ITEM 7.01. Regulation FD Disclosure.

HealthSouth Corporation (“HealthSouth” or the “Company”) will participate in the Robert W. Baird 2009 Growth Stock Conference on May 12-14, 2009 at the Four Seasons Hotel in Chicago. As part of this conference, representatives of HealthSouth will make a presentation on May 14, 2009 at 9:55 a.m. ET using the slides attached to this Current Report on Form 8-K as Exhibit 99.1. The presentation will address, among other things, the Company’s strategy, objectives, and financial performance and discuss industry trends and dynamics. The presentation will be webcast live and will be available at <http://investor.healthsouth.com> by clicking on an available link.

The Company’s last investor presentation was made at the Barclays Capital Global Healthcare Conference on March 10 – 11, 2009 at the Loews Miami Beach Hotel in South Beach, Florida, and the related slide presentation was furnished as an exhibit to the Current Report on Form 8-K dated March 9, 2009. Since that time, the Company has issued a press release reporting the financial results of the Company for the three months ended March 31, 2009 and has filed its Quarterly Report on Form 10-Q for the three months ended March 31, 2009 (the “March 2009 Form 10-Q”). The press release was furnished as an exhibit to the Current Report on Form 8-K dated May 4, 2009 and included certain supplemental slides that the Company discussed during its earnings conference call held on May 5, 2009. While the format of certain slides may have changed, the slide presentation attached to this Current Report on Form 8-K as Exhibit 99.1 contains substantially the same information as previously provided in the above referenced reports.

In the slide presentation attached to this Current Report on Form 8-K as Exhibit 99.1, the Company will share its initial observations on the second quarter of 2009. These observations are:

- *Volume:* Through April 2009, the Company has continued to experience positive discharge growth.
- *Pricing:* Quarter-over-quarter comparables are similar, as the Medicare pricing roll-back became effective April 1, 2008.
- *Expenses:* The Company has continued to focus on cost-effective patient care.

The Company uses “same store” comparisons to explain the changes in certain performance metrics and line items within its financial statements. Same store comparisons are calculated based on hospitals open throughout both the full current periods and throughout the full prior periods presented. These comparisons include the financial results of market consolidation transactions in existing markets, as it is difficult to determine, with precision, the incremental impact of these transactions on the Company’s results of operations.

The Company also reiterated its guidance for 2009. As discussed in the press release furnished as an exhibit to the Current Report on Form 8-K dated May 4, 2009 and during the earnings conference call held on May 5, 2009, the Company expects to be at the higher end of its guidance range.

The information in this Current Report on Form 8-K, including the information set forth in Exhibit 99.1, shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), nor shall it be incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing. The furnishing of this report is not intended to constitute a determination by the Company that the information is material or that the dissemination of the information is required by Regulation FD.

Note Regarding Adoption of New Accounting Pronouncement

On January 1, 2009, the Company adopted Financial Accounting Standards Board ("FASB") Statement No. 160 *Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51*. As a result, the Company has reclassified its noncontrolling interests (formerly known as "minority interests") as a component of equity and now report net income and comprehensive income attributable to its noncontrolling interests separately from net income and comprehensive income attributable to HealthSouth.

Note Regarding Presentation of Non-GAAP Financial Measures

The financial data contained in the presentation includes non-GAAP financial measures, including "Adjusted Consolidated EBITDA." The Company continues to believe Adjusted Consolidated EBITDA as defined in its Credit Agreement is a measure of leverage capacity, its ability to service its debt, and its ability to make capital expenditures.

The Company uses Adjusted Consolidated EBITDA on a consolidated basis as a liquidity measure. The Company believes this financial measure on a consolidated basis is important in analyzing its liquidity because it is the key component of certain material covenants contained within the Company's Credit Agreement, which is discussed in more detail in Note 8, *Long-term Debt*, to the consolidated financial statements included in its Annual Report on Form 10-K for the year ended December 31, 2008 (the "2008 Form 10-K"). These covenants are material terms of the Credit Agreement, and the Credit Agreement represents a substantial portion of the Company's capitalization. Non-compliance with the financial covenants under the Credit Agreement – its interest coverage ratio and its leverage ratio – could result in the Company's lenders requiring the Company to immediately repay all amounts borrowed. If the Company anticipated a potential covenant violation, it would seek relief from its lenders, which would have some cost to the Company, and such relief might not be on terms as favorable to those in the Company's existing Credit Agreement. In addition, if the Company cannot satisfy these financial covenants, it would be prohibited under the Credit Agreement from engaging in certain activities, such as incurring additional indebtedness, making certain payments, and acquiring and disposing of assets. Consequently, Adjusted Consolidated EBITDA is critical to the Company's assessment of its liquidity.

