UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended: March 31, 2013
Commission file number: 0-51557

Investors Bancorp, Inc.
(Exact name of registrant as specified in its charter)

Delaware 22-3493930
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification Number)

101 JFK Parkway, Short Hills, New Jersey 07078
(Address of Principal Executive Offices) Zip Code
(973) 924-5100
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all the reports to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such report), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

As of May 3, 2013, the registrant had 118,020,280 shares of common stock, par value \$0.01 per share, issued and 111,852,219 shares outstanding, of which 65,396,235 shares, or 58.5%, were held by Investors Bancorp, MHC, the registrant's mutual holding company.

INVESTORS BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

1. Basis of Presentation

The consolidated financial statements are comprised of the accounts of Investors Bancorp, Inc. and its wholly owned subsidiaries, including Investors Bank (the “Bank”) and the Bank’s wholly-owned subsidiaries (collectively, the “Company”).

In the opinion of management, all the adjustments (consisting of normal and recurring adjustments) necessary for the fair presentation of the consolidated financial condition and the consolidated results of operations for the unaudited periods presented have been included. The results of operations and other data presented for the three months ended March 31, 2013 are not necessarily indicative of the results of operations that may be expected for subsequent periods or the full year results.

Certain information and note disclosures usually included in financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) for the preparation of the Form 10-Q. The consolidated financial statements presented should be read in conjunction with the Company’s audited consolidated financial statements and notes to the consolidated financial statements included in the Company’s December 31, 2012 Annual Report on Form 10-K. Certain reclassifications have been made to prior year amounts to conform to current year presentation.

2. Business Combinations

On April 5, 2013, the Company entered into a definitive merger agreement with Gateway Community Financial Corporation, the mid-tier holding company for GCF Bank. Gateway Community Financial Corporation has no public shareholders, and therefore no merger consideration will be paid to third parties. The Company will issue shares of its common stock to Investors MHC as consideration for the transaction. The number of shares to be issued will be based on the pro forma market valuation of Gateway Community Financial Corporation as determined by an independent appraisal. As of December 31 2012, Gateway Community Financial Corporation operated 4 branches in Gloucester County, New Jersey, and had assets of \$309.8 million, deposits of \$278.6 million and a net worth of \$24.6 million. The merger agreement has been approved by the boards of directors of each company and is subject to regulatory approvals and other customary closing conditions. As the merger has not been completed, the transaction is not reflected in the balance sheet or results of operation for the periods presented in this document.

On December 19, 2012, the Company entered into a definitive merger agreement with Roma Financial Corporation, the federally-chartered holding company for Roma Bank and RomAsia Bank. Under the terms of the merger agreement, 100% of the shares of Roma Financial will be converted into Investors Bancorp Inc. common stock. As of December 31, 2012, Roma Financial Corporation operated 26 branches in Burlington, Ocean, Mercer, Camden and Middlesex counties, New Jersey, and had assets of \$1.81 billion, deposits of \$1.49 billion and stockholders' equity of \$215.6 million. The merger agreement has been approved by the boards of directors of each company. The merger is subject to the required approvals of Investors Bancorp and Roma Financial shareholders, requisite regulatory approvals and other customary closing conditions. As the merger has not been completed, the transaction is not reflected in the balance sheet or results of operation for the periods presented in this document.

On October 15, 2012, the Company completed the acquisition of Marathon Banking Corporation and Marathon National Bank of New York, (“Marathon Bank”) a federally chartered bank with 13 full-service branches in the New York metropolitan area. The acquisition was accounted for under the acquisition method of accounting as prescribed by “ASC” 805 “Business Combinations”, as amended. After the purchase accounting adjustments, the Company assumed \$777.5 million in customer deposits and acquired \$558.5 million in loans. This transaction resulted in \$38.4 million of goodwill and generated \$5.0 million in core deposit intangibles. Under this method of accounting, the purchase price has been allocated to the respective assets acquired and liabilities assumed based on their estimated fair values, net of applicable income tax effects. The excess cost over fair value of net assets acquired has been recorded as goodwill.

The purchase price of \$135.0 million was paid using available cash.

Table of Contents

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for Marathon, net of cash consideration paid:

	At October 15, 2012 (In millions)	
Cash and cash equivalents, net	\$113.0	
Securities available-for-sale	42.2	
Securities held to maturity	4.7	
Loans receivable	558.5	
Accrued interest receivable	1.5	
Other real estate owned	1.0	
Office properties and equipment, net	7.5	
Goodwill	38.4	
Intangible assets	5.0	
Other assets	14.9	
Total assets acquired	786.7	
Deposits	(777.5)
Borrowed funds	(5.2)
Other liabilities	(4.0)
Total liabilities assumed	\$(786.7)

On January 6, 2012, the Company completed the acquisition of Brooklyn Federal Bancorp, Inc. (“BFSB”), the holding company of Brooklyn Federal Savings Bank, a federally chartered savings bank with five full-service branches in Brooklyn and Long Island. After the purchase accounting adjustments, the Company assumed \$385.9 million in customer deposits and acquired \$177.5 million in loans. This transaction resulted in \$16.7 million of goodwill and generated \$218,000 in core deposit intangibles. Under the acquisition method of accounting, the purchase price has been allocated to the respective assets acquired and liabilities assumed based on their estimated fair values, net of applicable income tax effects. The excess cost over fair value of net assets acquired has been recorded as goodwill. The purchase price of \$10.3 million was paid through a combination of the Company’s common stock (551,862 shares), issued to Investors Bancorp, MHC, and cash of \$2.9 million. Brooklyn Federal Savings Bank was merged into the Bank as of the acquisition date. In a separate transaction the Company sold most of Brooklyn Federal Savings Bank’s commercial real estate loan portfolio to a real estate investment fund on January 10, 2012.

Table of Contents

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for BFSB, net of cash consideration paid:

	At January 6, 2012 (In millions)	
Cash and cash equivalents, net	\$27.7	
Securities available-for-sale	170.4	
Loans receivable	177.5	
Accrued interest receivable	1.1	
Office properties and equipment, net	5.2	
Goodwill	16.7	
Intangible assets	0.2	
Other assets	9.3	
Total assets acquired	408.1	
Deposits	(385.9)
Borrowed funds	(8.2)
Other liabilities	(6.4)
Total liabilities assumed	(400.5)
Net assets acquired	\$7.6	

The calculation of goodwill is subject to change for up to one year after closing date of the transactions as additional information relative to closing dates estimates and uncertainties becomes available. The purchase accounting for the Brooklyn is complete and reflected in the table above and in our consolidated financial statements.

Fair Value Measurement of Assets Acquired and Liabilities Assumed

Described below are the methods used to determine the fair values of the significant assets acquired and liabilities assumed in the Marathon and BFSB acquisitions:

Securities. The estimated fair values of the investment securities classified as available for sale were calculated utilizing Level 1 inputs. The prices for these instruments are based upon sales of the securities shortly after the acquisition date. Investment securities classified as Held to Maturity were valued using a combination of Level 1 and Level 2 inputs. The Company reviewed the data and assumptions used in pricing the securities by its third party provider to ensure the highest level of significant inputs are derived from market observable data.

Loans. The acquired loan portfolio was valued based on guidance from ASC 820-10 which defines fair value as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. Level 3 procedures utilized to value the portfolio included the use of present value techniques employing cash flow estimates and the incorporated assumptions that marketplace participants would use in estimating fair values. In instances where reliable market information was not available, the Company used its own assumptions in an effort to determine reasonable fair value. Specifically, the Company utilized three separate fair value analyses we believe a market participant might employ in estimating the entire fair value adjustment required under ASC 820-10. The three separate fair valuation methodologies used are: 1) interest rate loan fair value analysis, 2) general credit fair value adjustment and 3) specific credit fair value adjustment.

To prepare the interest rate loan fair value analysis loans were assembled into groupings by characteristics such as loan type, term, collateral and rate. Market rates for similar loans were obtained from various external data sources and reviewed by Company Management for reasonableness. The average of these rates was used as the fair value interest rate a market participant would utilize. A present value approach was utilized to calculate the interest rate fair value adjustment.

The General Credit Risk fair value adjustment was calculated using a two part general credit fair value analysis; 1) expected lifetime losses and 2) estimated fair value adjustment for qualitative factors. The expected lifetime losses were calculated using an average of historical losses of the Company, Marathon Bank and peer banks. The adjustment related to qualitative factors was impacted by general economic conditions, and the risk related to lack of

familiarity with the originator's underwriting process.

To calculate the Specific Credit fair value adjustment the Company reviewed the acquired loan portfolio for loans meeting the definition of an impaired loan as defined by ASC 310-30. Loans meeting this criteria were reviewed by comparing the contractual cash flows to expected collectible cash flows. The aggregate expected cash flows less the acquisition date fair value will result

11

Table of Contents

in an accretable yield amount. The accretable yield amount will be recognized over the life of the loans on a level yield basis as an adjustment to yield.

Deposits / Core Deposit Intangibles. Core deposit intangibles (CDI) represent the value assigned to demand, interest checking, money market and savings accounts acquired as part of an acquisition. The CDI value represents the future economic benefit, including the present value of future tax benefits, of the potential cost savings from acquiring core deposits as part of an acquisition compared to the cost alternative funding sources.

Certificates of deposit (time deposits) are not considered to be core deposits as they are assumed to have a low expected average life upon acquisition. The fair value of certificates of deposits represents the present value of the certificates' expected contractual payments discounted by market rates for similar CD's.

Borrowed Funds. The present value approach was used to determine the fair value of the borrowed funds acquired during 2012. The fair value of the liability represents the present value of the expected payments using the three year FHLB advance rate.

3. Earnings Per Share

The following is a summary of our earnings per share calculations and reconciliation of basic to diluted earnings per share.

	Three Months Ended March 31, 2013			2012		
	Income	Shares	Per Share Amount	Income	Shares	Per Share Amount
	(Dollars in thousands, except per share data)					
Net Income	\$27,167			\$18,935		
Basic earnings per share:						
Income available to common stockholders	\$27,167	107,499,975	\$0.25	\$18,935	107,257,811	\$0.18
Effect of dilutive common stock equivalents	—	1,170,409		—	178,400	
Diluted earnings per share:						
Income available to common stockholders	\$27,167	108,670,384	\$0.25	\$18,935	107,436,211	\$0.18

For the three months ended March 31, 2013 and 2012 there were 4.4 million and 4.3 million equity awards, respectively, that could potentially dilute basic earnings per share in the future that were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive for the periods presented.

4. Securities

Table of Contents

The amortized cost, gross unrealized gains and losses and estimated fair value of securities available-for-sale and held-to-maturity for the dates indicated are as follows:

	At March 31, 2013			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
	(In thousands)			
Available-for-sale:				
Equity securities	\$3,306	919	—	4,225

The gross unrealized losses in our corporate and other debt securities accounted for 54.7% of the gross unrealized losses at March 31, 2013. The estimated fair value of our corporate and other debt securities portfolio has been adversely impacted by the current economic environment, current market rates, wider credit spreads and credit deterioration subsequent to the purchase of these securities. The portfolio consists of 36 pooled trust preferred securities ("TruPS"), principally issued by banks. At March 31, 2013, the amortized cost and estimated fair values of the trust preferred portfolio was \$30.4 million and \$44.6 million, respectively with 7 of the securities in an unrealized loss position (see "OTTI" for further discussion). The Company has no intent to sell, nor is it more likely than not that the Company will be required to sell, the debt securities in an unrealized loss position before the recovery of their amortized cost basis or maturity.

Edgar Filing: Investors Bancorp Inc - Form 10-Q

Table of Contents

The following table summarizes the Company's pooled trust preferred securities as of March 31, 2013. The Company does not own any single-issuer trust preferred securities.

Table of Contents

(1) At March 31, 2013, assumed recoveries for current deferrals and defaulted issuers ranged from 0.0% to 15.0%.

(2) At March 31, 2013, assumed recoveries for expected deferrals and defaulted issuers ranged from 0.8% to 15.0%.

(3) Excess subordination represents the amount of remaining performing collateral that is in excess of the amount needed to pay off a specified class of bonds and all classes senior to the specified class. Excess subordination reduces an investor's potential risk of loss on their investment as excess subordination absorbs principal and interest shortfalls in the event underlying issuers are not able to make their contractual payments.

