,959	\$ 21,026	\$ (3,874)	\$ (3,377)

¹ Includes net capital gain distributions.

² Represents net shares purchased.

³ Represents net shares sold.

For Fund compliance purposes, the Fund's industry classifications refer to one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such industry subclassifications for reporting ease.

Schedule of Investments (continued)

BlackRock Limited Duration Income Trust (BLW)

Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of investments and derivative financial instruments. For information about the Fund's policy regarding valuation of investments and derivative financial instruments, refer to the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 70,575,372	\$ 7,006,265	\$ 77,581,637
Common Stocks	\$ 3,376	9,047	1,176,534	1,188,957
Corporate Bonds		411,741,987	1,163,602	412,905,589
Floating Rate Loan Interests		224,307,976	12,661,424	236,969,400
Foreign Agency Obligations		29,373,739		29,373,739
Non-Agency Mortgage-Backed Securities		60,189,760		60,189,760
Other Interests			10	10
Preferred Securities	14,193,258	51,540,211		65,733,469
U.S. Government Sponsored Agency Securities		5,131,565		5,131,565
U.S. Treasury Obligations		2,896,125		2,896,125
Rights			36,493	36,493
Warrants			24,290	24,290
Unfunded Floating Rate Loan Interests ¹		2,401		2,401
Short-Term Securities	2,168,959			2,168,959
Options Purchased:				
Foreign Currency Exchange Contracts		201,186		201,186
Subtotal	\$ 16,365,593	\$ 855,969,369	\$ 22,068,618	\$ 894,403,580
Investments valued at NAV²				120,717
Total Investments				\$ 894,524,297
Derivative Financial Instruments³				
Assets:				
Foreign currency exchange contracts		\$ 424,445		\$ 424,445
Credit contracts		23,219		23,219
Interest rate contracts	\$ 13,676	468,018		481,694
Liabilities:				
Foreign currency exchange contracts		(307,566)		(307,566)
Credit contracts		(482,991)		(482,991)
Interest rate contracts	(318,466)	(464,491)		(782,957)
Total	\$ (304,790)	\$ (339,366)		\$ (644,156)

¹ Unfunded floating rate loan interests are valued at the unrealized appreciation (depreciation) on the commitment.

² As of February 28, 2017, certain Investments of the Fund were fair valued using net asset value per share as no quoted market value is available and have been excluded from the fair value hierarchy.

³ Derivative financial instruments are swaps, futures contracts, forward foreign currency exchange contracts and options written. Swaps, futures contracts and forward foreign currency exchange contracts are valued at the unrealized appreciation (depreciation) on the instrument and options written are shown at value. The Fund may hold assets and/or liabilities in which the fair value approximates the carrying amount for financial statement purposes. As of period end, reverse repurchase agreements of \$255,621,583 are categorized as Level 2 within the disclosure hierarchy.

During the six months ended February 28, 2017, there were no transfers between Level 1 and Level 2.

See Notes to Financial Statements.

Schedule of Investments (concluded)

BlackRock Limited Duration Income Trust (BLW)

A reconciliation of Level 3 Investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Rights	Warrants	Total
Assets:								
Opening balance, as of August 31, 2016	\$ 18,351,873	\$ 1,167,006	\$ 1,163,250	\$ 12,230,322	\$ 193,629		\$ 6,316	\$ 33,112,396
Transfers into Level 3				4,148,994				4,148,994
Transfers out of Level 3 ¹	(2,952,810)			(6,067,534)				(9,020,344)
Other ²		(12,000)				\$ 12,000		
Accrued discounts/premiums	(51,320)		400	11,006				(39,914)
Net realized gain (loss)	(638,505)	689,120	(374,995)	(286,477)	193,619			(417,238)
Net change in unrealized appreciation (depreciation) ^{3,4}	1,614,058	618,039	374,947	543,406	(193,619)	24,493	17,974	2,999,298
Purchases	4,496,360			5,795,252				10,291,612
Sales	(13,813,391)	(1,285,631)		(3,713,545)	(193,619)			(19,006,186)
Closing Balance, as of February 28, 2017	\$ 7,006,265	\$ 1,176,534	\$ 1,163,602	\$ 12,661,424	\$ 10	\$ 36,493	\$ 24,290	\$ 22,068,618

Net change in unrealized appreciation (depreciation) on investments still held at February 28, 2017³

\$	112,140	\$	989,625	\$	351	\$	189,220		\$	24,493	\$	17,974	\$	1,333,803
----	---------	----	---------	----	-----	----	---------	--	----	--------	----	--------	----	-----------

¹ As of August 31, 2016, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2017, the Fund used observable inputs in determining the value of the same investments. As a result, investments at beginning of period value were transferred from Level 3 to Level 2 in the disclosure hierarchy.

² Certain Level 3 investments were re-classified between Common Stocks and Rights.

³ Included in the related net change in unrealized appreciation (depreciation) in the Statements of Operations.

⁴ Any difference between net change in unrealized appreciation (depreciation) on investments still held at February 28, 2017 is generally due to investments no longer held or categorized as Level 3 at period end.

The Fund's investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.

Notes to Financial Statements (Unaudited)

1. Organization:

The following are registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as closed-end management investment companies and are referred to herein collectively as the "Funds", or individually, a "Fund":

Fund Name	Herein Referred To As	Organized	Diversification Classification
BlackRock Defined Opportunity Credit Trust	BHL	Delaware	Diversified
BlackRock Floating Rate Income Strategies Fund, Inc.	FRA	Maryland	Diversified
BlackRock Limited Duration Income Trust	BLW	Delaware	Diversified

The Boards of Directors and Boards of Trustees of the Funds are collectively referred to throughout this report as the "Board of Directors" or the "Board", and the directors/trustees thereof are collectively referred to throughout this report as "Directors". The Funds determine and make available for publication the net asset value ("NAV") of their Common Shares on a daily basis.

The Funds, together with certain other registered investment companies advised by BlackRock Advisors, LLC (the "Manager") or its affiliates, are included in a complex of closed-end funds referred to as the Closed-End Complex.

Basis of Consolidation: The accompanying consolidated financial statements of FRA include the accounts of FRA Subsidiary, LLC (the "Taxable Subsidiary"), which is a wholly owned taxable subsidiary of FRA, the Taxable Subsidiary enables FRA to hold an investment in an operating partnership and satisfy Regulated Investment Company ("RIC") tax requirements. Income earned and gains realized on the investment held by the Taxable Subsidiary are taxable to such subsidiary. A tax provision for income, if any, is shown as income tax in the Consolidated Statements of Operations for FRA. A tax provision for realized and unrealized gains, if any, is included as a reduction of realized and/or unrealized gain (loss) in the Consolidated Statement of Operations for FRA. FRA may invest up to 25% of its total assets in the Taxable Subsidiary. The net assets of the Taxable Subsidiary as of period end were \$2,866,093, which is 0.5% of FRA's consolidated net assets. Intercompany accounts and transactions, if any, have been eliminated. The Taxable Subsidiary is subject to the same investment policies and restrictions that apply to FRA.

2. Significant Accounting Policies:

The financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"), which may require management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. Each Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies. Below is a summary of significant accounting policies:

Foreign Currency: Each Fund's books and records are maintained in U.S. dollars. Purchases and sales of investments are recorded at the rates of exchange prevailing on the respective dates of such transactions. Generally, when the U.S. dollar rises in value against a foreign currency, the investments denominated in that currency will lose value; the opposite effect occurs if the U.S. dollar falls in relative value.

Each Fund does not isolate the portion of the results of operations arising as a result of changes in the exchange rates from the changes in the market prices of investments held or sold for financial reporting purposes. Accordingly, the effects of changes in exchange rates on investments are not segregated in the Statements of Operations from the effects of changes in market prices of those investments, but are included as a component of net realized and unrealized gain (loss) from investments. Each Fund reports realized currency gains (losses) on foreign currency related transactions as components of net realized gain (loss) for financial reporting purposes, whereas such components are generally treated as ordinary income for federal income tax purposes.

