FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the fiscal year ended: December 31, 2011

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 000-53235

DIGITILITI, INC.

(Exact Name of Registrant as specified in its Charter)

Delaware

26-1408538

(State or other Jurisdiction of Incorporation
or Organization)

(I.R.S. Employer Identification No.)

266 East 7th Street, 4th Floor

St. Paul, Minnesota 55101

(Address of Principal Executive Offices)

(651) 925-3200

(Registrant's Telephone Number, including area code)

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act: Common Stock, par value \$0.001

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during

the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part IV of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company:

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Market Value of Non-Affiliate Holdings

State the aggregate market value of the voting and non-voting common stock held by non-affiliates computed by reference to the price at which the common stock was last sold, or the average bid and asked price of such common stock, as of the last business day of the Registrant's most recently completed second quarter.

At June 30, 2011, the aggregate market value of the shares of voting and non-voting common stock held by non-affiliates was approximately \$4,111,983, based on 68,533,042 shares being held by such persons and the closing price of \$0.06 for the Registrant's common stock on the Pink OTC Markets, Inc. (the "Pink Sheets") on June 30, 2011.

Outstanding Shares

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

Class	Outstanding at April 13, 2012
-------	-------------------------------

Common Stock, \$.001 par value per share	70,683,241 shares
--	-------------------

Documents Incorporated by Reference

None.

PART I

FORWARD-LOOKING STATEMENTS

In this Annual Report, references to “Digitiliti, Inc.,” “Digitiliti,” the “Company,” “we,” “us,” “our” and words of similar import refer to Digitiliti, Inc., a Delaware corporation (the “Registrant”); and such references also include our wholly-owned subsidiary, Digitiliti, Inc., a Minnesota corporation, which was formerly named “Storage Elements, Inc.,” our predecessor (sometimes called “Storage” herein).

This Annual Report contains certain forward-looking statements, and for this purpose, any statements contained in this Annual Report that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, words such as “may,” “will,” “expect,” “believe,” “anticipate,” “estimate,” “continue” or comparable terminology are intended to identify forward-looking statements. These statements by their nature involve substantial risks and uncertainties, and actual results may differ materially depending on a variety of factors, many of which are not within our control. These factors include, but are not limited to, economic conditions generally and in the markets in which we may participate, competition within our chosen industry, technological advances and any failure by us to successfully develop continuing business relationships and customers or to successfully fund our current and intended operations.

ITEM 1: BUSINESS

We were organized under the name “Cyclone Holdings, Inc.” as a holding company under Delaware Law on March 31, 2006.

On February 27, 2007, we changed our name to “Digitiliti, Inc.”

We acquired Storage Elements, Inc (the “Storage Merger”), effective August 17, 2007, and we became a successor to Storage and its business operations, with Storage becoming our wholly-owned subsidiary. References are often made to “Storage” throughout this Annual Report to provide a clearer understanding of the information presented. We also changed the name of Storage to “Digitiliti, Inc.” As a result, we both share the same name, respectively, in the States of Delaware and Minnesota.

Currently, our principal executive offices are located at 266 East 7th Street, 4th Floor, St. Paul, Mn 55101, (651) 925-3000.

On March 13, 2008, we acquired a commercially-proven technology from StorageSwitch, LLC, a Colorado limited liability company (“StorageSwitch”), which led to the development of our new product discussed below under the heading “Business-DigiLIBE.” Since then we have made significant changes to the product, and it is now called the “Universal Archive Platform”.

Our business is developing and delivering superior archiving and information management technologies and methodologies enabling our customers to manage, control, protect and access their information and data simply and cost effectively. Our traditional business is providing a cost effective on-line data protection and data recovery solution to the small to medium business (“SMB”) and small to medium enterprise (“SME”) markets through our DigiBAK service.”. This on-line cloud storage management solution helps organizations properly manage and protect their entire network from one centralized location.

Our emerging business product, released in the first quarter of 2010, is called the Universal Archive Platform, DigiLIBE. We believe that DigiLIBE is a game-changing product that addresses the desperate need for a fiscally responsible, integrated system to manage the increasing growth, volume, and diversity of unstructured data that now represents up to 85% of enterprise information and continues to grow rapidly. Content chaos is overwhelming companies’ ability to meet compliance, utilize collaboration tools and optimize storage needs for their virtualized infrastructures.

DigiBAK and DigiLIBE are complementary products with DigiBAK providing cloud storage backup and recovery of structured data and operating system files and DigiLIBE offers archiving and information management and life-cycle control of unstructured data from end-user through archiving and back to the end user.

Our Internet website address is www.Digitiliti.com. The information on this website is not incorporated by reference into this Annual Report on Form 10-K. We make available free of charge through our website annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, Forms 3, 4 and 5 filings, and all amendments to those reports and filings as soon as reasonably practicable after such material is electronically filed with, or furnished

to, the Securities and Exchange Commission (“SEC”).

The DigiBAK business

Our DigiBAK solution can backup and restore emails and all company data on every machine in a network, including desktops, laptops, file and print servers. We provide storage through a “utility based computing” philosophy, where customers pay for the

gigabytes of data they store in DigiBAK's Vault facility.

Through our DigiBAK service, we combine powerful, agent-less backup software with our SAS 70 compliant facility, to deliver to our customers an efficient and effective online-offsite data backup and restore solution. Our facilities enable us to provide offsite disaster recovery emphasizing intraday protection and restore for all of our customer primary data centers and geographically dispersed offices or campus settings. Our SAS 70 compliant DigiBAK Vault facility is located at 511 6th Street South, Minneapolis, MN. It is a one of a kind facility providing web based on-demand backup/restore service with all the benefits of direct fiber access to a "Level 5" data center. The Vault has 24/7 onsite physical security, including security guards, motion detectors, security cameras, card-key access, separate cages with individual locking cabinets and ladder racking. It also has battery generator back up power, temperature and humidity controls and fire suppression systems. Geographically, we are located at the center point of the Metropolitan area network. Being centrally located at the focal point of the Twin Cities Fiber Channel and Gig loop, the pipeline for data and load capabilities are immense and this capability allows us to send data back and forth in real time.

We utilize both direct in-house sales and sales through business partner channels such as Value Added Resellers (VARs) and third party integrators. Our resellers have extensive data storage knowledge and expertise and an established customer base. Our sales plan targets reseller, Original Equipment Manufacturer and channel partnerships regionally and nationally that possess utility-oriented sales systems. We and our partners target vertical markets specifically in the Small Business Market (SMB) and the Small and Intermediate size Enterprises of 100 — 5000 employees with an average of four sites and five — 20 Terabytes of information to archive.

As a result of our sales and marketing efforts of our DigiBAK product, our customer base has expanded from approximately 20 in fiscal 2005 to approximately 100 in fiscal 2006, 508 in 2007, 731 in 2008, 789 in 2009, 890 in 2010 and 910 as of December 31, 2011. And, while our annual sales increased from \$402,638 in 2006 up to \$3,192,463 in 2009, in 2010 we began to experience a decline in annual sales posting \$2,143,882 in 2010 and \$1,480,154 as of December 31, 2011. Despite this strong overall customer trend, we continue to struggle with profitability because of increasing competitive pressure causing commodity-like pricing through cloud-like storage. While we have continued to grow our customer base, we have also had to adjust pricing to maintain competitive advantage. We have significantly improved our support infrastructure and have been able to hold our margins. We still need to raise cash in 2011 to grow our overall business, but we believe we are in a much better financial and expense position than we were a year ago through targeted expense reduction and debt conversion. The product features that we are offering to our clients we believe have superior functionality to the mainstream competition and fill a customer need. We expect this gain new business in 2012.

The Emerging New Universal Archive Platform (DigiLIBE) Product

In 2008, we began to pursue a strategy of expanding our solution to address the need of the industry for managing structured data through DigiBAK, but also provide information management abilities for the unstructured data. This effort led to the development and release of the product called Universal Archive Platform, DigiLIBE, a platform that is designed to consolidate together multiple disparate hardware and data storage environments to provide organizations with the ability to capture, classify, share, preserve, protect, achieve, and deliver the right information, to the right people, at the right time, helping them make informed business decisions. DigiLIBE should be understood as follows — as a company continues to virtualize their hardware and data storage environments, DigiLIBE provides a complementary virtualized environment for the company's primary asset — its information and data. It does not matter if the information is on a user machine, on a server, or in archive. A customer can control it, secure it, and access it and at the same time reduce its IT storage costs.

Growing both Business Segments:

We believe the benefits of our strategic decision to grow both the DigiBAK and DigiLIBE businesses are:

- (i) solving a major industry and customer problem of managing continually growing information volume and associated cost of storage and retrieval;
- (ii) ability to access a larger share of opportunity in the information management storage business;

(iii) offering significant technological advantages in control of information at the corporate policy level and ability to leverage knowledge from the information it creates; and

(iv) optimization of the synergistic allocation of capital and resources between both business.

DigiLIBE has received excellent feedback on the capability, performance, and function it delivers since its initial release. Our sales and prospecting efforts have also reaffirmed the potential of selling DigiBAK services as part of a DigiLIBE sale.

To date, Digitiliti has achieved market recognition and brand value having successfully established its presence in several vertical markets such as Finance, Legal, Telecom, Managed Service Provider, Healthcare, Information Technology Services, and Management Consulting. In June 2010, DigiLIBE won the Tech Awards Circle Gold Award in the Midrange Software category. In briefings, leading industry analysts have described DigiLIBE as a unique and potentially disruptive product integrating both the storage management and information management markets.

We believe DigiLIBE is a fiscally responsible solution at a price, performance, and ease of use level that disrupts the current competitors' point solution landscape and positions while exceeding customers' expectations and needs. We believe our new product represents a significant step toward our goal of becoming a technology leader in the information content and context management marketplace.

We began providing on-line backup and recovery services to the small and medium business ("SMB") and small to medium enterprise ("SME") markets in 2005. This line of our business is referred to as our "DigiBAK" service. This data protection solution helps organizations easily manage and protect their entire network from one centralized location, with offsite redundancy. Our DigiBAK service can backup and restore data on every machine in a network, including desktops, laptops, file and print servers. The marketplace for on-line backup and recovery services is estimated to be a \$3 billion dollar opportunity.

The advantages of outsourcing on-line backup and disaster recovery for customers is that it eliminates cumbersome tape storage and internal infrastructure costs associated with the effort and capital to provide redundancy, disaster recovery and to comply with legal and regulatory requirements for information management. We combine a powerful, agent-less backup software, with our remote DigiBAK service, to deliver to our customers a powerful and effective online-offsite data backup and restore solution from our SAS 70 compliant data center located at 511 6th Street South, Minneapolis, MN.

Our Data Storage Center is located at 511 6th Street South, Minneapolis, MN. It is a one of a kind facility providing our web based on-demand backup/restore service with all of the benefits of direct fiber access to a "Level 5" data center. The Data Storage Center has 24/7 onsite physical security, including security guards, motion detectors, security cameras, card-key access, separate cages with individual locking cabinets and ladder racking. It also has battery generator back-up power, temperature and humidity controls and fire suppression systems. Geographically, we are located at the center point of the Metropolitan area network, being centrally located at the focal point of the Twin Cities Fiber Channel and Gig loop. The pipeline for data and load capabilities are immense, and this capability enables us to send data back and forth in real time.

At the customer site, DigiBAK administrator software is loaded on as many or as few workstations as desired and requires a valid logon code, helps to eliminate any unauthorized access; the administrator software console acts as the interface with DigiBAK in the Data Storage Center; and enables the configuration of all backups and restores. The DigiBAK backup software is totally agent-less, requiring no additional software to be installed on any machines. From the customer administration console, the customer sets retention policies, schedules automatic backups and initiates restores. The customer decides what files to backup: emails, Windows, Linux, Mac, Lotus, AS400 and many more. To ensure security and confidentiality, customer data sent to our Data Storage Center is encrypted and compressed. The encryption key is known only to the customer. The data can be unencrypted only by the customer, affected upon the need of a restore of information. Encrypted data is also highly compressed, making it extremely safe and impenetrable from viruses.

We currently have two storage vaults in our Data Storage Center; 1-105 Terabyte system and 1-95 Terabyte system. We built this vault infrastructure upon a third-party software system called Asigra to efficiently manage the volumes of data being transmitted and stored. When we fully consume existing storage capacity, we purchase additional Asigra licenses, as needed.

Customers are charged monthly for the gigabytes of data they store in our Data Storage Center. The compelling business case is that industry statistics (and our own actual experience) show that organizations grow data at a rate of 3% per month, so gigabyte billing per customer is estimated to grow at that approximate rate. This model provides ongoing revenue growth from our existing customer base. However, the down side of this growth is that it results in increased monthly and annual costs for customers. At some point, the costs are such that the business case for

outsourcing backup and recovery services can no longer be justified by larger customers.

In 2008, we began to develop a new product targeted to help customers deal with the ever-increasing burden of data growth and data proliferation that would also stem the potential of rising storage costs. In analyzing industry data growth issues, we determined that 80% of data being stored is either duplicate or proliferated, and 80% of that data is categorized as “unstructured” data, such as Word documents, PDF’s, Excel spread sheets, other Office documents, pictures and music, but with the greatest issue being emails. “Structured” data, representing 20% of data stored, is typically data contained in databases such as inventory, accounting data and the like. Our new product is named DigiLIBE, or the Universal Archive Platform, previously referred to as “Pyramid” in our previous reports and registration statements filed with the Securities and Exchange Commission.

The architecture of DigiLIBE was developed from the ground up, starting with the foundational database software purchased from StorageSwitch in March, 2008. During most of 2008, we refined and enhanced this base code and optimized it for our specific application. We struggled to define the overall architecture and went through a number of false starts in trying to develop the overall DigiLIBE system. In February, 2009, we brought in new management experienced in software development. We reorganized our development team and solidified the overall architecture of this product. We also identified significant areas of intellectual property in the architecture and design and filed for patent protection on these aspects.

In analyzing the opportunity for this product, it became clear that existing solutions to the problem of data growth did not address the root cause. They addressed pieces of the problem, attacking symptoms with “point” solutions such as de-duplication, Indexing, Compression, Mass Storage Devices, Archives and so forth. The aggregate industry opportunity for all these different solutions is estimated to be somewhere between \$30 billion and \$45 billion, and potentially even more, if you expanded beyond storage into e-discovery and business intelligence.

Our approach was to address the root cause of the data growth and proliferation problem/opportunity by providing one universal architecture, in a simple-to-implement solution. Throughout most of 2009, we worked diligently to complete this project, gathering continuous feedback from industry analysts, experts and potential customers. On December 19, 2009, we announced DigiLIBE as a break-through data management product.

During this time, we attempted to sell our DigiBAK service business, but abandoned these efforts because we could not agree to terms with the potential buyer. As a result, we restructured the DigiBAK business to become more efficient, and reinitiated our effort to grow that business. A component of our new DigiLIBE business is also an “active” Vault where customers archive and can retrieve DigiLIBE information objects without the assistance of IT personnel. We believe customers are looking for a one stop shopping storage solution, so as our DigiLIBE business grows, we see the potential to also increase our DigiBAK business. Unstructured data (information objects) sent to the DigiLIBE vault and structured data and all other backups sent to the DigiBAK vault, are all done seamlessly and transparently for the customer.

As with DigiBAK, DigiLIBE’s Vault component is charged per gigabyte of customer storage. DigiLIBE also has a onetime charge for its software license and storage device, along with annual maintenance. We do not charge per client license fee as we believe it will discourage using the system to its full ability and capacity. While there are a limited number of direct sales, both products are distributed through industry resellers nationwide. DigiBAK and the DigiLIBE Vaults are basically service businesses where our resellers can benefit by providing and gaining ongoing service revenue. DigiLIBE has also a product component and a consulting services component, making it a compelling value equation for resellers.

Our vision for DigiLIBE is to change the way customers approach the problem of data growth and proliferation. In the past and current environment, customers have labored on implementing technologies to solve individual issues like using indexers to find data, de-duplication devices to control growth and email archivers to manage ever-growing email storage. DigiLIBE offers a different approach: one where technology is secondary to the problem solution, DigiLIBE provides organizations with the ability to focus their energy and resources on managing the content of information created and putting their content into context for competitive advantage, rather than concentrating on data growth problems.

Products, Software, Services and Related Technologies Utilized

The following information describes various products, services, software and other technologies utilized in our products and services. We will define these in two categories; (1) storage technologies, and (2) information technologies. Where it is not specifically indicated, technologies identified are common to both DigiLIBE and DigiBAK.

Storage Technologies:

We use industry standard computing hardware and operating systems in our products. Our goal is to use top-tier brand hardware and state of the art technology for overall system and network performance, reliability and maintainability. We employ SCSI hard drive protocol for speed and reliability and Level 5 RAID storage redundancy and fault-tolerance. We move data across high performance fiber channel networks between systems and from disks to computer processors. Our network switches are also top-tier vendor solutions.

In DigiBAK, we rebranded a third party application from Asigra, which manages and controls the data being archived and retrieved from the customer to our Data Storage Center. This solution provides the capability to efficiently and effectively move and manage very large blocks of data and to ensure the integrity and security of the information stored. It also provides the capability to track and report on storage volumes by customers, providing the basis for our monthly billing. We pay for their licenses and maintenance based on the number of systems and gigabytes of storage allocated. We also pay them an annual “Branding” fee to employ a

customer-facing Digitiliti brand.

The DigiLIBE Vault does not use any third party software. Secure storage is implemented in an industry standard database.

Archiving & Information Technologies:

This category is unique to our Universal Archive Platform, DigiLIBE. DigiLIBE moves and manages information objects, which, in effect, are human recognized content such as a Word document or an Excel spreadsheet.

Technologies employed in DigiLIBE include de-duplication to remove type of unstructured of information from the system. One of DigiLIBE's patent applications involves "global de-duplication." In other words, we de-duplicate objects from the time of creation to the time of archive — over the life-cycle of the object. We can assure there are no duplicates in the system. Another technology is indexing, where we save the contents of information objects so that a user can search not only for title, but for any information contained in the content of the object. And this indexing supports multiple languages. Other technologies include compression to reduce the object size and encryption to protect security of customer information. DigiLIBE information object technology also includes a policy engine to control factors like retention life, versioning and other options targeted to allow users and company executives to define information object storage parameters. Each information object has "meta-data" stored with the object. Meta-data is basic information about the object such as who stored it, what type of data is it, when was it stored and/or updated, what computer was its source and who accessed it. All these capabilities are integrated into one package with DigiLIBE and contained on one storage appliance called an "Information Director," making this a simple and easy to use information content and context delivery solution.

Principal Products or Services and their Markets

Markets

The on-line archiving market characterized by DigiBAK is projected to be a \$3 billion dollar opportunity. The market for DigiBAK is a horizontal market comprised of small and intermediate sized establishments and enterprises. The industry definition is SMB (Small and Medium Businesses) and SME (Small and Medium Enterprises) with up to 500 employees. Our DigiBAK customer profile is typically in the 50 to 1000 employee segment with 500 gigabytes to 3 terabytes of stored data. This business spans horizontally across all industry segments. However, regulated industries or those having significant concerns about data protection and disaster recovery tend to be the primary customer base. North America is the primary geographic region for our business. We expect to move into broader geographic areas within two years.

Because of DigiLIBE's highly and uniquely integrated architecture, the market opportunity is less well defined. In order to complete a market opportunity assessment, one has to roll up the individual opportunity for each "point" solution offering. Our estimates are that this industry opportunity ranges from between \$30 to \$45 billion. It is new market defined by Gartner as Enterprise Information Archiving (EIA) market. They issued a new magic quadrant report in October 2010 for the first time on this market. Not a data management and control market, but an information content and context market transforming the current market definition of Primary Storage, Secondary Storage and Archival Storage to a market of Content and Context Management that not only includes Storage, but also includes Business Intelligence, e-Discovery and Information Policy. DigiLIBE's capability even makes the traditional file structures obsolete, encroaching into traditional operating system space, as it relates to file storage and file structures.

DigiLIBE's target market is similar to DigiBAK — SMB / SME. However the market segmentation has more vertical tendencies and targeted to Health Care, Finance, Legal and some sectors of government. However, DigiLIBE's policy engine and life cycle management make it ideal for any organization with regulatory compliance requirements. As with DigiBAK, North America is the primary geographic region for DigiLIBE sales, but we expect to move into broader geographic areas within two years.

Products

DigiBAK is an on-line data backup and restore service. DigiLIBE is both a product and a service offering. The product is our information management software contained in our Information Director storage appliance Customers pay a one-time fee for this appliance and a one-time software license fee, plus annual maintenance for this product. The service component is a monthly per-gigabyte fee for archiving. DigiLIBE has an "active" archive, meaning that

individual users have real-time access to archived data (assuming they are authorized). Customers can use Digitiliti's Data Storage Vault services, their own storage or a third party for active archiving. Another service component is consulting services to assist customers in enhancing the DigiLIBE policy engine and to customize workflow applications to put content into context. DigiBAK is an on-line data backup and recovery service. Both the DigiLIBE and DigiBAK services are charged by gigabyte of storage per month.

An additional opportunity for DigiLIBE is an OEM solution and business partnership where DigiLIBE software is placed on another vendor's storage appliance and sold under that vendor's brand.

Objectives

Through on-line research, engaging industry experts and through continuous customer contact, we have identified the most pressing data management issues SMB/SME managers struggle with today. Various ad-hoc collections of single purpose (point) software/hardware products and functions like data de-duplication, encryption or application integration are a few examples of some of the different data management issues we are addressing.

We believe our experience as a hybrid cloud backup/disaster recovery solution provider in the past 5 years brings us credibility in the market. We have learned from this experience and are in a better position going forward. One of the strengths of DigiLIBE is built from the heritage of our DigiBAK business. We believe that both our current business and our new product will complement each other with a very good chance that we can grow both in a complementary sales strategy where we provide an active archive for information objects of unstructured data and a traditional archive for all other data of customers. In effect, we can be the “cloud” provider, but with value added capability of using that content.

Targets

See “Markets,” above for our targeted market focus

“digitiliti” Product Operational Methodology

Our operational model is simply defined in these points:

• Develop simple and robust technologies. Mask technical complexity from IT and from the users.

• Develop technologies and process to scale sales through VARs

• Reduce total cost of ownership (TCO) of managing information and archiving for IT and organizations.

• Provide customers with the business knowledge of the content they create and store, to improve their efficiency and effectiveness.

Distribution Methods of the Products or Services

We sell and support our solutions and services through direct sales, and through relationships with Value-Added Resemarketers and third-party integrators (resellers). We have a current base of about 15 resellers in North America for DigiBAK, most of whom are local to a city or are regional in nature. Over 80% of our current base of more than 900 DigiBAK customers has been signed through resellers. For DigiLIBE, we are targeting regional and national resellers who can sell the product, deploy the product and provide on-going consulting services. With DigiBAK, our value to resellers is an on-going monthly revenue stream from on-line archive volumes. With DigiLIBE, we have a more compelling reseller model. Resellers not only get revenue from the one-time sale of the product, but they gain service revenue from the monthly archive volumes. They also have the opportunity to engage the customer in business services such as consulting on policy setting details, developing workflow applications to leverage information object content or to write information applications that turn content into context.

For DigiLIBE, another potential distribution channel is OEM — Original Equipment Manufacturer. We also market through traditional methods, including the web, trade publications, trade shows and advertising. We are aggressively pursuing a plan to use our web site to grow our direct sales by strategically improving our ability through the new site to go Viral. We are developing a limited function assessment tool that will be distributed through the new website and help IT professionals realize the value of the product and the reduction in their TCO.

