**IVANHOE ENERGY INC.**

**Notes to the Unaudited Condensed Consolidated Financial Statements**

**(tabular amounts in US\$000s, except share and per share amounts)**

**1. NATURE OF OPERATIONS AND GOING CONCERN**

Ivanhoe Energy Inc. (the “Company” or “Ivanhoe”) is a publicly listed limited liability company incorporated under the laws of Yukon, Canada. Ivanhoe’s common shares are listed on the Toronto Stock Exchange (“TSX”) and the NASDAQ Stock Market (“NASDAQ”). The principal corporate office of Ivanhoe is located at 999 Canada Place, Suite 654, Vancouver, British Columbia, V6C 3E1. Our registered and records office is located at 300-204 Black Street, Whitehorse, Yukon, Y1A 2M9 and our operational headquarters are located at 101-6th Avenue SW, 19th Floor, Calgary, Alberta, T2P 3P4.

Ivanhoe is an independent international heavy oil development company focused on pursuing long term growth in its reserves and production. Ivanhoe plans to utilize advanced technologies, such as its patented Heavy-to-Light (“HTE<sup>®</sup>”) technology, that are designed to improve recovery of heavy oil resources. In addition, the Company seeks to expand its reserve base and production through conventional exploration and production of oil.

The March 31, 2014 unaudited condensed consolidated financial statements (“Financial Statements”) have been prepared using International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due and assumes that Ivanhoe will be able to meet its obligations and continue operations for at least its next fiscal year. Realization values may be substantially different from carrying values as shown and these Financial Statements do not give effect to adjustments that may be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material.

At March 31, 2014, Ivanhoe had an accumulated deficit of \$466.6 million and a working capital surplus of \$8.8 million, excluding assets held for sale. For the three months ended March 31, 2014, cash used in operating activities was \$8.7 million and the Company expects to incur further losses in the development of its business. Continuing as a going concern is dependent upon attaining future profitable operations to repay liabilities arising in the normal course of operations and accessing additional capital to develop the Company’s properties. Ivanhoe intends to finance its future funding requirements through a combination of partnering with strategic investors and/or public and private debt and equity markets, either at the parent company level or at the project level, and through the sale of interests in existing oil properties. There is no assurance that the Company will be able to obtain such financing, or obtain it on favorable terms. Without access to additional financing or other cash generating activities in 2014, there is material uncertainty that casts substantial doubt upon the Company’s ability to continue as a going concern.

The March 31, 2014 Financial Statements were approved by the Board of Directors and authorized for issue on April 29, 2014.

The Financial Statements are presented in US dollars and all values are rounded to the nearest thousand dollars except where otherwise indicated.

## **2. BASIS OF PRESENTATION**

### **2.1 Statement of Compliance**

The Financial Statements have been prepared in accordance with IAS 34, "Interim Financial Reporting" ("IAS 34"), using accounting policies consistent with IFRS as issued by the IASB. The Financial Statements are not subject to qualification relating to the application of IFRS as issued by the IASB.

The Financial Statements are condensed as they do not include all of the information required for full annual financial statements, and they should be read in conjunction with the Company's annual consolidated financial statements for the year ended December 31, 2013 prepared in accordance with IFRS as issued by the IASB. The same accounting policies, presentation and methods of computation have been followed in these Financial Statements as were applied in the Company's annual IFRS consolidated financial statements for the year ended December 31, 2013 except as discussed below.

## 2.2 Basis of Presentation

The Financial Statements have been prepared on an historical cost basis, except derivative instruments, which are measured at fair value.

## 3. RESULTS OF DISCONTINUED OPERATIONS

Analysis of the results of discontinued operations and on the disposal of the assets of the Zitong Block and Pan-China Resources Ltd., constituting the discontinued operations, is as follows:

## 6. FINANCIAL INSTRUMENTS

### 6.1 Fair Value of Financial Instruments Measured at Amortized Cost

Except as detailed below, the fair value of the Company's financial instruments recognized at amortized cost approximates their carrying value due to the short term maturity of these instruments.

