<sup>2</sup> This report contains pro forma figures for the fourth quarter of 2006 as if the acquisition of Banagricola had taken place on June 30, 2006. All references to numbers for periods prior to third quarter of 2007 were derived from such pro forma consolidated financial statements and are used herein for the purpose of comparison. Some assumptions were needed in order to complete the pro forma figures, the purchase transaction was simulated applying the same multiples, used on the acquisition, to the numbers that BANAGRICOLA had at that time and an issuance of subordinated bonds and preferred shares were simulated keeping a similar participation on the bank's funding as they did in June 30 2007.

**2. CONSOLIDATED BALANCE SHEET****2.1. Assets**

Corporate loans amounted to Ps. 18,244 billion as of December 31, 2007, increasing 2.1% as compared to the previous quarter. This represents an increase of 15.7% as compared to pro forma Ps. 15,768 billion at December 31, 2006. Corporate loans represent 48.4% of BANCOLOMBIA's loan portfolio.

Retail and small and medium-sized enterprise (SME) loans amounted to Ps. 11,876 billion as of December 31, 2007. They increased 16.2% as compared to the previous quarter and 40.8% over the year, driven by the increase on

Colombian household demand and its direct effect on credit appetite. Retail and SME s loans represent 31.5% of the loan portfolio.

Financial leases amounted to Ps. 4,699 billion, increasing 8.4% as compared to the previous quarter and 32.2% over the year. Financial leases represent 12.5% of the loan portfolio.

Mortgage loans amounted Ps. 2,884 billion, representing 7.6% of the loan portfolio. In 2007 BANCOLOMBIA securitized approximately Ps. 729 billion of its mortgage loans, of which Ps. 439 billion were securitized on the fourth quarter. After taking into account the securitizations presented on the quarter and the year, mortgage loans origination increased 5.4% as compared to the previous quarter and 25.3% over the year.

### 2.1.2. Investment Portfolio

As of December 31, 2007, BANCOLOMBIA S net investment securities amounted to Ps. 5,774 billion, representing an increase of 8.3% when compared to September 30, 2007, and a decrease of 19.3% when compared to the pro forma figures as of December 31, 2006.

As of December 31, 2007, investments in debt securities represented 96.9% of BANCOLOMBIA s net investment securities, which amounted to Ps. 5,596 billion (10.7% of total assets) at the end of the fourth quarter. This represents an increase of 8.2% when compared to September 30, 2007, when such investments amounted to Ps. 5,174 billion (10.6% of total assets), and a decrease of 20.1% as compared to the pro forma figures as of December 31, 2006, when such investments amounted to Ps. 7,004 billion (16.2% of total assets). The quarter over quarter change was mainly due to the increase of 29.3% in Colombian mortgage backed securities TIPS as a result of the repurchase of a portion of the mortgages securitized by the Bank on the same period. On a year over year basis, debt investments decreased as a continuation of the asset reallocation that began during 2006 driven by the loan growth dynamic and the decreasing bond prices environment.

TIPS is the name given to the mortgage backed securities in Colombia, securities issued by Titularizadora Colombiana S.A., entity that buys and secures mortgage loans in Colombia. These securities have a tax benefit in Colombia as their income is tax free, benefit that has contributed to the development of a market for this kind of instruments. It is important to highlight that a vast majority of the TIPS BANCOLOMBIA buys are backed by mortgages originated by the Bank according to its credit policies and standards.

### 2.1.3. Asset Quality

As of December 31, 2007, the Bank s past due loans accounted for 2.9% of total loans, increasing from the 2.8% posted as of September 30, 2007. The increase is due to higher interest rates in Colombia, BANCOLOMBIA s largest market, and the higher participation retail and SME s segment has reached on the Bank s loan book. Nonetheless, the level of the coverage measured by the ratio of allowances to past due loans at the end of the quarter increased reaching 134.9%, which is above the average of this measure for the last 3 years.

