Form 10-Q
November 16, 2009

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

- ☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR
15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2009

- ☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR
15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No.000-51883

MagneGas Corporation
(Exact name of registrant as specified in its charter)

Delaware	26-0250418
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

150 Rainville Rd	
Tarpon Springs, FL 34689	34689
(Address of principal executive offices)	(Zip Code)

(Former name, former address, if changed since last report)

Tel: (727) 934-3448
(Registrant's telephone number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act during the preceding 12 months (or for such shorter period that the issuer was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Edgar Filing: MAGNEGAS CORP - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐

Non-accelerated filer ☐

Accelerated filer ☐ (do not check if smaller reporting company)

Smaller reporting company ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

State the number of shares outstanding of each of the issuer's classes of common equity, as of November 12, 2009: 104,519,395 shares of common stock.

MagneGas Corporation
(A Development Stage Enterprise)
Notes to Financial Statements
(unaudited)

Three and Nine Months Ended September 30, 2009, 2008 and
for the period December 9, 2005 (date of inception) through September 30, 2009

1. Background Information

MagneGas Corporation (the "Company"), formerly 4307, Inc., was organized in the state of Delaware on December 9, 2005.

On April 2, 2007 (the "Effective Date"), pursuant to the terms of a Stock Purchase Agreement, Clean Energies Tech Co. purchased a total of 100,000 shares (100%) of the issued and outstanding common stock of the Company from the sole officer, director and shareholder of the Company, for an aggregate of \$30,000 in cash and the assumption of liabilities (\$2,500). The total of 100,000 shares represented all of the shares of outstanding common stock of the Company at the time of transfer.

Prior to the above transaction, Clean Energies Tech Co and the Company were essentially shell companies that were unrelated, with no assets, minimal liabilities, and no operations. As a result, the 100% change in control was recorded as a private equity transaction, and no goodwill was recorded, as no assets were acquired and minimal liabilities were assumed. On May 12, 2007, subsequent to the date of purchase, 67,052,000 shares of common stock were issued to founding members of the organization. As the company determined that the shares had no value, stock and additional paid in capital were increased and decreased, respectively, by the par value of the stock issued.

Since the acquisition, the Company has adopted the operating plan and mission which is to provide services in cleaning and converting contaminated waste. A process has been developed which transforms contaminated waste through a proprietary incandescent machine. The result of the product is to carbonize waste for normal disposal. A by-product of this process will produce an alternative MagneGas source.

2. Development Stage Enterprise

The Company has been in the development stage since its formation on December 9, 2005. It has primarily engaged in raising capital to carry out its business plan, as described above. The Company expects to continue to incur significant operating losses and to generate negative cash flow from operating activities while it develops its customer base and establishes itself in the marketplace. The Company's ability to eliminate operating losses and to generate positive cash flow from operations in the future will depend upon a variety of factors, many of which it is unable to control. If the Company is unable to implement its business plan successfully, it may not be able to eliminate operating losses, generate positive cash flow, or achieve or sustain profitability, which would materially adversely affect its business, operations, and financial results, as well as its ability to make payments on any obligations it may incur.

3. Going Concern

The accompanying unaudited financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern.

The Company incurred a net loss of \$495,486, \$917,461 and \$2,317,538 for the three and nine months ended September 30, 2009 and for the period December 9, 2005 (date of inception) through the period ended September 30, 2009, respectively. As of September 30, 2009 the Company had minimal cash with which to satisfy any future cash requirements. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The Company depends upon capital to be derived from future financing activities such as subsequent offerings of its common stock, debt financing or grant funding in order to operate and grow the business. There can be no assurance that the Company will be successful in raising such capital or grants. The key factors that are not within the Company's control and that may have a direct bearing on operating results include, but are not limited to, acceptance of the Company's business plan, the ability to raise capital in the future, the ability to expand its customer base, and the ability to hire key employees to build and manufacture such proprietary machines to provide services. There may be other risks and circumstances that management may be unable to predict.

The unaudited financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the possible inability of the Company to continue as a going concern.

F-7

4. Summary of Significant Accounting Policies

The significant accounting policies followed are:

Basis of Presentation

In the opinion of management, all adjustments consisting of normal recurring adjustments necessary for a fair statement of (a) the result of operations for the three and nine month periods ended September 30, 2009, 2008 and the period December 9, 2005 (date of inception) through September 30, 2009; (b) the financial position at September 30, 2009, and (c) cash flows for the nine month period ended September 30, 2009, 2008 and the period December 9, 2005 (date of inception) through September 30, 2009, have been made.

The unaudited financial statement and notes are presented as permitted by Form 10-Q. Accordingly, certain information and note disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. The accompanying unaudited financial statements should be read in conjunction with the financial statements for the years ended December 31, 2008 and 2007 and notes thereto in the Company's annual report on Form 10-K for the year ended December 31, 2008, filed with the Securities and Exchange Commission. Operating results for the three and nine months ended September 30, 2009 and 2008 and for the period December 9, 2005 (date of inception) to September 30, 2009 is not necessarily indicative of the results that may be expected for the entire year.

Use of Estimates

The Company prepares its financial statements in conformity with generally accepted accounting principles in the United States of America. These principals require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that these estimates are reasonable and have been discussed with the Board of Directors; however, actual results could differ from those estimates.

Variable Interest Entities

The Company considers the consolidation of entities to which the usual condition (ownership of a majority voting interest) of consolidation does not apply, focusing on controlling financial interests that may be achieved through arrangements that do not involve voting interest. If an enterprise holds a majority of the variable interests of an entity, it would be considered the primary beneficiary. The primary beneficiary is generally required to consolidate assets, liabilities and non-controlling interests at fair value (or at historical cost if the entity is a related party) and subsequently account for the variable interest as if it were consolidated based on a majority voting interest. The Company has investments in joint ventures that are in development of the MagneGas technology, however the Company is not identified as a primary beneficiary; therefore no consolidation is required and the investments are listed at their cost.