A portion of the Company's securities are pledged to secure borrowings. The contractual maturities of mortgage-backed securities generally exceed 10 years; however, the effective lives are expected to be shorter due to anticipated prepayments. Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer, therefore, mortgage-backed securities are not included in the following table. The amortized cost and estimated fair value of debt securities at March 31, 2013, by contractual maturity, are shown below.

	March 31, 2013	
	Amortized cost	Estimated fair value
	(In thousands)	
Due in one year or less	\$9,606	9,607
Due after one year through five years	3,614	3,645
Due after five years through ten years	160	162
Due after ten years	35,567	50,816
Total	\$48,947	64,230

Other-Than-Temporary Impairment ("OTTI")

We conduct a quarterly review and evaluation of the securities portfolio to determine if the value of any security has declined below its cost or amortized cost, and whether such decline is other-than-temporary. If a determination is made that a debt security is other-than-temporarily impaired, the Company will estimate the amount of the unrealized loss that is attributable to credit and all other non-credit related factors. The credit related component will be recognized as an other-than-temporary impairment charge in non-interest income as a component of gain (loss) on securities, net. The non-credit related component will be recorded as an adjustment to accumulate other comprehensive income, net of tax.

Through the use of a valuation specialist, we evaluate the credit and performance of each underlying issuer of our trust preferred securities by deriving probabilities and assumptions for default, recovery and prepayment/amortization for the expected cash flows for each security. At March 31, 2013, management deemed that the present value of projected cash flows for each security was greater than the book value and did not recognize any OTTI charges for the period ended March 31, 2013. At March 31, 2013, non credit-related OTTI recorded on the previously impaired pooled trust preferred securities was \$28.2 million (\$16.7 million after-tax).

The following table presents the changes in the credit loss component of the impairment loss of debt securities that the Company has written down for such loss as an other-than-temporary impairment recognized in earnings.

	Three Months Ended March 31,	
	2013	2012
	(In thousands)	
Balance of credit related OTTI, beginning of period	\$114,514	117,003
Additions:		
Initial credit impairments	—	—
Subsequent credit impairments	—	—
Reductions:		
Accretion of credit loss impairment due to an increase in expected cash flows	(814) (622
Balance of credit related OTTI, end of period	\$113,700	116,381

The credit loss component of the impairment loss represents the difference between the present value of expected future cash flows and the amortized cost basis of the securities prior to considering credit losses. The beginning balance represents the credit loss component for debt securities for which other-than-temporary impairment occurred prior to the period presented. If other-than-temporary impairment is recognized in earnings for credit impaired debt securities, they would be presented as additions in two

Table of Contents

components based upon whether the current period is the first time a debt security was credit impaired (initial credit impairment) or is not the first time a debt security was credit impaired (subsequent credit impairments). The credit loss component is reduced if the Company sells, intends to sell or believes it will be required to sell previously credit impaired debt securities. Additionally, the credit loss component is reduced if (i) the Company receives cash flows in excess of what it expected to receive over the remaining life of the credit impaired debt security, (ii) the security matures or (iii) the security is fully written down.

Realized Gains and Losses

Gains and losses on the sale of all securities are determined using the specific identification method. For the three months ended March 31, 2013, proceeds from sales of securities from available-for-sale portfolio were \$56.0 million, which resulted in gross realized gains of \$846,100 and \$162,300 gross realized losses. For the three months ended March 31, 2013 there were no sales of securities from held-to-maturity portfolio.

During the three months ended March 31, 2012 the Company sold \$166.8 million of available-for-sale agency mortgage backed securities that were acquired in the acquisition of Brooklyn Federal Bancorp, Inc. The sales did not result in any gross realized gains or gross realized losses. In addition, the Company realized a \$42,000 loss on capital distributions of equity securities during the three months ended March 31, 2012.

5. Loans Receivable, Net

The detail of the loan portfolio as of March 31, 2013 and December 31, 2012 was as follows:

	March 31, 2013	December 31, 2012
	(In thousands)	
Residential mortgage loans	\$4,855,748	4,837,838
Multi-family loans	3,097,992	2,995,052
Commercial real estate loans	2,005,781	1,966,156
Construction loans	230,721	224,816
Consumer and other loans	228,217	238,922
Commercial and industrial loans	174,475	168,943
Total loans excluding PCI loans	10,592,934	10,431,727
PCI loans	6,426	6,744
Total loans	10,599,360	10,438,471
Net unamortized premiums and deferred loan costs	14,174	10,487
Allowance for loan losses	(149,639) (142,172
Net loans	\$ 10,463,895) 10,306,786

Purchased Credit-Impaired Loans

Purchased Credit-Impaired ("PCI") loans, are loans acquired at a discount that is due, in part, to credit quality. PCI loans are accounted for in accordance with ASC Subtopic 310-30 and are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., the allowance for loan losses).

Table of Contents

The following table presents information regarding the estimates of the contractually required payments, the cash flows expected to be collected, and the estimated fair value of the PCI loans acquired in Marathon Bank acquisition as of October 15, 2012:

	October 15, 2012 (In thousands)	
Contractually required principal and interest	\$11,774	
Contractual cash flows not expected to be collected (non-accretable difference)	(4,163)
Expected cash flows to be collected	7,611	
Interest component of expected cash flows (accretable yield)	(1,537)
Fair value of acquired loans	\$6,074	

The following table presents changes in the accretable yield for PCI loans.

	Three months ended March 31, 2013 (In thousands)	
Balance, beginning of period	\$1,457	
Acquisitions	—	
Accretion	(114)
Net reclassification from non-accretable difference	—	
Balance, end of period	\$1,343	

An analysis of the allowance for loan losses is summarized as follows:

	Three months ended March 31,	
	2013	2012
	(In thousands)	
Balance at beginning of the period	\$142,172	117,242
Loans charged off	(6,867) (7,007
Recoveries	584	281
Net charge-offs	(6,283) (6,726
Provision for loan losses	13,750	13,000
Balance at end of the period	\$149,639	123,516

The allowance for loan losses is the estimated amount considered necessary to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses that is charged against income. In determining the allowance for loan losses, we make significant estimates and therefore, have identified the allowance as a critical accounting policy. The methodology for determining the allowance for loan losses is considered a critical accounting policy by management because of the high degree of judgment involved, the subjectivity of the assumptions used, and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

The allowance for loan losses has been determined in accordance with U.S. GAAP, under which we are required to maintain an allowance for probable losses at the balance sheet date. We are responsible for the timely and periodic determination of the amount of the allowance required. We believe that our allowance for loan losses is adequate to cover specifically identifiable losses, as well as estimated losses inherent in our portfolio for which certain losses are probable but not specifically identifiable. No allowance has been provided for the loans acquired in the Brooklyn Federal Savings Bank and Marathon Bank transaction as the loans were marked to fair value on the date of acquisition and there has been no subsequent credit deterioration.

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has two components: specific and general allocations. Specific allocations are made for loans determined to be impaired.

Table of Contents

A loan is deemed to be impaired if it is a commercial real estate, multi-family or construction loan with an outstanding balance greater than \$1.0 million and on non-accrual status, loans modified in a troubled debt restructuring (“TDR”), and other loans if management has specific information of a collateral shortfall. Impairment is measured by determining the present value of expected future cash flows or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. The general allocation is determined by segregating the remaining loans, including those loans not meeting the Company’s definition of an impaired loan, by type of loan, risk rating (if applicable) and payment history. In addition, the Company also considers whether residential loans are fixed or adjustable rate. We also analyze historical loss experience, delinquency trends, general economic conditions, geographic concentrations, and industry and peer comparisons. This analysis establishes factors that are applied to the loan groups to determine the amount of the general allocations. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established which could have a material negative effect on our financial results.

On a quarterly basis, management’s Allowance for Loan Loss Committee reviews the current status of various loan assets in order to evaluate the adequacy of the allowance for loan losses. In this evaluation process, specific loans are analyzed to determine their potential risk of loss. This process includes all loans, concentrating on non-accrual and classified loans. Each non-accrual or classified loan is evaluated for potential loss exposure. Any shortfall results in a recommendation of a specific allowance or charge-off if the likelihood of loss is evaluated as probable. To determine the adequacy of collateral on a particular loan, an estimate of the fair value of the collateral is based on the most current appraised value available. This appraised value is then reduced to reflect estimated liquidation expenses. The results of this quarterly process are summarized along with recommendations and presented to Executive and Senior Management for their review. Based on these recommendations, loan loss allowances are approved by Executive and Senior Management. All supporting documentation with regard to the evaluation process, loan loss experience, allowance levels and the schedules of classified loans are maintained by the Lending Administration Department. A summary of loan loss allowances and the methodology employed to determine such allowances is presented to the Board of Directors on a quarterly basis.

Our primary lending emphasis has been the origination of commercial real estate loans, multi-family loans and the origination and purchase of residential mortgage loans. We also originate commercial and industrial loans, home equity loans and home equity lines of credit. These activities resulted in a loan concentration in residential mortgages, as well as a concentration of loans secured by real estate property located in New Jersey and New York. Based on the composition of our loan portfolio, we believe the primary risks are increases in interest rates, a continued decline in the general economy, and a further decline in real estate market values in New Jersey, New York and surrounding states. Any one or combination of these events may adversely affect our loan portfolio resulting in increased delinquencies, loan losses and future levels of loan loss provisions. We consider it important to maintain the ratio of our allowance for loan losses to total loans at an adequate level given current economic conditions and the composition of the portfolio. As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

For commercial real estate, construction and multi-family loans, the Company obtains an appraisal for all collateral dependent loans upon origination and an updated appraisal in the event interest or principal payments are 90 days delinquent or when the timely collection of such income is considered doubtful. This is done in order to determine the specific reserve needed upon initial recognition of a collateral dependent loan as non-accrual and/or impaired. In subsequent reporting periods, as part of the allowance for loan loss process, the Company reviews each collateral dependent commercial real estate loan previously classified as non-accrual and/or impaired and assesses whether there has been an adverse change in the collateral value supporting the loan. The Company utilizes information from its

commercial lending officers and its loan workout department's knowledge of changes in real estate conditions in our lending area to identify if possible deterioration of collateral value has occurred. Based on the severity of the changes in market conditions, management determines if an updated appraisal is warranted or if downward adjustments to the previous appraisal are warranted. If it is determined that the deterioration of the collateral value is significant enough to warrant ordering a new appraisal, an estimate of the downward adjustments to the existing appraised value is used in assessing if additional specific reserves are necessary until the updated appraisal is received.

For homogeneous residential mortgage loans, the Company's policy is to obtain an appraisal upon the origination of the loan and an updated appraisal in the event a loan becomes 90 days delinquent. Thereafter, the appraisal is updated every 2 years if the loan remains in non-performing status and the foreclosure process has not been completed.

Management adjusts the appraised value of residential loans to reflect estimated selling costs and declines in the real estate market.

Table of Contents

Management believes the potential risk for outdated appraisals for impaired and other non-performing loans has been mitigated due to the fact that the loans are individually assessed to determine that the loan's carrying value is not in excess of the fair value of the collateral. Loans are generally charged off after an analysis is completed which indicates that collectability of the full principal balance is in doubt.

Our allowance for loan losses reflects probable losses considering, among other things, the continued adverse economic conditions, the actual growth and change in composition of our loan portfolio, the level of our non-performing loans and our charge-off experience. We believe the allowance for loan losses reflects the inherent credit risk in our portfolio.

Although we believe we have established and maintained the allowance for loan losses at adequate levels, additions may be necessary if the current economic environment continues or deteriorates. Management uses the best information available; however, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the Federal Deposit Insurance Corporation and the New Jersey Department of Banking and Insurance, as an integral part of their examination process, will periodically review our allowance for loan losses. Such agencies may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Table of Contents

The following tables present the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment method as of March 31, 2013 and December 31, 2012:

	March 31, 2013							
	Residential Mortgage	Multi- Family	Commercial Real Estate	Construction Loans	Commercial and Industrial Loans	Consumer and Other Loans	Unallocated	Total

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors. For non-homogeneous loans, such as commercial and commercial real estate loans the Company analyzes the loans individually by classifying the loans as to credit risk and assesses the probability of collection for each type of class. This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

Pass - "Pass" assets are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell, of any underlying collateral in a timely manner.