The percentage of loans classified as C, D and E increased in the fourth quarter of 2007, representing 3.1% of total loans compared to 2.6% the previous quarter, while the ratio of allowances to loans classified as C, D and E at the end of the fourth quarter of 2007 was 127.4%.

(1) Performing past due loans are loans upon which the Bank continues to recognize income although interests have not been

received for those periods. Once interest is unpaid on accrual loans, the loan is classified as non-performing. To check the periods where a loan is past due or non-performing please read the foot note on page 136 of the Bank's 2006 20-F. Under Colombian Banking regulations, a loan is past due when it is at least 31 days past the actual due date.

- (2) Allowance means allowances for loan and accrued interest losses.

## **2.2. Liabilities**

Total deposits increased 12.2% as compared to the third quarter of 2007 and 20.5% over the year ended December 31, 2007, amounting to Ps. 34,374 billion as of December 31, 2007. Non-interest bearing deposits increased 24.9% over the third quarter of 2007 as part of the seasonal effect caused by the higher activity close to the end of the year. Interest bearing deposits increased 9.9% over the third quarter of 2007 and 22.8% as compared to the pro forma figures for the same period in 2006.

The composition of deposits changed throughout the year, specifically, time deposits increased representing 41.6% of the total, compared to 35.2% a year before. Saving deposits represented 36.9% of the deposits compared to a participation of 41.1% in 2006. These changes are explained to a large extent by the marginal reserve requirements imposed by the Colombian authorities in the first half of 2007, imposing higher reserves required for checking accounts and savings accounts than for time deposits, changing the preference among banks in marketing this kind of deposit.

### 2.3. Shareholders Equity

BANCOLOMBIA's shareholders' equity amounted to Ps. 5,199 billion at the end of the fourth quarter of 2007, which represents an increase of 9.0% as compared to the third quarter of 2006 and 20.5% as compared to the pro forma figures for the fourth quarter of 2006. The increase is explained by the financial result of the Bank and the stock issuance occurred in July 2007 (Ps. 927.6 billion).

At the end of the fourth quarter of 2007, the Bank's consolidated ratio of technical capital to risk-weighted assets was 12.67%, a slight decrease as compared to the 13.28% from the previous quarter. The decrease is explained by the asset growth occurring in the fourth quarter of 2007.

<b>CAPITAL ADEQUACY <sup>(2)</sup></b>	<b>11.12%</b>	<b>13.28%</b>	<b>12.67%</b>

(1) Technical capital is the sum of basic capital and additional capital.

(2) Capital Adequacy is technical capital divided by risk weighted assets.

### 3. INCOME STATEMENT

BANCOLOMBIA's net income amounted to Ps. 322.5 billion for the fourth quarter of 2007 and Ps. 1,087 billion for the year ended December 31, 2007, a 31.0% increase as compared to Ps. 829.5 billion pro forma figure for the year ended December 31, 2006.

#### 3.1. Net Interest Income

Interest on loans amounted to Ps. 1,072 billion in the fourth quarter of 2007, increasing 10.3% compared to the third quarter of 2007. On a year over year basis, this represents an increase of 37.9% as compared to the Ps. 776,883 million at December 31, 2006. On the other hand, interests in investment securities reached Ps. 105,916 million for the fourth

quarter of 2007, increasing 13.9% as compared to the previous quarter and decreasing 26.0% as compared to the fourth quarter of 2006, decreasing mostly because of the smaller size of the debt securities portfolio.

### **3.2. Provisions**

For the year ended December 31, 2007, provisions for loan and interest losses amounted to Ps. 708 billion, increasing 117.9% as compared to the year ended December 31, 2006. During the fourth quarter of 2007, provisions for loans and interest losses amounted to Ps. 258 billion, increasing 27.0% as compared to the third quarter of 2007.

Recoveries of provisions for foreclosed assets decreased 9.1% in the previous year from Ps. 90 billion.