Financial Instruments

The Company's balance sheets include the following financial instruments: cash, accounts receivable, inventory, accounts payable and note payable to stockholder. The carrying amounts of current assets and current liabilities approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization. The carrying values of the note payable to stockholder approximates fair value based on borrowing rates currently available to the Company for instruments with similar terms and remaining maturities.

Cash and Cash Equivalents

The majority of cash is maintained with a major financial institution in the United States. Deposits with this bank may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed on demand and, therefore, bear minimal risk. The Company considers all highly liquid investments purchased with an original maturity of six months or less to be cash equivalents.

Accounts Receivable, Credit and Revenue Recognition

Accounts receivable consist of amounts due for the delivery of MagneGas sales to customers. Revenue for metal-cutting fuel is recognized when shipments are made to customers. The Company recognizes a sale when the product has been shipped and risk of loss has passed to the customer. An allowance for doubtful accounts is considered to be established for any amounts that may not be recoverable, which is based on an analysis of the Company's customer credit worthiness, and current economic trends. Based on management's review of accounts receivable, no allowance for doubtful accounts was considered necessary. Receivables are determined to be past due, based on payment terms of original invoices. The Company does not typically charge interest on past due receivables.

Inventories

Inventories are stated at the lower of standard cost or market, which approximates actual cost. Cost is determined using the first-in, first-out method. Inventory is comprised of filled cylinders of MagneGas and accessories (regulators and tips) available for sale.

F-8

Property, Equipment and Intangible Assets

Equipment is stated at cost. Depreciation is computed by the straight-line method over estimated useful lives (five years for equipment). The carrying amount of all long-lived assets is evaluated periodically to determine if adjustment to the depreciation and amortization period or the unamortized balance is warranted. Based upon its most recent analysis, the Company believes that no impairment of equipment existed at December 31, 2008. Currently there is no equipment capitalized.

During 2008, the Company recorded an intangible license for \$727,000 related to the Company's acquisition of patent rights and certain other intellectual property, secured from a company related by common management. The Company valued the license based on the value of the stock issued, as the Company believes that this is the more reliable measurement. The intellectual property consists primarily of patents and patent applications, which the Company has estimated has a useful life of fifteen years.

Long-lived assets such as property, equipment and identifiable intangibles are reviewed for impairment whenever facts and circumstances indicate that the carrying value may not be recoverable. When required impairment losses on assets to be held and used are recognized based on the fair value of the asset. The fair value is determined based on estimates of future cash flows, market value of similar assets, if available, or independent appraisals, if required. If the carrying amount of the long-lived asset is not recoverable from its undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount and fair value of the asset. When fair values are not available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risk associated with the recovery of the assets. The Company did not recognize any impairment losses for any periods presented.

Share-Based Compensation

All share-based payments to employees, including grants of employee stock options are recognized as compensation expense in the financial statements based on their fair values. That expense is recognized over the requisite service period, the period during which an employee is required to provide services in exchange for the award, (usually the vesting period). The Company had no common stock options or common stock equivalents granted or outstanding for all periods presented

The Company issues restricted stock to consultants for various services. Cost for these transactions are measured at the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The value of the common stock is measured at the earlier of (i) the date at which a firm commitment for performance by the counterparty to earn the equity instruments is reached or (ii) the date at which the counterparty's performance is complete. The Company recognized consulting expenses and a corresponding increase to additional paid-in-capital related to stock issued for services. Stock compensation for the three and nine months ended September 30, 2009 and 2008, were issued to consultants for past services provided, accordingly, all shares issued are fully vested, and there is no unrecognized compensation associated with these transactions. In May 2008 the Company entered into a consulting agreement for services to be rendered over a five year period. The consulting expense is to be recognized ratably over the requisite service period.

Shipping Costs

The Company includes shipping costs and freight-in costs in cost of goods sold. Total freight-in included in cost of goods sold expense was \$219, \$0, \$649, \$0 and \$649 for the three and nine months ended September 30, 2009, 2008 and for the period December 9, 2005 (date of inception) through September 30, 2009, respectively..

Advertising Costs

Advertising costs have been occurred for the promotion of the existing technology generally technical demonstrations. The costs of advertising are expensed as incurred. Advertising expenses are included in the Company's operating expenses.

Research and Development

The Company expenses research and development costs when incurred. Indirect costs related to research and developments are allocated based on percentage usage to the research and development.

Income Taxes

The Company accounts for income taxes under the liability method. Deferred tax assets and liabilities are recorded based on the differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purpose, referred to as temporary differences. Deferred tax assets and liabilities at the end of each period are determined using the currently enacted tax rates applied to taxable income in the periods in which the deferred tax assets and liabilities are expected to be settled or realized.

Earnings (Loss) Per Share

Basic earnings (loss) per share calculations are determined by dividing net income (loss) by the weighted average number of shares outstanding during the year. Diluted earnings (loss) per share calculations are determined by dividing net income (loss) by the weighted average number of shares. There are no share equivalents and, thus, anti-dilution issues are not applicable.

F-9

Subsequent Events

These interim condensed financial statements were approved by management and were issued on November 12, 2009. Subsequent events have been evaluated through this date.

5. Recently Issued Accounting Pronouncements

We have reviewed accounting pronouncements and interpretations thereof that have effectiveness dates during the periods reported and in future periods. We believe that the following impending standards may have an impact on our future filings. The applicability of any standard is subject to the formal review of our financial management and certain standards are under consideration.