Segregation and Collateralization: In cases where a Fund enters into certain investments (e.g., futures contracts, forward foreign currency exchange contracts, options written and swaps) or certain borrowings (e.g., reverse repurchase transactions) that would be treated as "senior securities" for 1940 Act purposes, a Fund may segregate or designate on its books and records cash or liquid assets having a market value at least equal to the amount of its future obligations under such investments or borrowings. Doing so allows the investment or borrowing to be excluded from treatment as a "senior security". Furthermore, if required by an exchange or counterparty agreement, the Funds may be required to deliver/deposit cash and/or securities to/with an exchange, or broker-dealer or custodian as collateral for certain investments or obligations.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend date. Dividends from foreign securities where the ex-dividend date may have passed are subsequently recorded when the Funds are informed of the ex-dividend date. Under the applicable foreign tax laws, a withholding tax at various rates may be imposed on capital gains, dividends and interest. Upon notification from issuers, some of the dividend income received from a real estate investment trust may be redesignated as a reduction of cost of the related investment and/or realized gain. Interest income, including amortization and accretion of premiums and discounts on debt securities, is recognized on the accrual basis.

Notes to Financial Statements (continued)

Distributions: Distributions from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend date and made at least annually. The character and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

Deferred Compensation Plan: Under the Deferred Compensation Plan (the "Plan") approved by each Fund's Board, the independent Directors ("Independent Directors") may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of certain other BlackRock Closed-End Funds selected by the Independent Directors. This has the same economic effect for the Independent Directors as if the Independent Directors had invested the deferred amounts directly in certain other BlackRock Closed-End Funds.

The Plan is not funded and obligations thereunder represent general unsecured claims against the general assets of each Fund, if applicable. Deferred compensation liabilities are included in officer's and directors' fees payable in the Statements of Assets and Liabilities and will remain as a liability of the Funds until such amounts are distributed in accordance with the Plan.

Recent Accounting Standards: In November 2016, the Financial Accounting Standards Board issued Accounting Standards Update "Restricted Cash" which will require entities to include the total of cash, cash equivalents, restricted cash, and restricted cash equivalents in the beginning and ending cash balances in the Statements of Cash Flows. The guidance will be applied retrospectively and is effective for fiscal years beginning after December 15, 2017, and interim periods within those years. Management is evaluating the impact, if any, of this guidance on the Funds' presentation in the Statements of Cash Flows.

Indemnifications: In the normal course of business, a Fund enters into contracts that contain a variety of representations that provide general indemnification. A Fund's maximum exposure under these arrangements is unknown because it involves future potential claims against a Fund, which cannot be predicted with any certainty.

Other: Expenses directly related to a Fund are charged to that Fund. Other operating expenses shared by several funds, including other funds managed by the Manager, are prorated among those funds on the basis of relative net assets or other appropriate methods.

Through May 31, 2016, the Funds had an arrangement with their custodian whereby credits were earned on uninvested cash balances, which could be used to reduce custody fees and/or overdraft charges. Credits previously earned may have been utilized until December 31, 2016. Under current arrangements effective June 1, 2016, the Funds no longer earn credits on uninvested cash, and may incur charges on uninvested cash balances and overdrafts, subject to certain conditions.

3. Investment Valuation and Fair Value Measurements:

Investment Valuation Policies: The Funds' investments are valued at fair value (also referred to as "market value" within the financial statements) as of the close of trading on the New York Stock Exchange ("NYSE") (generally 4:00 p.m., Eastern time) U.S. GAAP defines fair value as the price the Funds would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The Funds determine the fair values of their financial instruments using various independent dealers or pricing services under policies approved by the Board. The BlackRock Global Valuation Methodologies Committee (the "Global Valuation Committee") is the committee formed by management to develop global pricing policies and procedures and to oversee the pricing function for all financial instruments.

Fair Value Inputs and Methodologies: The following methods and inputs are used to establish the fair value of each Fund's assets and liabilities:

Equity investments traded on a recognized securities exchange are valued at the official closing price each day, if available. For equity investments traded on more than one exchange, the official closing price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day may be valued at the last available bid (long positions) or ask (short positions) price.

Fixed-income securities for which market quotations are readily available are generally valued using the last available bid prices or current market quotations provided by independent dealers or third party pricing services. Floating rate loan interests are valued at the mean of the

bid prices from one or more independent brokers or dealers as obtained from a third party pricing service. Pricing services generally value fixed-income securities assuming orderly transactions of an institutional round lot size, but the Funds may hold or transact in such securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional round lots. The pricing services may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values, including transaction data (e.g., recent representative bids and offers), credit quality information, perceived market movements, news, and other relevant information. Certain fixed-income securities, including asset-backed and mortgage related securities may be valued based on valuation models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. The amortized cost method of valuation may be used with respect to debt obligations with sixty days or less remaining to maturity unless the Manager determines such method does not represent fair value.

Notes to Financial Statements (continued)

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of trading on the NYSE. Occasionally, events affecting the values of such instruments may occur between the foreign market close and the close of trading on the NYSE that may not be reflected in the computation of the Funds' net assets. Each business day, the Funds use a pricing service to assist with the valuation of certain foreign exchange-traded equity securities and foreign exchange-traded and over-the-counter (OTC) options (the Systematic Fair Value Price). Using current market factors, the Systematic Fair Value Price is designed to value such foreign securities and foreign options at fair value as of the close of trading on the NYSE, which follows the close of the local markets.

Investments in open-end U.S. mutual funds are valued at NAV each business day.

Futures contracts traded on exchanges are valued at their last sale price.

Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using exchange rates determined as of the close of trading on the NYSE. Forward foreign currency exchange contracts are valued at the mean between the bid and ask prices and are determined as of the close of trading on the NYSE. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is valued at the last bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day's price will be used, unless it is determined that the prior day's price no longer reflects the fair value of the option. OTC options and options on swaps (swaptions) are valued by an independent pricing service using a mathematical model, which incorporates a number of market data factors, such as the trades and prices of the underlying instruments.

Swap agreements are valued utilizing quotes received daily by the Funds' pricing service or through brokers, which are derived using daily swap curves and models that incorporate a number of market data factors, such as discounted cash flows, trades and values of the underlying reference instruments.

If events (e.g., a company announcement, market volatility or a natural disaster) occur that are expected to materially affect the value of such investments, or in the event that the application of these methods of valuation results in a price for an investment that is deemed not to be representative of the market value of such investment, or if a price is not available, the investment will be valued by the Global Valuation Committee, or its delegate, in accordance with a policy approved by the Board as reflecting fair value (Fair Valued Investments). The fair valuation approaches that may be used by the Global Valuation Committee will include Market approach, Income approach and Cost approach. Valuation techniques such as discounted cash flow, use of market comparables and matrix pricing are types of valuation approaches and typically used in determining fair value. When determining the price for Fair Valued Investments, the Global Valuation Committee, or its delegate, seeks to determine the price that each Fund might reasonably expect to receive or pay from the current sale or purchase of that asset or liability in an arm's-length transaction. Fair value determinations shall be based upon all available factors that the Global Valuation Committee, or its delegate, deems relevant and consistent with the principles of fair value measurement.

The Global Valuation Committee, or its delegate, employs various methods for calibrating valuation approaches for investments where an active market does not exist, including regular due diligence of each Fund's pricing vendors, regular reviews of key inputs and assumptions, transactional back-testing or disposition analysis to compare unrealized gains and losses to realized gains and losses, reviews of missing or stale prices and large movements in market values and reviews of any market related activity. The pricing of all Fair Valued Investments is subsequently reported to the Board or a committee thereof on a quarterly basis. As a result of the inherent uncertainty in valuation of these investments, the fair values may differ from the values that would have been used had an active market existed.

For investments in equity or debt issued by privately-held companies or funds (Private Company or collectively, the Private Companies) and other Fair Valued Investments, the fair valuation approaches that are used by third party pricing services utilize one or a combination of, but not limited to, the following inputs.

Standard Inputs Generally Considered By Third Party Pricing Services	
Market approach	(i) recent market transactions, including subsequent rounds of financing, in the underlying investment or comparable issuers;
	(ii) recapitalizations and other transactions across the capital structure; and
	(iii) market multiples of comparable issuers.
Income approach	(i) future cash flows discounted to present and adjusted as appropriate for liquidity, credit, and/or market risks;
	(ii) quoted prices for similar investments or assets in active markets; and
	(iii) other risk factors, such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, recovery rates, liquidation amounts and/or default rates.
Cost approach	audited or unaudited financial statements, investor communications and financial or operational metrics issued by the
	(i) Private Company;
	(ii) changes in the valuation of relevant indices or publicly traded companies comparable to the Private Company;
	(iii) relevant news and other public sources; and
	(iv) known secondary market transactions in the Private Company's interests and merger or acquisition activity in companies comparable to the Private Company.