Status of any Publicly Announced New Product or Service

Release 1 of DigiLIBE was announced on December 19, 2009.

Release 2 of DigiLIBE was announced on October, 2010. This release significantly improved the functionality, stability, and scalability of the product.

Release 3.5 of DigiLIBE was announced on February, 2011. This release provides new and improved features that created sharing, collocation and improved client connectivity. .

There are plans for additional releases and future content targeted for new features and functions and for market expansion both to smaller size organizations to the larger enterprises.

Competitive Business Conditions, Competitive Position in the Industry and Methods of Competition

For DigiBAK, we compete with multiple information protection and storage service providers in all geographic areas where we

operate. We also compete with current and potential customers' internal information protection and storage service capabilities, especially larger customers where data growth is driving costs to the point where outsourcing this service is cost prohibitive. The most important competitive factors are, in order of priority: price, reliability and service. Over the last few years, "Cloud" storage is emerging from a number of sources, including Amazon, Google, Barracuda and others. "Cloud" offers basic backup service for very low entry point and has attracted smaller business customers away from our more fully functional service.

Key national and international competitors for full function on-line archiving include Iron Mountain, EVault, HP, and EMC. These companies focus on larger enterprises and offer services similar to our services. Their competitive advantage is in financial strength, size and by the fact that they are also hardware providers. We differ in our competitive advantages by our agility, service and focus on small and intermediate businesses as our core business. Other competition is more limited and tends to be localized to geographic areas. These competitors operate with cost as a competitive advantage. However, they typically offer a subset of service and capabilities and are targeted more to smaller enterprises and establishments. Iron Mountain, EMC and some other large storage providers have made strategic purchases of companies offering point solutions, which when linked together, offer a subset of capabilities offered by DigiLIBE. They are clearly moving in a direction to offer a comprehensive solution to compete with DigiLIBE. The question is when will they reach that capability, and that is presently unknown.

Competitive landscape for DigiLIBE:

Currently, there is no known competitor providing the comprehensive and integrated capability found in DigiLIBE. We have been able to confirm this through calls with industry analysts. DigiLIBE's patent application architecture is "Client" based with a focus on the "Human" interface and on the need for information management and control, with content put into context. Most competitive products are individual "point" solutions offering technology to help solve a specific information area like content indexing or de-duplicating or archiving. Some companies are integrating multiple point solutions in a network to provide broader value, but most of this integration is done at the storage layer versus the client or human point of data creation. This architectural limitation leaves these competitors at a significant disadvantage relative to capturing key meta-data at point of creation that can be used to put content into context. It also leaves them in a high cost, high complexity environment. Key competitive factors are function/capability, simplicity and cost.

Competitors that have similar DigiLIBE function (with limitations) by integrating a number of point solutions together include EMC, Evault, IBM, NetApp, Symantec, and HP. No one of these competitors offers a complete suite except EMC. However, as stated, all these potential competitors' weaknesses are the "storage-centric architecture versus the client (human)-based design, and the cost of integrate and manage "point" solutions. It is difficult to assess how much reengineering or redesign would be required and how much time it would take for a top-tier competitor (like those listed above) to develop a cost and performance competitive solution to compete directly with DigiLIBE. It is more likely that a second-tier or startup company may introduce a product to compete with DigiLIBE. Our patents, if issued, will afford some level of protection against strongly similar architectural solutions.

Sources and Availability of Raw Materials and Names of Principal Suppliers

For DigiBAK, our principal supplier partners are Asigra, a software vendor providing system management tools; NetApp, which provides hardware and software and our data transmission supplier. Asigra is a provider of comprehensive software solutions and IT expertise to back up data to customers secure vaults. We pay for licenses and for annual maintenance agreements based on the gigabytes of storage used. We chose NetApp because we believed it to be robust and the best fit with the Asigra software. Our software/hardware infrastructure is built around the NetApp product (hardware and software) and the Asigra product (software). When we fully consume existing storage capacity, we purchase additional NetApp software and equipment or Asigra licenses as needed. Integra Telecom provides voice, data and IP services to businesses and other telecommunications companies in 80 metropolitan markets across the United States.

For DigiLIBE, all our software is developed in-house. We use the Microsoft Developers Suite to develop our software. Our hardware Information Director is industry standard and we outsource the product from multiple top-line vendors. Our DigiLIBE vault hardware is basically the same hardware as our Information Director. This hardware is industry standard that can be provided from many different sources.

Dependence on One or a Few Major Customers

Our customers trust us with the ability to archive, protect and retrieve their information assets. We serve customers throughout the United States in a diverse group of data intensive industries, including financial services, engineering and scientific, construction, health care, education and legal services, being the most important. We have strong relationships with our customers and high customer satisfaction with our sales and technical support, and those of our business partners.

Our DigiBAK business has grown to over 900 customers in 2011 across North America. Of those customers, approximately 72% of the revenue (based on gigabytes of stored data) is with our 10 largest customers. While loss of one or two of these large customers would present a challenge to continued revenue growth, our contracts are for three years. Further, larger customers drive more generic growth in data from the initial stored amounts over time. Our sales direction is toward more intermediate sized customers similar to those in our top 10. With the introduction of DigiLIBE, we offer customers alternatives to control their data growth as well as provide new functions. With the combination of DigiBAK and DigiLIBE, we expect to grow both of our data archiving businesses and retain larger customers who would otherwise leave the service because of escalating costs driven by their own data growth. Patents, Trademarks, Licenses, Franchises, Concessions, Royalty Agreements or Labor Contracts, including Duration Generally, we rely on a combination of patents, copyrights, trademarks, trade secrets (including know-how), employee intellectual property agreements, and third-party agreements to establish and protect proprietary rights in our products and technologies. It is our practice to seek protections in all jurisdictions where such protections are deemed useful and desirable to our business and competitive interests.

In 2008, we applied for and have a patent pending an Information Area Network Patent representing the underlying technology and process of our DigiLIBE product. Key claims filed in January, 2010 include; (1) file creation, metadata attribution and storage, (2) persistent access to files, (3) file policies and (4) global de-duplication.

We have customary software licenses required to conduct current and intended operations. We are in the process of filing certain service mark applications that are deemed to be necessary or beneficial to us.

We have or are party to the following service agreements that are deemed to be material.

StorageSwitch, LLC

In January 2008, we executed a nonbinding Letter of Intent (the "LOI") with StorageSwitch to purchase selective existing software technology and in March 2008 we signed and completed a Technology Purchase Agreement for a purchase of certain technology software with a total payment of \$250,000 cash and 500,000 shares of our common stock that were restricted securities. We also entered into a Consulting Service Agreement with a monthly payment of \$25,000 and monthly issuance of 24,960 shares of our common stock that were also "restricted securities". This Consulting Services Agreement terminated on August 1, 2008.

Vision to Practice, Inc.

On February 6, 2008, we entered into a Consulting Agreement with Vision to Practice, Inc., a Minnesota corporation ("Vision"), to assist in bringing our new product initiatives to market utilizing the technology software purchased from StorageSwitch. We pay semi-monthly payments of \$7,680 based on full-time service provided to us under this Consulting Agreement. We also issued to the consultant's principal a comprehensive stock option package that vest over multiple years of service. Vision is owned by Rodd Johnson.

This Consulting Agreement contains various provisions regarding independent contractor status, confidentiality, due performance and care in performing services, notice of disputes and time for correction, arbitration of disputes and indemnification by Vision, among other provisions, a copy of which was filed as an Exhibit to our Form 10. The Scope of Work outline referenced in the Consulting Agreement is not filed as an Exhibit as it considered confidential and proprietary information to us and our storage technology. See Part IV, Item 15.

Research and Development Costs during the Last two Fiscal Years

In 2010 and 2011, we incurred research and development expenses of \$447,476 and \$992,210, respectively to develop our new DigiLIBE product offering. We announced DigiLIBE on December 19, 2009, and launched Release 1 of our new DigiLIBE product in June 2010, and release 2 of DigiLIBE was in October of 2010, and release 3.5 in February of 2011.

Number of Total Employees and Number of Full Time Employees

At year end 2010, our employee headcount was 20 full-time employees and one subcontractor. At year end 2011 our employee headcount was 13 full-time employees and one subcontractor. We utilized contract employees for specific skills required in short-term activities. We hire full-time employees where we intend to focus on strategic skill needs. Over the past two years, we have focused on maintaining a small and highly productive team and intend to continue as such.

Reports to Security Holders

We are required to file annual reports on Form 10-K and quarterly reports on Form 10-Q with the Securities Exchange Commission, and on a regular basis, are required to timely disclose certain material events (e.g., changes in corporate control; acquisitions or dispositions of a significant amount of assets other than in the ordinary course of business; and bankruptcy) in a Current Report on Form 8-K.

You may read and copy any materials that we file with the Securities and Exchange Commission at the Securities and Exchange Commission's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549, on official business days during the hours of 10:00 am to 3:00 pm. You may obtain information on the operation of the Public Reference Room by calling the Commission at 1-800-SEC-0330. You may also find all of the reports that we have filed electronically with the Securities and Exchange Commission at their Internet site www.sec.gov.

ITEM 1A: RISK FACTORS

Risks Related to Our Business

We have not recorded annual profitable operations since our inception, and continued losses may require us to curtail or terminate our business operations.

We have experienced operating losses each year since our inception. Our revenues decreased by \$663,728 to \$1,480,154 in 2011 compared to \$2,143,882 in 2010, with our net loss decreasing to \$3,988,543 for the year ended December 31, 2011, compared to the net loss of \$6,414,639 for the year ended December 31, 2010. We may still incur additional future operating losses. Without raising new capital, continued losses on our operations may require us to curtail or terminate our business operations. Our operating results may fluctuate significantly and any failure to meet financial expectations may disappoint securities analysts or investors and result in a decline in our common stock price on the Pink Sheets or any other nationally recognized quotation system upon which our common stock may be publicly traded in the future.

Our substantial short term debt could adversely affect our financial condition and our ability to continue our present and planned business operations.

As of December 31, 2011, and December 31, 2010, we had long term debt in the form of our 12% and 8% convertible notes in the amount of \$1,374,259 and \$250,000, respectively.

From April 2009 through October 2009, we raised \$750,000 from the sale of 12% convertible debt and warrants that were secured against the assets associated with our DigiBAK vault located in the base of the former Minneapolis federal Reserve Bank. These notes reflected a 24-month maturity date. To address the debt concerns reflected above, in June 2010 we initiated an Incentive Offer that requested all of our unsecured and secured convertible debt holders to convert their convertible notes at a preferential \$0.20 per share conversion rate. In response to this offer, we converted \$2,537,300 of its unsecured convertible debt and \$728,673 of accrued interest into 16,329,868 shares of the Company's common stock. In addition, we converted \$650,000 of our secured convertible stock and \$74,187 of accrued interest into 724,187 shares of the Company's Series A Convertible Preferred Debt. During the year ended December 31, 2010, we raised \$420,000 through the issuance of 420,000 shares of Series B Convertible Preferred Stock. Each share of Series B Convertible Preferred Stock is convertible into 5 common shares at the option of the holder and is entitled to annual cumulative dividends at the rate of 5%.

To satisfy a significant debt obligation owed to certain shareholders and to address cash flow concerns, on February 28, 2011, we completed the placement of \$1,182,844 of Secured Convertible Promissory Note (the "Notes") and Warrants (collectively, the "First Secured Convertible Debt Offering"). The Lenders in the First Secured Convertible Debt Offering paid a 10% discount for their investment, resulting in a "stepped-up" basis in their individual Notes for a total principal amount of \$1,301,128. The Notes bear interest at the rate of 12% per annum, have an 18-month maturity date and are convertible to common shares at \$0.20 per share. The Notes are secured by a first lien on all assets of the Company. In conjunction with the First Secured Convertible Debt Offering, the Lenders received warrants to purchase an aggregate of 3,252,821 common shares. The warrants vested immediately, have a five year term, a \$0.30 exercise price and are redeemable by the Company in the event of an acquisition.

In an effort to address low cash concerns, in June 2011, we initiated a Junior Secured Convertible Debt Offering that provides for the sale of up to an aggregate principal amount of \$1,500,000 Junior Secured Convertible Promissory Notes (the "Junior Notes") and Warrants. The investors in this Junior Secured Convertible Debt Offering receive five-year warrants to purchase that number of common shares equal to 10% of the principal amount of their Junior

Note(s) divided by the exercise price of \$.06 per share. The Junior Notes bear interest at 8% per annum, have a 24-month maturity date and are secured by the assets of the Company with the repayment being subordinated to the repayment of all secured notes previously issued by the Company.

On June 28, 2011, we closed on the first \$500,000 tranche of the Junior Secured Convertible Debt Offering. In conjunction

with the closing of the first tranche of the Junior Secured Convertible Debt Offering, the investors received warrants to purchase an aggregate of 833,333 common shares. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

On September 15, 2011, we broke escrow on the remaining \$1,000,000 available under the second tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by closing on \$550,000 of proceeds from the sale of the Junior Notes. In conjunction with the sale of \$550,000 of these Junior Notes, the investors received an aggregate of 916,667 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

On December 5, 2011, we broke escrow on the third tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by closing on \$30,000 of proceeds from the sale of Junior Notes. In conjunction with the sale of \$30,000 of these Junior Notes, the investors received an aggregate of 50,000 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

On December 31, 2011, we closed the third tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by converting \$379,534 of existing convertible debt and accrued interest into the Junior Secured Convertible Debt Offering. In conjunction with the conversion of this \$379,534, the investors received an aggregate of 682,556 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

We plan to continue to raise additional funds in the form of equity or debt offerings, secured and otherwise, and we are continuing to evaluate alternative incentive programs to reduce and/or eliminate this debt. If we are unable to pay these notes when due, including interest, and the holders of these convertible notes do not elect to convert them to purchase shares of our common stock or extend them, our financial condition could worsen substantially, and we may be required to cease operations entirely.

We also have substantial amount of other current liabilities as of December 31, 2011, that are principally comprised of the following: notes payable to related parties of \$66,000; notes payable of \$45,933; current maturities of convertible notes \$1,212,098; current maturities of convertible notes - related parties \$42,114, trade accounts payable \$820,308; related party accounts payables of \$35,287, deferred income \$6,040 and accrued expenses \$694,892; for total current liabilities of \$2,922,672. See also Notes to the Consolidated Financial Statements.

Our substantial indebtedness could have important adverse consequences on our ability to carry on our present and planned business operations.

For example, it could:

- make it more difficult for us to satisfy our obligations with respect to the current or new debt financing, if any is offered in the future;
- fund the selling and marketing expenses that support the national roll-out of DigiLIBE;
- make us more sensitive to adverse economic conditions than some of our competitors with less debt;
- limit our ability to fund future working capital, acquisitions, capital expenditures and other general corporate requirements;
- limit our flexibility in planning for, or reacting to, changes in our business and the records and information management services industry;
- make it more difficult for us to obtain additional equity or debt financing for future; and
- limit our working capital requirements for future acquisitions or other reasons important to our business strategy.

Despite our current debt position, we may still need to incur substantial additional debt or we will be unable to continue our planned operations.

We expect to continue to raise additional funding in the form of equity or debt offerings, secured or otherwise. However, if we are unable to pay the currently outstanding convertible notes and accrued interest, trade accounts payable and accrued expenses, our financial condition may be adversely affected to the point that no debt or equity financing may be available to us. That could require us to cease or substantially limit our business operations, including termination of employees and business associations necessary for us to continue in our business.

We have deficiencies in our internal controls that could adversely affect our financial statements reporting, which could cause our financial statements to be inaccurate or un-auditable.

Our disclosure controls and procedures have been designed to ensure that information required to be disclosed by us is collected and communicated to management to allow timely decisions regarding required disclosures. Our Chief Executive Officer and the Chief Financial Officer have concluded, based on their evaluation as of December 31, 2011, that, as a result of material weaknesses in internal control over financial reporting as described further in this Annual Report were not effective in providing reasonable

assurance that material information is made known to them by others within our Company:

We have material weaknesses in our internal controls over financial reporting that could adversely affect our financial statements.

Our internal control system is intended to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements and that we have controls and procedures designed to ensure that the information required to be disclosed by us in our reports that we will be required to file under the Exchange Act is accumulated and communicated to our management as appropriate to allow timely decisions regarding financial disclosure.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2011 and concluded that there were material weaknesses. Management is taking steps to address these weaknesses. However, these weaknesses could cause our financial statements to be inaccurate and may result in restatements of such financial statements. There can be no assurance when and if we will be able to resolve the weaknesses in our internal controls.

If we fail to develop new products, or if we incur unexpected expenses or delays in product development, we may lose our competitive position and incur substantial additional losses on our operations or may be required to curtail or terminate our present and planned business operations.

Although we currently have fully developed products and services available for sale, we are also developing various new products and technologies that we will rely on to remain competitive. Due to the risks in developing new products and technologies, limited financing, competition, obsolescence, loss of key personnel and other factors, we may fail to develop these technologies and products, or we may experience lengthy and costly delays in doing so. Although we may be able to license some of our technologies in their current stage of development, we cannot assure you that we will be able to do so.

Our business may be adversely affected by downturns in the economy that may limit the sale of storage and universal archiving solutions and our present and planned business operations may fail as a result.

We are subject to the capital spending patterns of this industry. If our customers and potential customers do not increase their capital spending budgets, we could face a weaker demand for our products; however, such an event may not be materially adverse to us as our storage solution products offers a more cost-effective methodology of data backup and restoring services.

We depend on our key personnel, and the loss of any would impair our ability to compete and gain any market share in the storage solutions industry that we presently serve and intend to serve.

With the small number of people in our company, we are highly dependent on the principal members of our management. The loss of services of any of these persons could seriously harm the growth and success of our current and intended business operations. In addition, research, product development and commercialization will require additional skilled personnel in the backup and storage retention services industry procedures and products.

Competition for and retention of personnel, particularly for employees with technical expertise, is intense and the turnover rate for these qualified personnel is high. If we are unable to hire, train and retain a sufficient number of qualified employees, our ability to conduct and expand our business could be reduced. The inability to retain and hire qualified personnel could also hinder the planned expansion of our business. We have utilized stock options as the primary method for retaining key personnel.

Our intellectual property rights or contractual provisions may not protect us and our products and as a result, our business may fail.

Our products could infringe on the intellectual property rights of others, which may involve us in costly litigation and, if we are not successful in defending such claims, could also cause us to pay substantial damages and prohibit us from selling our products. Third parties may assert infringement or other intellectual property claims against us. Even if these claims are without merit, defending lawsuits takes significant time, may be expensive and may divert management's attention from other business concerns. We are not currently aware of any third-party patents claims against us or other legal proceedings.

With our own patents applications, assuming they result in the issuance of patents, we may need to initiate lawsuits to protect or enforce our proprietary rights in our products, which would also be expensive and, if we unsuccessful, may

cause us to lose some of our intellectual property rights, which would reduce our ability to compete in the market. In the future, we may rely on patents to protect our intellectual property and our competitive position. The rights we rely upon to protect the intellectual property underlying our products may not be adequate, which could enable third parties to use this technology and would reduce our ability to compete in our markets.

We presently have filed certain patent applications on certain facets of our products, and no assurance can be given that these

filings will result in patents being issued, or if issued, that they will protect us and not infringe on patents of others, in some part. See the heading “Patents, Trademarks, Licenses, Franchises, Concessions, Royalty Agreements or Labor Contracts, including Duration” of Part I, Item 1. We also rely on a combination of trade secrets, nondisclosure agreements and other contractual provisions and technical code security measures to protect our intellectual property rights. Nevertheless, these measures may not be adequate to safeguard the technology underlying our storage solutions products. Notwithstanding our efforts to protect our intellectual property, our competitors may independently develop similar or alternative technologies or products that are equal or superior to our technology and storage solutions products without infringing on any of our intellectual property rights or design around our proprietary technologies. We need additional capital to continue or expand our current business operations, and our business operations may prove unsuccessful without additional funding.

Failure to raise additional capital or generate the significant capital necessary to continue and expand our operations and launched, sell or license our DigiLIBE product could reduce our ability to compete and result in lower revenue. We anticipate that our existing capital resources will only enable us to maintain currently planned operations through the first quarter of 2012; and we expect to continue to seek funding through equity and debt offerings, secured or otherwise. See the caption “Recent Sales of Unregistered Securities,” Part II, Item 5, for a complete description of our prior funding efforts. However, we premise this expectation on our current operating plans, which may change as a result of many factors. Consequently, we may need additional funding sooner than anticipated. Our inability to raise needed capital would harm our business. In addition, we may choose to raise additional capital due to market conditions or strategic considerations even if we believe we have sufficient funds for our current operating plans. To the extent that additional capital is raised through the sale of equity, debt, convertible debt securities or other combinations of our securities, including our newly authorized preferred stock, the issuance of these securities could result in substantial dilution to our stockholders.

We currently have no credit facility or committed sources of capital. To the extent operating and capital resources are insufficient to meet our future funding requirements, we will have to raise additional funds to continue the commercialization of our products. These funds may not be available on favorable terms, or at all. If adequate funds are not available on attractive terms, we may be required to cease or curtail operations significantly or to obtain funds by entering into financing, supply or collaboration agreements on unfavorable terms.

We face a higher risk of failure and loss of our entire business because we cannot accurately forecast our future revenues and operating results.

Our short operating history, lack of adequate internal controls and the rapidly changing nature of the market in which we compete make it difficult to accurately forecast our revenues and operating results. Furthermore, we expect our revenues and operating results might fluctuate in the future due to a number of factors, including the following:

- The timing of sales of our products and services;
- The timing of product implementation;
- Unexpected delays in introducing new products and services;
- Increased expenses, whether related to sales and marketing, product development or administration;
- The mix of product license and services revenue; and
- Costs related to possible acquisitions of technology or businesses.

Our limited resources may make it harder for us to manage growth, and the future of our business model maybe adversely harmed if we are unable to adequately manage this growth.

We have a limited basis upon which to evaluate our Storage Management Solutions systems ability to handle controlled or full commercial availability of our products and services. We anticipate that we may need to expand our operations significantly in the near future, and we may need to expand further to address the anticipated growth in our user base and market opportunities. To manage the expected growth of operations and personnel, we may need need to improve existing systems, and implement new systems, procedures and internal controls. In addition, we may need to expand, train and manage an increasing employee base. We may also need to expand our finance, administrative and operations staff. We may not be able to effectively manage this growth. Our planned expansion in the near future will place, and we expect our future expansion to continue to place, a significant strain on our managerial, operational and financial resources. Our planned personnel, systems, procedures and controls may be inadequate to support our future

operations. If we cannot manage growth effectively or if we experience disruptions during our expansion, the expansion may not be cost-effective.

If we do not respond effectively to technological change, our products and services could become obsolete and our business may fail.

The development of our products and services and other technology entails significant technical and business risks. To remain competitive, we must continue to improve our Information and Storage Management Solutions products and their Responsiveness, functionality and features.

High technology industries are characterized by:

- Rapid technological change;
- Changes in user and customer requirements and preferences;
- Frequent new product and services introductions embodying new technologies; and
- The emergence of new industry standards and practices.

The rapid technological change could render our existing technology and systems obsolete. Our success will depend, in part, on our ability to:

- license or acquire leading technologies useful in our business;
- develop new services and technologies that address our users' increasingly sophisticated and varied needs; and
- Respond to technological advances and emerging industry and regulatory standards and practices in a cost effective and timely way.

Future advances in technology may not be beneficial to, or compatible with, our business. Furthermore, we may not use new technologies effectively or adapt our technology and systems to user requirements or emerging industry standards in a timely way. In order to stay technologically competitive, we may have to spend large amounts of money and time. If we do not adapt to changing market conditions or user requirements in a timely way, our business, financial condition and results of operations could be adversely affected.