Special Mention - A "Special Mention" asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the institution's credit position at some future date. Special Mention assets are not adversely classified and do not expose

an institution to sufficient risk to warrant adverse classification. Residential loans delinquent 30-89 days are considered special mention.

Table of Contents

Substandard - A “Substandard” asset is inadequately protected by the current sound worth and paying capacity of the obligor or by the collateral pledged, if any. Assets so classified must have a well-defined weakness, or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Residential loans delinquent 90 days or greater are considered substandard.

Doubtful - An asset classified “Doubtful” has all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently known facts, conditions, and values.

Loss - An asset or portion thereof, classified “Loss” is considered uncollectible and of such little value that its continuance on the institution’s books as an asset, without establishment of a specific valuation allowance or charge-off, is not warranted. This classification does not necessarily mean that an asset has no recovery or salvage value; but rather, there is much doubt about whether, how much, or when the recovery will occur. As such, it is not practical or desirable to defer the write-off.

The following tables present the risk category of loans as of March 31, 2013 and December 31, 2012 by class of loans excluding the PCI loans:

	March 31, 2013					
	Pass	Special Mention	Substandard	Doubtful	Loss	Total

Total	\$51,623	21,516	108,473	181,612	10,250,115	10,431,727

The following table presents non-accrual loans excluding PCI loans at the dates indicated:

	March 31, 2013		December 31, 2012	
	# of loans	Amount	# of loans	Amount
	(Dollars in thousands)			
Non-accrual:				
Residential and consumer	328	\$84,133	354	\$82,533
Construction	9	24,117	9	25,764
Multi-family	7	14,527	5	11,143
Commercial real estate	6	10,227	4	753
Commercial and industrial	6	2,774	2	375
Total non-accrual loans	356	\$135,778	374	\$120,568

Based on management's evaluation, at March 31, 2013 the Company classified 1 TDR construction loan for \$2.9 million and 18 residential TDR loans totaling \$6.0 million that were current as non-accrual. The Company has no loans past due 90 days or more delinquent that are still accruing interest. As of March 31, 2013, there were \$6.4 million of PCI loans, of which 7 PCI loans totaling \$3.7 million were current and 6 PCI loans totaling \$2.7 million were 90 days or more delinquent. As of December 31, 2012, there were \$6.7 million of PCI loans, of which 8 PCI loans totaling \$5.8 million were current and 4 PCI loans totaling \$966,000 were 90 days or more delinquent.

Table of Contents

At March 31, 2013 and December 31, 2012, loans meeting the Company's definition of an impaired loan which were primarily collateral dependent totaled \$66.5 million and \$57.4 million, respectively, with allocations of the allowance for loan losses of \$2.1 million for both periods. During the three months ended March 31, 2013 and 2012, interest income received and recognized on these loans totaled \$666,000 and \$236,000, respectively.

The following tables present loans individually evaluated for impairment by class of loans as of March 31, 2013 and December 31, 2012:

	March 31, 2013				
	Recorded Investment	Unpaid Principal Balance	Related Allowance	Average Recorded Investment	Interest Income Recognized
	(In thousands)				
With no related allowance:

Total impaired loans	\$57,406	85,216	2,142	68,357	1,579

The average recorded investment is the annual average calculated based upon the ending quarterly balances. The interest income recognized is the year to date interest income recognized on a cash basis.

Troubled Debt Restructurings

On a case-by-case basis, the Company may agree to modify the contractual terms of a borrower's loan to remain competitive and assist customers who may be experiencing financial difficulty, as well as preserve the Company's position in the loan. If the borrower is experiencing financial difficulties and a concession has been made at the time of such modification, the loan is classified as a troubled debt restructured loan.

Substantially all of our troubled debt restructured loan modifications involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan, or a combination of these two methods. These modifications rarely result in the forgiveness of principal or accrued interest. In addition, we frequently obtain additional collateral or guarantor support when modifying commercial loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following tables present the total troubled debt restructured loans as of March 31, 2013 excluding PCI loans:

	Three months ended March 31, 2013					
	Accrual		Non-accrual		Total	
	# of loans	Amount	# of loans	Amount	# of loans	Amount
	(Dollars in thousands)

Table of Contents

The following tables present information about troubled debt restructurings for the periods presented:

Three months ended March 31, 2013

	Number of Loans	Pre-modification Recorded Investment	Post- modification Recorded Investment
(Dollars in thousands)			
Troubled Debt Restructurings:			
Residential mortgage	5	\$2,870	\$2,974
Multi-family	2	14,267	7,150
Commercial real estate	3	4,423	4,402

Three months ended March 31, 2012

	Number of Loans	Pre-modification Recorded Investment	Post- modification Recorded Investment
(Dollars in thousands)			
Troubled Debt Restructurings:			
Residential mortgage	8	\$1,748	\$1,694

Post-modification recorded investment represents the balance immediately following modification. Residential mortgage loan modifications primarily involved the reduction in loan interest rate and extension of loan maturity dates.

All TDRs are impaired loans, which are individually evaluated for impairment, as discussed above. Collateral dependent impaired loans classified as TDRs were written down to the estimated fair value of the collateral. There were \$518,000 and \$542,000 in charges-offs for collateral dependent TDRs during the three months ended March 31, 2013 and 2012, respectively. The allowance for loan losses associated with the TDRs presented in the above tables totaled \$2.1 million and \$5.1 million at March 31, 2013 and 2012, respectively.

For the three months ended March 31, 2013, there were 5 residential TDRs that had a weighted average modified interest rate of approximately 3.45% compared to a yield of 5.55% prior to modification. For the three months ended March 31, 2012, there were 8 residential TDRs that had a weighted average modified interest rate of approximately 3.09% compared to a yield of 5.80% prior to modification. Several residential TDRs include step up interest rates in their modified terms which will impact their weighted average yield in the future. There were 3 commercial real estate TDRs that had a weighted average modified interest rate of approximately 5.61% as compared to a yield of 7.43% prior to modification for the three months ended March 31, 2013. There were no commercial real estate TDRs for the three months ended March 31, 2012. There were 2 multi-family TDRs that has a weighted average modified interest rate of approximately 3.54% as compared to a yield of 9.10% prior to modification for the three months ended March 31, 2013. There were no multi-family TDRs for the three months ended March 31, 2012.

Loans modified as TDRs in the previous 12 months to March 31, 2013, for which there was a payment default consisted of 9 residential loans with a recorded investment of \$2.2 million at March 31, 2013. Loans modified as TDRs in the previous 12 months to March 31, 2012, for which there was a payment default consisted of one construction loan with a recorded investment of \$2.9 million at March 31, 2012.

During the three months ended March 31, 2013, the Company sold a pool of non performing residential loans for \$5.9 million as well as one construction loan for \$8.2 million.

Table of Contents

6. Deposits

Deposits are summarized as follows:

	March 31, 2013 (In thousands)	December 31, 2012
Savings	\$1,749,827	1,718,199
Checking accounts	2,571,164	2,498,829
Money market deposits	1,568,486	1,585,865
Certificates of deposits	2,884,839	2,965,964
Total	\$8,774,316	8,768,857

7. Goodwill and Other Intangible Assets

The carrying amount of goodwill for the period ended March 31, 2013 and December 31, 2012 was approximately \$77.1 million.

The following table summarizes other intangible assets as of March 31, 2013 and December 31, 2012:

	Gross Intangible Asset (In thousands)	Accumulated Amortization	Valuation Allowance	Net Intangible Assets
March 31, 2013				
Mortgage servicing rights	41,245	(27,363) (1,076) 12,806
Core deposit premiums	14,338	(5,002) —	9,336
Other	300	(57) —	243
Total other intangible assets	\$55,883	\$(32,422) \$(1,076) \$22,385
December 31, 2012				
Mortgage servicing rights	\$37,838	\$(24,107) \$(1,705) \$12,026
Core deposit premiums	14,338	(4,455) —	9,883
Other	300	(50) —	250
Total other intangible assets	\$52,476	\$(28,612) \$(1,705) \$22,159

Mortgage servicing rights are accounted for using the amortization method. Under this method, the Company amortizes the loan servicing asset in proportion to, and over the period of, estimated net servicing revenues. The Company sells loans on a servicing-retained basis. Loans that were sold on this basis, amounted to \$1.46 billion and \$1.40 billion at March 31, 2013 and December 31, 2012 respectively, all of which relate to residential mortgage loans. At March 31, 2013 and December 31, 2012, the servicing asset, included in intangible assets, had an estimated fair value of \$12.8 million and \$12.0 million, respectively. Fair value was based on expected future cash flows considering a weighted average discount rate of 10.2% , a weighted average constant prepayment rate on mortgages of 11.8% and a weighted average life of 5.0 years.

Core deposit premiums are amortized using an accelerated method and having a weighted average amortization period of 10 years.

8. Equity Incentive Plan

During the three months ended March 31, 2013, the Company recorded \$885,000 of share-based compensation expense, comprised of stock option expense of \$87,000 and restricted stock expense of \$799,000. During the three months ended March

Table of Contents

31, 2012, the Company recorded \$745,000 of share-based compensation expense, comprised of stock option expense of \$106,000 and restricted stock expense of \$639,000.

The following is a summary of the Company's stock option activity and related information for its option plan for the three months ended March 31, 2013:

	Number of Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at December 31, 2012	4,320,068	\$ 14.98	4.2	\$ 12,082,811
Granted	—	—		
Exercised	—	—		
Forfeited	—	—		
Expired	—	—		
Outstanding at March 31, 2013	4,320,068	\$ 14.98	3.92	\$ 16,402,389
Exercisable at March 31, 2013	4,228,068	\$ 15.01	3.90	\$ 15,948,029

There were no options granted during the three months ended March 31, 2013. Expected future expense relating to the unvested options outstanding as of March 31, 2013 is \$279,600 over a weighted average period of 1.40 years.

The following is a summary of the status of the Company's restricted shares as of March 31, 2013 and changes therein during the three months then ended:

	Number of Shares Awarded	Weighted Average Grant Date Fair Value
Non-vested at December 31, 2012	1,292,739	\$ 13.62
Granted	3,000	18.18
Vested	(218,976) 13.51
Forfeited	—	—
Non-vested at March 31, 2013	1,076,763	\$ 13.70

Expected future compensation expense relating to the non-vested restricted shares at March 31, 2013 is \$13.9 million over a weighted average period of 4.92 years.

9. Net Periodic Benefit Plan Expense

The Company has a Supplemental Executive Retirement Wage Replacement Plan (SERP). The SERP is a nonqualified, defined benefit plan which provides benefits to employees as designated by the Compensation Committee of the Board of Directors if their benefits and/or contributions under the pension plan are limited by the Internal Revenue Code. The Company also has a nonqualified, defined benefit plan which provides benefits to certain directors. The SERP and the directors' plan are unfunded and the costs of the plans are recognized over the period that services are provided.

Table of Contents

The components of net periodic benefit cost are as follows:

	Three Months Ended March 31,	
	2013	2012
	(In thousands)	
Service cost	\$450	328
Interest cost	227	199
Amortization of:		
Prior service cost	24	24
Net gain	165	36
Total net periodic benefit cost	\$866	587

Due to the unfunded nature of these plans, no contributions have been made or were expected to be made to the SERP and Directors' plans during the three months ended March 31, 2013.

The Company also maintains a defined benefit pension plan. Since it is a multiemployer plan, costs of the pension plan are based on contributions required to be made to the pension plan. We contributed \$2.8 million to the defined benefit pension plan during the three months March 31, 2013. We anticipate contributing funds to the plan to meet any minimum funding requirements for the remainder of 2013.