	March 31, 2014	December 31, 2013
<b>Convertible Debentures</b>		
Carrying amount	<b>61,118</b>	63,012
Fair value	<b>35,148</b>	31,017

The fair value of the liability component of the Convertible Debentures was estimated using the closing price of the publicly traded debentures at period end.

### 6.2 Risks Arising from Financial Instruments

Ivanhoe is exposed in varying degrees to normal market risks resulting from foreign currency exchange rate risk, credit risk, interest rate risk and liquidity risk. The Company recognizes these risks and manages its operations to minimize the exposure to the extent practicable. There have not been any significant changes to the Company's exposure to risks, or processes to manage these risks as described in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013 ("2013 Form 10-K").

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Forward-Looking Statements

With the exception of historical information, certain matters discussed in this Quarterly Report on Form 10-Q ("Form 10-Q"), including those within this Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), are forward-looking statements that involve risks and uncertainties.

Statements that contain words such as "could", "should", "can", "anticipate", "estimate", "propose", "plan", "expect", "seek", "will", "may" and similar expressions and statements relating to matters that are not historical facts constitute "forward-looking statements" within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. In particular, forward-looking statements contained in this Form 10-Q include, but are not limited to, statements relating to or associated with individual wells, regions or projects; future crude oil prices; possible future production levels; future royalty and tax levels; future capital expenditures, their timing and their allocation to exploration and development activities; future asset acquisitions or dispositions; future sources of funding for the Company's capital programs; future debt levels; availability of future credit facilities; possible commerciality of the Company's projects; development plans or capacity expansions; future ability to execute dispositions of assets or businesses; future formation of joint ventures and other business relationships with third parties; future sources of liquidity, cash flows and their uses; future drilling of new wells; ultimate recoverability of current and long term assets; ultimate recoverability of reserves or resources; expected operating costs; estimates on a per share basis; future foreign currency exchange rates, future expenditures and future allowances relating to environmental matters and the Company's ability to comply therewith; dates by which certain areas will be developed, come on-stream or reach expected operating capacity; and changes in any of the foregoing.

Statements relating to "reserves" are forward-looking statements, as they involve the implied assessment, based on estimates and assumptions, that the reserves described exist in the quantities predicted or estimated and can be profitably produced in the future.

The forward-looking statements contained in this Form 10-Q are based on certain assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances. By their nature, forward-looking statements involve inherent risks and uncertainties, including the risk that the outcome that they predict will not be achieved. Undue reliance should not be placed on forward-looking statements as a number of important factors could cause the actual results to differ materially from the beliefs, plans, objectives, expectations and anticipations, estimates and intentions expressed in the forward-looking statements, including those set out below and those detailed in Item 1A, "Risk Factors" and Item 7A, "Quantitative and Qualitative Disclosures About Market Risk" in the 2013 Form 10-K. Such factors include, but are not limited to: the Company's short history of limited revenue, losses and negative cash

flow from its current exploration and development activities in Canada, Ecuador, Mongolia and the United States; the Company's limited cash resources and consequent need for additional financing; the ability to raise capital as and when required, or to raise capital on acceptable terms; the timing and extent of changes in prices for oil and gas; competition for oil and gas exploration properties from larger, better financed oil companies; environmental risks; title matters; drilling and operating risks; uncertainties about the estimates of reserves and the potential success of the Company's Heavy-to-light ("HTE<sup>®</sup>") technology; the potential success of the Company's oil and gas properties in Canada, Ecuador and Mongolia; the prices of goods and services; the availability of drilling rigs and other support services; legislative and government regulations; political and economic factors in countries in which the Company operates; and implementation of the Company's capital investment program.

The forward-looking statements contained in this Form 10-Q are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable securities laws. The forward-looking statements contained herein are expressly qualified in their entirety by this cautionary statement.