Total net provisions for the year ended December 31, 2007 amounted to Ps. 597 billion, increasing 158.5% as compared to the pro forma figure for the year ended December 31, 2006. During the fourth quarter of 2007, Total net provisions amounted to Ps. 211 billion, increasing 9.3% as compared to the previous quarter.

#### **3.2.1. Source of provisions charges variation**

During 2007, the Bank made the necessary adjustments to fulfill the requirements established by Colombia's Superintendency of Finance (the SFC) in terms of provision charges, which included:

- The application of a new methodology when calculating provisions for commercial loans based on a reference model developed by the SFC.

- Changes to the applicable allowance percentage formula for consumer loans, which increased these percentages for the loans classified as A and B.

- The adjustment of the allowances of BANAGRICOLA, a Salvadorian subsidiary, to Colombia's regulatory framework, causing additional non-recurrent provisions.

- Changes in the methodology used to classify restructured commercial loans.

BANCOLOMBIA notes that 40% of the Bank's current allowances are made upon loans classified as A which are performing loans. Additionally, the adjustment of BANAGRICOLA's allowances generated non-recurrent charges that account for 10.8% of the net provisions for the year 2007 and represent 17.6% of the variation between the years 2007 and the pro forma figures for 2006.

### **3.3. Fees and Income from Services**

Net fees and income from services amounted to Ps. 1,170 billion during 2007, increasing 7.8% as compared to the pro forma figures as of December 2006, affected by the sale of Almacenar S.A., a former subsidiary, as the Bank did not have any income from warehouse services in 2007; services that represented 6.2% of the total fees and other service income for the year 2006.

In the fourth quarter of 2007, net fees and income from services amounted to Ps. 348,778 million, increasing 23.0% as compared to the previous quarter and 19.9% as compared to Ps. 290,987 million for the fourth quarter of 2006. The increase was mainly driven by higher banking services transactions along the fourth quarter of 2007.

BANCOLOMBIA's accumulated unconsolidated credit card billing increased 35.3% during 2007, resulting in a 23.1% market share of the Colombian credit card business. In addition, the Bank's number of outstanding credit cards increased 30.19%, resulting in a 16.6% market share at the end of 2007.

**3.4. Other Operating Income**

Total other operating income amounted to Ps. 307.5 billion for the year ended December 31, 2007, increasing 16.5% as compared to the pro forma figures of 2006. During the fourth quarter of 2007, total other operating income amounted to Ps. 132.2 billion which represents an increase of 38.2% when compared to the third quarter's figures.

Other operating income was driven by foreign currency forward contracts which had a dynamic year, especially in the Colombian Peso exchange market in which BANCOLOMBIA is a leader given its broad customer base and its contract size capacity.

Revenues from commercial subsidiaries presented a substantial increase as well, driven by the revenue generated by some minor acquisitions undertaken by LEASING BANCOLOMBIA S.A. on 2007 and by the organic growth presented on the rest of the Bank's commercial subsidiaries.

**3.5. Operating expenses**

Operating expenses increased 6.1% in the year ended December 31, 2007 as compared to the previous year. During the fourth quarter of 2007, operating expenses amounted to Ps. 582,026 million, increasing 9.5% over the third quarter of 2007 but decreasing 5.4% as compared to the pro forma figures for the fourth quarter of 2006.

Personnel expenses (the sum of salaries and employee benefits, bonus plan payment and compensation) implemented for the year 2007 increased 10.7% as compared to the pro forma for the year ended December 31, 2006. Administrative and other expenses increased 5.6% compared to 2006 on the same period, a lower rate of increase compared to the 11.2% increase in the previous year. This decline is the result of a stricter policy concerning expenses implemented in 2007.

BANCOLOMBIA's ratio of operating expenses to net operating income improved for the year 2007 reaching 53.0%, a lower ratio than the 62.5% from 2006 pro forma figures. On a quarterly basis, the cost to income efficiency ratio reached 47.4%.

The Bank's efficiency, measured as operating expenses over average total assets, was 4.8% for the year 2007, a decline as compared to the 5.06% from the pro forma figures for 2006.