10. Comprehensive Income

The components of comprehensive income, both gross and net of tax, are as follows:

	Three months ended March 31,			Three months ended March 31,		
	2013			2012		
	Gross	Tax	Net	Gross	Tax	Net
Net income	\$42,256	(15,089)	27,167	30,631	(11,696)	18,935
Other comprehensive income:						
Change in funded status of retirement obligations	239	(98)	141	121	(49)	72
Unrealized (loss) gain on securities available-for-sale	(3,476)	1,433	(2,043)	2,384	(877)	1,507
Reclassification adjustment for gains included in net income	(684)	279	(405)	—	—	—
Other-than-temporary impairment accretion on debt securities	330	(135)	195	369	(151)	218
Total other comprehensive income	(3,591)	1,479	(2,112)	2,874	(1,077)	1,797
Total comprehensive income	\$38,665	(13,610)	25,055	33,505	(12,773)	20,732

Table of Contents

The following table presents the after-tax changes in the balances of each component of accumulated other comprehensive loss for the three months ended March 31, 2013 and 2012:

	Change in funded status of retirement obligations	Unrealized gain on securities available-for-sale	Reclassification adjustment for losses included in net income	Other-than- temporary impairment accretion on debt securities	Total accumulated other comprehensive loss
Balance - December 31, 2012	\$(5,879)	15,718	(586)	(16,860)	(7,607)
Net change	141	(2,043)	(405)	195	(2,112)
Balance - March 31, 2013	\$(5,738)	13,675	(991)	(16,665)	(9,719)
Balance - December 31, 2011	\$(3,319)	10,638	(691)	(17,734)	(11,106)
Net change	72	1,507	—	218	1,797
Balance - March 31, 2012	\$(3,247)	12,145	(691)	(17,516)	(9,309)

The following table sets for information about amounts reclassified from accumulated other comprehensive loss to the consolidated statement of income and the affected line item in the statement where net income is presented.

	For the Three Months Ended March 31, 2013 (In thousands)
Reclassification adjustment for gains included in net income	
Gain on security transactions	(684)
Change in funded status of retirement obligations (1)	
Compensation and fringe benefits:	
Amortization of net obligation or asset	8
Amortization of prior service cost	37
Amortization of net gain	194
Compensation and fringe benefits	239
Total before tax	(445)
Income tax benefit	181
Net of tax	(264)

(1) These accumulated other comprehensive loss components are included in the computations of net periodic cost for our defined benefit plans and other postretirement benefit plan. See Note 9 for additional details.

11. Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Our securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other assets or liabilities on a non-recurring basis, such as held-to-maturity securities, mortgage servicing rights (“MSR”), loans receivable and real estate owned (“REO”). These non-recurring fair value adjustments involve the application of lower-of-cost-or-market accounting or write-downs of individual assets. Additionally, in connection with our mortgage banking activities we have commitments to fund loans held for sale and commitments to sell loans, which are considered free-standing derivative instruments, the fair values of which are not material to our financial condition or results of operations.

Edgar Filing: Investors Bancorp Inc - Form 10-Q

In accordance with Financial Accounting Standards Board (“FASB”) ASC 820, “Fair Value Measurements and Disclosures”, we group our assets and liabilities at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 – Valuation is based upon quoted prices for identical instruments traded in active markets.

33

Table of Contents

Level 2 – Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

We base our fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Assets Measured at Fair Value on a Recurring Basis

Securities available-for-sale

Our available-for-sale portfolio is carried at estimated fair value on a recurring basis, with any unrealized gains and losses, net of taxes, reported as accumulated other comprehensive income/loss in stockholders' equity. The fair values of available-for-sale securities are based on quoted market prices (Level 1), where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded (Level 2), the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and non-binding broker quotes. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service.

Table of Contents

The following table provides the level of valuation assumptions used to determine the carrying value of our assets measured at fair value on a recurring basis at March 31, 2013 and December 31, 2012, respectively.

	Carrying Value at March 31, 2013			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
Securities available for sale:				
Equity securities	\$4,225	—	4,225	—
Debt securities:				
Government-sponsored enterprises	3,028		3,028	
Mortgage-backed securities:				
Federal Home Loan Mortgage Corporation	662,248	—	662,248	—
Federal National Mortgage Association	740,158	—	740,158	—
Government National Mortgage Association	3,151	—	3,151	—
Total mortgage-backed securities available-for-sale	1,405,557	—	1,405,557	—
Total securities available-for-sale	\$1,412,810	—	1,412,810	—

	Carrying Value at December 31, 2012			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
Securities available for sale:				
Equity securities	\$4,161	—	4,161	—
Debt securities:				
Government-sponsored enterprises	3,035	—	3,035	—
Mortgage-backed securities:				
Federal Home Loan Mortgage Corporation	667,517	—	667,517	—
Federal National Mortgage Association	706,128	—	706,128	—
Government National Mortgage Association	4,487	—	4,487	—
Total mortgage-backed securities available-for-sale	1,378,132	—	1,378,132	—
Total securities available-for-sale	\$1,385,328	—	1,385,328	—

There have been no changes in the methodologies used at March 31, 2013 from December 31, 2012, and there were no transfers between Level 1 and Level 2 during the three months ended March 31, 2013.

Assets Measured at Fair Value on a Non-Recurring Basis

Mortgage Servicing Rights, net

Mortgage servicing rights (MSR) are carried at the lower of cost or estimated fair value. The estimated fair value of MSR is obtained through independent third party valuations through an analysis of future cash flows, incorporating estimates of assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, including the market's perception of future interest rate movements. The prepayment speed and the discount rate are considered two of the most significant inputs in the model. At March 31, 2013, the fair value model used prepayment speeds ranging from 5.8% to 24.6% and a discount rate of 10.2% for the valuation of the mortgage servicing rights. A significant degree of judgment is involved in valuing the mortgage servicing rights using Level 3 inputs. The use of different assumptions could have a significant positive or negative effect on the fair value estimate.

Loans Receivable

Loans which meet certain criteria are evaluated individually for impairment. A loan is deemed to be impaired if it is a commercial real estate, multi-family or construction loan with an outstanding balance greater than \$1.0 million and on non-accrual

Table of Contents

status, loans modified in a troubled debt restructuring, and other loans with \$1.0 million in outstanding principal if management has specific information of a collateral shortfall. Our impaired loans are generally collateral dependent and, as such, are carried at the estimated fair value of the collateral less estimated selling costs. In order to estimate fair value, once interest or principal payments are 90 days delinquent or when the timely collection of such income is considered doubtful an updated appraisal is obtained. Thereafter, in the event the most recent appraisal does not reflect the current market conditions due to the passage of time and other factors, management will obtain an updated appraisal or make downward adjustments to the existing appraised value based on their knowledge of the property, local real estate market conditions, recent real estate transactions, and for estimated selling costs, if applicable. At March 31, 2013 appraisals were discounted in a range of 0%-25%.

Other Real Estate Owned

Other Real Estate Owned is recorded at estimated fair value, less estimated selling costs when acquired, thus establishing a new cost basis. Fair value is generally based on independent appraisals. These appraisals include adjustments to comparable assets based on the appraisers' market knowledge and experience, and are discounted an additional 0%-25% for estimated costs to sell. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. If the estimated fair value of the asset declines, a writedown is recorded through expense. The valuation of foreclosed assets is subjective in nature and may be adjusted in the future because of changes in economic conditions. Operating costs after acquisition are generally expensed.

The following table provides the level of valuation assumptions used to determine the carrying value of our assets measured at fair value on a non-recurring basis at March 31, 2013 and December 31, 2012, respectively.

	Carrying Value at March 31, 2013			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
MSR, net	\$6,727	—	—	6,727
Impaired loans	8,715	—	—	8,715
Other real estate owned	2,907	—	—	2,907
	\$18,349	—	—	18,349
	Carrying Value at December 31, 2012			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
MSR, net	\$12,025	—	—	12,025
Impaired loans	50,470	—	—	50,470
Other real estate owned	8,093	—	—	8,093
	\$70,588	—	—	70,588

Other Fair Value Disclosures

Fair value estimates, methods and assumptions for the Company's financial instruments not recorded at fair value on a recurring or non-recurring basis are set forth below.

Cash and Cash Equivalents

For cash and due from banks, the carrying amount approximates fair value.

Securities held-to-maturity

Our held-to-maturity portfolio, consisting primarily of mortgage backed securities and other debt securities for which we have a positive intent and ability to hold to maturity, is carried at amortized cost. Management utilizes various inputs to determine the fair value of the portfolio. The Company obtains one price for each security primarily from a third-party pricing service, which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For

securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to,

Table of Contents

benchmark yields, credit spreads, default rates, prepayment speeds and non-binding broker quotes. In the absence of quoted prices and in an illiquid market, valuation techniques, which require inputs that are both significant to the fair value measurement and unobservable, are used to determine fair value of the investment. Valuation techniques are based on various assumptions, including, but not limited to cash flows, discount rates, rate of return, adjustments for nonperformance and liquidity, and liquidation values. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service.

FHLB Stock

The fair value of FHLB stock is its carrying value, since this is the amount for which it could be redeemed. There is no active market for this stock and the Bank is required to hold a minimum investment based upon the unpaid principal of home mortgage loans and/or FHLB advances outstanding.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential mortgage and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories.

The fair value of performing loans, except residential mortgage loans, is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan. For performing residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using discount rates based on secondary market sources adjusted to reflect differences in servicing and credit costs, if applicable. Fair value for significant nonperforming loans is based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows. Fair values estimated in this manner do not fully incorporate an exit price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

Deposit Liabilities

The fair value of deposits with no stated maturity, such as savings, checking accounts and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates which approximate currently offered for deposits of similar remaining maturities.

Borrowings

The fair value of borrowings are based on securities dealers' estimated fair values, when available, or estimated using discounted contractual cash flows using rates which approximate the rates offered for borrowings of similar remaining maturities.

Table of Contents

Commitments to Extend Credit

The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For commitments to originate fixed rate loans, fair value also considers the difference between current levels of interest rates and the committed rates. Due to the short-term nature of our outstanding commitments, the fair values of these commitments are immaterial to our financial condition.

The carrying values and estimated fair values of the Company's financial instruments are presented in the following table.

	March 31, 2013				
	Carrying	Estimated Fair Value			
	value	Total	Level 1	Level 2	Level 3
	(In thousands)

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Table of Contents

Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets that are not considered financial assets include deferred tax assets, premises and equipment and bank owned life insurance. Liabilities for pension and other postretirement benefits are not considered financial liabilities. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

12. Recent Accounting Pronouncements

In December 2011, the FASB issued ASU 2011-11, Disclosures about Offsetting Assets and Liabilities, in conjunction with the IASB's issuance of amendments to Disclosures—Offsetting Financial Assets and Financial Liabilities (Amendments to IFRS 7). While the Boards retained the existing offsetting models under U.S. GAAP and IFRS, the new standards require disclosures to allow investors to better compare financial statements prepared under U.S. GAAP with financial statements prepared under IFRS. The new standards are effective for annual periods beginning January 1, 2013, and interim periods within those annual periods. Retrospective application is required. The adoption of this pronouncement did not have a material impact on the Company's financial condition or results of operations.

In January 2013, the FASB issued ASU 2013-1, Scope of Disclosures about Offsetting Assets and Liabilities. The main provision of ASU 2013-1 is to clarify the scope of the new offsetting disclosures required under ASU 2011-11 to derivatives, including bifurcated embedded derivatives; repurchase and reverse repurchase agreements and securities borrowing and lending transactions that are either offset in the statement of financial position or subject to an enforceable master netting arrangement regardless of their presentation in the financial statements. The Company does not expect that the adoption of this pronouncement will have a material impact on the Company's financial condition or results of operations.

In February 2013, the FASB issued ASU 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income". This ASU requires entities to disclose the effect of items reclassified out of accumulated other comprehensive income (AOCI) on each affected net income line item. For AOCI reclassification items that are not reclassified in their entirety into net income, a cross reference to other required US GAAP disclosures. This information may be provided either in the notes or parenthetically on the face of the financials. For public entities, the guidance is effective for annual reporting periods beginning after December 15, 2012 and interim periods within those years. The Company has presented comprehensive income in a separate Consolidated Statement of Comprehensive Income and in Note 10 of the Notes to Consolidated Financial Statements.

13. Subsequent Events

As defined in FASB ASC 855, "Subsequent Events", subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued or available to be issued. Financial statements are considered issued when they are widely distributed to shareholders and other financial statement users for general use and reliance in a form and format that complies with GAAP.

On April 29, 2013, the Company declared a cash dividend of \$0.05 per share to stockholders of record as of May 10, 2013, payable on May 24, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward Looking Statements

Certain statements contained herein are not based on historical facts and are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "estimate," "anticipate," "continue," or similar terms

variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which Investors Bancorp, Inc. (the “Company”) operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations or interpretations of regulations affecting financial institutions, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity.

