- (1) Non-income producing.
- Variable rate security. Rate disclosed is as of February 28, 2018. For loan agreements, the rate shown may represent a weighted average interest rate. Information in parenthesis represents benchmark and reference rate for each security. Certain variable rate securities are not based on a published reference rate and spread but are determined by the issuer or agent and are based on current market conditions, or, for mortgage-backed securities, are impacted by the individual mortgages which are paying off over time. These securities do not indicate a reference rate and spread in their descriptions.
- (3) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At February 28, 2018, these securities amounted to a value of \$124,315 or 71.7% of net assets.
- (4) Regulation S security. Security is offered and sold outside of the United States, therefore, it is exempt from registration with the SEC under Rules 903 and 904 of the Securities Act of 1933.
- (5) No contractual maturity date.
- (6) Interest payments may be deferred.
- (7) This Note was issued for the sole purpose of funding a loan agreement between the issuer and the borrower. As the credit risk for this security lies solely with the borrower, the name represented here is that of the borrower.
- (8) This loan will settle after February 28, 2018, at which time the interest rate, based on the LIBOR and the agreed upon spread on trade date, will be reflected.
- (9) Value shown as par value.
- (10) Security in default, no interest payments are being received during the bankruptcy proceedings.
- (11) Security in default, interest payments are being received during the bankruptcy proceedings.
- (12) 100% of the income received was in cash.

- (13) Security valued at fair value as determined in good faith by or under the direction of the Trustees. This security is disclosed as a Level 3 security in the Fair Value Hierarchy table located after the Schedule of Investments.
- (14) The value of this security was determined using significant unobservable inputs and is reported as a Level 3 security in the Fair Value Hierarchy table located at the end of the Schedule of Investments.
- (15) All or a portion of the security is segregated as collateral for written options.
- (16) All or a portion of the portfolio is segregated as collateral for borrowings.
- (17) Amounts are less than \$500 (not reported in 000s).

There were no transfers between Level 1, Level 2, or Level 3 related to securities held at February 28, 2018.

Some of the Fund s investments that were categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could result in a significantly lower or higher value of Level 3 investments.

Management has determined that the amount of Level 3 securities compared to total net assets is de minimis; therefore, the rollforward of Level 3 securities and assumptions are not shown for the period ended February 28, 2018.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited)

FEBRUARY 28, 2018

NOTE 1 SIGNIFICANT ACCOUNTING POLICIES

The Fund is an investment company that follows the accounting and reporting guidance of Accounting Standards Codification Topic 946 applicable to Investment Companies.

The significant accounting policies consistently followed by the Fund in the preparation of its Schedule of Investments are summarized below and, for derivatives, included in Note 2 below. The preparation of the Schedule of Investments in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the Schedule of Investments. Actual results could differ from those estimates and those differences could be significant.

A. SECURITY VALUATION

Security valuation procedures for the Fund, which include nightly price variance, as well as back-testing items such as bi-weekly unchanged price, monthly secondary source and transaction analysis, have been approved by the Board of Trustees (the Board, or the Trustees). All internally fair valued securities are approved by a valuation committee appointed by the Board (the Valuation Committee). The Valuation Committee is comprised of certain members of management as identified to the Board and convenes independently from portfolio management. All internally fair valued securities are updated daily and reviewed in detail by the Valuation Committee monthly unless changes occur within the period. The Valuation Committee reviews the validity of any model inputs and any changes to the model. Fair valuations are reviewed by the Board at least quarterly.

The Fund utilizes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The Fund s policy is to recognize transfers between levels at the end of the reporting period.

Level 1 quoted prices in active markets for identical securities (security types generally include listed equities).

Level 2 prices determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 prices determined using significant unobservable inputs (including the Valuation Committee s own assumptions in determining the fair value of investments).

A description of the valuation techniques applied to the Fund s major categories of assets and liabilities measured at fair value on a recurring basis is as follows:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded or, if no closing price is available, at the last bid price and are categorized as Level 1 in the hierarchy. Restricted equity securities and private placements that are not widely traded, are illiquid, or are internally fair valued by the Valuation Committee, are generally categorized as Level 3 in the hierarchy.

Certain non-U.S. securities may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market or other regional and local developments) may occur between the time that non-U.S. markets close (where the security is principally traded) and the time that a Fund calculates its

net asset value (NAV) (at the close of regular trading on the New York Stock Exchange (NYSE), generally 4 p.m. Eastern time) that may impact the value of securities traded in these non-U.S. markets.

In such cases the Fund fair values non-U.S. securities using an independent pricing service which considers the correlation of the trading patterns of the non-U.S. security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange-traded funds, and certain indexes, as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy. Because the frequency of significant events is not predictable, fair valuation of certain non-U.S. common stocks may occur on a frequent basis.

