According to the notification from the National Development and Reform Commission regarding adjustment of on-grid tariffs for power generation enterprises, the State has decided that with the view to implementing the Notice from the National Development and Reform Commission Regarding Adjusting Surcharge Standards on Renewable Energy Tariffs and Environmental Protection Related Tariffs, appropriate adjustment to the on-grid tariffs of coal-fired generating units should be made while maintaining the electricity sales price unchanged. In practice,

---

the on-grid tariffs for coal-fired generating units that have met the denitrification requirements to the satisfaction of environmental protection authorities will be raised by RMB0.01/kWh if the generating units have not benefited from the denitrification tariffs subsidy, or RMB0.002/kWh if the generating units have received a subsidy of RMB0.008/kWh. For coal-fired generating units that have met the de-dusting requirements to the satisfaction of environmental protection authorities, the on-grid tariffs will be raised by RMB0.002/kWh to compensate de-dusting costs.

The above mentioned adjustment on tariffs has been effective as of September 25, 2013. After the on-grid tariffs adjustment, the average on-grid tariffs of the Company is expected to decrease by RMB12.59/MWh based on the weighted average on-grid tariffs for the Company's generating capacity affected by this adjustment (such de-dusting tariffs subsidy of RMB0.002/kWh is not included in the tariffs adjustment set forth above as the generating units which have met de-dusting requirements are still under confirmation).

For details, please refer to the Company's announcement on on-grid tariffs adjustment published on the Shanghai Stock Exchange, China Securities Journal and Shanghai Securities News on 16 October 2013.