### **Special Note to Canadian Investors**

The Company is a registrant under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and voluntarily files reports with the United States Securities and Exchange Commission ("SEC") on Form 10-K, Form 10-Q and other forms used by registrants that are US domestic issuers. Therefore, the Company's reserves estimates and securities regulatory disclosures generally follow SEC requirements. National Instrument 51-101 - Standards of Disclosure for Oil and Gas Activities ("NI 51-101"), adopted by the Canadian Securities Administrators ("CSA"), prescribes certain standards for the preparation, and disclosure of reserves and related information by Canadian issuers. The Company has been granted certain exemptions from NI 51-101. Please refer to the Special Note to Canadian Investors in the 2013 Form 10-K.

**Advisories**

This Form 10-Q should be read in conjunction with the Company's March 31, 2014 unaudited condensed consolidated financial statements (the "Financial Statements") contained herein, and the audited consolidated financial statements and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the 2013 Form 10-K. The Financial Statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34").

As a foreign private issuer in the US, Ivanhoe is permitted to file with the SEC financial statements prepared under IFRS, as issued by the International Accounting Standards Board, without a reconciliation to US GAAP. It is possible that some of the Company's accounting policies under IFRS could be different from US GAAP.

ALL TABULAR AMOUNTS ARE EXPRESSED IN THOUSANDS OF U.S. DOLLARS, EXCEPT PER SHARE DATA.

**HIGHLIGHTS**

(\$000, except as stated)	<b>Three months ended March 31,</b>	
	<b>2014</b>	<b>2013</b>
Capital expenditures	<b>1,003</b>	7,533
Net cash used in operating activities	<b>(8,744)</b>	(18,586)
Net loss from continuing operations	<b>(7,880)</b>	(11,975)
Net loss per share from continuing operations - basic and diluted	<b>(0.07)</b>	(0.09)

Net loss from continuing operations during the three months ended March 31, 2014 was \$7.9 million, which was \$4.1 million lower compared to a net loss from continuing operations of \$12.0 million incurred during the same period in

2013. The decrease is primarily due to a \$5.4 million decrease in general and administrative (“G&A”) expenses and a \$0.7 million increase in foreign currency exchange gains compared to the prior year quarter. This was partially offset by a \$0.9 million decrease in deferred income tax recoveries, a \$0.5 million increase in finance expense and a \$0.6 million net increase in other items impacting net loss from continuing operations. These changes are explained in detail below under “Results of Operations”.

## RESULTS OF OPERATIONS

### General and Administrative

G&A expenses mainly consist of staff, office and legal and other contract services costs.

G&A expenses for the three months ended March 31, 2014 was \$7.3 million, which was \$5.4 million lower compared to G&A expenses of \$12.7 million incurred during the same period in 2013. The decrease is primarily due to a \$1.2 million decrease in accrued bonuses as no bonuses were accrued in 2014, a \$1.2 million decrease in legal costs related to the proceedings discussed in Part II, Item 1 “Legal Proceedings” disclosed within this Form 10-Q, a \$1.1 million decrease in travel and business expenses due to reduced business activities, a \$1.0 million decrease in staff costs related to severance and retention of key employees in the Asia segment incurred in 2013 not recurring in 2014, and a \$0.9 net decrease related to other miscellaneous G&A items.

### Foreign Currency Exchange

The gain or loss on foreign currency exchange results from the revaluation of monetary assets and liabilities denominated in currencies other than the Company's functional currency, the US dollar, at each period end and from the settlement of the Company's receivables and payables denominated in foreign currencies.