Notes to Financial Statements (continued)

Investments in series of preferred stock issued by Private Companies are typically valued utilizing Market approach in determining the enterprise value of the company. Such investments often contain rights and preferences that differ from other series of preferred and common stock of the same issuer. Valuation techniques such as an option pricing model (OPM), a probability weighted expected return model (PWERM) or a hybrid of those techniques are used in allocating enterprise value of the company, as deemed appropriate under the circumstances. The use of OPM and PWERM techniques involve a determination of the exit scenarios of the investment in order to appropriately allocate the enterprise value of the company among the various parts of its capital structure.

The Private Companies are not subject to the public company disclosure, timing, and reporting standards as other investments held by a Fund. Typically, the most recently available information by a Private Company is as of a date that is earlier than the date a Fund is calculating its NAV. This factor may result in a difference between the value of the investment and the price a Fund could receive upon the sale of the investment.

Fair Value Hierarchy: Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a fair value hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that each Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including each Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Investments classified within Level 3 have significant unobservable inputs used by the Global Valuation Committee in determining the price for Fair Valued Investments. Level 3 investments include equity or debt issued by Private Companies. There may not be a secondary market, and/or there are a limited number of investors. Level 3 investments may also be adjusted to reflect illiquidity and/or non-transferability, with the amount of such discount estimated by the Global Valuation Committee in the absence of market information.

Changes in valuation techniques may result in transfers into or out of an assigned level within the hierarchy. In accordance with each Fund's policy, transfers between different levels of the fair value hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investments and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities.

As of February 28, 2017, certain investments of BLW were valued using net asset value per share as no quoted market value is available and therefore have been excluded from the fair value hierarchy.

4. Securities and Other Investments:

Asset-Backed and Mortgage-Backed Securities: Asset-backed securities are generally issued as pass-through certificates or as debt instruments. Asset-backed securities issued as pass-through certificates represent undivided fractional ownership interests in an underlying pool of assets. Asset-backed securities issued as debt instruments, which are also known as collateralized obligations, are typically issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time

because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security will have the effect of shortening the maturity of the security. In addition, a Fund may subsequently have to reinvest the proceeds at lower interest rates. If a Fund has purchased such an asset-backed security at a premium, a faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

For mortgage pass-through securities (the "Mortgage Assets"), there are a number of important differences among the agencies and instrumentalities of the U.S. Government that issue mortgage-related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by Ginnie Mae are guaranteed as to the timely payment of principal and interest by Ginnie Mae and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by Freddie Mac and Fannie Mae, including Freddie Mac and Fannie Mae guaranteed mortgage pass-through certificates, which are solely the obligations of Freddie Mac and Fannie Mae, are not backed by or entitled to the full faith and credit of the United States, but are supported by the right of the issuer to borrow from the U.S. Treasury.

Notes to Financial Statements (continued)

Non-agency mortgage-backed securities are securities issued by non-governmental issuers and have no direct or indirect government guarantees of payment and are subject to various risks. Non-agency mortgage loans are obligations of the borrowers thereunder only and are not typically insured or guaranteed by any other person or entity. The ability of a borrower to repay a loan is dependent upon the income or assets of the borrower. A number of factors, including a general economic downturn, acts of God, terrorism, social unrest and civil disturbances, may impair a borrower's ability to repay its loans.

Collateralized Debt Obligations: Collateralized debt obligations (CDOs), including collateralized bond obligations (CBOs) and collateralized loan obligations (CLOs), are types of asset-backed securities. A CDO is an entity that is backed by a diversified pool of debt securities (CBOs) or syndicated bank loans (CLOs). The cash flows of the CDO can be split into multiple segments, called tranches, which will vary in risk profile and yield. The riskiest segment is the subordinated or equity tranche. This tranche bears the greatest risk of defaults from the underlying assets in the CDO and serves to protect the other, more senior, tranches from default in all but the most severe circumstances. Since it is shielded from defaults by the more junior tranches, a senior tranche will typically have higher credit ratings and lower yields than their underlying securities, and often receive investment grade ratings from one or more of the nationally recognized rating agencies. Despite the protection from the more junior tranches, senior tranches can experience substantial losses due to actual defaults, increased sensitivity to future defaults and the disappearance of one or more protecting tranches as a result of changes in the credit profile of the underlying pool of assets.

Multiple Class Pass-Through Securities: Multiple class pass-through securities, including collateralized mortgage obligations (CMOs) and commercial mortgage-backed securities, may be issued by Ginnie Mae, U.S. Government agencies or instrumentalities or by trusts formed by private originators of, or investors in, mortgage loans. In general, CMOs are debt obligations of a legal entity that are collateralized by a pool of residential or commercial mortgage loans or Mortgage Assets. The payments on these are used to make payments on the CMOs or multiple pass-through securities. Multiple class pass-through securities represent direct ownership interests in the Mortgage Assets. Classes of CMOs include interest only (IOs), principal only (POs), planned amortization classes and targeted amortization classes. IOs and POs are stripped mortgage-backed securities representing interests in a pool of mortgages, the cash flow from which has been separated into interest and principal components. IOs receive the interest portion of the cash flow while POs receive the principal portion. IOs and POs can be extremely volatile in response to changes in interest rates. As interest rates rise and fall, the value of IOs tends to move in the same direction as interest rates. POs perform best when prepayments on the underlying mortgages rise since this increases the rate at which the principal is returned and the yield to maturity on the PO. When payments on mortgages underlying a PO are slower than anticipated, the life of the PO is lengthened and the yield to maturity is reduced. If the underlying Mortgage Assets experience greater than anticipated prepayments of principal, a Fund's initial investment in the IOs may not fully recoup.

Stripped Mortgage-Backed Securities: Stripped mortgage-backed securities are typically issued by the U.S. Government, its agencies and instrumentalities. Stripped mortgage-backed securities are usually structured with two classes that receive different proportions of the interest (IOs) and principal (POs) distributions on a pool of Mortgage Assets. Stripped mortgage-backed securities may be privately issued.

Zero-Coupon Bonds: Zero-coupon bonds are normally issued at a significant discount from face value and do not provide for periodic interest payments. These bonds may experience greater volatility in market value than other debt obligations of similar maturity which provide for regular interest payments.

Capital Securities and Trust Preferred Securities: Capital securities, including trust preferred securities, are typically issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics. In the case of trust preferred securities, an affiliated business trust of a corporation issues these securities, generally in the form of beneficial interests in subordinated debentures or similarly structured securities. The securities can be structured with either a fixed or adjustable coupon that can have either a perpetual or stated maturity date. For trust preferred securities, the issuing bank or corporation pays interest to the trust, which is then distributed to holders of these securities as a dividend. Dividends can be deferred without creating an event of default or acceleration, although maturity cannot take place unless all cumulative payment obligations have been met. The deferral of payments does not affect the purchase or sale of these securities in the open market. Payments on these securities are treated as interest rather than dividends for federal income tax purposes. These securities generally are rated below that of the issuing company's senior debt securities and are freely callable at the issuer's option.

Preferred Stock: Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well), but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

Warrants: Warrants entitle a Fund to purchase a specified number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any. If the price of the underlying stock does not rise above the strike price before the warrant expires, the warrant generally expires without any value and a Fund will lose any amount it paid for

Notes to Financial Statements (continued)

the warrant. Thus, investments in warrants may involve more risk than investments in common stock. Warrants may trade in the same markets as their underlying stock; however, the price of the warrant does not necessarily move with the price of the underlying stock.

Floating Rate Loan Interests: Floating rate loan interests are typically issued to companies (the borrower) by banks, other financial institutions, or privately and publicly offered corporations (the lender). Floating rate loan interests are generally non-investment grade, often involve borrowers whose financial condition is troubled or uncertain and companies that are highly leveraged or in bankruptcy proceedings. In addition, transactions in floating rate loan interests may settle on a delayed basis, which may result to proceeds from the sale to not be readily available for a Fund to make additional investments or meet its redemption obligations. Floating rate loan interests may include fully funded term loans or revolving lines of credit. Floating rate loan interests are typically senior in the corporate capital structure of the borrower. Floating rate loan interests generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. Since the rates reset only periodically, changes in prevailing interest rates (and particularly sudden and significant changes) can be expected to cause some fluctuations in the NAV of a Fund to the extent that it invests in floating rate loan interest. The base lending rates are generally the lending rate offered by one or more European banks, such as the London Interbank Offered Rate (LIBOR), the prime rate offered by one or more U.S. banks or the certificate of deposit rate. Floating rate loan interests may involve foreign borrowers, and investments may be denominated in foreign currencies. These investments are treated as investments in debt securities for purposes of a Fund's investment policies.