The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company wishes to advise that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not undertake and specifically declines any obligation to publicly release the result of any revisions, which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events except as may be required by law.

Critical Accounting Policies

We consider accounting policies that require management to exercise significant judgment or discretion or to make significant assumptions that have, or could have, a material impact on the carrying value of certain assets or on income, to be critical accounting policies. We consider the following to be our critical accounting policies.

Allowance for Loan Losses. The allowance for loan losses is the estimated amount considered necessary to cover credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses that is charged against income. In determining the allowance for loan losses, we make significant estimates and, therefore, have identified the allowance as a critical accounting policy. The methodology for determining the allowance for loan losses is considered a critical accounting policy by management because of the high degree of judgment involved, the subjectivity of the assumptions used, and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

The allowance for loan losses has been determined in accordance with U.S. generally accepted accounting principles, under which we are required to maintain an allowance for probable losses at the balance sheet date. We are responsible for the timely and periodic determination of the amount of the allowance required. We believe that our allowance for loan losses is adequate to cover specifically identifiable losses, as well as estimated losses inherent in our portfolio for which certain losses are probable but not specifically identifiable.

Management performs a quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has two components: specific and general allocations. Specific allocations are made for loans determined to be impaired. A loan is deemed to be impaired if it is a commercial real estate, multi-family or construction loan with an outstanding balance greater than \$1.0 million and on non-accrual status, loans modified in a troubled debt restructuring, and other commercial real estate loans with an outstanding balance greater than \$1.0 million if management has specific information of a collateral shortfall. Impairment is measured by determining the present value of expected future cash flows or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. The general allocation is determined by segregating the remaining loans, including those loans not meeting the Company's definition of an impaired loan, by type of loan, risk weighting (if applicable) and payment history. We also analyze historical loss experience, delinquency trends, general economic conditions, geographic concentrations, and industry and peer comparisons. This analysis establishes factors that are applied to the loan groups to determine the amount of the general allocations. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revisions based upon changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established which could have a material negative effect on our financial results.

Purchased Credit-Impaired ("PCI") loans, are loans acquired at a discount that is due, in part, to credit quality. PCI loans are accounted for in accordance with ASC Subtopic 310-30 and are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance (i.e., the allowance for loan losses). The difference between the undiscounted cash flows expected at acquisition and the initial carrying amount (fair value) of the PCI loans, or the "accretable yield," is recognized as interest income utilizing the level-yield method over the life of the loans. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the "non-accretable difference," are not recognized as a yield adjustment, as a loss accrual or a valuation allowance. Reclassifications of the non-accretable difference to the accretable yield may occur subsequent to the loan acquisition dates due to increases in expected cash flows of the loans and result in an increase in yield on a prospective basis.

On a quarterly basis, management's Allowance for Loan Loss Committee reviews the current status of various loan assets in order to evaluate the adequacy of the allowance for loan losses. In this evaluation process, specific loans are analyzed to determine their potential risk of loss. This process includes all loans, concentrating on non-accrual and classified loans. Each non-accrual or classified loan is evaluated for potential loss exposure. Any shortfall results in a recommendation of a specific allowance if the likelihood of loss is evaluated as probable. To determine the adequacy of collateral on a particular loan, an estimate of the fair market value of the collateral is based on the most current appraised value available. This appraised value is then reduced to reflect estimated liquidation expenses.

Table of Contents

The results of this quarterly process are summarized along with recommendations and presented to Executive and Senior Management for their review. Based on these recommendations, loan loss allowances are approved by Executive and Senior Management. All supporting documentation with regard to the evaluation process, loan loss experience, allowance levels and the schedules of classified loans are maintained by the Lending Administration Department. A summary of loan loss allowances is presented to the Board of Directors on a quarterly basis. Our primary lending emphasis has been the origination of commercial real estate loans, multi-family loans and the origination and purchase of residential mortgage loans. We also originate commercial and industrial loans, construction loans, business lending, home equity loans and home equity lines of credit. These activities resulted in a loan concentration in residential mortgages, as well as a concentration of loans secured by real property located in New Jersey and New York. As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

For commercial real estate, construction and multi-family loans, the Company obtains an appraisal for all collateral dependent loans upon origination and an updated appraisal in the event interest or principal payments are 90 days delinquent or when the timely collection of such income is considered doubtful. This is done in order to determine the specific reserve needed upon initial recognition of a collateral dependent loan as non-accrual and/or impaired. In subsequent reporting periods, as part of the allowance for loan loss process, the Company reviews each collateral dependent commercial real estate loan previously classified as non-accrual and/or impaired and assesses whether there has been an adverse change in the collateral value supporting the loan. The Company utilizes information from its commercial lending officers and its loan workout department's knowledge of changes in real estate conditions in our lending area to identify if possible deterioration of collateral value has occurred. Based on the severity of the changes in market conditions, management determines if an updated appraisal is warranted or if downward adjustments to the previous appraisal are warranted. If it is determined that the deterioration of the collateral value is significant enough to warrant ordering a new appraisal, an estimate of the downward adjustments to the existing appraised value is used in assessing if additional specific reserves are necessary until the updated appraisal is received.

For homogeneous residential mortgage loans, the Company's policy is to obtain an appraisal upon the origination of the loan and an updated appraisal in the event a loan becomes 90 days delinquent. Thereafter, the appraisal is updated every two years if the loan remains in non-performing status and the foreclosure process has not been completed. Management adjusts the appraised value of residential loans to reflect estimated selling costs and estimated declines in the real estate market, taking into consideration the estimated length of time to complete the foreclosure process. In determining the allowance for loan losses, management believes the potential for outdated appraisals has been mitigated for impaired loans and other non-performing loans. As described above, the loans are individually assessed to determine that the loan's carrying value is not in excess of the fair value of the collateral. Loans are generally charged off after an analysis is completed which indicates that collectability of the full principal balance is in doubt. Based on the composition of our loan portfolio, we believe the primary risks are increases in interest rates, a continued decline in the general economy, and a further decline in real estate market values in New Jersey, New York and surrounding states. Any one or combination of these events may adversely affect our loan portfolio resulting in increased delinquencies, loan losses and future levels of loan loss provisions. We consider it important to maintain the ratio of our allowance for loan losses to total loans at an adequate level given current economic conditions, interest rates, and the composition of the portfolio.

Our allowance for loan losses reflects probable losses considering, among other things, the continued adverse economic conditions, the actual growth and change in composition of our loan portfolio, the level of our non-performing loans and our charge-off experience. We believe the allowance for loan losses reflects the inherent credit risk in our portfolio.

Although we believe we have established and maintained the allowance for loan losses at adequate levels, additions may be necessary if the current economic environment continues or deteriorates. Management uses the best information available; however, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the Federal Deposit Insurance Corporation and the New Jersey Department of Banking and Insurance, as an integral part of their examination process, will periodically review our allowance for loan losses. Such agencies may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Deferred Income Taxes. The Company records income taxes in accordance with ASC 740, "Income Taxes," as amended, using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the financial statements or tax returns; (ii) are attributable to differences

Table of Contents

between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled. Where applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant.

Asset Impairment Judgments. Certain of our assets are carried on our consolidated balance sheets at cost, fair value or at the lower of cost or fair value. Valuation allowances or write-downs are established when necessary to recognize impairment of such assets. We periodically perform analyses to test for impairment of such assets. In addition to the impairment analyses related to our loans discussed above, another significant impairment analysis is the determination of whether there has been an other-than-temporary decline in the value of one or more of our securities.

Our available-for-sale portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in stockholders' equity. While the Company does not intend to sell these securities, and it is more likely than not that we will not be required to sell these securities before their anticipated recovery of the remaining amortized cost basis, the Company has the ability to sell the securities. Our held-to-maturity portfolio, consisting primarily of mortgage backed securities and other debt securities for which we have a positive intent and ability to hold to maturity, is carried at amortized cost. We conduct a periodic review and evaluation of the securities portfolio to determine if the value of any security has declined below its cost or amortized cost, and whether such decline is other-than-temporary. Management utilizes various inputs to determine the fair value of the portfolio. To the extent they exist, unadjusted quoted market prices in active markets (level 1) or quoted prices on similar assets (level 2) are utilized to determine the fair value of each investment in the portfolio. In the absence of quoted prices and in an illiquid market, valuation techniques, which require inputs that are both significant to the fair value measurement and unobservable (level 3), are used to determine fair value of the investment. Valuation techniques are based on various assumptions, including, but not limited to cash flows, discount rates, rate of return, adjustments for nonperformance and liquidity, and liquidation values. Management is required to use a significant degree of judgment when the valuation of investments includes unobservable inputs. The use of different assumptions could have a positive or negative effect on our consolidated financial condition or results of operations.

The fair values of our securities portfolio are also affected by changes in interest rates. When significant changes in interest rates occur, we evaluate our intent and ability to hold the security to maturity or for a sufficient time to recover our recorded investment balance.

If a determination is made that a debt security is other-than-temporarily impaired, the Company will estimate the amount of the unrealized loss that is attributable to credit and all other non-credit related factors. The credit related component will be recognized as an other-than-temporary impairment charge in non-interest income as a component of gain (loss) on securities, net. The non-credit related component will be recorded as an adjustment to accumulate other comprehensive income, net of tax.

Goodwill Impairment. Goodwill is presumed to have an indefinite useful life and is tested, at least annually, for impairment at the reporting unit level. Impairment exists when the carrying amount of goodwill exceeds its implied fair value. For purposes of our goodwill impairment testing, we have identified a single reporting unit.

In connection with our annual impairment assessment we applied the guidance in FASB Accounting Standards Update (“ASU”) 2011-08, Intangibles—Goodwill and Other (Topic 350): Testing Goodwill for Impairment, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit’s fair value is less than its carrying amount before applying the two-step goodwill impairment test.

Valuation of Mortgage Servicing Rights (MSR). The initial asset recognized for originated MSR is measured at fair value. The fair value of MSR is estimated by reference to current market values of similar loans sold with servicing released. MSR are amortized in proportion to and over the period of estimated net servicing income. We apply the amortization method for measurements of our MSR. MSR are assessed for impairment based on fair value at each reporting date. MSR impairment, if any, is recognized in a valuation allowance through charges to earnings as a component of fees and service charges. Subsequent increases in the fair value of impaired MSR are recognized only up to the amount of the previously recognized valuation allowance.

We assess impairment of our MSR based on the estimated fair value of those rights with any impairment recognized through a valuation allowance. The estimated fair value of the MSR is obtained through independent third party valuations through an analysis of future cash flows, incorporating estimates of assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, including the market's perception of future interest rate movements. The allowance is then adjusted in subsequent periods to reflect changes in the measurement of impairment. All assumptions are reviewed for reasonableness on a quarterly basis to ensure they reflect current and anticipated market conditions.

Table of Contents

The fair value of MSR is highly sensitive to changes in assumptions. Changes in prepayment speed assumptions generally have the most significant impact on the fair value of our MSR. Generally, as interest rates decline, mortgage loan prepayments accelerate due to increased refinance activity, which results in a decrease in the fair value of MSR. As interest rates rise, mortgage loan prepayments slow down, which results in an increase in the fair value of MSR. Thus, any measurement of the fair value of our MSR is limited by the conditions existing and the assumptions utilized as of a particular point in time, and those assumptions may not be appropriate if they are applied at a different point in time.

Core Deposit Premiums. Core deposit premiums represent the intangible value of depositor relationships assumed in purchase acquisitions and are amortized on an accelerated basis over 10 years. The Company periodically evaluates the value of core deposit premiums to ensure the carrying amount exceeds its implied fair value.

Stock-Based Compensation. We recognize the cost of employee services received in exchange for awards of equity instruments based on the grant-date fair value of those awards in accordance with ASC 718, "Compensation-Stock Compensation".

We estimate the per share fair value of option grants on the date of grant using the Black-Scholes option pricing model using assumptions for the expected dividend yield, expected stock price volatility, risk-free interest rate and expected option term. These assumptions are subjective in nature, involve uncertainties and, therefore, cannot be determined with precision. The Black-Scholes option pricing model also contains certain inherent limitations when applied to options that are not traded on public markets.