Foreign currency exchange gains for the three months ended March 31, 2014 were \$2.0 million, which was \$0.7 million higher compared to the foreign currency exchange gains of \$1.3 million incurred during the same period in 2013. The decrease is primarily due to the revaluation of the Cdn\$73.3 million of Convertible Debentures. The Canadian dollar weakened in relation to the US dollar more in the first quarter of 2014 than it did in the same period in 2013, resulting in increased gains on translation of the US dollar Convertible Debentures in the first quarter of 2014 compared to same period in 2013. This was partially offset by Ivanhoe holding more Canadian dollar cash in the first quarter of 2014 than it did in the same period in 2013, resulting in increased losses on translation of the Canadian dollar cash in the first quarter of 2014 compared to same period in 2013.

### Finance

Finance expense consists of interest expense and the unwinding of the discount rate for decommissioning obligations.

Finance expense for the three months ended March 31, 2014 was \$1.0 million, which was \$0.5 million higher compared to finance expense of \$0.5 million incurred during the same period in 2013. The increase is primarily due to a lower allocation of interest expense to capital projects mainly resulting from Ivanhoe suspending activity on its current Tamarack oil sands project in the first quarter of 2014.

### Recovery of Income Taxes

The deferred income tax recovery for the three months ended March 31, 2014 was nil, which was \$0.9 million lower compared to a recovery of \$0.9 million incurred during the same period in 2014. The decrease is primarily due to the impact of no additional deferred income tax recoveries being recognized for net operating losses.

### Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

## LIQUIDITY AND CAPITAL RESOURCES

## Contractual Obligations and Commitments

The following information about our contractual obligations and other commitments summarizes certain liquidity and capital resource requirements. The information presented in the table below does not include planned, but not legally committed, capital expenditures or obligations that are discretionary and/or being performed under contracts which are cancelable with a 30 day notification period.

	<b>Total</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>After 2017</b>
Long term debt <sup>(1)</sup>	<b>66,316</b>	-	-	66,316	-	-
Interest on long term debt <sup>(1)</sup>	<b>9,517</b>	3,813	3,813	1,891	-	-
Decommissioning obligations <sup>(2)</sup>	<b>4,076</b>	-	-	192	-	3,884
Leases	<b>2,741</b>	741	808	686	348	158
Total	<b>82,650</b>	4,554	4,621	69,085	348	4,042

(1) Long term debt is denominated in Canadian dollars and has been translated to US dollars at an exchange rate of approximately CDN= 0.9046 USD.

(2) Represents undiscounted decommissioning obligations after inflation. The discounted value of these estimated obligations (\$2.5 million) is provided for in the consolidated financial statements.

## Long Term Debt and Interest

As described in the financial statements included in the 2013 Form 10-K, the Company issued Cdn\$73.3 million of Convertible Debentures maturing on June 30, 2016. The Convertible Debentures bear interest at an annual rate of 5.75%, payable semi-annually on the last day of June and December of each year.

### Decommissioning Provisions

The Company is required to remedy the effect of our activities on the environment at our operating sites by dismantling and removing production facilities and remediating any damage caused. At March 31, 2014, Ivanhoe estimated the total undiscounted, inflated cost to settle its long term decommissioning obligations in Canada, for the feedstock test facility in the US and in Ecuador was \$4.1 million. These costs are expected to be incurred in 2016-2032, 2029 and 2038, respectively.

### Leases

The Company has long term leases for office space and vehicles, which expire between 2014 and 2018.

### Other

Should Ivanhoe receive government and other approvals necessary to develop the northern border of one of the Tamarack Project leases, the Company will be required to make a cash payment to Talisman Energy Canada of up to Cdn\$15.0 million, as a conditional, final payment for the 2008 purchase transaction. This particular geographical area of the lease is not currently part of the project for which the Company has requested approval from the Alberta Energy Regulator ("AER").

From time to time, Ivanhoe enters into consulting agreements whereby a success fee may be payable if and when either a definitive agreement is signed or certain other contractual milestones are met. Under the agreements, the consultant may receive cash, common shares, stock options or some combination thereof. Similarly, agreements entered into by the Company may contain cancellation fees or liquidated damages provisions for early termination. These fees are not considered to be material.