In June 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-01, Topic 105 — Generally Accepted Accounting Principles — amendments based on Statement of Financial Accounting Standards No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles. This ASU reflected the issuance of FASB Statement No. 168. This Accounting Standards Update amends the FASB Accounting Standards Codification for the issuance of FASB Statement No. 168, The FASB Accounting Standards Codification TM and the Hierarchy of Generally Accepted Accounting Principles. This Accounting Standards Update includes Statement 168 in its entirety, including the accounting standards update instructions contained in Appendix B of the Statement. The Codification does not change current U.S. GAAP, but is intended to simplify user access to all authoritative U.S. GAAP by providing all the authoritative literature related to a particular topic in one place. The Codification is effective for interim and annual periods ending after September 15, 2009, and as of the effective date, all existing accounting standard documents will be superseded. The Codification is effective for us in the third quarter of 2009, and accordingly, our Quarterly Report on Form 10-Q for the quarter ending September 30, 2009 and all subsequent public filings will reference the Codification as the sole source of authoritative literature.

In June 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-02, Omnibus Update—Amendments to Various Topics for Technical Corrections. This omnibus ASU detailed amendments to various topics for technical corrections. The adoption of ASU 2009-02 will not have a material impact on our condensed financial statements.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-03, SEC Update — Amendments to Various Topics Containing SEC Staff Accounting Bulletins. This ASU updated cross-references to Codification text. The adoption of ASU 2009-03 will not have a material impact on our condensed financial statements.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-04, Accounting for Redeemable Equity Instruments — Amendment to Section 480-10-S99. This ASU represents an update to Section 480-10-S99, Distinguishing Liabilities from Equity, per Emerging Issues Task Force Topic D-98, “Classification and Measurement of Redeemable Securities.” The adoption of ASU 2009-04 will not have a material impact on our condensed financial statements.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-05, Fair Value Measurements and Disclosures (Topic 820) — Measuring Liabilities at Fair Value. This Accounting Standards Update amends Subtopic 820-10, Fair Value Measurements and Disclosures - Overall, to provide guidance on the fair value measurement of liabilities. The adoption of ASU 2009-05 is not expected to have a material impact on our condensed financial statements.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-06, Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities. This Accounting Standards Update provides additional implementation guidance on accounting for uncertainty in income taxes and eliminates the disclosures.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-07, Technical Corrections to SEC Paragraphs. This Accounting Standards Update corrected SEC paragraphs in response to comment letters. The adoption of ASU 2009-07 will not have material impact on our condensed financial statements.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-08, Earnings Per Share Amendments to Section 260-10-S99. This Codification Update represents technical corrections to Topic 260-10-S99, Earnings per Share, based on EITF Topic D-53, Computation of Earnings Per Share for a Period that Includes a Redemption or an Induced Conversion of a Portion of a Class of Preferred Stock and EITF Topic D-42, The Effect of the Calculation of Earnings per Share for the Redemption or Induced Conversion of Preferred Stock. The adoption of ASU 2009-08 will not have material impact on our condensed financial statements.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-09, Accounting for Investments-Equity Method and Joint Ventures and Accounting for Equity-Based Payments to Non-Employees. This Accounting Standards Update represents a correction to Section 323-10-S99-4,

F-10

Accounting by an Investor for Stock-Based Compensation Granted to Employees of an Equity Method Investee. Section 323-10-S99-4 was originally entered into the Codification incorrectly. The adoption of ASU 2009-09 will not have material impact on our condensed financial statements.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-10, Financial Services-Brokers and Dealers: Investments-Other, Amendment to Subtopic 940-325. This Accounting Standards Update codifies the Observer comment in paragraph 17 of EITF 02-3, Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management. The adoption of ASU 2009-10 will not have material impact on our condensed financial statements.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-11, Extractive Activities-Oil and Gas, Amendment to Section 932-10-S99. This Accounting Standards Update represents a technical correction to the SEC Observer comment in EITF 90-22, Accounting for Gas-Balancing Arrangements. The adoption of ASU 2009-11 will not have material impact on our condensed financial statements.

In September 2009, the FASB issued Accounting Standards Update (“ASU”) No. 2009-12, Fair Value Measurements and Disclosures (Topic 820), Investments in Certain Entities that Calculate Net Asset Value per Share (or Its Equivalent). This Accounting Standards Update amends Subtopic 820-10, Fair Value Measurements and Disclosures Overall, to provide guidance on the fair value measurement of investments in certain entities that calculate net asset value per share (or its equivalent). The adoption of ASU 2009-12 will not have material impact on our condensed financial statements.

6. Property, Equipment and Intangible Assets

There were no capitalized equipment as of September 30, 2009. Equipment sold in 2008 resulted in a loss of \$2,757. Depreciation of equipment was \$0, \$520 and \$693 for the nine months ended September 30, 2009, 2008 and for the period December 9, 2005 (date of inception) through September 30, 2009, respectively.

The Company owns certain rights and licenses of intellectual property.

	September 30, 2009 (unaudited)	December 31, 2008 (audited)
Intangible Assets	\$ 727,000	\$ 727,000
Less: Accumulated Amortization	52,461	6,111
	\$ 674,539	\$ 720,889
2009	\$ 12,117	
2010	48,467	
2011	48,467	
2012	48,467	
2013	48,467	
thereafter	468,554	
	\$ 674,539	

Amortization expense was \$12,116, \$1,666, \$36,350, \$4,444, and \$42,461 for the three and nine months ended September 30, 2009, 2009 and the period December 9, 2005 (date of inception) through September 30, 2009, respectively.