The per share fair value of options is highly sensitive to changes in assumptions. In general, the per share fair value of options will move in the same direction as changes in the expected stock price volatility, risk-free interest rate and expected option term, and in the opposite direction as changes in the expected dividend yield. For example, the per share fair value of options will generally increase as expected stock price volatility increases, risk-free interest rate increases, expected option term increases and expected dividend yield decreases. The use of different assumptions or different option pricing models could result in materially different per share fair values of options.

Investors Bancorp's fundamental business strategy is to be a well capitalized, full service, community bank which provides high quality customer service and competitively priced products and services to individuals and businesses in the communities we serve.

Executive Summary

Investors Bancorp's fundamental business strategy is to be a well capitalized, full service, community bank which provides high quality customer service and competitively priced products and services to individuals and businesses in the communities we serve.

Our results of operations depend primarily on net interest income, which is directly impacted by the market interest rate environment. Net interest income is the difference between the interest income we earn on our interest-earning assets, primarily mortgage loans and investment securities, and the interest we pay on our interest-bearing liabilities, primarily interest-bearing transaction accounts, time deposits, and borrowed funds. Net interest income is affected by the level of interest rates, the shape of the market yield curve, the timing of the placement and the re-pricing of interest-earning assets and interest-bearing liabilities on our balance sheet, and the prepayment rate on our mortgage-related assets.

The continued low interest rate environment has resulted in our earning assets being refinanced at lower yields and new assets being originated at lower yields. The Company has been able to partially offset the yield compression by lowering the interest rates on our interest bearing liabilities. The Company continues to actively manage its interest rate risk as the current interest rate environment is forecasted to remain at these low levels through year end 2013 and likely into 2014. As this low interest rate environment continues, the Company will be subject to net interest income compression if interest rates on interest bearing liabilities do not decrease as quickly as interest rates on our earning assets. The Company will continue to manage its interest rate risk.

Table of Contents

The Company's results of operations are also significantly affected by general economic conditions. The national and regional unemployment rates remain at elevated levels. This factor coupled with the weakness in the housing and real estate markets have resulted in the Company recognizing higher credit costs on the loan portfolio. Despite these conditions our overall level of non-performing loans remains low compared to our national and regional peers. We attribute this to our conservative underwriting standards, as well as our diligence in resolving our troubled loans. The Company continues to transform the mix of its balance sheet. Our loan portfolio continued to grow this quarter as net loans, including loans held for sale, increased by \$145 million or 1.4% since December 31, 2012. The loan growth continues to be predominately in the commercial and multi-family portfolios which for the first time comprise over 50% of our loan portfolio. We continue to transform our primary source of funding as well as core deposits increased to 67.1% of total deposits, which totaled \$8.8 billion at March 31, 2013.

We continue to actively look for opportunities to enhance shareholder value. In December 2012, the Company announced its pending acquisition of Roma Financial Corporation with approximately \$1.8 billion in assets, \$1.5 billion in deposits and 26 full service branches in southern New Jersey. In April 2013, the Company announced the pending acquisition of Gateway Community Financial Corp with approximately \$310 million in assets, \$280 million in deposits, and 4 full service branches which compliment the Roma franchise. When these acquisitions are completed, Investors will emerge with the largest market share of any New Jersey- headquartered banks. It will also expand our footprint into the greater Philadelphia market and allow us to enhance the lending relationships we already have in those markets. In addition to our acquisition strategy, the Company announced a \$0.05 dividend to shareholders which is payable in May.

Comparison of Financial Condition at March 31, 2013 and December 31, 2012

Total Assets. Total assets increased by \$118.2 million, or 0.9%, to \$12.84 billion at March 31, 2013 from \$12.72 billion at December 31, 2012. This increase was largely the result of net loans, including loans held for sale, increasing \$145.0 million to \$10.48 billion at March 31, 2013 from \$10.34 billion at December 31, 2012 offset by a decrease in cash of \$35.4 million to \$119.7 million at March 31, 2013 from \$155.2 million at December 31, 2012.

Net Loans. Net loans, including loans held for sale, increased by \$145.0 million, or 1.4%, to \$10.48 billion at March 31, 2013 from \$10.34 billion at December 31, 2012. At March 31, 2013, total loans were \$10.60 billion and included \$4.86 billion in residential loans, \$3.10 billion in multi-family loans, \$2.01 billion in commercial real estate loans, \$230.7 million in construction loans, \$228.2 million in consumer and other loans and \$174.6 million in commercial and industrial loans. For the three months ended March 31, 2013, we originated \$227.3 million in multi-family loans, \$129.6 million in commercial real estate loans, \$9.0 million in commercial and industrial loans, \$17.7 million in consumer and other loans and \$16.0 million in construction loans. This increase in loans reflects our continued focus on generating multi-family and commercial real estate loans, which was partially offset by pay downs and payoffs of loans. The loans we originate and purchase are on properties located primarily in New Jersey and New York.

We originate residential mortgage loans through our mortgage subsidiary, Investors Home Mortgage Co. For the three months ended March 31, 2013, Investors Home Mortgage Co. originated \$419.2 million in residential mortgage loans of which \$141.6 million were for sale to third party investors and \$277.6 million were added to our portfolio. We also purchased mortgage loans from correspondent entities including other banks and mortgage bankers. Our agreements with these correspondent entities require them to originate loans that adhere to our underwriting standards. During the three months ended March 31, 2013, we purchased loans totaling \$202.9 million from these entities.

The Company also originates interest-only one- to four-family mortgage loans in which the borrower makes only interest payments for the first five, seven or ten years of the mortgage loan term. This feature will result in future increases in the borrower's loan repayment when the contractually required repayments increase due to the required amortization of the principal amount. These payment increases could affect the borrower's ability to repay the loan. The amount of interest-only one- to four-family mortgage loans at March 31, 2013 was \$368.8 million compared to \$384.0 million at December 31, 2012. The ability of borrowers to repay their obligations are dependent upon various factors including the borrowers' income and net worth, cash flows generated by the underlying collateral, value of the underlying collateral and priority of the Company's lien on the property. Such factors are dependent upon

various economic conditions and individual circumstances beyond the Company's control. The Company is, therefore, subject to risk of loss. The Company maintains stricter underwriting criteria for these interest-only loans than it does for its amortizing loans. The Company believes these criteria adequately reduce the potential exposure to such risks and that adequate provisions for loan losses are provided for all known and inherent risks.

Table of Contents

Our past due loans and non-accrual loans discussed below exclude certain purchased credit impaired (PCI) loans, primarily consisting of loans recorded in the acquisition of Marathon. Under U.S. GAAP, the PCI loans (acquired at a discount that is due, in part, to credit quality) are not subject to delinquency classification in the same manner as loans originated by Investors. The following table sets forth non-accrual loans and accruing past due loans (excluding PCI loans of \$2.6 million) on the dates indicated as well as certain asset quality ratios.

	March 31, 2013		December 31, 2012		September 30, 2012		June 30, 2012		March 31, 2012	
	# of Loans	Amount	# of Loans	Amount	# of Loans	Amount	# of Loans	Amount	# of Loans	Amount
	(Dollars in millions)									
Residential and consumer	328	\$84.1	354	\$82.5	335	\$81.2	328	\$81.7	328	\$86.1
Construction	9	24.1	9	25.8	9	26.6	15	51.4	16	57.2
Multi-family	7	14.5	5	11.1	6	12.0	6	13.3	4	6.2
Commercial	6	10.2	4	0.8	1	0.8	1	1.2	2	0.4
Commercial and industrial	6	2.8	2	0.4	1	0.1	2	0.8	—	—
Total non-accrual loans	356	\$135.7	374	\$120.6	352	\$120.7	352	\$148.4	350	\$149.9
Accruing troubled debt restructured loans	18	\$9.0	22	\$15.8	18	\$14.8	17	\$8.9	15	\$8.4
Non-accrual loans to total loans		1.28 %		1.16 %		1.28 %		1.60 %		1.64 %
Allowance for loan loss as a percent of non-performing loans		110.21 %		117.92 %		108.79 %		86.58 %		82.53 %
Allowance for loan loss as a percent of total loans		1.41 %		1.36 %		1.39 %		1.38 %		1.35 %

Total non-accrual loans increased \$15.1 million to \$135.7 million at March 31, 2013 compared to \$120.6 million at December 31, 2012. We will continue to diligently resolve our troubled loans. Our allowance for loan loss as a percent of total loans is 1.41%. At March 31, 2013, there were \$40.8 million of loans deemed trouble debt restructuring, of which \$9.0 million were accruing and \$31.8 million were on non-accrual.

In addition to non-accrual loans we continue to monitor our portfolio for potential problem loans. Potential problem loans are defined as loans about which we have concerns as to the ability of the borrower to comply with the present loan repayment terms and which may cause the loan to be placed on non-accrual status. As of March 31, 2013, there were 4 multi-family loans totaling \$5.1 million, 2 commercial real estate loans for \$884,000, and 6 commercial and industrial loan totaling \$1.8 million that the Company has deemed as potential problem loans. Management is actively monitoring these loans.

The ratio of non-accrual loans to total loans was 1.28% at March 31, 2013 compared to 1.16% at December 31, 2012. The allowance for loan losses as a percentage of non-accrual loans was 110.21% at March 31, 2013 compared to 117.92% at December 31, 2012. At March 31, 2013, our allowance for loan losses as a percentage of total loans was 1.41% compared to 1.36% at December 31, 2012.

At March 31, 2013, loans meeting the Company's definition of an impaired loan were primarily collateral-dependent loans and totaled \$66.5 million of which \$13.5 million of impaired loans had a specific allowance for credit losses of \$2.1 million and \$53.0 million of impaired loans had no specific allowance for credit losses. At December 31, 2012, loans meeting the Company's definition of an impaired loan were primarily collateral dependent and totaled \$57.4 million, of which \$10.8 million of impaired loans had a related allowance for credit losses of \$2.1 million and \$46.6 million of impaired loans had no related allowance for credit losses.

Table of Contents

At March 31, 2013, there were 12 commercial loans totaling \$25.7 million and 44 residential loans totaling \$15.1 million which are deemed troubled debt restructurings. At March 31, 2013, there were 10 of the commercial loans totaling \$23.2 million and 28 of the residential loan totaling \$8.6 million included in non-accrual loans.

The following table sets forth the allowance for loan losses at March 31, 2013 and December 31, 2012 allocated by loan category and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

	March 31, 2013		December 31, 2012		
	Allowance for Loan Losses	Percent of Loans in Each Category to Total Loans	Allowance for Loan Losses	Percent of Loans in Each Category to Total Loans	
	(Dollars in thousands)				
End of period allocated to:					
Residential mortgage loans	\$49,624	45.84	% \$45,369	46.35	%
Multi-family	28,842	29.25	% 29,853	28.70	%
Commercial real estate	38,838	18.93	% 33,347	18.89	%
Construction loans	12,686	2.18	% 16,062	2.15	%
Commercial and industrial	4,221	1.65	% 4,094	1.62	%
Consumer and other loans	1,893	2.15	% 2,086	2.29	%
Unallocated	13,535	—	11,361	—	
Total allowance	\$149,639	100.00	% \$142,172	100.00	%

The allowance for loan losses increased by \$7.4 million to \$149.6 million at March 31, 2013 from \$142.2 million at December 31, 2012. The increase in our allowance for loan losses is due to the growth of the loan portfolio and the increased credit risk in our overall portfolio, particularly the inherent credit risk associated with commercial real estate lending. Future increases in the allowance for loan losses may be necessary based on the growth and composition of the loan portfolio, the level of loan delinquency and the impact of the deterioration of the real estate and economic environments in our lending area.

Future increases in the allowance for loan losses may be necessary based on the growth of the loan portfolio, the change in composition of the loan portfolio, possible future increases in non-performing loans and charge-offs, and the possible continuation of the current adverse economic environment. Although we use the best information available, the level of allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. See "Critical Accounting Policies."

Securities. Securities, in the aggregate, increased by \$5.6 million, or 0.4%, to \$1.57 billion at March 31, 2013. The increase in the portfolio was primarily due to the purchase of agency issued mortgage backed securities partially offset by sales, normal pay downs or maturities during the three months March 31, 2013.