The Company may provide indemnities to third parties, in the ordinary course of business, that are customary in certain commercial transactions, such as purchase and sale agreements. The terms of these indemnities will vary based upon the contract, the nature of which prevents Ivanhoe from making a reasonable estimate of the maximum potential amounts that may be required to be paid. The Company's management is of the opinion that any resulting settlements relating to indemnities are not likely to be material.

In the ordinary course of business, the Company is subject to legal proceedings being brought against it. While the final outcome of these proceedings is uncertain, the Company believes that these proceedings, in the aggregate, are not reasonably likely to have a material effect on its financial position or earnings.

## Sources and Uses of Cash

The Company's cash flows from operating, investing and financing activities, as reflected in the unaudited condensed consolidated statements of cash flows, are summarized in the following table:

	<b>Three months ended March 31, 2014 2013</b>	
Cash used in operating activities	<b>(8,744)</b>	(18,586)
Cash (used in) provided by investing activities	<b>(822)</b>	17,794
Cash provided by (used in) financing activities	<b>1</b>	(5)

## Liquidity

Ivanhoe's existing financial resources are insufficient to fund the future capital expenditures necessary to advance the development of our existing projects and to maintain the Company's business activities at their current level. In the near term, the Company will require other sources of financing in order to continue operating its business as currently constituted. Ivanhoe intends to finance its future funding requirements through a combination of partnering with strategic investors and/or public and private debt and equity markets, either at the parent company level or at the project level, and through the sale of interests in existing oil properties. There is no assurance that the Company will be able to obtain such financing, or obtain it on favorable terms.

These activities include discussions with a large international oil company for the creation of a joint financial participation arrangement in respect of its Pungarayacu project in Ecuador. The transaction contemplated by these discussions, if and when consummated, would be expected to generate additional cash. While progress in reaching the transaction objective has been made by the potential transaction participants, there is no assurance that the objective can be achieved, or achieved in a timely manner or that such participation will be approved by regulatory authorities in Ecuador. Without timely access to a sufficient source of financing to enable the Company to make its planned capital expenditures and otherwise fund the cost of carrying on its business, the Company may have to significantly curtail its existing business activities and may be unable to continue as a going concern.

## Operating Activities

Net cash used in operating activities for the three months ended March 31, 2014 was \$8.7 million, which was \$9.9 million lower compared to net cash used in operating activities of \$18.6 million incurred during the same period in 2013. The decrease is primarily due to \$5.1 million in decreased cash G&A expenses as discussed above which excludes non-cash share-based compensation expense, \$2.1 million in transaction costs and \$1.8 million in income tax payments related to discontinued operations incurred in three months ended March 31, 2013 not recurring in the same period in 2014 and \$0.9 million in other net changes impacting operating activities.

## Capital Structure

	<b>As at March 31, 2014</b>		<b>As at December 31, 2013</b>	
Long term debt	<b>61,118</b>	<b>28.4%</b>	63,012	28.2%
Shareholders' equity	<b>152,986</b>	<b>71.6%</b>	160,277	71.8%
Total capital	<b>215,104</b>	<b>100.0%</b>	223,289	100.0%

On September 6, 2013, the Company received a notification letter from the Listing Qualifications Department of the NASDAQ notifying the Company that the Company did not meet the minimum bid price requirements set forth in the NASDAQ Listing Rules and that the Company could regain compliance if at any time prior to March 5, 2014 the closing bid price of the Company's common shares was at least \$1.00 for a minimum of 10 consecutive business days. For additional information, refer to the Form 8-K filed on September 12, 2013. On February 18, 2014, the Company applied to the NASDAQ for an additional compliance period of 180 days, which was granted and will expire on September 2, 2014.