We face competition for customers that could effectively keep us from being successful in our planned business operations.

We compete with our current and potential customers' internal records and information management services capabilities. We can provide no assurance that these organizations will begin or continue to use an outside company, such as us, for their future records and information management services needs or that they will use us to provide these services. We also compete with multiple records and information management services providers in all geographic areas where we operate. Potential competitors with established market share and greater financial resources may introduce competing products. Thus, there can be no assurance that we will be able to compete successfully in the future, or that competition will not have a material adverse affect on our results of operations. We also compete with multiple information protection and storage services providers in all geographic areas where we operate. We continue to evaluate competitive activities to keep abreast of industry changes with both large and well known competitors and emerging competition.

Our storage systems may fail, and we may be subject to substantial liabilities and could lose a substantial portion of our customer base.

Our disaster recovery framework to control and address systems risks is not fully redundant, and we may incur and/or suffer the costs, delays and customer complaints associated with system failures and may not be able to efficiently and accurately provision new orders for services on a timely basis to begin to generate revenue related to those services.

While our storage system facilities are highly secure and virtually disaster proof, we will refresh our storage technology in 2012 with new equipment, which will include full redundancy.

Our operating results could be impaired if we become subject to burdensome government regulation and legal uncertainties, all of which would increase our cash requirements and may cause our business to fail.

Other than the Company's requirements to file all public reports under the regulations administered by the Securities and Exchange Commission, we are not currently subject to direct regulation by any domestic or foreign governmental agency, other than regulations applicable to businesses generally. However, due to the increasing popularity and use of the Internet, it is possible that a number of laws and regulations may be adopted with respect to the Internet, relating to:

- User privacy;
- pricing;
- Content;

Copyrights;
Distribution; and
Characteristics and quality of products and services.

The adoption of any additional laws or regulations may decrease the expansion of the Internet. A decline in the growth of the Internet could decrease demand for our products and services and increase our cost of doing business. Moreover, the applicability

of existing laws to the Internet is uncertain with regard to many issues, including property ownership, export of specialized technology, sales tax, libel and personal privacy. Our business, financial condition and results of operations could be seriously harmed by any new legislation or regulation. The application of laws and regulations from jurisdictions whose laws do not currently apply to our business, or the application of existing laws and regulations to the Internet and other online services could also harm our business.

Our Information and Storage Management Solutions products rely substantially on the Internet in multiple states. These jurisdictions may claim that we are required to qualify to do business as a foreign corporation in each state or foreign country. Our failure to qualify as a foreign corporation in a jurisdiction where we are required to do so could subject us to taxes and penalties. Other states and foreign countries may also attempt to regulate our business or prosecute us for violations of their laws. Further, we might unintentionally violate the laws of foreign jurisdictions and those laws maybe modified and new laws may be enacted in the future.

The United States Congress has enacted legislation limiting the ability of the states to impose taxes on Internet accessory to impose multiple or discriminatory taxes on electronic commerce. This legislation, known as the Internet Tax Nondiscrimination Act, imposed a moratorium, which commenced November 1, 2003 and was extended to 2014, on state and local taxes on electronic commerce, where such taxes are discriminatory, and Internet access, unless the taxes were generally imposed and actually enforced prior to October 1, 1998. Various states continue to attempt to regulate and tax Internet use and sales of products and services. The imposition of these taxes could seriously adversely affect Internet commerce and hinder our ability to become profitable.

The Internet may fail or providers of these services may increase their costs for these and related services, which could increase our costs and make our services less attractive to customers.

The secure transmission of confidential information over public networks is a significant barrier to electronic commerce and communications. Anyone who can circumvent our security measures could misappropriate confidential information or cause interruptions in our operations. We may have to spend large amounts of money and other resources to protect against potential security breaches or to alleviate problems caused by any breach. Peering agreements of our business partners like Integra Telecom with Internet service providers, allow access to the Internet and exchange traffic with these providers. Depending on the relative size of the providers involved, these exchanges may be made without settlement charges. Recently, many Internet service providers that previously offered peering have reduced or eliminated peering relationships or are establishing new, more restrictive criteria for peering and an increasing number of these providers are seeking to impose charges for transit. Increases in costs associated with Internet and exchange transit could have an adverse effect on our revenues for our services, most of which require Internet access. Our providers may not be able to renegotiate or maintain peering arrangements on favorable terms, which could increase our costs and expenses and impair our growth and performance.

Our auditor's "Going Concern" qualification in our consolidated financial statements might create additional doubt about our ability to stay in business, potentially resulting in total stockholder loss on investment.

The following is a quotation from our auditor's report that is filed as a part of this Annual Report: "The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern."

See Note 2 to our consolidated financial statements. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty."

Note 2 of our consolidated financial statements states: "As shown in the accompanying financial statements, the Company has incurred net losses of \$3,988,543 for the year ended December 31, 2011 and has negative working capital at December 31, 2011 of \$2,324,242. The Company continues to be dependent on its ability to generate future revenues, positive cash flows and additional financing. There can be no guarantee that the Company will be successful in generating future revenues, in obtaining additional debt or equity financing or that such additional debt or equity financing will be available on terms acceptable to the Company. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern."

Multiple acts of God could result in data loss and subject us to substantial liabilities and the loss of our business and customers.

The operation of our business depends on the efficient and uninterrupted operation of the Internet and our Storage Management Solutions hardware systems. Our systems and operations will be vulnerable to damage or interruption

from many sources, including fire, flood, power loss, telecommunications failure, break-ins, earthquakes and similar events. Our servers will also be vulnerable to computer viruses, physical or electronic break-ins and similar disruptions. Any substantial interruptions in the future could result in the loss of data and could destroy our ability to generate revenues from operations.

Risks Related to Our Common Stock

Our common stock is “penny stock” under Securities and Exchange Commission Rules and Regulations, which means there is a very limited trading market for our shares.

Our common stock is deemed to be penny stock as that term is defined in Rule 3a51-1 of the Securities and Exchange Commission. Penny stocks are stocks (i) with a price of less than five dollars per share; (ii) that are not traded on a “recognized” national exchange; (iii) whose prices are not quoted on the NASDAQ automated quotation system (NASDAQ-listed stocks must still meet requirement (i) above); or (iv) in issuers with net tangible assets less than \$2,000,000 (if the issuer has been in continuous operation for at least three years); or \$5,000,000 (if in continuous operation for less than three years); or with average revenues of less than \$6,000,000 for the last three years. Section 15(g) of the Exchange Act and Rule 15g-2 of the Securities and Exchange Commission require broker dealers dealing in penny stocks to provide potential investors with a document disclosing the risks of penny stocks and to obtain a manually signed and dated written receipt of the document before effecting any transaction in a penny stock for the investor’s account. Potential investors in our common stock are urged to obtain and read such disclosure carefully before purchasing any shares that are deemed to be “penny stock.”

Moreover, Rule 15g-9 of the Securities and Exchange Commission requires broker dealers in penny stocks to approve the account of any investor for transactions in such stocks before selling any penny stock to that investor. This procedure requires the broker dealer to (i) obtain from the investor information concerning his, her or its financial situation, investment experience and investment objectives; (ii) reasonably determine, based on that information, that transactions in penny stocks are suitable for the investor, and that the investor has sufficient knowledge and experience as to be reasonably capable of evaluating the risks of penny stock transactions; (iii) provide the investor with a written statement setting forth the basis on which the broker dealer made the determination in (ii) above; and (iv) receive a signed and dated copy of such statement from the investor, confirming that it accurately reflects the investor’s financial situation, investment experience and investment objectives. Compliance with these requirements may make it more difficult for investors in our common stock to resell their shares to third parties or to otherwise dispose of them.

Due to the substantial instability in our common stock price, you may not be able to sell your shares at a profit or at all, and as a result, any investment in our shares could be totally lost.

The public market for our common stock is very limited and volatile. As with the market for many other small companies, any market price for our shares is likely to continue to be very volatile. In addition, factors such as the following may significantly affect our share price:

• Our competitors’ announcements and successes or failures;

• Other evidence about the safety or efficacy of our products;

• Announcements of new competitive products or successes by our competitors;

• Increased or new governmental regulation of our products;

• Our competitors’ developments of competing patents or proprietary rights or other technology; and

• Fluctuations in our operating results.

Our common stock has a limited trading history, and it will be difficult to determine any market trends or prices for our shares where this present limited market is believed to be based primarily on supply and demand.

Our common stock currently is quoted on the Pink Sheets, under the symbol “DIGI.” However, with very little trading history, a trading market that does not represent an “established trading market,” a limited current public, volatility in the bid and asked prices and the fact that our common stock is very thinly traded, you could lose all or a substantial portion of your funds if you make an investment in us.

The sale or potential sale of shares of our common stock that may become publicly tradable under Rule 144 in the future will have a severe adverse impact on any market that develops for our common stock, and you may lose your entire investment or be unable to resell any shares in us that you purchase.

12 months from the filing of our Form 10 Registration Statement or on or about May 13, 2009, and provided that we are “current” in the filing of all of our reports that are then required to have been filed with the Securities and Exchange Commission under the Exchange Act, substantially all shares of our common stock will have been held for at least six

months and will be available for public sale under Rule 144. That will substantially increase the shares available to be freely publicly traded. See the heading “Recent Sales of Unregistered Securities; Use of Proceeds from Unregistered Securities,” Part II, Item 5, for information about the number of shares that may become available for resale under Rule 144.

ITEM 2: PROPERTIES

Our Data Storage Center is located at 511 6th Street South Minneapolis, MN 55401, and we have contracted with Integra Telecom for data center space and communications (the “Integra Telecom Contract”). Integra Telecom is a vendor that provides cabinet space, power and Internet connectivity. This arrangement ensures capital expenditures are at a minimum, while maintaining the flexibility to set up a new data center in any one of the 80 geographically dispersed locations throughout the world. Our DigiBAK service is not limited by geographic concerns. As new customers are added, we will also add capacity to our Data Storage Center that has virtually unlimited scalability. Our Data Storage Center occupies approximately 1,500 square feet of this facility, at a cost of \$3,300 per month and houses our equipment and software.

We lease 8,736 square feet of office space, consisting of floors three and four of the building located at 266 East 7th Street, St. Paul, MN 55101 (the “Upper Corner Lease”), for base rent of \$6,450 per month. This lease expired on December 31, 2011 and continue to lease the premises on a month-to-month basis.

ITEM 3: LEGAL PROCEEDINGS

In June 2011, the Company was made a party to a lawsuit initiated by one of its preferred stockholders seeking recovery of their investment in the Company based on, among other claims, an alleged breach of the state's securities regulations. The Company believes the preferred stockholder's claim lacks factual basis and is without merit.

Accordingly, the Company has not accrued any manner of loss contingency related to this claim and litigation is currently pending.

We are not a party to any pending legal proceeding. To the knowledge of our management, no federal, state or local governmental agency is presently contemplating any proceeding against us. To the knowledge of our management, no director, executive officer or affiliate of ours or owner of record or beneficially of more than five percent of our common stock is a party adverse to us or has a material interest adverse to us in any proceeding.

PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND
5: ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock is traded on the PinkSheets under the trading symbol of "DIGI". The following table sets forth the high and low price for our common stock as quoted on the internet trading services for the quarterly periods Within the last two fiscal years. The quotations set forth below reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not necessarily represent actual transactions. On April 13, 2012, the closing bid price was \$0.08 for the high and \$0.08 for the low per share.

Quarter Ended	Closing Bid	
	High	Low
March 31, 2010*	\$0.28	\$0.28
June 30, 2010*	\$0.19	\$0.18
September 30, 2010*	\$0.24	\$0.21
December 31, 2010*	\$0.21	\$0.21
March 31, 2011*	\$0.13	\$0.13
June 30, 2011*	\$0.07	\$0.06
September 30, 2011*	\$0.08	\$0.07
December 31, 2011*	\$0.04	\$0.04

Holders

According to the records of our transfer agent, we had approximately 348 stockholders of record, not including an indeterminate number who may hold shares in "street name."

Dividends

We have not declared any cash dividends with respect to our common stock during the last two fiscal years, and do not intend to declare dividends in the foreseeable future. Instead, we intend to focus on funding our business operations and our intended Plan of Operation. There are no material restrictions limiting, or that are likely to limit, our ability to pay dividends on our securities.

Securities Authorized for Issuance under Equity Compensation Plans

Plan Category	Number of Securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans excluding securities reflected in column (a)
(a)	(b)	(c)	(d)
Equity compensation plans approved by security holders	8,535,707	* \$0.34	0 (2) 1,928,635 (3)
Equity compensation plans not approved by security holders	None	None	None
Total	8,535,707	(1) \$0.34	0 (2) 1,928,635 (3)

Reflects the overall grant of five year options totaling 12,112,365 that vest over various periods, less (1) the cancellation, effective April 17, 2008, of an option to purchase 525,000 shares granted to an employee who are no longer employed by us and (2) the forfeiture of options totaling 9,240,342 pertaining to employees who are no longer employed by us.

Reflects the approval by the Company's Board of Directors on July 15, 2010 to terminate the existing 2007 Stock (2)Option Plan in favor of the 2010 Long Term Incentive Plan approved on July 15, 2010, subject to approval by the shareholders at the Company's next annual meeting.

(3) Reflects the approval by the Company's Board of Directors on July 15, 2010, and the subsequent approval by the

Company's stockholders at the Company's Annual Meeting on October 14, 2010, to enact the 2010 Long Term Incentive Plan. A narrative description of the material terms of the equity compensation plans is set forth in Note 11 to our Consolidated Financial Statements.

Exemptions from Registration for Sales of Restricted Securities.

We issued all of these securities to persons who were "accredited investors" or "sophisticated investors" as those terms are defined in Rule 501 of Regulation D of the Securities and Exchange Commission; and each such person had prior access to all material information about us. We believe that the offer and sale of these securities were exempt from the registration requirements of the Securities Act of 1933, as amended (the "Securities Act"), pursuant to Sections 4(2) and Rule 506 of Regulation D of the Securities and Exchange Commission.

Purchases of Equity Securities by Us and Affiliated Purchasers

There were no purchases of our equity securities by us during the years ended December 31, 2011, and 2010.

ITEM 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

This Annual Report on Form 10-K contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that reflect our current estimates, expectations and projections about our future results, performance, prospects and opportunities. Forward-looking statements include, without limitation, statements about our market opportunities, our business and growth strategies, our projected revenue and expense levels, possible future consolidated results of operations, the adequacy of our available cash resources, our financing plans, our competitive position and the effects of competition and the projected growth of the industries in which we operate. This Annual Report on Form 10-K also contains forward-looking statements attributed to third parties relating to their estimates regarding the size of the future market for products and systems such as our products and systems, and the assumptions underlying such estimates.

Forward-looking statements are only predictions based on our current expectations and projections, or those of third parties, about future events and involve risks and uncertainties.

Although we believe that the expectations reflected in the forward-looking statements contained in this Annual Report on Form 10-K are based upon reasonable assumptions, no assurance can be given that such expectations will be attained or that any deviations will not be material. In light of these risks, uncertainties and assumptions, the forward-looking statements, events and circumstances discussed in this Annual Report on Form 10-K may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. Important factors that could cause our actual results, level of performance or achievements to differ materially from those expressed or forecasted in, or implied by, the forward-looking statements we make in this Annual Report on Form 10-K are discussed under "Item 1A. Risk Factors" and elsewhere in this Annual Report on Form 10-K.

Executive Summary

The Business

Our business is developing and delivering superior information management technologies and methodologies enabling our customers to manage, control, protect and access their information and data simply and cost effectively. Our traditional business is providing a cost effective on-line data protection solution to the small to medium business ("SMB") and small to medium enterprise ("SME") markets through our DigiBAK service." This on-line cloud storage management solution helps organizations properly manage and protect their entire network from one centralized location.

Our emerging business product, released in the first quarter of 2010, is called DigiLIBE. We believe that DigiLIBE is a game-changing product that addresses the desperate need for a fiscally responsible, integrated system to manage the increasing growth, volume, and diversity of unstructured data that now represents up to 85% of enterprise information and continues to grow rapidly. Content chaos is overwhelming companies' ability to meet compliance, utilize collaboration tools and optimize storage needs for their virtualized infrastructures.

DigiBAK and DigiLIBE are complementary products — DigiBAK providing cloud storage backup and recovery of structured data and operating system files and DigiLIBE offers information management and life-cycle control of unstructured data from end-user through archiving and back to the end user.

The DigiBak business

Our DigiBAK solution can backup and restore emails and all company data on every machine in a network, including desktops, laptops, file and print servers. We provide storage through a “utility based computing” philosophy, where customers pay for the gigabytes of data they store in DigiBAK Vault facility.

Through our DigiBAK service, we combine powerful, agent-less backup software with our SAS 70 compliant facility, to deliver to our customers an efficient and effective online-offsite data backup and restore solution. Our facilities enable us to provide offsite disaster recovery emphasizing intraday protection and restore for all of our customer primary data centers and geographically dispersed offices or campus settings. Our DigiBAK Vault is a top-line SAS 70 compliant facility that provides web based on-demand backup/restore service with all the benefits of direct fiber access to a “Level 5” data center. The Vault has 24/7 onsite physical security, including security guards, motion detectors, security cameras, card-key access, separate cages with individual locking cabinets and ladder racking. It also has battery generator back up power, temperature and humidity controls and fire suppression systems.

Geographically, we are located at the center point of the Metropolitan area network. Being centrally located at the focal point of the Twin Cities Fiber Channel and Gig loop, the pipeline for data and load capabilities are immense. We utilize both direct in-house sales and sales through business partner channels such as VAR’s (Value Added Remarketers) and third party integrators. Our resellers have extensive data storage knowledge and expertise and an established customer base. Our sales plan targets reseller, Original Equipment Manufacturer and channel partnerships regionally and nationally that possess utility-oriented sales systems. We and our partners target vertical markets specifically in the Small Business Market (SMB) and the Small and Intermediate size Enterprises of 100 — 5000 employees with an average of four sites and five — 20 Terabytes of information to archive.

As a result of our sales and marketing efforts of our DigiBAK product, our customer base has expanded from approximately 20 in fiscal 2005 to approximately 100 in fiscal 2006, 508 in 2007, 731 in 2008, 789 in 2009, 890 in 2010 and 910 as of December 31, 2011. While our annual sales increased from \$402,638 in 2006 up to \$3,192,463 in 2009, in 2010 we began to experience a decline in annual sales posting \$2,143,882 in 2010 and \$1,480,154 in 2011. Despite this strong overall customer trend, we continue to struggle with profitability because of increasing competitive pressure causing commodity-like pricing through cloud-like storage. While we have continued to grow our customer base, we have also had to adjust pricing to maintain competitive advantage. We have significantly improved our support infrastructure and have been able to hold our margins. We still need to raise cash in 2011 to grow our overall business, but we believe we are in a much better financial and expense position than we were a year ago through targeted expense reduction and debt conversion. The product features that we are offering to our clients we believe have superior functionality to the mainstream competition and fill a customer need. We expect this gain new business in 2012.

The Emerging New DigiLIBE Product

In 2008, we began to pursue a strategy of expanding our solution to address the need of the industry for managing structured data through DigiBAK, but also provide information management abilities for the unstructured data. This effort led to the development and release of the product called DigiLIBE, a virtual corporate library that is designed to link together multiple disparate hardware and data storage environments to provide organizations with the ability to capture, classify, share, preserve, protect, achieve, and deliver the right information, to the right people, at the right time, helping them make smart informed business decisions. DigiLIBE should be understood as follows — as a company continues to virtualize their hardware and data storage environments, DigiLIBE provides a complementary virtualized environment for the company’s primary asset — its information. It does not matter if the information is on a user machine, on a server, or in archive. A customer can control it, secure it, and access it.

Growing both Business Segments:

We believe the benefits of making a strategic decision to grow both the DigiBAK and DigiLIBE businesses are:

(i) solving a major industry and customer problem of managing continually growing information volume and associated cost of storage and retrieval;

(ii) being able to access a larger share of opportunity in the information management storage business;

(iii)

offering significant technological advantages in corporate policy level control of information and ability to leverage knowledge from the information it creates; and

(iv) optimizing how we synergistically allocate capital and resources between both business.

DigiLIBE has received excellent feedback on the capability, performance, and function it delivers since its initial release.

Our sales and prospecting efforts have also reaffirmed the potential of selling DigiBAK services as part of a DigiLIBE sale.

To date, Digitiliti has achieved significant market recognition and brand value having successfully established its presence in several vertical markets such as Finance, Legal, Telco, Managed Service Provider, Healthcare, Information Technology Services, and Management Consulting. In June 2010, DigiLIBE won the Tech Awards Circle Gold Award in the Midrange Software category. In briefings, leading industry analysts have described DigiLIBE as a unique and potentially disruptive product integrating both the storage management and information management markets.

We believe DigiLIBE is a fiscally responsible solution at a price, performance, and ease of use level that disrupts the current competitors' point solution landscape and positions while exceeding customers' expectations and needs. Our new product represents a significant step toward our goal of becoming a technology leader in the information content and context management marketplace.

Intellectual Property Protection

We have taken action to protect our key DigiLIBE technologies. Currently pending are four key claims filed for patent protection in our initial patent application filed in January, 2009. Going forward, we will strive to enhance our innovative products and we will continue to protect Digitiliti's Intellectual Property.

The Market and Resellers

Our channel strategy for DigiBAK and DigiLIBE is to target regional and national resellers who have technical support and infrastructure to deploy the products into the small and intermediate size enterprises of 50 to 5000 employees or workstations. Our strategy is to target and develop these channels with a vertical market focus on regulation and compliance, collaboration, and virtualization. For resellers, we believe their incentive is that they can grow their business by selling the products, they get a monthly annuity from the cost of data archiving as they improve cost and efficiency of their client's environment, and they can provide value-added consulting and software services through DigiLIBE's Application Program Interfaces, (AP's) and compliance engine.

Company Funding

In order to fund continuing operations and the growth of the new product DigiLIBE, we have aggressively reduced overall operating costs to increase profitability of our DigiBAK operations. We have continued to reduce the annual salaries and wages associated with our DigiBAK operations by over 20% in the past two years, while increasing operational efficiencies and lowering overall costs of goods sold. As previously stated, we implemented additional restructuring of our DigiBAK operations to increase profitability, improve cash flow and reduce cash burn rate. Through these actions, we have continued to reduce our cash burn rate per month associated with DigiBAK business. At present, we continue to raise additional capital to provide the financial resources needed to achieve our strategy, while we are balancing our desire to aggressively launch our new product with the reality of available capital.

Throughout 2011, our continuing operations have been funded, in large part, through the following:

1. On February 28, 2011, the Company completed the placement of \$1,182,844 of Secured Convertible Promissory Note (the "Notes") and Warrants (collectively, the "First Secured Convertible Debt Offering"). The Lenders in the First Secured Convertible Debt Offering paid a 10% discount for their investment, resulting in a "stepped-up" basis in their individual Notes for a total principal amount of \$1,301,128. The Notes bear interest at the rate of 12% per annum, have an 18-month maturity date and are convertible to common shares at \$0.20 per share. The Notes are secured by a first lien on all assets of the Company. In conjunction with the First Secured Convertible Debt Offering, the Lenders received warrants to purchase an aggregate of 3,252,821 common shares. The warrants vested immediately, have a five year term, a \$0.30 exercise price and are redeemable by the Company in the event of an acquisition.