When a Fund purchases a floating rate loan interest, it may receive a facility fee and when it sells a floating rate loan interest, it may pay a facility fee. On an ongoing basis, a Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit amount of a floating rate loan interest. Facility and commitment fees are typically amortized to income over the term of the loan or term of the commitment, respectively. Consent and amendment fees are recorded to income as earned. Prepayment penalty fees, which may be received by a Fund upon the prepayment of a floating rate loan interest by a borrower, are recorded as realized gains. A Fund may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loan interests are usually freely callable at the borrower's option. A Fund may invest in such loans in the form of participations in loans (Participations) or assignments (Assignments) of all or a portion of loans from third parties. Participations typically will result in a Fund having a contractual relationship only with the lender, not with the borrower. A Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing Participations, a Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of offset against the borrower. A Fund may not benefit directly from any collateral supporting the loan in which it has purchased the Participation. As a result, a Fund assumes the credit risk of both the borrower and the lender that is selling the Participation. A Fund's investment in loan participation interests involves the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, a Fund may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower. Assignments typically result in a Fund having a direct contractual relationship with the borrower, and a Fund may enforce compliance by the borrower with the terms of the loan agreement.

In connection with floating rate loan interests, the Funds may also enter into unfunded floating rate loan interests (commitments). In connection with these commitments, a Fund earns a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is included in interest income in the Statements of Operations, is recognized ratably over the commitment period. Unfunded floating rate loan interests are marked-to-market daily, and any unrealized appreciation (depreciation) is included in the Statements of Assets and Liabilities and Statements of Operations. As of period end, the Funds had the following unfunded floating rate loan interests:

Fund	Borrower	Par	Commitment Amount	Value	Unrealized Appreciation
BHL	Oberthur Technologies SA	\$ 86,579	\$ 86,146	\$ 87,391	\$ 1,245
FRA	Oberthur Technologies SA	\$ 377,237	\$ 375,350	\$ 380,775	\$ 5,425
BLW	Oberthur Technologies SA	\$ 166,974	\$ 166,139	\$ 168,540	\$ 2,401

Forward Commitments and When-Issued Delayed Delivery Securities: Certain Funds may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. A Fund may purchase securities under such conditions with the intention of actually acquiring them, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, a Fund may be required to pay more at settlement than the security is worth. In addition, a Fund is not entitled to any of the interest earned prior to settlement. When purchasing a security on a delayed delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. In the event of default by the counterparty, a Fund's maximum amount of loss is the unrealized appreciation of unsettled when-issued transactions.

Commitments: Commitments are agreements to acquire an investment at a future date (subject to conditions) in connection with a potential public or non-public offering. Such agreements may obligate a Fund to make future cash payments. As of February 28, 2017, BLW had outstanding commitments of

SEMI-ANNUAL REPORT

FEBRUARY 28, 2017

81

Notes to Financial Statements (continued)

\$5,600,000 in connection with the Chapter 11 cases of Energy Future Holding Corp., et al. These commitments are not included in the net assets of BLW as of February 28, 2017.

Reverse Repurchase Agreements: Reverse repurchase agreements are agreements with qualified third party broker dealers in which a Fund sells securities to a bank or broker-dealer and agrees to repurchase the same securities at a mutually agreed upon date and price. A Fund receives cash from the sale to use for other investment purposes. During the term of the reverse repurchase agreement, a Fund continues to receive the principal and interest payments on the securities sold. Certain agreements have no stated maturity and can be terminated by either party at any time. Interest on the value of the reverse repurchase agreements issued and outstanding is based upon competitive market rates determined at the time of issuance. A Fund may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse repurchase agreements involve leverage risk. If a Fund suffers a loss on its investment of the transaction proceeds from a reverse repurchase agreement, a Fund would still be required to pay the full repurchase price. Further, a Fund remains subject to the risk that the market value of the securities repurchased declines below the repurchase price. In such cases, a Fund would be required to return a portion of the cash received from the transaction or provide additional securities to the counterparty.

Cash received in exchange for securities delivered plus accrued interest due to the counterparty is recorded as a liability in the Statements of Assets and Liabilities at face value including accrued interest. Due to the short-term nature of the reverse repurchase agreements, face value approximates fair value. Interest payments made by a Fund to the counterparties are recorded as a component of interest expense in the Statements of Operations. In periods of increased demand for the security, a Fund may receive a fee for use of the security by the counterparty, which may result in interest income to a Fund.

For the six months ended February 28, 2017, the average amount of reverse repurchase agreements outstanding and the daily weighted average interest rate for BLW were \$256,590,202 and 1.04%, respectively.

Reverse repurchase transactions are entered into by a Fund under Master Repurchase Agreements (each, an "MRA"), which permit a Fund, under certain circumstances, including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables under the MRA with collateral held and/or posted to the counterparty and create one single net payment due to or from a Fund. With reverse repurchase transactions, typically a Fund and counterparty under an MRA are permitted to sell, re-pledge, or use the collateral associated with the transaction. Bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of the MRA counterparty's bankruptcy or insolvency. Pursuant to the terms of the MRA, a Fund receives or posts securities as collateral with a market value in excess of the repurchase price to be paid or received by a Fund upon the maturity of the transaction. Upon a bankruptcy or insolvency of the MRA counterparty, a Fund is considered an unsecured creditor with respect to excess collateral and, as such, the return of excess collateral may be delayed.

As of period end, the following table is a summary of BLW's open reverse repurchase agreements by counterparty which are subject to offset under an MRA on a net basis:

Counterparty	Fair Value of Non-cash			
	Reverse Repurchase Agreements	Collateral Pledged		Net Amount ²
		Including Accrued Interest ¹	Cash Collateral Pledged	
Barclays Capital, Inc.	\$ 5,963,984	\$ (5,963,984)		
BNP Paribas Securities Corp	17,760,073	(17,760,073)		
Citigroup Global Markets, Inc.	834,922	(834,922)		
Credit Suisse Securities (USA) LLC	17,292,818	(17,292,818)		
Deutsche Bank Securities, Inc.	74,277,478	(74,277,478)		
HSBC Securities (USA), Inc.	37,165,313	(37,165,313)		
J.P. Morgan Securities LLC	8,406,627	(8,339,576)		\$ 67,051
RBC Capital Markets LLC	72,547,580	(72,547,580)		
UBS Ltd.	21,372,788	(21,372,788)		
Total	\$ 255,621,583	\$ (255,554,532)		\$ 67,051

¹ Net collateral, including accrued interest, with a value of \$298,574,224 has been pledged/received in connection with open reverse repurchase agreements. Excess of net collateral pledged to the individual counterparty is not shown for financial reporting purposes.

² Net amount represents the net amount payable due to the counterparty in the event of default. In the event the counterparty of securities under an MRA files for bankruptcy or becomes insolvent, a Fund's use of the proceeds from the agreement may be restricted while the counterparty, or its trustee or receiver, determines whether or not to enforce a Fund's obligation to repurchase the securities.

5. Derivative Financial Instruments:

The Funds engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Funds and/or to manage their exposure to certain risks such as credit risk, equity risk, interest rate risk, foreign currency exchange rate risk, commodity price risk or other risks (e.g., inflation risk). Derivative financial instruments categorized by risk exposure are included in the Schedules of Investments. These contracts may be transacted on an exchange or OTC.

Notes to Financial Statements (continued)

Futures Contracts: The Funds invest in long and/or short positions in futures and options on futures contracts to gain exposure to, or manage exposure to, changes in interest rates (interest rate risk), changes in the value of equity securities (equity risk) or foreign currencies (foreign currency exchange rate risk).

Futures contracts are agreements between the Funds and a counterparty to buy or sell a specific quantity of an underlying instrument at a specified price and on a specified date. Depending on the terms of a contract, it is settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash amount on the settlement date. Upon entering into a futures contract, the Funds are required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on a contract's size and risk profile. The initial margin deposit must then be maintained at an established level over the life of the contract.