7. Related Party Transactions

The Company entered into an agreement with a company, Hyfuels, Inc., (the worldwide intellectual property owner) which secures intellectual property licensing for North, South, Central America and all Caribbean Islands ("the Territories"). Dr. Ruggero Santilli, Chief Executive Officer, Chairman of the Board and Chief Scientist of MagneGas Corporation, is also the Chief Executive Officer, Chief Scientist and President of Hyfuels, Inc so as to expedite the patent work on behalf of both MagneGas Corporation and Hyfuels, Inc. It should be noted that Dr. Santilli is not and never has been a stockholder of Hyfuels, Inc. and is lending his knowledge and expertise for the mutually beneficial advancement of this technology. This intellectual property consists of all relevant patents, patent applications, trademarks and domain names. The agreement became effective February 2008, when the Company issued 100,000 shares of common stock valued at \$1.00 per share. The term of the license agreement is in perpetuity for the above territories with the exception of (i) bankruptcy or insolvency of the Company (ii) the filing of the Company of a petition for bankruptcy (iii) the making by the Company of the assignment of the license for the benefit of creditors (iv) the appointment of a receiver of the Company or any of its assets which appointment shall not be vacated within 60 days thereafter (v) the filing of any other petition for the relief from creditors based upon the alleged bankruptcy or insolvency of the Company which shall not be dismissed within 60 days thereafter. Additionally, the agreement triggered a 5 year consulting agreement with Dr. Santilli, whose knowledge and expertise of the technology is essential in the development of the MagneGas product. The terms of the consulting agreement consist of issuance of common stock (100,000 shares) and payment of \$5,000 per month to Dr. Santilli, upon the determination by the Board of Directors of MagneGas Corporation of achieving adequate funding. On December 29, 2008 the company exercised their purchase option to acquire the intellectual property which includes all possible inventions, discoveries and intellectual right of the MagneGas Technology, for 30,000,000 common shares with a market value of \$627,000 at the time of the purchase option. The Company is continuing to seek opportunities for expansion of its intellectual property rights into other areas of the world excluding Europe.

In 2007 an advance in the amount of \$10,000 was made by a company owned by a shareholder, for initial deposit for services. As of September 30, 2009, the amount remains as a payable to the affiliate. There are no repayment terms to this advance and the amount is payable upon demand.

In January 2008, the Company received \$30,000 from a shareholder in exchange for an unsecured promissory note to a shareholder. During 2008 additional funds were contributed for the purposes of operating capital, under the same terms of the original shareholder note. The total of these notes were \$125,100 plus accrued interest. These promissory notes have no repayment date; however it is payable within 30 days of written demand. Payment is to include accrued simple interest at 4%.

During the normal course of operations, business expenses have been paid by a shareholder. These advances are short-term in nature and the expenses are typically reimbursed within a reasonable period. These advances are non-interest bearing and have no repayment date. As of September 30, 2009 the amounts due from advances was \$2,187.

Beginning April 2008 the Company entered into a month-to-month lease, at a monthly rate of \$2,500 per month for facilities to occupy approximately 3,000 square feet of a 6,000 square foot building and the use of certain equipment and utilities, as needed. The facility allows for expansion needs. The lease is held by a Company that is effectively controlled by Dr. Santilli.

The use of an initial small production refinery has been contributed by Dr. Ruggero Santilli, Chief Executive Officer, Chief Scientist, and Chairman of the Board. The computed fair value of this month to month rental agreement is \$1,870 per month and has been charged to equipment rental expense in the operating expenses. To reflect the contributed value, the corresponding entry has been charged to additional paid in capital, and is included in the statement of stockholders' equity. Total contributed value was \$5,610 and \$16,830 for the three and nine months ended September 30, 2009 and \$28,050 for the period December 9, 2005 (date of inception) through September 30, 2009.

The amounts and terms of the above transactions may not necessarily be indicative of the amounts and terms that would have been incurred had comparable transactions been entered into with independent third parties.

8. Income Tax

The Company has not recognized an income tax benefit for its operating start-up losses generated since inception based on uncertainties concerning its ability to generate taxable income in future periods. The tax benefit for the periods presented is offset by a valuation allowance established against deferred tax assets arising from operating losses and other temporary differences, the realization of which could not be considered more likely than not. In future periods, tax benefits and related deferred tax assets will be recognized when management considers realization of such amounts to be more likely than not. As of December 31, 2008, the Company incurred start-up losses of approximately \$90,600. These losses are capitalized as start-up costs for tax purposes, to be amortized when the Company commences business operations.

9. Equity

The company has two classifications of stock:

Preferred Stock includes 10,000,000 shares authorized at a par value of \$0.001. Preferred Stock has been issued as Series A Preferred Stock. Preferred Stock has liquidation and dividend rights over Common Stock, which is not in excess of its par value. The preferred stock has no conversion rights or mandatory redemption features. Each share of Preferred Stock is entitled to 100,000 votes.

Common Stock includes 900,000,000 shares authorized at a par value of \$0.001. The holders of Common Stock and the equivalent Preferred Stock, voting together, shall appoint the members of the Board of the Directors. Each share of Common Stock is entitled to one vote.

During the nine month period ended September 30, 2009, the company issued 3,032,500 common shares to various consultants, valued at fair market. During the nine month period ending September 30, 2009, the Company sold 1,642,062 common shares at the prevailing market quotation share price for \$158,000 in cash.

During the quarter ended June 30, 2009 the Company issued subscription agreements for the purchase of shares of common stock which included warrants to purchase an additional 854,763 common shares at the fair market value of the shares at the date of the subscription agreement. If the warrants are to be exercised, the proceeds would amount to \$131,000. There have been no excises of the warrants as of September 30, 2009.

Additionally warrants were issued to a service provider, vesting over a one year period, exercisable at the fair market price at the date of the agreement. A total of 340,000 warrants, vesting on the quarterly periods through February 15, 2010 were valued at \$8,432 and will be recognized ratably over the vesting period. Stock-based compensation was charged for the recognized portion of the warrants, in the amount of \$2,108 and \$4,216 for the three and nine month period ended September 30, 2009.

F-12

The following assumptions were used in the valuation calculation:

Dividend rate	0.000	%
Risk-free interest rate	1.440	%
Expected lives	2.0	
Expected price volatility	110.862	%
Forfeiture Rate	0.000	%

10. Subsequent Events

The Company is currently in negotiations with companies to expanded territories in the development of the MagneGas technologies. As of September 30, 2009, there are agreements in principle, with completion upon transfer of title.