## OUTLOOK

### Corporate

Management's plans for financing future expenditures include traditional project financing, debt and mezzanine financing, the sale of non-core assets or the sale of equity securities as well as the potential for partnerships or other arrangements with strategic investors. However, no assurances can be given that Ivanhoe will be able to arrange such financing, to enter into one or more strategic business alliances with third parties or that the Company will be able to sell non-core assets on acceptable terms or raise sufficient additional capital. If the Company is unable to enter into such business alliances or obtain adequate additional financing, the Company may be required to abandon assets and otherwise curtail its operations.

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There has been no material change in the Company's assessment of its sensitivity to market risk since its presentation set forth in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk" in the 2013 Form 10-K.

#### ITEM 4. CONTROLS AND PROCEDURES

The Company's management, including its Executive Chairman and its Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of March 31, 2014. Based upon this evaluation, management concluded that these controls and procedures were (1) designed to ensure that material information relating to the Company is made known to the Company's Executive Chairman and its Chief Financial Officer as appropriate to allow timely decisions regarding disclosure and (2) effective, in that they provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

It should be noted that while the Company's Executive Chairman and its Chief Financial Officer believe that the Company's disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that the Company's disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

There were no changes in the Company's internal control over financial reporting in the quarter ended March 31, 2014, that have materially affected, or are reasonably likely to have a material effect on the Company's internal control over financial reporting.

## PART II OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS

Cotundo Minerales S.A.

On August 9, 2013, Cotundo Minerales S.A. ("Cotundo") served us with a notice of claim against the Company, two of its subsidiaries, and Company board member Robert Friedland, filed in the Supreme Court of British Columbia. The Company and its two subsidiaries were served on August 9, 2013. The Company and its two subsidiaries filed a response on September 24, 2013. The suit alleges that the Company misused confidential information provided to it by Cotundo related to the Pungarayacu heavy oil field in Ecuador. Cotundo seeks damages in the form of lost profits, an imposition of a trust in favor of Cotundo, a transfer of Ivanhoe's interest in the Pungarayacu field to Cotundo, interest, and costs. To date, there have been no discovery requests.

The plaintiff and claims in the recent lawsuit by Cotundo overlap with those from a previous lawsuit filed against the Company, its subsidiaries, Mr. Friedland and others in the United States District Court for the District of Colorado on November 20, 2008. That case was dismissed by the trial court for lack of personal jurisdiction, and that dismissal was affirmed by the United States Court of Appeals for the Tenth Circuit on July 12, 2012. The plaintiffs filed a writ of certiorari with the United States Supreme Court, which was denied on January 14, 2013. Both the district court and the appellate court in the prior case awarded fees and costs to the Ivanhoe defendants.

The likelihood of loss or gain resulting from this dispute, and the estimated amount of ultimate loss or gain, are not determinable or reasonably estimable at this time. The Company believes that the plaintiff's claims have no merit.

GAR Energy

For details regarding this lawsuit see “GAR Energy” in Item 3 of the 2013 Form 10-K, which is incorporated herein by reference.

An evidentiary hearing on the merits (trial) in the ensuing arbitration was held September 9-13, 2013. On March 14, 2014 the Company received the decision from the arbitrators. The panel awarded a take-nothing judgment against the plaintiffs and in favor of the Company, meaning that the Company prevailed entirely on the merits. The Consulting Agreement with GAR contained a clause that the prevailing party will be entitled to reasonable attorney’s fees and so the Company filed a motion on April 4, 2014 with the arbitrators requesting recovery of some of its attorneys’ fees in defending the case.

#### ITEM 1A: RISK FACTORS

Ivanhoe is exposed in varying degrees to normal market risks inherent in the oil and gas industry, including commodity price risk, foreign currency exchange rate risk, credit risk, interest rate risk and liquidity risk. The Company recognizes these risks and manages its operations to minimize the exposure to the extent practicable. There have not been any significant changes to the Company’s exposure to risks, or processes to manage these risks as described in the Company’s 2013 Form 10-K.