Securities deposited as initial margin are designated in the Schedules of Investments and cash deposited, if any, is shown as cash pledged for futures contracts in the Statements of Assets and Liabilities. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in market value of the contract (variation margin). Variation margin is recorded as unrealized appreciation (depreciation) and, if any, shown as variation margin receivable (or payable) on futures contracts in the Statements of Assets and Liabilities. When the contract is closed, a realized gain or loss is recorded in the Statements of Operations equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of futures contracts involves the risk of an imperfect correlation in the movements in the price of futures contracts and interest, foreign currency exchange rates or underlying assets.

Forward Foreign Currency Exchange Contracts: Certain Funds enter into forward foreign currency exchange contracts to gain or reduce exposure to foreign currencies (foreign currency exchange rate risk).

A forward foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a specified date. These contracts help to manage the overall exposure to the currencies in which some of the investments held by the Funds are denominated and in some cases, may be used to obtain exposure to a particular market.

The contract is marked to market daily and the change in market value is recorded as unrealized appreciation (depreciation) in the Statements of Assets and Liabilities. When a contract is closed, a realized gain or loss is recorded in the Statements of Operations equal to the difference between the value at the time it was opened and the value at the time it was closed. Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in cash without the delivery of foreign currency. The use of forward foreign currency exchange contracts involves the risk that the value of a forward foreign currency exchange contract changes unfavorably due to movements in the value of the referenced foreign currencies.

Options: Certain Funds purchase and write call and put options to increase or decrease their exposure to the risks of underlying instruments, including equity risk, interest rate risk and/or commodity price risk and/or, in the case of options written, to generate gains from options premiums.

A call option gives the purchaser (holder) of the option the right (but not the obligation) to buy, and obligates the seller (writer) to sell (when the option is exercised) the underlying instrument at the exercise or strike price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise or strike price at any time or at a specified time during the option period.

Premiums paid on options purchased and premiums received on options written, as well as the daily fluctuation in market value, are included in investments at value—unaffiliated and options written at value, respectively, in the Statements of Assets and Liabilities. When an instrument is purchased or sold through the exercise of an option, the premium is offset against the cost or proceeds of the underlying instrument. When an option expires, a realized gain or loss is recorded in the Statements of Operations to the extent of the premiums received or paid. When an option is closed or sold, a gain or loss is recorded in the Statements of Operations to the extent the cost of the closing transaction exceeds the premiums received or paid. When the Funds write a call option, such option is typically covered, meaning that they hold the underlying instrument subject to being called by the option counterparty. When the Funds write a put option, such option is covered by cash in an amount sufficient to cover the obligation.

Swaptions—Certain Funds purchase and write options on swaps (swaptions) primarily to preserve a return or spread on a particular investment or portion of the Funds' holdings, as a duration management technique or to protect against an increase in the price of securities it anticipates purchasing at a later date. The purchaser and writer of a swaption is buying or granting the right to enter into a previously agreed upon

interest rate or credit default swap agreement (interest rate risk and/or credit risk) at any time before the expiration of the option.

Foreign Currency options Certain Funds purchase and write foreign currency options, foreign currency futures and options on foreign currency futures to gain or reduce exposure to foreign currencies (foreign currency exchange rate risk). Foreign currency options give the purchaser the right to buy from or sell to the writer a foreign currency at any time before the expiration of the option.

In purchasing and writing options, the Funds bear the risk of an unfavorable change in the value of the underlying instrument or the risk that they may not be able to enter into a closing transaction due to an illiquid market. Exercise of a written option could result in the Funds purchasing or selling a security when it otherwise would not, or at a price different from the current market value.

Notes to Financial Statements (continued)

Swaps: The Funds enter into swap contracts to manage exposure to issuers, markets and securities. Such contracts are agreements between the Funds and a counterparty to make periodic net payments on a specified notional amount or a net payment upon termination. Swap agreements are privately negotiated in the OTC market and may be entered into as a bilateral contract (OTC swaps) or centrally cleared (centrally cleared swaps).

For OTC swaps, any upfront premiums paid and any upfront fees received are shown as swap premiums paid and swap premiums received, respectively, in the Statements of Assets and Liabilities and amortized over the term of the contract. The daily fluctuation in market value is recorded as unrealized appreciation (depreciation) on OTC Swaps in the Statements of Assets and Liabilities. Payments received or paid are recorded in the Statements of Operations as realized gains or losses, respectively. When an OTC swap is terminated, a realized gain or loss is recorded in the Statements of Operations equal to the difference between the proceeds from (or cost of) the closing transaction and the Funds basis in the contract, if any. Generally, the basis of the contract is the premium received or paid.

In a centrally cleared swap, immediately following execution of the swap contract, the swap contract is novated to a central counterparty (the CCP) and the Funds' counterparty on the swap agreement becomes the CCP. The Funds are required to interface with the CCP through the broker. Upon entering into a centrally cleared swap, the Funds are required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on the size and risk profile of the particular swap. Securities deposited as initial margin are designated in the Schedules of Investments and cash deposited is shown as cash pledged for centrally cleared swaps in the Statements of Assets and Liabilities. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in market value of the contract (variation margin). Variation margin is recorded as unrealized appreciation (depreciation) and shown as variation margin receivable (or payable) on centrally cleared swaps in the Statements of Assets and Liabilities. Payments received from (paid to) the counterparty, including at termination, are recorded as realized gains (losses) in the Statements of Operations.

Credit default swaps Certain Funds enter into credit default swaps to manage their exposure to the market or certain sectors of the market, to reduce their risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which they are not otherwise exposed (credit risk).

The Funds may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign), a combination or basket of single-name issuers or traded indexes. Credit default swaps are agreements in which the protection buyer pays fixed periodic payments to the seller in consideration for a promise from the protection seller to make a specific payment should a negative credit event take place with respect to the referenced entity (e.g., bankruptcy, failure to pay, obligation acceleration, repudiation, moratorium or restructuring). As a buyer, if an underlying credit event occurs, the Funds will either (i) receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising the index, or (ii) receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index. As a seller (writer), if an underlying credit event occurs, the Funds will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising the index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index.

Total return swaps Certain Funds enter into total return swaps to obtain exposure to a security or market without owning such security or investing directly in such market or to exchange the risk/return of one market (e.g., fixed income) with another market (e.g., equity or commodity prices) (equity risk, commodity price risk and/or interest rate risk).

Total return swaps are agreements in which there is an exchange of cash flows whereby one party commits to make payments based on the total return (distributions plus capital gains/losses) of an underlying instrument in exchange for fixed or floating rate interest payments. If the total return of the instrument or index underlying the transaction exceeds or falls short of the offsetting fixed or floating interest rate obligation, the Funds receive payment from or make a payment to the counterparty.

Interest rate swaps Certain Funds enter into interest rate swaps to gain or reduce exposure to interest rates or to manage duration, the yield curve or interest rate (interest rate risk).

Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating, in exchange for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time. In more complex interest rate swaps, the notional principal amount may decline (or amortize) over time.

Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Master Netting Arrangements: In order to define their contractual rights and to secure rights that will help them mitigate their counterparty risk, the Funds may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (ISDA Master Agreement) or similar agreement with their counterparties. An ISDA Master Agreement is a bilateral agreement between each Fund and a counterparty that governs certain OTC derivatives and

Notes to Financial Statements (continued)

typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, each Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments payables and/or receivables with collateral held and/or posted and create one single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of default including the bankruptcy or insolvency of the counterparty. Bankruptcy or insolvency laws of a particular jurisdiction may restrict or prohibit the right of offset in bankruptcy, insolvency or other events. In addition, certain ISDA Master Agreements allow counterparties to terminate derivative contracts prior to maturity in the event the Funds' net assets decline by a stated percentage or the Funds fail to meet the terms of their ISDA Master Agreements. The result would cause the Funds to accelerate payment of any net liability owed to the counterparty.

Collateral Requirements: For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Fund and the counterparty.

Cash collateral that has been pledged to cover obligations of the Funds and cash collateral received from the counterparty, if any, is reported separately on the Statements of Assets and Liabilities as cash pledged as collateral and cash received as collateral, respectively. Non-cash collateral pledged by the Funds, if any, is noted in the Schedules of Investments. Generally, the amount of collateral due from or to a counterparty is subject to a certain minimum transfer amount threshold before a transfer is required, which is determined at the close of business of the Funds. Any additional required collateral is delivered to/pledged by the Funds on the next business day. Typically, the counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. A Fund generally agrees not to use non-cash collateral that it receives but may, absent default or certain other circumstances defined in the underlying ISDA Master Agreement, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty. To the extent amounts due to the Funds from their counterparties are not fully collateralized, they bear the risk of loss from counterparty non-performance. Likewise, to the extent the Funds have delivered collateral to counterparty and stand ready to perform under the terms of their agreement with such counterparty, they bear the risk of loss from a counterparty in the amount of the value of the collateral in the event the counterparty fails to return such collateral. Based on the terms of agreements, collateral may not be required for all derivative contracts.