Jeruz MagneGas Pvt. Limited:

On March 26, 2009 the Company entered into contract with HyFuels, Inc to permanently transfer to MagneGas Corporation in its totality and irrevocably the entirety of the assets owned by HyFuels, Inc in Jeruz MagneGas Pvt. Limited. Jeruz MagneGas Pvt. Limited is an India based corporation (located at 8/A, Ground Floor "KARP House", Lal Darwaja, Surat: 395 008, India) that owns all Intellectual Property rights (patents, patent applications, trademark, domain names and technical know-how) for the MagneGas Technology for India, Pakistan, Bangladesh and Sri Lanka only. The assets transferred from HyFuels, Inc to MagneGas Corporation are as follows:

1. 12.5% equity shares of Jeruz MagneGas Pvt, Limited in the existing issued and paid up capital of Jeruz MagneGas Pvt. Limited;
2. 5% royalties on sales of MagneGas equipment made by Jeruz MagneGas Pvt. Limited.

The consideration to be paid for the Purchased Assets the Purchaser, MagneGas, is 1,000,000 (one million) restricted shares of common stock. As of September 30, 2009, the terms of this agreement were not satisfied and the shares were not issued, rendering the agreement null and void. It was determined by the Board of Directors that there were certain liabilities associated with share ownership of a company domiciled in India and these liabilities could not be properly assessed to the satisfaction of the Board. In addition, the royalty terms were not satisfactory, requiring a royalty on sales after direct expenses, versus a royalty on gross sales. Negotiation is currently underway to restructure this agreement without equity participation due to the inherent risk to MagneGas Corporation of the share ownership, instead including better royalty terms. As of November 12, 2009, this negotiation has not been completed and the Company can make no assessment as to the expected outcome of the negotiation.

MagneGas Israel LLC

MagneGas Israel LLC issued MagneGas Corp a minority share interest of 20% of their issued and outstanding stock. We have no common directors or officers in this company and are unrelated. MagneGas Israel LLC owns the intellectual property rights for MagneGas for Israel. MagneGas Israel LLC has no assets or cash at this time. The completion of this transaction will be completed within a reasonable time, at which time the Company will recognize an investment in the venture.

We currently have no written agreement with this company and it is intended that MagneGas, in exchange for the 20% interest, will advise the Israel Company and additionally provide manufacturing support. MagneGas Israel, LLC is seeking funding to complete the purchase of a demonstration MagneGas refinery. As of November 12, 2009, this funding has not been secured.

Philippine and Vietnam Market

On July 7, 2009 the Company signed definitive Asset Purchase and Distribution agreements with American Investments, Inc for the purchase of a \$1.2million MagneGas Refinery and the granting of exclusive distribution rights for the Philippine and Vietnam markets. In June 2009, MagneGas received \$100,000 as down-payment on the equipment purchase order. The signed agreement calls for an additional \$390,000 is due on December 1, 2009, the anticipated commencement of construction. The balance of \$710,000 is due prior to the final delivery of the refinery. Due to the extreme natural weather conditions (hurricane, flooding) encountered in the Philippines, it is uncertain if the original time schedule is to be renegotiated.

11. Contingencies

From time to time the Company may be a party to litigation matters involving claims against the Company. Management believes that there are no current matters that would have a material effect on the Company's financial position or results of operations.

F-13

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation or Plan of Operation.

Cautionary Notice Regarding Forward Looking Statements

The information contained in Item 2 contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Actual results may materially differ from those projected in the forward-looking statements as a result of certain risks and uncertainties set forth in this report. Although management believes that the assumptions made and expectations reflected in the forward-looking statements are reasonable, there is no assurance that the underlying assumptions will, in fact, prove to be correct or that actual results will not be different from expectations expressed in this report.

We desire to take advantage of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. This filing contains a number of forward-looking statements which reflect management’s current views and expectations with respect to our business, strategies, products, future results and events, and financial performance. All statements made in this filing other than statements of historical fact, including statements addressing operating performance, events, or developments which management expects or anticipates will or may occur in the future, including statements related to distributor channels, volume growth, revenues, profitability, new products, adequacy of funds from operations, statements expressing general optimism about future operating results, and non-historical information, are forward looking statements. In particular, the words “believe,” “expect,” “intend,” “anticipate,” “estimate,” “n variations of such words, and similar expressions identify forward-looking statements, but are not the exclusive means of identifying such statements, and their absence does not mean that the statement is not forward-looking. These forward-looking statements are subject to certain risks and uncertainties, including those discussed below. Our actual results, performance or achievements could differ materially from historical results as well as those expressed in, anticipated, or implied by these forward-looking statements. We do not undertake any obligation to revise these forward-looking statements to reflect any future events or circumstances.

Readers should not place undue reliance on these forward-looking statements, which are based on management's current expectations and projections about future events, are not guarantees of future performance, are subject to risks, uncertainties and assumptions (including those described below), and apply only as of the date of this filing. Our actual results, performance or achievements could differ materially from the results expressed in, or implied by, these forward-looking statements. Factors which could cause or contribute to such differences include, but are not limited to, the risks to be discussed in our Annual Report on form 10-K and in the press releases and other communications to shareholders issued by us from time to time which attempt to advise interested parties of the risks and factors which may affect our business. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Plan of Operations

Due to the current state of the economy and financial markets, it is been difficult for the Company to achieve its Plan of Operation, primarily due to lack of capital to finance the Plan. As a result, the Company is extending the Plan to cover a 24 month period. During the next twenty four months, we expect to take the following steps in connection with the further development of our business and the implementation of our plan of operations:

Overall Plan

Our overall plan of operation for the next twenty four months is to aggressively seek revenue through the sale of Magnegas for metal working, hydrogen for various industrial uses and equipment sales for the processing of liquid waste. We will pursue worldwide distributors of equipment sales and fuel (with the exception of Europe). In addition,

the plan is to install several Plasma Arc Flow Industrial demonstration centers strategically located throughout the United States. These centers will be used to produce fuel to sell to market and to promote equipment sales. One will be installed in a municipal sewage treatment facility to process sludge or sewage, one will be built and used as a refinery for the metal cutting fuel market, one will be developed for converting solar or wind power to hydrogen and several will be built and used to produce fuel for the automotive market. These refineries will be used to promote our core business strategy. During the next twenty four months, we intend to pursue private equity financing in combination with federal and state grant funding, for up to \$10 million in various phases using our shares of common stock and through federal and state funds available for renewable energy as part of the Stimulus program. We will pursue the acquisition of a metal cutting and welding fuel distribution company to accelerate our market penetration. In addition, we will conduct research and development for the catalytic liquefaction of Magnegas, the industrial membrane separation of hydrogen, the use of Magnegas as an additive to clean coal exhaust and the installation of a pilot refinery utilizing the synergies of wind power or solar power to produce fuel with our technology. We will also pursue all needed federal, state and local regulatory permits necessary to implement our operational plan.

Fourth Quarter 2009

We will continue our efforts in selling MagneGas in the metal cutting market. We will use established relationships with existing metal cutting fuel wholesalers to distribute MagneGas for this market.

We will fulfill fuel orders from our Pennsylvania, Kentucky and Tampa distributors and will pursue agreements with additional metal cutting fuel distributors throughout the United States. We will aggressively pursue equity and grant financing to obtain sufficient capital to allow us to purchase a fuel distributor in our market, construct refineries and conduct research and development. We intend to actively recruit new board members, corporate and manufacturing staff with appropriate experience. In addition, we will attempt to aggressively expand our world-wide market reach (excluding Europe) through new and existing relationships with fuel distributors, liquid waste and environmental companies.

We anticipate the commencement of our manufacturing of our first MagneGas PlasmaArcFlow for commercial installation, in fulfillment of our Philippines contract after receipt of the next installment payment due.

First Quarter 2010

We plan to begin construction of one PlasmaArcFlow demonstration center to process sludge or sewage at a local municipality. We will continue to aggressively pursue MagneGas sales for the metal cutting market through wholesalers, trade events and from our marketing and sales consultants. We intend to continue to actively recruit new board members with appropriate experience and hire a corporate and operational staff. We expect to complete the first phase of our capital raise and to identify potential acquisitions in our market. We will conduct additional research and development as outlined above. We plan to conduct a demonstration at a local car dealership, turning a car dealer into a fuel producer by using automotive liquid waste to produce fuel on site.

We expect the work in process of our Philippines PlasmaArcFlow to be completed and in quality control testing. Delivery and installation is anticipated for the fourth quarter 2009 or first quarter 2010.

Second Quarter 2010

We plan to install our Plasma Arc Flow demonstration center at a local Florida sewage treatment facility to process human sludge or sewage. We plan to begin construction of our refinery for the metal working market. We plan to aggressively pursue MagneGas sales for the metal cutting market through a marketing plan that fully leverages our demonstration centers and we will hire additional operational staff and manufacturing staff in anticipation of new sales and will expand our current facility to accommodate our space needs. We will continue our research and development efforts.

Third Quarter 2010

We anticipate that we can complete construction of our metal cutting fuel refinery and will begin construction of a third refinery converting solar or wind power to hydrogen with a location to be determined. By the second quarter of 2010, we anticipate being fully operational with two refineries located in the United States and we will begin distribution of fuel through our Philippine distributor. We plan to continue sales of MagneGas in the metal cutting market. We will aggressively pursue our marketing and sales plan to fully leverage our demonstration centers. We expect to obtain several service contracts during this quarter as potential customers view firsthand the operation of our equipment at an industrial level. We plan to continue to hire operational staff and manufacturing staff in anticipation of new sales.

Fourth Quarter 2010 through Fourth Quarter 2011

We plan to complete construction of the refinery converting solar or wind power to fuel and intend to complete several additional refineries converting liquid waste to fuel for the automotive market. The plan of the Company is to launch the automotive market by turning car dealers into fuel producers. Each car dealer disposes of large volumes of liquid waste in the form of used motor oil, used antifreeze and other waste. This waste can be used to produce fuel,

and that fuel can be sold for use in bi-fuel automobiles. Several refineries will be built for these markets and will be strategically placed at car dealers throughout the United States.

The current state of the economy and financial markets has made it difficult for us to achieve our past operational plans and the Company can make no assurance that we will achieve our operational plan in the future.

The foregoing represents our best estimate of our current planning, and is based on a reasonable assessment of funds we expect to become available. However, our plans may vary significantly depending upon the amount of funds raised and status of our business plan. In the event we are not successful in reaching our initial revenue targets, additional funds will be required and we would then not be able to proceed with our business plan as anticipated. Should this occur, we would likely seek additional financing to support the continued operation of our business.

The Company has financed its operations primarily through cash generated by the sale of stock through a private offering. We believe we can not currently satisfy our cash requirements for the next twelve months with our current cash and expected revenues from our private placement and sales. However, management plans to increase revenue and obtain additional financing in order to sustain operations for at least the next twelve months. We have already sold shares to support our continued operations. However, completion of our plan of operation is subject to attaining adequate revenue. We cannot assure investors that adequate revenues will be generated.

In the absence of our projected revenues, we may be unable to proceed with our plan of operations. Even without significant revenues within the next twelve months, we still anticipate being able to continue with our present activities, but we will require financing to potentially achieve our goal of profit, revenue and growth.