2. On June 28, 2011, the Company initiated the placement of a \$1,500,000 Junior Secured Convertible Debt Offering that provides for the sale of up to an aggregate principal amount of \$1,500,000 Junior Secured Convertible Promissory Notes (the "Junior Notes") and Warrants. The Junior Notes bear interest at 8% per annum, have a 24-month maturity date and are secured by the assets of the Company with the repayment being subordinated to the repayment of all secured notes previously issued by the Company. In addition, the investors in this Junior Secured Convertible Debt Offering receive five-year warrants to purchase that number of common shares equal

to 10% of the principal amount of their Junior Note(s) divided by the exercise price of \$.06 per share.

On June 28, 2011, we closed on the first \$500,000 tranche of the Junior Secured Convertible Debt Offering. In conjunction with the closing of the first tranche of the Junior Secured Convertible Debt Offering, the investors received warrants to purchase an aggregate of 833,333 common shares. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

On September 15, 2011, we broke escrow on the remaining \$1,000,000 available under the second tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by closing on \$550,000 of proceeds from the sale of the Junior Notes. In conjunction with the sale of \$550,000 of these Junior Notes, the investors received an aggregate of 916,667 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

On December 5, 2011, we broke escrow on the third tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by closing on \$30,000 of proceeds from the sale of Junior Notes. In conjunction with the sale of \$30,000 of these Junior Notes, the investors received an aggregate of 50,000 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

And on December 31, 2011, we closed the fourth tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by converting \$379,534 of existing convertible debt into the Junior Secured Convertible Debt Offering. In conjunction with the conversion of this \$379,534 of existing convertible debt through the issuance of the Junior Notes, the investors received an aggregate of 682,556 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

Liquidity and Capital Resources

Our liquidity is dependent, in the short term, on proceeds from newly issued debt and the sale of our common stock and preferred stock for cash. In the long term, we may need to continue expanding our capacity of the Data Storage Center by investing in property and equipment and software licenses. As discussed in Note 2 to the consolidated financial statements, the Company has suffered recurring losses from operations and a working capital deficit. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

We have financed our operations, debt service and capital requirements through cash flows generated from operations, the issuance of secured and unsecured convertible debt financing, capital leases and issuance of equity securities. We had a working capital deficit of \$2,324,242 at December 31, 2011. We had cash of \$499 as of December 31, 2011, compared to having cash of \$27,557 at December 31, 2010.

We used \$1,657,773 of net cash in operating activities for the year ended December 31, 2011, compared to net cash flows used in operating activities of \$1,916,844 for the year ended December 31, 2010. Cash used in operating activities during the year ended December 31, 2011, funded a net loss of \$3,988,543. This net loss was offset by non-cash charges of \$385,154 for amortization and depreciation, \$755,409 associated with stock options expense, \$414,402 related to amortization of the discount on our convertible debt and deferred financing costs, \$67,614 loss on settlement of debt, \$54,840 bad debts expense, \$111,050 for common stock issued for services and \$58,548 warrants expense. Cash used in operating activities during the year ended December 31, 2010, funded a net loss of \$6,414,639. This net loss was offset by non-cash charges of \$632,670 for amortization and depreciation, \$310,967 associated with stock options expense, \$372,836 related to amortization of the discount on our convertible debt and deferred financing costs, \$306,428 loss on settlement of debt, \$40,893 bad debt expense, \$238,340 for common stock issued for services, \$1,522,950 additional beneficial conversion feature on converted notes, and \$456,329 of warrants expense.

Net cash flows used by investing activities was \$5,863 for the year ended December 31, 2011, compared to net cash flows used in investing activities of \$69,509 for the year ended December 31, 2010. Both comparable totals are attributed to our purchase of property and equipment and software licenses during these two periods.

Net cash flow provided by financing activities were \$1,636,578 for the year ended December 31, 2011, compared to net cash provided by financing activities of \$1,872,824 for the year ended December 31, 2010. During 2011, cash provided by financing activities is primarily due to net proceeds of \$1,891,494 received from the issuance of convertible debt, proceeds from debt and related party debt of \$166,000 and proceeds from the sale of common stock

of \$63,000 that supported payments of \$23,308 on capital lease obligations, \$235,607 payments on notes payable and \$225,001 payments on convertible note. During 2010, cash provided by financing activities is primarily due to proceeds of \$1,619,050 received

from the issuance of equity securities, \$509,900 received from the exercise of warrants and proceeds of \$250,000 from convertible notes payable that supported payments of \$46,554 on capital lease obligations, \$364,572 payments on notes payable and \$95,000 payments on convertible notes.

Results of Operations

Year Ended December 31, 2011 as compared to the Year Ended December 31, 2010

Our sales for 2011 decreased to \$1,480,154 compared to \$2,143,882 in 2010, reflecting a \$663,728 decrease in annual revenue, despite an increase in the number of our customers to 910 at December 31, 2011 from 890 at December 31, 2010. During 2011, we experienced considerable competitive and economic pressure on our pricing due to an ever-expanding range of viable alternative storage platforms and services offered throughout the industry and the weak economy. Concurrent with the pricing pressure, we took action to restructure our resources, strengthened our VAR relationships, repositioned our offering and refined other aspects of the DigiBAK business to increase our margins. Customers remain highly satisfied with the service and simplicity of our DigiBAK offering, attributes of which are competitive differentiators and sought after by new customers.

Gross profit for 2011 was \$165,930 compared to \$640,119 in 2010, reflecting a 74% decrease from 30% in 2010 down to 11% in 2011. Our overall gross margin has remained stable due to actions taken in 2011 to restructure the resources associated with our DigiBAK business and the inherent benefits of our business model that relies on the organic growth of our customer's data, yet does not require a proportionate expenditure in capital costs. We manage our Data Storage Center to plan for growth and capacity and can efficiently manage and support this data growth without requiring significant capital cost in the short term. We do, however, plan to refresh our hardware technology on a three to four year cycle, which will be coming up in 2012.

Research and development expenses during 2011 were \$447,476 compared to \$992,210 in 2010. In 2009, we reorganized our development effort by redefining the DigiLIBE architecture and release plan, we brought the software development in-house with a combination of internal and targeted skilled contractors and streamlined the development process, which produced a much more efficient and effective approach. We continued this effort during 2010 and 2011 producing greater focus and oversight over design architecture and cost control which resulted in the successful development and first quarter 2010 roll-out of our DigiLIBE product.

During 2011, we incurred sales and marketing expense of \$527,399, compared to \$849,337 incurred during 2010. Our 2011 sales and marketing plan reflected a redesign of our website coupled with our transition to a new public relations firm, which helped get our message viral, generate qualified leads and be able to increase Digitiliti's reach across the internet to potential customers more effectively.

General and administrative expenses decreased by \$262,080 to \$2,419,445 in 2011 compared to \$2,681,525 incurred during 2010. The decrease is primarily attributable to a reduction in our overall personnel and those attendant costs including associated insurance cost and other resources. This reduction in general and administrative expenses reflects the company's disciplined cost containment system that has historically reduced the general overhead expenses through personnel realignment to priorities and goals, vendor contract negotiations, stock based compensation alternatives, insurance costs and a daily/weekly focus between the CEO and CFO on expenditures.

Interest expense for 2011 decreased by \$1,532,719 to \$692,539, compared to \$2,225,258 incurred in 2010. During 2010, the company initiated a program to convert its outstanding convertible debt into shares of the company's common stock. During 2010, the company converted a large portion of its convertible note debt portfolio which resulted in the recognition of associated beneficial conversion feature and unamortized warrant cost that was reflected as interest expense during 2010.

Recent and other Significant Events affecting our results of Operations and Financial Condition

On February 28, 2011, the Company completed the placement of \$1,182,844 First Secured Convertible Promissory Note and Warrants (the "First Secured Convertible Debt Offering"). All of the securities issued in conjunction with the First Secured Convertible Debt Offering were made to "accredited investors" as those terms are defined on Rule 501 of Regulation D of the Securities and Exchange Commission, The Lenders in the First Secured Convertible Debt Offering paid a 10% discount for their investment, resulting in a "stepped-up" basis in their individual Secured Convertible Promissory Notes. The First Secured Convertible Promissory Notes bear interest at the rate of 12% per annum, have an 18-month maturity date and a \$.20 per share conversion rate in the Company's common stock. The

First Secured Convertible Promissory Notes are secured by a first lien on all assets of the Company; provided, however, that the Lenders

agreed to subordinate to a lien with respect to up to \$100,000 of original principal amount of other notes against the Company's vault.

The Lenders received Warrants to purchase an aggregate of 3,252,821 shares of Company Common Stock. The Warrants have a five year term, \$.30 exercise price and include a cashless exercise provision and a put right in the event of an acquisition of the Company valued at the Black Scholes Value of the unexercised portion of the Warrant obtained from the "OV" function on Bloomberg determined as of the day prior to announcement of the transaction. The Warrants include antidilution provisions for stock splits, stock dividends and recapitalization only.

The First Secured Convertible Debt Offering was conducted in order to implement a previously approved repayment of debt obligations owed to two stockholders (the "Miners") (see Footnote 6, Note Payable and Footnote 7, under "Other Convertible Notes"), as well as provide additional working capital for the Company. The debt obligations owed to the Miners by the Company (the "Miner Debt") were secured by a first lien on the Company's assets and consisted of the following: a \$250,000 12% secured convertible note issued in November 2008 with a \$0.35 per share conversion rate; a \$50,000 payable that was due on demand and bore interest at 10% per annum; and a \$231,540 6% promissory note that was due on demand. Contemporaneously with the closing of the Secured Convertible Debt Offering, the Company and the Miners executed a Repayment of Note Obligations and Release of Security Interest Agreement that provided for the repayment of \$431,540 of principal of the Miner Debt with the remaining principal balance owed of \$100,000 being converted into a secured promissory note under the Secured Convertible Debt Offering.

Correspondingly, all outstanding accrued interest owed on the Miner Debt of \$103,109 was paid to the Miners in the form of 687,393 shares of the Company's common stock, along with a modification in terms on 350,000 common stock purchase warrants previously issued to the Miners and the issuance of an additional 200,000 warrants reflecting a five year term and a \$.30 per share exercise price. After completion of all documentation reflecting the repayment of the Miner Debt, the Miners released their first lien in the Company's assets in preference to those Lenders associated with the Secured Convertible Debt Offering.

In June, 2011, the Company initiated the placement of \$1,500,000 Junior Secured Convertible Promissory Note and Warrants (the "Junior Secured Convertible Debt Offering"). The investors in the Junior Secured Convertible Debt Offering received five-year warrants to purchase that number of common shares equal to 10% of the principal amount of their Junior Note(s) divided by the exercise price of \$.06 per share. The Junior Notes bear interest at 8% per annum, have a 24-month maturity date and are secured by the assets of the Company with the repayment being subordinated to the repayment of all secured notes previously issued by the Company. The Junior Notes also contain a contingent conversion option wherein, at the option of 60% of the investors and twelve months following the closing of the first tranche, all or a portion of the principal amount and accrued interest may be converted into common shares at an exercise price of \$.06 per share but only if the Junior Secured Convertible Debt Offering has been raised. However, the Junior Notes automatically convert into common shares upon a subsequent equity funding round of at least \$3 million of new equity capital ("Qualified Round") at a per share price equal to the per share price of the qualified round. All of the securities issued in conjunction with the Junior Secured Convertible Debt Offering were sold to "accredited investors" as those terms are defined on Rule 501 of Regulation D of the Securities and Exchange Commission, and each such person had prior access to all material information about the Company. The offer and a sale of these securities were exempt from the registration requirements of the Securities Act of 1933, as amended (the "Securities Act"), pursuant to, among other reasons, Section 4(2) and 4(6) thereof, and Rule 506 of Regulation D of the Securities and Exchange Commission. Registration of sales to "accredited investors" are preempted from state regulation.

On June 28, 2011, we closed on the first \$500,000 tranche of the Junior Secured Convertible Debt Offering. In conjunction with the closing of the first tranche of the Junior Secured Convertible Debt Offering, the investors received warrants to purchase an aggregate of 833,333 common shares. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

Edgar Filing: Digitiliti Inc - Form 10-K

On September 15, 2011, we broke escrow on the remaining \$1,000,000 available under the second tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by closing on \$550,000 of proceeds from the sale of the Junior Notes. In conjunction with the sale of \$550,000 of these Junior Notes, the investors received an aggregate of 916,667 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

On December 5, 2011, the Company closed on the sale of \$30,000 of proceeds from the sale of the Junior Notes. In conjunction with the sale of \$30,000 of these Junior Notes, the investors received an aggregate of 50,000 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share. On December 31, 2011, we closed the fourth tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by converting \$379,534 of existing convertible debt into the Junior Secured Convertible Debt Offering. In conjunction with the conversion of this \$379,534 of existing convertible debt through the issuance of the Junior Notes, the investors received an aggregate of 632,556 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

Critical Accounting Policies and Estimates

Software Revenue Recognition

The Company derives its revenue from sales of its products and services. Product revenue is derived from sales of the Company's DigiBak service and new DigiLibe service.

The DigiBak service provides an offsite storage solution through a "utility based computing philosophy" where customers pay for the gigabytes of data they store in the DigiBak vault.

The DigiLibe service is a multiple element software sales arrangement that is comprised of three key components that act as one: Client Agent, Information Director, and Archive Information Store.

For multiple element software license sales arrangements that do not require significant modification or customization of the underlying software, we recognize revenue when: (1) we enter into a legally binding software arrangement with a customer for the license of software, (2) we deliver the software, (3) price is deemed fixed or determinable and free of contingencies of significant uncertainties and (4) collection is probable.

For sales arrangements with multiple elements, we defer revenue for any undelivered elements, and recognize revenue when the product is delivered or over the periods in which the service is performed. If we cannot objectively determine the fair value of any undelivered element included in bundled arrangements, we defer revenue until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements.

Share-Based Payment

The Company accounts for share-based awards issued to employees and non-employees in accordance with the guidance on share-based payments. Accordingly, employee share-based payment compensation is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the requisite service period (generally the vesting is over a 3-year period). Additionally, share-based awards to non-employees are expensed over the period in which the related services are rendered at their fair value.

New Accounting Pronouncements

We do not expect the adoption of any recently issued accounting pronouncement's to have, a material impact on the Company's consolidated financial statements.

Off-Balance Sheet Arrangements

We had no off-balance sheet arrangements during 2011 and 2010.

ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required for smaller reporting companies.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors

Digitiliti, Inc.

St. Paul, Minnesota

We have audited the accompanying consolidated balance sheets of Digitiliti, Inc. (the "Company") as of December 31, 2011 and 2010 and the related consolidated statement of operations, stockholders' deficit and cash flows for each of the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Digitiliti, Inc. as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the consolidated financial statements, the Company has suffered losses from operations and has a working capital deficit. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regards to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

DIGITILITI, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Business Description and Summary of Significant Accounting Policies

The Company and Nature of Operations

Digitiliti, Inc. (we, our, the Company or Digitiliti) provides back up archiving and information management and methodologies enabling our customer to manage, control, protect and access their information data simply and cost effectively through our products and services.

Principles of Consolidation

The consolidated financial statements included the accounts of Digitiliti, a Delaware corporation and its wholly owned subsidiary, Cyclone Acquisition Corp. , a Minnesota corporation. All significant intercompany balances and transactions were eliminated.

Correction of a Prior Period

During the year, the Company discovered and corrected an error related to the expensing of options from 2007 through 2010. The error resulted in an overstatement of stock compensation expense and additional paid in capital. In accordance with the SEC's Staff Accounting Bulletin Nos. 99 and 108 (SAB 99 and SAB 108), the Company evaluated this error and, based on an analysis of quantitative and qualitative factors, determined that the error was immaterial to each of the prior reporting periods affected. However, if the adjustments to correct the cumulative effect of the above error had been recorded in the year ended December 31, 2011, the Company believes the impact would have been significant and would impact comparisons to prior periods. Therefore, as permitted by SAB 108, the Company corrected, in the current filing, previously reported results for the year ended December 31, 2010.

The Consolidated Balance Sheets as of December 31, 2010 and 2009 were also revised to reflect the cumulative effect of the error described above. The adjustment resulted in a decrease in accumulated deficit and additional paid in capital of \$828,024. There was no impact to the total consolidated stockholders' deficit as of December 31, 2010 and 2009.

The adjustments to the Consolidated Statements of Cash Flows for the year ended December 31, 2010 did not result in any changes to the amounts previously reported for net cash from operating activities, investing activities or financing activities.

Use of Estimates

The preparation of these consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that may affect certain reported amounts and disclosures in the consolidated financial statements and accompanying notes. The significant estimates relate to the collectability of accounts receivable, useful lives of software licenses, valuation of beneficial conversion feature on convertible debts, valuation of warrants and stock options, and valuation allowance for deferred income taxes. Actual results could differ from those estimates.

Credit risk

Cash is maintained in bank accounts which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts and does not believe it is exposed to any significant credit risk on cash.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is based on the aging, historical experience and management's judgment of the individual accounts receivable. Accounts receivable are written off against the allowance when management determines a balance is uncollectible and no longer actively pursues collection. Accounts receivable is presented net of the allowance for doubtful accounts of \$48,281 and \$10,753 at December 31, 2011 and 2010, respectively.

Property and Equipment

Property and equipment are recorded at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Computer equipment and furniture and

fixtures are depreciated over three to five years. Maintenance and repairs are charged to operations when incurred.

Software Licenses

Certain software is licensed from two vendors to facilitate the secure online data storage solution. The licenses are nonexclusive. These licenses were fully paid in a prior year and are owned outright by the Company and are amortized over five years from the date of purchase.

Long-Lived Assets

All long-lived assets are reviewed when events or changes in circumstances indicate that the carrying amounts of such assets may not be recoverable. An impairment loss is recognized when estimated undiscounted cash flows that can be generated by those assets are less than the carrying value of the assets. When an impairment loss is recognized, the carrying amount is reduced to its estimated fair value based on appraisals or other reasonable methods to estimate fair value. There was no impairment of long-lived assets as of December 31, 2011 and 2010.

Deferred Financing Costs

Costs associated with the issuance of debt is capitalized as deferred financing costs and amortized into interest expense using the effective interest method over the life of the related debt. At December 31, 2011 and 2010, unamortized deferred financing costs incurred totaled \$214,863 and \$4,466, respectively. Amortization of deferred financing costs for the years ended December 31, 2011 and 2010 was \$109,344 and \$41,252 respectively.

Fair Value of Financial Instruments

The carrying value of short-term financial instruments, including cash, accounts receivable, accounts payable and accrued expenses, short-term borrowings and capital lease obligations approximate fair value due to the relatively short period to maturity for these instruments. The long-term borrowings approximate fair value since the related rates of interest approximates current market rates.

Software Revenue Recognition

The Company derives its revenue from sales of its products and services. Product revenue is derived from sales of the Company's DigiBak service and new DigiLibe service.

The DigiBak service provides an offsite storage solution through a "utility based computing philosophy" where customers pay for the gigabytes of data they store in the DigiBak vault.

The DigiLibe service is a multiple element software sales arrangement that is comprised of three key components that act as one: Client Agent, Information Director, and Archive Information Store.

For multiple element software license sales arrangements that do not require significant modification or customization of the underlying software, we recognize revenue when: (1) we enter into a legally binding software arrangement with a customer for the license of software, (2) we deliver the software, (3) price is deemed fixed or determinable and free of contingencies of significant uncertainties and (4) collection is probable.

For sales arrangements with multiple elements, we defer revenue for any undelivered elements, and recognize revenue when the product is delivered or over the periods in which the service is performed. If we cannot objectively determine the fair value of any undelivered element included in bundled arrangements, we defer revenue until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements.

Research and Development Costs

Research and development costs are expensed as incurred. The Company expensed third party development costs totaling \$447,476 and \$992,210 in 2011 and 2010, respectively.

Share-Based Payment

The Company accounts for share-based awards issued to employees and non-employees in accordance with the guidance on share-based payments. Accordingly, employee share-based payment compensation is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the requisite service period (generally the vesting is over a 3-year

period). Additionally, share-based awards to non-employees are expensed over the period in which the related services are rendered at their fair value.

Income Taxes

Deferred income tax assets and liabilities are recognized for the expected future income tax consequences of events that have been included in the consolidated financial statements or income tax returns. Deferred income tax assets and liabilities are determined based on differences between the financial statement and tax bases of assets and liabilities using tax rates in effect for the years in which the differences are expected to reverse.

In evaluating the ultimate realization of deferred income tax assets, management considers whether it is more likely than not that the deferred income tax assets will be realized. Management establishes a valuation allowance if it is more likely than not that all or a portion of the deferred income tax assets will not be utilized. The ultimate realization of deferred income tax assets is dependent on the generation of future taxable income, which must occur prior to the expiration of the net operating loss carry forwards.

The Company also follows the guidance related to accounting for income tax uncertainties. In accounting for uncertainty in income taxes, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more likely than not threshold, the amount recognized in the consolidated financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. No liability for unrecognized tax benefits was recorded as of December 31, 2011 and 2010.

It is the Company's practice to recognize penalties and/or interest related to income tax matters in interest and penalties expense.

The Company is subject to income taxes in the U.S. federal jurisdiction and various states and local jurisdictions. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. The Company is not currently under examination by any taxing jurisdiction.

Net Loss per Share

Basic net loss per common share is computed by dividing the net loss by the weighted-average number of common shares outstanding. Diluted net loss per common share is computed based on the weighted-average number of common shares outstanding increased by dilutive common stock equivalents. For the years ended December 31, 2011 and 2010, potential dilutive securities had an anti-dilutive effect and were not included in the calculation of diluted earnings per common share.

Reclassifications

Certain 2010 amounts have been reclassified to conform to 2011 presentation.

General and administrative

General and administrative expenses for the year ended December 31, 2011 includes \$181,050 of expenses related to expenses incurred for services to upgrade our vault operations and support.

Recently Issued Accounting Pronouncements

Management does not expect the adoption of any recently issued accounting pronouncements to have a material impact on the Company's consolidated financial statements.

2. Going Concern

As shown in the accompanying financial statements, the Company incurred net losses of \$3,988,543 for the year ended December 31, 2011 and has negative working capital at December 31, 2011 of \$2,324,242. These conditions raise substantial doubt as to the Company's ability to continue as a going concern.

The Company continues to be dependent on its ability to generate future revenues, positive cash flows and additional financing.

There can be no guarantee that the Company will be successful in generating future revenues, in obtaining additional debt or equity financing or that such additional debt or equity financing will be available on terms acceptable to the Company. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

3. Property and Equipment

Property and equipment consisted of the following:

	December 31,	
	2011	2010
Computer equipment	\$2,661,934	\$2,656,071
Furniture and fixtures	14,511	14,511
	2,676,445	2,670,582
Less — accumulated depreciation	(2,640,417)	(2,512,477)
	\$36,028	\$158,105

Depreciation expense totaled \$127,940 and \$336,797 in 2011 and 2010, respectively.

4. Software Licenses

Software licenses consisted of the following:

	December 31,	
	2011	2010
Software licenses	\$1,553,132	\$1,553,132
Less — accumulated amortization	(1,373,738)	(1,116,524)
	\$179,394	\$436,608

Amortization expense totaled \$257,214 and \$295,873 in 2011 and 2010, respectively.

5. Related Party Transactions

At December 31, 2011 and 2010, balances due to related parties consisted of the following:

	2011	2010
Miscellaneous payables to various employees, bearing no interest, due on demand, unsecured	\$35,287	\$—
Notes payable to Directors, bearing interest at 12% per annum, maturing between June 25, 2011 and September 1, 2011, secured against accounts receivable, past due as of December 31, 2011	66,000	—
Convertible notes payable to Directors and Officers, bearing interest between 8% and 12% per annum, maturing between August 1, 2012 and June 28, 2013, convertible into common stock at rates between \$0.06 and \$0.20 per share, secured, net of unamortized discounts of \$19,845	125,155	—
	\$226,442	\$—

Management and Founders Agreements:

M2 Capital Advisors, Inc.