Debt securities, including restricted securities, are valued based on evaluated quotations received from independent pricing services or from dealers who make markets in such securities. For most bond types, the pricing service utilizes matrix pricing that considers one or more of the following factors: yield or price of bonds of comparable quality, coupon, maturity, current cash flows, type, and current day trade information, as well as dealer-supplied prices. These valuations are generally categorized as Level 2 in the hierarchy. Structured debt instruments, such as mortgage-backed and asset-backed securities, may also incorporate collateral analysis and utilize cash flow models for valuation, and are generally categorized as Level 2 in the hierarchy. Pricing services do not provide pricing for all securities and therefore indicative bids from dealers are utilized which are based on pricing models used by market makers in the security and are generally categorized as Level 2 in the hierarchy. Debt securities that are not widely traded or are internally fair valued by the Valuation Committee, are generally categorized as Level 3 in the hierarchy.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized as Level 1 in the hierarchy. Over-the-counter derivative contracts, which include forward currency contracts and equity-linked instruments, do not require material subjectivity as pricing inputs are observed from actively quoted markets and are categorized as Level 2 in the hierarchy.

Investments in open-end mutual funds are valued at NAV. Investments in closed-end funds are valued as of the close of regular trading on the NYSE each business day. Both are categorized as Level 1 in the hierarchy.

A summary of the inputs used to value the Fund s net assets by each major security type is disclosed at the end of the Schedule of Investments for the Fund. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

NOTE 2 DERIVATIVE FINANCIAL INSTRUMENTS

Disclosures about derivative instruments and hedging activities are intended to enable investors to understand how and why the Fund uses derivatives, how derivatives are accounted for, and how derivative instruments affect the Fund s results of operations and financial position. Summarized below is a specific type of derivative instrument used by the Fund.

Options contracts

An options contract provides the purchaser with the right, but not the obligation, to buy (call option) or sell (put option) a financial instrument at an agreed-upon price. The Fund pursues an option income strategy whereby it purchases and sells out-of-the-money

puts and calls, creating an options spread designed to generate a consistent level of option cash flow which should result in additional yield. The Fund is subject to equity price risk in the normal course of pursuing its investment objectives.

When the Fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an asset. When the Fund writes an option, it receives a premium and an amount equal to that premium is recorded as a liability. The asset or liability is adjusted daily to reflect the current market value of the option.

Holdings of the Fund designated to cover outstanding written options are noted in the Schedule of Investments. Purchased options are reported as an asset within Investment in securities at value in the Statement of Assets and Liabilities. Options written are reported as a liability within Written options outstanding at value. Changes in value of the purchased option is included in Net change in unrealized appreciation (depreciation) on investments in the Statement of Operations. Changes in value of written options is included in Net change in unrealized appreciation (depreciation) on written options.

If an option expires unexercised, the Fund realizes a gain or loss to the extent of the premium received or paid. If an option is exercised, the premium received or paid is recorded as an adjustment to the proceeds from the sale or the cost basis of the purchase. The difference between the premium and the amount received or paid on effecting a closing purchase or sale transaction is also treated as a realized gain or loss. Gain or loss on purchased options is included in Net realized gain (loss) on investments—in the Statement of Operations. Gain or loss on written options is presented separately as—Net realized gain (loss) on written options—in the Statement of Operations. The risk in writing covered call options is that the Fund gives up the opportunity for profit if the market price of the security increases and the option is exercised. The risk in writing covered put options is that the Fund may incur a loss if the market price of the security decreases and the option is exercised.

The risk in buying options is that the Fund pays a premium whether or not the option is exercised. The use of such instruments may involve certain additional risks as a result of unanticipated movements in the market. Writers (sellers) of options are normally subject to unlimited risk of loss, as the seller will be obligated to deliver or take delivery of the security at a predetermined price which may, upon exercise of the option, be significantly different from the then-market value. However, the Fund may limit its risk of loss when writing an option by purchasing an option by purchasing an option similar to the one that is sold except for the fact it is further out of the money.

NOTE 3 ILLIQUID AND RESTRICTED SECURITIES

(\$ reported in thousands)

Investments are generally considered illiquid if they cannot be disposed of within seven days in the ordinary course of business at the approximate amount at which such securities have been valued by the Fund. Additionally, the following information is also considered in determining liquidity: the frequency of trades and quotes for the investment, whether the investment is listed for trading on a recognized domestic exchange and/or whether two or more brokers are willing to purchase or sell the security at a comparable price, the extent of market making activity in the investment and the nature of the market for investment.

Restricted securities are illiquid securities, as defined above, not registered under the Securities Act of 1933, as amended (the 1933 Act). Generally, 144A securities are excluded from this category, except where defined as illiquid.

The Fund will bear any costs, including those involved in registration under the 1933 Act, in connection with the disposition of such securities.

The Fund held securities considered to be illiquid at February 28, 2018, with an aggregate value of \$297 representing 0.2% of the Fund s net assets.

At February 28, 2018, the Fund did not hold any securities that were both illiquid and restricted.

NOTE 4 REGULATORY MATTERS AND LITIGATION

From time to time, the Fund, the Fund s Adviser and/or subadvisers and/or their affiliates may be involved in litigation and arbitration as well as examinations and investigations by various regulatory bodies, including the SEC, involving compliance with, among other things, securities laws, client investment guidelines, laws governing the activities of broker-dealers and other laws and regulations affecting their products and other activities. At this time, the Fund s Adviser believes that the outcomes of such matters are not likely, either individually or in aggregate, to be material to these financial statements.

NOTE 5 SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Fund through the date the Schedule of Investments was filed, and has determined that there are no subsequent events requiring recognition or disclosure in these Notes to Schedule of Investments.