In the event we are not successful in reaching our initial revenue targets, additional funds will be required, and we would then not be able to proceed with our business plan for the development and marketing of our core services. Should this occur, we would likely seek additional financing to support the continued operation of our business. We anticipate that depending on market conditions and our plan of operations, we would incur operating losses in the foreseeable future. We base this expectation, in part, on the fact that we may not be able to generate enough gross profit from our services to cover our operating expenses. Consequently, there is substantial doubt about the Company's ability to continue to operate as a going concern.

As reflected in the unaudited financial statements, we are in the development stage, and have an accumulated deficit from inception of \$2,317,538 and have a negative cash flow from operations of \$507,307 from inception. This raises substantial doubt about its ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company's ability to raise additional capital and implement its business plan. The unaudited financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

At September 30, 2009 the Company had minimal cash resources to meet current obligations. The Company may rely upon the issuance of common stock and additional capital contributions from shareholders to fund administrative expenses until operations generate cash flows sufficient to support the on-going business.

Management believes that actions presently being taken to obtain additional funding and implement its strategic plans provide the opportunity for the Company to continue as a going concern. We anticipate that we will require approximately \$10,000,000 to fund our plan of operations.

In effort to achieve revenue plans we have been concentrating on selling MagneGas as a metal cutting fuel. We have received firm orders from several entities for the Magnegas produced from non-hazardous waste. We have an additional non-binding letter of intent to process liquid waste based on proposals and our demonstrations. The non-binding letter of intent includes the installation of a plant scale test at a local sewage treatment facility processing sludge. To fund operations, the Company has raised \$377,500, since inception, in cash proceeds via sales of common stock to date and raised an additional \$197,100 in cash proceeds from a shareholder loans since inception. Additionally, to deliver on the metal cutting gas orders we have the commitment of six persons dedicated to the fulfillment of orders and it is headed by a well known industry consultant, whom we have named as president to help develop operating guidelines as well as being instrumental in the marketing and development of our brand offering.

To expand understanding of our efforts and progress in generating revenue:

Metal Cutting Magnegas: Marketing efforts are being concentrated on industry wholesalers to utilize their established customer base and distribution channels. Our current operations in new facilities (previously disclosed month to month agreement) have been set up for expansion. We estimate current facilities have capacity for 400-500 bottles to be processed per week. Our new facilities allow us the flexibility to ramp up for greater volume, as market interest is anticipated to increase.

In April of 2009, the Company established a relationship with Crumpton Welding Supply in Florida to distribute Magnegas at each of their four locations. In order to better support this relationship, the Company hired an outside sales representative as an independent contractor to partner with Crumpton to generate sales in their territory. In addition, the Company has a relationship with a small distributor, Boca Industries in Atlanta, Georgia. Boca

Industries has closed their Atlanta location and is in the process of relocating to North Carolina and as a result will no longer be distributing fuel to the Atlanta based market. The Company will revisit the relationship with Boca after they have moved to their new location. The Company also established a relationship with York Welding Supply in Pennsylvania and Holston Gas Company in Kentucky to distribute fuel. The Company has identified two additional independent sales representatives to support these relationships

Letter of Intent: A non-binding letter of intent was agreed, in principal with a local municipality's water treatment facility. Our existing prototype equipment is being modified for the specifics required for this project. The initial fuel generated from this project will be sold in the metal cutting market. At this time we are unable to accurately estimate the volume that will be processed. Upon completion of the 12 month test the contract will be evaluated and subject to renegotiation. No date has been determined when this project is to commence and funding will be required to implement this project as per our plan of operations.

Results of Operations

For the three and nine months ended September 30, 2009, 2008 and for the period December 9, 2005 (date of inception) through September 30, 2009.

Selected Historical Data

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Revenues	\$ 1,300	\$ 1,072	\$ 5,351	\$ 9,151
Gross Profit	412	(30)	915	5
Operating Expenses	494,531	489,918	913,741	777,240
Net Loss	\$ (495,486)	\$ (490,421)	\$ (917,641)	\$ (780,975)

Revenues

For the three and nine months ended September 30, 2009 and 2008 we generated revenues of \$1,300, \$1,072, \$5,351, and \$9,151, respectively from our metal cutting fuel sales operations. The year-to-date decrease was due to the general economic conditions as it affects almost all production and construction areas, creating inconsistent orders. The results of our marketing have not generated the revenue we had anticipated, believed to be due to the economy and the target market channels inability to commit funds for new technology and capital expenditures.

Operating Expenses

Operating costs were incurred in the amount of \$494,531, \$489,918, \$913,741 and \$777,240 for the three and nine months ended September 30, 2009 and 2008. The increase was attributable to the issuance of common stock for services. The Company has been allocating resources, primarily through the issuance of stock in payment, for advertising and promotion of the technology. Professional fees also remain a significant portion of the operating expenses due to public filing requirements. The major expenses incurred have been for professional and non-cash stock based compensation and account for the variances in costs from comparative prior year costs.

Net Loss

Net losses incurred in all periods presented have been primarily due to the operating costs. These expenses resulted in the net losses in the amount of \$495,486, \$490,421, \$917,641 and \$780,975 for the three and nine months end September 30, 2009 and 2008 respectively. The Company incurred net losses of \$2,317,538 for the period December 9, 2005 (date of inception) through September 30, 2009, respectively. The increase in the year over year net loss was due primarily from general and administrative expenses, particularly professional services and stock-based payments for advertising. At this time, normal costs of public filing will continue and it is not known when significant revenues will occur to off-set these expenses.

Liquidity and Capital Resources

The Company is currently financing its operations primarily through cash generated by the sale of stock through a private offering. We believe we can not currently satisfy our cash requirements for the next twelve months with our current cash and expected revenues from our private placement and sales. However, management plans to increase revenue and obtain additional financing in order to sustain operations for at least the next twelve months. We have already sold shares to support our continued operations. However, completion of our plan of operation is subject to attaining adequate revenue. We cannot assure investors that adequate revenues will be generated. In the absence of our

projected revenues, we may be unable to proceed with our plan of operations. Even without significant revenues within the next twelve months, we still anticipate being able to continue with our present activities, but we may require financing to potentially achieve our goal of profit, revenue and growth.