On May 3, 2006, we executed a consulting agreement with M2. The duties of M2 include introducing the Company to the financial community; researching and identifying potential business partners, executives, consultants and Board of Director candidates; assisting with securing leases or equipment financing; and other general business consulting services. The agreement also provided for the payment of various fees for raising capital, identifying an acquisition/reverse merger candidate, assisting with capital lease arrangements, etc. This agreement was amended March 2007, effective May 6, 2006.

At the time, Mark Savage, our former President and a former director, was the President and a principal stockholder of M2. While M2 was engaged, they assisted in raising \$3,504,010 of capital from the sale of our common stock and received \$350,401 in fees for these services. In addition, M2 assisted in raising \$2,035,950 in 12% convertible notes and received fees totaling \$203,595.

On or about March 23, 2009, we agreed to pay a 10% introduction fee to M2 under their current Letter Agreement with us that had been extended into May, 2009, on any funds raised by us in a planned \$1,500,000 financing through the sale of secured and unsecured convertible notes.

In April 2009, we initiated a \$750,000 raise through the issuance of 12% convertible notes that were secured by a third position security lien in our DigiBAK vault system and equipment. This offering also included the issuance of an equal number of warrants. See Note 7 for further details. We completed this offering in October 2009. In conjunction with the offering, M2 received \$66,500 reflecting the 10% introduction fee and were issued 5 year warrants totaling 375,000 with an exercise price of \$0.30. The introduction fee and the fair value of the warrants amounting to \$74,424 were charged to deferred financing costs.

Upon the closing of this convertible note offering in October 2009, we initiated an equity offering in November 2009 of our common stock that comprised "restricted securities" as that term is defined in Rule 144 of the Securities and Exchange Commission at a price of \$0.20 per share, for total aggregate gross proceeds through May 11, 2010, of \$1,857,000. In conjunction with specific monies raised by M2 Capital that were associated with this equity offering, M2 received a 10% introduction fee of \$118,000 through May 11, 2010. The related fees were charged to additional paid in capital as stock issuance costs.

In February 2011, we initiated a \$1,182,884 raise through the issuance of 12% convertible notes that were secured by a first lien on all assets of the Company; provided, however, that the Lenders agreed to subordinate to a lien with respect to up to \$100,000 of original principal amount of other notes secured against the Company's vault assets. This offering also included warrants to purchase an aggregate of 3,252,821 shares of the Company's common stock. In conjunction with the offering, M2 received \$9,500 reflecting the 10% introduction fee. The introduction fee was charged to deferred financing costs.

In total, M2 partners earned total fees of approximately \$9,500 and \$118,000 for the years ended December 31, 2011 and 2010, respectively.

6. Notes Payable

We issued a \$250,000 promissory note to a stockholder dated December 15, 2005. The note mirrors a promissory note between the stockholder and his bank, which matured on December 15, 2009 and had an interest rate 0.5% above the bank's index rate (6.00% at December 31, 201 and 2010). Subsequent to December 15, 2009, the maturity date of the

note was extended to February 1, 2011. The unpaid principal balance under this note was \$231,540 as of December 31, 2010. On February 28, 2011, this note was paid in full (see Note 7).

In June 2008, the Company negotiated a six-month payment plan with its primary software vendor Asigra, Inc. Under the terms of this payment plan, the Company was granted extended payment terms that omitted Asigra's standard 20% discount for a net 30-day early payment. This payment plan reflected monthly payments based on a percentage of outstanding invoices owed for software licenses and maintenance, with any remaining outstanding balance payable in December 2008. In December 2008, this payment plan was extended for another 6 months with all outstanding debt payable in May 2009. In July 2009, we executed a Payment and Security Agreement (the "Security Agreement") with Asigra that reflected an 8-month payment plan that would satisfy the existing balance owed to Asigra along with the inclusion of amounts to be charged over this 8-month period. This Security Agreement provided Asigra a security lien in the Company's DigiBAK vault system. As of March 6, 2010, the Company has made all payments called for under this Security Agreement totaling \$364,572 and now owns all of Asigra licenses outright.

During April 2011, the Company borrowed \$50,000 from a third party. This note is unsecured, bears interest at 12% per annum and matures on October 8, 2011. In connection with the loan, the lender received warrants to purchase an aggregate of 25,000 common shares at an exercise price of \$0.20 per share. The warrants vested immediately and have a term of five years. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$1,923 and was recorded as a discount to the note. The entire discount was amortized to interest expense during 2011.

On December 13, 2011, the Company borrowed \$50,000 from a third party. This note is secured against the Company's accounts receivable, bears interest at 12% per annum and matures March 13, 2012. In connection with the loan, the lender received warrants to purchase an aggregate of 50,000 common shares at an exercise price of \$0.05 per share. The warrants vested immediately and have a term of five years. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$2,381, which was recorded as a debt discount. The debt discount is being amortized over the life of the note using the effective interest method. The amortization expense recorded on the discount during 2011 totaled \$543.

7. Convertible Debt

A summary of the convertible debt activity, including related party convertible debt, for the years ended December 31, 2011 and 2010 is as follows:

	2011	2010
Convertible debt, net at beginning of period	\$ 1,032,941	\$ 3,679,273
Add: proceeds from issuance of new debt	2,058,284	250,000
Add: accrued interest converted into debt	113,377	—
Add: amortization of discounts	302,592	385,968
Add: convertible debt issued for debt issuance costs	64,000	—
Less: 10% face discounts	(118,284)	—
Less: discounts due to warrants issued with debt	(427,965)	—
Less: discounts due to beneficial conversion features	(144,635)	—
Less: principal converted to common stock	(75,000)	(3,187,300)
Less: principal payments	(225,001)	(95,000)
Total convertible debt, net at end of period	2,580,309	1,032,941
Current maturities of convertible debt, net at end of period	(1,206,050)	(782,941)
Convertible debt, non-current, net at end of period	\$ 1,374,259	\$ 250,000

A summary of the contingent beneficial conversion features for the years ended December 31, 2011 and 2010 are as follows:

Unrecognized beneficial conversion feature (BCF) at December 31, 2009	\$ 1,079,669
Less: beneficial conversion feature charged to interest on converted and extinguished debt	(1,041,079)
Unrecognized contingent beneficial conversion features at December 31, 2010	38,590
Add: contingent beneficial conversion features on new debt	185,572
Unrecognized contingent beneficial conversion features at December 31, 2011	224,162

12% Convertible debt — \$5.5 million Private Offering

In March 2007, we engaged M2 (see Note 5 — Related Party Transactions) to raise up to \$5.5 million from the sale of 12% convertible debt and warrants. This \$5.5 million raise was closed in September 2008. Under the initial conversion terms, the debt was convertible into common stock at \$0.50 per share, subject to an effective registration statement covering the underlying common stock that has been filed with the Securities and Exchange Commission. In addition, for each \$1 invested, the investor receives one half warrant to acquire one half of a share of common stock with a five year term at \$1.50 per share (the A warrants); and one half warrant to acquire one half share of common stock with a five year term at \$2.25 per share (the B

warrants). Each warrant cannot be exercised during the first 6-months and one day following issuance, unless there is an effective registration statement covering the underlying common stock that has been filed with the Securities and Exchange Commission. The warrants are callable at \$0.01 per warrant, if the common stock of the Company trades for 20 consecutive days on its principal market above \$2.25 for the first one half warrant and \$3.00 for the second one half warrant, provided there is an effective registration statement covering the underlying common stock that has been filed with the Securities and Exchange Commission. A total of 840,000 warrants at \$1.00, 2,330,000 warrants at \$1.50 and 2,330,000 warrants at \$2.25 were issued.

In conjunction with the sale of the 12% convertible debt referenced above, M2 received a 10% introductory fee, which totaled \$523,550 pursuant to a Consulting Agreement and an officer also received a 10% introductory fee which totaled \$26,450. These introductory fees were accounted for as deferred financing cost and were amortized using the effective interest method over the term of the convertible debt.

We analyzed these convertible debt and the warrants issued for derivative accounting consideration and determined that derivative accounting is not applicable for these debts.

The convertible debt was evaluated for a beneficial conversion feature, at which time it was concluded that a contingent beneficial conversion feature existed for a substantial portion of the convertible debt. The beneficial conversion feature was measured using the commitment-date stock price and will be recognized once the contingency is resolved. (see further discussion below regarding induced conversion of debt below.)

In addition, the relative fair value of the warrants was measured using the Black-Scholes Option Pricing Model and recorded as a debt discount, which is being amortized over the life of the debt using the effective interest method. The total discount recorded was \$2,116,131 and the unamortized balance at December 31, 2011 and 2010 was \$0.

In November 2008, we initiated a request to all of these convertible debt holders to either extend their respective convertible debt for another 18 months or to convert their principal and accrued interest into common stock. During 2009, the Company converted \$2,337,700 of its convertible debt and \$365,885 of accrued interest into 7,656,606 shares of the Company's common stock.

In exchange for extending their convertible debt for an additional 18 months, we agreed to reduce the exercise price of the associated warrants from \$1.50 and \$2.25 per share to \$1.00 per share, respectively for the A and B warrants. In addition, we agreed to extend the term of both the A and B warrants from 5 years to 6 1/2 years. However, the requirement of an effective registration was not removed in the case of extending the note.

In exchange for converting their convertible debt into common stock, we agreed to reduce the exercise price from \$0.50 to \$0.35 per share. We also agreed to reduce the exercise price of the associated warrants from the \$1.50 and \$2.25 per share to \$1.00 per share, respectively for the A and B warrants. In addition, we agreed to extend the term of both the A and B warrants from 5 years to 6 1/2 years. Furthermore, the requirement of an effective registration was removed to allow conversion, which removed the contingency associated with the beneficial conversion feature. As a result, the measured value associated with the converted debt was recognized as interest expense.

In June 2010, under the terms of our Incentive Offer, we initiated a request to the remaining convertible debt holders to convert their convertible notes at a preferential \$0.20 per share conversion rate. In response to this offer, the Company converted \$2,537,300 of its convertible debt and \$728,673 of accrued interest into 16,329,869 shares of the Company's common stock. The debt holders who elected to convert were also allowed to exercise their outstanding common stock warrants at a reduced exercise price of \$0.20 per share. The Company closed the Incentive Offer in July 2010.

During 2010, the Company entered into settlement agreements with five unsecured convertible note holders. Pursuant to these agreements, the Company repaid an aggregate of \$95,000 of principal and \$8,933 of accrued interest to settle the outstanding convertible notes. In connection with the settlement, the note holders surrendered all or a portion of the warrants associated with these notes.

We evaluated the extension event in November 2008 under the guidance for troubled debt restructuring and debt modification or exchange of debt instruments. Because the investors did not grant concession on these outstanding loans, the transactions were not accounted for as troubled debt restructuring. Consequently, we evaluated these transactions to determine if the modification was substantial and determined they were not. As a result, no gain or loss was recorded on the date of the extension since the modification in terms is not considered significant. For the year ended December 31, 2009, the Company recognized warrant expense of \$73,272 associated with the modification of the exercise price of the warrants on the extended

debt and charged the unamortized discount to interest expense over the remaining life of the convertible debt under the new terms.

We accounted for the conversion events in June 2010 and November 2008 as induced conversions under the guidance of FASB ASC 470-20. Under ASC 470-20, the Company recognized additional interest expense for 2010 and 2009 totaling \$608,956 and \$299,693, respectively, which is equal to the fair value of the incremental compensation cost created by the modification of the exercise price of the warrants and the incremental increase in the fair value of the conversion option as a result of the reduction in the conversion price. In addition, the remaining unamortized discount on the debt converted in 2010 and 2009 of \$189,331 and \$378,590, respectively, was recognized to interest expense.

Likewise, the contingency related to the contingent beneficial conversion feature was resolved on the respective dates of conversion. The beneficial conversion features calculated on the respective commitment dates were fully recognized through interest expense and additional paid in capital. During 2010 and 2009, \$913,994 and \$776,725, respectively, of the contingent beneficial conversion feature was recognized into interest expense. At December 31, 2011 and 2010, the unamortized debt discount on the convertible debt and the unrecognized contingent beneficial conversion feature amounted to \$0 and \$38,590, respectively.

During 2011, the Company completed a repayment plan with one of the note holder from the \$5.5 million Private Offering that reflected the repayment of accrued interest of \$37,100 with the conversion of the outstanding \$75,000 principal balance into 375,000 shares of the Company common stock based on a \$0.20 per share conversion rate.

As of December 31, 2011, the unpaid principal amounts under the \$5.5 million Private Offering totaled \$115,000 and 190,000, respectively. The Company is in default on \$115,000 of the convertible debt and accrued interest of \$63,266 as of December 31, 2011.

12% Convertible Debt — \$750,000 Private Offering

In April 2009, we raised \$750,000 from the sale of 12% convertible debt and warrants that are secured against the assets associated with our Pharaoh Business Fortress Storage Center, subject to certain other liens. Under the conversion terms, the debt is convertible into common stock at \$0.35 per share, subject to an effective registration statement covering the underlying common stock that has been filed with the Securities and Exchange Commission. In addition, for each \$1 invested, the investor receives one warrant to acquire one share of common stock with a five year term at \$0.50 per share. The warrants are callable at \$0.01 per warrant, if the common stock of the Company trades for 20 consecutive days on its principal market above \$1.50 per share, provided there is an effective registration statement covering the underlying common stock that has been filed with the Securities and Exchange Commission. In conjunction with the sale of the 12% convertible debt referenced above, we paid M2 10% introductory fee totaling \$66,500 and issued 5 year warrants totaling 375,000 with an exercise price of \$0.30. The introductory fee and the fair value of the warrants amounting to \$74,424 were charged to deferred financing costs and are amortized using the effective interest method over the term of the convertible debt.

We analyzed the convertible debt and the warrants issued for derivative accounting consideration and determined that derivative accounting is not applicable for these debts.

The convertible debt was evaluated for a beneficial conversion feature at which time it was concluded that a contingent beneficial conversion feature existed for a substantial portion of the convertible debt. The beneficial conversion feature was measured using the commitment-date stock price to be \$127,085, which will be recorded once the contingency has been resolved. In addition, the relative fair value of the warrants were measured using the Black-Scholes Option Pricing Model to be \$123,618 and recorded as a debt discount, which is amortized over the life of the debt using the effective interest method. The unamortized discount as of December 31, 2010 amounted to \$7,059 and it was fully amortized to interest expense during 2011.

Edgar Filing: Digitiliti Inc - Form 10-K

In connection with the Incentive Offer noted above, the secured convertible debt holders were also allowed to convert their convertible notes into shares of the Company's Series A Convertible Preferred Stock at a conversion rate of \$1.00 per share (whereby each Preferred Stock is convertible into five shares of common stock). In response, the Company converted \$650,000 of its secured convertible stock and \$74,187 of accrued interest into 724,187 shares of the Company's Series A Convertible Preferred Debt. The secured debt holders who elected to convert were also allowed to exercise their outstanding common stock warrants at a reduced exercise price of \$0.20 per share.

The Company accounted for the issuance of the Series A Convertible Preferred Stock for the repayment of the secured

convertible debt as a debt extinguishment under FASB ASC 470-50. As a result, a total loss on the extinguishment of \$173,830 was recognized for the year ended December 31, 2010.

During 2011, the Company repaid an aggregate of \$75,000 of outstanding notes associated with the \$750,000 Private Offering

On December 31, 2011, a holder of a secured note under the \$750,000 Private Offering agreed to convert the outstanding principal balance due of \$25,000, along with the associated accrued interest of \$6,867, into the Company's \$1,500,000 Junior Secured Convertible Debt Offering. In conjunction with the conversion of this \$31,867 of existing secured convertible debt into the Company's Junior Secured Convertible Debt Offering, the investor received an aggregate of 53,111 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

The Company evaluated the conversion of the \$31,867 secured convertible debt into the Junior Secured Convertible Debt Offering under FASB ASC 470-50 and determined that the modification was substantial and qualified as a debt extinguishment. The fair value of the 53,111 common stock warrants of \$2,124 was recorded as a loss on extinguishment of debt during the year ended December 31, 2011.

As of December 31, 2011 and 2010, the outstanding unpaid principal under the \$750,000 Private Offering totaled \$0 and \$100,000, respectively.

Other Convertible Notes

In October 2008, we issued a \$250,000 12% convertible note. The note was originally convertible into our common stock at \$0.50 per share. The debt is guaranteed by a stockholder of the Company. In conjunction with this convertible debt, we issued stock warrants to purchase 150,000 shares and 100,000 shares, respectively, of Digitilite common stock with a five year term at \$0.50 per share. This convertible note reflected a 6-month maturity date that was later extended to October 16, 2009.

On June 30, 2010, the Company modified the terms of this \$250,000 convertible note to reflect an extended maturity date of December 31, 2011 and a reduction in the conversion rate from \$.50 to \$.20 per share. In connection with this modification, the Company granted the holder 50,000 common stock warrants exercisable at \$.20 per share. The fair value of the warrants was determined to be \$9,000 (see Note 12). The incremental increase in the fair value of the conversion option was determined to be \$132,598. The Company evaluated the modification under FASB ASC 470-50 and determined the modification was substantial and the revised terms constituted a debt extinguishment. As a result, the total loss on extinguishment of \$141,598 was recognized during the year ended December 31, 2010.

On December 31, 2011, the note holder agreed to convert the entirety of the outstanding balance due of \$347,667 convertible debt, reflecting a principal balance due of \$250,00, along with accrued interest of \$97,667, into the Company's \$1,500,000 Junior Secured Convertible Debt Offering (see below). In conjunction with the conversion of this \$347,666 of existing convertible debt into the Company's Junior Secured Convertible Debt Offering, the investor received an aggregate of 629,444 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share.

The Company evaluated the conversion of the \$347,667 convertible debt into the Junior Secured Convertible Debt Offering under FASB ASC 470-50 and determined that the modification was substantial and qualified as a debt extinguishment. The fair value of the 629,444 common stock warrants of \$25,178 was included in the loss on extinguishment of debt for the year ended December 31, 2011.

Edgar Filing: Digitiliti Inc - Form 10-K

In November 2008, we issued a \$250,000 12% convertible note. The debt can be converted into our common stock at \$0.35 per share, subject to an effective registration statement covering the underlying common stock that has been filed with the Securities and Exchange Commission. In conjunction with this convertible debt, we issued stock warrants to purchase 250,000 shares of Digitiliti common stock with a five year term at \$0.50 per share.

Pursuant to a security agreement with the stockholder, our DigiLIBE software and our DigiBAK vaults along with other intellectual properties serve as the collateral for the above guarantee, convertible debt and the related note payable (see Note 6). The convertible note matured on May 20, 2009 and became past due.

On June 30, 2010, the Company modified the terms of this convertible note whereby the maturity date was extended from May 20, 2009 to August 31, 2010. The Company evaluated the modification under FASB ASC 470-50 and determined that the modification

was not substantial and did not qualify as a debt extinguishment. Accordingly, no gain or loss was recognized from the modification. On February 28, 2011, the Company entered into an agreement to repay and modify this \$250,000 12% convertible debt, along with two additional debt obligations, that were secured by a first lien on the Company's assets and consisted of the following: this \$250,000 12% secured convertible note issued in November 2008 with a \$0.35 per share conversion rate; a \$50,000 payable that was due on demand and bore interest at 10% per annum; and a \$231,540 6% promissory note that was due on demand. The terms of the agreement provided for the repayment of \$431,540 of principal on the combined debt and payable with the remaining principal balance owed of \$100,000 being converted into a Note under the 12% First Secured Convertible Debt Offering. In addition, the outstanding accrued interest owed to these two stockholders of \$103,109 was paid through the issuance 687,393 common shares. Under the agreement, the terms of 350,000 warrants previously granted to these stockholders were modified whereby the exercise price was reduced to \$0.15 and the term changed to 5 years. An additional 200,000 warrants with a 5-year term and a \$0.20 per share exercise price and 275,000 warrants with a 5-year term and a \$0.30 per share exercise price were also granted to these stockholders. Upon final payment of the loan on April 21, 2011, the stockholders released their first lien in the Company's assets in preference to those lenders associated with the First Secured Convertible Debt Offering. The Company evaluated the modification of the \$100,000 into the 12% First Secured Convertible Debt Offering under FASB ASC 470-50 and determined that the modification was substantial and qualified as a debt extinguishment. The incremental increase in the fair value of the 350,000 modified warrants of \$384, the fair value of the additional 200,000 warrants issued of \$30,000 and the fair value of the 275,000 warrants issued under the terms of the Secured Debt Offering of \$41,250 were recorded as a loss on the extinguishment of debt during 2011.

In November and December 2010, the Company issued an aggregate of \$250,000 of 12% convertible debt to a stockholder. The debt reflects an 18-month maturity date and can be converted into common stock at \$0.20 per share. The debt is secured by a lien on all assets of the Company; provided, however, that the stockholder agrees to be subordinate with respect to up to \$100,000 of original principal amount of other note against the vault. The funds were advanced with the intent of buying into the 12% First Secured Convertible Debt Offering. On February 28, 2011, these notes were converted into the 12% First Secured Convertible Debt Offering (see below).

On August 11, 2011, the Company borrowed \$50,000 from a third party. This note is secured against the Company's accounts receivable, bears interest at 12% per annum and matures February 11, 2012. In connection with the loan, the lender received warrants to purchase an aggregate of 50,000 common shares at an exercise price of \$0.07 per share. The warrants vested immediately and have a term of five years. The note is convertible at \$0.07 per share. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$3,704, which was recorded as a debt discount. The note was then evaluated for a beneficial conversion feature and it was determined that a beneficial conversion feature existed. The intrinsic value of the beneficial conversion feature was determined to be \$10,846 and was recorded as a debt discount. The debt discounts are being amortized over the life of the note using the effective interest method. The amortization expense recorded on the discounts during 2011 totaled \$11,491.

On August 16, 2011, the Company borrowed \$50,000 from a third party. This note is secured against the Company's accounts receivable, bears interest at 12% per annum and matures February 16, 2012. In connection with the loan, the lender received warrants to purchase an aggregate of 50,000 common shares at an exercise price of \$0.07 per share. The warrants vested immediately and have a term of five years. The note is convertible at \$0.07 per share. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$3,488, which was recorded as a debt discount. The note was then evaluated for a beneficial conversion feature and it was determined that a beneficial conversion feature existed. The intrinsic value of the beneficial conversion feature was determined to be \$7,060 and was recorded as a debt discount. The debt discounts are being amortized over the life of the note using the effective interest method. The amortization expense recorded on the discounts during 2011 totaled \$8,362.

We analyzed these convertible debt and the warrants issued for derivative accounting consideration and determined that derivative accounting is not applicable for these notes.

12% Secured Convertible Debt - First Secured Convertible Debt Offering

On February 28, 2011, the Company completed the placement of \$1,182,844 of Secured Convertible Promissory Note (the "Notes") and Warrants (collectively, the "First Secured Convertible Debt Offering"). The Lenders in the First Secured Convertible Debt Offering paid a 10% discount for their investment, resulting in a "stepped-up" basis in their individual Notes for a total principal amount of \$1,301,128. The Notes bear interest at the rate of 12% per annum, have an 18-month maturity date and are convertible to common shares at \$0.20 per share. The Notes are secured by a first lien on all assets of the Company; but are subordinate to the lien with respect to up to \$25,000 of original principal amount of other notes against the

Company's vault.