For financial reporting purposes, the Funds do not offset derivative assets and derivative liabilities that are subject to netting arrangements, if any, in the Statements of Assets and Liabilities.

6. Investment Advisory Agreement and Other Transactions with Affiliates:

The PNC Financial Services Group, Inc. is the largest stockholder and an affiliate of BlackRock, Inc. ("BlackRock") for 1940 Act purposes.

Investment Advisory: Each Fund entered into an Investment Advisory Agreement with the Manager, the Fund's investment adviser, an indirect, wholly-owned subsidiary of BlackRock, to provide investment advisory and administration services. The Manager is responsible for the management of each Fund's portfolio and provides the personnel, facilities, equipment and certain other services necessary to the operations of each Fund.

For such services, FRA pays the Manager a monthly fee at an annual rate equal to 0.75% of the average daily value of the Fund's net assets, plus the proceeds of any debt securities or outstanding borrowings used for leverage. For purposes of calculating this fee, "net assets" means the total assets of the Fund minus the sum of its accrued liabilities.

For such services, BLW pays the Manager a monthly fee at an annual rate equal to 0.55% of the average weekly value of the Fund's managed assets. For purposes of calculating this fee, "managed assets" means the total assets of the Fund minus the sum of its accrued liabilities (other than the aggregate indebtedness constituting financial leverage).

For such services, BHL pays the Manager a monthly fee at an annual rate equal to 1.00% of the average daily value of the Fund's managed assets. For purposes of calculating this fee, "managed assets" means the total assets of the Fund (including any assets attributable to money borrowed for investment purposes) minus the sum of its accrued liabilities (other than money borrowed for investment purposes).

The Manager provides investment management and other services to the Taxable Subsidiary. The Manager does not receive separate compensation from the Taxable Subsidiary for providing investment management or administrative services. However, the Funds pay the Manager based on the Funds' net assets, plus the proceeds of any debt securities or outstanding borrowings used for leverage, which includes the assets of the Taxable Subsidiary.

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

Distribution Fees: FRA and BLW have entered into a Distribution Agreement with BlackRock Investments, LLC (BRIL), an affiliate of the Manager, to provide for distribution of FRA and BLW common shares on a reasonable best efforts basis through an equity shelf offering (a Shelf Offering) (the Distribution Agreement); however, as of February 28, 2017, BLW is no longer actively engaged in a Shelf Offering and has not filed a registration statement or a prospectus for any current Shelf Offering. Pursuant to the Distribution Agreement, FRA and BLW would compensate BRIL with respect to sales of common shares at a commission rate of 1.00% of the gross proceeds of the sale of FRA and BLW s Common Shares and a portion of such commission would be re-allowed to broker-dealers engaged by BRIL.

SEMI-ANNUAL REPORT

FEBRUARY 28, 2017

85

Notes to Financial Statements (continued)

Waivers: The Manager voluntarily agreed to waive its investment advisory fees by the amount of investment advisory fees each Fund pays to the Manager indirectly through its investment in affiliated money market funds (the "affiliated money market fund waiver"). These amounts are included in fees waived by the Manager in the Statements of Operations. For the six months ended February 28, 2017, the amounts waived were as follows:

	BHL	FRA	BLW
Amounts waived	\$ 159	\$ 643	\$ 2,427
Effective September 1, 2016, the Manager voluntarily agreed to waive its investment advisory fee with respect to any portion of Fund's assets invested in affiliated equity or fixed-income mutual funds or affiliated exchange-traded funds that have a contractual management fee. Prior to September 1, 2016, the Manager did not waive such fees. On December 2, 2016, the Manager entered into a Master Advisory Fee Agreement ("Agreement"), contractually committing to this arrangement through June 30, 2017 for BHL and BLW and through December 31, 2017 for FRA. The Agreement can be renewed for annual periods thereafter, and may be terminated on 90 days' notice, each subject to approval by a majority of the Funds' independent directors. For the six months ended February 28, 2017 the amounts waived in investment advisory fees pursuant to these arrangements were as follows:			

	BHL	FRA	BLW
Amounts waived	\$ 987	\$ 3,513	\$ 787
Officers and Directors: Certain officers and/or directors of the Funds are officers and/or directors of BlackRock or its affiliates. The Funds reimburse the Manager for a portion of the compensation paid to the Funds' Chief Compliance Officer, which is included in Officer and Directors in the Statements of Operations.			

Other Transactions: The Funds may purchase securities from, or sell securities to, an affiliated fund provided the affiliation is due solely to having a common investment adviser, common officers, or common directors. For the six months ended February 28, 2017, the purchase and sale transactions and any net realized gains (losses) with affiliated funds in compliance with Rule 17a-7 under the 1940 Act were as follows:

	Purchases	Sales	Net Realized Gain (loss)
BLW	\$ 6,334		

7. Purchases and Sales:

For the six months ended February 28, 2017, purchases and sales of investments, including paydowns and excluding short-term securities, were as follows:

Purchases

	BHL	FRA	BLW
Non-U.S. Government Securities	\$ 35,948,191	\$ 284,667,669	\$ 269,585,822
U.S. Government Securities			
Total Purchases	\$ 35,948,191	\$ 284,667,669	\$ 269,585,822

Sales

	BHL	FRA	BLW
Non-U.S. Government Securities (includes paydowns)	\$ 66,963,950	\$ 279,082,153	\$ 264,620,434
U.S. Government Securities			1,589,200

Total Sales	\$ 66,963,950	\$ 279,082,153	\$ 266,209,634
--------------------	---------------	----------------	----------------

8. Income Tax Information:

It is the Funds' policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies, and to distribute substantially all of their taxable income to their shareholders. Therefore, no U.S. federal income tax provision is required, except with respect to any taxes related to the Taxable Subsidiaries.

Each Fund files U.S. federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on each Fund's U.S. federal tax returns generally remains open for each of the four years ended August 31, 2016. The statutes of limitations on each Fund's state and local tax returns may remain open for an additional year depending upon the jurisdiction.

Management has analyzed tax laws and regulations and their application to the Funds as of February 28, 2017, inclusive of the open tax return years, and does not believe that there are any uncertain tax positions that require recognition of a tax liability in the Funds' financial statements.

Notes to Financial Statements (continued)

As of August 31, 2016, the Funds had capital loss carryforwards available to offset future realized capital gains through the indicated expiration dates as follows:

Expires August 31,	BHL	FRA	BLW
No expiration date ¹	\$ 4,624,408	\$ 21,876,470	\$ 41,127,468
2017		50,735,721	9,996,868
2018		27,716,009	37,509,275
2019		2,206,081	
Total	\$ 4,624,408	\$ 102,534,281	\$ 88,633,611

As of February 28, 2017, gross unrealized appreciation and depreciation based on cost for U.S. federal income tax purposes were as follows:

	BHL	FRA	BLW
Tax cost	\$ 145,687,933	\$ 829,102,835	\$ 885,558,373
Gross unrealized appreciation	\$ 1,798,710	\$ 10,305,227	23,009,105
Gross unrealized depreciation	(660,158)	(10,746,632)	(14,045,582)
Net unrealized appreciation (depreciation)	\$ 1,138,552	\$ (441,405)	\$ 8,963,523

9. Bank Borrowings:

BHL and FRA are party to a senior committed secured, 360-day rolling line of credit facility and a separate security agreement (the SSB Agreement) with State Street Bank and Trust Company (SSB). SSB may elect to terminate its commitment upon 360-days written notice to the Funds. As of period end, the Funds have not received any notice to terminate. BHL and FRA have granted a security interest in substantially all of their assets to SSB.

The SSB Agreement allows for the following maximum commitment amounts:

	Commitment Amounts
BHL	\$ 61,000,000
FRA	\$ 274,000,000

Advances will be made by SSB to BHL or FRA, at the Funds' option of (a) the higher of (i) 0.80% above the Fed Funds rate and (ii) 0.80% above the Overnight LIBOR or (b) 0.80% above 7-day, 30-day, 60-day or 90-day LIBOR.

