Item 1.04 Mine Safety - Reporting of Shutdowns and Patterns of Violations.

Section 1503(b)(1) of the Dodd-Frank Act requires the disclosure on a Current Report on Form 8-K of the receipt of an imminent danger order (an "Order") under Section 107(a) of the Federal Mine Safety and Health Act of 1977 issued by the Mine Safety and Health Administration ("MSHA").

On May 29, 2013, Pinnacle Mining Company, LLC (the "Company"), a wholly owned subsidiary of Cliffs Natural Resources Inc., received an Order dated May 29, 2013 from MSHA related to an elevated carbon monoxide level behind the Shawnee seals. All personnel were removed from the mine and production was halted. Later on May 29, 2013, MSHA determined by laboratory analysis that there was no elevated carbon monoxide present in the sample and the initial readings, which had been obtained by hand-held detectors, were in error. MSHA vacated the Order later on May 29, 2013.

The condition cited in the Order referred to above did not result in an accident or injury and is not expected to have a material adverse impact on the Company's operations at the mine.