In conjunction with the First Secured Convertible Debt Offering, the Lenders received warrants to purchase an aggregate of 3,252,821 common shares. The warrants vested immediately, have a five year term, a \$0.30 exercise price and are redeemable by the Company in the event of an acquisition. The Company valued the warrants using the Black-Scholes option pricing model. The warrants include standard antidilution provisions for stock splits, stock dividends and recapitalization.

During November and December of 2010, the Company received \$250,000 of the cash proceeds under the First Secured Convertible Debt Offering in the form of advanced convertible notes. These advanced convertible notes originally matured at the earlier of the closing of the First Secured Convertible Debt Offering or May and June of 2012, had an interest rate of 12% per annum and were convertible into common shares at \$0.20 per share. The principal and accrued interest amounting to \$250,000 and \$8,844, respectively, were converted into Notes under the First Secured Convertible Debt Offering upon closing.

In conjunction with the sale of the 12% First Secured Convertible Debt Offering, the Company paid consultants fees totaling \$64,000 and issued 170,000 five-year warrants with an exercise price of \$0.20 per share and 363,000 five-year warrants with an exercise price of \$0.30 per share. The fees were paid through the issuance of Notes in the 12% First Secured Convertible Debt Offering. The fees and the fair value of the warrants totaling \$143,735 were recorded as deferred financing costs and are being amortized using the effective interest method over the term of the Notes. The amortization of these deferred financing costs during the year ended December 31, 2011 totaled \$73,944.

The Company analyzed the First Secured Convertible Debt Offering for derivative accounting under FASB ASC 815-15 and determined that derivative accounting does not apply to these instruments.

The First Secured Convertible Debt Offering was then evaluated for a beneficial conversion feature and it was determined that a beneficial conversion feature existed. The intrinsic value of the beneficial conversion feature was determined to be \$126,729. In addition, the relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$316,226, which was recorded as a debt discount. The 10% face discount on the Notes was determined to be \$118,284 resulting in an aggregate discount of \$561,240 being recorded on the Notes. The aggregate discount is being amortized over the life of the Notes using the effective interest method. The amortization expense recorded on these discounts for the year ended December 31, 2011 totaled \$256,407 resulting in a total unamortized discount of \$304,833 as of December 31, 2011.

8% Secured Convertible debt Offering - Junior Secured Convertible Debt Offering

In June 2011, the Company initiated a Junior Secured Convertible Debt Offering that provides for the sale of up to an aggregate principal amount of \$1,500,000 Junior Secured Convertible Promissory Notes (the "Junior Notes") and Warrants. The investors in this Junior Secured Convertible Debt Offering receive five-year warrants to purchase that number of common shares equal to 10% of the principal amount of their Junior Note(s) divided by the exercise price of \$.06 per share. The Junior Notes bear interest at 8% per annum, have a 24-month maturity date and are secured by the assets of the Company with the repayment being subordinated to the repayment of all secured notes previously issued by the Company. The Junior Notes also contain a contingent conversion option wherein, at the option of 60% of the investors and twelve months following the closing of the first tranche, all or a portion of the principal amount and accrued interest may be converted into common shares at an exercise price of \$0.06 per share but only if at least \$1,000,000 in aggregate principal amount of the Junior Secured Convertible Debt Offering has been raised. However, the Junior Notes automatically convert into common shares upon a subsequent equity funding round of at least \$3 million of new equity capital ("Qualified Round") at a per share price equal to the per share price of the qualified round.

On June 28, 2011, the Company closed on the first \$500,000 tranche of the Junior Secured Convertible Debt Offering. In conjunction with the closing of the first tranche of the Junior Secured Convertible Debt Offering, the investors received warrants to purchase an aggregate of 833,333 common shares. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$52,239, which was recorded as a debt discount. The warrant discount is being amortized over the life of the notes using the effective interest method. The amortization expense recorded on the discount for the year ended December 31, 2011 totaled \$11,905.

In conjunction with the closing of the first tranche of the Junior Secured Convertible Debt Offering, the Company paid consultants fees totaling \$101,250 consisting of \$22,500 paid in cash and the issuance of 1,125,000 warrants valued at \$78,750 using the Black-Scholes pricing option model. The warrants vested immediately, have a five-year life and an exercise price of \$.06 per share. The total consulting fees of \$101,250 were recorded as deferred financing costs and are being amortized using the effective interest method over the term of the Notes. The amortization of these deferred financing costs during the year ended December 31, 2011 totaled \$23,534.

On September 15, 2011, the Company broke escrow on the remaining \$1,000,000 available under the second tranche of the \$1,500,000 Junior Secured Convertible Debt Offering by closing on \$550,000 of proceeds from the sale of the Junior Notes. In conjunction with the sale of \$550,000 of these Junior Notes, the investors received an aggregate of 916,667 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$50,000, which was recorded as a debt discount. The warrant discount is being amortized over the life of the notes using the effective interest method. The amortization expense recorded on the discounts for the year ended December 31, 2011 totaled \$7,368.

In conjunction with the September 2011 sale of these \$550,000 of Junior Notes, the Company paid consultants fees totaling \$75,000 consisting of \$26,250 paid in cash and the issuance of 812,500 warrants valued at \$48,750 using the Black-Scholes pricing option model. The warrants vested immediately, have a five-year life and an exercise price of \$.06 per share. The total consulting fees of \$75,000 were recorded as deferred financing costs and are being amortized using the effective interest method over the term of the Notes. The amortization of these deferred financing costs during the year ended December 31, 2011 totaled \$14,015.

On December 5, 2011, the Company borrowed an additional \$30,000 under the Junior Secured Convertible Debt Offering ("Third Tranche"). In conjunction with the sale of \$30,000 of these Junior Notes, the investor received 50,000 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share. The relative fair value of the warrants was measured using the Black-Scholes option pricing model and determined to be \$2,308, which was recorded as a debt discount. The warrant discount is being amortized over the life of the note using the effective interest method. No amortization of this discount was recorded during the year ended December 31, 2011.

On December 31, 2011, the Company closed on the Fourth Tranche of the Junior Secured Convertible Debt Offering through the conversion of previously issued notes payable into this new offering for an aggregate principal amount of \$379,533. A principal balance due of \$250,00, along with accrued interest of \$97,667 on a previously issued convertible note was converted into the Company's \$1,500,000 Junior Secured Convertible Debt Offering. In conjunction with the conversion of this \$347,666 of existing convertible debt into the Company's Junior Secured Convertible Debt Offering, the investor received an aggregate of 629,444 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share. The Company evaluated the conversion of the \$347,667 convertible debt into the Junior Secured Convertible Debt Offering under FASB ASC 470-50 and determined that the modification was substantial and qualified as a debt extinguishment. The fair value of the 629,444 common stock warrants of \$25,178 was included in the loss on extinguishment of debt for the year ended December 31, 2011. In addition, another note holder agreed to convert the outstanding principal balance due of \$25,000, along with the associated accrued interest of \$6,867 on a previously issued convertible note, into the Company's \$1,500,000 Junior Secured Convertible Debt Offering. In conjunction with the conversion of this \$31,867 of existing secured convertible debt into the Company's Junior Secured Convertible Debt Offering, the investor received an aggregate of 53,111 common stock warrants. The warrants vested immediately, have a five year term and an exercise price of \$0.06 per share. The Company evaluated this conversion of the \$31,867 secured convertible debt into the Junior Secured Convertible Debt Offering under FASB ASC 470-50 and determined that the modification was substantial and qualified as a debt extinguishment. The fair value of the 53,111 common stock warrants of \$2,124 was recorded as a loss on extinguishment of debt during the year ended December 31, 2011.

The Company analyzed the Junior Secured Convertible Debt Offering for derivative accounting under FASB ASC 815-15 and determined that derivative accounting does not apply to these instruments.

In addition, the Junior Secured Convertible Debt Offering was then evaluated for a beneficial conversion feature and it was determined that a beneficial conversion feature existed. The intrinsic value of the beneficial conversion feature

associated with the closing of the first \$500,000 tranche was measured on the date of the agreement and determined to be \$135,572. The intrinsic value of the beneficial conversion feature associated with the sale of the \$550,000 Junior Notes was measured on the date the proceeds were received and was determined to be \$50,000. It was determined there was no contingent beneficial conversion feature on the third and fourth tranches. Due to the contingent nature of the conversion features, the beneficial conversion features associated with the tranches will be recognized when the contingency is lifted.

The aggregate unamortized deferred financing costs on all notes amounted to \$214,863 and \$4,466 as of December 31, 2011 and 2010, respectively. The aggregate amortization of deferred financing costs during the years ended December 31, 2011 and 2010 totaled \$109,344 and \$41,252, respectively.

8. Capital Leases Obligations

In August and September 2008, the Company entered into three 36-month leases for computer equipment with two financial institutions. The present value of the monthly lease payments was capitalized using an imputed interest rate of approximately 20% and 10%. The amount outstanding for the capital lease obligation was \$0 and \$23,308 at December 31, 2011 and 2010, respectively.

Amortization of capital lease property is included in depreciation expense and was \$22,546 and \$194,250 in 2011 and 2010, respectively.

Assets under capital leases, included in property and equipment, consisted of the following:

	December 31,	
	2011	2010
Computer equipment	\$1,944,545	\$1,944,545
Less accumulated depreciation	(1,944,545)	(1,921,999)
	\$—	\$22,546

9. Income Taxes

Income tax computed at the U.S. federal statutory rate reconciled to the effective tax rate consisted of the following:

	Years Ended December 31,			
	2011		2010	
Federal tax benefit at statutory rate	\$(1,356,105)	(34)%	\$(2,180,977)	(34)%
State income taxes, net of federal tax	(195,439)	(4.9)%	(416,952)	(6.5)
Valuation allowance for deferred tax	1,049,890	26.3%	2,562,469	22.4%
Other	501,654	12.6%	35,460	18.1%
Income Tax	\$—	—	\$—	—

Deferred tax assets and liabilities consisted of the following:

	December 31	
	2011	2010
Current Deferred Income Tax Assets		
Vacation accrual	\$20,554	\$19,041
Allowance for uncollectible accounts	18,784	4,355
Accrued expense	—	—
Stock based compensation	155,225	199,685
Total	194,563	223,081
Noncurrent deferred income tax assets		
Net operating loss carryforward	9,799,501	8,749,217
Noncurrent deferred income tax liabilities		
Depreciation	(76,484)	(101,676)
Deferred rent	—	(1,238)
Deferred revenue	(2,350)	(4,046)
Total	(78,834)	(106,960)
Valuation Allowance	(9,915,230)	(8,865,338)
Net Deferred Income Tax	\$—	\$—

The Company established a valuation allowance to fully offset the net deferred income tax assets due to the uncertainty of the

Company's ability to generate the future taxable income necessary to realize those net deferred income tax assets, considering the Company's history of significant operating losses. In addition, future utilization of the available net operating loss carryforward may be limited under Internal Revenue Code Section 382 as a result of changes in ownership that have or may result from the issuance of common stock, and from options and warrants for the purchase of common stock.

At December 31, 2011 and 2010 respectively, the Company had net operating loss carryforward of approximately \$25,192,000 and \$21,603,000, respectively, which will begin to expire in 2026.

10. Equity

For the year ended December 31, 2010

During the year ended December 31, 2010, in connection with the Company's Incentive Offer, the Company issued 16,329,869 common shares to repay \$2,537,300 of principal and \$728,673 of accrued interest on the convertible debt (see Note 7).

During the year ended December 31, 2010, in connection with a private placement, the Company sold 6,565,000 common shares at \$0.20 per share for cash proceeds of \$1,199,050, net of issuance costs of \$112,950.

During the year ended December 31, 2010 the Company issued 1,082,253 common shares for services valued at \$235,120 based on the grant-date quoted market value of the Company's stock.

During the year ended December 31, 2010, the Company issued 364,395 common shares to settle payables to an officer of the Company. The shares were valued at \$67,099 based on the grant-date quoted market value of the Company's stock. In connection with this settlement, the Company recorded additional compensation expense of \$3,220 and a gain on the extinguishment of liability of \$9,000.

During the year ended December 31, 2010 the Company issued 2,549,500 common shares for the exercise of 2,549,500 common stock warrants and received cash proceeds of \$509,900.

During the year ended December 31, 2010 the Company issued 724,187 shares of Series A Convertible Preferred Stock to repay \$650,000 of principal and \$74,187 of accrued interest on the secured convertible debt (see Note 7). Each share of Series A Convertible Preferred Stock is convertible into 5 common shares at the option of the holder and is entitled to annual cumulative dividends at the rate of 6%. The Series A Convertible Preferred Stock will be automatically converted into common shares if any one of the following events occurs:

- a) The Company's common stock trades at \$0.60 per share for more than 10 consecutive days;
- b) The Company conducts a capital raise of common stock at a price of at least \$0.50 per share and raises at least \$5 million of gross proceeds; or
- c) At least 2/3 of the authorized shares of the Series A Convertible Preferred Stock have been converted to common shares.

During the year ended December 31, 2010, the Company issued 420,000 shares of Series B Convertible Preferred Stock for cash. Each share of Series B Convertible Preferred Stock is convertible into 5 common shares at the option of the holder and is entitled to annual cumulative dividends at the rate of 5%. The Series B Convertible Preferred

Edgar Filing: Digitiliti Inc - Form 10-K

Stock will be automatically converted into common shares if any one of the following events occurs:

- a) The Company's common stock trades at \$1.00 per share for more than 20 consecutive days;
- b) The Company conducts a capital raise of common stock at a price of at least \$0.50 per share and raises at least \$5 million of gross proceeds; or
- c) At least 2/3 of the authorized shares of the Series B Convertible Preferred Stock have been converted to common shares.

On October 14, 2010, the Company held its annual meeting of stockholders. At the meeting, the stockholders approved an Amendment to the Articles of Incorporation to increase the number of authorized shares from 110,000,000 to 135,000,000 shares and to allocate the additional shares as common stock.

For the year ended December 31, 2011

During the year ended December 31, 2011 the Company issued 1,557,197 common shares for services valued at \$111,050 based on the grant-date quoted market value of the Company's stock.

During the year ended December 31, 2011 the Company issued 887,393 common shares to repay accrued interest and accounts payable totaling \$144,431. The common stock was valued at \$103,109 based on the grant-date quoted market value of the Company's stock resulting in a gain on the extinguishment of liabilities of \$31,322.

During the year ended December 31, 2011 the Company issued 277,335 common shares for the conversion of 55,467 Series A preferred Convertible Stock based on a \$.20 per share conversion ratio.

During the year ended December 31, 2011 the Company issued 1,400,000 common shares for total cash proceeds of \$63,000, net of issuance costs of \$7,000.

During the year ended December 31, 2011 the Company issued 375,000 common shares for the conversion of debt principal of \$75,000 (see Note 4).

11. Stock Options

For the year ended December 31, 2010

On July 15, 2010, the Company's Board of Directors approved the 2010 Long Term Incentive Plan, subject to the approval of the Company's stockholders at the annual meeting. In conjunction with this resolution, the Board of Directors, by subsequent written action, shall authorize the specific number of shares of common stock of the Company for issuance under the terms of the 2010 Long Term Incentive Plan. On October 14, 2010, the stockholders approved the 2010 Long Term Incentive Plan.

In connection with the Long-term Incentive Plan, a total of 20,000 common stock options were granted to the Company's non-employee directors with an exercise price, equal to the fair value of the share at the date of grant, of \$0.22. These options vest over a period of 1 year, have a term of 5 years and a fair value of \$4,400, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.60%, (2) expected term of 3 years, (3) expected volatility of 352% and (4) zero expected dividends.

For the year ended December 31, 2010, in connection with the terms of his employment agreement, the Company granted 600,000 common stock options to the CEO with an exercise price, equal to the fair value of the share at the date of grant, of \$0.21 per share. These options have a term of 5 years, vests equally on December 31, 2010, December 31, 2011 and December 31, 2012 and have a fair value of \$125,805, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rates of 0.86% and 1.17%, (2) expected terms ranging from 2.6 to 3.6 years, (3) expected volatility ranging from 358% to 453% and (4) zero expected dividends.

For the year ended December 31, 2010, the Company granted 100,000 common stock options to an employee with an exercise price of \$0.35 per share. These options have a term of 7 years, vested immediately and have a fair value of \$21,991, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.44%, (2) expected term of 3.5 years, (3) expected volatility of 383% and (4) zero expected dividends.

Stock option expense for the twelve months ended December 31, 2010 totaled \$310,967. As of December 31, 2010, there was approximately \$185,648 of unrecognized option expense which is expected to be recorded through December 2012.

For the year ended December 31, 2011

For the year ended December 31, 2011, in connection with incentive options issued to company personnel on January 24, 2011, the Company granted 1,225,000 common stock options with an exercise price equal to the fair value of the share on the date of grant of \$0.19 per share. These options have a term of 5 years, with 70,833 vesting immediately and the remainder vesting over a 3 year period. The options have a fair value of \$232,619, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.44%, (2) expected term of 4.0 years, (3) expected volatility of 344% and (4) zero expected dividends.

For the year ended December 31, 2011, in connection with options issued in lieu of a 20% salary reduction to members of management, on January 24, 2011, the Company granted 200,707 common stock option with an exercise price equal to the fair

value of the share on the date of grant of \$0.19 per share. These options vested monthly over 6 months from the month of grant and have a fair value of \$38,014 as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.05%, (2) expected term ranging between 2.50 and 2.71 years, (3) expected volatility of 367% and (4) zero expected dividends.

For the year ended December 31, 2011, in connection with retention options issued to company personnel on May 11 2011, the Company granted 1,050,000 common stock options with an exercise price of \$0.08 per share. These options have a term of 5 years and vest ratably over 3 years. The options have a fair value of \$58,711, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.28%, (2) expected term of 3.5 years, (3) expected volatility of 351% and (4) zero expected dividends.

In connection with the Long-term Incentive Plan, 225,000 common stock options were granted to the Company's non-employee director with an exercise price equal to the fair value of the share at the date of grant of \$0.09. These options vest over a period of 3 year, have a term of 5 years and a fair value of \$19,116, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.79%, (2) expected term of 3.35 years, (3) expected volatility of 353% and (4) zero expected dividends.

In connection with the Long-term Incentive Plan, 225,000 common stock options were granted to the Company's non-employee director with an exercise price equal to the fair value of the share at the date of grant of \$0.08. These options vest over a period of 3 year, have a term of 5 years and a fair value of \$17,997, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.05%, (2) expected term of 3 years, (3) expected volatility of 363% and (4) zero expected dividends.

For the year ended December 31, 2011, the Company granted 75,000 common stock options to an employee with an exercise price equal to the fair market value on the date of grant of \$0.05 per share. These options have a term of 5 years and vested over a 3 year period. The options have a fair value of \$3,748 as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.09%, (2) expected term of 3.35 years, (3) expected volatility of 337% and (4) zero expected dividends.

For the year ended December 31, 2011, in connection with the terms of his employment agreement, the Company granted 510,000 common stock options to a senior member of management with an exercise price equal to the fair value of the share at the date of grant, of \$0.07 per share. These options have a term of 5 years and will vest as to one-third (1/3rd) of the option shares each on the date of June 1, 2012, June 1, 2013 and June 1, 2014. The options have a fair value of \$35,689, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.74%, (2) expected term of 3.5 years, (3) expected volatility of 342% and (4) zero expected dividends.

For the year ended December 31, 2011, the Company granted 75,000 common stock options to an employee with an exercise price equal to the fair market value on the date of grant of \$0.05 per share. These options have a term of 5 years and vested over a 3 year period. The options have a fair value of \$3,748 as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 1.09%, (2) expected term of 3.35 years, (3) expected volatility of 337% and (4) zero expected dividends.

In connection with the Long-term Incentive Plan, 225,000 common stock options were granted to the Company's non-employee director with an exercise price equal to the fair value of the share at the date of grant of \$0.05. These options vest over a period of 3 year, have a term of 5 years and a fair value of \$11,236, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.41%, (2) expected term of 3.35 years, (3) expected volatility of 364% and (4) zero expected dividends.

For the year ended December 31, 2011, in connection with the terms of his amended employment agreement, the Company granted 1,500,000 common stock options to a senior member of management with an exercise price equal to

the fair value of the share at the date of grant, of \$0.05 per share. These options have a term of 5 years and will vest as to one-third (1/3rd) of the option shares each on the date of October 21, 2011, October 21, 2012 and October 21, 2013. The options have a fair value of \$74,887, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.47%, (2) expected term ranging 3.0 years, (3) expected volatility of 634% and (4) zero expected dividends.

For the year ended December 31, 2011, in connection with the terms of his employment agreement, the Company granted 4,000,000 common stock options to the CEO with an exercise price equal to the fair value of the share at the date of grant of \$0.05 per share. These options have a term of 5 years and vest annually with 1/3 on the date of grant of November 29, 2011, 1/3 on December 31, 2012 and 1/3 on December 31, 2013. The options have a fair value of \$209,514, as calculated using the Black-Scholes option

pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.40%, (2) expected term of 3.03 years, (3) expected volatility of 609% and (4) zero expected dividends.

For the year ended December 31, 2011, the Company granted 6,000,000 common stock options to the CEO with an exercise price equal to the fair value of the share at the date of grant of \$0.05 per share. These options have a term of 5 years and vest annually with 1/3 on December 31, 2012, 1/3 on December 31, 2013 and 1/3 on December 31, 2014. The options have a fair value of \$299,750, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.40%, (2) expected term of 3.54 years, (3) expected volatility of 668% and (4) zero expected dividends.

For the year ended December 31, 2011, the Company granted 75,000 common stock options to a member of management with an exercise price equal to the fair value of the share at the date of grant of \$0.09 per share. These options have a term of 5 years and vest 1/3 on October 17, 2012 with the remaining options vesting monthly through October 17, 2014. The options have a fair value of \$6,744, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the options included: (1) discount rate of 0.48%, (2) expected term of 3.35 years, (3) expected volatility of 662% and (4) zero expected dividends.

Stock option expense for the twelve months ended December 31, 2011 totaled \$755,409. As of December 31, 2011, there was approximately \$358,108 of unrecognized option expense which is expected to be recorded through December 2014.

A summary of option activities for the year ended December 31, 2011 and 2010 is reflected below:

	Options	Weighted-Average Exercise Price	Weighted Average Remaining Life (yrs)
Outstanding at December 31, 2009	2,370,000	0.37	3.2
Granted	720,000	0.23	
Canceled	—	—	
Forfeited	(100,000)	(0.35)	
Outstanding at December 31, 2010	2,990,000	0.34	2.8
Granted	15,310,707	0.07	
Canceled	—	—	
Forfeited	(2,624,342)	0.30	
Outstanding at December 31, 2011	15,676,365	0.08	4.7
Exercisable at December 31, 2011	2,010,971	0.35	3.1
Exercisable at December 31, 2010	4,077,132	0.13	4.0

The weighted-average grant date fair value of options granted in 2010 was \$0.21. The outstanding options at December 31, 2010 have an intrinsic value of zero. The weighted-average grant date fair value of options granted in 2011 was \$0.08. The outstanding options at December 31, 2011 have an intrinsic value of zero.

12. Stock Warrants

For the year ended December 31, 2010

In conjunction with the Company's past equity raise, the Company granted 340,000 common stock warrants with an exercise price of \$0.30 per share to a consulting group that introduced investors to the Company. These warrants have a term of 5 years, vested immediately and have a fair value of \$77,395, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 2.37%, (2) expected life of five years, (3) expected volatility of 181% and (4) zero expected dividends. The above warrants were accounted for against the Company's additional paid-in capital account as share issuance costs.