In addition, BHL and FRA paid a commitment fee (based on the daily unused portion of the commitments). The fees associated with each of the agreements are included in the Statements of Operations as borrowing costs, if any. Advances to BHL and FRA as of period end are shown in the Statements of Assets and Liabilities as bank borrowings payable. Based on the short-term nature of the borrowings under the line of credit and the variable interest rate, the carrying amount of the borrowings approximates fair value.

BHL and FRA may not declare dividends or make other distributions on shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding short-term borrowings is less than 300%.

For the six months ended February 28, 2017, the average amount of bank borrowings and the daily weighted average interest rates for BHL and FRA for loans under the revolving credit agreements were as follows:

	Average Amount of Bank Borrowings	Daily Weighted Average Interest Rate
BHL	\$ 45,220,994	1.38%
FRA	\$ 227,337,017	1.37%

10. Principal Risks:

In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer to meet all its obligations, including the ability to pay principal and interest when due (issuer credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers of securities owned by the Funds. Changes arising from the general economy, the overall market and local, regional or global political and/or social instability, as well as currency, interest rate and price fluctuations, may also affect the securities value.

Each Fund may be exposed to prepayment risk, which is the risk that borrowers may exercise their option to prepay principal earlier than scheduled during periods of declining interest rates, which would force each Fund to reinvest in lower yielding securities. Each Fund may also be exposed to reinvestment risk, which is the risk that income from each Fund's portfolio will decline if each Fund invests the proceeds from matured, traded or called fixed income securities at market interest rates that are below each Fund portfolio's current earnings rate.

Notes to Financial Statements (continued)

Valuation Risk: The market values of equities, such as common stocks and preferred securities or equity related investments, such as futures and options, may decline due to general market conditions which are not specifically related to a particular company. They may also decline due to factors which affect a particular industry or industries. A Fund may invest in illiquid investments and may experience difficulty in selling those investments in a timely manner at the price that they believe the investments are worth. Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. This volatility may cause each Fund's NAV to experience significant increases or decreases over short periods of time. If there is a general decline in the securities and other markets, the NAV of a Fund may lose value, regardless of the individual results of the securities and other instruments in which a Fund invests.

The price a Fund could receive upon the sale of any particular portfolio investment may differ from a Fund's valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued using a fair valuation technique or a price provided by an independent pricing service. Changes to significant unobservable inputs and assumptions (i.e., publicly traded company multiples, growth rate, time to exit) due to the lack of observable inputs may significantly impact the resulting fair value and therefore a Fund's results of operations. As a result, the price received upon the sale of an investment may be less than the value ascribed by a Fund, and a Fund could realize a greater than expected loss or lesser than expected gain upon the sale of the investment. A Fund's ability to value its investments may also be impacted by technological issues and/or errors by pricing services or other third party service providers.

Counterparty Credit Risk: Similar to issuer credit risk, the Funds may be exposed to counterparty credit risk, or the risk that an entity may fail to or be unable to perform on its commitments related to unsettled or open transactions. The Funds manage counterparty credit risk by entering into transactions only with counterparties that the Manager believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the Funds' exposure to market, issuer and counterparty credit risks with respect to these financial assets is approximately their value recorded in the Statements of Assets and Liabilities, less any collateral held by the Funds.

A derivative contract may suffer a mark-to-market loss if the value of the contract decreases due to an unfavorable change in the market rates or values of the underlying instrument. Losses can also occur if the counterparty does not perform under the contract.

A Fund's risk of loss from counterparty credit risk on OTC derivatives is generally limited to the aggregate unrealized gain less the value of any collateral held by such Fund.

For OTC options purchased, each Fund bears the risk of loss in the amount of the premiums paid plus the positive change in market values net of any collateral held by the Funds should the counterparty fail to perform under the contracts. Options written by the Funds do not typically give rise to counterparty credit risk, as options written generally obligate the Funds, and not the counterparty, to perform. The Funds may be exposed to counterparty credit risk with respect to options written to the extent the Funds deposit collateral with their counterparties to a written option.

With exchange-traded futures and centrally cleared swaps, there is less counterparty credit risk to the Funds since the exchange or clearinghouse, as counterparty to such instruments, guarantees against a possible default. The clearinghouse stands between the buyer and the seller of the contract; therefore, credit risk is limited to failure of the clearinghouse. While offset rights may exist under applicable law, a Fund does not have a contractual right of offset against a clearing broker or clearinghouse in the event of a default (including the bankruptcy or insolvency). Additionally, credit risk exists in exchange-traded futures and centrally cleared swaps with respect to initial and variation margin that is held in a clearing broker's customer accounts. While clearing brokers are required to segregate customer margin from their own assets, in the event that a clearing broker becomes insolvent or goes into bankruptcy and at that time there is a shortfall in the aggregate amount of margin held by the clearing broker for all its clients, typically the shortfall would be allocated on a pro rata basis across all the clearing broker's customers, potentially resulting in losses to the Fund.

Concentration Risk: Certain Funds may invest in securities that are rated below investment grade quality (sometimes called "junk bonds"), which are predominantly speculative, have greater credit risk and generally are less liquid and have more volatile prices than higher quality securities.

The Funds invest a significant portion of their assets in fixed income securities and/or use derivatives tied to the fixed income markets. Changes in market interest rates or economic conditions may affect the value and/or liquidity of such investments. Interest rate risk is the risk that prices of bonds and other fixed income securities will increase as interest rates fall and decrease as interest rates rise. The Funds may be subject to a greater risk of rising interest rates due to the current period of historically low rates.

Certain Funds invest a significant portion of their assets in securities backed by commercial or residential mortgage loans or in issuers that hold mortgage and other asset-backed securities. Investment percentages in these securities are presented in the Schedules of Investments. Changes in economic conditions, including delinquencies and/or defaults on assets underlying these securities, can affect the value, income and/or liquidity of such positions.

11. Capital Share Transactions:

BHL and BLW are authorized to issue an unlimited number of shares, par value \$0.001, all of which were initially classified as Common Shares. FRA is authorized to issue 200 million shares, par value \$0.10, all of which were initially classified as Common Shares. The Board is authorized, however, to reclassify any unissued Common Shares to Preferred Shares without approval of Common Shareholders.

Notes to Financial Statements (concluded)

On October 26, 2016, with respect to FRA and BLW, the Board approved the Funds' participation in an open market share repurchase program. The Funds are eligible to purchase, at prevailing market prices, up to 5% of their common shares outstanding as of the close of business on October 28, 2016, subject to certain conditions. Repurchases may be made through November 30, 2017. There is no assurance that the Funds will purchase shares in any particular amounts.

For the six months ended February 28, 2017 and the year ended August 31, 2016, shares issued and outstanding remained constant.

BLW had previously filed a final prospectus with the U.S. Securities and Exchange Commission (SEC) allowing it to issue an additional 3,750,000 Common Shares through a Shelf Offering. BLW is no longer actively engaged in a Shelf Offering and has not filed a registration statement or a prospectus for any current Shelf Offering. BLW did not issue any Common Shares through its Shelf Offering.

FRA filed a final prospectus with the SEC allowing it to issue an additional 3,050,000 Common Shares through a Shelf Offering. Under the Shelf Offering, FRA, subject to market conditions, may raise additional equity capital from time to time in varying amounts and utilizing various offering methods at a net price at or above FRA's NAV per Common Share (calculated within 48 hours of pricing). FRA has not issued any Common Shares through its Shelf Offering. See Additional Information - Shelf Offering Program for additional information about the Shelf Offering.

Costs incurred by FRA and BLW in connection with the Shelf Offering are recorded as a deferred charge and amortized over 12 months.

12. Contingencies:

In May 2015, the Motors Liquidation Company Avoidance Action Trust, as the Trust Administrator and Trustee of the General Motors bankruptcy estate, began serving amended complaints on defendants, which include former holders of certain General Motors debt (the Debt), in an adversary proceeding in the United States Bankruptcy Court for the Southern District of New York. In addition to FRA, the lawsuit also names over five hundred other institutional investors as defendants, some of which are also managed by BlackRock Advisors, LLC or its affiliates. The plaintiffs are seeking an order that FRA and other defendants return proceeds received in 2009 in full payment of the principal and interest on the Debt. The holders received a full repayment of a term loan pursuant to a court order in the General Motors bankruptcy proceeding with the understanding that the Debt was fully secured at the time of repayment. The plaintiffs contend that FRA and other defendants were not secured creditors at the time of the 2009 payments and therefore not entitled to the payments in full. FRA cannot predict the outcome of the lawsuit, or the effect, if any, on FRA's net asset value. As such, no liability for litigation related to this matter is reflected in the financial statements. Management cannot determine the amount of loss that will be realized by FRA but does not expect the loss to exceed the payment received in 2009. The amount of the proceeds received in 2009 is \$668,165.