In general terms, the definition of Adjusted Consolidated EBITDA, per the Credit Agreement, allows the Company to add back to Adjusted Consolidated EBITDA unusual non-cash or non-recurring items. These items include, but may not be limited to, (1) amounts associated with government, class action, and related settlements, (2) fees, costs, and expenses related to the Company's recapitalization transactions, (3) any losses from discontinued operations and closed locations, (4) charges in respect of professional fees for reconstruction and restatement of financial statements, including fees paid to outside professional firms for matters related to internal controls and legal fees for continued litigation defense and support matters discussed in Note 11, *Settlements*, and Note 12, *Contingencies*, to the condensed consolidated financial statements included in the March 2009 Form 10-Q, (5) compensation expense recorded in accordance with FASB Statement No. 123(R), *Share-Based Payment*, (6) investment and other income (including interest income), and (7) fees associated with the Company's divestiture activities.

However, Adjusted Consolidated EBITDA is not a measure of financial performance under generally accepted accounting principles in the United States of America ("GAAP"), and the items excluded from Adjusted Consolidated EBITDA are significant components in understanding and assessing financial performance. Therefore, Adjusted Consolidated EBITDA should not be considered a substitute for net income or cash flows from operating, investing, or financing activities. The Company reconciles Adjusted Consolidated EBITDA to net income, which reconciliation is set forth in the slide presentation attached as Exhibit 99.1, and to net cash provided by operating activities, which reconciliation is set forth below. Because Adjusted Consolidated EBITDA is not a measurement determined in accordance with GAAP and is thus susceptible to varying calculations, Adjusted Consolidated EBITDA, as presented, may not be comparable to other similarly titled measures of other companies. Revenues and expenses are measured in accordance with the policies and procedures described in the 2008 Form 10-K.

The Company also uses adjusted income (loss) from continuing operations and the related per share amounts as analytical indicators to assess its performance. Management believes the presentation of adjusted income (loss) from continuing operations and the related per share amounts provides useful information to management and

Edgar Filing: HEALTHSOUTH CORP - Form 8-K

investors about the Company's operating business before taking into account certain items that are non-operational or infrequent in nature. These measures are not defined measures of financial performance under GAAP and should not be considered as alternatives to net income and net income per share available to HealthSouth common shareholders. Because these measures are not measures determined in accordance with GAAP and are susceptible to varying calculations, they may not be comparable to other similarly titled measures presented by other companies. See the condensed consolidated statements of operations included in the March 2009 Form 10-Q and the consolidated statements of operations included in the 2008 Form 10-K for the GAAP measures of net income, income from continuing operations, and basic and diluted earnings per common share. A reconciliation of net income to adjusted income (loss) from continuing operations, and the related per share amounts, is included in the slide presentation attached as Exhibit 99.1.

The Company also uses adjusted free cash flow as an analytical indicator to assess its performance. Management believes the presentation of adjusted free cash flow provides investors an efficient means by which they can evaluate the Company's capacity to reduce debt and pursue development activities. The calculation of adjusted free cash flow is included in the slide presentation attached as Exhibit 99.1. This measure is not a defined measure of financial performance under GAAP and should not be considered as an alternative to net cash provided by operating activities. Our definition of adjusted free cash flow is limited and does not represent residual cash flows available for discretionary spending. Because this measure is not determined in accordance with GAAP and is susceptible to varying calculations, it may not be comparable to other similarly titled measures presented by other companies. See the condensed consolidated statements of cash flows included in the March 2009 Form 10-Q and the consolidated statements of cash flows included in the 2008 Form 10-K for the GAAP measures of cash flows from operating, investing, and financing activities. A reconciliation of net cash provided by operating activities to Adjusted Consolidated EBITDA and adjusted free cash flow is presented below.