Pursuant to final terms of a former executive officer's severance agreement confirmed on April 15, 2010, the Company granted 1,500,000 common stock warrants with an exercise price of \$0.385 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$374,995, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.79%, (2) expected life of five years, (3) expected volatility of 393% and (4) zero expected dividends. The fair value of the above warrants were recognized as warrant expense for the year ended December 31, 2010.

As compensation for computer software programming services provided, the Company granted 50,000 common stock warrants with an exercise price of \$0.35 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$12,500, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.79%, (2) expected life of five years, (3) expected volatility of 393% and (4) zero expected dividends. The fair value of the above warrants were recognized as warrant expense for the year ended December 31, 2010.

In return for extending the maturity date of a convertible note (see Note 7), the Company granted 50,000 common stock warrants with an exercise price of \$0.20 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$9,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.79%, (2) expected life of five years, (3) expected volatility of 377% and (4) zero expected dividends. The value of the above warrants were included in the loss on extinguishment of debt.

In conjunction with the sale of the Series B Convertible Preferred Stock, the Company granted 100,000 common stock warrants with an exercise price of \$0.30 to a consultant. These warrants have a term of 5 years, vested immediately and have a fair value

of \$23,998, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.79%, (2) expected life of five years, (3) expected volatility of 356% and (4) zero expected dividends.

On October 14, 2010, the Company's Board of Directors approved the grant of warrants to the Chairman of the Board as follows:

250,000 warrants with a five-year life and a \$0.35 per share exercise price as a result of the successful launch of the Company's DigiLIBE product prior to March 31, 2010. These warrants will vest on January 14, 2011, and have a fair value of \$55,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.18%, (2) expected life of five years, (3) expected volatility of 443% and (4) zero expected dividends.

2. 250,000 warrants with a five-year life and an exercise price of \$0.22 for raising \$2.35M of capital prior to June 30, 2010. These warrants will vest on December 1, 2010, if the Company raises \$1.3 million in additional capital as of November 30, 2010, and have a fair value of \$55,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.18%, (2) expected life of five years, (3) expected volatility of 443% and (4) zero expected dividends. The performance condition was not met and the warrants were forfeited.

3. 250,000 warrants with a five-year life and an exercise price of \$0.22 for his assistance in facilitating a new CEO transition, along with his continued assistance in providing technical advice and investor relations expertise. These warrants will vest on January 14, 2011, and have a fair value of \$55,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.18%, (2) expected life of five years, (3) expected volatility of 443% and (4) zero expected dividends.

During 2010, the Company reached settlement agreements with three convertible note holders that included the surrender and forfeiture of an aggregate of 30,000 associated common stock warrants.

During 2010, the Company reached partial settlement agreements that were entered into in conjunction with the Incentive Offer (see Note 7) involving two convertible note holders that resulted in the surrender and forfeiture of 37,500 common stock warrants.

During the year, 750,000 contingent warrants granted to the Company's former President/CEO were forfeited since the related performance conditions were not met.

For the year ended December 31, 2011

In connection with the Company's First Secured Convertible Debt Offering (see Note 7), the Company granted 3,252,821 common stock warrants with an exercise price of \$0.30 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$487,919, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 2.13%, (2) expected life of five years, (3) expected volatility of 895% and (4) zero expected dividends. The relative fair value of 2,977,821 of these warrants of \$316,226 was accounted for as a discount against the convertible promissory debt and the fair value of 275,000 of these warrants of \$41,250 was accounted for as a loss on extinguishment of debt.

In conjunction with the First Secured Convertible Debt Offering (see Note 7), the Company granted 533,000 common stock warrants with exercise prices of \$0.30 and \$0.20 per share to consultants that introduced investors to the

Company. These warrants have a term of 5 years, vested immediately and have a fair value of \$79,735, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rates of 1.18%, (2) expected life of five years, (3) expected volatility of 769% and (4) zero expected dividends. These warrants were accounted for as deferred financing costs.

In connection with a loan modification, the Company granted 200,000 common stock warrants with an exercise price of \$0.20 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$30,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 2.13 %, (2) expected life of five years, (3) expected volatility of 769% and (4) zero expected dividends. The fair value of these warrants was accounted for as a loss on the extinguishment of debt.

In connection with a loan modification, the Company granted 200,000 common stock warrants with an exercise price of \$0.20 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$30,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 2.13 %, (2) expected life of five years, (3) expected volatility of 769% and (4) zero expected dividends. The fair value of these warrants was accounted for as a loss on the extinguishment of debt.

Pursuant to the terms of a 6-month promissory note entered into with an individual, the Company granted 25,000 common stock warrants with an exercise price of \$0.20 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$2,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 2.31%, (2) expected life of five years, (3) expected volatility of 897% and (4) zero expected dividends. The relative fair value of these warrants of \$1,923 was accounted for as a discount against the promissory note.

In conjunction with the Company's past equity raise, the Company granted 500,000 common stock warrants with an exercise price of \$0.08 per share to a consulting group that introduced investors to the Company. These warrants have a term of 5 years, vested immediately and have a fair value of \$25,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 2.05%, (2) expected life of five years, (3) expected volatility of 403% and (4) zero expected dividends. The above warrants were accounted for against the Company's additional paid-in capital account as share issuance costs.

As compensation for legal and consultation services provided, the Company granted 60,000 common stock warrants with an exercise price of \$0.20 per share that vested monthly over a 6 month period. These warrants have a term of 5 years, vested immediately upon date of grant each month and have a cumulative fair value of \$3,059, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate ranging between 0.96% and 2.11%, (2) expected life of five years, (3) expected volatility ranging between 769% and 908% and (4) zero expected dividends. The fair value of the above warrants was recognized as warrant expense for the year ended December 31, 2011.

In conjunction with the Company's \$500,000 equity raise during 2011, the Company granted 140,000 common stock warrants with an exercise price of \$0.05 per share to a consulting group that introduced investors to the Company. These warrants have a term of 5 years, vested immediately and have a fair value of \$8,540, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.85%, (2) expected life of five years, (3) expected volatility of 407% and (4) zero expected dividends. The above warrants were accounted for against the Company's additional paid-in capital account as share issuance costs.

Pursuant to final terms of a former executive officer's employment agreement, the Company granted 150,000 common stock warrants with an exercise price of \$0.06 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$12,750, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.70%, (2) expected life of five years, (3) expected volatility of 406% and (4) zero expected dividends. The fair value of the above warrants was recognized as warrant expense for the year ended December 31, 2011.

Pursuant to the former executive officer's employment agreement mentioned above and in connection with the closing of the second tranche of the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted an additional 150,000 common stock warrants with an exercise price of \$0.06 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$9,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option pricing model for the warrants included: (1) discount rate of

0.95%, (2) expected life of five years, (3) expected volatility of 406% and (4) zero expected dividends. The fair value of the above warrants was recognized as warrant expense for the year ended December 31, 2011.

In connection with the closing of the first tranche of the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted 833,333 common stock warrants with an exercise price of \$0.06 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$58,333, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.62%, (2) expected life of five years, (3) expected volatility of 908% and (4) zero expected dividends. The relative fair value of these warrants of \$52,239 was accounted for as a discount against the convertible promissory notes.

In connection with the breaking escrow on the second tranche of the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted 916,667 common stock warrants with an exercise price of \$0.06 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$55,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 5.41%, (2) expected life of five years, (3) expected volatility of 913% and (4) zero expected dividends. The relative fair value of these warrants of \$50,000 was accounted for as a discount against the convertible promissory notes.

In connection with the third tranche of the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted 50,000 common stock warrants with an exercise price of \$0.06 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$2,500, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 5.41%, (2) expected life of five years, (3) expected volatility of 920% and (4) zero expected dividends. The relative fair value of these warrants of \$2,308 was accounted for as a discount against the convertible promissory notes.

In connection with the fourth tranche of the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted 629,444 common stock warrants with an exercise price of \$0.06 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$25,178, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 0.83%, (2) expected life of five years, (3) expected volatility of 920% and (4) zero expected dividends. The fair value of these warrants was accounted for as a loss on the extinguishment of debt.

Also in connection with the fourth tranche of the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted 53,112 common stock warrants with an exercise price of \$0.06 per share. These warrants have a 5 year term, vested immediately and have a fair value of \$2,124, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 0.83%, (2) expected life of five years, (3) expected volatility of 920% and (4) zero expected dividends. The fair value of these warrants was accounted for as a loss on the extinguishment of debt.

Pursuant to the terms of two 6 month convertible promissory notes entered into with stockholders, the Company granted 100,000 common stock warrants with an exercise price of \$0.07 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$7,750, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.00%, (2) expected life of five years, (3) expected volatility of 908% and (4) zero expected dividends. The relative fair value of these warrants of \$7,192 was accounted for as a discount against the convertible promissory notes.

Pursuant to the terms of a 3 month promissory note entered into with a stockholder, the Company granted 50,000 common stock warrants with an exercise price of \$0.05 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$2,500, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.02%, (2) expected life of five years, (3) expected volatility of 919% and (4) zero expected dividends. The relative fair value of these warrants of \$2,381 was accounted for as a discount against the promissory notes.

In conjunction with the Company's Junior Secured Convertible Debt Offering (see Note 7), the Company granted 1,937,500 common stock warrants with an exercise price of \$0.06 per share to a consulting group that introduced investors to the Company. These warrants have a term of 5 years, vested immediately and have a fair value of \$127,499, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 0.91%, (2) expected life of five years, (3) expected volatility of 910% and (4) zero expected dividends. These warrants were accounted for as deferred financing costs.

Pursuant to a separation agreement, the Company granted 200,000 common stock warrants with an exercise price of \$0.06 per share. These warrants have a term of 5 years, vested immediately and have a fair value of \$17,000, as calculated using the Black-Scholes option pricing model. Variables used in the Black-Scholes option-pricing model for the warrants included: (1) discount rate of 1.70%, (2) expected life of five years, (3) expected volatility of 908% and (4) zero expected dividends. The fair value of the above warrants was recognized as warrant expense for the year ended December 31, 2011.

A summary of warrant activities for the years ended December 31, 2011 and 2010 are as follows:

	Warrants	Weighted-Average Exercise Price
Outstanding at December 31, 2009	9,510,348	0.79
Granted	2,790,000	0.35
Exercised	(2,549,500) 0.92
Forfeited	(1,067,500) 0.52
Outstanding at December 31, 2010	8,683,348	0.64
Granted	9,780,878	0.16
Exercised	—	—
Forfeited	(36,464) 0.35
Outstanding at December 31, 2011	18,427,762	0.39

The weighted-average grant date fair value of warrants granted in 2011 and 2010 was \$0.10 and \$0.24, respectively. The outstanding warrants at December 31, 2011 and 2010 have an intrinsic value of \$0.

13. Commitments and Contingencies

Some of our convertible note holders have not accepted our offers to convert their notes under the terms of the Modification Proposal and Incentive Offer, accordingly, we are presently in arrears in principal and accrued interest payments in an aggregate total of \$178,265 as of December 31, 2011. Although we are continuing to discuss payment and/or conversion or extension of these notes with note holders, these outstanding obligations pose a risk to our ongoing operations.

On July 13, 2009, the Company was made a party to a complaint by nuArch, LLC, alleging breach of contract and sought recovery of unpaid compensation of approximately \$140,000 for alleged services rendered during 2008 and 2009. On February 4, 2010, the Company entered into a Settlement Agreement with nuArch that reflected an agreed upon payment of \$75,000 to be paid over a 9-month period commencing on March 22, 2010. Accordingly, the Company reduced the related payable based on the agreed settlement amount. As of December 31, 2010, all payments have been made in compliance with the terms of this Settlement Agreement.

From time to time, Digitiliti may be subject to routine litigation, claims, or disputes in the ordinary course of business. In the opinion of management; no pending or known threatened claims, actions or proceedings against Digitiliti are expected to have a material adverse effect on Digitiliti's consolidated financial position, results of operations or cash flows. Digitiliti cannot predict with certainty, however, the outcome or effect of any of the litigation or investigatory matters specifically described above or any other pending litigation or claims. There can be no assurance as to the ultimate outcome of these lawsuits and investigations.

Operating leases

The Company leases its office space for a period of 4.6 years through December 2011. The lease requires monthly rental payments of \$6,450 through December 2011. Thereafter, the rent will be consistent with other similar commercial properties. The Company recorded deferred rent to equalize the monthly payments during the lease term. To date, our base rent of \$6,450 has not changed and the Company leases the premises on a month-to-month basis.

For 2011, rent expense was \$96,839. For 2010, rent expense was \$140,264 net of \$32,398 sublease rental income.

14. Major Customers and Vendors

The Company earned 29% percent of its revenues from one customer for the year ended December 31, 2011.

The Company primarily deals with four major vendors which account for approximately 52% of the cost of revenues for the year ended December 31, 2011.

15. Subsequent Events

On January 11, 2012, the Company initiated the placement of up to \$770,000 of Unsecured Convertible Promissory Note and Warrants (the "Third Unsecured Convertible Debt Offering"). As of April 14 2012, the Company has received proceeds totaling \$567,145 through the issuance of Unsecured Convertible Promissory Notes and Warrants associated with the Third Unsecured Convertible Debt Offering. The Unsecured Convertible Promissory Notes bear interest at the rate of 8% per annum, reflect a March 31, 2014 maturity date and a \$0.03 per share conversion rate into the Company's common stock. The Lenders received Warrants to purchase an aggregate of 7,561,935 shares of Company Common Stock. The Warrants vests immediately, have a five year term, \$0.03 exercise price and include a cashless exercise provision.

Between the months of January and March 2012, the Company issued an aggregate of 486,563 common shares as compensation for contracted business development and marketing services.

ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A: CONTROLS AND PROCEDURES THIS ENTIRE SECTION NEED TO BE REVIEWED

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities and Exchange Commission reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Our disclosure controls and procedures are also designed to accumulate and communicate information to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Accordingly, management must apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We conducted our evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act as of the end of the period covered by this report. Based on their review of our disclosure controls and procedures, the Chief Executive Officer and the Chief Financial Officer have concluded that our disclosure controls and procedures are not effective in providing reasonable assurance that information required to be disclosed by us in the reports we file under the Exchange Act were recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules, regulations and forms. In particular, we have identified the following material weakness in our disclosure controls:

We did not maintain sufficient personnel with an appropriate level of technical accounting knowledge, experience, and training in the application of generally accepted accounting principles commensurate with our complexity and (a) our financial accounting and reporting requirements. We have limited experience in the areas of financial reporting and disclosure controls and procedures. As a result, there is a lack of monitoring of the reporting process and there is a reasonable possibility will not be detected or made known to permit us to report on a timely basis.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system is intended to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements and that we have controls and procedures designed to ensure that the information required to be disclosed by us in our reports that we will be required to file under the Exchange Act is accumulated and communicated to our management, including our principal executive and our principal financial officers or persons performing similar functions, as appropriate to allow timely decisions regarding financial disclosure.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control-Integrated Framework". Based on this assessment, management has concluded that our internal control over financial reporting was not effective as of December 31, 2011 as a result of the material weaknesses described below.

Management's assessment identified several material weaknesses in our internal control over financial reporting. These material weaknesses include the following:

1. lack of appropriate segregation of duties,
2. lack of adequate documentation of our system of internal control,
3. limited capability to interpret and apply accounting principles generally accepted in the United States and
4. lack of formal accounting policies and procedures that include multiple levels of review.

To address these weaknesses, management established an Audit Committee effective April 2009 and in 2010 the Company implemented a new accounting software system designed to provide for more detailed and timely information processing and communication of financial data. In addition, management has implemented a detailed system of processing cash disbursements and cash receipts that involves a dual oversight function by two independent members of the accounting staff that should serve to deter and detect inappropriate entries and processes. And management continues to take all steps necessary to correct those identified material weaknesses in our internal controls. Unfortunately, financial constraints prevents us from implementing at this time all corrective processes that would provide reasonable assurance that the information required to be disclosed by us in our reports under the Exchange Act is accumulated and communicated to our management, including our principal executive and our principal financial officers or persons performing similar functions, as appropriate to allow timely decisions regarding financial disclosure. Until such time, our internal control over financial reporting may be subject to additional material weaknesses and deficiencies that we have not yet identified.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Changes in internal control over financial reporting

Except as indicated in the preceding paragraph about management's evaluation of disclosure controls and procedures, our management, with the participation of our chief executive officer and chief financial officer, has concluded there were no significant changes in our internal controls over financial reporting that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B: OTHER INFORMATION

PART III

ITEM 10: DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

Identification of Directors and Executive Officers

Edgar Filing: Digitiliti Inc - Form 10-K

The following table sets forth the names of all of our directors and executive officers as of the date of this report. These persons will serve until the next annual meeting of the stockholders or until their successors are elected or appointed and qualified, or their prior resignation or termination.

Edgar Filing: Digitiliti Inc - Form 10-K

Name	Positions Held	Date of Election or Designation
David S. Macey	President, CEO Director	12/11
William McDonald	CFO	04/08
David F. Dalvey	Director	7/11
Kent E. Lillemoe	Director	8/11
Jack Scheetz	Director	12/11

Background and Business Experience David S. Macey, President/CEO and Director. Mr. Macey is 45 years old. Effective December 1, 2011, Mr. Macey became the Company's President and Chief Executive Officer and was elected to the Company's Board of Directors. Mr. Macey served as Chief Executive Officer of SwiftKnowledge, Inc. since 2010. SwiftKnowledge is a global provider of web-based business intelligence (BI) software that offered the only cloud computing-based suite designed for the financial industry. From 2008 until the sale of McAfee, Inc. in 2010, Mr. Macey served as vice president and general manager of McAfee Inc.'s industry-leading, \$300 million Web and Email Security business unit, where he grew the business unit's revenue by 19 percent year-over-year and was responsible for its engineering, product management and product marketing functions. During 2008, Mr. Macey served as vice president and general manager of the \$100 million Secure Web Gateway division of Secure Computing, where he increased the division's revenue by 45 percent year-over-year, achieved top market share in the web security appliance segment for International Data Corp.'s 2008 ranking, and implemented new product development and quality assurance processes. Secure Computing was sold to McAfee in 2008. From 2003 to 2007, Mr. Macey served as vice president of enterprise content management sales at Oracle Corp. and executive vice president of international operations at Stellent, Inc. – which was acquired by Oracle in March 2007 – where he grew international sales by more than 100 percent during a 36-month period. Before joining Stellent, Mr. Macey was the chairman and chief technology officer for Millennium Communications Corp., a regional U.S. Internet services provider. Overall, Mr. Macey brings more than 17 years of industry experience to his role as President and CEO of the Company.

Background and Business experience David F. Dalvey, Director. Mr. Dalvey was elected as a director to the Board of Directors on July 1, 2011. Mr. Dalvey has over 30 years of corporate board experience, with over twelve of those years attributed to public, SEC regulated companies. Mr. Dalvey has significant experience as a board director/advisor to several publically-traded companies including Navarre Corporation (Nasdaq: NAVR), NatureVision (Nasdaq: NRVN), August Technology (Nasdaq: AUGT), and currently serves as an independent Director and Audit Committee member of The Blue Rock Market Neutral Fund LP, an SEC registered hedge fund. Mr. Dalvey also served as a director to several private businesses including Definity Health Inc., AppTec Laboratory Services Inc., chf Solutions Inc., Gentra Systems Inc. and Agiliti, Inc. Mr. Dalvey's director qualifications include his experience advising and building growth businesses and investment portfolios, his understanding of corporate finance, merger, acquisition and divestiture transactions, and his experience with and understanding of capital markets and the management of liquidity transactions for portfolio company investments. Mr. Dalvey has significant investment banking and equity investment experience with two venture capital firms, two national investment banks and two national commercial banking institutions working primarily with growth oriented technology businesses. Mr. Dalvey was nominated for election to our Board of Directors because of his extensive public company knowledge and experience, as well as his substantial knowledge of corporate finance, capital markets, investment bank and equity background and prior involvement with growth oriented technology businesses.

Background and Business Experience Kent E. Lillemoe, Director. Mr. Lillemoe was appointed to our board on August 24, 2011, by the unanimous vote of our board to fill a vacancy. Mr. Lillemoe has extensive senior level executive experience serving as Chief Financial Officer of MinuteClinic, Inc., a "retail healthcare" company integrating affordable healthcare solutions into consumer lifestyles from January 2006 through April 2009, serving as Chief Financial Officer and Corporate Secretary of Envoy Medical Corporation, a start-up medical technology company focused on developing a fully-implantable device for the hearing impaired from January 2003 through November 2005, and

serving as Founder, Director and Chief Operating Officer of Avanti Optics Corporation, a start-up technology company focused on developing high-speed processes and equipment for manufacturing optical components from June 2000 through January 2003. Mr. Lillemoe currently serves on numerous corporate boards of directors, including Exos Medical Corporation, Mobi, LLC and Fargo Electronics. Mr. Lillemoe also serves as an Advisor to the Board of Directors for Vast Enterprises and Finnigans, Inc. Mr. Lillemoe holds an Executive Masters of Business Administration from Stanford University and a Masters of Business Administration in Finance from the University of Minnesota. Mr. Lillemoe graduated from the University of South Dakota with a Bachelors of Science degree in accounting and has a Certificate of Public Accountant (inactive status). Mr. Lillemoe was nominated for election to our Board of Directors because of his extensive financial background and senior level executive experience.

Background and Business Experience Jack B. Scheetz, Director. Mr. Scheetz is 64 years of age. Effective June 2011, Mr. Scheetz was appointed as the interim President and Chief Executive Officer of the Company and as a member of the Board of Directors on June 29, 2011. Mr. Scheetz previously was the Principal and President of JS Consulting Group, a business transformation consulting company, from December 1994 through June 2011. From January 2004 until January 2007, he served as the Corporate Vice President of Information Technology and Human Resources for Pemstar, Inc. (Nasdaq: PMTR), a precision electronics contract manufacturing company. Pemstar was acquired by Benchmark Electronics (NYSE: BHE) in January 2007. From May 1978 to November 1994, he served as Engagement Manager with IBM Consulting Group, a part of International Business Machines Corporation (NYSE: IBM), a computer and intellectual property company, where he handled management and technical assignments in finance, pricing, business planning, product development, marketing and strategic planning. Mr. Scheetz received a Masters Degree in Business Administration from the University of Minnesota and a BA Degree in Accounting and Business Administration from the Winona State University.

William McDonald, CFO. Mr. McDonald is 48 years old. Mr. McDonald joined Digitiliti in July of 2007. He has over 25 years experience in the public accounting and finance arena. He worked in public accounting for 11 years before assuming the CFO position for Kath Fuel Oil Co. (with over \$225 million in annual sales). He holds a CPA certificate (currently inactive status), as well as a J.D. from William Mitchell College of Law. He is a licensed attorney in the State of Minnesota. Prior to joining Digitiliti, Mr. McDonald held executive level finance positions at North Star Bank for three years. He graduated from Augsburg College with a B.A. in Accounting and Finance.

Significant Employees

Rodd Johnson, Product Development. Mr. Johnson's experience includes architecting and implementing a world-wide identity intelligence system for AT&T, architecting a super-computer based filtration modeling application for Donalson Corporation and developing custom identity databases for a number of countries. Mr. Johnson has a wide-ranging career spanning the insurance, health care, multi-national technology production, manufacturing, government, security, credit card and factory automation arenas. He earned a double major in Computer Science and Business Administration from Mankato State University. Mr. Johnson is 45 years old.

Family Relationships

There are no family relationships between our directors and executive officers.