Goodwill, Stock in the Federal Home Loan Bank, Bank Owned Life Insurance. At March 31, 2013, goodwill was \$77.1 million. The amount of stock we own in the Federal Home Loan Bank (FHLB) decreased by \$589,000 or 0.4% from \$150.5 million at December 31, 2012 to \$149.9 million at March 31, 2013. Bank owned life insurance was \$114.7 million at March 31, 2013 compared to \$113.9 million at December 31, 2012.

Deposits. Deposits increased by \$5.5 million from December 31, 2012 or 0.1% to \$8.77 billion at March 31, 2013. This increase was attributed to an increase in core deposits of \$86.6 million or 1.5%, partially offset by a \$81.1 million decrease in certificates of deposit. Core deposits now represent 67.1% of our total deposit portfolio.

Borrowed Funds. Borrowed funds increased \$86.5 million, or 3.2%, to \$2.79 billion at March 31, 2013 from \$2.71 billion at December 31, 2012 due to the funding of our asset growth.

Stockholders' Equity. Stockholders' equity increased \$19.9 million to \$1.09 billion at March 31, 2013 from \$1.07 billion at December 31, 2012. The increase is primarily attributed to the \$27.2 million of net income for the three

months ended March 31, 2013 offset by a \$2.1 million increase to other comprehensive loss. Stockholders' equity was also impacted by the declaration of a cash dividend of \$0.05 per common share that resulted in a decrease of \$5.6 million.

Table of Contents

Average Balance Sheets for the Three Months ended March 31, 2013 and 2012

The following tables present certain information regarding Investors Bancorp, Inc.'s financial condition and net interest income for the three months ended March 31, 2013 and 2012. The tables present the annualized average yield on interest-earning assets and the annualized average cost of interest-bearing liabilities. We derived the yields and costs by dividing annualized income or expense by the average balance of interest-earning assets and interest-bearing liabilities, respectively, for the periods shown. We derived average balances from daily balances over the periods indicated. Interest income includes fees that we consider adjustments to yields.

Total liabilities and stockholders' equity	\$ 12,712,692			\$ 11,020,813		
Net interest income		\$ 102,041			\$ 87,731	
Net interest rate spread(2)			3.23 %			3.18 %
Net interest-earning assets(3)	\$ 1,538,820			\$ 1,116,701		
Net interest margin(4)			3.36 %			3.33 %
Ratio of interest-earning assets to total interest-bearing liabilities	1.14	X		1.12	X	

(1) Securities available-for-sale are stated at amortized cost, adjusted for unamortized purchased premiums and discounts.

(2) Net interest rate spread represents the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities.

(3) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average total interest-earning assets.

Table of Contents

Comparison of Operating Results for the Three Months Ended March 31, 2013 and 2012

Net Income. The net income for the three months ended March 31, 2013 was \$27.2 million compared to \$18.9 million for the three months ended March 31, 2012.

Net Interest Income. Net interest income increased by \$14.3 million, or 16.3%, to \$102.0 million for the three months ended March 31, 2013 from \$87.7 million for the three months ended March 31, 2012. The increase was primarily due to the average balance of interest earning assets increasing \$1.61 billion to \$12.16 billion at March 31, 2013 compared to \$10.55 billion at March 31, 2012, as well as a 39 basis point decrease in our cost of interest-bearing liabilities to 1.03% for the three months ended March 31, 2013 from 1.42% for the three months ended March 31, 2012. These were partially offset by the average balance of our interest bearing liabilities increasing \$1.19 billion to \$10.62 billion at March 31, 2013 compared to \$9.43 billion at March 31, 2012, as well as the yield on our interest-earning assets decreasing 34 basis points to 4.26% for the three months ended March 31, 2013 from 4.60% for the three months ended March 31, 2012. While the yield on our interest earning assets declined due to the lower interest rate environment, our cost of funds also continued to fall resulting in our net interest spread increasing by 5 basis points to 3.23% for the three months ended March 31, 2013 from 3.18% for the three months ended March 31, 2012.

Interest and Dividend Income. Total interest and dividend income increased by \$8.2 million, or 6.8%, to \$129.4 million for the three months ended March 31, 2013 from \$121.2 million for the three months ended March 31, 2012. This increase is attributed to the average balance of interest-earning assets increasing \$1.61 billion or 15.3%, to \$12.16 billion for the three months ended March 31, 2013 from \$10.55 billion for the three months ended March 31, 2012 due to organic growth and acquisitions. This was partially offset by the weighted average yield on interest-earning assets decreasing 34 basis points to 4.26% for the three months ended March 31, 2013 compared to 4.60% for the three months ended March 31, 2012.

Interest income on loans increased by \$9.6 million, or 8.7%, to \$119.9 million for the three months ended March 31, 2013 from \$110.3 million for the three months ended March 31, 2012, reflecting a \$1.45 billion or 16.2%, increase in the average balance of net loans to \$10.36 billion for the three months ended March 31, 2013 from \$8.92 billion for the three months ended March 31, 2012. The increase is primarily attributed to the average balance of multi-family loans and commercial real estate loans increasing \$1.18 billion and \$552.8 million, respectively as we continue to focus on diversifying our loan portfolio by adding more multi-family loans and commercial real estate loans. This was partially offset by the decrease in the average balance of residential loans and construction loans of \$250.1 million and \$41.8 million, respectively for the three months ended March 31, 2013. The increase also reflects \$3.1 million in loan prepayment fees recorded in interest income for the three months ended March 31, 2013 compared to \$1.1 million for the three months ended March 31, 2012. The increase was partially offset by a 32 basis point decrease in the average yield on net loans to 4.63% for the three months ended March 31, 2013 from 4.95% for the three months ended March 31, 2012, as lower rates on new and refinanced loans reflect the current interest rate environment.

Interest income on all other interest-earning assets, excluding loans, decreased by \$1.4 million or 12.7%, to \$9.6 million for the three months ended March 31, 2013 from \$11.0 million for the three months ended March 31, 2012. The decrease is attributed to the weighted average yield on interest-earning assets, excluding loans, decreasing by 55 basis points to 2.13% for the three months ended March 31, 2013 compared to 2.68% for the three months ended March 31, 2012 reflecting the lower interest rate environment. This was partially offset by a \$164.4 million increase in the average balance of all other interest-earning assets, excluding loans, to \$1.80 billion for the three months ended March 31, 2013 from \$1.63 billion for the three months ended March 31, 2012.

Interest Expense. Total interest expense decreased by \$6.1 million, or 18.2%, to \$27.4 million for the three months ended March 31, 2013 from \$33.5 million for the three months ended March 31, 2012. This decrease is attributed to the weighted average cost of total interest-bearing liabilities decreasing 39 basis points to 1.03% for the three months ended March 31, 2013 compared to 1.42% for the three months ended March 31, 2012. This was partially offset by the average balance of total interest-bearing liabilities increasing by \$1.19 billion, or 12.6%, to \$10.62 billion for the three months ended March 31, 2013 from \$9.43 billion for the three months ended March 31, 2012.

Interest expense on interest-bearing deposits decreased \$5.6 million, or 30.8% to \$12.7 million for the three months ended March 31, 2013 from \$18.3 million for the three months ended March 31, 2012. This decrease is attributed to a 36 basis point decrease in the average cost of interest-bearing deposits to 0.63% for the three months ended March 31, 2013 from 0.99% for the three months ended March 31, 2012 as deposit rates reflect the lower interest rate environment. This was partially offset by the average balance of total interest-bearing deposits increasing \$622.6 million, or 8.5% to \$7.99 billion for the three months ended March 31, 2013 from \$7.37 billion for the three months ended March 31, 2012. Core deposit accounts- savings, checking and money market- outpaced average total interest-bearing deposit growth as average core deposits increased \$1.10 billion over the past year.

Table of Contents

Interest expense on borrowed funds decreased by \$447,000 or 3.0%, to \$14.7 million for the three months ended March 31, 2013 from \$15.2 million for the three months ended March 31, 2012. This decrease is attributed to the average cost of borrowed funds decreasing 70 basis points to 2.24% for the three months ended March 31, 2013 from 2.94% for the three months ended March 31, 2012 as recent borrowings were priced at current interest rates. This was partially offset by the average balance of borrowed funds increasing by \$568.0 million or 27.5%, to \$2.63 billion for the three months ended March 31, 2013 from \$2.06 billion for the three months ended March 31, 2012.

Provision for Loan Losses. Our provision for loan losses was \$13.8 million for the three months ended March 31, 2013 compared to \$13.0 million for the three months ended March 31, 2012. For the three months ended March 31, 2013, net charge-offs were \$6.3 million compared to \$6.7 million for the three months ended March 31, 2012. Our provision for the three months ended March 31, 2013 is a result of continued growth in the loan portfolio, specifically the multi-family and commercial real estate portfolios; the inherent credit risk in our overall portfolio, particularly the credit risk associated with commercial real estate lending; the level of non-performing loans and delinquent loans caused by the adverse economic and real estate conditions in our lending area. See discussion of the allowance for loan losses and non-accrual loans in “Comparison of Financial Condition at March 31, 2013 and March 31, 2012.”

Non-Interest Income. Total non-interest income decreased by \$265,000, or 2.6% to \$10.1 million for the three months ended March 31, 2013 from \$10.4 million for the three months ended March 31, 2012. The decrease is primarily attributed to the gain on the sale of loans decreasing \$815,000 to \$3.1 million for the three months ended March 31, 2013 as more of the originations from our Mortgage Company were maintained in portfolio versus sold to third parties, as well as a decrease of \$565,000 in fees and service charges. These decreases were offset by an increase of \$726,000 on gains from securities sold during the quarter and \$456,000 in additional income from non-deposit investment products.

Non-Interest Expenses. Total non-interest expenses increased by \$1.7 million, or 3.1%, to \$56.1 million for the three months ended March 31, 2013 from \$54.5 million for the three months ended March 31, 2012. Compensation and fringe benefits increased \$3.4 million primarily as a result of the staff additions to support our continued growth including employees from the acquisition of Marathon Bank, a federally chartered bank with 13 full-service branches in the New York metropolitan area which was completed in the fourth quarter of 2012, as well as normal merit increases. Occupancy expenses, professional fees and data processing expenses decreased \$904,000, \$1.7 million and \$1.2 million, respectively, for the three months ended March 31, 2013. The three months ended March 31, 2012 reflects costs of \$6.0 million associated with the Brooklyn Federal acquisition. In addition, our FDIC insurance premium increased \$1.7 million as the FDIC reclassified Investors Bank as a large institution which increased our assessment rate.

Income Tax Expense. Income tax expense was \$15.1 million for the three months ended March 31, 2013, representing a 35.90% effective tax rate compared to income tax expense of \$11.7 million for the three months ended March 31, 2012 representing a 38.19% effective tax rate.

Liquidity and Capital Resources

The Company’s primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from the sale of loans, Federal Home Loan Bank (“FHLB”) and other borrowings and, to a lesser extent, investment maturities. While scheduled amortization of loans is a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition. The Company has other sources of liquidity if a need for additional funds arises, including unsecured overnight lines of credit and other borrowings from the FHLB and other correspondent banks.

At March 31, 2013, the Company had overnight borrowings outstanding with FHLB of \$361.0 million compared to \$373.5 million at December 31, 2012. The Company utilizes overnight borrowings from time to time to fund short-term liquidity needs. The Company had total borrowings of \$2.79 billion at March 31, 2013, an increase from \$2.70 billion at December 31, 2012.

In the normal course of business, the Company routinely enters into various commitments, primarily relating to the origination of loans. At March 31, 2013, outstanding commitments to originate loans totaled \$809.4 million; outstanding unused lines of credit totaled \$490.4 million; standby letters of credit totaled \$14.6 million and outstanding commitments to sell loans totaled \$49.6 million. The Company expects to have sufficient funds available

to meet current commitments in the normal course of business. Time deposits scheduled to mature in one year or less totaled \$1.62 billion at March 31, 2013. Based upon historical experience management estimates that a significant portion of such deposits will remain with the Company.

