Table of Contents

The Group has adopted IFRS/HKFRS 16, Leases since 1 January 2019. Subject to practical expedients allowed by the standard, the Group recognised a lease liability and a corresponding right-of-use asset for all applicable leases, and recognised interest expense accrued on the outstanding balance of the lease liability and depreciation of the right-of-use asset. The Group has elected to use the modified retrospective approach for the adoption of the standard, i.e. it will not restate the comparative figures for years/periods prior to its initial application, and will recognise the cumulative effect of initial application as adjustments to the opening balances of total assets, total liabilities and retained earnings in the current period. As a result, the adoption of IFRS/HKFRS 16 caused depreciation and amortisation, finance costs to increase in the first quarter of 2019 while the rental expenses within network, operation and support expenses reduced correspondingly. The costs of telecommunications products sold decreased 20.8% year-on-year mainly due to the lower sales of telecommunications products during the period. Other operating expenses increased by 13.7% year-on-year mainly due to the increasing costs associated with the rapid growth of ICT business, and more technical support and marketing spending for innovative businesses. For the first quarter of 2019, the Group's EBITDA amounted to RMB 25,012 million, up by 4.6% year-on-year. EBITDA as a percentage of service revenue was 37.4%. The profit attributable to the equity shareholders of the Company amounted to RMB 3,675 million, up significantly by 22.3% year-on-year. Excluding the impact of the adoption of IFRS/HKFRS 16 in the period, depreciation and amortisation in the first quarter of 2019 would have decreased by 8.6% year-on-year mainly driven by the good control of capital expenditure in recent years. Finance costs would have decreased by 58.2% mainly because the strong free cash flow generated last year contributed to the substantial reduction in interest-bearing debts year-on-year. Network, operation and support expenses would still have decreased by 1.1% year-on-year mainly due to the effective control of the related costs.

Going forward, the Group will continue to deepen the execution of the Strategy of Focus, Innovation and Cooperation and deeply advance mixed-ownership reform. It will expedite Five New establishment to drive high-quality sustainable growth. The Group will resolutely carry out its Internet-oriented operation transformation, ensure stable development of its fundamental businesses and expand the scale of its innovative businesses in a bid to drive continuous business growth as a whole. Ongoing efforts will be made to strengthen operation management and risk control. The Group will advance cost reduction and efficiency enhancement to continuously improve operating effectiveness and competitive strengths, striving to achieve collaborative enhancement in the returns of shareholders, corporate and employees.