13. Subsequent Events:

Management's evaluation of the impact of all subsequent events on the Funds' financial statements was completed through the date the financial statements were issued and the following items were noted:

	Common Dividend Per Share	
	Paid ¹	Declared ²
BHL	\$ 0.051	\$ 0.051
FRA	\$ 0.061	\$ 0.061
BLW	\$ 0.087	\$ 0.087

¹ Net investment income dividend paid on March 31, 2017 to Common Shareholders of record on March 15, 2017.

² Net investment income dividend declared on April 3, 2017, payable to Common Shareholders of record on April 13, 2017.

Additional Information

Fund Certification

Certain Funds are listed for trading on the NYSE and have filed with the NYSE their annual chief executive officer certification regarding compliance with the NYSE's listing standards. The Funds filed with the SEC the certification of its chief executive officer and chief financial officer required by section 302 of the Sarbanes-Oxley Act.

Dividend Policy

Each Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the distributions paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The portion of distributions that exceeds a Fund's current and accumulated earnings and profits, which are measured on a tax basis, will constitute a nontaxable return of capital. Distributions in excess of a Fund's taxable income and net capital gains, but not in excess of a Fund's earnings and profits, will be taxable to shareholders as ordinary income and will not constitute a nontaxable return of capital. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statements of Assets and Liabilities, which comprises part of the financial information included in this report.

General Information

BHL and BLW do not make available copies of their Statements of Additional Information because the Funds' shares are not continuously offered, which means that the Statements of Additional Information have not been updated after the completion of the respective Fund's offerings and the information contained in their Statements of Additional Information may have become outdated.

FRA's Statement of Additional Information includes additional information about its Board and is available, without charge upon request by calling (800) 882-0052.

In accordance with Section 23(c) of the Investment Company Act of 1940, as amended, that FRA and BLW from time to time may purchase their common shares in the open market or in private transactions.

Except as described below, during the period, there were no material changes in the Funds' investment objectives or policies or to the Funds' charters or by-laws that would delay or prevent a change of control of the Funds that were not approved by the shareholders or in the principal risk factors associated with investment in the Funds. There have been no changes in the persons who are primarily responsible for the day-to-day management of the Funds' portfolios.

On October 28, 2016, FRA announced that it had divided its Board of Directors into three classes, with one class standing for election each year, and had adopted a voting standard of a majority of the outstanding shares for the election of directors in a contested election.

Quarterly performance, semi-annual and annual reports, current net asset value and other information regarding the Funds may be found on BlackRock's website, which can be accessed at <http://www.blackrock.com>. Any reference to BlackRock's website in this report is intended to allow investors public access to information regarding the Funds and does not, and is not intended to, incorporate BlackRock's website in this report.

Electronic Delivery

Shareholders can sign up for e-mail notifications of quarterly statements, annual and semi-annual shareholder reports by enrolling in the electronic delivery program. Electronic copies of shareholder reports are available on BlackRock's website.

To enroll in electronic delivery:

Shareholders Who Hold Accounts with Investment Advisers, Banks or Brokerages:

Please contact your financial advisor. Please note that not all investment advisers, banks or brokerages may offer this service.

Additional Information (continued)

General Information (concluded)

Householding

The Funds will mail only one copy of shareholder documents, including annual and semi-annual reports and proxy statements, to shareholders with multiple accounts at the same address. This practice is commonly called "householding" and is intended to reduce expenses and eliminate duplicate mailings of shareholder documents. Mailings of your shareholder documents may be householded indefinitely unless you instruct us otherwise. If you do not want the mailing of these documents to be combined with those for other members of your household, please call the Funds at (800) 882-0052.

Availability of Quarterly Schedule of Investments

The Funds file their complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may also be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room or how to access documents on the SEC's website without charge may be obtained by calling (800) SEC-0330. The Funds' Forms N-Q may also be obtained upon request and without charge by calling (800) 882-0052.

Availability of Proxy Voting Policies and Procedures

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available upon request and without charge (1) by calling (800) 882-0052; (2) at <http://www.blackrock.com>; and (3) on the SEC's website at <http://www.sec.gov>.

Availability of Proxy Voting Record

Information about how the Funds voted proxies relating to securities held in the Funds' portfolios during the most recent 12-month period ended June 30 is available upon request and without charge (1) at <http://www.blackrock.com> or by calling (800) 882-0052 and (2) on the SEC's website at <http://www.sec.gov>.

Availability of Fund Updates

BlackRock will update performance and certain other data for the Funds on a monthly basis on its website in the "Closed-end Funds" section of <http://www.blackrock.com> as well as certain other material information as necessary from time to time. Investors and others are advised to check the website for updated performance information and the release of other material information about the Funds. This reference to BlackRock's website is intended to allow investors public access to information regarding the Funds and does not, and is not intended to, incorporate BlackRock's website in this report.

Section 19(a) Notices

BLW's amounts and sources of distributions reported are estimates and are being provided to you pursuant to regulatory requirements and are not being provided for tax reporting purposes. The actual amounts and sources for tax reporting purposes will depend upon the Fund's investment experience during the remainder of the fiscal year and may be subject to changes based on tax regulations. The Fund will provide a Form 1099-DIV each calendar year that will tell you how to report these distributions for federal income tax purposes.

February 28, 2017

Total Cumulative Distributions for the Fiscal Period				% Breakdown of the Total Cumulative Distributions for the Fiscal Period			
Net Investment Income	Net Realized Capital Gains	Net Realized Capital Gains	Return of Capital	Total Per Common	Net Investment Income	Net Realized Capital Gains	Return of Capital

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

		Short Term	Long Term	Share		Short Term	Long Term	Share		
BLW	\$ 0.740334		\$ 0.025666	\$ 0.7660	97%	0%	0%	3%	100%	

The Fund estimates that it has distributed more than the amount of earned income and net realized gains; therefore, a portion of the distribution may be a return of capital. A return of capital may occur, for example, when some or all of the shareholder's investment in the Fund is returned to the shareholder. A return of capital does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income". When distributions exceed total return performance, the difference will incrementally reduce the Fund's net asset value per share.

Section 19(a) notices for the Funds, as applicable, are available on the BlackRock website <http://www.blackrock.com>.

Additional Information (concluded)

Shelf Offering Program

From time-to-time, the Funds may seek to raise additional equity capital through an equity shelf program (a Shelf Offering). In a Shelf Offering, the Funds may, subject to market conditions, raise additional equity capital by issuing new Common Shares from time to time in varying amounts at a net price at or above the Funds' net asset value (NAV) per Common Share (calculated within 48 hours of pricing). While any such Shelf Offering may allow the Funds to pursue additional investment opportunities without the need to sell existing portfolio investments, it could also entail risks including that the issuance of additional Common Shares may limit the extent to which the Common Shares are able to trade at a premium to NAV in the secondary market.

BHL and BLW have not filed a registration statement with respect to any current Shelf Offerings. This report is not an offer to sell Fund Common Shares and is not a solicitation of an offer to buy Fund Common Shares. If a Fund files a registration statement with respect to any current Shelf Offering, the prospectus contained therein will contain more complete information about the Fund and should be read carefully before investing.

FRA has filed a final prospectus with the SEC in connection with its Shelf Offering. This report is not an offer to sell FRA Common Shares or a solicitation of an offer to buy FRA Common Shares in any jurisdiction where such offers or sales are not permitted. The prospectus contains important information about FRA, including its investment objectives, risks, charges and expenses. Investors are urged to read the prospectus of FRA carefully and in its entirety before investing. A copy of the final prospectus for FRA can be obtained from BlackRock at <http://www.blackrock.com>.

BlackRock Privacy Principles

BlackRock is committed to maintaining the privacy of its current and former fund investors and individual clients (collectively, Clients) and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information BlackRock collects, how we protect that information and why in certain cases we share such information with select parties.

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following:

(i) information we receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our websites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

This report is intended for current holders. It is not a prospectus. Past performance results shown in this report should not be considered a representation of future performance. The Funds have leveraged their Common Shares, which creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares, and the risk that fluctuations in short-term interest rates may reduce the Common Shares' yield. Statements and other information herein are as dated and are subject to change.