The Board of Directors approved a fourth share repurchase program at their January 2011 meeting, which authorizes the repurchase of an additional 10% of the Company's outstanding common stock. The fourth share repurchase program commenced immediately upon completion of the third program. Under this program, up to 10% of its publicly-held outstanding shares of

Table of Contents

common stock, or 3,876,523 shares of Investors Bancorp, Inc. common stock may be purchased in the open market and through other privately negotiated transactions in accordance with applicable federal securities laws. During the three month period ended March 31, 2013, the Company did not repurchase any shares of its common stock. Under the current share repurchase program, 2,111,597 shares remain available for repurchase. At March 31, 2013, a total of 16,652,720 shares have been purchased under Board authorized share repurchase programs, of which 3,412,701 shares were allocated to fund the restricted stock portion of the Company's 2006 Equity Incentive Plan. The remaining shares are held for general corporate use.

As of March 31, 2013, the Bank exceeded all regulatory capital requirements as follows:

	March 31, 2013		Required Amount	Ratio	
	Actual Amount (Dollars in thousands)	Ratio			
Total capital (to risk-weighted assets)	\$1,049,305	11.36	% 738,917	8.00	%
Tier I capital (to risk-weighted assets)	933,427	10.11	369,459	4.00	
Tier I capital (to average assets)	933,427	7.41	503,816	4.00	

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in the financial statements. These transactions primarily relate to debt obligations and lending commitments.

The following table shows the contractual obligations of the Company by expected payment period as of March 31, 2013:

Contractual Obligations	Total	Less than One Year	One-Two Years	Two-Three Years	More than Three Years
	(in thousands)				
Debt obligations (excluding capitalized leases)	\$2,792,139	983,000	179,000	325,000	1,305,139
Commitments to originate and purchase loans	\$809,405	809,405	—	—	—
Commitments to sell loans	\$49,563	49,563	—	—	—

Debt obligations include borrowings from the FHLB and other borrowings. The borrowings have defined terms and, under certain circumstances, \$130.1 million of the borrowings are callable at the option of the lender.

Additionally, at March 31, 2013, the Company's commitments to fund unused lines of credit totaled \$490.4 million. Commitments to originate loans and commitments to fund unused lines of credit are agreements to lend additional funds to customers as long as there have been no violations of any of the conditions established in the agreements.

Commitments generally have a fixed expiration or other termination clauses which may or may not require a payment of a fee. Since some of these loan commitments are expected to expire without being drawn upon, total commitments do not necessarily represent future cash requirements.

In addition to the contractual obligations previously discussed, we have other liabilities which includes capitalized and operating lease obligations. These contractual obligations as of March 31, 2013, have not changed significantly from December 31, 2012.

In the normal course of business the Company sells residential mortgage loans to third parties. These loan sales are subject to customary representations and warranties. In the event that we are found to be in breach of these representations and warranties, we may be obligated to repurchase certain of these loans.

For further information regarding our off-balance sheet arrangements and contractual obligations, see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in our December 31, 2012 Annual Report on Form 10-K.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Qualitative Analysis. We believe one significant form of market risk is interest rate risk. Interest rate risk results from timing differences in the maturity or re-pricing of our assets, liabilities and off-balance sheet contracts (i.e., loan commitments); the effect of loan prepayments, deposits and withdrawals; the difference in the behavior of lending and funding rates arising from the uses of different indices; and “yield curve risk” arising from changing interest rate relationships across the spectrum of maturities for constant or variable credit risk investments. Besides directly affecting our net interest income, changes in market interest rates can also affect the amount of new loan originations, the ability of borrowers to repay variable rate loans, the volume of loan prepayments and refinancings, the carrying value of securities classified as available for sale and the mix and flow of deposits.

The general objective of our interest rate risk management is to determine the appropriate level of risk given our business model and then manage that risk in a manner consistent with our policy to reduce, to the extent possible, the exposure of our net interest income to changes in market interest rates. Our Asset Liability Committee, which consists of senior management, evaluates the interest rate risk inherent in certain assets and liabilities, our operating environment and capital and liquidity requirements and modifies our lending, investing and deposit gathering strategies accordingly. On a quarterly basis, our Board of Directors reviews the Asset Liability Committee report, the aforementioned activities and strategies, the estimated effect of those strategies on our net interest margin and the estimated effect that changes in market interest rates may have on the economic value of our loan and securities portfolios, as well as the intrinsic value of our deposits and borrowings.

We actively evaluate interest rate risk in connection with our lending, investing and deposit activities. Historically, our lending activities have emphasized one- to four-family fixed- and variable- rate first mortgages. Our variable-rate mortgage related assets have helped to reduce our exposure to interest rate fluctuations and is expected to benefit our long-term profitability, as the rate earned in the mortgage loans will increase as prevailing market rates increase. However, the current interest rate environment, and the preferences of our customers, has resulted in more of a demand for fixed-rate products. This may adversely impact our net interest income, particularly in a rising rate environment. To help manage our interest rate risk, we have increased our focus on the origination of commercial real estate mortgage loans, particularly multi-family loans, as these loan types may reduce our interest rate risk due to their shorter repricing term compared to fixed rate residential mortgage loans. In addition, we primarily invest in shorter-to-medium duration securities, which generally have shorter average lives and lower yields compared to longer term securities. Shortening the average lives of our securities, along with originating more adjustable-rate mortgages and commercial real estate mortgages, will help to reduce interest rate risk.

We retain an independent, nationally recognized consulting firm who specializes in asset and liability management to complete our quarterly interest rate risk reports. We also retain a second nationally recognized consulting firm to prepare independently comparable interest rate risk reports for the purpose of validation. Both firms use a combination of analyses to monitor our exposure to changes in interest rates. The economic value of equity analysis is a model that estimates the change in net portfolio value (“NPV”) over a range of immediately changed interest rate scenarios. NPV is the discounted present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. In calculating changes in NPV, assumptions estimating loan prepayment rates, reinvestment rates and deposit decay rates that seem most likely based on historical experience during prior interest rate changes are used.

The net interest income analysis uses data derived from an asset and liability analysis, described below, and applies several additional elements, including actual interest rate indices and margins, contractual limitations and the U.S. Treasury yield curve as of the balance sheet date. In addition we apply consistent parallel yield curve shifts (in both directions) to determine possible changes in net interest income if the theoretical yield curve shifts occurred gradually. Net interest income analysis also adjusts the asset and liability repricing analysis based on changes in prepayment rates resulting from the parallel yield curve shifts.

Our asset and liability analysis determines the relative balance between the repricing of assets and liabilities over multiple periods of time (ranging from overnight to five years). This asset and liability analysis includes expected cash flows from loans and mortgage-backed securities, applying prepayment rates based on the differential between the current interest rate and the market interest rate for each loan and security type. This analysis identifies mismatches in

the timing of asset and liability but does not necessarily provide an accurate indicator of interest rate risk because the assumptions used in the analysis may not reflect the actual response to market changes.

Table of Contents

Quantitative Analysis. The table below sets forth, as of March 31, 2013, the estimated changes in our NPV and our net interest income that would result from the designated changes in interest rates. Such changes to interest rates are calculated as an immediate and permanent change for the purposes of computing NPV and a gradual change over a one year period for the purposes of computing net interest income. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied upon as indicative of actual results. We did not estimate changes in NPV or net interest income for an interest rate decrease of greater than 100 basis points or increase of greater than 200 basis points.

Change in Interest Rates (basis points)(1)	Net Portfolio Value(2)			Net Interest Income		
	Estimated NPV	Increase (Decrease) in Estimated Net Interest Income		Estimated Net Interest Income(3)	Increase (Decrease) in Estimated Net Interest Income	
		Amount	Percent		Amount	Percent
	(Dollars in thousands)					
+ 200bp	\$669,509	(195,032)	(22.6)%	\$357,168	(29,098)	(7.5)%
0bp	\$864,541	—	—	\$386,266	—	—
-100bp	\$759,708	(104,833)	(12.1)%	\$390,972	4,706	1.2 %

(1) Assumes an instantaneous and parallel shift in interest rates at all maturities.

(2) NPV is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts.

(3) Assumes a gradual change in interest rates over a one year period at all maturities.

The table set forth above indicates at March 31, 2013, in the event of a 200 basis points increase in interest rates, we would be expected to experience a 22.6% decrease in NPV and a \$29.1 million, or 7.5%, decrease in net interest income. In the event of a 100 basis points decrease in interest rates, we would be expected to experience a 12.1% decrease in NPV and a \$4.7 million, or 1.2%, increase in net interest income. These data do not reflect any future actions we may take in response to changes in interest rates, such as changing the mix of our assets and liabilities, which could change the results of the NPV and net interest income calculations.

As mentioned above, we retain two nationally recognized firms to compute our quarterly interest rate risk reports. Certain shortcomings are inherent in any methodology used in the above interest rate risk measurements. Modeling changes in NPV and net interest income require certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. The NPV and net interest income table presented above assumes the composition of our interest-rate sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and, accordingly, the data do not reflect any actions we may take in response to changes in interest rates. The table also assumes a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or the repricing characteristics of specific assets and liabilities. Accordingly, although the NPV and net interest income table provide an indication of our sensitivity to interest rate changes at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effects of changes in market interest rates on our NPV and net interest income.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective. There were no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over

financial reporting.

PART II OTHER INFORMATION

Table of Contents

Item 1. Legal Proceedings

On April 25, 2013, Investors Bancorp, Inc. (“Investors Bancorp”) and Roma Financial Corporation (“Roma Financial”) entered into a Memorandum of Understanding (the “MOU”) with plaintiffs regarding the settlement of a putative class action captioned Joseph T. Zalescik v. Peter Inverso, Michele Siekerka, Alfred DeBlasio, Jr., Thomas Bracken, Robert Albanese, William Walsh, Jr., Dennis Bone, Robert Rosen, Jeffrey Taylor, Roma Financial Corporation, Roma Financial Corporation, MHC, Roma Bank, Investors Bancorp, Inc., Investors Bancorp MHC, and Investors Bank, pending before the Superior Court of the State of New Jersey, Chancery Division, Mercer County (the “Action”). As described in the Joint Proxy Statement/Prospectus of Investors Bancorp and Roma Financial, dated April 26, 2013 (the “Joint Proxy Statement”), regarding the proposed merger (the “Merger”) of Roma Bank with and into Investors Bank, Roma Financial within and into Investors Bancorp and Roma Financial Corporation, MHC with and into Investors Bancorp, MHC, the Action relates to the Agreement and Plan of Merger, dated as of December 19, 2012 by and among (i) Investors Bank, Investors Bancorp, Inc. and Investors Bancorp, MHC, and (ii) Roma Bank, Roma Financial Corporation and Roma Financial Corporation, MHC. Pursuant to the MOU, Roma Financial and Investors Bancorp agreed to make available additional information to Roma Financial and Investors Bancorp stockholders. The additional information is contained in the Joint Proxy Statement.

Investors Bancorp, Roma Financial and the other defendants deny all of the allegations in the Action and believe the disclosure in the Registration Statement on Form S-4, filed on March 19, 2013, was adequate under the law.

Nevertheless, Investors Bancorp, Roma Financial and the other defendants have agreed to settle the Action in order to avoid the costs, disruption and distraction of further litigation.

In addition, the Company and its subsidiaries are subject to various legal actions arising in the normal course of business. In the opinion of management, the resolution of these legal actions is not expected to have a material adverse effect on the Company’s financial condition or results of operations.

Item 1A. Risk Factors

There have been no material changes in the “Risk Factors” disclosed in the Company’s December 31, 2012 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table reports information regarding repurchases of our common stock during the quarter ended March 31, 2013 and the stock repurchase plans approved by our Board of Directors.

Period	Total Number of Shares Purchased(1)	Average Price paid Per Share	As part of Publicly Announced Plans or Programs	Yet Be Purchased Under the Plans or Programs
January 1, 2013 through January 31, 2013	46,331	\$17.91	\$ 829,872	2,141,929
February 1, 2013 through February 28, 2013	30,332	17.99	545,672	2,111,597
March 1, 2013 through March 31, 2013	—	—	—	2,111,597
Total	76,663	17.94	\$ 1,375,544	

On March 1, 2011, the Company announced its fourth Share Repurchase Program, which authorized the purchase of an additional 10% of its publicly-held outstanding shares of common stock, or 3,876,523 million shares. This stock repurchase program commenced upon the completion of the third program on July 25, 2011. This program has no expiration date and has 2,111,597 shares yet to be purchased as of March 31, 2013.
