### **Financing of REVAP Modernization Project**

---

(Rio de Janeiro, May 23, 2006) - PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that it will sign today in New York contracts to implement the construction of new units in the Henrique Lage Refinery (REVAP) and to obtain a finance amounting up to US\$ 900 million to this project (the REVAP Modernization Project). REVAP is the Petrobras fourth largest refinery and it is located in the region of Vale do Paraíba, in the city of São José dos Campos, 90Km from São Paulo.

The REVAP Modernization Project is in line with the Strategic Plan of the Company, which indicates that Petrobras will adjust its refineries to increase the capacity of processing national oil. Moreover, the purpose of the REVAP Modernization Project is to increase the quantity of conversion of fuel oil in lighter petroleum derivatives, to adjust the diesel oil output to the new domestic specifications, to initiate the refinery's coke trading business and to reduce emissions.

The funding will be used for the construction of a delayed coking unit, of a coke naphtha hydrotreater unit and of other auxiliary units. The works will begin in the second quarter of 2006 and the start-up is being scheduled to the first quarter of 2009. The company in charge of the Engineering, Procurement and Construction activities for those units will be Toyo Engineering Corporation.

The main lender of the project will be the Japan Bank for International Cooperation - JBIC, being responsible for 54% of the credit facility granted (US\$ 486 million). The project will also be funded with US\$ 378 million granted by a syndicate of commercial banks established by Santander Banespa, Cylon Corporate and Investment Bank, Societe Generale, BNP Paribas, Standard Chartered Bank, Bank of Tokyo Mitsubishi UFJ and Sumitomo Mitsui Banking Corporation - SMBC, and with US\$ 36 million provided by the Japanese Trading Companies Mitsui & Co, Ltd. and Itochu Corporation.

It is estimated that the implementation of the project will create around 11,500 direct jobs and 14,500 indirect jobs in Brazil, emphasizing PETROBRAS' social commitment to sponsor the local workmanship qualification during the project's implementation in addition to the hiring of medium size companies to carry out the infrastructure works. In relation to the goods and services supplying, PETROBRAS and Toyo agreed in achieving around 80% of Brazilian content.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