Directorships Held in Other Reporting Companies

Mr. Dalvey serves on the Board of Directors for Navarre Corporation and The Blue Rock Market Neutral Fund, LP an SEC registered hedge fund and several private businesses including Definity Health Inc., AppTec Laboratory Services Inc., chf Solutions Inc., Genra Systems Inc. and Agiliti, Inc.. Mr. Lillemoe serves on the Board of Directors including Exos Medical Corporation, Mobi, LLC, Fargo Electronics and Wireless Ronin.

Involvement in Certain Legal Proceedings

During the past 10 years, to our knowledge, none of our present or former directors, executive officers or persons nominated to become directors or executive officers has been the subject of any of the following:

- (1) A petition under the federal bankruptcy laws or any state insolvency law was filed by or against, or a receiver, fiscal agent or similar officer was appointed by a court for the business or property of such person, or any partnership in which he was a general partner at or within two (2) years before the time of such filing, or any corporation or business association of which he was an executive officer at or within two (2) years before the time of such filing;
- (2) Such person was convicted in a criminal proceeding or is a named subject of a pending criminal proceeding (excluding traffic violations and other minor offenses);

(3) Such person was the subject of any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining him or her from, or otherwise limiting, the following activities:

(i) Acting as a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, floor broker, leverage transaction merchant, any other person regulated by the Commodity Futures Trading Commission, or an associated person of any of the foregoing, or as an investment adviser, underwriter, broker or dealer in securities, or as an affiliated person, director or employee of any investment company, bank, savings and loan association or insurance company, or engaging in or continuing any conduct or practice in connection with such activity;

(ii) Engaging in any type of business practice; or

(iii) Engaging in any activity in connection with the purchase or sale of any security or commodity or in connection with any violation of Federal or State securities laws or Federal commodities laws;

(4) Such person was the subject of any order, judgment or decree, not subsequently reversed, suspended or vacated, of any Federal or State authority barring, suspending or otherwise limiting for more than sixty (60) days the right of such person to engage in any activity described in paragraph (i) above, or to be associated with persons engaged in any such activity;

(5) Such person was found by a court of competent jurisdiction in a civil action or by the SEC to have violated any

federal or state securities law, and the judgment in such civil action or finding by the SEC has not been subsequently reversed, suspended, or vacated;

(6) Such person was found by a court of competent jurisdiction in a civil action or by the Commodity Futures Trading Commission to have violated any Federal commodities law, and the judgment in such civil action or finding by the Commodity Futures Trading Commission has not been subsequently reversed, suspended or vacated;

(7) Such person was the subject of, or a party to, any federal or state judicial or administrative order, judgment, decree, or finding, not subsequently reversed, suspended or vacated, relating to an alleged violation of:

(i) Any federal or state securities or commodities law or regulation; or

(ii) Any law or regulation respecting financial institutions or insurance companies including, but not limited to, a temporary or permanent injunction, order of disgorgement or restitution, civil money penalty or temporary or permanent cease-and-desist order, or removal or prohibition order; or

(iii) Any law or regulation prohibiting mail or wire fraud or fraud in connection with any business entity; or

(8) Such person was the subject of, or a party to, any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization (as defined in Section 3(a)(26) of the Exchange Act (15 U.S.C. 78c(a)(26))), any registered entity (as defined in Section 1(a)(29) of the Commodity Exchange Act (7 U.S.C. 1(a)(29))), or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member.

Promoters and control person.

See the heading "Transactions with Related Persons" below of Part III, Item 13.

Compliance with Section 16(a) of the Exchange Act

Our shares of common stock are registered under the Exchange Act, and therefore the officers, directors and holders of more than 10% of our outstanding shares are subject to the provisions of Section 16(a), which requires them to file with the Securities and Exchange Commission initial reports of ownership and reports of changes in ownership of common stock and our other equity securities. Officers, directors and greater than 10% beneficial owners are required by Securities and Exchange Commission regulations to furnish us with copies of all Section 16(a) reports they file.

Based solely upon review of the copies of such forms furnished to us during the year ended December 31, 2010, a Form 4 pertaining to Benno G. Sand with a September 9, 2010 due date was inadvertently untimely filed on October 14, 2010.

Code of Ethics

We adopted a Code of Ethics for our principal executive and financial officers on or about April 14, 2009. Our Code of Ethics was filed as Exhibit 14 to our 10-K Annual Report for the year ended December 31, 2008, in Part IV, Item 15.

Corporate Governance

Our Board of Directors held eleven regularly scheduled meetings and two special meetings during 2011, and acted by unanimous written consent in lieu of a meeting seven times, as permitted by the applicable state law, during 2011. During 2011, all directors attended 75% or more of the meetings of the Board of Directors and committees to which they were assigned. During 2011, our Governance and Nominating Committee and Compensation Committee each held four meetings, while our Audit Committee held five meetings. The Governance and Nominating Committee, Compensation Committee and Audit Committee each have a written charter that has been approved by the board.

Corporate Governance and Nominating Committee

We have established a Corporate Governance and Nominating Committee and our Charter outlining our procedures is filed as an Exhibit to our 8-K Current Report dated December 16, 2008 and filed with the Securities and Exchange Commission on December 22, 2008. As of December 31, 2011, the members of the Nominating Committee were: David F. Dalvey, Chairman; Kent E. Lillemoe and Jack Scheetz.

The committee was established for the purpose of overseeing the identification, evaluation, and nomination of Board members for election. The committee also has the responsibility for evaluating the performance of the Board and Board committees. The committee oversees all matters of corporate governance. Currently, the committee submits nominations for election to fill vacancies on the Board to the entire Board of Director for its consideration. A copy of the Corporate Governance and Nomination Committee charter is available on our website at www.digitiliti.com.

Our goal is to assemble a Board of Directors that brings together a diverse variety of perspectives and skills derived from high

quality business and professional experience. In evaluating potential directors, the committee considers the following factors:

- the appropriate size of our Board of Directors;
- our needs with respect to the particular talents and experience of our directors;
- the knowledge, skills and experience of nominees, including experience in desirable vertical markets such as financial, legal, medical or education or public companies, in light of prevailing business conditions and the knowledge, skills and experience already possessed by other members of the Board of Directors;
- educational and practical experience;
- familiarity with the information technology industry; and
- the desire to balance the benefit of continuity with the periodic injection of a fresh perspective that can be provided by new Board members.

We will disclose any change to our procedures in our corporate governance and the recommending of nominees to our Board of Directors with an 8-K Current Report.

Audit Committee

We have also established an Audit Committee and our Charter outlining our procedures was an Exhibit to our 8-K Current Report dated December 16, 2008 and filed with the Securities and Exchange Commission on December 22, 2008. As of December 31, 2011, the members of the Audit Committee were: Kent E. Lillemoe, Chairman; and David F. Dalvey. Although not required to have an independent financial expert on our Audit Committee by reason of being a smaller reporting company, we believe that Mr. Lillemoe and Mr. Dalvey both qualify as “audit committee financial experts,” based upon their prior experience and education, which is outlined in their respected resumes in this Part III, Item 10, above. We believe that David F. Dalvey is not "independent" as defined in the Company's Audit Committee Charter, which is outlined in an Exhibit to our 8-K Current Report dated December 16, 2008 and filed with the Securities and Exchange Commission on December 22, 2008.

We will disclose any change to our procedures in recommending nominees to our Audit Committee with an 8-K Current Report.

Compensation Committee

We also established a Compensation Committee and our Charter outlining our procedures was an Exhibit to our 8-K Current Report dated December 16, 2008 and filed with the Securities and Exchange Commission on December 22, 2008. As of December 31, 2011, the members of the Compensation Committee were: Jack Scheetz, Chairman, Kent E. Lillemoe and David F. Dalvey.

We will disclose any change to our procedures in recommending nominees to our Compensation Committee with an 8-K Current Report.

ITEM 11: EXECUTIVE COMPENSATION

All Compensation

The following table sets forth the aggregate compensation paid by us for services rendered during the periods and in the capacities indicated:

Summary Compensation Table

Edgar Filing: Digitiliti Inc - Form 10-K

Name and Principal Position	Year or Period	Salary (\$)	Stock Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Nonqualified Deferred Compensation (\$)	All Other Compensation (\$)	Total Earnings (\$)
(a)	(b)	(c)	(d)(e)(f)	(g)	(h)	(i)	(j)

Jack Scheetz	\$849(8)						\$849

- During 2011, Mr. Bauer earned \$2,433 for his services as a member of the Company's Board of Directors. On October 14, 2010, citing Mr. Bauer's exceptional service to the Company under extremely difficult circumstances,
- (1) Mr. Bauer was granted 500,000 warrants to purchase the Company's common stock at \$.22 per share (valued at \$109,998) and 250,000 warrants to purchase the Company's common stock at \$0.35 per share (valued at \$55,000).
- (2) During 2011, Mr. Belhe earned \$9,151 for his services as a member of the Company's Board of Directors. On October
-

14, 2010, Mr. Belhe was granted a five-year option to purchase 5,000 shares of our common stock, exercisable at \$0.22 per share (valued at \$1,097), and vests over a period of twelve months based on his continued service as a director. On November 12, 2010, Mr. Belhe was issued 52,632 shares of common stock in lieu of cash compensation for services render during 2010 as a non-employee director for the Company.

(3) During 2011, Mrs. Larson earned \$5,003 for her services as a member of the Company's Board of Directors. On October 14, 2010, Ms. Gilles Larson was granted a five-year option to purchase 5,000 shares of our common stock, exercisable at \$0.22 per share (valued at \$1,097), and vests over a period of twelve months based on his continued service as a director. These options were forfeited on July 1, 2011, the date of Ms. Gilles Larson's resignation. On November 12, 2010, Ms. Larson was issued 52,632 shares of common stock in lieu of cash compensation for services render during 2010 as a non-employee director for the Company.

(4) During 2011, Mr. Rickenbach earned \$5,079 for his services as a member of the Company's Board of Directors. On October 14, 2010, Mr. Rick Rickenbach was granted a five-year option to purchase 5,000 shares of our common stock, exercisable at \$0.22 per share (valued at \$1,097), and vests over a period of twelve months based on his continued service as a director. These options were forfeited on July 22, 2011, the date of Mr. Rickenbach's resignation. On November 12, 2010, Mr. Rickenbach was issued 52,632 shares of common stock in lieu of cash compensation for services render during 2010 as a non-employee director for the Company.

(5) During 2011, Mr. Sand earned \$6,668 for his services as a member of the Company's Board of Directors. On October 14, 2010, Mr. Sand was granted a five-year option to purchase 5,000 shares of our common stock, exercisable at \$0.22 per share (valued at \$1,097), and vests over a period of twelve months based on his continued service as a director. These options were forfeited on August 24, 2011, the date of Mr. Sand's resignation. On November 12, 2010, Mr. Sand was issued 52,632 shares of common stock in lieu of cash compensation for services render during 2010 as a non-employee director for the Company.

(6) During 2011, Mr. Dalvey earned \$5,041 for his services as a member of the Company's Board of Directors. On June 29, 2011, Mr. Dalvey was granted a five-year option to purchase 225,000 shares of our common stock, exercisable at \$0.09 per share (valued at \$19,116), and vests over a period of three years based on his continued service as a director.

(7) During 2011, Mr. Lillemoe earned \$3,556 for his services as a member of the Company's Board of Directors. On August 24, 2011, Mr. Lillemoe was granted a five-year option to purchase 225,000 shares of our common stock, exercisable at \$0.08 per share (valued at \$17,997), and vests over a period of three years based on his continued service as a director.

(8) During 2011, Mr. Lillemoe earned \$849 for his services as a member of the Company's Board of Directors.

ITEM 12: SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Security Ownership of Certain Beneficial Owners

To the knowledge of management, no person owns more than five percent (5%) of our common stock as of the date of this Annual Report, respectively based upon 70,196,678 shares being outstanding as of December 31, 2011.

Security Ownership of Management

The following table sets forth the share holdings of management based upon 4,870,077 shares being outstanding as of April 13, 2012:

Ownership of Officers and Directors

Title of Class	Name of Beneficial Owner	Amount and Nature of Beneficial Owner	Percent of Class (1)
Common Stock			
Common Stock	Roy A. Bauer **	2,032,760(2)	*
Common Stock	Karen Gilles Larson **	52,632(3)	*
Common Stock	Kedar R. Belhe**	1,465,978(4)	*
Series A Convertible Preferred Stock	Kedar R. Belhe**	28,367(4)	*
Common Stock	Benno G. Sand **	52,632(5)	*
Common Stock	Rick M. Rickenbach **	52,632(6)	*
Common Stock	William McDonald	470,976(8)	*
Common Stock	David F. Dalvey	0(9)	*
Common Stock	Kent O. Lillemoe	0(10)	*
All Directors and Officers as a group		4,870,077	7.16%

* Less than 1%

** Former Director or Officer

(1) Excludes shares of our common stock underlying outstanding convertible securities, but includes all shares that can be acquired by any of the foregoing within 60 days; assumes that all Storage stockholders have exchanged their respective shares under the Storage Merger and that there are currently 70,683,241 outstanding shares of our common stock, plus the 10,825,000 shares underlying the management stock option grants in their ownership and in the total number of outstanding shares for these computations. That outstanding figure is the sum of 67,942,250 and the respective vested portions of each member of management's vested options in the above referenced computations. For information about shares of our common stock underlying outstanding convertible securities, see our consolidated financial statements and related notes that are filed as a part of Annual Report, in Part II, Item 8, and the table under the heading "Director Compensation," in this Item above. This computation includes the shares underlying these grants and those to William McDonald, our CFO, in the amount of 421,272 shares.

(2) These computations include the 750,000 warrants reflecting a five-year life and 741,100 of common stock issued for services rendered by Mr. Bauer up through September 30, 2010. In addition, Mr. Bauer has purchased 541,660 shares of the Company's common stock.

(3) These computations include 52,632 shares of common stock issued to Mrs. Larson in lieu of cash compensation for services rendered during 2010 as a non-employee director of the company.

(4) This total reflects 325,000 five-year warrants to purchase the Company's common stock, as well as 1,088,346 shares of common stock owned by Mr. Belhe. In addition, this computation include 52,632 shares of common stock issued to Mr. Belhe in lieu of cash compensation for services rendered during 2010 as a non-employee director of the company.

And, Mr. Belhe owns 28,367 shares of the Company's Series A Convertible Preferred Stock received upon the conversion of a \$50,000 secured convertible note in June 2010.

(5) These computations include 52,632 shares of common stock issued to Mr. Sand in lieu of cash compensation for services rendered during 2010 as a non-employee director of the company.

(6) These computations include 52,632 shares of common stock issued to Mr. Rickenbach in lieu of cash compensation for services rendered during 2010 as a non-employee director of the company.

(7) These computations include the vested portion of 406,581 shares underlying the 10,825,000 \$0.385 five year employee stock options granted to members of management, in Mr. McDonald's holdings and in the outstanding shares utilized for computation of his holdings. In addition, this total reflects 64,395 shares of common stock issued to repay \$12,879 owed by the Company to Mr. McDonald.

This computation reflects the unvested portion of 225,000 shares underlying the 2,126,242 \$0.09 five year (8) employee stock options granted to members of management, in Mr. Dalvey's holdings and in outstanding shares utilized for computation of his holdings.

(9) This computations reflects the unvested portion of 225,000 shares underlying the 2,126,242\$0.09 five year employee stock options granted to members of management, in Mr. Lillemoe's holdings and in outstanding shares utilized for computation of his holdings.

Changes in Control

There are no present arrangements or pledges of our securities which may result in a change in control of our Company.

Securities Authorized for Issuance under Equity Compensation Plans

ITEM 13: CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions with Related Persons

There were no material transactions or series of similar transactions during the years ended December 31, 2011, or any currently proposed transactions, or series of similar transactions, to which we or any of our subsidiaries was or is to be a party, in which the amount involved exceeded the lesser of \$120,000 or one percent of the average of our total assets at year-end for the last completed fiscal years and in which any director, executive officer or any security holder who is known to us to own of record or beneficially more than five percent of any class of our common stock, or any member of the immediate family of any of the foregoing persons, had an interest, except:

Management and Founders Share Issuances

The following shares have been issued to our management and founders:

Name	No. of Shares	Consideration
Roy A. Bauer	741,100	\$148,220

Management and Founders Agreements

Jonathan S. Miner and Pamela J. Miner

In January 2006, we issued a \$50,000 On Demand Promissory Note to Pamela J. Miner. The note had an 10% per annum interest rate and a maturity date that was callable on demand by Mrs. Miner. This promissory note accrued interest until it was paid by us on February 28, 2011.

We issued a \$250,000 On Demand Promissory Note to a Jonathon S. Miner dated December 15, 2005. The note mirrors a promissory note between the Mr. Miner and his bank, which matured on December 15, 2009 and had an interest rate 0.5% above the bank's index rate (6.00% at December 31, 2009 and 2008). In December 2010, the note was renewed to January 31, 2011. The balance of the note was \$231,540 and \$231,540 at December 31, 2010 and 2009. Interest expense was \$2,333 and \$13,357 for 2011 and 2010, respectively.

Effective December 5, 2008, our Board of Directors approved the issuance of a convertible note to Board members, Jonathan S. Miner and Pamela J. Miner (the "Miners"), for their advance to us of the sum of \$175,000 and their agreement to advance up to an additional \$75,000 (which additional sum had been advanced to us), all to be utilized in the development of our DigiLIBE software storage product. We also executed a Security Agreement with them whereby we granted to them as collateral and security a lien for the payment of the convertible note and additional indebtedness of theirs or indebtedness they had guaranteed in the past on our behalf in the further aggregate amount of \$500,000, for a total secured amount of \$750,000. See Note 6 of our consolidated financial statements in Part II, Item 8.

On February 28, 2011, we completed the placement of \$1,182,844 Secured Convertible Promissory Note and Warrants (the "Secured Convertible Debt Offering"). All of the securities issued in conjunction with the Secured Convertible Debt Offering were made to "accredited investors" as those terms are defined on Rule 501 of Regulation D of the Securities and Exchange Commission, and each such person had prior access to all material information about the Company. The offer and a sale of these securities were exempt from the registration requirements of the Securities Act of 1933, as amended (the "Securities Act"), pursuant to, among other reasons, Section 4(2) and 4(6) thereof, and Rule 506 of Regulation D of the Securities and Exchange Commission. Registration of sales to "accredited investors" are preempted from state regulation.

The Secured Convertible Debt Offering was conducted in order to implement a previously approved repayment of debt obligations owed to the Miners, as well as provide additional working capital for the Company. The debt obligations owed to the Miners by the Company (the "Miner Debt") was secured by a first lien on the Company's assets and consisted of the following: a \$250,000 12% secured convertible note (\$.20 per share conversion rate). This convertible note contained a maturity date of October 16, 2009 and had been classified as past due in all public filings; a \$50,000 10% On-Demand

Promissory Note that had been classified in the current maturity portion of related party debt in all public filings; and a \$231,540 6% On-Demand Promissory Note that had been classified in the current maturity portion of related party debt in all public filings. Contemporaneously with the closing of the Secured Convertible Debt Offering, the Company and the Miners executed a Repayment of Note Obligations and Release of Security Interest Agreement that provided for the repayment of \$431,540 of principal of the Miner Debt with the remaining principal balance owed of \$100,000 being rolled into a secured promissory note under the Secured Convertible Debt Offering. Correspondingly, all outstanding accrued interest owed on the Miner Debt was paid to the Miners in the form of the Company's common stock based on a rate of \$.15 per share, along with a modification in terms on 350,000 common stock purchase warrants previously issued to the Miners and the issuance of an additional 200,000 warrants reflecting a five year term and a \$.30 per share exercise price. After completion of all documentation reflecting the repayment of the Miner Debt, the Miners released their first lien in the Company's assets in preference to those Lenders associated with the Secured Convertible Debt Offering.

Other Management and Founder Transactions

None.

Promoters and Certain Control Persons

See the heading "Transactions with Related Persons" above.

Parents of the Smaller Reporting Company

We have no parents.

Director Independence

Though we are not required to have any independent directors as a smaller reporting company not listed on any exchange, using the following definition of NASDAQ, which is summarized below and which is adopted in our Audit Committee Charter that was an Exhibit to our 8-K Current Report dated December 16, 2008 and filed with the Securities and Exchange Commission on December 22, 2008, all of our directors may be deemed to be independent, except Jack Scheetz and David F. Dalvey (see references below):

"Independent director" means a person other than an officer or employee of the company or its subsidiaries or any other individual having a relationship, which, in the opinion of the company's Board of Directors, would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. The following persons shall not be considered independent

(A) a director who is, or during the past three years was, employed by the company or by any parent or subsidiary of the company (or any of its affiliates) for the current year or any of the past three years (applies to none);

(B) a director who accepts or who has a family member who accepts any compensation payments from the company or any of its affiliates in excess of \$60,000 during the current fiscal year or any of the past three fiscal years, other than compensation for board service, payments arising solely from investments in the company's securities, compensation paid to a family member who is an employee of the company or a parent or subsidiary of the company (but not if such person is an executive officer of the company or any parent or subsidiary of the company), benefits under a tax-qualified retirement plan, or non-discretionary compensation (provided, however, that audit committee members are subject to heightened requirements under Rule 4350(d)) of NASDAQ (may apply to Kedar R. Behle);

(C) a director who is a member of the immediate family member of an individual who is, or has been in any of or during the past three years was employed by the company or by any of its affiliates as an executive officer (applies to none);

(D) a director who is a partner in, or a controlling shareholder or an executive officer of, any for-profit business organization to which the company made, or from which the company received, payments (other than those arising solely from investments in the company's securities) that exceed 5% of the recipient's consolidated gross revenues for that year, or \$200,000, whichever is more, in the current fiscal year or any of the past three fiscal years (applies to none);

(E) a director of the company who is employed as an executive officer of another entity where any of the company's] executive[s] officer[s] of the company serve on that entity's compensation committee of such other entity, or if such relationship existed during the past three years (applies to none); or

(F) a director who is or was a partner or employee of the company's outside auditor, and worked on the company's audit, during the past three years (applies to none).

ITEM 14: PRINCIPAL ACCOUNTING FEES AND SERVICES

The following is a summary of the fees billed to us by our principal accountants during the fiscal years ended December 31, 2011, and 2010:

Fee Category	2011	2010
Audit Fees	\$ 135,800	\$ 136,500
Audit-related Fees	\$ —	\$ —
Tax Fees	\$ —	\$ 2,375
All Other Fees	\$ —	\$ —
Total Fees	\$ 135,800	\$ 138,875

Audit Fees - Consists of fees for professional services rendered by our principal accountants for the audit of our annual financial statements and review of the financial statements included in our Forms 10-Q or services that are normally provided by our principal accountants in connection with statutory and regulatory filings or engagements.

Audit-related Fees - Consists of fees for assurance and related services by our principal accountants that are reasonably related to the performance of the audit or review of our financial statements and are not reported under "Audit fees."

Tax Fees - Consists of fees for professional services rendered by our principal accountants for tax compliance, tax advice and tax planning.

All Other Fees - Consists of fees for products and services provided by our principal accountants, other than the services reported under "Audit fees," "Audit-related fees," and "Tax fees" above.

Policy on Audit Committee Pre-Approval of Audit and Permissible Non-Audit Services of Independent Auditors

We have adopted an Audit Committee Charter. We do require approval in advance of the performance of professional services to be provided to us by our principal accountant. Additionally, all services rendered by our principal accountant are performed pursuant to a written engagement letter between us and the principal accountant. See our 8-K Current Report dated December 16, 2008 for more information regarding our Audit Committee and Charter.