In the event we are not successful in reaching our initial revenue targets, additional funds may be required, and we would then not be able to proceed with our business plan for the development and marketing of our core services. Should this occur, we would likely seek additional financing to support the continued operation of our business. We anticipate that depending on market conditions and our plan of operations, we would incur operating losses in the foreseeable future. We base this expectation, in part, on the fact that we may not be able to generate enough gross profit from our services to cover our operating expenses. Consequently, there is substantial doubt about the Company's ability to continue to operate as a going concern.

As reflected in the unaudited financial statements, we are in the development stage, and have an accumulated deficit from inception of \$2,317,538 and have a negative cash flow from operations of \$507,307 from inception. This raises substantial doubt about its ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company's ability to raise additional capital and implement its business plan. The unaudited financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

At September 30, 2009 the Company had minimal cash to meet current obligations. The Company may rely upon the issuance of common stock and additional capital contributions from shareholders to fund administrative expenses until operations generate cash flows sufficient to support the on-going business.

Management believes that actions presently being taken to obtain additional funding and implement its strategic plans provide the opportunity for the Company to continue as a going concern

Subsequent Events

The Company is currently in negotiations with companies to expanded territories in the development of the MagneGas technologies. As of September 30, 2009, there are agreements in principle, with completion upon transfer of title.

The events subsequent to the date of our report are detailed in the notes to the unaudited financial statements.

Recent Accounting Pronouncements

We have reviewed accounting pronouncements and interpretations thereof that have effectiveness dates during the periods reported and in future periods. The Company has carefully considered the new pronouncements that alter previous generally accepted accounting principles and does not believe that any new or modified principles will have a material impact on the corporation's reported financial position or operations in the near term. The applicability of any standard is subject to the formal review of our financial management and certain standards are under consideration. Those standards have been addressed in the notes to the unaudited financial statement and in our Annual Report, filed on Form 10-K for the period ended December 31, 2008.

Critical Accounting Policies

The Company's significant accounting policies are presented in the Company's notes to financial statements for the period ended September 30, 2009 and fiscal year ended December 31, 2008, which are contained in the Company's 2008 Annual Report on Form 10-K. The significant accounting policies that are most critical and aid in fully understanding and evaluating the reported financial results include the following:

The Company prepares its financial statements in conformity with generally accepted accounting principles in the United States of America. These principals require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that these estimates are reasonable and have been discussed with the Board of Directors; however, actual results could differ from those estimates.

The Company issues restricted stock to consultants for various services. Cost for these transactions are measured at the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The value of the common stock is measured at the earlier of (i) the date at which a firm commitment for performance by the counterparty to earn the equity instruments is reached or (ii) the date at which the counterparty's performance is complete.

Long-lived assets such as property, equipment and identifiable intangibles are reviewed for impairment whenever facts and circumstances indicate that the carrying value may not be recoverable. When required impairment losses on assets to be held and used are recognized based on the fair value of the asset. The fair value is determined based on estimates of future cash flows, market value of similar assets, if available, or independent appraisals, if required. If the carrying amount of the long-lived asset is not recoverable from its undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount and fair value of the asset. When fair values are not

available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risk associated with the recovery of the assets. We did not recognize any impairment losses for any periods presented.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are a Smaller Reporting Company as defined by Rule 12b-2 of the Securities Exchange Act of 1934 and are not required to provide the information under this item.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act), as of September 30, 2009. Based on this evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures as of the end of such periods are not effective to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that our disclosure and controls are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure

The company has limited resources and as a result, a material weakness in financial reporting currently exists. Those weaknesses include: Lack of Effective Corporate Governance Policies and Procedures. We do not have effective policies regarding the independence of or directors and do not have independent directors. The lack of independent directors means that there is no effective review, authorization, or oversight of management or management's actions by persons that were not involved in approving or executing those actions. We have no conflicts of interest policies and there is no provision for the review and approval of transactions between the Company and interested members of management.

Lack of Effective Policies Regarding the General Accounting System. We do not have any documented processes for the input, accumulation, or testing of financial data that would provide assurance that all transactions are accurately and timely recorded or that the financial reports will be prepared on a periodic basis.

Management has determined that the Company does not have the financial resources or personnel to address any of the material weaknesses identified or to conduct a more robust evaluation of its controls. As resources become available, management will develop and implement remedial actions to address the material weaknesses it has identified.

A material weakness is a deficiency (within the meaning of the Public Company Accounting Oversight Board (PCAOB) Auditing Standard 5) or combination of deficiencies in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. Management has determined that a material weakness exists due to a lack of segregation of duties, resulting from the Company's limited resources.

The Company's management, including the President (Principal Executive Officer), Director, and Chief Financial Officer (Principal Accounting and Financial Officer), confirm that there was no change in the Company's internal control over financial reporting during the quarter ended September 30, 2009 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

We are currently not involved in any litigation that we believe could have a material adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court,

public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our company or any of our subsidiaries, threatened against or affecting our company, our common stock, any of our subsidiaries or of our companies or our subsidiaries' officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

Item 1A. Risk Factors.

We believe there are no changes that constitute material changes from the risk factors previously disclosed in the Company's 2008 Annual Report filed on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None

19

Item 3. Defaults Upon Senior Securities.

None

Item 4. Submission of Matters to a Vote of Security Holders.

No matter was submitted during the quarter ending September 30, 2009, covered by this report to a vote of our shareholders, through the solicitation of proxies or otherwise.

Item 5. Other Information.

None

Item 6. Exhibits
